Aviation Safety Organization Changes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The FAA Aircraft Certification Service (AIR) and Flight Standards Service (AFS) have reorganized to align with functional organization design concepts. The AIR reorganization included eliminating product directorates and restructuring and re-designating field offices. The AFS reorganization included eliminating geographic regions, realigning headquarters organizations, and restructuring field offices. Currently, various rules in the Code of Federal Regulations refer to specific AIR and AFS offices that are obsolete after the reorganizations. This rule replaces specific references with generic references not dependent on any particular office structure. This rule does not impose any new obligations and is only intended to eliminate any confusion about with whom regulated entities and other persons should interact when complying with these various rules in the future.

DATES: Effective March 5, 2018.

FOR FURTHER INFORMATION CONTACT: For questions concerning AIR offices referred to in this action, contact Suzanne Masterson, Transport Standards Branch (AIR-670), Policy and Innovation Division, Aircraft Certification Service, Federal Aviation

Administration, 2200 South 216th St., Des Moines, WA 98189; telephone (206) 231-3211 or (425) 227-1855; email suzanne.masterson@faa.gov.

For questions concerning AFS offices referred to in this action, contact Joseph Hemler, Commercial Operations Branch (AFS-820), Flight Standards Service, Federal Aviation Administration, 55 M Street SE, 8th floor, Washington, DC 20003-3522; telephone (202) 267-1100; email joseph.k.hemler-jr@faa.gov.

SUPPLEMENTARY INFORMATION:

Good Cause for Immediate Adoption

Section 553(b)(3)(A) of the Administrative Procedure Act (APA) (5 U.S.C.) authorizes agencies to dispense with notice and comment procedures for rules of agency organization, procedure, or practice, except when notice or hearing is required by statute. Under this section, an agency may issue a final rule without seeking comment prior to the rulemaking.

Additionally, section 553(b)(3)(B) of the APA authorizes agencies to dispense with notice and comment procedures for rules when the agency for “good cause” finds that those procedures are “impracticable, unnecessary, or contrary to the public interest.” Under this section, an agency, upon finding good cause, may issue a final rule without seeking comment prior to the rulemaking. The FAA finds that notice and public comment to this immediately adopted final rule are unnecessary because this rule meets the exception of section 553(b)(3)(A). The sole purpose of this rule is to reflect organizational changes within AIR and AFS. This rule imposes no additional requirements on the public. Therefore, the FAA has determined that notice and public comment are unnecessary.

The FAA further finds, under 5 U.S.C. 553(d)(3), that good cause exists for making this rule effective upon publication in the **Federal Register**. It is unnecessary to delay the effective date of this rule because the final rule consists only of organizational amendments that have no substantive effect on the public.

Authority for This Rulemaking

The FAA’s authority to issue rules is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator.

This rulemaking is promulgated under the authority described in 49 U.S.C. 106(f), which establishes the authority of the Administrator to promulgate regulations and rules, including rules that carry out the functions of the agency.

This regulation is within the scope of that authority because the rule makes non-substantive edits to agency organization, procedure, or practice that guides the public’s interaction with AIR and AFS.

I. Overview of Immediately Adopted Final Rule

AIR and AFS have reorganized to align with a functional organization design concept. Currently, various rules in title 14 of the Code of Federal Regulations (14 CFR) parts 21, 25, 26, 27, 34, 91, 121, 125, 129, 135, and 183 refer to specific AIR offices that are obsolete after its reorganization. Additionally, various rules in 14 CFR parts 1, 43, 45, 60, 61, 63, 65, 91, 97, 107, 110, 119, 121, 125, 129, 133, 135, 137, 141, 142, 145, and 183 refer to specific AFS offices that are obsolete after its reorganization. This rule replaces specific office references with generic references not dependent on any particular office structure. This rule is intended to eliminate any confusion about with whom regulated entities and other persons should interact when complying with these various rules in the future.

II. Background

AIR and AFS have played a critical role in assuring that the U.S. National Airspace System operates at the highest level of safety. This level of safety has been achieved through the development of standards, policy, and guidance to assure the safe design and production of aviation products, as well as the safe and standardized certification, operation, and oversight of multiple types of FAA certificate holders.

