**FEDERAL COMMUNICATIONS COMMISSION**

— Lines of policy and judicial authority  
 - - - Lines of management and administrative authority

*The Federal Communications Commission regulates interstate and foreign communications by radio, television, wire, satellite, and cable. It is responsible for the orderly development and operation of broadcast services and the provision of rapid, efficient nationwide and worldwide telephone and telegraph services at reasonable rates. Its responsibilities also include the use of communications for promoting safety of life and property and for strengthening the national defense.*

The Federal Communications Commission was created by the Communications Act of 1934 (47 U.S.C. 151 *et seq.*) to regulate interstate and foreign communications by wire and radio in the public interest. It was assigned additional regulatory jurisdiction under the provisions of the Communications Satellite Act of 1962 (47 U.S.C. 701–744). The scope of its regulation includes radio and television broadcasting; telephone, telegraph, and cable television operation; two-way radio and radio operators; and satellite communication.

The Commission is composed of five members, who are appointed by the President with the advice and consent of the Senate. One of the members is designated by the President as Chairman.

To assist the Commission in exercising its responsibility in the adjudicatory process, there is a Review Board to review initial decisions and write decisions and the Office of the General Counsel to assist the Commission and individual Commissioners in the disposition of matters arising in cases of adjudication (as defined in the Administrative Procedure Act (5 U.S.C. note prec. 551)) that have been designated for hearings. There also is a corps of administrative law judges, qualified and appointed pursuant to the requirements of the Administrative Procedure Act, who conduct evidentiary adjudicatory hearings and write initial decisions.

#### Activities

**Mass Media** The Mass Media Bureau administers the regulatory program for the following services: amplitude modulation (AM); frequency modulation (FM); television; low-power TV; translators; instructional TV and auxiliary services. The Bureau issues construction permits, operating licenses, and renewals

or transfers of such broadcast licenses except for broadcast auxiliary services. The Bureau also oversees compliance by broadcasters with statutes and Commission policies.

For further information, contact the Mass Media Bureau. Phone, 202–632–6460.

**Common Carrier Communications** The Common Carrier Bureau administers the regulatory program for interstate common carrier communications by telephone. Common carriers include companies, organizations, or individuals providing communications services to the public for hire, who must serve all who wish to use them at established rates. In providing interstate communications services, common carriers may employ landline wire or electrical or optical cable facilities.

For further information, contact the Common Carrier Bureau. Phone, 202–418–1500.

**Wireless Telecommunications** The Wireless Telecommunications Bureau administers all domestic commercial and private wireless telecommunications programs and policies. The commercial wireless services include Cellular, Paging, Personal Communications Services, Specialized Mobile Radio, Air-Ground, and Basic Exchange Telecommunications. The private wireless services include the Land Mobile Radio Services (including Public Safety, Industrial, Land Transportation, and Business), Broadcast Auxiliary, Operational Fixed Microwave and Point-to-Point Microwave, and the Special Radio Services (including Aviation, Marine, Amateur IVDS, and the Personal Radio Service). Additionally, the Bureau serves as the Commission's principal policy and administrative resource with regard to spectrum auctions. The Bureau also implements the compulsory provisions of laws and treaties covering

the use of radio for the safety of life and property at sea and in the air. The commercial and amateur radio operator programs are also administered by the Wireless Telecommunications Bureau.

For further information, contact the Wireless Telecommunications Bureau. Phone, 202-418-0600.

**International Bureau** The International Bureau manages all FCC international telecommunications and satellite programs and policies, and has the principal representational role on behalf of the Commission at international conferences, meetings, and negotiations. The Bureau consists of three divisions: Telecommunications, Satellite and Radiocommunication, and Planning and Negotiations.

The Telecommunications Division develops and administers policy, rules, and procedures for the regulations of telecommunications facilities and services under section 214 of the Communications Act and Cable Landing License Act. In addition, the Division develops and administers regulatory assistance and training programs in conjunction with the administration's Global Information Infrastructure (GII) initiative.

The Satellite and Radiocommunication Division develops and administers policy, rules, standards, and procedures for licensing and regulation of satellite and earth station facilities, both international and domestic, and oversight of Comsat as the U.S. Signatory to INTELSAT and Inmarsat.

The Planning and Negotiations Division represents the Commission in negotiations with Mexico, Canada, and other countries on international agreements that provide for arrangements and procedures for the coordination of radio frequency assignments to prevent and resolve international radio interference involving U.S. licensees and notifies all new changed U.S. radio stations to appropriate administrations and responds to foreign notifications as required and processes high frequency (HF) international broadcast applications and

applications to deliver broadcast programs to foreign stations.

For further information, contact the International Bureau. Phone, 202-418-0420.

**Cable Services Communications** The Cable Services Bureau develops, recommends, and administers policies and programs for the regulation of cable television systems. The Bureau advises and recommends to the Commission, or acts for the Commission under delegated authority, in matters pertaining to the regulation and development of cable television.

