Crystalline Silicon Photovoltaic Cells, Whether or Not Assembled Into Modules, From the People’s Republic of China: Final Results of Changed Circumstances Reviews, and Revocation of Antidumping and Countervailing Duty Orders, in Part

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: On December 26, 2017, the Department of Commerce (Commerce) published its preliminary results of changed circumstances reviews (CCRs) and intent to revoke, in part, the antidumping duty (AD) and countervailing duty (CVD) orders on crystalline silicon photovoltaic cells, whether or not assembled into modules, from the People’s Republic of China (China) with respect to certain solar panels (collectively, the Orders). Specifically, Commerce preliminarily determined that the producers accounting for substantially all of the production of the domestic like product to which the Orders pertain lacked interest in the relief provided by the Orders with respect to certain solar panels of a sufficiently small size, voltage, amperage, and wattage, among other characteristics, as described below. Commerce invited interested parties to comment on the preliminary results. No party submitted comments. For the final results of these CCRs, Commerce is revoking, in part, the Orders as to imports of certain solar panels as described below.

FOR FURTHER INFORMATION CONTACT: Lauren Caserta or Kaithin Wojnar, AD/CVD Operations, Office VII, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–4737 and (202) 482–3857, respectively.

SUPPLEMENTARY INFORMATION:

Background

On December 7, 2012, Commerce published AD and CVD orders on certain crystalline silicon photovoltaic cells, whether or not assembled into modules, from China.1 On October 6,
