Background

The FAA has implemented several initiatives to address congestion and delay issues at certain airports within the National Airspace System (NAS). The FAA has issued Orders limiting operations at JFK and LGA.1 These Orders resulted in part from increasing congestion and delays at the airports requiring the FAA to allocate arrival and departure slots at JFK and LGA. Additionally, the FAA has designated Newark Liberty International Airport (EWR), Chicago O’Hare International Airport (ORD), San Francisco International Airport (SFO), and Los Angeles International Airport (LAX) as Level 2 schedule-facilitated airports under the IATA WSG.2 These Level 2 designations largely resulted from increasing congestion and delays requiring FAA to implement a voluntary schedule-facilitation process to manage operational growth at EWR, ORD, and SFO. The FAA designated LAX as Level 2 due to long-term construction projects expected to reduce runway capacity. The agency will review this designation upon the completion of the planned construction at LAX.
