US GOVERNMENT PRINTING OFFICE

ANNUAL REPORT

FISCAL YEAR 1996
U.S. Government Printing Office

Performance Measures
September 30, 1996

Operating Performance Measures

Congressional Record Delivery

The Congressional Record is an extremely important tool and product of the legislative process, and is a large part of GPO's mission. To gauge how well GPO is serving Congress by producing the Record timely, GPO has established a deadline of 9 AM the following day, when copy is received in GPO by midnight, regardless of whether the Senate or the House of Representatives is in session.

Our actual on-time delivery rate was 78.6 percent in fiscal year 1996, compared with 96.9 percent in fiscal year 1995. The decline in the indicator resulted from a decision to reduce cost and several other factors. In prior years when copy was delivered extremely late from Congress, GPO would produce a "cut" Record, an issue containing the timely copy, and then produce a second book with the other copy. GPO management and Congressional leadership decided to forego the extra expense of producing a second book. Other factors that contributed to the decline in the on-time delivery percentage were that copy was received after midnight on 21 occasions, and unusually large issues (exceeding 300 printed pages) were produced on 13 occasions.

Overtime Management

GPO makes an ongoing effort to minimize overtime hours. In fiscal year 1996, overtime hours decreased to 238,000 hours from 358,000 hours in fiscal year 1995, or 33.5 percent. The cost of overtime in fiscal year 1996 decreased by $3.4 million to $7.5 million from $10.9 million in fiscal year 1995, or 31.2 percent. We were successful in achieving our goal in fiscal year 1996, actual overtime hours worked were well below the 358,000 overtime hours threshold. Our goal for fiscal year 1997, which takes into account the reduction in staffing over the last year, sets a level of 333,000 overtime hours as our upper limit.

Production Chargeable Hours

Chargeable hours decreased to 955,000 in fiscal year 1996 from 1,179,000 in fiscal year 1995, a decrease of 224,000 hours, or
19.0 percent. The results for 1996 did not meet our goal of equaling or exceeding the chargeable hours necessary to achieve break-even operations. The decrease in chargeable hours results from less work being done in the Plant. The drop in workload has caused additional downsizing: in September 1996, there were 116 fewer employees (6.7 percent fewer employees) in GPO's central plant than there were in September, 1995. Our fiscal year 1997 chargeable hour goal is to achieve the level necessary to achieve break even in the Plant.

On-Time Delivery of Procured Printing

The Printing Procurement Department contracted with commercial printing firms to ship 180,000 jobs in fiscal year 1996 compared with 207,000 jobs in fiscal year 1995. For fiscal year 1996, GPO's goal was to have at least 95 percent of procured printing orders delivered on-time and a quality-acceptance rate of at least 99 percent. GPO attained a 95 percent on-time delivery rate and a 99.2 percent quality acceptance rate. The goals for fiscal year 1997 remain the same as those for fiscal year 1996.

Financial Performance Measures

Cash Management

- **Payment Performance** - In fiscal year 1996, GPO continued its strong payment performance by taking prompt payment discounts when it was to the government's advantage. GPO's total purchased printing expense for fiscal year 1996 was $513.4 million after deducting prompt payment discounts of $7.5 million. The resultant 1.46 percent of discounts taken to net purchased printing exceeded our fiscal year 1996 goal of 1.4 percent. Our goal for fiscal year 1997 remains 1.4 percent.

Discounts lost increased to $193,000 in fiscal year 1996 from $163,000 in fiscal year 1995. The percentages of discounts lost to discounts offered were 2.5 percent and 2.1 percent in fiscal years 1996 and 1995, respectively. We achieved our goal set for fiscal year 1996, which was a maximum of 2.5 percent. Our goal for fiscal year 1997 remains at 2.5 percent.

- **Electronic Payments** - The use of electronic funds transfer (EFT) payments results in a savings for GPO and the Department of the Treasury because paper checks do not have to be produced and processed. In 1996, approximately 21,500 monthly payments, or 85 percent, of all GPO payments were made by EFT, compared with 22,000 monthly payments, or 83 percent of all payments in fiscal year 1995. Our goal for fiscal year 1996, which was to show an increase in the percentage of EFT payments of total payments, was met.
Debt Management

• Federal Receivables - In fiscal year 1996, GPO billed Federal agencies $760.3 million for printing and binding services. Of this amount, $437.9 million, or 57.6 percent, was collected using the Department of the Treasury’s On-Line Payment and Collection (OPAC) system.

In fiscal year 1996, GPO’s average monthly receivables more than 90 days overdue were $9.2 million, or 25.8 percent of the monthly average of outstanding receivables. The Department of Defense’s (DoD) account at GPO, with an average monthly balance more than 90 days overdue of $8.3 million, or 91.1 percent of all of GPO’s delinquent receivables, was by far GPO’s largest delinquent account. At the end of fiscal year 1996, DoD owed GPO $9.0 million that was between 31 and 60 days overdue, $3.1 million that was between 61 and 90 days overdue, and $8.4 million that was more than 90 days overdue.

