

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–82580; File No. SR–FICC–2017–805]

Self-Regulatory Organizations; Fixed Income Clearing Corporation; Notice of Filing and Extension of the Review Period of an Advance Notice To Adopt a Recovery & Wind-Down Plan and Related Rules

January 24, 2018.

Pursuant to Section 806(e)(1) of Title VIII of the Dodd-Frank Wall Street Reform and Consumer Protection Act entitled the Payment, Clearing, and Settlement Supervision Act of 2010 (“Clearing Supervision Act”) and Rule 19b–4(n)(1)(i) under the Securities Exchange Act of 1934 (“Act”),¹ notice is hereby given that on December 18, 2017, Fixed Income Clearing Corporation (“FICC”) filed with the Securities and Exchange Commission (“Commission”) advance notice SR–FICC–2017–805 (“Advance Notice”) as described in Items I and II below, which Items have been prepared by the clearing agency.² The Commission is publishing this notice to solicit comments on the Advance Notice from interested persons and to extend the review period of the Advance Notice for an additional 60 days pursuant to Section 806(e)(1)(H) of the Clearing Supervision Act.³

I. Clearing Agency’s Statement of the Terms of Substance of the Advance Notice

The Advance Notice of FICC proposes to adopt the Recovery & Wind-down Plan of FICC (“R&W Plan” or “Plan”). The R&W Plan would be maintained by FICC in compliance with Rule 17Ad–22(e)(3)(ii) under the Act by providing plans for the recovery and orderly wind-down of FICC necessitated by credit losses, liquidity shortfalls, losses from general business risk, or any other losses, as described below.⁴

The Advance Notice also proposes to (1) amend FICC’s Government Securities Division (“GSD”) Rulebook (“GSD Rules”) in order to (a) adopt Rule 22D (Wind-down of the Corporation) and Rule 50 (Market Disruption and Force Majeure), and (b) make conforming

changes to Rule 3A (Sponsoring Members and Sponsored Members), Rule 3B (Centrally Cleared Institutional Triparty Service) and Rule 13 (Funds-Only Settlement) related to the adoption of these Proposed Rules to the GSD Rules; (2) amend FICC’s Mortgage-Backed Securities Division (“MBSD,” and, together with GSD, the “Divisions”) Clearing Rules (“MBSD Rules”) in order to (a) adopt Rule 17B (Wind-down of the Corporation) and Rule 40 (Market Disruption and Force Majeure); and (b) make conforming changes to Rule 3A (Cash Settlement Bank Members) related to the adoption of these Proposed Rules to the MBSD Rules; and (3) amend Rule 1 of the Electronic Pool Netting (“EPN”) Rules of MBSD (“EPN Rules”) in order to provide that EPN Users, as defined therein, are bound by proposed Rule 17B (Wind-down of the Corporation) and proposed Rule 40 (Market Disruption and Force Majeure) to be adopted to the MBSD Rules.⁵ Each of the proposed rules is referred to herein as a “Proposed Rule,” and are collectively referred to as the “Proposed Rules.”

The Proposed Rules are designed to (1) facilitate the implementation of the R&W Plan when necessary and, in particular, allow FICC to effectuate its strategy for winding down and transferring its business; (2) provide Members and Limited Members with transparency around critical provisions of the R&W Plan that relate to their rights, responsibilities and obligations;⁶ and (3) provide FICC with the legal basis to implement those provisions of the R&W Plan when necessary, as described below.

II. Clearing Agency’s Statement of the Purpose of, and Statutory Basis for, the Advance Notice

In its filing with the Commission, the clearing agency included statements concerning the purpose of and basis for the Advance Notice and discussed any comments it received on the Advance Notice. The text of these statements may be examined at the places specified in Item IV below. The clearing agency has prepared summaries, set forth in

sections A and B below, of the most significant aspects of such statements.

(A) Clearing Agency’s Statement on Comments on the Advance Notice Received From Members, Participants or Others

While FICC has not solicited or received any written comments relating to this proposal, FICC has conducted outreach to Members in order to provide them with notice of the proposal. FICC will notify the Commission of any written comments received by FICC.

(B) Advance Notice Filed Pursuant to Section 806(e) of the Clearing Supervision Act

Description of Proposed Changes

FICC is proposing to adopt the R&W Plan to be used by the Board and management of FICC in the event FICC encounters scenarios that could potentially prevent it from being able to provide its critical services as a going concern. The R&W Plan would identify (i) the recovery tools available to FICC to address the risks of (a) uncovered losses or liquidity shortfalls resulting from the default of one or more Members, and (b) losses arising from non-default events, such as damage to its physical assets, a cyber-attack, or custody and investment losses, and (ii) the strategy for implementation of such tools. The R&W Plan would also establish the strategy and framework for the orderly wind-down of FICC and the transfer of its business in the remote event the implementation of the available recovery tools does not successfully return FICC to financial viability.

As discussed in greater detail below, the R&W Plan would provide, among other matters, (i) an overview of the business of FICC and its parent, The Depository Trust & Clearing Corporation (“DTCC”); (ii) an analysis of FICC’s intercompany arrangements and an existing link to another financial market infrastructures (“FMIs”); (iii) a description of FICC’s services, and the criteria used to determine which services are considered critical; (iv) a description of the FICC and DTCC governance structure; (v) a description of the governance around the overall recovery and wind-down program; (vi) a discussion of tools available to FICC to mitigate credit/market and liquidity risks, including recovery indicators and triggers, and the governance around management of a stress event along a “Crisis Continuum” timeline; (vii) a discussion of potential non-default losses and the resources available to FICC to address such losses, including

¹ 12 U.S.C. 5465(e)(1) and 17 CFR 240.19b–4(n)(1)(i), respectively.

² On December 18, 2017, FICC filed the Advance Notice as a proposed rule change (SR–FICC–2017–021) with the Commission pursuant to Section 19(b)(1) of the Act, 15 U.S.C. 78s(b)(1), and Rule 19b–4 thereunder, 17 CFR 240.19b–4. A copy of the proposed rule change is available at <http://www.dtcc.com/legal/sec-rule-filings>.

³ 12 U.S.C. 5465(e)(1)(H).

⁴ 17 CFR 240.17Ad–22(e)(3)(ii).

⁵ The GSD Rules and the MBSD Rules are referred to collectively herein as the “Rules.” Capitalized terms not defined herein are defined in the Rules. The Rules and the EPN Rules are available at <http://www.dtcc.com/legal/rules-and-procedures>.

⁶ References herein to “Members” refer to GSD Netting Members and MBSD Clearing Members. References herein to “Limited Members” refer to participants of GSD or MBSD other than GSD Netting Members and MBSD Clearing Members, including, for example, GSD Comparison-Only Members, GSD Sponsored Members, GSD CCIT Members, and MBSD EPN Users.

recovery triggers and tools to mitigate such losses; (viii) an analysis of the recovery tools' characteristics, including how they are comprehensive, effective, and transparent, how the tools provide appropriate incentives to Members to, among other things, control and monitor the risks they may present to FICC, and how FICC seeks to minimize the negative consequences of executing its recovery tools; and (ix) the framework and approach for the orderly wind-down and transfer of FICC's business, including an estimate of the time and costs to effect a recovery or orderly wind-down of FICC.

The R&W Plan would be structured as a roadmap, and would identify and describe the tools that FICC may use to effect a recovery from the events and scenarios described therein. Certain recovery tools that would be identified in the R&W Plan are based in the Rules (including the Proposed Rules) and, as such, descriptions of those tools would include descriptions of, and reference to, the applicable Rules and any related internal policies and procedures. Other recovery tools that would be identified in the R&W Plan are based in contractual arrangements to which FICC is a party, including, for example, existing committed or pre-arranged liquidity arrangements. Further, the R&W Plan would state that FICC may develop further supporting internal guidelines and materials that may provide operationally for matters described in the Plan, and that such documents would be supplemental and subordinate to the Plan.

Key factors considered in developing the R&W Plan and the types of tools available to FICC were its governance structure and the nature of the markets within which FICC operates. As a result of these considerations, many of the tools available to FICC that would be described in the R&W Plan are FICC's existing, business-as-usual risk management and default management tools, which would continue to be applied in scenarios of increasing stress. In addition to these existing, business-as-usual tools, the R&W Plan would describe FICC's other principal recovery tools, which include, for example, (i) identifying, monitoring and managing general business risk and holding sufficient liquid net assets funded by equity ("LNA") to cover potential general business losses pursuant to the Clearing Agency Policy on Capital Requirements ("Capital Policy"),⁷ (ii)

maintaining the Clearing Agency Capital Replenishment Plan ("Replenishment Plan") as a viable plan for the replenishment of capital should FICC's equity fall close to or below the amount being held pursuant to the Capital Policy,⁸ and (iii) the process for the allocation of losses among Members, as provided in Rule 4 of the GSD Rules and Rule 4 of the MBS Rules.⁹ The R&W Plan would provide governance around the selection and implementation of the recovery tool or tools most relevant to mitigate a stress scenario and any applicable loss or liquidity shortfall.

The development of the R&W Plan is facilitated by the Office of Recovery & Resolution Planning ("R&R Team") of DTCC.¹⁰ The R&R Team reports to the DTCC Management Committee ("Management Committee") and is responsible for maintaining the R&W Plan and for the development and ongoing maintenance of the overall recovery and wind-down planning process. The Board, or such committees as may be delegated authority by the Board from time to time pursuant to its charter, would review and approve the R&W Plan biennially, and would also review and approve any changes that are proposed to the R&W Plan outside of the biennial review.

As discussed in greater detail below, the Proposed Rules would define the procedures that may be employed in the event of FICC's wind-down and would provide for FICC's authority to take certain actions on the occurrence of a "Market Disruption Event," as defined therein. Significantly, the Proposed Rules would provide Members and Limited Members with transparency and certainty with respect to these matters. The Proposed Rules would facilitate the implementation of the R&W Plan, particularly FICC's strategy for winding down and transferring its business, and would provide FICC with the legal basis to implement those aspects of the R&W Plan.

⁸ See *id.*

⁹ See GSD Rule 4 (Clearing Fund and Loss Allocation) and MBS Rule 4 (Clearing Fund and Loss Allocation), *supra* note 5. FICC is proposing changes to GSD Rule 4 and MBS Rule 4, and other related rules, regarding allocation of losses in a separate filing submitted simultaneously with this filing (File Nos. SR-FICC-2017-022 and SR-FICC-2017-806, referred to collectively herein as the "Loss Allocation Filing"). FICC expects the Commission to review both proposals together, and, as such, the proposal described in this filing anticipates the approval and implementation of those proposed changes to the Rules.