The aviation system is rapidly changing, placing greater demands on its participants. It is more complex, interconnected, and reliant on new technologies. Each component of the aircraft certification safety system—which extends beyond AIR and AFS to include industry’s role in ensuring compliance to regulations, and the public’s participation in the regulatory process—must address the challenges posed by the changing environment. The FAA’s ability to meet the diverse and ever-increasing expectations of its stakeholders, including the flying public, industry, Congress, and other certification authorities, requires fundamental changes to several aspects of the aircraft, airmen, and operator certification safety system, including the organizational structure of AIR and AFS.

The AIR and AFS management teams evaluated changing domestic and global demands on AIR and AFS and

determined a need for improved organizational efficiencies in order to provide other civil aviation authorities, manufacturers, and stakeholders with consistent and predictable outputs. The management teams evaluated feasible options and selected a functional organization design concept. AIR's reorganization into functional divisions has built necessary infrastructure to enable a comprehensive approach to becoming more efficient and effective. AIR has implemented and completed its reorganization in a phased approach. Product directorates have been eliminated in 2017 and replaced with functional divisions. Field offices have been reorganized and re-designated. For further details on this reorganization, please refer to https://www.faa.gov/news/fact_sheets/news_story.cfm?newsId=21315 and https://www.faa.gov/about/office_org/headquarters_offices/avs/offices/air/transformation/.

You can also obtain more information on the new AIR organization and the responsibilities and functions of the AIR divisions in FAA Order 8100.5C, "Aircraft Certification Service—Organizational Structure and Functions." AIR also created a new order, FAA Order 8100.18, "Aircraft Certification Service Organizational Realignment References," that facilitates the use of existing AIR policy and guidance after the realignment of AIR by detailing which new AIR office takes the place of which former AIR office. These orders are available online at https://www.faa.gov/regulations_policies/orders_notices/.

The AFS reorganization into functional areas aligns its infrastructure to more efficiently and effectively meet the needs of the aviation industry and improve standardization and agility to changing world needs while providing oversight for continued operational safety. AFS has eliminated regional offices, realigned headquarters

organizations, and restructured field offices. More functional alignment in field offices will take place in the future. Where legacy AFS references exist, the user can access the Flight Standards Information Management System (FSIMS) publication page (<http://fsims.faa.gov/PublicationForm.aspx>) and select "Future of Flight Standards (FFS) Updates" found under "Active Publication." This link provides a listing that translates organizational codes from the legacy AFS structure to the FFS structure.

III. Discussion of Immediately Adopted Final Rule

Certain offices referenced in various rules under 14 CFR parts 1, 21, 25, 26, 27, 34, 43, 45, 60, 61, 63, 65, 91, 97, 107, 110, 119, 121, 125, 129, 133, 135, 137, 141, 142, 145, and 183 are obsolete due to AIR and AFS reorganization. References to non-existent offices may cause confusion for applicants, approval holders, and certificate holders in the future when interacting with AIR and AFS. The FAA is replacing specific references with generic references not dependent on any particular office structure. This rule is intended to eliminate any confusion about with whom regulated entities and other persons should interact when complying with these various rules in the future.

The new AIR and AFS organizations will continue to maintain offices throughout the United States that—for the public—perform the same functions and provide the same services that those offices performed previously. However, the names of these offices and their internal reporting structure have changed, and may continue to change over time. The generic references to offices that the FAA used in this rule are intended to refer to the same offices as the previous specific references, but with references to regions or localities

removed, along with specific office names. The generic references also include offices that have international duties. Table 1 provides the specific changes for nomenclature. Additionally, some manager and director titles have changed, but these new titles are of equivalent hierarchy within the FAA. One advantage of AIR and AFS restructuring is to allow for a more-virtual work environment with less dependence on geographic region, which accommodates resource sharing among offices performing the same functions, resulting in more efficiency.

This rule does not change any existing processes. Processes for public interaction with AIR and AFS (such as application processes, reporting processes, and oversight processes) are documented in orders, notices, advisory circulars (ACs), and policy statements. These documents are available online at https://www.faa.gov/regulations_policies/. AIR and AFS will continue to provide the public the opportunity to comment on any proposed revisions to these documents prior to incorporation.

