(OFA) achieve its goals to foster economically secure households and communities for the well-being and long-term success of children and families. The purpose of the PAIVED study is to better understand the prevalence of intimate partner violence (IPV) experienced by the population of fathers served by Responsible Fatherhood (RF) programs, and the services that federally-funded RF programs are providing to address and contribute to the prevention of IPV among its participants. The proposed data collection will include whether IPV content is included in RF programs, the types of activities they are using to address IPV, and related successes and challenges. Other collected data will include barriers to addressing IPV in RF programs, the relevance of addressing IPV with fathers, fathers’ reactions to this programming, and what types of partnerships RF programs have with other agencies to address IPV. This information will be collected through interviews conducted over the phone and in-person with RF grantee program staff and community partners. This information will be critical to inform future efforts to address and contribute to the prevention of IPV through RF programming.

Respondents: Responsible Fatherhood grantee program staff (e.g., program directors and facilitators) and community partners.

**Proposed Information Collection Activity; Comment Request; Healthy Marriage and Responsible Fatherhood Performance Measures and Additional Data Collection (Part of the Fatherhood and Marriage Local Evaluation and Cross-Site (FaMILE Cross-Site) Project)—Extension**

**Description**

**Background**

For decades various organizations and agencies have been developing and operating programs to strengthen families through healthy marriage and relationship education and responsible fatherhood programming. The Administration for Children and Families (ACF), Office of Family Assistance (OFA), has had administrative responsibility for federal funding of such programs since 2006 through the Healthy Marriage (HM) and Responsible Fatherhood (RF) Grant Programs. The authorizing legislation for the programs may be found in Section 403(a)(2) of the Social Security Act [1].

**Extension of Current Approval**

The Offices of Family Assistance (OFA) and Planning, Research and Evaluation (OPRE) in the Administration for Children and Families (ACF), U.S. Department of Health and Human Services (HHS) are proposing to extend performance measure and other data collection activities, in service to the HM and RF programs. This data collection is part of the Fatherhood and Marriage Local Evaluation and Cross-site (FaMILE Cross-site) project, whose purpose is to support high quality data collection, strengthen local evaluations, and conduct cross-site analysis for the Responsible Fatherhood and Healthy Marriage grantees. ACF is requesting comment on the following data collection, which has been ongoing since 2016. There are no changes proposed to the information collection, we are only requesting an extension to continue data collection with the current grantees through 2020.

**Performance measures.** ACF is proposing to extend collection of a set of performance measures that are collected by all grantees. These measures collect standardized information in the following areas:

- Applicant characteristics;
- Program operations (including program characteristics and service delivery); and
- Participant outcomes:
  - Entrance survey, with four versions: (1) Healthy Marriage Program Pre-Program Survey for Adult-Focused Programs; (2) Healthy Marriage Program Pre-Program Survey for Youth-Focused Programs; (3) Responsible Fatherhood
Program Pre-Program Survey for Community-Based-Fathers; and (4) Responsible Fatherhood Program Pre-Program Survey for Incarcerated Fathers.
- Exit survey, with four versions: (1) Healthy Marriage Program Post-Program Survey for Adult-Focused Programs; (2) Healthy Marriage Program Post-Program Survey for Youth-Focused Programs; (3) Responsible Fatherhood Program Post-Program Survey for Community-Based-Fathers; and (4) Responsible Fatherhood Program Post-Program Survey for Incarcerated Fathers.

These measures were required to submit data on these standardized measures on a regular basis (e.g., quarterly). In addition to the performance measures mentioned above, ACF proposes to extend collection for these data submissions:
- Semi-annual Performance Progress Report (PPR), with two versions: (1) Performance Progress Report for Healthy Marriage Programs, and (2) Performance Progress Report for Responsible Fatherhood Programs; and
- Quarterly Performance Progress Report (QPR), with two versions: (1) Quarterly Performance Progress Report for Healthy Marriage Programs, and (2) Quarterly Performance Progress Report for Responsible Fatherhood Programs. A management information system has been implemented which improves efficiency and the quality of data, and makes reporting easier. Additional data collection. We also seek to extend the approval to collect information from a sub-set of grantees on how they designed and implemented their programs (information on outcomes associated with programs will also be assessed), per the following protocols:
- Staff interview protocol on program design (will be collected from about half of all grantees);
- Staff interview protocols on program implementation (will be collected from about 10 grantees); and
- Program participant focus group protocol (will be conducted with about 10 grantees).

Respondents: Responsible Fatherhood and Healthy Marriage Program grantees (e.g., grantee staff) and program applicants and participants—participants are called “clients.”

SUPPLEMENTARY INFORMATION:
I. Background
The Drug Price Competition and Patent Term Restoration Act of 1984 (Pub. L. 98–417) and the Generic Animal Drug and Patent Term Restoration Act (Pub. L. 100–670) generally provide that a patent may be extended for a period of up to 5 years so long as the patented item (human drug product, animal drug product, medical device, food additive, or color additive) was subject to regulatory review by FDA before the item was marketed. Under these acts, a product’s regulatory review period forms the basis for determining the amount of extension an applicant may receive.