The DoD’s slow payment process results from procedures requiring that all GPO invoices pass through duplicate review processes before payment is initiated; also, DoD does not use Treasury Department’s OPAC system. Defense Printing Service (DPS) bills its customers who review GPO’s invoices prior to paying DPS. After DPS has been paid, GPO’s invoices are sent to Defense Finance and Accounting Service where they are reviewed a second time before GPO is paid. This additional layer of DoD administration has had a sustained negative impact on GPO’s ability to collect from DoD since the inception of DPS in October 1992.

GPO has been working with DoD management to resolve this problem, and a special task force has been established within DoD to research and pay GPO invoices. Another goal of the task force is to convert DoD’s payment process from a manual to an electronic system. DoD had initially scheduled this conversion for fiscal year 1996, but later changed it to fiscal year 1997. GPO’s goal for fiscal year 1997 is to improve the DoD receivables turnover while maintaining non-DoD collections at the current rate.
Management Comments

GPO's consolidated financial statements are prepared in accordance with generally accepted accounting principles (GAAP). GAAP requires that financial statements be prepared on the accrual basis of accounting, whereby expenses are recorded when incurred and revenues are recorded when earned, regardless of when cash is disbursed or received. GAAP also requires that the statements be prepared in a manner consistent with that of the previous year. The accompanying financial statements provide information on all events and economic affairs controlled by GPO in conformity with established regulations, procedures, and promulgated accounting principles.

GPO's accounting system includes internal controls designed to provide reasonable assurance that assets are safeguarded against loss from unauthorized use or disposition and that transactions are properly recorded. To ensure that adequate internal controls are maintained, management monitors the systems that provide management data and initiates modifications or improvements deemed necessary to promote operational efficiencies and encourage adherence to prescribed managerial policies.

Operating Issues

GPO's mission is to assist Congress and Federal agencies in the cost-effective creation and replication of information products and services and to provide effective and economical public access to government information services and products. GPO strives to operate and manage its resources as efficiently as possible, and to achieve steady gains in productivity. An example of GPO's fulfilling this role is found in GPO ACCESS. This Internet-based system rapidly and efficiently diffuses a wide range of government information at no cost to the user. GPO computer systems will also be used to support government-wide procurement operations in fiscal year 1997 when the Commerce Business Daily is electronically published and disseminated.

Neither Congress nor GPO has the ability to accurately forecast the volume of printing that may be needed for the legislative process. In years where the workload exceeds the funding available, GPO exercises its authority to temporarily fund shortfalls through the Revolving Fund. Funding by Congress for their printing requirements in recent years has been adequate and no near-term shortfalls are anticipated.

Over the last few years there has been a steady decline in traditional printing and binding in the Federal government. Recent GPO financial operating results reflect this decline. However, GPO is responding by continuing to downsize its workforce, by reducing operating costs, by trying to attain a larger share of the Federal printing market, and by encouraging
customers to adopt electronic-media products when cost effective.

GPO continues to pursue avenues that will increase the efficiency and effectiveness of the Federal government. A good example of this is the 5-year strategic alliance formed by GPO and the Department of Commerce (DoC) in fiscal year 1996. As a result of this agreement, GPO is developing a secure, electronic version of the Commerce Business Daily that will allow Federal procurement offices world-wide to enter their solicitations to GPO's Internet Web-site. The agreement also requires GPO to make the solicitations available instantaneously to prospective bidders. So that the private sector is not adversely affected, the data will also be made available to commercial value-added-providers. The traditional paper version of the Commerce Business Daily will continue to be printed by a commercial printer and sold to small businesses and other subscribers. Finally, GPO will also provide all accounting services related to customer accounts for DoC. One measure of the efficiency created by this alliance is that customer charges per electronic solicitation will be reduced by 72 percent!

Fiscal Year 1996 Results

The public printing and documents chapters of Title 44, United States Code, require GPO to fulfill the printing needs of the Federal government and distribute government publications to the public. GPO activities are financed through a Revolving Fund, which is reimbursed by payments from client agencies, sales to the public, and transfers from the Congressional Printing and Binding Appropriation and the Salaries and Expenses Appropriation of the Superintendent of Documents. These annual appropriations reimburse GPO for costs incurred while performing congressional work and fulfilling statutory requirements associated with the distribution of government publications. Reimbursements from these appropriations to the Revolving Fund are recorded as revenues. GPO was adversely affected by the funding-related government-wide shutdowns in fiscal year 1996. As a result, GPO workload was severely reduced in almost all programs.

GPO experienced a consolidated net loss of $16.9 million in fiscal year 1996, compared with a $3.0 million loss in fiscal year 1995. Revenues decreased by $34.1 million (4.0 percent) overall, while expenses decreased by only $20.2 million (2.4 percent).
A summary, in thousands, of revenues and net income or loss in each GPO major operation is shown below.

