SUPPLEMENTARY INFORMATION:

A. Purpose

This information collection requirement, OMB Control No. 3090-0293, currently titled "Reporting and Use of Information Concerning Integrity and Performance of Recipients of Grants and Cooperative Agreements" is necessary in order to comply with section 872 of the Duncan Hunter National Defense Authorization Act of 2009, Public Law 110-417, as amended by Public Law 111-212, hereafter referred to as "the Act." The Duncan Hunter National Defense Authorization Act of 2009 (Pub. L. 110-417) was enacted on October 14, 2008. Section 872 of this Act required the development and maintenance of an information system that contains

specific information on the integrity and performance of covered Federal agency contractors and grantees.

The Federal Awardee Performance and Integrity Information System (FAPIIS) was developed to address these requirements. FAPIIS provides users access to integrity and performance information from the FAPIIS reporting module in the Contractor Performance Assessment Reporting System (CPARS), proceedings information from the Entity Management section of the System for Award Management (SAM) database, and suspension/debarment information from the Performance Information section of SAM.

As stated in 2 CFR 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards, the Federal awarding agency is required to review information available through any OMB-designated repositories of government-wide eligibility qualification or financial integrity information, as appropriate.

The Federal awarding agency is required to review the non-public segment of the OMB-designated integrity and performance system accessible through SAM (currently the FAPIIS), prior to making a Federal award where the Federal share is expected to exceed the simplified acquisition threshold (currently \$150,000), defined in 41 U.S.C. 134, over the period of performance.

For non-federal entities (NFEs), if the total value of the NFEs currently active grants, cooperative agreements, and procurement contracts from all Federal awarding agencies exceeds \$10,000,000 for any period of time during the period of performance of the Federal award, then the NFE must disclose semiannually, and maintain the currency of information reported to the SAM that is made available in the designated integrity and performance system (currently the FAPIIS) about civil, criminal, or administrative proceedings, as described in the award terms and conditions, for the most recent five year period.

FOR FURTHER INFORMATION CONTACT: Mr. Charles Gray, Procurement Analyst, Office of Governmentwide Acquisition Policy, at telephone 703–795–6328, or email charles.gray@gsa.gov.

SUPPLEMENTARY INFORMATION:

A. Purpose

Federal Acquisition Regulation clause 52.223–2, Affirmative Procurement of Biobased Products Under Service and Construction Contracts, requires prime contractors to report annually the product types and dollar values of U.S. Department of Agriculture (USDA)-designated biobased products purchased to the System for Award Management (SAM) Web site. The information reported by prime contractors enables Federal agencies to report annually to the Office of Federal Procurement Policy (OFPP) concerning actions taken to implement and measure progress in carrying out the preference for biobased products required under section 9002 of the Farm Security and Rural Investment Act of 2002, codified at 7 U.S.C. 8102.

B. Annual Reporting Burden

To determine the number of contractors performing construction and service contracts that may involve the purchase of USDA-designated biobased products, fiscal year 2016 data in the Federal Procurement Data System (FPDS) was reviewed to calculate the number of entities with unique DUNS numbers that were awarded contracts for the following selected Product Services Codes: A—Research and Development; F—Natural Resources Management; J—Maintenance, Repair, and Rebuilding of Equipment; M—Operation of Government-Owned Facility; S—Utilities and Housekeeping Services; T—Photographic, Mapping, Printing, and Publication Services; Y—Construction of Structures and Facilities; and Z—Maintenance, Repair or Alteration of Real Property. The clause at FAR 52.223–2 will apply to the majority of the contract actions in the selected PSCs.

The estimated total burden is as follows:

Respondents: 51,457.

Responses per Respondent: 5.

Total Annual Responses: 257,285.

Hours per Response: 5.

Total Burden Hours: 1,286,425.

Affected Public: Businesses or other for-profit and not-for-profit institutions.

Frequency: Annually.

C. Public Comments

Public comments are particularly invited on: Whether this collection of information is necessary for the proper performance of functions of the FAR, and whether it will have practical utility; whether our estimate of the public burden of this collection of information is accurate, and based on valid assumptions and methodology; ways to enhance the quality, utility, and

clarity of the information to be collected; and ways in which we can minimize the burden of the collection of information on those who are to respond, through the use of appropriate technological collection techniques or other forms of information technology.
