PROCEEDINGS AND DEBATES OF THE 102<sup>d</sup> CONGRESS, SECOND SESSION

## SENATE—Monday, October 5, 1992

(Legislative day of Wednesday, September 30, 1992)

The Senate met at 9:30 a.m., on the expiration of the recess, and was called to order by the Honorable HERB KOHL, a Senator from the State of Wisconsin.

### PRAYER

The Chaplain, the Rev. Richard C. Halverson, D.D., offered the following prayer:

Let us pray:

*The Lord shall preserve thee from all evil; he shall preserve thy soul. The Lord shall preserve thy going out and thy coming in from this time forth, and for evermore.—Psalm 121:7-8.*

Gracious God, our Father in heaven, this morning let this generous promise from the Psalms be real and relevant for every Member of the Senate, every staff person, and the families of all who work in the Senate. As they are scattered, involved in the election or related issues, let Thy special blessing rest upon each one. Grant that they may have the sense of divine guidance in all their involvements and activities.

Grant that all who are running for reelection, whether in the administration or Congress, enjoy the sense of God-direction each day as they pursue whatever responsibility is laid upon them. Grant them grace for each moment, each step of the way—an awareness of the presence of God with them at all times, protection as they travel, labor or play, and a safe return to the tasks which await them when the 103d Congress opens.

In His name who is the Lord of Life and History. Amen.

### APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore [Mr. BYRD].

The legislative clerk read the following letter:

U.S. SENATE,  
PRESIDENT PRO TEMPORE,  
Washington, DC, October 5, 1992.

To the Senate:

Under the provisions of rule I, section 3, of the Standing Rules of the Senate, I hereby

appoint the Honorable HERB KOHL, a Senator from the State of Wisconsin, to perform the duties of the Chair.

ROBERT C. BYRD,  
President pro tempore.

Mr. KOHL thereupon assumed the chair as Acting President pro tempore.

### RESERVATION OF LEADER TIME

The ACTING PRESIDENT pro tempore. Under the previous order, leadership time is reserved.

### RECOGNITION OF THE MAJORITY LEADER

The ACTING PRESIDENT pro tempore. The Chair recognizes the majority leader.

### THE JOURNAL

Mr. MITCHELL. Mr. President, am I correct in my understanding that the Journal of the proceedings have been approved to date?

The ACTING PRESIDENT pro tempore. That is correct.

### SCHEDULE

Mr. MITCHELL. Mr. President, and Members of the Senate, today the Senate will take up a number of measures in an effort to complete action prior to adjournment. Among those matters which we must resolve today are the remaining appropriations conference reports. Those include the legislative, Department of Defense, and foreign operations measures. In addition, the energy conference report is expected to be taken up and acted upon by the House this morning.

We have the tax bill-urban aid package that is expected to be completed shortly, action on that measure, as well as the pending measure when the Senate returns to legislative session, the National Institutes of Health authorization report, and what remains unresolved, also, on the so-called Brady bill. So Senators can expect a full

schedule today, with the possibility of votes occurring at any time and a session extending late into the evening, if necessary.

I ask my colleagues for their patience and cooperation in this matter as we attempt to complete action on these important measures prior to adjournment.

Under the previous order, there will now be a period for morning business until the hour of 10 a.m., at which time, I inquire of the Chair whether or not the pending business would be the National Institutes of Health reauthorization bill.

The ACTING PRESIDENT pro tempore. That is correct.

Mr. MITCHELL. I thank the Chair and I yield the floor.

### MORNING BUSINESS

The ACTING PRESIDENT pro tempore. Under the previous order, there will now be a period for morning business.

The Chair recognizes the Senator from Washington [Mr. ADAMS] for up to 30 minutes.

### THE OPPORTUNITY OF A LIFETIME

Mr. ADAMS. Mr. President, as the 102d Congress of the United States moves closer to adjournment, I want to take a few minutes to reflect upon my service here in the Senate, revisit a few of the issues that occupied my time and attention, and to express my appreciation to the people of the State of Washington for having granted me the opportunity of a lifetime: a term of service in the Senate of the United States.

A little over 6 years ago, I left the private practice of law to seek the Democratic Party nomination in my State for the U.S. Senate. In traveling around my State, I found communities that had not flourished during the economic boom of the early 1980's.

Chief among those was the tricity area of central Washington, Richland,

\* This "bullet" symbol identifies statements or insertions which are not spoken by a member of the Senate on the floor.

Pasco, and Kennewick, a region that had nearly 50 years of dependence on Federal spending at the Hanford Nuclear Reservation.

Although the breathtaking changes that have occurred over the last few years could not have been anticipated at that time, it was clear to me that the future economic stability of the triticities rested in moving beyond cold war weapons production and into a more diverse employment base.

With a campaign theme calling on the people of Washington State to "step up to the future" our message resulted in a close, hard fought upset victory.

During my 6 years in the Senate, I have watched with great pride as the community in the triticities has accepted the challenges brought by a changing world: Today there are more people working in a rapidly diversifying local economy than were working at Hanford before Federal cutbacks began.

The future of Hanford is now in high technology research labs, in cleanup of the defense-related waste at the site, and in a leadership role in developing technologies to assist the world in stepping back from the brink of nuclear war.

In our lifetimes, we will see the nuclear genie that was released at Hanford under the Manhattan project in the early 1940's safely contained and channeled into peaceful scientific endeavors that benefit mankind rather than threaten its very survival.

I am proud to have kept that promise to the citizens of Washington, and to the families in the triticities, in helping them step up to the challenge of an uncertain future, a future that today holds great promise.

The lesson of the Hanford experience is that those who look toward the future will be rewarded with opportunity: Those who yearn for a past that cannot be recreated will be frustrated. There is no turning back.

When I was a candidate for this Senate seat, the timber communities of my State were likewise in an era of transition. Despite record log harvests occurring in the early 1980's, brought about by severe storms, and by the Mount St. Helen's blowdown, over 25,000 jobs were lost, due primarily to increased automation, changes in technology and continuing exports of raw logs to foreign mills.

In all those many months on the campaign trail, not one single voter ever mentioned a shy little bird called the spotted owl. Yet today, to hear the rhetoric, you would think he was public enemy No. 1, responsible for locking up the forests, destroying families and towns, and creating a climate of economic chaos.

Such a strange way to look at a little bird whose unfortunate role it is to serve as an indicator species warning us of impending disaster in the ancient

forest ecosystems, if we do not change our ways in harvesting old growth timber from public lands. Like the miner's canary, the spotted owl warns us of the deadly consequences that will follow the destruction of the fragile, old-growth ecosystems.

Who would have thought, 6 years ago, that the Pacific Yew tree was anything more than just a nuisance undergrowth, to be slashed and burned in the course of clearcutting yet another section of the forest? Today we hear that the humble Yew may hold the secret to curing some forms of cancer.

Should we not ask ourselves: What other great secrets, and answers to human mysteries, rest hidden in the ancient forests of the Pacific Northwest? By what right does this generation destroy the opportunity of a future generation to unlock those secrets? I am proud to have fought to protect what is left of those great forests in my State and the Pacific Northwest.

The fight is not yet over. I leave to my successor the responsibility to protect the public interest in this debate.

I hope the next session of Congress provides a climate where responsible legislation will heed the warning of the spotted owl. By providing meaningful protection for the fragile ecosystem that is home to the owl, the salmon, and the old-growth trees, the timber communities can survive.

But like their counterparts in the triticities, citizens of Forks, Grays Harbor, Skamania, and Pend Oreille must look to the future rather than to the past. The Federal Government has a responsibility to help: I hope to see an expansion of the New Beginnings Program that has been such a phenomenal success in meeting the retraining needs of women in timber households in Forks, WA.

And I hope the 103d Congress will revisit the proposal I advanced, with the courageous and enlightened support of the Senator from Vermont [Mr. LEAHY], to redirect Federal tax policy toward reinvestment, and new business capital, in those timber dependent communities.

Their futures depend on innovative and thoughtful approaches that look forward, not on a politically motivated siren song promising a return to a past that is gone forever.

During the time I have served in this body, it has sometimes seemed as though the pace of current events has been on fast forward. Who would have predicted, 6 years ago, that we would witness the breakup of the Soviet Union and the collapse of international communism?

That a peaceful election would bring a return of democratic institutions to Nicaragua? Or that tiny, war torn El Salvador would at last begin to heal the wounds inflicted by a cruel civil war?

This great institution is sometimes called upon to exercise its own responsibilities under the Constitution in determining whether American men and women will go to war. It was during my term in the Senate, I am glad to say, that we reaffirmed once again that only Congress under the Constitution has the power to declare war.

I am proud to have stood on this floor on several occasions, whether discussing the reflagging of Kuwaiti tankers, or responding to the President's initiative in August 1990 when Iraq invaded Kuwait, debating congressional responsibility under the War Powers Act. There are many who say the debate that preceded our vote to authorize U.S. participation in the Persian Gulf war was the Senate and the House at their best.

If history records it as such, and if the pattern of this Nation's future deliberations on the issue of war follows a similar course, I will consider my efforts rewarded. In upholding the sole power to declare war under article I, section VIII, we avoided repeating the mistakes of past executive branch wars that led to so much national turmoil.

During my Senate term, I have been fortunate to serve on five Senate committees, working with many of my colleagues from both sides of the aisle. In the 100th Congress, I had the great honor of serving on the Foreign Relations Committee, under the able leadership of Senator CLAIBORNE PELL.

My longtime interest in national transportation issues was enhanced as a member of the Committee on Commerce, Science and Transportation, chaired by my friend, the senior Senator from South Carolina [Mr. HOLINGS]. And during my entire term I had the pleasure of serving on the Senate Rules Committee, under the capable stewardship of the Senator from Kentucky, Senator WENDELL FORD.

On the Senate Labor and Human Resources Committee these past 6 years, it has been my distinct pleasure to participate closely in legislative work that touches the lives of all Americans.

The health, educational, and workplace interests of working Americans; the needs of our disabled and elderly; the hopes of those suffering from AIDS and other dread diseases are all gathered within the jurisdiction of that committee. I salute and appreciate the hard work and determined leadership that Senator TED KENNEDY displays as chairman of that committee.

I enjoyed being a part of the many health initiatives of the committee, with particular pride in the several womens' health initiatives Senator BARBARA MIKULSKI and I cosponsored and brought before the Senate.

Mr. President, I am very proud of my tenure as chairman of the Labor Committee's Subcommittee on Aging. During the little more than 2 years that I have chaired the subcommittee, I be-

lieve we have contributed substantially to addressing the needs of our Nation's elderly. I am frankly at the diversity of the issues we have tackled through the subcommittee. I am also proud of my dedicated and hard-working staff of the subcommittee.

A partial list of our accomplishments include the reauthorization of the Older Americans Act and a great deal of work on issues affecting the health care needs of middle-aged and older women. The Congress is on the verge of enacting my legislation to establish national standards for screening mammography. I held the first congressional hearing concerning menopause. And, the subcommittee also addressed other critical issues such as pension reform, malnutrition among the elderly, the quality of care in nursing homes, long-term care, and the need to prohibit physicians from referring patients to the health care businesses in which they have financial interests. I leave knowing that the subcommittee has a solid foundation for continued action on these and other crucial matters affecting older Americans.

And of course, I have deeply appreciated the chance to sit on the Senate Appropriations Committee, and to chair the Subcommittee on the District of Columbia. Nearly 20 years ago, as a Member of the other body, in chairing the Subcommittee on Constitutional Law of the House District Committee, I helped bring home rule to the District of Columbia.

In my more recent role, I have come to see, up close, the challenges presented to a local government that must depend on the fair-mindedness and generosity of Federal legislators whose primary obligation is to the voters of their own States.

No single example better defines the frustration confronting a chairman of the District Appropriations Subcommittee than the recent veto of a bill that would allow the local government to use its own local funds to provide abortion services for some of this Nation's poorest women. Presidential meddling into this local issue, and congressional acquiescence in that action cries out for a remedy.

I have now come to the conclusion that the remedy for this imposed second class citizenship is statehood for the citizens of Washington, DC.

I know the citizens of my State appreciate the benefits that have flowed from my membership on the Senate Appropriations Committee. And although the subcommittee chairmanship I held might seem remote from their interests, a U.S. Senator has an obligation to serve the national interest in addition to the interests of his or her State.

The important benefit of that subcommittee chairmanship includes participation on all conferences within the committee's jurisdiction. It was a

great honor. Chairmanship of the District of Columbia Subcommittee can be a source of frustration, or it can be a labor of love.

For me, it has been the latter, in large measure because some of my more senior colleagues recognized the difficulty of the task, and were sources of encouragement. They remembered their own years chairing the subcommittee.

I refer to the Senator from Hawaii [Mr. INOUE] and to the Senator from West Virginia, Chairman BYRD.

Under the chairmanship of Senator ROBERT BYRD of West Virginia, the Senate Appropriations Committee has, during my 4 years as a member, struggled to do the best of things in the worst of economic times.

My own personal priorities, particularly funding of AIDS treatment under the Ryan White CARE Act, womens' health initiatives, worker retraining, public transportation alternatives, and the agricultural needs of my State have always gotten a fair hearing and a decent level of funding.

The obligation to allocate among the numerous competing interests, to remain within the constraints of a budget that is unfairly burdened with the debt heaped upon it by the folly of the early 1980's, and to meet the current needs of America's families, its elderly and its children, has fallen to the senior Senator from West Virginia.

His service in this body began over 33 years ago; he is the Senate's President pro tempore. But his love of this institution and its rules, his appreciation of the history of democracy from the ancient Greeks and Romans up to our present time, and his unswerving loyalty to the Constitution, all point to special talents and interests apart from seniority and tenure.

Like my colleagues on both sides of the aisle, when I look back with fondness on the time I have spent here, it will remain a matter of pride to recall that I served in the U.S. Senate with ROBERT C. BYRD.

I have spoken this morning of the changes that have come to my State, and the changes that have occurred around the world during my term in the U.S. Senate.

When the 103d Congress meets in a few short months, change will also come to this institution. In some important ways, the U.S. Senate will come to more closely resemble the face of America, and in subsequent years, I hope, will continue to see more women, more minorities, more sons and daughters of working families, bringing their range of skills and experience to the Senate.

For my part, I hope the new Senators who take the oath of office in January will help this body continue to grow, and to face up to the future with the kind of courage and vision the Founders expected.

The State of Washington is heavily dependent on the quality of that vision. Our State is home to great industries that welcome the opportunity to compete in the emerging, new world economic order.

Firms like Microsoft and Boeing have the work forces and management to do business anywhere in the world, but we must insist that our trading partners are willing to compete on a level field. With its location at the gateway to the Pacific rim, my State is eager to invite foreign capital, such as Nintendo, to find a home in the Pacific Northwest. National policies should encourage that participation.

From the perspective of having spent four decades of adult life in the private practice of law, in Congress, in a Presidential Cabinet, private business, and now the Senate, I see a great need for change in the way this Nation deals with the issue of the Federal budget.

Several of my colleagues who are also retiring have expressed their views on this topic in recent days. I hope it is not just the liberated feeling of those now longer standing for election that provokes such introspection and candor.

But it is beyond dispute that the national debt, the yearly deficit, and the growing interest on the debt that is currently the fastest growing category of domestic spending pose a serious threat to our Nation's future. We will be strapping an ever growing 800-pound gorilla onto the backs of our children and grandchildren we as a nation do not face up to the future by paying as we go in the present.

Having served as the first chairman of the House Budget Committee from 1975 to 1977, I have personal knowledge of the time when our Federal budget was under control. During the years I was in the private sector in the early 1980's, I watched with horror as the wave of mergers, acquisitions and binge economic policies created an illusion of prosperity for which the bills are now coming due.

As this Nation faces up to the future, we need to embark on a serious national discussion, defining the relationships between America's generations, and our common obligation to ensure that each is fairly treated.

In the upcoming months, I plan to devote some time to considering the elements of an honest and realistic budget. By clearly defining the relationship between our Nation's past investment and debt, present operating and capital budgets, and our investments in this Nation's future, we can chart the course out of the current budget mess.

As my thoughts on this topic develop, those of you who will grapple with the deficit monster can expect to hear from me. The solution to this problem must become our most urgent priority.

Finally, Mr. President, I must say that my long record of public service could not have been possible without the many friends and supporters from the State of Washington, who sent me to Congress seven consecutive times, and later elected me to the Senate.

Friendships that began on the playing fields of Seattle, and in the classrooms of Broadway High School and the University of Washington have endured these years of change.

Above all else, I have had the love and friendship of my wife Betty and four children in good times and bad. What more could anyone ask?

Here in the Senate, I am grateful to have been assisted by a loyal, talented, and dedicated staff that shared my desire to serve the public interest.

They have proof that the younger generation coming to the forefront of American political life has the skills and the idealism to continue carrying our Nation forward.

To my colleagues on both sides of the aisle, and to the dedicated men and women who serve the U.S. Senate in staff capacities, I extend my deepest appreciation for the 6 years we have worked together.

And I look forward to many more years of remaining active in the public discussion of the great issues that distinguished this Nation from all others.

Thank you, Mr. President.

I yield the floor.

Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. DOLE. Mr. President, is my understanding correct that leader time has been reserved?

The ACTING PRESIDENT pro tempore. That is correct.

#### SALUTE TO JAKE GARN

Mr. DOLE. Mr. President, we all know that voters are frustrated with Congress and frustrated with Washington, DC.

They look at the Capitol and see an institution which is unwilling and unable to deal with the most pressing problems of our day.

For the past 18 years, Senator JAKE GARN has served as a voice for the people's frustration. And for the past 18 years, JAKE GARN's honesty and courage have served Utah and America very well.

Senator GARN's years in the Senate have been ones of both tragedy and triumph. We grieved with him over the tragic death of his wife, Hazel. We re-

joiced with him when he married Kathleen.

And we marveled at his courage when he flew aboard the space shuttle *Discovery*, and when he underwent a major operation to donate one of his kidneys to one of his children.

The courage exhibited by Senator GARN in his personal life, could also be seen in his service in the Senate.

Senator GARN has always called them as he saw them, and he has never been afraid to let this body know when it has failed in its duty.

From banking deregulation to export controls, JAKE GARN has tackled the tough issues, and he has made the Senate a better place.

We all know that many Members of Congress are retiring involuntarily this year. That is not the case with JAKE GARN. He won his last two elections with over 70 percent of the vote, and there is no doubt he could have been re-elected with a similar margin this year.

But Senator GARN has always known that the view from his home in Park City was far better than the view from his office on Capitol Hill.

And perhaps Senator GARN said it best when he said:

The Founding Fathers did not intend that we stay in session from January to December every year. \* \* \* I think they expected that we might live and work with the people who elected us to represent them.

And now that Senator GARN will be living with the people who elect us, I know he will keep speaking out on issues with the same courage and forthrightness that have become his trademark.

#### SALUTE TO STEVE SYMMS

Mr. DOLE. Mr. President, along with many of my colleagues, last week I attended a salute to our good friend, STEVE SYMMS.

There was a lot of good-natured ribbing, and a lot of one-liners. More importantly, however, there were a lot of kind words—from both sides of the aisle—for Idaho's senior Senator.

I was honored to be asked to share some of my thoughts and memories about STEVE SYMMS and his 12 years in the Senate.

I spoke of his loyalty and friendship to me, and the fact that he has stood beside me, solid as a rock, through some of the toughest times of my political life.

I spoke of his courage on a sweltering day in Nicaragua, when Senator SYMMS faced the dictator, Daniel Ortega, in his stage-managed confrontation with our Senate delegation.

And I spoke of the simple fact that STEVE SYMMS is a man who sticks to his principles.

There is no more staunch patriot in the Senate than STEVE SYMMS. For the past 12 years in the Senate, and 8 years

before that in the House, STEVE has been a leader in the efforts to keep America strong, to win the cold war, and to bring democracy to nations all around the world.

And all those who know STEVE know that when he retires from the Senate, he will not retire from the give and take of public debate. Rather, he will be where he loves to be—in the middle of the argument, standing up for America and standing up for freedom.

#### THE CONTINUED PLIGHT OF THE HAITIAN PEOPLE

Mr. PELL. Mr. President, a year ago this week, Haitian President Jean Bertrand Aristide was dragged from the Presidential Palace by members of the armed forces and forced into exile. Although President Aristide had an overwhelming mandate—over 67 percent of the popular vote in Haiti's Presidential elections—he had little protection from the wrath of the armed forces. As a result, Haiti's 7-month experience with democracy was abruptly halted.

At that time, I joined in introducing a resolution condemning the coup and calling upon international organizations to promote the restoration of democracy. The United States and the Organization of American States responded quickly, calling for the return of constitutional democracy and implementing an economic embargo against the impoverished country. Sadly, the implementation of that policy has proven far more difficult than anyone imagined. Today, the military continues to rule the country by force and Haitians live in a climate of fear, insecurity, and lawlessness.

In the year since the coup, it is estimated that more than 2,000 civilians have been killed, more than 37,000 have fled the country, and more than 15,000 have applied for refugee status at the U.S. Embassy. Tens of thousands are in hiding and thousands more have been victims of illegal arrests, torture, and harassment. According to a recent report by Amnesty International, extortion is an increasing form of repression as citizens are forced to pay to avoid arrest or ill-treatment, to secure better prison conditions, or to be released from detention.

The recent agreement to send 18 OAS observers to Haiti to monitor the human rights situation and evaluate needs for humanitarian assistance is a small step in the right direction. However, there is concern that the enormity of their task far outweighs their limited numbers. Unfortunately, President Aristide's original proposal of sending 500 observers was scaled down to 18 in negotiations between representatives of the de facto government and President Aristide.

There are no easy answers to Haiti's problems. The immediate issue, how-

ever, of the appalling lack of respect of human rights and personal security, must be addressed. Through continued international pressure, we must remind all Haitians that they will be held to internationally recognized standards of human rights. The United States, in conjunction with the Organization of American States, must continue to work for the restoration of constitutional order.

In the longer term, the international community must begin to work with Haitians to address the fundamental issues that have crippled democratic effort for decades. Any long lasting solution must include bringing the security forces under civilian authority, and separating and professionalizing the military and police. These steps along with the establishment of the rule of law and strengthening democratic institutions must be priorities in Haiti, otherwise many more Haitian democrats will meet the same fate of President Aristide and his supporters.

#### A NEW CHALLENGE FOR RHODE ISLAND LABOR LEADER EDWARD MCELROY

Mr. PELL. Mr. President, it gives me great pleasure to call the attention of the Senate to the appointment of Edward J. McElroy, one of Rhode Island's most respected and influential leaders of organized labor, to the post of secretary treasurer of the American Federation of Teachers [AFT] here in Washington, DC.

In his new position Mr. McElroy will be the second in command of the 800,000-member AFT, one of the Nation's largest, most innovative and progressive education organizations. Its president is the venerable Albert Shanker who is known to so many of us for his superb leadership, incisive thinking, provocative writing, about education in this country.

For 30 years, Ed McElroy has dedicated himself to the best interests of Rhode Island's working men and women, first as a leader of the Warwick Teachers Union, then as president of our State's AFT and, since 1972, as president of the Rhode Island AFL-CIO. His contributions are immense and, while my State will miss his leadership and energy, the AFT and, indeed, our Nation will benefit enormously from his vision and his talent.

A native Rhode Islander, Ed McElroy graduated from Providence College in 1962 and promptly began teaching social studies and English at Lockwood Junior High School in Warwick, RI. It was then and there that he began his involvement with organized labor as a member of the Warwick Teachers Union.

As the son of a union man, Ed McElroy understood the vital role that organized labor plays in protecting the rights of working men and women and

he was determined to work to expand those rights, especially in the case of public employees. He quickly rose to be president of the Warwick Teachers Union and was instrumental in securing passage by the Rhode Island General Assembly of legislation to give all Rhode Island teachers important new rights to bargain collectively.

Having demonstrated in the Warwick post his leadership ability, his understanding of the Rhode Island educational—and political—systems and his knack for building consensus, Ed McElroy was elected president of the Rhode Island Federation of Teachers in 1971.

The Rhode Island Federation of Teachers represents elementary and secondary school teachers in cities and towns across my State, as well as faculty and staff at Rhode Island College, professional staff at the Rhode Island Department of Education and some health care professionals. When Ed McElroy became the Rhode Island Federation of Teachers president, the Federation had 2,500 members. Today, it represents almost 10,000 Rhode Island teachers and other education professionals in 11 communities.

As president of the Rhode Island Federation of Teachers, Ed McElroy has been an avid and determined advocate for improving the quality of education in our State. He has vigorously opposed education budget cuts, has worked to improve the standards and training for Rhode Island teachers and has fought to give teachers a direct voice in creating better schools for Rhode Island's children. Ed McElroy has been a staunch and tireless warrior for the Rhode Island teacher, protecting their rights, improving their working conditions, and increasing the pay of a profession that should be the proudest and most rewarding one can pursue.

Ed McElroy's style of quiet, effective leadership and consensus building gained statewide recognition and respect. As a result, in 1972 he was elected president of the Rhode Island AFL-CIO, a position he has filled ably while continuing as president of the Rhode Island Federation of Teachers.

The Rhode Island AFL-CIO represents 80,000 Rhode Island workers and in a very real way, it also watches over the interests of all Rhode Island working people whether or not they happen to be a member of a labor union. Ed McElroy's 20 years as president of the Rhode Island AFL-CIO have been especially challenging because labor, both in Rhode Island and nationally, has been buffeted by aggressive opponents and by tough economic times.

In each battle, whether at the bargaining table or in the State House, Ed McElroy has been an indefatigable advocate, his energy boundless, his arguments persistent and persuasive. While he and organized labor have not won every skirmish, the fact that Rhode Is-

land's AFL-CIO remains today a strong, proud, and effective force is a tribute to the quality and tenacity of Ed McElroy's tenure as president.

Ed has faithfully served Rhode Island in other important ways for many years through his participation in the United Way, the Narragansett Bay Commission, Meeting Street School, Work Force 2000, and the Swearer Commission. I would also note that in addition to everything else, he has been a good friend and wise adviser to me for many years.

During his years serving Rhode Island, Ed McElroy has, in my view, been motivated by one principal vision: The belief that the quality of American education should be second to none in the world.

I salute the American Federation of Teachers for recognizing what we, in Rhode Island, have known for years; namely, that Ed McElroy is a rare and special breed of person. Never has he forgotten why he was chosen to lead. And never has he forgotten that his leadership is the vessel to help those who bestowed the responsibility of leadership upon him.

We, Rhode Islanders, will undoubtedly gain from his new role on the national scene. But, while we take pride in that accomplishment, we also feel a sense of loss in our hearts. For now we must share him, where once he was our special treasure, and ours alone.

#### TRIBUTE TO BROCK ADAMS

Mr. PELL. Mr. President, with the retirement of our colleague BROCK ADAMS at the end of the 102d Congress, the State of Washington and the U.S. Senate will be losing the service of a gifted public servant whose career has covered an exceptionally broad spectrum of issues and concerns.

It has been my privilege to share the same committee assignments with Senator ADAMS for at least part of his Senate career, and I can attest at first hand to his genuine concern for dealing constructively with major issues in each committee jurisdiction.

He served on the Committee on Foreign Relations during his first 3 years in the Senate and became deeply involved in our deliberations over protection of navigation in the Persian Gulf during the volatile final years of the Iran-Iraq war.

Senator ADAMS was a leading and sometimes lonely figure in challenging what he perceived to be the folly of re-flagging and escorting Kuwaiti tankers through the mine-choked waters of the gulf. I particularly admired and supported his valiant efforts to invoke the War Powers Act in that connection.

On the Committee on Labor and Human Resources he has been at the forefront of creative action on important social issues, most notably in his capacity as chairman of the Sub-

committee on Aging and as sponsor of the reauthorization of the Older Americans Act. He has been a key proponent of fetal tissue transplantation research, an endeavor that holds promise of alleviating debilitating and painful diseases such as Parkinson's disease.

He has also been a strong advocate of increased attention to women's health issues and has pressed the National Institutes of Health to increase its research activities in this area.

Senator ADAMS has also been an active member of the Committee on Rules and Administration on such issues as the uniform poll closing legislation which is so important to the Western States.

My association with BROCK ADAMS predates his arrival in the Senate. During his tenure as Secretary of Transportation in the Carter administration he was particularly helpful in advancing my interest in the improvement of rail passenger service in the Northeast corridor between Washington and Boston.

One aspect of that project to which he was especially attentive involved the realignment of the Amtrak right of way through downtown Providence, resulting ultimately in the virtual reconstruction of the heart of the city. Secretary ADAM's attentiveness and consideration were much appreciated by Rhode Island.

Mr. President, I have touched on only a few high points of Senator ADAM's multifaceted career. He has contributed richly and constructively to a very broad range of programs and issues. I regret his departure from the Senate and wish him well in all future endeavors.

#### TRIBUTE TO THE LATE GEN. JAMES A. VAN FLEET

Mr. THURMOND. Mr. President, I rise today to pay tribute to a great man, a great soldier, and a great patriot, Gen. James A. Van Fleet, who recently passed away at the age of 100.

General Van Fleet had a long and distinguished career as an Army officer, beginning with his graduation from the U.S. Military Academy in 1915. His class also included two other great Army officers, Gens. Dwight D. Eisenhower and Omar N. Bradley. Upon graduation, Van Fleet accepted a commission in the infantry, the "Queen of Battle," and was soon involved in hostile action as the commander of a machine gun battalion during World War I.

In the years between World War I and World War II, the young officer held a number of assignments in the United States and the Panama Canal zone, the most interesting being a double assignment as both an ROTC instructor and the football coach at the University of Florida.

The peace following World War I was brief, and it was not long before the

winds of conquest were fanning the flames of war throughout the world. Japanese expansion in Asia and Germany's actions in Europe made it only a matter of time before we once again found ourselves involved in global conflict.

During World War II, General Van Fleet spent 3 years commanding the 8th Infantry Regiment, 4th Infantry Division, conducting combat training and amphibious exercises at a number of stateside forts, including Fort Benning, the home of the infantry. In 1944, the division was sent to England where Van Fleet's regiment was selected to spearhead the landing of the 4th Division at Utah Beach in Normandy. Incidentally, I first met General Van Fleet during the D-day invasion when his unit linked up with the 82d Airborne Division, of which I was a member, in the town of St. Marie Eglise. General Van Fleet continued to serve in the European Theater in several different units, participating in some of the conflict's most crucial and key engagements. After the surrender of Germany to the Allied Forces, the General was slated to be sent to the Pacific Theater. He was in the United States when the war with Japan came to an end.

Despite the end of armed conflict with the Axis Forces, the United States and the free world faced a new and equally dangerous and ambitious enemy—our former Communist allies in the Soviet Union, Southeast Asia, and China. General Van Fleet soon found himself back in Europe, this time in Greece where he was the director of the Joint U.S. military advisory and planning group. The general's strategy and tactics soundly defeated the Communist insurgency, and the plan he implemented in Greece has been cited as an excellent example of how to defeat guerrilla forces.

The threat of Communist expansion was truly global, and on the Korean peninsula, American and South Korean forces were waging a vicious war against the North Korean Army which had invaded its southern neighbor without provocation. In April 1951, Van Fleet found himself in Korea, in command of the Eighth Army. During the 2 years he was in command, Van Fleet built up and maintained the morale of his troops at a high level. This was no easy task, considering that they had been pushed to Pusan Harbor, fought their way to the Yalu River, and then were forced back past the 38th Parallel where a static, almost trench war developed. In February of 1953, Van Fleet turned over command of the Eighth Army and retired, after having served our Nation for 38 years.

In his almost four decades of soldiering, General Van Fleet compiled an impressive record of awards and to this day, he is considered to be one of the outstanding combat commanders of

World Wars I and II, as well as a brilliant tactician. President Truman once called General Van Fleet "the greatest general we have ever had."

Mr. President, James Van Fleet enjoyed a long and full life and made many important contributions to the safety and future of the free world. We are all indebted to this great man and we shall miss him.

#### DACOTAH CHAPTER AFA AWARD

Mr. PRESSLER. Mr. President, I take this opportunity to congratulate the Sioux Falls, SD, Dacotah chapter of the Air Force Association. The Dacotah chapter has received the first annual North Central Region Chapter of the Year Award. The award is based on the chapter's performance in programs, newsletters, membership, and reports.

The Dacotah chapter also has received the Golden Community Partner Award, which is a national membership award. Its membership currently stands at 280. The Dacotah chapter is one of 337 chapters throughout the world, which together comprise the Air Force Association, an independent, civilian, nonprofit organization that promotes national defense through the use of aerospace technology and a volunteer total force Air Force. Worldwide membership is nearly 200,000.

The Dacotah chapter conducts programs to support several activities. Its members educate the public about aerospace defense by providing speakers, programs, and newsletters. The chapter administers support programs for the 114th Tactical Fighter Group of the South Dakota Air National Guard.

Another important part of the Dacotah chapter's mission is to provide support not available from Air Force sources. It assists recruiters and supports the South Dakota State University Air Force ROTC Detachment and the Arnold Air Society in ways the Air Force cannot. The organization also is an important supporter of the South Dakota Civil Air Patrol. The local chapter provides funding to the AEF Visions of Exploration Program at local elementary and junior high schools. It also sponsors civil leader tours to USAF bases.

The Air Force Association is an admirable organization. It was formed as an organization in which people could address the defense responsibilities of our Nation using the dramatic advances in aerospace technology. The association also educated its members and the public on how technology can contribute to the peace and security of the world.

Mr. President, I congratulate the Dacotah chapter and all those involved in attaining this honor, including President Charles Nelson, Vice President D.K. Koller, Secretary Dale Faeth, Treasurer Frank McQuire, and

all the other hardworking members of the Dacotah chapter of the Air Force Association.

#### YEAR OF RECONCILIATION EVENTS

Mr. PRESSLER. Mr. President, I am pleased Congress has adopted and the President has signed into law a resolution which I coauthored declaring 1992 a National Year of Reconciliation between American Indians and Non-Indians. This proclamation marks the culmination of a combined effort by members of both the Indian and non-Indian communities. This joint effort is an example of how we should proceed in achieving greater reconciliation.

Mr. President, the resolution should facilitate efforts for reconciliation across the Nation. As the senior Senator from South Dakota, I would like to see the residents of South Dakota, and especially our young people, actively participate in reconciliation by building bridges of understanding between American Indians and non-Indians.

To encourage this effort, I contacted more than 12,000 teachers in my home State to encourage their students to participate in the Spirit of Reconciliation. Students are sending me either a poster or an essay based on this theme. All participants will receive a certificate of merit for their individual efforts toward reconciliation. In addition, every essay and poster I receive will be displayed in my offices—both here in Washington, DC, and in my State offices.

The first essay received is an excellent example of the mail I am receiving. The essay was written by Kari Nicole Cox. She is a second grader at the Hawthorne School in Sioux Falls, SD. Kari ended her essay with this sentence: "Reconciliation is a big word, but my heart is big too." This reflects the attitude of many of the students I am hearing from. I ask unanimous consent that Kari Cox's complete essay be entered in the RECORD.

I will be holding a listening meeting with South Dakota tribal leaders in the near future. Listening meetings, such as this one, are important in keeping abreast of all the latest developments in Indian country.

In closing, I urge my colleagues to join me in taking an active role in reconciliation during the remainder of this year and on into the future.

SIoux FALLS, SD.

During this National Year of Reconciliation I have an Indian friend. I think she is beautiful. She thinks I am too. I am mixed race. I know that people can get along if we all try. That is my wish. *Reconciliation* is a big word, but my heart is big too.

Love,

KARI COX.

Second grade, Hawthorne School.

#### CORN PALACE CELEBRATES CENTENNIAL

Mr. PRESSLER. Mr. President, the World's Only Corn Palace, located in Mitchell, SD, is celebrating its 100th anniversary. This one-of-a-kind landmark was created in 1892. For 100 years it has been one of South Dakota's greatest tourist attractions.

The Corn Palace is a castle-like structure decorated with over 3,000 bushels of colored corn, as well as grains and grasses. Its exterior murals are changed each spring to express the year's chosen theme, which is selected by the Corn Palace Committee.

The manner in which the palace is decorated is well planned and similar to a paint-by-numbers approach. First the palace artist sketches and color-codes the designs which are enlarged and transferred onto sheets of roofing paper attached to the exterior panels. Then the corn and other decorative items are nailed or stapled to the panels to create the mural designs.

An official pictorial record is displayed inside the palace, showing each year's decorative theme since its inception. For years the murals were designed by Oscar Howe, a famous South Dakota artist. Mitchell artist and educator, Cal Schultz, has been designing the murals since 1977.

The history of the Corn Palace has been researched in depth by Clyde Goin, who is known as the Corn Palace historian. Mr. Goin's findings are contained in "The Corn Palace Story," which reports that the Corn Palace was created to revitalize immigration to South Dakota to convince the Corn Belt farmer that corn and wheat could be grown in abundance in South Dakota. Mr. President, I ask unanimous consent that "The Corn Palace Story" be printed in the RECORD immediately following my remarks.

While the Corn Palace may have been created to attract settlers to the area, it has since grown to serve a multitude of purposes. In addition to drawing over 750,000 visitors each year, the Corn Palace is the focal point of the Mitchell community. It serves as a center for entertainment—over the years attracting such stars as Bob Hope, Red Skelton, Lawrence Welk, and the Mills Brothers. The Corn Palace also has hosted politicians, including John Kennedy in 1960. In fact, President Bush stopped at the Corn Palace during his first Presidential race.

The Mitchell Corn Palace serves as the sporting arena for the athletic teams of Mitchell High School and Dakota Wesleyan University as well as for many of the State regional sporting events. It also houses the Mitchell Teen Center.

The annual Corn Palace week celebration each September is a favorite highlight for the community. This week-long event provides daily entertainment, including the Polka Fes-

tival, which brings visitors from 40 States.

The Corn Palace is world renowned and I am pleased to tell my colleagues its features have been included in the "Seeds of Change" exhibit currently displayed at the Smithsonian's Museum of Natural History. In fact, the exhibit's Director has confirmed the Mitchell Corn Palace was the inspiration for the grand entrance to the "Seeds" exhibit. The "Seeds of Change" exhibit runs through May 1993.

Mr. President, recently the Corn Palace was presented with the 1992 Special Achievement Award by the Black Hills, Badlands & Lakes Association, South Dakota's largest private tourism organization. The award appropriately recognizes the Corn Palace for its 100 years as a premier visitor attraction. I ask unanimous consent that the award announcement as printed in the Rapid City Journal be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

#### CORN PALACE GETS AWARD

The Black Hills, Badlands & Lakes Association 1992 Special Achievement Award was presented to the Corn Palace Saturday night.

Jim Sellars, Corn Palace general manager, accepted the award from BHB&L President Bill Honerkamp.

Honerkamp said the award was given in recognition of the Corn Palace's 100 years as a premier South Dakota visitor attraction.

"For 10 decades, this architectural showcase has captured the imagination of visitors and showcased America's foremost performers," Honerkamp said. "The Corn Palace is a monument to South Dakota ingenuity and to one community's quest to create and preserve a landmark that is singular on this planet."

#### THE CORN PALACE STORY

On July 26, 1892, in executive session, the Corn Belt Real Estate Association initiated plans to revitalize immigration to South Dakota to convince the Corn Belt farmer that corn and wheat could be grown in abundance in South Dakota. The idea of a Corn Belt Exposition was accepted by the association membership and presented to leading businessmen of Mitchell's commercial sector the following day. The major problem was the lack of a suitable building for such a venture.

With the real estate association's commitment to underwrite part of the expense, Mitchellites picked up on Sioux City, Iowa's Corn Palace which had been cancelled for 1892. In deference to the Corn Belt Real Estate Association, which had initiated the idea, it was to be called the Corn Belt Exposition.

An out-of-state band was engaged along with several free street acts. Each of the 26 counties represented in the real estate association purchased booth space to exhibit the crops produced and goods manufactured in their county—and to tout the fertility of their land and the productivity of its people—just a great place to live!

From the day of its inception, July 26, 1892, until the first day of the Exposition, the City of Mitchell and the Corn Belt Real Estate

Association had joined forces. An Exposition building had been built and decorated from top to bottom with native grasses and grains and a variety of colored corn. Entertainment had been booked and the entire city was decked out in nature's finest raiment. The doors opened on September 28, 1892—only 64 days later!

The venture was a great success! Plans were immediately underway for 1893. The building was enlarged to accommodate more purveyors as well as larger audience. The designs would again be mostly geometric patterns. The second year was equally successful.

By early 1894, economic conditions in the country were disastrous; severe drought conditions gripped the entire farm belt. The Exposition was cancelled. Economic conditions worsened and the celebration was set aside until 1900, when it was revived only to be dropped again for 1901. The year 1902 saw a resurgence of the economy. The Corn Belt Exposition was back for good!

By 1905, the twice-enlarged original building had served its purpose. Plans were formulated for a new building, which was located one block north of the original building. It was completed in 55 days, time enough for the 1905 celebration. This building stood until the very early spring of 1920. During the winter months of 1919-1920 the dirt floor had been flooded providing Mitchellites with South Dakota's first indoor ice skating rink.

In 1919, concern for safety precipitated laws governing buildings and their use. Large groups of people could no longer congregate in wooden structures. The third and present building made entirely of steel and concrete, was designed by architects Rapp & Rapp of Chicago who also designed Radio City Music Hall in New York City, as well as many other famous theatrical buildings throughout the United States.

It was obvious early in 1920 that complications would not allow construction to be completed in time for the 1920 fall Festival. Construction was planned for 1921. Time for the Festival was rapidly approaching with no building, so plans were made to stage the show with circus theme in a huge tent two blocks north of the new building site. The plan met with great enthusiasm but foul weather held crowds to a minimum. The new building was completed in 1921 just in time for the show. The first performance was delayed approximately two hours so some final touch-up painting could be completed.

The general condition and existing inconveniences of the Palace dictated a general overhaul in 1964. A bond issue of \$395,000 was passed by the people and new seating, lighting, air circulation, stage props and a sizeable addition, to include modern dressing rooms, gave the Palace new life. In 1987, the Corn Palace lobby and infrastructure received another \$650,000 worth of renovations.

In 1979, the Palace experienced its only major disaster. A fire near the largest minaret, located on the roof directly above the front entrance, blazed nearly out of control. The amount of water necessary to extinguish the blaze cascaded through the roof entrance, down the stairs and spread throughout the building. Plaster walls and ceilings were devastated along with the parquet basketball floor. Damage was well over one million dollars. To this day the community owes a great debt of gratitude to our local fire fighters who literally "saved the Palace".

#### DECORATING THE PALACE

Decorations on the Palace consisted of dock, wild oats, brome grass, blue grass, rye

straw and wheat tied in bunches and nailed in attractive designs with corn of different colors, sawed in half, lengthwise, and nailed flat-side to the Palace. All grains and grasses were applied in pre-determined design. Usually the earlier Palaces had sugarcane as the bottom decoration due to its hardness and easy replacement.

Until the 1979 fire, the Palace was always decorated from top to bottom. However, since that time any flammable material must be at least eight feet above ground level. Over time the hammer and nails have given way to air nailers and staplers, the old wood scaffolding has been replaced by tubular steel, and the hand saw method of cutting corn has bowed to a specially designed table saw. Normally, decorating starts in mid summer and is completed in mid-September. The total annual cost of decorating can vary from \$25,000 to \$60,000, depending on the amount of surface to be worked.

#### ENTERTAINMENT

The entertainment during the early years was, by popular demand, the concert bands—Pat Conway, Karl King and John Phillip Sousa to name a few. By the early 1920's stage revues were in demand. The first of the "big band" era to play the Palace was Benny Meroff's Orchestra in 1931. Virtually all the big bands played the Palace at least once through 1959. For the next 20 years, the greatest of the "standup" comedians and entertainers held sway. Recent years have seen a shift to shows with several different entertainers for one day stands, leaning toward country western. The history of Palace entertainment mirrors the change in entertainment over the past century.

The Corn Palace is more than just the home of a festival or a point of interest for tourists. The Palace is a practical structure adaptable to many purposes. It is a convention center, a facility for dances, stage shows, meetings, and industrial displays. One of the most important functions is as a sports arena for local and area schools. Sports for all age groups from elementary school to college constantly use the facilities. Time was, the Palace's main purpose was to attract people to South Dakota. Today, the Palace strives to stop folks so they may enjoy a bit of what is now a 100 year old tradition.

#### RECOGNITION OF JANET KRAMER DICKERSON OF MADISON, SD

Mr. PRESSLER. Mr. President, I rise today to recognize the outstanding research completed by Janet Kramer Dickerson, extension home economist for Lake County, SD, residents, headquartered in Madison, SD. Her research paper, entitled "Use and Care of Protective Clothing by Certified Private Pesticide Applicators: A South Dakota Study," was presented during the National Association of Extension Home Economists [NAEHE] conference held last week in Washington, DC. During the NAEHE conference, Mrs. Dickerson received a national home laundering award from her peers for this outstanding research.

Mr. President, agriculture is the driving force behind the economy and plays an important role in the lives of the people in my home State of South Dakota. It is well known that agricul-

tural production is increased through the use of pesticides. The purpose of Mrs. Dickerson's study was to identify the attitudes of South Dakota certified private pesticide applicators toward the use and care of clothing worn during the handling, mixing, and application of pesticides.

Research findings indicated that reading and following directions on pesticide labels could greatly reduce health risks related to pesticide exposure. The South Dakota Cooperative Extension Service incorporated this data into statewide training seminars conducted for commercial and private pesticide applicators. Each seminar participant received a magnet, similar to a refrigerator magnet, which can be attached to a washing machine. The magnet clearly outlines the correct procedures for laundering pesticide contaminated clothing.

Funding for the project was provided by the Environmental Protection Agency through the South Dakota Department of Agriculture, the South Dakota State University Research Station, and the South Dakota State University Cooperative Extension Service.

I commend Mrs. Dickerson for identifying this problem and finding a creative way to deal with it. It is estimated that 12,000 magnets have been distributed to homes throughout South Dakota in the past 2 years. This type of education is helpful in protecting worker safety.

In 1960, Mrs. Dickerson—nee Kramer—a 4-H member from Spink County, and I attended the National 4-H Club Congress in Chicago, IL, as a member of the 4-H delegation from South Dakota. That experience had a significant impact on both of our lives. It was a pleasure to meet with her and other South Dakota extension home economists last week.

Mr. President, I ask unanimous consent that an abstract of Mrs. Dickerson's research on the proper handling of pesticide-contaminated clothing be inserted in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

Dickerson, Janet A. "Use and Care of Protective Clothing by Certified Private Pesticide Applicators: A South Dakota Study." Thesis, Master of Science, 1991, South Dakota State University, Brookings.

*Purpose.* The purpose of this study was to identify the attitudes of South Dakota Certified Private Pesticide Applicators toward the use and care of clothing which is worn for the handling, mixing and application of pesticides. Information related to the effectiveness of the educational information presented by the South Dakota Cooperative Extension Service at the Private Pesticide Certification seminars and through the home study examination is also included in the study.

*Method.* A two part survey questionnaire was mailed in November, 1990, to 2680 of the 21,297 certified private pesticide applicators in South Dakota. These individuals were

identified during the systematic sample, stratified by county procedure. Part I of the survey, consisting of 34 questions was designed to be completed by the certified private pesticide applicator. Part II of the survey, consisting of 36 questions was designed to be completed by the individual in the household who is responsible for the laundry of the clothing worn while handling, mixing and applying pesticides. Results were analyzed using the Statistical Analysis System computer program. Methods of statistical analysis used included frequencies and cross tabulations. Chi-square was used for the statistical test as the data collected was discrete. The  $P \leq .01$  probability level for chi-square test was selected as criteria for identifying statistically significant differences.

**Findings.** Results of this study indicated applicators generally feel the use of pesticides for increased crop production highly outweighs the human health risks and that the reading and following of directions on the pesticide label could greatly reduce health risks related to pesticide exposure. Although both the launderer and the applicator perceived that there were health risks involved due to exposure to pesticides, data collected for this study does not imply that all precautions were taken to eliminate exposure. The applicators (>80%) identified protective clothing choices as long sleeved shirts, jeans or work pants, leather or canvas shoes and baseball style caps with 63.1% selecting vinyl/rubber gloves for use when handling, mixing and applying pesticides. 88.6% of the launderers reported washing pesticide contaminated clothing separate from the family laundry and of these same individuals only 19.3% reported wearing vinyl/rubber gloves while handling these clothes. Effectiveness of the educational information received through certification training processes was rated by respondents as 81.2% to 95.8% very adequate to adequate.

**Implications for Extension.** Using research data obtained through the study, the South Dakota Cooperative Extension Service incorporated the data into the training seminars conducted for commercial and extension staff field agents beginning winter 1992. Research data in the form of transparencies with script were provided for the extension agent's use in conducting the seminars for the private pesticide applicators. Emphasis for education to applicators was placed in the areas of protective clothing selection, laundry, communication and thorough reading of pesticide labels.

15,000 magnets were produced which outline the correct procedures for laundering clothing worn by the applicator of pesticides. These magnets have been distributed to those individuals receiving private and commercial pesticide certification in 1992. It is estimated that 10,000 of these magnets are in South Dakota homes.

Results of the research were shared with all individuals participating in the survey.

Results from the laundry segment of the research were published in the fall edition of the South Dakota Farm & Home Research, 42(3), 13-15, Agricultural Experiment Station, South Dakota State University, Brookings.

Further use of the research will be incorporated into the protective clothing, laundry and safety aspects of pesticide usage as a means of preventing human health risks associated with pesticide usage. Information will be distributed to the public via measures which must be observed to protect all humans from the health risks associated with pesticides.

**LAUNDRY DAILY ALL CLOTHING WORN BY  
PESTICIDE APPLICATORS**

Follow these steps:

Prerinse or presoak separately.  
Wash in hot water.  
Use heavy-duty liquid detergent.  
Use the full water level.  
Use the maximum wash cycle.  
Line dry clothing.  
Rinse machine using detergent and complete cycle.  
Wear rubber gloves.  
Wash separately from family clothing.

Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. MITCHELL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. AKAKA). Without objection, it is so ordered.

**BRADY HANDGUN VIOLENCE  
PREVENTION ACT**

Mr. MITCHELL. Mr. President, I ask unanimous consent that, notwithstanding the provisions of rule XXII, the Senate now proceed to the consideration of Calendar Order No. 749, S. 3282, a bill to require a waiting period before the purchase of a handgun; that when the bill is considered, it be considered under the following limitation; that there be 2 hours for debate on the bill, equally divided in the usual form; that no amendments or motions to commit be in order; and that, when all time is used or yielded back, the Senate, without any intervening action or debate, vote on passage of the bill.

The PRESIDING OFFICER. Is there objection?

Mr. CRAIG addressed the Chair.

The PRESIDING OFFICER. The Senator from Idaho.

Mr. CRAIG. Mr. President, I object.

The PRESIDING OFFICER. Objection is heard.

Mr. MITCHELL addressed the Chair.

The PRESIDING OFFICER. The majority leader is recognized.

Mr. MITCHELL. Mr. President, on Friday, the Senate was unable to complete action on a comprehensive crime control bill. Although 55 Senators voted for it and only 43 voted against it, under the rules of the Senate, that was not enough to end the filibuster against the bill by Republican Senators. So the crime bill is dead. It will not be passed this year. It cannot be passed this year.

But there is one part of that bill that might still be passed this year. I have just tried to get consent to let the Senate consider and vote on the Brady bill this year, but Republican Senators objected. It is obvious that the only way the Brady bill can be passed is if President Bush is willing to help. So, I address an appeal directly to President Bush.

Mr. President, you have said that you are for the Brady bill if it is part of a

broader bill. It was part of a broader bill, but that broader bill has been killed by Republican Senators.

Last night, on national television, you said that you support the improved version of the Brady bill that Senator DOLE and I and Senators METZENBAUM and KOHL worked out last year. The Senate approved it by a vote of 67 to 32.

I ask you to support and work for enactment of that improved version of the Brady bill now on its own.

Presidents Nixon, Ford, Carter, and Reagan recently urged the Senate to pass the Brady bill. These four former Presidents—three of them Republicans—urged us to put aside partisan politics and do what is right for the American people.

Every major police organization in America has asked the same thing. So did Jim and Sarah Brady. So have six former Attorneys General of the United States.

Consider that; four former Presidents, six former Attorneys General, every major police organization in America has asked the same thing. I join them. I ask now. There is not much time. But with your direct and active involvement, we can pass it now, by itself, no filibuster, no other crime provisions. Without your help we all know it cannot be done. It is up to you, Mr. President. I hope that for the American people you will say yes. If you do say yes, I will do everything in my power as majority leader to get it done.

I now ask unanimous consent that there be placed in the RECORD, an open letter to the U.S. Senate from former Presidents Nixon, Ford, Reagan, and Carter, and an article which appeared in Saturday's Washington Post written by six former Attorneys General of the United States.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[An advertisement from Roll Call,  
Sept. 28, 1992]

SEPTEMBER 28, 1992.

To the U.S. Senate:

It is not often that the four of us agree on a major issue of the day. But we share common ground on the desperate need to pass the Brady Bill before the 102d Congress adjourns.

We were proud to join together last year in urging passage of this commonsense measure, and gratified that both Houses passed the legislation with broad, bi-partisan support. But the Brady Bill, requiring a national waiting period and background check for handgun purchases, has been tied up in the debate over an omnibus crime bill for nearly ten months. And as each day passes, we lose 63 more American men, women and children to handgun fire.

Every major law enforcement group in the nation, and dozens of medical, civic, professional and religious organizations, have urged Congress to help save some of these lives by passing the Brady Bill.

The time has come to put aside partisan politics and do what is right for the Amer-

ican people. You will soon have an opportunity to show your commitment to this lifesaving legislation. We strongly urge every Senator to stand up for the nation's law enforcement community, as well as for public safety, by voting for the Brady Bill and sending it immediately to President Bush, whom we urge to sign this important bill.

Sincerely,

RONALD REAGAN.  
GERALD FORD.  
JIMMY CARTER.  
RICHARD NIXON.

[From the Washington Post]

IT'S TIME TO PASS THE BRADY BILL

As individuals who have had the privilege of serving as attorneys general, we watched with dismay as the congressional debate about the crime bill became increasingly partisan and divisive. This is not to say that we all agree on the difficult issues that defined the debate, such as habeas corpus reform or expansion of the federal death penalty. Our dismay, rather, has been directed at the failure to pass an anti-crime measure on which we all agree: the Brady bill's national waiting period and background check for handgun purchasers.

The Brady bill was a key part of the Omnibus Crime Control Act, which had been stalled by a Senate filibuster since November 1991 and failed to survive a closure vote yesterday. It can, and still should be, enacted without delay.

Handgun violence in America is a national tragedy. According to the Justice Department, handguns are involved every year in more than 600,000 violent crimes, including an average of 9,200 murders, 12,100 rapes, 210,000 robberies and 407,600 assaults. Despite this record of mayhem, our laws continue to tolerate the instantaneous, over-the-counter sales of these deadly instruments of crime to anyone who can pay the price.

Handguns are sold to anyone who fills out a form denying that he or she is a convicted felon, drug abuser or other prohibited buyer. In most states, no one checks the veracity of the buyer's answers before the gun is sold. In short, we have an "honor system" for handgun sales in which those who already have committed serious crimes are trusted to tell the truth about their past.

In states that already have waiting periods, criminals attempting to buy guns have been stopped in their tracks. California, which has a 15-day waiting period applicable to all firearms, stopped more than 5,800 prohibited persons from buying guns in 1991 and another 1,300 during the first quarter of 1992. These prospective buyers included 760 people convicted of drug violations, 47 of homicide, 30 of sex crimes, 418 of burglary, 132 of robbery, 10 of kidnapping and 3,613 of assault.

Despite the proven success of waiting periods in states such as California, the black market in handguns will continue as long as other states permit "cash and carry" sales. It is hardly surprising that the handguns used in crime in cities and states with strict gun control laws originate in jurisdictions without such laws. A study by the Bureau of Alcohol, Tobacco and Firearms showed that between 1987 and 1990, 94 percent of the guns used in crime in New York City came from out-of-state sources. The primary source states were Virginia, Texas, Florida, Georgia, South Carolina and Ohio, all of which have weak gun laws. Only federal legislation will ensure that nowhere in our country can convicted felons buy handguns over the counter with no questions asked.

Of all the arguments advanced by opponents of the Brady bill, surely the most specious is the charge that it would infringe a constitutional right. For more than 200 years, the federal courts have unanimously determined that the Second Amendment concerns only the arming of the people in service to an organized state militia; it does not guarantee immediate access to guns for private purposes. The nation can no longer afford to let the gun lobby's distortion of the Constitution cripple every reasonable attempt to implement an effective national policy toward guns and crime.

Congress knows what needs to be done. It knows that, according to a Gallup poll, 95 percent of the American people want the Brady bill to become law. It knows that the Brady bill has been endorsed by every major police organization in the country. It knows that among its own members, the Brady bill enjoys remarkable bipartisan support. In May of last year, the Brady bill passed the House of Representatives by 53 votes; it later passed the Senate by a margin of 67 to 32 and was incorporated into the crime bill.

The question now is whether Congress has the will to do what needs to be done. Since the crime bill filibuster began last November, thousands of Americans have lost their lives to handgun violence. It's time for Congress to pass the Brady bill and send it to the president. The American people have been waiting too long.

NICHOLAS DEB.

GRIFFIN B. BELL.  
BENJAMIN R. CIVILETTI.

(The writers are former attorneys general of the United States.)

Mr. MITCHELL. Mr. President, I now ask unanimous consent that there be 1 hour for debate on this matter, with the time to be controlled by Senator CRAIG and Senator METZENBAUM.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Idaho [Mr. CRAIG] is recognized.

Mr. CRAIG. Mr. President, we have just heard the majority leader speak of the overwhelming support that he has so characterized around a provision that has come to be known nationwide as the Brady bill, or a 7-day waiting period for the purchase of a firearm.

While that particular provision does hold some support, I think it would be grossly unfair to characterize S. 3282—or the provision that was, in fact, attempted in its introduction here a few moments ago, and it is the issue at hand at this moment—to be one that is widely supported. Because I think that is simply false.

Why would I suggest that the majority leader might in some way be misportraying the issue before us? Let me make myself as clear as I can, Mr. President.

While his arguments were directed at the Brady bill, the provision before us is not the Brady bill. In fact, it is not even the compromise that was worked out by Senators in the crime provision, which was to be a 5-day waiting period and then a move toward an instantane-

ous background check. The language in S. 3282 did not appear in any Senate crime bill. The language in S. 3282, certain portions of it, did not even appear in the House provisions of the crime bill.

What happened was some magic sleight-of-hand that occurred during the crime conference which brought about some unique language that the law enforcement community had argued they wanted in the crime bill if there was to be a waiting period for the acquisition of a firearm.

It is so interesting that this Senate is wanting to vote on something that would take away the civil rights of the average American citizen, that would grant an openness, or a nonliable environment for a law enforcement person who would be charged with the responsibility of building a background check on an individual during a waiting period of time which would clear them to acquire a handgun.

I can understand why the law enforcement community does not want to be held liable. They really did not want to be held liable in the issue of Rodney King. But the American citizens said we must hold them responsible for their acts. They cannot be exempt when it comes to taking away the civil liberties of an individual citizen of this country.

While I totally respect the law enforcement community of our country and find them so necessary and appropriate, I cannot grant them absolute immunity from any liable or libelous act that they might enter into in the enforcement of law.

What am I talking about? That seems to be a pretty serious charge, Mr. President, but that is exactly what the language of the provision speaks to. It is what is embodied in S. 3282. Let me read a little bit. It says that:

A chief law enforcement officer or other person responsible for providing criminal history background information pursuant to this subsection shall not be liable in an action at law for damages or for damages for failure to prevent the sale or transfer of a handgun to a person whose receipt or possession of the handgun is unlawful under this section; or for preventing such a sale or transfer to a person who may lawfully receive or possess a handgun.

What does that all mean? Well, it all means that in the process of the information clearing, if you had a law enforcement officer who simply did not want handguns to move in his or her jurisdiction, they could find reason to disallow the clearing of a background check or to put a cloud over it, which would stop the sale. And then a law-abiding citizen would have to go to court, spend his or her money and employ lawyers to argue that they were, in fact, law-abiding citizens and, therefore, were eligible to acquire a handgun.

Now, we know that a criminal would not follow this procedure. In fact, criminals do not live by the law. They

never have. So, we really are not talking about blocking handguns or firearms from the criminal element. We are really talking about a new loophole, or not a loophole—I guess a loophole for the law enforcement community—but a whole new series of jumps and hurdles and processes that the law-abiding citizen, under his or her constitutional right, must now abide by if we are, as this lawmaking body, to pass a Brady-type bill.

Now, you can see why these new provisions were not in the original Senate provision. They would not have passed muster here, Mr. President. It is why they were not in the House provision. It is why they thought they might slip them through in a conference report on the crime bill, except for a few of us who spend some of our late hours reading the fine print.

Section (2), subsection (B)(7) (A) and (B) of one section of the law speaks just exactly to that. The effect of granting this immunity is to give law enforcement authorities unlimited and unqualified power to disapprove—to disapprove—any firearms sale to any law-abiding citizen.

I did not think the test was on the citizen. I did not think that a citizen ought to be tested for living within the Constitution. But that is what is about to be argued here if we are, in fact, to try to move forward on the provision, or the bill, separate from the crime bill that was introduced by the majority leader, S. 3282. That is what is at issue here today.

The President supports the Brady bill? Well, he has spoken to that. Does he support these new provisions? No; he has not spoken to that. Law enforcement organizations, yes, some of them do support it. But I would like to provide for the RECORD ample information that shows that there are literally thousands of law enforcement personnel out across America today who do not support the idea of violating the second amendment to the Constitution simply because the courts of this country have failed to handle and prosecute lawbreakers over the last good many years.

That is the issue at hand, Mr. President. That is why we are here today; not to debate a crime bill, because we decided not to do that, but to debate, really, an entirely new set of language around the Brady bill concept, something that has never been debated on this floor or discussed. And I think as the debate goes on, Mr. President, you will see why—because it could not stand the open test of the committees, because these committees, I do believe, would not intentionally create the kind of loophole that we are granting the law enforcement community, in an arbitrary way, and fail to grant to law-abiding citizens their constitutional rights.

I retain the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. METZENBAUM. Mr. President, I yield 5 minutes to the Senator from Wisconsin, who has been resolute in his support for the Brady bill.

The PRESIDING OFFICER. The Chair recognizes the Senator from Wisconsin.

Mr. KOHL. Mr. President, if anyone wonders why people do not trust Government, the answer lies in what we have done with gun control. What Government has done, Mr. President, is worse than nothing. What it has done is fooled people.

A year ago—now over a year ago—both the House and Senate voted for the Brady bill. Now, the way most people learn basic Government, and the way we teach it in the "How Our Laws Are Made" brochure we send to thousands of our constituents every year, if both Houses of Congress pass a bill, then it should go to the President.

But that did not happen here. Not at all.

The House passed the Brady bill as a freestanding measure and sent it to the Senate. Instead of taking up that freestanding bill, the Senate passed the Brady bill as part of a larger crime bill. Then the House approved the Brady bill again as a part of the conference report on the crime bill. But the Senate did not act on the conference report. And now, the Senate has declined to act on the freestanding Brady bill.

So there we are. Two votes in favor of the Brady bill in the House. Two votes in favor of the Brady bill in the Senate. No Brady bill sent to the President. And no Brady bill signed into law.

"How Our Laws Are Made."

Mr. President, some of the 15,000 American citizens murdered by firearms since the Senate passed the Brady bill 465 days ago might still be alive if we had made a law rather than played a political game. Now those lives have been lost. But other lives can still be saved if we stop playing the game.

Sixty-seven Senators voted for the Brady bill. Ninety percent of the American people support the Brady bill. Every major law enforcement organization has endorsed it. Even the President has said that he would sign it as part of a comprehensive crime bill, and more recently he said that he was flexible about the Brady bill standing alone.

So, we will soon find out if the President meant what he said.

There has been an objection to moving to the bill today. Unless that objection can be removed, the bill will die when the Congress adjourns. But between now and then, the President can exercise some leadership. Between now and then, the President can call upon Republican Senators who have objected to step aside and let this bill become law. Between now and then, the Presi-

dent can translate his rhetorical support for the Brady bill into action. He can call, as former Presidents Ford, Nixon, Carter and Reagan have, for action. He can exercise his leadership. He can make it happen.

The people of America deserve and need his help now. I hope President Bush will hear our call, free the Brady bill, and save some lives.

I thank the Chair.

Mr. METZENBAUM addressed the Chair.

The PRESIDING OFFICER (Mr. KERREY). The Senator from Ohio is recognized.

Mr. METZENBAUM. Mr. President, I yield myself 10 minutes.

Mr. President, let us not kid ourselves what the issue is on the floor today. The issue has nothing to do with the specious question raised by the Senator from Idaho. I will address myself to that later. He is one of those unalterably opposed to the Brady bill.

The crime bill is dead, and there is only one reason the crime bill is dead, it is by reason of a filibuster by the Republican Members. And, Mr. President, let us make it clear, the reason we do not have a Brady bill or a crime bill is that the President has not put his shoulder to the wheel. If the President did, he could cause the Brady bill to become law before we adjourn. It is his responsibility; it is on his doorstep. He can get the few extra votes needed to cut off a filibuster.

But the President is not willing to do that. First he said he would support the Brady bill only as a part of the crime bill. So we put it into the crime bill. And we still cannot pass the crime bill because of a filibuster from the other side of the aisle.

Sixty-seven Senators on June 28, 1991, indicated their support for the Brady bill. Ninety percent of Americans have indicated their support for the Brady bill. And in a Time-CNN poll, 87 percent of gunowners support the Brady bill. But a few over on that side of the aisle, too many, enough to keep us from moving forward, will not join in helping us pass the Brady bill.

The President is the only one who has the persuasive powers to use in order to bring those Senators in line. Every law enforcement group in this country supports the Brady bill. These men and women, day in and day out, are out on the front lines fighting for their lives and fighting to protect the lives of all Americans. They want this bill. They want it very badly. They know that the fewer guns that are on the street, the more protected will they be, and they know that the only way to move in that direction is to pass the Brady bill. It has already been stated. Four former Presidents, three of them Republicans, six former attorneys general, all support the Brady bill.

Every year there are 24,000 people killed in this country with handguns.

That means 65 people today, 65 people tomorrow, 65 people the next day and 65 people yesterday. This is a question that is in the hands of the President.

I say to the President of the United States, and I do not do this often, "Mr. President, I plead with you. Mr. President, I appeal to you, I cajole you, I entreat with you, I ask you in every humanly possible way, help us pass the Brady bill at this moment in time. You are the only person in the United States who can cause the Brady bill to become law. You owe it to Jim Brady. We all owe it to Jim Brady. We all owe it to law enforcement officers in this country who are out there every day and week fighting to protect the lives of Americans. We owe it to the American people. Mr. President, do not let the people down. Do not let them stand in the way of passing the Brady bill. You can do it if you will do it."

Mr. President, I yield 5 minutes to the Senator from Minnesota.

The PRESIDING OFFICER. The Senator from Minnesota is recognized.

Mr. WELLSTONE. Mr. President, I ask unanimous consent that an op-ed piece in the Washington Post of October 3, 1992, be printed in the RECORD. I believe the majority leader made this request. I make it as well.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

#### IT'S TIME TO PASS THE BRADY BILL

As individuals who have had the privilege of serving as attorneys general, we watched with dismay as the congressional debate about the crime bill became increasingly partisan and divisive. This is not to say that we all agree on the difficult issues that defined the debate, such as habeas corpus reform or expansion of the federal death penalty. Our dismay, rather, has been directed at the failure to pass an anti-crime measure on which we all agree: the Brady bill's national waiting period and background check for handgun purchasers.

The Brady bill was a key part of the Omnibus Crime Control Act, which had been stalled by a Senate filibuster since November 1991 and failed to survive a cloture vote yesterday. It can, and still should be, enacted without delay.

Handgun violence in America is a national tragedy. According to the Justice Department, handguns are involved every year in more than 600,000 violent crimes, including an average of 9,200 murders, 12,100 rapes, 210,000 robberies and 407,600 assaults. Despite this record of mayhem, our laws continue to tolerate the instantaneous, over-the-counter sales of these deadly instruments of crime to anyone who can pay the price.

Handguns are sold to anyone who fills out a form denying that he or she is a convicted felon, drug abuser or other prohibited buyer. In most states, no one checks the veracity of the buyer's answers before the gun is sold. In short, we have an "honor system" for handgun sales in which those who already have committed serious crimes are trusted to tell the truth about their past.

In states that already have waiting periods, criminals attempting to buy guns have been stopped in their tracks. California, which has a 15-day waiting period applicable

to all firearms, stopped more than 5,800 prohibited persons from buying guns in 1991 and another 1,900 during the first quarter of 1992. These prospective buyers included 760 people convicted of drug violations, 47 of homicide, 30 of sex crimes, 418 of burglary, 132 of robbery, 10 of kidnapping and 3,613 of assault.

Despite the proven success of waiting periods in states such as California, the black market in handguns will continue as long as other states permit "cash and carry" sales. It is hardly surprising that the handguns used in crime in cities and states with strict gun control laws originate in jurisdictions without such laws. A study of the Bureau of Alcohol, Tobacco and Firearms showed that between 1987 and 1990, 94 percent of the guns used in crime in New York City came from out-of-state sources. The primary source states were Virginia, Texas, Florida, Georgia, South Carolina and Ohio, all of which have weak gun laws. Only federal legislation will ensure that nowhere in our country can convicted felons buy handguns over the counter with no questions asked.

Of all the arguments advanced by opponents of the Brady bill, surely the most specious is the charge that it would infringe a constitutional right. For more than 200 years, the federal courts have unanimously determined that the Second Amendment concerns only the arming of the people in service to an organized state militia; it does not guarantee immediate access to guns for private purposes. The nation can no longer afford to let the gun lobby's distortion of the Constitution cripple every reasonable attempt to implement an effective national policy toward guns and crime.

Congress knows what needs to be done. It knows that, according to a Gallup poll, 95 percent of the American people want the Brady bill to become law. It knows that the Brady bill has been endorsed by every major police organization in the country. It knows that among its own members, the Brady bill enjoys remarkable bipartisan support. In May of last year, the Brady bill passed the House of Representatives by 53 votes; it later passed the Senate by a margin of 67 to 32 and was incorporated into the crime bill.

The question now is whether Congress has the will to do what needs to be done. Since the crime bill filibuster began last November, thousands of Americans have lost their lives to handgun violence. It's time for Congress to pass the Brady bill and send it to the President. The American people have been waiting too long.

NICHOLAS DEB.  
KATZENBACH.  
RAMSEY CLARK.  
ELLIOT L. RICHARDSON.  
EDWARD H. LEVI.  
GRIFFIN B. BELL.  
BENJAMIN R. CIVILETTI.

Mr. WELLSTONE. Mr. President, this was written by six former Attorneys General.

Handgun violence in America is a national tragedy. According to the Justice Department, handguns are involved every year in more than 600,000 violent crimes, including an average of 9,200 murders, 12,100 rapes, 210,000 robberies and 407,600 assaults. Despite this record of mayhem, our laws continue to tolerate the instantaneous, over-the-counter sales of these deadly instruments of crime to anyone who can pay the price.

Mr. President, I have attended two press conferences in the last 2 weeks with Sarah and Jim Brady, with Senators KOHL, METZENBAUM, BIDEN, and

with law enforcement officials representing law enforcement people all across this country. I have to say that these have been two of the most emotional press conferences I have ever been to, at least in my experience in politics.

The words that people spoke were so real, not just Sarah Brady and not just Jim Brady, but the law enforcement officials. The reason that there were tears in people's eyes is because 90 percent of the people in this country, or thereabout, support the Brady bill. The law enforcement people know what it means to have somebody with a history of violence to be able to go in and obtain a gun with no check whatsoever, no waiting period. They know what it means to have a fellow officer murdered as a result of that.

Mr. President, the arguments have been made back and forth, back and forth. I respect the Senator from Idaho. He knows that. He will say what he believes. But I think ultimately what we have today in the Senate as we come near the end of our session is a test case of who in the world owns the Congress, who owns the Senate. If 75, 80 or 90 percent of the people say it is reasonable to have the waiting period, if 75, 80, or 90 percent of the people say stop the violence, if 75, 80, or 90 percent of law enforcement people say it is the right thing to do, then is it the National Rifle Association that owns the Senate, is it the National Rifle Association that owns the House of Representatives, or do the people in this country?

This is once again a test case of whether or not we have democracy for the few or democracy for the many. We should have democracy for the many. People have instructed us that they want to see the Brady bill passed. It is time to pass the Brady bill.

Mr. President, we have passed arms control agreements in the Senate. Let us do something about arms control in our own country. This is absolutely insane for people to come in with no check whatsoever and be able to obtain these handguns. Now is the time to take the action.

Mr. President, I heard President Bush last night live, on the "Larry King Show," say he was in favor of this compromise bill that had been worked out. I think it is now time for the President of the United States to instruct all of us in the Senate and in the House to pass this piece of legislation. It is good Government policy. It is what the people in this country want.

We can no longer be run by one or two powerful financial organizations. It is time we start listening to what people are telling us. It is time we move beyond what the President has called gridlock.

I support what the Senator from Ohio said. There is only one person in the United States of America who can

make the Brady bill the law of the land, and that is President Bush, and he can do it today. He can pick up the phone; he can exert the leadership; and we will pass this piece of legislation. When we pass this piece of legislation, people in the country will say this is what we thought it was all about. This is real representative democracy. We spoke. You listened. That is what we have to do, Mr. President.

Mr. CRAIG addressed the Chair.

The PRESIDING OFFICER. The Senator from Idaho.

Mr. CRAIG. I yield myself such time as I may consume.

The PRESIDING OFFICER. The Senator from Idaho is recognized.

Mr. CRAIG. Mr. President, a good many of us have wondered for some time why the leadership and Members on the other side of the aisle did not bring up the crime bill more quickly than this. Why would they wait until the final days of the Senate, or, more importantly, why would they wait until the final days of a Presidential campaign to raise such critical and important issues? I think now we know. We just heard it: Only the President of the United States can solve this problem.

Let me suggest to you, Mr. President, that the President of the United States is not a Member of this body. No, only this body, with properly worded language, with a proper compromise can solve this issue, not running at the last minute to the floor with language that was never seen on this floor, creating a massive loophole in the law that will allow law enforcement officers to create their own law in their own environment. That is what we are talking about today.

Let me tell you what happened in Los Angeles, or have we forgotten so quickly that the days following the tragic Rodney King decision brought violence to that great city, and thousands upon thousands of people poured to gun shops to buy firearms to protect themselves and their property, only to find out that a 15-day waiting period stopped them. They grew violent about it. Even the law enforcement community of California said we wish we could bend the law. We cannot protect the law-abiding citizens. And they had to resort to law-abiding citizens protecting themselves, their lives, and their property.

How quickly we forget why our Founding Fathers in fact put the second amendment into the Constitution, for the situations like Los Angeles when law enforcement broke down and could no longer protect the private citizen and the private citizen must protect oneself. And that is what it is all about.

None of us in any way justify, or attempt to justify, the kind of violence that goes on in the streets of America today. We all know it is tragic. But we

also know we must stand for the vast majority of law-abiding citizens who otherwise would have their constitutional rights trampled by those who would represent this type of legislation.

Mr. President, I would now like to yield to my colleague from New Hampshire 6 minutes.

The PRESIDING OFFICER. The Senator from New Hampshire is recognized.

Mr. SMITH. I thank the Chair. I thank my colleague from Idaho for yielding.

With all due respect to my colleagues on the other side of this issue, the basic premise of the Brady bill is that all of the violent people in America who own guns, who have an intention of committing a crime with that weapon, are going to line up and voluntarily register their weapons. That is what the premise of this whole debate is, that the violent people who intend to commit crimes are simply going to say: "I will register; I will wait 7 days before I pick up my weapon to commit the crime."

Mr. President, with all due respect, that is ridiculous. It is simply not going to happen.

As Senator CRAIG has already stated, what is going to happen is that millions of innocent, law-abiding American citizens, many of whom are the victims that the other side has been talking about, are simply going to have to go through a hassle to be able to have a weapon for recreation, sport or even self-defense.

Mr. President, I am not going to be a part of that. It is about time Congress realizes what the American people realize, that we need to control crime, not guns.

Frankly, this is just a smokescreen because this Congress does not want to deal with the criminal. It is the criminal that is causing the problem in America today. We will not deal with that criminal. We do not want to pass the mandated sentences that are necessary for the repeat offenders who over and over again commit crimes with a gun.

It is very easy to get these people off the street so that we can walk across the street from our offices or other people around this country can walk around the larger cities of this Nation without being threatened and intimidated by guns. It is the person behind that weapon. Should we ban baseball bats? How about cars? They kill 50,000 people a year. Do we want to have a 7-day waiting period to buy an automobile?

Obviously, it is the intent of the individual behind the weapon that causes the crime.

Mr. President, because roughly 80 percent of all illegally used firearms are acquired illegally, gun control will do little to curb the incidence of crime

and violence on America's streets. This reality is illustrated even more clearly by the fact that virtually every jurisdiction which has enacted or extended its waiting period for a firearm purchase, including States like Connecticut, California, and Washington, has witnessed an increase in violent crime substantially exceeding the national average, an increase substantially exceeding the national average.

So if a waiting period works, why has it not worked, for example, in Indiana, California, Minnesota, New York, and Connecticut, all of which have waiting periods. For the period between 1967 and 1989, these waiting period States all witnessed homicide increases exceeding the national average. In Indiana, homicide rates rose 70 percent; in California, 82 percent; Minnesota, 56 percent; Connecticut, 146 percent; in New York, gun control nirvana, the homicide rate increase was 131 percent.

Mr. President, consider the homicide rates over the same time period in States with no waiting period. In Alaska—we are talking about the rates now, not the number of people—rates were down 16 percent; in Nevada, down 24 percent; prior to its adoption of a waiting period, Delaware homicide rates dropped 35 percent; Vermont, 39 percent down; Idaho, down 40 percent.

Violent crime statistics tell the same story. States with waiting periods have experienced vast increases in violent crime compared to States without them. In New Jersey, violent crime rose 223 percent between 1967 and 1989; in Massachusetts, 429 percent; and in Connecticut the rate of violent crimes soared 434 percent.

Now, the nonwaiting period States over the same period: In Virginia, the crime rate was up a relatively modest 63 percent compared to those numbers; in West Virginia, 51 percent; Montana, 38 percent.

I am not happy with the rates of violent crime in any State, but the fact is the average rate increase in those States, three nonwaiting period States, was 51 percent, and the average in New Jersey, Massachusetts, and Connecticut, the three waiting period States, was 362 percent. The statistics do not back up the argument of the opposition, Mr. President.

Will a 7-day waiting period cut down on crimes of passion? The answer according to the statistics is "no", a resounding "no." According to FBI supplementary homicide reports, the average rate of domestic homicide in cities with waiting periods is 2½ times the average rate of domestic homicide rates in cities without waiting periods.

Do the people of America want a 97-percent increase in homicide rates, a sevenfold increase in violent crime, a 2½-percent increase in domestic violence? Of course they do not. The American people want to decrease this, and the way to do it is to take the criminal off the street.

A comprehensive study exhaustively researched and written by ACLU spokesman David B. Kopel shows why waiting periods are more dangerous to the public than they are helpful: Waiting periods distract law enforcement officials from criminals, fail to keep guns out of the hands of felons, and violate "prior restraint" and "least restrictive means" principles protecting citizens under the Bill of Rights.

Mr. President, I ask unanimous consent that Mr. Kopel's study be printed in the RECORD in full.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Independence Institute, Denver, CO., Mar. 25, 1991]

WHY GUN WAITING PERIODS THREATEN PUBLIC SAFETY

(By David B. Kopel)

EXECUTIVE SUMMARY

"Honey, I forgot to duck." Remember the day Ronald Reagan was shot? The President, grinning up from his hospital bed on March 30, 1991, was able to joke about a gunman's attempt on his life. But his press secretary, James Brady, fared much worse; shots from the same pistol left him permanently disabled. The nation was shocked, the gun control movement galvanized.

This month's observance of ten years since the day Reagan and Brady were shot by John Hinckley is an occasion for renewed consideration of what can realistically be done to keep firearms from falling into the wrong hands and being used for the wrong purposes.

The leading proposal before Congress and state legislatures is to require that any retail purchase of a handgun be preceded by a waiting period, during which a background check on the purchaser's criminal and mental record could be conducted.

A waiting period has strong initial appeal. The tradeoffs appear positive: relatively small costs in exchange for significant gains in public safety.

But an exhaustive study of the issue by attorney and gun control expert David Kopel concludes that his perception is misleading. When all the evidence is dispassionately weighed, all the consequences traced, Kopel finds that there is a very real possibility that gun waiting periods threaten public safety.

The reason: law enforcement resources diverted and law-abiding citizens disarmed. Proponents are doubtless right in saying that a federally imposed waiting period would save at least one life somewhere, the author concedes. But he says that is beside the point if America as a whole would be marginally less secure against crime, violence, and fear as a result of the new restriction. Kopel's research and analysis show why the waiting period's vast cost is likely to more than cancel its apparent benefits.

Advocates of the waiting period use the Hinckley case as a symbol, opinion polls to suggest momentum, criminological studies and state experience for empirical validation. None of the four stands up to scrutiny, however. The proposed law would not in fact have halted purchase of the gun used to shoot Reagan and Brady. Polling results turn out to be flawed and mixed. No criminologist has shown that waiting periods work. California and other states with waiting periods show only a minuscule arrest rate and widespread unfairness to the law-abiding.

There is shock value in the scenario of guns "too easily bought" by drug dealers, psychotic killers, persons bent on killing a spouse or themselves, or purchasers intending to use them in hot blood. Yet hard data and common sense show little benefit from a waiting period even in such lurid situations.

Against the meager-to-nil impact of waiting periods on crime control must be set their clearly negative impact on the average American's ability to count on police protection or protect himself.

Specifically: Is it desirable to have law enforcement agencies bogged in a vast new paperwork morass and harried with lawsuits over insufficient background checks? To have a threatened person face dangerous, sometimes indefinite, delays in obtaining a self-defense gun? To set in place a mechanism for *de facto* universal gun registration and a political stepping stone to outright gun prohibition? To legislate in disregard of the "no prior restraints" and "least restrictive means" principles that should safeguard not only the Second Amendment, but the whole Bill of Rights? All these are foreseeable effects of the proposal.

Alternatives to the waiting period proposal might include a Virginia-style instant phone check on the purchaser's background, creation of a firearms owner ID card, or adding one's fingerprint to a computerized driver's license (the so-called "smart card"). These measures are preferable in many respects, since they are at least as effective as waiting periods at disarming criminals, and are less likely to be used to disarm citizens. Yet these alternatives, like the waiting period, are subject to evasion by criminals and abuse by government administrators, and create serious risks of privacy violations.

Ultimately, the Kopel study concludes, practicality and constitutionality are best served by strategies that aim to cut gun crime not by targeting the legitimate retail firearms trade, but instead by aiming at the black market where most criminals get most of their guns.

NOTE.—The Independence Issue Papers are published for educational purposes only, and the authors speak for themselves. Nothing written here is to be construed as necessarily representing the view of the Independence Institute or as an attempt to influence any election or legislative action.

INTRODUCTION

Waiting periods: Many states already have them; most national police organizations, most people, and most gun owners are for them. In the 1970s, even the National Rifle Association supported the idea of a carefully-crafted state waiting period. So who could be opposed?

This paper suggests that sometimes a majority of NRA members, a majority of gun owners, and even a majority of all the people may not always be right.

Waiting periods come in two basic shapes. The "limited" waiting period is a relatively short wait for retail handgun purchases. Proposals for such a law have attracted many co-sponsors in Congress, and lost by margins that (while not narrow) are far from the landslides usually thought to be the National Rifle Association's norm in crushing gun control. The wide support for a limited handgun waiting period in Congress reflects the growing persuasiveness of Handgun Control, Inc., the anti-gun lobby.

The more comprehensive waiting period applies to all guns, including long guns, and applies to all transfers, including gifts between family members. The wait itself is much longer. The comprehensive wait is also

supported by Handgun Control, Inc. (HCI). HCI has persuaded legislatures in California, Connecticut, and Rhode Island to adopt a comprehensive wait, supplanting the existing limited handgun wait in those states.

Although HCI backs the new comprehensive waits in California and other states, the ultimate goal is an even stronger comprehensive wait. In 1990, Colorado State Senator Pat Pascoe introduced a waiting period bill which HCI Chair Sarah Brady called "everything on my wish list."<sup>1</sup> The bill provided:

As in California, a comprehensive background check and waiting period on both handguns and long guns, for all transactions, including intra-family gifts.

Each gun purchase would require a background check of up to two weeks, followed by a waiting period of one week. An applicant would then be given a permit to purchase, good for 60 days.

The applicant would pay a fee of up to \$20 for each purchase permit.