Where general references to "the FAA" are introduced in specific sections, existing advisory material for the affected section specifies the AIR and AFS offices responsible for the function identified in that section. For example, in § 21.3, the FAA is replacing the words "Aircraft Certification Office in the region in which the person required to make the report is located" with the word "FAA." AC 21-9B, "Manufacturers Reporting Failures, Malfunctions, or Defects," provides instructions on reporting to specific offices within AIR. The existing AIR advisory material remains in effect and is not affected by the realignment of AIR, except as noted in FAA Order 8100.18. Similarly, AFS's advisory material remains in effect and is not affected by the realignment of AFS, except as noted in FAA Order 1100.1.

In addition to the above nomenclature changes, this rule makes the following conforming changes:

- In §§ 1.2 and 110.2, removes the acronym and definition for certificate holding district office because the FAA no longer uses this nomenclature in the rules.
- In § 21.15, removes the reference “and is submitted to the appropriate aircraft certification office” because the FAA no longer uses this nomenclature in the rules and this information is adequately addressed by existing guidance on submitting applications for type certificates.
- In § 21.603, removes the reference “to the appropriate aircraft certification office” because the FAA no longer uses this nomenclature in the rules and this information is adequately addressed by existing guidance on submitting applications for technical standard order authorizations.
- In §§ 26.3, 91.1501, 121.1101, 125.501, and 129.101, removes the definition of “FAA Oversight Office” because the FAA no longer uses this nomenclature in the rules.
- In § 34.60, removes the reference to the “Aircraft Certification Office” because the FAA no longer uses this nomenclature in the rules.
- In appendix B to part 43, removes references to office designators “AFS–750” and “AFS–751”, which are obsolete references.
- In appendices A and C to part 60, removes the contact information for Ed Cook, Senior Advisor to the Division Manager, Air Transportation Division, because this information is obsolete and not necessary.
- In §§ 60.5 and 60.29, removes the reference to “AFS–1”, which is an obsolete reference.
- In § 91.1505, replaces the words “that have been approved by the FAA Aircraft Certification Office (ACO), or office of the Transport Airplane Directorate, having cognizance over the type certificate for the affected airplane are incorporated within its inspection program:” with “are incorporated within its inspection program. The repair assessment guidelines must be approved by the responsible Aircraft Certification Service office for the type certificate for the affected airplane.” This revision does not change the requirements of this section. It clarifies the wording so it is easier to understand

and harmonizes the sentence structure with the other rules for repairs assessment of pressurized fuselages in §§ 121.1107, 125.505, and 129.107.

- In appendix P to part 121, removes the reference to “AFS–200”, which is an obsolete reference.
- In § 97.20, replaces “FAA National Aeronautical Charting Office. These charts are available for purchase from the FAA’s National Aeronautical Charting Office, Distribution Division, 6303 Ivy Lane, Suite 400, Greenbelt, MD 20770” with “FAA. These charts are available from the FAA at https://www.faa.gov/air_traffic/flight_info/aeronav/digital_products/” because the FAA has ceased the sale of paper charts and now publishes charts for free on the internet.
- In § 125.509, replaces the word “Office” with the word “office” to create a generic reference.

In addition, this rule removes the Transport Airplane Directorate address from §§ 25.5 and 25.795 and removes the Rotorcraft Standards Staff address from § 27.685. These addresses were provided as one option to obtain documents incorporated by reference in the rule. With the movement of the Northwest Regional office and the movement to a more virtual work environment, the FAA addresses provided may change and require more flexibility. Therefore, we have removed these addresses. Per 5 CFR 51.7, documents incorporated by reference need to be “reasonably available” to regulated entities. Additional options for obtaining these documents from the National Archives and Records Administration (NARA) and other locations such as the National Institute of Justice at no cost continue to be listed in the rule. This rule also updates the website reference to NARA in these sections.

