Synopsis

As required by the Paperwork Reduction Act of 1995 (44 U.S.C. 3507), the FCC is notifying the public that it received final OMB approval on March

13, 2017, for the information collection requirements contained in the modifications to 47 CFR 10.320(g).

Under 5 CFR part 1320, an agency may not conduct or sponsor a collection of information unless it displays a current, valid OMB Control Number.

No person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act that does not display a current, valid OMB Control Number. The OMB Control Number is 3060–1126.

The foregoing notice is required by the Paperwork Reduction Act of 1995, Public Law 104–13, October 1, 1995, and 44 U.S.C. 3507.

The total annual reporting burdens and costs for the respondents are as follows:

OMB Control Number: 3060–1126.

OMB Approval Date: March 13, 2017.

OMB Expiration Date: March 31, 2020.

Title: Testing and Logging Requirements for Wireless Emergency Alerts (WEA).

Form Number: N/A.

Respondents: Business or other for-profit entities, and state, local, or tribal government.

Number of Respondents and Responses: 80 respondents; 451,600 responses.

Estimated Time per Response: 0.0000694 hours (2.5 seconds)–2 hours.

Frequency of Response: Monthly and on occasion reporting requirements and recordkeeping requirement.

Obligation To Respond: Statutory authority for these collection is contained in sections 1, 2, 4(i), 4(o), 301, 303(r), 303(v), 307, 309, 335, 403, 624(g), 706, and 715 of the Communications Act of 1934, as amended, 47 U.S.C. 151, 152, 154(i), 154(o), 301, 301(r), 303(v), 307, 309, 335, 403, 544(g), 606, and 615, as well as by sections 602(a), (b), (c), (f), 603, 604 and 606 of the WARN Act, 47 U.S.C. 1202(a), (b), (c), (f), 1203, 1204 and 1206, unless otherwise noted.

Total Annual Burden: 125,390 hours.

Total Annual Cost: No Cost.

Nature and Extent of Confidentiality: Confidentiality protection at least equal to that provided by the federal Freedom of Information Act upon request, but only insofar as those logs pertain to Alert Messages initiated by that emergency management agency.

Privacy Act: No impact(s).

Needs and Uses: Section 10.320 describes the provider alert gateway requirements, specifically with respect to logging. The CMS provider must log the CMAC attributes of all Alert

Messages received at the CMS Provider Alert Gateway, including time stamps that verify when the message is received, and when it is retransmitted or rejected by the Participating CMS Provider Alert Gateway. If an Alert Message is rejected, a Participating CMS Provider is required to log the specific error code generated by the rejection. The CMS provider must also maintain a log of all active and cancelled Alert Messages for at least 12 months after receipt of such alert or cancellation and make their alert logs available to the Commission and FEMA upon request. Participating CMS Providers are also required to make alert logs available to emergency management agencies that offer confidentiality protection at least equal to that provided by the federal Freedom of Information Act upon request, but only insofar as those logs pertain to Alert Messages initiated by that emergency management agency.

This information will inform emergency managers whether their alerts are delivered, and if not, why not. We anticipate that the alert log maintenance requirements will serve to ensure that alert logs are available when needed, both to the Commission and to emergency management agencies. These logs have potential to increase their confidence that WEA will work as intended when needed. Alert logs are also necessary to establish a baseline for system integrity against which future iterations of WEA can be evaluated. Without records that can be used to describe the quality of system integrity, and the most common causes of message transmission failure, it will be difficult to evaluate how any changes to WEA could affect system integrity.

Federal Register Liaison Officer, Office of the Secretary.

Advanced Methods To Target and Eliminate Unlawful Robocalls

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: In this document, Commission issues new rules that protect consumers from unwanted robocalls by permitting voice service

providers to proactively block telephone calls when the subscriber of a phone number requests that calls purporting to originate from that number be blocked, and when calls purport to originate from three categories of unassigned phone numbers: Invalid numbers, valid numbers that are not allocated to a voice service provider, and valid numbers that are allocated but not assigned to a subscriber. While such calls may appear to be legitimate to those who receive them, they can result in fraud or identity theft. To combat these scams, the new rules expressly authorize voice service providers to block these robocalls without running afoul of the FCC's call completion rules. To minimize blocking of lawful calls, the Commission encourages voice service providers that elect to block calls to establish a simple way to identify and fix blocking errors. The rules also prohibit providers from blocking 911 emergency calls.

DATES: Effective February 12, 2018.

Final Paperwork Reduction Act of 1995 Analysis

The *Report and Order* does not contain any new or modified information collection requirements subject to the Paperwork Reduction Act of 1995, Public Law 104–13. In addition, therefore, it does not contain any new or modified information collection burden for small business concerns with fewer than 25 employees, pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198, see 44 U.S.C. 3506(c)(4).