There would be no exception for a person who needed a firearm for self-defense. In fact, even if the police strongly wanted the citizen to acquire a gun because of imminent deadly threats, a one week delay would still be mandatory.<sup>2</sup>

Presently the only state with a law that is more severe than Colorado's very strict proposal is New Jersey.

The waiting period concept (both limited and comprehensive) reflects the belief that there should be a police check before a person buys a gun. In the form of an instant telephone check, the National Rifle Association is essentially willing to accept the police assent principle, providing the system is structured properly. The instant check is currently in effect in Virginia, with few apparent problems (and some successes) so far. Hand Control, Inc. accepted the instant check in Virginia, and opposed it in Ohio.

Since the instant telephone check is sometimes offered as an alternative to the waiting period, the telephone check is discussed in this paper. Other regulatory alternatives to a waiting period are considered.

The paper discusses the following issues: Would a waiting period have stopped John Hinckley? What do the polls of police and of citizens say about waiting periods, and what implications should be drawn from the results? What have the criminologists learned about waiting periods? What good have they done in states where they already exist? If a waiting period could save at least one life (and it certainly could) isn't it a good idea? What are the disadvantages and risks of waiting periods and other police permission systems like the instant telephone check? Are there meritorious alternatives to waiting periods? The paper also offers suggestions about how a waiting period should be structured, if a legislature elects to enact one.

The views of Handgun Control, Inc. on waiting periods and gun control are discussed throughout, because, as HCI puts it, the waiting period is the group's "flagship" bill and HCI is by far the most important gun control lobby.

I. JOHN HINCKLEY

Synopsis: Handgun Control, Inc. claims that a waiting period and background check "certainly" would have stopped John Hinckley, who attempted to assassinate President Reagan. Yet Hinckley had no felony record, and no public record of mental disability. HCI asserts that Hinckley was not a resident

<sup>1</sup>Footnotes at end of article.

of Texas, the state where he bought the gun, and that a background check would have revealed that he was illegally buying a handgun in state where he was not a resident. The evidence indicates that Hinckley was a legal Texas resident. In any case, HCI's proposed background check involves only criminal and mental records, and not an address check. Accordingly, it is very unlikely that the background check would have affected Hinckley.

The national waiting period is commonly known as "the Brady Bill." Its supporters named it after Sarah Brady, the Chair of HCI. To many people, the fact that a waiting period would have stopped John Hinckley from shooting President Reagan and crippling his Press Secretary Jim Brady is reason enough to enact such a law.

Both the perpetrator and the main victim of Hinckley's attack agree that a waiting period would have prevented the crime. Currently under indefinite commitment to St. Elizabeth's mental hospital in Washington, John Hinckley has petitioned to be allowed access to reporters so that he can speak out for handgun control and for a waiting period. Hinckley explains that he was in "a valium depression" when he acted, and a waiting period might have given his better self time to reassert control. But in fact, Hinckley bought the assassination gun in October 1980, months before the assassination attempt. A wait would obviously have had no impact.

Legislators usually pay little attention to the policy suggestions of the criminally insane. The more persuasive spokesperson for the waiting period is Sarah Brady, wife of the man crippled by Hinckley. "Had a waiting period been in effect seven years ago, John Hinckley would not have had the opportunity to buy the gun he used," says Mrs. Brady.<sup>3</sup>

Mrs. Brady bemoans the fact that Hinckley was able to buy the gun with no waiting period to see if he had a criminal or mental illness record.<sup>4</sup> But Hinckley had no public record of mental illness; hence a mental records check would have done no good.<sup>5</sup>

As for a criminal records check, a police background check was run on Hinckley a few days before he bought the gun, and nothing turned up. Hinckley was caught trying to smuggle a gun aboard a plane on October 9, 1980, in Nashville. His name was run through the National Crime Information Center, which reported, correctly, that he had no felony convictions in any jurisdiction. He was promptly released after paying a fine of \$62.50 and pleading guilty to a misdemeanor.<sup>6</sup>

Although Mrs. Brady complains about the lack of a criminal/mental check on Hinckley, she does not explicitly affirm that such checks would have affected him. Instead, Mrs. Brady's detailed explanation involves Hinckley's residence status.

On October 13, 1980, John Hinckley walked into Rocky's Pawn Shop, in Dallas, Texas, and walked out shortly thereafter with two .22 caliber RG revolvers. As with the retail purchase of any gun, the gun dealer was required to complete a federal form which listed Hinckley's address. Because Hinckley was buying two guns in the same five-day period (in fact, at the same moment), the dealer also filled out another federal form. That federal form was sent to the local office of the Bureau of Alcohol, Tobacco, and Firearms.

By federal law, the dealer was required to verify that Hinckley was a resident of Texas, the state in which he was buying the handgun. When asked for identification, Hinckley offered his Texas driver's license.<sup>7</sup>

Mrs. Brady details how a background check might have helped: "He lied about his address and used an old Texas driver's license to purchase that revolver. He was not a Texas resident. A police check would have stopped him from buying a handgun in Texas."<sup>8</sup> As she puts it, "He lied on his purchase application. Given time, the police could have caught the lie and put him in jail."<sup>9</sup>

Accordingly, Mrs. Brady states: "A simple check would have stopped him . . . John Hinckley might well have been in jail instead of on his way to Washington."<sup>10</sup> Indeed, her assurance that the waiting period would have stopped Hinckley is often unequivocal: "There's no doubt that he would not have been able to purchase that gun."<sup>11</sup> Or, "John Hinckley would never have walked out of that Texas pawnshop with the handgun that came within an inch of killing Ronald Reagan."<sup>12</sup>

But the facts are hardly as clear-cut as Mrs. Brady asserts.

Hinckley moved around a great deal, from one Texas address to another. The Lubbock address he listed on his federal gun form (the address for a rooming house) was different from both his driver's license address and his address in the then-current Lubbock phone book.<sup>13</sup> Of course moving frequently is not a federal crime. Because the only purpose of the driver's license is to prove residence in the state, there is no federal requirement that a handgun purchaser reside at the street address shown on his license, as long as the address is in the same state. Even if Hinckley had deliberately made a false statement about his address, the act would not have been illegal; a false statement on the federal form is illegal only if it relates to the purchaser's eligibility.<sup>14</sup> While a person's state of residence does relate to eligibility, address within that state does not.

In other words, Hinckley's purchase would have been illegal under federal law only if he was not a resident of Texas. Merely offering a Texas driver's license with a street address that was no longer current and was different from the address put on the federal form was not in itself illegal.

Was Hinckley a Texas resident? Contrary to what Handgun Control implies, it has never been determined that Hinckley was not. During the previous summer, he had attended both summer sessions at Texas Tech in Lubbock. According to federal rules, a university student is considered a resident of the area where he attends school, and may purchase firearms there.<sup>15</sup> Notably, when Hinckley was arrested in Nashville (a few days before he bought the handguns), he identified himself as a Texas resident.

Significantly, Hinckley, after the assassination attempt, was the subject of an intensive federal investigation. The federal government used every resource possible to ensure Hinckley's conviction. Notably, Hinckley was not charged with illegally purchasing the handguns in Texas. Had the prosecutors believed that Hinckley was guilty of an illegal gun purchase, the charges would likely have been brought. After all, Hinckley would then have had to convince a Texas jury that he was insane not just on the day of the assassination, but six months beforehand.

If the full resources of the Department of Justice did not find enough evidence even to charge Hinckley with an illegal gun purchase, it is not realistic to claim that a 7-day background check would have found the exact same transaction illegal.

Moreover, law enforcement authorities already had an opportunity to run a check on

Hinckley. Because Hinckley bought two handguns on the same day, his purchase was immediately reported to the Bureau of Alcohol, Tobacco and Firearms, as required by federal law. BATF reportedly runs name checks as standard procedure, but does not run detailed background checks on multiple handgun purchasers (such as Hinckley) even though it has the legal authority to do so. Perhaps BATF has concluded that the expense of running the checks exceeds the likely benefits.

Let us hypothesize the fact that Mrs. Brady assumes (but for which the Justice Department apparently had no evidence): Hinckley was no longer a Texas resident. Assume that the address listed on the federal form was false. Would the assassination have been prevented by a background check? Almost certainly not.

How would the police have found Hinckley's "lie"? If they had looked in the phone book, they would have seen Hinckley listed as a Lubbock resident. To ascertain that Hinckley did not reside in Texas, the police would have had to visit his purported residence at least once. Since many police departments do not have the time to visit the scene of residential burglaries, it is not realistic to assume that they would have bothered to verify the address listed on Hinckley's residence.

Most importantly, the police never would have found the "lie" about Hinckley's address, because they would not be checking addresses. Under the Brady Bill (and the similar state proposals), the police would not be verifying anyone's address. The Brady Bill does not discuss any kind of address/residence check. As one of Handgun Control's key Congressional supporters explicitly insisted during the debate on the 1988 proposal, "The 'investigation' is limited to the review of police and court records."<sup>16</sup>

Thus, at the same time that Handgun Control's Congressional forces were reassuring Congress that the "Brady bill" involved solely a criminal/mental records check, and not an address or other check, Mrs. Brady was imploring the public to support her bill because an address check would have stopped John Hinckley.

Assume that, despite the evidence to the contrary, Hinckley actually was not a Texas resident, and further assume that the Texas police would have found it worthwhile to do what the federal BATF did not, and run a background check; and further assume that although the background check was intended to be run according to HCI's description, and to apply only to criminal/mental records, the Texas police would have expanded the background check and tried to verify Hinckley's address; and additionally assume that the police would have committed the manpower necessary to verify that Hinckley was not a Texas resident. If all these assumptions are valid (and if any one of the assumptions were incorrect, Hinckley clearly would not have been stopped), would Hinckley have been stopped? Perhaps.

Assuming the police found that Hinckley was trying to make a purchase without the proper residency status, would they have arrested him for that offense? Would he have been imprisoned for more than a day, if that long? Only a few days before Hinckley bought the Texas guns, he had been caught attempting to smuggle a gun onto a plane, and had been released from custody almost immediately, having pleaded guilty to a misdemeanor. Unless Hinckley were imprisoned for a term of years for the out of state gun purchase, he would have speedily been back

on the streets. He could have taken any of the other handguns which he owned, and gone on to Washington for the assassination with one of them. (Among the guns he could have used was the .38 special he bought in Colorado, in full compliance with the law. Had he used that gun, rather than the .22 from Texas, President Reagan and Mr. Brady would likely have been killed.)<sup>17</sup>

Handgun Control, Inc.'s version of the assassination is false in other details as well. For example, one Handgun Control, Inc. advertisement depicts Mrs. Brady saying "A \$29 dollar handgun shattered my family's life."<sup>18</sup> Actually, Hinckley's gun cost \$47.<sup>19</sup> The difference is of no real importance, except that it shows the Handgun Control copywriters to be unwilling to offer a truthful presentation of even the most basic facts of the case.<sup>20</sup>

Handgun Control, Inc. and Sarah Brady have garnered substantial press support by claiming that the "Brady Bill" would have stopped John Hinckley.<sup>21</sup> Indeed, the strength of the push for the waiting period is very largely based on Sarah Brady and her assassination story. Sarah Brady heads Handgun Control, Inc., and HCI's fundraising letters are mostly personal testimonies by Mrs. Brady and her husband. The image of a man crippled by an assassin, but who could have been saved by "The Brady Bill" is compelling to press and politicians alike.

To say the least, the evidence suggesting that a waiting period would have stopped John Hinckley is underwhelming. Yet Mrs. Brady insists: "[T]his shooting could have been prevented if legislation such as that proposed here and been in force in 1981."<sup>22</sup> The unequivocal assertion is, in light of the facts, quite close to a fraud. Only a very unlikely set of events would have enabled police armed with a "Brady Bill" to stop John Hinckley. It is perfectly proper for victims of gun crimes to campaign for gun control. They should do so truthfully.

## II. PUBLIC AND POLICE OPINION

Synopsis: Polling data show that large majorities of American citizens, as well as of big-city police chiefs, favor a waiting period. Polls of command-rank officers find them skeptical about waiting periods. For all the polling, flaws in the wording of the questions probably exaggerates the extent of public support and command-rank police hostility. In any case, polls are poor guides to public policy, particularly when Constitutional rights are involved. The reflexive hostility of some police officials towards the Second, Fourth, and Fifth Amendments to the Constitution should not be entitled to much weight in the deliberative process.

### A. Police

Handgun Control, Inc. and its Congressional allies claim that a waiting period is supported by "every major police organization" in the country.<sup>23</sup> The assertion is based on a selective definition of "major police organization." The American Federation of Police, with 103,000 members, is the second-largest rank and file police organization in the United States, and is headed by Saginaw County Deputy Dennis Ray Martin, who has won awards from President Bush for anti-drug work. Martin and the American Federation of Police oppose a waiting period. The National Association of Chiefs of Police, with 10,000 members, is the second-largest command rank organization in the United States. It opposes a waiting period. Apparently neither of these organizations, being merely the second-largest in their field qualifies as a "major police organization."<sup>24</sup>

Many important police organizations do support a waiting period.<sup>25</sup> Yet a very few of these police organizations have actually bothered to ask the police what they think. One group that did ask was the Police Executive Research Forum (PERF), a Washington think tank comprising about 500 present and former big-city police executives. PERF's membership poll found 92% in favor of a national seven-day waiting period for handguns, and 6% opposed.<sup>26</sup> Thus, among big-city police chiefs, support for a waiting period is nearly unanimous.

The National Association of Chiefs of Police (NACOP) conducts annual national surveys of the opinion of command rank police officers. The survey is sent to all known commanders, not only NACOP members. In the 1989, the waiting period questions and responses were:

"Do you believe that a waiting period to purchase a handgun or any type of firearm will have any effect on criminals getting firearms?" Yes—29.1%; No—70.9%.

"The 'Brady Bill' offers a national 7 day waiting period that gives local police or sheriffs an option to check for previous criminal activities, possible drug or alcohol dependency and mental instability. Do you think you would be able to conduct such an investigation in a 7 day period?" Yes—44.7%; No—55.3%

"Some states have longer waiting periods and some less. Would you agree that it should be a state mandated law rather than a federal regulation as regards to firearms purchase requirements?" Should be State—62.7%; Should be Federal—37.3%.<sup>27</sup>

In 1990, the questions and answers were:

"Do you believe that a waiting period to purchase a handgun or any type of firearm will have any effect on criminals getting firearms?" Yes—23.9%; No—76.1%.

"Do you believe that in the national 7 day waiting period proposed before Congress (Brady Bill) that you can fully determine that the applicant has no criminal record; is not mentally unsound; or is an abuser of drugs or alcohol?" Yes—14.4%; No—85.6%.

"No funds to carry out this 7 day 'investigation' are provided in this Bill for police. Do you believe that your department has the manpower to conduct this investigation without taking patrol officers off the Street?" Yes—10.6%; No—89.4%.

"There is no provision to protect you from a lawsuit in the event that you approve (after 7 days) an applicant who is a criminal, may be mentally unsound, or a drug or alcohol abuser. Do you believe that the 'Brady Bill' may leave you open to a future civil lawsuit? No—10.2%; Yes—89.8%.<sup>28</sup>

While the NACOP polls are interesting evidence regarding police opinion, they must be interpreted cautiously. Although every fact stated in the NACOP questions is true, the tone of some of the questions was slanted against the waiting period. A graphic example of a pollster's ability to elicit different responses by slight changes in the question is shown in the contrasting 1989 and 1990 answers on whether 7 days was enough time to complete the background check. In 1989, 55% said that 7 days would not be long enough. In 1990, the question was revised to ask if the background check could be fully completed 7 days, and the time question was followed by a question which noted that no extra funds for the check would be available. For the 1990 survey, the number of respondents who said that 7 days was not long enough shot up to 86%.

In both the 1989 and 1990 surveys, the questions about waiting periods affecting crimi-

nals were phrased in a neutral way. But the 1990 questions regarding police civil liability clearly did, like the Gallup poll on waiting period, elicit a particular response. Notably, the neutral questions (about waiting periods affecting criminals) drew responses of about 70-76% negative on the waiting period, while the most biased question (about civil liability), drew about a 90% negative.

Accordingly, NACOP's most extreme figures, of 90% command rank hostility to the waiting period, are likely too high, for the same reason that Gallup's 91% pro-wait figures for the general public is too high. (The Gallup poll is discussed below.) The NACOP survey does seem to indicate that a majority of command rank officers (perhaps something less than 70%) are skeptical about waiting periods. The most definite conclusion that can be drawn from the NACOP and PERF surveys is that Handgun Control's claim to have the near-unanimous support of the police is true only for major urban chiefs.<sup>29</sup>

A large number of working officers seem to agree with Willis Booth, a former police chief, and Executive Director of the Florida Police Chiefs Association: "I think any working policeman will tell you that the crooks already have guns. If a criminal fills out an application and sends his application . . . he's the biggest, dumbest crook I've ever seen."

Put aside the evidence regarding police opinion, and hypothesize that every police chief in the United States supported a national waiting period. Should their position determine the law?

The opinion of police chiefs is not the arbiter of our Constitutional rights. Some police executives criticize the exclusionary rule; they claim that a strong Fourth Amendment causes crime. Some police executives criticize the *Miranda* decision, and claim that a strong Fifth Amendment causes crime. Many police executives say that a strong Second Amendment causes crime. In every case the executives are wrong.<sup>30</sup>

Police chiefs are, after all, not generally renowned for their regard the Constitution. As the NACOP polling indicates, huge majorities of command ranks favor sharp limits on death penalty appeals, draconian drug laws, and widespread drug testing.

Likewise, self-proclaimed allies of law enforcement have eroded their credibility by supporting bans on "plastic guns" (which do not exist) or by claiming that a law which lets a Pennsylvania hunter drive to Maine without obtaining a New York gun permit would threaten the lives of police officers.<sup>31</sup>

In short, the reflexive hostility of some police officials towards the Second, Fourth, and Fifth Amendments is not entitled to much weight in the deliberative process.

Why does the waiting period have nearly unanimous support among big-city police executives? While it is true that some big-city chiefs (such as Ari Zavaras of Denver and Joseph McNamara of San Jose) are ardent enemies of the right to bear arms, not all chiefs are out to destroy gun ownership. One reason for supporting the waiting period is its intuitive appeal; at first glance, it seems like a way to interdict at least some criminals, without interfering with legitimate gun owners.

Perhaps another reason that some police chiefs favor the waiting period is that police chiefs, like any other administrators of large government offices, often seek to expand their official power. From the perspective of a police administrator, more power may mean more officers performing administra-

tive tasks and supervising more transactions by the citizenry. The same mentality leads to the creation of paperwork empires in the Pentagon or in the Hubert H. Humphrey building, even if the emphasis on paperwork hinders the agency's performance of its assigned mission.

#### B. Public opinion polls

The Gallup Poll reports: "91% of Americans Favor Brady Amendment."<sup>32</sup> If the polls are for it, who can be against it?

One reason to be cautious about polls is that the bias of the pollster can skew the poll. By modifying the wording of a question, "You can come up with any result you want," says Peter Hart, pollster for the Dukakis campaign.

The Gallup poll about waiting periods posed the question in a way that assumed the waiting period really would help the police keep guns away from illegitimate persons: "Would you favor or oppose a national law requiring a seven-day waiting period before a handgun could be purchased, in order to determine whether the prospective buyer has been convicted of a felony or is mentally ill."<sup>33</sup> As discussed below, the criminological and real-world evidence on waiting periods shows that they do virtually no good in keeping illegitimate users from getting guns; criminals do not buy guns in gun stores.

Most people are for something that works. If the question assumes that a waiting period would work, it is bound to receive nearly unanimous support. But the real question is whether waiting periods work as well as Gallup assumed they do.

The most important reason polls should not always prevail is because the Constitution does not depend on polls. Violating the Constitution can be a popular thing. By huge majorities, Americans would favor all of the following:

Banning use of civic auditoriums by atheists, or by people denouncing the government, or by patriotic groups advocating war against a foreign enemy;

Using a federal censorship board to decide which television shows are permissible;

Infiltrating non-violent dissident groups with FBI agents.<sup>34</sup>

Every one of those popular ideas would violate the Constitution. The precise reason for putting certain fundamental rights in the Constitution is to protect them from transient majorities.<sup>35</sup>

No measure could have been more unconstitutional than herding American citizens of Japanese descent into concentration camps during WWII. Public opinion and the press almost unanimously favored this repression, despite the total lack of evidence that these Americans were disloyal.

Even though the public sometimes backs unconstitutional measures, the public still has the common sense to know that the Constitution is more important. One survey asked: "Suppose the President and Congress have to violate a Constitutional principle to pass an important law the people wanted. Would you support them in this action?"

28% said yes, "because the Constitution shouldn't be allowed to stand in the way of what the people need and want."

49% said no, "because protecting the Constitution is more important to the national welfare than any law could possibly be."<sup>36</sup>

Finally, while the majority of the public does favor a waiting period (although probably by less than the 91% majority found by Gallup's biased question), the public opposes "a law giving police the power to decide who may or may not own firearms" by a 68% to

29% margin.<sup>37</sup> Accordingly, if a waiting period were conducted within the limits implied in the Gallup poll (every legitimate owner got the gun in no more than seven days), the public might well support a waiting period. But if waiting periods turned out to give police the opportunity to interfere with citizens' right to buy firearms, the large majority of the public would oppose a waiting period. As detailed below, waiting periods in practice often lead to the kinds of police abuses which the public overwhelmingly opposes.

#### III. CRIMINOLOGICAL STUDIES

Synopsis: Criminologists of every persuasion have examined waiting periods, and not one has found statistically significant evidence that waiting periods are effective. Studies of felony prisoners show that virtually none of them obtain crime guns by personal over the counter purchase, the only kind of criminal gun acquisition that a background check could stop.

"Virtually every study ever conducted proves that where there are local or state laws requiring a waiting period and background check, handguns are harder to obtain by those who are prone to misuse them," claims Handgun Control, Inc.<sup>38</sup> The claim is false. Every study of waiting periods has found no evidence that they are effective. There is not a single study published in any academic journal which concludes waiting periods are effective. The results show just the opposite.

Professor Matthew DeZee states: "I firmly believe that more restrictive legislation is necessary to reduce the volume of gun crime." Yet his comparative study of state laws, including waiting periods, found "The results indicate that not a single gun control law, and not all the gun control laws added together, had a significant impact . . . in determining gun violence. It appears, then, that present legislation created to reduce the level of violence in society falls short of its goals. . . . Gun laws do not appear to affect gun crimes."<sup>39</sup>

Professors Joseph P. Magadino and Marshall H. Medoff, both of California State University, Long Beach, performed two studies of waiting periods at the state level. The first study, using data from 1979 and previous years, compared the 1979 robbery and homicide rates in states that had waiting periods with states that did not. The study also looked at changes in the robbery and homicide rates in states which had recently changed their laws regarding firearms sales. Both aspects of the study found that there was no correlation between waiting periods and lower homicide or robbery rates.<sup>40</sup>

The second Magadino-Medoff analyzed state gun laws and rates of homicide, robbery, and aggravated assault in 1960 and 1970. The results were consistent with the hypothesis that stricter state gun control laws have no impact on crime.<sup>41</sup>

When the U.S. Senate Judiciary Committee investigated the issue, the Committee found no evidence that waiting periods affect crime. There was no correlation between a waiting period and lower crime rates.<sup>42</sup>

Duke University's Philip Cook, who is generally supportive of gun control, explains why there is no apparent statistical impact: [W]e suspect that most felons and other ineligible who obtain guns do so not because the state's screening system fails to discover their criminal record, but rather because these people find ways of circumventing the screening system entirely. . . . Under these circumstances, developing a more intensive and reliable screening process is probably

not worth the additional cost. . . . It is known that such screening systems are widely circumvented and, furthermore, that state criminal record files are sufficiently incomplete that a felon who did choose to submit to the required police check before buying a handgun would have a sporting chance of having his application accepted.<sup>43</sup>

Assistant Attorney General John Bolton observes, "Those persons with a criminal record who are prohibited from purchasing a handgun are the ones most likely to obtain false identification documents to support a new name."<sup>44</sup>

Of course the Magadino-Medoff, Senate Judiciary, and DeZee studies do not completely destroy the case for a waiting period. It might be that state waiting periods have a small impact on crime, even if that impact is too small to be statistically significant. Moreover, even if state waiting periods were acknowledged as demonstrable failures, it might be that a federal wait would be effective.

Under the Carter Administration, the National Institute of Justice offered a grant to the former president of the American Sociological Association and two colleagues to survey the field of research on gun control. Peter Rossi and his coauthors Jim Wright and Kathleen Daly began their work convinced of the need for strict national gun control. Indeed, Wright had already written about the need for more control. After looking at the data, however, the three researchers found no convincing evidence that gun control curbs crime.<sup>45</sup>

A few years later, Wright and Rossi conducted another National Institute of Justice study, this one of the gun use patterns of criminals. They interviewed prisoners in ten state systems. The study confirmed that many criminals are indeed frightened of armed citizens.<sup>46</sup> Notably, the second National Institute of Justice study discovered that felons in states with strict laws found obtaining a gun no more difficult than in states with more moderate laws. Almost all felons, regardless of the severity of their state's laws, reported that they would have little or no difficulty obtaining a gun soon after release.

Wright and Rossi asked the prisoners where they obtained their last handgun, and 21% replied at a gun store. Hence, HCI argues, a waiting period and background check would affect a significant figure of gun crimes. But Wright and Rossi disagree with HCI's interpretation of their data. They write:

"One might as a matter of federal policy require that every firearms transaction be reported to the cognizant authorities, and the appropriate criminal records check undertaken; but one quickly senses that this measure would have little or no effect on the criminal users whom we are trying to interdict and a considerable effect on legitimate users. . . . The ideal gun crime policy is one that impacts directly on the illicit user but leaves the legitimate user pretty much alone."<sup>47</sup>

Careful analysis of the Wright-Rossi data shows that far less than 21% of criminal gun users would be affected by a background check. The 21% who obtained their last crime handgun at a gun store included 5% who had obtained the gun by theft, rather than by purchase. Of the 16% who had obtained the gun by purchase, at least some likely did not have disqualifying criminal records at the time of purchase.

Further, not all of the guns acquired by criminals are acquired for crime. (Many

criminals live in neighborhoods with other criminals, and hence own guns for defense.) The more likely a felon was to be a serious gun criminal, the less likely he was to have acquired a retail gun. For example, of the criminals who specialized in unarmed crime, 30% obtained their most recent handgun at a store (by purchase or by theft). Of the "handgun predators" who specialize in handgun crime, only 7% had gotten a handgun from a store. For criminals as a whole, of the guns that had been obtained "to use in a crime," 12% came from a store.<sup>48</sup>

Since about one-fourth of the handguns from stores were stolen from stores, only about 9% of handguns obtained to use in a crime, (and about 5-6% of handguns obtained by handgun predators) came from a retail purchase. Nine percent or even five percent still seems to be a significant number of criminals buying guns in gun stores. But Wright and Rossi explain that their data:

"does not imply that the men in question themselves simply walked into a gun shop and bought themselves a gun, in direct defiance of the Gun Control Act of 1968. In many cases, these purchases would have been made in the felon's behalf by friends or associates with "clean" records, which is, to be sure, still quite illegal. Although, we asked these men where and how they had obtained their most recent guns, we did not ask who, exactly, had obtained them."<sup>49</sup>

Assuming that only half the purchases were made by legal surrogates, the background check is entirely irrelevant to 95-98% of crime gun acquisitions.

The large majority of all gun acquisitions are by people who already own a gun. If the pattern also holds true for criminals, then the background check would impact only a fraction of the already tiny percentage of criminals who personally buy guns at retail. In other words, of all guns acquired for crime, only about 0.5% to 2% are personally bought at a retail outlet by a person with an existing criminal record who does not already have another gun.<sup>50</sup>

The basic problem with waiting periods is shown by a Bureau of Alcohol, Tobacco and Firearms study of gun dealer sales in Des Moines and Greenville. The study found that about one to two percent of sales were to dangerous criminals.<sup>51</sup> In short, waiting periods have no statistically noticeable impact on any type of crime because only a tiny fraction of crime guns are purchased at retail by ineligible buyers.

Waiting periods have existed in some states for over half a century. Yet after all this time, there is not a single criminological study ever published which shows waiting periods to have any beneficial impact. While the researchers who have studied waiting periods have very diverse views on the gun debate in general, all researchers have concluded that there is no evidence that waiting periods cause any statistically significant benefits.

#### IV. THE WAITING PERIOD (IN)ACTION

Synopsis: Although no evidence ties waiting periods to reduce crime rates, the experience of states with waiting periods shows only a small percentage of retail gun buyers are denied because of criminal records. Of these, about 1% are deemed worth arresting. The number of people who are illegally or arbitrarily denied their right to bear arms by abuse of a background check system is about as large as, and sometimes far larger than, the number of criminals denied.

Although the academics have never found any statistically significant effect from waiting periods, it would be incorrect to con-

clude that waiting periods accomplish nothing. The following section reports results in several jurisdictions that already have waiting periods. The particular jurisdictions discussed were selected because: 1. The police have compiled and released data for that jurisdiction; and 2. The jurisdiction is cited as a success story by Handgun Control, Inc; 3. Data is available to test the veracity of the figures from the police or HCI. The data shows that: 1. Some people with criminal or mental records do attempt retail gun purchases, and are stopped by a background check; 2. Handgun Control, Inc, consistently overstates the efficacy of the background check in its model jurisdictions.

California: Officials state that their background check for handguns interdicted 1,900 illegal purchases in 1989.<sup>52</sup> Nevertheless, California's handgun homicide rate rose 21% from 1979 to 1988, even as gun laws grew tighter.<sup>53</sup> California has no appeals process, so it is impossible to determine how many of the denials are proper. As discussed below, the California waiting period forms have been used to build a government data-base of gun owners.

About 10% of California's 300,000 "assault weapon" owners have registered their weapons, as required by law. The group that complied with the retroactive registration law surely qualifies as highly law-abiding set of people. Yet this group of highly law abiding gun-owners, when they attempt to buy a new rifle or pistol following California's 15-day waiting period, find that the California Department of Justice has put a 1 to 4 month hold on their application, because they are registered "assault weapon" owners.<sup>54</sup>

A Los Angeles City Councilman, noting the thriving market in stolen Rolex watches, has suggested that all Rolex watches be registered, and a five-day waiting period be imposed on transfers of second-hand Rolexes. The Rolex waiting period has been ridiculed by most other Los Angeles politicians, and written up in the national press as another instance of California silliness. It might be asked why so many people who dismiss the idea that registration and a waiting period would affect the criminal sale of Rolex watches think that registration and a waiting period would affect the criminal sale of firearms.

Broward County, Florida: Handgun Control correctly notes that in 1984-85, 37 persons were kept from buying guns by the county's ten day waiting period (which has since been preempted by state law).<sup>55</sup> Handgun Control fails to point out that nearly half of the rejections were for unpaid traffic tickets or similar offenses which do not legally disqualify Floridians from gun ownership.<sup>56</sup> HCI also fails to point out that gun suicides actually increased after the waiting period was implemented.

Columbus, Georgia: HCI claims that the city's 3-day wait catches two felons a week trying to buy handguns.<sup>57</sup> HCI exaggerates the rate four-fold, and implies that the number related to arrests, rather than merely to denials.<sup>58</sup>

Illinois: Prospective gun purchasers must obtain a Firearms Owners Identification card (FOID), which is valid for five years. There are about 5,000 applications every week for the card. Over the weekend, a list of applicants is run through the state Department of Mental Health, revealing about 10 applicants who are ineligible to buy because of mental disability.<sup>59</sup> Illinois' automated licensing system often takes 60 days to authorize a clearance.<sup>60</sup>

Illinois issues FOID cards to about 78% of applicants. Another 17% are issued a card

after following up an initial rejection, for a total of about 200,000 FOID cards issued annually. Around 5% of applications are ultimately rejected. In 1988, there were 2,470 persons (about 2.5% of applicants) denied an FOID card on the basis of felony convictions, and 779 previously-issued cards were revoked due to felony convictions.<sup>61</sup>

The most thorough study of the Illinois system was conducted by Professor David Bordua. Happily, "the system was run with real attention to due process protections for firearms owners." Unfortunately, "even its administrators were not convinced it was effective." The system, which costs over a million dollars a year to process, was summarized as "inherently weak."<sup>62</sup>

Maryland: About 700-800 of every 20,000 applicants in a given year are denied. (The waiting period/police permission applies to all handguns and to long guns considered "assault weapons.") According to state police testimony before a Congressional subcommittee, the hundreds of denials typically lead to only a handful of prosecutions.<sup>63</sup>

Notably, 78% of appeals result in a reversal of the initial denial by the police.<sup>64</sup> The success rate on appeals likely understates the police error rate in initial denials. Many police who have been improperly denied may have neither the finances nor the energy to pursue an appeal. (Similarly, the ACLU indicates that only a minority of people improperly denied welfare benefits appeal.)

Although the waiting period is by statute supposed to last only one week, the police may take longer, and gun shops will not release the firearm until the police have completed their review.

New Jersey: Firearms laws in New Jersey are the strictest of any American state. Handgun Control states that "10,000 convicted felons have been caught trying to buy handguns."<sup>65</sup> The cost to legitimate gun owners has been severe. The number of New Jersey citizens arbitrarily denied the right to possess arms under the New Jersey law is almost as large as the number of criminals who were prevented from law-abiding transactions.<sup>66</sup> About one-quarter of the rejections in New Jersey are based on the hunch of police that it would be a good idea for a person to own a gun, rather than on any specific disqualifying criterion.<sup>67</sup> Although New Jersey law requires that the authorities act on gun license applications within 30 days, delays of 90 days are routine; some applications are delayed for years, for no valid reason.<sup>68</sup>

The cost to the non-gun owning citizens of New Jersey has also been severe. The New Jersey licensing system is so expensive that it costs \$4,442.13 (more than the salary of state trooper of one month) for each denial based on criminal, mental or alcohol abuse records.<sup>69</sup> It might be that the resource diverted into the licensing system might have saved far more lives if they had been spent on putting state troopers on patrol, instead of putting troopers behind a desk.

The overall crime rate and the gun crime rate in New Jersey has remained consistent with the rate in other states in the region, even though none of them imposes gun control as strict as New Jersey's.

Pennsylvania: In Pennsylvania, handgun buyers face a 48 hour waiting period (72 hours in practice), during which local police or sheriff may conduct a check.<sup>70</sup> After the buyer picks up the handgun, the transaction record is sent to the state police firearms unit, which checks the name against a list of violent felons. Data for the first check by local police is kept at the county level, so

there are no comprehensive figures available.

In addition to checking the approximately 130,000-150,000 handgun transfers that occur in a year, the state police are also automating their old records of firearms transfers (which date back to 1931), and checking the old names against the same list of violent felons. In 1988, the state police performed about 230,000 total records checks, resulting in about 80 "hits."

When a "hit" is found, state troopers are sent to confiscate the gun, and the local district attorney may bring charges for unlawful gun possession by a felon. Ms. Sharon Crawford, head of the state police firearms unit, recalled only one case in her memory where a person had committed a crime in the two to three week interval between taking possession of the gun and the arrival of the state trooper, or had refused to hand the gun over to the trooper. In the one case, the person had shot (not fatally) someone else during an argument.

The explanation for the generally peaceful behavior of the persons caught with illegal guns is that the purchases were not with the intention of use in a crime, but rather were self-defense and/or hunting purchases by persons who did not realize they were ineligible or who hoped to slip through the system.<sup>71</sup>

The Pennsylvania data validates the findings by Wright and Rossi: there are many attempted and/or completed firearms acquisitions by ex-felons that are unrelated to any effort to use the gun in a crime. Accordingly, the number of crimes prevented by a system that keeps ex-felons from buying guns in stores is likely to be significantly less than the number of ex-felons who are caught buying guns. (All this is not to say that the "felon-in-possession" cases should not be prosecuted or taken seriously; the point is simply that most attempted acquisitions were not for a criminal purpose.)

It would not be correct to use the Pennsylvania state data to conclude that background checks are pointless. The data above refers only to the State police check of names against violent felony convictions. The data do not show what impact the first check, by the local police, has had. It might be that most felons buying guns for crime are stopped at the local level, and are hence never checked by the state system.

Virginia: In 1989, Virginia enacted an instant telephone check, with the consent of both HCI and the NRA. About 16 to 20% of phone applications result in a "hit," requiring the rejected applicant to submit fingerprints to the police to prove his noncriminal identity.<sup>72</sup> The ultimate denial rate of about 1/2% to 1% is the same as in other states with longer waiting periods. The first year the check was in effect, there were 540 denials, leading to arrest of 7 fugitives, including one wanted for murder.<sup>73</sup> (There was also at least one false arrest.) The Virginia system required 16 new full-time state employees, and \$391,000 in annual operating costs.<sup>74</sup> Because the Virginia system appears to be working reasonably well, it is touted as model by many right-to-bear arms advocates.

In sum, the evidence shows that a permission system does result in some denials, at least half of which turn out to be incorrect. Even for the denials that are correctly applied to ineligible purchasers, it is not correct to assume that the denial has thereby prevented a crime. Virtually no one who intends to commit a gun crime buys from a gun store. Ineligible people do sometimes attempt retail transactions, but that act is hardly proof that they intended a crime.

Of the people who are rejected by permission systems, a mere 1% are arrested.<sup>75</sup> In other words, where a permission system is in effect, about 1 in 10,000 applicants turns out to be a criminal who is arrested. A success rate of one true "hit" for every 10,000 searches is, literally, not much better than the odds of finding a needle in a haystack—and is not a cost-effective method of catching needles.

#### V. PARTICULAR TARGETS OF WAITING PERIODS

**Synopsis:** The suggestion that people who transact in illegal drugs could be denied firearms under any gun control system is patently silly. Psychotic mass murderers have repeatedly bought guns in states with waiting periods. There is no evidence that waiting periods prevent suicides or domestic homicides. Hardly any crimes could even theoretically be prevented by a "cooling off" period. A perfect waiting period or other permission system would not even stop criminals from getting even retail guns. False identification is not hard to procure. And although a fingerprint or other biometric check would defeat false identification, most criminals would still likely know someone without a felony record. The surrogate buyer could still buy a gun for a criminal at retail.

Although waiting periods might have little impact on the average street criminal, it is sometimes suggested that waiting periods might deter particular kinds of gun misusers.

#### A. Drug dealers

In 1988, Handgun Control, Inc. attempted to hang its national waiting period on the drug bill, under the theory that the waiting period would disarm narcotics distributors. HCI still continues to promise that a waiting period will help take guns away from drug dealers.<sup>76</sup>

It stretches credulity to promise that any kind of gun legislation, including a waiting period, would have the slightest impact on drug dealers. Dealers, being expert in the black market, would have the readiest access to false identification, and to underground supplies. They are the last people gun control could impact.

Drug dealers obviously cannot count on the police or the courts for protection from violence. Because of this, and because dealers are a valuable robbery target, it would virtually be suicide for them not to carry a gun.<sup>77</sup>

In addition, drug dealers cannot use normal legal and social commercial dispute resolution mechanisms. Like the gangsters of alcohol prohibition days, drug dealers need guns to protect their business's income and territory. Thus, many drug dealers must own a gun for their lives and their livelihood.

No matter how scarce guns become for civilians, there will always be one for a criminal who can pay enough. Street handguns now sell for less than \$100. If the price went up to \$2,000, dealers would still buy them, because dealers would have to. Spending a few hours' or days' profits on self-protection is the only logical decision for a dealer. Can anyone really believe that an individual who buys pure heroin by the ounce, who transacts in the highly illegal chemicals used to produce amphetamine, or who sells cocaine on the toughest street-corners in the worst neighborhoods will not know where to buy an illegal gun?

#### B. Homicidal maniacs

Patrick Purdy, who killed five children in Stockton, California, bought five guns over the counter in California, despite the state's strict 15-day waiting period. Laurie Dann

bought a handgun and shot up a second grade classroom in Illinois, killing one child, wounding five, and then killing herself despite that state's requirement that all gun owners be licensed, and still undergo a waiting period before each firearm acquisition.<sup>78</sup> Mark David Chapman, John Lennon's assassin, bought a handgun in Hawaii, a state with one of the strictest waiting periods in the nation. Canada has a nationwide licensing system, yet a deranged man was able to buy a rifle with which he shot and killed 14 women in December 1989.<sup>79</sup> Criminals like Eugene Thompson (a felon and a cocaine addict who shot up a Denver suburb in March 1989) do not buy guns legally; they steal them. The criminally insane are criminally insane day off and on for years and years, not just for the three weeks covered by a waiting period. They periodically consult psychiatrists and acquire firearms without immediately or soon thereafter perpetrating crimes of insanity.

The latest claim that a waiting period would have stopped a maniac involves a mental patient who bought a gun in an Atlanta suburb without a wait, shot up shoppers at Atlanta's Perimeter Mall, killed one of them, and wounded four others. DeKalb County promptly approved a 15 day waiting period.<sup>80</sup> Handgun Control's national fundraising claims that the killer would have been stopped had a waiting period been in effect.<sup>81</sup> The claim is false; the killer's record of mental disorder was entirely private, and he had never been adjudicated mentally incompetent, or involuntarily committed.

#### C. Suicides

There are simply too many ways for people to kill themselves. After Canada implemented a national licensing system in 1978, its gun suicide rate did drop;<sup>82</sup> but the overall suicide rate remained the same.<sup>83</sup> Japan almost totally bans guns, but suffers a suicide rate twice the U.S. level.<sup>84</sup>

#### D. Domestic homicides

Many handgun control advocates assume that a waiting period would prevent "impulse killings."<sup>85</sup> But most domestic killings occur at night, gun stores are closed. Most perpetrators are intoxicated with drugs and alcohol, and thus legally forbidden to buy a gun anyway. The image of a murderously enraged person leaving home, driving to a gun store, finding one open after 10 p.m. (when most crimes of passing occur), buying a weapon, and driving home to kill is a little silly.<sup>86</sup>

In any case, hundreds who kill wives rarely use guns. Wives who kill husbands do often use guns, and are usually defending themselves or their children against felonious attacks.<sup>87</sup>

#### E. People in need of "cooling-off"

Criminologist Gary Kleck points out that for a "cooling-off" period to prevent homicide, a number of conditions must be fulfilled: 1. The gun the killer used was the only one he owned, or the only one he could have used in the crime; 2. The killer acquired the gun from a source that would be expected to obey gun control laws (a licensed dealer); 3. The gun was purchased and used in the homicide in a time period shorter than the "cooling-off" period. Discussing an analysis of 1982 Florida homicides, Kleck found that 0.9% (about 1 in 100) homicides fit all three criteria. He estimated that nationally about 0.5% (1 in 200) would fit all three criteria.

Nevertheless, Kleck suggested that a waiting period would not prevent even 1 in 200 homicides. For the homicide to actually be prevented, several other conditions would all

have to be fulfilled: 1. The killer was the kind of person who would not have been willing to kill even after waiting; in other words, the killing was an isolated act, rather than the culmination of a long history of assaults by the killer; 2. The killer would not have acquired and successfully used a gun that did not require cooling off (such as a long gun, in most states); 3. The killer would not have been able to complete the homicide with any weapon other than a gun; 4. The killer would not have been able or willing to obtain a gun from a non-retail source. Considering all the necessary criteria, Kleck did not find any Florida homicides which a cooling-off period clearly would have prevented.<sup>88</sup> While supporting a background check, Kleck concluded that a cooling-off period would in itself do no good. Hence, he thought the waiting period to offer no advantage over the instant check.

*F. Summary: What benefits can be expected from a waiting period?*

New York City Mayor David Dinkins asserts that "The Brady Bill could save thousands of lives in its first year."<sup>89</sup> Although many credulous New Yorkers believed their Mayor, and flooded House of Representatives Speaker Tom Foley's office with phone calls demanding passage of the waiting period, there is not a serious criminologist in the United States who thinks the Mayor's assertion has any basis in reality.

A perfect waiting period or other permission system would not even stop criminals from getting retail guns. False identification is not hard to procure. And although a fingerprint or other biometric check would defeat false identification, most criminals would still likely know someone without a felony record. The surrogate buyer could still buy a gun for a criminal at retail.

When pressed for whether the waiting period will deprive criminals of guns, HCI demurs, but expresses confidence that a waiting period will make gun acquisition more troublesome for criminals.<sup>90</sup> Likewise, the federal Task Force which studied background checks acknowledges that "[E]ven a perfect felon identification system would not keep most felons from acquiring firearms,"<sup>91</sup> but nonetheless supported a permission system, hoping that by forcing some criminal buyers onto the black market would leave them less able to obtain high-quality firearms.<sup>92</sup>

But would a waiting period or other permission even inconvenience criminals, considering that hardly any of them obtain crime guns through dealers anyway? Moreover, the current black market supplies even fully automatic firearms, which have been under a strict federal licensing system since 1934, and have been illegal to manufacture for civilians since 1986. If the black market can supply machine guns, it is doubtful that it cannot supply other high-quality weapons.

Still, as Professors Cook and Blose point out, there must be at least a few inexperienced or impecunious criminals for whom even a porous permission system would delay gun acquisition for at least some period. Moreover, the waiting period, simply because it will reduce gun sales to legal purchasers (see below) would reduce the number of guns in circulation. It seems likely that one of those unbought guns might one day have been part of a suicide or homicide or accident that might not otherwise have occurred.

Proponents of permission systems say that they will be successful if they save a single life.<sup>93</sup> It seems clear that a waiting period or other permission system would, inevitably,

prevent at least one firearms fatality. Even if a waiting period would have no discernible impact on crime in general, it would save at least one life. Is it therefore a good idea? The next Part discusses that question.

**VI. PROBLEMS CAUSED BY A WAITING PERIOD**

**Synopsis:** Substantial police resources are inefficiently diverted from street patrol to desk work. A background check consumes about \$40,000 in police salary for every arrest it produces. Resources may be further consumed by lawsuits regarding allegedly insufficient background checks. Waiting periods prevent a person from acquiring a gun for several days, and if implemented improperly (as they often are) waiting periods may result in total denial of a person's legitimate right to bear arms. The diversion of police resources, coupled with the interference with the acquisition of self-defense guns, may mean that a waiting period would cause a net loss of lives.

Severe problems with the data quality of existing criminal justice records will result in large numbers of false denials, requiring the victims to undergo a lengthy process to prove that they are not criminals. An initial denial stands only a 50% chance of being accurate and proper.

Moreover, waiting periods may provide a mechanism for gun registration, erode the confidentiality of medical records, and work a substantial financial hardship on the firearms dealers and users. Advocates of gun prohibition see waiting periods as a useful first step towards their ultimate goal.

*A. The Drain on Police Resources*

Police resources are finite. The question is not whether a waiting period would save one life, but whether other uses of the police resources spent administering a waiting period might save more lives if used elsewhere.

Under a national comprehensive waiting period, the drain on police resources would be staggering. There are approximately 7.5 million firearms transactions annually.<sup>94</sup> If a waiting period were to be rigorous enough to stop future Hinckleys, it would have to include in-person address verification. (See Part I, above.) How many hours would it take for a policeman to run national criminal records check, and to visit the home of every person who applied? One hour, at the very least. That would be 7.5 million police hours spent checking up on honest citizens, instead of looking for criminals. In the haystack of applications by honest citizens, police would search for a few needles left by the nation's very stupidest criminals. Looking for crime, police officers would be directed onto a paperwork enterprise particularly unlikely to lead to criminals. Would not all those millions of police hours be better spent on patrol, on the streets instead of behind a desk?<sup>95</sup>

According to the Task Force, implementing a national comprehensive permission system would require the FBI to hire 395 additional clerical employees to process the requests for fingerprint card readings for the (approximately) 725,000 citizens who would be denied permission to purchase because they have the same name as a criminal, or because police records noted an arrest but not a subsequent acquittal.

A national waiting period and background check could cost from tens to hundred millions of dollars.<sup>96</sup> Applying the 1 arrest per 10,000 applicant review figure, each arrest would cost approximately 40,000 dollars, or the one-year salary of a full-time, fairly senior police officer.<sup>97</sup>

Such profligate use of police manpower is an impediment to crime control. One useful

modification to existing waiting periods would be to exempt persons who already have a gun. (Proof of lawful purchase of another gun might suffice for the exemption.) After all, a person who buys a second revolver is hardly more dangerous than a person with only one gun.

The waiting period is an impediment to effective law enforcement in a more subtle way also: Local politicians who are failing to take effective steps to control crime use the campaign for a national waiting period as a tool to divert the attention to the national scene away from local law enforcement. For example, after Utah tourist Brian Watkins was stabbed in a New York City subway in the summer of 1990, New York Mayor Dinkins announced that what was needed to stop New York City crime was a national gun waiting period, or even gun prohibition. The Mayor now makes the call for a national "Brady Bill" the centerpiece of his response to publicized shootings in New York, regardless of whether evidence indicates that a waiting period would have had an effect on the particular shooting.<sup>98</sup>

*B. Lawsuits against the police*

At a time when local police resources are already stretched thin, the national waiting period bill imposes very substantial paperwork and manpower requirements on most police forces in the country. The bill claims it is cost-free, because the background check would be optional. But the bill's prime lobbyist, Handgun Control Inc., has already announced that its legal defense fund will sue police departments that do not implement the background check.<sup>99</sup> Much to the delight of Handgun Control, a woman has already won \$350,000 from the city of Philadelphia for not conducting a thorough enough background check of a man who killed her husband.<sup>100</sup>

In this regard, it is astonishing that persons who claim to speak for the nation's police want a law to make police departments everywhere vulnerable to a brand new form of tort litigation.

*C. Covert registration*

Waiting periods and other permission systems can operate as de facto gun registration. Once the police are told who is applying to buy a gun, they may simply add that person's name to their list of gun owners, as is the practice in New Jersey, New York and other states. The California Justice Department has used the waiting period, without statutory authorization to do so, to compile a list of a handgun owners.<sup>101</sup> In Oregon, the police are allowed to retain handgun purchase records up to five years.

One attempted solution to problem of covert registration is to require the police to destroy the purchase application records. The national waiting period bill purports to require record destruction, but does not really do so.<sup>102</sup> Moreover, not even the toughest language in a federal bill could compel a state officer to destroy records, because Congress has no authority to compel an act by a state or local officer which is not required by the U.S. Constitution.<sup>103</sup>

Under neither proposed federal nor existing state systems is the pretense of required destruction backed up by meaningful enforcement. Police who keep illegal records are subject to no penalties or civil liability. Significantly, the practice of making daily computer back-up tapes means that even if original records are destroyed, back-up records will still exist.

Precisely because most waiting periods amount to covert registration, many other-

wise law-abiding gun owners will resist them.<sup>104</sup> The principal objection of Constitutionalists to gun registration is that it has frequently been a prelude to and a tool for gun confiscation.<sup>105</sup> Additionally, the government has no authority to register people merely for exercising their Constitutional rights.<sup>106</sup>

In states where waiting periods already exist, the legislature should specify liquidated damages against officials who illegally compile registration lists. In cases of intentional wrong-doing, criminal prosecutions, similar to existing criminal prosecutions for federal Privacy Act violations, should be allowed.<sup>107</sup>

#### D. Privacy of medical records

The vast majority of people with mental illnesses, such as John Hinckley, never enter state treatment systems. Pressure will inevitably build to end the confidentiality of private medical records, so the police can check those records as well. In California, legislators enacting a comprehensive waiting period were told that mental health records would be kept fully confidential. But the same year the law was enacted, the California Department of Justice began ordering public and private mental health clinics to report their clients to the state, which puts them in a database along with felons that is useable by the police. Included in the databases are non-violent persons who have voluntarily checked themselves into private facilities for problems such as anxiety or stress.<sup>108</sup> A number of jurisdictions already require purchasers to waive the confidentiality of their medical or mental health records.<sup>109</sup> Illinois queries, "Are you mentally retarded?"<sup>110</sup> New Jersey asks the McCarthy-style question "Have you ever been attended, treated or observed by any doctor or psychiatrist or at any hospital or mental institution on an in-patient or outpatient basis for any mental or psychiatric condition?" The State also inquires, "Do you suffer from a physical defect or sickness?"<sup>111</sup> The mother who consulted a psychiatrist on one occasion because her son had died must confess herself to the New Jersey police, upon pain of criminal prosecution.<sup>112</sup>

And it is not only the government that can use firearms background checks to disclose private medical information. An employer can conduct inexpensive inquiries into the mental health records and criminal background of prospective or current employees by ordering them to produce proof that they are eligible to buy a gun, and hence have no mental or criminal record. Some employers in Illinois use this tactic.

#### E. Denial of ability to obtain a gun

A waiting period provides anti-rights police administrators with an easy opportunity for abuse. In New Jersey, the police often simply refuse to process gun purchase applications.<sup>113</sup> In cases of budgetary constraint, firearms applications may suffer inordinate or even permanent delays.<sup>114</sup>

Although a statute may specifically limit the reasons for disqualifying a buyer, police may disqualify for other, illegal reasons. In Maryland, where an appeals process exists, the police are over-ruled on 78% of appeals.<sup>115</sup>

Indeed, many of the police departments which most vociferously champion "reasonable" gun controls routinely abuse those controls once enacted. The St. Louis police have denied permits to homosexuals, nonvoters, and wives who lack their husband's permission.<sup>116</sup> Although New Jersey law requires that the authorities act on gun license applications within 30 days, delays of

90 days are routine; some applications are delayed for years, for no valid reason.<sup>117</sup> Mayor Richard Hatcher of Gary, Indiana, ordered his police department not to give license application forms to anyone.<sup>118</sup> The Police Department in New York City has refused to issue legally-required licenses, even when twice commanded by appeals courts to do so. The Department has also refused to even hand out blank application forms.<sup>119</sup>

Most police, fortunately, are law-abiding, and would not engage in the abuses typical in New York City and Maryland. Nevertheless, even in law-abiding jurisdictions, the waiting period, by definition, delays for a number of days a citizen's acquisition of a firearm. For a hunter planning a trip next month, the delay is inconsequential. For a young woman being threatened by an ex-boyfriend, the delay may be fatal.

Simply put, seven days is too long for a woman whose ex-boyfriend is promising to come over and batter her. Seven days is too long for families when a burglar strikes three homes in a neighborhood in one week, and may strike that night. Twenty-four hours is too long to wait when the Gainesville serial murderer is loose, and every woman is a potential victim.

The issue is not hypothetical. In September 1990, a mail carrier named Catherine Latta of Charlotte, North Carolina, went to the police to obtain permission to buy a handgun. Her ex-boyfriend had previously robbed her, assaulted her several times, and raped her. The clerk at the sheriff's office informed her the gun permit would take two to four weeks. "I told her I'd be dead by then," Ms. Latta later recalled. That afternoon, she went to a bad part of town, and bought an illegal \$20 semi-automatic pistol on the street. Five hours later, her ex-boyfriend attacked her outside her house, and she shot him dead. The county prosecutor decided not to prosecute Ms. Latta for either the self-defense homicide, or the illegal gun.<sup>120</sup>

In 1985 in San Leandro, California, a woman and her daughter were threatened by a neighbor. Instead of being able immediately to obtain a handgun for self-defense, the women had to wait 15 days. The day after she finally was allowed to pick up her gun, the neighbor attacked them, and she shot him in self-defense. Had the man attacked 14 days after his initial threat, rather than 16 days after, the woman and her daughter would have been raped. Of course the state of California would have denied liability, as it has repeatedly denied liability for its failure to protect citizens against specific threats from specific criminals.

The national waiting period proposal does allow a waiver of the 7-day wait if the locality's chief law enforcement official (or his designee) issues a written order stating that immediate purchase is necessary to protect the life of the gun purchaser or someone in her household.<sup>121</sup> In practical terms, it is very doubtful that a potential crime victim (particularly the poor and minorities who are the victims of most violent crime), will be able to obtain a rapid appointment with the police administrator who will issue a gun authorization. If the administrator is out of town, or busy, or uninterested, the victim is out of luck. And if the potential victim is receiving threatening phone calls that deal only with rape, aggravated assault, or mayhem, even a sympathetic police chief cannot issue an exemption, since there is no threat to the victim's life.

Some of the people killed by a waiting period could, ironically, be people who have volunteered to defend the United States.

Members of the armed forces are allowed to carry personal handguns as sidearms, if they so choose. Many infantry grunts might want a Colt .45 or a Glock 9mm on their hip, in case their government-issue M-16 rifle jams in a firefight. Television stations in Texas and Alabama reported high levels of sales of 9 millimeter handguns to servicemen shipping out to Saudi Arabia. But in states like California, with a minimum wait of 15 days, the short period between notification of call-up and departure date is not enough time for a soldier to be cleared by the firearms control apparatus. As a result, soldiers from California and similar states were placed in greater peril.<sup>122</sup> Happily, the rapid collapse of the Iraqi army reduced the importance of back-up sidearms.

As the Fifth Circuit Court of Appeals has held, "the right to defend oneself from deadly attack is fundamental."<sup>123</sup> A waiting period puts that fundamental right on hold.<sup>124</sup>

A person who is falsely imprisoned by the state can get out of jail a week later, with perhaps no permanent harm done. Newspapers which libel a person by mistake can always publish corrective stories the next day. A person who is denied the right to bear arms for a week may, at the end of the week, be dead. A deprivation of even 24 hours of the means to self-defense may mean a deprivation of life itself.

Of course the number of persons who would be killed or injured because of the waiting period would be small, so small as to be statistically unnoticeable. But so would the number of persons saved by a waiting period. Proponents of a waiting period have not carried the burden of demonstrating that a waiting period would be a net saving of lives, taking into account the people who die because they cannot defend themselves, and taking into account the diversion of police resources away from street patrol.

To reduce the abuses and injuries that waiting periods could cause, a number of prophylactic measures make sense: Any waiting period should have an explicit appeals process. At the appeal, the government should have the burden of proving that the citizen is not entitled to possess a firearm. Normal rules of evidence should apply, and citizens should not be victimized by anonymous rumors and other sorts of hearsay evidence. Citizens who are victorious in their appeal should be entitled to attorney's fees.

Moreover, any person injured by the failure of police to properly and promptly approve an application should have a right to sue for damages. (When a person is killed because the police failed to act, the survivors would have the right to sue.)

Under the legal doctrine of sovereign immunity, the police have no duty to protect any individual citizen from crime, even if the citizen has received death threats and the police have negligently failed to provide protection.<sup>125</sup> In cases where the government affirmatively interferes with a person's ability to protect herself (the interval between an application to purchase a firearm and approval), the doctrine of sovereign immunity should not apply. The government should not be able to strip a person of her right to defend herself, and then assert that it has no responsibility for the consequences.

#### F. Financial hardships

Almost all waiting period/permission systems require the firearms purchaser to pay the entire cost of the system. It is Constitutionally odious to make people pay the government so the government can satisfy itself that they are fit to exercise their Constitutional rights. The young woman in the ghet-

to who needs an inexpensive handgun for self-defense, or the young man in Appalachia who wishes to hunt squirrel with a .22 rifle are not the cause of the crime problem. Even an \$8 fee may drive the cost of their \$50 gun out of reach.

For all firearms purchasers, not just poor people who need a defense gun, a waiting period requires an additional trip to the firearms store, more time spent by the clerk at the store, lost sales due to people who do not have the time to make repeated trips, and a host of other transaction costs. For a person who lives in a small town, and needs to make a long trip to get to a store with a good selection of merchandise, the inconvenience can be substantial.

The waiting period severely impacts firearms dealers and manufacturers. The reason is that most guns are bought by persons who already own guns, often as an impulse addition to a collection. If two trips to the store are required, the buyer often loses interest in the sale. For example, the number of handgun sale records reviewed by the Pennsylvania state police is one-third less than the number of handgun purchase applications. Most of the drop-off is caused by potential purchasers who, after a few days, decide not to buy the gun.<sup>126</sup>

The waiting period also indirectly impacts government resources. A substantial decline in firearms sales mean a substantial decline of several million dollars in firearms excise taxes, and perhaps also a substantial decline in revenue for wildlife commissions.<sup>127</sup>

From a criminal justice standpoint, the loss of gun sales is inconsequential. The fact that a person who already legally owns three guns ends up not buying a fourth does not make him more vulnerable to crime, nor does it make him more dangerous to the public. (There is no correlation between gun density and gun crime.<sup>128</sup>

The loss in sales, irrelevant to the crime issue, is very harmful to retailers and manufacturers. Automobile dealers, liquor stores, and tobacco outlets all sell products that kill many people, but they are not burdened with a rule that makes lawful users make repeated trips for the same transaction.

It should be emphasized that substantial burdens on firearms owners and the firearms industry might well be justified if tangible benefits resulted. But as the evidence discussed above indicates, waiting periods simply do not prevent guns from coming into the wrong hands.

#### G. The data quality problem

The existing state of criminal records in most jurisdictions is simply too primitive to support a background check that is part of a waiting period (or part of an instant telephone check).

The FBI "estimates that approximately one-half of the arrest charges in their records do not show a final disposition."<sup>129</sup>

Only 40 percent to 60 percent of the nation's felony records are automated.<sup>130</sup> Many states do not have fully automated criminal records name indexes.<sup>131</sup> Many indexes are not currently searchable by information transmitted from the outside, such as telephone lines or computers. In some states, the same master index (such as a fingerprint index) that contains all felons will also include child care workers, various license holders, and firearms permit holders.<sup>132</sup>

For citizens regarding whom false information has been incorrectly recorded on a "rap" sheet, there is no remedy. Courts have held that even after an acquittal or dismissal of charges, a person has no Constitutional right to have an arrest purged from his

record.<sup>133</sup> (It should be noted that racial minorities are disproportionately victimized by arrests that do not prove worthy of a conviction.)

According to the Department of Justice study, performing a reliable background check under current data quality conditions would take 30 days. The Department found that shorter background checks (such as one week or three weeks) were no more reliable than instant checks. That conclusion is consistent with opinion in the police surveys, which shows most command rank officers do not believe that seven days would give them enough time to do a background check.<sup>134</sup>

Because of the severe problems with the existing data quality, the Department of Justice Task Force concluded: "[A]pproximately 50 percent of the cases where persons appear to have a criminal history record based on an initial name search are eventually found to be false hits. . . . Indeed, in many (perhaps most) cases an initial indication of a criminal record would eventually be shown to be untrue because it resulted from misidentification with someone else with a common name and date of birth." As a result, only 84-88 percent of gun purchasers would be able to pass an initial check.<sup>135</sup>

If there were a national comprehensive check, approximately 725,000 persons a year would be falsely denied under either the waiting period or the instant telephone check.<sup>136</sup> The 725,000 faced with false denials would then have to prove their innocence by being fingerprinted, and entered in a data base of eligible gun buyers. The "secondary verification process" (proving their non-criminal identity to the police) that would take four to six weeks.<sup>137</sup>

The list of people processed through secondary verification would be another basis for gun registration.

Accordingly, a minimum condition for any kind of background check system should include the establishment of a data base consisting only of convicted felons and other ineligible.

#### H. A step towards prohibition

Why waiting periods? It is understandable why many legislators would be attracted to an idea that, at first glance, seems eminently plausible. Many legislators accept the reasoning "guns don't kill people; people kill people." So instead of controlling guns (through gun registration), why not control people who may abuse guns?<sup>138</sup>

But the anti-gun lobbies, being expert in the issue, know better. They know the facts of the Hinckley assassination. So why do they support a waiting period?

The National Coalition to Ban Handguns [recently renamed the Coalition Against Gun Violence] candidly admits that gun controls do nothing to prevent criminals from obtaining guns.<sup>139</sup> The CSGV believes that criminals are not the issue; handguns have no place in civilian hands. Moderate controls over handguns are a step toward to a ban. Policy statements distributed by the NCBH forthrightly admit as much.<sup>140</sup>

Even in the most academic settings, the question may come down to whether a person is "for" guns or "against" them. At a debate at the American Society of Criminology Conference in November 1989, the participants were asked what number of lives saved would be necessary for them to consider a waiting period worthwhile. Both sides of the debate agreed that the number of lives saved was not determinative of their positions. Dr. Paul Blackman, the National Rifle Association representative, replied that he thought

the waiting period might end up with a net cost of lives. He also stated that alcohol Prohibition had saved lives, but still was not a good idea. Darrel Stephens, Executive Director of the Police Executive Research Forum, replied that he would still favor a waiting period even if it were proven not to save any lives. He reasoned that the extra effort required to purchase a gun would convince some people not to buy a gun, and less guns in civilians hands would be good in itself.<sup>141</sup>

What about Handgun Control, Inc., the more powerful of the two major anti-gun lobbies? Their stated motto is merely "Keeping handguns out of the wrong hands." But their agenda is prohibition. HCI's former Chairman has stated that he favors intermediate control as a waystation to near-total handgun prohibition.<sup>142</sup> The organization supports handgun prohibition as a policy matter.<sup>143</sup> As one of HCI's congressional allies acknowledges, the 7-day handgun wait "is not really enough, but it is a start."<sup>144</sup>

What good does a waiting period do for the goal of handgun prohibition? Waiting periods facilitate gun registration, which HCI praises as a prelude to gun prohibition.<sup>145</sup> The national waiting period proposal includes a number of subtle provisions which facilitate prohibition: an anti-gun police chief could indefinitely delay a purchase application by refusing to mail back acknowledgement of receipt of the application; and the definition of "handgun" is elastic enough to include a number of long guns.<sup>146</sup>

As discussed above, waiting periods sharply reduce gun sales. While there are no anti-crime benefits, HCI sees reduced sales (rather than just reducing uncontrolled sales) as good in itself, and a necessary precondition to prohibition.<sup>147</sup>

Most importantly, the waiting period is social conditioning. It sends the message that citizens do not possess a right to bear arms, but merely a privilege dependent on police permission.<sup>148</sup>

#### VII. CONSTITUTIONAL ISSUES

Synopsis: Waiting periods are a prior restraint on the exercise of Constitutional rights. The very point of basic rights like free speech, or free exercise of religion, or the right to keep and bear arms, is that a citizen does not need to ask for government approval to exercise those rights. Waiting periods, because of their inefficacy and potential for abuse, are not the least restrictive means of attacking gun crime without interfering with the right to bear arms. A federal waiting period violates the 10th Amendment by forcing state officials to perform background checks.

Is a federal waiting period Constitutional? The issue has never been directly tested in court. State waiting periods are common, but the prevalence of a practice is no guarantee of its Constitutionality. Racial segregation, after all, was the norm in most of the U.S. for the century after the Civil War, even though the Constitution forbade it.

One view of Constitutional interpretation was articulated by Justice Black. He viewed the Constitutional prohibitions literally. For example, he took the First Amendment's command "Congress shall make no law respecting the freedom of speech . . ." to mean that Congress could pass no law regarding free speech. Justice Black viewed the Second Amendment with a similar literalness: "its prohibition is absolute."<sup>149</sup> The more prevalent view, however, is that no Constitutional provision is absolute.

Regardless of which view is adopted, the most appropriate guide for analysis of the Second Amendment is the First Amendment.

Of the entire Bill of Rights, only the First, Second, and Third Amendments guarantee particular substantive rights.<sup>150</sup> Amendments Four through Eight are due process requirements for the government to obey, while Amendments Nine and Ten are non-specific reservations of rights. The Supreme Court has indicated that the First and Second Amendments should be interpreted according to the same principles.<sup>151</sup> Indeed, it is necessary to interpret the Second Amendment with just as much vigor as the First in order to obey the Court's command that all Constitutional rights must be treated with equal respect, with no right being particularly favored or disfavored.<sup>152</sup> And of course all Constitutional rights must be broadly construed.<sup>153</sup>

#### A. Prior restraints on constitutional rights

While the First Amendment protects freedom of speech, there are legitimate debates about what kinds of communication are considered "speech." Pornography, picketing, price-fixing, and perjury are activities which, at least arguably, are not included within the freedom of speech. Likewise, the right to bear "arms" is sometimes said not to apply to machine guns, nunchakus, brass knuckles, switchblades or antiaircraft rockets.

For communication that is clearly within the freedom of speech (such as political commentary), the single clearest principle is that prior restraints are virtually never lawful. While the government (through laws against libel or against criminal incitement) may punish speech after it occurs, the government may almost never impose a prior restraint by requiring a person receive permission before speaking.<sup>154</sup>

The various police permission proposals destroy the normal presumption of innocence and impose prior restraints. A person is forbidden to exercise her right to bear arms unless the police satisfy themselves that the person is not guilty.<sup>155</sup> Citizens who wish to protect themselves should not have to wait to receive police permission. The very point of basic rights like speech, or free exercise of religion, or the right to keep and bear arms, is that a citizen does not need to ask for government approval to exercise those rights.<sup>156</sup>

A judicial decision permitting a prior restraint on the right to bear arms would inevitably endanger the right to abortion. If prior restraints and waiting periods on the right to bear arms are allowed, why not require women who need an abortion to submit to a waiting period, pass a simple test on the nature of fetal life and risks of abortion, and obtain permission from a local health agency?

The chance that any given person acquiring gun by any method, including by theft, will perpetrate a homicide is 1 in 3,000. In future years, a legislature dominated by pro-life forces could point out that a woman seeking an abortion does so with the intention of killing the fetus. If a chance of a killing smaller than 1 in 3000 justifies a prior restraint, then surely the certainty of a killing in case of abortion would also justify a prior restraint.

#### B. Balancing tests

Another principle, originally developed under First Amendment analysis, but now considered to have general applicability, is that of "least restrictive means." When the government regulates Constitutionally-protected activity (such as speech or interstate commerce), even if the government is pursuing a substantial purpose:

"That purpose cannot be pursued by means that broadly stifle fundamental personal liberties when the end can be more narrowly achieved. The breadth of legislative abridgement must be viewed in light of less drastic means for achieving the same basic purpose".<sup>157</sup>

Courts have directly applied the principle to strike down infringements on the right to keep and bear arms.<sup>158</sup>

Because a waiting period is so patently ineffective, it is not the least restrictive means to achieve the substantial government interest in reducing gun misuse. The waiting period fails the less restrictive means test because it imposes a broad restriction on all firearms purchases (or all handgun purchases for a limited wait) that is not narrowly tailored. There are a large number of less restrictive methods the government might adopt, discussed below in Part VIII, to reduce gun misuse.

#### C. Federalism

Handgun Control, Inc. claims that 22 states have waiting periods. The statement is not completely accurate. The majority of American states impose no major restrictions on firearms purchases in addition to those under existing federal law. Federal law requires the purchaser of any gun to fill out a form which is permanently retained by the dealer, and is available for inspection by federal authorities. Some states require handgun purchasers (or all gun owners) to obtain a license. Once granted a license, the licensee may obtain an unlimited number of firearms of all types without further approval, for as long as the license is valid (for life, or a term of one or more years).<sup>159</sup> South Carolina runs a background check after the person has picked up the gun.<sup>160</sup> Wisconsin has a two day waiting period, but no background check.<sup>161</sup>

Only 16 states actually have a system like what is proposed by Handgun Control, Inc. as a federal law, and pushed by HCI in the state legislatures: a statute requiring individual police permission for every single handgun purchase. In four of those states (Pennsylvania, Oregon, Indiana, and Washington), a person who holds a permit to carry a concealed firearm is exempt from the waiting period; the police are statutorily required to grant concealed carry permits to all citizens unless there is a particular legal disability. Connecticut exempts from its wait anyone with a state hunting or local gun license, and allows transfers in less than 14 days if approval is granted earlier.<sup>162</sup> Tennessee also allows an instant transaction if the police approve, and in some rural counties, the waiting period is not enforced. Of the 12 states that require handgun purchasers to receive individual permission for each purchase under all circumstances, 3 have a waiting period shorter than the 7-day standard commonly proposed.<sup>163</sup> Thus, the 7-day waiting period for every handgun purchase by Handgun Control is more severe than the existing laws in 41 of the 50 states.

Forty-one of the fifty states have decided not to implement laws as severe as the proposed uniform 7-day wait. Sometimes the federal government, viewing a growing trend in the states, makes the progressive state legislation into federal law. It cannot be said that there is a national trend in favor of waiting periods. It is true that some states that already had waiting periods for handguns have extended them to long guns.<sup>164</sup> (The move is logical since long guns, especially shotguns, are so much deadlier than handguns.)<sup>165</sup> Similarly, Florida, which already allowed counties to have limited 3-day

waiting periods, voted in November 1990 to make the wait statewide. The new Florida law had several provisions which made it more palatable to supporters of the right to bear arms; the law provides for a wait only, with no background check or police permission. Persons with handgun carry permits (which are required by law to be issued to all qualified applicants) are exempt from the wait. As a state constitutional amendment, the Florida wait prevents the state legislature from enacting stricter gun laws.

In states that do not already have waiting periods, there has been no willingness to adopt one. In the last decade, not one state without a waiting period has added one. Even Ohio, the home state of both sponsors of the federal waiting period, has repeatedly rejected a waiting period.<sup>166</sup> Indeed, the large majority of states, through preemption laws, have forbidden or abolished local waiting periods.<sup>167</sup>

It is sometimes asserted that the lack of a waiting period in some states makes enforcement of the law impossible in states that have one.<sup>168</sup> But ever since the federal Gun Control Act of 1968, citizens are only permitted to buy handguns in the state where they reside. If a Marylander wished to evade his state's 7-day wait, and buy in a state without a wait (such as West Virginia), he could not do so without providing proof that he was a resident of the other state. Only persons possessing false identification could evade the background check in one state.

When faced with the federalism argument, some supporters of a national waiting period reply that the proposals merely allow the choice of a background check. States already have that choice, of course. The state legislature of Iowa could enact a background check if it wished; it does not need the assistance of the federal government to have a "choice." Besides, as discussed above, Handgun Control, Inc. has already announced it will sue police departments that do not "choose" to conduct a background check. Because of HCI's lawsuit strategy, the seven-day wait would in practice be mandatory—even though the large majority of states have apparently decided that public safety is enhanced if their citizens can acquire the means of self-defense in less than a week.

Since the net effect of Handgun Control's strategy would be to impose on state officials a federal obligation to conduct a background check, the national waiting period is an unconstitutional exercise of Congressional power. As the Supreme Court has ruled: "the Federal Government, under the Constitution, has no power to impose on a State officer, as such, any duty whatever, and compel him to perform it; for if it possessed this power, it might overload the officer with duties that would fill up all his time, and disable him from performing his obligations to the State, and might impose on him duties of a character incompatible with the rank and dignity to which he was elevated by the State."<sup>169</sup>

The Supreme Court's concerns are particularly apt in the case of the national background check. The mandatory check would require each state to assign some number of police officers or other employees (ranging from a few dozen in a small state doing a retail handgun-only check to several hundred in a large state under HCI's comprehensive check) to the job of checking the backgrounds of its citizens. Although the state legislature would have preferred to devote the time of its employees to the more urgent task of fighting criminals, the federal government would force the state to use its own

resources to process paperwork from honest citizens.

The national waiting period violates, at the very least, the spirit of the Tenth Amendment.<sup>170</sup>

#### VIII. ALTERNATIVES

Synopsis: There are a number of alternatives that—while clearly superior to the waiting period—do not represent good policy choices in themselves. The Instant Telephone Check and the 7 day waiting period/background check both use the same (often inaccurate) database; the Instant Check has the obvious advantage of being speedy, and not interfering with expeditious acquisition of a self-defense gun. Firearms Owners Identification Cards take a long time to obtain initially, and serve as a basis for gun-owner registration and overly broad fingerprinting of the general population. Turning drivers licenses into "smart cards" also requires citizens to submit fingerprints to the government in order to exercise their Constitutional rights. The most effective way to deal with criminals possessing guns is to better enforce laws regarding criminal gun acquisition and to target the black market trade that supplies the gigantic majority of criminal funds. Researchers from the National Institute of Justice have suggested several possibilities to directly attack the black market; none of the NIJ proposals interferes with Constitutional rights.

Henny Youngman was once asked how he liked his wife. "Compared to what?" he replied. There are a number of alternative controls on retail gun sales that, compared to a waiting period, are quite attractive.

If the only issue to be decided is what kinds of restrictive controls on retail gun sales are best, all of the alternatives detailed below compare favorably to the waiting period. They are just as effective at stopping legal purchases by ineligible buyers as a waiting period would be. Because the alternatives do not give the abusive administrators an easy opportunity maliciously to block every retail transaction, these alternatives are much less likely to result in wholesale denials of the right to bear arms, and hence less likely to threaten public safety. At the same time, they consume police resources at a rate equal to or significantly less than the rate at which a waiting period would consume police resources. Hence, the alternatives are clearly superior to a waiting period from all perspectives.

On the other hand, if the question is not how to further restrict retail gun sales, but instead if any such restrictions would be worthwhile none of the alternative controls appear satisfactory. Like a waiting period, the alternative controls on legitimate sales can be evaded, and will likely do virtually nothing to disarm criminals. And while the alternative controls are not as dangerous to civil liberties as is a waiting period, the alternatives still pose some danger.

The most effective way to promote public safety and preserve civil liberties is to crack down on the black market that supplies criminal guns. A number of approaches for attacking the black market are suggested below.

##### A. "Instant" checks

One alternative to waiting periods is an "instant telephone check." The first state to enact such a check was Virginia; and Florida and Delaware have recently followed suit. When a Virginia gun dealer sells any handgun or certain long guns to a Virginia resident, the dealer calls a toll-free number at state police headquarters, to verify that the

purchaser has no legal disqualification. If everything proceeds properly, the sale can be consummated with no more delay than a credit card check might entail.

Support of an instant check is widespread. Criminologists and legal scholars such as Gary Kleck, Don Kates, and Robert Cottrol who are generally skeptical of gun prohibition support the instant check system. Even big-city police chiefs who generally agree with Handgun Control, Inc., split from that group in preferring the instant check over a national firearms identification care.<sup>171</sup> The National Rifle Association also supported the instant telephone check in Virginia.

In terms of sorting out ineligible buyers, the instant check is just as effective as a 7-day waiting period, according to the Department of Justice Task Force, and for that reason is supported by Attorney General.<sup>172</sup> Unfortunately, in terms of preventing incorrect denials of the right to bear arms, the instant check is just as bad as the waiting period. Because the data quality for instant checks is, according to the Task Force, equivalent to that for a one or three week background check, only 84%-88% of applicants will be initially allowed to purchase if there were a national instant check. The unlucky remainder must go through a secondary verification process (such as submitting fingerprints at state police headquarters) that would take several weeks.<sup>173</sup>

Of course a criminal can evade an "instant" check just as easily as he can evade any other check. All he needs is a fake driver's license with another name. Since false social security and alien registration cards may sometimes be bought for as little as \$35,<sup>174</sup> and since those cards are usually sufficient to obtain a driver's license, the instant check is likely to be just as porous as longer checks. The instant check, therefore, like the waiting period, could be evaded by anyone with false identification.<sup>175</sup>

For the purchasers who are rejected initially, fingerprint checks might be required to verify their identity. It is estimated that, if the instant check were national and comprehensive, the FBI would need 395 new clerical employees and 8,000 more square feet of office space to process the fingerprint work.<sup>176</sup> Given the limited efficacy of any police permission system, it might be considered whether 395 additional FBI employees might be better employed at projects focused on criminals, rather than on law-abiding citizens.

An instant check will cost between \$7.07 and \$9.39 per purchase.<sup>177</sup> For a person buying a high-quality target pistol, the cost is hardly noticeable. For a poor person buying a \$40 used revolver for self-defense, the cost is considerable. The cost could be justified, if it yielded important benefits.

Significantly, the instant check is subject to the same problem of creating a gun and gun-owner registration system as is a waiting period. As the Task Force observes, "Any system that requires a criminal history record check prior to purchase of a firearm creates the potential for the automated tracking of individuals who seek to purchase firearms."<sup>178</sup> If a transaction number must be placed on the dealer gun sale form (to prove he made the check), and if the state retains its own record of transaction numbers, the record-keeping could easily be perverted into gun registration.

At the least, any instant check system should include protections to absolutely bar gun-owner record retention, and should specify that if computer or other failure prevents the police from approving the sale, the

sale should be delayed no more than 24 hours.

The instant check is clearly preferable to a waiting period. The instant check uses the same criminal/mental data base as would a waiting period, and would therefore be equally effective in denying ineligible buyers. Because the large majority of sales would be approved on the spot, abusive administrators would have much less of an opportunity to interfere with the right to bear arms. It is true that an instant check eliminates the "cooling off" feature of a waiting period; but as discussed above, the number of crimes that could be prevented by "cooling off" is very, very small. The loss to public safety from the elimination of the "cooling off" period is more than offset by allowing persons who need a gun for immediate self-defense to get one, and by substantially reducing the numbers of arbitrary denials of firearms purchases.

##### B. Firearms owners identification cards

One suggested alternative to waiting periods for each firearm purchase is the creation of a Firearm Owners Identification Card (FOID). A person applies once for FOID card and submits her fingerprints to the authorities; after a four to six week review process, the person is granted a card which allows her to make unlimited purchases, with no further approval, as long as the card remains valid. (The card might expire after one year, or three years, or be valid for life.) Massachusetts and Illinois are among the states currently using a FOID system. Faced with the choice between the instant telephone check and the FOID card, Handgun Control, Inc. prefers the FOID card.<sup>179</sup>

The Task Force suggests that each FOID card would cost \$30. Approximately 1,700 new FBI employees would be required to process the necessary fingerprint checks of FBI files. According to the Task Force, the FOID card, taking up to six weeks to process, would be substantially more accurate than an instant check or a short waiting period.

As with the instant check or the waiting period, the list of FOID owners would be a de facto registration list of gun owners. The more serious civil liberties problem, however, involves massive fingerprinting.

The National Association of Police Organizations favors the collection of fingerprints of gun owners as the first step towards a comprehensive fingerprint system: "Hence the development of such an integrated national fingerprint system should be considered not merely for its benefits in connection with felon identification concerning firearms purchases but also in connection with improving law enforcement in general."<sup>180</sup>

The American Civil Liberties Union states "limited criminal history record checks, with fingerprint cards, are justified in certain licensing and employment situations. However, we oppose routine fingerprinting of all individuals who seek to buy firearms as an intrusion into privacy that cannot be justified by the minuscule benefit that may be achieved. . . ."<sup>181</sup> Of course, the ACLU's principle should also apply not only to proposed national fingerprint proposals, but also to the current practice in states such as New York and Illinois which routinely fingerprint the large fraction of the population which exercises its right to bear arms.

The same argument that lead one to reject a national or identity card apply to federal gun licensing through a FOID. A national licensing system would require the collection of dossiers on half the households in the United States (or a quarter, for handgun-only record-keeping).

Implementing national gun licensing would make introduction of a national identity card more likely. Assuming that a large proportion of American families would become accustomed to the government collecting extensive data about them, they would probably not oppose making everyone else go through the same procedures for a national identity card.

Although the problem of illegal immigration is immense, Congress has repeatedly rejected calls for a national ID card. The same reasons that impelled Congress to reject that national ID card should impel Congress (and the states) to reject large steps towards such a card.

#### C. Smart Cards

Another suggestion for screening of firearms purchasers has been the development of "smart" cards. As the Task Force explains, "every adult would carry an identification card issued by the state of residence, such as a driver's license, that would have electronically imprinted identifying information."<sup>182</sup> An instant fingerprint check in gun stores will within a few years be technologically feasible.<sup>183</sup>

The Smart Card seems to pose no serious problems from a pure Second Amendment viewpoint. There would be no false denials, since the cardholder would not be confused with other people with similar names and birth dates. There would be hardly any delays in purchases, since almost everyone would have a smart card.<sup>184</sup> There would be less risk of creating a gun registration system, although some states would be tempted to include gun registration data directly on the smart card.

Nevertheless, civil libertarians (including those with no interest in the gun issue) should oppose the smart card for the same reason that they oppose a firearms owners identification card (FOID). Both smart and FOID cards are a huge step towards a national identity card. Smart/FOID cards would of course be introduced with the assurance that they would only be used for limited purposes. But the Social Security Number, it was promised, would only be used for Social Security; today, the SSN is in effect a mandatory universal identification number, demanded by all levels of government and by businesses.

The National Rifle Association rejects the idea that persons who fill out the federal gun purchase form (form 4473) should be required to affix a fingerprint: "Exercise of a constitutional right cannot be conditioned on making fingerprints available to the police."<sup>185</sup> Indeed, the Supreme Court has held that the Constitution forbids states to collect fingerprints of people merely because they exercise their Constitutional rights.<sup>186</sup> But the smart card requires a citizen to offer his fingerprint for government approval before exercising his right to bear arms.

The instant driver's license fingerprint scan offers few anti-crime advantages over the instant telephone check. Both can be evaded with false identification. (In the case of the fingerprint scan, the criminal just makes sure to have someone else's print placed on his fake driver's license.)<sup>187</sup> The instant fingerprint scan proposal would result in every state having a fingerprint of all of its adult citizens. It is questionable whether states currently ought to be fingerprinting citizens who obtain drivers' licenses. It is repugnant to federalism to force states to erode the privacy of their citizens by forcing the states to collect fingerprints.

