the storage, preparation, and launching of fireworks. COTP Key West or a designated representative may reduce the 500-yard zone based on prevailing conditions and enforcement needs.

(1) The Coast Guard realizes that some large scale events, such as those with many participants or spectators, or those that could severely restrict navigation pose a significant hazard, may still require separate special local regulations or safety zones that address the specific peculiarities of the event. In those situations, the Coast Guard will create special local regulations or safety zones specifically for the event, and those regulations will supersede the proposed regulations in this rule.

(2) All firework platforms, structures, or barges will display a sign on both the port and starboard sides labeled, “FIREWORKS—STAY AWAY.” This sign will consist of 10-inch high by 1.5-inch wide red lettering on a white background. Shore fireworks sites that affect navigable waterways will also display signs with the aforementioned specifications.

(b) Definition. Designated representative means Coast Guard Patrol Commanders, including Coast Guard coxswains, petty officers, and other officers operating Coast Guard vessels, and Federal, state, and local officers designated by or assisting the COTP Key West in the enforcement of the regulated area.

(c) Regulations.

(1) In accordance with § 165.23, entering, transiting through, anchoring in, or remaining within the safety zone during periods of enforcement is prohibited unless authorized by the COTP Key West or a designated representative.

(2) During periods of enforcement, upon being hailed by a Coast Guard vessel by siren, radio, flashing light or other means, the operator must proceed as directed.

(3) Vessel operators desiring to enter, transit through, anchor in, or remain or operate within the regulated area during the enforcement period shall contact the COTP Key West or the designated on-scene representative via VHF channel 16 or call the Sector Key West Command Center at (305) 292–8727 to obtain permission.

(d) Notice of enforcement or suspension of enforcement. The safety zone established by this section will be enforced only upon notice of the Captain of the Port. The Captain of the Port will cause notice of enforcement of the safety zone established by this section and all appropriate means to the affected segments of the public including publication in the Federal Register as practicable, in accordance with 33 CFR 165.7(a). Such means of notification may also include, but are not limited to Broadcast Notice to Mariners or Local Notice to Mariners.

J.A. Janszen,
Captain, U.S. Coast Guard, Captain of the Port Key West.

[FRL–9961–11–OAR]

Review of the Clean Power Plan

AGENCY: Environmental Protection Agency (EPA).

ACTION: Announcement of review.

SUMMARY: The U.S. Environmental Protection Agency (EPA) announces that it is reviewing and, if appropriate will initiate proceedings to suspend, revise or rescind the Clean Power Plan.

FOR FURTHER INFORMATION CONTACT: Mr. Peter Tsirigotis, Sector Policies and Research Triangle Park, NC 27711; telephone number: (888) 627–7764; email address: airaction@epa.gov.

SUPPLEMENTARY INFORMATION: By this notice, EPA announces it is reviewing the Clean Power Plan, 80 FR 64662 (October 23, 2015) (CPP), including the accompanying Legal Memorandum, and, if appropriate, will as soon as practicable and consistent with law, initiate proceedings to suspend, revise or rescind this rule. The CPP established emission guidelines for state plans to limit carbon dioxide emissions from existing fossil fuel-fired power plants.

I. Background

The CPP was promulgated under Section 111 of the Clean Air Act. 42 U.S.C. 7411. Section 111 of the Clean Air Act authorizes the EPA to issue nationally applicable New Source Performance Standards (NSPS) limiting air pollution from “new sources” in source categories that cause or contribute to air pollution that may reasonably be anticipated to endanger public health or welfare. 42 U.S.C. Section 7411(b)(1). Under this authority, the EPA had long regulated new fossil fuel-fired power plants to limit air pollution other than carbon dioxide, including particulate matter (PM); nitrogen oxides (NOx) and sulfur dioxide (SO2). See 40 CFR part 60 subparts D, Da. In 2015, the EPA issued a rule that for the first time set carbon dioxide emission limits for new fossil fuel-fired power plants. Standards of Performance for Greenhouse Gas Emissions From New, Modified, and Reconstructed Stationary Sources: Electric Generating Units, 80 FR 64510 (October 23, 2015). Under certain circumstances, when the EPA issues standards for new sources under Section 111(b), the EPA has the authority under Section 111(d), to prescribe regulations under which each State is to submit a plan to establish standards for existing sources in the same category. The EPA relied on that authority to issue the CPP, which, for the first time, required States to submit plans specifically designed to limit carbon dioxide emissions from existing fossil fuel-fired power plants.

