proposed production activity to the FTZ Board on behalf of AFE, Inc., located in Mount Pleasant, Wisconsin. The notification conforming to the requirements of the regulations of the FTZ Board (15 CFR 400.22) was received on November 30, 2017.

The applicant has submitted a separate application for subzone designation at AFE, Inc.’s facility under 15 CFR 400.38. The facility would be used to produce whiteboard monitors/interactive displays and televisions with and without tuners. Pursuant to 15 CFR 400.14(b), FTZ activity would be limited to the specific foreign-status materials and components and specific finished products described in the submitted notification (as described below) and subsequently authorized by the FTZ Board.

Production under FTZ procedures could exempt AFE, Inc., from customs duty payments on the foreign-status components used in export production. On its domestic sales, for the foreign-status materials/components noted below, the company would be able to choose the duty rates during customs entry procedures that apply to whiteboard monitors/interactive displays, tuner-free televisions, and televisions with tuners (duty rate ranges from duty-free to 3.9%). The company would be able to avoid duty on foreign-status components which become scrap/ waste. Customs duties also could possibly be deferred or reduced on foreign-status production equipment.

The components and materials sourced from abroad include: Printed wire boards (PWBs) for monitors; PWBs for keyboards; infrared light detecting units for remote controllers; open cell liquid crystal displays (LCDs); monitor chassis components and assemblies of plastic and metal; stainless steel screws; reflector sheets; lens sheets; diffusion sheets; light emitting diode (LED) wires; PWBs for LEDs; plastic tapes; bezels; LCD modules; rear cover cable assemblies; power supply and drive units; power cables; LCD control cables; Wi-Fi cables; keyboard cables; speakers; A/C cords; remote controls; flexible flat cable for printed wire boards; AAA batteries; Wi-Fi units; plastic labels; TV stands and stand support brackets; plastic bags; printed setup guides; plastic cable clamps; molded paper packaging; paper packaging; cardboard cartons; plastic packaging; printed instructions; self-tapping screws; wire holders of plastic; plastic spacers; plastic insulator for coolers; keyboard cover assemblies; wooden pallets; PWBs for turnboards; infrared light detecting units for tuner TV remote controllers; open cell LCDs for tuner TVs; monitor chassis components and assemblies of plastic and metal for tuner TVs; reflector sheets for tuner TVs; lens sheets for tuner TVs; diffusion sheets for tuner TVs; bezels for tuner TVs; LCD modules for tuner TVs; rear cover cable assemblies for tuner TVs; and, stands for tuner TVs (duty rate ranges from duty-free to 10.7%).

Public comment is invited from interested parties. Submissions shall be addressed to the Board’s Executive Secretary at the address below. The closing period for their receipt is January 29, 2018.

A copy of the notification will be available for public inspection at the Office of the Executive Secretary, Foreign-Trade Zones Board, Room 21013, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230–0002, and in the “Reading Room” section of the Board’s website, which is accessible via www.trade.gov/ftz.

For further information, contact Christopher Wedderburn at Chris.Wedderburn@trade.gov or (202) 482–1963.

Andrew McGilvray,
Executive Secretary.

DEPARTMENT OF COMMERCE
International Trade Administration
[A–583–853]
Certain Crystalline Silicon Photovoltaic Products From Taiwan: Preliminary Results of Antidumping Duty Administrative Review and Partial Rescission of Antidumping Duty Administrative Review; 2016–2017

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (the Department) is conducting an administrative review of the antidumping duty (AD) order on certain crystalline silicon photovoltaic products (solar products) from Taiwan. The period of review (POR) is February 1, 2016, through January 31, 2017. This administrative review covers 11 exporters of the subject merchandise, including one mandatory respondent, Motech Industries, Inc. (Motech). The Department preliminarily determines that Motech made sales of subject merchandise at less than normal value during the POR. Additionally, we are rescinding this administrative review with respect to 23 companies that timely withdrew their requests for administrative review. Interested parties are invited to comment on these preliminary results.

FOR FURTHER INFORMATION CONTACT: Ariel Garvey or Thomas Martin, AD/ CVD Operations, Office IV, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–3609 or (202) 482–3936, respectively.

SUPPLEMENTARY INFORMATION:

Background

On February 8, 2017, the Department notified interested parties of the opportunity to request an administrative review of orders, findings, or suspended investigations with anniversaries in February 2017, including the antidumping duty order on solar products from Taiwan.1 On February 28, 2017, SolarWorld Americas Inc. (the petitioner), as well as various exporters and exporters, requested that the Department conduct an administrative review of certain exporters covering the POR. On April 10, 2017, the Department published a notice initiating an AD administrative review of solar products from Taiwan covering 34 companies for the POR.2

In the Initiation Notice, the Department stated that if it limited the number of respondents for individual examination, it intended to select respondents based on volume data contained in responses to its quantity and value (Q&V) questionnaire.3 On April 10, 2017, the Department issued Q&V questionnaires to all 11 companies that appeared in the U.S. Customs and Border Protection (CBP) data for import and merchandise value.4 We received Q&V questionnaire responses from 11 companies5 named in the Initiation