**Summary of Results**

Consolidated revenues decreased to $818.5 million in 1996 from $852.6 million in 1995. The largest revenue decrease occurred in Printing and Binding Operations, which decreased by $21.9 million. Sales Program revenue, which dropped $9.6 million, was adversely affected by the government-wide shutdowns. As a result of the fall off in revenue, GPO's loss increased to $16.9 million in fiscal year 1996 compared with $3.0 million in fiscal year 1996.

**Printing and Binding Operations**

In fiscal year 1996, GPO Printing and Binding Operations
contributed revenues of $751.1 million, compared with $775.5 million in fiscal year 1995. Printing and Binding Operations generated 79.5 percent of total pre-elimination revenues of $944.5 million, compared with 80.5 percent last year. Revenues from commercially procured printing were $559.6 million, or 59.2 percent of total pre-elimination revenues.

**Purchased Printing Operations** - Central and regional printing procurement operations reported revenues of $559.6 million in fiscal year 1996, compared with $574.7 million in 1995. Expenses for printing procurement activities were $559.4 million, compared with $573.0 million in the previous fiscal year. The procurement operations experienced a net gain of $178,000, compared with a net gain of nearly $1.7 million in fiscal year 1995.

- **Central** - Revenues from Central Office printing procurement activities were $358.9 million, compared with $355.6 million in fiscal year 1995. Expenses for Central Office printing procurement activities were $353.7 million, compared with $350.2 million in the previous fiscal year. The net gain for Central Office printing procurement activities was $5.2 million, compared with a fiscal year 1995 net gain of $5.4 million.

- **Regional** - Regional printing procurement revenues were $200.8 million, compared with $219.1 million in the previous year, while expenses decreased to $205.8 million from $222.8 million in 1995. The net loss in regional printing procurement increased to $5.0 million in fiscal year 1996 from a $3.7 million net loss in fiscal year 1995.

**In-house Printing Operations** - Central and regional in-house printing operations generated revenues of $191.5 million in 1996, compared with revenues of $200.9 million in 1995. This operation experienced a net loss of $8.6 million, compared with a net loss of $8.7 million in fiscal year 1995.

- **Central** - Central Plant Printing Operations incurred a loss of $6.6 million on revenues of $188.4 million in 1996, compared with a net loss of $7.6 million on revenues of $195.9 million in fiscal year 1995.

- **Regional** - GPO regional printing operations generated revenues of $3.1 million in fiscal year 1996, compared with revenues of $5.0 million in 1995; and a net loss of $2.0 million in fiscal year 1996, compared with a net loss of $1.1 million in 1995.

In fiscal year 1996, as a result of continuing losses brought on by a steadily declining demand for printing in the field locations, the New York, San Francisco, and Chicago Regional Printing Offices were closed, and the Juneau Satellite Printing Office was scheduled to be closed early in fiscal year 1997. These actions will leave Denver as the lone city hosting a GPO.
regional plant.

Other Operations - Other Operations consist of revenues and expenses related to the sale of retired assets, the pay parking program, the Commerce Business Daily billing and collecting program, and other transactions. Other Operations generated net income of $745,000 in fiscal year 1996, compared with net income of $784,000 in 1995.

Information Dissemination

Sales of Publications Program - GPO’s Sales of Publications Program generated a net loss of $8.9 million in 1996, compared with fiscal year 1995 net income of $3.2 million. Total revenues decreased to $70.5 million, compared with $80.1 million in fiscal year 1995, while expenses increased to $79.4 million from $76.9 million. Revenues from the sale of electronic government information were $4.3 million in fiscal year 1996, compared with $3.9 million in fiscal year 1995. Bookstore revenues decreased to $13.2 million, compared with $15.2 million in fiscal year 1995. The government-wide shutdowns contributed to the drop in program revenue.

Agency Distribution Services - Under contract with customer agencies, GPO distributes publications to recipients designated by those agencies and charges for the cost of services performed. This program had revenues of $4.4 million and a loss of $340,000 in fiscal year 1996, compared with revenues of $5.3 million with net loss of $36,000 in fiscal year 1995. The loss in fiscal year 1996 was due to the correction of overbillings to GSA for postage. These overbillings had occurred over the prior two years.

Appropriations

Salaries and Expenses - The Salaries and Expenses Appropriation is used to fund the Statutory Distribution Program, the Depository Library Program, the Cataloging and Indexing Program, and the International Exchange Program. These programs are administered and performed by Superintendent of Documents employees. The amount of expended appropriation was $31.3 million in fiscal year 1996, compared with $27.6 million in fiscal year 1995.

Congressional Printing and Binding - Printing and binding expenses for work performed for Congress are reimbursed to the Printing and Binding Operations Revolving Fund upon billing. For fiscal year 1996, reimbursements from the appropriation were $82.4 million, compared with $73.1 million in fiscal year 1995.