IV. Regulatory Notices and Analyses

Changes to Federal regulations must undergo several economic analyses. First, Executive Orders 12866 and 13563 direct that each Federal agency shall propose or adopt a regulation only upon a reasoned determination that the benefits of the intended regulation justify its costs. Second, the Regulatory Flexibility Act of 1980 (Pub. L. 96–354), as codified in 5 U.S.C. 603 *et seq.*, requires agencies to analyze the economic impact of regulatory changes

on small entities. Third, the Trade Agreements Act of 1979 (Pub. L. 96–39), as amended, 19 U.S.C. Chapter 13, prohibits agencies from setting standards that create unnecessary obstacles to the foreign commerce of the United States. In developing U.S. standards, the Trade Agreements Act requires agencies to consider international standards and, where appropriate, that they be the basis of U.S. standards. Fourth, the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4), as codified in 2 U.S.C. 1532, requires agencies to prepare a written assessment of the costs, benefits, and other effects of proposed or final rules that include a Federal mandate likely to result in the expenditure by State, local, or tribal governments, in the aggregate, or by the private sector, of \$100 million or more annually (adjusted for inflation with a base year of 1995). This portion of the preamble summarizes the FAA’s analysis of the economic impacts of this final rule.

In conducting these analyses, the FAA has determined this final rule is not a “significant regulatory action,” as defined in section 3(f) of Executive Order 12866. The rule is also not “significant” as defined in the Department of Transportation’s (DOT’s) Regulatory Policies and Procedures. The final rule will not have a significant economic impact on a substantial number of small entities, will not create unnecessary obstacles to international trade, and will not impose an unfunded mandate on State, local, or tribal governments, or on the private sector.

A. Regulatory Evaluation

DOT Order 2100.5 prescribes policies and procedures for simplification, analysis, and review of regulations. If the expected cost impact is so minimal that a proposed or final rule does not warrant a full evaluation, this order permits a statement to that effect and the basis for it to be included in the preamble if a full regulatory evaluation of the costs and benefits is not prepared. Such a determination has been made for this final rule. The reasoning for this determination follows:

AIR and AFS have reorganized to align with functional organization design concepts. The AIR reorganization included eliminating product directorates and restructuring and redesignating field offices. The AFS

reorganization included eliminating geographic regions and moving to a more functionally based organization. Specific AIR and AFS office references currently in 14 CFR are obsolete post-reorganization and will be replaced by generic references not dependent on any particular office structure. This rule is intended to clarify any confusion over which offices regulated entities and other persons should interact with when complying with 14 CFR regulations. Since this rule involves non-substantial clarifying editorial changes only, the costs of the rule will be minimal.

B. Regulatory Flexibility Determination

The Regulatory Flexibility Act of 1980 (Pub. L. 96-354, “RFA”) establishes “as a principle of regulatory issuance that agencies shall endeavor, consistent with the objectives of the rule and of applicable statutes, to fit regulatory and informational requirements to the scale of the businesses, organizations, and governmental jurisdictions subject to regulation. To achieve this principle, agencies are required to solicit and consider flexible regulatory proposals and to explain the rationale for their actions to assure that such proposals are given serious consideration.” The RFA covers a wide-range of small entities, including small businesses, not-for-profit organizations, and small governmental jurisdictions.

Agencies must perform a review to determine whether a rule will have a significant economic impact on a substantial number of small entities. If the agency determines that it will, the agency must prepare a regulatory flexibility analysis as described in the RFA.

However, if an agency determines that a rule is not expected to have a significant economic impact on a substantial number of small entities, section 605(b) of the RFA provides that the head of the agency may so certify and a regulatory flexibility analysis is not required. The certification must include a statement providing the factual basis for this determination, and the reasoning should be clear.

As discussed above, since the rule involves non-substantial editorial changes only, due to FAA reorganization, the FAA finds the costs of this rule will be minimal. Therefore, as provided in section 605(b), the head of the FAA certifies that this rulemaking will not result in a significant economic impact on a substantial number of small entities.