¹⁰ DTCC operates on a shared services model with respect to FICC and its other subsidiaries. Most corporate functions are established and managed on an enterprise-wide basis pursuant to intercompany agreements under which it is generally DTCC that provides a relevant service to a subsidiary, including FICC.

FICC R&W Plan

The R&W Plan is intended to be used by the Board and FICC's management in the event FICC encounters scenarios that could potentially prevent it from being able to provide its critical services as a going concern. The R&W Plan would be structured to provide a roadmap, define the strategy, and identify the tools available to FICC to either (i) recover in the event it experiences losses that exceed its prefunded resources (such strategies and tools referred to herein as the "Recovery Plan") or (ii) wind-down its business in a manner designed to permit the continuation of its critical services in the event that such recovery efforts are not successful (such strategies and tools referred to herein as the "Wind-down Plan"). The description of the R&W Plan below is intended to highlight the purpose and expected effects of the material aspects of the R&W Plan, and to provide Members and Limited Members with appropriate transparency into these features.

Business Overview, Critical Services, and Governance

The introduction to the R&W Plan would identify the document's purpose and its regulatory background, and would outline a summary of the Plan. The stated purpose of the R&W Plan is that it is to be used by the Board and FICC management in the event FICC encounters scenarios that could potentially prevent it from being able to provide its critical services as a going concern. The R&W Plan would be maintained by FICC in compliance with Rule 17Ad-22(e)(3)(ii) under the Act¹¹ by providing plans for the recovery and orderly wind-down of FICC.

The R&W Plan would describe DTCC's business profile, provide a summary of the services of FICC as offered by each of the Divisions, and identify the intercompany arrangements and links between FICC and other entities, most notably a link between GSD and Chicago Mercantile Exchange Inc. ("CME"), which is also an FMI. This overview section would provide a context for the R&W Plan by describing FICC's business, organizational structure and critical links to other entities. By providing this context, this section would facilitate the analysis of the potential impact of utilizing the recovery tools set forth in later sections of the Recovery Plan, and the analysis of the factors that would be addressed in implementing the Wind-down Plan.

¹¹ 17 CFR 240.17Ad-22(e)(3)(ii).

⁷ See Securities Exchange Act Release No. 81105 (July 7, 2017), 82 FR 32399 (July 13, 2017) (SR-DTC-2017-003, SR-FICC-2017-007, SR-NSCC-2017-004).

DTCC is a user-owned and user-governed holding company and is the parent company of FICC and its affiliates, The Depository Trust Company (“DTC”) and National Securities Clearing Corporation (“NSCC”, and, together with FICC and DTC, the “Clearing Agencies”). The Plan would describe how corporate support services are provided to FICC from DTCC and DTCC’s other subsidiaries through intercompany agreements under a shared services model.

The Plan would provide a description of the critical contractual and operational arrangements between FICC and other legal entities, including the cross-margining agreement between GSD and CME, which is also an FMI.¹² Pursuant to this arrangement, GSD offsets each cross-margining participant’s residual margin amount (based on related positions) at GSD against the offsetting residual margin amounts of the participant (or its affiliate) at CME. GSD and CME may then reduce the amount of collateral that they collect to reflect the offsets between the cross-margining participant’s positions at GSD and its (or its affiliate’s) positions at CME. This section of the Plan, identifying and briefly describing FICC’s established links, would provide a mapping of critical connections and dependencies that may need to be relied on or otherwise addressed in connection with the implementation of either the Recovery Plan or the Wind-down Plan.

The Plan would define the criteria for classifying certain of FICC’s services as “critical,” and would identify those critical services and the rationale for their classification. This section would provide an analysis of the potential systemic impact from a service disruption, and is important for evaluating how the recovery tools and the wind-down strategy would facilitate and provide for the continuation of FICC’s critical services to the markets it serves. The criteria that would be used to identify an FICC service or function as critical would include consideration as to (1) whether there is a lack of alternative providers or products; (2) whether failure of the service could impact FICC’s ability to perform its central counterparty services through either Division; (3) whether failure of the service could impact FICC’s ability to perform its multilateral netting services through either Division and, as

such, could impact the volume of transactions; (4) whether failure of the service could impact FICC’s ability to perform its book-entry delivery and settlement services through either Division and, as such, could impact transaction costs; (5) whether failure of the service could impact FICC’s ability to perform its cash payment processing services through either Division and, as such, could impact the flow of liquidity in the U.S. financial markets; and (6) whether the service is interconnected with other participants and processes within the U.S. financial system, for example, with other FMIs, settlement banks, and broker-dealers. The Plan would then list each of those services, functions or activities that FICC has identified as “critical” based on the applicability of these six criteria. GSD’s critical services would include, for example, its Real-Time Trade Matching (“RTTM[®]”) service,¹³ its services related to netting and settlement of submitted trades for Netting Members,¹⁴ the Auction Takedown service,¹⁵ and the Repurchase Agreement Netting Service.¹⁶ MBSD’s critical services would include, for example, its RTTM[®] service,¹⁷ its netting service for to-be-announced (“TBA”) transactions,¹⁸ its Electronic Pool Notification service,¹⁹ and its pool netting and settlement.²⁰ The R&W Plan would also include a non-exhaustive list of FICC services that are not deemed critical.

The evaluation of which services provided by FICC are deemed critical is important for purposes of determining how the R&W Plan would facilitate the continuity of those services. As discussed further below, while FICC’s Wind-down Plan would provide for the transfer of all critical services to a transferee in the event FICC’s wind-down is implemented, it would anticipate that any non-critical services

that are ancillary and beneficial to a critical service, or that otherwise have substantial user demand from the continuing membership, would also be transferred.

The Plan would describe the governance structure of both DTCC and FICC. This section of the Plan would identify the ownership and governance model of these entities at both the Board of Directors and management levels. The Plan would state that the stages of escalation required to manage recovery under the Recovery Plan or to invoke FICC’s wind-down under the Wind-down Plan would range from relevant business line managers up to the Board through FICC’s governance structure. The Plan would then identify the parties responsible for certain activities under both the Recovery Plan and the Wind-down Plan, and would describe their respective roles. The Plan would identify the Risk Committee of the Board (“Board Risk Committee”) as being responsible for oversight of risk management activities at FICC, which include focusing on both oversight of risk management systems and processes designed to identify and manage various risks faced by FICC, and, due to FICC’s critical role in the markets in which it operates, oversight of FICC’s efforts to mitigate systemic risks that could impact those markets and the broader financial system.²¹ The Plan would identify the DTCC Management Risk Committee (“Management Risk Committee”) as primarily responsible for general, day-to-day risk management through delegated authority from the Board Risk Committee. The Plan would state that the Management Risk Committee has delegated specific day-to-day risk management, including management of risks addressed through margining systems and related activities, to the DTCC Group Chief Risk Office (“GCRO”), which works with staff within the DTCC Financial Risk Management group. Finally, the Plan would describe the role of the Management Committee, which provides overall direction for all aspects of FICC’s business, technology, and operations and the functional areas that support these activities.

The Plan would describe the governance of recovery efforts in response to both default losses and non-default losses under the Recovery Plan, identifying the groups responsible for those recovery efforts. Specifically, the Plan would state that the Management

¹³ See GSD Rule 5 (Comparison System), GSD Rule 6A (Bilateral Comparison), GSD Rule 6B (Demand Comparison), and GSD Rule 6C (Locked-In Comparison), *supra* note 5.

¹⁴ See GSD Rule 11 (Netting System), GSD Rule 12 (Securities Settlement), and GSD Rule 13 (Funds-Only Settlement), *supra* note 5.

¹⁵ See GSD Rule 6C (Locked-In Comparison) and GSD Rule 17 (Netting and Settlement of Netting-Eligible Auction Purchases), *supra* note 5.

¹⁶ See GSD Rule 7 (Repo Transactions), GSD Rule 11 (Netting System), GSD Rule 18 (Special Provisions for Repo Transactions), GSD Rule 19 (Special Provisions for Brokered Repo Transactions), and GSD Rule 20 (Special Provisions for GCF Repo Transactions), *supra* note 5.

¹⁷ See MBSD Rule 5 (Trade Comparison), *supra* note 5.

¹⁸ See MBSD Rule 6 (TBA Netting), *supra* note 5.

¹⁹ See EPN Rules, *supra* note 5.

²⁰ See MBSD Rule 8 (Pool Netting System) and MBSD Rule 9 (Pool Settlement with the Corporation), *supra* note 5.

²¹ The charter of the Board Risk Committee is available at <http://www.dtcc.com/~media/Files/Downloads/legal/policy-and-compliance/DTCC-BOD-Risk-Committee-Charter.pdf>.

¹² Available at http://www.dtcc.com/~media/Files/Downloads/legal/rules/ficc_cme_crossmargin_agreement.pdf. See also GSD Rule 43 (Cross-Margining Arrangements), *supra* note 5.

Risk Committee provides oversight of actions relating to the default of a Member, which would be reported and escalated to it through the GCRO, and the Management Committee provides oversight of actions relating to non-default events that could result in a loss, which would be reported and escalated to it from the DTCC Chief Financial Officer (“CFO”) and the DTCC Treasury group that reports to the CFO, and from other relevant subject matter experts based on the nature and circumstances of the non-default event.²² More generally, the Plan would state that the type of loss and the nature and circumstances of the events that lead to the loss would dictate the components of governance to address that loss, including the escalation path to authorize those actions. As described further below, both the Recovery Plan and the Wind-down Plan would describe the governance of escalations, decisions, and actions under each of those plans.

Finally, the Plan would describe the role of the R&R Team in managing the overall recovery and wind-down program and plans for each of the Clearing Agencies.

FICC Recovery Plan

The Recovery Plan is intended to be a roadmap of those actions that FICC may employ across both Divisions to monitor and, as needed, stabilize its financial condition. As each event that could lead to a financial loss could be unique in its circumstances, the Recovery Plan would not be prescriptive and would permit FICC to maintain flexibility in its use of identified tools and in the sequence in which such tools are used, subject to any conditions in the Rules or the contractual arrangement on which such tool is based. FICC’s Recovery Plan would consist of (1) a description of the risk management surveillance, tools, and governance that FICC would employ across evolving stress scenarios that it may face as it transitions through a “Crisis Continuum,” described below; (2) a description of FICC’s risk of losses that may result from non-default events, and the financial resources and recovery

²² The Plan would state that these groups would be involved to address how to mitigate the financial impact of non-default losses, and in recommending mitigating actions, the Management Committee would consider information and recommendations from relevant subject matter experts based on the nature and circumstances of the non-default event. Any necessary operational response to these events, however, would be managed in accordance with applicable incident response/business continuity process; for example, processes established by the DTCC Technology Risk Management group would be followed in response to a cyber event.

tools available to FICC to manage those risks and any resulting losses; and (3) an evaluation of the characteristics of the recovery tools that may be used in response to either default losses or non-default losses, as described in greater detail below. In all cases, FICC would act in accordance with the Rules, within the governance structure described in the R&W Plan, and in accordance with applicable regulatory oversight to address each situation in order to best protect FICC, the Members, and the markets in which it operates.