Eliminations
Financial statement eliminations consist of transactions for printing and binding, publications, and other services provided by GPO to operations funded within GPO. Eliminations of intra-office transactions increased to $125.9 million in fiscal year 1996 from $111.1 million in fiscal year 1995.

Fiscal Year 1997 Projections

The consolidated operating loss of $3.0 million in fiscal year 1995 increased to a $16.9 million underrecovery in fiscal year 1996. Despite this increase in the operating loss, management is hopeful of returning GPO to breakeven operations soon. Unsettled external issues, however, create some uncertainty regarding GPO's ability to fully recover its costs. The Department of Justice (DoJ) rendered a decision in fiscal year 1996 that GPO's "control" over Executive Branch printing was unconstitutional, and granted executive agencies the authority to bypass GPO to purchase printing. The effect of this decision was subsequently mitigated by a letter, signed by Office of Management and Budget Director Leon Panetta, which requested that Executive Agencies continue to use GPO services until the DoJ decision is reviewed. GPO is hopeful that prudence will prevail and that the long-standing, but too often bypassed, regulation that requires government printing to be ordered through GPO is strengthened, not removed.

GPO will continue to reduce the size of its workforce in fiscal year 1997. GPO will be at or below the Appropriation Committee's ceiling of 3,600 full-time equivalents at fiscal year end. An early-out retirement (without incentive) is being offered to employees. GPO has eliminated a $2 million a year loss by closing all but one regional printing plant.

GPO will continue to improve operations and services. The Superintendent of Documents critically reviewed and downsized its inventory of publications during fiscal year 1996. As a result, inventory holding and handling expenses, as well as the surplus inventory cost, will be reduced in fiscal year 1997 and beyond. The Superintendent of Documents operation also expects to award a contract to acquire a fully integrated order processing system in fiscal year 1997. This system will vastly improve customer services by allowing more efficient and faster processing of orders, inquiries, and complaints. In all, 18 antiquated computer systems will be replaced by the new system.

GPO ACCESS continues to be a popular source for electronic government information. This award-winning system became free to users on December 1, 1995, and now averages 3 million documents retrieved from 72 databases each month! In fiscal year 1997, GPO will increase GPO ACCESS' utility further by distributing additional agency publications in electronic format, including the remaining volumes of the Code of Federal Regulations and the
Printing Procurement Operations will be reengineering its outdated backbone system for contracting. The new system will be PC-based and networked. It will provide many efficiencies throughout the procurement cycle, will enhance GPO's ability to conduct electronic commerce, and will improve communications with customer agencies and commercial printers.

The accompanying notes are an integral part of these consolidated statements.
U.S. Government Printing Office

Notes to Consolidated Financial Statements
As of September 30, 1996

1. Organization:

The U.S. Government Printing Office (GPO) was created by the Printing Act of 1860. The U.S. Congress enacted Title 44, a comprehensive codification of printing related laws, in 1968. This legislation provides to the Federal government an economic and efficient means for the production and procurement of congressional and Federal agency printing and binding and for the dissemination of information to the public.

The Public Printer, appointed by the President of the United States with the advice and consent of the U.S. Senate, oversees the operations of GPO. GPO discharges its responsibilities through the operation of a Revolving Fund and congressional appropriations.

2. Significant Accounting Policies:

A. Basis of Accounting

The accompanying consolidated financial statements are prepared on the accrual basis of accounting in accordance with generally accepted accounting principles.

B. Basis of Consolidation

The accompanying consolidated financial statements of GPO include the accounts of all funds under GPO control that have been established and are maintained to account for the resources of GPO. Also provided are supplemental schedules that present GPO’s financial position, results of operations, and cash flows by fund type and by program within each fund. GPO operations are financed through the operation of a Revolving Fund and a General Fund.

Revolving Fund accounts are established by law to finance a continuing cycle of operations with receipts derived from operations. These accounts are used to finance two major GPO programs: Printing and Binding Operations and Sales of Publications Operations.

Printing and Binding Operations accounts are used to record transactions related to printing and binding, and distribution services. Sales of Publications Operations accounts are used to record transactions related to the sales of publications and their distribution to the public.
General Fund accounts are used to record financial transactions arising under annual congressional appropriations under two major programs: the Salaries and Expenses Appropriation and the Congressional Printing and Binding Appropriation.

The Salaries and Expenses Appropriation account is used to record transactions for expenses incurred by the Superintendent of Documents for depository library distributions, international exchange distributions, other statutory distribution of publications, and for the cataloging and indexing of government publications.

The Congressional Printing and Binding Appropriation account is used to record printing and binding performed for Congress and for printing and binding publications authorized by law to be distributed without charge to recipients.

All significant intra-agency balances and transactions have been eliminated in consolidation. Revenue and expense eliminations for the years ended September 30, 1996 and 1995, consisted of the following services.