C. International Trade Impact Assessment

The Trade Agreements Act of 1979 (Pub. L. 96-39), as amended, prohibits Federal agencies from establishing standards or engaging in related activities that create unnecessary obstacles to the foreign commerce of the United States. Pursuant to this Act, the establishment of standards is not considered an unnecessary obstacle to the foreign commerce of the United States, so long as the standard has a legitimate domestic objective, such as the protection of safety, and does not operate in a manner that excludes imports that meet this objective. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards.

The FAA has assessed the potential effect of this rule and has determined that the rule is in accord with the Trade Agreements Act as the rule applies equally to domestic and foreign persons engaged in aviation activities under 14 CFR.

D. Unfunded Mandates Assessment

Title II of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104-4) requires each Federal agency to prepare a written statement assessing the effects of any Federal mandate in a proposed or final agency rule that may result in an expenditure of \$100 million or more (in 1995 dollars) in any one year by State, local, and tribal governments, in the aggregate, or by the private sector; such a mandate is deemed to be a “significant regulatory action.” The FAA currently uses an inflation-adjusted value of \$155 million in lieu of \$100 million.

This final rule does not contain such a mandate; therefore, the requirements of Title II of the Act do not apply.

E. Paperwork Reduction Act

The Paperwork Reduction Act of 1995 (44 U.S.C. 3507(d)) requires that the FAA consider the impact of paperwork and other information collection burdens imposed on the public. The FAA has determined that there is no new requirement for information collection associated with this immediately adopted final rule.

F. International Compatibility

In keeping with U.S. obligations under the Convention on International Civil Aviation, it is FAA policy to conform to International Civil Aviation Organization (ICAO) Standards and Recommended Practices to the maximum extent practicable. The FAA has reviewed the corresponding ICAO Standards and Recommended Practices

and has identified no differences with these proposed regulations.

G. Environmental Analysis

FAA Order 1050.1F identifies FAA actions that are categorically excluded from preparation of an environmental assessment or environmental impact statement under the National Environmental Policy Act in the absence of extraordinary circumstances. The FAA has determined this rulemaking action qualifies for the categorical exclusion identified in paragraph 5-6.6(d), which covers the issuance of regulatory documents covering administrative or procedural requirements and involves no extraordinary circumstances.

V. Executive Order Determinations

A. Executive Order 13132, Federalism

The FAA has analyzed this immediately adopted final rule under the principles and criteria of Executive Order 13132, “Federalism.” The agency determined that this action will not have a substantial direct effect on the States, or the relationship between the Federal Government and the States, or on the distribution of power and responsibilities among the various levels of government, and, therefore, does not have Federalism implications.

B. Executive Order 13211, Regulations That Significantly Affect Energy Supply, Distribution, or Use

The FAA analyzed this immediately adopted final rule under Executive Order 13211, “Actions Concerning Regulations that Significantly Affect Energy Supply, Distribution, or Use” (May 18, 2001). The agency has determined that it is not a “significant energy action” under the executive order and it is not likely to have a significant adverse effect on the supply, distribution, or use of energy.

C. Executive Order 13609, International Cooperation

Executive Order 13609, “Promoting International Regulatory Cooperation,” promotes international regulatory cooperation to meet shared challenges involving health, safety, labor, security, environmental, and other issues and to reduce, eliminate, or prevent unnecessary differences in regulatory requirements. The FAA has analyzed this action under the policies and agency responsibilities of Executive Order 13609, and has determined that this action would have no effect on international regulatory cooperation.

D. Executive Order 13771, Reducing Regulation and Controlling Regulatory Costs

Executive Order 13771 titled “Reducing Regulation and Controlling Regulatory Costs,” directs that, unless prohibited by law, whenever an executive department or agency publicly proposes for notice and comment or otherwise promulgates a new regulation, it shall identify at least two existing regulations to be repealed. In addition, any new incremental costs associated with new regulations shall, to the extent permitted by law, be offset by the elimination of existing costs. Only those rules deemed significant under section 3(f) of Executive Order 12866, “Regulatory Planning and Review,” are subject to these requirements.

This rule is not an Executive Order 13771 regulatory action because this rule is not significant under Executive Order 12866.