Managing Member Default Losses and Liquidity Needs Through the Crisis Continuum. The Recovery Plan would describe the risk management surveillance, tools, and governance that FICC may employ across an increasing stress environment, which is referred to as the “Crisis Continuum.” This description would identify those tools that can be employed to mitigate losses, and mitigate or minimize liquidity needs, as the market environment becomes increasingly stressed. The phases of the Crisis Continuum would include (1) a stable market phase, (2) a stressed market phase, (3) a phase commencing with FICC’s decision to cease to act for a Member or Affiliated Family of Members,²³ and (4) a recovery phase. This section of the Recovery Plan would address conditions and circumstances relating to FICC’s decision to cease to act for a Member (referred to in the R&W Plan as a “defaulting Member,” and the event as a “Member default”) pursuant to the applicable Rules.²⁴

The Recovery Plan would provide context to its roadmap through this Crisis Continuum by describing FICC’s ongoing management of credit, market and liquidity risk across the Divisions, and its existing process for measuring and reporting its risks as they align with established thresholds for its tolerance of those risks. The Recovery Plan would discuss the management of credit/market risk and liquidity exposures together, because the tools that address these risks can be deployed either separately or in a coordinated approach in order to address both exposures. FICC manages these risk exposures collectively to limit their overall impact on FICC and the memberships of the Divisions. As part of its market risk management strategy, FICC manages its credit exposure to Members by determining the appropriate required

²³ The Plan would define an “Affiliated Family” of Members as a number of affiliated entities that are all Members of either GSD or MBSB.

²⁴ See GSD Rule 21 (Restrictions on Access to Services) and MBSB Rule 14 (Restrictions on Access to Services), *supra* note 5.

deposits to the GSD and MBSB Clearing Fund and monitoring its sufficiency, as provided for in the applicable Rules.²⁵ FICC manages its liquidity risks with an objective of maintaining sufficient resources to be able to fulfill obligations that have been guaranteed by FICC in the event of a Member default that presents the largest aggregate liquidity exposure to FICC over the settlement cycle.²⁶

The Recovery Plan would outline the metrics and indicators that FICC has developed to evaluate a stress situation against established risk tolerance thresholds. Each risk mitigation tool identified in the Recovery Plan would include a description of the escalation thresholds that allow for effective and timely reporting to the appropriate internal management staff and committees, or to the Board. The Recovery Plan would make clear that these tools and escalation protocols would be calibrated across each phase of the Crisis Continuum. The Recovery Plan would also establish that FICC would retain the flexibility to deploy such tools either separately or in a coordinated approach, and to use other alternatives to these actions and tools as necessitated by the circumstances of a particular Member default in accordance with the applicable Rules. Therefore, the Recovery Plan would both provide FICC with a roadmap to follow within each phase of the Crisis Continuum, and would permit it to adjust its risk management measures to address the unique circumstances of each event.

The Recovery Plan would describe the conditions that mark each phase of the Crisis Continuum, and would identify actions that FICC could take as it transitions through each phase in order to both prevent losses from materializing through active risk management, and to restore the financial health of FICC during a period of stress.

The “stable market phase” of the Crisis Continuum would describe active risk management activities in the

²⁵ See GSD Rule 4 (Clearing Fund and Loss Allocation) and MBSB Rule 4 (Clearing Fund and Loss Allocation), *supra* note 5. FICC’s market risk management strategy for both Divisions is designed to comply with Rule 17Ad-22(e)(4) under the Act, where these risks are referred to as “credit risks.” See also 17 CFR 240.17Ad-22(e)(4).

²⁶ FICC’s liquidity risk management strategy, including the manner in which FICC utilizes its liquidity tools, is described in the Clearing Agency Liquidity Risk Management Framework. See Securities Exchange Act Release Nos. 80489 (April 19, 2017), 82 FR 19120 (April 25, 2017) (SR-DTC-2017-004, SR-NSCC-2017-005, SR-FICC-2017-008); 81194 (July 24, 2017), 82 FR 35241 (July 28, 2017) (SR-DTC-2017-004, SR-NSCC-2017-005, SR-FICC-2017-008).

normal course of business. These activities would include (1) routine monitoring of margin adequacy through daily review of back testing and stress testing results that review the adequacy of the margin calculations for each of GSD and MBSD, and escalation of those results to internal and Board committees;²⁷ and (2) routine monitoring of liquidity adequacy through review of daily liquidity studies that measure sufficiency of available liquidity resources to meet cash settlement obligations of the Member that would generate the largest aggregate payment obligation.²⁸

The Recovery Plan would describe some of the indicators of the “stressed market phase” of the Crisis Continuum, which would include, for example, volatility in market prices of certain assets where there is increased uncertainty among market participants about the fundamental value of those assets. This phase would involve general market stresses, when no Member default would be imminent. Within the description of this phase, the Recovery Plan would provide that FICC may take targeted, routine risk management measures as necessary and as permitted by the Rules.

Within the “Member default phase” of the Crisis Continuum, the Recovery Plan would provide a roadmap for the existing procedures that FICC would follow in the event of a Member default and any decision by FICC to cease to act for that Member.²⁹ The Recovery Plan would provide that the objectives of FICC’s actions upon a Member or Affiliated Family default are to (1) minimize losses and market exposure of the affected Members and the applicable Division’s non-defaulting Members; and (2), to the extent practicable, minimize disturbances to the affected markets. The Recovery Plan would describe tools, actions, and related governance for both market risk monitoring and liquidity risk monitoring through this phase. For example, in connection with managing its market risk during this phase, FICC would, pursuant to the applicable Division’s Rules, (1) monitor

and assess the adequacy of the GSD and MBSD Clearing Fund resources; (2), when necessary and appropriate pursuant to the applicable Division’s Rules, assess and collect additional margin requirements; and (3) follow its operational procedures to liquidate the defaulting Member’s portfolio. Management of liquidity risk through this phase would involve ongoing monitoring of the adequacy of FICC’s liquidity resources, and the Recovery Plan would identify certain actions FICC may deploy as it deems necessary to mitigate a potential liquidity shortfall, which would include, for example, adjusting its strategy for closing out the defaulting Member’s portfolio or seeking additional liquidity resources. The Recovery Plan would state that, throughout this phase, relevant information would be escalated and reported to both internal management committees and the Board Risk Committee.

The Recovery Plan would also identify financial resources available to FICC, pursuant to the Rules, to address losses arising out of a Member default. Specifically, GSD Rule 4 and MBSD Rule 4, as each are proposed to be amended by the Loss Allocation Filing, would provide that losses be satisfied first by applying a “Corporate Contribution,” and then, if necessary, by allocating remaining losses to non-defaulting Members.³⁰

The “recovery phase” of the Crisis Continuum would describe actions that FICC may take to avoid entering into a wind-down of its business. In order to provide for an effective and timely recovery, the Recovery Plan would describe two stages of this phase: (1) A recovery corridor, during which FICC may experience stress events or observe early warning indicators that allow it to evaluate its options and prepare for the recovery phase; and (2) the recovery phase, which would begin on the date that FICC issues the first Loss Allocation Notice of the second loss allocation round with respect to a given “Event Period.”³¹

³⁰ See *supra* note 9. The Loss Allocation Filing proposes to amend GSD Rule 4 and MBSD Rule 4 to define the amount FICC would contribute to address a loss resulting from either a Member default or a non-default event as the “Corporate Contribution.” This amount would be 50 percent (50%) of the “General Business Risk Capital Requirement,” which is calculated pursuant to the Capital Policy and is an amount sufficient to cover potential general business losses so that FICC can continue operations and services as a going concern if those losses materialize, in compliance with Rule 17Ad-22(e)(15) under the Act. See also *supra* note 7; 17 CFR 240.17Ad-22(e)(15).

³¹ The Loss Allocation Filing proposes to amend Rule 4 to introduce the concept of an “Event Period” as the ten (10) Business Days beginning on

FICC expects that significant deterioration of liquidity resources would cause it to enter the recovery corridor stage of this phase, and, as such, the actions it may take at this stage would be aimed at replenishing those resources. Circumstances that could cause it to enter the recovery corridor may include, for example, a rapid and material change in market prices or substantial intraday activity volume by the defaulting Member, neither of which are mitigated by intraday margin calls, or subsequent defaults by other Members or Affiliated Families during a compressed time period. Throughout the recovery corridor, FICC would monitor the adequacy of the Divisions’ respective resources and the expected timing of replenishment of those resources, and would do so through the monitoring of certain metrics referred to as “Corridor Indicators.”

The majority of the Corridor Indicators, as identified in the Recovery Plan, relate directly to conditions that may require either Division to adjust its strategy for hedging and liquidating a defaulting Member’s portfolio, and any such changes would include an assessment of the status of the Corridor Indicators. Corridor Indicators would include, for example, effectiveness and speed of FICC’s efforts to close out the portfolio of the defaulting Member, and an impediment to the availability of its financial resources. For each Corridor Indicator, the Recovery Plan would identify (1) measures of the indicator, (2) evaluations of the status of the indicator, (3) metrics for determining the status of the deterioration or improvement of the indicator, and (4) “Corridor Actions,” which are steps that may be taken to improve the status of the indicator,³² as well as management

(i) with respect to a Member default, the day on which NSCC notifies Members that it has ceased to act for a Member under the Rules, or (ii) with respect to a non-default loss, the day that NSCC notifies Members of the determination by the Board that there is a non-default loss event, as described in greater detail in that filing. The proposed GSD Rule 4 and MBSD Rule 4 would define a “round” as a series of loss allocations relating to an Event Period, and would provide that the first Loss Allocation Notice in a first, second, or subsequent round shall expressly state that such notice reflects the beginning of a first, second, or subsequent round. The maximum allocable loss amount of a round is equal to the sum of the “Loss Allocation Caps” (as defined in the proposed GSD Rule 4 and MBSD Rule 4) of those Members included in the round. See *supra* note 9.