<table>
<thead>
<tr>
<th>Service</th>
<th>1996</th>
<th>1995 (Audited)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Printing and reproduction</td>
<td>$122,212,000</td>
<td>$105,816,000</td>
</tr>
<tr>
<td>Data processing</td>
<td>2,029,000</td>
<td>2,250,000</td>
</tr>
<tr>
<td>Miscellaneous</td>
<td>1,692,000</td>
<td>3,054,000</td>
</tr>
<tr>
<td><strong>Total</strong></td>
<td>$125,933,000</td>
<td>$111,120,000</td>
</tr>
</tbody>
</table>

In addition to the above eliminations, there is an elimination within the In-house Printing Program of revenues and expenses for services and other internal transactions (e.g., internal-use forms, electronic repairs) provided to and by the In-house Printing Operations. The eliminations were $4,402,000 and $5,400,000 for the years ended September 30, 1996 and 1995, respectively.

To the extent feasible, general and administrative expenses have been allocated among the various expense categories based on the estimated level of effort associated with each program.

C. Revenue Recognition and Expended Appropriations

In-house Printing and Binding - By law, GPO must be reimbursed by the party requesting its services for all printing and binding work. Consequently, all Revolving Fund revenues from in-house printing and binding work (work not commercially procured) are
recognized as the work is performed by GPO.

**Commercially Procured Printing and Binding** - Revolving Fund revenues from commercially procured printing and binding are recognized on the date the contract requirements are fulfilled, which is generally the date of shipment by the commercial contractor to the requesting agency.

**Distributing and Selling Publications** - Revolving Fund revenues from distributing and selling publications are recognized when the publications have been shipped or when the services have been performed.

**Appropriation Revenues** - Appropriation revenues are recorded when the qualifying expenses are incurred. The amount of appropriations expended and the programs funded by appropriations are presented in Note 9A. Unexpended appropriations are recorded as a component of Equity of U.S. Government (see Note 9B).

**D. Funds with U.S. Treasury**

Funds with U.S. Treasury represent all unexpended balances for GPO's accounts with the Department of the Treasury. The amounts recorded by GPO at September 30, 1996 agree with the balances recorded by the Department of the Treasury in its Government Online Accounting Link System (GOALS). A breakdown of items included in this balance as of September 30, 1996 and 1995, follows.

<table>
<thead>
<tr>
<th></th>

<td>$157,080,000</td>
<td>$148,079,000</td>
</tr>
</tbody>
</table>
For purposes of the statements of cash flows, cash includes all funds with the Department of the Treasury.

As explained in Note 9, at the end of both 1996 and 1995, all appropriated funds were expended or obligated. Obligated and unobligated appropriation balances are cancelled after 5 years. In 1996 and 1995, no such cancellations were required for fiscal years 1991 and 1990, respectively.

E. Inventories

Inventories of publications held for sale are valued at the lower of cost, using the weighted average cost method, or market, and are shown net of an allowance for surplus publications. The allowance for surplus publications is established to estimate the value of potentially obsolete or excess publications held in inventory.

Paper, materials, and supplies inventory includes the cost of production material (e.g., blank paper, spare parts, ink, and book cloth), as well as the cost of administrative-use supplies. This inventory is valued at the lower of cost, using the weighted moving average cost method, or market, net of an allowance for materials and supplies obsolescence. There is no provision for paper obsolescence due to the frequency of use. The components of inventories as of September 30, 1996 and 1995, are as follows.

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

F. Property, Plant, and Equipment

Property and equipment purchases and additions are valued at
cost. Printing equipment transferred to GPO from other Federal agencies is valued in accordance with Regulation Number 26, *Government Printing and Binding Regulations*, published by the Joint Committee on Printing (JCP). This valuation generally approximates historical cost.

Major alterations and renovations are capitalized, while normal maintenance and repair costs are expensed as incurred.

Depreciation and amortization of property and equipment is calculated on a straight-line basis over their estimated useful lives. The following table presents the ranges of depreciable and amortizable lives of GPO assets.

<table>
<thead>
<tr>
<th>Category</th>
<th>Estimated Useful Life</th>
</tr>
</thead>
<tbody>
<tr>
<td>Buildings and improvements</td>
<td>42 to 50 years</td>

</table>

G. Annual, Sick, and Other Types of Leave

Annual leave is accrued as a liability as it is earned, and the liability is reduced as leave is taken. Each year the annual leave liability account is adjusted to reflect current pay rates.

Sick leave and other types of non-vested leave are expensed as the leave is taken. Although there is no limit on the amount of sick leave that can be accumulated, no lump-sum payment is made for unused sick leave.

