

The humpback whale and the killer whale (southern resident distinct population segment (DPS)) are the only marine mammal species listed under the ESA that could occur in the vicinity of WSDOT's proposed construction project. Two DPSs of the humpback whale stock, the Mexico DPS and the Central America DPS, are listed as threatened and endangered under the ESA, respectively. NMFS' Office of Protected Resources has initiated consultation with NMFS' West Coast Regional Office under section 7 of the ESA on the issuance of an IHA to WSDOT under section 101(a)(5)(D) of the MMPA for this activity.

In July 2017, NMFS finished conducting its section 7 consultation and issued a Biological Opinion concluding that the issuance of the IHA associated with WSDOT's Mukilteo Multimodal Project is not likely to jeopardize the continued existence of the endangered humpback and the Southern Resident killer whales.

Authorization

As a result of these determinations, NMFS has issued an IHA to the Washington State Department of Transportation for the Mukilteo Multimodal Construction Project in Washington State, provided the previously described mitigation, monitoring, and reporting requirements are incorporated.

B. Background

On July 19, 2017, EPA published a public notice and request for comment in the **Federal Register**, entitled “Proposal to Withdraw Proposed Determination to Restrict the Use of an Area as a Disposal Site; Pebble Deposit Area, Southwest Alaska” (82 FR 33123). The EPA Administrator and Region 10 Acting Regional Administrator are requesting public comment on this proposal to withdraw the EPA Region 10 July 2014 Proposed Determination that was issued pursuant to Section 404(c) of the Clean Water Act, to restrict the use of certain waters in the South Fork Koktuli River, North Fork Koktuli River, and Upper Talarik Creek watersheds in southwest Alaska as disposal sites for dredged or fill material associated with mining the Pebble deposit, a copper-, gold-, and molybdenum-bearing ore body. The EPA agreed to initiate this proposed withdrawal process pursuant to policy direction from EPA's Administrator and as part of a May 11, 2017 settlement agreement with the Pebble Limited Partnership (PLP), whose subsidiaries own the mineral claims to the Pebble deposit. The Agency is accepting public comment through the aforementioned notice to afford the public an opportunity to comment on:

- Whether to withdraw the July 2014 Proposed Determination at this time for the reasons stated in the aforementioned notice; and
- if a final withdrawal decision is made following this comment period,

whether the Administrator should review and reconsider the withdrawal decision.

Abstract: EPA promulgated Federal Implementation Plans (FIPs) under the Clean Air Act for Indian reservations located in Idaho, Oregon, and Washington in 40 CFR part 49 (70 FR 18074, April 8, 2005). The FIPs in the final rule, also referred to as the Federal Air Rules for Indian Reservations in Idaho, Oregon, and Washington (FARR), include information collection requirements associated with the partial delegation of administrative authority to a Tribe in § 49.122; the rule for limiting visible emissions at § 49.124; fugitive particulate matter rule in § 49.126, the wood waste burner rule in § 49.127; the rule for limiting sulfur in fuels in § 49.130; the rule for open burning in § 49.131; the rules for general open burning permits, agricultural burning permits, and forestry and silvicultural burning permits in §§ 49.132, 49.133, and 49.134; the rule for emissions detrimental to human health and welfare in § 49.135; the registration rule in § 49.138; and the rule for non-Title V operating permits in § 49.139. EPA uses this information to manage the activities and sources of air pollution on the Indian reservations in Idaho, Oregon, and Washington. EPA believes these information collection requirements are appropriate because they will enable EPA to develop and maintain accurate records of air pollution sources and their emissions, track emissions trends and changes, identify potential air quality problems, allow EPA to issue permits or approvals, and ensure appropriate records are available to verify compliance with these FIPs.