³² The Corridor Actions that would be identified in the Plan are indicative, but not prescriptive; therefore, if FICC needs to consider alternative actions due to the applicable facts and circumstances, the escalation of those alternative actions would follow the same escalation protocol

²⁷ FICC’s stress testing practices are described in the Clearing Agency Stress Testing Framework (Market Risk). See Securities Exchange Act Release Nos. 80485 (April 19, 2017), 82 FR 19131 (April 25, 2017) (SR-DTC-2017-005, SR-FICC-2017-009, SR-NSCC-2017-006); 81192 (July 24, 2017), 82 FR 35245 (July 28, 2017) (SR-DTC-2017-005, SR-FICC-2017-009, SR-NSCC-2017-006).

²⁸ See *supra* note 26.

²⁹ See GSD Rule 21 (Restrictions on Access to Services), GSD Rule 22A (Procedures for When the Corporation Ceases to Act), MBSD Rule 14 (Restrictions on Access to Services), and MBSD Rule 17 (Procedures for When the Corporation Ceases to Act), *supra* note 5.

escalations required to authorize those steps. Because FICC has never experienced the default of multiple Members, it has not, historically, measured the deterioration or improvements metrics of the Corridor Indicators. As such, these metrics were chosen based on the business judgment of FICC management.

The Recovery Plan would also describe the reporting and escalation of the status of the Corridor Indicators throughout the recovery corridor. Significant deterioration of a Corridor Indicator, as measured by the metrics set out in the Recovery Plan, would be escalated to the Board. FICC management would review the Corridor Indicators and the related metrics at least annually, and would modify these metrics as necessary in light of observations from simulations of Member defaults and other analyses. Any proposed modifications would be reviewed by the Management Risk Committee and the Board Risk Committee. The Recovery Plan would estimate that FICC may remain in the recovery corridor stage between one day and two weeks. This estimate is based on historical data observed in past Member defaults, the results of simulations of Member defaults, and periodic liquidity analyses conducted by FICC. The actual length of a recovery corridor would vary based on actual market conditions observed on the date and time FICC enters the recovery corridor stage of the Crisis Continuum, and FICC would expect the recovery corridor to be shorter in market conditions of increased stress.

The Recovery Plan would outline steps by which FICC may allocate its losses, and would state that the available tools related to allocation of losses would only be used in this and subsequent phases of the Crisis Continuum.³³ The Recovery Plan would also identify tools that may be used to address foreseeable shortfalls of FICC's liquidity resources following a Member default, and would provide that these tools may be used throughout the Crisis Continuum to address liquidity shortfalls if they arise. The goal in managing FICC's qualified liquidity resources is to maximize resource availability in an evolving stress situation, to maintain flexibility in the order and use of sources of liquidity,

identified in the Plan for the Corridor Indicator to which the action relates.

³³ As these matters are described in greater detail in the Loss Allocation Filing and in the proposed amendments to GSD Rule 4 and MBS Rule 4, described therein, reference is made to that filing and the details are not repeated here. *See supra* note 9.

and to repay any third party lenders of liquidity in a timely manner. Additional voluntary or uncommitted tools to address potential liquidity shortfalls, for example uncommitted bank loans, which may supplement FICC's other liquid resources described herein, would also be identified in the Recovery Plan. The Recovery Plan would state that, due to the extreme nature of a stress event that would cause FICC to consider the use of these liquidity tools, the availability and capacity of these liquidity tools, and the willingness of counterparties to lend, cannot be accurately predicted and are dependent on the circumstances of the applicable stress period, including market price volatility, actual or perceived disruptions in financial markets, the costs to FICC of utilizing these tools, and any potential impact on FICC's credit rating.

As stated above, the Recovery Plan would state that FICC will have entered the recovery phase on the date that it issues the first Loss Allocation Notice of the second loss allocation round with respect to a given Event Period. The Recovery Plan would provide that, during the recovery phase, FICC would continue and, as needed, enhance, the monitoring and remedial actions already described in connection with previous phases of the Crisis Continuum, and would remain in the recovery phase until its financial resources are expected to be or are fully replenished, or until the Wind-down Plan is triggered, as described below.

The Recovery Plan would describe governance for the actions and tools that may be employed within the Crisis Continuum, which would be dictated by the facts and circumstances applicable to the situation being addressed. Such facts and circumstances would be measured by the Corridor Indicators applicable to that phase of the Crisis Continuum, and, in most cases, by the measures and metrics that are assigned to those Corridor Indicators, as described above. Each of these indicators would have a defined review period and escalation protocol that would be described in the Recovery Plan. The Recovery Plan would also describe the governance procedures around a decision to cease to act for a Member, pursuant to the applicable Division's Rules, and around the management and oversight of the subsequent liquidation of the defaulting Member's portfolio. The Recovery Plan would state that, overall, FICC would retain flexibility in accordance with each Division's Rules, its governance structure, and its regulatory oversight, to address a particular situation in order to

best protect FICC and the Members, and to meet the primary objectives, throughout the Crisis Continuum, of minimizing losses and, where consistent and practicable, minimizing disturbance to affected markets.

Non-Default Losses. The Recovery Plan would outline how FICC may address losses that result from events other than a Member default. While these matters are addressed in greater detail in other documents, this section of the Plan would provide a roadmap to those documents and an outline for FICC's approach to monitoring and managing losses that could result from a non-default event. The Plan would first identify some of the risks FICC faces that could lead to these losses, which include, for example, the business and profit/loss risks of unexpected declines in revenue or growth of expenses; the operational risks of disruptions to systems or processes that could lead to large losses, including those resulting from, for example, a cyber-attack; and custody or investment risks that could lead to financial losses. The Recovery Plan would describe FICC's overall strategy for the management of these risks, which includes a "three lines of defense" approach to risk management that allows for comprehensive management of risk across the organization.³⁴ The Recovery Plan would also describe FICC's approach to financial risk and capital management. The Plan would identify key aspects of this approach, including, for example, an annual budget process, business line performance reviews with management, and regular review of capital requirements against LNA. These risk management strategies are collectively intended to allow FICC to effectively identify, monitor, and manage risks of non-default losses.

The Plan would identify the two categories of financial resources FICC maintains to cover losses and expenses arising from non-default risks or events as (1) LNA, maintained, monitored, and managed pursuant to the Capital Policy,

³⁴ The Clearing Agency Risk Management Framework includes a description of this "three lines of defense" approach to risk management, and addresses how FICC comprehensively manages various risks, including operational, general business, investment, custody, and other risks that arise in or are borne by it. *See* Securities Exchange Act Release No. 81635 (September 15, 2017), 82 FR 44224 (September 21, 2017) (SR-DTC-2017-013, SR-FICC-2017-016, SR-NSCC-2017-012). The Clearing Agency Operational Risk Management Framework describes the manner in which FICC manages operational risks, as defined therein. *See* Securities Exchange Act Release No. 81745 (September 28, 2017), 82 FR 46332 (October 4, 2017) (SR-DTC-2017-014, SR-FICC-2017-017, SR-NSCC-2017-013).

which include (a) amounts held in satisfaction of the General Business Risk Capital Requirement,³⁵ (b) the Corporate Contribution,³⁶ and (c) other amounts held in excess of FICC's capital requirements pursuant to the Capital Policy; and (2) resources available pursuant to the loss allocation provisions of GSD Rule 4 and MBS Rule 4.³⁷

The Plan would address the process by which the CFO and the DTCC Treasury group would determine which available LNA resources are most appropriate to cover a loss that is caused by a non-default event. This determination involves an evaluation of a number of factors, including the current and expected size of the loss, the expected time horizon over when the loss or additional expenses would materialize, the current and projected available LNA, and the likelihood LNA could be successfully replenished pursuant to the Replenishment Plan, if triggered.³⁸ Finally the Plan would discuss how FICC would apply its resources to address losses resulting from a non-default event, including the order of resources it would apply if the loss or liability exceeds FICC's excess LNA amounts, or is large relative thereto, and the Board has declared the event a "Declared Non-Default Loss Event" pursuant to GSD Rule 4 and MBS Rule 4.³⁹

The Plan would also describe proposed GSD Rule 50 (Market Disruption and Force Majeure) and proposed MBS Rule 40 (Market Disruption and Force Majeure), which FICC is proposing to adopt in the GSD Rule and MBS Rules, respectively. This Proposed Rule would provide transparency around how FICC would address extraordinary events that may occur outside its control. Specifically, the Proposed Rule would define a "Market Disruption Event" and the governance around a determination that such an event has occurred. The Proposed Rule would also describe FICC's authority to take actions during the pendency of a Market Disruption Event that it deems appropriate to address such an event and facilitate the continuation of its services, if practicable, as described in greater detail below.

The Plan would describe the interaction between the Proposed Rule and FICC's existing processes and procedures addressing business

continuity management and disaster recovery (generally, the "BCM/DR procedures"), making clear that the Proposed Rule is designed to support those BCM/DR procedures and to address circumstances that may be exogenous to FICC and not necessarily addressed by the BCM/DR procedures. Finally, the Plan would describe that, because the operation of the Proposed Rule is specific to each applicable Market Disruption Event, the Proposed Rule does not define a time limit on its application. However, the Plan would note that actions authorized by the Proposed Rule would be limited to the pendency of the applicable Market Disruption Event, as made clear in the Proposed Rule. Overall, the Proposed Rule is designed to mitigate risks caused by Market Disruption Events and, thereby, minimize the risk of financial loss that may result from such events.

Recovery Tool Characteristics. The Recovery Plan would describe FICC's evaluation of the tools identified within the Recovery Plan, and its rationale for concluding that such tools are comprehensive, effective, and transparent, and that such tools provide appropriate incentives to Members and minimize negative impact on Members and the financial system, in compliance with guidance published by the Commission in connection with the adoption of Rule 17Ad-22(e)(3)(ii) under the Act.⁴⁰ FICC's analysis and the conclusions set forth in this section of the Recovery Plan are described in greater detail in Item 3(b) of this filing, below.

FICC Wind-Down Plan

The Wind-down Plan would provide the framework and strategy for the orderly wind-down of FICC if the use of the recovery tools described in the Recovery Plan do not successfully return FICC to financial viability. While FICC believes that, given the comprehensive nature of the recovery tools, such event is extremely unlikely, as described in greater detail below, FICC is proposing a wind-down strategy that provides for (1) the transfer of FICC's business, assets and memberships of both Divisions to another legal entity, (2) such transfer being effected in connection with proceedings under Chapter 11 of the U.S. Federal Bankruptcy Code,⁴¹ and (3) after effectuating this transfer, FICC liquidating any remaining assets in an orderly manner in bankruptcy

proceedings. FICC believes that the proposed transfer approach to a wind-down would meet its objectives of (1) assuring that FICC's critical services will be available to the market as long as there are Members in good standing, and (2) minimizing disruption to the operations of Members and financial markets generally that might be caused by FICC's failure.