Like the FOID card, the smart card looks handsome when compared to the waiting pe-

riod, since it is more effective in denying ineligible buyers, and is less susceptible to repeated abuse by anti-gun administrators. But standing on its own, the smart card fails important civil liberties tests.

#### D. Anti-crime alternatives that do not infringe civil liberties

If the goal is really to keep felons from obtaining guns (rather than imposing gun control on honest citizens for its own sake), then the focus on retail sales is entirely misplaced. Hardly any felons buy crime guns in stores; almost all of the guns come from the underground market. A system aimed at disarming criminals should aim primarily at the black market.

The National Institute of Justice authors, Wright and Rossi, suggest "stiff penalties for firearms transfers to felons whenever these were detected and, in the same framework, stiff penalties for the crime of gun theft."<sup>188</sup> Enhanced penalties for transfers to felons were added to federal law in 1986, and should be added to state laws as well. To assist prosecutions of gun theft, states should follow Virginia's lead, and make sale of a stolen firearm a special, serious offense.<sup>189</sup> In many states, the theft and sale of \$75 gun amounts to only petty larceny. Selling a "hot" \$75 pistol should be a more serious offense than selling a "hot" \$75 toaster-oven.

Other ways to keep criminals away from guns include closer monitoring of parolees and probationers, and more intensive crackdowns on fencing operations for stolen firearms. State or federal strike forces aimed directly at gun-runners might be introduced or augmented. To deal with the rare cases of criminals with non-false identification buying guns at retail, police departments could distribute wanted posters and/or gun felon lists to gun stores.<sup>190</sup>

Funding for any of the above programs should come from the same general revenues that support all law enforcement, or from a special assessment on convicted gun felons.<sup>191</sup> Persons exercising their Constitutional right to bear arms should not be forced to pay a special tax to support enforcement efforts against gun criminals, any more than camera owners or magazine readers should be taxed to pay for enforcement or child pornography laws.

#### IX. CONCLUSION

One night a man was walking down the street, and saw a friend crawling on the sidewalk, near a lamppost. The friend explained that he was looking for his wallet. The man got down on his knees, and helped the friend look. After about 15 minutes, the man said "I don't think your wallet is anyplace near this lamppost."

"Of course it isn't," the friend replied. "It fell out of my pocket over there, in that dark alley."

"Then why are you looking all the way over here, by the lamppost?" the man asked. "Because the light is so much better over here."

Where should police officers look for armed criminals? In the dark alleys and black markets where criminals sell guns? Or behind a desk, where the light is better, so they can examine paperwork filled out by law-abiding citizens?

Especially when a legislature is considering laws that impact fundamental rights, it is improper to pass legislation simply because "it might help a little" or "it won't do much harm." Proponents of a new law have the burden of proving that their new law will accomplish a significant positive good. The burden is all the higher when proposed legis-

lation affects a significant number of people, and waiting periods regulate the 50% of American households that choose to possess firearms. Proponents of a waiting period have failed to carry their burden of persuasion.

The criminological evidence is solidly against the waiting period. Most police do not favor the waiting period, and even if they did, their opinions do not over-ride Constitutional commands. While the Constitutional question is not at all well-settled, analysis of core Constitutional principles suggests that a waiting period cannot pass muster under the bar on prior restraints or the requirement of "least restrictive means."

Of all the proposals for increased restrictions on retail firearms sales, the waiting period scores last in terms of disarming criminals, and first in terms of threatening the exercise of the right to bear arms. Alternative restrictions share many of the Tenth Amendment guaranteeing state autonomy. All of the proposals facilitate gun registration. All of the proposals force a citizen wishing to exercise his right to bear arms to receive, at least once, permission from the government. The waiting period gives abusive administrators a chance to interfere with every firearms transaction, while the alternatives allow interference with some transactions. In terms of fighting crime, all of the proposals are essentially trivial. They will force police officers to carry out a surveillance of ordinary citizens that will almost never result in the arrest of a criminal.

The strongest evidence against a waiting period comes from the copywriters of Handgun Control, Inc., the lead proponent of the bill. They have chosen to build their case on a misrepresentation—the empirically false claim that a waiting period would have stopped John Hinckley. If Handgun Control, Inc.'s most compelling argument is false, why should legislators or other citizens believe HCl's other assertions? Why should the public accept controls like waiting periods which are designed as intermediate steps towards prohibition? Why should Americans accept alternatives like instant telephone checks or smart cards which—although better in every respect than waiting periods—fail to eliminate the civil liberties problem created by forcing people to risk being put on a government list because they exercise their rights.

The premise of the waiting period—and of most suggested alternatives—is that citizens can be required to ask police permission before exercising their rights. But the Constitution does not create a privilege to possess "sporting" guns. The Constitution recognizes a fundamental human right to keep and bear arms.<sup>192</sup> And that is why waiting periods, besides being ineffective, are illegal and immoral.

<sup>18</sup>Shots from a .38 caliber are almost twice as likely to kill as .22 calibre attacks. Franklin Zimring, The Medium is the Message: Firearms Caliber as a Determinant of Death from Assault, 1 Journal of Legal Studies 97 (Jan. 1972). The campaign Mrs. Brady and HCI wage against "Saturday Night Specials" (cheap handguns like the RG .22) is particularly odd in light of the fact that Hinckley owned guns more powerful than a "Saturday Night Special," and had a ban on "Saturday Night Specials" been in effect, Hinckley would not have been able to buy the cheap handguns in Texas, and probably would have used the higher-quality (and deadlier) handguns.

<sup>19</sup>Advertisement, "A \$29 handgun shattered my family's life." The New Republic, July 18, 1988, inside front cover. Same advertisement, New York Times, August 1, 1988, p. 1. See also James Brady Fund-raising letter, p. 1: "That shot—from a \$29 Saturday Night Special—changed my life . . ." Also, Sarah Brady: "Nine years ago, I got thrown into the issue when John Hinckley bought a \$29 handgun in Dallas," in Peter Nye, "National Gun-Control Position," The National Voter (League of Women Voters), October/November 1990, p. 5.

<sup>20</sup>"Gun Used to Shoot Reagan called a \$47 'Saturday Night Special,'" Baltimore Sun, March 31, 1981 (reporting testimony of federal agents based on their examination of the purchase record for the transaction involving Hinckley). See also, Pete Earley, "The Gun: A Saturday Night Special From Miami," Washington Post, March 31, 1981: "[W]hen model RG14 finally reaches the public, its price tag is about \$47.50—one of the cheapest pistols available." (article about model of gun used by Hinckley).

<sup>21</sup>Mrs. Brady also offers diverse stories about her own involvement in the anti-gun crusade. In a November 1985 New York Times op-ed, she explained her involvement as directly triggered by NRA's attempt to repeal federal gun control through the McClure-Volkmer bill: Last July, the Senate passed the McClure-Volkmer bill, which would make it even easier for the kind of tragedy that struck down my husband to happen again. This bill would severely undermine federal gun laws by allowing anyone to buy a handgun across state lines, by limiting Government inspections of gun dealers' records and by repealing certain handgun record-keeping requirements. I decided I had to do more than think about the problem. Sarah Brady, "How to Deter Future Hinckleys," New York Times, Nov. 8, 1985 (emphasis added). As a New York Times reporter described it: Mrs. Brady first enlisted in the fight for gun control in the summer of 1985 when it appeared that the Senate was about to adopt a measure backed by the NRA that was designed to weaken the 1968 Gun Control Act. "It just enraged me," she recalled of the effort to alter the comprehensive law . . . Barbara Bamarekian, "Fighting the Fight on Gun Control," New York Times, Feb. 10, 1987, p. B10. But another newspaper states that Mrs. Brady has actually been an anti-gun activist since 1973, not since 1985, as she twice claimed in the New York Times. According to a USA Today profile, "Sarah Brady has spent nearly a third of her life arguing for tougher gun laws . . . Brady, daughter of an FBI agent, began her fight for stronger gun laws in 1973, when she tried to ban Saturday Night Specials . . ." "Brady Backs a Wait on Handgun Sales," USA Today, June 17, 1987, p. 2A (emphasis added). In light of Mrs. Brady's deceptions about matters large and small, her attack on the NRA, "I think they tend to prevaricate quite often" seems a case of the pot calling the kettle black. ABC News/Time Forum, January 24, 1990, show #ABC-11, transcript. It is also ironic that she congratulates herself: "I have tried very hard not to make it an emotion issue because I think that is what the gun lobby has done." New York Times, Feb. 10, 1987. A reader of Handgun Control's late 1990 fund-raising letter might find the rhetoric somewhat emotional: [Y]ou are at risk. You are in danger of also becoming a victim of the senseless handgun violence . . . [S]top our insane national handgun war . . . Frankly, what makes me livid is that the NRA opposes the Brady Bill because they claim it's an inconvenience . . . For their convenience, I experience pain—sometimes so intense I cry . . . I need help getting out of bed, help taking a shower, help getting dressed and, damn it, even help going to the bathroom . . . The NRA lobbyists can go to hell! . . . [T]he NRA lobbyists scream FOUL! . . . But the mighty NRA roars NO! And the cowards in Congress cringe! . . . I desperately need your help. James Brady Fund-raising letter (emphasis in original).

<sup>22</sup>For example, Hank Johnson, Executive Editor, "Making a Case for Gun Control," Athens Daily News (Georgia), September 16, 1990 ("Had such a waiting period been in effect when John Hinckley walked into a Dallas pawn shop . . . he could have been stopped.")

<sup>23</sup>Sarah Brady, Vice Chair, Handgun Control, Inc., Statement (press release), February 4, 1987, p. 1. Presumably she meant to say "1980."

<sup>24</sup>Handgun Control, Inc., "Briefing Paper on the Brady Amendment" (1988); Rep. Feighan (sponsor of waiting period), remarks, Congressional Record, September 15, 1988, p. H7636.

<sup>25</sup>The National Sheriffs Association, which currently supports the waiting period, certainly qualifies as a major law enforcement organization, since it is the largest group of sheriffs in the United States. Interestingly, Handgun Control, Inc. claimed in 1988 to have the support of "every major law enforcement organization," even though in 1988 the NSA had voted not to support a waiting period. Apparently when the NSA later changed its mind and supported Handgun Control, the NSA then qualified as a "major police organization." Both NACOP and AFP are for-profit organizations, and are associated with retired police chief Gerald Arenberg, who is also associated with other for-profit organizations. Handgun Control, Inc., sometimes announces this fact as if it somehow delegitimizes the NACOP and AFP—although the more than 100,000 law enforcement officers who have joined these organizations apparently do not agree. Perhaps no major law enforcement organization has been more tainted by financial impropriety than has the International Association of Chiefs of Police, a strong supporter of the waiting period; the questionable financial prac-

tices of IACP's former leadership should certainly not disqualify it as a voice for its members. A fortiori, the for-profit status of NACOP and AFP, untainted by any hint of scandal, should not disqualify these groups as police voices.

<sup>26</sup>The Federal Law Enforcement Officers Association, Fraternal Order of Police, International Brotherhood of Police Officers, International Association of Chiefs of Police, Major Cities Chief Administrators, National Association of Police Organizations, National Organization of Black Law Enforcement Executives, National Sheriffs Association, National Troopers Coalition, Police Executive Research Forum, Police Foundation (a think-tank), and Police Management Association. Congressional Record, Sept. 15, 1988, p. H7639; Handgun Control, Inc., "Briefing Paper on the Brady Bill," p. 2.

<sup>27</sup>"What PERF Members Think About Police Education, Assault Weapons, Toy Guns, Etc." Subject to Debate (PERF newsletter) March/April 1989, p. 1. It cannot be said that PERF has done an outstanding job of informing its members of the technicalities of the firearms debate. Ninety-four percent of PERF members favored a ban on nondetectable weapons, apparently unaware of testimony from the Bureau of Alcohol, Tobacco and Firearms and from the Federal Aviation Administration that there was no such thing as an undetectable weapon currently in existence or technologically feasible in the foreseeable future.

<sup>28</sup>National Association of Chiefs of Police, "American Law Officers Survey for 1989." The NACOP survey was sent to 16,259 command officers, and 16% responded. The 16% represented departments which employ 172,355 officers. Both the NACOP and the PERF surveys were conducted by mail, and response was voluntary. Because the surveys were not conducted by random sampling, it is not possible to assign a confidence interval to either survey. Accordingly, it is statistically possible that either or both of the surveys is not a correct measure of its population's opinion. On the other hand, it seems very possible that both PERF and NACOP were accurate measures. The responses to other questions in the surveys revealed results that would be expected of the sample populations. The big-city chiefs (PERF), favored: educational requirements for entry-level police (77%); an "assault weapon" ban (76%); funds for drug research (85%); and collection of data on hate crimes (78%). Likewise, the NACOP survey found results that are consistent with the expected conservative orientation of national police commanders as a whole: belief that the death penalty deters crime (93.8%); opposition to drug legalization (94.4%); belief that "the courts are too soft on criminals in general" (95.6%); and belief that their department was undermanned (87.3%). In any case, it is doubtful that Handgun Control, Inc. would criticize the NACOP survey, since NACOP's survey methodology is the same as PERF's, and Handgun Control cites the PERF survey in its own informational literature. Handgun Control, Inc., "Waiting Periods Work."

<sup>29</sup>National Association of Chiefs of Police, "American Law Officers Survey for the Year 1990." The NACOP survey was sent to approximately 16,000 command officers, and 10% responded. See the previous endnote for caveats regarding the response rate.

<sup>30</sup>Handgun Control, Inc. claims that the NRA has lost police allies because it has "gone off the deep end" by opposing reasonable gun controls. Interestingly, when HCI tried its "deep end" advertisement in Police magazine, the magazine received mail "unrivaled by any subject in the last two years," most of the writers "saying they didn't like the contents of the ad one bit." Police's editor composed an editorial condemning Handgun Control, Inc., defending the NRA, and warning that "HCI is trying to erode the Second Amendment." F. McKeen Thompson, "Readers Respond to HCI . . . And We Agree," Police (The Law Officer's Magazine), vol. 11, no. 12 (December 1987), p. 4. In any case, the NRA is not the only group to lose friends over its extreme stands. On most issues, the Fraternal Order of Police is a staunch ally of Handgun Control. (The FOP leadership switched sides on the gun debate in anger over the NRA's stand on armor-piercing bullets.) But when Handgun Control helped push the New Jersey legislature to enact a bizarre and overbroad "assault weapon" ban (it even applied to BB guns), the local chapter of the Fraternal Order of Police strongly opposed the law. Apparently, the FOP did not agree with HCI that BB guns should be confiscated as assault weapons. Dewey R. Stokes, "Major Issues Face FOP," National FOP Journal, Summer 1990, p. 4 (de-

scribing FOP stand in New Jersey, and national FOP support for New Jersey's opposition.)

<sup>30</sup>Regarding the criminal procedure amendments to the Constitution, only a small percent of cases are not prosecuted or are reduced to lesser charges because of the rules against illegally seized physical evidence and coerced confessions. Peter F. Nardulli, "The Societal Cost of the Exclusionary Rule: An Empirical Assessment," 1983 American Bar Foundation Research Journal (1983): 585-610; Thomas Y. Davies, "A Hard Look at What We Know (and Still Need to Learn) about the 'Costs' of the Exclusionary Rule: The NIJ Study and Other Studies of 'Lost' Arrests," 1983 American Bar Foundation Research Journal (1983): 611-90; "Legal Safeguards Don't Hamper Crime-Fighting," National Law Journal, December 12, 1988, p. 5: Six-tenths of one percent to 2.35% of cases are dismissed because of bad searches; in a survey of prosecutors, 87% said that 5% or less of their cases were dismissed because of Miranda problems.

<sup>31</sup>See for example the remarks of Rep. Mel Levine (D-Calif.), Congressional Record, April 10, 1986, p. H1746 (allowing interstate transportation of handguns for sporting purposes will cause "mayhem . . . on our streets . . . and further handicap law enforcement efforts to control handgun crime."); remarks of Rep. Howard Wolpe (D-Mich), *ibid.*, ("[T]he police in my district are concerned that the Volkmer substitute would add considerably more peril to their job than already exists.")

<sup>32</sup>"91% of Americans Favor Brady Amendment," Subject to Debate, Nov/Dec. 1988, p. 10.

<sup>33</sup>Subject to Debate.

<sup>34</sup>Polling data from Herbert McCloskey & Alida Brill, *Dimensions of Tolerance: What Americans Believe About Civil Liberties*. (New York: Russell Sage Foundation, 1988).

<sup>35</sup>"It established some rights of the individual as unalienable and which consequently, no majority has a right to deprive them of," Albert Gallatin, Congressman and Cabinet officer of the early American Republic, quoted in Richard E. Gardiner, "To Preserve Liberty: A Look at the Right to Keep and Bear Arms," 10 Northern Kentucky Law Review 63, 79n. (1982).

<sup>36</sup>McCloskey and Brill.

<sup>37</sup>Wright, Rossi, and Daly, pp. 223-35.

<sup>38</sup>Sarah Brady, Fund-raising letter for Handgun Control, Inc., "Wednesday," (no date, 1988).

<sup>39</sup>Matthew DeZee, "Gun Control Legislation: Impact and Ideology," Law Policy Quarterly 5 (July 1983): 363-79. Although DeZee stated that he supported stricter gun laws, he did not offer any proposals.

<sup>40</sup>"Homicides, Robberies and State 'Cooling-Off' Schemes," in ed. Donald B. Kates, *Why Handgun Bans Can't Work* (Bellevue, Wash: Second Amendment Foundation, 1982), pp. 101-12.

<sup>41</sup>"An Empirical Analysis of Federal and State Firearms Control Laws," in *Firearms and Violence: Issues of Public Policy* (Cambridge, Mass.: Ballinger, 1984): 225-58 (the study also found no perceptible impact on crime or gun acquisition from the federal Gun Control Act of 1968).

<sup>42</sup>Report on the Federal Firearm Owners Protection Act, S. rep. no. 3476, 97th Con., 2d sess. (1982), pp. 51-52.

<sup>43</sup>Philip J. Cook & James Blase, "State Programs for Screening Handgun Buyers," *Annals of the American Academy of Political Science* 455 (May 1981), pp. 88-90. Although skeptical about screening systems as a panacea, Cook and Blase still favor screening since it might increase the marginal price or time needed to obtain a gun for inexperienced criminals (such as teenagers), and might keep weakly-motivated criminals from obtaining guns at all, *ibid.*, pp. 90-91. Although Cook and Blase do not offer evidence, their intuition about possible benefits is not implausible. But since waiting periods and other screening systems do not show any statistical effect, it must be that the number of criminals actually affected is fairly small. Parts IV and V below discuss how the potential benefits of a waiting period compare to the potential harms. One study I have cited in earlier works (Cato Institute and Senate Testimony, both 1988) for the inefficacy of gun control is Douglas Murray, (1975). My citation to Murray was an error. As Wright, Rossi, and Daly point out, Murray's statistical model has a design flaw which minimizes any possible relationship between gun laws and gun crime.

<sup>44</sup>Assistant Attorney General John R. Bolton, Letter to House Judiciary Chairman Peter Rodino, March 19, 1986.

<sup>45</sup>James Wright, Peter Rossi, and Kathleen Daly, *Under the Gun: Weapons, Crime and Violence in America* (Hawthorne, N.Y.: Aldine, 1983).

<sup>46</sup>James Wright and Peter Rossi, *Armed and Considered Dangerous: A Survey of Felons and Their Firearms* (New York: Aldine, 1986). Three-fifths of the prisoners studied said that a criminal would not attack a potential victim who was known to be armed. Two-fifths of them had decided not to commit a crime because they thought the victim might have a gun. Criminals in states with higher civilian gun ownership rates worried the most about armed victims.

<sup>47</sup>The Armed Criminal in America, p. 46 (reports to National Institute of Justice; later republished as *Armed and Considered Dangerous*). One of the authors, Professor James Wright nevertheless sees little disadvantage in a waiting period. He calls it "a reasonable precaution" and argues "Few legitimate purposes to which a firearm might be put are thwarted if the user has to wait a few days, or even a few weeks, between filing the application and actually acquiring the weapon." James D. Wright, *Firearms* chapter in ed. Joseph F. Sheley, *Criminology* (Wadsworth Pub., 1991), p. 442. Professor Wright's view seems to be that while the waiting period, like any screening system might yield only small benefits, it is worthwhile because it exacts virtually no costs. The counter-argument that the waiting period's small benefits are outweighed by the damage it does to public safety is discussed below. Professor Wright's assumption that a waiting period "leaves the legitimate user pretty much alone" is true in theory but not in fact; as detailed below, a waiting period can be and often is administratively abused and made into a prohibition.

<sup>48</sup>Wright & Rossi, pp. 181-87.

<sup>49</sup>*Ibid.*, p. 188, n. 3.

<sup>50</sup>There is of course some value in keeping a criminal from obtaining a second gun or a better gun, but the process would be unlikely to stop a criminal from perpetrating a given armed crime.

<sup>51</sup>Bureau of Alcohol, Tobacco and Firearms, Assistant Director of Criminal Enforcement, Memorandum to Director, July 10, 1975 (Greenville survey; of 20,017 names submitted to FBI for record checks, 68 had felony convictions; of those, 41 had not been represented by counsel at their conviction or who committed crimes in the distant past; twenty-seven buyers were prosecuted) of the 1.3% of buyers selected for prosecution, 9% had non-violent felony convictions, and 4% had violent convictions). Bureau of Alcohol, Tobacco and Firearms, Assistant Director for Criminal Enforcement, memorandum to Director, May 8, 1975 (of 374 records checked, 39 were purchasers with felony records who were not appropriate for prosecution because of age or non-violent nature of felony; six purchasers were prosecuted).

<sup>52</sup>Douglas A. Blackmon, "Gun Sale Limits Don't Cut Crime, Experts Say," *Atlanta Journal & Constitution*, May 29, 1990, p. A-9. The numbers for previous years were: for 1981, 1365; for 1982, 1008; for 1983, 1148; for 1984, 1349; for 1985, 1413; for 1986, 1515. Anita Lagunas, Supervisor, Firearms Control Unit, California Attorney General, Letter to Richard Gardiner, National Rifle Association, March 23, 1987.

<sup>53</sup>California Board of Criminal Statistics, in Blackmon.

<sup>54</sup>William Davis, "Gun Law Backfires," *Los Angeles Daily News*, Mar. 4, 1991 (letter to the editor from law enforcement officer and licensed federal firearms dealer whose application was put on hold). There are also reports that all "assault weapon" registrants have been placed in police computer lists of persons who pose a special hazard. California's practice of enforcing its laws with special severity against persons who are especially law-abiding makes the registrants seem naive, and seems to vindicate the intuitive distrust of gun registration felt by most gun-owners.

<sup>55</sup>Handgun Control, Inc., "Briefing Paper."

<sup>56</sup>"Gun Control: It Threatens the Right People," *Tallahassee Democrat*, February 1, 1985 (In six month period since waiting period went into effect, 37 of 1,425 applicants were denied; of the 37, 14 were denied for "outstanding arrest records for traffic offenses and other misdemeanors").

<sup>57</sup>Handgun Control, Inc., "The Case for a Waiting Period."

<sup>58</sup>In response to a letter from the NRA requesting information about the Columbus waiting period, the police department analyzed its records and found that in the period January 1, 1985 through July 22, 1985, thirty of the 1,419 handgun purchase applications had been refused. Due to man-hour limitations, the department was not able to provide data

for other periods. G.J. McCain, Major, Bureau of Support Services, Columbus Police Department, letter to Richard Gardiner, National Rifle Association, September 12, 1985. Of the 32 denials, seven were because of outstanding warrants, four were due to marijuana cases, three for other drug cases, thirteen were for felony convictions other than marijuana, and five were due to age.

<sup>60</sup>Pete Shields, *Guns Don't Die—People Do* (New York: Arbor House, 1981), p. 83.

<sup>61</sup>Task Force, p. 86.

<sup>62</sup>David Bordua, "Operational and Effects of Firearms Owners Identification and Waiting Period Legislation in Illinois," (University of Illinois: unpublished paper, 1985).

<sup>63</sup>Sgt. R.G. Peppersack, Sr., Maryland State Police, Commander, Firearms License Section, written testimony and oral questioning before United States Senate Committee on the Judiciary, Subcommittee on the Constitution, regarding S. 466, "Handgun Violence Prevention Act," June 16, 1987 (In 1986, there were 20,704 applications, 1,102 initial disapprovals, 370 approvals granted upon appeal, and 14 currently active cases involving an applicant who had a conviction of a crime of violence, of which 5 of 6 had been selected for prosecution for attempting an illegal purchase.)

<sup>64</sup>Peppersack, p. 2 (of 471 appellants in 1986, 370 [78%] were ultimately approved). Because so many initial denials are overturned, it is misleading for Handgun Control, Inc. to characterize the entire total of initial denials as "people who were trying to purchase handguns illegally." "The Case for a Waiting Period."

<sup>65</sup>"The Case for a Waiting Period." Also, "Flagship Bill Introduced," Washington Report (Handgun Control, Inc. newsletter), Spring 1987, p. 1.

<sup>66</sup>From 1966 (when current controls were enacted) until June 1988, there were 1,153,400 applications for either a permit to purchase a handgun or a firearms identification card. Of those applications, 28,850 (2.5%) were denied. According to reporter Eugene Kiley, of the *Bergen Record*, the state police conducted a random survey of 507 applicants in 1985. Applying the percentages from the 1985 survey to the data as a whole leads to the following breakdown for the denials: Criminal Record: 29%, 8,366 Falsifying Application: 35% 10,097; Public Health Safety & Welfare: 20% 5,770; Mental or Alcoholic: 7% 2,020; Insufficient Reason to Issue: 6%, 1,731. In other words, the total denials for actual danger (8,366 criminal record, plus 2,020 mental or alcoholic = 10,386) uncomfortably close to the number of denials for patently arbitrary reasons (5,770 public health, plus 1,731 insufficient reason = 7,501). If the denials based on falsifying application (10,097) are also considered arbitrary (since the category does not include falsifications relating to criminal, mental, or alcoholic ineligibility), the number of arbitrary denials significantly exceeds the number of arbitrary denials significantly exceeds the number of legitimate denials.

<sup>67</sup>*Ibid.*

<sup>68</sup>Statement of Robert F. Mackinnon, on behalf of the Coalition of New Jersey Sportsmen, before the House Committee on the Judiciary, on Legislation to Modify the 1968 Gun Control Act, part 2, serial no. 131, 99th Congress, 1st and 2d sess., Feb. 27, 1986 (Washington: Government Printing Office, 1987), p. 1418. For example of the New Jersey law in operation, see W. Peter Haas, Chairman, Public Safety Committee, Borough of Mountain Lakes, letter to Police Chief Joseph Spinozzi, July 29, 1968 ("It is my opinion that you as Chief of Police of our Borough deny any applications and fully process that application to the point of approval or disapproval, then disapproved and notify the applicant of your decision and their recourse through the County Court . . . Article 4 Section 2A: 151-33 (d) . . . authorizes the disapproval of any person where the issuance would not be in the public interest or welfare. It is my belief that it is not in the public interest to issue permits. . .")

<sup>69</sup>Each application takes about four hours to process. Colonel Clinton Pagano, testimony before the New Jersey Assembly Law and Public Safety Committee, hearing on A. 594, February 1988. If one assumes that each man hour costs the state of New Jersey ten dollars, the licensing system has cost New Jersey \$46,136,000. (The figure is in 1988 dollars, and based on the figure of 1,153,400 total applications

in 1966-88, cited in the previous endnote.) There have been 10,386 denials based on criminal, mental, or alcohol records (see previous endnote), and dividing that number into the total dollar cost yields the cost per denial of \$4,442.13.

<sup>70</sup>The dealer must report the sale to local police within 6 hours. The police have 48 hours to veto the sale, but in practice dealers generally wait 72 hours, to be sure to avoid liability for a sale to an ineligible person. Weekends and holidays do not count for purposes of the 48 hour computation. Police believe that the law requires all private transfers to be routed through retail dealers, so that police can perform the check, but the requirement, if it exists, is widely ignored. All information regarding Pennsylvania comes from the author's August 28, 1990 telephone conversation with Ms. Sharon H. Crawford, head of the state police firearms unit, in Harrisburg.

<sup>71</sup>A good number of "hits" are based on felony convictions from many years before, or on a conviction of aggravated assault, which some people (negligently) do not realize is a disqualifying felony.

<sup>79</sup>"Killer Fraternalized with Men in Army Fatigues," The Globe and Mail, December 9, 1989; "Killer's Letter Blames Feminists," The Globe and Mail, December 8, 1989. To be precise, Canada does not have a formal waiting period. In 1978, Canada implemented a national law which required police permission for every handgun purchase, and a one-time license (good for five years) for long gun purchases. The license application requirement served, in effect, as a waiting period for most first-time gun purchasers.

<sup>92</sup>Task Force, p. 24.

<sup>93</sup>For example, the Lakewood, Colorado, police chief defended the Pascoe 21-day comprehensive wait: "If we can save one life, it's worth it." Also, Richard Boyd, President of Fraternal Order of Police, quoted in "Two Sides Spiritedly Debate Bill on Gun-purchase Waiting Period," The Capital Times (Madison, Wisc.), June 18, 1987; Rep. Edward Feighan (House sponsor of waiting period), "Feighan Introduces Bill of Deter Criminals and Save Lives," Press Release, February 4, 1987 ("If this bill can save even one life, which I know it can, Congress should act on it now."); Fraternal Order of Police: "If the seven-day waiting period will save just one life—the life of a law enforcement officer or a citizen—then [Congress] work will be successful." quoted in Handgun Control, Inc., "Waiting Periods Work." If the criteria for legislation is whether it will save a single life, legislatures would also want to consider a ban on new private swimming pools and on cigarette lighters, as well as a reduction of the speed limit to 15 m.p.h. There is of course no Constitutional right to swim or light fires or drive at a particular speed; and pools, cigarette lighters, and cars are not usually considered useful for self-defense. Cars kill many more people than guns. Cigarette lighters cause more fatal accidents for children than do guns. (In 1984, the number of accidental deaths from all types of guns for children under the age of 5 was 34, while that same year 90 children aged 0-4 were killed by cigarette lighters. Centers for Disease Control, "Mortality and Morbidity Weekly Report," March 11, 1988, p. 145; Consumer's Research, May 1988, p. 34.)

<sup>94</sup>Bureau of Alcohol, Tobacco and Firearms estimate cited in Task Force on Felon Identification System, Report to the Attorney General on Systems for Identifying Felons Who Attempt to Purchase Firearms (Washington: Department of Justice, October 1989), p. 34 (hereinafter "Task Force"). The Task Force was chaired by Assistant Attorney General Richard B. Abel, and included the Bureau of Alcohol, Tobacco and Firearms; the Bureau of Justice Assistance; the Bureau of Justice Statistics; the Federal Bureau of Investigation; the Immigration and Naturalization Service; the National Institute of Justice; and the U.S. Marshals Service.

<sup>95</sup>The current federal proposal applies only to retail handgun sales, reducing the number of transactions the police have to check down to "only" two and a half million. Since the anti-gun lobby has already pushed several states to include long guns in the waiting period, and pushed California to include even gifts between family members in the waiting period, it is appropriate to consider cost estimates for waiting period schemes on the ultimate system that will be implemented, rather than on what is proposed as a "first step." One way to reduce the number of required checks by the police would be to exempt low-volume firearms dealers (50 or less sales per year) from the required check. Most such dealers sell only to persons they already know (such as members of their shooting club) and therefore, in effect, perform their own background check prior to sales. The New York City system takes the equivalent of almost 100 full time personnel. Research Associates Inc., A Preliminary Cost Analysis of Firearms Control Programs (Silver Spring, Maryland: R.A.I., 1968), prepared for the National Commission

on the Causes and Prevention of Violence, pp. 23, 27-28. In Washington, DC the firearms ballistic lab is so underfinanced that it is nearly two years behind in providing ballistic analysis of firearms used in crimes. Sari Horwitz, "Caseload Weighs Down D.C.'s Ballistics Lab," Washington Post, March 8, 1989. Given that Washington, D.C. spends more per capita on police than any other city in the United States, and given the utter failure of the police department to meet even minimal standards in protecting public safety, it is disheartening to see Washington, D.C.'s current police chief spending his time lobbying for a national waiting period, which would impose significant manpower and paperwork costs on other police departments.

<sup>96</sup>The Department of Justice Task Force did not specifically analyze the cost of a 7-day waiting period, since the Task Force found that such a wait would be no more effective than an instant check. The Task Force did analyze the cost of a Firearms Owner Identification card, under which a card good for three years would be issued, allowing unlimited purchases after an initial background check lasting 30 days. Since the FOID system would not require repeated checks for the same person buying several guns, the FOID system would likely cost significantly less than a waiting period. The Task Force estimated the start-up cost of FOIDs at \$148-153 million, and the annual operating costs at \$136-161 million. Task Force, p. 106. The cost estimate makes the assumption that most jurisdictions would undertake the "voluntary" background check out of fear of being sued by HCL. If the check were truly voluntary and most police departments declined to perform it, the additional costs of the law would be small. In any case, the total costs of the "Brady Bill" are nowhere near the "billions" which the NRA cited as the upper cost range in its 1988 campaign against the bill. A figure of billions would only be justified only by combining the costs for several years of operation of the bill. A national check on every gun transfer, retail and private, long gun and handgun, might well cost billions. Even though the comprehensive billion-dollar check seems to be the long-term goal of Handgun Control, Inc., there is no current national proposal to that effect. For an instant telephone check, the Virginia police had requested an \$8 per transaction fee to cover costs. If costs in other jurisdictions are about the same, a national check for retail handgun sales would cost about \$20 million (\$8 2.5 million sales). A national check on all gun transfers would be about \$60 million (\$8 7.5 million transfers).

<sup>97</sup>The cost analysis improves if one assumes that in addition to leading to the arrest of one criminal, the 10,000 background checks and cooling off periods prevented several people without criminal records from obtaining guns that they would have used in crime or a suicide attempt. See the discussion in Part III for the expected very small size of those groups.

<sup>98</sup>For example, David Seifman, "City's Latest Crime Shocker Falls to Stir Mayor's Anger," New York Post, Sept. 5, 1990, p. 4; Donatalla Lorch, "Girl is Killed by Stray Bullet in Brooklyn," New York Times, Sept. 24, 1990, p. A1 (Although the newspapers did not report that the gun involved was a "bad" gun like a "Saturday Night Special" or an "assault weapon," the Mayor stated: "Her death leaves me grief stricken and outraged . . . at the failure of our state and federal government to bring an end to the manufacture and distribution of these tools of death."); "Excerpts from Dinkins' Address: Mobilizing to Fight Crime," New York Times, Oct. 5, 1990, p. B2 (The speech concluded "we ache for the protection that only a federal law can give us—the Brady Bill." He implored New Yorkers to call U.S. House Speaker Foley to demand passage of the "Brady bill," "which could save thousands of lives in its first year, including yours.")

<sup>99</sup>N.T. "Pete" Shields, fund-raising letter for Handgun Legal Action Fund, "confidential, Wednesday morning" (1988), pp. 2-3. See *Warren v. District of Columbia*, 44 A.2d 1 (D.C. App. 1981). Unfortunately, after police departments begin complying with the paperwork rules, citizens who are victimized by crime will have no right to sue the police chiefs for putting their officers behind a desk, instead of on anti-crime patrol.

<sup>100</sup>Eileen Welsome, "Killing Spree Leads to Talk of Gun Control," Albuquerque Tribune, n.d.; Shields, fund-raising letter (1988), p. 3.

<sup>101</sup>"Background Checks Done Strictly by the Book," San Diego Union, February 21, 1990 ("We have an archive where we keep all those records, alphabetized by the gun owners' names," said Entricon. [Justice Department official]).

<sup>102</sup>The 1991 version of the national police permission bill, H.R. 7, explicitly states that it imposes no obligation on law enforcement officials. §(a)(2).

<sup>103</sup>*Puerto Rico v. Branstad*, 483 U.S. 219 (1987). Of course Congress could compel destruction of registration records if it made a finding that gun registration violates the Second Amendment. Congress has the power under section five of the Fourteenth Amendment to outlaw state violations of Constitutional rights. Logical consistency would mandate that the registration ban apply to other state and local gun registration as well.

<sup>104</sup>Registration is routinely flouted. In Illinois, for example, a 1977 study showed that compliance with handgun registration was only about 25 percent. Donald B. Kates, "Handgun Control: Prohibition Revisited," *Inquiry*, December 5, 1977, p. 20, n. 1. Compliance with retroactive registration of semiautomatics in Boston and Denver has been about 1 percent. About 10 percent of California's 300,000 "assault weapons" owners registered as required by law.

<sup>105</sup>Registration lists facilitated gun confiscation in Greece, Ireland, Jamaica, and Bermuda. B. Bruce Briggs, "The Great American Gun War," *The Public Interest*, (Fall 1976), p. 59; Kates, *Why Handgun Bans Can't Work*, p. 16. The Washington, D.C., city council considered (but did not enact) a proposal to use registration lists to confiscate all shotguns and handguns in the city. When reminded that the registration plan had been enacted with the explicit promise to gun owners that it would not be used for confiscation, the confiscation's sponsor retorted, "Well, I never promised them anything!" "Wilson's Gun Proposal," *Washington Stat-News*, February 15, 1975, p. A 12; Lawrence Francis, "Washington Report," *Guns & Ammo*, December 1976, p. 86. The Evanston, Illinois, police department also attempted to use state registration lists to enforce a gun ban. Paul Blackman, "Civil Liberties and Gun-Law Enforcement: Some Implications of Expanding the Power of the Police to Enforce a 'Liberal' Victimless Crime," Paper presented at the annual meeting of the American Society of Criminology, Cincinnati, 1984, p. 14. In 1989, the Illinois Legislature considered a proposal to confiscate semi-automatics, using the existing gun registration forms to find out where to round up the guns. When Illinois Firearms Owners Identification Cards were first issued, persons with a felony conviction were eligible to possess a firearm if the conviction was more than 5 years in the past. Later, the Illinois legislature retroactively changed the bar date to 20 years. Registered owners who had a felony conviction more than 5 years old and less than 20 had their guns confiscated. Since there are always proposals to expand the class of prohibited persons (such as barring all persons with even a single misdemeanor drug or violent offense, no matter how long ago), and always proposals to confiscate various lawfully-acquired types of weapons, many gun-owners are leery of being placed on any kind of government list—even if they are in full compliance with the (current) law. For more on registration, see note 52 and accompanying text.

<sup>106</sup>The Supreme Court has ruled that the Constitution prohibits the government from registering purchasers of newspapers and magazines, even of foreign Communist propaganda. *Lamont, DBA Basic Pamphlets v. Postmaster General*, 381 U.S. 301 (1965). The U.S. Post Office intercepted "foreign Communist propaganda" before delivery, and required addressees to sign a form before receiving the items. The Court's narrow holding was based on the principle that addressees should not have to go to the trouble of filling out a form to receive particular items of politically oriented mail. Since the Post Office had stopped maintaining lists of propaganda recipients before the case was heard, the Court did not specifically rule on the list-keeping practices. One may infer that the Post Office threw away its lists because it expected the Court would find them unconstitutional. See also *Thomas v. Collins*, 323 U.S. 516 (1944) (registration of labor organizers).

<sup>121</sup>H.R. 7, §(a)(1)(B).

<sup>122</sup>Robert E. McSherry, Jr., letter to the Editor of Orange County Register, reprinted in Gun Owner's ACTION Committee, We 'The People' (newsletter), September 1990, p. 7.

<sup>123</sup>*United States v. Panter*, 688 F.2d 268, 271 (5th Cir. 1982).

<sup>124</sup>Notably, many gun control activists do not consider self-defense legitimate. The United Methodist Church, which founded the National Coalition to Ban Handguns, and whose Washington office building also houses the NCBH, declares that people should submit to rape and robbery rather than endanger the criminal's life by shooting him. Methodist Board of Church and Society, "Handguns in the United States" (pamphlet); same statement in Rev. Brockway, "But the Bible Doesn't Mention Pistols," *Engage-Social Action Forum*, May 1977, pp. 39-40. The Presbyterian Church, another affiliate of the National Coalition to Ban Handguns, supports a complete ban on handguns because it opposes "the killing of anyone, anywhere, for any reason," including defense of others against a life-threatening attack. Rev. Young, Director of Criminal Justice Program for Presbyterian Church, testifying in 1985-6 Hearings on Legislation to Modify the 1968 Gun Control Act, House Judiciary Committee, Subcommittee on Crime, vol. I, p. 128. The Washington Post condemns "the need that some homeowners and shopkeepers believe they have for weapons to defend themselves" as representing "the worst instincts in the human character." Editorial, "Guns and the Civilizing Process," *Washington Post*, September 26, 1972.

<sup>125</sup>See, for example, *Bowers v. DeVito* 686 F.2d 616 (7th Cir. 1982) (no federal Constitutional requirement that police provide protection); *Calogrides v. Mobile*, 475 So. 2d 560 (Ala. 1985); *Cal. Govt. Code §8845* (no liability for failure to provide police protection) and *846* (no liability for failure to arrest or to retain arrested person in custody); *Davidson v. Westminster*, 32 Cal 3d 197, 185 Cal. Rep. 252; 649 P.2d 894 (1982); *Stone v. State* 106 Cal. App. 3d 924, 165 Cal. Rep. 339 (1980); *Morgan v. District of Columbia*, 468 A.2d 1306 (D.C. App. 1983); *Warrent v. District of Columbia*, 444 A.2d 1 (D.C. App. 1981); *Sapp v. Tallahassee*, 348 S.2d 363 (Fla. App. 1st Dist.), cert. denied 354 So.2d 985 (Fla. 1977); *Ill. Rev. Stat.* 4-102; *Keane v. Chicago*, 96 Ill. App. 2d 460, 240 N.E. 2d 321 (1st Dist. 1968); *Jamison v. Chicago*, 48 Ill. App. 3d 567 (1st Dist. 1977); *Simpson's Food Fair v. Evansville*, 272 N.E.2d 871 (Ind. App.); *Silver v. Minneapolis* 170 N.W.2d 206 (Minn. 1969); *Wuetrich v. Delia*, 155 N.J. Super. 324, 326, 382, A.2d 929, 930, cert. denied 77 N.J. 486, 391 A.2d 500 (1978); *Chapman v. Philadelphia*, 290 Pa. Super. 281, 434 A.2d 753 (Penn. 1981); *Morris v. Musser*, 84 Pa. Cmwh. 170, 478 A.2d 937 (1984). The law in New York remains as decided by the Court of Appeals the 1959 case *Riss v. New York*: the government is not liable even for a grossly negligent failure to protect a crime victim. In the *Riss* case, a young woman telephoned the police and begged for help because her ex-boyfriend had repeatedly threatened "If I can't have you, no one else will have you, and when I get through with you, no one else will want you." The day after she had pleaded for police protection, the ex-boyfriend threw lye in her face, blinding her in one eye severely damaging the other, and permanently scarring her features. "What makes the City's position particularly difficult to understand," wrote a dissenting opinion, "is that, in conformity to the dictates of the law, Linda did not carry any weapons for self-defense. Thus, by a rather bitter irony she was required to rely for protection on the City of New York which now denies all responsibility to her." *Riss v. New York*, 22 N.Y.2d 579, 293 N.Y.2d 897, 240 N.E.2d 806 (1958). Ruth Brunell called the police on 20 different occasions to beg for protection from her husband. He was arrested only one time. One evening Mr. Brunell telephoned his wife and told he was coming over to kill her. When she called the police, they refused her request that they come to protect her. They told her to call back when he got there. Mr. Brunell stabbed his wife to death before she could call the police to them that he was there. The court held that the San Jose police were not liable for ignoring Mrs. Brunell's pleas for help. *Hartler v. City of San Jose*, 46 Cal. App. 3d 6 (1st Dist. 1975). The year after winning the Hartzler case, the San Jose government appointed Joseph McNamara Police Chief. Chief McNamara has since become the leading police spokesman for HCL.

<sup>126</sup>The 1/2 figure comes from the author's conversation with Ms. Sherman, head of the Pennsylvania state police firearms unit, cited above. Part of the 1/2 drop-off may be caused by people who are disqual-

fled by the local police background check, but (based on data from other states) ineligible buyers only account for, at most, a few percent of buyers. The rest of the 1/2 drop-off, therefore, is best explained by buyers changing their mind, as would buyers of virtually every product, if forced to make two trips for a single purchase.

<sup>127</sup>Research Associate, Inc., p. 34 (A firearms control program that substantially reduced gun sales would result in a tax revenue loss, in 1968 dollars, of over one hundred million dollars.)

<sup>134</sup>See the National Association of Chiefs of Police surveys discussed in Part IIA above. See also the testimony of David Hall, undersheriff of Lake County, Florida: Q. Can't you do one in seven days? Would you be able to do it? Hall: It would be a very cursory check. Q. Would you be satisfied with that kind of check . . . ? Hall: No, sir, I personally wouldn't feel comfortable with it. State of Florida, Commission on Assault Weapons, Report (May 18, 1990), transcript on February 5, 1990, p. 9.

<sup>135</sup>64 Fed. Reg. 43545.

<sup>136</sup>The figure is based on the BATF estimate of 7.5 million firearms transactions per year, and the Task Force estimate of an initial "hit" rate of 12 to 16% of applicants.

<sup>137</sup>Task Force, p. 15.

<sup>138</sup>Rep. Dan Lungren, CONGRESSIONAL RECORD, Sept. 15, 1988.

<sup>139</sup>As Josh Sugarman, former communications director for the Coalition Against Gun Violence, wrote in *The Washington Monthly*: "handgun controls do little to stop criminals from obtaining handguns." Josh Sugarman, "The NRA Is Right: But We Still Need to Ban Handguns," *Washington Monthly*. Sugarman authored the November 1988 strategy memo suggesting that the press and the public had lost interest in handgun control. He counseled the anti-gun lobby to switch to the "assault weapon" issue, which the lobby did with spectacular success in 1989.

<sup>140</sup>National Coalition to Ban Handguns, "Twenty Questions and Answers" (no date), question 8 ("Banning 'Saturday Night Specials' would be a useful first step towards an ultimate solution.")

<sup>141</sup>The author was a member of the panel that questioned the two debaters.

<sup>142</sup>Founding Chair Pete Shields explained his strategy for prohibition: "The first problem is to slow down the number of handguns being produced and sold in this country. The second problem is to get handguns registered. The final problem is to make possession of all handguns and all handgun ammunition—except for the military, police, licensed security guards, licensed sporting clubs, and licensed gun collectors—totally illegal." Richard Harris, "A Reporter at Large: Handguns," *New Yorker*, July 26, 1976, p. 58.

<sup>143</sup>Handgun Control, Inc. has supported bills like the Russo bill in New Jersey to outlaw all handgun sales or transfers, and require that handguns be handed over to the police upon the death of their owner. HCI endorses the laws in Chicago and Washington, D.C. which prohibit the lawful acquisition of handguns. Handgun Control, Inc., "Fact Card," District of Columbia Code §§6-2132(4) and 6-2372.

<sup>144</sup>Rep. Traficant, CONGRESSIONAL RECORD, Sept. 15, 1988, p. H7644.

<sup>145</sup>See note 142.

<sup>146</sup>H.R. 7, §§(a)(1)(A)(i)(I) (a sale may proceed only if "the transferor has received written verification that the chief law enforcement officer has received the statement"); (a)(2) ("Paragraph (1) shall not be interpreted to require any action by a chief law enforcement which is not otherwise required."); (b) ("The term 'handgun' means—(A) a firearm which has a short stock and is designed to be held and fired by the use of a single hand"). The HCI handgun defi-

nition could be read to apply to rifles or shotguns that have folding stocks and extended pistol grips.

<sup>147</sup>See note 142. "And most importantly, you've helped us hurt the NRA and its friends in the handgun industry in the wallet, where it counts—and a 10-year low in new handgun sales proves it!" Sarah Brady, Fund-raising letter for Handgun Control, Inc., "Monday" (1988), p. 2.

<sup>148</sup>Representative Hughes of New Jersey, a prime sponsor of the waiting period, calls himself a sportsman, and claims to protect "the privilege of owning weapons in this country." Congressional Record, Sept. 15, 1988, p. H7654. Of course what makes this country different from other countries is that gun ownership is an explicit right, not a privilege.

<sup>149</sup>Speaking before a New York University Law School audience, Justice Black said: "Although the Supreme Court has held the Amendment to include only arms necessary to a well-regulated militia, as so construed, its prohibition is absolute." Hugo L. Black, "The Bill of Rights," 35 *New York University Law Review* 865, 873 (1960). In *United States v. Miller*, the Court held that only arms useful to a well-regulated militia were protected by the Second Amendment. Seeing no military utility to a sawed-off shotgun, the Court upheld a strict federal licensing system. As for the meaning of "a well-regulated militia," the Court noted that to the authors of the Second Amendment, "The Militia comprised all males physically capable of acting in concert for the common defense. . . . Ordinarily when called for service these men were expected to appear bearing arms supplied by themselves and of the kind in common use at the time." 307 U.S. 174, 179 (1939).

<sup>150</sup>Amendment I: "Congress shall make no law respecting and establishment of religion, or prohibiting the free exercise thereof; or abridging the freedom of speech, or of the press; or the right of the people peaceably to assemble, and to petition the government for a redress of grievances. Amendment II: "A well regulated Militia, being necessary to the security of a free State, the right of the people to keep and bear Arms, shall not be infringed." Amendment III: "No Soldier shall, in time of peace be quartered in any house, without the consent of the Owner, nor in time of war, but in a manner to be prescribed by law." The Third Amendment, having hardly ever been breached, has developed little case law.

<sup>151</sup>In *United States v. Verdugo-Urquidez*, the Court ruled that the Fourth Amendment "right of the people to be secure in their persons, houses, papers, and effects" applied to the same group protected by the Second Amendment "right of the people to keep and bear arms" and the First Amendment "right of the people peaceably to assemble." In every case, said the Court, the "right of the people" refers to individual citizens of the United States. 110 S.Ct. 1056, 108 L.Ed. 2d 222 (1990). In *Konigsberg v. State Bar of California*, the Court rejected Justice Black's absolutist approach to Constitutional interpretation. The Court noted that the First Amendment on its face was absolute, and the Second Amendment contained an "equally unqualified command." Nevertheless, both Amendments were subject to reasonable limitations. 363 U.S. 36, 51 n. 24 (1961).

<sup>152</sup>"Each establishes a norm of conduct which the Federal Government is bound to honor—to no greater or less extent than any other inscribed in the Constitution. Moreover, we know of no principled basis on which to create a hierarchy of Constitutional values. . . . Valley Forge Christian College v. Americans United For Separation of Church and State, Inc., 454 U.S. 464, 484 (1982). See also *Ullman v. United States*, 350 U.S. 422, 426-29 (1956): "As no constitutional guarantee enjoys preference, so none should suffer subordination or deletion. . . . To view a particular provision of the Bill of Rights with disfavor inevitably results in a constricted application of it. This is to disrespect the Constitution."

<sup>153</sup>*Byars v. United States*, 273 U.S. 28, 32 (1927); *Fairbank v. United States*, 181 U.S. 283 (1901).

<sup>154</sup>*New York Times v. United States* 403 U.S. 713, 714 (1971); *Organization for a Better Austin v. Keefe*, 402 U.S. 415, 419 (1971); *Bantam Books v. Sullivan*, 372 U.S. 58, 79 (1963); *Near v. Minnesota*, 283 U.S. 697, 716 (1931) ("Liberty of the press has meant principally, although not exclusively immunity from prior restraint or censorship.")

<sup>155</sup>Rep. Bosco derides the quaint notion that "gun purchasers in America should be considered innocent until they prove themselves guilty." Congressional Record, Sept. 15, 1988, p. H7651.

<sup>156</sup>The right to bear arms obviously includes the right to purchase them, just as the right to free speech includes the right to purchase printed matter.

<sup>157</sup>Shelton v. Tucker, 364 U.S. 479, 488 (1960). See also *Schneider v. State*, 308 U.S. 147, 161, 165 (1939); *American Communications Association v. Douds* 339 U.S. 382 (1950); *Louisiana ex rel. Gremillion v. NAACP*, 366 U.S. 293 (1961); *NAACP v. Alabama*, 377 U.S. 288, 307-8 (1963); *Talley v. California*, 362 U.S. 60 (1960); *Dean Milk v. Madison*, 340 U.S. 349 (1951).

<sup>158</sup>"[T]he legitimate governmental purpose in regulating the right to bear arms cannot be pursued by means that broadly stifle the exercise of this right where the governmental purpose can be more narrowly achieved." *State ex rel. Princeton v. Buckner*, 377 S.E.2d 139, 144 (W.Va. 1988). See also *City of Lakewood v. Pillow*, 180 Colo. 20, 501 P.2d 744, 745 (Colo. 1972) (voiding ban on gun sales within city limits and a requirement that persons carrying firearms be licensed: "Even though the governmental purpose may be legitimate and substantial, that purpose cannot be pursued by means that broadly stifle fundamental personal liberties when the end can be more narrowly achieved.")

<sup>159</sup>Some states with a license system are Indiana (license for handguns valid for 4 years); Iowa (handguns, 1 year); Massachusetts (all guns, lifetime); Minnesota (handguns, 1 year).

<sup>160</sup>Pennsylvania runs a state records check after the person picks up the handgun following a 48 hour wait. Task Force, pp. 82-83.

<sup>161</sup>Task Force, p. 83.

<sup>162</sup>Rep. Kennedy, Congressional Record, Sept. 15, 1988, p. H7650.

<sup>163</sup>The states with waiting periods for each handgun purchase are listed below. In some cases, the time period is not a minimum waiting period, but the maximum time the police are allowed to process an application for a permit to purchase a handgun [the time limits are not always observed, see Parts IV and V above]: Alabama (2 days); California (all guns, 15 days); Connecticut (all guns, 14 days); Hawaii (handguns, 15 days); Maryland (handguns and "assault weapons," 7 days); Michigan (handguns); Missouri (handguns, must issue within 7 days); New Jersey (all guns, 30 days); New York (handguns, 180 days); North Carolina (handguns, 30 days); Oregon (handguns, 15 days); Pennsylvania (handguns, 2 days); Rhode Island (all guns, 7 days); South Dakota (handguns, 2 days); Tennessee (handguns, 15 days); Washington (handguns, 5 days); Wisconsin (handguns, 2 days). Identifying Persons, Other Than Felons, p. 114, exhibit B.4 (and updated to account for 1990 changes in state laws).

<sup>164</sup>California and Rhode Island in 1990. Maryland extended its wait to "assault weapons" in 1989.

<sup>165</sup>At close range, the shotgun is the most formidable and destructive of all arms. . . . Unlike bullets, shotgun pellets rarely exit the body. Therefore, the kinetic energy of wounding in shotguns is usually equal to the striking energy. . . . all the kinetic energy is transferred to the body as wounding effects." Vincent J.M. DiMaio, *Gunshot Wounds: Practical Aspects of Firearms, Ballistics, and Forensic Techniques* (New York: Elsevier, 1985), pp. 182-83. "Shotgun injuries have not been compared with other bullet wounds of the abdomen as they are a thing apart. . . . [A]t close range, they are as deadly as a cannon." R. Taylor, "Gunshot Wounds of the Abdomen," *Annals of Surgery* 177 (1973): 174-75.

<sup>166</sup>The lead sponsors are Rep. Feighan in the House and Sen. Metzenbaum in the Senate.

<sup>167</sup>Forty-one states have some form of preemption. Of the 41, 36 are statute, and 5 by judicial decree. Some of the preemption states (such as Massachusetts) allow local gun controls if the state legislature approves them; some other preemption states (like Virginia) have grandfathered in restrictive local ordinances.

<sup>168</sup>Rep. Hoyer (Maryland), Congressional Record, Sept. 15, 1988, p. H7640.

<sup>169</sup>*Kentucky v. Dennison*, 65 U.S. (24 How.) 66, 107-8 (1860) (state official's refusal to deliver escaped slave under federal Fugitive Slave Act).

<sup>170</sup>The Tenth Amendment reserves state authority regarding powers not delegated the federal government: "The powers not delegated to the United States by a Constitution, nor prohibited by it to the States, are reserved to the States respectively, or to the people."

<sup>171</sup>Members of the Police Executive Research Forum (a think-tank for major urban police chiefs) supported an instant check over a firearms licensed care by a margin of 49% to 46%. Task Force, p. 113; Police Executive Research Forum, Comments on Justice Department's "Draft Report on Systems for Identifying Felons Who Attempt to Purchase Firearms," July 26, 1989, p. 2.

<sup>172</sup>The Attorney General of the United States insists that any verification system for firearms pur-

chasers be at the point of sale, without further delays; he reasons that any check that would be significantly more accurate would take a month, and "Such a delay would impose an unreasonable burden on legitimate gun purchasers." Richard Thornburgh, Attorney General, Letter to Dan Quayle, November 20, 1989, p. 2; Identifying Persons, Other Than Felons, p. 91.

<sup>173</sup>In Florida, where an instant check began a few weeks before the publication date of this monograph, a man was denied the right to purchase because the police computer located a 10-year-old outstanding bench warrant. The warrant turned out to be for a lawsuit involving a bad check; the man had never even been told that a lawsuit had been filed against him.

<sup>174</sup>"U.S.'s Barriers to Employment Are Not Stopping the Influx," New York Times, October 9, 1989, p. 13 (quoting I.N.S. assistant district director for investigation for Los Angeles. Several illegal workers said that a good set of papers cost \$300.)

<sup>183</sup>William S. Sessions, FBI Director, "The FBI and the Challenges of the 21st Century," FBI Law Enforcement Bulletin, January 1989, p. 3 (near-term feasibility of instant fingerprint readers in police cars).

<sup>184</sup>People without driver's licenses or other official identification might face delays if such a card were mandatory for a purchase. Currently firearms dealers may sell to someone whose identity they have verified, and verification may include personal knowledge. Currently, a small dealer can sell to a friend even if the friend does not present official identification, since the dealer knows the purchaser's bona fides based on personal knowledge.

<sup>185</sup>National Rifle Association, "Comments of the National Rifle Association of America, Inc. on Draft Report for Identifying Felons Who Attempt to Purchase Firearms," (July 26 1989), p. 30.

<sup>186</sup>In *Schneider v. State*, 308 U.S. 147, 164 (1939), the Court voided a New Jersey law requiring pamphleteers to undergo a "burdensome and inquisitorial examination, including photographing and fingerprinting." New Jersey, noted for its disdain of Second Amendment rights, apparently needs to be repeatedly reminded to obey the First Amendment as well. Despite the plain language of *Schneider*, a New Jersey township enacted a law requiring political canvassers to be fingerprinted. A federal appeals court found the fingerprinting, "stigmatizing, and an inappropriate burden on their right to do political work." *New Jersey Citizen Action v. Edison Township*, 797 F.2d 1250, 1262-65 (3d Cir. 1986), cert. denied, 479 U.S. 1103 (1987).

<sup>187</sup>As the Task Force explained, "the biometric card does not solve the problem of individuals using fraudulent 'breeder' documents, such as birth certificates, to obtain the biometric ID card."

<sup>188</sup>Wright & Rossi, p. 191. The "McClure-Volkmer" firearms law reform in 1986 enhanced penalties for gun transfers to felons. 18 United States Code §922(d).

<sup>189</sup>Virginia Code §18.2-108.1 (1988).

<sup>190</sup>The measure would be Constitutional according to the principles of *Paul v. Davis*, 424 U.S. 693 (1976) (distribution of names and photos of "active shoplifters" to retail stores).

<sup>191</sup>18 United States Code §3013.

<sup>192</sup>*United States v. Cruikshank*, 343 U.S. 542, 551-53 (1976). The Court stated that the rights to peaceably assemble and to keep and bear arms were not created by the Constitution, but merely recognized in the document. Those rights, the Court said, were not dependent on the constitution for their existence, but were found "wherever civilization exists."

Mr. SMITH. Ironically, the Washington interest groups pushing these dubious gun control solutions are in some cases the same people who a decade ago were blaming society for the incidents of crime in our country. Congressional liberals who throughout the decade of the seventies were proposing the legalization of marijuana use, and reduction

of penalties for violent crime, are now running for political cover.

Unfortunately, their targets are not violent felons but rather the peaceful, law-abiding citizens, gun owners of the United States of America.

The American people are way ahead of Congress on this issue as they usually are. They realize violent crime is a serious problem and an avoidable one. They realize it is criminals, not society, and not gun owners, who are responsible for crime.

Furthermore, they realize the only way to reduce crime in our Nation's streets is to take the criminals off those streets. And unless Congress begins to take a leadership role in this area, unless Congress begins to punish the criminal rather than the American people, I am convinced the people will find leaders who will.

That is really is the crux of the issue, and that is the crux of the Republican crime bill, which was not mentioned on the floor today by the opposition. It is not a matter of just a crime bill. It is a difference in opinion as to where the focus should be.

If the Democrats want a crime bill, I will give them an opportunity to consider an anticrime bill, the Republican bill. It will not make it easier for criminals to get out of jail with a habeas corpus petition, or make it easier for criminals to exclude incriminating evidence. It will not do that. That is the major difference between the two parties on this issue, Mr. President.

Mr. President, I yield the remainder of my time.

Mr. METZENBAUM. Mr. President, I yield 3 minutes to the distinguished Senator from North Dakota.

The PRESIDING OFFICER. The Senator from North Dakota is recognized.

Mrs. BURDICK. Mr. President, as the newest Member of this group, and acting on a temporary basis, I would like to speak to this issue.

I did not think that gun control was a political issue, either Republican or Democratic. I feel that the waiting period for guns, handguns, the Brady bill, would give us a little bit more assurance that those who are not in control of their faculties might be checked before they went ahead and purchased. I realize we are not talking about the hardened criminal, but many people get involved with guns who could be prevented from doing it, and lives could be saved.

Since there is such a demand in this country that the Brady bill be passed, and as a housewife, the mother of six children and seven grandchildren, I would like to see the Brady bill passed.

Thank you.

Mr. METZENBAUM. Mr. President, I yield 2 minutes to the Senator from Minnesota.

Mr. WELLSTONE. Mr. President, I know there are others who wish to speak. I just want to respond briefly to

the Senator from New Hampshire, I wanted to say to the Senator from New Hampshire that I think he knows and I think all of us know that you learn in social science work that the correlation does not make causation. We are really talking about two difference factors. I do not think the Senator from New Hampshire was trying to suggest with his statistics that passage of the Brady bill would really cause more violent crime. If so, I think that very claim really makes his argument fairly preposterous.

Rather than going back and forth on the floor of the Senate, except to remind my colleagues gently, that this correlation does not mean causation and there are surely other factors that affect incidents of violent crime in the various States that he talked about.

Mr. President, I have a letter that I ask unanimous consent be printed in the RECORD, from a variety of different law enforcement officials.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

LAW ENFORCEMENT SAYS VOTE "YES" ON THE BRADY BILL

OCTOBER 1, 1992.

Hon. PAUL WELLSTONE,  
U.S. Senate, Hart Senate Office Building,  
Washington, DC.

DEAR SENATOR WELLSTONE: Within the next few days you will have the opportunity to pass a bill which has been at the top of law enforcement's legislative agenda for almost five years. Of course, we are referring to the Brady Bill, S.3282, which Senate Majority Leader George Mitchell re-introduced on September 28.

The organization signing this letter represent more than 375,000 chiefs, sheriffs, troopers and rank and file police officers. Since the Brady Bill was first introduced in Congress in 1987, more than 100,000 Americans have lost their lives as a result of handgun violence. In the same period, more than 200 police officers have been shot and killed with handguns. According to their 1991 FBI Uniform Crime Reports, there were a record number of homicides last year.

Law enforcement recognizes that the Brady Bill will not eliminate violent crime, but it will provide us with an important tool to reduce gun violence in America. We have presented all of our arguments in past hearings, personal visits, meetings, letters and telephone contacts. We urgently request your support for the common sense public safety measure. We ask you to stand with law enforcement and vote to enact the Brady Bill, S. 3282.

Sincerely,

Rick Darling, Chairman, National Troopers Coalition, Neil Behan, Legislative Liaison, Major Cities Chiefs, Hubert Williams, President Police Foundations, Dewey Stokes, President, Fraternal Order of Police, Ira Harris, Executive Director, National Organization of Black Law Enforcement Executives, Bob Scully, President, National Association of Police Organizations, Charles B. Meeks Executive Director, National Sheriffs Association, Victor Oboyski, President, Federal Law Enforcement Officers Association, Chris Sullivan, Legislative Director, Inter-

national Brotherhood, of Police Officers, Darrel Stephens, Executive Director, Police Executive Research Forum.

Mr. WELLSTONE. My only point is it seems to me that all of these law enforcement organizations representing men and women in law enforcement all across the country do not believe that the Brady bill is the end all or be all. No one is making that claim. No one is saying that passage of this bill would end violent crime. But what all of these men and women are saying, who are down in the trenches, in our cities, in our towns, and in our rural communities, is the Brady bill would be an important step forward.

I think, Mr. President, that they know more about what we need to do to make our cities and our neighborhoods and our communities safe than just about anybody else that would enter into this debate.

Mr. CRAIG. Mr. President, I yield myself such time as I may use. Let me respond very briefly and directly to the Senator who just spoke.

Mr. President, to the great myth of the law enforcement community and where they stand on this issue—because I know that all of us want to stand solidly behind the law enforcement community in its enforcement of laws and in its apprehension of the criminal element of this country, in an effort to make our communities safer places to live—historically police forces in this country have always been in favor of gun control.

We recognize that, and admittedly it would make their lives a great deal easier and probably their jobs a safer place to be involved.

But our Founding Fathers also knew that the citizen had rights that had to be protected. So let me suggest that not all in the law enforcement community are represented by the arguments you just heard.

In 1992, this year, U.S. police chiefs and sheriffs by the National Association of Chiefs of Police were polled. Some 15,000 of them were sent a questionnaire.

When they were asked, Do you believe that a waiting period of purchase a handgun or any other firearm may have an effect on criminals getting firearms, 79.5 percent said no.

Do you believe that in the national 7-day waiting period proposed by the Congress—Brady bill—that you can fully determine that an applicant has no criminal record, is not mentally unsound, or is an abuser of drugs or alcohol, 86.4 percent said no.

So we can use a lot of facts and we can use a lot of figures. I submit to the RECORD these figures because they are important and necessarily valid as we argue this critical issue.

I ask unanimous consent they be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

#### REPORT OF THE FIFTH ANNUAL NATIONAL POLL OF LAW ENFORCEMENT AGENCY HEADS (1992)

While concerns about illegal drugs and firearms grow among the heads of U.S. law enforcement agencies, these same "top cops;" fear that the current state of the economy will result in decreased funding for law enforcement in their areas. These are among the findings of the fifth annual poll of all U.S. police chiefs and sheriffs by the National Association of Chiefs of Police. The following questions were sent to 15,800 command officers throughout the United States, and some 7 percent responded; a summary of their answers is noted below.

When our non-profit educational organization is asked its view by media or members of Congress, we base our response upon the results of this survey, thereby properly reflecting the opinions of the U.S. law enforcement community as a whole. The National Association of Chiefs of Police remains the only such group to conduct such a survey. For further information, write to the National Association of Chiefs of Police at 3801 Biscayne Blvd., Miami, FL 33137, or phone (305) 573-0202.

#### DEATH PENALTY

1. Do you feel that the death penalty serves as a deterrent to certain types of crimes? 94% said Yes.

2. Would you agree that once the death penalty has been imposed that a time limited of three years be set on carrying out all appeals? 96% said Yes.

3. Would you agree that where the state legislature has voted to invoke the death penalty that the Governor of that state should not veto that law and thus impose his/her own personal views on the majority of elected representatives. 93.6% said Yes.

4. Law enforcement officers are empowered to use deadly force to protect themselves or citizens when their lives are in danger and therefore are, by state law, carrying out lawful executions. Would you agree that if a law enforcement officer is asked not only to risk his life but to, in a moment of crisis, take a life, that the very least every state should do is provide the death penalty for persons who may kill a law enforcement officer or citizen during a felonious act? 97.5% said Yes.

#### DRUGS & NARCOTICS

5. Would you favor the legalization of any drugs presently prohibited by law for personal or recreational use? 94.6% said No.

6. Would you favor for all persons convicted of illegal drug dealing forfeit all personal property and assets and to serve prison terms of life, so as to make the risk of conducting illegal drug enterprises more severe in consequence? 81.9% said Yes.

7. Would you state that it is your current experience that the majority of all violent crimes how being committed in your area are tied into drug abuse/including alcohol, drug use, or drug dealing? 89.9% said Yes.

8. Do you feel that the "Drug Czar" or the federal agency set in place almost three years ago has made any significant reduction in your community to drug abuse and use? 84.8% said No.

9. Would you say that your own police agency, by its work in enforcement, has been a major reason for any drug reduction education and reduced use? 74.5% said Yes.

#### FIREARMS

10. Do you favor the training and issuance of semi-automatic firearms (sidearms) that carry 16-17 rounds over the present police revolver? 88.2% said Yes.

11. Do you believe that banning of firearms (handguns, shotguns or rifles) will reduce the

ability of criminals from obtaining such weapons? 92.8% said No.

12. Do you believe that a waiting period to purchase a handgun or any type of firearm will have any effect on criminals getting firearms? 79.5% said No.

13. Do you believe that in the national 7 day waiting period proposed before the Congress (Brady Bill) that you can fully determine that the applicant has no criminal record; is not mentally unsound; or is an abuser of drugs or alcohol? 86.4% said No.

14. Many Gun-Rights organizations suggest that we need to build jails, prosecute cases under present gun laws, and target criminals instead of the law abiding gun owners. Would you agree with that statement? 89% said Yes.

15. Historically, the militia is "all men between the ages of 16 to 45". Under the present armed forces defense of the United States the National Guard now must be able to mobilize in three days to back up our regular armed forces world-wide. Therefore, the only defense would be the "state militia" in time of war. Would you agree that for the sake of the defense of the United States that citizens should be allowed to have their own rifles, shotguns and handguns for emergencies natural or man made? 85.4% said Yes.

16. Would you agree that all bonafide law enforcement officers should be permitted to carry weapons on or off duty from state to state? 92.9% said Yes.

17. Would you agree that any person convicted of alcohol abuse or narcotics abuse more than three times should be placed in a national computer to reject their application for the purchase of a firearm of any kind? 94.8% said Yes.

18. Do you believe that law abiding citizens should have the right to purchase any type of firearm for sport or self-defense under state laws that now exist? 66.7% said Yes.

19. A "military type" of long gun (rifle, shotgun, etc.) is now being described as one able to hold more than five rounds or more of ammunition. It must be fired by pulling the trigger each time. The legal description would cover many semi-automatic weapons. Do you believe that banning such types of weapons would reduce criminals from obtaining them? 89.6% said No.

20. Would you agree that most criminals obtain their weapons from illegal sources? 91.4% said Yes.

21. Do you believe that the banning of private ownership of firearms will result in fewer crimes from firearms? 90.3% said No.

22. Do you feel that because of limited police man-power that citizens should retain the right to own firearms for self-defense at home or business? 90.2% said Yes.

23. With the increasing rate of violence would you agree that citizens should take training in self-defense with firearms to protect their homes and property based on a 40% increase in crime in the last 10 years and almost no increase in police manpower? 85.9% said Yes.

#### CRIME AND CRIMINAL JUSTICE

24. Do you feel that the system of criminal justice has broken down to the point where it is the inability to deal with criminals caught by the police (prosecution and imprisonment) that is the major cause of crime in America? 85.3% said Yes.

25. Do you agree that we must enlarge our prison capacity so that we can keep career criminals in prison and off the streets longer? 95.1% said Yes.

26. Do you think the courts are too soft on criminals in general? 94.7% said Yes.

27. Do you believe your police department is undermanned? 87.3% said Yes.

GOVERNMENTAL ETHICS

28. The top executives (elected) of the International Association of Chiefs of Police were invited with wives, to an all paid trip to Japan last year to "dedicate a religious temple". In addition to the trip (that is estimated to cost about \$10,000 per person) the officers were given cash gifts of \$3,000 to \$12,000. All monies were eventually returned. Do you think that free trips like this; not related to police work or the offer of sums of cash is ethical to accept? The sponsor is connected to a major Japanese Mfg. Corp. 93.4% said not ethical.

29. Based on the state of the United States economy in your area, do you feel that 1992 will show an increase in police funding to fight crime or a decrease? 82.4% said Decrease.

30. The new National Law Enforcement Memorial in Washington, D.C. has been completed. Reports indicate that the 3 foot, 6 inch wall and park with the names of slain officers, cost about ten million dollars, on free government land. The Fund raised over 39 million dollars. It is requesting additional donations so that new names may be added. By comparison the American Police Hall of Fame and Museum, now in its 32nd year, has a wall of imported marble 360 feet long; 10 feet high, plus a museum, and chapel and land for parking 100 cars; with a staff on duty at a cost of \$3 million. Do you feel that some explanation is due by the directors as to the vast variances in the budgets? 94.2% said Yes.

31. The idea of the police memorial in Washington, D.C., was introduced in 1984 by former Congressman, Mario Biaggi. Later he was convicted of theft and perjury as well as obstruction of justice. His name appears on the memorial plaque in Washington, D.C. as sponsor of the Bill. Do you think this was proper to list in the memorial park along with the 12,000 names of officers who died in the line of duty? 80.5% said No.

Mr. CRAIG. We heard Senator THURMOND speak last week when we were debating the whole of the crime bill. When the argument was used this morning that all attorneys general support it, well, at that time he entered into the RECORD information that showed that 30 States' attorneys general oppose the crime bill. And they oppose the crime bill with this provision in it. Because I think what they see is a total package and not the piecemealing of a package that does not represent the will of the Congress, and, I think, very truly distorts the concern of the American citizens. Our newest Senator spoke to crimes of passion, and she is absolutely right. In the right incidence, under the right situation, it might occur that a waiting period would stop or hinder a crime of passion.

But she, too, agrees that the common criminal on the street that acquires his or her weapon illegally will never be touched by this law, and, if we are really concerned about crime on the streets and safety in our communities, then we would do a comprehensive crime bill and not the piecemeal approach that is before us this morning.

I retain the remainder of my time.

Mr. BIDEN. Mr. President, I have been authorized on behalf of the Senator from Ohio to yield myself 5 minutes of the time controlled by the Senator from Ohio.

The PRESIDING OFFICER. The Senator is recognized for 5 minutes.

Mr. BIDEN. Mr. President, I was working on another matter when I heard my friend from New Hampshire on the television. He always attracts my interest and attention whenever he speaks. I decided I should come over and respond.

A portion of what I heard—and I apologize if I misrepresent in any way the totality of what my friend from New Hampshire has said. The only thing I heard on the television was him saying that the answer really is that if we just had tougher and stiffer penalties for the use of a gun in the commission of a crime, that that is the way to go. And then he went on to suggest, as I understood it, if we had accepted in the crime bill those provisions that—although I did not hear him mention his name—my friend from Texas, Senator GRAMM, had put forward, this is the way to go.

Mr. President, during debate on the Brady bill amendment, several points were raised about the nature and extent of Federal penalties for firearm crimes. In the interest of clarifying this information, I would like to provide, for the record, the current Federal firearm penalties, as well as detail new penalties proposed in recent crime legislation.

The current Federal law harshly punishes criminals who carry or use guns to commit crimes. For example, for the first offense, current Federal law provides for a 5-year minimum mandatory penalty to be added to the prison sentence of those convicted of carrying a firearm during a Federal violent or drug trafficking crime. Current law adds a 10-year minimum mandatory sentence if the firearm is a short-barreled shotgun. And, current law adds a 30-year minimum mandatory sentence if the firearm is a machinegun, or equipped with a silencer.

For subsequent convictions, Federal law adds even tougher penalties. For example, those convicted of subsequent offenses are subject to a 20-year minimum mandatory prison sentence. And, if the convicted criminal used a machinegun or a gun equipped with a silencer, current Federal law provides for life imprisonment.

Let me also be clear, each of these mandatory penalties are served after the convicted criminal serves his time behind bars for the underlying offense.

In addition to these tough penalties, the conference crime bill recently blocked by a Senate filibuster included a provision that would have doubled the penalty—to a 10-year minimum mandatory—for criminals armed with a military-style assault weapon.

Mr. President, let me point out that the proposals made by Senator GRAMM, which allegedly would stiffen the penalties for the use of a firearm as an alternative to a waiting period, would have made the law weaker, because right now the Federal law requires that the sentences be served consecutively. That is, if I am convicted of burglary and I get sentenced to 7 years for burglary, and then I am convicted on top of that to the second crime, that I committed the burglary with a firearm and I get 5 years on top of that, I have to serve 7 years first for burglary before I serve my 5 years for violating the law relating to a gun. They way my friend from Texas had it, he had it running concurrent, which meant if I got convicted with the use of a handgun, I would serve 5 years for the gun, 7 years for burglary; they would run concurrently, and I am out at the end of 7 years. I would have served 5 years for the gun and 7 years for burglary. Even when my Republican friends have moved to toughen the law, they have, in effect, weakened the law. I do not think it was intentional. Quite frankly, I do not think they focused on concurrent versus consecutive.

Two, I point out that I have worked with every single solitary person from the White House down through to the Attorney General on gosh knows how many occasions whereby I offered to compromise 75 different ways to get a crime bill. The only reason we do not have a crime bill is every time we got down to it, including habeas corpus, it came down to the Brady bill.

As my friend from Idaho said, he has been one of the few people straightforward on this. He has made no bones about this. He said to me that this is about guns. It is about other things, too, but ultimately it is about guns. Now, we had the last effort to try to get a crime bill last week, and the filibuster by my Republican friends prevailed. Guns won again.

Let me say one last thing. We still have a chance to pass the Brady bill, notwithstanding the fact there is going to be no crimes bill. If the President of the United States of America steps forward, the President can save the Brady bill.

What I find absolutely amazing, Mr. President, is that the President of the United States says, "I am for the Brady bill in a crime bill." Obviously, unlike my friend from Idaho, he has no philosophic argument against controlling guns. Obviously, the President has no philosophic or intellectual rationale for being against the Brady bill. He has not said the Brady bill per se is bad, as my friend from Idaho has said, and I respect him for saying it. He said, if Brady is part of an overall crime bill, but then the home team kept the crime bill from being passed. Then I ask, what possible intellectual or moral justification does he have to, in fact, now

not be for the Brady bill? He is either for it or against it. I promise you, if he is for it, we can pass it notwithstanding the brilliant arguments—I mean that sincerely—that my friends will make in the filibuster they can put up.

We can break the filibuster. We have the votes if the President says: I, George Bush, want this bill. And I see no rationale, I have heard none, and I have not even heard one attempt to be articulated by the President where he says, on the one hand: I am for Brady, if it is sitting over here; but I am not for Brady if it is over here, with not a single word changed in either Brady bill.

Mr. President of the United States of America, if you are listening, and I suspect you are not, understandably, please, please, at least be intellectually consistent. If you are for it, you are for it. If you are against it, you are against it. Be like my friends from Idaho and New Hampshire, who are intellectually honest enough to say they are against Brady. Do not come and tell the American people: I am for Brady if it is packaged with this ribbon but not if it does not have a ribbon on it.

We tried it his way, Mr. President. I spent literally tens of hours negotiating with the Attorney General of the United States and the President of the United States—obviously, the Attorney General does not make those decisions on his own. He goes back to the President to check whether or not he can have a bill.

Mr. President, the bottom line is real simple, to use the trite Washington phrase. If the President wants a Brady bill, all he has to do is send up a note in the next 20 minutes: I, President George Bush, want the Brady bill. And the Senator who has been the leader on this, the Senator from Ohio [Mr. METZENBAUM] and, I expect, the majority leader—and we have spoken to the House as well—will jump through hoops to try to get it done, notwithstanding the fact that my friends from New Hampshire and Idaho and Wyoming and other places will exercise their rights under the rule to try to stop us. But that at least is a fight straight up and down, a fight that I relish and welcome. It is a fight that I believe we can win if the President switches from their side to our side. Brady is squarely in the lap of the President of the United States. If it passes, he can get the credit. If it fails, it is his fault.

Mr. CRAIG. Mr. President, I yield myself such time as I may consume.

Let me suggest to the chairman of the Judiciary Committee that if he had accepted the agreement that the Attorney General and he had discussed, they might be talking about a crime bill on the floor at this moment with the Brady provision in it. But I am told, at least not firsthand, that that agree-

ment was not acceptable to the chairman.

Let me also tell the chairman of the Judiciary Committee that the President did not call me on this issue.

Mr. BIDEN. I did not think he did.

Mr. CRAIG. He and I differ on this issue. I simply have read all the facts. I am sure he is busy enough that he does not have time to recognize that the language is different in the provision we are talking about today from the provision that he was quizzed about last night on Larry King, more than he probably knows.

It is not the Brady bill that we debated here on the floor in June; it is not the Brady bill that the House debated; it is not even the Brady bill that came to the conference. It is new language. And the chairman knows that and that is the issue that is before us today, the creating of what I believe to be a substantial loophole for certain people within the law enforcement community to arbitrarily walk through.

I am happy to yield such time as the Senator from New Hampshire would need.

The PRESIDING OFFICER. The Senator from New Hampshire is recognized.

Mr. SMITH. Mr. President, I ask for 1 minute to respond to the chairman of the Judiciary Committee. This may be an honest mistake, but I understand there was a typo.

On page S. 6131, May 6, 1992, of the CONGRESSIONAL RECORD, I say to my friend from Delaware, it says:

Notwithstanding any other law, a term of imprisonment under this subsection shall not run concurrently with any other term of imprisonment imposed for the underlying crime.

And it is my understanding that there may have been a typographical error in the original. I want to clarify it. I am not challenging the Senator in terms of integrity obviously, but I just point out that it does not run concurrently according to the President's crime package.

Mr. BIDEN. I appreciate the Senator's clarification.

Mr. SMITH. I ask unanimous consent to print that page in the RECORD for clarification.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

GRAMM (AND OTHERS) AMENDMENT NO. 1795

Mr. GRAMM (for himself, Mr. THURMOND, and Mr. DOLE) proposed an amendment to the bill S. 652, *supra*, as follows:

On page 10, line 19 of the pending substitute, strike "use," and insert in lieu thereof the following:

"Use  
DIVISION B—THE "CRIME CONTROL ACT OF 1992"

SECTION 1. SHORT TITLE AND TABLE OF CONTENTS.

(a) SHORT TITLE.—This division may be cited as the "Crime Control Act of 1992".

(b) TABLE OF CONTENTS.—The following is the table of contents for this division:

Sec. 1. Short title and table of contents.

TITLE I—DEATH PENALTY

Sec. 101. Short Title.

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

SECTION 1. SHORT TITLE AND TABLE OF CONTENTS.

(a) SHORT TITLE.—This Act may be cited as the "Crime Control Act of 1992".

(b) TABLE OF CONTENTS.—The following is the table of contents for this Act:

Sec. 1. Short title and table of contents.

TITLE I—DEATH PENALTY

Sec. 101. Short title.

Sec. 102. Death penalty procedures.

Sec. 103. Conforming amendment relating to destruction of aircraft or aircraft facilities.

Sec. 104. Conforming amendment relating to espionage.

Sec. 105. Conforming amendment relating to transportation explosives.

Sec. 106. Conforming amendment relating to malicious destruction of Federal property by explosives.

Sec. 107. Conforming amendment relating to malicious destruction of interstate property by explosives.

Sec. 108. Conforming amendment relating to murder.

Sec. 109. Conforming amendment relating to killing official guests or internationally protected persons.

Sec. 110. Murder by Federal prisoner.

Sec. 111. Conforming amendment relating to kidnapping.

Sec. 112. Conforming amendment relating to hostage taking.

Sec. 113. Conforming amendment relating to mailability of injurious articles.

Sec. 114. Conforming amendment relating to presidential assassination.

Sec. 115. Conforming amendment relating to murder for hire.

Sec. 116. Conforming amendment relating to violent crimes in aid of racketeering activity.

Sec. 117. Conforming amendment relating to wrecking trains.

Sec. 118. Conforming amendment relating to bank robbery.

Sec. 119. Conforming amendment relating to terrorist acts.

Sec. 120. Conforming amendment relating to aircraft hijacking.

Sec. 121. Conforming amendment to Controlled Substances Act.

Sec. 122. Conforming amendment relating to genocide.

Sec. 123. Protection of court officers and jurors.

Sec. 124. Prohibition of retaliatory killings of witnesses, victims, and informants.

Sec. 125. Death penalty for murder of Federal law enforcement officers.

Sec. 126. Death penalty for murder of State or local law enforcement officers assisting Federal law enforcement officers.

Sec. 127. Implementation of the 1988 Protocol for the Suppression of Unlawful Acts of Violence at Airports Serving International Civil Aviation.

Sec. 128. Amendment to Federal Aviation Act.

Sec. 129. Offenses of violence against maritime navigation or fixed platforms.

