ENVIRONMENTAL PROTECTION AGENCY

Information Collection Request Submitted to OMB for Review and Approval; Comment Request; Laboratory Quality Assurance Evaluation Program for Analysis of Cryptosporidium Under the Safe Drinking Water Act (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency has submitted an information collection request (ICR)—Laboratory Quality Assurance Evaluation Program for Analysis of Cryptosporidium Under the Safe Drinking Water Act, EPA ICR No. 2067.06, OMB Control No. 2040–0246—to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a proposed extension of the ICR, which is currently approved through March 31, 2018.

Public comments were previously requested via the Federal Register on October 16, 2017, during a 60-day comment period. This notice allows for an additional 30 days for public comments. A fuller description of the ICR is given below, including its estimated burden and cost to the public. An agency may not conduct or sponsor a collection of information, unless it receives OMB approval for the ICR. EPA is requesting comments concerning this ICR, including any of its elements that are subject to Public Participation

Abstract: Under the Long Term 2 Enhanced Surface Water Treatment Rule (LT2ESWTR), EPA requires public water systems (PWS) to use approved laboratories when conducting Cryptosporidium monitoring. The Code of Federal Regulations (CFR) at 40 CFR 141.705(a) provides for approval of Cryptosporidium laboratories by “an equivalent” state laboratory certification program (i.e., equivalent to EPA’s Laboratory Quality Assurance Evaluation Program). In the preamble to the LT2ESWTR as well as several other notices, EPA has described the criteria for approval of laboratories to analyze Cryptosporidium samples under the LT2ESWTR.