In describing the transfer approach to FICC's Wind-down Plan, the Plan would identify the factors that FICC considered in developing this approach, including the fact that FICC does not own material assets that are unrelated to its clearance and settlement activities. As such, a business reorganization or "bail-in" of debt approach would be unlikely to mitigate significant losses. Additionally, FICC's approach was developed in consideration of its critical and unique position in the U.S. markets, which precludes any approach that would cause FICC's critical services to no longer be available.

First, the Wind-down Plan would describe the potential scenarios that could lead to the wind-down of FICC, and the likelihood of such scenarios. The Wind-down Plan would identify the time period leading up to a decision to wind-down FICC as the "Runway Period." This period would follow the implementation of any recovery tools, as it may take a period of time, depending on the severity of the market stress at that time, for these tools to be effective or for FICC to realize a loss sufficient to cause it to be unable to effectuate settlements and repay its obligations.⁴² The Wind-down Plan would identify some of the indicators that it has entered this Runway Period, which would include, for example, successive Member defaults, significant Member retirements thereafter, and FICC's inability to replenish its financial resources following the liquidation of the portfolio of the defaulting Member(s).

The trigger for implementing the Wind-down Plan would be a determination by the Board that recovery efforts have not been, or are unlikely to be, successful in returning FICC to viability as a going concern. As described in the Plan, FICC believes this is an appropriate trigger because it is both broad and flexible enough to cover a variety of scenarios, and would align

⁴² The Wind-down Plan would state that, given FICC's position as a user-governed financial market utility, it is possible that Members might voluntarily elect to provide additional support during the recovery phase leading up to a potential trigger of the Wind-down Plan, but would also make clear that FICC cannot predict the willingness of Members to do so.

⁴⁰ Standards for Covered Clearing Agencies, Securities Exchange Act Release No. 78961 (September 28, 2016), 81 FR 70786 (October 13, 2016) (S7-03-14).

⁴¹ 11 U.S.C. 1101 *et seq.*

incentives of FICC and the Members to avoid actions that might undermine FICC's recovery efforts. Additionally, this approach takes into account the characteristics of FICC's recovery tools and enables the Board to consider (1) the presence of indicators of a successful or unsuccessful recovery, and (2) potential for knock-on effects of continued iterative application of FICC's recovery tools.

The Wind-down Plan would describe the general objectives of the transfer strategy, and would address assumptions regarding the transfer of FICC's critical services, business, assets and membership, and the assignment of GSD's link with another FMI, to another legal entity that is legally, financially, and operationally able to provide FICC's critical services to entities that wish to continue their membership following the transfer ("Transferee"). The Wind-down Plan would provide that the Transferee would be either (1) a third party legal entity, which may be an existing or newly established legal entity or a bridge entity formed to operate the business on an interim basis to enable the business to be transferred subsequently ("Third Party Transferee"); or (2) an existing, debt-free failover legal entity established ex-ante by DTCC ("Failover Transferee") to be used as an alternative Transferee in the event that no viable or preferable Third Party Transferee timely commits to acquire FICC's business. FICC would seek to identify the proposed Transferee, and negotiate and enter into transfer arrangements during the Runway Period and prior to making any filings under Chapter 11 of the U.S. Federal Bankruptcy Code.⁴³ As stated above, the Wind-down Plan would anticipate that the transfer to the Transferee be effected in connection with proceedings under Chapter 11 of the U.S. Federal Bankruptcy Code, and pursuant to a bankruptcy court order under Section 363 of the Bankruptcy Code, such that the transfer would be free and clear of claims against, and interests in, FICC, except to the extent expressly provided in the court's order.⁴⁴

In order to effect a timely transfer of its services and minimize the market and operational disruption of such transfer, FICC would expect to transfer all of its critical services and any non-critical services that are ancillary and beneficial to a critical service, or that otherwise have substantial user demand from the continuing membership. Following the transfer, the Wind-down

Plan would anticipate that the Transferee and its continuing membership would determine whether to continue to provide any transferred non-critical service on an ongoing basis, or terminate the non-critical service following some transition period. FICC's Wind-down Plan would anticipate that the Transferee would enter into a transition services agreement with DTCC so that DTCC would continue to provide the shared services it currently provides to FICC, including staffing, infrastructure and operational support. The Wind-down Plan would also anticipate the assignment of FICC's link arrangements, including its arrangements with clearing banks and GSD's cross-margining arrangement with CME, described above, to the Transferee.⁴⁵ The Wind-down Plan would provide that Members' open positions existing prior to the effective time of the transfer would be addressed by the provisions of the proposed Wind-down Rule, as defined and described below, and the existing GSD Rule 22B (Corporation Default) and MBS Rule 17 (Corporation Default) (collectively, "Corporation Default Rule"), as applicable, and that the Transferee would not acquire any pending or open transactions with the transfer of the business.⁴⁶ The Wind-down Plan would anticipate that the Transferee would accept transactions for processing with a trade date from and after the effective time of the transfer.

The Wind-down Plan would provide that, following the effectiveness of the transfer to the Transferee, the wind-down of FICC would involve addressing any residual claims against FICC through the bankruptcy process and liquidating the legal entity. As such, and as stated above, the Wind-down Plan does not contemplate FICC continuing to provide services in any capacity following the transfer time, and any services not transferred would be terminated.

The Wind-down Plan would also identify the key dependencies for the effectiveness of the transfer, which include regulatory approvals that would

permit the Transferee to be legally qualified to provide the transferred services from and after the transfer, and approval by the applicable bankruptcy court of, among other things, the proposed sale, assignments, and transfers to the Transferee.

The Wind-down Plan would address governance matters related to the execution of the transfer of FICC's business and its wind-down. The Wind-down Plan would address the duties of the Board to execute the wind-down of FICC in conformity with (1) the Rules, (2) the Board's fiduciary duties, which mandate that it exercise reasonable business judgment in performing these duties, and (3) FICC's regulatory obligations under the Act as a registered clearing agency. The Wind-down Plan would also identify certain factors the Board may consider in making these decisions, which would include, for example, whether FICC could safely stabilize the business and protect its value without seeking bankruptcy protection, and FICC's ability to continue to meet its regulatory requirements.

The Wind-down Plan would describe (1) actions FICC or DTCC may take to prepare for wind-down in the period before FICC experiences any financial distress, (2) actions FICC would take both during the recovery phase and the Runway Period to prepare for the execution of the Wind-down Plan, and (3) actions FICC would take upon commencement of bankruptcy proceedings to effectuate the Wind-down Plan.

Finally, the Wind-down Plan would include an analysis of the estimated time and costs to effectuate the plan, and would provide that this estimate be reviewed and approved by the Board annually. In order to estimate the length of time it might take to achieve a recovery or orderly wind-down of FICC's critical operations, as contemplated by the R&W Plan, the Wind-down Plan would include an analysis of the possible sequencing and length of time it might take to complete an orderly wind-down and transfer of critical operations, as described in earlier sections of the R&W Plan. The Wind-down Plan would also include in this analysis consideration of other factors, including the time it might take to complete any further attempts at recovery under the Recovery Plan. The Wind-down Plan would then multiply this estimated length of time by FICC's average monthly operating expenses, including adjustments to account for changes to FICC's profit and expense profile during these circumstances, over the previous twelve months to

⁴³ See 11 U.S.C. *et seq.*

⁴⁴ See *id.* at 363.

⁴⁵ The proposed transfer arrangements outlined in the Wind-down Plan do not contemplate the transfer of any credit or funding agreements, which are generally not assignable by FICC. However, to the extent the Transferee adopts rules substantially identical to those FICC has in effect prior to the transfer, it would have the benefit of any rules-based liquidity funding. The Wind-down Plan contemplates that neither of the Divisions' respective Clearing Funds would be transferred to the Transferee, as they are not held in a bankruptcy remote manner and they are the primary prefunded liquidity resource to be accessed in the recovery phase.

⁴⁶ See *supra* note 5.

determine the amount of LNA that it should hold to achieve a recovery or orderly wind-down of FICC's critical operations. The estimated wind-down costs would constitute the "Recovery/Wind-down Capital Requirement" under the Capital Policy.⁴⁷ Under that policy, the General Business Risk Capital Requirement is calculated as the greatest of three estimated amounts, one of which is this Recovery/Wind-down Capital Requirement.⁴⁸

The R&W Plan is designed as a roadmap, and the types of actions that may be taken both leading up to and in connection with implementation of the Wind-down Plan would be primarily addressed in other supporting documentation referred to therein.

The Wind-down Plan would address proposed GSD Rule 22D and MBSB Rule 17B (Wind-down of the Corporation), which would be adopted to facilitate the implementation of the Wind-down Plan, and are discussed below.

Proposed Rules

In connection with the adoption of the R&W Plan, FICC is proposing to adopt the Proposed Rules, each described below. The Proposed Rules would facilitate the execution of the R&W Plan and would provide Members and Limited Members with transparency as to critical aspects of the Plan, particularly as they relate to the rights and responsibilities of both FICC and Members. The Proposed Rules also provide a legal basis to these aspects of the Plan.

GSD Rule 22D and MBSB Rule 17B (Wind-Down of the Corporation)

The proposed GSD Rule 22D and MBSB Rule 17B (collectively, "Wind-down Rule") would be adopted by both Divisions to facilitate the execution of the Wind-down Plan. The Wind-down Rule would include a proposed set of defined terms that would be applicable only to the provisions of this Proposed Rule. The Wind-down Rule would make clear that a wind-down of FICC's business would occur (1) after a decision is made by the Board, and (2) in connection with the transfer of FICC's services to a Transferee, as described therein. Because GSD and MBSB are both divisions of FICC, the individual Wind-down Rules are designed to work together. A decision by the Board to initiate the Wind-down Plan would be pursuant to, and trigger the provisions of, the Wind-down Rule of each Division simultaneously. Generally, the

proposed Wind-down Rule is designed to create clear mechanisms for the transfer of Eligible Members, Eligible Limited Members, and Settling Banks (as these terms would be defined in the Wind-down Rule), and FICC's business in order to provide for continued access to critical services and to minimize disruption to the markets in the event the Wind-down Plan is initiated.