- Sec. 130. Torture.  
 Sec. 131. Weapons of mass destruction.  
 Sec. 132. Homicides and attempted homicides involving firearms in Federal facilities.  
 Sec. 133. Death penalty for civil rights murders.  
 Sec. 134. Death penalty for murder of Federal witnesses.  
 Sec. 135. Drive-by shootings.  
 Sec. 136. Death penalty for gun murders during Federal crimes of violence and drug trafficking crimes.  
 Sec. 137. Death penalty for rape and child molestation murders.  
 Sec. 138. Protection of jurors and witnesses in capital cases.  
 Sec. 139. Inapplicability to Uniform Code of Military Justice.  
 Sec. 140. Death penalty for causing death in the sexual exploitation of children.  
 Sec. 141. Murder by escaped prisoners.  
 Sec. 142. Death penalty for murders in the District of Columbia.

## TITLE II—HABEAS CORPUS REFORM

## Subtitle A—General Habeas Corpus Reform

- Sec. 201. Short title.  
 Sec. 202. Period of limitation.  
 Sec. 203. Appeal.  
 Sec. 204. Amendment of Federal Rules of Appellate Procedure.  
 Sec. 205. Section 2254 amendments.  
 Sec. 206. Section 2255 amendments.

## Subtitle Death Penalty Litigation Procedures

- Sec. 211. Short title for subtitle B.  
 Sec. 212. Death penalty litigation procedures.  
 Subtitle C—Equalization of Capital Habeas Corpus Litigation Funding

- Sec. 221. Funding for death penalty prosecutions.

## TITLE III—EXCLUSIONARY RULE

- Sec. 301. Admissibility of certain evidence.

## TITLE IV—FIREARMS AND RELATED AMENDMENTS

- Sec. 401. Increased mandatory minimum sentences for criminals using firearms.

Section 924(c)(1) of title 18, United States Code, is amended to read as follows:

“(c)(1)(A) Whoever, during and in relation to any crime of violence or drug trafficking crime (including a crime of violence or drug trafficking crime which provides for an enhanced punishment if committed by the use of a deadly or dangerous weapon or device) for which the person may be prosecuted in a court of the United States—

“(i) knowingly uses, carries, or otherwise possesses a firearm, shall, in addition to the punishment provided for the underlying crime, be sentenced to imprisonment for 10 years;

“(ii) discharges a firearm with intent to injure another person, shall, in addition to the punishment provided for the underlying crime, be sentenced to imprisonment for 20 years; or

“(iii) knowingly uses, carries, or otherwise possesses a firearm that is a machinegun or destructive device, or that is equipped with a firearm silencer or firearm muffler, shall, in addition to the punishment provided for the underlying crime, be sentenced to imprisonment for 30 years.

“(B)(1) In the case of a second conviction under this subsection, a person shall, in addition to the punishment provided for the underlying crime, be sentenced to imprisonment for 20 years for a violation of subparagraph (A)(i), to imprisonment for 30 years for a violation of subparagraph (A)(ii), and life

imprisonment for a violation of subparagraph (A)(iii).

“(ii) In the case of a third or subsequent conviction under this subsection, or a conviction for a violation of subparagraph (A)(ii) that results in the death of another person, a person shall be sentenced to life imprisonment.

“(C) Notwithstanding any other law, a term of imprisonment under this subsection shall not run concurrently with any other term of imprisonment imposed for the underlying crime.

“(D) For the purposes of paragraph (A), a person shall be considered to be in possession of a firearm if the person has a firearm readily available at the scene of the crime during the commission of the crime.”

The PRESIDING OFFICER. The Senator from Idaho is recognized.

Mr. CRAIG. Mr. President, I yield myself such time as I may need.

There has been a great deal of talk today about controlling firearms, and that a Brady bill would make the world a safer place to live in, would make our communities safer and would make our homes safer. I think most all of us recognize that it would not, but it is awfully good political fodder in the election year. It is a smokescreen. It is a cloud of false protection perpetrated on the American people that simply will not work.

Let me tell you what does work, tragically enough, in this country. Gary Clink, a criminologist at University of Florida, says that when private citizens can, in fact, defend themselves, they can offer some of the greatest form of protection there is. And last year over 1 million citizens protected themselves from attempted criminal activity by the ownership of a firearm.

That is a pretty stark number, but it is saying that a good many more of our citizens protected themselves and their families and loved ones and their profit with the use of a firearm, than were damaged by one. Those kind of statistics never come forward, because when someone wards off a burglar or a potential rapist with a firearm, it never makes the headlines. But when someone is killed with the use of a firearm it makes front page.

So, let us keep our arguments on balance today and let us clearly recognize that it is false government when we pass a law that really offers us nothing, does not control the criminal element, might accidentally control a crime of passion or—incidentally, that is what is at issue here today.

I think the American people have cried out for a good crime bill. The President sent forth a good crime package. This Senate simply could not get together on the differences. Guns are not the issue in bringing forth a good crime bill, but when you put gun control in a crime bill, that is what helps kill it, and the chairman of the Judiciary Committee knows it. We ought to keep a good crime bill clean of this kind of legislation and maybe we could,

in fact, then bring about the kind of criminal control in this country that the American people are crying out to have. I retain the remainder of my time.

The PRESIDING OFFICER. The Senator from Ohio is recognized.

Mr. METZENBAUM. Mr. President, I yield myself such time as I may need.

Mr. President, my friend from Idaho talks about a smoke screen. There is a real smoke screen. The effort to portray their opposition to the Brady bill as somehow being protective of people of this country is quite absurd.

Back in 1976, even the NRA, even the NRA in their publication took a vote and asked the question. The NRA indicated support for a waiting period.

They have changed since then.

My colleague from Idaho talks about one change as if it were a cause celebre. First of all, let me tell him he will vote for the Brady bill we will take the occasion of it and drop that provision. Let us not confuse the issue. There is one minor technical change that expands the immunity provision for the police which was contained in the Dole-Mitchell-Metzenbaum compromise.

That provision protects police officers from damage suits in instances in which they fail to prevent a gun sale to a felon. That was a provision which had unanimous support, and was put in the bill in part because of concerns raised by his friends in the NRA that the police might otherwise be subject to tort liability if the Brady bill became law.

A concern was raised, however, that if the bill specifies that police officers are immune if they fail to prevent a gun sale to a felon, it is necessary to specify that they are also immune if they mistakenly prevent a legal sale from going forward. Otherwise, there might be a negative implication that Congress intended to immunize the police from damage suits for one kind of mistake but leave them open for damage suits for another kind of mistake. And so language was added in conference to address this issue.

My colleague's arguments, in my opinion, are specious, they are confusing. There is only one issue, does the Congress want to pass a 5-day waiting period? And it can only pass it at this point if the President of the United States indicates he wants it.

The argument has been made that waiting periods do not work, made by the Senator from New Hampshire. The evidence suggests that waiting periods do indeed work. California has a 15-day waiting period. Statistics from the California Department of Justice show that in 1991, the California waiting period stopped nearly 6,000 illegal gun sales. In the first quarter of 1992, 1,385 prohibited firearms sales were stopped by the California law. The California waiting period kept guns out of the hands of 760 drug felons and over 3,700 violent offenders.

Maryland has had a 7-day waiting period since 1966. In 1990, the law kept guns out of the hands of 750 convicted felons. New Jersey has required a background check for over 20 years. Since the law took effect, more than 10,000 convicted felons have been caught trying to buy handguns. Last year, the law kept guns out of the hands of over 900 felons. What are we talking about here?

Mr. President, when a person applies for a job, an apartment, a credit card, or a bank loan, a background check is routinely conducted to ensure that the person would be a suitable employee, tenant, cardholder or debtor. But in too many parts of this country, a person can buy a handgun without anyone checking to see whether or not that person has a history of criminal behavior or mental illness. We make a more serious effort to check whether a person should be entrusted with a credit card than we do to check whether he or she should be entrusted with a weapon which can kill people. That makes no sense.

And I say to my colleagues in the Senate, you are not going to change your point of view, but the President of the United States was on TV last night—I did not hear him and I understood he indicated he was for the Brady bill. Actions speak louder than words. You cannot say you are for something, being the President of the United States, without putting the shoulder to the wheel and delivering the necessary votes.

We could still pass the Brady bill in this late hour of the session if the President of the United States made known to his friends and colleagues on the other side of the aisle that he wants it passed. If he wants it passed, it will be passed. Up to this point he has not indicated he wants it passed. He says he is for it.

Then he says last night he is for it. If he is for it let him stand up and be counted. Let him indicate he truly wants it. Let him make the necessary calls that need to be made to Members on the other side of the aisle and we will pass the Brady bill and save lives, and stop the killing on the streets of America.

The PRESIDING OFFICER. The time of the Senator from Ohio has expired.

The Senator from Idaho is recognized.

Mr. CRAIG. I ask how much time remains on my side.

The PRESIDING OFFICER. Three minutes.

Mr. CRAIG. Mr. President, then let me close with a few comments in response to my colleague who has just spoken.

I think any good criminal law ought to be directed at the criminal. He indicated that the language that he says I am using as a smoke screen is only for a felon. Subsection (b) says for prevent-

ing such a sale or transfer to a person who may lawfully receive or possess a handgun. That "hain't" a felon. That is a law abiding citizen. That is a constitutional right. We are talking about trampling on civil rights in this country. So when we look at the fine print let us look at all of the fine print.

This is not a partisan issue. The vote on the crime bill last time was very bipartisan. There are just as many, or a good many at least, on that side of the aisle who are opposed to this type of gun control as there are on this side of the aisle.

I think it is very important that the record bear that out. It is not partisan. It never has been a partisan issue.

Los Angeles County, on an average month, sells 8,500 firearms through legal firearms dealers. Now that is just L.A. County alone. And while my colleague who just spoke would indicate that 6,500 firearms were blocked from sale last year in California, that is but a blink of the eye in the normal selling through legal channels of firearms in the State of California.

During the peak of the L.A. riots, that 8,500 a month jumped to over 14,000 a month as concerned, law-abiding citizens feared for their rights and their inability to protect themselves, their property and their family.

You see, Mr. President, that is really what is at issue here. I can understand why my colleague confuses a credit card and a background check. A credit card and a person's credit is not a constitutional right, but the second amendment that our Founding Fathers put in is. And we ought not confuse them between the simplicity of a credit card and the right of an American citizen under his or her Constitution.

That is at issue. That is what we are talking about. That is why this Senate will not bring up a piece of legislation that violates the constitutional rights of the average citizen.

I yield back the remainder of my time.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MITCHELL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### BILL RETURNED TO THE CALENDAR—S. 2899

Mr. MITCHELL. Mr. President, Members of the Senate, on Friday the Senate voted 85 to 12 to proceed to consideration of the bill which reauthorizes the National Institutes of Health. The vote reflected the singular importance of this legislation. It is, first and foremost, the most important bill affecting

the health of American women ever considered by the Congress. It contains a number of important provisions that deal specifically with rising concern over women's health and particularly the alarming rate at which breast cancer is afflicting an increasing number of American women and women at an earlier age than has previously been the case.

It also provides important provisions involving research for those who suffer from Parkinson's disease, Alzheimer's disease, diabetes, prostate cancer, and other illnesses and diseases.

Only in the United States Senate and only in the last few days of a session can 85 Senators vote one way: Yes, for this bill; 12 Senators vote another way: No, against the bill—and the no's prevail.

The American people will not understand it. And especially those millions of Americans who either suffer from some of these dread diseases or have family members suffering from those diseases will not understand it. But that is the reality which confronts us today. Twelve U.S. Senators willfully blocking legislation supported by the overwhelming majority of the American people and voted favorably by 85 other Senators.

But, as a result of the actions of that dozen Senators—not one of them, I note, a woman—millions of American women will be, at least temporarily, denied the hope of the kind of research that will lead to arresting of these dramatic results in breast cancer—women whose parents, or they, suffer from Alzheimer's disease and others of these dread diseases.

It is a deplorable state. It is a terrible circumstance. It is the kind of thing that subjects this institution and this Congress to the contempt of the American people. But that is where we find ourselves.

Therefore, Mr. President, there is no alternative but to discontinue consideration of this bill. But to those dozen Senators who now may be smiling in the flush of victory, let me say to them that this is a short-lived victory. And let me commit to the 85 Senators who have voted for this legislation and those Senators who have worked tirelessly for it, and to the millions of American women and American families who will suffer because this bill is not passed, that I have made the following decision which I announce here today.

One of the powers I have as majority leader is to designate the first five bills in any new Congress, as a way of expressing my priorities and what I believe to be the priorities of the Senate and the American people on what is important and what we ought to get done. Therefore, Mr. President, when this Senate reconvenes on January 21, one day following the inauguration of the President on January 20, I will des-

ignate this bill as S. 1. And I say to the chairman of the committee now seated on the Senate floor, I charge you and your committee with the responsibility to report this bill to the Senate as soon as humanly possible when the Senate reconvenes. And I will, on the first moment that I have an opportunity to do so, move to proceed to that bill and file cloture on that bill and if the 85 Senators, or those who return to the next Senate, will stick with us and stick to their guns on this issue, we will get cloture immediately upon returning next year.

When we get to the bill, I will file cloture on the bill, and the Senate will stay in session so long as it is necessary to pass this bill the first week we are back in January.

The 12 Senators will have the opportunity to filibuster then, as they have done now. They will have the opportunity to obstruct then, as they have done now. They will have the opportunity to delay then as they have now. But they will not have the close of the session as their ally. They will not have the fact that we cannot complete action on this bill before the end of this legislative year to help them enact this legislation.

So, Mr. President, I regret very, very much that we are not going to be able to complete action on this bill this year. It is a combination of circumstances: The timing in which the bill was brought before us, the end of the session, the rules of the Senate, and the action of a dozen Senators, all of which have combined to prevent us from proceeding on this important measure.

It is with the greatest reluctance that I now ask unanimous consent that the bill, S. 2899, the National Institutes of Health reauthorization bill, be returned to the calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MITCHELL. Mr. President, I want to repeat now, so there can be no misunderstanding on the part of any Senator, when the Senate returns to session next January 21, at the earliest possible appropriate opportunity—and that is as soon as the Senate committee of jurisdiction reports the bill and places it on the Senate Calendar—I will move to proceed to that bill, and I will file cloture on the motion to proceed.

And if the 85 Senators—or, under our rules, 60 or more Senators—agree next year, as they did this year, that we should consider it, we will stay in session until we get that cloture. And then we will be on the bill, and we will file cloture on the bill, and we will stay in session until we get that bill done. That will be the first order of business in the next Senate, and it will begin the first day that the Senate reconvenes following the inauguration of the President. That is on Thursday, January 21.

Mr. President, I now ask unanimous consent that there be 1 hour for debate on this matter, with the time to be equally divided and controlled between Senator KENNEDY and Senator HATCH.

The PRESIDING OFFICER (Mr. ROBB). Without objection, it is so ordered.

The PRESIDING OFFICER. Who yields time?

The Senator from Massachusetts [Mr. KENNEDY] is recognized.

#### THE NATIONAL INSTITUTES OF HEALTH REVITALIZATION AMENDMENTS OF 1992

Mr. KENNEDY. Mr. President, I yield such time as I might use.

Mr. President, first of all, I want to express, as the chairman of the Labor and Human Resources Committee, and I believe all the Members of the Senate, our appreciation to the majority leader for repeatedly scheduling this legislation.

All of us who have been strongly in support of the programs at the NIH are enormously grateful to him for giving us an opportunity to make this case in the U.S. Senate. Senator MITCHELL has offered the millions of Americans who are victims of devastating diseases a real sense of hope by his commitment to name this as the first order of business when the next Congress convenes. That is a very powerful message, and it is a hopeful message.

We certainly want to give the reassurance to the millions of American families whose lives have been touched by these diseases—Alzheimer's, Parkinson's disease, diabetes, juvenile arthritis, osteoporosis, ovarian cancer, breast cancer, heart disease, multiple sclerosis, lupus—that this delay is extremely unfortunate. Those who have been a part of the delay bear the responsibility, clearly, for it.

I will assure the victims of these diseases and their families that the Committee on Labor and Human Resources will meet prior to January 21, and we will make every effort to report it out, to conform with the rules of the Senate, and have it ready on the first day that we are back, we will be prepared to move ahead.

So we are again grateful to the leader for his support of this legislation, and for his commitment to seeing that this measure will be addressed and enacted as the first order of business in the next Congress.

Mr. President, on Saturday, I urged President Bush to help us pass this vital health research legislation. I said at that time that it was up to President Bush. If he said yes, he wanted an NIH bill, the road block would be lifted and we would have a bill. We heard nothing back from the White House.

I called Secretary Louis Sullivan, HHS Secretary and spoke to him on Sunday. He said he would get back to

me if there was any chance the White House was ready to compromise. Again, we have heard nothing, and the administration continues to remain silent.

They have turned a deaf ear to the pleas of millions of sufferers from such dread diseases as Alzheimer's, Parkinson's, and diabetes.

Let me review the record. The bill now before us will help assure America's biomedical research leadership well into the next century.

It would have strengthened our research on cancer and heart disease. And it would help make major strides to redress our shameful neglect of women's health issues.

The bill will assure that women are appropriately represented in clinical trials.

It will dramatically increase the resources devoted to research on the diseases of the greatest concern to our country's women—an additional \$325 million for breast cancer, an additional \$75 million for ovarian, cervical, and reproductive cancer, and \$40 million for osteoporosis research.

It will require the NIH to develop and implement a comprehensive plan for the prevention, early detection, and treatment of breast cancer. And it will provide a statutory basis for the Office of Women's Health to assure that all health issues concerning women continue to receive the attention they deserve at the highest levels of the NIH.

American women need this legislation, and they deserve it to become law this year.

A key feature of this bill is that it will at last allow research on fetal tissue transplantation to proceed—research that offers hope to sufferers from Parkinson's disease, Alzheimer's disease, diabetes, and many other diseases.

It is the provisions regarding fetal tissue transplant research that are at issue. As the result of a decision by the Reagan administration in March 1988, support of this research by the NIH was banned on the grounds that it might somehow encourage abortions. The Reagan administration appointed an expert advisory panel, including theologians, physicians, scientists, and lawyers, to consider the issue. This panel recommended that, after safeguards were put in place to assure that no abortion would take place for the purpose of providing tissue transplant purposes, the ban should be lifted. The vote was 18-3. The Bush administration chose to overrule this recommendation of the panel that President Reagan had appointed, and maintained the ban.

The NIH reauthorization bill passed by the Senate on June 4, wrote the safeguards recommended by the advisory panel into law and overturned the ban on the use of fetal tissue in transplant research. The vote in the Senate was an overwhelming 85-12. The sup-

porters of the bill included some of the staunchest opponents of abortion in this body. They would not have supported this legislation if it truly encouraged abortion. Instead, they affirmed what is basically common sense; pregnant women do not choose to have abortions because there is a remote possibility that tissue from the abortion might be used in medical research.

In a desperate attempt to head off this vote, the administration announced that, effective May 19, they would establish tissue banks to make fetal tissue available for transplant research. The fetal tissue in these banks would come exclusively from ectopic pregnancies and spontaneous abortions, rather than induced abortions. Virtually every authority who has examined this issue believes that it will not be possible to supply sufficient usable tissue from these sources to meet research needs. Nonetheless, the President vetoed the NIH reauthorization on the grounds that this tissue bank was an adequate solution to this problem. We were unable to override his veto in the House of Representatives.

Even the authorities cited by the administration as supporting the tissue bank have concluded that it is unlikely to solve the problem. As Drs. Kline, Kinney, Stein, and Susser recently stated in a letter to the prestigious journal *Science*, "We believe the present NIH plan cannot be expected to produce significant numbers of usable specimens."

They go on to say that the six sites at which the bank would be operated could be expected to yield a total of only 14 specimens per site, and even these specimens, and I quote, "may or may not prove acceptable for transplantation research."

Dr. Richard Robbins, of the Yale University Medical Center, will be publishing in November the results of a new study which shows that fetal tissue transplantation can improve the health status of Parkinson patients and that his facility alone could do 50 transplants a year, enough to absorb 60 percent of the total capacity of the administration's tissue bank, even if every one of the specimens collected proves to be usable.

On June 26, I reintroduced the NIH reauthorization bill. The new legislation responded to the concerns the President stated. It provided that the ban on use of fetal tissue from induced abortions in transplant research would continue for 1 year from the date of the establishment of the President's tissue bank. At the end of that time, researchers would be allowed to use tissue from induced abortions—but only if the tissue bank was unable to meet their needs.

We tried to bring this new legislation to the floor of the Senate, but we were confronted with a filibuster on the mo-

tion to proceed to its consideration. On Friday, the Senate overwhelmingly voted to proceed by a vote of 85 to 12. But there are many more opportunities to filibuster in the short space of time remaining in this session.

During the course of the debate, Senator HATCH, the leader of the opposition and the ranking member of our committee, offered a compromise. Lift the ban, but give the administration's tissue bank 27 months to prove that it could supply adequate tissue before allowing the use of material from induced abortions. I offered a further compromise—to split the difference with Senator HATCH and allow 18 months to see if the administration's tissue bank could do the job.

Senators from both sides of the aisle worked hard to try to reach an agreement. We were willing to move even further to compromise. But at the crucial moment a small band of extremists intervened on the Republican side and insisted on no compromise. And word filtered from the Republican side that the President wanted no compromise. He did not want a bill to pass the Senate. He wanted the filibuster to work to thwart the 85 to 12 vote in the Senate. No use of tissue from induced abortions—ever, not in 1 year, not in 18 months, not in 2 years, not in 10 years—even if the administration's tissue bank is a total failure. And they pledged to use every parliamentary device at their disposal to keep the House and Senate from sending any bill to the President this year.

What is tragic is that the President remained silent. Opponents dug in their heels: No compromise; no bill that would reach the President's desk; make the filibuster work; protect President Bush from having to publicly choose between Alzheimer's patients and the extreme right.

We know this issue is not really about abortion. With the safeguards included in this bill, even a commission appointed by President Reagan concluded that no woman would decide to have an abortion because the tissue might be used in medical research or to assist an anonymous transplant recipient. There is no antiabortion basis for opposition to this bill, any more than there is a pro-life basis for opposing organ transplants. We encourage donation of kidneys, hearts, eyes and other organs from persons who have died. There is no gift more precious than the gift of life, and no one has ever suggested that this policy encourages murder or suicide.

If this were an abortion issue, some of the staunchest opponents of abortion in the Senate—STROM THURMOND, MARK HATFIELD, JOHN DANFORTH, DAVID DURENBERGER, and DENNIS DECONCINI—would not have supported this bill. If this were truly an abortion issue, Senator HATCH would never have offered a compromise.

During the course of our negotiations on Saturday, I met with representatives of the victims of diabetes, of Alzheimer's, of Parkinson's, of the great medical research institutions. They have been working for 5 years to lift the ban on Federal funding of fetal tissue transplant research. They include men and women like Ann Udall, who has been fighting for help for Parkinson's disease victims since her father, Congressman Mo Udall was stricken. Joan Samuelson, a lawyer and founder of the Parkinson's Action Network has partially lost the use of her arms and her legs because of Parkinson's disease. Rev. Guy Walden saw his unborn son saved from a fatal genetic disease by a fetal tissue transplant.

Their efforts and the efforts of thousands like them have brought this issue to the forefront of the attention of Congress. They have held fund-raisers; they have written letters; they have called reporters; they have visited Members of Congress to make their case—not once but many times. And they have turned Congress around.

But all their hard work cannot stop the clock from running out on this session of Congress. There is time remaining to consider legislation on taxes, on cable television, on energy. But time is running out on the issue of breast cancer, uterine cancer, osteoporosis, Alzheimer's disease, Parkinson's disease, genetic disease, and the national biomedical research effort on cancer, heart disease, and a host of other illnesses that afflict millions of our fellow citizens.

There is a lot of talk this year from the other end of Pennsylvania Avenue about a gridlocked Congress. The issue is not a do-nothing Congress, but a Congress struggling to do the right thing without Presidential leadership.

It is really a "do a lot Congress" and a "block everything" President. On issues of great importance to American families, in the last several weeks alone, the Congress passed a family leave bill; the President vetoed it. The Congress passed a family planning bill that overturned the gag rule; the President vetoed it. The Congress tried to pass an important education bill; the President blocked it. Earlier, the Congress passed an economic recovery bill; the President vetoed it.

Now the Congress is ready to pass a medical research bill. Support for it by the American people and in the U.S. Senate is overwhelming. But the President will not say in public whether he supports or opposes it.

But today, the hour is late. The 102d Congress has just a few more hours to act. A compromise would still have been possible this morning but still, no word of encouragement from the White House. The filibuster Senators are still on the floor.

As disappointed as we are, I do not want any of those who have worked so

hard, so tirelessly for years to lift this unconscionable ban on research that could save lives, and make the lives of those who suffer, so much better, to lose hope. I have not given up hope, and they should not give up hope either.

We will pass the NIH reauthorization bill, and repeal the moratorium on fetal tissue research at the earliest time next year. I will bring this bill with its women's health initiatives and its strengthening of cancer research and research on heart disease and prostate cancer before the Labor and Human Resources Committee at our first meeting in January 1993. We will report this bill to the floor immediately. Senator MITCHELL has indicated we would take immediate action.

The greatest reason of all for hope is that Governor Clinton has assured me and the American people that as President Clinton he will immediately lift the ban on fetal tissue research. He will authorize the NIH to go forward to support research in this field. With a stroke of the pen, President Clinton will achieve what President Bush has blocked for 4 years. And sufferers of Alzheimer's disease and Parkinson's disease and diabetes, and spinal cord injury and scores of other diseases will have help again.

The issue of fetal tissue research should be decided by research doctors in their laboratories, not by spin doctors in the White House or Congress.

A small group of Republican Senators has succeeded in blocking lifesaving research that is the only real hope for millions of victims of incurable diseases.

Worst of all, the White House is being held hostage by the most extreme anti-abortion zealots in its party. President Bush himself has refused to get involved, even though his support could break the current impasse and allow a compromise to be enacted.

When the chips are down, President Bush refuses to break with his extremist supporters in the anti-abortion movement, even though a clear majority of Senators in his own party believes that the extremists are going too far.

The same tiny minority who dictated the Republican Platform in Houston and embraced the Republican Party are doing it again. The Hordes of Houston are dictating national policy on medical research, because President Bush is permitting them to do so.

The deafening silence from the White House means that this bill will not pass—for now. But we shall be back in January to renew the battle as soon as we can.

So if there is a silver lining to the current impasse, it is this—legislative action next year may not even be necessary. With the stroke of a pen, a new President can revoke the irresponsible Executive order that imposes the cur-

rent irresponsible moratorium on fetal tissue transplantation research.

President Clinton will do so. And I am also confident that if the American people understand what has happened here, they will be even more inclined to choose a new President of the United States on election day next month—a President who is not a captive of the extremist fringe of his party on the issue of abortion—a President who will get this country moving again on the economy, on biomedical research too, and on all the other pressing challenges America faces.

Mr. President, I reserve the remainder of my time.

Mr. HATCH addressed the Chair.

The PRESIDING OFFICER. The Chair recognizes the Senator from Utah [Mr. HATCH].

Mr. HATCH. It is with a great deal of sadness that I stand on the floor at this time following the remarks of the distinguished Senator from Massachusetts. I feel absolutely terrible that we have not been able to pass the NIH reauthorization bill in this term of Congress, because I have always supported the NIH.

I feel badly that some have tried to make a political football out of the NIH reauthorization bill at the last moment of the 102d Congress. This bill could have been brought up in plenty of time to have invoked cloture on both the motion to proceed, and also the bill itself. And it would have passed. It would have passed the House, too. It would have been vetoed and the House would have sustained the veto once more.

So there has been a lot of politics played with this bill. Frankly, I do not like politics being played with this bill. I am not part of the filibuster. At the end of the debate last week—as a pro-life Senator who believes in the right to life of the unborn, and who thinks we are going way beyond the pale in aborting 1.6 to 2 million infants a year—I offered a compromise. If my colleagues on the other side of the aisle would give the fetal tissue banks, which are now being set up, 2 years from January 1, 1993—to work which is what it would take because the bureaucracy sat on that executive order, dragged its feet, and did not get it started until now—I would do everything in my power to get the President and my colleagues to accept that compromise position also, thus, the bill would pass. But, it would reasonably take 2 years at a minimum to get the fetal tissue banks in full operation.

It was the right time to accept that offer, and it was not accepted. It was that simple. I could not split the difference because I know that 18 months from the date of enactment was an insufficient period of time to get them fully operational. I knew that it would minimally take 2 years from January 1993.

Let us face it. If I am right, based upon what scientists have told me both pro-life and pro-abortion scientists then we would never have to get into the abortion issue again because the fetal tissue banks would prove to meet the tissue needs of researchers.

From the beginning, I have said if you would agree to that, we will find out if they work. If they do not, then I myself will vote to allow any kind of tissue to be used because I believe that human fetal tissue transplantation research is critical to this country. I share the same feelings as many of my colleagues who voted for this bill, regardless of this issue; human fetal tissue transplantation research should go forward, and that it would be delayed in such a way that we would be putting off fetal tissue research longer.

That was no small offer on my part. Everybody who has seen my service through the years knows that I mean what I say. But we were unable to put a middle position together for one reason or other. Some would prefer having the President in the posture of preventing fetal tissue transplantation research because he is committed to not using induced aborted tissue until it has been shown that the fetal tissue banks will not work.

I, too, am responsible to a degree because I did not tell the distinguished Senator from Massachusetts until during the debate that I had an alternative position in my mind. But, frankly, prior to last week I had not fully considered this alternative. It was during the debate that I decided maybe this is what ought to be done here. So I offered it.

My colleague from Massachusetts was unable to take it at that time. In the process, others who are very sincere—dedicated Members of this body who do not have ulterior motives at all—decided to debate this bill extensively. They have a right to do that. They have every bit a right to stop this bill that the majority leader and the distinguished Senator from Massachusetts did not have to bring it up at the last minute. They knew calling up S. 2899 was going to result in a protected debate. But, they control the floor.

They could have brought this up as soon as we returned from our recess in August. But, they also knew even if it went through both Houses of Congress as we did only 3 months ago with H.R. 2507, the same bill it, too, would be vetoed and it would be sustained in the House again. Why did we go through two bills in 1 year? This maneuver is unusual unless it is for political purposes.

If I had been listened to during the first debate, we would have solved this problem then, and we would have the bill alive today. But, no. Some people—I am not saying the distinguished Senator from Massachusetts, I am sure he is not one of them—but some people,

want the abortion issue more than they want the other important health provisions in the NIH reauthorizing bill. Mr. President, I think it is abominable.

Now passage of S. 2899 is not going to occur. So, what is going to happen? I might add just for the RECORD that all of the terrible things that the distinguished Senator from Massachusetts says will not be done now are going to be done anyway. They have been done without the reauthorization bill. They are being done by the Appropriations Committee.

It is important to remember that our failure to reenact or enact this particular bill does not stop research from going on out of NIH. It is going to continue. There will be women's health research programs, all these other programs that the distinguished Senator from Massachusetts covered, important initiatives on cancer, heart disease, aging, diabetes, and many other provisions included in the proposed legislation—all of which will go forward even though this bill dies today.

Thanks to President Bush's executive order, even fetal tissue research will not only go forward, but it will be facilitated according to the President.

Let us lay aside the political rhetoric. I want the American people to be assured that this research is moving forward, bill or no bill. So, Senator KENNEDY's concern is not a good argument for passing S. 2899. It just would have been better to have it go forward with the imprimatur of the whole U.S. Congress on it; that we had by statute authorized a period of time during which the fetal tissue banks could become fully operational.

Mr. President, I feel just terrible right now because I really believe in fetal tissue transplantation research. My family suffers from these dreaded problems. My father was a diabetic. I wanted him to have the best possible health care. I also want all severe diabetics and all Parkinson's victims to have the very best health care that society could give. The very quickest and best way to do that would have been to have taken that offer and gotten this whole process moving forward.

Now, I have to say that I think our side is wrong, too, in not accepting a 2-year period to get the fetal tissue banks fully operational. If they would accept this compromise, I think we probably could still pass this legislation. But let us understand something. What I had in mind was this: I wanted to get fetal tissue transplantation research out of politics. I was willing to take that upon myself to achieve that goal by offering a compromise. It was a decent offer. It was a legitimate offer. It was a sincere offer.

My reasoning was this: if President Bush is reelected he has a statute giving 2 years from January 1, 1993, to make fetal tissue research work.

If it works, then it shows that those scientists who are so pro-abortion that they will not let the fetal tissue banks really work, and argue against them, could be proven wrong. I think that would be a wonderful thing for America, to show they placed the issue of abortion above science itself. That is a fact. Some individuals in the scientific community, not all, but some of them.

But, if Governor Clinton is elected, then there would be a statute requiring a 2-year period to see if the fetal tissue banks work, to see who is right scientifically, but at the same time to push this ahead. I think "President" Clinton, if he is indeed elected, would have a very difficult time immediately calling for an override of that statute, which would already be overwhelmingly passed and on the books. So it was a way of solving this problem.

I also note, as the distinguished Senator from Massachusetts has said, very forthrightly, if Clinton is elected, he will immediately rescind the executive order establishing fetal tissue banks, with a "stroke of his pen." It will be 1 hour after he is sworn in as President of the United States.

To me, the right-to-life community is not very far-seeking on issues like this, because they should realize that. If Clinton is elected, the fetal tissue banks will be dead.

Mr. President, I have to say that it makes me sick that good people on both sides could not get together on this, and politics are being played, on whichever side. I will let the public make that decision. But I suspect it is on both sides.

Having said that, my colleagues have decided to create extended debate here. I have nothing but respect for them. They feel very deeply about this issue. They do not believe that a genuine compromise can be reached at this late hour. I have nothing but respect for them.

Mr. President, I am very concerned. I have been concerned as a member of the Judiciary Committee, someone who has watched the continuing onslaught against every nominee, acting like everyone is either pro-abortion or anti-abortion. The abortion issue has dominated this country to such a degree that it is causing reasonable minds not to be very reasonable. It is causing politicians to be more political. It is causing people to refuse great legislation because one side or the other does not think it is going to have an advantage. It is ruining the lives of a lot of people on both sides. People are using it to try to distort the whole record around here.

Why stay in this mode where one side or the other will bet the upper hand, or neither gets the upper hand and the people lose? That is what is happening. I tried to get us off of that last week, and I failed.

This whole exercise right now is just an exercise in politics.

Why was this not brought up 2 weeks ago when we had plenty of time to invoke cloture and to have found votes on it, and plenty of time to get it to the House, for the House to pass it, and for the President to veto it, and for the House to sustain the veto? Why is it brought up at the last minute if it is not to allow the abortion issue to rear its ugly head again, and I have to say at the expense of everybody who is worried about fetal tissue research.

Mr. President, I would like to have this NIH bill pass; I would like to have the fetal tissue banks given a chance to work. I would have liked the imprimatur of the whole Congress on it. We unfortunately are not going to have that as of right now in this NIH authorizing bill.

I have taken enough of our time. I think those who feel deeply about extended debate should have the rest of our time and, therefore, I yield the floor and turn the remainder of my time over to them.

Mr. SMITH. Mr. President, how much time is remaining?

The PRESIDING OFFICER. Twelve minutes, 33 seconds are controlled by the Senator from Utah.

Mr. SMITH. Mr. President, I was somewhat surprised at the tone of the debate by the majority leader and by the Senator from Massachusetts. We all have strong feelings about issues. I happen to feel very strongly about this one, and the Senator from Massachusetts does as well.

But the real fact of the matter is that Members on this side were not the ones who held this bill hostage. We are not holding this bill hostage.

This bill, Mr. President, is approximately 400 pages long, and there are 12 pages that refer to fetal tissue research in this bill. That is the issue.

We are not opposed to breast cancer research or anything of that kind. It is very misleading to indicate that those of us on this side are trying to hold a bill hostage with a lot of good research material in that NIH legislation.

This bill could have been brought up, and should have been brought up, without the fetal tissue issue. Had it been, long ago by those who control this body, it would have been passed, sent to the President, and signed into law.

I might point out for the purpose of the RECORD that I think the American people know that the President is not opposed to fetal tissue research from ectopic pregnancies and spontaneous abortions. I think my colleagues on the other side of this issue know that, and there is an ample amount of tissue from those sources. The issue is whether or not those tissue banks are to be filled with tissue from abortions.

I might also say, with all due respect to the Senator from Massachusetts, before we get too endeared with the idea that it may be "President" Clinton—and it may very well be President Clin-

ton signing legislation—"President" Dewey also planned to sign a great deal of legislation that for some reason after the voters spoke he did not get a chance to sign. I might point that out. I might just point that out.

I might also say to the Senator from Massachusetts my wife's father is a victim of Alzheimer's disease, and he is institutionalized. He would not want to take an innocent life for the purpose of research on this disease. He would be more than happy, if he could, to say that the research material from ectopic pregnancies and from spontaneous abortions could and should be used.

Mr. KENNEDY. Mr. President, will the Senator yield?

Mr. SMITH. I would be happy to yield if it could be taken from the Senator's time.

Mr. KENNEDY. Mr. President, I have how much time?

The PRESIDING OFFICER. The Senator yield on time charged to the Senator from Massachusetts who has 26 minutes remaining.

Mr. KENNEDY. My question is: Can the Senator point out the provision in this legislation that says or even suggests remotely that supports taking of a life to provide fetal tissue for research?

Mr. SMITH. As the Senator knows, if an individual determines that she wants to have an abortion and uses the rationale that it is somehow going to be helpful in research, then that choice can be made for that reason.

My purpose in debating the issue here is simply to say I do not think that is right.

Mr. KENNEDY. Does the Senator know the issue was reviewed in very considerable depth by President Reagan's own advisory committee? And they rejected that suggestion and they made a series of recommendations to ensure the separation of a woman's decision to have an abortion and the decision to donate tissue for research. This legislation includes all of the safeguards recommended by the task force. Can the Senator cite any study or provide any information that would support his position?

Mr. SMITH. Mr. President, I would like to reclaim my time and complete my statement.

The PRESIDING OFFICER. The Senator has the floor, with the time chargeable to the Senator from Utah.

Mr. SMITH. Mr. President, the Senator is fully aware that the issue is not fetal tissue research. The issue is abortion. That is the issue. The Senator knows that.

I might also say that there is one person that I would like to refer to today who does not have a voice on this matter today in the U.S. Senate, although she does have a voice and I do not know the circumstance of her mother in terms of why she chose to do

what she did. To the best of my knowledge she did not do it because she wanted to donate tissue to the bank for fetal research but she could have.

That young lady is a lady by the name of Gianna Jessen.

Gianna Jessen, a 14-year-old California girl who as an infant survived a saline abortion, came to the Nation's Capital October 4 to speak out about abortion and how it has affected her life. At a press briefing sponsored by the Abortion Is Not Family Planning Coalition, the sunny, dynamic teenager told her remarkable story.

Gianna's natural mother was 17 years old when she underwent a third-trimester, saline abortion. Gianna survived the caustic saline solution that was injected into her mother's womb and was born alive, weighing only 2 pounds. She said, "I feel it's only God that saved my life."

Should this young woman have to endure what she is enduring because it is possible that a mother somewhere may decide to have an abortion to donate tissue to a fetal tissue bank? I say no, Mr. President.

She was taken from the abortion clinic to a hospital, where she stayed for some time. After the trauma of the abortion, she suffered from spina bifida and cerebral palsy, and required multiple operations. Doctors said she would never be able to walk, or even sit up on her own.

But Gianna proved them wrong. She was adopted at the age of 3, and has since proved her quality of life—and then some. Now she is a normal, energetic teen, with a unique story to tell. She has spoken to groups around the country and internationally, talking about her insider's experience with abortion and sharing her gift of song. She says she has no bitterness toward her natural mother for aborting her, and expresses compassion for women in crisis pregnancies.

Gianna's very existence makes advocates of legalized abortion extremely uncomfortable. She says her survival proves that unborn babies aren't just blobs of tissue. But proabortionists would seem to say that Gianna's live birth—the dreaded complication—was a rare mistake. In a Washington Times article, Susan Shermer of the National Abortion Federation said, "The way most procedures are performed today, most physicians make sure there's fetal demise."

Fortunately for Gianna Jessen, her abortionist wasn't so careful. And she's alive today to tell about it.

Try telling Gianna that she was a mistake. Try telling her she ought to be dead. Talk to her about bodily integrity. Talk to her about fetal tissue research, Mr. President.

She has given joy to her family and joy to those who have met her.

Mr. President, I ask unanimous consent to have printed in the RECORD

newspaper articles pertaining to Gianna Jessen.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the San Antonio Light, Oct. 5, 1991]

ABORTION SURVIVOR, 14, DENOUNCES PROCEDURES DURING 3D TRIMESTER

WASHINGTON.—A 14-year-old California girl whose mother tried to abort her in the third trimester said Friday her survival was proof that fetuses were more than just "blobs of tissue."

Gianna Jessen of San Clemente said she did not blame her natural mother, who was just 17 when she underwent a saline abortion while 24 weeks pregnant. At birth, Gianna weighed just 2 pounds and had spina bifida, a spine defect, and a mild case of cerebral palsy.

Michael Levitt, science information officer at the March of Dimes, said spina bifida develops much earlier in gestation than the 24th week and that a trauma in the mother's uterus at that time could not cause the defect. However, he said such a trauma could result in cerebral palsy.

"A person who has an abortion is a person without hope," said Gianna, an energetic, blonde ninth-grader who has stopped attending local schools to travel internationally with her adoptive mother, telling stories of her survival and nurturing a singing career. "I feel it's only God that saved my life," she said.

Roberta Synal, a spokeswoman for Planned Parenthood in New York City, said only about 160 third-trimester abortions are performed each year—representing just one one-hundredth of a percent of all abortions.

She said the Roe vs. Wade Supreme Court decision made abortion legal everywhere in the first three months; let states regulate second trimester abortions and allowed third-trimester abortions only in cases of severe fetal abnormality or when the mother's life is in danger.

Susan Smith, associate legislative director of the National Right to Life Committee said that while there were no hard figures on third-trimester abortions, she had seen estimates ranging into the thousands.

Gianna was brought to Washington by the Abortion Is Not Family Planning Coalition of anti-abortion groups in advance of nationwide protests Sunday.

WHEN GIANNA TELLS HER STORY

(By Cal Thomas)

Pro-choice activists and their soulmates in Congress and in the press are treating the likelihood of Judge Clarence Thomas' confirmation to the Supreme Court as they might a visit from Freddie Krueger, the main character in the "Nightmare on Elm Street" movies.

Columnists Ellen Goodman, Richard Cohen and Anna Quindlen—part of the "don't mess with my body" brigade—are sounding apocalyptic warnings, raising the specter of coat hangers and bleeding women in back alleys, a scenario to delight Freddie's sick mind.

In a New York Times column last Saturday, Miss Quindlen went ballistic over the possibility that abortion on demand might again be curtailed. She called abortion "the issue of our lives" and a matter of "bodily integrity."

Miss Quindlen fears that Judge Thomas' will be the fifth or sixth vote to overturn Roe vs. Wade. She notes his compassion for accused criminals being transported to his courthouse ("But for the grace of God there

go I", said Judge Thomas) and writes, "I wish I had any confidence that he considered those of us who feel that way when we see a group of desperate women in a clinic waiting room."

Such statements cannot go unanswered. To assert that a woman in a crisis pregnancy has only one option—abortion—is false.

First, she has the right not to get pregnant in the first place, even if she gives up those rights, she has still other options. She has the right to place the child for adoption or keep the child herself. She has the right to seek out assistance at one of several thousand crisis pregnancy centers, whose services are free, unlike those of the abortionist, who demands payment for his grisly services.

Miss Quindlen and the other hysterical commentators who fear repeal of Roe by the justices who work in that building on Washington's First Street should meet 14-year-old Gianna Jessen of San Clemente, Calif. Gianna was aborted by her 17 year-old mother in the third trimester of her pregnancy.

Gianna survived the saline abortion and was diagnosed as having cerebral palsy (due, she says, to loss of oxygen from gulping saline) and spina bifida.

She was placed in a foster home, and after several surgeries (she still walks with a pronounced limp and faces another operation), she was adopted by the daughter of her foster mother. Gianna is pretty, charming, intelligent and thrilled to be alive. She travels with her adoptive mother to tell people, as few others can, about the horror of abortion and of alternatives to the procedure.

Try telling Gianna she was a mistake and that she ought to be dead. Talk to her about bodily integrity. She has given joy to her family and delights all who meet her. When she tells her story, adults weep.

Gianna meets many women who have had abortions. "I always tell them I understand," she says, "because they didn't know what they were doing. I'm not trying to put a guilt trip on them."

Anna Quindlen says it is insulting to tell a woman she can't abort her unborn child. A greater insult is to tell someone like Gianna Jessen she is a mistake, the result of a botched abortion who ought to be dead. The greatest insult is to those who did not survive their abortions.

Why was Gianna Jessen not considered a person while inside her mother, but seconds later as she emerged gasping for breath she inherited the full protection of the law? This is the stuff of which nightmares are made.

#### ABORTION SURVIVOR

(By Callista Gould)

Fourteen years ago Gianna Jessen narrowly escaped from an abortion clinic. Gianna was not a "patient," but a baby, scheduled to die by saline injection. Now a bubbly teenager, Gianna travels around with her adoptive mother, Diane, to different churches and organizations, telling her story as an abortion survivor and delighting audiences with her singing.

Gianna's birth mother was in her late-second or early third trimester when she was injected with the saline solution that was supposed to kill her child. Incredibly, Gianna survived and was rescued by a worker at the clinic. But the injection left her with cerebral palsy, which impairs muscular control and coordination.

After three months in the hospital, Gianna was placed with Penny, (Diane's mother) who has been a foster parent specializing in high risk cases for 24 years. As soon as Gianna arrived, Penny called Diane.

"She said, 'I got this new little girl and she's so cute!'" Diane remembers. "Mom would have her sitting up—she had these long curls, and she would have a pillow in front of her and a pillow behind her and she was kind of folded over."

Although doctors said Gianna would never walk, Penny resolved to prove them wrong. "My mom worked with Gianna and worked with her and she'd bring her to therapy every day," said Diane.

When Gianna was three years old, Diane, with a eight-year-old daughter of her own, adopted her. And on the day of Gianna's adoption, she was able to walk out to Diane with the help of a walker.

Gianna did not learn about the circumstances of her birth until a few years ago.

When Gianna was younger, Diane told her that God had a plan for her and there would come a time when she would learn more about that plan. Then on Christmas Day, in 1989, while Diane was making Christmas dinner, Gianna came to her and said, "What's the true story about me?"

Diane approached the subject with hesitation. But before she told her anything, Gianna suddenly said, "I was aborted, right?"

Looking back, Gianna says, "It's like God just put it in my head \* \* \* I didn't cry or get hysterical."

"I knew there was something more than 'you were born with cerebral palsy,'" she continued. "I didn't know what it was, but I knew."

It was after Diane explained to her that she was an abortion survivor that Gianna began to feel that God had spared her life so she could speak out against abortion. Diane agreed.

"She has a responsibility \* \* \* to tell the story," says Diane. "And to let people know, hey, if you've never believed it before, please believe it—I'm alive, I was aborted, I'm alive—and what you're aborting every day are babies exactly like me."

Gianna first shared her story when she was invited to sing for a Crusade for Life dinner in 1990. Since then she has received invitations to speak before various churches and organizations. At National Right to Life's recent convention in Atlanta, she spoke at a workshop and sang at the final banquet.

Because Diane's mother was initially Gianna's foster mother, reporters often badly confuse the situation. To clarify: Gianna had a biological mother, who aborted her, an adoptive mother—Diane—and a foster mother, Penny, who is Diane's mother. Or, as Gianna puts it, "The woman who was my foster mother is now my grandmother."

Mr. SMITH. Mr. President, America is perched on the brink of a decision over whether to enact a Federal policy legalizing the harvest of fetal tissue from induced abortions for research. The medical community is diligently trying to find whatever cures are available for debilitating diseases. However, there is a moral line we cannot cross—even in medical research.

It is true that President Clinton will sign it, and it can be for any reason. We can have an abortion and donate tissue to a bank for fetal tissue for sex selection. If the young woman decides she does not want a child that is a girl, she can have an abortion, but we can save lives; we can give it to a fetal tissue bank.

Fifty years ago, the world repulsed at revelations of Nazi scientific experiments on living human beings. After that time, the civilized world decided that human tissue could not ethically be used for medical research or transplantation without the consent of the subject. Before we begin carving holes in that doctrine and abandon our code of ethics, we should take a very long look at the potential consequences to our society.

At the outset, let me say that I am aware of the suffering of many Americans whose friends and families struggle with diabetes, Alzheimer's disease, Parkinson's disease, and other crippling illnesses. I have an uncle who has had diabetes for over 40 years. My father-in-law has Alzheimer's disease, so I can sympathize with those who cling to the hope that using tissue from preborn children can provide the miracle cure which can return their relatives to productive and healthy lives.

Were my father-in-law able to stand here and comprehend this issue and speak—and he cannot—I think he would say—in fact, I know he would say—that he would not want to see an unborn child lose its life for him.

Because of my own experiences, I particularly object to the way operatives have manipulated extremely sick people to their own political ends in connection with this controversy.

We know how the President feels on this issue, and the Senate knows how the President feels on this issue. How many times do you have to rub his nose in it, Mr. President? It is political. It is the worst form of politics. It is disgusting, and I am willing to take the hit. I am willing to take the bullets to stand here, and I am willing to stand here and take the criticism from the Senator from Massachusetts and the majority leader for Gianna. I will take it, and I am proud of it.

We have received sanctimonious platitudes from the pro-abortionists about whether this dangerous step would be useful in treating victims of disease, whether it would encourage a substantial increase in abortions, and whether the tissue needed for transplants is just as available from other sources. But their assertions are devoid of empirical backing and contradict the evidence we have. The truth is as follows:

First, unless the method of performing abortion in America is altered in a way which would increase the danger to the mother, the abortion procedure ensures that most aborted infants cannot be used for transplant or research. Most abortions performed in the United States each year are performed with a vacuum suction machine that dismembers and destroys much of the fetal tissue, making it unusable for research or transplantation. Only 10 percent of early aborted babies would be usable for transplants under current

practices, according to Janice Raymond—a feminist women's studies and medical ethics professor at the University of Massachusetts. Dr. Raymond also warned that "the number of elective abortions will never be enough for the amount of fetal tissue that doctors need." So it is all documented.

Second, it is a fallacy to suggest that fetal tissue implantation has been demonstrated to be some panacea to a wide range of neural maladies. Claims to have successfully treated disorders in the body's chemistry or nervous systems through transplants are still the subject of hot debate in the medical community. Although two recent studies argued that modest improvements in a small number of Parkinson's patients had been achieved by fetal tissue transplantation, the fact is that only a very small number of fetal tissue transplants have occurred in the United States over the past 20 years.

In the *Medical Journal Lancet*, Dr. C.G. Clough, a British physician and researcher, concluded:

Although 100 operations with fetal implants have now been completed, there is little evidence of implant survival. \* \* \* The technical difficulties of the procedure suggests that neural implantation is unlikely to benefit many patients with Parkinson's disease.

Third, new therapies could render tissue transplant obsolete. For example, just last month, NIH scientists announced an exciting new breakthrough in the use of GM-1 ganglioside to cure Parkinson's disease—a breakthrough which was achieved in spite of the moratorium and which will be pursued without fetal tissue from induced abortion. In the past few months, the possibility of coaxing nerve cells to regenerate themselves has also been achieved for the first time. We should not allow the focus on tissue transplanted from induced elective abortions to detract from ethically acceptable and innovative new research efforts.

Fourth, allowing the use of tissue from induced abortions could allow a woman in an emotionally wrenching situation to justify and feel good about the abortion, much like the feeling that one gets from giving blood. That is not what we need, Mr. President.

If this research and transplantation were to become prevalent, it could produce an escalating societal demand for aborted children, adding a new factor which could tilt the decisions of individual women in favor of abortion. For example, if a woman with an unwanted pregnancy is struggling to determine whether or not to have her baby or abort it, being told that her preborn infant's tissue may be used in medical research could push her to elect abortion and an innocent human life would be lost.

Although abortion proponents reject the idea that fetal transplantation pro-

cedures could increase the incidence of abortion, Harvard Law Professor Laurence Tribe—testifying in favor of the so-called freedom-of-choice act—disagreed. He stated:

Each currently lawful abortion that State or local rules might delay or prevent represents a potential source of \* \* \* liberty-enhancing and lifesaving medical information. \* \* \*

Fifth, pro-abortionists also argue that the propriety of using the tissue can be divorced from the tissue's source. They maintain that, because abortion is legal, the only question is whether aborted tissue will be wasted or used. This argument simply does not pass ethical muster. If induced abortions are unethical, tissue harvesting from those abortions is also unethical.

Sixth, despite all of the representations to the contrary, the fact is that usable fetal tissue can be produced without resorting to induced abortions. In an April 20, 1989, article in the *New England Journal of Medicine*, the Stanford University Medical Center Committee on Ethics stated:

If tissue from spontaneous abortions could reasonably satisfy medical demands in both quantity and quality, it would be preferable to avoid the ethical problems of using tissue from induced abortions.

All of us support an increase in efforts to develop treatments for victims of debilitating diseases.

And comments to the contrary for those of us who oppose this bill on these grounds are simply wrong, misleading, and inaccurate.

However, this research and transplantation can be done with tissue from spontaneous abortions, ectopic pregnancies, and cell cultures without any of the ethical implications of using tissue from induced abortions. There are at least 100,000 ectopic pregnancies a year—at least 1 to 2 percent of which would produce tissue suitable for transplantation. In three hospitals alone, there were 3,518 miscarriages over a 10-year period; and 5 to 7 percent of these were found to produce tissue suitable for transplantation. Furthermore, the cells of a single donor can be cultured to benefit as many as seven recipients.

Since April 1988, when the moratorium on the use of tissue from induced abortions was implemented, the National Institutes of Health have spent more than \$23.4 million to support 295 research projects involving the use of human fetal tissue using alternative sources. Scientists such as Yale University Medical School Associate Dean Myron Genel concede that federally funded fetal transplant research has continued unabated. The central laboratory for human embryology at the University of Washington has supplied nearly 10,000 fresh human embryonic and fetal specimens to hundreds of clients, even though it says it does not provide fetal remains from elective abortions.

Seventh, notwithstanding the safeguards contained in the fetal tissue bill, there is a serious danger that, if this procedure became popular, women could become incubators for the new demands of medical science. As we are seeing with respect to efforts to alter last year's civil rights compromise and 1990's budget summit agreement, compromises such as the fetal tissue safeguards can be changed. Janice Raymond has stated:

Women become the resources whose bodies are mined for scientific gold handmaidens for medical procedure transplants.

Mr. President, why has such an obscure and untried technology as transplanting human brain cells being treated as a miracle cure? One suspects that, in the case of many pro-abortion groups, this is hardly more than a cynical attempt to enlist another group of hope-starved Americans into efforts to achieve abortion on demand. The radical abortion-on-demand lobby is taking advantage of the highly charged emotions surrounding the issue of medical research in order to further their own agenda of abortion at any time, for any reason.

Using the remains of an aborted child for medical research is just one more way to justify the abortion of unwanted babies—abortions conducted for the convenience of the mother rather than respecting an innocent human life. It is time to end the manipulation.

For the reasons I outlined, I will vote against this conference report and I will vote to sustain the Bush administration's inexorable veto. Federal funding of fetal transplantation experimentation would allow taxpayer's dollars to provide for a system of treatment that depends solely upon a steady and increasing flow of aborted babies. This will create an higher societal demand for aborted infants. Surely, America has higher ethical standards and more important national priorities than harvesting of preborn children for medical spare parts. I commend President Bush for having the courage to stand up and say that he will veto this legislation.

The PRESIDING OFFICER (Mr. WELLSTONE). The Senator's time has expired.

Mr. KENNEDY addressed the Chair.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. KENNEDY. Mr. President, how much time remains?

The PRESIDING OFFICER. The Senator has 12 minutes.

Mr. KENNEDY. Mr. President, I have been around here long enough and participate in numerous debates, and one of the techniques which is often used, and is being used at the present time, is to misrepresent what is in the legislation and then disagree with it. That is just what we have just witnessed.

Mr. President, I ask unanimous consent to have printed in the RECORD all of the protections that are included in

the legislation. These protections are the recommendations of President Reagan's own task force to ensure that there will not be any inducement for any woman to have an abortion for the purposes of providing tissue for fetal transplantation research.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

SAFEGUARDS AND GUIDELINES ON FETAL TISSUE RESEARCH

1. Provisions to assure informed consent of donor, researcher and donee; certification by attending physician; audit by Director of NIH; and compliance with state and local law.

2. Informed Consent (in writing) of Donor. Donor willing to donate such fetal tissue for research.

Donation made without restriction regarding identity of recipient, and donor not informed of identity of recipient.

3. Certification of Consent by Attending Physician.

Decision for abortion made prior to requesting or obtaining consent for donation of tissue.

Full disclosure made of any medical risks and physicians interest in research.

Attending physician or researcher will not alter timing, method or procedure for terminating pregnancy solely for purpose of fetal tissue research.

4. Informed Consent (in writing) of Researcher and Recipient.

Researcher must provide signed statement he or she is aware that tissue to be utilized is human fetal tissue, obtained subsequent to a spontaneous or induced abortion, and tissue donated for research purpose.

5. Secretary of HHS, though Director NIH, shall require audit of each grantee applying for or receiving grant involving fetal tissue transplantation research to assure compliance with above provisions.

6. Such research must be conducted only in accordance with applicable state law.

7. Measure makes it a criminal offense for a person to solicit or receive donation of human fetal tissue for transplantation if: (a) donation is made pursuant to promise to transplant tissue into specified recipient or relative of donor; or (b) such person has paid any part of costs of the abortion.

8. GAO to conduct study on adequacy of safeguards.

Mr. KENNEDY. Mr. President, Senator THURMOND, who has been one of the leaders of the right-to-life position here in the Senate over a number of years, sent to the Members of the Senate a letter supporting the lifting of the ban on fetal tissue transplantation researches.

He points out in his letter:

I have been and continue to be a supporter of efforts to limit abortions in this Country. At the same time, I supported this measure and am writing to urge your support of this legislation and Title II of the bill, which includes a provision that would lift the current moratorium on Federal funding for human fetal tissue transplantation research.

I chose to support this measure because this type of research holds a great deal of promise for curing diabetes, a chronic and often fatal disease that affects approximately 14 million Americans, and several other serious diseases. My daughter, Julie, has suffered from diabetes for three years. I

believe that for the sake of Julie and other individuals, who suffer from diabetes, Parkinson's, Huntington's and Alzheimer's diseases, we cannot afford to lose this opportunity to develop a cure.

After careful analysis, I concluded that this legislation should not be lumped together with the debate about abortion. Title II of the substitute incorporates guidelines and safeguards to keep the decision to terminate a pregnancy independent from the retrieval and use of fetal tissue.

I ask unanimous consent that Senator THURMOND's letter be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,

Washington, DC, March 3, 1992.

DEAR COLLEAGUE: In March, the Senate may consider H.R. 2507, the "National Institutes of Health Reauthorization Act of 1991, which was recently approved by the Committee on Labor and Human Resources. I have been and continue to be a supporter of efforts to limit abortions in this country. At the same time, I supported this measure and am writing to urge your support of this legislation and Title II of the bill, which includes a provision that would lift the current moratorium on Federal funding for human fetal tissue transplantation research.

I chose to support this measure because this type of research holds a great deal of promise for curing diabetes, a chronic and often fatal disease that affects approximately 14 million Americans, and several other serious diseases. My daughter, Julie, has suffered from diabetes for three years. I believe that for the sake of Julie and other individuals, who suffer from diabetes, Parkinson's Huntington's and Alzheimer's diseases, we cannot afford to lose this opportunity to develop a cure.

After careful analysis, I concluded that this legislation should not be lumped together with the debate about abortion. Title II of the substitute incorporates guidelines and safeguards to keep the decision to terminate a pregnancy independent from the retrieval and use of fetal tissue. For instance, the bill would prohibit payment, or other forms of compensation for fetal tissue. It would prohibit the pregnant woman from designating the recipient of the fetal tissue, and it would require that informed consent to donate the tissue be obtained only after the decision to abort has been made.

I encourage you to carefully examine the safeguards. I believe that you will conclude, as I did, that supporting H.R. 2507 is the proper course. For your information, the Juvenile Diabetes Foundation's position paper on this issue is enclosed.

Sincerely,

STROM THURMOND.

Mr. KENNEDY. So no matter how many times the Senator from New Hampshire mentions that the legislation encourages abortions, it clearly does not. Many pro-life Senators have reviewed the language of this legislation and they have concluded that it will not promote abortions.

Here is what Senator HATFIELD had to say:

Mr. President, I know of few issues I have had to wrestle with more in the light of conscience and belief and conviction than on this question of fetal tissue.

I stand here today as one who is unabashedly pro-life. I voted every time for the Hyde amendment and other amendments that delineate through so-called pro-choice and pro-life, both of which are oversimplified labels.

That is a pretty good line, as well.

I have worked throughout my career to promote pro-life causes because of my deep respect for life. I believe in the sanctity of life. A unifying goal of my political career has been to improve the quality of life for my constituents and all Americans and all humanity everywhere.

I worked to achieve this goal by promoting and supporting world peace, disarmament, improvements in education, access to health care, and increased medical research.

Then he continues:

First, fetal tissue transplants hold the promise of saving life, and second, this research will not promote abortion. Having gone through this process of investigation, study, and deliberation, I strongly urge my colleagues to take the time to study this issue for I believe it is of great importance.

Mr. President, this is an issue about research, about life, not about abortion. The Senate has debated this issue sufficiently.

Finally, Mr. President, I listened to my colleague, the Senator from Utah—I wish he were here—I listened to his comments and statements, in saying: Well, it does not really make much difference if we move ahead with this legislation, because the Appropriations Committee has addressed many of these issues and the NIH is already working on them.

That just is not the case.

The case is that the NIH has made a very modest—very modest—downpayment on the whole range of women's health issues. I commend Bernadine Healy for the leadership she has provided.

The progress at the NIH on addressing research on women's health has been very slow, not nearly of the dimension, scope, purpose, and inclusion that this legislation provides. That is very important, and we should not delude ourselves to the contrary; as well as the fact that many of the provisions that have been included in this legislation are not getting the attention they deserve by the NIH today.

There is no cancer registry; there is no prostate cancer prevention program; the prostate cancer research program is relatively small; there is no multi-purpose juvenile arthritis center program; there is no obstetric and gynecology program. The NCI only spends \$133 million for breast cancer research—one in nine women develop breast cancer. NIH has supported research projects that exclude women and minorities.

We spend \$9 billion for intramural and extramural programs at the NIH. I am strongly for it. I would like to see the NIH expand and intensify their efforts, particularly in the areas of women's health, cancer, heart disease, and in the other areas which were a part of our initial bill that was vetoed by the President.

I am appalled that out of \$9 billion NIH budget that we are spending less than 200 million on breast, ovarian, and other gynecological cancers and less than 10 million for fetal tissue research.

This legislation is important, and is necessary to address the research needs of millions of Americans with diabetes, arthritis, heart disease, cancer, Alzheimer's, Parkinson's, multiple sclerosis, lupus, and other devastating and often incurable diseases.

I will submit for the record a comprehensive summary of the important initiatives in the legislation.

Finally, Mr. President, we should be clear about what is going on and what is not going on. There is limited research using fetal tissue being pursued at the NIH—it is somewhere around \$10 million—but there is no NIH funds being used for fetal tissue transplantation in humans.

The interesting thing is to hear our friend from New Hampshire talk about all of the dangerous things that could happen with this legislation. The fact is, with this legislation, we establish safeguards and criminal penalties, not only on research conducted or supported by the NIH, but for privately on what is being done by the NIH funded research.

These protections are not in place today. They are not in the law. They depend upon local and State restrictions. And most States have not established guidelines for fetal tissue transplantation research.

So, one of the reasons that a number of our colleagues who supported the Hyde amendment and now support lifting the ban on fetal tissue transplantation research is the safeguards and criminal penalties established by this legislation. Without this legislation, there are no safeguards in place. They will not be put in place today as a result of the actions that were taken by those who oppose that position.

Mr. President, again, I express our appreciation to many of our colleagues: Senator ADAMS on our committee who did very important work in developing the provisions on the fetal tissue transplantation; Senator MIKULSKI, who has probably made the greatest contribution in developing the women's health initiatives, and many others who participated on our committee. I would also like to especially thank the staff: Grant Carrow, Van Dunn, Robin Lipner, Nick Littlefield, Phyllis Albritton, Jay Himmerstein, Laura Brown, and David Nixon for all their efforts. I am grateful to all of them and we look forward to addressing this issue as the first order of business in the next session.

Mr. President, I yield the remainder of my time.

Ms. MIKULSKI. Mr. President, a veto of the NIH bill is a veto of the American family. To filibuster the NIH bill

is also a travesty for American families. No one who has ever watched a loved one suffer from a life-threatening disease would ever say no to a measure that so clearly saves lives. No one who cares about families would ever stand in the way of curing diseases that tear families apart.

NIH saves lives and cures diseases. NIH is in the business of saving families from the heartbreak of very serious illnesses. The kind of diseases that destroy families.

The President's veto stalled lifesaving research on often fatal diseases such as breast cancer, cervical cancer, and multiple sclerosis.

The delays caused by those who do not want this bill passed have killed this legislation and will mean that these changes will have to wait until next year.

Our National Institutes of Health do research on diseases like prostate cancer and lung cancer. Prostate cancer is an increasingly large threat to men—our fathers and husbands.

These are diseases that take husbands from their wives and attack the men we love. The President's veto came near Father's day. And many families won't be able to spend time with the fathers and husbands they have lost to cancer, Alzheimer's or other diseases.

But this is not a gender issue. This is a family issue. Men and women stood by the congressional women 2 years ago. On the day when we women marched up the steps of the NIH asking to be included in medical studies and cures for repugnant diseases.

Together we asked that women be included in such fundamental research as heart disease and aging. We knew what the statistics were for men—but no one had ever bothered to look at the fact that women get heart disease too. And in ever increasing numbers.

Together we asked that the aging process of women be studied like it had been for men. Together we asked for a change. A change in the program and a change in attitude.

Funding NIH is the way to make that change. It is a family issue. The cure of Alzheimer's is a family issue. Ovarian cancer is a family issue.

The President's veto killed a measure that included \$300 million for breast cancer research. Breast cancer affects one out of every nine women in this country. That money would have helped set up basic research centers. That money would have helped set up basic research centers. Centers where our doctors and technicians would trace the genes that cause cancer. Develop the drugs to slow the cancer down. And may even find the cure.

When you talk to Maryland families the way I have, you learn that losing a wife, a mother to breast cancer is devastating to families.

What else have the President and the Members of the Senate opposed to the

bill signed away as worthless? They have signed away the office of women's health research, research on gynecological cancers, and possible treatments for osteoporosis cancers, and possible treatments for osteoporosis and infertility.

And he has signed away jobs. There are 13,000 Marylanders working at NIH. That means jobs today.

The President claims that he believes families are important. But not important enough to help cure the diseases that tear them apart.

Finding cures for diseases like Parkinson's and Alzheimer's keeps people out of nursing homes. This not only saves families, it saves lives and it saves money.

I look forward to successful passage of the NIH bill next year at the beginning of the 103d Congress.

Mrs. KASSEBAUM. Mr. President, I just want to say that I very much concur with the plan announced by the majority leader to make reauthorization of the National Institutes of Health the first order of legislative business when the 103d Congress convenes in January. The important initiatives in this legislation, particularly with respect to women's health, will offer a very positive beginning to the new Congress. In addition, we will have the opportunity to move research in the critical area of fetal tissue transplantation research, which holds so much promise for individuals suffering from diabetes, Parkinson's and other disabling conditions. As the probable ranking Republican member of the Senate Labor and Human Resources Committee, I look forward to playing an active role in moving ahead with this important legislation.

The PRESIDING OFFICER. The Senator from New Mexico is recognized.

Mr. DOMENICI. Parliamentary inquiry, Mr. President. What is the issue before the Senate?

The PRESIDING OFFICER. There is no pending business before the Senate.

Mr. DOMENICI. Mr. President, I ask unanimous consent I be permitted to speak for up to 15 minutes as in morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### THE COST OF NEW JOBS

Mr. DOMENICI. Mr. President, as we prepare to leave and go to our States, I would like to leave one thought about the current state of the economy and what is happening right now in terms of why the economy is not adding more jobs. It is the issue, which goes unnoticed, that I choose to call the indirect cost of creating a new job. Even though the news has not been good about new jobs in the American economy as measured by employment, the unemployment rate declined to 7.5 percent in September. That was down from 7.8

percent, the high point over the last 2-year recession/slow-growth period. Nevertheless, employment growth has clearly been unsatisfactory, even slower than can be explained by the growth in economic activity as measured by GDP, our broadest and most widely accepted measure of the economy.

Gross domestic product has grown for the past 5 quarters following quarterly declines in late 1990 and early 1991 that marked the recession. While GDP growth has averaged a modest 1.6 percent over these 5 quarters, employment has hardly increased.

During this period of expansion something very different has to be happening in the economy. Employers clearly must need more workers than they are hiring. I believe we now have proof that another phenomenon is setting in that is very important for us to consider if we truly want the American economy to produce more jobs as it grows. One thing that is happening right now—believe it or not, on the plus side—is that productivity is going up. And when productivity goes up, unless the economy is growing more than enough to accumulate the positive effects of that productivity, you hire fewer people. And we all want more productivity because it yields the kind of growth that increases our wealth dramatically without inflation. It has a big dampening effect on inflation.

But that is not what I am talking about. What I am talking about is a finding by the Federal Reserve about how job gains during this recovery differ from past recoveries. The implications are that 2 billion hours of work that would have gone to new employees in this recovery have gone also to overtime and to non-full-time workers.

Let me talk about that for a minute. If you are an employer and your business is going up, there are four things that can happen with regard to your employees.

One, if your business goes up and you have higher productivity, you do not increase the job force. They are doing more per unit of time.

Or, two as the work goes up you hire more workers.

Or, three, you take your existing work force and you work them longer—called overtime.

Or, four—a phenomenon is occurring that is recent in American economic history. Businesses hire non-full-time workers. For example: A university will not hire a new professor and put that professor on all of the fringe and health coverage benefits—covering the pension plan and all the other things. Instead it will hire a new professor and say if you want to work, here is your salary, but we are not going to cover you with a pension, we are not going to cover you with health care and this is your contract. You agree to it or do not agree to it. And we are not going to cover you with other things that we

are paying our other employees. Take the job or not.

This is a growing part of the American job market. It is happening because the cost of new employees is going through the roof. Not the hourly wage, not what they take home, but what the employer has to pay aside and apart from the salary to the workers.

What we know is that—if we were to take the 2 billion hours of added work that is now being spread out among the work force of America, and if that had gone to new employees, as it has in the past, we would have added 1 million employees. One million new employees would have been hired, instead of the anemic increase we have gotten.

This economy has generated enough growth, even in its anemic state, so that we could be saying 1 million new jobs have been added to the economy. But they were not added because the employers of America, large companies and small companies, have decided that rather than hire new workers, and create new jobs, they choose to work the existing work force overtime because it costs so much to hire one aside from the salary.

We all ought to be wondering what that means for the future. It means a couple of things to this Senator. One, before you pass anymore mandates on the employers of American workers, you better consider seriously whether the new mandates, all made in the name of a good cause, will cause more harm than good because employment will be diminished. The new mandates that the employer has to pay will cause that employer to say I cannot afford new workers.

I will give you a couple of mandates that are clear, patent, unequivocal, and you ought to watch out for them.

The combined employer-employee payroll tax rate, FICA, and other things that we mandate, went up 2 percentage points. We started with 13.4 percent of payroll at the beginning of the last decade. Today that same mandate is 15.3, almost 2 percentage points higher. If we can take 2 percentage points off the payroll costs for American businesses today, they would have hired more than the million that I just spoke of. This means that this mandate has had a big impact.

Now I want to explore the one that I believe is truly wreaking havoc with new jobs in the United States. All of our employers, large and small, face two choices: "One, cover your employees with health care just like you did last year. You did not have to, but you did because you want to put health care in the packet of fringe benefits going to all of your employees. This year you have to put the same health care on, but it has gone up 20 percent. You have two choices. You keep the coverage, increase the cost 20 percent and do not hire any new workers. Or you lower the health cost dramati-

cally, cutting your workers off from some of the benefits and narrowing the package down. The tradeoff is less health care protection, more jobs."

As we think about health care reform, we had better consider seriously how to reduce its spiraling cost, not just how do we cover more people. If you have to change it dramatically, then do so, but get the spiraling cost of health care off the backs of America's employers or they will, for the foreseeable future, pay for health care and hire less people.

Mr. President, this is a big-ticket item, not a little item. Some phrase it as competitiveness and noncompetitiveness. I choose to say that it is literally more jobs or less jobs. More jobs, or a continuation of the type of health care—with its spiraling costs—that is imposed on employers today.

I hope everyone will understand that the American economy is not magic. Employers, large and small, have no chain that they pull that will produce dollars so they can hire more workers and increase their pay. They have to make more money and then they can hire more people, unless the cost of doing business goes up: costs such as mandated benefits of all types, regulations on business—some of which may not be necessary—and health care costs. The latter, although they are not mandated in many instances, are contractually agreed to and in other instances employers say we want our employees to have it. It is going up so fast as a cost of doing business, that it shrinks the available jobs.

I believe this is more than just a competitiveness issue with overseas businesses and countries. It is also whether American business, especially small- and medium-size firms, even as they grow in the amount of business they do, will add a requisite amount of new employees or will use up their new-found growth to just pay for health care and mandated costs.

Mr. President, it is serious enough, in my opinion, to cry out to the next administration at the start of the new year that we all hope there will be on the horizon a new initiative. It will say to the American people, there will be perhaps more sacrifice, more giving, but the future will have good, sound jobs on the horizon for America.

I think this issue of how much employers can bear by way of new costs for employment ought to be looked at from the standpoint of where are the diminishing returns. What are we asking of them that is not necessary and that costs money? Do we want all of those? Do we really want reform of health care so the costs go down. Or do we just assume, as some are doing, that it is going to continue up and it is a matter of who pays for it, the employers or the Government?

If that is the attitude, pay we will, not only in spiraling health care but in lost jobs.

## STRENGTHENING OF AMERICA

Mr. DOMENICI. Mr. President, for the last week or so, a fair amount of attention has been paid to a report called Strengthening of America. Senator NUNN of Georgia and myself were very privileged over the last 2 years to cochair that very, very significant undertaking. I believe the results have acquired a very significant amount of positive attention in the press and, thus, among the American people.

Frankly, I believe the time has come for us to take cognizance of the fact that we are living in a new era; that we are on the verge of a new century, as never before. The domino theory proved correct, only in reverse. One Communist dictatorship after another has been knocked down and replaced with free market democracies. As we look to the beginning of a new century, is so clear that America must start doing things differently or we will not be strong and we will have failed to provide the marvelous freedoms and governance to the people of this country, the great people of this country so we can grow and prosper.

We are on the verge of that era. That requires, in my opinion, that we do things differently. I think the people are tired of business as usual, even if they do not express it as such.

I saw an old Spencer Tracy movie, called *State of the Union* and it reminded me of our challenges today. Believe it or not I am going to quote from that old movie because it is relevant today. We all know how old Spence Tracy and his movies would be. In *State of the Union* Kate Hepburn played a newspaper publisher. She was trying to talk Spencer Tracy into running for President and Tracy gives a rousing speech. It is given to a huge Chamber of Commerce audience. He is talking about our country and what is wrong with politicians. Imagine Spencer Tracy. In his prime. Delivering this message:

Politicians, instead of trying to pull the country together, are helping pull it apart just to get votes. To labor, they promise higher wages and lower prices.

To labor they promise higher wages and lower prices. To business, higher prices and lower wages. To the rich, the agenda is let's cut taxes. To the poor, we'll soak the rich. To the veterans, cheaper housing. To builders, uncontrolled housing prices.

This movie is an oldie, but it was prophetic about where we are in 1992. There is at least one special interest group for every program in the Federal budget, and they are all pulling the country apart.

We have too many of these activist groups that only care about their particular self-interest. What we desperately lack is one activist group that might put aside their personal agendas and do what's best for America. It would be a group which would urge its leaders to do what is right for the

country. This Strengthening of America Commission, of which I am cochairman, is an effort to create this type of activist coalition.

Reports are issued every day in Washington. But we intend this Strengthening of America report to be different. It is a blueprint action plan which we intend to follow up with enacting legislation. It is intended as an integrated package to get our fiscal house in order. The Commissioners are committed to working at the grass roots level to build support for the recommendations and policies advocated in the report. We are repeating the warning that Spencer Tracy gave to the American people in that very good movie that I just described.

This upcoming election may be the electorate's equivalent of the Strengthening of America Commission. This election could be a people's mandate to do what is right, to do what is in the best interest of America and the country as a whole. I hope voters will join in the mission of the Strengthening of America Commission.

In April, Senators NUNN, ROBB, RUDMAN, and I started talking about one of the Strengthening of America Commission's recommendations. This would limit programs which are on automatic pilot and are growing far faster than anyone ever imagined, 8 percent instead of a typical 2½ percent for other programs in Government. These programs currently make up 44 percent of the budget. By the turn of the century, they will be 55 percent of that budget.

Our proposal in the Strengthening of America report would reform these so-called mandatory spending programs. The two biggest and fastest growing mandatory programs are Medicare and Medicaid. Under the Commission's plan all mandatory programs would be allowed to grow for 2 years—during this time it is expected that Congress would enact health care reform legislation. Beginning in 1995, all non-Social Security programs would be capped. All people who are, or who would become eligible would continue to participate fully in these programs. The program specialists call this case load growth.

In addition, the proposal would let the programs all grow at the inflation rate and an extra 2 percent above inflation in 1994. This additional cushion is in recognition of just how difficult cost containment may be. In years after 1994 the cushion would be phased down—5 percent each year.

The proposal generated a great deal of attention. We were bombarded by special interest groups that have programs within this mandatory package that make up 44 percent of the budget today.

Senior citizens, educators, farmers, doctors, veterans, were all calling in to my office. Were they asking that we work together on this? Was that what they were doing? Again, to quote the

Spencer Tracy movie: "in a pig's eye." And just like that movie, "They are all scared together, all fighting each other—and us, each for fighting for the biggest bite out of the apple. Well, there are not that many bites in the apple."

This character in this old movie told professional politicians that when he goes up in an airplane he sees America, the real America. And again I quote from that old film. You can imagine him delivering these lines in that wonderful Spencer Tracy way. He said this is America: "Farms, factories, lumber, mines, railroads, business management, labor. Not one able to exist alone, but together working together with courage and imagination. That makes America. That's a great picture from the air."

We should adopt his perspective. That is what the Strengthening of America Commission is trying to do to get the big picture, get the great picture from the air, get everyone working together to accomplish what's needed and what's right.

Our interim Strengthening America Commission recommends zeroing out the deficit by reducing it \$2 trillion and balance the budget over 10 years, abolish the current income tax and its antisavings, antiinvestment, slow growth bias, and replace it with one geared for economic growth, a progressive based income tax; create a \$160 million endowment for the future which would be added to current expenditures by investing in education, research and development, child care, and begin a life cycle learning program, and break the old mold of the current education system.

Give national laboratories a new mission; make Washington work. It seems to me that a bright future is achievable, but it is not a sure thing. The cycle of tax and spend and spend has to stop. We have to figure out ways to make Government provide better services for less. And at the same time the country faces many challenges. We have to increase savings, remodel our education system, teach values to our young, increase the stock of capital backing up each American worker, faster commercialization of technology, producing better designed and higher quality goods.

We need to make sure our students get a good education so they can be competent workers.

We need better school-to-work transition for the 50 percent of our students who are work-bound not college bound.

We need to encourage U.S. companies to follow total quality management techniques.

As a government we need to reduce the deficit and put into place policies that encourage savings and investment.

But if the challenge is enormous, so too is the opportunity.

We need to create tax policies that gear our economy for growth. The Strengthening of America Commission was very bold. Their recommendation: Abolish our current income tax system. Instead of taxing income, this new system would tax spending; and savings would not be taxed until spent. The system would be similar to a universal IRA.

The Strengthening America Commission issued its report yesterday. To paraphrase from the report: We do not want to be the first generation to violate the trust and tradition that each generation will improve the nation for the benefit of the next. We do not want to be the first generation to tell our children and grandchildren that we sacrificed their standard of living for our own. We do not want to be the first generation to turn our backs on this country's fundamental identity as a land of opportunity.

I saw another rerun movie not too long ago, "The Way We Were" with Robert Redford and Barbra Streisand.

The lead character, Redford, playing an all America, all-around winner is compared to America.

"He was a lot like the country he grew up in, everything came too easy for him."

Looking to the next century, the movie wouldn't make that comparison. Things aren't going to be easy. Outside of Hollywood, they never were. But they can be prosperous if we all work together, with courage and imagination. That has made America great in the past. Such cooperation will make America great in the future.

Mr. President, I thank the Senate for the time, and I yield the floor.

The PRESIDING OFFICER. The Chair, in its capacity as a Senator from Minnesota, suggests the absence of a quorum.

The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. CHAFEE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. LIEBERMAN). Without objection, it is so ordered.

#### THE RECENT SHOOTING AND DEATH OF ANDWELE JACKSON

Mr. CHAFEE. Mr. President, 3½ months ago, I introduced legislation, S. 2913, to prohibit the sale, manufacture, or possession of handguns in our country. I have spoken previously in this Chamber on my reasons for authoring that bill.

Everyday, it seems, Mr. President, there is another reason, another new report about a senseless episode of handgun slaughter taking place in our country. Surely, upon reading these stories, we are all appalled. But these reports of handgun shootings across

our country come so steadily and so frequently that sometimes we almost become inured to the horrors described in this stream of articles.

I call my colleagues' attention to an article which appeared in the Sunday, August 30, edition of the Washington Post. It is a poignant and painful reminder of the real-life ramifications and what actually happens out there as a result of the prevalence of these handguns.

I think this article ought to be required reading for anyone who is desensitized by the daily reports of the slaughter and shooting that is occurring in our country.

This article describes the valiant struggle of a young man named Andwele Jackson. Andwele was 16 years old. He was shot in the stomach by an unidentified man with a handgun.

It occurred just after 1 a.m. on a Sunday morning, August 2. Andwele and five friends were cavorting along on Pennsylvania Avenue, having some fun—yes, it was late at night, but so what? They had just been to a nearby Burger King. They are teenagers, five of them were running along as carefree teenagers do.

Then the unthinkable—or what we once thought was unthinkable—occurred. A man with a .357 handgun stepped out from behind a tree. Moments later, Andwele Jackson lay in a pool of blood, barely breathing and unable to move his legs.

Bullet wounds and shootings that occur on TV or in the movies always appear to be neat and tidy. The bullet enters the body and follows a straight path and exits cleanly on the other side. And sometimes there appears to be little harm done. But this is not the way modern bullets work. Modern bullets do not behave like that when they enter a body. As the Post article states:

In real life, being shot is more like having an explosion inside the body—or more precisely, a chain of small explosions.

The bullet, which went in to Andwele Jackson's stomach tore apart his intestine, ripped a hole in his colon, smashed into his lower spine, rendering him paralyzed from the waist down. Pieces of the bullet lodged in one of his kidneys causing serious infection.

Here is a young man, 16, a good athlete, a fine young man, cavorting out with some friends; out from behind a tree steps a man with a handgun. Anybody can get a handgun. We all know that—no problem—and shoots one of these boys. It happens to be Andwele Jackson.

He was a gifted athlete who had had a fine career, and suddenly there he is. To regain the use of his legs he struggled through excruciating sessions of physical therapy. The pain that lingered after his surgery and from his infected wounds was so acute that he

could not sleep. Because he disliked drugs, he did his best to avoid pain killers, talking on the telephone instead—that was his therapy—and leaning on his mother, Joyce, for moral support.

Yet his courage was no match for the devastation the bullet wrought in his body. On Monday, 3 weeks after his shooting, while watching TV he suffered a massive heart attack brought on by a blood clot which started in one of his paralyzed legs and worked its way up to his heart and lungs, and he died.

There he was, Andwele Jackson, a good boy. Energetic, studious, well liked, excellent football player. He had stayed out of trouble. Now he is gone.

That is what happened to a promising young life in this city.

Mr. President, what we need to do is get rid of these handguns, altogether. There is no other way.

People can either care about this subject or not care about it. It seems to me there is no middle path. If we are going to do something about the problem, the only solution is to get rid of them as every other civilized country has—every other industrialized country. Do not permit handguns, do not permit the possession, do not permit the transfer, do not permit the production, do not permit the sale of handguns.

What is said to that is, oh, well, what will happen is the good people will get rid of them. There are 68 million handguns in our society today, and 2 million being added every single year. We have to stop this flow of guns. There is no question that there is a direct correlation between the availability, easy availability of these weapons and the deaths that are resulting from handguns.