H. Accounting for Interagency Activities

Other Federal agencies make financial decisions and report certain financial matters on behalf of the entire Federal government, including matters in which individual agencies may be an indirect party-in-interest. This concept of having Federal agencies record or report only those financial matters for which they are directly responsible is consistent with the U.S. General Accounting Office’s Policies and Procedures Manual for Guidance of Federal Agencies, Title 2, "Accounting," which requires financial matters to be identified with the agencies that have the budgetary authority and resources to manage them.

Financial matters maintained or reported by other Federal agencies...
agencies in which GPO is indirectly involved include employee benefit plans (see Note 3) and certain legal situations (see Note 7C).

I. Statements of Cash Flows

The statements of cash flows identify cash receipts and payments and classify them into operating, investing, and financing activities. The disclosure of this information is intended to help assess the ability of GPO to generate funds from current operations, to identify financing acquired from outside sources, and to identify the major nonoperating (investing) uses of funds. For purposes of these statements, cash is considered to be Funds with U.S. Treasury, as defined in Note 2D.

J. Allocated Workers' Compensation Liability

The Federal Employees Compensation Act (FECA) provides income and medical cost protection to covered Federal civilian employees injured on the job, employees who have incurred a work-related occupational disease, and the beneficiaries of employees whose death is attributable to a job-related injury or occupational disease. The FECA program is administered by the U.S. Department of Labor (DOL), which initially pays valid claims and subsequently seeks reimbursement from the Federal agencies employing the claimants.

In fiscal year 1993, DOL began providing the actuarially estimated liability for claims outstanding at the end of each fiscal year and allocated to GPO the DOL's estimate of GPO's portion of the actuarial liability. This liability includes the estimated future costs of death benefits, workers' compensation, and medical and miscellaneous costs for approved compensation cases. It does not include the estimated future costs for claims incurred but not approved at year-end. The allocated liability totaled approximately $27.5 million at September 30, 1996, and $24.9 million at September 30, 1995.

The actuarially computed liability was discounted at September 30, 1996, using a discount rate of 7.0 percent for fiscal year 1997 and thereafter. At September 30, 1995, the liability was calculated, using a discount rate of 7.1 percent for fiscal year 1996, 6.6 percent for fiscal year 1997, and 7.0 percent thereafter.

K. Reclassification of Fiscal Year 1995 Balances

Certain reclassifications have been made to fiscal year 1995 balances to present them consistently with the fiscal year 1996 financial statements.

3. Employee Benefit Plans:
GPO funds a portion of pension contributions for its employees under the Civil Service Retirement System and the Federal Employees Retirement System and also makes payroll deductions for employees for their pension contribution. GPO is not required to disclose the assets of either system nor the actuarial data with respect to accumulated plan benefits of the unfunded pension liability relative to its employees. This reporting is the direct responsibility of the Office of Personnel Management (OPM). The cost of health care benefits for retired employees and the reporting of such amounts are also the direct responsibility of OPM.

A. Civil Service Retirement System

The majority of GPO’s employees were covered by the Civil Service Retirement System (CSRS) during fiscal years 1996 and 1995. Total GPO matching contributions (7.5 percent for Congressional Record indexers, investigators, and law officers, and 7 percent for all other employees covered under this plan) to CSRS for all eligible employees were approximately $8.7 million and $9.3 million for the years ended September 30, 1996 and 1995, respectively.

B. Federal Employees Retirement System

On January 1, 1987, the Federal Employees Retirement System (FERS), a defined contribution plan, commenced pursuant to Public Law 99-335. Employees hired after December 31, 1983, were automatically covered by FERS and Social Security, while employees hired prior to January 1, 1984, were able to choose between joining this plan or remaining in CSRS. Unlike CSRS, FERS offers the Federal Government’s Thrift Savings Plan (TSP), which requires GPO to contribute 1 percent of an enrolled employee’s base pay, and additionally to match voluntary employee contributions up to 4 percent of base pay.

For the years ended September 30, 1996 and 1995, total GPO (employer) contributions to FERS (16.9 percent for Congressional Record indexers, 24.3 percent for investigators and law officers, and 11.4 percent for all other employees covered under this plan) were $4.5 million and $4.4 million, respectively. Additional contributions of GPO’s share to the TSP for the years ended September 30, 1996 and 1995, were $1.5 million and $1.4 million, respectively.

C. Social Security System

GPO also makes matching contributions to the Social Security Administration (SSA) under the Federal Insurance Contributions Act (FICA). For employees covered by FERS, GPO contributes matching amounts of 6.2 percent of gross pay (up to $62,700) to SSA’s Old-Age, Survivors, and Disability Insurance (OASDI)
Program. Additionally, GPO makes matching contributions for all employees of 1.45 percent of gross pay to SSA’s Medicare Hospital Insurance Program. Payments to these programs for the years ended September 30, 1996 and 1995, amounted to $5.2 million and $5.4 million, respectively.

4. Accounts Receivable:

Accounts receivable as of September 30, 1996 and 1995, consists of the following.

