k. **Description of Filing:** Idaho Power Company (IPC) requests amendment of
the Commission’s July 1, 2010 Order that authorized IPC to upgrade the
Shoshone Falls Hydroelectric Project’s installed capacity. Specifically, IPC no
longer wants to build a new powerhouse with a single 50 megawatt (MW) unit.
Instead, IPC proposes to remove the project’s two existing turbines and
install a single 3.2 MW unit in the project’s existing powerhouse. The
project’s total installed capacity would then be 3.2 MW. IPC also proposes to
delete Article 402 to remove the supplemental aesthetic flow release
requirement and proposes to delete Article 420 which requires a Visitor Use
Survey and Monitoring Plan. Both of these requirements were added to the
license in response to the 50 MW upgrade. Finally, IPC proposes to
accelerate its license expiration date so the license expires on July 31, 2040
instead of its current expiration date of July 31, 2044. This proposal would
coordinate the license expiration date of the Shoshone Falls Project with the
Twin Falls Project (FERC Project No. 18), which is located one mile upstream
on the Snake River and has a license expiration date of December 31, 2040.
IPC says coordination would allow the licensee, resource agencies, and the
Commission to more effectively relicense the two projects and would allow
the Commission to better assess cumulative effects.