The statistics show, for example, that if there is a handgun available in a house, the chances are 75 percent greater that a young person who might be contemplating suicide will, indeed, go through with suicide if the weapon is available.

So, it is my earnest hope that others will take up this cry. You might say here you are all alone. Nobody else is for this legislation. That may be. But I am absolutely convinced that the slaughter from handguns is going to affect, intimately, every single family in America. Perhaps not the mother, perhaps not the father, perhaps not the two children, or three children—but it is going to affect a cousin, or a nephew, or niece, or uncle, or the father, or the children directly. By that I mean somebody is going to be shot, or somebody is going to be held up by a handgun.

So my sympathies go to Andwele Jackson's family and friends for this tremendous loss they have suffered.

I commend Tracy Thompson, of the Washington Post, who wrote this article.

Mr. President, I ask unanimous consent that the text of this article be printed in the RECORD following my statement.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CHAFFEE. Mr. President, I do hope my colleagues and others across the country will read about this and more and more people will become concerned. Oh, they are concerned. I should not say people are not concerned—they are concerned. But what to do?

Some say have a registration of handguns. But that does not take care of the problem. They are still being manufactured, still being sold, still tremendous prevalence of these guns in our society.

Others say, have different penalties. For example, if a child in a house obtains a handgun, a 4-year-old child or a 3-year-old child—this has occurred, frequently. A 3-year-old child discovered a hidden handgun and shot another child in the family, or a friend. One of the answers is make the parents subject to a fine for not keeping the weapon under proper security conditions.

That is retrospective. Meanwhile the child has taken the gun and shot another child. That is not the solution.

I am convinced more and more as my colleagues study this problem they will come to the conclusion the only thing to do is ban them, get rid of them.

We will collect them. We will not get them all the first year. We will not get them all from every criminal right away. But eventually we will, because they will not be able to get any more.

#### EXHIBIT 1

[From the Washington Post, Aug. 30, 1992]

#### STRUGGLING FOR A MIRACLE.—BULLET'S PATH OF DESTRUCTION PUT LONG ODDS ON YOUTH'S RECOVERY

(By Tracy Thompson)

The shocking thing was the stillness of his legs. A moment earlier, Andwele Jackson had been jogging along Pennsylvania Avenue with his friends Jesse Davis and Xerxes Speller and some girls they'd just met at Burger King—running easily, just for fun, like the athlete he was.

Now he lay in a pool of blood on the steps of an office building in Foggy Bottom. All that bystanders could see were Andwele's legs—not moving, still as death—and his panting chest, exposed to the eyes of strangers and the ministrations of the D.C. Emergency Medical Services crew.

As soon as we passed this tree, this guy must have been waiting for us. I saw a guy step out and he had a nickel-plated .357 magnum in his hand," said Xerxes, tears coursing down his cheeks. "So we started running really hard, and when we got up there to the Exxon station, I looked and I just saw Jesse."

"I said, 'Where's Andwele at?'" Jesse said. Jesse ran back down the street, screaming, "Call 911! Call 911!" A couple walking on the other side of the street—nobody learned their names—heard him and called 911. The ambulance was there in minutes.

Both youths—who were 16, like Andwele—were breathing in gulps. The three girls they

had been with crowded around them, reaching out to link arms, huddling together. All five were crying. In the background, the medics loaded Andwele into the ambulance—just a shape on a stretcher now, inert but still breathing, an oxygen mask strapped to his face. It was 1:15 a.m. Sunday, Aug. 2.

It was the 175th shooting this year to which the Emergency Medical Services Bureau has been summoned—a routine event in one of the nation's most violence-plagued cities. For the medical staff assigned to Andwele's case, it would be another fight to salvage life from the physical devastation of bullets—which, contrary to popular myth, ricochet once they enter the body, splintering bones, shattering arteries, ripping through organs, disintegrating as they go, leaving fragments in their wake.

For Andwele and his family, this moment of seismic upheaval would place them on a weeks-long roller-coaster ride through laughter and anguish, through reality and belief in the miraculous—only to end in sudden desolation.

"Andwele is not the story," his father would say later. "The story is what's happening in 1992 to our kids."

Minutes after Andwele was carted away to nearby George Washington University Hospital, bystanders began drifting away. Detectives from the 2nd District combed through the dwindling crowd, talking to anybody who might have seen anything.

At that moment, Andwele's mother, Joyce Collette, was sitting on the side of her bed in Upper Marlboro, rehearsing the speech she was going to give Andwele when he finally got home.

A few weeks earlier, Andwele had celebrated an adolescent rite of passage: getting his driver's license. Then came Saturday night, and he had asked his mother if he could borrow her car. He told Collette that he and his friends Xerxes and Jesse would celebrate Andwele's new vehicular freedom by going to Georgetown, maybe hooking up with Andwele's girlfriend at a movie, or just checking out the girls and getting some hamburgers.

It has seemed harmless, and Collette had agreed. But she also had given him a midnight curfew. Now, he had violated it.

Listening for the slamming door, the footsteps in the hallway, she readied her speech. "Just get on in here, boy," she was going to say. "It'll be a long time before you see a car again, buddy."

The phone rang. It was Jesse, saying something about Andwele being shot.

"Oh, is that so?" Collette recalls saying, with the sarcasm born of having raised eight children, five of them boys, and hearing every conceivable explanation for all kinds of misbehavior. "This is an excuse I've never heard before, and I thought I'd heard them all."

"No, really," Jesse insisted. Then he put a police detective on the line. Hearing the stranger's voice, Collette felt herself go numb.

For a moment, she said, "I couldn't move." All she knew at that point was that someone had shot Andwele, that the bullet had pierced his intestines. That was manageable, she thought; a daughter-in-law had had intestinal problems a few years back that had finally been cured with surgery and diet.

It was not until Andwele's surgeon, Neofytos Theodore Tsangaris, came out of the operating room several hours later that reality began to hit. Tsangaris told her and the other family members who had begun to gather at the hospital about the intestinal

damage. The bullet had blown out part of his transverse and ascending colon, which had to be resected.

"Then he said, 'Now for the spinal injury,' and I said 'WHAT spinal injury?'"

The bullet also had ricocheted off Andwele's first lumbar vertebra, shattering it and—though his doctors did not know it then—scattering bullet fragments throughout one kidney. Everything below his first lumbar vertebra, everything from his waste down, was paralyzed.

"The prognosis is that he'll never walk again," Collette said the day after the shooting. She cupped her face in her hands. Her eyes filled with tears. Her voice faltered. She looked away, toward the window.

#### AN UNUSUALLY SENSELESS SHOOTING

In a city where senseless shootings happen every day, the shooting of Andwele Jackson made less sense than most. To the detectives, there was little to go on.

They had taken down a welter of descriptions of the gunman—everything from a tall, bald man to a short man with a gold tooth—from Andwele's friends, the three high school girls they were with and the few bystanders. Nobody had gotten the names of the couple who had heard Jesse's screams and called 911, and they were apparently the only other people who could have seen the gunman or given a description of the car he drove away in.

Then there was the location. "How did somebody manage to get themselves shot downtown?" one ambulance crew member exclaimed when the call had come in; the EMS crew that prowl the city's streets at night are more familiar with racing to shootings in Southeast Washington, across the Anacostia River, or in some neighborhoods in Northeast Washington.

The detectives questioned Andwele's companions about whether they knew of a possible motive, but they were stumped. To Collette, it was inconceivable that Andwele had done anything to provoke the shooting. He was not a bad kid, he did not have a police record, she said later. Although she and his father, Robert Jackson, had divorced when Andwele was 3 (she had later married Sam Collette), she and her ex-husband remained friendly and he was supportive of his sons. The troubles they had had with Andwele, she said, were the sort that would later become family jokes, not topics for police blotters.

There was, for instance, the time he and a friend had used an older brother's stash of condoms to water bomb the mailman. ("I opened the door," she said, "and there was the mailman, soaking wet, and not a cloud in the sky.")

Since age 6, he had been what his mother called "a football maniac." He had inherited his father's height and physical grace—as well as his dazzling, open smile.

Lately, his preoccupation with football had caused his grades at Largo High School to slip. Collette decided it was a good time for him to get to know his father better, so for the last year he had been living with Robert Jackson in Atlanta, attending Benjamin E. Mays High School.

New to the Atlanta school system, Andwele was ineligible for the football team. Instead, he discovered a new group of friends more studious than his football buddies in Maryland. He started studying—realizing, his father said, that he could get ego strokes for good grades as well as for being a superior athlete. His grades improved. He was starting to grow up.

But now, Collette was less concerned about tracking down the person who shot her son

than about dealing with the immediate medical crisis. Andwele had made it through surgery, but doctors told her that bowel wounds carried a high risk of postoperative infection. The normally closed intestinal tract is full of bacteria which, if spilled into the abdominal cavity, can create rapid, rampant infections. The bullet had fragmented, and not all the fragments had been found; there also was the ever-present risk of blood clots.

A practical woman, a teacher of history and civics at Francis Junior High School in the West End, Collette's mind already was pondering building a wheelchair ramp at home, getting a bigger car, maybe a van, and hassling with insurance companies.

"I'm used to chaos," she said. A small-boned woman, about 110 pounds, she wears jeans and work shirts, delicate gold earrings and a wrist full of jangling bracelets, her graying hair is in a bun. In her 47 years, she has raised eight children, only two of whom—Andwele and his older brother Michael, now 29—were biologically hers.

Her life had taught her to deal with reality, and she gained strength by thinking of Andwele's paralysis in practical terms. "We're going to break the news to him tomorrow," she said.

The doctors told her the bullet missed Andwele's heart by about an inch. "One more inch and we could be putting him in the ground. . . . We can deal with anything from there," she said.

#### "PRINCE OF GOOD FORTUNE"

In the end, Andwele's father told him the doctors said he would never walk again.

That was just part of the message Robert Jackson delivered. A tall man who makes a living as a metal sculptor, his speech was slow and thoughtful, his demeanor serious—until he turned on that open smile. A man of profoundly mystical beliefs, he habitually searched for meaning in every event, and this was no different.

The meaning of this event, he said, began with the name he had given his son at birth: Andwele Nkosane Mawi Ta-Nehesi. The words are an amalgam of African dialects that, loosely translated, mean "Prince of good fortune, brought by God from the land of our fathers."

So when Robert told Andwele what the doctors were saying, he was telling him the Official Version. There was no doubt in his mind that Andwele would defy all medical wisdom.

Andwele took the news stoically. Later, he would say that as soon as he came to a groggy awareness lying on the sidewalk in Foggy Bottom, he knew he couldn't move his legs.

Later he would ask Collette questions she couldn't answer: Will I be able to father children? Will I ever have bowel and bladder control? Intensely self-conscious, like most teenagers, the thought of having an involuntary bowel movement was too horrifying for him to contemplate.

"I want him to cry a little bit," Robert Jackson said. "Maybe he will later. He's strong beyond his years. He's a little boy, but he's also a little man."

#### A BULLET'S PATH OF DESTRUCTION

In the movies and in detective novels, bullets cause either instant death or minimal damage. In real life, being shot is more like having an explosion inside the body—or, more precisely, a chain of small explosions. Lucky shooting victims get a clean exit wound.

Andwele was not one of the lucky ones. On Aug. 12, 10 days after the shooting, he was fighting an intermittent fever, caused per-

haps by bullet fragments that a CAT scan found scattered throughout his right kidney. He also was having trouble keeping down solid food.

Even so, the physical therapy staff thought it was time for his first trip downstairs in a wheelchair. Getting Andwele moving as much as possible, as soon as possible, was of paramount importance. One of the common complications of paralysis is that pools of blood collect in the paralyzed extremities and form clots, which can break off into the bloodstream and—on occasion—hit a vital organ.

The physical therapy room was a large, mirror-lined room that looked like a cross between a gym and a nursery school for tall infants. Most of the therapy took place on large mats that rested on platforms about chair-height.

Three physical therapists, Nancy Koplin, Bruce Banks and Mary Francis Little, maneuvered Andwele out of his wheelchair and onto the side of one of the mats. It was a complex maneuver, made more so by the plethora of tubes and catheters connected to his body.

Andwele wore an intent, inward look, the look of someone who is afraid of falling and also of throwing up—both of which were very much on his mind. Still, he stole a moment to give his grandmother, Irma Jackson, a high-five. She smiled delightedly.

The therapists got him positioned sitting on the side of the mat, legs hanging down, torso upright. The simple act of sitting up, as any baby discovers, requires a complex interaction of muscles in the lower back, buttocks and legs, as well as the upper body. To help him gauge where his body was in space, Little brought a full-length mirror and parked it in front of Andwele. He froze.

"This is the first time I've seen myself," he said softly. It is a moment familiar to anyone who has been seriously injured—the wrenching experience of seeing a disfigured, disabled, helpless body in a mirror that does not at all match the self-image, a shock like seeing 20 extra years, or a body that suddenly is of the opposite sex.

Andwele stared at himself while Banks knelt on the mat behind him to hold him steady. There were the tubes to take in, his own face—swollen, tight with pain—and the helpless legs. Andwele, the former football maniac, the effortless athlete, was at that moment wearing a diaper.

"Let's throw a football," Koplin said, tossing him a bright green-and-pink foam rubber ball. As hard as it was to get out of his wheelchair a few moments earlier and sit upright, Andwele skillfully caught the ball, then threw it back in a perfect arc.

Suddenly, he felt dizzy and nauseated. The therapists helped him lie down. Lying there, eyes closed, fighting the nausea, he spoke.

"I want to be doing this," he said. His goal, Collette said later, was to be walking by his 17th birthday on Dec. 16—exactly four months and four days away. He was, she said, "absolutely determined."

#### NIGHTMARES AND LINES OF SUPPORT

"I don't feel like I'm getting better," Andwele said. It was Friday, Aug. 14. The fever had returned. Alternately chilled and sweating, Andwele sat up in bed with half an eye on the television. He looked exhausted.

In the hallway, Collette was conferring with Andwele's urologist. The theory was still that the bullet fragments in his kidney were causing the infection, and for that reason they were treating him with antibiotics and keeping a close eye on his white blood cell count. An increase would signal that the

infection was galloping out of control. For the moment, the doctor told her, all they could do was watch and wait.

"It's been a wacky day," Collette said a moment later. "We keep telling him he's getting better every day. But I think he's tired of a whole bunch of doctors coming in and out. He keeps saying, 'I can't get any sleep.'"

For one thing, there was the recurring pain from the huge incision in his abdomen that doctors had made when they were repairing the damage to his intestines. It started in the middle of his chest, zig-zagged to the right at his navel and went down almost to his groin. The staples that held the incision together had had to come out or risk creating another infection, so part of the incision still gaped open. Nurses packed it several times a day with sterile gauze, letting it heal from the inside out.

Most people would have asked for drugs, but Andwele disliked them and tried to avoid them. When the pain was bad, he relied on the telephone.

One night, he said, the pain had been so bad that he called his mother at home.

"Then I sort of hung up on her," he said. "So then she got frustrated and called the nurses' station. Then I called my best friend, this as about 10:15, and we talked until about 12. So then I went to sleep about 12:30 and slept until 2, and then I woke up and listened to the radio for a while. Then at 4 they came in to change my dressing, and I was up for a while after that."

Nights were bad for another reason, he added: the nightmares of that moment on Pennsylvania Avenue.

"BANG!" he said. "I see a big light—boom. And I wake up sweating. Or I just start running. I always wake up sweating." When that happened, he said, it helped for someone to be in the room to at least look at, perhaps get him a glass of ice water and talk for a moment.

Collette, who had watched him sleep more than anybody else, knew about the nightmares before Andwele told her.

"He twitches in his sleep," she said. "Always moving. Picking at the covers."

#### A DECLARATION OF INDEPENDENCE

Four days later—Tuesday, Aug. 18—Collette greeted a visitor with ebullience.

"Andwele escaped today!" she announced, laughing.

He had been in his wheelchair, coming back from physical therapy, when he decided to take advantage of his freedom from the intravenous tubes, which had been temporarily removed.

"The nurse said she looked up and he was at the elevator. She said, 'Where are you going?' and he said, 'Goin' roaming. I'll be back.'"

His exploration took him downstairs to the hospital lobby, where he sat and watched the constant foot traffic for about 20 minutes. Then he went back upstairs and headed off to the obstetrical wing, on the same floor as his room, and spent some time looking at the newborn babies. The escapade wore him out, but his mother was delighted. Every impulse toward independence, she thought, was "a positive sign."

There was no shortage of moral support. Friends crowded his room; his girlfriend, Jocelyn, visited almost every day. Like any teenager, Andwele was constantly on the phone. Once, a visitor to his room found him lying flat on his back, covers over his head, looking corpse-like—until he drew back the covers to reveal a telephone receiver at his ear, a finger at his lips warning the visitor to be quiet. He was grinning.

But recovery would take a lot more than moral support.

That reality began to sink in with the arrival on Saturday, Aug. 22, of a graying, beefy man who paused uncertainly at the door, as if he weren't sure he had the right room.

"Hi," he said, extending a hand. "I'm Michael Sullivan from the Spinal Cord Injury Network. Is there someplace we can talk?"

Sullivan gave Collette a handful of literature—stories of spinal cord injury survivors and how they had coped, a textbook on the medical aftereffects of spinal cord injuries. Some of the complications, he said, included wild fluctuations in blood pressure, pressure sores on the skin, recurrent urinary tract infections.

Collette reached for a napkin on the table where the nurses had been eating coffee cake and wiped her eyes.

Sullivan's tone softened.

"These are not insurmountable," he said. "They seem that way now. It's something to look at it in a positive way. You can say to yourself, 'This is the worst it can ever get.' It's not like multiple sclerosis. And in 10 years, we've made great gains. There's a good chance your son will walk again."

Nancy Link, the head nurse on the floor, stuck her head in the door. It seemed that Andwele had had another CAT scan that morning and now needed to drink some kind of mineral oil to get the iodine needed for the test out of his system. The trouble was, she said, Andwele was being a little obstinate.

"I'm on my way," Collette said.

Back in her son's room, she heard his version: Awakened at 6:30 for the CAT scan, he had had to drink a glass of some gross iodine mixture, which he promptly threw up, and which they then make him take intravenously. There were some other procedures too loathsome to describe, and the whole thing had taken about three hours. Now he felt awful. He would drink his medicine, he told his mother, but he wasn't moving out of bed for now.

At that moment, as if on cue, Link popped in to ask cheerily what time Andwele was going to be ready for occupational therapy.

"Let's step outside," Collette said. As she and Link talked in the hallway, they were interrupted at intervals by Andwele's voice bellowing from inside the room. It was the voice of rebellious adolescence.

"I'm not going!" he shouted. "I'm not going! . . . I'm not going!"

Collette looked at the nurse and grinned. "He's not going," she said.

'I DON'T KNOW WHAT TO DO'

On Monday, in the late afternoon, Collette stood outside the hospital's main entrance—the only place she could find to smoke—and pondered practicalities.

In one week, she was supposed to report for work at Francis Junior High; the students would be arriving a week later. She had no idea how long Andwele would be at George Washington, and after that how long he would be at the National Rehabilitation Hospital, where she had arranged to have him transferred for the extensive physical therapy he was going to need.

Fortunately, there was enough medical insurance to keep them from bankruptcy; there was even coverage for a home nurse. The first two weeks of care alone had totaled nearly \$56,000, all covered by insurance. But so far, she had found no help when it came to the job of getting their house ready for Andwele to live in. There was a wheelchair ramp to be built, doors to be widened, an en-

tire bathroom that had to be made accessible to a wheelchair.

"We're facing thousands of dollars in renovations," she said. She made too much money to qualify for Social Security, it would be two more years before Andwele turned 18 and became eligible for Medicaid, and "the maximum loan I can get from the teachers' credit union is \$6,500"—barely enough, she suspected, to do the bathroom renovation.

"I don't know what to do," she said. "I'm at a blank wall."

She stubbed out her cigarette and went back upstairs, where Andwele was sitting up in bed watching "Oprah." Two nurses came in to change some of his linen; she settled down in a corner with a crossword puzzle book.

Suddenly, Andwele began to vomit, and one of the nurses grabbed a basin. Collette looked up, but felt no alarm; Andwele was still having trouble tolerating solid food.

Then there was another sound—one she could not describe. She remembers looking up sharply.

"He was arched with his back in the air and his eyes rolled way back. He was convulsing." For a second, she thought he was playing a practical joke, trying to scare the nurses. She rushed to the bed and grabbed his arm.

"Stop it!" she said. Then she felt the tremors in his arm, throughout his body. She bolted from the room.

"I need a doctor!" she screamed, and three residents at the nurses' station ran toward her. She followed them back down the hall, but they wouldn't let her in the room. Then she heard Andwele's voice.

"No! No!" he was yelling, "You can't do that to me!" She relaxed slightly, realizing from his tone and from what he had seen of medical procedures that they were probably trying to open an airway by pushing a tube into his esophagus.

"We have survived another ordeal," she remembers thinking. Shaking, she turned to walk toward the waiting area. She had taken only a few steps when she heard a frantic voice.

"Code him!" the person was screaming.

"Code him!"

She wheeled. Nurses, residents, doctors came from nowhere. A crash cart—the essential equipment that every hospital ward keeps at hand, including the electric "paddles" that can restart a human heart—emerged from a closet and disappeared into Andwele's room.

Collette fought to get in, but someone shoved her out. Two nurses she didn't know appeared from somewhere and grabbed her.

"We can't tell you anything," they kept saying as she struggled to get inside. "Is there anybody you want to call? Is there anybody you want to call?"

"I'm not stupid!" Collette screamed as she fought them. "I know what that means!" Sobbing, hysterical, she sank to the floor.

Later, they told her that Andwele's death probably was caused by a blood clot or maybe two, something that had broken loose from one of his paralyzed legs and made its way to his heart and lungs. The effect was as if he had suffered a sudden, massive heart attack.

That evening, a different set of police officers arrived, and she realized the shooting of her son had entered a new domain, that of the homicide detectives. It would be recorded as the District's 284th homicide of 1992.

The investigation continues, but police say they have no leads.

"It's been happening so much lately," said one 2nd District detective. "A couple of them, they've just been testing out the guns to see if they worked."

"It's hard to say," a homicide detective added later. "You know, kids will shoot each other over almost anything these days."

They buried Andwele yesterday at Maryland National Memorial Park.

The PRESIDING OFFICER. The Senator from Delaware [Mr. ROTH].

Mr. ROTH. I thank the Chair.

(The remarks of Mr. ROTH pertaining to the introduction of S. 3329 are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

Mr. BREAUX. Mr. President, what is the pending business?

The PRESIDING OFFICER. The Chair advises the distinguished Senator from Louisiana that there is no pending business before the Senate.

Mr. BREAUX. Mr. President, I ask unanimous consent that I be allowed to proceed as in morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Louisiana has the floor.

Mr. BREAUX. I thank the Chair.

(The remarks of Mr. BREAUX pertaining to the introduction of legislation are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

#### THIRTIETH ANNIVERSARY OF LIBRARY OF CONGRESS' FIELD OFFICE IN INDIA

Mr. MOYNIHAN. Mr. President, I rise today to pay tribute to the 30th anniversary of the Library of Congress' field office in New Delhi, India.

The Library of Congress has every reason to be proud of this program. This field office has allowed research libraries throughout the United States to acquire foreign works that were previously difficult to obtain; it has preserved ancient materials that are now used by other libraries in both India and in the United States; it has been the leader in the cataloging of approximately 40 vernacular languages of India; and it has conducted elaborate studies of India—its languages, history, and cultures. Because of the resources that the new Delhi field office offers, many Americans come to India to do research and to meet Indian colleagues.

In short, for 30 years the Library of Congress' field office in New Delhi has provided a significant cultural and intellectual exchange between India and the United States. We have every reason to look forward to thirty more years of such continued accomplishments.

Mr. President, I ask unanimous consent that the following four speeches delivered on September 3, 1992, at the 30th anniversary celebration for the New Delhi field office be included in the RECORD. The speeches were deliv-

ered by the Ambassador to India, Thomas Pickering, the Librarian of Congress, James Billington, the Minister for Human Resource Development in India, Shri Arjun Singh, and the Dean of the Graduate School of Library and Information Science at the University of California, Los Angeles, Beverly Lynch.

There being no objection, the speeches were ordered to be printed in the RECORD, as follows:

AMBASSADOR THOMAS R. PICKERING EMBASSY OF THE UNITED STATES OF AMERICA ADDRESS ON THE 30TH ANNIVERSARY OF THE LIBRARY OF CONGRESS OFFICE, NEW DELHI, SEPTEMBER 3, 1992

Hon. Minister Shri Arjun Singh, Dr. Billington, Dean Lynch and distinguished guests:

It is really a very special pleasure from this afternoon to inaugurate the Thirtieth Anniversary Celebration of the Library of Congress Office here in New Delhi.

At the outset, I want to tell you that in my family, librarians are very valued—very highly valued. I personally treasure them. They rank equally—and sometimes even above—Ambassadors, and maybe even ministers, Mr. Minister. That is because while I am here as the Ambassador, Mrs. Pickering is the librarian.

So, now with matters put in their proper perspective, you can trust me when I tell you I've had to do my homework regarding the accomplishments of the Library of Congress here in India. Mrs. Pickering and I called on Dr. Billington before we left Washington, and we, of course, have visited the Library's office here in South Extension in New Delhi.

Let me say something about that installation. You may have passed it every day without even noticing it. An ordinary building—or, rather, two buildings joined together—located on the busy Ring Road in New Delhi. From the outside, nothing to distinguish it from its neighbors.

But on the inside, things are very different. Books, books and more books, pamphlets, tapes; almost anything you can think of, being processed for shipment to the Library of Congress—and from there, to more than 30 of the world's great university and other libraries. It is an effort that combines high-quality scholarship in the selection and cataloging process with the administration and shipping capacity of one of the world's busiest book export houses. For 30 years of its operations, this small office has been responsible for acquiring materials from India, Nepal, Bangladesh, Burma, Sri Lanka, and the Maldives and it has shipped over 16 million books and other items.

That's right—16 million. If you like to do this sort of calculation, 16 million books set end to end would stretch about 2,200 miles. Carrying the metaphor another step, you could lay a line of books from Kashmir to just outside the city of Moscow. And in fact, if you had read Dr. Billington's masterful study, "The Icon and the Axe," you could put in historical and cultural perspective what you would observe along that line of books.

In terms of India itself, the accomplishments of the Library of Congress Office here have forged a notable link in the remarkable chain of ties between our two nations. Both the Library of Congress and United States Information Service have made significant contributions to the exchange of information and knowledge between American and Indians.

Under the auspices of the Fulbright program, for example, our two countries have exchanged 8,000 Indian and American scholars, teachers, and university lecturers; and librarians have, I am happy to say, been an integral part of that process. Mid-level librarians from Indian universities have gone to the US to see how we do things, and our own librarians have come here to learn from your Indian experience.

Fruitful linkages have also developed between our two publishing industries. Leading American publishers participate in major book fairs in India, and Indian publishers participate in those held in United States. Through the Indo-American publishing program, over 12 million copies of more than 2,000 American textbooks in low-cost editions have been made available here, and if my calculation is right, that will stretch at least halfway across the United States. In the United States the works of Indian novelists, economists, and philosophers have found an expanding market. The freshness, zest, critical eye and mastery of the language of many of India's young writers have captured the imagination of enthusiastic American audiences.

Within the overall framework of our efforts to deepen mutual understanding, the Library of Congress office here is charged with a particularly inclusive and comprehensive task. For 30 years, it has been providing American scholars with not only books, but magazines, journals, newspapers, pamphlets, posters, phonograph records, film, and video and audio cassettes—whatever has captured life and history in the making of the region.

As a result, we can confidently claim that outside of India, the world's largest collection of materials on post-independence India is housed in the Library of Congress in Washington.

That material is utilized on a regular basis by Members of Congress and their research staffs, seeking to understand better the dynamics and direction of Indian affairs. We know from first-hand reports that the Library's collection—along with the collections held by more than 30 other major libraries receiving materials from New Delhi—also is a source of service, pleasure and inspiration to the tens of thousands of Indian students pursuing higher education in the US, and to the 950,000-strong community of Americans of Indian origin. Moreover, it is no coincidence that the great centers of Indian Studies in the United States are located precisely at those universities which enjoy the fruits of the Library of Congress's endeavors here in New Delhi.

This has not been an effortless process. It has been achieved over the years by a series of dedicated Field Directors and their staff and with the cooperation of the Government of India, the participation of scholars throughout the area, the work of the Library's South Asian regional and country representatives, and the labors of the extensive network of dealers and suppliers.

Therefore, Dr. Billington, we honor you for the original thinking and interpretive genius you have shown in your scholarly works and we congratulate you for the confident steps that you have taken to bring your great library into the 21st century, making its immense resources more widely available through modern technology. As part of this program, we know of your intense personal support for the overseas offices and that support has been vital to their success. In India, you cannot count on all of us as the friends of the Library of Congress and its work here.

And to all the Field Directors of the Library of Congress in New Delhi who have

come and gone, the seven whom Lygia mentioned, to Lygia herself and to Alice Kniskern, both of them are, of course, with us today: You can take pride in your accomplishments and those of your dedicated and exceptional staff on the occasion of this thirtieth year of the Library of Congress operation in India. Scholars and laymen around the world are—and will forever be—in your debt.

Congratulations and all good wishes.

And thank you all very much.

JAMES H. BILLINGTON, LIBRARIAN OF CONGRESS, ADDRESS ON THE 30TH ANNIVERSARY OF THE LIBRARY OF CONGRESS, NEW DELHI, SEPTEMBER 3, 1992

Thank you very much, Mr. Minister, Mr. Ambassador, Dean Lynch, Ms. Ballantyne, distinguished guests. I feel a bit anticlimactic. But it is a great privilege and pleasure for me. I think I may be the first Librarian of Congress whose academic specialty was a study of foreign cultures and so perhaps, even though I deserve no credit, I have a special feeling for these 30 years of accomplishments which are the work of this wonderful staff here, the field directors, my predecessors, and my colleagues, many of whom are here. You do the real work. I just appear at the photo opportunities, but I do feel a very great sense of gratitude and excitement at having the chance to come and see this really model field office and model international exchange program in operation.

For the past thirty years, six of our overseas offices, of which this one is the oldest and the largest, have been carrying out what I think is one of the most successful and far-reaching national library programs ever undertaken. But remarkably, this program has remained largely unknown and unsung in library circles. That's why Dean Lynch's eloquent speech and this lovely plaque are so particularly welcome. And during this week when librarians from across the world are meeting in New Delhi for the conference of the International Federation of Library Associations and Institutions, it is a good time to talk a little bit about our overseas program and to reflect on the future of the Library's overseas activities in the information age.

Conceptually, our overseas program is grounded on two of the most cherished principles of the library profession. First, that knowledge must be universally accessible to generate new knowledge: that is, if the knowledge of the past is not available, we can't really invent anything new in the future; and second, that wisdom and libraries are ideally suited to act as a special kind of catalyst in the creative process.

Libraries are, in a sense, temples of democracy. Just as democracy was inconceivable without the culture of the book, so libraries are temples of the pluralism that exists within a democracy because each book is there next to another book that may contradict the one previous to it and all are open to the public. The library is a kind of temple of democracy. One of my predecessors, Archibald MacLeish, called librarians the sentinels of freedom because what they protect is the common patrimony of humanity and is the basis for the kind of dynamic creative process without which democracy stagnates into some form of authoritarian backwater.

Now, these principles have strong roots in America, I think, guiding the actions of the founding fathers of our country who knew that, in order to establish a new nation, access to the best that had already been thought and written was essential to them

and to the future leaders of their type of republic. Where did they go? To the library. It is quite fascinating that the first meeting of the Continental Congress in 1774 occurred in the Library Company of Philadelphia. The first meeting of our national congress in New York, after we adopted the national constitution, was also in a library in New York. When we built a new capital in Washington some years later in 1800, through legislation signed by our second president John Adams, the library for the U.S. Congress was formally established. And to me it is exciting as I look out at the Capitol dome from my office in the Library of Congress to think that for the first century of our existence, the Library of Congress was in the nation's Capitol building itself. In other words, our laws were generated for the first century in a building which was itself also a library. Because it was only in 1897 that the Jefferson Building, the first separate building of the Library of Congress, was dedicated.

And Congress' purchase of Thomas Jefferson's excellent library of 6,487 volumes in 1814 made the Library of Congress the best in the new nation. The purchase also established the universal nature of the Library's collection as well as the idea, clearly enunciated by Jefferson himself, that an informed Congress and an informed citizenry were the best guarantors of a free society. His collection included classics from the ancient world, works by European philosophers and scientists, as well as one of the last translations of Kalidasa's *Sakuntala* by a pioneering European Indologist, Sir William Jones.

A further step towards the internationalization of the Library's collection was taken in 1840 when Congress passed a law establishing a systematic and regular exchange of official documents and set the precedent for a program that today enables the Library to receive over 500,000 items annually from 15,000 foreign exchange partners. Judy McDermott, our new head of these overseas offices, is supervising that remarkable exchange program that we have with so many foreign partners.

Yet another widening of the Library's scope and mission was brought about by an agreement with the Smithsonian Institution in 1865, which enabled us to acquire on a regular basis the scientific books, journals, and transactions of foreign and domestic learned societies. At the same time, we were able to serve not only the Congress and federal agencies but, increasingly, the general public, taking on a new mission as the national library of the United States, particularly with the passing of the Copyright Act and the locating of copyright deposits in the Library of Congress. Now, the period that brought into being this field office in New Delhi really began a new stage in the Library of Congress's relationship and in America's relationships to the world.

The mid-1950's, in particular, saw the beginning of what has been the largest expansion of higher education in the history of the United States. It was accompanied by a similar expansion in library services and by a concerted effort to build up both foreign scholarly resources in American libraries and the materials necessary to develop language and area expertise in order to create communication between the United States and other countries. Previous speakers have been kind enough to mention me and my predecessor, Daniel Boorstin, so let me go back to Daniel Boorstin's predecessor, L. Quincy Mumford, who redefined the Library's mandate at that time as the need to, and I quote, "acquire all library materials of

value to scholarship that are currently published throughout the world."

The overseas offices of the Library of Congress came into being during that golden age of the library's acquisitions. They were made possible by legislation sponsored by Representative John Dingell of Michigan. His bill authorized the Library of Congress to use foreign currencies generated by the overseas sale of American agricultural commodities for the acquisition and cataloging of books, periodicals and other materials for the Library of Congress and for other American research libraries, as you have already heard. It was a visionary piece of legislation whose full impact no one could have possibly predicted at the time.

As Representative Dingell hoped, the program made possible an unparalleled "commerce of ideas" between the United States an unparalleled "commerce of ideas" between the United States and the nations of the world. As you may know, we now have field offices in New Delhi, Karachi, Jakarta, Cairo, Nairobi and Rio de Janeiro, as well as a smaller office in Moscow, whose distinguished representative Michael Levner is with us here today. To scholars and academics of the United States as well as to general readers, the New Delhi program has meant exposure to the richness of India's and South Asia's linguistic diversity and cultural heritage.

Incidentally, I think it is very appropriate that an institution so central to democracy, our largest, oldest, and, in many ways—certainly in terms of this remarkable staff—especially dedicated office should be located in the world's largest democracy. In any event, it has made possible American exposure to the linguistic diversity and the cultural heritage of South Asia, which I must say, as a cultural historian myself, I find a particularly rich and deep and rewarding mine of the world's memory. And this has fostered an enormous expansion of South Asian studies in North America during the last thirty years, an impressive body of American scholarship on this region, and a growing band of scholars conversant in the languages of the subcontinent. Similar benefits have accrued from operations of the Library's other overseas offices. So, it is a unique success story. As a useful by-product of our overseas acquisitions and cataloging activities, each office, as has been pointed out, prepares acquisitions lists which are distributed to libraries worldwide. Here in India, our dealers tell us that many libraries outside America use these lists, as Dean Lynch has already indicated, to place orders for the books selected by the New Delhi office. They know that the office has cast its net wide and tried to acquire the best of the formidable intellectual production of the area. At the same time, by providing a constant market for literary and scholarly works in all languages, the Library of Congress acquisitions program has encouraged publishing in Indian in certain areas and in regional languages.

Like the Library of Congress itself, the Delhi office is deeply involved not just in acquisitions but in preservation. Through microfilm and microfiche projects undertaken by the New Delhi office, large numbers of important books, documents, and other printed materials have been given permanence and made more widely accessible. We are especially pleased at our recent new collaboration with major Indian libraries to microfilm and create automated records for the 60,000 early 20th century books listed in the *National Bibliography of Indian Literature*. This project will preserve for current and fu-

ture scholars the literary production of the most important period in the recent history of the subcontinent. To our knowledge, this is the largest single preservation project ever attempted. As a collaboration between American and Indian libraries, between public institutions and the private sector, and funded under the United States—India Fund, this project may set the pace for other collaborative projects between the Library of Congress and the area's institutions, something that we have been exploring in a number of conversations here this week.

Already we are talking of undertaking a joint project to collect scientific "gray" literature published by India's premier research institutes and to make it available more broadly to the world's scientific community. This project would team Indian and American experts to establish the methodology for a combined acquisition, preservation, and dissemination project which might be applied elsewhere to control an elusive segment of the scientific bibliography. I mention this project since it complements a recent initiative that the Library of Congress is attempting to launch in this field. Our special project on science and technology is aimed at creating an automated referral service that will be usable by scholars on a worldwide basis, not duplicating other efforts but rather providing a kind of central information switchboard to many databases and sources that already exist, a kind of union catalog, if you like, of scientific and technical information.

Now in the more traditional field of historical bibliography, the Library of Congress and the Sahtiya Akademi have been discussing a pilot project to create an automated short-title catalog for the books published in the 19th century in South Asia and listed in the provincial gazettes. This reference tool would fill in a gap in the control of the area's bibliographic production and would greatly benefit Indological studies wherever they may take place.

After many years of looking for ways to make our bibliographic products and library tools more accessible to libraries everywhere, we are able this year, for the first time, to offer them through our overseas offices to interested libraries in exchange for local currencies. We hope this measure will be of service to other libraries who wish to use our automated database in the retrospective conversion of their library catalogs. As our catalogs become automated and as our offices themselves automate their own acquisition and cataloging operations, we hope to be able to share information at will.

Important Indian institutions such as the Indra Gandhi National Centre for the Arts, which I had the pleasure of visiting just yesterday, and Indian research and academic libraries have expressed an interest in two recent initiatives of the Library of Congress: first, the American Memory Pilot Project, which uses CD-ROM and video disks to make available to schools and libraries across America the rich variety of primary source materials from the Library's American collections, currently being tested at 44 locations around the country; and second, our National Demonstration Laboratory for Interactive Information Technology whose machines represent some of the most powerful current technology in information storage, transmission, and presentation. This is located in the atrium of the Madison Building at the Library.

These two projects, I think, demonstrate the productive partnerships that will be possible between government and private indus-

try, particularly if we are able to secure passage of the current fee-for-service legislation now before the Congress which is absolutely crucial if we are going to extend the services of the Library of Congress and create new opportunities. Already, representatives from the companies that provide operational support for the National Demonstration Laboratory, discuss with us issues of significance in information technology, among them intellectual property rights, the development of hardware and software standards, international information flow, and technology equity. Their advice will help the Library as we develop a practical long-term strategy to provide leadership in supplying the information needs of the American people and our international neighbors for the 21st century.

It isn't enough simply to accumulate all this material—we are nearing our 100 millionth item at the Library of Congress—if it is not dramatically brought forward and made able to provide more services to more people which is the main challenge that the Library of Congress faces, and I think, perhaps libraries in general face.

The Library has long operated on the assumption that the ready availability of books from all over the world is the mark of a civilized society. And increasingly, in an interrelated age, the library is going to be a fresh source of creativity across cultural and intellectual specialties bringing new kinds of synthetic thinking, new kinds of connections that need to be made between often confusing specialized sources. Librarians are increasingly becoming knowledge navigators as well as the preservers of this vast heritage. Our overseas offices, by bringing to American libraries the best of the intellectual production of the 60 countries that they cover, representing 2.5 billion people, are, we think, a civilizing force in our increasingly interdependent world.

The New Delhi office, whose dedicated Indian staff really has inspired us all, especially those of us from the Library of Congress who have been privileged to visit it this year, has witnessed thirty years in the life of this great Indian democracy and has enabled many of us in America to have the opportunity to read and study this remarkable record and the long history and culture that lies behind it. During this 30-year period, as we carried out our Congressional mandate to facilitate a commerce of ideas between our two countries, we have worked together with Indian institutions on many worthwhile projects. These have included library policy planning conferences, technical workshops, research on paper preservation, development of transliteration schemes for Indic languages, library-to-library exchanges of publications, training of personnel both in India and in the United States, and the financing of visitor exchanges between the two countries.

Our new projects under consideration convince me that the next thirty years will present increased opportunities for extending our collaboration. On this auspicious occasion of the centenary of the great Ranganathan, I invite you to join us in the search for ways to assure that the riches accumulated in our countries' libraries and archives are made ever more available to the community of learners around the world and are preserved for future generations.

We must thank once again (we cannot do it too many times) the skilled and professional staff, the dedication, the long years of service of our Overseas Offices. Here in India, we also thank the dynamic Indian publishers collectively responsible for one of the largest

and most diverse publishing industries in the world and the knowledgeable book dealers who have supplied us. We are indebted to our colleagues from the Embassy and the USIS here in Delhi who have assisted the only overseas program of the Legislative Branch of the United States Government most dramatically exemplified in the hospitality we are enjoying today.

And, above all, we thank, as we always do in the library business, the writers, the poets, the artists, the scholars, the scientists whose works provide the very substance of what we are privileged to preserve and pass on to the next generations which will produce their own writers, poets, artists, scholars, and scientists, whose vision will be enlarged by the broadened international perspective that this program has made possible. All of us have benefitted from this cooperative effort and look forward to seeing even greater accomplishments in the years to come.

And we had a very interesting discussion with you, Mr. Minister, this morning about the interest that is being taken in so many countries, certainly in our own, in the older cultures, the oral cultures, many which previously seemed to be peripheral in many respects. They are being brought into the broader national patrimony in both our countries and, when I think of libraries and when I think of what they represent in the world, I am reminded of a very fascinating remark that I picked up when I went into the interior of our own country, out in the Great Plains, to give a talk about libraries and I had used the term "gatekeepers to knowledge." A man rose at the back of the auditorium and said, "you know, librarians are not gatekeepers." This was a native American from one of the Indian reservations. He said "in the Indian community before we had books and written records, we referred to the special people in the community who gathered in the oral memory of the community and then related it and passed it on from one generation to another as the "dreamkeepers." And that is what I think the librarians of today must be, not merely the gatekeepers but the dreamkeepers. So I thank all of you here in India who have helped us make this dream of closer international cooperation possible. May we not only keep open the gates in the next 30 years but keep the dreams as well.

Thank you all.

Our official speaker this afternoon is the Honorable Minister for Human Resource Development, Shri Arjun Singh.

For over 30 years Minister Singh has served at the Cabinet level in state and national governments, as Governor, as the Chief Minister, and as Vice President of the Congress Party. His titles include Minister of Agriculture and Minister for Education of the state of Madhya Pradesh, Governor of the Punjab, Minister of Communication under Prime Minister Rajiv Gandhi, Chief Minister of Madhya Pradesh, and since 1991 again as a Cabinet Minister in his present capacity. It is a great honor for the Library of Congress to present to you the Honorable Minister Arjun Singh.

SHRI ARJUN SINGH, MINISTER FOR HUMAN RESOURCE DEVELOPMENT, ADDRESS ON THE 30TH ANNIVERSARY OF THE LIBRARY OF CONGRESS OFFICE, NEW DELHI, SEPTEMBER 3, 1992

His Excellency Ambassador Pickering, Mrs. Pickering, Dr. Billington, Madam Lynch, Madam Ballantyne, respected ladies and gentlemen. I thank you very much for inviting me to this function this afternoon

on the occasion of the completion of 30 years of the Library of Congress Office in New Delhi, and giving me this opportunity to say a few words.

The good work being done by this office, especially in the acquisition of books from all SAARC countries and also from Afghanistan, is universally acknowledged. I note with pleasure that its book exchange activities with the National Library, Calcutta and the Central Secretariat Library, New Delhi as also with other institutions in India, are going on for quite some time and on a very high level.

The Library of Congress is not only a great institution of the United States. It is a great institution of the world. It goes without saying that many countries in the world look to this library as a model. I am particularly happy to know that recently the Library has opened reading rooms for all the major cultures of the world creating, in the words of Mr. James H. Billington, "a living, universal museum of the written word—the closet thing anywhere to the world's memory." This indeed is a monumental task and I wish this endeavor every success. In a country like ours with a vast multicultural past the problem of storing the great Indian memory, as it were, is truly of epic dimension and I do hope that we can learn a lot from the experience of the Library of Congress.

Information and knowledge are in many ways central to the democratic ethos. No democratic polity can survive without the right to information and knowledge being guaranteed to all its citizens. But the contemporary explosion of information and knowledge tends to create elitist tyrannies within the system itself. It becomes crucial therefore "to transform information into knowledge and knowledge into wisdom." Libraries, and certainly a great library like the Library of Congress, democratize knowledge and wisdom making them accessible to all. We should look at the libraries not only as repositories but also as democratizing institutions.

The United States of America and India are two large democracies and we share a lot, many concerns, including those of the freedom, liberty and dignity of man. Whereas we have an historical experience of thousands of years, of many religions, climes, languages and traditions, the new America offers great innovative genius and dynamism. India and the USA have had a long and enduring friendship and collaboration in many fields including those related to knowledge and information. Leaders of all shades of opinion and in all walks of life in this country have been deeply impressed with the openness of the American Society which has over two centuries welcomed ideas, styles, persons from any part of the world. I feel the great success story of the USA is substantially due to its enriching multiculturalism which has always found a vibrant and responsive space in the American society.

Sometimes, one hears the prophecies of doom claiming that books are on their way out, and that both information and knowledge would soon replace them as their vehicles by some other media. Optimistic as I am about still greater leaps forward in technological advance and innovation, I hope that books shall remain with us as trustworthy friends and guides to whom we can always turn for enjoyment as well as enlightenment, and, of course, knowledge. The book, I would like to believe, is a lasting invention of man which shall not fade into history nor grow obsolescent but will remain with us till eter-

nity. Somehow our humanity can never be full or deeply rich without books.

Americans and Indians have always been interested in each other, not only at the level of great leaders, writers, scientists, intellectuals, etc. but also at the level of ordinary citizens. Books have been an important instrument of this familiarity which has matured into mutual respect and regard. The Library of Congress itself has one of the largest collection of books on and about India. It is often said that if a book is not available in India, at least a copy is to be found in the Library of Congress. This is not an ordinary achievement and I would like to express my great admiration as well as gratitude for the fine work the Library has been doing in respect to India.

I would like to mention that although India and the USA do not have any formal Cultural Exchange Program, we do have an Indo-US Sub-Commission on Education and Culture which provides sufficient coverage for mutually needed programs on different areas of culture. Cooperation of Indian and American institutions in bringing together all museum materials on India available in the USA, mutual development of science museums, mutual cooperation in the field of archives, holding of workshops on natural history, conservation, exchange of teachers, students, books, audio-visual material, museum personnel, directors, playwrights, etc., are some of the aspects of the growing cooperation between our two countries. The major focus in the next two years is on an exciting new program called Information 2000+. We have a great sense of satisfaction at the warmth and understanding that the Indo-US Sub-Commission programmes have generated in both the countries. Knowledge and information are boundless and more so in our times. Sharing of them is both a human necessity and an historical duty. I have no doubt that in this area, as indeed in many other areas, the USA and India are coming closer to each other and will do so in the coming years. The Library of Congress has been a significant factor in bringing about this closeness and I am sure it will continue to play that historical role with greater enthusiasm and dynamism.

Thank you.

REMARKS ON THE OCCASION OF THE 30TH ANNIVERSARY OF THE LIBRARY OF CONGRESS NEW DELHI FIELD OFFICE BY BEVERLY P. LYNCH, UCLA, SEPTEMBER 3, 1992

Honorable Minister, Shri Arjun Singh, Ambassador Pickering, Dr. Billington, Ladies and Gentlemen, it is a very great pleasure for me to be here this afternoon, representing the Committee on South Asia Libraries and Documentation (CONSALD) and my own university, The University of California, to mark the occasion of the 30th anniversary of the Library of Congress' Field Office in New Delhi. This anniversary is an important milestone in the history of the Library of Congress' Cooperative Acquisitions Program. The Committee acknowledges, with gratitude, the contributions of this office and the very able staff who have implemented the program consistently and so well for these thirty years.

The Committee is a part of the Association of Asian Studies and, as such, serves as one of the important bridges between university libraries committed to supporting instruction and research on this country and all of its elements and the students and faculty members who study, teach and do research about South Asia.

The program in India, carried out so ably by the field office in New Delhi, serves as a

model for the other offices supported by the Library of Congress. All of the members of CONSALD acknowledge the essential contributions made by the office and its staff to the scholarship of Indian studies.

The collections assembled through this program are extraordinarily rich. There is great depth for South Asia as a whole, and particularly for India. Scholars tell us that the collections relating to India now held in research libraries in the U.S. are better than what they can find anywhere else in the world. That is a remarkable achievement and is due directly to the program. We particularly note with that the strong support of the Librarian of Congress and his predecessors. We also acknowledge the support of the U.S. Congress; without the agreement of the Congress to spend the monies here the program could not be sustained. The vision that created this program and the leadership that has sustained it have ensured the systematic and careful selection, acquisition, cataloging and use of materials on all aspects of India.

The material acquired by libraries in the U.S., as a result of this program, has enhanced teaching and research in academic disciplines as diverse as history, political science, economics, anthropology, language and literature, religion and philosophy, music.

A few years ago an Indian scholar was arriving in the U.S. to spend a year as a visiting professor of history at Yale. He sent ahead to the library a list of materials he wanted to have available for his students. To my delight—it was my responsibility at Yale at the time—and to his delight, ALL of the items he identified were in the library's collections, fully cataloged, and available. There was nothing on his list that Yale did not already have. That was due directly to this program.

A Professor of Modern Indian Literature at the University of Pennsylvania wrote: "... one of the reasons which made me accept an offer to teach at an American University was the rich collection of South Asian books in the Van Pelt Library. I had not seen something comparable in European libraries nor so well arranged and easily accessible as the PL 480 material in Van Pelt."

The stream of materials sent from the New Delhi office to U.S. libraries have made the U.S. collections the most important repositories in the world for the study of India. The presence of a highly trained staff, on-site in this office in New Delhi, means that the latest current materials are being acquired as they are produced. Bibliographers in the U.S., confident that the current publishing output of the country and the region is being collected and will be coming to their libraries, are able to spend the time developing their collections, seeking out older materials, fugitive materials, materials that are the stuff of scholarship but require careful attention and time to find and then acquire.

Equally important to our libraries and our users is the bibliographic data prepared in the field office. The fine cataloging work done here enables our libraries to get the books on the shelf and into the hands of readers quickly.

The staff in the New Delhi office have been very responsive to the comments from curators and scholars in the U.S. Many tell of "... the enthusiastic encouragement given by successive field directors and their staffs for visiting scholars to contribute suggestions for new materials and media and to share insights into the shape of scholarship."

The interactions between the people in Delhi, the staff in Washington, and the li-

braries which are the repositories for the materials are cordial; the high level of professionalism has made this field office a model.

There are other important benefits which have emerged from this program, but are not so obvious. For example, the distribution of publications from the subcontinent both in English and in the regional languages has benefited greatly from the field office's monthly Accessions List. The list is distributed to over 1000 libraries worldwide. Many of these libraries rely upon this list, using it as an acquisitions tool from which they order copies of the titles from book dealers in India and abroad.

On behalf of the Committee on South Asian Libraries and Documentation and the institutions it represents, I am pleased to present to the library this plaque which lists the Institutions that are members of the committee and reads:

SEPTEMBER 1992

With appreciation for 30 years of outstanding service and program support by the staff of the New Delhi Field Office.

Congratulations on thirty fine years. May there be many more. And thank you.

#### SENATOR ALAN CRANSTON

Mr. EXON. Mr. President, I want to take this opportunity to bid a fond farewell to my long-time friend, Senator ALAN CRANSTON.

It has been my pleasure to serve for 14 years with ALAN CRANSTON, the entire stretch of time during which I have had the privilege of being a U.S. Senator.

For much of that time, ALAN CRANSTON was the senate whip, and, therefore, in one of the highest positions of leadership in the United States Senate. The whip's job is one of the most thankless, and yet one of the most important, jobs in the Senate. It entails long hours and extensive work. During the many years ALAN CRANSTON served in this position, he not only carried out the whip's job in an extraordinary fashion, he also fully and admirably carried out his duties as one of the U.S. Senators from this Nation's largest State. To accomplish this double duty requires an extraordinary individual and ALAN CRANSTON certainly measures up to that description.

ALAN CRANSTON has always been a rugged individualist, yet has strived hard for many years to do what he believes is best for the United States of America. Not too long ago, ALAN carried out an exemplary race for President of the United States. While many senators may ponder such a step, carrying it out and enduring the rigors of a presidential campaign is no small task.

ALAN CRANSTON will go down in history as one of the most able and influential U.S. Senators of all time. This institution will miss his legislative ability, leadership and drive when we reconvene next January and I will miss a close friend and associate.

## HONORING PINK VAN GORDEN

Mr. KASTEN. Mr. President, I rise today to honor truly distinguished public servant. The Honorable Pink Van Gorden has been an outstanding member of the Wisconsin State Assembly for the last decade—and he is now retiring to private life.

Pink Van Gorden has provided a great deal of excellent service to his constituents in the Neillsville area. He entered politics because he cared about his friends in the community—and they are unanimous in believing, along with me, that he has made a big difference for the better in the life of central Wisconsin.

I ask my Senate colleagues to join me in thanking Pink Van Gorden for his long career of service—and in wishing him a happy retirement.

## PERU'S NEW FUTURE

Mr. PRESSLER. Mr. President, recently I had the privilege of hosting a lunch for Carlos Bolona, Minister of Finance and Economy of Peru. Mr. Bolona, who was educated in this country and at Oxford, in addition to Peru, became Minister of Economy and Finance in President Alberto Fujimori's government in February 1991.

I was pleased that several of our colleagues also were able to attend or stop by the lunch, including Senators DURENBERGER, COATS, BENTSEN, RUDMAN, BURNS, LOTT, and SIMPSON. All of us were curious to learn more about the future of Peru in light of the recent capture of Shining Path leader Abimael Guzman on September 12. The Marxist Communist guerrilla group was founded by Guzman, a former philosophy professor. Shining Path has conducted a 12-year war in Peru during which time some 23,000 people have been killed. Indeed, Minister Bolona's own home and his ministry building have each come under attack twice during his tenure in office.

Minister Bolona explained that the people of Peru understand the war is not yet over. Shining Path retaliation for the arrest of Guzman and other leaders of the group has caused even more deaths and injury. However, the capture is viewed as a government victory in a significant battle in the war to restore peace to Peru. Minister Bolona admitted concern over the ability of Peru to keep Guzman imprisoned before and during his trial, which likely will be held next month. In addition, Peru likely will be faced with the extremely difficult task of keeping Guzman in prison for the rest of his life. Peru's constitution does not allow for the death penalty.

During the lunch, we also had the opportunity to discuss the current state of Peru's economy. President Fujimori, a long-shot candidate, entered the 1990 presidential race late and, in fact, placed more hope on his concurrent run

for the Senate. However, once elected, President Fujimori moved quickly to develop a formula for combating the drug trade, improve results in the war against insurgents, root out corruption by government officials and improve the economy.

With the help of Minister Bolona, the government has reined in inflation from estimates in the thousands of percentage points per year to less than 150 percent in 1991. Significant progress also has been made to begin repaying Peru's arrearages on intergovernmental debt. In addition, relative to prior administrations, the Fujimori government has shown a willingness to cooperate that has encouraged United States policymakers and has expanded the range of issues on which the two countries are working together.

Mr. President, the United States must now take the opportunity to further assist Peru and develop closer ties. Both countries could benefit greatly from mutual cooperation. Peru purchases a significant amount of United States agricultural products and there are tremendous opportunities to increase our exports to Peru. The United States exported 160 million dollars' worth of agricultural products to Peru in 1990. Major exports included unmilled wheat, rice, coarse grains, vegetables, and vegetable oils. Meat and poultry products are making significant inroads into the Peruvian market. Furthering United States agricultural exports helps feed the people of Peru and supports jobs here in the United States.

On a large scale, the United States should continue to promote agricultural diversification in Peru itself. This needs to be an international effort and one that could lead to progress in our fight to combat illegal drugs. Mr. Bolona pointed out that nearly 200,000 farmers grow coca that is used to make cocaine. Unfortunately, simple economics dictate that the most profitable crop for these farmers is the coca plant. Peru is the world's largest coca leaf producer with about 300,000 acres under cultivation for this purpose. This is the source for most of the world's coca paste and cocaine base. Approximately 85 percent of Peru's cultivation is for illicit production. Most of this production winds up in the hands of Colombian drug dealers for processing into cocaine for the international drug market.

Investments need to be made in programs and delivery systems to enable Peruvian farmers to produce traditional crops and make a fair profit. Without such assistance, the source of great tragedy not only in the United States, but the world as well, will continue to grow unchecked. Mr. Bolona estimated that Peru would need \$200 million annually for 3 to 4 years to help farmers make the switch to traditional crops.

On the trade front, Mr. Bolona indicated Peru's desire to consider a free-trade agreement with the United States. We talked about the current NAFTA discussions and future discussions on a free-trade agreement between the United States and Chile. I look forward to further talks with Mr. Bolona on the possibility of the United States entering into a free-trade agreement with Peru. Expanded trade between Peru and the United States would greatly benefit both countries.

Mr. President, as the Fujimori administration continues its work on the economic and agricultural fronts, it also is striving to reshape the Government itself. In November, elections will be held for an entirely new congress. That assembly will be charged with the responsibility of drafting a new constitution for Peru. Unfortunately, elections always have been a target of the Shining Path, and with their leader imprisoned that pattern is likely to continue. It is my hope that the elections will go ahead as scheduled, a new constitution will be written, the reforms begun by President Fujimori, with the help of effective young leaders such as Minister of Economy and Finance Carlos Bolona, will succeed and Peru can continue on the road to a new and better future.

## SENATOR JAKE GARN

Mr. EXON. Mr. President, I rise to salute my departing colleague from Utah, Senator JAKE GARN.

From Navy pilot to U.S. Senator to Astronaut, JAKE GARN is truly an extraordinary individual. On top of that, he has been a devoted U.S. Senator who has always been a straight-shooter. JAKE GARN has always been tough, yet fair. Even though we happen to sit on different sides of the aisle here in the U.S. Senate, over the years I have developed a deep and lasting respect for JAKE GARN. It takes Senators who are willing to work hard and accept their individual responsibilities as committee members to make this place work. JAKE GARN has always been, and remains, a man of action who has helped to make the U.S. Senate work.

JAKE GARN is a man of the West, who has brought a unique and much-needed perspective to the United States Senate.

For many years, JAKE GARN has been a dedicated public servant, both in the defense of his country and here in the U.S. Senate, as we try to move our country forward into the 21st century.

I salute JAKE GARN and Pat and I want to wish him and Kathleen the best of everything in all of their future endeavors.

## SENATE OBSERVER GROUP FOR THE GATT NEGOTIATIONS

Mr. PRESSLER. Mr. President, once again we are approaching year's end,

and the current Uruguay round negotiations on a new General Agreement on Tariffs and Trade [GATT] are reaching a critical stage. At this point in 1991 and 1990, there were great expectations for a breakthrough on agriculture that would lead to a successful conclusion of the Uruguay round. Yet no agreement was reached and the talks continue.

Mr. President, a new GATT agreement that ensures freer and fairer trade could bring tremendous benefits to American agriculture by opening more world markets to U.S. farmers and ranchers. Achieving a sound agricultural sector agreement would open the door to concluding negotiations in other key sectors like telecommunications, banking, insurance, intellectual property rights, and Government procurement markets.

Should an agreement on agriculture be reached, then negotiations among all 108 GATT signatory countries would commence to conclude the Uruguay round. Estimates of the worldwide economic benefits from a Uruguay round trade agreement have ranged from \$200 billion to \$1 trillion.

Selecting a bipartisan Senate observer group to attend the GATT negotiations would send a meaningful message to the other GATT countries that the United States is intent on achieving fair revision of the GATT. A Senate observer group could be a valuable asset to our U.S. negotiators, as we have seen from the past in sending observer groups to negotiations involving arms control.

Mr. President, I recently asked Majority Leader MITCHELL and Minority Leader DOLE to establish a United States Senate observer group to the Uruguay Round GATT negotiations. I hope that such a group can be formed and I ask unanimous consent that my letters to the Senate leadership be printed in the RECORD at this point.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

U.S. SENATE,  
Washington, DC, September 30, 1992.

Hon. ROBERT DOLE,  
Minority Leader, U.S. Senate,  
Washington, DC.

DEAR BOB: I am writing to you and Majority Leader George Mitchell asking that an Observer Group of U.S. Senators be appointed for the ongoing negotiations to reach a new General Agreement on Tariffs and Trade (GATT). Observer Groups, such as the one for arms control, have been appointed in the past and have proven to be very useful.

The appointment of an official group of U.S. Senate observers would demonstrate the determination of the United States to successfully conclude the negotiations. Since the Uruguay Round began in 1986, several members of the Senate have observed the negotiations, though not in any formal position. First hand observation by the U.S. Senate would prove helpful when this body considers implementing legislation for a revised GATT.

Current negotiations are at a critical juncture. A meeting between Ambassador Hills and chief negotiators of the European Community is scheduled for October. The key to successfully concluding the Uruguay round is an agricultural sector agreement and that will be the main topic of the upcoming meeting. Once an agreement is reached on agriculture, then a period of negotiations among all 108 GATT members would commence. Though it is impossible to accurately predict and length of time required for these negotiations, it should take several months at the least.

A bipartisan Senate observer group would send a meaningful message to the other GATT countries that the United States is intent on achieving fair revisions of the GATT. A Senate Observer Group could prove to be a valuable asset to our U.S. negotiators.

I look forward to your response.

Sincerely,

LARRY PRESSLER,  
U.S. Senator.

U.S. SENATE,  
Washington, DC, September 30, 1992.

Hon. GEORGE MITCHELL,  
Majority Leader, U.S. Senate,  
Washington, DC.

DEAR GEORGE: I am writing to you and Minority Leader Robert Dole asking that an Observer Group of U.S. Senators be appointed for the ongoing negotiations to reach a new General Agreement on Tariffs and Trade (GATT). Observer Groups, such as the one for arms control, have been appointed in the past and have proven to be very useful.

The appointment of an official group of U.S. Senate observers would demonstrate the determination of the United States to successfully conclude the negotiations. Since the Uruguay Round began in 1986, several members of the Senate have observed the negotiations, though not in any formal position. First hand observation by the U.S. Senate would prove helpful when this body considers implementing legislation for a revised GATT.

Current negotiations are at a critical juncture. A meeting between Ambassador Hills and chief negotiators of the European Community is scheduled for October. The key to successfully concluding the Uruguay round is an agricultural sector agreement and that will be the main topic of the upcoming meeting. Once an agreement is reached on agriculture, then a period of negotiations among all 108 GATT members would commence. Though it is impossible to accurately predict the length of time required for these negotiations, it should take several months at the least.

A bipartisan Senate observer group would send a meaningful message to the other GATT countries that the United States is intent on achieving fair revisions of the GATT. A Senate Observer Group could prove to be a valuable asset to our U.S. negotiators.

I look forward to your response.

Sincerely,

LARRY PRESSLER,  
U.S. Senator.

#### SENATOR ALAN DIXON

Mr. EXON. Mr. President, when we reconvene next January, a bright and shining face will unfortunately be missing from our ranks. Lest there be any doubt about the individual to whom I am referring, I want to pay my tribute to Senator ALAN DIXON.

ALAN DIXON came to the U.S. Senate 2 years after I did and we have served together on committees in addition to being neighbors in the Senate Office Building. ALAN DIXON is perhaps Illinois' most successful political figure. His election to the U.S. Senate was a natural. If I was ever in a legislative fight, I certainly wanted ALAN DIXON on my side. And, if during those rare occasions when we might have differed on a legislative matter, knowing that ALAN DIXON was on the other side would make me redouble my efforts because of his enthusiasm and ability.

Most of all, ALAN DIXON has been a friend to all and especially to me. There is no way yet to measure how much we all will miss that bright, shining face and pleasant demeanor. Needless to say, the Senate will not be as much fun without ALAN DIXON.

I only hope ALAN DIXON knows how much joy he has brought into our lives and that he knows how much I will always value his friendship. Pat and I want to wish him and Jody all the best for a wonderful life ahead.

#### CAN THE UNITED NATIONS BE FIXED?

Mr. PRESSLER. Mr. President, the United Nations is a broken institution. Ethical standards are not applied, evaluations are self-serving or nonexistent, and a bureaucracy run by diplomats exists mainly to perpetuate itself. As a result, the United Nations consumes ever greater proportions of U.S. taxpayer funds with little hope that quality, cost-effective services will result.

These and other disturbing messages were contained in a series of articles in the Washington Post from September 20-23, 1992. The principal author, William Branigan, is to be commended for excellent investigative reporting that uncovered an unmistakable trail of waste, fraud, privilege, favoritism, and abuse. According to U.N. insiders, the most damning criticism of Mr. Branigan's series is that some problems he cited have been known about for a long time. These experts claim that contemporary examples of a United Nations gone awry reach or exceed many cited in the Post series.

Mr. President, before going any further, I want to state my support for the concept and necessity of the United Nations. This year I am serving for a second time as a U.S. congressional delegate to the General Assembly. I am a long-time member of the Minnehaha County United Nations Association. I am absolutely convinced the world needs effective multilateral bodies to help resolve disputes.

But support for the United Nations as a noble ideal does not mean I support inefficiency, favoritism, greed, and corruption in U.N. agencies or by some U.N. employees. As a Senator, I am grappling with what—if anything—

Congress or the administration can do to hold down U.N. costs, fire or discipline the crooks, create and maintain a meaningful evaluation system, and end the cozy, preferential personnel system that feathers the nests of career diplomats who built it.

There are no easy answers. Raising questions sparks criticism that any United Nations, at any cost and regardless of how it is run, is better than no United Nations. Many U.N. cheerleaders and employees believe there should be a moratorium on criticism. They are wrong. I simply am not convinced—in a time of huge Federal deficits—that the United States can support funding any organization that spends money recklessly. If Congress has not gotten that message on the United Nations yet, it soon will.

It is not helpful to drag the red herding of U.S. funding delays across the trail of excess, inefficiency, and corruption. These problems do not exist because the organization lacks funds. In keeping with vital U.S. priorities, Congress has authorized full payment of funds withheld from the United Nations during the 1980's for nonperformance and anti-Americanism. Congress has been extremely generous in appropriating new funds for the United Nations and for peacekeeping outside the normal budget cycle. It is self-defeating for U.N. employees and some of its friends to tar the United States as an international deadbeat. If nothing else, such abusive language poisons the well in Congress for those of us who recently have fought for full funding.

Sadly, Congress, and perhaps even the administration, seem to have little idea what the U.N. problems are or how to address them. That's a good point at which to begin. American policymakers need a common base of information that can be used to assess the state of the United Nations. This is the jumping off point for negotiations about the United Nation's future.

One meritorious idea has been proposed since the Carter administration, and has been summarized by Assistant Secretary of State John Bolton as a unitary United Nations. It calls for the United Nations, or other international bodies, to decide how a task can best be performed efficiently and assign that responsibility to one agency. The Washington Post articles highlighted areas of overlap and duplication in programs, causing costs for the most heavily assessed country—the United States—to go through the roof.

Although Secretary General Boutros Boutros Ghali has worked hard for top to bottom personnel and budget reform, the U.N. system probably cannot reform itself. The Secretary General's energetic desire to change things rapidly, building on the groundwork of Finland's Martti Ahtisaari, has not yet shown much promise.

Since the United Nations is principally a legislative body, it makes

sense to begin with a complete shakeup of the Advisory Committee on Administrative and Budget Questions [ACABQ], adding observers from national legislative bodies. The new ACABQ also should insist that its chairman be held to minimal standards of U.N. employees since he is obviously an employee of that institution.

A tough, independent inspector general is needed, following the model of the State Department's Sherman Funk or USIA's George Murphy. Auditors and inspectors need resources, autonomy, and direction to give them clout and to prevent their reports from being permanently consigned to the proverbial round file.

Congress has dropped the ball on international organizations. Unlike outstanding monitoring work done by the congressional members of the Commission on Security and Cooperation in Europe [CSCS], no arm of Congress has conducted more than a cursory examination of the United Nations and other regional or specialized international agencies. As a result, a handful of pro-U.N. groups and a tiny group of U.S. experts on international organizations dominate what passes for congressional oversight.

More Members of Congress need to be involved in oversight. While I certainly am not advocating an expansion of congressional committee staff, if international organizations are important—and they are—they should be treated that way by the Congress. There is considerable bipartisan need for supplemental information about international organizations that is not generated by enthusiastic, uncritical groups or international agency lobbying.

Finally, the United Nations needs a scale of member assessments that compares with real world realities. CSCE peacekeeping assessments are only 9 percent for the United States, as opposed to more than 30 percent for our share of U.N. peacekeeping. Democratic development activities undertaken by regional organizations like the Organization of American States [OAS] may be better investments and easier to oversee than parallel efforts of the United Nations. Worthy but grandiose efforts, such as United Nations peacekeeping in Cambodia, can become recipes for disaster, as William Branigan's series portrayed. Non-governmental organizations, like Medicines sans Frontiers and AMERICARES, may help more people in Somalia than any United Nations bureaucracy.

In the meantime, current U.S. policy of zero real growth for the U.N. budget and staff must be defended. A majority of Congress clearly supports the United Nations in principle and calls on the United Nations or other international bodies to intervene where they can be effective. But that support could be on

shifting sand if revelations such as those in the Post series continue to crop up and are not answered to the satisfaction of the Congress. It is simply not enough for the United Nations and its supporters to say, "trust us."

#### SENATOR WARREN RUDMAN

Mr. EXON. Mr. President, I rise to salute and pay tribute to my colleague, Senator WARREN RUDMAN.

When the Senate reconvenes in January, a very important person will be missing. While I understand the reasons why WARREN RUDMAN chose not to run for reelection, I will miss his voice of reason and understanding.

As we all know, the most important domestic problem facing the United States of America is the outrageous Federal deficit and the mushrooming national debt. No person in the U.S. Senate has worked harder than WARREN RUDMAN to correct this problem. WARREN RUDMAN has not simply talked about the need for deficit reduction and the consequences of failing to achieve it. Instead, he has done something about it and we here in the Senate and Americans all across the country are indebted to him.

I have always enjoyed my association with WARREN RUDMAN. He is dedicated, tough and fair. He has personified the tough New Englander image which Americans all across this great land recognize.

Despite the fact that WARREN RUDMAN will not be a Member of the 103d Congress, I am gratified to know that he will continue his fight for fiscal sanity and for the good of our country.

Pat and I want to wish him and Shirley all the best in the future. I want him to know that I will continue to stand ready to work with him for a better America.

#### VISIT OF PRESIDENT TER-PETROSSIAN OF ARMENIA

Mr. PRESSLER. Mr. President, recently I had the great privilege of introducing President Levon Ter-Petrossian to a large gathering of ethnic Armenians in New York City. During the event I had the pleasure of meeting Ambassador Alexander Arzumanyan of Armenia's Mission in New York, Dr. Vartan Gregorian, president of Brown University and many others who have given a great deal of themselves to the cause of establishing independence, freedom, and democracy to the former Soviet Republic of Armenia.

The history of the Armenian people contains a number of important milestones. Three events in particular mark the development of the Armenian nation and must always be remembered. First, St. Vartan led the successful campaign against the Persians in 451 A.D. The result of this effort was

the establishment of the second Christian country in the Caucasus.

The world is well aware of a second, horrible event, the effort by the Ottoman Turks to wipe Armenians from the face of the earth early in the 20th century. "Genocide" is a term that should be used with great care, but the genocide against Armenians was among the most horrible episodes in all of human history.

I became interested in this issue as a student at Oxford University in the 1960's. Since that time I have believed it is important for public officials to publicly discuss the Armenian genocide often. This cruel experience must not be forgotten. It is important not only because of a moral imperative that we honor the memory of the victims of such atrocities. It also is important because, when the world forgets such events, it allows future despots a freer hand in conducting genocide against other races—as occurred in both Germany and Cambodia. We must do everything possible to ensure that such tragedies of history are not repeated.

The third event was the reason for the celebration in New York. After decades of suffering under the cruel yoke of communism, the world rejoices that Armenia—along with 11 other former Soviet Republics—has emerged as a free and democratic country. President Levon Ter-Petrosian played a major role in this process.

A scholar of ancient Armenian history, President Ter-Petrosian became the first democratically elected president of the Republic of Armenia on October 16, 1991. This marked the culmination of several years of activities as a leading political activist in Armenia—activities that, for a time, cost him his freedom. Under his leadership, the Armenian Legislature adopted a declaration of independence on August 24, 1990 by a vote of 194-0.

President Ter-Petrosian has demonstrated a strong commitment to the ideals of democracy and free markets. He has demonstrated great courage and leadership in seeking normalized relations with all of Armenia's neighbors, without sacrificing the principle of self-determination for the people of Karabakh.

There is no doubt that the world is a safer place now that the Soviet Union has disappeared. There should be no doubt about the debt of gratitude the world owes to democratic nationalists throughout that former empire who helped make freedom possible. The collapse of the Soviet Union has produced a variety of experiments in government—all claim to be democratic. During July, I visited 10 former Soviet Republics as part of a congressional fact-finding mission. In a number of these countries, although the government calls itself a democracy, the same old Communists are in control.

For example, Uzbekistan's Government continues to beat and imprison

its political opponents and resented the fact that I met with several opposition leaders who had been brutally beaten by the regime. Yet Uzbekistan says it accepts the Helsinki human rights principles and wants United States foreign aid, despite our huge budget deficit and its behavior toward its own people.

I regret my schedule did not permit me to visit Armenia during my July trip, but I believe true democracy is being built there. I look forward to seeing Armenia for myself in the near future.

Unfortunately, Armenia's new independence is under severe challenge from the same imperialistic forces that were responsible for the 1915 genocide. Some in the press have tried to paint the problems of the former Soviet Union as ethnic in nature. But I think Ambassador Jeanne Kirkpatrick had a more accurate description of what is happening. In a recent article, she said:

Building collective security measures requires abandoning preferred myths and facing the fact that it is not poverty, not ethnicity, not the break-up of empires that cause war. It is violent and lawless governments.

The government of Azerbaijan is just such a violent and lawless government, and its powerful backers in neighboring Turkey would like nothing better than to assert their influence throughout the Caucasus.

As a supporter of Armenia for many years, and as a member of the Foreign Relations Committee, I support stiff conditions on United States foreign aid to the former Soviet Union. It is essential we send a clear message to Azerbaijan that United States taxpayers will not subsidize dreams of conquest.

I also have supported international observers and peacekeeping efforts in the disputed areas of the Caucasus and elsewhere in the former Soviet Union. It simply makes no sense to expect the Russian Army to be neutral and fair in territories the Soviets controlled for seven decades.

Armenia has many friends in the United States Congress—in both parties. We will not abandon that country in its time of need. I am committed both to stiff sanctions on Azerbaijan and international observer teams in the Caucasus. I also will do all I can to ensure Congress provides humanitarian relief needed to rebuild Armenia in the aftermath of the terrible earthquakes that country has suffered.

Finally, until Azerbaijan ends its blockades and use of force against Armenia and Nagorno-Karabakh; respects the human rights of Armenians, Russians, Jews, and other minorities; and commits to peaceful resolution of the Nagorno-Karabakh conflict, I will continue to support trade and economic sanctions against Azerbaijan. To this end, I am cosponsoring S. 2167, the Restrictions on Azerbaijan Act. This bill

is designed to ensure that until the issues I just mentioned are resolved, Azerbaijan will be denied most-favored-nation trading status; loans, guarantees or insurance with respect to U.S. exports to that country; and most foreign assistance; as well as other trade and economic benefits.

In the past few minutes I have said quite a bit about Armenia. But history depends on key women and men during crucial periods. At this moment, Armenia's democratically elected President stands at the crossroads of history. The good he can do at the United Nations, visiting with other world leaders, and especially leaders of the former Soviet Union, and with American foreign policymakers is enormous. Let me also just briefly note the good work done in this country by the Armenian Assembly of America. I commend Ross Vartian, the executive director, Sonia Crow, director of government and legal affairs, and other members of the staff. I also want to make a special note of the efforts of Hirair Hovnanian, chairman of the board of trustees of the Armenian Assembly, who is playing an instrumental role in the reconstruction efforts in Armenia following the earthquakes.

Armenian history—like the history of many countries—has been shaped by scholars, poets, and academics. President Levon Ter-Petrosian, is just such a scholar. On the occasion of its first anniversary of independence, Armenia today is a democratic, pluralistic, market-oriented sovereign state. President Ter-Petrosian has led the successful struggle to create a remarkable island of freedom where a multiparty Parliament is governing the country under his administration. He has earned our appreciation and support. I felt extremely fortunate to be able to introduce him to those gathered in New York for the rally. I remain committed to the effort to ensure that democracy succeeds in Armenia.

#### SENATOR TIM WIRTH

Mr. EXON. Mr. President, I want to take a moment to honor my departing colleague from the neighboring State of Colorado, Senator TIM WIRTH.

TIM is my daughter, Pam's, Senator since she resides with her family in Greeley, CO. She has worked hard on behalf of TIM WIRTH in his 1986 campaign and admires him greatly. I, too, admire him greatly.

TIM is a fighter who has made a tremendous contribution to the U.S. Senate and the United States of America during his short, 6 years in this body. Some Senators stand out among their peers here and TIM WIRTH has been one of those.

TIM WIRTH's dedication to the betterment of our environmental and to the future of our children and grandchildren is unparalleled in the Senate.

It was with a great deal of sadness that I learned of his decision to retire. Yet, I understand his decision even while, at the same time, mourning the loss of his presence here. TIM WIRTH has been one of the young, rising stars in the Democratic Party and I believe that star will continue to shine brightly for many years to come.

I want to personally thank TIM WIRTH for his dedication and, especially, for his friendship. Pat and I also want to wish him and Wren all the best in the future and want him to know that he will miss very sorely come next January.

#### TRIBUTE TO SENATOR RUDMAN

Mr. PRYOR. Mr. President, we lose another bright light in the Senate with the retirement of Senator WARREN RUDMAN at the close of this term. This most popular politician in New Hampshire today is not leaving us because he is in trouble with the voters back home. He is leaving this body in part in frustration and in part to move on to other endeavors.

Many may ask how a Republican Senator from New Hampshire and a Democratic Senator from Arkansas could forge such a strong bond. And WARREN RUDMAN and I have done so, Mr. President.

Though we are not in agreement on many issues of public policy and debate, we share a deep faith in our system of government and a deep sorrow when we see it is not operating up to its potential.

WARREN RUDMAN and I sat together for many hours in the Senate Ethics Committee over some very trying issues and dilemmas. You might say we were sentenced to the Ethics Committee, because at times we felt like that.

But in all those long and arduous hours of deliberations on matters dealing with our fellow colleagues, I took strength in the fact that WARREN RUDMAN was a member of the committee. Yes, he could be contentious, but he was also conscientious. And I have never known WARREN RUDMAN to take a position that he could not intellectually defend.

If there has been a reward from our service on the Ethics Committee, then for me it has been to get to know and respect the Senator from New Hampshire.

He shook this institution at its very roots in challenging the way we put together a Federal budget. He masterfully guided the nomination of his friend and successor as attorney general in New Hampshire, David Souter, through the Senate. And he has never forgotten the people who sent him here either. He has championed a contingency fund for the Low-Income Home Energy Assistance Program and a bill to preserve almost 50,000 acres of land in New Hampshire threatened by overzealous development.

So I am saddened, Mr. President, to have to bid farewell to my friend, WARREN RUDMAN. He will truly be missed in the U.S. Senate. His successor in the Senate will indeed have big shoes to fill.

#### SENATOR STEVE SYMMS

Mr. EXON. Mr. President, I want to salute one of our departing colleagues, Senator STEVE SYMMS of Idaho.

I have served with STEVE SYMMS as long as he has been a Member of the U.S. Senate and will miss him as he departs.

There has been no greater defender of the national security of the United States of America than STEVE SYMMS. His dedication to this goal, and willingness to pursue it, have been an example to us all.

His rugged individualism, dedication, and ability have made a keen contribution to the U.S. Senate. STEVE SYMMS is also a friend who has served his Presidents very well. Even though we are of opposite political parties, I have always known STEVE SYMMS to be one with whom I could work and always get a straight answer. STEVE SYMMS is an example of what a U.S. Senator ought to be. He represents his constituency with vigor, yet always keeps in mind what is best for the United States of America.

I value his friendship and want to wish him all the best in his future endeavors.

#### RETIREMENTS IN THE ARKANSAS DELEGATION

Mr. PRYOR. Mr. President, Arkansas will bid farewell to three-fourths of its delegation in the House of Representatives when the 102d Congress comes to a close.

CONGRESSMAN JOHN PAUL HAMMERSCHMIDT

JOHN PAUL HAMMERSCHMIDT has served the people of the Third Congressional District for 26 years. JOHN PAUL and I came to the Congress together back in 1967 as freshman in the House of Representatives.

The constituent services that JOHN PAUL and his staff have provided to his people are legend and are a standard which the rest of us in the Arkansas delegation emulate.

As ranking member of the House Public Works and Transportation Committee, JOHN PAUL has been recognized as an expert on transportation matters in the Congress. As the representative of one of the fastest growing regions in the country, JOHN PAUL has worked tirelessly to expand and improve U.S. Highway 71, a main thoroughfare in northwest Arkansas. Our State legislature recognized his contributions to transportation in our State by deservedly naming that highway for him.

Arkansas veterans have come to rely on JOHN PAUL as their key man in

Washington. By actual seniority, he is ranking member of the Veterans' Affairs Committee as well.

Mr. President, JOHN PAUL will be missed in the Congress. He is one of the many Members of the Congress who has performed his job, without fanfare or headline, day in and day out, to make life for his constituents a little better.

I wish he and Ginny a long and fulfilling retirement. They have earned it.

CONGRESSMAN BILL ALEXANDER

Congressman BILL ALEXANDER leaves us after 24 years of service to the people of the First District. A member of the powerful House Appropriations Committee, BILL has worked to insure that our State gets its fair share of dollars for programs and projects for our people.

The people in northeast and eastern Arkansas know full well that they have BILL ALEXANDER to thank for most of their water and sewer systems, their parks, housing, and rural development programs.

In recent years, BILL has sounded the alarm on the need to more fully utilize alternative fuels, particularly alcohol fuels, as a means of reducing our dependence on oil from foreign sources. Frankly, we should have been listening more closely to BILL ALEXANDER on this issue. I am hopeful that the Congress will move more swiftly to follow up on BILL "trailblazing" in this area.

BILL ALEXANDER has proved to be an able defender of the Economic Development Administration, often the lifeline in poor areas, like a number of those he represents. Likewise, he has been a champion of the REA, another link to progress for rural America. The farmer has never had a better friend in Congress than BILL ALEXANDER.

The voters of the First District always knew where BILL ALEXANDER stood. And while they may not have always agreed, they have respected him for his honesty and forthrightness in office.

BILL, too, will be missed, and I wish he and Debi and their new son Alex all the best as they move on to other endeavors.

CONGRESSMAN BERYL ANTHONY, JR.

In 1978, Barbara and I moved to Washington to take our place in the Senate as BERYL and Sheila ANTHONY came to be in the House of Representatives. We shared the same trials and tribulations of the move, the expectations, fears, the anticipation.

Over the years, we have become very close personal friends, as have our wives. BERYL came to the Nation's Capital with the same kind of enthusiasm and hope that I remembered feeling as a young Congressman back in 1967, coming to Washington to represent the same Fourth District that BERYL has so ably represented these past 14 years.

He gained a coveted seat on the House Ways and Means Committee and

quickly became an avid student of the wide range of public policies dealt with by that committee.

He also took the chairmanship of the Democratic Congressional Campaign Committee, setting new records for money raised in support of his colleagues' electoral fortunes. That is a time consuming job that pays few dividends back home. BERYL gave that job, however, his all and a number of fine individuals are serving in the House today due, in large part, to his stewardship at the DCCC.

Barbara joins me in wishing BERYL and Sheila the best as they take on the next task that they pursue.

You can be assured that BERYL ANTHONY will give that endeavor every ounce of strength he possesses.

#### SENATOR BROCK ADAMS

Mr. EXON. Mr. President, I want to take this opportunity to salute my friend and departing colleague, Senator BROCK ADAMS.

I have known BROCK ADAMS for many years, dating back to his service as the Secretary of Transportation during the administration of President Jimmy Carter. BROCK ADAMS and I have served on committees together here in the U.S. Senate and I truly regard him as my friend.