VI. How To Obtain Additional Information

A. Rulemaking Documents

An electronic copy of a rulemaking document may be obtained from the internet by—

1. Searching the Federal eRulemaking Portal (<http://www.regulations.gov>);
2. Visiting the FAA’s Regulations and Policies web page at http://www.faa.gov/regulations_policies/; or
3. Accessing the Government Printing Office’s web page at <http://www.gpo.gov/fdsys/>.

Copies may also be obtained by sending a request (identified by notice, amendment, or docket number of this rulemaking) to the Federal Aviation Administration, Office of Rulemaking, ARM-1, 800 Independence Avenue SW, Washington, DC 20591, or by calling (202) 267-9680.

B. Small Business Regulatory Enforcement Fairness Act

The Small Business Regulatory Enforcement Fairness Act (SBREFA) of 1996 requires FAA to comply with small entity requests for information or advice about compliance with statutes and regulations within its jurisdiction. A small entity with questions regarding this document, may contact its local FAA official, or the person listed under the **FOR FURTHER INFORMATION CONTACT** heading at the beginning of the preamble. To find out more about SBREFA on the internet, visit http://www.faa.gov/regulations_policies/rulemaking/sbre_act/.

The Amendment

In consideration of the foregoing, the Federal Aviation Administration amends chapter I of title 14, Code of Federal Regulations as follows:

PART 1—DEFINITIONS AND ABBREVIATIONS

- 1. The authority citation for part 1 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g), 40113, 44701.

§ 1.2 [Amended]

- 2. In § 1.2, remove the definition for *CHDO*.

PART 21—CERTIFICATION PROCEDURES FOR PRODUCTS AND ARTICLES

- 3. The authority citation for part 21 continues to read as follows:

Authority: 42 U.S.C. 7572; 49 U.S.C. 106(f), 106(g), 40105, 40113, 44701–44702, 44704, 44707, 44709, 44711, 44713, 44715, 45303.

Special Federal Regulation No. 88 [Amended]

- 4. Amend Special Federal Regulation No. 88 as follows:
 - a. In paragraph 2(a), remove the words “FAA (Aircraft Certification Office (ACO), or office of the Transport Airplane Directorate, having cognizance over the type certificate for the affected airplane)” and add, in their place, the words “responsible Aircraft Certification Service office for the affected airplane”.
 - b. In paragraph 2(c), remove the words “FAA Aircraft Certification Office (ACO), or office of the Transport Airplane Directorate, having cognizance over the type certificate” and add, in their place, the words “responsible Aircraft Certification Service office”.
 - c. In paragraph 2(d), remove the words “Aircraft Certification Office (ACO), or office of the Transport Airplane Directorate, having cognizance over the type certificate for the affected airplane,” and add, in their place, the words “responsible Aircraft Certification Service office for the affected airplane”.

§ 21.3 [Amended]

- 5. In § 21.3(e)(1), remove the words “Aircraft Certification Office in the region in which the person required to make the report is located” and add, in their place, the word “FAA”.

§§ 21.3, 21.47, 21.75, 21.113, 21.618, and 21.619 [Amended]

- 6. In addition to the amendment set forth above, in 14 CFR part 21, remove the words “appropriate aircraft certification office” and add, in their place, the word “FAA” in the following places:
 - a. Section 21.3(f);
 - b. Section 21.47(c);
 - c. Section 21.75;
 - d. Section 21.113(b);
 - e. Section 21.618(b); and
 - f. Section 21.619(a).

§ 21.4 [Amended]

- 7. Amend § 21.4 as follows:
 - a. In paragraph (a)(1) introductory text, remove the words “FAA aircraft certification office,” and add, in their place, the words “Aircraft Certification Service office.”
 - b. In paragraph (b)(1) introductory text, remove the words “FAA type certificate holding office” and add, in their place, the words “Aircraft Certification Service office”; and remove the words “FAA office responsible for administering its type certificate” and add, in their place, the words “responsible Aircraft Certification Service office”.

§ 21.15 [Amended]

- 8. In § 21.15(a), after the words “prescribed by the FAA” and before the period, remove the words “and is submitted to the appropriate aircraft certification office”.

§ 21.47 [Amended]

- 9. In § 21.47(b) and (d), remove the words “in writing the appropriate aircraft certification office” and add, in their place, the words “the FAA in writing”.