1 See Antidumping or Countervailing Duty Order, Finding, or Suspended Investigation; Opportunity To Request Administrative Review, 82 FR 9709 (February 8, 2017).
3 Id. at 17189.
4 The Department explained in the Initiation Notice that the units used to measure the imported quantities of solar cells and solar modules in the CBP data are in “piece” units, and it would not be meaningful to sum the number of imported solar cells and the number of imported solar modules in attempting to determine the largest Taiwan exporters of subject merchandise by volume. Id.
5 The 11 companies that submitted a Q&V questionnaire response include: AU Optronics
Notice. The remaining 23 companies withdrew their requests for administrative review, pursuant to section 735(a) of the Tariff Act of 1930, as amended (the Act). Export price and constructed export price are calculated in accordance with section 772 of the Act. Normal value is calculated in accordance with section 773 of the Act.

For a full description of the methodology underlying our conclusions, see the Preliminary Decision Memorandum. A list of topics included in the Preliminary Decision Memorandum is included as an Appendix to this notice.

Preliminary Results of Review

As a result of this review, we preliminarily determine the following weighted-average dumping margins for the period February 1, 2016 through January 31, 2017:

<table>
<thead>
<tr>
<th>Manufacturer/exporter</th>
<th>Weighted-average dumping margin (percent)</th>
</tr>
</thead>
<tbody>
<tr>

Rate for Companies Not Individually Examined

The statute and the Department’s regulations do not address the establishment of a rate to be applied to respondents not selected for individual examination when the Department limits its examination of companies subject to the administrative review pursuant to section 777A(c)(2)(B) of the Act. Generally, the Department looks to section 735(c)(5) of the Act, which provides instructions for calculating the all-others rate in an investigation, for guidance when calculating the rate for respondents not individually examined in an administrative review. Section 735(c)(5)(A) of the Act articulates a

Antidumping and Countervailing Duty Operations, Performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance. “Decision Memorandum for Preliminary Results of the 2016–2017 Antidumping Duty Administrative Review of Certain Crystalline Silicon Photovoltaic Products from Taiwan,” dated concurrently with, and hereby adopted by this notice (Preliminary Decision Memorandum). The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance’s Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at http://access.trade.gov and available to all parties in the Central Records Unit, Room B8024 of the main Department of Commerce building. In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly on the Internet at http://enforcement.trade.gov/frn/. The signed and electronic versions of the Preliminary Decision Memorandum are identical in content.

See Preliminary Decision Memorandum.
merchandise during the POR produced by each respondents for which it did not know its merchandise was destined for the United States, we will instruct CBP to liquidate un-reviewed entries at the all-others rate if there is no rate for the intermediate company involved in the transaction.\textsuperscript{14} We will instruct CBP to assess antidumping duties on all appropriate entries covered by this review when the importer-specific assessment rate calculated in the final results of this review is above de minimis. Where either the respondents’s weighted-average dumping margin is zero or de minimis, or an importer-specific assessment rate is zero or de minimis, we will instruct CBP to liquidate the appropriate entries without regard to antidumping duties. The final results of this review shall be the basis for the assessment of antidumping duties on entries of merchandise covered by the final results of this review and for future deposits of estimated duties, where applicable.

\textbf{CashDepositRequirements}

The following deposit requirements will be effective upon publication of the notice of final results of administrative review for all shipments of solar products from Taiwan entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results of this administrative review, as provided for by section 751(a)(2)(C) of the Act: (1) The cash deposit rate for the companies under review will be the rate established in the final results of this review (except, if the rate is zero or de minimis, no cash deposit will be required); (2) for merchandise exported by manufacturers or exporters not covered in this review but covered in a prior segment of the proceeding, the cash deposit rate will continue to be the company-specific rate published for the most recently completed segment of this proceeding in which the manufacturer or exporter participated; (3) if the exporter is not a firm covered in this review, a prior review, or the less-than-fair-value investigation, but the manufacturer is, the cash deposit rate will be the rate established for the most recently completed segment of the proceeding for the manufacturer of the merchandise; and (4) the cash deposit rate for all other manufacturers or exporters will continue to be 19.50 percent ad valorem, the all-others rate established in the less-than-fair-value investigation.\textsuperscript{15} These cash deposit requirements, when imposed, shall remain in effect until further notice.