BROCK ADAMS has been a dedicated public servant for quite some time who brings a unique and important perspective to the U.S. Senate. When you get down to tough work in the trenches, you need a friend and colleague like BROCK ADAMS in there pitching with you in working to get the job done.

Mr. President, BROCK ADAMS is a man of deep conviction who pursues what he believes is right with great enthusiasm and capability. He represents the essence of what a U.S. Senator ought to be—a fighter who has the wisdom and courage to back up his zeal.

Surely the U.S. Senate will be a poorer place without BROCK ADAMS. Pat and I want to take this opportunity to wish him and Betty all the best in the future.

Mr. GRASSLEY. Mr. President, if I may, I would like to have permission to speak as if in morning business.

The PRESIDING OFFICER. Hearing no objection, that will be the order.

#### U.S. PRISONERS OF WAR

Mr. GRASSLEY. Mr. President, in light of the recent hearings that the Select Committee on POW/MIA Affairs has been having—and we have had several very good hearings over the period of the last 9 months—I want to provide an update as to where I believe the issue now stands, and then where, in my opinion—just speaking for myself as an individual Senator, but also a member of this committee—I think we should be headed.

The committee heard compelling testimony recently from Nixon administration officials who said they believed we left men behind in Southeast Asia. We unearthed countless documents that point to the very same conclusion.

I personally disclosed in hearings recently a series of documents which showed the U.S. Government believed there were 81 prisoners 2 days after President Nixon said that all prisoners of war were home.

This series of documents, Mr. President, constitute the proverbial smoking gun. Perhaps it is more like a smoldering gun.

Was the Government telling it straight when it said all our prisoners were coming home? I believe the definitive answer to that question is "No". According to our own Government's intelligence, 81 men were still being held prisoner. When President Nixon said all were returning home.

Let me explain the documents and provide their context. This blowup of one of the documents shows a weekly status report on the prisoners that our Government believed were being held by the Vietnamese. The document reflects the official position of the Government. Responsibility for maintaining these lists resided with the Comptroller's Office in the Office of the Secretary of Defense. It was a thoroughly coordinated and therefore official assessment that went all the way up the chain of command—to then-Secretary of Defense Elliott Richardson, that is according to Mr. Richardson's own testimony 10 days ago. The bottom line, here, in the document—in the category called "current captured"—it says "81." In other words, there are 81 men upon whom the U.S. Government had intelligence, on March 31, 1973, and were believed to be alive and in captivity. This is just 2 days after homecoming, and 2 days after the President said all our men were on their way home.

Two days before this chart was prepared, the Vietnamese made their final release of our men. That was March 29. The week before that, this weekly status sheet showed 222 "current captured." The number shrunk to 81 one week later because of the final release.

Subsequent weeks show the number falling slightly, so that by June 1973, the number was down to 67. This is because new information had come in from returnees who accounted for the death of some of the list of 81. Meanwhile, some 50 to 75 cases requested by the service secretaries to be added to the list were denied by then-Deputy Secretary of Defense William Clements, according to Clements' own deposition taken by the committee.

Of the 67 men remaining on the current list as of June 1973, a document discovered by the committee, and signed by Clements, reveals how the administration then defined the cur-

rent captured category. In Clements' own words, in a July 17, 1973 memo to the President—which highlighted in this chart, Mr. President—he said the following:

Presently, there are 1,278 military personnel who are unaccounted for as a result of hostilities in Southeast Asia. Of this number, 67 are officially listed as prisoner of war based on information that they reached the ground safely and were captured.

This sentence, Mr. President, sums it all up, better than I could. It is as obvious as the smell of manure in the springtime in Iowa. It is just so obvious you cannot turn it off.

The Paris peace accords hearings before our committee left the Nation astonished. Headlines told the story of our country leaving prisoners behind. As one prominent newspaper stated, what was once the unthinkable has become the accepted viewpoint. I quote from the September 22 issue of the Washington Post: it is "an idea that once seemed almost unthinkable but is rapidly becoming the accepted view."  
\* \* \*

There are three basic reasons why prisoners could have been withheld. First is the case of Laos. How could the United States demand the return of men captured in Laos whose presence we had never been willing to acknowledge in the first place? Laos certainly would not be obliged to return prisoners at homecoming when we were engaged in a secret war with them.

Second, in the case of Vietnam, is the issue of reparations. Our testimony and depositions show that reparations were the highest priority on the list of the Vietnamese. Dr. Kissinger denied this. He said reparations were a top priority only in the public talks, not in the secret talks. But Gen. Vernon Walters contradicted that assertion. He said reparations were at the top of the Vietnamese' list in the secret talks as well. He said he knew that because he was the translator during the secret talks. And the testimony of Col. Lawrence Robson, the Deputy Chief of the U.S. delegation, four-party joint military team, supported the testimony of General Walters. Colonel Robson was present during negotiations for the prisoner lists. His testimony was that reparations were right at the top of the Vietnamese' wish list. His testimony, like that of Walters, contradicted that of Kissinger. When that contradiction was pointed out to him, and when asked to explain the contradiction, Colonel Robson said that sometimes there is a difference between what is said in Washington and what is said in that sweaty little room where the negotiations were being held.

If it is true that reparations were primary on the minds of the Vietnamese, it is logical to assume they withheld some prisoners after homecoming in hopes they would obtain reparations. To deny that possibility is to deny the

obvious. And, of course, we never provided those reparations. So the next obvious question is: What happened to the prisoners?

The third reason why prisoners could have been withheld, again in the case of the Vietnamese, is that we had little leverage to enforce the terms of the treaty. It seems we were caught in a catch-22 situation. On the one hand, Congress rejected the aid package the Vietnamese assuredly viewed as a quid pro quo for United States prisoners. The fact that Congress rejected the aid package may well have sealed the fate of any prisoners still being withheld by the Vietnamese after homecoming. Either in Vietnam or in Laos.

On the other hand, Congress had been misled by Kissinger and Nixon, who maintained there were no secret deals with Vietnam involving an aid package. In fact there was a secret deal, involving more than \$4 billion. But it was scuttled by Congress, not knowing of the arrangement. And also scuttled, therefore, was any leverage the United States had to account for those we left behind.

This catch-22 predicament is insightfully explained in an October 5 article in *Time* magazine by Walter Isaacson. I would like to place this article in the RECORD, Mr. President, to appear at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. GRASSLEY. So this catch-22 left us with a very difficult policy decision. We knew the accounting of prisoners and MIA's was inadequate, in both Vietnam and Laos. But without leverage, what could be done to enforce a full accounting?

The choice was unfortunate yet, perhaps inevitable, given the circumstances.

As former Kissinger senior adviser Winston Lord said:

The President decided not to scuttle the agreement over the MIA issue. It was a very tough decision.

There were other complicating factors that contributed to our failure to gain a full accounting. The most obvious of these is the advent of Watergate. But there may have been other geopolitical issues that took priority. Discussing the question of how hard we pressed for an accounting from the Vietnamese, former Secretary of Defense James Schlesinger put it this way in his deposition:

The Pentagon would have been very exercised and said that these people (i.e. the Vietnamese) are not living up to their word and we want our men back. Whether the White House would, under those circumstances, think that the investment of capital, as desired by the Pentagon, was a wise investment of White House capital is another question.

Dr. Schlesinger goes on, in the context of the contradiction between the

evidence and Nixon's statement, and says the following:

Then after that it becomes not only an inconvenience in that the pursuit of this objective might interfere with the pursuit of other objectives—that is, an investment of political capital other than that which was desired—but it becomes a positive embarrassment for an administration that has declared that there is nobody left, that all of a sudden some show up.

Where was the political capital actually spent? Schlesinger touched on this in his deposition. He said that Kissinger "was not dealing only with the POW situation. He would have other things that he was concerned about."

He was concerned about not drawing down on his credit with the Russians too frequently, because he had a SALT negotiation underway. He would be concerned that if he demanded too much of the North Vietnamese on this particular point, that he might be obliged to make concessions, or at least be subjected to demand for concessions on some other point, which he might regard as more important than this issue.

In other words, there may have been more important issues than the full accounting of our MIA's, according to Dr. Schlesinger.

Schlesinger goes on to say there was documentation he saw that spelled this out. He says:

I recall seeing one of those (documents) that indicated that Dr. Kissinger had expressed concern about the possibility of the North Vietnamese demanding concessions as a consequence of pressing certain issues too hard.

Schlesinger was then asked by a committee attorney:

Was one of the issues—that we were thinking of pressing—POW's? Was that one of the issues that Dr. Kissinger was concerned, if we pressed it.

Schlesinger's reply: "Yes. I think that that was the context."

Mr. President, I trust our committee will follow up and obtain this documentation alluded to by Dr. Schlesinger. And indeed I have requested that the committee do so. I believe this would shed light on a critical question about why men were left behind.

The bottom line is, there is now abundant, documented evidence that says we left men behind. And now the next obvious question is: Did they survive and, if so, for how long? And what evidence is there to address that question?

These questions have been on the minds of the American people ever since they came to realize that the unthinkable actually occurred. If it is true we left men behind, what happened to them?

There has been as much skepticism about survival of some prisoners as there had been about our country leaving them behind. But given that men were left behind, skepticism of survival is unfair; it is baseless; it is glib; and, it is irresponsible—unless, that is, it is backed up by evidence. Thus far, none has come forth.

It is often conjectured by some that the men we left behind are dead. Such conjecture should not be allowed to stand without attendant evidence. One can think or believe that our men left behind are all dead. But it is a pretty sad state of affairs when the burden of proof is for showing they are alive, rather than showing they are dead.

The same standard should also apply for statements that "there is no credible evidence that men are alive." That proposition might certainly be the case without the context of knowing we left men behind. But with this new context, any evidence at all must be given greater weight than before. The burden of proof must now shift.

This is not to say, Mr. President, that I believe there are men alive even today. I neither believe nor disbelieve that proposition. The point is, let us get the evidence on the table without all the debunking, and let us examine it within the new context that we left men behind.

Within such a context, the burden of proof should be weighted in favor of survival. It would seem logical, since we now know men were left behind, that evidence of survival should be viewed as valid until proven otherwise.

This presumption is in sharp contrast to the presumptions of the Government's previous efforts to pursue POW/MIA evidence, in my view.

Previously, the Defense Intelligence Agency, assuming men were not left behind, would have an extremely high threshold of proof.

DIA, as we all know, is the organization responsible for the POW/MIA issue since 1973. And as America now knows, DIA has been criticized innumerable times, from both inside and outside DOD, as having a "mindset to debunk." In other words, DIA would not be satisfied that evidence was evidence unless it came up and bit them in the leg. That means that anything short of producing a live POW was not considered credible evidence.

Just what is a "mindset to debunk"? For the best answer to that, I refer you to the hearings of our select committee, August 4 and 5. These were the so-called live-sighting hearings.

DIA was asked to defend its analysis that literally thousands of live sighting reports of Americans in captivity were all either fabrications or in some other way false.

Thousands. Every one of those reports was deemed false by DIA. In fact, DIA has no category for possible live POW's in their data base to categorize live sighting reports. Is this amazing, or what?

And, of course, no motive was offered by DIA as to why each of the thousands of reports was false. Perhaps it was a freak of nature. Or, maybe these sources—predominantly refugees—were fibbing, figuring we would be grateful and let them settle in America. Maybe

they just wanted to sell false information for money.

In point of fact, Mr. President, most of the credible firsthand sources were already settled in the United States, or did not want to come to the United States. Many were already settled in other countries and were prominent members of society there. And they asked for no money. So what was the motive to lie? DIA has no explanation for this.

Nonetheless, August 4 and 5 witnessed the most adamant and dogmatic display of intelligence analysis by a Government organization that I have seen since entering public office.

Intelligence analysts are traditionally cautious with their assessments. They hedge their analysis by measuring possibilities and probabilities. They are not black and white, as a rule. They are well aware that their readings of intelligence may be flawed or incomplete. It is the only intellectually honest way to present intelligence assessments.

But not the Defense Intelligence Agency. Their analysis cannot be wrong. Ever. Even though they admit they are human and can make mistakes, such a possibility is never reflected in their analysis. If evidence contradicts their position, the evidence must be flawed, not their position. Evidence contrary to their position becomes someone's personal musings, or illusions, rather than a reflection of reality. If my colleagues doubt this, I invite my colleagues to read the transcripts of the August 4 and 5 hearings. During those hearings, when DIA could not explain away evidence that challenged their position, they would maintain their position and cite information not documented or contained in their own files. And today, 2 months after the fact, DIA is still not able to document these citations for our committee.

So the bottom line, Mr. President, is that men were left behind, a new context for evaluating evidence has been established, and the burning question is: Can we trust DIA to competently evaluate evidence of possible survival?

This is the crucial question, Mr. President, because the fact of the matter is that our committee does have evidence that suggests survival. The evidence is in the form of radio intercepts and perhaps live sighting reports, depending on how DIA responds to outstanding questions and discrepancies. Perhaps most compelling, though, this evidence is in the form of distress signals and authenticator numbers captured in overhead photography.

One pertinent question, for instance, surrounding the symbols issue is the following: Does a 4-digit number seen dug into a rice paddy in the mid-1980's, and which matches a classified authenticator number of a known MIA, constitute evidence of a possible living POW?

The committee must examine the possibility that a number of symbols and markings may be attempts by possible U.S. POW's to communicate their locations to intelligence collectors. These symbols and markings have been identified through the use of overhead reconnaissance photography. These possible distress symbols, several of which match pilot distress symbols used during the war, span a period from 1973 to 1988. The committee must also examine followup actions taken by the Government to investigate these symbols.

It should be noted that our Government launched a reconnaissance operation to a possible detention site on the basis of just one such symbol, in the early 1980's.

One of the hurdles we will face in examining this evidence, in my view, is the ubiquitous mindset to debunk. DIA has yet to come to grips with the new context for understanding evidence on this issue. And so the debunking continues, although without credibility, in my view.

The great challenge of our committee will be to examine the new evidence we have on symbols without the bias of DIA's mindset to debunk.

Let me touch a bit on this issue of symbols, Mr. President, because it will be critical for answering questions about possible survival.

And then I would like to address recent circumstances and concerns I have as our committee proceeds to evaluate these symbols.

First, an explanation of the symbols: During the war years, the military services gave many pilots who flew in Southeast Asia individual authenticator numbers. These numbers allowed pilots to identify themselves and their whereabouts to U.S. intelligence experts in the event of their shootdown or capture. Many pilots were rescued during the war thanks to such signals.

Often, fliers had primary and backup distress signals. These were classified, as were authenticator numbers, and they changed periodically.

After the war years, the intelligence community all but stopped looking for distress signals. This was consistent with official policy that all our men were home. The Government's institutional memory on the subject was lost. Monitoring intelligence for symbols became a low priority.

Over the years, some photography surfaced that seemed to show legitimate symbols. Despite the low priority, a significant number of symbols were collected and have been identified by the committee. But both DIA and CIA did little to follow up.

For example, one symbol was spotted in January 1988 but was not followed up by DIA until December 1988, 12 months later.

Perhaps the clearest illustration that the Government ignored the monitor-

ing of distress signals is that the Government agency responsible for training our men to create the symbols was never brought in the loop. That agency is called JSSA, which stands for joint services SERE agency. SERE stands for Search, Escape, Rescue, and Evacuation.

It is almost unconscionable that this agency was not brought into the loop, Mr. President. And upon seeing these photographs, JSSA has said most of them are potentially valid, and must be treated as such until proven otherwise. In other words, JSSA views these symbols as possible evidence of survivors.

JSSA's credibility and standing are not based solely on their role as the lead agency for symbols and survival. JSSA has recently been given responsibility for the POW/MIA issue and has been chartered to review the performance of the Defense Intelligence Agency on this issue. Because of this new charter, judgments rendered by DIA, which is the subject of the JSSA review, must be viewed with a filter. Is DIA's opposition to JSSA's belief in the validity of these symbols merely because of bureaucratic jealousy over jurisdiction? In my view, it is high time this issue was taken away from DIA to remove once and for all the stigma of the mindset to debunk.

Now, I raise this issue, Mr. President, because I have gotten wind that DIA is trying to prevent the committee's long-scheduled public hearing on this symbols issue. That, despite the fact that DIA has not even analyzed the data it has been sitting on for years. The rumor is, if a hearing must be scheduled, DIA wants it to be secret. I hope our committee will not succumb to DIA's desire. I, for one, do not want to be accused of a coverup. And I do not think the rest of my colleagues on the committee relish the charge, either.

The importance of raising this issue before the American public is seen by virtue of the controversy within the Defense Department itself on interpreting these symbols. No less than the organization responsible for teaching pilots how to create these symbols says the evidence is valid. Mr. President, we need to examine this issue in a public setting, and let the public decide if this is evidence of surviving MIAs.

This afternoon I have presented my views of the current status of our committee's work, and what more needs to be done. Today, I will provide the committee with a list of issues to be resolved before our business can be called thorough and complete.

The committee has done a tremendous and commendable job of uncovering the events both during and after the Paris peace accords. We now have a good understanding of the fact that we failed to gain an accounting. And we have a good sense as to why.

Our unfinished business involves the question of possible survival. That is the next logical question to deal with. And it must be dealt with in the open.

With just 3 months to go in our committee's charter, there are still numerous documents we have requested and have yet to receive. We cannot make judgments on the remaining crucial question until we see those documents. The Central Intelligence Agency has given us access to only a fraction of their files. We have reviewed only 20 out of 90 boxes of materials we have identified at the National Security Agency. DOD has not provided access to all of its documents. The military services, most notably the Navy, have been uncooperative in varying degrees. In some cases, documents have been provided from headquarters, but not from the various commands.

Mr. President, I do expect my colleagues will not want to foreclose on the question of possible survival. That is, unless and until all the evidence has been examined. As I said earlier, I personally neither believe nor disbelieve men are still alive. But I want a chance to examine the data. I want it all on the table, in full view of the public. And I am confident my colleagues desire this as well. It is the only way we can answer this crucial question with any credibility.

I would only say one additional thing. All that I have spoken about here is just in pursuit of Congress' responsibility, constitutional responsibility, of congressional oversight; to make sure that the administration of laws under several administrations has done everything that the law has required.

But most importantly, for a long period of time, our Government has said that this issue of getting to the bottom of the POW-MIA thing is our Nation's highest priority.

I do not think that our performance has been commensurate with that rhetoric. I think we ought to either perform commensurate with that rhetoric or that we ought to not be telling the people any more that this is our Nation's highest priority.

And these statements that I make and my concern about this issue are not in any way just related to the POW-MIA matter for the Vietnam war or even for the Korean or World War II wars. It is because we tell our enlistees and we tell our draftees, "Ye shall not be forsaken nor forgotten." In other words, if taken prisoner, our Government will do all humanly possible to see that you are rescued and not forgotten.

I would like to believe that the day has come in America that we never will fight any more wars, and I hope that is true. But we are still going to keep a military to see that we do not have to fight any more wars. And in case that maybe we do, we must reaffirm to the

people who are in uniform today, and our children and grandchildren that will be in uniform in decades into the future, that when we say, "Ye shall not be forsaken nor forgotten," we will not forsake and we will not forget.

And, as I indicated here, Mr. President, from the beginning, I said there is a memo from the Secretary of Defense to the President of the United States, dated 17 July 1973—3 months after our President said that all were home—that our Government officially recognized, at least that they believe were still alive, 67. And this number 67 is going to stand out in the minds of people now in the military; whether or not we are keeping our commitment to the young people defending freedom, not only America's freedom but freedom around the world so that we can continue to be a shining light for people that hope for freedom and want to maintain their freedom elsewhere.

Mr. President, I yield the floor.

#### EXHIBIT 1

[From Time Magazine, Oct. 5, 1992]

#### IMPERFECT HINDSIGHT

(By Walter Isaacson)

It is a reliable rule of statecraft that it is hard to win at the bargaining table what you are unable or unwilling to win on the battlefield. Henry Kissinger, a cold-eyed realist and practitioner of power politics, knew this well. During the four years that he negotiated America's exit from Vietnam, he regularly resisted those people—ranging from Defense Secretary Melvin Laird to the doves in the Senate—who wanted to speed up troop withdrawals and, in Kissinger's view, undercut U.S. leverage at the Paris peace talks. And after the peace accord was signed in January 1973, he repeatedly advocated military pressure to force the communists to comply with the bargain.

Although Laird and two of his successors, Elliot Richardson and James Schlesinger, testified last week before a Senate committee that some American POWs may have been left behind in Indochina, there is no evidence that Kissinger was callous toward their fate. His critics may be justified in attacking his bureaucratic methods, but they have no reason to impugn his motives. As he pointed out in his Senate testimony last week, there were no reliable reports of live Americans being held in violation of the accord. And he was also persuasive in charging that neither the public nor the Congress was willing any longer to support the bargaining levers—economic aid, renewed military involvement—that he considered necessary to force the communists to account for the American servicemen who were still missing.

What Kissinger failed to confront in his testimony was the disjunction between his explanation that he knew of no POWs still being held and his plaint that he had no bargaining powers to force the issue. Policy involves making trade-offs, and in 1973 a difficult one was made: the Nixon Administration decided that it was best not to scuttle the peace agreement or re-engage in the war despite the fact that some missing Americans had not yet been accounted for. Winston Lord, Kissinger's onetime aide, was the only witness last week willing to discuss this uncomfortable truth, calling the trade-off tough and agonizing. This choice may not have been the right one, but it was an under-

standable one given the public mood at the time.

But it was partly Kissinger's back-channel methods that made it more difficult to enforce the 1973 treaty and that created the distrust that has surrounded the MIA issue ever since. Kissinger negotiated the Vietnam Peace Accord secretly, cutting Congress and even the State Department out of the process. And on two crucial issues in the final agreement, this furtiveness bordered on deceit.

The first involved the "war reparations" that Hanoi demanded from the U.S. Kissinger offered instead a package of "reconstruction" aid. This was duly noted in the Paris agreement. But Kissinger kept secret a deal he made with the North Vietnamese to send them a presidential letter—three days after the accord was signed—spelling out the detail of this aid. Even trickier was the deal he cooked up to get around Hanoi's insistence that the letter not say this aid was contingent on congressional approval. To solve that, Kissinger drafted a separate presidential letter saying the aid package would "be implemented by each member in accordance with its own constitutional provisions."

Kissinger and Nixon did not tell Congress of these letters. Instead, in between the signing of the treaty and the sending of the letters, they misleadingly informed Congress that there were "no secret deals" involving economic aid. Congress balked at the aid package and thus removed one of Kissinger's bargaining chips for dealing with the MIA issue.

The same was true on the issue of whether the U.S. would be willing to enforce the Paris agreement by retaliating militarily against violations on the MIA issue and others. Kissinger drafted letters, which Nixon signed, making such pledges to South Vietnam's President Nguyen Van Thieu. "We will respond with full force should the settlement be violated by North Vietnam," read one sent in January 1973, and that helped persuade Thieu to sign the peace accord. But Kissinger and Nixon kept these letters secret from Congress—and even from the Joint Chiefs of Staff. As it turned out, Congress was unwilling to authorize force either to press the MIA issue or to save the Thieu government. When the secret letters became public two years later, an uproar ensued that further undermined Kissinger's credibility.

Kissinger was right: deprived of both the carrot of economic aid and the stick of military retaliation, it was next to impossible to make the Vietnamese communists comply with the agreement. And he did work mightily—and honorably—with the few tools left at his disposal to pressure the communists to account for the missing servicemen. But in the end, he was undermined both by the nation's unwillingness to remain engaged in Indochina and by the furtive way he handled the negotiations that led to America's eagerly sought withdrawal from the region.

Mr. KERRY addressed Chair.

The PRESIDING OFFICER (Mr. SIMON). The Senator from Massachusetts is recognized.

Mr. KERRY. Mr. President, I would ask my colleague from Iowa if he could remain just for 1 minute because I wanted to try to ask from him, if I can, a clarification.

But before I do so, I want to thank the Senator from New Jersey for letting me just take a moment ahead of him.

First of all, I would like to congratulate the Senator from Iowa, because I

think he has laid out accurately a number of major questions that remain before the committee. And I want to thank the Senator for his personal efforts to try to seek the full accounting and to try to seek a declassification.

The Senator from Iowa has been one of the principal proponents of the declassification process and helped the committee to lay out an approach to that. But what I wanted to try to clarify with the Senator, because I was in my office listening and I heard him say something to the effect that the bottom line is, we left people behind. And, to the best of my knowledge, as chairman of the committee who attended most of the hearings, we have been seeking to be very, very careful about the language on this issue.

If the Senator means, when he says the bottom line is, we left people behind, if he means by that that there was this group who were unaccounted for whom we have reason to believe that the last we knew of them is they were captured and they were alive and we did not get the accounting, it seems to me the testimony is very clear that is true.

What we have to be very careful of is making the automatic leap that all, the vast majority of, or some of those, that we can assume that they were actually alive on a specific day and time.

Now I do not, as a member of the committee, have evidence that says to me—and this is where we got into a great tangle with Secretary Kissinger and a great tangle with other people who have been part of this, Roger Shields, for instance, could somebody say that they knew on a certain day in 1973 when Operation Homecoming took place, did they know that Colonel Somebody or Lieutenant Somebody was, in fact, alive?

Now, I do not think the Senator from Iowa is saying that he knows that on the given day they were alive. If he does know something different which allows him to say that we left people behind, I would like to know it. I believe the Senator from Iowa is saying that we had a right to expect that that group of people listed as POW's, about whom the last thing we knew was that they had been alive and captured, that there was a presumption that they were alive and that they were not accounted for. But there is a distinction between the two.

And I just want to be very careful that before the committee itself sits and deliberates on this and before we come up as a group with our conclusions as to how we are phrasing it, I just want to make sure that the Senator from Iowa and I are on the same wavelength here as to what that evidence really is.

So I really ask him whether that clarification is an accurate one and whether it meets with his approval as to what we understand.

Mr. GRASSLEY. Very definitely.

I would only add to that, though, that I carried on from that point in my remarks to make crystal clear that the approach that DIA has used, that somehow if there was a lead on somebody possibly being in captivity that there was an overwhelming burden to prove your case.

It seems to me, with this sort of admittance on the part of our Government, that it ought to be DIA's approach and they ought to have the responsibility of proving that that information is not accurate. And I listed in the thousands of cases that that is not the case, that they just accept the evidence as not overwhelming enough to show that somebody is there so it has no basis. And to me, that is wrong.

Mr. KERRY. May I say to the distinguished Senator, I agree with a lot of that evidence. I think he is absolutely correct, that we have countless people who have laid out to the committee some of the problems that existed in the evaluative process. And I think his statement today is a good summary, a good summary of some of the difficulties that the committee confronted and a very good statement about some of the things that remain to be done.

There are a lot of documents yet to be declassified. There is a lot of evidence yet to be put in front of the committee. As I say, the Senator is one of the leaders in trying to make that happen. But I just wanted to clarify as to that one point. Because I did not want it to be a premature conclusion of the committee.

I thank the distinguished Senator.

Mr. GRASSLEY. I thank my colleague for the clarification, probably needed clarification, very legitimate clarification. And more important, I thank my colleague for his leadership on the committee, creating an environment where getting all this stuff out on the table is possible.

The PRESIDING OFFICER. The Senator from New Jersey is recognized.

#### THE ECONOMY

Mr. LAUTENBERG. Mr. President, I want to take some time to talk about the state of our economy, where we have been and where we might go.

On October 2, the Department of Labor announced that the unemployment rate stands at 7.5 percent, a rate far higher than the 5.4-percent rate when President Bush took office in 1989. In fact, since George Bush took office, our economy has stalled. We are in the longest recession since the Great Depression, with no end in sight.

According to the latest statistics, the number of Americans holding payroll jobs fell in September by 57,000. And the number of Americans holding manufacturing jobs dropped by 26,000. More than 9.5 million Americans are out of work and more than 1.1 million Ameri-

cans have dropped out of the labor force because they cannot find a job and they are totally discouraged.

The only reason the unemployment rate dipped slightly from last month's 7.6 percent is because 164,000 Americans dropped out of the labor force altogether in September—a jarring sign of the despair darkening the homes of our people.

These numbers are part of an overall drumbeat of negative news on the economy. Consumer confidence fell for the third consecutive month in September, bringing it to a lower point than it has been on the eve of the past five Presidential elections. Durable goods orders, one of the most reliable barometers of sustained recovery, fell in August for the third time in 4 months.

Sales of existing family homes fell 3.2 percent in August, despite the steep plunge in mortgage rates that began in July and total personal income fell sharply in August. Consumer confidence fell in September for the third consecutive month. The Commerce Department's index of leading economic indicators, a composite statistic designed to predict economic activity during the next 6 months, fell 0.2 percent in August, the second decline in 3 months; 7 of its 11 components worsened significantly.

Experts agree that, taken together, these statistics mean that the economy is going nowhere fast and that means that things are not likely to improve for at least 6 months, if then. But you do not need an expert to confirm what every American but George Bush knows—that our economy is in deep trouble and it needs help now.

And our economic woes have exaggerated our social problems. Today's Washington Post reports the findings of a Fordham University study that tracks the nation's Index of Social Health. That index, which tracks indicators such as poverty, infant mortality, crime and drug abuse, is now at its lowest point in 21 years. Most if not all of these problems have their roots in our economic problems.

And, incredibly, George Bush said in June that he thought the economy was better than Americans realized. In July he said we were in a recovery. And in August he said we were poised for an outstanding recovery. Even last week George Bush said that the job market was improving, when fewer Americans held jobs, and when wages had fallen and when thousands of people had dropped out of the job market altogether.

We have to wake up and read the statistics, or better yet, just talk to the average person across the country. We are facing tough times in my State of New Jersey and across the Nation. Jobs are disappearing—218,000 in New Jersey alone, since George Bush took office. In September, U.S. News & World Report published a "Pocketbook Index" which

measures our current economic misery. It developed rankings for each State based on income growth, growth in employment, and growth in unemployment, the rise or fall in home prices and business bankruptcies. In this survey, my State of New Jersey was ranked 50th—the State which took the greatest beating. We have lost income and we have lost jobs. Our unemployment rate is above the national average, real home prices have declined by 8.3 percent—the steepest in the Nation. Bankruptcies have reached record rates. People are suffering. And increasing numbers of middle-class Americans are struggling to pay their mortgage or rent payments, send their kids to college and keep their heads above water.

Nothing that George Bush has done or is prepared to do has made any discernible difference in these facts. Under his stewardship things have gone from bad to worse, and worse yet. The dismal situation in which we find ourselves is the product of an economic record of broken promises and failed economic policies. Although George Bush promised that he would create 30 million new jobs in 8 years, the number of private sector jobs on his watch is actually down—not up. Under George Bush 1.3 million manufacturing jobs have been lost, and over 100,000 farms have been wiped out. The typical family is \$1,600 poorer in real income annually than it was 2 years ago.

Ten years ago, the United States had the highest wages in the world. And now we are down to 13th. We have the highest rate of poverty of any advanced nation, and 10 percent of our country is on food stamps. Welfare and Medicaid rolls are growing at record rates. We are 21st among advanced nations in infant mortality. Our cities have turned into armed camps, and virtually no American feels safe in his or her home. And we find out lately that we are not even safe in our own cars.

Last year, Germany and Japan had productivity growth rates that were 3 and 4 times ours and we are raising the first generation of Americans who may actually be worse off than their parents.

George Bush's solution is another short-term capital gains tax cut for the wealthy, a balanced budget amendment with no serious proposals to balance the budget, and across-the-board tax cut in the face of a \$400 billion deficit.

The President's solution? He is handling out election year promises with no rhyme or reason as a substitute for a failed economic policy. His election strategy is to break the budget further. As one of my colleagues has said, we should consider moving up election day as our best means of reducing the deficit. He believes if you give tax breaks to the wealthiest Americans, that the benefits will trickle down to everyone else. We have seen that tried. It has not worked.

George Bush's trickle down economics have failed and it is time to try some new ideas. It is time for a new strategy on the economy—one that can restore growth and health to our economy, create genuine economic opportunity with high wage, high skilled jobs for Americans and restore the American dream for those who are willing to work hard—hard enough to succeed.

In the short term we must take bold steps to get the economy moving again and put people back to work. In the long term, we need to change course to put our Nation back on the track of long-term increases in productivity and competitiveness.

As a former businessman, I believe in our free market system. I also believe that Government has an important role to play. It is not enough to just sit back and wait for the economy to take care of itself, because it has not and it likely will not.

We have entered into a period in our history when the economy is global. Our people cannot compete on an unequal playing field with our competitors. They cannot compete with their hands tied behind their backs. Our Nation needs to invest more in our public infrastructure to upgrade our crumbling roads, bridges, airports, and transit systems. Infrastructure investment can create jobs immediately, especially in those areas and industries hardest hit by the recession, equally important, it can lay the foundation for long-term economic growth and greater productivity.

Mr. President, to appreciate the extent to which the United States has underinvested, we just have to take a look at Japan. Between 1973 and 1985, Japan invested 5.1 percent of its GNP in public, physical infrastructure; 5.1 percent. The figure in the United States was 0.3 percent.

Mr. President, weak investment in physical infrastructure leads directly to poor productivity. According to testimony before the Appropriations Committee, for example, deteriorating highways alone are estimated to cost the economy \$35 billion annually because of delayed interstate commerce. That is simply unacceptable.

To ease the pain of the recession, we also have to help the long-term unemployed get back to work. There are roughly 300,000 jobless New Jerseyans, many of whom have not been employed for a long period. I proposed legislation to provide businesses with a tax incentive to hire the long-term unemployed through a well-established, existing program, the targeted jobs tax credit. The TJTC now gives benefits to employers who hire ex-convicts and welfare recipients. Surely the long-term unemployed deserve at least the same helping hand.

As the bills mount and the savings run dry, the pressure on long-term un-

employed Americans is enormous. Unemployment is often associated with lower self-esteem, medical problems, family problems, and even criminal activity. It is a matter of compassion and good economic sense to put these people back to work. I have also introduced a bill to allow the unemployed to make penalty-free emergency withdrawals from their IRA's, 401(k)'s, and other retirement plans.

These steps will help our economy in the short term, but if we are to create an America that can compete and win in the world economy, that can provide real opportunity to Americans who work hard, then we have to fundamentally reorder our priorities.

Over the past decade, our Nation has indulged itself in consumption at the expense of the future. It is true in business, it is true in Government, and it is true in private households. Of course, there are exceptions, but the trend can be seen throughout the economy. The most dramatic example is the huge budget deficit, which really represents borrowing from our children and grandchildren, a loan that they have not consented to. It would be less troubling if these loans were being used principally to invest in ways that would yield long-term dividends that our children and grandchildren will enjoy. But, unfortunately, we have been borrowing not so much to invest in a productive future, but rather to spend for today's wants and needs.

We have to refocus our attention and our resources on investments for the long range. Investments in the future are our best hope for dealing with our immediate economic problems, as well as our long-term structural economic weaknesses. Investing in the future will require reordering of our priorities from excessive spending on defense to more spending on our domestic needs. Our Nation cannot continue to subsidize the security of our allies, nor can we afford the outdated weapons systems and the waste that bloat the Pentagon budget.

The cold war is over. It is long past time to shift our priorities to needs at home. We have created many of today's economic problem by an underinvesting in the future, while our competitors have invested substantial sums in their infrastructure and in their education, the training of their people, in research and commercializing inventions, and in export assistance. We have not. And we will be paying the price of that neglect for decades to come. We must reverse those policies and expand opportunities for education, training, and retraining for American workers throughout their careers.

Retraining is particularly important as we reduce defense spending, causing millions of defense workers to seek new jobs. Such reductions in the defense in the defense budget, which I

support, must be accompanied by programs to help move workers from defense industries to civilian jobs. A sound economic strategy should provide incentives for worker training and education because, while American industry searches for skilled workers in Japan or Germany, we have regions of displaced, unemployed, dispirited workers right here at home desperately seeking jobs.

In the years ahead, American workers will need more than just a strong back and a will to work to succeed. In our increasingly technological world, they will need training and retraining to remain competitive. That is why we have to find new ways to train and educate displaced workers and those who are the most disadvantaged, who threaten to become a burden instead of a productive force.

We must experiment with new programs like comprehensive education and employment centers that merge traditional education with on-the-job training. At the same time, we have to make sure that our tax dollars for schools and colleges are properly spent. Any plan to get our economy back on track must include helping Americans get the education they need to compete in the world of tomorrow.

Vocational education or a college education should be available to every American who wants it. Every American should be able to find the funds needed to go to college. I want to college on the G.I. bill, a benefit available to our World War II veterans that helped to fuel America's postwar expansion and made us the economic envy of the world. If that assistance has not been available to me, I would have never had the opportunity to succeed in business or to be here—to step from behind the counter in my father's store, to start a business that became an industry and become the CEO of a major American company. We should make that same opportunity available to our young people today, and they will be able to pay it back as a percentage of their income when they go to work, or perhaps they will be able to pay it back through community service. By throwing open the doors of our technical schools and universities to the sons and daughters of every American, we will be on our way to creating an America of true opportunity once again.

We also have to take bold action to gain control of health care costs and make decent health care available to all Americans. Rising health care costs are a significant threat to our economic well-being.

Health care costs have skyrocketed, leaving 34 million Americans without health care coverage entirely or underinsured. In 1980, we were spending \$250 billion a year for our health needs. This year, we are spending \$809 billion. Without restraint, health care costs

will exceed 17 percent of our GNP at the end of the decade. Health care costs are inflating our deficit, eating away at workers' pay checks and impairing the competitiveness of small business. It also puts a lock on peoples' job mobility, because they are so afraid of losing their health care insurance in the process of seeking a new job or trying a new venture. Unless we find a way to provide decent health care for all Americans at a reasonable cost, we will never be able to restore the vitality of our economy, remove the biggest burden on small business, or to get our deficit under control.

We also must work for a trading system that allows American business and workers as much access to foreign markets as other countries have to our markets. Otherwise, we will continue to do what we've been doing—exporting our best jobs instead of our best products.

We must assure we provide strong and vigorous protection against theft or exploitation of American ideas. In the past, America has been the world's idea factory. Our ideas and inventions have been our competitive edge. But too often American ideas are exploited or stolen by others.

I wrote existing laws to toughen up the protection of our inventions or intellectual property and make it harder for foreigners to steal America's genius, and we have to follow up with rigorous enforcement. If we hope to compete successfully in today's world, we must set policies that not only protect but that also stoke the fires of invention.

We can do that by making permanent the tax credit for research and development to spur industry to more and better discoveries. We can do it with continued support of our national laboratories and health science institutes. We can also do it through support of the Export-Import Bank, the principal source of Government financing for U.S. exports, which helps our exports remain competitive in the cutthroat international marketplace. And we can do it by putting the vast power of high-speed computer networks at the fingertips of entrepreneurs and other business people striving to bring new products to market or products to new markets. By providing businesses or universities with network access to supercomputers, months, maybe years can be saved off the time required to take new products or manufacturing processes off the drawing boards and into the marketplace.

The world is changing and we are not keeping pace. America is not continuing to take the leadership that it had locked up so many years ago, decades ago, and moving forward with it. We are seeing our ideas, our concepts, our needs, developed by others who borrowed from us, sometimes literally stole from us, but they have made products that suit the marketplace.

There seems to be a lack of understanding in our country that you cannot create these ideas or these products or these programs without having trained minds and the personnel skills with which to do it.

I come from a State that is known as a high-technology State. And what we find, Mr. President, is recruiters, employment directors, search executives have to turn to those who were foreign born, who are welcomed to our shores, to take the jobs of scientists and leaders because, in addition to lack of training, we have lack of experience among the people we need to fill those jobs. So we need to get back on investing in the future, long-range planning, education providing incentives to invent and create. Mr. President, this would not only be helpful to the large companies; it would be very helpful to small- and medium-size businesses.

By encouraging Federal agencies with large R&D budgets to put a little more of those budgets to work on moving invention and new product ideas or processes to the marketplace, we can put technology developed by the Government with tax dollars to work for the American economy and the private sector, the kind of investment that creates long-term high-paying jobs.

Mr. President, the White House has caused gridlock in Washington. Without any plans of its own, it has ruled by veto and by the threat of veto. In the Senate, it rules by filibuster, which takes a supermajority of 60 votes to bring debate to a close and enact legislation.

I am as frustrated by this inaction as are my constituents. It is outrageous what has happened in New Jersey under the Bush Presidency. We need new leadership and bold action to shift national priorities to educate, train, and employ Americans to invest in our future and increase our economic competitiveness.

Mr. President, it is time for our country to stop arguing. It is now time to get on with planning what we do as we approach the 21st century. Frankly, it has been a disappointment as far as this Senator is concerned when I see the empty promises for job creation. Where are the 30 million jobs the President spoke of? Do we wonder, Mr. President, why it is that the American people are so disillusioned with those who hold the power of decisionmaking for our country. We can see that the leadership has failed the country.

Mr. President, I hope that, as we can conclude our business in the U.S. Senate for this year, we can look forward to a new year with a real promise of getting on to solving our problems and a time when we can create real optimism that is, unfortunately, not felt around this country at this time.

#### WAIVING CERTAIN ENROLLMENT REQUIREMENTS

Mr. LAUTENBERG. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of House Joint Resolution 560, a joint resolution, waiving certain enrollment requirements with respect to any appropriation bill for the remainder of the 102d Congress.

The PRESIDING OFFICER. Is there objection?

Mr. JEFFORDS. Mr. President, reserving the right to object, I have been placed in the position of representing the leader on this side, but I have no instructions for this particular piece of legislation. I am awaiting instructions at this time and will be happy to proceed at that time.

Mr. LAUTENBERG. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. LAUTENBERG. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LAUTENBERG. Mr. President, we are going to establish a new order of business. I ask unanimous consent that we vitiate the first request.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### PROVIDING FOR THE PREPARATION OF OFFICIAL DUPLICATES OF CERTAIN LEGISLATIVE PAPERS

Mr. LAUTENBERG. Mr. President, I now ask unanimous consent that the Senate proceed to the immediate consideration of House Concurrent Resolution 376, just received from the House, that the concurrent resolution be agreed to and the motion to reconsider be laid upon the table.

The PRESIDING OFFICER. The resolution is privileged. And unless there is objection, the concurrent resolution (H. Con. Res. 376) is agreed to.

Mr. LAUTENBERG. Mr. President, I move to reconsider the vote by which the concurrent resolution was agreed to.

I move to lay that motion on the table.

The motion to lay on the table was agreed to.

#### WAIVING CERTAIN ENROLLMENT REQUIREMENTS

Mr. LAUTENBERG. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of House Joint Resolution 560, a joint resolution waiving certain enrollment requirements with respect to any appropriations bill for the remainder of the 102d Congress.

The PRESIDING OFFICER. Is there objection?

Mr. JEFFORDS. No objection, Mr. President.

The PRESIDING OFFICER. Without objection, the joint resolution (H.J. Res. 560) is passed.

Mr. LAUTENBERG. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. JEFFORDS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

#### THE REHABILITATION ACT AMENDMENTS OF 1992

Mr. LAUTENBERG. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of House Concurrent Resolution 371, a concurrent resolution correcting the enrollment of the conference report on H.R. 5482, a bill to extend the programs of the Rehabilitation Act for 1973, that the concurrent resolution be agreed to, and the motion to reconsider be laid upon the table.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JEFFORDS. Mr. President, I ask unanimous consent that the additional names of HATCH, DOLE, JEFFORDS, and SYMMS be added as sponsors of that legislation.

The PRESIDING OFFICER (Mr. CONRAD). Without objection, it is so ordered.

#### REHABILITATION ACT AMENDMENTS OF 1992—CONFERENCE REPORT

Mr. LAUTENBERG. Mr. President, I submit a report of the committee of conference on H.R. 5482 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The legislative clerk read as follows: The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 5482) to revise and extend the programs of the Rehabilitation Act of 1973, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

(The conference report is printed in the House proceedings of the RECORD of October 1, 1992.)

Mr. LAUTENBERG. Mr. President, I ask unanimous consent that the conference report be agreed to, the motion to reconsider be laid upon the table, and that any statements thereon appear in the RECORD at the appropriate place as though read.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JEFFORDS. Mr. President, I rise in support of the conference agreement reauthorizing the Rehabilitation Act. I

want to commend Senators HARKIN and DURENBERGER and their staffs for their tireless efforts to forge compromise and craft a thoughtful, solid bill.

The Rehabilitation Act provides a wide array of services to individuals with disabilities. The bill funds essential services to assure that persons with disabilities receive training to become employed and live independently. This training is essential and often makes the difference between a life of productivity or a life of frustration and dependence. Training and employment are key areas of the Rehabilitation Act and are strengthened and enhanced in the reauthorization.

During Senate consideration of S. 3065, the Senate Reauthorization of the Rehabilitation Act, I expressed my concern with the changes made to the rehabilitation engineering centers [REC] included in title II of the bill. I believed the changes diminished the REC's key emphasis on research. I am pleased to report that the conference agreement reestablishes the historical commitment of the REC's to research and strengthens the consumer input and information dissemination.

I had also expressed my concern with changes made to the independent living centers. The conference report maintains the changes made in both the House and Senate bills to the independent living centers [ILC]. These provisions redefine ILC's to serve cross-disabilities, a fundamental change to the current definition which allows services to individuals with single disabilities. I believe the expansion of services to a broader population may be good. However, I do not wish to see populations currently served by ILC's be ignored. I hope the safeguards placed in the bill will continue to assure that, to the extent possible, all individuals with disabilities needing assistance will be served.

Let me now take the opportunity to express my concern about another issue not directly related to this reauthorization. As the primary author of the 1978 amendments to the Rehabilitation Act, I believe recent court decisions denying a private right of action to victims of discrimination by the Federal Government under section 504 of the Rehabilitation Act are in direct conflict with the congressional intent. See, *Cousins v. Secretary of the United States, Department of Transportation*, 880 F.2d 603 (1st Cir. 1989); and *Clark v. Skinner*, 937 F.2d 123 (4th Cir. 1991). See also, *Carpenter v. Department of Transportation*, Civ. No. 91-3935-TEH (N.D. Cal. April 8, 1991); *J.L. v. Social Security Administration*, Civ. No. 90-0529-AHS (C.D. Cal. January 22, 1991), *aff'd on different grounds*, *J.L. v. Social Security Administration*, 92 C.D.O.S. 6222 (9th Cir. July 15, 1992).

This is in direct contrast to rulings in the ninth circuit in *Doe v. Attorney General of the United States*, 941 F.2d 780

(9th Cir. 1991) and *J.L. v. Social Security Administration*, 92 C.D.O.S. 6222 (9th Cir. July 15, 1992), and the intent of Congress in 1978 to cover the Federal Government with the same antidiscrimination mandate which is applied to private recipients of Federal financial assistance. In the House debates before initial passage of the 1978 amendments, I stated that the purpose of the amendment extending section 504 to the Federal Government was "simply [to extend] the coverage of section 504 to include any function or activity of any department or agency of the Federal Government." 124 Cong. Rec. 13,901 (1978).

As I stated at that time, the original legislation in 1973 was developed to apply to every phase of American life, but the Justice Department on September 23, 1977, issued an opinion which declared that the Federal Government was exempt from the statute. In light of this, I explained in 1978 that the provision which explicitly adds the Federal Government to the coverage of section 504 was intended to bring "fairness and equity to the entire picture in eliminating discrimination against the handicapped wherever it exists. \* \* \* Somehow it did not seem right to me that the Federal Government should require States and localities to eliminate discrimination against the handicapped wherever it exists and remain exempt themselves. So I developed a provision which is in this conference report that extends coverage of section 504 to include any function or activity in every department or agency of the Federal Government."

Id. at 38,551.

In addition to clarifying the Federal Government's inclusion in section 504, the 1978 amendments added an explicit attorney's fees provision to facilitate private party enforcement of title V of the Rehabilitation Act, including section 504, through private rights of action. Section 505(b) explicitly refers to suits against the Federal Government. There can be no doubt that the 1978 amendments to section 504 provided a private right of action for victims of discrimination by the Federal Government.

There is no need to amend the Rehabilitation Act to provide a private right of action against the Federal Government as some have suggested. The language of the 1978 amendments is sufficient on its face to confer such a private right of action. Moreover, the legislative history created at the time of the 1978 amendments explicitly states the intention to create a "uniform and equitable national policy for eliminating discrimination." 124 Cong. Rec. 13,901 (1978). It would be a disgrace to allow a private right of action against private entities receiving Federal financial assistance, but to deny the same remedy against the Federal Government when it discriminates.

Yet, this is exactly the result of the decisions in the First and Fourth Circuits in the Cousins and Clark cases. In erroneously interpreting the statute, the Cousins Court noted that section 505 "does not \* \* \* specifically refer to actions against the government", and found no "indication that is meant to imply that a plaintiff can sue federal agencies directly under Section 504 \* \* \*." 880 F.2d at 607. This analysis works a gross inequity on persons with disabilities who have been subject to discrimination by Federal agencies, leaving them without a remedy for precisely the types of discrimination that the 1978 amendments to section 504 were intended to address. Such a result renders the inclusion of the Federal Government in the 1978 amendments meaningless.

This inequity has a real and ongoing impact on the millions of persons with disabilities who are subject to Federal agency regulations that are promulgated or applied in violation of the nondiscrimination mandate of section 504. This impact is currently being felt in a case in California, *Carpenter v. Department of Transportation*, Civ. No. 91-3935-TEH (N.D. Cal. 1991), in which an individual with monocular vision, who had safely driven in interstate commerce for 31 years, had his interstate certification revoked due to his vision impairment. Pursuant to DOT regulations, loss of his certificate per se disqualified him from driving in interstate commerce. This impairment, which he had revealed every two years to the DOT, was belatedly discovered by the agency and used as a basis for stripping him of the certification necessary to maintain his livelihood, with a devastating impact on his income that began over a year ago and continues to this day. Ruling similarly to the Cousins case, the California court held that section 504 did not provide Mr. Carpenter with a private right of action in the district court even though this kind of per se disqualification based on disability is precisely the kind of discrimination that would give rise to a private right of action against a private recipient of federal funds.

As the ninth circuit stated in the *Doa* case:

The Rehabilitation Act's legislative history . . . demonstrates Congress's intent not to limit victims of government discrimination to enforcement through injunctive relief under the APA but to permit enforcement through the same means available against private parties: enforcement in the courts with damages and equitable remedies. 941 F.2d 793-94. The ninth circuit has recently reaffirmed *Doa* in the *J.L.* case, correctly holding that "Congress, in enacting section 504, waived sovereign immunity and created a private cause of action against the Government." 92 C.D.O.S. at 6225.

Mr. President, My position on this issue is not new and, as stated previously, dates back at least to the 1978

amendments. In 1983, this issue was called into play in connection with the Supreme Court case in Consolidated Rail Corporation versus Lee Ann LeStrange Darrone, No. 82-862. At that time a joined with a number of my colleagues in submitting a "friend of the court" brief supporting the existence of just such a private right of action under the Rehabilitation Act.

To construe the statute otherwise would be the height of hypocrisy, expecting private entities to bear a burden that the Federal Government itself is unwilling to carry. As is clear from the language of the 1978 amendments, the associated legislative history, and the subsequent pronouncements of the Members of Congress principally involved with those amendments, it was the intention of Congress to create a private right of action and the courts should so interpret the statute.

Again, my appreciation and gratitude to the chairman and ranking minority member of the subcommittee and their staffs for their assistance. Their dedication to the needs of individuals with disabilities should be commended.

Mr. DOLE. Mr. President, I support passage of H.R. 5428, the conference report to the Rehabilitation Act Amendments of 1992. This conference report represents many long hours of bipartisan work in both the House and Senate as well as crucial support from the administration and the disability community in crafting a consensus bill that enhances disability policy aimed at consumer choice and support.

While many people with disabilities need only the opportunity to become full citizens, others need supportive services and access to be a part of the mainstream of life. The Rehabilitation Act amendments correctly place the focus of the law on streaming access to vocational rehabilitation services for people with severe disabilities on achieving appropriate job placements as well as the provision of rehabilitation technology the individual with a disability may need in order to succeed at work, and in strengthening the role independent living centers play in assisting consumers to lead self-directed lives.

Having a stable and rewarding job is a basic component of the American dream. Every individual would like to be employed in a job that is enjoyable and stimulating while providing one with sufficient income to meet his/her needs. This conference report represents a variety of occupational choices to empower people with disabilities to pursue productive lives and the American dream. Supported employment, the enhancement of assistive technology application in the workplace, and accessing the appropriate rehabilitation technology to ensure worksite productivity are just a few examples of the strengthening changes made in this year's reauthorization bill.

The difficulty faced by many people with disabilities, however, is that they often are not given the opportunity to demonstrate their talents and abilities to perform certain jobs. Instead, myths and stereotypes regarding the person's inability to perform the job, or fears about hiring a person with a disability for a particular job, preclude the individual from receiving offers of employment or promotion.

We are at an opportune time to begin looking at all our laws which affect citizens with disabilities and refining our statutes to complement the goals and mandates of the Americans With Disabilities Act. Never has there been a stronger demand to integrate disability policy into the philosophy and goals set forth in the Americans With Disabilities Act. I support this conference report and compliment Senators HARKIN and DURENBERGER and their staffs for crafting a reauthorization bill that weaves employment policy for people with disabilities with policies that promote personal choice and self-determination.

Mr. HATCH. Mr. President, when this bill passed the Senate this summer, I mentioned how pleased I was with the bipartisan manner with which the bill was crafted. I am especially grateful that this spirit of cooperation continued into conference. Cooperation does not always mean agreement, and there have been disagreements in this process. However, as a result of open and extensive discussion, consensus has been reached.

I understand that some individuals and groups would have liked to see different provisions than what were included in the bill. I am very cognizant that individuals with disabilities are not all the same. I am very much aware that individuals with disabilities, their families, and others have made their frustrations known with respect to certain aspects of the current system.

I also recognize the concerns of those who administer the program. They, too, have some frustrations resulting from the desire to fulfill the goals and directives of the Rehabilitation Act within real budgetary constraints. But, although the bill is not perfect, I believe all interested parties can say something positive about this legislation.

This bill has been drafted with an eye toward the empowerment of individuals with disabilities, increasing choices, independence, and responsibility of those who want and need rehabilitation services. This legislation continues employment training to increase the self-reliance of individuals with disabilities.

I would like to thank Senator HARKIN and Senator DURENBERGER for their leadership on this issue and for their commitment to the process of building consensus. I would also like to recog-

nize Bob Silverstein, Linda Hinton, and Annie Silberman, and particularly Corine Larson of my own staff, who have worked diligently to bring the bill to this successful conclusion.

I would again like to thank the members of the Utah task force on disabilities and other individuals in Utah with an interest in this legislation. Their participation and feedback have been very valuable to me during this process.

I hope that all those with an interest in this legislation will now work cooperatively to reach the goal of this legislation: To provide and assist individuals with disabilities the tools to become independent members of society through employment.

Mr. HARKIN. Mr. President, I rise today in strong support of the conference report to accompany H.R. 5482, the Rehabilitation Act Amendments of 1992. This is a companion bill to S. 3065, which I am proud to have sponsored along with all of the members of the Committee on Labor and Human Resources and Senator DOLE. H.R. 5482 reauthorizes the Rehabilitation Act of 1973, as amended, and the Helen Keller National Center Act.

I especially want to thank my distinguished colleague from Minnesota, Senator DURENBERGER for his excellent leadership during the reauthorization process. Senator DURENBERGER has worked long and hard on this bill and deserves credit for his commitment to the consensus building process that made this bill possible.

I also want to thank the chairman of the Labor and Human Resources Committee, Senator KENNEDY, and the ranking minority member, Senator HATCH, for their leadership and guidance in crafting this legislation. In addition, I want to thank a number of other members of the subcommittee for their contributions to the legislation. Senator SIMON's experience with this legislation has been an invaluable resource throughout the development of S. 3065 and the conference negotiations. Senator JEFFORDS provided valuable advice on changes in the rehabilitation research engineering centers and the civil rights provisions. Senator ADAMS provided assistance to assure that the needs of individuals with disabilities who are aging are adequately addressed.

I want to thank our colleagues from the other body, particularly Representatives OWENS and BALLENGER, for their dedication and hard work in crafting H.R. 5482 and in reaching the agreements contained in this conference report. Just as was the case with the Senate Subcommittee on Disability Policy, the members of the House Subcommittee on Select Education were involved in a 2-year process of reaching consensus on this legislation. Because of this effort, the House bill and the Senate amendment were very similar

and the majority of the differences were based on the same policy considerations.

Finally, I want to pay tribute to the staff members who contributed to this legislation, including Bob Silverstein, Linda Hinton, and Melanie Gabel from my staff, Anne Silberman with Senator DURENBERGER, Judy Wagner with Senator SIMON, Corine Larson with Senator HATCH, Pam Kruse with Senator JEFFORDS, Sean Tunis with Senator KENNEDY, Bill Bensen with Senator ADAMS, Gail Laster with Senator METZENBAUM, and Liz Aldridge, our legislative counsel. On the House side, I want to thank Sally Lovejoy with Representative BALLENGER, Maria Cuprill with Representative OWENS, and Alan Lovesee with Representative FORD.

The conferees received constructive advice from the administration and from many organizations, groups, and individuals. In particular, I want to express my gratitude to the staff of the Department of Education, the members of the employment and training task force of the Consortium for Citizens with Disabilities, the Council of State Administrators of Vocational Rehabilitation, and the various national, regional, and local independent living organizations. Advice from these and other groups served as the basis necessary for reconciling the House bill and the Senate amendment in the short time that was available.

Mr. President, I want to make a personal comment about the process used to develop this bill. Those of us working on this legislation over the past 2 years have been guided by one principle—unity. We learned a lesson with the passage of the Americans With Disabilities Act—that when we all work together and stay together we maximize the effect of our efforts to increase the inclusion and integration of individuals with disabilities into our society.

Remembering this lesson throughout the reauthorization process was crucial in keeping everyone involved together and working toward the goal of developing a consensus bill. I am now confident that the implementation of these amendments will proceed with the same degree of trust and respect as has been shown by the various parties during the development of this legislation.

As is always the case in conference, the Senate version of the Rehabilitation Act Amendments of 1992 was not adopted in its entirety. However, I am pleased that the conference report contains all of the Senate provisions necessary to achieve the goals set out by the subcommittee for the reauthorization of the Rehabilitation Act. These goals are:

To ensure that the values embedded in the Americans With Disabilities Act are reflected in the Rehabilitation Act

including increased choice and involvement of individuals with disabilities both individually and systematically;

To refine the vocational rehabilitation program including increasing the accountability and quality of the services provided;

To promote the independent living philosophy in order to maximize the leadership, empowerment, independence, and productivity of individuals with disabilities; and

To ensure that the discretionary programs of research, demonstrations, and training respond to the need of the basic formula grant programs to remain state of the art.

Briefly, I would like to summarize some of the important provisions from S. 3065 that are contained in the conference report.

#### COORDINATION WITH THE AMERICANS WITH DISABILITIES ACT

The Senate provisions incorporating the principles of the Americans With Disabilities Act are included in the conference report. The principles of respect for individual dignity, personal responsibility, self-determination, pursuit of meaningful careers, and full participation of individuals with disabilities are specifically set out in the purpose section for the entire act and the purpose sections of various sections of the act. In addition, language that reflects the philosophy of inclusion and respect for the dignity of the individual is contained throughout the conference report.

Both the House bill and the Senate amendment address the need for increased choice and involvement for individuals with disabilities who are served by the programs of this act.

The conference report includes the Senate provisions incorporating the standards applied under the employment provisions of the Americans With Disabilities Act into the employment sections of title V of the Rehabilitation Act.

For example, the ADA's definition of reasonable accommodation specifies that reasonable accommodation includes job restructuring, part-time or modified work schedules, reassignment to a vacant position, acquisition or modification of equipment or devices, appropriate adjustment or modifications of examinations, training materials or policies, the provision of qualified readers or interpreters, and other similar accommodations for individuals with disabilities.

The ADA also includes a definition of the term "discriminate" that includes, for example, limiting, segregating, or classifying a job applicant or employee because of a disability; utilizing standards, criteria, or methods that have the effect of discrimination; excluding qualified individuals because of their association with an individual with a known disability; and using qualification standards, employment tests, or

other selection criteria that screen out individuals with disabilities, unless it is shown that the standards, tests, or criteria are job-related for the position in question and are consistent with business necessity. The ADA also includes policies governing preemployment inquiries and examinations, and inquiries of current employees.

Now those who are covered by title V of the Rehabilitation Act will know that these are the definitions of reasonable accommodation and discrimination that apply. They will also know that the standards governing preemployment inquiries and examinations, and inquiries of current employees apply. Incorporating the ADA standards into the Rehabilitation Act will assure that there will be consistent, equitable treatment for both individuals with disabilities and businesses under the two laws.

I want to make it clear that the conference report in no way limits the remedies available under title V of the Rehabilitation Act. As recently affirmed by the Supreme Court, section 504 provides for a full panoply of remedies, including monetary damages and nothing in the conference report changes this in any way.

On a related matter, in response to the position taken by the Justice Department to the contrary, I want to state unequivocally that there is a private right of action against Federal agencies under section 504 of the Rehabilitation Act. As I stated before the Senate on October 30, 1991, Congress "made it clear that the same procedures that apply to actions by recipients of Federal aid—including a private right of action—also apply to actions by the Federal agencies themselves." (CONGRESSIONAL RECORD, S15456, October 30, 1991.)

Senator JEFFORDS and I have been colleagues for a long time. We were both Members of the House of Representatives when the Rehabilitation Act was amended in 1978. I vividly recall the work that then Representative JEFFORDS did on those amendments. Mr. JEFFORDS authored the 1978 amendments to rectify the Justice Department's interpretation that the Federal Government was not covered by section 504. I remember Senator JEFFORDS articulate statement explaining the changes made to section 504:

Somehow it did not seem right to me that the Federal Government should require states and localities to eliminate discrimination against the handicapped wherever it exists and remain exempt themselves. So I developed a provision which is in this conference report that extends coverage of Section 504 to include any function or activity in every department or agency of the federal government.

Senator JEFFORDS statement makes the intent of Congress crystal clear. In developing the Rehabilitation Act Amendments of 1992, we saw no need to amend section 504 to once again rectify

the Justice Department's attempt to narrow the applicability of section 504. The intent of Congress was obvious in 1978 and it remains obvious today—Congress intends that there is a private right of action against the Federal Government under section 504 of the Rehabilitation Act.

#### THE VOCATIONAL REHABILITATION PROGRAM

Most of the provisions in the House bill and the Senate amendment regarding the basic State grant program and the independent living programs were very similar. The Senate provisions streamlining access to vocational rehabilitation services, ensuring appropriate access for those individuals with the most severe disabilities, improving interagency working relationships and cooperation, improving relationships with business, industry, and labor, and providing for a comprehensive system of personnel development are included in the conference report.

The conference report includes the provisions from the Senate bill requiring each State to develop a strategic plan for the expansion and improvement of vocational rehabilitation services for individuals with disabilities. The provisions require that the plan be developed with input from the public through public forums, from the State Rehabilitation Advisory Council, and from the Statewide Independent Living Council.

#### THE INDEPENDENT LIVING PROGRAMS

Although there were only minor differences between the House bill and the Senate amendment, the conference report includes the Senate version of the purpose for title VII, which reads as follows:

The purpose of this title is to promote a philosophy of independent living, including a philosophy of consumer control, peer support, self-help, self-determination, equal access, and individuals and system advocacy, in order to maximize the leadership, empowerment, independence, and productivity of individuals with disabilities, and the integration and full inclusion of individuals with disabilities into the mainstream of American society.

The conference report includes the Senate provision converting the funding for centers for independent living from a competitive grant program to a formula grant program. This will ensure that there is progress in developing statewide networks of centers for independent living. Both the House bill and the Senate amendment specify standards for centers for independent living including that the centers must be consumer-controlled, private, non-profit agencies.

The conference report includes the Senate provision increasing the minimum allotment to State agencies for independent living services from \$200,000 to \$275,000. The conference report also includes a minimum for independent living centers of \$400,000 when

the appropriation is \$4 million or greater than the 1992 appropriation for centers and \$450,000 when the appropriation is \$8 million or greater than the fiscal year 1992 appropriation.

Both the House bill and the Senate amendment provide that the State plan required under title VII must be jointly signed by the director of the State agency and the Statewide Independent Living Council made up of a majority of individuals with disabilities or their family members.

RESEARCH, DEMONSTRATION PROJECTS AND TRAINING PROGRAMS

Both the House bill and the Senate amendment emphasize that research funded under title II should focus on improving the effectiveness of services provided under the act and that research information should be widely disseminated in practical, usable formats.

The conference report emphasizes that rehabilitation technology can eliminate many of the environmental barriers that prevent individuals with disabilities from fully participating in our society. Changes are made throughout the bill to assure the availability of technology for individuals with disabilities. In addition, the bill updates the authorizing language for the rehabilitation engineering research centers to address the need for systems change in the area of technology transfer. The authorizing language for the centers promotes a practical, realworld orientation that is responsive to the needs of individuals with disabilities.

It is important that rehabilitation researchers focus their efforts on practical applications of rehabilitation technology that remove environmental barriers confronted by individuals with disabilities in all aspects of their lives. The application of technology is integral to the goal of making the promise of the Americans With Disabilities Act become a reality for individuals with disabilities.

In the area of training rehabilitation professionals, the conference report includes the Senate provision of a set-aside of funds appropriated for training under title III for inservice training of State agency personnel. It is critical to the implementation of the Rehabilitation Act amendments that rehabilitation professionals receive training regarding the changes. In addition, these professionals must receive ongoing training in order to keep current regarding state-of-the-art vocational rehabilitation services in areas such as rehabilitation technology and integrated work placement opportunities for individuals with the most severe disabilities.

I urge my colleagues to join me in support of the conference report accompanying H.R. 3065. I believe that this conference report moves us closer to ensuring that the dream of the Americans With Disabilities Act be-

comes a reality—if we are to see an America where people with disabilities, including those with severe disabilities, are competitively employed in integrated work settings and are making meaningful contributions to their families and communities.

Mr. DURENBERGER. Mr. President, I once again have the honor of standing together on the floor with my friend and colleague from Iowa in support of the major piece of legislation addressing the needs of individuals with disabilities of this Congress, the Rehabilitation Act Amendments of 1992.

Reauthorizing this bill has been a long and challenging process, and there are many people to thank and recognize for the conference report that we proudly put forth to our colleagues today, but first on the list is the chairman of the subcommittee and champion of the disability community, TOM HARKIN. Senator HARKIN's fine leadership and unyielding version of an America that is free of discrimination and provides opportunity for all, has made the Subcommittee on Disability Policy a place in the Senate truly to be proud of. At a time when partisan politics and legislative gridlock are the norms in Congress, this subcommittee has been able to see through a series of momentous pieces of legislation including the Americans with Disabilities Act, all passed by unanimous consent.

One cannot talk about the strides that we have made in this body over the past 10 years for individuals with disabilities in this country without recognizing the important role that numerous other Members of the Senate have made, including my predecessor, Lowell Weicker, the distinguished chairman of the Committee on Labor and Human Resources, Senator KENNEDY, the ranking minority member Senator HATCH, and the minority leader, Senator DOLE.

Mr. KENNEDY. Mr. President, I welcome Senate passage of the conference report on S. 3065, legislation that reauthorizes the Rehabilitation Act of 1973. S. 3065 carries forward and improves programs of vital importance to our fellow citizens with disabilities.

I am pleased to be an original cosponsor of this bill, which has been authored by Senator HARKIN, the chairman of the Disability Subcommittee of the Labor and Human Resources Committee. Senator HARKIN and Senator DURENBERGER, the subcommittee's ranking member, have done a superb job of crafting a bipartisan, consensus reauthorization bill on this complex subject. They engaged in extensive consultation with the disability community, with State officials, and with the Federal Department of Education.

The Rehabilitation Act authorizes training and related services to enable individuals with disabilities to become employable and to live independently.

In addition to vocational training, the act funds programs that assist persons with disabilities to live in the community, and funds research on technological devices that can assist the disabled in such areas as mobility and communication.

The Rehabilitation Act is a vital complement to the Americans With Disabilities Act of 1990 [ADA]. Services under the Rehabilitation Act enable many of the severely disabled to take advantage of the legal opportunities afforded to them by the ADA.

Many of the improvements in the current reauthorization are technical and administrative in nature, but the underlying policy goals of the reauthorization are clear: to incorporate the philosophy of integration and inclusion of the ADA into the Rehabilitation Act; to streamline access into vocational rehabilitation for the severely disabled; to develop statewide networks of independent living centers for the disabled; to increase consumer choice and involvement in all aspects of the Act; and to increase the accountability and quality of services provided.

In certain respects, the bill has been improved significantly as a result of the conference committee meeting with our colleagues on the House Education and Labor Committee. In particular, I would highlight the importance of the language now included in the legislation which assures confidentiality for participants in the client Assistance Programs authorized by this Act. It is clear that Congress does not now, nor has it ever, intended for the Secretary of Education to have access to personally identifiable information concerning individual served by the Client Assistance Programs.

Considerable time this year has been spent discussing the benefits of different approaches to the National Commission on Rehabilitation Services. I am particularly anxious that the Commission's report and findings address the role of specialized services in meeting the needs of individuals with low-incidence disabilities, including those who are blind or visually impaired. I would expect that the National Commission will include individuals with low-incidence disabilities and individuals with disabilities who are minorities.

This is important, carefully considered legislation, and I am pleased to see it enacted.

Mr. SIMON. Mr. President, I am once again grateful to the chairman of the Subcommittee on Disability Policy and to his staff, particularly Bob Silverstein and Linda Hinton. There is broad and bipartisan support for the conference report on the reauthorization of the Rehabilitation Act. This support might give the impression that it is a simple matter to extend this popular legislation. But it is never easy to

bring together as many interests and parties as are affected by a law as comprehensive as the Rehabilitation Act. Many, many hours of hard work, listening, and getting people to listen to each other are involved. Most important in this case, there was a determination to understand the program and how it is actually implemented in the States. The result is a piece of legislation that can provide growth to the field of rehabilitation and new opportunities for individuals with disabilities. I also want to thank the Coalition of Citizens with Disabilities for their efforts to bring about consensus and move this legislation forward.

This bill preserves the long-term partnership between the States and the Federal Government in the effort to give individuals with disabilities the opportunity to become employed and participate fully in the mainstream of American society. The Rehabilitation Act Amendments of 1992, with broad bipartisan and disability community support, extends and improves the programs that are necessary to make the goals of the Americans with Disabilities Act a reality.

The Rehabilitation Act, in completing the Americans with Disabilities Act, offers the best opportunity for our citizens with disabilities to build productive lives as full participants in society. Key to this is the focus on an outcome of meaningful employment, with independent living and range of other vital services supporting that goal. Vocational rehabilitation is a dynamic field, dependent on new research and on developments in areas such as assistive technology. The success of these programs depends on the availability of highly skilled, well-trained personnel. This conference report recognizes and addresses the importance of each of these elements.

Importantly, the conference report recognizes that individuals with disabilities themselves must be more involved in the decisions that shape their lives. It clarifies that the rehabilitation client has the right, the opportunity, and the responsibility to be actively involved in making the decisions about the services he or she will receive. Rehabilitation counselors and consumers are partners in making the rehabilitation process work.

The Rehabilitation Act is important for what it does for our Nation as well as for what it does for the individuals it serves. It is good to know that these programs will continue and grow into the future. Again, I congratulate our colleague Senator HARKIN and his staff for a bill that moves us forward on the road to equal opportunity for all Americans.

Mr. KENNEDY. I congratulate the Senator from Iowa on this important and thoughtful piece of legislation. I would like to make certain that my understanding of some specific point

regarding the Client Assistance Programs authorized in the statute is correct. Would the Senator agree with me that it is the intent of Congress to protect the confidentiality of clients served by these programs?

Mr. HARKIN. I agree with the chairman of the Labor Committee.

Mr. KENNEDY. And does the chairman of the Disability Subcommittee also agree the Congress does not now, nor has it ever, intended for the Secretary of Education to have access to personally identifiable information concerning individuals served by the Client Assistance Programs?

Mr. HARKIN. Again, I agree with the Senator.

Mr. KENNEDY. I thank the Senator from Iowa.

Mr. DODD. Mr. President, I rise today in support of the conference report on the Rehabilitation Act Amendments of 1992. I am proud to say that I am an original cosponsor of the Senate bill, and I urge my colleagues to support the conference report that is now being considered.

Mr. President, this legislation is a vital instrument enabling thousands of people with disabilities to receive the training and develop the skills that will enable them to lead richer and fuller lives. It is the first major piece of disability-related legislation to come through this body since the Americans With Disabilities Act became law.

The conference report is the culmination of cooperative negotiations between the House, the Senate, the administration, all with strong bipartisan support. Input from individuals with disabilities, disability advocates and service providers was utilized at every step of the process. There truly was a consensus of support for this legislation. The process was exemplary and has resulted in legislation that will make much-needed improvements in the law. I commend the chairman of the Disability Policy Subcommittee, Senator HARKIN, for his leadership.

Mr. President, the majority of funding in the Rehabilitation Act goes toward vocational rehabilitation services. These services prepare people with physical and mental disabilities to obtain employment that will enable them to be independent.

Prior to the introduction of this legislation, there were many diverse concerns about vocational rehabilitation services and what improvements could be made. Some complaints were consistent, however. One was that those with the most severe disabilities were shut out of the system, probably because they were more expensive to serve. Another was that the eligibility process was extremely burdensome. We also heard many times that there was not enough consumer choice in the system as it currently functions. Finally, in addition to these policy concerns, we

were told that funding was totally inadequate for the number of people who needed services and for the kinds of services that are necessary to help people gain employment and independence.

The conference report which the Senate is considering today fully addresses the policy concerns regarding vocational rehabilitation. The language of the report stresses that all individuals with disabilities, including those with the most severe disabilities, are generally presumed capable of engaging in gainful employment. Eligibility will be streamlined so that existing information from other agencies must be used to the extent possible. Finally, the client will be an active participant in their own rehabilitation plan. At the policy level, individuals with disabilities will play a significant role on the State council.

Improvements have been made to other titles of the Rehabilitation Act. Independent living services are strengthened. Participation by individuals with disabilities is promoted in all aspects of the rehabilitation system. Proposed language clarifies that research and demonstration projects authorized under the Act are targeted to services authorized under the Rehabilitation Act. A new focus is placed on transition services. All of these changes will bring the Rehabilitation Act much closer to the philosophy of empowerment and independence that is espoused in the Americans With Disabilities Act.

Mr. President, the need for services authorized under the Rehabilitation Act is overwhelming. In fact, a 1991 study performed by the General Accounting Office showed that only 7 percent of eligible individuals receive vocational rehabilitation funding. In my own State of Connecticut, these statistics are borne out. It is unfortunate that funding is not available that would enable more individuals who could benefit from these services to become independent, productive workers in our society. Nonetheless, I firmly believe that the improvements that have been offered in this conference report will make more efficient use of scarce resources.

Mr. President, I urge my colleagues to support this important measure.

#### PATENT AND TRADEMARK OFFICE AUTHORIZATION ACT

Mr. LAUTENBERG. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of S. 3325, a bill to reauthorize the Patent and Trademark Office in the Department of Commerce, and for other purposes, that was introduced earlier today by Senator DeCONCINI, that the bill be deemed to have been read three times, passed, and the motion to reconsider be laid upon the

table, and that a statement by Senator DECONCINI be inserted at the appropriate place in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

PATENT AND TRADEMARK OFFICE  
AUTHORIZATION ACT

Mr. DECONCINI. I rise today to introduce the Patent and Trademark Office Authorization Act [PTO]. This bill addresses a number of important issues. First of all, it reauthorizes the PTO for 1 year. The Senate Judiciary Subcommittee on Patents, Copyrights and Trademarks, of which I am chairman, remains concerned about the Automated Patent System [APS] and therefore feels it is necessary to maintain strict oversight of the agency.

This bill does not change the fee structure of PTO. Last year's authorization bill gave PTO the authority to annually increase PTO's fees by the Consumer Price Index. Therefore, PTO intends to increase fees by 3 percent at the beginning of the new fiscal year.

APPROPRIATIONS PROCESS

The cost of filing and maintaining a patent has been a contentious issue since the Omnibus Budget Reconciliation Act of 1990 (Public Law 101-508) forced PTO to become almost totally user fee funded. Despite this fact, PTO is still subject to the appropriations process.

According to the 1990 Budget Act, \$99 million of PTO's fees must be deposited in the Patent and Trademark Office Fee Surcharge Fund and then, must be appropriated by Congress. The Senate Appropriations Committee's Commerce, Justice, State Subcommittee only appropriated \$86,672,000 of this amount. Thus, \$12,328,000 in user fee funds raised from patent applicants and other customers of the PTO are being used to reduce the deficit and cannot be spent by the Office. This is unfair and amounts to a tax on innovation. I intend to continue to object to this practice and work to resolve this problem.

In addition, I strongly believe federally appropriated taxpayer funds should be used to support the PTO. Certain functions of the Office, like their role in international negotiations and Government affairs, should be paid for through public financing and not merely be funded by PTO's users. What better agency than one that protects our inventors and increases America's competitiveness should be supported by our Government?

BOARD OF PATENT APPEALS AND  
INTERFERENCES

During the Patents Subcommittee oversight hearing on PTO a significant issue was raised concerning the independence of the Board of Patent Appeals and Interferences [Board]. It was brought to the attention of the subcommittee that a duly appointed three person panel, which had reached and signed a decision favorable to the pat-

ent applicant, was redesignated by the Commissioner of the PTO when he did not agree with the outcome of the Board's decision. The new panel, consisting of the Commissioner, Deputy Commissioner, the Assistant Commissioner of Trademarks, the Chairman and Vice Chairman of the Board, reached an opposite result. I understand this was an unusual but not isolated case.

Prior to 1927, appeals could be made directly to the Commissioner. In 1927, these appeals were eliminated and the Commissioner was made a member of the Board and given the power to designate Board panels to decide cases. The Commissioner's membership on the Board and his power to appoint panels obviously gives the Commissioner a significant role in the actions of the Board. Nonetheless, the actions by some previous Commissioners of redesignating panels or expanding panels which have reached decisions contrary to their views is inappropriate.

Concerns have also been raised that the current pay and evaluation system for the Board allows management officials the opportunity to affect the Board's independent judgment. The current performance appraisal plan was implemented in 1986 and includes a quota on written appeals. Although I recognize the PTO needs some means of rewarding employees on the basis of output, these issues deserve further evaluation.

Meetings have been held with members of the Board, the patent community and PTO to discuss possible solutions to the concerns raised about the Board's independence. Unfortunately, no one answer has emerged. Therefore, today's bill does not address the issue. However, it is my intention as chairman of the relevant subcommittee to take this issue up early next session. In the meantime, there are a number of different groups studying the issue and PTO has published a notice for public comment and will conduct a hearing on December 1 of this year. A committee of the American Intellectual Property Law Association has made a number of suggested changes, which have yet to be agreed to by their board of directors and the George Washington University National Law Center, Center for International Patent Studies will study the issue and come up with a final report in April, 1993. I look forward to the results of these studies and believe we can resolve this problem next year.

CD-ROM DEMONSTRATION PROGRAM

The bill I am introducing today extends for 1 year, the CD-ROM demonstration program sponsored by Senator GRASSLEY that was created in last year's authorization bill. PTO has made some progress on this project, although they appear nowhere near prepared to meet their October report deadline. In order to give the Office sufficient time to complete their eval-

uation, this bill extends the project for 1 year. The bill also includes a further requirement on PTO to evaluate alternative formats and methods for organizing patent information. This language was suggested by the General Accounting Office [GAO] which is conducting a thorough evaluation of the APS. GAO has expressed concern that PTO is not adequately reviewing the needs of the potential clients of patent information on CD-ROM.

REPORT ON PCT FEES

The bill also requires PTO to prepare a report on Patent Cooperation Treaty [PCT] fees. The PCT was ratified nearly 20 years ago and has proven to be beneficial in many ways. Concerns have been raised that PCT fees have been set so as to discourage and, in fact, penalize their use. I also understand that the U.S. PCT fee policy is not followed in other countries. While the PTO refuses to reciprocate for searching done by the EPO, the European Patent Office [EPO] allows for lower fees for applications which have been searched at the PTO.

Therefore, the report required by this bill asks PTO to both review the European and Japanese PCT fee structure and provide an explanation of how PTO calculates its fee levels for similar services.

LATE PAYMENT OF MAINTENANCE FEES

Section 107 of the bill provides for the late payment of maintenance fees if the delay in payment is unintentional and it occurs within 24 months after the expiration of the 6-month grace period for the payment of maintenance fees.

Current law requires patent owners to pay maintenance fees three times during the life of a patent, at 3½ years, 7½ years, and 11½ years. The maintenance fee must be paid within a 6-month grace period from the date the fee is due. Thereafter, the Commissioner may accept payment only if the delay is shown to the satisfaction of the Commissioner to have been unavoidable. This standard has been found to be extremely hard to meet. Some patent owners have lost their patent rights due to this inflexible standard. Today's bill will solve this problem.

TITLES II AND III

Title II and Title III of the bill I am introducing today includes legislation which has already passed the Senate. Title I is the Patent and Plant Variety Protection Remedy Clarification Act, introduced on March 21, 1991 as S. 758. Title III is the Trademark Remedy Clarification Act, S. 759 (see Senate Report 102-280), introduced on the same day. Both bills passed the Senate on June 12, 1992. In order to facilitate their passage during this Congress, I am reintroducing them as part of this bill.

So the bill (S. 3325) was deemed read three times and passed; as follows:

[The bill, S. 3326, will appear in a subsequent issue of the RECORD.]

#### FEDERAL DEPOSIT INSURANCE AMENDMENTS

Mr. LAUTENBERG. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of S. 3326, a bill to amend the Federal Deposit Insurance Act introduced earlier by Senators HARKIN and GRASSLEY, that the bill be deemed to have been read three times, passed, and the motion to reconsider be laid upon the table, and that any statements with respect to this bill be inserted at an appropriate place in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### CREDIT CARD PORTFOLIOS

Mr. HARKIN. Mr. President, many insured depository institutions are under intense regulatory pressure to strengthen their capital positions in order to achieve compliance with minimum applicable capital standards. Two principal means are available for such purposes: First, raising additional capital funds through the sale of securities; or second, reducing the institution's size through the sale or disposition of assets. In many instances, a troubled institution's access to the capital markets is essentially precluded leaving only the second alternative as practical. The sale of marketable assets, including discreet business operations, effectively reduces the asset size of the seller and enables it to achieve added and needed liquidity. Indeed, industry downsizing was an important policy objective of the Financial Institutions Reform, Recovery, and Enforcement Act of 1989 [FIRREA] and one of the underlying themes of the Federal Deposit Insurance Corporation Improvement Act of 1991.

FIRREA also gave the FDIC certain powers and rights of a receiver in equity, including the authority to repudiate contracts that it determines are burdensome and the repudiation of which will promote the orderly administration of the affairs of the institution in conservatorship or receivership; 12 U.S.C. 1821(e). The purpose of Congress in providing the FDIC with that authority was to allow the agency to avoid long-term, burdensome leases and similar executory obligations.

Competing bank regulatory policy goals have created a dilemma both for the Government and the financial institutions industry. On the one hand, the primary supervisory agencies actively encourage insured institutions with unsatisfactory capital levels to sell assets in order to comply with the new capital standards. By comparison, the FDIC as receiver and insurer has a legitimate need to want to preserve as much of an institution's assets—particularly the valuable, marketable assets—in order to facilitate such sale

and minimize loss to the insurance fund. The challenge, then, is to find a solution that will reconcile these competing policies and still provide protection to the taxpayer.

Credit card portfolios are unique assets because they are one of the most readily marketable assets of many banks. Their exceptional marketability is primarily owing to the discrete nature of such operations and the recent development of highly efficient nationwide markets in that business. The proposed amendment would address the dilemma created by the competing policies by establishing a regulatory scheme that would enable institutions to price such portfolios, and thereby restore market confidence in the integrity of asset sales without increasing any risk or onerous burden on the Government.

Current law does not authorize the FDIC in its capacity as an insurer to review a proposed asset sale prior to its appointment as a conservator or receiver of an institution. By authorizing the FDIC to waive its right to repudiate, the proposed amendment would enable it to review the proposed asset sale by an institution and essentially give notice to all potential acquirors of the risks of acquiring the portfolio should it decline to waive its right to repudiate. The provision contemplates that where the FDIC declines to waive its right to repudiate, the potential parties to the transaction would have two options: First, walk away from the deal and avoid the time and costs associated with a repudiation; or second, to continue with the transaction but to price it differently to account for the likelihood that the FDIC would repudiate at some time if the institution is placed in a conservatorship or receivership. The procedure established gives the FDIC the authority to take preventative actions rather than restrict the agency from acting. The new, proactive authority that would be given to the FDIC has been acknowledged by the agency to likely benefit it.

