11. *Title:* Rail Carrier and Tank Car Tanks Requirements, Rail Tank Car Tanks—Transportation of Hazardous Materials by Rail.

OMB Control Number: 2137–0559

Summary: This information collection consolidates and describes the information provisions in parts 172, 173, 174, 179, and 180 of the HMR on the transportation of hazardous materials by rail and the manufacture, qualification, maintenance, and use of tank cars. The types of information collected include:

(1) *Approvals of the Association of American Railroads (AAR) Tank Car Committee:* An approval is required from the AAR Tank Car Committee for a tank car to be used for a commodity other than those specified in part 173 and on the certificate of construction. This information is used to ascertain whether a commodity is suitable for transportation in a tank car. AAR approval is also required for an application for approval of designs, materials and construction, conversion or alteration of tank car tanks constructed to a specification in part 179, or an application for construction of tank cars to any new specification. This information is used to ensure that the design, construction, or modification of a tank car or the construction of a tank car to a new specification is performed in accordance with the applicable requirements.

(2) *Progress Reports:* Each owner of a tank car that is required to be modified to meet certain requirements specified in § 173.31 must submit a progress report to the Federal Railroad Administration (FRA). FRA uses this information to ensure that all affected tank cars are modified before the regulatory compliance date.

(3) *FRA Approvals:* An approval is required from FRA to transport a bulk packaging (such as a portable tank, IM portable tank, intermediate bulk container, cargo tank, or multi-unit tank car tank) containing a hazardous material in container-on-flat-car or trailer-on-flat-car service other than as authorized by § 174.63. FRA uses this information to ensure that the bulk package is properly secured using an adequate restraint system during transportation. An FRA approval is also required for the movement of any tank car that does not conform to the applicable requirements in the HMR. These latter movements are currently being reported under the information collection for special permit applications.

(4) *Manufacturer Reports and Certificate of Construction:* These documents are prepared by tank car manufacturers and used by owners, users, and FRA personnel to verify that rail tank cars conform to the applicable specification.

(5) *Quality Assurance Program:* Facilities that build, repair, and ensure the structural integrity of tank cars are required to develop and implement a quality assurance program. This information is used by the facility and DOT compliance personnel to ensure that each tank car is constructed or repaired in accordance with the applicable requirements.

(6) *Inspection Reports:* A written report must be prepared and retained for each tank car that is inspected and tested in accordance with § 180.509 of the HMR. Rail carriers, users, and FRA use this information to ensure that rail tank cars are properly maintained and in safe condition for transporting hazardous materials.

Affected Public: Manufacturers, owners, and rail carriers of tank.