\textbf{Disclosure and Public Comment}

The Department intends to disclose the calculations used in our analysis to interested parties in this review within five days of the date of publication of this notice in accordance with 19 CFR 351.224(b). Interested parties are invited to comment on the preliminary results of this review. Pursuant to 19 CFR 351.309(c)(1)(ii), interested parties may submit case briefs no later than 30 days after the date of publication of this notice. Rebuttal briefs, limited to issues raised in the case briefs, may be filed no later than five days after the time limit for filing case briefs.\textsuperscript{16} Parties who submit case briefs or rebuttal briefs in this proceeding are requested to submit with each brief: (1) A statement of the issue, (2) a brief summary of the argument, and (3) a table of authorities.\textsuperscript{17} Executive summaries should be limited to five pages total, including footnotes.\textsuperscript{18} Case and rebuttal briefs should be filed using ACCESS.\textsuperscript{19} Pursuant to 19 CFR 351.310(c), any interested party may request a hearing within 30 days of the publication of this notice in the \textit{Federal Register}. If a hearing is requested, the Department will notify interested parties of the hearing schedule. Interested parties who wish to request a hearing, or to participate if one is requested, must submit a written request to the Assistant Secretary for Enforcement and Compliance, filed electronically via ACCESS within 30 days after the date of publication of this notice. Requests should contain: (1) The party’s name, address, and telephone number; (2) the number of participants; and (3) a list of the issues to be discussed. Issues raised in the hearing will be limited to those raised in the respective case and rebuttal briefs.

We intend to issue the final results of this administrative review, including the results of our analysis of issues raised by the parties in the written comments, within 120 days of publication of these preliminary results in the \textit{Federal Register}, unless otherwise extended.\textsuperscript{20}

National Institute of Standards and Technology

Accurate Fluorescence Measurements Consortium

AGENCY: National Institute of Standards and Technology, Department of Commerce.

ACTION: Notice; request for information.

SUMMARY: The National Institute of Standards and Technology (NIST), an agency of the United States Department of Commerce, is establishing the Accurate Fluorescence Measurements Consortium and invites organizations to participate in this Consortium. The Consortium will develop tools for improving the accuracy of quantitative fluorescence measurements including reference materials, reference data and reference methods for relative spectral correction of spectra, lifetimes and quantum yields and for assessing the associated uncertainties and utilities. Participation in this Consortium is open to all eligible organizations, as described below.

DATES: NIST will accept responses for participation in this Consortium on an ongoing basis. The Consortium’s activities will commence on January 2, 2018 (“Commencement Date”). Acceptance of participants into the Consortium after the Commencement Date will depend on eligibility and the availability of NIST resources.

ADDRESS: Information in response to this notice and request for additional information about the Consortium can be directed via mail to the NIST Consortium Manager, Dr. Paul DeRose, Biosystems and Biomaterials Division of NIST’s Material Measurement Laboratory, 100 Bureau Drive, Gaithersburg, Maryland 20899–8312, or via electronic mail to lili.wang@nist.gov.

FOR FURTHER INFORMATION CONTACT: For further information about partnership opportunities or about the terms and conditions of NIST’s Cooperative Research and Development Agreement (CRADA), please contact Jeffrey DiVietro, CRADA and License Officer, National Institute of Standards and Technology’s Technology Partnerships Office, by mail to 100 Bureau Drive, Mail Stop 2200, Gaithersburg, Maryland 20899, by electronic mail to jeffrey.divietro@nist.gov, or by telephone at (301) 975–8779.

SUPPLEMENTARY INFORMATION: Quantitative fluorescence measurements are used for instrument qualification and method validation in the pharmaceutical and chemical industries. It is also increasingly being used for detection of antibodies in clinical diagnostics and biomedical research. The measurements made on different instrument platforms at different times and locations cannot be compared accurately, which makes diagnostic decisions unreliable and slows down advances in these areas. In response to this limitation, NIST, secondary standards manufacturers and other stakeholders have developed methodologies to implement quantitation fluorescence measurements.

In 2008, NIST produced SRMs 2940 through 2944 in the past nine years as relative intensity correction standards for fluorescence spectroscopy. These standards are needed by fluorescence instrument manufacturers and regulated communities that use quantitative fluorescence detection. For instance, the pharmaceutical and biotechnology communities use SRMs 2940 through 2944 to calibrate and verify the performance of their fluorescence instruments, which is required to achieve accurate results in secondary screening of drugs and in quantitative analysis of bioassays. Many other communities that use fluorescence detection need similar standards, but cannot afford the price of these SRMs or require different sample formats.

Few secondary standards of this type have been produced by industry because most companies do not have the fluorescence measurement capabilities and expertise to make high accuracy measurements. This Consortium is intended to give secondary standard manufacturers, as well as other stakeholders in the fluorescence measurement community, access to highly accurate fluorescence measurement capabilities available at NIST. In return, these manufacturers provide NIST information about new materials, future material needs, and new customer bases. These manufacturers know the needs of different communities and have developed new materials to meet these needs. Many of the fluorescent materials to be measured have not been used as standards and the suitability of these materials as standards is of great interest to NIST. NIST’s understanding of the fluorescent characteristics of such materials through collaborative research and information exchange may lead to new NIST standards in this and other related areas. It is also important for NIST to know about additional standards needed in emerging technologies. Collaborators will supply NIST with this knowledge and work with NIST to design and characterize the best standards for such emerging technologies. Through this process, collaborators will assist NIST to develop better reference materials.

Participation Process

Eligibility will be determined by NIST using the information provided by an organization in response to this notice based on the information requested below.

An organization responding to this notice should provide the following information to NIST’s Consortium Manager:

1) Type of Reference Materials: Format of the sample (e.g., standard cuvette, microwell plate, microscope