The amendment provides that where card customer lists are sold or their use is otherwise encumbered, those restrictions will remain in force and be passed through to the successor of a failed institution by a conservator or receiver. The amendment is structured specifically to address the FDIC's need to sell undercapitalized or insolvent institutions to healthier institutions and therefore imposes no greater restrictions on a successor institution than would affect an institution if it were to come into the market without such acquisition.

The proposed amendment only affects sales of credit card operations by insured banks and thrifts. Assuring the ability of institutions to realize the maximum value of such highly marketable assets provides the Government

with clear benefits. As an initial matter, it enables institutions to restructure their operations in order to get out of businesses that are either not essential to their core operations or that they may not have the means of carrying on profitably. There is an important public policy goal that is advanced by enabling institutions to sell marketable assets or business operations to prevent them from slipping into insolvency. The provision would effect this goal while at the same time ensuring that the FDIC as insurer and potential conservator gets an opportunity to assess the likely consequences of the proposed sale of an undercapitalized institution's assets. By enabling the FDIC to waive its right to repudiate a proposed sale, the proposal will allow prospective sellers and buyers to price a deal with greater certainty and can aid in the Government's efforts to help undercapitalized institutions attract private sources of capital.

I ask that certain material pertaining to this bill be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

#### BENEFICIAL ASPECTS OF AMENDMENT

##### BENEFITS TO THE FDIC

This amendment does not limit or curb the FDIC's flexibility, it expands it. Nothing in current law permits the FDIC as insurer under normal circumstances to prevent (or in effect prevent) an undercapitalized (but not insolvent) institution from selling an asset to raise capital or liquidity. The provision would establish a mechanism for the FDIC to review the proposed sale of a valuable asset by an undercapitalized institution. It can only waive its right to repudiate (thus in effect approving such sale) if it determines that the transaction is in the best interest of the insurance fund.

The amendment will restore the availability of private capital to support weakened financial institutions. This will give the regulators greater private resources to work with. Moreover, it will not prevent, hinder, or delay the closing of any insured depository institution and may work to the FDIC's benefit in avoiding burdensome litigation associated with resolving these claims after the fact.

This is a narrow provision; it explicitly limits its application to credit cards.

##### BENEFITS OF TAXPAYERS

This amendment will give undercapitalized institutions (consistent with reasonable government oversight) the ability to restructure operations to raise capital. The current market uncertainty impedes the ability of undercapitalized institutions to reorganize and downsize in order to raise capital. By restoring the ability of weakened institutions to attract private capital (without exposing the sources of capital to unquantifiable losses) the proposal will strengthen institutions and help avoid losses to the taxpayers.

##### BENEFITS OF SELLERS

This amendment will re-open the market to undercapitalized sellers and increase their return on sale. By eliminating the market uncertainty the proposal will entice potential portfolio bidders to return to the mar-

ket. More important, the elimination of the market uncertainty associated with the risk of repudiation will enable sellers accurately to price these portfolios. This, in turn, will enable sellers to realize maximum value in the sale of credit card portfolios. The amendment protects sellers and the FDIC by ensuring that any agreement be negotiated at arm's length. Thus, the FDIC will not be precluded from later repudiating an agreement where the sale was made under duress, such as by an institution in desperate need of cash.

#### BENEFITS TO ACQUIRORS

This amendment will restore certainty to (and stability to) the market for sale of credit card portfolios. This amendment will help potential acquirors assess with a reasonable degree to certainty whether to purchase a credit card portfolio from an undercapitalized institution. Under current law, if one institution acquires a credit card portfolio from a second institution and that sale is later repudiated, the first institution must recognize a loss on that transaction. The procedure established by this amendment would work to give potential acquirors a reasonable degree of certainty in purchasing such assets.

[From the CONGRESSIONAL RECORD, July 1, 1992]

#### SEC. 908. CREDIT CARD SALES.

(a) IN GENERAL.—Section 11(e) of the Federal Deposit Insurance Act (12 U.S.C. 1821(e)) is amended by adding at the end the following new paragraphs:

"(14) SELLING CREDIT CARD ACCOUNTS RECEIVABLE.—

"(A) NOTIFICATION REQUIRED.—An undercapitalized insured depository institution (as defined in section 38) shall notify the Corporation in writing before entering into an agreement to sell credit card accounts receivable.

"(B) WAIVER BY CORPORATION.—The Corporation may at any time, in its sole discretion and upon such terms as it may prescribe, waive its right to repudiate an agreement to sell credit card accounts receivable if the Corporation—

"(i) determines that the waiver is in the best interests of the deposit insurance fund; and

"(ii) provides a written waiver to the selling institution.

"(C) EFFECT OF WAIVER ON SUCCESSORS.—

"(i) IN GENERAL.—If, under subparagraph (B), the Corporation has waived its right to repudiate an agreement to sell credit card accounts receivable—

"(I) any provision of the agreement that restricts solicitation of a credit card customer of the selling institution, or the use of a credit card customer list of the institution, shall bind any receiver or conservator of the institution; and

"(II) the Corporation shall require any acquirer of the selling institution, or of substantially all of the selling institution's assets or liabilities, to agree to be bound by a provision described in subclause (I) as if the acquirer were the selling institution.

"(ii) EXCEPTION.—Clause (i)(II) does not—

"(I) restrict the acquirer's authority to offer any product or service to any person identified without using a list of the selling institution's customers in violation of the agreement;

"(II) require the acquirer to restrict any preexisting relationship between the acquirer and a customer; or

"(III) apply to any transaction in which the acquirer acquires only insured deposits.

"(D) WAIVER NOT ACTIONABLE.—The Corporation shall not, in any capacity, be liable to any person for damages resulting from waiving or failing to waive the Corporation's right under this section to repudiate any contract or lease, including an agreement to sell credit card accounts receivable. No court shall issue any order affecting any such waiver or failure to waive.

"(E) OTHER AUTHORITY NOT AFFECTED.—This paragraph does not limit any other authority of the Corporation to waive the Corporation's right to repudiate an agreement or lease under this section.

"(15) CERTAIN CREDIT CARD CUSTOMER LISTS PROTECTED.—

"(A) IN GENERAL.—If any insured depository institution sells credit card accounts receivable under an agreement negotiated at arm's length that provides for the sale of the institution's credit card customer list, the Corporation shall prohibit any party to a transaction with respect to the institution under this section or section 13 from using the list except as permitted under the agreement.

"(B) FRAUDULENT TRANSACTIONS EXCLUDED.—Subparagraph (A) does not limit the Corporation's authority to repudiate any agreement entered into with the intent to hinder, delay, or defraud the institution, the institution's creditors, or the Corporation."

(b) INTERIM DEFINITION OF UNDERCAPITALIZATION.—During the period beginning on the date of enactment of this Act and ending on the effective date of section 38 of the Federal Deposit Insurance Act (12 U.S.C. 1831o), an insured depository institution is undercapitalized for purposes of section 11(e)(14) of the Federal Deposit Insurance Act (as added by subsection (a) of this section), if it does not comply with any currently applicable minimum capital standard prescribed by the appropriate Federal banking agency, as defined in section 3(q) of the Federal Deposit Insurance Act (12 U.S.C. 1813(q)).

FEDERAL DEPOSIT  
INSURANCE CORPORATION,  
Washington, DC, April 9, 1992.

Hon. CHARLES GRASSLEY,  
U.S. Senate,  
Washington, DC.

DEAR SENATOR GRASSLEY: Thank you for your letter regarding an amendment which would allow the Federal Deposit Insurance Corporation to waive its authority to repudiate contracts for the sale of credit card operations.

This amendment, as provided for in Section 1163 of S. 543, creates a mechanism for parties to credit card sale transactions to obtain a waiver from the FDIC to repudiate these transactions where the selling bank does not meet specified capital requirements. The FDIC may benefit from the credit card notification feature contained in your amendment since it requires troubled banks to notify the FDIC if they intend to sell their credit card portfolio.

As originally drafted, the FDIC had substantial reservations about certain provisions of the amendment concerning restrictions on the FDIC's right to repudiate and its impact on the attractiveness of acquiring failed banks. As you know, we worked with your staff to craft an amendment that does not limit the power of the FDIC to repudiate contracts, considers the FDIC's need to sell insolvent institutions and codifies certain existing FDIC practices. Under the revised amendment, the FDIC also continues to be protected from any transactions undertaken with the intent to hinder, delay or defraud the institution, its creditors or the FDIC.

Upon considering these important revisions to the amendment, the FDIC withdraws its objections.

Sincerely,

WILLIAM TAYLOR,  
Chairman.

So the bill (S. 3326) was read three times and passed; as follows:

[The bill, S. 3326, will appear in a subsequent issue of the RECORD.]

#### THE CALENDAR

Mr. LAUTENBERG. Mr. President, I ask unanimous consent that the Senate proceed en bloc to the immediate consideration of Calendar Nos. 686, 687, 688, 689, that the committee amendments where appropriate be agreed to, the bills as amended be deemed read three times, passed, and the motion to reconsider the passage of these measures be laid upon the table, en bloc, that the title amendment where appropriate be agreed to, further that the consideration of these items appear individually in the RECORD, and any statements appear at the appropriate place.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### OSCAR GARCIA RIVERA POST OFFICE BUILDING

A bill (H.R. 686) to designate the U.S. Post Office Building located at 153 East 110th Street, New York, NY, as the "Oscar Garcia Rivera Post Office Building," was considered, ordered to a third reading, read the third time, and passed.

Mr. STEVENS. Mr. President, in its August 5 legislative meeting, the Senate Governmental Affairs Committee added the text of S. 947 to H.R. 2014, a bill to name a post office after Oscar Garcia Rivera. The committee unanimously reported this bill out for passage by the Senate. Senator PRYOR joined with me in introducing S. 947 on April 25, 1991.

S. 947 will produce a much-needed improvement in postal rate and classification administration. Today, even though the Postal Rate Commission [PRC] is recognized by the courts as the predominant authority on postal ratemaking (*Time, Inc. versus U.S. Postal Service*, 685 F. 2d 760 (2d Cir. 1982)), it cannot appear when postal rate cases go to the courts of appeals. This is so because the Postal Governors make the final decision, and it is their order that is appealed.

It stands to reason that—especially when dealing with highly technical rate and costing matters, embodied in a 40,000-page record—the court should be able to avail itself to as much explanation as possible. The agency that held the hearings, assembled and analyzed the record, and drew the technical and legal conclusions from it, can best provide that help; in this case,

that agency is the PRC. S. 947 would allow the PRC to intervene in a court review initiated by others but it could not bring such a case on its own.

Apart from the PRC's understanding of the details of the case, the Governors—even if they adopt the recommended rates—may misunderstand the PRC's reasons or their basis in the evidence, or may act for reasons incompatible with those actually supporting the decision. Again, the PRC can clarify these matters for the court.

Although some may say there is no reason for the PRC to go to court, there is plenty of room in judicial review for further discussion of matter within the scope of a decision. Moreover, no intervenor may raise in court an issue that was not raised before the agency. This is a bedrock principle of administrative law, and S. 947 does not change it.

S. 947 will make the court's job easier and improve the results of their review of postal rate and classification decisions.

#### LARKIN I. SMITH GENERAL MAIL FACILITY AND LARKIN I. SMITH POST OFFICE BUILDING

A bill (H.R. 4539) to designate the general mail facility of the U.S. Postal Service in Gulfport, MS, as the "Larkin I. Smith General Mail Facility," and the building of the U.S. Postal Service in Poplarville, MS, as the "Larkin I. Smith Post Office Building," was considered, ordered to a third reading, read the third time, and passed.

Mr. LOTT. Mr. President, Larkin Smith was born in 1944 in Poplarville, and his parents ran a small grocery store. He graduated from Poplarville High School and received his degree from Pearl River Junior College in 1964.

At age 22, he joined the Pearl River County Sheriff's Department and won rapid promotion to chief deputy sheriff. He remained with the sheriff's department until he was named chief investigator for the Harrison County Sheriff's Department in 1972.

Just 5 years later, Larkin was appointed chief of police of Gulfport. In 1979, he received his bachelor of arts degree from William Carey College, and was elected president of the State Association of Chiefs of Police later that year.

In 1983, he defeated the incumbent to become sheriff of Harrison County and his strong reform-oriented administration drew widespread praise with innovative antidrug strategies. His prisoner work program became a model used across the Nation.

In 1987 he was elected to a second term with 75 percent of the vote and was selected by President Reagan for appointment to the White House Conference for a Drug-Free America. In

1988 he was invited by the Justice Department to address the National Conference of U.S. Attorneys.

In addition to these accomplishments, Larkin helped establish the Customs Service Blue Lightning Strike Force based in Gulfport. He served as its first chairman and coordinated cooperative antidrug efforts of Federal, State, and local agencies across five States. The center, which now bears his name, directs a regional defense against drug runners attempting to penetrate the southern United States from bases along the Gulf of Mexico, and in Central and South America.

Larkin was elected to the U.S. House of Representatives on November 8, 1988.

Mr. President, I had the honor and privilege of working with Larkin Smith during his law enforcement career and, later, while he was a Member of Congress. He was an outstanding human being, and I am delighted that the effort to name a postal facility in his memory is finally on the verge of passage. It has been a long road since Senator COCHRAN and I here in the Senate, and the members of our State's House delegation, first introduced legislation during the previous Congress to name a post office after our dear friend and colleague. I feel that no one deserves this honor more than the late Congressman Larkin Smith, and I strongly urge my colleagues in the Senate to immediately enact this worthy measure.

#### POSTAL SERVICE MEMORIALS TO LARKIN I. SMITH

Mr. COCHRAN. Mr. President, I rise today in support of H.R. 4539, an act to designate the U.S. Postal Service general mail facility in Gulfport, MS, as the "Larkin I. Smith General Mail Facility" and the U.S. Postal Service building in Poplarville, MS, as the "Larkin I. Smith Post Office Building."

Both Poplarville and Gulfport were homes to Larkin Smith. He was born in Poplarville and began his career in law enforcement there. He later served as chief of police in Gulfport and as sheriff of Harrison County. Because of his distinguished work in law enforcement, President Reagan in 1987 appointed him to the Task Force on a Drug Free America.

Elected to the U.S. House of Representatives on November 8, 1988, Congressman Smith died in a tragic air crash on August 13, 1989. Although his time in Congress was short, he earned the respect and friendship of those with whom he served.

Mr. President, the naming of these facilities in memory of Congressman Smith would be a fitting tribute to his service to Mississippi and the Nation, and I urge prompt passage of H.R. 4539.

#### ABE MURDOCK U.S. POST OFFICE BUILDING

A bill (H.R. 4786) to designate the facility of the U.S. Postal Service located at 20 South Main Street in Beaver, UT, as the "Abe Murdock United States Post Office Building," was considered, ordered to a third reading, read the third time, and passed.

Mr. STEVENS. Mr. President. In its August 5 legislative business meeting, the Senate Governmental Affairs Committee added the text of S.1600 to H.R. 4786, a bill to name to a postal facility in Beaver, UT, after former U.S. Senate and House Member, Abe Murdock. The committee unanimously reported out this bill for passage by the Senate.

I, along with the Senators PRYOR, MURKOWSKI, GRASSLEY, and D'AMATO, introduced S. 1600 on July 31 of last year. The purpose of adding S. 1600 to the House bill was to facilitate its passage in these waning days of this Congress.

S. 1600, the Small Post Office Retention Act, would provide individuals served by contract post offices with an opportunity to appeal a Postal Service decision to close that postal operation. A contract post office is a facility by a nonpostal person or organization contracted by the U.S. Postal Service to operate under postal regulations. Contract post offices can be found in grocery stores, on college campuses, and even in private homes. By contracting for these services, the Postal Service is able to save significant funds while still providing much needed service.

Under present law, if the Postal Service determines that a U.S. Postal Service operated post office should be closed, it can do so only if it provides equal or better service to that community. In addition, individuals in that community have the right to appeal the decision through the Postal Rate Commission.

However, citizens being served by contract post offices do not have those same rights. This bill simply provides that citizens being served by a contract post office will have the same prerogative to appeal should that be necessary. This bill is very narrow in scope. It is not meant to halt or inhibit the Postal Service from closing post offices where they necessarily should be closed. We all recognize that people move and when communities cease to exist so does the need for a post office. If there is no need for a post office, by all means the Postal Service should close it.

The U.S. Postal Service has an obligation to serve every American and we, in Congress, have an obligation to ensure that responsibility is carried out. I want to stress again that this legislation is aimed at small post offices in communities in which that facility is the only post office in town.

The intent of the bill is not to foreclose the Postal Service the oppor-

tunity to close down or to shift locations of a post office within a community or to close branch facilities of a larger post office. It is clearly meant to protect individuals living in small communities who have no other recourse, and no other opportunity for mail service other than through a contract post office.

Passage of the bill will not, nor is it meant to, obstruct future congressional action to increase the rights of individuals being served by small post offices, be they contract or regular post offices.

I urge my colleagues to support this legislation.

#### CLIFTON MERRIMAN POST OFFICE BUILDING

A bill (H.R. 5453) to designate the Central Square facility of the U.S. Postal Service in Cambridge, MA, as the "Clifton Merriman Post Office Building," was considered, ordered to a third reading, read the third time, and passed.

#### RURAL ELECTRIFICATION ADMINISTRATION IMPROVEMENT ACT OF 1992

Mr. LAUTENBERG. Mr. President, I ask unanimous consent that the Agriculture Committee be discharged from further consideration of H.R. 5237, the Rural Electrification Administration Improvement Act of 1992, and that the Senate then proceed to its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will report.

The legislative clerk read as follows:

A bill (H.R. 5237) to amend the Rural Electrification Act of 1935 to improve the provision of electric and telephone service in rural areas, and for other purposes.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

#### AMENDMENT NO. 3400

Mr. LAUTENBERG. In behalf of Senators LEAHY and LUGAR, there is a substitute amendment already at the desk and I ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from New Jersey [Mr. LAUTENBERG] for Mr. LEAHY, for himself and Mr. LUGAR, proposes amendment numbered 3400.

Mr. LAUTENBERG. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike all after the enacting clause and insert the following:

#### SECTION 1. SHORT TITLE.

This Act may be cited as the "Rural Electrification Administration Improvement Act of 1992".

#### SEC. 2. DISCOUNTED LOAN PREPAYMENT.

(a) IN GENERAL.—Subsection (a) of section 306B of the Rural Electrification Act of 1936 (7 U.S.C. 936b(a)) is amended to read as follows:

"(a) DISCOUNTED PREPAYMENT BY BORROWERS OF ELECTRIC LOANS.—

"(1) IN GENERAL.—Except as provided in paragraph (2), a direct or insured loan made under this Act shall not be sold or prepaid at a value that is less than the outstanding principal balance on the loan.

"(2) EXCEPTION.—On request of the borrower, an electric loan made under this Act, or a portion of such a loan, that was advanced before May 1, 1992, or has been advanced for not less than 2 years, shall be sold to or prepaid by the borrower at the lesser of—

"(A) the outstanding principal balance on the loan; or

"(B) the present value of the loan discounted from the face value at maturity at the rate established by the Administrator.

"(3) DISCOUNT RATE.—The discount rate applicable to the prepayment under this subsection of a loan or loan advance shall be the then current cost of funds to the Department of the Treasury for obligations of comparable maturity to the remaining term of the loan.

"(4) TAX EXEMPT FINANCING.—If a borrower prepaies a loan under this subsection using tax exempt financing, the discount shall be adjusted to ensure that the borrower receives a benefit that is equal to the benefit the borrower would receive if the borrower used fully taxable financing. The borrower shall certify in writing whether the financing will be tax exempt and shall comply with such other terms and conditions as the Administrator may establish that are reasonable and necessary to carry out this subsection.

"(5) ELIGIBILITY.—

"(A) IN GENERAL.—A borrower that has prepaid an insured or direct loan shall remain eligible for assistance under this Act in the same manner as other borrowers, except that—

"(i) a borrower that has prepaid a loan, either before or after the date of enactment of this subsection, at a discount rate as provided by paragraph (3), shall not be eligible, except at the discretion of the Administrator, to apply for or receive direct or insured loans under this Act during the 120-month period beginning on the date of the prepayment; and

"(ii) a borrower that prepaid a loan before the date of enactment of this subsection at a discount rate greater than that provided by paragraph (3), shall not be eligible—

"(I) except at the discretion of the Administrator, to apply for or receive direct or insured loans described in clause (i) during the 180-month period beginning on the date of the prepayment; or

"(II) to apply for or receive direct or insured loans described in clause (i) until the borrower has repaid to the Federal Government the sum of—

"(aa) the amount (if any) by which the discount the borrower received by reason of the prepayment exceeds the discount the borrower would have received had the discount been based on the cost of funds to the Department of the Treasury at the time of the prepayment; and

"(bb) interest on the amount described in item (aa), for the period beginning on the

date of the prepayment and ending on the date of the repayment, at a rate equal to the average annual cost of borrowing by the Department of the Treasury.

"(B) EFFECT ON EXISTING AGREEMENTS.—If a borrower and the Administrator have entered into an agreement with respect to a prepayment occurring before the date of enactment of this subsection, this paragraph shall supersede any provision in the agreement relating to the restoration of eligibility for loans under this Act.

"(C) DISTRIBUTION BORROWERS.—A distribution borrower not in default on the prepayment of loans made or insured under this Act shall be eligible for discounted prepayment as provided in this subsection. For the purpose of determining eligibility for discounted prepayment under this subsection or eligibility for assistance under this Act, a default by a borrower from which a distribution borrower purchases wholesale power shall not be considered a default by the distribution borrower.

"(6) DEFINITIONS.—As used in this subsection:

"(A) DIRECT LOAN.—The term 'direct loan' means a loan made under section 4.

"(B) INSURED LOAN.—The term 'insured loan' means a loan made under section 305."

"(b) CONFORMING AMENDMENT.—Section 306B(b) of such Act (7 U.S.C. 936b(b)) is amended by striking "(b) Notwithstanding" and inserting the following:

"(b) MERGERS OF ELECTRIC BORROWERS.—Notwithstanding".

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the amendment of the Senator from Vermont.

The amendment (No. 3400) was agreed to.

Mr. LAUTENBERG. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. JEFFORDS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The question is on the engrossment of the committee amendment and third reading of the bill.

The amendment was ordered to be engrossed, and the bill to be read a third time.

The bill was read a third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, shall the bill pass?

So the bill (H.R. 5237), as amended, was passed.

Mr. LAUTENBERG. Mr. President, I move to reconsider the vote.

Mr. JEFFORDS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

#### WIC INFANT FORMULA PROCUREMENT ACT OF 1992

Mr. LAUTENBERG. Mr. President, I ask unanimous consent that the Agriculture Committee be discharged from further consideration of S. 2875, the WIC Infant Formula Procurement Act of 1992, and that the Senate then proceed to its immediate consideration.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 2875) to amend the Child Nutrition Act of 1966 to enhance competition.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

Mr. LEAHY. Mr. President, on June 11, the Federal Trade Commission ended a 2-year investigation by bringing charges in Federal court against the largest manufacturer of infant formula for anticompetitive practices under the WIC—Women, Infants and Children Program. The two remaining infant formula manufacturers agreed to settlements with the FTC on similar charges.

I introduced legislation in 1989 which required States to buy infant formula for WIC through competitive bidding and other cost containment procedures. That legislation was incorporated in the Child Nutrition and WIC Reauthorization Act of 1989.

However, according to the FTC, Abbott Laboratories, Mead Johnson & Co. and American Home Products Corp. tried to undermine WIC competitive bidding—a procedure that currently saves enough money to put an additional 1 million mothers and their children on the WIC Program at no additional cost.

We cannot tolerate price fixing that puts corporate profits ahead of hungry infants, children, and pregnant women.

Today the Senate has passed the WIC Infant Formula Procurement Act. This bill mandates civil penalties of up to \$100 million for infant formula manufacturers who cheat the WIC program and bars those manufacturers found guilty from the WIC infant formula market for up to 2 years.

The bill would also heighten competition in the WIC infant formula market by providing incentives and technical assistance to States which increase their buying power by forming blocs to purchase formula.

The Special Supplemental Food Program for Women, Infants and Children [WIC], is universally acclaimed as one of our Nation's most successful nutritional programs.

WIC provides food, nutritional instruction, health assessments, and medically prescribed supplements—and saves taxpayers' money.

A 1991 USDA study showed that for every WIC dollar spent on a pregnant woman, between \$2.98 and \$4.75 was saved in Medicaid costs for the newborn during the first 60 days after birth.

Under the bill, WIC agencies could elect to have USDA set up multistate buying groups for them. This will promote high volume discounts and prevent pharmaceutical companies from

taking advantage of smaller States or Native American WIC agencies.

In addition the bill also generates savings because the Secretary of Agriculture will be required, except in unusual circumstances, to purchase formula by soliciting bids for soy-based and for milk-based formula separately. The separate bidding approach has been very effectively used to reduce the cost of formula in those States that have tried that approach.

Let our message today be loud and clear: Hungry children and their mothers are more important than corporate profits.

I want to be clear that nothing in this act should be construed to create any immunity to any civil or criminal action under any Federal antitrust law, or to alter or restrict in any manner the applicability of any federal or state antitrust law.

As compared to current law the major provisions of this act:

First, allow USDA to impose civil penalties of up to \$100 million per year—but limited by the potential harm to the WIC Program—on companies that price-fix or engage in related anticompetitive activities injuring the WIC Program.

Second, allow USDA to disqualify companies—found to price-fix regarding WIC contracts—from participating in the WIC Program for up to 2 years.

Third, allow WIC agencies to require USDA to handle the bid solicitations on their behalf, thereby creating multistate cost containment contracts. This takes advantage of evidence showing the major additional cost savings that can be achieved by increasing the number of infants covered in an infant formula cost containment contract. The bill will also increase competition by having USDA—at WIC agency request—solicit bids from companies that only produce one type of formula.

Fourth, allow the Secretary to provide States with financial incentives to defray costs associated with innovations in cost containment or associated with establishing procedures that enhance competition.

Fifth, mandate that WIC agencies include in their plan of operation for 1994 a description of procedures to be used by the agency to reduce the purchase of unprescribed low-iron formula by WIC participants. Sources indicate that low-iron sales nationwide amount to ten percent of infant formula. Yet children with medical problems that require low-iron formula represent a small fraction of the population.

I wish to clarify one additional point. To avoid controversy at a later date it should be noted that this bill is to be applied prospectively. No other interpretation could be valid. Also note that the statute of limitations for claims owned the Federal Government would apply to these claims. USDA's regulations should incorporate this point to avoid confusion later.

Also, Federal statutory procedures protecting individuals and companies against arbitrary and capricious Government actions—the Administrative Procedure Act—also clearly apply to these new claims. It is expected that the Department will develop fair and appropriate protections to guard against arbitrary and capricious decisions.

Mr. President, I would like to provide some additional details. The act will serve as a deterrent to any future price-fixing regarding the WIC Program.

The Center for Budget and Policy Priorities analyzed the harm to States from the infant formula manufacturers anticompetitive behavior; that is advance price signaling, in 1990. It concluded that after Mead-Johnson publicly announced its future bids, that States were harmed by increased infant formula costs including: Indiana, \$3.7 million cost increase; Minnesota, \$1,811,000 increase; Mississippi, \$1.7 million increase; Oklahoma, \$1.4 million increase; Kentucky, \$868,000 increase; Oregon, \$867,000 increase; Colorado, \$820,000 increase; West Virginia, \$650,000 increase; Iowa, \$539,000 increase and Montana, with a \$324,000 cost increase.

Recent evidence clearly demonstrates that soliciting bids for soy-based and milk-based formula separately can greatly increase WIC savings. Yet, the great majority of WIC agencies require either combined bids, or separate and combined bids.

These new savings are achieved since separate bid solicitations encourage additional bidders. For example, Carnation and Loma Linda only make one type of formula and thus would have great difficulty in winning bids requiring some combination of both soy- and milk-based formula. A major concern of the FTC has been that only three large companies supplied almost all of the infant formula consumed in the United States. Indeed, USDA points out in a 1989 report that "currently the inability of new or smaller manufacturers to establish market shares in both the WIC and non-WIC market constitutes a major barrier to entry into the infant formula market."

In addition, the bill provides an incentive for WIC agencies to join together to jointly buy infant formula for WIC. In a 1991 study, USDA demonstrated the importance of higher volume buying power. For purposes of analysis USDA divided States into three categories based on WIC caseload size: small, less than 50,000; mid-sized, 50,000 to 150,000 and large, over 150,000.

The average rebate for the large States was 44 percent higher than for the small States, \$1.58 versus \$1.10.

Not surprisingly, USDA concluded that "a key factor in achieving high per can rebates appears to be the size of the WIC caseload."

Thus the bill provides incentives for WIC agencies—60 of them do not jointly buy formula—to increase their purchasing power by jointly buying infant formula for WIC. Many Native American WIC agencies, and smaller State agencies, may wish to take advantage of the bill provisions that require USDA to do the bid solicitations for them. USDA would establish buying groups to purchase formula. This could greatly reduce program costs for Native American programs, and smaller States, which pay relatively high prices for formula.

The impact of these savings to the WIC program cannot be minimized. The Congressional Budget Office supplied to my staff an estimate of the savings which could be generated by this bill. CBO concluded that these changes could save the WIC Program a conservative estimate of \$5 million in the first year alone. This means that WIC can enroll an additional 10,000 pregnant women and infants at no additional cost to the taxpayer. Furthermore, the evidence suggests that even greater savings will be achieved in future years after more WIC agencies choose to participate.

Many of us in this Chamber have advocated full funding of WIC. This bill moves us closer to that goal, without negatively impacting the Federal budget.

I wish to thank Senator METZENBAUM for his early leadership in raising questions about the possible anticompetitive actions of the three largest manufacturers of infant formula. The FTC investigation has borne out Senator METZENBAUM's concerns.

Also, I greatly appreciate the leadership role that Congressman WYDEN took in the other body regarding the WIC Program. He introduced in the House legislation to prevent further price-fixing and to promote additional competition. He also testified regarding the possible price fixing, right from the start and has been extremely helpful in getting the job done. This bill reflects his concerns.

Also I wish to thank Congressmen FORD and KILDEE for their supportive efforts and leadership on these matters.

I ask unanimous consent that a letter to me from the Director of the Congressional Budget Office be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD.

CONGRESSIONAL BUDGET OFFICE,  
Washington, DC, October 5, 1992.

Hon. PATRICK J. LEAHY,  
Chairman, Committee on Agriculture, Nutrition  
and Forestry,  
U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: As requested, the Congressional Budget Office has reviewed the Homeless Children's Assistance Act of 1992. Our analysis was based on draft language sent to us on October 2, 1992.

This bill would modify the way that the Secretary of Agriculture allocates grants to organizations participating in homeless children's feeding projects. The allocation would be changed from not less than \$4 million in 1993 and 1994 under current law, to not less than \$1 million and not more than \$4 million in 1993 and 1994 under the bill. A second change is that the Secretary would be required to allocate funds at the beginning of the fiscal year.

The bill affects entitlement spending in the child nutrition programs and thus has potential pay-as-you-go effects under section 252 of the Balanced Budget and Emergency Deficit Control Act of 1985. CBO estimates that there would be no pay-go cost because the bill would have no effect on budget authority and no significant effect on outlays. The allocations for homeless projects are made from funds returned to the Secretary by states that do not fully expend their allocations for state administrative expenses (SAE) for child nutrition programs. Returned funds that are not allocated to homeless programs are reallocated to state agencies that demonstrate a need for additional administrative funds. This bill could reduce the amount of funds allocated to homeless children's feeding projects and could also speed up the provision of grants for such projects.

Overall budget authority is unchanged by the allocation between homeless projects and state agencies. Outlays could be affected by two factors. The potential decrease in the allocation for homeless projects could increase or decrease outlays slightly, depending on whether grants are spent more quickly when used for homeless feeding projects or for state administrative expenses. Allocating funds at the beginning of the year is likely to speed up outlays slightly, resulting in small outlay increases in 1993. The net outlay effect is not expected to be significant.

If you wish further details on this estimate, we will be pleased to provide them. The staff contact is Julia Isaacs, who can be reached at 226-2820.

Sincerely,

ROBERT D. REISCHAUER.

Mr. LEAHY. Mr. President, I wish to clarify one aspect of the Children's Nutrition Assistance Act of 1992 regarding funding for homeless preschooler food projects. One provision of that bill makes available at least \$1 million for allocation to homeless projects for each of fiscal years 1993 and 1994. I wish to point out that if there is insufficient demand or insufficient numbers of suitable projects that there is no requirement to allocate the minimum amount listed in the bill.

I do wish to emphasize, however, that current law already requires USDA to alert States as to the availability of Federal funding for these homeless preschool projects. I intend to carefully monitor USDA efforts in this regard.

Mr. HARKIN. Mr. President, I want to express special recognition and gratitude to the talented staff of the subcommittee. I have said this before and I will say it again, without the staff director of the subcommittee, Bob Silverstein, we would not have a bill. Anybody that knows "Bobby" knows the special powers of consensus building he possesses. His approach is simple; nobody leaves the room until there

is an agreement—but it is his extensive knowledge of the subject matter and ability to inspire trust which really makes it work. I also want to mention the extraordinary efforts of my own staffperson, Anne Silberman. She has labored intensively on this legislation and I want to thank her on behalf of myself and my constituents. Beyond that, special thanks should go to Linda Hinton and Melanie Gabel, the majority legislative assistant, and staff assistant of the subcommittee.

The final version of the bill that the Senate will pass today represents real progress, and it is one we are all proud of. When we began this reauthorization, we were presented with a breadth of widely divergent views by the disability community about the direction this reauthorization should take. It was the task of our staffs, who worked long and diligently, to forge a consensus between those who wanted no changes at all and those who wanted to discard the entire bill and start over again. The conference report we will ratify today is the product of their labor; it is a compromise.

By their nature, compromises never mean that everyone is happy. Some will think that these changes are not enough. They have argued for, and will continue to advocate for, even more substantive amendments. I hear them.

But the truth is that this legislation does represent some significant accomplishments and changes to this program.

Over the years, the face of vocational rehabilitation in America has changed. With the technological advances of the last 20 years, almost anyone can be employed. The Vocational Rehabilitation Program has had to make adjustments as well. With the addition of the Independent Living Program, the Supported Employment Program, and the research and services in assistive technology, more people than ever are eligible and able to benefit from this program.

In this reauthorization, we have done all that was possible to continue to widen the door and expand opportunities for consumers. Some of the major accomplishments include:

A revision of the act that ensure that the concepts of empowerment for individuals with disabilities will be followed, including respect for individual dignity, self-determination, inclusion, integration, and full participation of individuals with disabilities.

A presumption that individuals with disabilities, including individuals with the most severe disabilities, are capable of benefiting from vocational rehabilitation services unless the State agency can demonstrate by clear and convincing evidence that the individual cannot benefit.

An improved relationship between the State agencies and public schools through a directive to establish poli-

cies and methods, including inter-agency agreements, to facilitate both the longterm rehabilitation goals for students and the transition of students from schools to State rehabilitation agencies.

Increased consumer involvement and choice by requiring a joint signoff between the consumer and counselor in the Individualized Written Rehabilitation Program.

The inclusion of a definition of personal assistance services.

The establishment of a State Rehabilitation Advisory Council for the basic grant program, a majority of whose members shall be persons with disabilities.

A choice demonstration project which gives States broad authority to implement consumer choice programs.

A counselor incentive demonstration to allow the Commissioner to fund projects to identify appropriate incentives to vocational rehabilitation counselors, such as weighted case closures, to achieve high-quality placements for individuals with severe disabilities.

The establishment of the Rehabilitation Research Advisory Council within the Department of Education to advise the Director of the National Institute on Disability and Rehabilitation Research with respect to research priorities.

Increased accountability and quality through the consumer councils and State plans.

In addition to these provisions, I am particularly pleased that the conference report includes language regarding two additional issues important to Minnesota: Social Security reimbursements, and a formula for the Older Blind Program.

Many State vocational rehabilitation programs, including my own, see their independent living centers as a vital part of the entire vocational rehabilitation picture. Therefore, State directors should have the option of giving some of their Social Security reimbursement funds to their independent living centers. To me, there is no better sign that the relationship between the State vocational rehabilitation and the independent living center is strong and healthy.

Likewise, the numbers of older blind are growing and the need for greater availability of these services has been well demonstrated. Certainly, the older blind population in this country will benefit from the change of this program to a formula.

Mr. President, this reauthorization has blessed me with the opportunity to further get to know the disability community in my State. Starting in the spring, when I had the privilege to meet and talk with 40 members of the disability community in Minneapolis, up until the last hours before this legislation went to be printed, the input from Minnesotans on this bill has been crucial.

Some of the Minnesotans who have provided valuable assistance and advice to me and my staff that I wish to thank are: Colleen Wieck, the director of the Governor's Council on Developmental Disabilities; Mary Shorthall, the director of the State Vocational Rehabilitation Program; Paula Goldberg, and the other parent advocates in the group called PACER; Jerry Krueger, Jay Johnson, and the other independent living directors in Minnesota; Charlie Lakin; Dan Klint, who testified before the subcommittee; Mike Ehrlichmann, chair of the Regional Transit Board; Margo Imdieke, director of the Minnesota State Council on Disability; Bruce Johnson, Office of Ombudsman for Mental Health and Mental Retardation; Mary O'Hara-Anderson; Elin Ohlsson; David Schwartzkopf; Kurt Strom with the Minnesota State Council on Disability; Leah Welch, director of Independence Crossroads; Kathy Wingen, Advocacy Plus Action; Rachel Wobschall, Governor's Initiative on Technology for People With Disabilities, and the many, many other Minnesotans who have consulted with either me or my staff about this legislation.

I urge my colleagues to support this conference report, and I look forward to the President signing this bill into law.

#### AMENDMENT NO. 3401

Mr. LAUTENBERG. Mr. President, I send an amendment to the desk on behalf of Mr. LEAHY and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from New Jersey [Mr. LAUTENBERG], for Mr. LEAHY, proposes an amendment numbered 3401.

Mr. LAUTENBERG. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike all after the enacting clause and insert the following:

#### SECTION 1. SHORT TITLE.

This Act may be cited as the "Children's Nutrition Assistance Act of 1992".

#### TITLE I—HOMELESS CHILDREN'S ASSISTANCE

##### SEC. 101. SHORT TITLE.

This title may be cited as the "Homeless Children's Assistance Act of 1992".

##### SEC. 102. EXPENDITURE OF FUNDS FOR ADMINISTRATIVE EXPENSES.

Section 18(c)(2)(B)(i) of the National School Lunch Act (42 U.S.C. 1769(c)(2)(B)(i)) is amended by striking "Each such organization" and inserting "Each private nonprofit organization".

##### SEC. 103. ALLOCATION OF RETURNED FUNDS.

Section 7(a)(5)(B)(i) of the Child Nutrition Act of 1966 (42 U.S.C. 1776(a)(5)(B)(i)) is amended—

(1) by striking "the Secretary shall—" and inserting a colon;

(2) by striking subclause (I) and inserting the following new clause:

"(I) The Secretary shall allocate, for the purpose of providing grants on an annual basis to public entities and private nonprofit organizations participating in projects under section 18(c) of the National School Lunch Act (42 U.S.C. 1769(c)), not more than \$4,000,000 in each of fiscal years 1993 and 1994. Subject to the maximum allocation for the projects for each fiscal year, at the beginning of each of fiscal years 1993 and 1994, the Secretary shall allocate, from funds available under this section that have not been otherwise allocated to the States, an amount equal to the estimates by the Secretary of funds to be returned under this clause, but not less than \$1,000,000 in each fiscal year. To the extent that amounts returned to the Secretary are less than estimated or are insufficient to meet the needs of the projects, the Secretary may, subject to the maximum allocations established in this subclause, allocate amounts to meet the needs of the projects from funds available under this section that have not been otherwise allocated to States."; and

(3) in subclause (II), by striking "then allocate," and inserting "After making the allocations under subclause (I), the Secretary shall allocate,".

#### SEC. 104. EFFECTIVE DATE.

This title and the amendments made by this title shall become effective on September 30, 1992.

#### TITLE II—WIC INFANT FORMULA PROCUREMENT

##### SEC. 201. SHORT TITLE.

This title may be cited as the "WIC Infant Formula Procurement Act of 1992".

##### SEC. 202. WIC INFANT FORMULA PROTECTION.

(a) FINDINGS.—

(1) the domestic infant formula industry is one of the most concentrated manufacturing industries in the United States;

(2) only three pharmaceutical firms are responsible for almost all domestic infant formula production;

(3) coordination of pricing and marketing strategies is a potential danger where only a very few companies compete regarding a given product;

(4) improved competition among suppliers of infant formula to the special supplemental food program for women, infants, and children (WIC) can save substantial additional sums to be used to put thousands of additional eligible women, infants, and children on the WIC program; and

(5) barriers exist in the infant formula industry that inhibit the entry of new firms and thus limit competition.

(b) PURPOSES.—It is the purpose of this title to enhance competition among infant formula manufacturers and to reduce the per unit costs of infant formula for the special supplemental food program for women, infants, and children (WIC).

##### SEC. 203. DEFINITIONS.

Section 17(b) of the Child Nutrition Act of 1966 (42 U.S.C. 1786(b)) is amended by striking paragraph (17) and inserting the following new paragraphs:

"(17) 'Competitive bidding' means a procurement process under which the Secretary or a State agency selects a single source (a single infant formula manufacturer) offering the lowest price, as determined by the submission of sealed bids, for a product for which bids are sought for use in the program authorized by this section.

"(18) 'Rebate' means the amount of money refunded under cost containment procedures

to any State agency from the manufacturer or other supplier of the particular food product as the result of the purchase of the supplemental food with a voucher or other purchase instrument by a participant in each such agency's program established under this section.

"(19) 'Discount' means, with respect to a State agency that provides program foods to participants without the use of retail grocery stores (such as a State that provides for the home delivery or direct distribution of supplemental food), the amount of the price reduction or other price concession provided to any State agency by the manufacturer or other supplier of the particular food product as the result of the purchase of program food by each such State agency, or its representative, from the supplier.

"(20) 'Net price' means the difference between the manufacturer's wholesale price for infant formula and the rebate level or the discount offered or provided by the manufacturer under a cost containment contract entered into with the pertinent State agency."

#### SEC. 204. PROCEDURE OF INFANT FORMULA FOR WIC.

Section 17(h)(8) of the Child Nutrition Act of 1966 (42 U.S.C. 1786(h)(8)) is amended by striking subparagraph (G) and inserting the following new subparagraphs:

"(G)(i) The Secretary shall offer to solicit bids on behalf of State agencies regarding cost-containment contracts to be entered into by infant formula manufacturers and State agencies. The Secretary shall make the offer to State agencies once every 12 months. Each such bid solicitation shall only take place if two or more State agencies request the Secretary to perform the solicitation. For such State agencies, the Secretary shall solicit bids and select the winning bidder for a cost containment contract to be entered into by State agencies and infant formula manufacturers or suppliers.

"(ii) If the Secretary determines that the number of State agencies making the election in clause (i) so warrants, the Secretary may, in consultation with such State agencies, divide such State agencies into more than one group of such agencies and solicit bids for a contract for each such group. In determining the size of the groups of agencies, the Secretary shall, to the extent practicable, take into account the need to maximize the number of potential bidders so as to increase competition among infant formula manufacturers.

"(iii) State agencies that elect to authorize the Secretary to perform the bid solicitation and selection process on their behalf and enter into the resulting containment contract shall obtain the rebates or discounts from the manufacturers or suppliers participating in the contract.

"(iv) In soliciting bids and determining the winning bidder under clause (i), the Secretary shall comply with the requirements of subparagraphs (B) and (F).

"(v)(I) Except as provided in subclause (II), the term of the contract for which bids are to be solicited under this paragraph shall be announced by the Secretary in consultation with the affected State agencies and shall be not less than 2 years.

"(II) If the law of a State regarding the duration of contracts is inconsistent with subclause (I), the Secretary shall permit a 1-year contract, with the option provided to the State to extend the contract for additional years.

"(vi) In prescribing specifications for the bids, the Secretary shall ensure that the contracts to be entered into by the State agen-

cies and the infant formula manufacturers or suppliers provide for a constant net price for infant formula products for the full term of the contracts and provide for rebates or discounts for all units of infant formula sold through the program that are produced by the manufacturer awarded the contract and that are for a type of formula product covered under the contract. The contracts shall cover all types of infant formula products normally covered under cost containment contracts entered into by State agencies.

"(vii) The Secretary shall also develop procedures for—

"(I) rejecting all bids for any joint contract and announcing a resolicitation of infant formula bids where necessary;

"(II) permitting a State agency that has authorized the Secretary to undertake bid solicitation on its behalf under this subparagraph to decline to enter into the joint contract to be negotiated and awarded pursuant to the solicitation if the agency promptly determines after the bids are opened that participation would not be in the best interest of its program; and

"(III) assuring infant formula manufacturers submitting a bid under this subparagraph that a contract awarded pursuant to the bid will cover State agencies serving no fewer than a number of infants to be specified in the bid solicitation.

"(viii) The bid solicitation and selection process on behalf of the State agencies shall be conducted in accordance with any procedures the Secretary deems necessary for the effective and efficient administration of the bid solicitation and selection process and consistent with the requirements of this subparagraph. The procedures established by the Secretary shall ensure that—

"(I) the bid solicitation and selection process is conducted in a manner providing full and open competition; and

"(II) the bid solicitation and selection process is free of any real or apparent conflict of interest."

"(H) In soliciting bids for contracts for infant formula for the program authorized by this section, the Secretary shall solicit bids from infant formula manufacturers under procedures in which bids for rebates or discounts are solicited for milk-based and soy-based infant formula, separately, except where the Secretary determines that such solicitation procedures are not in the best interest of the program.

"(I) To reduce the costs of any supplemental foods, the Secretary—

"(i) shall promote, but not require, the joint purchase of infant formula among State agencies electing not to participate under the procedures set forth in subparagraph (G);

"(ii) shall encourage and promote (but not require) the purchase of supplemental foods other than infant formula under cost containment procedures;

"(iii) shall inform State agencies of the benefits of cost containment and provide assistance and technical advice at State agency request regarding the State agency's use of cost containment procedures;

"(iv) shall encourage (but not require) the joint purchase of supplemental foods other than infant formula under procedures specified in subparagraph (B), if the Secretary determines that—

"(I) the anticipated savings are expected to be significant;

"(II) the administrative expenses involved in purchasing the food item through competitive bidding procedures, whether under a rebate or discount system, will not exceed

the savings anticipated to be generated by the procedures; and

"(III) the procedures would be consistent with the purposes of the program; and

"(v) may make available additional funds to State agencies out of the funds otherwise available under paragraph (1)(A) for nutrition services and administration in an amount not exceeding one half of 1 percent of the amounts to help defray reasonable anticipated expenses associated with innovations in cost containment or associated with procedures that tend to enhance competition.

"(J)(i) Any person, company, corporation, or other legal entity that submits a bid to supply infant formula to carry out the program authorized by this section and announces or otherwise discloses the amount of the bid, or the rebate or discount practices of such entities, in advance of the time the bids are opened by the Secretary or the State agency, or any person, company, corporation, or other legal entity that makes a statement (prior to the opening of bids) relating to levels of rebates or discounts, for the purpose of influencing a bid submitted by any other person, shall be ineligible to submit bids to supply infant formula to the program for the bidding in progress for up to 2 years from the date the bids are opened and shall be subject to a civil penalty of up to \$100,000,000, as determined by the Secretary to provide restitution to the program for harm done to the program. The Secretary shall issue regulations providing such person, company, corporation, or other legal entity appropriate notice, and an opportunity to be heard and to respond to charges.

"(ii) The Secretary shall determine the length of the disqualification, and the amount of the civil penalty referred to in clause (i) based on such factors as the Secretary by regulation determines appropriate.

"(iii) Any person, company, corporation, or other legal entity disqualified under clause (i) shall remain obligated to perform any requirements under any contract to supply infant formula existing at the time of the disqualification and until each such contract expires by its terms.

"(K) Not later than the expiration of the 180-day period beginning on the date of enactment of this subparagraph, the Secretary shall prescribe regulations to carry out this paragraph."

#### SEC. 205. PROCEDURES TO REDUCE PURCHASES OF LOW-IRON INFANT FORMULA.

Section 17(f) of the Child Nutrition Act of 1966 (42 U.S.C. 1786(f)) is amended by adding at the end the following new paragraph:

"(22) In the State plan submitted to the Secretary for fiscal year 1994, each State agency shall advise the Secretary regarding the procedures to be used by the State agency to reduce the purchase of low-iron infant formula for infants on the program for whom such formula has not been prescribed by a physician or other appropriate health professional, as determined by regulations issued by the Secretary."

#### SEC. 206. ASSISTANCE TO ENCOURAGE ADDITIONAL COST CONTAINMENT EFFORTS.

The second sentence of section 17(h)(2)(A) of the Child Nutrition Act of 1966 (42 U.S.C. 1786(h)(2)(A)) is amended—

(1) by striking "formula shall—" and inserting "formula—";

(2) by inserting "shall" after the clause designations of each of clauses (i), (ii), and (iii);

(3) by striking "and" at the end of clause (ii);

(4) by striking the period at the end of clause (iii) and inserting "; and"; and

(5) by adding at the end the following new clause:

"(iv) may provide funds, to the extent funds are not already provided under subparagraph (I)(v) for the same purpose, to help defray reasonable anticipated expenses associated with innovations in cost containment or associated with procedures that tend to enhance competition."

**SEC. 207. TECHNICAL ASSISTANCE.**

Section 17(h)(8)(E)(ii) of the Child Nutrition Act of 1966 (42 U.S.C. 1786(h)(8)(E)(ii)) is amended by striking "that do not have large caseloads and".

**SEC. 208. STUDY.**

Not later than April 1, 1994, the Secretary of Agriculture shall report to the Committee on Education and Labor of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate on—

(1) State agencies that request the Secretary of Agriculture to conduct bid solicitations for infant formula under section 17(h)(8)(G)(i) of the Child Nutrition Act of 1966 (42 U.S.C. 1786(h)(8)(G)(i)) (as amended by section 204 of this Act);

(2) cost reductions achieved by the solicitations; and

(3) other matters the Secretary determines to be appropriate regarding this title and the amendments made by this title.

**SEC. 209. TERMINATION.**

The authority provided by this title and the amendments made by this title shall terminate on September 30, 1994, except with regard to section 17(h)(8)(J) of the Child Nutrition Act of 1966 (42 U.S.C. 1786(h)(8)(J)) (as amended by section 204 of this Act).

Mr. LEAHY. Mr. President, this year Congress passed my legislation, the Child Nutrition Amendments of 1992 (S. 2759), to help feed homeless children under age 6 living in emergency and homeless shelters. These children are the innocent victims of the recession, of high unemployment rates, of parental neglect, of ill-fated programs, or just plain bad luck.

As I said upon Senate passage of S. 2759, these children will never have a fair chance if Americans turn their backs on them. While other children play and learn, these children go hungry.

Making matters worse, the demand for emergency food assistance keeps growing. In New York City alone the number of soup kitchens, food pantries, and other emergency food providers has increased from 30 in 1981 to more than 700 today. This is an astonishing increase.

It is shameful that homeless American children must stand in long lines at soup kitchens. Their older brothers and sisters are fed wholesome meals in school through the school breakfast and lunch programs.

The younger children, too young to go to school, all too often must wait for scraps of food brought home from school.

Pilot programs to feed homeless children under age 6 have worked very well. A USDA-issued report, the "Study of the Child Nutrition Homeless Demonstration," noted:

The shelters were unanimous in reporting that the preschool children living in the shelters were now receiving meals that were more balanced, more nutritious, and more frequently included fresh fruit, milk, vegetables and full-strength juices. \* \* \* Furthermore, [certain] children under age 6 \* \* \* now received a warm and nutritious lunch whereas prior to the demonstration they did not receive any meal at all.

It was also reported that "mothers were very grateful, and were especially pleased that their children now got the milk they needed."

GAO reports that 68,000 children are homeless, living in homeless shelters, abandoned buildings, churches, or living on the streets. In addition, 186,000 children live in shared housing.

Equally distressing are the numbers of children under age 6 that are homeless. CBO estimates that close to 25,000 children under age 6 live in emergency shelters—this leaves out the thousands more living in abandoned buildings or in alleys. According to CBO, it would cost \$20 million per year to fully fund this program for all 25,000 children. The annual cost is low, per child.

As I pointed out previously, this bill will help local governments and cities provide food assistance to these homeless children. For example, New York City has an immediate need for this assistance for its city administered facilities sheltering young children. Yet USDA is sitting on several million dollars which is available to fund this program.

Note that many other cities—Los Angeles, CA; Flint, MI; Detroit, MI; New Orleans, LA—have also expressed an interest in this program. It is critical that the Secretary provide each State with the procedures for applying to participate in the program as required in section 18(c)(7). I have been advised that USDA has yet to advise States about this program. The Child Nutrition Amendments of 1992 require that the Secretary advise each State of the availability of this program and of the procedures for applying to participate in the project.

Even though public sponsors are now eligible, the Department would be expected to continue to support existing programs in Philadelphia and at the other locations operated by nonprofit private sponsors. Also the Department is expected to consider applications from new private nonprofit sponsors.

These new amendments are designed to assure a source of more continuous funding for the homeless children food program. The idea is to take unused State administrative expense [SAE] funds and make them available on a more regular and on a more predictable basis. This legislation will require USDA to fund this homeless program with SAE funds—instead of delaying funding each year.

Under current law, USDA may not know until well into each fiscal year the level of SAE funds State agencies

will return to USDA as unused. Under current law amounts returned but not reallocated go to the homeless programs to the degree that those programs can use those funds.

But each year the funds are not available until well into the fiscal year which USDA argues makes it difficult to properly run the program. The purpose of this legislation is to address these concerns while not materially changing the ultimate amount of funds made available to the homeless program.

This amendment would do this by having the Secretary take a modest amount of SAE funds at the beginning of the fiscal year and allocate it to the homeless programs. The Secretary's allocation to the homeless program would reflect his or her estimate of the amount of funds that would otherwise have become available later in the fiscal year.

When some months later the amount of funds returned and not reallocated becomes known the Secretary would supplement the funds going to the homeless programs if more money is returned and not reallocated than he or she had originally anticipated and if the homeless program could use the additional funds.

The underlying purpose here is not to materially change the division of funds between the State agencies and the homeless programs but simply to modify the process for providing the funds to the homeless program so that it can operate effectively.

The concept behind these changes is to anticipate in advance levels of SAE funds that would have been made available to the Secretary after the reallocation process. These surplus unused funds would be dedicated to the homeless program in addition to the exact dollar amounts made available under the National School Lunch Act for each fiscal year.

I am disappointed that this legislation became necessary so that USDA would administer the program properly. As I have already noted that unused SAE funds have been available to USDA for this homeless program for at least 5 months, and probably much longer, but USDA has yet to use any of them for this program. This legislation removes any possible excuse for not feeding these homeless children.

One aspect of this bill concerns a very technical matter. USDA has indicated that it might limit the number of homeless centers in each city that could participate in the program. I want to again mention the point I raised when S. 2759 was under consideration by the Senate, and the point I raised before the House acted on that bill and before the President signed the bill into law.

The law as amended by this bill provides that no "organization" can operate more than 5 sites. While it is clear

from the text of the law, I want to emphasize that the reference to "Each such organization" in section 18(c)(2)(B) only refers to "private nonprofit organizations" and does not refer to the "State, city, local, or county governments, or other public entities" which are newly permitted to participate under this Act.

That five-site limit imposed on organizations is relevant only to "private nonprofit organizations" and not to governments or other public entities. Imposing that limit on counties or cities is unnecessary and counterproductive in terms of the intent of this legislation.

For example, it would make no sense to encourage homeless families to crowd into just five of New York's 11 or so shelters so that their youngest children could obtain nutritious meals.

I have often said that childhood hunger is a moral issue and not a political one. Childhood hunger is like the proverbial thief in the night, it robs and cripples this Nation of its greatest resource—our children. This bill helps to alleviate some of that hunger.

Mr. President, I ask unanimous consent that a letter from CBO on this matter be placed into the RECORD following the conclusion of my remarks.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 3401) was agreed to.

The PRESIDING OFFICER. The question is on the engrossment and third reading of the bill, as amended.

The bill, as amended, was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

Mr. LAUTENBERG. Mr. President, I move to reconsider the vote.

Mr. JEFFORDS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

#### AMENDING THE AGRICULTURAL ACT OF 1938

Mr. LAUTENBERG. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of S. 3327, a bill addressing the issue of acre-for-acre transfer of certain acreage allotments, introduced earlier this day by Senators FORD and MCCONNELL; that the bill be deemed read the third time, passed, and the motion to reconsider be laid upon the table, and that any statements appear in the RECORD at the appropriate place.

The PRESIDING OFFICER. Without objection, it is so ordered.

So the bill (S. 3327) was deemed read the third time, and passed, as follows:

The text of the bill (S. 3327) to amend the Agricultural Adjustment Act of 1938 to permit the acre-for-acre transfer of an acreage allotment or quota for

certain commodities, and for other purposes, as passed by the Senate on October 5, 1992, is as follows:

S. 3327

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

#### SECTION 1. ACRE-FOR-ACRE TRANSFER OF CERTAIN ACREAGE ALLOTMENTS.

Section 318 of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1314d) is amended by striking subsection (e) and inserting the following new subsection:

"(e) The transfer of an allotment or quota under this section shall be approved acre for acre."

#### REGARDING MARKETING OF IMPORTED PAPAYAS

Mr. LAUTENBERG. Mr. President, I ask unanimous consent that the Agriculture Committee be discharged from further consideration of S. 568, a bill regarding marketing order requirements on imported papayas, and that the Senate then proceed to its immediate consideration.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 568) to require that imports of fresh papaya meet all the requirements imposed on domestic fresh papaya.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

Mr. LEAHY. Mr. President, it is the intent of the committee that the extension of the authority under section 8e of the Agricultural Marketing Act of 1937 to include the addition of the commodity papayas, shall apply only to imported papayas of such similar varieties and other characteristics as are grown in the production area covered by the Federal marketing order.

There are papayas imported into the United States which are distinctly different than the papayas covered by the Federal marketing order. Such papayas are typically of different varieties, different shape, and larger in size than those regulated under the Federal marketing order. The committee does not intend such papayas to be covered under section 8e regulation.

AMENDMENT NO. 3402

Mr. LAUTENBERG. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from New Jersey [Mr. LAUTENBERG] for Mr. INOUE, proposes an amendment numbered 3402.

Mr. LAUTENBERG. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike all after the enacting clause and insert the following:

#### SECTION 1. PAPAYAS.

The first sentence of section 8e(a) of the Agricultural Adjustment Act (7 U.S.C. 608e-1(a)), reenacted with amendments by the Agricultural Marketing Agreement Act of 1937, is amended by striking "or apples" and inserting "apples, or papayas".

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 3402) was agreed to.

Mr. LAUTENBERG. Mr. President, I move to reconsider the vote.

Mr. JEFFORDS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The question is on the engrossment and third reading of the bill, as amended.

The bill, as amended, was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

The text of the bill (S. 568) to require that imports of fresh papaya meet all the requirements imposed on domestic fresh papaya, as passed by the Senate on October 5, 1992, is as follows:

S. 568

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

#### SECTION 1. PAPAYAS.

The first sentence of section 8e(a) of the Agricultural Adjustment Act (7 U.S.C. 608e-1(a)), reenacted with amendments by the Agricultural Marketing Agreement Act of 1937, is amended by striking "or apples" and inserting "apples, or Solo-type papayas".

Mr. LAUTENBERG. Mr. President, I move to reconsider the vote.

Mr. JEFFORDS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

#### COMMUNITIES MAKING TRANSITION TO HUNGER-FREE STATUS

Mr. LAUTENBERG. Mr. President, I ask unanimous consent that the Agriculture Committee be discharged from further consideration of House Concurrent Resolution 302, a concurrent resolution expressing the sense of Congress regarding communities making the transition to hunger-free status, and that the Senate then proceed to its immediate consideration, that the concurrent resolution be agreed to, and the motion to reconsider laid upon the table; and that the preamble be agreed to.

The PRESIDING OFFICER. Without objection, it is so ordered.

So the concurrent resolution (H. Con. Res. 302) was agreed to.

The preamble was agreed to.

**EQUITABLE TREATMENT OF SUGARCANE PRODUCERS—H.R. 5763**

**RECREATIONAL HUNTING SAFETY AND PRESERVATION ACT OF 1991—S. 1294**

Mr. LAUTENBERG. Mr. President, I ask unanimous consent that the Agriculture Committee be discharged, en bloc, from consideration of the following bills:

H.R. 5763, to provide equitable treatment to producers of sugarcane subject to proportionate shares; and

S. 1294, the Recreational Hunting Safety and Preservation Act of 1991.

And that the Senate then proceed, en bloc, to their immediate consideration; that the bills be deemed read three times, passed and the motion to reconsider laid upon the table, en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

So the bill (H.R. 5763) was deemed read a third time and passed.

So the bill (S. 1294) was deemed read a third time and passed, as follows:

The text of the bill (S. 1294) to protect individuals engaged in a lawful hunt within a national forest, to establish an administrative civil penalty for persons who intentionally obstruct, impede, or interfere with the conduct of the lawful hunt, and for other purposes, as passed by the Senate on October 5, 1992, is as follows:

S. 1294

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

**SECTION 1. SHORT TITLE.**

This Act may be cited as the "Recreational Hunting Safety and Preservation Act of 1991".

**SEC. 2. FINDINGS.**

Congress finds that—

(1) recreational hunting, when carried out pursuant to law (as implemented by the regulations of Federal and State wildlife management agencies) is a necessary and beneficial element in the proper conservation and management of healthy, abundant, and biologically diverse wildlife resources;

(2) recreational hunters (because of a generally demonstrated concern with the conservation of wildlife resources and preservation of habitat necessary for the breeding and maintenance of healthy wildlife populations, and through a familiarity with the resources gained from experience in the field) are a valuable asset in ensuring enlightened public input into decisions regarding management and maintenance programs for wildlife resources and habitat;

(3)(A) recreational hunting supports industries highly significant to the national economy through sales in interstate commerce of sporting goods; and

(B) the Federal excise taxes imposed on the sales provide a major source of funding for vital programs of wildlife conservation and management;

(4) various persons are engaging in (and have announced an intent to continue to engage in) a variety of disruptive activities with the premeditated purpose of preventing and interfering with the conduct of lawful recreational hunting within the boundaries

of national forests and other Federal lands, which activities—

(A) place both recreational hunters and the disruptive persons in imminent jeopardy of grave physical injury or death;

(B) disrupt the peaceful, lawful, and prudent conduct of wildlife population and habitat management programs by Federal and State wildlife management agencies; and

(C) ultimately may alter the planned program objectives, resulting in—

(i) undesirable patterns of activity within populations of wildlife;

(ii) the endangerment of the future viability of wildlife species; and

(iii) damage to habitat values;

(5) national forests comprise one important wildlife habitat resource that—

(A) supports many large, diverse, and vital populations of wildlife; and

(B) offers significant opportunities for legal recreational hunting as an important management tool to ensure the future viability of the wildlife populations;

(6) it is the right of citizens of the United States freely to enjoy lawful recreational hunting in national forests in accordance with regulations promulgated by Federal and State wildlife management agencies; and

(7) in many instances under current law, vagueness and ambiguity exist regarding the application of State laws and enforcement activities relating to the—

(A) safety of hunters; and

(B) legal rights of recreational hunters to participate peacefully in lawful hunts within national forests and on other Federal lands.

**SEC. 3. DEFINITIONS.**

As used in this Act:

(1) **LAWFUL HUNT.**—The term "lawful hunt" means an occasion when an individual is engaged in the taking or harvesting (or attempted taking or harvesting) through a legal means and during a specified legal season of a wildlife or fish, within a national forest, which activity—

(A)(i) is authorized by or licensed under the law of the State in which it takes place; or

(ii) is regulated by game or fishing seasons established by the State in which it takes place;

(B) is not prohibited by a law of the United States; and

(C) does not infringe upon a right of an owner of private property.

(2) **NATIONAL FOREST.**—The term "national forest" means land included in the National Forest System (as defined in section 11(a) of the Forest and Rangeland Renewable Resources Planning Act of 1974 (16 U.S.C. 1609(a))).

(3) **PERSON.**—The term "person" includes corporations, companies, associations, firms, partnerships, societies, and joint stock companies, as well as individuals.

(4) **SECRETARY.**—The term "Secretary" means the Secretary of Agriculture.

**SEC. 4. OBSTRUCTION OF A LAWFUL HUNT.**

(a) **VIOLATION.**—It is unlawful for a person knowingly and with the intent of obstructing, impeding, or interfering with a lawful hunt by an individual to—

(1) obstruct, impede, or otherwise interfere with a lawful hunt by an individual;

(2) scare, herd, harass, decoy, or otherwise engage in activities designed to affect wildlife in a national forest;

(3) engage in activities that prevent or impede the reasonable and usual means of access by those who intend to participate in a lawful hunt, whether the activities occur within a national forest or upon a public or

private road, highway, path, trail, or other normal route of access to a national forest;

(4) take or abuse property, equipment, or hunting dogs being used in conjunction with a lawful hunt; or

(5) enter into a national forest, travel in interstate commerce, use the United States mails or an instrumentality of interstate telephonic or electronic communications, or transport or cause to be transported in interstate commerce a material or item, to further—

(A) a scheme or effort to obstruct, impede, or otherwise interfere with a lawful hunt; or

(B) the efforts of another person to obstruct, impede, or interfere with a lawful hunt.

(b) **MULTIPLE VIOLATIONS.**—The Secretary may consider participation by a person in more than one of the activities described in this section to constitute multiple violations.

**SEC. 5. CIVIL PENALTIES.**

(a) **IN GENERAL.**—A person who engages in an activity described in section 4 shall be assessed a civil penalty of not less than \$500, and not more than \$5,000, for each violation.

(b) **VIOLATION INVOLVING FORCE OR VIOLENCE.**—Upon a determination by a court that the activity involved the use of force or violence, or the threatened use of force or violence, against the person or property of another person, a person who engages in an activity described in section 4 shall be assessed a civil penalty of not less than \$1,000, and not more than \$10,000, for each violation.

(c) **RELATIONSHIP TO OTHER PENALTIES.**—The penalties established by this section shall be in addition to other criminal or civil penalties that may be levied against the person as a result of an activity in violation of section 4.

(d) **PROCEDURE.**—

(1) **COMPLAINTS FROM GOVERNMENT AGENTS.**—Upon receipt of a written complaint from an officer, employee, or agent of the Forest Service or other Federal agency that a person violated section 4, the Secretary shall—

(A) forward the complaint to the United States Attorney for the Federal judicial district in which the violation is alleged to have occurred; and

(B) request the Attorney General of the United States to institute a civil action for the imposition and collection of the civil penalty specified in subsection (a) or (b).

(2) **COMPLAINTS FROM INDIVIDUALS.**—Upon receipt of a sworn affidavit from an individual and a determination by the Secretary that the statement contains sufficient factual data to create a reasonable belief that a violation of section 4 has occurred, the Secretary shall—

(A) forward a complaint to the United States Attorney for the Federal judicial district in which the violation is alleged to have occurred; and

(B) request the Attorney General of the United States to institute a civil action for the imposition and collection of the civil penalty specified in subsection (a) or (b).

(e) **USE OF PENALTY MONEY COLLECTED.**—After deduction of costs attributable to collection, money collected from penalties shall be—

(1) deposited into the trust fund established pursuant to the Act entitled "An Act to provide that the United States shall aid the States in wildlife-restoration projects, and for other purposes", approved September 2, 1937 (16 U.S.C. 669) (commonly known as the "Pitman-Robertson Wildlife Restoration Act"), to support the activities authorized

by that Act and undertaken by State wildlife management agencies; or

(2) used in such other manner as the Secretary determines will enhance the funding and implementation of—

(A) the North American Waterfowl Management Plan signed by the Secretary of the Interior and the Minister of Environment for Canada in May 1986; or

(B) a similar program that the Secretary determines will enhance wildlife management—

(i) within national forests; or

(ii) on private or State-owned lands when the efforts will also provide a benefit to wildlife management objectives within national forests.

#### SEC. 6. OTHER RELIEF.

(a) INJUNCTIVE RELIEF.—Injunctive relief against a violation of section 4 may be sought by—

(1) the head of a State agency with jurisdiction over fish or wildlife management;

(2) the Attorney General of the United States; or

(3) any person who is or would be adversely affected by the violation, or a hunting or sportsman's organization to which the person belongs.

(b) DAMAGES AND ATTORNEY'S FEES.—Any person who is or would be adversely affected by a violation of section 4, or a hunting or sportsman's organization to which the person belongs, may bring a civil action to recover—

(1) actual and punitive damages; and

(2) reasonable attorney's fees.

#### SEC. 7. RELATIONSHIP TO STATE AND LOCAL LAW AND CIVIL ACTIONS.

(a) LAW OR ORDINANCE.—This Act is not intended to preempt a State law or local ordinance that provides for civil or criminal penalties for a person who obstructs or otherwise interferes with a lawful hunt.

(b) CIVIL ACTION.—The bringing of an action pursuant to this Act shall not prevent an independent action against a person under a State law or local ordinance.

#### SEC. 8. REGULATIONS.

The Secretary may issue such regulations as are necessary to carry out this Act.

#### RECREATIONAL HUNTING SAFETY AND PRESERVATION ACT—S. 1294

Mr. SANFORD. Mr. President, I rise to offer my strong and sincere support for the passage of the Recreational Hunting Safety and Preservation Act (S. 1294), which is now before the Senate. Such action is long overdue, and hunter protection is an issue for which I have fought and one which I think deserves legislative affirmation. In June of last year, I introduced, with the help of Senators BREAUX, SYMMS, COCHRAN, and HATCH, a bill which is similar in nature to the language now before the Senate.

I wish to especially thank Senator FOWLER, the author of S. 1294, who has worked diligently to bring the Nation's attention to this cause, and Senator BURNS and other colleagues who have championed hunters' rights.

It is unfortunate that the tradition of responsible hunting in this country is being challenged by those who have little understanding of the sport, and those who wish to see all hunting of

wildlife eliminated. The harassment of hunters and the obstruction of lawful hunts has become increasingly frequent in recent months. In 41 States it is now illegal to harass hunters; I am glad Congress is taking action to establish similar guidelines for our national forests. This legislation will protect citizens attempting to carry out a lawful hunt within a national forest.

Those persons found to have intentionally disturbed wildlife resources or abused property in order to disrupt the lawful taking of these resources may be assessed a civil penalty of not less than \$1,000. If this violation involves the use of force or violence, penalties may not exceed \$10,000. Funds collected from civil penalties imposed under the act will aid State wildlife restoration projects, the North American waterfowl management plan, or other wildlife enhancement programs beneficial to our national forests.

Each year many Americans enjoy the natural beauty of our national forests and help maintain controlled populations of wildlife by hunting in these unspoiled areas. What began as a trend in the New England States has recently begun to spread. From Maine to Florida to California, pheasant hunters and deer hunters alike are being trailed into the fields and woods by noisy, protesting antihunting advocates. Air horns, loud music, and shouting arguments are increasingly taking the place of otherwise uninterrupted hunts. Vandalism and the threat of physical violence are also likely to become more widespread as groups opposing hunting become larger and more active.

Each year, American hunters spend several hundred million dollars for licenses, duck stamps, and excise taxes on equipment and ammunition. Much of that money is used to finance game research and management programs and to purchase important wildlife habitats that will benefit all species. The American hunter is a responsible conservationist who knows, and adds value to game species, and thereby ensures their preservation. These men and women have been instrumental in efforts which have led to dramatic increases in populations of white-tailed deer, elk, wild turkeys, wood ducks, and other species.

Mr. President, our national forests are treasures to be maintained for continuing supplies of natural resources and also for the recreational needs of our citizens. This bill will help ensure stable and healthy populations of game animals for hunters and nonhunters alike. I hope my colleagues will join Senator FOWLER and me in supporting this measure that will protect the property and safety of hunters who abide by all Federal and State game laws in the taking of animals within a national forest.

Mr. FOWLER. Mr. President, I am proud the Senate has taken action on

this legislation and want to recognize all the Senators who cosponsored this important bill—Senators BURNS, HEFLIN, MCCONNELL, PRYOR, SASSER, STEVENS, HATCH, SHELBY, BREAUX, HOLLINGS, DASCHLE, REID, and Senator SANFORD who has worked very closely with me on this issue. These Members should all be commended for their strong support for the sportsmen of America.

Mr. President, now that the Senate has passed this legislation, I urge all of my fellow Members of Congress in the other Chamber to move this legislation forward without delay and send the bill to the President.

#### RURAL ELECTRIFICATION ACT AMENDMENT

Mr. LAUTENBERG. Mr. President, I ask unanimous consent that the Agriculture Committee be discharged from further consideration of H.R. 5954, a bill to clarify the status of the Rural Telephone Bank and its accounting policies, and that the Senate then proceed to its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 5954) to amend the Rural Electrification Act of 1936 to clarify the status of the Rural Telephone Bank and its accounting policies, and for other purposes.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

AMENDMENT NO. 3403

Mr. LAUTENBERG. Mr. President, on behalf of Senators LEAHY and LUGAR a substitute amendment is already at the desk and I ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment.

The assistant legislative clerk read as follows:

The Senator from New Jersey [Mr. LAUTENBERG] for Mr. LEAHY (for himself and Mr. LUGAR) proposes amendment 3403.

Mr. LAUTENBERG. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike all after the enacting clause and insert the following:

#### SECTION 1. IMPROVEMENT OF HEALTH CARE SERVICES AND EDUCATIONAL SERVICES THROUGH TELECOMMUNICATIONS.

(a) PROGRAMS FOR CONSORTIA IN QUALIFIED LOCAL EXCHANGE SERVICE AREAS.—Chapter 1 of subtitle D of title XXIII of the Food, Agriculture, Conservation, and Trade Act of 1990 (7 U.S.C. 950aaa et seq.) is amended by adding at the end the following new section:

#### "SEC. 2335A. SPECIAL HEALTH CARE AND DISTANCE LEARNING PROGRAM FOR QUALIFIED SERVICE AREAS.

"(a) DEVELOPMENT OF CONSORTIA.—The Administrator shall encourage the development

of consortia to provide health care services or educational services through telecommunications in rural areas of a qualified local exchange carrier service area. Each consortium shall be composed of—

"(1) a tertiary care facility, rural referral center, medical teaching institution, or educational institution accredited by the State;

"(2) any number of institutions that provide health care services or educational services; and

"(3) not less than three rural hospitals, clinics, community health centers, migrant health centers, local health departments, or similar facilities, or not less than three educational institutions accredited by the State.

"(b) SPECIAL PROGRAM FOR QUALIFIED LOCAL EXCHANGE CARRIER SERVICE AREAS.—

"(1) REGULATIONS AND SPECIAL PROGRAM.—Through regulations issued not later than 190 days after the date of enactment of this section, the Administrator shall establish a program under which qualified consortia described in subsection (a) located within qualified local exchange carrier service areas may apply to the Administrator for grants to support the costs of activities involved in the sending and receiving of information that will improve the delivery of health care services or educational services through telecommunications in rural areas.

"(2) SELECTION OF GRANTEEES.—The Administrator shall—

"(A) establish application procedures;

"(B) review the applications submitted under this subsection in a timely manner; and

"(C) make grants in accordance with this subsection and with regulations issued by the Administrator.

"(3) PRIORITIES.—

"(A) IN GENERAL.—Priority for grants under this subsection shall be accorded applicants whose applications and plans demonstrate—

"(i) the greatest likelihood of successfully and efficiently carrying out the activities described in the application and the plan of the applicant;

"(ii) the greatest likelihood of improving health care services or educational services in the rural areas;

"(iii) coordination between local exchange carriers to carry out activities as described in the application; and

"(iv) unconditional financial support from each affected local community.

"(B) GEOGRAPHIC DIVERSITY.—In awarding grants, the Administrator shall seek to achieve geographic diversity among the grantees.

"(4) MAXIMUM AMOUNT OF GRANT.—The amount of each grant awarded under this subsection shall not exceed \$1,500,000.

"(5) DISTRIBUTION OF GRANTS.—Grants to a qualified consortium under this subsection shall be disbursed over a period of not more than 3 years.

"(6) USE OF FUNDS.—

"(A) IN GENERAL.—Grants under this subsection may be used to support the costs of activities involving the sending and receiving of information to improve health care services or educational services in rural areas, including—

"(i) in the case of grants to improve health care services—

"(I) consultations between health care providers;

"(II) transmitting and analyzing x-rays, lab slides, and other images;

"(III) developing and evaluating automated claims processing, and transmitting automated patient records; and

"(IV) developing innovative health professions education programs;

"(ii) in the case of grants to improve educational services—

"(I) developing innovative education programs and expanding curriculum offerings;

"(II) providing continuing education to all members of the community;

"(III) providing means for libraries of educational institutions or public libraries to share resources;

"(IV) providing the public with access to State and national data bases;

"(V) conducting town meetings; and

"(VI) covering meetings of agencies of State government; and

"(iii) in all cases—

"(I) transmitting financial information; and

"(II) such other related activities as the Administrator considers to be consistent with the purposes of this section.

"(7) LIMITATION ON ACQUISITION OF INTERACTIVE TELECOMMUNICATIONS EQUIPMENT.—Not more than 40 percent of the amount of any grant made under this subsection may be used to acquire interactive telecommunications end user equipment.

"(8) LIMITATION ON USE OF CONSULTANTS.—Not more than 5 percent of the amount of any grant made under this subsection may be used to employ or contract with any consultant or similar person.

"(9) PROHIBITIONS.—Grants made under this subsection may not be used, in whole or in part, to establish or operate a telecommunications network or to provide any telecommunications services for hire.

"(c) EXPEDITED TELEPHONE LOANS.—Local exchange carriers located in a qualified local exchange carrier service area shall be eligible to apply for expedited loans under the Rural Electrification Act of 1936 (7 U.S.C. 901 et seq.). The Administrator shall respond to a completed application for such a loan no later than 45 days after receipt. The Administrator shall notify the applicant in writing of its decision regarding each such application.

"(d) DEFINITION.—As used in this section, the term 'qualified local exchange carrier service area' means the service area of a local telephone exchange carrier in which the local exchange carrier has a plan approved by the Administrator for upgrading and modernizing the rural telecommunications infrastructure of the service area. The plan shall—

"(1) provide for eliminating party line service within the local exchange carrier service area and for other improvements and modernization in rural telephone service;

"(2) provide for the enhancement of the availability of educational opportunities or the availability of improved medical care through telecommunications;

"(3) encourage and improve the use of telecommunications, computer networks, and related advanced technologies to provide educational and medical benefits to people in rural areas; and

"(4) provide for the achievement of the goals described in subparagraphs (A) through (C) not later than 10 years after the approval of the plan."

(b) EXTENSION OF CHAPTER 1.—Notwithstanding any other provision of law, chapter 1 of subtitle D of title XXIII of the Food, Agriculture, Conservation and Trade Act of 1990 (7 U.S.C. 950aaa et seq.), including the amendments made by this section, shall be effective until September 30, 1997.

(c) ALLOCATION OF FUNDS.—Section 2335(b) of the Food, Agriculture, Conservation, and

Trade Act of 1990 (7 U.S.C. 950aaa-4) is amended by adding at the end the following new paragraph:

"(8) USE OF APPROPRIATED FUNDS.—

"(A) IN GENERAL.—Subject to subparagraph (B), the Administrator shall make available—

"(i) 50 percent of the funds made available pursuant to paragraph (3) for grants for end users that are consortia participating in the special program established under section 2335A; and

"(ii) 50 percent of the funds made available pursuant to paragraph (3) to provide funds for the programs, and end users participating in the programs, authorized by sections 2331 through 2335.

"(B) RELEASE OF FUNDS.—Not earlier than April 1 and not later than May 1 of each year, the Administrator shall make such funds described in subparagraph (A) as remain unobligated, available for any purpose described in subparagraph (A)."

(d) EFFECT OF AMENDMENTS.—The amendments made by this section shall not apply to funds appropriated for fiscal year 1993 to carry out subtitle D of title XXIII of the Food, Agriculture, Conservation, and Trade Act of 1990 (7 U.S.C. 950aaa et seq.) or require the revision of any regulation proposed to carry out such subtitle during fiscal year 1993.

The PRESIDING OFFICER. Without objection, the amendment is agreed to.

So the amendment (No. 3403) was agreed to.

The PRESIDING OFFICER. Without objection the bill is considered read a third time and passed and the amendment to the title is agreed to.

So the bill (H.R. 5934) as amended, was deemed read a third time and passed.

The title was amended to read as follows: "An Act to amend the Food, Agriculture, Conservation, and Trade Act of 1990 to improve health care services and educational services through telecommunications, and for other purposes."

Mr. LAUTENBERG. Mr. President, I move to reconsider the vote.

Mr. JEFFORDS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

#### FOREIGN SERVICE ACT AMENDMENTS OF 1992

Mr. LAUTENBERG. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 764, S. 3275, a bill to amend the Foreign Service Act of 1980; that the bill be read a third time, passed, and the motion to reconsider be laid upon the table.

The PRESIDING OFFICER. Without objection, it is so ordered.

So the bill (S. 3275) was deemed read a third time and passed, as follows:

S. 3275

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

(a) Section 805(a) of the Foreign Service Act of 1980 (22 U.S.C. 4045) is amended—

(1) by inserting "(1)" immediately after "(a)";

(2) by adding at the end thereof the following new paragraph:

"(2) Notwithstanding the percentage limitation contained in paragraph (1) of this subsection—

"(A) The Department shall deduct and withhold from the basic pay of a Foreign Service criminal investigator/inspector of the Office of the Inspector General, Agency for International Development, who is qualified to have his annuity computed in the same manner as that of a law enforcement officer pursuant to section 8339(d) of title 5, an amount equal to that to be withheld from a law enforcement officer pursuant to section 8334(a)(1) of title 5. The amounts so deducted shall be contributed to the Fund for the payment of annuities, cash benefits, refunds, and allowances. An equal amount shall be contributed by the Department from the appropriations or fund used for payment of the salary of the participant. The Department shall deposit in the Fund the amounts deducted and withheld from basic salary and amounts contributed by the Department.

"(B) The Department shall deduct and withhold from the basic pay of a Foreign Service criminal investigator/inspector of the Office of the Inspector General, Agency for International Development, who is qualified to have his annuity computed pursuant to section 8415(d) of title 5, an amount equal to that to be withheld from a law enforcement officer pursuant to section 8422(a)(2)(B) of title 5. The amounts so deducted shall be contributed to the Fund for the payment of annuities, cash benefits, refunds, and allowances. An equal amount shall be contributed by the Department from the appropriations or fund used for payment of the salary of the participant. The Department shall deposit in the Fund the amounts deducted and withheld from basic salary and amounts contributed by the Department."

(b) Section 805(d) of the Foreign Service Act of 1980 (22 U.S.C. 4045) is amended by adding at the end thereof the following new paragraph:

"(5) Notwithstanding paragraph (1), a special contribution for past service as a Foreign Service criminal investigator/inspector of the Office of the Inspector General, Agency for International Development which would have been creditable toward retirement under either section 8336(c) or 8412(d) of title 5, and for which a special contribution has not been made shall be equal to the difference between the amount actually contributed pursuant to either section 4045 or 4071e of title 22 and the amount that should have been contributed pursuant to either section 8334 or 8422 of title 5."

(c) Section 812(a) of the Foreign Service Act of 1980 is amended by striking out the number "55" from paragraph (2) and inserting the number "57" in lieu thereof.

(d) Section 806(a)(6) of the Foreign Service Act of 1980 is amended by striking out "5545(a)(2)" and inserting "5545(c)(2)" in lieu thereof.

#### YAVAPAI-PRESCOTT INDIAN TRIBE WATER RIGHTS SETTLEMENT ACT

Mr. LAUTENBERG. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 744, S. 2975, Yavapai-PreScott Indian Tribe water rights bill; that the committee substitute be agreed to; the bill be read a third time and passed;

and the motion to reconsider be laid upon the table.

The PRESIDING OFFICER. Without objection, it is so ordered.

So the bill (S. 2975), as amended, was deemed read a third time and passed, as follows:

#### SECTION 1. SHORT TITLE.

This Act may be cited as the "Yavapai-PreScott Indian Tribe Water Rights Settlement Act of 1992".

