The peer review process is also deemed to satisfy the requirements of the Information Quality Act, including the OMB Peer Review Bulletin guidelines.

Special Accommodations

These meetings are physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Shannon Gleason at (907) 271–2809 at least 7 working days prior to the meeting date.
of total and fishing mortality rates for coral reef fish stocks. These rates, combined with population demographic parameters, are used in a numerical population model to obtain stock sustainability metrics (for example, spawning potential ratio, F/FMSY).

Overfishing limits can be generated by using recent total catch estimates and/or population size estimates from diver surveys. Furthermore, a meta-analytical approach using stochastic simulations was developed at PIFSC to obtain demographic parameter estimates for species with even less data than data-poor species (that is, “data-less” species). These scientific methods passed a rigorous independent review by a panel organized by the Center for Independent Experts in 2015. In 2017, these methods were applied to individual species in the main Hawaiian Islands, and now this general approach will be used to assess 20 species from the U.S. territory of Guam. Per WPSAR, there is a need to independently review these species-specific stock assessments prior to submission to a fishery management organization for consideration.

Section 301(a)(2) of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act) requires that fishery conservation and management measures be based upon the best scientific information available. Magnuson-Stevens Act Section 302(g)(1)(E) provides that the Secretary of Commerce and each regional fishery management council may establish a peer review process for regional fishery management council scientific information used to advise the Council about the consistency.

This meeting is physically accessible to people with disabilities. Please direct requests for sign language interpretation or other auxiliary aides to Michael Seki, Director, PIFSC, tel 808–725–5360, fax 808–725–5360, at least 5 days prior to the meeting date.