§ 21.113 [Amended]

- 10. In addition to the amendments set forth above, in § 21.113(a), remove the words “either apply to the appropriate aircraft certification office for an STC or apply” and add, in their place, the words “apply to the FAA either for an STC, or”.

§ 21.215 [Amended]

- 11. In § 21.215, remove the words “Manufacturing Inspection District Office in the geographic area in which the manufacturer or air carrier is located” and add, in their place, the word “FAA”.

§ 21.603 [Amended]

- 12. In § 21.603(a) introductory text, remove the words “to the appropriate aircraft certification office”.

PART 25—AIRWORTHINESS STANDARDS: TRANSPORT CATEGORY AIRPLANES

- 13. The authority citation for part 25 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g), 40113, 44701, 44702 and 44704.

§ 25.5 [Amended]

- 14. In § 25.5(a):
 - a. Remove the words “, and at FAA, Transport Airplane Directorate, Aircraft Certification Service, 1601 Lind Avenue SW., Renton, Washington 98057–3356”; and
 - b. Remove the text “http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html” and add, in its place, the text “<http://www.archives.gov/federal-register/cfr/ibr-locations.html>”.
- 15. Amend § 25.795 by revising paragraphs (f)(2)(i) and (ii) and removing paragraph (f)(2)(iii) to read as follows:

14 CFR Part 23

[Docket No. FAA–2018–0090; Special Conditions No. 23–286–SC]

Special Conditions: Textron Aviation, Inc., Model C90A King Air; Installation of Electronic Engine Control System

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final special conditions; request for comments.

SUMMARY: These special conditions are issued for the Textron Aviation, Inc., model C90A King Air airplane. This airplane as modified by Nextant Aerospace will have a novel or unusual design feature associated with installation of an engine that includes an electronic engine control system. The applicable airworthiness regulations do not contain adequate or appropriate safety standards for this design feature. These special conditions contain the additional safety standards that the Administrator considers necessary to establish a level of safety equivalent to that established by the existing airworthiness standards.

DATES: The effective date of these special conditions is March 5, 2018.

We must receive your comments by April 4, 2018.

ADDRESSES: Send comments identified by docket number FAA–2018–0090 using any of the following methods:

• **Federal eRegulations Portal:** Go to <http://www.regulations.gov> and follow the online instructions for sending your comments electronically.

• **Mail:** Send comments to Docket Operations, M–30, U.S. Department of Transportation (DOT), 1200 New Jersey Avenue SE, Room W12–140, West Building Ground Floor, Washington, DC 20590–0001.

• **Hand Delivery of Courier:** Take comments to Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m., and 5 p.m., Monday through Friday, except Federal holidays.

• **Fax:** Fax comments to Docket Operations at 202–493–2251.

Privacy: The FAA will post all comments it receives, without change, to <http://www.regulations.gov>, including any personal information the commenter provides. Using the search function of the docket website, anyone can find and read the electronic form of all comments received into any FAA docket, including the name of the individual sending the comment (or signing the comment for an association, business, labor union, etc.). DOT’s complete Privacy Act Statement can be found in the **Federal Register** published on April 11, 2000 (65 FR 19477–19478), as well as at <http://DocketsInfo.dot.gov>.

Docket: Background documents or comments received may be read at <http://www.regulations.gov> at any time. Follow the online instructions for accessing the docket or go to the Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m., and 5 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Jeff Pretz, Federal Aviation Administration, Aircraft Certification Service, Policy & Innovation Division, Small Airplane Standards Branch, AIR–691, 901 Locust, Room 301, Kansas City, MO 64106; telephone (816) 329–3239; facsimile (816) 329–4090.

SUPPLEMENTARY INFORMATION: The FAA has determined that notice and opportunity for prior public comment hereon are impracticable because these procedures would significantly delay issuance of the approval design and thus delivery of the affected aircraft. In addition, the FAA has determined, in accordance with 5 U.S.C. 553(b)(3)(B) and 553(d)(3), that notice and opportunity for prior public comment hereon are unnecessary because the substance of these special conditions has been subject to the public comment process in several prior instances with