Wind-down Trigger. First, the Proposed Rule would make clear that the Board is responsible for initiating the Wind-down Plan, and would identify the criteria the Board would consider when making this determination. As provided for in the Wind-down Plan and in the proposed Wind-down Rule, the Board would initiate the Plan if, in the exercise of its business judgment and subject to its fiduciary duties, it has determined that the execution of the Recovery Plan has not or is not likely to restore FICC to viability as a going concern, and the implementation of the Wind-down Plan, including the transfer of FICC's business, is in the best interests of FICC, Members and Limited Members of both Divisions, its shareholders and creditors, and the U.S. financial markets.

Identification of Critical Services; Designation of Dates and Times for Specific Actions. The Proposed Rule would provide that, upon making a determination to initiate the Wind-down Plan, the Board would identify the critical and non-critical services that would be transferred to the Transferee at the Transfer Time (as defined below and in the Proposed Rule), as well as any non-critical services that would not be transferred to the Transferee. The proposed Wind-down Rule would establish that any services transferred to the Transferee will only be provided by the Transferee as of the Transfer Time, and that any non-critical services that are not transferred to the Transferee would be terminated at the Transfer Time. The Proposed Rule would also provide that the Board would establish (1) an effective time for the transfer of FICC's business to a Transferee ("Transfer Time"), (2) the last day that transactions may be submitted to either Division for processing ("Last Transaction Acceptance Date"), and (3) the last day that transactions submitted to either Division will be settled ("Last Settlement Date").

Treatment of Pending Transactions. The Wind-down Rule would also authorize the Board to provide for the settlement of pending transactions of either Division prior to the Transfer Time, so long as the applicable Division's Corporation Default Rule has

not been triggered. For example, the Proposed Rule would provide the Board with the ability to, if it deems practicable, based on FICC's resources at that time, allow pending transactions of either Division to complete prior to the transfer of FICC's business to a Transferee. The Board would also have the ability to allow Members to only submit trades to the applicable Division that would effectively offset pending positions or provide that transactions will be processed in accordance with special or exception processing procedures. The Proposed Rule is designed to enable these actions in order to facilitate settlement of pending transactions of the applicable Division and reduce claims against FICC that would have to be satisfied after the transfer has been effected. If none of these actions are deemed practicable (or if the applicable Division's Corporation Default Rule has been triggered with respect to a Division), then the provisions of the proposed Corporation Default Rule would apply to the treatment of open, pending transactions of such Division.

The Proposed Rule would make clear, however, that neither Division would accept any transactions for processing after the Last Transaction Acceptance Date or which are designated to settle after the Last Settlement Date for such Division. Any transactions to be processed and/or settled after the Transfer Time would be required to be submitted to the Transferee, and would not be FICC's responsibility.

Notice Provisions. The proposed Wind-down Rule would provide that, upon a decision to implement the Wind-down Plan, FICC would provide its Members and Limited Members and its regulators with a notice that includes material information relating to the Wind-down Plan and the anticipated transfer of the membership of both Divisions and business, including, for example, (1) a brief statement of the reasons for the decision to implement the Wind-down Plan; (2) identification of the Transferee and information regarding the transaction by which the transfer of FICC's business would be effected; (3) the Transfer Time, Last Transaction Acceptance Date, and Last Settlement Date; and (4) identification of Eligible Members and Eligible Limited Members, and the critical and non-critical services that would be transferred to the Transferee at the Transfer Time, as well as those Non-Eligible Members and Non-Eligible Limited Members (as defined in the Proposed Rule), and any non-critical services that would not be included in the transfer. FICC would also make

⁴⁷ See *supra* note 7.

⁴⁸ See *supra* note 7.

available the rules and procedures and membership agreements of the Transferee.

Transfer of Membership. The proposed Wind-down Rule would address the expected transfer of both Divisions' membership to the Transferee, which FICC would seek to effectuate by entering into an arrangement with a Failover Transferee, or by using commercially reasonable efforts to enter into such an arrangement with a Third Party Transferee. Therefore, the Wind-down Rule would provide Members, Limited Members and Settling Banks with notice that, in connection with the implementation of the Wind-down Plan and with no further action required by any party, (1) their membership with the applicable Division would transfer to the Transferee, (2) they would become party to a membership agreement with such Transferee, and (3) they would have all of the rights and be subject to all of the obligations applicable to their membership status under the rules of the Transferee. These provisions would not apply to any Member or Limited Member that is either in default of an obligation to FICC or has provided notice of its election to withdraw its membership from the applicable Division. Further, the proposed Wind-down Rule would make clear that it would not prohibit (1) Members and Limited Members that are not transferred by operation of the Wind-down Rule from applying for membership with the Transferee, or (2) Members, Limited Members, and Settling Banks that would be transferred to the Transferee from withdrawing from membership with the Transferee.⁴⁹

Comparability Period. The proposed automatic mechanism for the transfer of both Divisions' memberships is intended to provide the membership with continuous access to critical services in the event of FICC's wind-down, and to facilitate the continued prompt and accurate clearance and settlement of securities transactions. Further to this goal, the proposed Wind-down Rule would provide that FICC would enter into arrangements with a Failover Transferee, or would use commercially reasonable efforts to enter into arrangements with a Third Party Transferee, providing that, in either case, with respect to the critical services and any non-critical services that are

transferred from FICC to the Transferee, for at least a period of time to be agreed upon ("Comparability Period"), the business transferred from FICC to the Transferee would be operated in a manner that is comparable to the manner in which the business was previously operated by FICC. Specifically, the proposed Wind-down Rule would provide that: (1) The rules of the Transferee and terms of membership agreements would be comparable in substance and effect to the analogous Rules and membership agreements of FICC; (2) the rights and obligations of any Members, Limited Members and Settling Banks that are transferred to the Transferee would be comparable in substance and effect to their rights and obligations as to FICC; and (3) the Transferee would operate the transferred business and provide any services that are transferred in a comparable manner to which such services were provided by FICC. The purpose of these provisions and the intended effect of the proposed Wind-down Rule is to facilitate a smooth transition of FICC's business to a Transferee and to provide that, for at least the Comparability Period, the Transferee (1) would operate the transferred business in a manner that is comparable in substance and effect to the manner in which the business was operated by FICC, and (2) would not require sudden and disruptive changes in the systems, operations and business practices of the new members of the Transferee.

Subordination of Claims Provisions and Miscellaneous Matters. The proposed Wind-down Rule would also include a provision addressing the subordination of unsecured claims against FICC of its Members and Limited Members who fail to participate in FICC's recovery efforts (*i.e.*, such firms are delinquent in their obligations to FICC or elect to retire from FICC in order to minimize their obligations with respect to the allocation of losses, pursuant to the Rules). This provision is designed to incentivize Members to participate in FICC's recovery efforts.⁵⁰

The proposed Wind-down Rule would address other ex-ante matters, including provisions providing that its Members, Limited Members and

Settling Banks (1) will assist and cooperate with FICC to effectuate the transfer of FICC's business to a Transferee, (2) consent to the provisions of the rule, and (3) grant FICC power of attorney to execute and deliver on their behalf documents and instruments that may be requested by the Transferee. Finally, the Proposed Rule would include a limitation of liability for any actions taken or omitted to be taken by FICC pursuant to the Proposed Rule.

GSD Rule 50 and MBSD Rule 40 (Market Disruption and Force Majeure)

The proposed GSD Rule 50 and MBSD Rule 40 (Market Disruption and Force Majeure) (collectively, "Force Majeure Rule") would address FICC's authority to take certain actions upon the occurrence, and during the pendency, of a "Market Disruption Event," as defined therein. Because GSD and MBSD are both divisions of FICC, the individual Force Majeure Rules are designed to work together. A decision by the Board or management of FICC that a Market Disruption Event has occurred in accordance with the Force Majeure Rule would trigger the provisions of the Force Majeure Rule of each Division simultaneously. The Proposed Rule is designed to clarify FICC's ability to take actions to address extraordinary events outside of the control of FICC and of the memberships of the Divisions, and to mitigate the effect of such events by facilitating the continuity of services (or, if deemed necessary, the temporary suspension of services). To that end, under the proposed Force Majeure Rule, FICC would be entitled, during the pendency of a Market Disruption Event, to (1) suspend the provision of any or all services, and (2) take, or refrain from taking, or require its Members and Limited Members to take, or refrain from taking, any actions it considers appropriate to address, alleviate, or mitigate the event and facilitate the continuation of FICC's services as may be practicable.

The proposed Force Majeure Rule would identify the events or circumstances that would be considered a "Market Disruption Event," including, for example, events that lead to the suspension or limitation of trading or banking in the markets in which FICC operates, or the unavailability or failure of any material payment, bank transfer, wire or securities settlement systems. The proposed Force Majeure Rule would define the governance procedures for how FICC would determine whether, and how, to implement the provisions of the rule. A determination that a Market Disruption Event has occurred would generally be

⁴⁹The Members and Limited Members whose membership is transferred to the Transferee pursuant to the proposed Wind-down Rule would submit transactions to be processed and settled subject to the rules and procedures of the Transferee, including any applicable margin charges or other financial obligations.

⁵⁰Nothing in the proposed Wind-down Rule would seek to prevent a Member, Limited Member or Settling Bank that retired its membership at either of the Divisions from applying for membership with the Transferee. Once its FICC membership is terminated, however, such firm would not be able to benefit from the membership assignment that would be effected by this proposed Wind-down Rule, and it would have to apply for membership directly with the Transferee, subject to its membership application and review process.

made by the Board, but the Proposed Rule would provide for limited, interim delegation of authority to a specified officer or management committee if the Board would not be able to take timely action. In the event such delegated authority is exercised, the proposed Force Majeure Rule would require that the Board be convened as promptly as practicable, no later than five Business Days after such determination has been made, to ratify, modify, or rescind the action. The proposed Force Majeure Rule would also provide for prompt notification to the Commission, and advance consultation with Commission staff, when practicable. The Proposed Rule would require Members and Limited Members to notify FICC immediately upon becoming aware of a Market Disruption Event, and, likewise, would require FICC to notify Members and Limited Members if it has triggered the Proposed Rule.

Finally, the Proposed Rule would address other related matters, including a limitation of liability for any failure or delay in performance, in whole or in part, arising out of the Market Disruption Event.