As part of the promulgation of the CPP, EPA prepared a legal memorandum that supplemented the legal analysis provided by the Agency in the preamble to the final CPP.

Due to concerns about EPA’s legal authority and record, 27 States and a number of other parties sought judicial review of the CPP in the D.C. Circuit.

State of West Virginia v. EPA, No. 15–1363 (and consolidated cases) (D.C. Cir.). On February 9, 2016, the Supreme Court stayed implementation of the CPP pending judicial review. Following full merits briefing, oral argument was held before the D.C. Circuit, sitting en banc, on September 27, 2016. That case is currently pending in the D.C. Circuit.

II. Initiation of Review of CPP

On March 28, 2017, President Trump issued an Executive Order establishing a national policy in favor of energy independence, economic growth, and the rule of law. The purpose of that Executive Order is to facilitate the development of U.S. energy resources—including oil and gas—and to reduce unnecessary regulatory burdens associated with the development of those resources. The President has directed agencies to review existing regulations that potentially burden the development of domestic energy resources, and appropriately suspend, revise, or rescind regulations that unduly burden the development of U.S. energy resources beyond what is necessary to protect the public interest or otherwise comply with the law.

The Executive Order also directs agencies to take appropriate actions, to the extent permitted by law, to promote clean air and clean water while protecting the proper roles of Congress and the States. This Executive Order specifically

Review of the Standards of Performance for Greenhouse Gas Emissions From New, Modified, and Reconstructed Stationary Sources: Electric Generating Units

AGENCY: Environmental Protection Agency (EPA).

ACTION: Announcement of review.

SUMMARY: The U.S. Environmental Protection Agency (EPA) announces that it is reviewing and, if appropriate, will initiate proceedings to suspend, revise or rescind the Standards of Performance for Greenhouse Gas Emissions From New, Modified, and Reconstructed Stationary Sources: Electric Generating Units.

FOR FURTHER INFORMATION CONTACT: Mr. Peter Tsirigotis, Sector Policies and Programs Division (D205–01), U.S. Environmental Protection Agency, Research Triangle Park, NC 27711; telephone number: (888) 627–7764; email address: airaction@epa.gov.

SUPPLEMENTARY INFORMATION: By this notice, EPA announces it is reviewing the Standards of Performance for Greenhouse Gas Emissions From New, Modified, and Reconstructed Stationary Sources: Electric Generating Units (New Source Rule), 80 FR 64510 (October 23, 2015) and, if appropriate, will as soon as practicable and consistent with law, initiate reconsideration proceedings to suspend, revise or rescind this rule. The New Source Rule established national emission standards to limit carbon dioxide emissions from new fossil fuel-fired power plants.

I. Background

The New Source Rule was promulgated under the authority of Section 111 of the Clean Air Act, 42 U.S.C. 7411. That Section authorizes EPA to issue nationally applicable New Source Performance Standards (NSPS) limiting air pollution from “new sources” in source categories that cause or contribute to air pollution that may reasonably be anticipated to endanger public health or welfare. 42 U.S.C. Section 7411(b)(1). Under this authority, EPA had long regulated new fossil fuel-fired power plants to limit air pollution other than carbon dioxide, including particulate matter (PM); nitrogen oxides (NOx) and sulfur dioxide (SO2).