<table>
<thead>
<tr>
<th></th>
<th>1996</th>
<th>1995 (Audited)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Federal Agencies:</td>
<td></td>
<td></td>

</tr>
<tr>
<td><strong>Total accounts receivable, net</strong></td>
<td><strong>$156,256,000</strong></td>
<td><strong>$170,117,000</strong></td>
</tr>
</tbody>
</table>

The majority of GPO’s accounts receivable are due from other Federal agencies. Unbilled completed work results from the delivery of goods or the performance of services for which bills have not yet been rendered. Included in this balance as of September 30, 1996, is unbilled commercial printing of $54.1 million, unbilled direct mill-to-customer agency paper shipments of approximately $1.0 million, finished work in the process of being billed of $34.0 million, and finished work for which invoices have not been prepared as of September 30, 1996, valued at $11.0 million.

Unbilled work in process represents the amount owed on work performed on customer orders as of September 30, 1996 and 1995, that by law must be reimbursed by GPO customers.

Employees accounts receivable for fiscal year 1996 includes $997,000 and $60,000 owed by current employees and former
employees, respectively, who were advanced both annual and sick leave. Both types of leave for current employees will be repaid by these employees in biweekly installments or by other GPO employees on their behalf through the donated leave program.

5. Accounts Payable and Accrued Expenses:

Accounts payable and accrued expenses are composed of the following as of September 30, 1996 and 1995.

<table>
<thead>
<tr>
<th>Accounts payable:</th>
<th>1996</th>
<th>1995 (Audited)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Commercial printing</td>
<td>$48,294,000</td>
<td>$52,268,000</td>
</tr>
<tr>

<td>8,727,000</td>
<td>8,036,000</td>
</tr>
<tr>
<td>State and local payroll taxes</td>
<td>802,000</td>
<td>843,000</td>
</tr>
<tr>
<td><strong>Total accounts payable and accrued expenses</strong></td>
<td><strong>$80,274,000</strong></td>
<td><strong>$79,336,000</strong></td>
</tr>
</tbody>
</table>

6. Deferred Revenue:

As of September 30, 1996 and 1995, deferred revenue consisted of the following.

<table>
<thead>
<tr>
<th>Deferred subscription revenue</th>
<th>1996</th>
<th>1995 (Audited)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Customer deposits--held on accounts</td>
<td>7,725,000</td>
<td>8,389,000</td>
</tr>
<tr>
<td>Customer deposits--unfilled orders</td>
<td>2,813,000</td>
<td>2,210,000</td>
</tr>
<tr>
<td>Advanced billings to Federal agencies</td>
<td>8,655,000</td>
<td>6,308,000</td>
</tr>
<tr>
<td><strong>Total</strong></td>
<td><strong>$37,294,000</strong></td>
<td><strong>$38,467,000</strong></td>
</tr>
</tbody>
</table>

Deferred revenue results from the receipt of customer remittances for products or services that will be delivered or provided in the future. Deferred subscription revenues for products such as
the Congressional Record, the Federal Register, and the Commerce Business Daily are recognized as revenue at the time the products are delivered. Customer deposits for publication orders are recognized as revenue as customer orders are filled. At the time a customer cancels a subscription or closes a deposit account, the customer's unused account balance is refunded.

7. Commitments and Contingencies:

A. Operating Leases

As of September 30, 1996, GPO was committed to various noncancelable operating leases primarily covering warehouse, office, and retail space. Some of these leases contain escalation clauses and renewal options. A schedule of future minimum rental payments required under operating leases by type, which have initial or remaining noncancelable lease terms in excess of one year follows. Rent expenses for the years ended September 30, 1996 and 1995, were $6,550,000 and $6,606,000, respectively.

<table>

B. Commitments

GPO is committed, by contract, for goods and services that have been ordered but have not been delivered at fiscal year-end. Total undelivered orders for all GPO activities were approximately $108.6 million and $130.0 million as of September 30, 1996 and 1995, respectively.

C. Contingencies

GPO is a party to various administrative proceedings, legal actions, and claims brought by or against it. In the opinion of GPO management and legal counsel, the ultimate resolution of these proceedings, actions, and claims will not materially affect the financial position or results of operations of GPO.
Occasionally, GPO may be the named party, but another agency may administer and litigate the case. Amounts to be paid under any decision, settlement, or award pertaining thereto may be funded by those agencies. In most cases, tort claims are administered and resolved by the U.S. Department of Justice, and any amounts necessary for resolution are obtained from a Special Judgment Fund maintained by the Department of the Treasury. Amounts paid from this fund on behalf of the GPO were $80,000 and $84,000 for the years ended September 30, 1996 and 1995, respectively, and are not reflected in the GPO's consolidated financial statements.

8. Revolving Fund:

A. Cumulative Results of Operations

Cumulative results of operations for the Revolving Fund include net operating results since its inception, reduced by funds returned to the Department of the Treasury by legislative rescissions, and by transfers to other Federal agencies.