Proposed Changes to GSD Rules, MBSD Rules, and EPN Rules

In order to incorporate the Proposed Rules into the Rules and the EPN Rules, FICC is also proposing to amend (1) GSD Rule 3A (Sponsoring Members and Sponsored Members), GSD Rule 3B (Centrally Cleared Institutional Triparty Service) and GSD Rule 13 (Funds-Only Settlement); (2) MBSD Rule 3A (Cash Settlement Bank Members); and (3) Rule 1 of the EPN Rules. As shown on Exhibit 5b, these proposed changes would clarify that certain types of Limited Members, as identified in those rules, would be subject to the Proposed Rules.

Expected Effect on and Management of Risk

FICC believes the proposal to adopt the R&W Plan and the Proposed Rules would enable it to better manage its risks. As described above, the Recovery Plan would identify the recovery tools and the risk management activities that FICC may use to address risks of uncovered losses or shortfalls resulting from a Member default and losses arising from non-default events. By creating a framework for its management of risks across an evolving stress scenario and providing a roadmap for actions it may employ to monitor and, as needed, stabilize its financial condition, the Recovery Plan would strengthen FICC's ability to manage risk. The Wind-down Plan would also enable

FICC to better manage its risks by establishing the strategy and framework for its orderly wind-down and the transfer of FICC's business when the Wind-down Plan is triggered. By creating clear mechanisms for the transfer of the Divisions' membership and business, the Wind-down Plan would facilitate continued access to FICC's critical services and minimize market impact of the transfer and enable FICC to better manage risks related to its wind-down.

FICC believes the Proposed Rules would enable it to better manage its risks by facilitating, and providing a legal basis for, the implementation of critical aspects of the R&W Plan. The Proposed Rules would provide Members and Limited Members with transparency around those provisions of the R&W Plan that relate to their and FICC's rights, responsibilities and obligations. Therefore, FICC believes the Proposed Rules would enable it to better manage its risks by providing this transparency and creating certainty, to the extent practicable, around the occurrence of a Market Disruption Event (as such term is defined in the proposed Force Majeure Rule), and around the implementation of the Wind-down Plan.

Consistency With the Clearing Supervision Act

The stated purpose of the Clearing Supervision Act, is to mitigate systemic risk in the financial system and promote financial stability by, among other things, promoting uniform risk management standards for systemically important financial market utilities and strengthening the liquidity of systemically important financial market utilities.⁵¹ Section 805(a)(2) of the Clearing Supervision Act⁵² also authorizes the Commission to prescribe risk management standards for the payment, clearing, and settlement activities of designated clearing entities, like FICC, for which the Commission is the supervisory agency. Section 805(b) of the Clearing Supervision Act⁵³ states that the objectives and principles for risk management standards prescribed under Section 805(a) shall be to promote robust risk management, promote safety and soundness, reduce systemic risks, and support the stability of the broader financial system.

FICC believes that the proposal is consistent with Section 805(b) of the Clearing Supervision Act because it is designed to address each of these objectives. The Recovery Plan and the

proposed Force Majeure Rule would promote robust risk management and would reduce systemic risks by providing FICC with a roadmap for actions it may employ to monitor and manage its risks, and, as needed, to stabilize its financial condition in the event those risks materialize. Further, the Recovery Plan would identify the triggers of recovery tools, but would not provide that those triggers necessitate the use of those tools. Instead, the Recovery Plan would provide that the triggers of these tools lead to escalation to an appropriate management body, which would have the authority and flexibility to respond appropriately to the situation. Essentially, the Recovery Plan and the proposed Force Majeure Rule are designed to minimize losses to both FICC and Members by giving FICC the ability to determine the most appropriate way to address each stress situation. This approach would allow for proper evaluation of the situation and the possible impacts of the use of the available recovery tools in order to minimize the negative effects of the stress situation, and would reduce systemic risks related to the implementation of the Recovery Plan and the underlying recovery tools.

The Wind-down Plan and the proposed Wind-down Rule, which would facilitate the implementation of the Wind-down Plan, would promote safety and soundness and would support the stability of the broader financial system, because they would establish a framework for the orderly wind-down of FICC's business and would set forth clear mechanics for the transfer of its critical services and the memberships of both Divisions. By designing the Wind-down Plan and this Proposed Rule to enable the continuity of FICC's critical services and membership, FICC believes they would promote safety and soundness and would support stability in the broader financial system in the event the Wind-down Plan is implemented.

By assisting FICC to promote robust risk management, promote safety and soundness, reduce systemic risks, and support the stability of the broader financial system, as described above, FICC believes the proposal is consistent with Section 805(b) of the Clearing Supervision Act.⁵⁴

FICC also believes that the proposal is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a registered clearing agency. In particular, FICC believes that the R&W Plan, each of the Proposed Rules and the other proposed

⁵¹ 12 U.S.C. 5461(b).

⁵² *Id.* at 5464(a)(2).

⁵³ *Id.* at 5464(b).

⁵⁴ *Id.*

changes to the Rules and the EPN Rules are consistent with Section 17A(b)(3)(F) of the Act,⁵⁵ the R&W Plan and each of the Proposed Rules are consistent with Rule 17Ad-22(e)(3)(ii) under the Act,⁵⁶ and the R&W Plan is consistent with Rule 17Ad-22(e)(15)(ii) under the Act,⁵⁷ for the reasons described below.

Section 17A(b)(3)(F) of the Act requires, in part, that the rules of FICC be designed to promote the prompt and accurate clearance and settlement of securities transactions, and to assure the safeguarding of securities and funds which are in the custody or control of FICC or for which it is responsible.⁵⁸ The Recovery Plan and the proposed Force Majeure Rule would promote the prompt and accurate clearance and settlement of securities transactions by providing FICC with a roadmap for actions it may employ to mitigate losses, and monitor and, as needed, stabilize, its financial condition, which would allow it to continue its critical clearance and settlement services in stress situations. Further, as described above, the Recovery Plan is designed to identify the actions and tools FICC may use to address and minimize losses to both FICC and Members. The Recovery Plan and the proposed Force Majeure Rule would provide FICC's management and the Board with guidance in this regard by identifying the indicators and governance around the use and application of such tools to enable them to address stress situations in a manner most appropriate for the circumstances. Therefore, the Recovery Plan and the proposed Force Majeure Rule would also contribute to the safeguarding of securities and funds which are in the custody or control of FICC or for which it is responsible by enabling actions that would address and minimize losses.

The Wind-down Plan and the proposed Wind-down Rule, which would facilitate the implementation of the Wind-down Plan, would also promote the prompt and accurate clearance and settlement of securities transactions and assure the safeguarding of securities and funds which are in the custody or control of FICC or for which it is responsible. The Wind-down Plan and the proposed Wind-down Rule would collectively establish a framework for the transfer and orderly wind-down of FICC's business. These proposals would establish clear mechanisms for the transfer of FICC's critical services and membership. By doing so, the Wind-down Plan and this

Proposed Rule are designed to facilitate the continuity of FICC's critical services and enable Members and Limited Members to maintain access to FICC's services through the transfer of its Divisions' memberships in the event the Wind-down Plan is triggered by the Board. Therefore, by facilitating the continuity of FICC's critical clearance and settlement services, FICC believes the proposals would promote the prompt and accurate clearance and settlement of securities transactions. Further, by creating a framework for the transfer and orderly wind-down of FICC's business, FICC believes the proposals would enhance the safeguarding of securities and funds which are in the custody or control of FICC or for which it is responsible.

Finally, the other proposed changes to the Rules and the EPN Rules would clarify the application of the Proposed Rules to certain types of Limited Members and would enable these Limited Members to readily understand their rights and obligations. As such, FICC believes these proposed changes would enable Limited Members that are governed by the applicable rules to have a better understanding of those rules and, thereby, would assist in promoting the prompt and accurate clearance and settlement of securities transactions.

Therefore, FICC believes the R&W Plan, each of the Proposed Rules, and the other proposed changes are consistent with the requirements of Section 17A(b)(3)(F) of the Act.⁵⁹

Rule 17Ad-22(e)(3)(ii) under the Act requires FICC to establish, implement, maintain and enforce written policies and procedures reasonably designed to maintain a sound risk management framework for comprehensively managing legal, credit, liquidity, operational, general business, investment, custody, and other risks that arise in or are borne by the covered clearing agency, which includes plans for the recovery and orderly wind-down of the covered clearing agency necessitated by credit losses, liquidity shortfalls, losses from general business risk, or any other losses.⁶⁰ The R&W Plan and each of the Proposed Rules are designed to meet the requirements of Rule 17Ad-22(e)(3)(ii).⁶¹

The R&W Plan would be maintained by FICC in compliance with Rule 17Ad-22(e)(3)(ii) in that it provides plans for the recovery and orderly wind-down of FICC necessitated by credit losses, liquidity shortfalls, losses from general business risk, or any other losses, as

described above.⁶² Specifically, the Recovery Plan would define the risk management activities, stress conditions and indicators, and tools that FICC may use to address stress scenarios that could eventually prevent it from being able to provide its critical services as a going concern. Through the framework of the Crisis Continuum, the Recovery Plan would address measures that FICC may take to address risks of credit losses and liquidity shortfalls, and other losses that could arise from a Member default. The Recovery Plan would also address the management of general business risks and other non-default risks that could lead to losses.

The Wind-down Plan would be triggered by a determination by the Board that recovery efforts have not been, or are unlikely to be, successful in returning FICC to viability as a going concern. Once triggered, the Wind-down Plan would set forth clear mechanisms for the transfer of the memberships of both Divisions and FICC's business, and would be designed to facilitate continued access to FICC's critical services and to minimize market impact of the transfer. By establishing the framework and strategy for the execution of the transfer and wind-down of FICC in order to facilitate continuous access to FICC's critical services, the Wind-down Plan establishes a plan for the orderly wind-down of FICC. Therefore, FICC believes the R&W Plan would provide plans for the recovery and orderly wind-down of the covered clearing agency necessitated by credit losses, liquidity shortfalls, losses from general business risk, or any other losses, and, as such, meets the requirements of Rule 17Ad-22(e)(3)(ii).⁶³

As described in greater detail above, the Proposed Rules are designed to facilitate the execution of the R&W Plan, provide Members and Limited Members with transparency regarding the material provisions of the Plan, and provide FICC with a legal basis for implementation of those provisions. As such, FICC also believes the Proposed Rules meet the requirements of Rule 17Ad-22(e)(3)(ii).⁶⁴

FICC has evaluated the recovery tools that would be identified in the Recovery Plan and has determined that these tools are comprehensive, effective, and transparent, and that such tools provide appropriate incentives to Members to manage the risks they present. The recovery tools, as outlined in the Recovery Plan and in the proposed

⁵⁵ 15 U.S.C. 78q-1(b)(3)(F).