With its major divisions—Financial Analysis and Compliance, Consumer Protection and Competition, Policy and Rules, and Engineering and Technical Services, as well as units within the Office of the Bureau Chief—the Cable Services Bureau has the following duties and responsibilities:

- to investigate complaints and answer general inquiries from the public;
- to plan and develop proposed rulemakings and conduct comprehensive studies and analyses (legal, social, and economic) of various petitions for policy or rule changes;
- to process applications for authorizations in the cable television relay service;
- to participate in hearings before Administrative Law Judges, the Review Board, and the Commission;
- to conduct studies and compile data relating to the cable industry for the Commission to develop and maintain an adequate regulatory program;
- to collaborate and coordinate with State and local authorities in matters involving cable television systems; and
- to advise and assist the public, other government agencies, and industry groups on cable television regulation and related matters.

**Engineering and Technology** The Office of Engineering and Technology administers the Table of Frequency Allocations which specifies the frequency ranges that can be utilized by various radio services. The Office also administers the Experimental Radio Service and the Equipment Authorization Program. The Experimental Radio

Service permits the public to experiment with new uses of radio frequencies. This allows development of radio equipment and exploration of new radio techniques prior to licensing under other regulatory programs. The Equipment Authorization Program includes several specific procedures by which the agency approves radio equipment as a prerequisite to importation, marketing, or use. The procedures range from Commission testing of an equipment sample for compliance with applicable standards, through FCC review of applications and accompanying test reports submitted by the applicants, to a self-authorization procedure whereby a manufacturer certifies that the product complies with the standards.

For further information, contact the Office of Engineering and Technology. Phone, 202-739-0700.

**Compliance** Much of the investigative and enforcement work of the

Commission is carried out by its field staff. The Field Operations Bureau has 6 regional offices and 35 field offices. It also operates a nationwide fleet of mobile radio direction-finding vehicles for technical enforcement purposes. The field staff, in effect, are the Commission's "eyes and ears" in detecting radio violations and enforcing rules and regulations. Continuous surveillance of the radio spectrum is maintained to detect unlicensed operation and activities or nonconforming transmissions, and to furnish radio bearings on ships and planes in distress. The Field Operations Bureau also administers public service programs aimed at educating Commission licensees, industry, and the general public to improve compliance with FCC rules and regulations.

For further information, contact the Field Operations Bureau. Phone, 202-632-6980.

Advisory Committee Management  
Direct inquiries to the Associate Managing Director for Program Analysis. Phone, 202-418-0923.

Consumer Assistance Inquiries concerning general information on how the Commission works and how the public can participate in the decisionmaking process should be addressed to the Public Service Division, Room 254, 1919 M Street NW., Washington, DC 20554. Phone, 202-418-0200.

Contracts and Procurement Direct inquiries to the Chief, Acquisitions Branch. Phone, 202-418-0930.

Employment and Recruitment The Commission's programs require attorneys, electronics engineers, economists, accountants, administrative management and computer specialists, and clerical personnel. Requests for employment information should be directed to the Chief, Personnel Resources Branch. Phone, 202-418-0130. Schools interested in participating in the college recruitment programs of the Commission should direct their inquiries to the Associate Managing Director, Human Resources Management. Phone, 202-418-0100.

Equal Employment Practices by Industry Direct inquiries to the Chief, Public Service Division. Phone, 202-418-0200. Internal Equal Employment Practices Direct Inquiries to the Director, Office of Workplace Diversity. Phone, 202-418-0125.

Ex-Parte Presentations Information concerning ex-parte presentations should be directed to the Commission's Office of General Counsel. Phone, 202-418-1720.

Fees Inquiries concerning the Commission's Fee Program should be addressed to the Public Service Division, Room 254, 1919 M Street NW., Washington, DC 20554. Phone, 202-418-0192.

Information Available for Public Inspection At the Commission's

headquarters office in Washington, DC, dockets concerning rulemaking and adjudicatory matters, copies of applications for licenses and grants, and reports required to be filed by licensees and cable system operators are maintained in the public reference rooms—some reports are by law held confidential. General information is also available from the Commission's Internet site @ [fcc.gov](http://fcc.gov) and through fax-on-demand, 202-418-2830. In addition to the information available at the Commission, each broadcasting station makes available for public reference

certain information pertaining to the operation of the station, a current copy of the application filed for license, and nonconfidential reports filed with the Commission. Special requests for inspection of records at the Commission's offices should be directed to the Managing Director. Phone, 202-418-1919. The Library has on file Commission rules and regulations. Phone, 202-418-0450. The Office of Public Affairs distributes publications, public notices, and press releases. Phone, 202-418-0500.

For further information, contact the Public Service Division, Federal Communications Commission, 1919 M Street NW., Washington, DC 20554. Phone, 202-418-0200.