B. Invested Capital

Invested Capital represents Federal government resources directly appropriated to GPO by Congress to invest in GPO assets - primarily land, buildings, equipment, and working capital. The Revolving Fund was established in 1953 with appropriated funds of $33.8 million, and buildings and land with a fair market value of $415,000. Subsequently, Congress has provided additional funding to GPO for working capital ($58 million since 1953) and land and other improvements ($17.5 million since 1971).

Increases to Invested Capital are also recorded when printing equipment is donated to GPO. Invested Capital is reduced over the useful life of the donated asset or when retired. The net book value of assets donated to GPO from other agencies was $349,000 and $381,000 in fiscal years 1996 and 1995, respectively.

GPO received $12,900,000 of Revolving Fund appropriations during the 1970's for an air-conditioning system. This appropriation amount was recorded in Invested Capital in the Equity section. In 1994, a reclassification was made to transfer the cumulative depreciation expenses associated with the air-conditioning system from invested capital to cumulative results of operations. Since 1994, Invested Capital has been reduced annually by $440,000 to reflect the air-conditioning system's depreciation.

C. Summary of Revolving Fund Activity

Revolving Fund balance, September 30, 1994
Donated equipment, net (see Note 88)
Net loss for fiscal year 1995

Revolving Fund balance, September 30, 1995
Donated equipment, net (see Note 88)
Reclassification to transfer depreciation expense for air-conditioning system
Net loss for fiscal year 1996

Revolving Fund balance, September 30, 1996

9. Appropriated Funds:

A. Expended Appropriations

Total appropriations initially made available for fiscal years 1996 and 1995 were $83,770,000 and $89,724,000 for Congressional Printing and Binding, and $30,307,000 and $32,207,000 for Salaries and Expenses of the Superintendent of Documents, respectively. In fiscal year 1995, Public Law 104-19 rescinded portions of GPO's 1995 appropriations as part of the emergency supplemental appropriations act that was enacted to fund anti-terrorist initiatives. The 1995 Congressional Printing and Binding Appropriation was reduced by $5 million, and the 1995 Salaries and Expenses Appropriation was reduced by $600,000 as a result of these rescissions.

Expended appropriations for program operations for the years ended September 30, 1996 and 1995, were as follows.

See Note 11 for 1997 GPO funding appropriations.

B. Unexpended Appropriations

As of September 30, 1996, GPO had unexpended appropriations that were obligated for Salaries and Expenses and Congressional Printing and Binding services of $20,734,000 and $42,973,000, respectively, as shown in the accompanying supplemental Schedule of Appropriated Funds. In fiscal year 1995, these amounts were $22,553,000 and $41,610,000, respectively.

10. Related-Party Transactions:

The Refectory Cafe, Ltd. (RCL), a non-profit corporation chartered in the District of Columbia in 1985, operated the GPO Cafeteria (Cafeteria) until the RCL ceased operations on November 18, 1994. The members of the Board of Directors of the RCL were appointed by the former Public Printer and include the current Public Printer, the Deputy Public Printer, and one senior-level GPO manager. Employee food service is currently provided and managed by an independent contractor.

From its incorporation in 1985 through November 18, 1994, the Cafeteria sustained a cumulative loss of approximately $600,000, primarily as a result of a steady decline in customers. In fiscal year 1995, GPO paid approximately $100,000 to satisfy the RCL’s creditors, as the Cafeteria was unable to meet these obligations.
obligations. The RCL’s bank account, with a balance of $14,900 at September 30, 1996, will be used to resolve future claims against the Cafeteria that might arise, including amounts needed to terminate the RCL’s employee pension plan (Plan) as of November 1, 1995. Any remaining funds in the RCL account after all claims are satisfied will be deposited in the GPO Revolving Fund to offset GPO’s expenditures.

The latest actuarial report prepared by the Massachusetts Mutual Life Insurance Company, the Plan trustee, states that the RCL Plan was fully funded. Any Plan assets remaining after liquidation will be deposited in the GPO Revolving Fund to offset GPO’s expenditures.

11. Subsequent Events:

Public Law 104-197 approved on September 16, 1996, provides $110,746,000 in Federal funds to GPO for fiscal year 1997. Of these funds, $81,669,000 is to be used for the authorized printing and binding of the U.S. Congress and for the distribution of congressional information in any format, and $29,077,000 is to be used for expenses of the activities of the Office of the Superintendent of Documents necessary to provide for the cataloging and indexing of government publications and their distribution to the public, members of Congress, other government agencies, and designated depository and international exchange libraries as authorized by law.

Management believes that GPO will be able to meet its operating requirements with the approved Federal funding and cash flows from operations. However, management’s operating plans are dependent upon the volume and type of printing and binding services requested by Congress and other Federal agencies and management’s control of operating costs. There can be no assurance that the approved Federal funding and cash flows from operations will be sufficient to meet GPO’s operating requirements.