⁵⁶ 17 CFR 240.17Ad-22(e)(3)(ii).

⁶⁰ 17 CFR 240.17Ad-22(e)(3)(ii).

⁶¹ *Id.*

⁶² *Id.*

⁶³ *Id.*

⁶⁴ *Id.*

Force Majeure Rule, provide FICC with a comprehensive set of options to address its material risks and support the resiliency of its critical services under a range of stress scenarios. FICC also believes the recovery tools are effective, as FICC has both legal basis and operational capability to execute these tools in a timely and reliable manner. Many of the recovery tools are provided for in the Rules; Members are bound by the Rules through their membership agreements with FICC, and the Rules are adopted pursuant to a framework established by Rule 19b-4 under the Act,⁶⁵ providing a legal basis for the recovery tools found therein. Other recovery tools have legal basis in contractual arrangements to which FICC is a party, as described above. Further, as many of the tools are embedded in FICC's ongoing risk management practices or are embedded into its predefined default-management procedures, FICC is able to execute these tools, in most cases, when needed and without material operational or organizational delay.

The majority of the recovery tools are also transparent, as they are, or are proposed to be, included in the Rules, which are publicly available. FICC believes the recovery tools also provide appropriate incentives to Members, as they are designed to control the amount of risk they present to FICC's clearance and settlement system. Members' financial obligations to FICC, particularly their required deposits to the applicable Division's Clearing Fund, are measured by the risk posed by the Members' activity in FICC's systems, which incentivizes them to manage that risk which would correspond to lower financial obligations. Finally, FICC's Recovery Plan provides for a continuous evaluation of the systemic consequences of executing its recovery tools, with the goal of minimizing their negative impact. The Recovery Plan would outline various indicators over a timeline of increasing stress, the Crisis Continuum, with escalation triggers to FICC management or the Board, as appropriate. This approach would allow for timely evaluation of the situation and the possible impacts of the use of a recovery tool in order to minimize the negative effects of the stress scenario. Therefore, FICC believes that the recovery tools that would be identified and described in its Recovery Plan, including the authority provided to it in the proposed Force Majeure Rule, would meet the criteria identified within guidance published by the

Commission in connection with the adoption of Rule 17Ad-22(e)(3)(ii).⁶⁶

Therefore, FICC believes the R&W Plan and each of the Proposed Rules are consistent with Rule 17Ad-22(e)(3)(ii).⁶⁷

Rule 17Ad-22(e)(15)(ii) under the Act requires FICC to establish, implement, maintain and enforce written policies and procedures reasonably designed to identify, monitor, and manage its general business risk and hold sufficient LNA to cover potential general business losses so that FICC can continue operations and services as a going concern if those losses materialize, including by holding LNA equal to the greater of either (x) six months of the covered clearing agency's current operating expenses, or (y) the amount determined by the board of directors to be sufficient to ensure a recovery or orderly wind-down of critical operations and services of the covered clearing agency.⁶⁸ While the Capital Policy addresses how FICC holds LNA in compliance with these requirements, the Wind-down Plan would include an analysis that would estimate the amount of time and the costs to achieve a recovery or orderly wind-down of FICC's critical operations and services, and would provide that the Board review and approve this analysis and estimation annually. The Wind-down Plan would also provide that the estimate would be the "Recovery/Wind-down Capital Requirement" under the Capital Policy. Under that policy, the General Business Risk Capital Requirement, which is the sufficient amount of LNA that FICC should hold to cover potential general business losses so that it can continue operations and services as a going concern if those losses materialize, is calculated as the greatest of three estimated amounts, one of which is this Recovery/Wind-down Capital Requirement. Therefore, FICC believes the R&W Plan, as it interrelates with the Capital Policy, is consistent with Rule 17Ad-22(e)(15)(ii).⁶⁹

III. Date of Effectiveness of the Advance Notice and Timing for Commission Action

The proposed change may be implemented if the Commission does not object to the proposed change within 60 days of the later of (i) the date that the proposed change was filed with the Commission or (ii) the date that any additional information requested by the

Commission is received,⁷⁰ unless extended as described below. The clearing agency shall not implement the proposed change if the Commission has any objection to the proposed change.⁷¹

Pursuant to Section 806(e)(1)(H) of the Clearing Supervision Act,⁷² the Commission may extend the review period of an advance notice for an additional 60 days, if the changes proposed in the advance notice raise novel or complex issues, subject to the Commission providing the clearing agency with prompt written notice of the extension.

Here, as the Commission has not requested any additional information, the date that is 60 days after FICC filed the Advance Notice with the Commission is February 16, 2018. However, the Commission is extending the review period of the Advance Notice for an additional 60 days under Section 806(e)(1)(H) of the Clearing Supervision Act⁷³ because the Commission finds the Advance Notice is both novel and complex, as discussed below.

The Advance Notice is novel because it concerns a matter of first impression for the Commission. Specifically, it concerns a recovery and wind-down plan that has not been part of the Commission's regulatory framework for registered clearing agencies until the recent adoption of Rule 17Ad-22(e)(3)(ii) under the Act.⁷⁴

Rule 17Ad-22(e)(3)(ii) under the Act⁷⁵ requires FICC to establish, implement, maintain and enforce written policies and procedures reasonably designed to, as applicable, maintain a sound risk management framework for comprehensively managing legal, credit, liquidity, operational, general business, investment, custody, and other risks that arise in or are borne by FICC, which includes plans for the recovery and orderly wind-down of FICC necessitated by credit losses, liquidity shortfalls, losses from general business risk, or any other losses. The Commission has not yet considered such a plan pursuant to Rule 17Ad-22(e)(3)(ii) under the Act.⁷⁶

The Advance Notice is complex because the proposed changes are substantial, detailed, and interrelated with other risk management practices at the clearing agency. The Advance Notice is substantial because it is

⁷⁰ 12 U.S.C. 5465(e)(1)(G).

⁷¹ 12 U.S.C. 5465(e)(1)(F).

⁷² 12 U.S.C. 5465(e)(1)(H).

⁷³ *Id.*

⁷⁴ Securities Exchange Act Release 78961 (September 28, 2016), 81 FR 70786 (October 13, 2017) (S7-03-14).

⁷⁵ 17 CFR 240.17Ad-22(e)(3)(ii).

⁷⁶ *Id.*

⁶⁶ *Supra* note 40.

⁶⁷ 17 CFR 240.17Ad-22(e)(3)(ii).

⁶⁸ *Id.* at 240.17Ad-22(e)(15)(ii).

⁶⁹ *Id.*

⁶⁵ *Id.* at 240.19b-4.

designed to comprehensively address how the clearing agency would implement a recovery or wind-down plan. For example, according to the clearing agency, the R&W Plan would provide, among other things, (i) an overview of the business of FICC and its parent, DTCC; (ii) an analysis of FICC's intercompany arrangements and an existing link to other FMIs; (iii) a description of FICC's services, and the criteria used to determine which services are considered critical; (iv) a description of the FICC and DTCC governance structure; (v) a description of the governance around the overall recovery and wind-down program; (vi) a discussion of tools available to FICC to mitigate certain risks, including recovery indicators and triggers, and the governance around management of a stress event along a "Crisis Continuum" timeline; (vii) a discussion of potential non-default losses and the resources available to FICC to address such losses, including recovery triggers and tools to mitigate such losses; (viii) an analysis of the recovery tools' characteristics, including how they are comprehensive, effective, and transparent, how the tools provide appropriate incentives to Members to, among other things, control and monitor the risks they may present to FICC, and how FICC seeks to minimize the negative consequences of executing its recovery tools; and (ix) the framework and approach for the orderly wind-down and transfer of FICC's business, including an estimate of the time and costs to effect a recovery or orderly wind-down of FICC.

The Advance Notice is detailed because it articulates the step-by-step process the clearing agency would undertake to implement a recovery or wind-down plan.

The Advance Notice is interrelated with other risk management practices at the clearing agency because the R&W Plan concerns some existing rules that address risk management as well as proposed rules that would further address risk management. For example, according to the clearing agency, many of the tools available to the clearing agency that would be described in the R&W Plan are the clearing agency's existing, business-as-usual risk management and default management tools, which would continue to be applied in scenarios of increasing stress. The Advance Notice also proposes new rules, such as the proposed market disruption and force majeure rules,⁷⁷

⁷⁷ Proposed FICC GSD Rule 50 (Market Disruption and Force Majeure) and proposed FICC MBS Rule 40 (Market Disruption and Force Majeure).

and contemplates application of the rules proposed in the Loss Allocation Operation as an integral part of the operation of the R&W Plan.⁷⁸

Accordingly, pursuant to Section 806(e)(1)(H) of the Clearing Supervision Act,⁷⁹ the Commission is extending the review period of the Advance Notice to April 17, 2018 which is the date by which the Commission shall notify the clearing agency of any objection regarding the Advance Notice, unless the Commission requests further information for consideration of the Advance Notice (SR-FICC-2017-805).⁸⁰

The clearing agency shall post notice on its website of proposed changes that are implemented.

The proposal shall not take effect until all regulatory actions required with respect to the proposal are completed.⁸¹

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File Number SR-FICC-2017-805 on the subject line.

Paper Comments

• Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090. All submissions should refer to File Number SR-FICC-2017-805. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the Advance Notice that are filed with the Commission, and all written communications relating to the Advance Notice between the Commission and any person, other than those that may be withheld from the public in accordance with the

⁷⁸ See *supra* note 9.

⁷⁹ 12 U.S.C. 5465(e)(1)(H).

⁸⁰ This extension extends the time periods under Sections 806(e)(1)(E) and (G) of the Clearing Supervision Act. 12 U.S.C. 5465(e)(1)(E) and (G).

⁸¹ See *supra* note 2 (concerning the clearing agency's related proposed rule change).

provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of FICC and on DTCC's website (<http://dtcc.com/legal/sec-rule-filings.aspx>). All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-FICC-2017-805 and should be submitted on or before February 14, 2018.

By the Commission.

Eduardo A. Aleman,
Assistant Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-82577; File No. SR-Phlx-2018-09]

Self-Regulatory Organizations; Nasdaq PHLX LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Relocate and Amend Rule 1080(l)

January 24, 2018.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),¹ and Rule 19b-4 thereunder,² notice is hereby given that on January 16, 2018, Nasdaq PHLX LLC ("Phlx" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to relocate and amend Rule 1080(l), entitled "Directed Orders" to new Rule 1068 with the same title. The Exchange is also proposing to amend Rule 1000(b) to add various definitions. The Exchange

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.