#### SEC. 2. CONGRESSIONAL FINDINGS AND DECLARATIONS.

(a) FINDINGS.—The Congress finds that—

(1) it is the policy of the United States, in fulfillment of its trust responsibility to the Indian tribes, to promote Indian self-determination and economic self-sufficiency, and to settle, wherever possible, the water rights claims of Indian tribes without lengthy and costly litigation;

(2) meaningful Indian self-determination and economic self-sufficiency depend on the development of viable Indian reservation economies;

(3) quantification of rights to water and development of facilities needed to utilize tribal water supplies effectively is essential to the development of viable Indian reservation economies, particularly in arid western States;

(4) on June 7, 1935, and by actions subsequent thereto, the United States established a reservation for the Yavapai-PreScott Indian Tribe in Arizona adjacent to the city of Prescott;

(5) proceedings to determine the full extent of Yavapai-PreScott Tribe's water rights are currently pending before the Superior Court of the State of Arizona in and for Maricopa County, as part of the general adjudication of the Gila River system and source;

(6) recognizing that final resolution of the general adjudication will take many years and entail great expense to all parties, prolong uncertainty as to the full extent of the Yavapai-PreScott Tribe's entitlement to water and the availability of water supplies to fulfill that entitlement, and impair orderly planning and development by the Tribe and the city of Prescott; the Tribe, the city of Prescott, the Chino Valley Irrigation District, the State of Arizona and the United States have sought to settle all claims to water between and among them;

(7) representatives of the Yavapai-PreScott Tribe, the city of Prescott, the Chino Valley Irrigation District, the State of Arizona and the United States have negotiated a Settlement Agreement to resolve all water rights claims between and among them, and to provide the Tribe with long term, reliable water supplies for the orderly development and maintenance of the Tribe's reservation;

(8) pursuant to the Settlement Agreement, the quantity of water made available to the Yavapai-PreScott Tribe under the existing water service agreement between the Tribe and the city of Prescott will be secured, such water service agreement will be continued in perpetuity, and the Tribe's continued on-reservation use of surface and ground water for municipal and industrial, recreational and agricultural purposes will be provided for;

(9) to advance the goals of Federal Indian policy and to fulfill the trust responsibility of the United States to the Tribe, it is appropriate that the United States participate in the implementation of the Settlement Agreement and contribute funds to firm up the city of Prescott and the Yavapai-PreScott Tribe's long-term water supplies so as to enable the Tribe to utilize fully its water entitlements in developing a diverse, efficient reservation economy; and

(10) providing funds for the acquisition and development of replacement water in exchange for the CAP contract of the Yavapai-PreScott Tribe and the CAP subcontract of the city of

Prescott is a cost-effective means for the United States to ensure reliable, long-term water supplies for the Yavapai-PreScott Tribe and to promote efficient, environmentally sound use of available water supplies in the Verde River basin.

(b) DECLARATION OF PURPOSES.—The Congress declares that the purposes of this Act are:

(1) to approve, ratify and confirm the Settlement Agreement among the Yavapai-PreScott Tribe, the city of Prescott, the Chino Valley Irrigation District, the State of Arizona and the United States;

(2) to authorize and direct the Secretary of the Interior to execute and perform the Settlement Agreement;

(3) to authorize the actions and appropriations necessary for the United States to fulfill its legal and trust obligations to the Yavapai-PreScott Tribe as provided in the Settlement Agreement and this Act;

(4) to authorize appropriation of such sums as may be agreed upon by the Secretary, city of Prescott, and the Yavapai-PreScott Tribe as necessary for the Secretary to acquire the contract of the Yavapai-PreScott Tribe for 500 acre-feet of CAP water and the subcontract of the city of Prescott for 7,167 acre-feet of CAP water for use in settlement of Indian water rights claims in Arizona;

(5) to require that expenditures of such appropriations by the Yavapai-PreScott Tribe and Prescott for the acquisition or development of replacement water supplies in the Verde River basin shall not be inconsistent with the goals of the Prescott Active Management Area, preservation of riparian habitat, flows and biota of the Verde River and its tributaries;

(6) to authorize the Secretary to substitute all or part of CAP Indian and non-Indian municipal and industrial priority water acquired pursuant to this Act for CAP water of agricultural or municipal and industrial priority acquired by the Secretary pursuant to Public Law 101-628, the Fort McDowell Indian Community Water Rights Settlement Act, and assigned to that Community; and

(7) to repeal section 406(k) of Public Law 101-628 which authorizes \$30,000,000 in appropriations for the acquisition of land and water resources in the Verde River basin and for the development thereof as an alternative source of water for the Fort McDowell Indian Community.

#### SEC. 3. DEFINITIONS.

For purposes of this Act:

(1) The term "CAP" means the Central Arizona Project, a reclamation project authorized under title III of the Colorado River Basin Project Act of 1968 (43 U.S.C. 1521 et seq.).

(2) The term "CAWCD" means the Central Arizona Water Conservation District, organized under the laws of the State of Arizona, which is the contractor under a contract with the United States, dated December 1, 1988, for the delivery of water and repayment of costs of the Central Arizona Project.

(3) The term "CVID" means the Chino Valley Irrigation District, an irrigation district organized under the laws of the State of Arizona.

(4) The term "Community" means the Fort McDowell Indian Community, a community of Yavapai Indians organized under section 16 of the Indian Reorganization Act of June 18, 1934 (25 U.S.C. 476), and duly recognized by the Secretary.

(5) The term "Payson" means the town of Payson, an Arizona municipal corporation.

(6) The term "Prescott" means the city of Prescott, an Arizona municipal corporation.

(7) The term "Reservation" means the reservation established by the Act of June 7, 1935 (49 Stat. 332) and the Act of May 18, 1956 (70 Stat. 157) for the Yavapai-PreScott Tribe of Indians.

(8) The term "Secretary" means the Secretary of the United States Department of the Interior.

(9) The term "Settlement Agreement" means that agreement entered into by the city of Prescott, the Chino Valley Irrigation District, the Yavapai-Prescott Indian Tribe, the State of Arizona, and the United States, providing for the settlement of all water claims between and among them.

(10) The term "Tribe" means the Yavapai-Prescott Indian Tribe, a tribe of Yavapai Indians duly recognized by the Secretary.

(11) The term "Water Service Agreement" means that agreement between the Yavapai-Prescott Indian Tribe and the city of Prescott providing for water, sewer, and effluent service from the city of Prescott to the Yavapai-Prescott Tribe.

#### SEC. 4. RATIFICATION OF SETTLEMENT AGREEMENT.

(a) APPROVAL OF SETTLEMENT AGREEMENT.—To the extent the Settlement Agreement does not conflict with the provisions of this Act, such Agreement is approved, ratified and confirmed. The Secretary shall execute and perform such Agreement, and shall execute any amendments to the Agreement and perform any action required by any amendments to the Agreement which may be mutually agreed upon by the parties.

(b) PERPETUITY.—The Settlement Agreement and Water Service Agreement shall include provisions which will ensure that the benefits to the Tribe thereunder shall be secure in perpetuity. Notwithstanding the provisions of section 2103 of the Revised Statutes of the United States (25 U.S.C. 81) relating to the term of the Agreement, the Secretary is authorized and directed to approve the Water Service Agreement with a perpetual term.

#### SEC. 5. ACQUISITION AND ALLOCATION OF CAP WATER.

(a) ACQUISITION OF CONTRACTS.—The Secretary is authorized and directed to acquire the CAP contract of the Tribe, and the CAP subcontract of the city of Prescott in exchange for an appropriate share of funds appropriated to the Verde River Basin Water Fund established pursuant to section 6.

(b) ALLOCATION OF WATER.—The Secretary may allocate to the Fort McDowell Indian Community all or part of the water acquired pursuant to section 5(a) directly or in lieu of water which the Secretary may acquire from the Harquahala Valley Irrigation District (hereinafter "HVID") pursuant to section 406(b) of the Act of November 28, 1990 (Public Law 101-628; 104 Stat. 4483), and allocated to the Community in fulfillment of the United States' obligations. In the event the Secretary allocates water acquired pursuant to section 5(a) in lieu of water acquired from the HVID, the Secretary may reallocate HVID water to one or more other Arizona Indian tribes, bands or communities. The Secretary may reallocate HVID water either with its original CAP agricultural priority or as converted to a CAP Indian priority.

(c) PRIORITY.—The priority of water acquired under this section, if allocated by the Secretary to the Community, or to any other Arizona Indian tribe, band or community, shall be the same as established in the Notice of Final Water Allocations to Indian and non-Indian Water Users and Related Decisions, dated March 24, 1983 (48 FR 2446 et seq.). The Community or any other Arizona tribe, band or community to whom such water may be allocated shall pay the United States or, if directed by the Secretary, the CAWCD, all operation, maintenance and replacement costs associated with such CAP water. Water service capital charges, or any other charges or payments for such CAP water other than operation, maintenance and replacement costs shall be nonreimbursable.

(d) EXCLUSION OF CERTAIN COSTS.—The Secretary shall, for the purpose of determining the allocation and repayment of costs of the CAP as provided in Article 9.3 of Contract No. 14-06-W-245, Amendment No. 1, between the United States and the CAWCD dated December 1, 1988, and any amendment or revision thereof, exclude the costs associated with water acquired under this section from the CAWCD's repayment obligation and such costs shall be nonreimbursable.

#### SEC. 6. REPLACEMENT WATER FUND; CONTRACTS.

(a) FUND.—The Secretary shall establish a fund to be known as the "Verde River Basin Water Fund" (hereinafter called the "Fund") to provide replacement water for the CAP water relinquished by the Tribe and by Prescott. Moneys in the Fund shall be available without fiscal year limitations.

(b) CONTENT OF FUND.—The Fund shall consist of moneys appropriated to it pursuant to the authorization in section 9(a), and any moneys returned to the Fund pursuant to subsection (d).

(c) PAYMENTS FROM FUND.—The Secretary shall, subsequent to the publication of a statement of findings as provided in section 12(a), cause to be paid from the Fund to the Tribe and to Prescott an amount equal to the number of acre-feet of CAP water relinquished by the Tribe and by Prescott times a value to be negotiated by the Secretary with the Tribe and Prescott, respectively, together with interest as provided in section 9(b).

(d) CONTRACTS.—The Secretary shall require, as a condition precedent to the payment of any moneys pursuant to subsection (c), that the Tribe and Prescott agree, by contract with the Secretary, to establish trust accounts into which the payments would be deposited and administered, to use such moneys consistent with the purpose and intent of section 7, to provide for audits of such accounts, and for the repayment to the Fund, with interest, any amount determined by the Secretary not to have been used within the purpose and intent of section 7.

#### SEC. 7. EXPENDITURES OF FUNDS.

(a) BY THE CITY.—All moneys paid to Prescott for relinquishing its CAP subcontract to the Secretary and deposited into a trust account pursuant to section 6(d), shall be used for the purposes of defraying expenses associated with the investigation, acquisition or development of alternative sources of water to replace the CAP water relinquished under this Act. Alternative sources shall be understood to include, but not be limited to, retirement of agricultural land and acquisition of associated water rights, development of ground water resources outside the Prescott Active Management Area established pursuant to the laws of the State of Arizona, and artificial recharge.

(b) BY THE TRIBE.—All funds paid to the Tribe for relinquishing its CAP contract to the Secretary, and deposited into a trust account pursuant to section 6(d), shall be used to defray its water service costs under the Water Service Agreement or to develop and maintain facilities for on-reservation water or effluent use.

(c) NO PER CAPITA PAYMENTS.—No amount of the Tribe's portion of the Fund may be used to make per capita payments to any member of the Tribe, nor may any amount of any payment made pursuant to section 6(c) be distributed as a dividend or per capita payment to any constituent, member, shareholder, director or employee of Prescott.

(d) DISCLAIMER.—Effective with the payment of funds pursuant to section 6(c), the United States shall not be liable for any claim or cause of action arising from the use of such funds by the Tribe or by Prescott.

#### SEC. 8. ENVIRONMENTAL COMPLIANCE.

The Secretary, the Tribe and Prescott shall comply with all applicable Federal environ-

mental and State environmental and water laws in developing alternative water sources pursuant to section 7(a). Development of such alternative water sources shall not be inconsistent with the goals of the Prescott Active Management Area, preservation of the riparian habitat, flows and biota of the Verde River and its tributaries.

#### SEC. 9. APPROPRIATIONS AUTHORIZATION AND REPEAL.

(a) AUTHORIZATION.—There are authorized to be appropriated to the Fund established pursuant to section 6(a):

(1) Such sums as may be required to meet the amount agreed upon by the Secretary, city of Prescott, and the Yavapai-Prescott Tribe as necessary for the acquisition of the CAP contract of the Tribe and the CAP subcontract of the city of Prescott, plus an amount necessary for any accrued interest in accordance with subsection (b).

(2) Such sums as may be necessary, but not to exceed \$200,000, to the Secretary for the Tribe's costs associated with judicial confirmation of the settlement.

(3) Such sums as may be necessary to provide for the study required under section 11(d).

(4) Such sums as may be necessary to establish, maintain and operate the gauging station required under section 11(e).

(b) INTEREST.—Interest shall accrue and be paid by the United States on the amount authorized in subsection (a)(1) beginning October 1, 1993, or the date the agreement referred to in subsection (a) is entered into, whichever last occurs, and shall continue to accrue until appropriated, at rates determined by the Secretary of the Treasury, taking into consideration the average market yield on outstanding Federal obligations of comparable maturity.

(c) STATE CONTRIBUTION.—The State of Arizona shall contribute \$200,000 to the trust account established by the Tribe pursuant to the Settlement Agreement and section 6(d) for uses consistent with section 7(b).

(d) REPEAL.—Subsection 406(k) of the Act of November 28, 1990 (Public Law 101-628; 104 Stat. 4487) is repealed.

#### SEC. 10. SATISFACTION OF CLAIMS.

(a) WAIVER.—The benefits realized by the Tribe and its members under the Settlement Agreement and this Act shall constitute full and complete satisfaction of all members' claims for water rights or injuries to water rights under Federal and State laws (including claims for water rights in ground water, surface water and effluent) from time immemorial to the effective date of this Act, and for any and all future claims of water rights (including claims for water rights in ground water, surface water, and effluent) from and after the effective date of this Act. Nothing in this Act shall be deemed to recognize or establish any right of a member of the Tribe to water on the Tribe's reservation.

(b) WAIVER AND RELEASE.—The Tribe, on behalf of itself and its members, and the Secretary on behalf of the United States, are authorized and required, as a condition to the implementation of this Act, to execute a waiver and release, except as provided in subsection (d) and the Settlement Agreement, of all claims of water rights or injuries to water rights (including water rights in ground water, surface water and effluent), from and after the effective date of this Act, which the Tribe and its members may have, against the United States, the State of Arizona or any agency or political subdivision thereof, or any other person, corporation, or municipal corporation, arising under the laws of the United States or the State of Arizona.

(c) WAIVER BY UNITED STATES.—Except as provided in subsection (d) and the Settlement Agreement, the United States, in its own right or on behalf of the Tribe, shall not assert any claim against the State of Arizona or any politi-

cal subdivision thereof, or against any other person, corporation, or municipal corporation, arising under the laws of the United States or the State of Arizona based upon water rights or injuries to water rights of the Tribe and its members or based upon water rights or injuries to water rights held by the United States on behalf of the Tribe and its members.

(d) **RIGHTS RETAINED.**—In the event the waivers of claims authorized in subsection (b) of this section do not become effective pursuant to section 12(a), the Tribe, and the United States on behalf of the Tribe, shall retain the right to assert past and future water rights claims as to all reservation lands.

(e) **JURISDICTION.**—The United States District Court for the District of Arizona shall have original jurisdiction of all actions arising under this Act, the Settlement Agreement and the Water Service Agreement, including review pursuant to title 9, United States Code, of any arbitration and award under the Water Service Agreement.

(f) **CLAIMS.**—Nothing in this Act shall be deemed to prohibit the Tribe, or the United States on behalf of the Tribe, from asserting or maintaining any claims for the breach or enforcement of the Settlement Agreement or the Water Service Agreement.

(g) **DISCLAIMER.**—Nothing in this Act shall affect the water rights or claims related to any trust allotment located outside the exterior boundaries of the reservation of any member of the Tribe.

(h) **FULL SATISFACTION OF CLAIMS.**—Payments made to Prescott under this Act shall be in full satisfaction for any claim that Prescott might have against the Secretary or the United States related to the allocation, reallocation, relinquishment or delivery of CAP water.

#### SEC. 11. MISCELLANEOUS PROVISIONS.

(a) **JOINING OF PARTIES.**—In the event any party to the Settlement Agreement should file a lawsuit in any United States district court relating only and directly to the interpretation or enforcement of the Settlement Agreement or this Act, naming the United States of America or the Tribe as parties, authorization is hereby granted to join the United States of America or the Tribe, or both, in any such litigation, and any claim by the United States of America or the Tribe to sovereign immunity from such suit is hereby waived. In the event Prescott submits a dispute under the Water Service Agreement to arbitration or seeks review by the United States District Court for the District of Arizona of an arbitration award under the Water Service Agreement, any claim by the Tribe to sovereign immunity from such arbitration or review is hereby waived.

(b) **NO REIMBURSEMENT.**—The United States of America shall make no claims for reimbursement of costs arising out of the implementation of the Settlement Agreement or this Act against any lands within the Yavapai-Prescott Indian Reservation, and no assessment shall be made with regard to such costs against such lands.

(c) **GROUND WATER MANAGEMENT PLAN.**—The Secretary, in consultation with the Tribe, is authorized to establish a ground water management plan for the reservation which, except as is necessary to be consistent with the Water Service Agreement, the Settlement Agreement and this Act, will have the same effect as a ground water management plan developed under the laws of the State of Arizona.

(d) **WATER STUDY.**—The Secretary is authorized and directed to study the sources and costs of water supplies which may be available to fulfill the trust responsibility of the United States to the Tonto Apache Tribe of Arizona with respect to water. Sources to be studied shall include water service from the town of Payson, Arizona. The study shall be commenced within

180 days after the enactment of this Act and shall be completed within 1 year after it is commenced. Copies of this study shall be provided to the Committee on Interior and Insular Affairs of the House of Representatives and the Select Committee on Indian Affairs of the Senate.

(e) **GAUGING STATION.**—The Secretary, acting through the Geological Survey, shall establish, maintain and operate a gauging station at the State Highway 89 bridge across Granite Creek adjacent to the reservation to assist the Tribe and the CVID in allocating the surface flows from Granite Creek as provided in the Settlement Agreement.

#### SEC. 12. EFFECTIVE DATE.

(a) **WAIVERS AND RELEASES.**—The waivers and releases required by section 10(b) of this Act shall become effective as of the date the Secretary causes to be published in the Federal Register a statement of findings that—

(1) the Secretary has executed contracts for the acquisition of the Tribe's CAP contract and the city of Prescott's CAP subcontract as provided in section 6(d);

(2) the stipulation which is attached to the Settlement Agreement as exhibit 9.5, has been approved in substantially the form of such exhibit no later than December 31, 1993, such approval conditioned upon subsequent appropriation of funds authorized in section 9(a)(1) and deposit of such funds into the Tribe's and Prescott's respective trust accounts;

(3) the Settlement Agreement has been modified to the extent it is in conflict with this Act and has been executed by the Secretary; and

(4) the State of Arizona has appropriated and deposited into the Tribe's trust account \$200,000 as required by the Settlement Agreement.

(b) **DEADLINE.**—If the actions described in paragraphs (1), (2), (3), and (4) of subsection (a) have not occurred by December 31, 1995, any contract between Prescott and the United States entered into pursuant to section 6(d) shall not thereafter be effective, any funds appropriated pursuant to section 9(a)(1) shall be returned to the Treasury of the United States, and any funds appropriated by the State of Arizona pursuant to the Settlement Agreement shall be returned by the Tribe to the State of Arizona.

#### SEC. 13. OTHER CLAIMS.

(a) **OTHER TRIBES.**—Nothing in the Settlement Agreement or this Act shall be construed in any way to quantify or otherwise adversely affect the land and water rights, claims or entitlements to water of any Arizona Indian tribe, band or community, other than the Tribe.

(b) **FEDERAL AGENCIES.**—Nothing in this Act shall be construed to affect the water rights or the water rights claims of any Federal agency, other than the Bureau of Indian Affairs on behalf of the Tribe.

### PIPELINE SAFETY ACT

Mr. LAUTENBERG. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 1583.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the bill from the Senate (S. 1583) entitled "An Act to amend the Natural Gas Pipeline Safety Act of 1968 and the Hazardous Liquid Pipeline Safety Act of 1979 to authorize appropriations and to improve pipeline safety, and for other purposes", do pass with the following amendments:

Strike out all after the enacting clause, and insert:

#### SECTION 1. SHORT TITLE; TABLE OF CONTENTS.

(a) **SHORT TITLE.**—This Act may be cited as the "Pipeline Safety Act of 1992".

#### (b) TABLE OF CONTENTS.—

Sec. 1. Short title; table of contents.

**TITLE I—NATURAL GAS PIPELINE SAFETY**

Sec. 101. Environmental protection.

Sec. 102. High-density population areas.

Sec. 103. Increased inspection requirements.

Sec. 104. Excess flow valves.

Sec. 105. Technical pipeline safety standards committee.

Sec. 106. Operator testing.

Sec. 107. Replacement of cast iron pipelines.

Sec. 108. Pipeline facility inspection amendments.

Sec. 109. Gathering lines.

Sec. 110. Revised reporting requirements.

Sec. 111. Authority of Secretary.

Sec. 112. Enforcement.

Sec. 113. Participation in agreement proceedings.

Sec. 114. Authorization of appropriations.

Sec. 115. Customer-owned service lines.

Sec. 116. Additional State standards.

Sec. 117. Underwater abandoned pipeline facilities.

Sec. 118. Natural Gas Pipeline Safety Act of 1968 table of contents.

**TITLE II—HAZARDOUS LIQUID PIPELINE SAFETY**

Sec. 201. Environmental protection.

Sec. 202. Environmentally sensitive and high-density population areas.

Sec. 203. Increased inspection requirements.

Sec. 204. Technical Pipeline Safety Standards Committee.

Sec. 205. Operator testing.

Sec. 206. Low internal stress hazardous liquid pipeline facilities.

Sec. 207. Pipeline facility inspection amendments.

Sec. 208. Gathering lines.

Sec. 209. Revised reporting requirements.

Sec. 210. Authority of Secretary.

Sec. 211. Enforcement.

Sec. 212. Emergency flow restricting devices.

Sec. 213. Participation in agreement proceedings.

Sec. 214. Authorization of appropriations.

Sec. 215. Additional State standards.

Sec. 216. Underwater abandoned pipeline facilities.

**TITLE III—GENERALLY APPLICABLE PIPELINE SAFETY PROVISIONS**

Sec. 301. Grants-in-aid authorization.

Sec. 302. Underground storage tanks.

Sec. 303. Pipeline accident investigations.

Sec. 304. One-call enforcement.

Sec. 305. Additional inspectors.

Sec. 306. Development of underground utility location technologies.

Sec. 307. Study of underwater abandoned pipeline facilities.

**TITLE IV—RESEARCH AND SPECIAL PROGRAMS ADMINISTRATION**

Sec. 401. Research and Special Programs Administration.

**TITLE V—HAZARDOUS MATERIALS TRANSPORTATION ACT TECHNICAL AMENDMENTS**

Sec. 501. Correction to reference to Indian Self-Determination and Education Assistance Act.

Sec. 502. Definitions of HAZMAT employee and employer.

Sec. 503. Technical corrections to section 106.

Sec. 504. Technical correction to section 115.

Sec. 505. Technical corrections to section 116.

Sec. 506. Technical correction to section 118.

Sec. 507. Uniformity of State motor carrier permitting forms and procedures.

Sec. 508. Exemption for certain rail-motor carrier mergers.

**TITLE I—NATURAL GAS PIPELINE SAFETY**

**SEC. 101. ENVIRONMENTAL PROTECTION.**

(a) **FEDERAL SAFETY STANDARDS AND REPORTS.**—Section 3(a) of the Natural Gas Pipeline

Safety Act of 1968 (49 U.S.C. App. 1672(a)) is amended—

(1) in paragraph (1) by inserting "and the protection of the environment" after "need for pipeline safety";

(2) in paragraph (1)(D) by inserting "and the protection of the environment" after "contribute to public safety"; and

(3) in paragraph (3)(A) by striking "or property" and inserting "property, or the environment".

(b) CORRECTIVE ACTION.—Section 12(b) of such Act (49 U.S.C. App. 1679b(b)) is amended—

(1) in paragraph (1) by striking "or property," and inserting "property, or the environment,";

(2) in paragraph (2)(A) by striking "or property," and inserting "property, or the environment,";

(3) in paragraph (2)(B)—

(A) by striking "or property," and inserting "property, or the environment,"; and

(B) by striking "or property," and inserting "property, or the environment,"; and

(4) in paragraph (5) by striking "or property," and inserting "property, or the environment,".

#### SEC. 102. HIGH-DENSITY POPULATION AREAS.

(a) PIPELINE INVENTORY.—Section 3 of the Natural Gas Pipeline Safety Act of 1968 (49 U.S.C. App. 1672) is amended—

(1) in subsection (f)—

(A) by inserting "(and, to the extent the Secretary considers necessary, operators of gathering lines that are not regulated gathering lines as such term is defined pursuant to section 21(b))" after "subject to this Act"; and

(B) by inserting after the first sentence the following new sentence: "Such inventory shall also include an identification of each of the pipeline facilities of such operator which pass through an area described in regulations issued under subsection (i)(1)."; and

(2) by adding at the end the following new subsection:

"(i) HIGH-DENSITY POPULATION AREAS.—

"(1) IDENTIFICATION OF FACILITIES.—Not later than 2 years after the date of the enactment of this subsection, the Secretary shall issue regulations establishing criteria for the identification, by operators of pipeline facilities, of all pipeline facilities that are located in high-density population areas. Such regulations shall provide for such identification to be carried out through the inventory required under subsection (f).

"(2) EXCLUSION OF NATURAL GAS DISTRIBUTION LINES.—Natural gas distribution lines shall not be included among pipeline facilities required to be identified pursuant to paragraph (1)."

(b) MAPS.—Section 3(e)(2) of such Act is amended by inserting "including an identification of areas described in regulations issued under subsection (i)(1)," after "supplementary geographic description,".

(c) INSPECTION AND MAINTENANCE PLANS.—Section 13(a)(4) of such Act (49 U.S.C. App. 1680(a)(4)) is amended by inserting "and the protection of the environment" after "public safety".

#### SEC. 103. INCREASED INSPECTION REQUIREMENTS.

Section 3(g) of the Natural Gas Pipeline Safety Act of 1968 (49 U.S.C. App. 1672(g)) is amended—

(1) by redesignating paragraphs (1) and (2) as subparagraphs (A) and (B), respectively;

(2) by inserting "(1) FEDERAL SAFETY STANDARDS.—" after "INSPECTION DEVICES.—";

(3) by indenting paragraph (1), as designated by paragraph (2) of this subsection, and moving such paragraph (1) (including subparagraphs (A) and (B), as designated by paragraph (1) of this subsection) 2 ems to the right;

(4) by adding at the end of paragraph (1), as designated by paragraph (2) of this subsection, the following new sentence: "The Secretary may

extend such regulation to require existing transmission facilities, whose basic construction would accommodate an instrumented internal inspection device, to be modified to permit the inspection of such facilities with instrumented internal inspection devices."; and

(5) by adding at the end the following new paragraph:

"(2) PERIODIC INSPECTIONS.—Not later than 3 years after the date of the enactment of this paragraph, the Secretary shall issue regulations requiring the periodic inspection of each pipeline identified pursuant to subsection (i) by the operator of the pipeline. In issuing the regulations, the Secretary shall prescribe the circumstances, if any, under which such inspections shall be conducted with an instrumented internal inspection device. In those circumstances under which an instrumented internal inspection device is not required, the Secretary shall require the use of an inspection method that is at least as effective as the use of such a device in providing for the safety of the pipeline."

#### SEC. 104. EXCESS FLOW VALVES.

Section 3 of the Natural Gas Pipeline Safety Act of 1968 (49 U.S.C. App. 1672) is further amended by adding at the end the following new subsection:

"(j) EXCESS FLOW VALVES.—

"(1) REGULATIONS PRESCRIBING INSTALLATION CIRCUMSTANCES.—Not later than 18 months after the date of the enactment of this subsection, the Secretary shall issue regulations prescribing the circumstances, if any, under which operators of natural gas distribution systems must install excess flow valves in such systems. In prescribing such circumstances, the Secretary shall consider—

"(A) the system design pressure and the system operating pressure;

"(B) the types of customers to which the distribution system supplies natural gas, including hospitals, schools, and commercial enterprises;

"(C) the technical feasibility and cost of the installation of such valves;

"(D) the public safety benefits of the installation of such valves;

"(E) the location of customer meters; and

"(F) such other factors as the Secretary determines to be relevant.

"(2) REGULATIONS PRESCRIBING NOTIFICATION TO CUSTOMERS OF AVAILABILITY.—Not later than 2 years after the date of the enactment of this subsection, the Secretary shall issue regulations requiring operators of natural gas distribution systems to notify, in writing, their customers with lines in which excess flow valves are not required by law, but can be installed in accordance with the performance standards developed under paragraph (4)—

"(A) of the availability of excess flow valves for installation in such systems,

"(B) of any safety benefits to be derived from the installation, and

"(C) of any costs associated with the installation.

Such regulations shall provide that, except in circumstances under which the installation is required under paragraph (1), excess flow valves shall be installed at the request of a customer if the customer will pay all costs associated with the installation.

"(3) REPORT.—If the Secretary determines under paragraph (1) that there are no circumstances under which operators must install excess flow valves, the Secretary shall transmit to Congress, not later than 30 days after the date of such determination, a report on the reasons for such determination.

"(4) PERFORMANCE STANDARDS.—Not later than 18 months after the date of the enactment of this paragraph, the Secretary shall develop standards for the performance of excess flow

valves used to protect lines in natural gas distribution systems. Such standards shall be incorporated into any regulations issued by the Secretary under this subsection. All installations of excess flow valves shall be made in accordance with such standards.

"(5) APPLICABILITY OF REGULATIONS AND STANDARDS.—Regulations and standards issued under paragraphs (1), (2), and (4) shall only apply to—

"(A) natural gas distribution systems installed after the effective date of such regulations; and

"(B) other natural gas distribution systems where repairs to such system require the replacement of parts in a manner to accommodate the installation of excess flow valves."

#### SEC. 105. TECHNICAL PIPELINE SAFETY STANDARDS COMMITTEE.

Section 4 of the Natural Gas Pipeline Safety Act of 1968 (49 U.S.C. App. 1673) is amended—

(1) in subsection (a)(3) by striking the period and inserting "including 2 members who have education, background, or experience in environmental protection or public safety. At least 1 of the members selected under this paragraph shall have no financial interests in the pipeline, petroleum, or natural gas industries."; and

(2) in subsection (b) by inserting after the sixth sentence the following new sentence: "The Committee, if requested by the Secretary, shall make recommendations to the Secretary concerning policy development."

#### SEC. 106. OPERATOR TESTING.

Section 3(a)(1) of the Natural Gas Pipeline Safety Act of 1968 (49 U.S.C. App. 1672(a)(1)) is further amended—

(1) in the third sentence by striking "may" and inserting "shall"; and

(2) by inserting after the third sentence the following new sentence: "Such certification may, as the Secretary considers appropriate, be performed by the operator. Such testing and certification shall address the ability to recognize and appropriately react to abnormal operating conditions which may indicate a dangerous situation or a condition exceeding design limits."

#### SEC. 107. REPLACEMENT OF CAST IRON PIPELINES.

Section 13 of the Natural Gas Pipeline Safety Act of 1968 (49 U.S.C. App. 1680) is amended by adding at the end the following new subsection:

"(c) REPLACEMENT OF CAST IRON PIPELINES.—The Secretary shall publish a notice as to the availability of the industry guidelines, developed by the Gas Piping Technology Committee, for the replacement of cast iron pipelines. Within 2 years after the industry guidelines become available, the Secretary shall conduct a survey of operators with cast iron pipe in their systems to determine the extent to which each operator has adopted a plan for the safe management and replacement of cast iron, the elements of the plan, including anticipated rate of replacement, and the progress that has been made. Chapter 35 of title 44, United States Code (relating to coordination of Federal information policy), shall not apply to the conduct of such survey. Nothing in this section shall preclude the Secretary from developing such Federal guidelines or regulations with respect to cast iron pipelines as the Secretary deems appropriate."

#### SEC. 108. PIPELINE FACILITY INSPECTION AMENDMENTS.

Section 3(h) of the Natural Gas Pipeline Safety Act of 1968 (49 U.S.C. App. 1672(h)) is amended—

(1) in paragraph (2)(A) by striking "pipeline facility operators described in paragraph (1)(A)" and inserting "operators of pipeline facilities described in paragraph (3)";

(2) in paragraph (2)(B) by striking "paragraph (1)(A)" and inserting "paragraph (3)";

(3) in paragraph (3) by striking "periodic inspection program" and all that follows through "and its inlets" and inserting the following:

"periodic inspection program of—

"(A) all offshore pipeline facilities; and  
 "(B) any other pipeline facilities which cross under, over, or through navigable waters, as such term is defined by the Secretary, if the location of such pipeline facilities in such navigable waters could pose a hazard to navigation or public safety, as determined by the Secretary";

(4) in paragraph (4) by striking "offshore pipeline facility" and inserting "pipeline facility described in paragraph (3)"; and

(5) by adding at the end the following new paragraph:

"(5) SUPPLEMENTARY INITIAL INSPECTION.—

"(A) REQUIREMENT.—Not later than—  
 "(i) 3 years after the date of the enactment of this paragraph; or

"(ii) 6 months after the establishment of standards under subparagraph (D),

whichever occurs first, the operator of each offshore pipeline facility not described in paragraph (1)(A) shall inspect such pipeline facility and report to the Secretary on any portion of the pipeline facility which is exposed or is a hazard to navigation. This subparagraph shall apply only to pipeline facilities between the high water mark and the point where the subsurface is under 15 feet of water, as measured from mean low water.

"(B) EXTENSION.—The Secretary may extend the time period for compliance under subparagraph (A) with respect to a pipeline facility for an additional period of up to 6 months if the operator of the pipeline facility demonstrates to the satisfaction of the Secretary that a good faith effort, with due diligence and care, has failed to enable compliance with the deadline under subparagraph (A).

"(C) PRIOR INSPECTION RECOGNITION.—Any inspection of a pipeline facility which has occurred after October 3, 1989, may be used for compliance with subparagraph (A) if the inspection conforms to the requirements of that subparagraph.

"(D) ESTABLISHMENT OF STANDARDS.—The Secretary shall, within 2 years after the date of the enactment of this paragraph, establish, for the purposes of this paragraph, standards—

"(i) for what constitutes an exposed pipeline facility; and

"(ii) for what constitutes a hazard to navigation."

#### SEC. 109. GATHERING LINES.

(a) DEFINITION OF TRANSPORTATION OF GAS.—

(1) AMENDMENTS.—Section 2(3) of the Natural Gas Pipeline Safety Act of 1968 (49 U.S.C. App. 1671(3)) is amended—

(A) by inserting ", other than gathering through regulated gathering lines," after "include the gathering of gas"; and

(B) by inserting ", but such term shall include the movement of gas through regulated gathering lines" after "a nonrural area".

(2) EFFECTIVE DATE.—The amendments made by paragraph (1) shall take effect on the effective date of the regulations required under section 21 of the Natural Gas Pipeline Safety Act of 1968, as added by subsection (b) of this section.

(b) REGULATIONS DEFINING GATHERING LINES.—Such Act is further amended by adding at the end the following new section:

#### "SEC. 21. GATHERING LINES.

"(a) GATHERING LINES DEFINED.—The Secretary shall, within 2 years after the date of the enactment of this section, define by regulation the term "gathering line". In defining such term, the Secretary shall consider functional and operational characteristics of the lines to be included in the definition and shall not be bound by any classifications established by the Federal Energy Regulatory Commission under the Natural Gas Act.

"(b) REGULATED GATHERING LINES DEFINED.—The Secretary shall, within 3 years after the

date of the enactment of this section, define by regulation the term "regulated gathering line". In defining such term, the Secretary shall consider such factors as location, length of line from the well site, operating pressure, throughput, and the composition of the transported gas in determining the types of lines which are functionally gathering but which, due to specific physical characteristics, warrant regulation under this Act."

#### SEC. 110. REVISED REPORTING REQUIREMENTS.

(a) PROPERTY DAMAGE THRESHOLD.—Section 5(a)(ii) of the Natural Gas Pipeline Safety Act of 1968 (49 U.S.C. App. 1674(a)(ii)) is amended by striking "\$5,000" and inserting "an amount established by the Secretary".

(b) DATE OF ANNUAL REPORT TO CONGRESS.—Section 16(a) of such Act (49 U.S.C. App. 1683(a)) is amended by striking "April 15" and inserting "August 15".

#### SEC. 111. AUTHORITY OF SECRETARY.

The first sentence of section 5(a) of the Natural Gas Pipeline Safety Act of 1968 (49 U.S.C. App. 1674(a)) is amended by striking "when" and inserting "to the extent that".

#### SEC. 112. ENFORCEMENT.

(a) MAXIMUM CIVIL PENALTY.—Section 11(a)(1) of the Natural Gas Pipeline Safety Act of 1968 (49 U.S.C. App. 1679a(a)(1)) is amended by striking "\$10,000" and inserting "\$25,000".

(b) ENFORCEMENT ORDERS.—Section 14 of such Act (49 U.S.C. App. 1681) is amended by adding at the end the following new subsection:

"(f) ENFORCEMENT ORDERS.—In case of contumacy or refusal to obey a subpoena, or refusal to allow officers, employees, or agents authorized by the Secretary to enter, conduct inspections, or examine records and properties for purposes of determining compliance with this Act, by any person who resides, is found, or transacts business within the jurisdiction of any district court of the United States, such district court shall, upon the request of the Attorney General, acting at the request of the Secretary, have jurisdiction to issue to such person an order requiring such person to comply forthwith. Failure to obey such an order is punishable by that court as a contempt of court."

#### SEC. 113. PARTICIPATION IN AGREEMENT PROCEEDINGS.

(a) IN GENERAL.—Section 12(b) of the Natural Gas Pipeline Safety Act of 1968 (49 U.S.C. App. 1679(b)) is amended by adding at the end the following new paragraph:

"(6) OPPORTUNITY FOR STATE COMMENT.—The Secretary shall provide, to appropriate State officials responsible for pipeline safety in any State in which a pipeline facility is located, notice and an opportunity to comment on any agreement proposed to be entered into by the Secretary to resolve a proceeding initiated under this section with respect to such pipeline facility. Comment submitted under this paragraph shall incorporate comments of affected local officials."

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall take effect on the 180th day following the date of the enactment of this Act.

#### SEC. 114. AUTHORIZATION OF APPROPRIATIONS.

Section 17(a) of the Natural Gas Pipeline Safety Act of 1968 (49 U.S.C. App. 1684(a)) is amended—

(1) by striking "and" at the end of paragraph (8);

(2) by striking the period at the end of paragraph (9) and inserting a semicolon; and

(3) by inserting after paragraph (9) the following new paragraphs:

"(10) \$6,405,000 for the fiscal year ending September 30, 1992;

"(11) \$6,857,000 for the fiscal year ending September 30, 1993;

"(12) \$7,000,000 for the fiscal year ending September 30, 1994; and

"(13) \$7,500,000 for the fiscal year ending September 30, 1995."

#### SEC. 115. CUSTOMER-OWNED SERVICE LINES.

(a) SERVICE LINE MAINTENANCE INFORMATION.—Section 18 of the Natural Gas Pipeline Safety Act of 1968 (49 U.S.C. App. 1685) is amended—

(1) by inserting "(a) PUBLIC EDUCATION PROGRAM.—" before "Each person"; and

(2) by adding at the end the following new subsection:

"(b) SERVICE LINE MAINTENANCE INFORMATION.—Not later than 1 year after the date of the enactment of this subsection, the Secretary shall issue regulations requiring operators of natural gas distribution pipelines which do not maintain customer-owned service lines up to building walls to advise their customers of the requirements for maintenance of those lines, any resources known to the operator that could aid customers in doing such maintenance, any information that the operator has concerning the operation and maintenance of its lines that could aid customers, and the potential hazards of not maintaining service lines."

(b) MAINTENANCE OF CUSTOMER-OWNED SERVICE LINES.—

(1) DOT SAFETY REVIEW.—Within 18 months after the date of the enactment of this Act, the Secretary of Transportation shall conduct a review of Department of Transportation and State rules, policies, procedures, and other measures with respect to the safety of customer-owned natural gas service lines, including the effectiveness of such rules, policies, procedures, and other measures. The Secretary of Transportation shall include in the review an evaluation of the extent to which lack of maintenance of customer-owned natural gas service lines raises safety concerns and shall make recommendations regarding maintenance of such lines, including the need for any legislative changes or regulatory action. In conducting the review and developing the recommendations, the Secretary of Transportation shall consider the following factors: State and local law, including law governing private property and rights, and including State pipeline safety regulation of distribution operators; the views of State and local regulatory authorities; the extent of operator compliance with the program for advising customers regarding maintenance of such lines required under section 18(b) of the Natural Gas Pipeline Safety Act of 1968; available accident information; the recommendations of the National Transportation Safety Board; costs; the civil liability implications of distribution operators taking responsibility for customer-owned service lines; and whether the service line maintenance information program required under such section 18(b) sufficiently addresses safety risks and concerns involving customer-owned service lines.

(2) OPERATION AND MAINTENANCE RESPONSIBILITY.—Within 18 months after the date of the enactment of this Act, the Secretary of Transportation shall conduct, with the participation of the operators of natural gas distribution facilities, a survey of owners of customer-owned service lines to determine the views of such owners regarding whether distribution companies should assume responsibility for the operation and maintenance of customer-owned service lines. In conducting the survey, the Secretary of Transportation shall ensure that such customers are aware of any potential safety benefits, any potential implementation issues (including any property rights or cost issues), the recommendations of the National Transportation Safety Board, and accidents that have occurred, related to customer-owned service lines.

(3) **APPLICABILITY.**—Chapter 35 of title 44, United States Code (relating to coordination of Federal information policy) shall not apply to the conduct of the review or survey under this subsection.

(4) **REPORT.**—Not later than 2 years after the date of the enactment of this Act, the Secretary of Transportation shall transmit to Congress a report on the results of the review and survey conducted under this subsection, together with any recommendations (including legislative recommendations) regarding maintenance of customer-owned natural gas service lines.

(c) **SAFETY MEASURES.**—Section 3 of the Natural Gas Pipeline Safety Act of 1968 (14 U.S.C. App. 1672) is further amended by adding at the end the following new subsection:

“(k) **SAFETY MEASURES.**—The Secretary shall, within 1 year after transmitting the report required by section 115(b) of the Pipeline Safety Act of 1992, taking into consideration such report, and in cooperation and coordination with appropriate State and local authorities, take action, as appropriate, to promote the adoption of measures that would improve the safety of customer-owned service lines.”.

#### SEC. 116. ADDITIONAL STATE STANDARDS.

Section 3(a)(1) of the Natural Gas Pipeline Safety Act of 1968 (49 U.S.C. App. 1672(a)(1)) is further amended by inserting “that has submitted a current certification under section 5(a)” after “Any State agency”.

#### SEC. 117. UNDERWATER ABANDONED PIPELINE FACILITIES.

Section 3(h) of the Natural Gas Pipeline Safety Act of 1968 (49 U.S.C. App. 1672(h)) is further amended by adding at the end the following new paragraph:

“(6) **ABANDONED PIPELINE FACILITIES.**—  
“(A) **TREATMENT.**—For the purposes of this subsection, except with respect to the initial inspection required under paragraph (1), the term ‘pipeline facilities’ includes underwater abandoned pipeline facilities. For the purposes of this subsection, in a case where such a pipeline facility has no current operator, the most recent operator of such pipeline facility shall be deemed to be the operator of such pipeline facility.  
“(B) **REGULATIONS.**—  
“(i) **IDENTIFICATION OF HAZARDS.**—In issuing regulations under paragraph (3), the Secretary shall identify what constitutes a hazard to navigation with respect to underwater abandoned pipeline facilities.  
“(ii) **OTHER REQUIREMENTS.**—In issuing regulations under paragraphs (3) and (4) regarding underwater pipeline facilities abandoned after the date of the enactment of this paragraph, the Secretary shall—  
“(I) include such requirements as will lessen the potential that such pipeline facilities will pose a hazard to navigation; and  
“(II) take into consideration the relationship between water depth and navigational safety and factors relevant to the local marine environment.  
“(C) **REPORTING REQUIREMENTS.**—  
“(i) **FORM.**—The operator of a pipeline facility abandoned after the date of the enactment of this paragraph shall report such abandonment to the Secretary in a manner specifying whether the facility has been properly abandoned according to applicable Federal and State requirements.  
“(ii) **PRE-ENACTMENT ABANDONED PIPELINES.**—Within 3 years after the date of the enactment of this paragraph, the operator of a pipeline facility abandoned before the date of the enactment of this paragraph shall report to the Secretary reasonably available information, including information in the possession of third parties, relating to the abandoned pipeline facility. Such information shall include the location,

size, date, and method of abandonment, whether the pipeline had been properly abandoned pursuant to applicable law, and such other relevant information as the Secretary may require. The Secretary shall, within 18 months after the date of the enactment of this subsection, specify the manner in which such information shall be reported.

“(iii) **MAINTENANCE OF RECORDS BY UNITED STATES.**—The Secretary shall ensure that the information reported under clause (ii) is maintained by the Federal Government in a manner accessible to the appropriate Federal and State agencies.

“(iv) **COLLISIONS.**—The Secretary shall request that State agencies which have information on collisions between vessels and underwater pipeline facilities report such information to the Secretary in a timely manner and make a reasonable effort to specify the location, date, and severity of such collisions. Chapter 35 of title 44, United States Code, relating to coordination of Federal information policies, shall not apply to the collection of information under this clause.

“(D) **ABANDONED DEFINED.**—For purposes of this paragraph, the term ‘abandoned’ means permanently removed from service.”.

#### SEC. 118. NATURAL GAS PIPELINE SAFETY ACT OF 1968 TABLE OF CONTENTS.

The first section of the Natural Gas Pipeline Safety Act of 1968 (49 U.S.C. App. 1671 note) is amended to read as follows:

##### “SECTION 1. SHORT TITLE; TABLE OF CONTENTS.

“(a) **SHORT TITLE.**—This Act may be cited as the ‘Natural Gas Pipeline Safety Act of 1968’.

“(b) **TABLE OF CONTENTS.**—

“Sec. 1. Short title; table of contents.

“Sec. 2. Definitions.

“Sec. 3. Standards established.

“Sec. 4. Technical Pipeline Safety Standards Committee.

“Sec. 5. State certifications and agreements.

“Sec. 6. Standards for LNG facilities.

“Sec. 7. Financial responsibility for certain LNG activities; studies.

“Sec. 8. Judicial review.

“Sec. 9. Cooperation with Federal Energy Regulatory Commission and State commissions.

“Sec. 10. Compliance.

“Sec. 11. Penalties.

“Sec. 12. Specific relief.

“Sec. 13. Inspection and maintenance plans.

“Sec. 14. Powers and duties of the Secretary.

“Sec. 15. Natural gas safety cooperation and coordination.

“Sec. 16. Annual report.

“Sec. 17. Appropriations authorized.

“Sec. 18. Consumer education.

“Sec. 19. Citizen’s civil action.

“Sec. 20. Minimum requirements for one-call notification systems.

“Sec. 21. Gathering lines.”.

#### TITLE II—HAZARDOUS LIQUID PIPELINE SAFETY

##### SEC. 201. ENVIRONMENTAL PROTECTION.

(a) **FEDERAL SAFETY STANDARDS AND REPORTS.**—Section 203 of the Hazardous Liquid Pipeline Safety Act of 1979 (49 U.S.C. App. 2002) is amended—

(1) in subsection (a)(1) by inserting “and the protection of the environment” after “safe transportation of hazardous liquids”;

(2) in subsection (a)(2)(A) by striking “or property” and inserting “, property, or the environment”;

(3) in subsection (b)(4) by inserting “and the protection of the environment” after “contribute to public safety”.

(b) **CORRECTIVE ACTION.**—Section 209(b) of such Act (49 U.S.C. App. 2008(b)) is amended—

(1) in paragraph (1) by striking “or property,” and inserting “, property, or the environment,”;

(2) in paragraph (2)(A) by striking “or property,” and inserting “, property, or the environment.”;

(3) in paragraph (2)(B)—

(A) by striking “or property,” and inserting “, property, or the environment.”; and

(B) by striking “or property,” and inserting “, property, or the environment.”;

(4) in paragraph (3)(C) by inserting “proximity of such areas to environmentally sensitive areas,” after “associated with such areas.”; and

(5) in paragraph (5) by striking “or property,” and inserting “, property, or the environment.”.

##### SEC. 202. ENVIRONMENTALLY SENSITIVE AND HIGH-DENSITY POPULATION AREAS.

(a) **PIPELINE INVENTORY.**—Section 203 of the Hazardous Liquid Pipeline Safety Act of 1979 (49 U.S.C. App. 2002) is amended—

(1) in subsection (j)—

(A) by inserting “(and, to the extent the Secretary considers necessary, operators of gathering lines that are not regulated gathering lines as such term is defined pursuant to section 220(b))” after “subject to this title”; and

(B) by inserting after the first sentence the following new sentence: “Such inventory shall also include an identification of each of the pipeline facilities and gathering lines of such operator which pass through an area described in regulations issued under subsection (m), whether or not such pipeline facility or gathering line is otherwise subject to regulation under this Act.”; and

(2) by adding at the end the following new subsection:

“(m) **ENVIRONMENTALLY SENSITIVE AND HIGH-DENSITY POPULATION AREAS.**—Not later than 2 years after the date of the enactment of this subsection, the Secretary shall issue regulations establishing criteria for the identification, by operators of pipeline facilities and operators of gathering lines, of—

“(1) all pipeline facilities and gathering lines, whether otherwise subject to regulation under this Act or not, that are located in areas that are described, by the Secretary in consultation with the Administrator of the Environmental Protection Agency, as unusually sensitive to environmental damage in the event of a pipeline accident; and

“(2) all pipeline facilities, whether otherwise subject to regulation under this Act or not, that—

“(A) cross a navigable waterway, as such term is defined by the Secretary by regulation; or

“(B) are located in areas that are described in such criteria as high-density population areas.

Such regulations shall provide for such identification to be carried out through the inventory required under subsection (j). In describing areas that are unusually sensitive to environmental damage, the Secretary shall consider including earthquake zones and areas subject to substantial ground movements such as landslides; areas where ground water contamination would be likely in the event of the rupture of a pipeline facility; freshwater lakes, rivers, and waterways; and river deltas and other areas subject to soil erosion or subsidence from flooding or other water action, where pipeline facilities are likely to become exposed or undermined.”.

(b) **MAPS.**—Section 203(i)(2) of such Act (49 U.S.C. App. 2002(i)(2)) is amended by inserting “including an identification of areas described in regulations issued under subsection (m),” after “supplementary geographic description.”.

(c) **INSPECTION AND MAINTENANCE PLANS.**—Section 210 of such Act (49 U.S.C. App. 2009) is amended—

(1) in subsection (b)(4) by inserting “and the protection of the environment” after “public safety”; and

(2) in each of subsections (c)(2)(D) and (d)(2)(D) by inserting "the proximity of such areas to areas that are unusually sensitive to environmental damage," after "pipeline facilities are located,".

#### SEC. 203. INCREASED INSPECTION REQUIREMENTS.

Section 203(k) of the Hazardous Liquids Pipeline Safety Act of 1979 (49 U.S.C. App. 2002(k)) is amended—

(1) by redesignating paragraphs (1) and (2) as subparagraphs (A) and (B), respectively;

(2) by inserting "(1) FEDERAL SAFETY STANDARDS.—" after "INSPECTION DEVICES.—";

(3) by indenting paragraph (1), as designated by paragraph (2) of this subsection, and moving such paragraph (1) (including subparagraphs (A) and (B), as designated by paragraph (1) of this subsection) 2 ems to the right;

(4) by adding at the end of paragraph (1), as designated by paragraph (2) of this subsection, the following new sentence: "The Secretary may extend such regulation to require existing transmission facilities whose basic construction would accommodate an instrumented internal inspection device to be modified to permit the inspection of such facilities with instrumented internal inspection devices."; and

(5) by adding at the end the following new paragraph:

"(2) PERIODIC INSPECTIONS.—Not later than 3 years after the date of the enactment of this paragraph, the Secretary shall issue regulations requiring the periodic inspection of each pipeline identified pursuant to subsection (m) by the operator of the pipeline. In issuing the regulations, the Secretary shall prescribe the circumstances, if any, under which such inspections shall be conducted with an instrumented internal inspection device. In those circumstances under which an instrumented internal inspection device is not required, the Secretary shall require the use of an inspection method that is at least as effective as the use of such a device in providing for the safety of the pipeline."

#### SEC. 204. TECHNICAL PIPELINE SAFETY STANDARDS COMMITTEE.

Section 204 of the Hazardous Liquid Pipeline Safety Act of 1979 (49 U.S.C. App. 2003) is amended—

(1) in subsection (a)(3) by striking the period and inserting ", including 2 members who have education, background, or experience in environmental protection or public safety. At least 1 of the members selected under this paragraph shall have no financial interests in the pipeline, petroleum, or natural gas industries."; and

(2) in subsection (b) by inserting after the sixth sentence the following new sentence: "The Committee, if requested by the Secretary, shall make recommendations to the Secretary concerning policy development."

#### SEC. 205. OPERATOR TESTING.

Section 203(c) of the Hazardous Liquid Pipeline Safety Act of 1979 (49 U.S.C. App. 2002(c)) is amended—

(1) in the second sentence by striking "may" and inserting "shall"; and

(2) by inserting after the second sentence the following new sentence: "Such certification may, as the Secretary considers appropriate, be performed by the operator. Such testing and certification shall address the ability to recognize and appropriately react to abnormal operating conditions which may indicate a dangerous situation or a condition exceeding design limits."

#### SEC. 206. LOW INTERNAL STRESS HAZARDOUS LIQUID PIPELINE FACILITIES.

Section 203(b) of the Hazardous Liquid Pipeline Safety Act of 1979 (49 U.S.C. App. 2002(b)) is further amended by inserting after paragraph (4) the following new sentence:

"In exercising any discretion under this Act, the Secretary shall not provide an exception to reg-

ulation under this Act for any pipeline facility solely on the basis of the fact that such pipeline facility operates at low internal stress."

#### SEC. 207. PIPELINE FACILITY INSPECTION AMENDMENTS.

Section 203(l) of the Hazardous Liquid Pipeline Safety Act of 1979 (49 U.S.C. App. 2002(l)) is amended—

(1) in paragraph (2)(A) by striking "pipeline facility operators described in paragraph (1)(A)" and inserting "operators of pipeline facilities described in paragraph (3)";

(2) in paragraph (2)(B) by striking "paragraph (1)(A)" and inserting "paragraph (3)";

(3) in paragraph (3) by striking "periodic inspection program" and all that follows through "and its inlets" and inserting the following: "periodic inspection program of—

"(A) all offshore pipeline facilities; and

"(B) any other pipeline facilities which cross under, over, or through navigable waters, as such term is defined by the Secretary, if the location of such pipeline facilities in such navigable waters could pose a hazard to navigation or public safety, as determined by the Secretary";

(4) in paragraph (4) by striking "offshore pipeline facility" and inserting "pipeline facility described in paragraph (3)"; and

(5) by adding at the end the following new paragraphs:

"(5) TRANSFER PIPELINE FACILITIES.—The Secretary shall not exempt from regulation under this Act any offshore pipeline facility solely on the basis of the fact that such pipeline facility serves to transfer hazardous liquids in underwater pipelines between vessels and onshore facilities.

"(6) SUPPLEMENTARY INITIAL INSPECTION.—

"(A) REQUIREMENT.—Not later than—

"(i) 3 years after the date of the enactment of this paragraph; or

"(ii) 6 months after the establishment of standards under subparagraph (D),

whichever occurs first, the operator of each offshore pipeline facility not described in paragraph (1)(A) shall inspect such pipeline facility and report to the Secretary on any portion of the pipeline facility which is exposed or is a hazard to navigation. This subparagraph shall apply only to pipeline facilities between the high water mark and the point where the subsurface is under 15 feet of water, as measured from mean low water.

"(B) EXTENSION.—The Secretary may extend the time period for compliance under subparagraph (A) with respect to a pipeline facility for an additional period of up to 6 months if the operator of the pipeline facility demonstrates to the satisfaction of the Secretary that a good faith effort, with due diligence and care, has failed to enable compliance with the deadline under subparagraph (A).

"(C) PRIOR INSPECTION RECOGNITION.—Any inspection of a pipeline facility which has occurred after October 3, 1989, may be used for compliance with subparagraph (A) if the inspection conforms to the requirements of that subparagraph.

"(D) ESTABLISHMENT OF STANDARDS.—The Secretary shall, within 2 years after the date of the enactment of this paragraph, establish, for the purposes of this paragraph, standards—

"(i) for what constitutes an exposed pipeline facility; and

"(ii) for what constitutes a hazard to navigation."

#### SEC. 208. GATHERING LINES.

(a) DEFINITION OF TRANSPORTATION OF HAZARDOUS LIQUIDS.—

(1) AMENDMENTS.—Section 202(3) of the Hazardous Liquid Pipeline Safety Act of 1979 (49 U.S.C. App. 2001(3)) is amended—

(A) by striking "any such";

(B) by inserting ", other than regulated gathering lines," after "through gathering lines"; and

(C) by inserting ", but such term shall include the movement of hazardous liquids through regulated gathering lines" after "any of such facilities".

(2) EFFECTIVE DATE.—The amendments made by paragraph (1) shall take effect on the effective date of the regulations required under section 220 of the Hazardous Liquid Pipeline Safety Act of 1979, as added by subsection (b) of this section.

(b) REGULATIONS DEFINING GATHERING LINES.—Such Act is further amended by adding at the end the following new section:

#### "SEC. 220. GATHERING LINES.

"(a) GATHERING LINES DEFINED.—The Secretary shall, within 2 years after the date of the enactment of this section, define by regulation the term 'gathering lines'.

"(b) REGULATED GATHERING LINES DEFINED.—The Secretary shall, within 3 years after the date of the enactment of this section, define by regulation the term 'regulated gathering lines'. In defining such term, the Secretary shall consider such factors as location, length of line from the well site, operating pressure, throughput, diameter, and the composition of the transported hazardous liquid in determining the types of lines which are functionally gathering but which, due to specific physical characteristics, warrant regulation under this Act. Such definition shall not include crude oil gathering lines that are of a nominal diameter of 6 inches or less, are operated at low pressure, and are located in rural areas that are not unusually sensitive to environmental damage."

(c) CONFORMING AMENDMENT.—The table of contents contained in section 1(b) of the Hazardous Liquid Pipeline Safety Act of 1979 is amended by adding at the end the following new item:

"Sec. 220. Gathering lines."

#### SEC. 209. REVISED REPORTING REQUIREMENTS.

(a) PROPERTY DAMAGE THRESHOLD.—Section 205(a) of the Hazardous Liquid Pipeline Safety Act of 1979 (49 U.S.C. App. 2004(a)) is amended by striking "\$5,000" and inserting "an amount established by the Secretary".

(b) DATE OF ANNUAL REPORT TO CONGRESS.—Section 213(a) of such Act (49 U.S.C. App. 2012(a)) is amended by striking "April 15" and inserting "August 15".

#### SEC. 210. AUTHORITY OF SECRETARY.

The first sentence of section 205(a) of the Hazardous Liquid Pipeline Safety Act of 1979 (49 U.S.C. App. 2004(a)) is amended by striking "when" and inserting "to the extent that".

#### SEC. 211. ENFORCEMENT.

(a) MAXIMUM CIVIL PENALTY.—Section 208(a)(1) of the Hazardous Liquid Pipeline Safety Act of 1979 (49 U.S.C. App. 2007(a)(1)) is amended by striking "\$10,000" and inserting "\$25,000".

(b) ENFORCEMENT ORDERS.—Section 211 of such Act (49 U.S.C. App. 2010) is amended by adding at the end the following new subsection:

"(f) ENFORCEMENT ORDERS.—In case of contumacy or refusal to obey a subpoena, or refusal to allow officers, employees, or agents authorized by the Secretary to enter, conduct inspections, or examine records and properties for purposes of determining compliance with this Act, by any person who resides, is found, or transacts business within the jurisdiction of any district court of the United States, such district court shall, upon the request of the Attorney General, acting at the request of the Secretary, have jurisdiction to issue to such person an order requiring such person to comply forthwith. Failure to obey such an order is punishable by that court as a contempt of court."

**SEC. 212. EMERGENCY FLOW RESTRICTING DEVICES.**

Section 203 of the Hazardous Liquid Pipeline Safety Act of 1979 (49 U.S.C. App. 2002) is further amended by adding at the end the following new subsection:

**"(n) EMERGENCY FLOW RESTRICTING DEVICES.—**

**"(1) SURVEY AND ASSESSMENT.**—The Secretary shall, within 2 years after the date of the enactment of this subsection, survey and assess the effectiveness of emergency flow restricting devices (including remotely controlled valves and check valves) and other procedures, systems, and equipment used to detect and locate pipeline ruptures and minimize product releases from pipeline facilities.

**"(2) REGULATIONS.**—Not later than 2 years after the completion of the survey and assessment required by paragraph (1), the Secretary shall issue regulations prescribing the circumstances under which operators of hazardous liquid pipeline facilities must use emergency flow restricting devices and other procedures, systems, and equipment described in paragraph (1) on such facilities."

**SEC. 213. PARTICIPATION IN AGREEMENT PROCEEDINGS.**

**(a) IN GENERAL.**—Section 209(b) of the Hazardous Liquid Pipeline Safety Act of 1979 (49 U.S.C. App. 2008(b)) is amended by adding at the end the following new paragraph:

**"(6) OPPORTUNITY FOR STATE COMMENT.**—The Secretary shall provide, to appropriate State officials responsible for pipeline safety in any State in which a pipeline facility is located, notice and an opportunity to comment on any agreement proposed to be entered into by the Secretary to resolve a proceeding initiated under this section with respect to such pipeline facility. Comment submitted under this paragraph shall incorporate comments of affected local officials."

**(b) EFFECTIVE DATE.**—The amendment made by subsection (a) shall take effect on the 180th day following the date of the enactment of this Act.

**SEC. 214. AUTHORIZATION OF APPROPRIATIONS.**

Section 214(a) of the Hazardous Liquid Pipeline Safety Act of 1979 (49 U.S.C. App. 2013(a)) is amended—

(1) by striking "and" at the end of paragraph (8);

(2) by striking the period at the end of paragraph (9) and inserting a semicolon; and

(3) by inserting after paragraph (9) the following new paragraphs:

**"(10) \$1,600,500 for the fiscal year ending September 30, 1992;**

**"(11) \$1,728,500 for the fiscal year ending September 30, 1993;**

**"(12) \$1,866,800 for the fiscal year ending September 30, 1994; and**

**"(13) \$2,000,000 for the fiscal year ending September 30, 1995."**

**SEC. 215. ADDITIONAL STATE STANDARDS.**

Section 203(d) of the Hazardous Liquid Pipeline Safety Act of 1979 (49 U.S.C. App. 2002(d)) is further amended by inserting "that has submitted a current certification under section 205(a)" after "Any State agency".

**SEC. 216. UNDERWATER ABANDONED PIPELINE FACILITIES.**

Section 203(l) of the Hazardous Liquid Pipeline Safety Act of 1979 (49 U.S.C. App. 2002(l)) is further amended by adding at the end the following new paragraph:

**"(7) ABANDONED PIPELINE FACILITIES.—**

**"(A) TREATMENT.**—For the purposes of this subsection, except with respect to the initial inspection required under paragraph (1), the term 'pipeline facilities' includes underwater abandoned pipeline facilities. For the purposes of this subsection, in a case where such a pipeline

facility has no current operator, the most recent operator of such pipeline facility shall be deemed to be the operator of such pipeline facility."

**"(B) REGULATIONS.—**

**"(i) IDENTIFICATION OF HAZARDS.**—In issuing regulations under paragraph (3), the Secretary shall identify what constitutes a hazard to navigation with respect to underwater abandoned pipeline facilities.

**"(ii) OTHER REQUIREMENTS.**—In issuing regulations under paragraphs (3) and (4) regarding underwater pipeline facilities abandoned after the date of the enactment of this paragraph, the Secretary shall—

**"(I) include such requirements as will lessen the potential that such pipeline facilities will pose a hazard to navigation; and**

**"(II) take into consideration the relationship between water depth and navigational safety and factors relevant to the local marine environment."**

**"(C) REPORTING REQUIREMENTS.—**

**"(i) FORM.**—The operator of a pipeline facility abandoned after the date of the enactment of this paragraph shall report such abandonment to the Secretary in a manner specifying whether the facility has been properly abandoned according to applicable Federal and State requirements.

**"(ii) PRE-ENACTMENT ABANDONED PIPELINES.**—Within 3 years after the date of the enactment of this paragraph, the operator of a pipeline facility abandoned before the date of the enactment of this paragraph shall report to the Secretary reasonably available information, including information in the possession of third parties, relating to the abandoned pipeline facility. Such information shall include the location, size, date, and method of abandonment, whether the pipeline had been properly abandoned pursuant to applicable law, and such other relevant information as the Secretary may require. Within 18 months after the date of the enactment of this paragraph, the Secretary shall specify the manner in which such information shall be reported.

**"(iii) MAINTENANCE OF RECORDS BY UNITED STATES.**—The Secretary shall ensure that the information reported under clause (ii) is maintained by the Federal Government in a manner accessible to the appropriate Federal and State agencies.

**"(iv) COLLISIONS.**—The Secretary shall request that State agencies which have information on collisions between vessels and underwater pipeline facilities report such information to the Secretary in a timely manner and make a reasonable effort to specify the location, date, and severity of such collisions. Chapter 35 of title 44, United States Code, relating to coordination of Federal information policies, shall not apply to the collection of information under this clause.

**"(D) ABANDONED DEFINED.**—For purposes of this paragraph, the term 'abandoned' means permanently removed from service."

**TITLE III—GENERALLY APPLICABLE PIPELINE SAFETY PROVISIONS****SEC. 301. GRANTS-IN-AID AUTHORIZATION.**

Section 17(c) of the Natural Gas Pipeline Safety Act of 1968 (49 U.S.C. App. 1684(c)) is amended by striking "and \$5,500,000 for the fiscal year ending September 30, 1991" and inserting "\$5,500,000 for the fiscal year ending September 30, 1991, \$7,750,000 for the fiscal year ending September 30, 1992, \$7,750,000 for the fiscal year ending September 30, 1993, \$9,000,000 for the fiscal year ending September 30, 1994, and \$10,000,000 for the fiscal year ending September 30, 1995".

**SEC. 302. UNDERGROUND STORAGE TANKS.**

Section 9001(1)(D) of the Solid Waste Disposal Act (42 U.S.C. 6991(1)(D)) is amended to read as follows:

"(D) pipeline facility (including gathering lines)—

"(i) which is regulated under the Natural Gas Pipeline Safety Act of 1968 (49 U.S.C. App. 1671 et seq.),

"(ii) which is regulated under the Hazardous Liquid Pipeline Safety Act of 1979 (49 U.S.C. App. 2001 et seq.), or

"(iii) which is an intrastate pipeline facility regulated under State laws as provided in the provisions of law referred to in clause (i) or (ii) of this subparagraph,

and which is determined by the Secretary to be connected to a pipeline or to be operated or intended to be capable of operating at pipeline pressure or as an integral part of a pipeline,".

**SEC. 303. PIPELINE ACCIDENT INVESTIGATIONS.**

Section 304(a)(1)(D) of the Independent Safety Board Act of 1974 (49 U.S.C. App. 1903(a)(1)(D)) is amended by inserting "or significant injury to the environment" after "substantial property damage".

**SEC. 304. ONE-CALL ENFORCEMENT.**

**(a) ONE-CALL ENFORCEMENT.**—Section 20 of the Natural Gas Pipeline Safety Act of 1968 (49 U.S.C. App. 1687) is amended by adding at the end the following new subsections:

**"(g) VIOLATIONS.**—Any person who knowingly and willfully—

**"(1) engages in excavation activities—**

**"(A) without first using an available one-call notification system to determine the location of underground facilities in the area being excavated; or**

**"(B) without heeding appropriate location information or markings established by an operator of a natural gas or hazardous liquid pipeline facility; and**

**"(2) subsequently damages—**

**"(A) a natural gas pipeline facility resulting in death, serious bodily harm, or actual damage to property exceeding \$50,000; or**

**"(B) a hazardous liquid pipeline facility resulting in death, serious bodily harm, actual damage to property exceeding \$50,000, or release of more than 50 barrels of product,**

shall, upon conviction, be subject, for each offense, to a fine under title 18, United States Code, imprisonment for a term not to exceed 5 years, or both.

**"(h) MARKING OF FACILITIES.**—Upon notification by an operator of a damage prevention program or by a contractor, excavator, or other person planning to carry out demolition, excavation, tunneling, or construction in the vicinity of a natural gas or hazardous liquid pipeline facility, the operator of the pipeline facility shall accurately mark, in a reasonable and timely manner, the location of the pipeline facilities in the vicinity of such demolition, excavation, tunneling, or construction."

**(b) TECHNICAL AMENDMENTS.**—Subsections (a)(1) and (c)(1) of section 11 of the Natural Gas Pipeline Safety Act of 1968 (49 U.S.C. App. 1678) are each amended by inserting "or section 20(h)" after "section 10(a)".

**(c) NOTIFICATION OF OCCUPATIONAL SAFETY AND HEALTH ADMINISTRATION.**—The Secretary of Transportation shall, in consultation with the Occupational Safety and Health Administration, establish procedures to notify such Administration of any pipeline accident in which an excavator, causing damage to a pipeline, may have violated Occupational Safety and Health Administration regulations.

**SEC. 305. ADDITIONAL INSPECTORS.**

To the extent and in such amounts as are provided in advance in appropriations Acts, the Secretary of Transportation, in fiscal year 1993, shall employ and retain thereafter an additional 12 employees for regional or field pipeline safety offices above the number of such employees authorized for fiscal year 1992. The primary functions of such additional employees shall be—

(1) to provide technical assistance and training to State pipeline inspectors and to assist in the review and management of pipeline safety grants;

(2) to inspect pipeline facilities, including interstate and intrastate hazardous liquid pipeline facilities in those States that do not have a hazardous liquid pipeline safety program that meets the requirements of section 205 (a) or (b) of the Hazardous Liquid Pipeline Safety Act of 1979 (49 U.S.C. App. 2004 (a) or (b));

(3) to assist the States identified in paragraph (2) in developing hazardous liquid pipeline safety programs that meet such requirements; and

(4) to inspect interstate hazardous liquid pipeline facilities constructed before 1971.

**SEC. 306. DEVELOPMENT OF UNDERGROUND UTILITY LOCATION TECHNOLOGIES.**

(a) *IN GENERAL.*—The Secretary of Transportation shall carry out a research and development program on underground utility location technologies.

(b) *AUTHORIZATION OF APPROPRIATIONS.*—There is authorized to be appropriated to carry out this section \$500,000 for fiscal years beginning after September 30, 1992. Such sums shall remain available until expended.

**SEC. 307. STUDY OF UNDERWATER ABANDONED PIPELINE FACILITIES.**

(a) *STUDY.*—The Secretary of Transportation, in consultation with State and other Federal agencies having authority over underwater natural gas and hazardous liquid pipeline facilities and with pipeline owners and operators, the fishing and maritime industries, and other affected groups, shall undertake a study of the abandonment of such pipeline facilities. Such study shall include—

(1) a survey of Federal policies and authorities with respect to abandonment of such pipeline facilities;

(2) an analysis of the extent and nature of the problems currently caused by such pipeline facilities;

(3) an analysis of alternative methods and requirements for abandonment as well as the relevant costs and other factors associated with those alternative methods and requirements;

(4) an analysis of the navigational, safety, and environmental impacts and economic costs associated with the disposition of pipeline facilities permanently removed from service;

(5) an analysis of various factors associated with retroactively imposing requirements on previously abandoned pipeline facilities; and

(6) other matters as may contribute to the development of a recommendation for Federal action.

(b) *REPORT TO CONGRESS.*—Not later than 3 years after the date of the enactment of this Act, the Secretary of Transportation shall submit to Congress a report on the results of the study undertaken under this section, together with a recommendation for Federal action.

(c) *ADDITIONAL AUTHORITY.*—Based on the findings of the study undertaken under this section, the Secretary may require, by regulations issued under the Natural Gas Pipeline Safety Act of 1968 or the Hazardous Liquid Pipeline Safety Act of 1979, operators of facilities abandoned before the date of the enactment of this Act to take any additional appropriate actions to prevent hazards to navigation in connection with such facilities.

(d) *AUTHORIZATION OF APPROPRIATIONS.*—There is authorized to be appropriated to carry out this section \$300,000 for fiscal years beginning after September 30, 1992. Such funds shall remain available until expended.

**TITLE IV—RESEARCH AND SPECIAL PROGRAMS ADMINISTRATION**

**SEC. 401. RESEARCH AND SPECIAL PROGRAMS ADMINISTRATION.**

(a) *ESTABLISHMENT.*—Chapter 1, title 49, United States Code, is amended by adding at the end the following new section:

**“§112. Research and Special Programs Administration**

“(a) *ESTABLISHMENT.*—There is established in the Department of Transportation a Research and Special Programs Administration.

“(b) *ADMINISTRATOR.*—

“(1) *APPOINTMENT.*—The Administration shall be headed by an Administrator who shall be appointed by the President, by and with the advice and consent of the Senate.

“(2) *REPORTING.*—The Administrator shall report directly to the Secretary.

“(c) *DEPUTY ADMINISTRATOR.*—The Administration shall have a Deputy Administrator who shall be appointed by the Secretary of Transportation. The Deputy Administrator shall carry out duties and powers prescribed by the Administrator.

“(d) *RESPONSIBILITIES OF ADMINISTRATOR.*—The Administrator of the Administration shall be responsible for carrying out the following:

“(1) *HAZMAT TRANSPORTATION SAFETY.*—Duties and powers vested in the Secretary of Transportation with respect to hazardous materials transportation safety, except as otherwise delegated by the Secretary.

“(2) *PIPELINE SAFETY.*—Duties and powers vested in the Secretary with respect to pipeline safety.

“(3) *ACTIVITIES OF VOLPE NATIONAL TRANSPORTATION SYSTEMS CENTER.*—Duties and powers vested in the Secretary with respect to activities of the Volpe National Transportation Systems Center.

“(4) *OTHER.*—Such other duties and powers as the Secretary shall prescribe, including such multimodal and intermodal duties as are appropriate.

“(e) *LIMITATION ON STATUTORY CONSTRUCTION.*—Nothing in this section shall affect any delegation of authority, regulation, order, approval, exemption, waiver, contract, or other administrative act of the Secretary with respect to laws administered through the Research and Special Programs Administration of the Department of Transportation on the date of the enactment of this section.”

(b) *CONFORMING AMENDMENT.*—The analysis for chapter 1 of such title is amended by adding at the end the following new item:

“§112. Research and Special Programs Administration.”

(c) *AMENDMENT TO TITLE 5, UNITED STATES CODE.*—Section 5314 of title 5, United States Code, is amended by adding at the end the following new item:

“Administrator, Research and Special Programs Administration.”

**TITLE V—HAZARDOUS MATERIALS TRANSPORTATION ACT TECHNICAL AMENDMENTS**

**SEC. 501. CORRECTION TO REFERENCE TO INDIAN SELF-DETERMINATION AND EDUCATION ASSISTANCE ACT.**

Section 103(8) of the Hazardous Materials Transportation Act (49 U.S.C. App. 1802(8)) is amended by inserting after “Education” the following: “Assistance”.

**SEC. 502. DEFINITIONS OF HAZMAT EMPLOYEE AND EMPLOYER.**

Section 103 of the Hazardous Materials Transportation Act (49 U.S.C. App. 1802) is amended in each of paragraphs (5)(B) and (6)(A)(iii)—

(1) by striking “reconditions” and inserting “manufactures, reconditions.”; and

(2) by inserting “as qualified” after “represented”.

**SEC. 503. TECHNICAL CORRECTIONS TO SECTION 106.**

(a) *IN GENERAL.*—Section 106 of the Hazardous Materials Transportation Act (49 U.S.C. App. 1805) is amended—

(1) in subsection (c)(1)(C) by inserting “(in other than a bulk packaging)” after “5,000 pounds or more”;

(2) in subsection (c)(8) by inserting “, or carries out an activity at more than one location,” after “one activity”;

(3) in subsection (c)(12) by striking “117(h)” and inserting “117A(h)”;

(4) in subsection (d)(5) by striking “this section” and inserting “this subsection”; and

(5) in subsection (d)(5) by inserting “, in quantities established by the Secretary,” after “motor carrier”.

(b) *SUBSECTION DESIGNATION AND HEADING.*—Section 8 of the Hazardous Materials Transportation Uniform Safety Act of 1990 is amended by inserting before “Section 106” the first place it appears the following: “(a) *IN GENERAL.*—”.

**SEC. 504. TECHNICAL CORRECTION TO SECTION 115.**

Section 115(a) of the Hazardous Materials Transportation Act (49 U.S.C. App. 1812(a)) is amended by inserting “, 117A, 118,” after “117”.

**SEC. 505. TECHNICAL CORRECTIONS TO SECTION 116.**

Section 116 of the Hazardous Materials Transportation Act (49 U.S.C. App. 1813) is amended—

(1) in subsection (c) by inserting “and” after “alternative routes.”; and

(2) by adding at the end the following new subsection:

“(e) *DEFINITIONS.*—For purposes of this section, the following definitions apply:

“(1) *HIGH-LEVEL RADIOACTIVE WASTE.*—The term ‘high-level radioactive waste’ has the meaning given such term in section 2(12) of the Nuclear Waste Policy Act of 1982 (42 U.S.C. 10101(12)).

“(2) *SPENT NUCLEAR FUEL.*—The term ‘spent nuclear fuel’ has the meaning given such term in section 2(23) of the Nuclear Waste Policy Act of 1982 (42 U.S.C. 10101(23)).”

**SEC. 506. TECHNICAL CORRECTION TO SECTION 118.**

Section 118(d) of the Hazardous Materials Transportation Act (49 U.S.C. App. 1816(d)) is amended by striking “117(h)” and inserting “117A(h)”.

**SEC. 507. UNIFORMITY OF STATE MOTOR CARRIER PERMITTING FORMS AND PROCEDURES.**

(a) *WORKING GROUP.*—Section 121(a) of the Hazardous Materials Transportation Act (49 U.S.C. App. 1819(a)) is amended—

(1) in paragraph (1) by striking “States that” and inserting “a State to”;

(2) in paragraph (1) by striking “, by motor vehicle” and inserting “by motor vehicle in such State and for a State to permit the transportation of hazardous materials in such State”; and

(3) in paragraph (2) by inserting “and permit” before “forms and”.

(b) *CONSULTATION REQUIREMENT.*—Section 121(b) of such Act is amended by inserting “and permit” before “requirements”.

**SEC. 508. EXEMPTION FOR CERTAIN RAIL-MOTOR CARRIER MERGERS.**

Any transaction in which a rail carrier providing transportation subject to the jurisdiction of the Interstate Commerce Commission under subchapter I of chapter 105 of title 49, United States Code (or a person controlled by or affiliated with such a rail carrier) seeks to acquire control of a motor carrier providing transportation subject to the jurisdiction of the Interstate Commerce Commission under subchapter II of chapter 105 of such title shall be exempt from the fourth sentence of section 11344(c) of such title (1) if, during the period between November 30, 1987, and May 1, 1992, such rail carrier or person acquired a minority stock interest in the motor carrier, and (2) if such rail carrier or person (or a person controlled by or affiliated with such rail carrier or person) was authorized by the Commission to provide transportation as a

motor carrier before the acquisition of such minority stock interest.

Amend the title so as to read: "An Act to increase the safety to humans and the environment from the transportation by pipeline of natural gas and hazardous liquids, and for other purposes."

AMENDMENT NO. 3404

(Purpose: To authorize the Secretary of Transportation to approve construction of the Page Avenue extension in St. Louis, Missouri, and for other purposes.)

Mr. LAUTENBERG. Mr. President, I move that the Senate concur in the amendments of the House with a further amendment, now at the desk, on behalf of Senator DANFORTH.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from New Jersey [Mr. LAUTENBERG], for Mr. DANFORTH, proposes an amendment numbered 3404.

Mr. LAUTENBERG. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place, insert the following new sections:

SEC. . PAGE AVENUE EXTENSION.

(a) Upon submission of a request by the State of Missouri for Federal Highway Administration approval of the Page Avenue Extension project (hereinafter cited in this section as "the project"), the Secretary of the United States Department of Transportation (hereinafter cited in this section as "the Secretary") is authorized to waive the requirements of section 138 of title 23, United States Code and section 303 of title 49, United States Code, for the alignment designated by the State of Missouri as the "Red Alignment", as described in the draft environmental impact statement approved by the Federal Highway Administration on May 30, 1990, if:

(1) the Secretary determines that a final environmental impact statement has been completed by the State of Missouri and approved by the Secretary; and

(2) the State of Missouri enters into an enforceable agreement with the Secretary to implement a project mitigation plan that includes, at a minimum—

(A) expansion of the Creve Coeur Lake Memorial Park (hereinafter cited in this section as "the Park") in the vicinity of St. Louis, Missouri, by at least fifty percent, through acquisition and addition to the Park of not less than 600 acres of land;

(B) development of a walking and bicycle path that is not less than ten feet in width and connects the Park to the KATY Trail State Park in St. Charles County, Missouri;

(C) construction of nature trails in the wooded upland portion of the addition to the Park referred to in subparagraph (A);

(D) development of a Wetland Wildlife area that includes lake areas and marshes, trails, observation points, and other environmentally compatible features in the Park or in one of the additions to the Park referred to in subparagraph (A);

(E) dredging of Creve Coeur Lake to help remedy a chronic siltation problem and to promote fish and wildlife populations;

(F) construction of a new lake in one of the additions to the Park referred to in subpara-

graph (A) to help alleviate the recurrence of a chronic siltation problem in a manner that minimizes, to the maximum extent practicable and in accordance with section 404 of the Federal Water Pollution Control Act (33 U.S.C. 1344), the disturbance of any existing wetlands;

(G) design and construction of features to minimize the visual and physical impact of the project in the vicinity of the Park, consistent, to the extent practicable, with recommendations of the design committee established in accordance with subsection (c), including—

(i) the use of textured concrete, as appropriate;

(ii) the minimization of bridge pier sizing in the elevated portion of the project;

(iii) the use of a bridge design that is more aesthetically pleasing than standard elevated roadway designs;

(iv) construction of bridge siderails with materials that are effective noise attenuators to reduce operational noise levels near the bridge;

(v) design and construction of a drainage system to prevent contamination of Creve Coeur Lane and Creve Coeur Creek with pollution from roadway runoff;

(vi) landscaping of the area between the elevated roadway and Creve Coeur Mill Road to enhance visual parameters without compromising road user safety; and

(vii) the placement of signs to direct road users to appropriate park entrances and facilities;

(H) such other mitigation measures as the Secretary may determine are appropriate to ensure that the environmental benefits of the project mitigation plan exceed the environmental damage associated with the project; and

(I) a monetary contribution by the State of Missouri as may be necessary to implement the entire mitigation plan, in an amount not less than \$6,000,000, including the payment of not less than \$250,000 for facility improvements in the Park, and all funds to develop and implement the mitigation plan shall come from non-federal sources of funding.

(b) None of the costs to develop or implement the project mitigation plan referred to in subsection (a) shall be considered expenditures pursuant to or in satisfaction of the transportation enhancement requirements of section 133 of title 23, United States Code (as amended by section 1007 of The Intermodal Surface Transportation Efficiency Act of 1991, P.L. 102-240, 105 Stat. 1927-1931).

(c) The Governor of the State of Missouri shall establish a design committee to develop recommendations concerning design and construction features to minimize the visual and physical impact of the project in the vicinity of the Park. The Committee shall include representatives of local elected officials, regional park officials, local community groups, design professionals, environmental organizations, and business organizations.

(d) To the maximum extent practicable, the State of Missouri shall implement the project mitigation plan referred to in subsection (a) prior to the commencement of construction of the Page Avenue Extension project. At a minimum, the mitigation measures specified in subsection (a)(2)(A) and (a)(2)(C) shall be completed prior to commencement of construction of the Page Avenue Extension project.

(e) If the project does not comply with all other requirements of federal environmental law that are applicable to the project, including sections 134 and 135 of title 23, Uni-

ted States Code (as amended by sections 1024 and 1025 of the Intermodal Surface Transportation Efficiency Act of 1991, P.L. 102-240, 105 Stat. 1955-1962 and 105 Stat. 1962-1965) and all other requirements of the Intermodal Surface Transportation Efficiency Act of 1991 (P.L. 102-240, 105 Stat. 1914 et seq.), any waiver of the requirements of section 138 of title 23, United States Code and section 303 of title 49, United States Code, granted by the Secretary under the authority of this section shall be stayed pending a determination by the Secretary that the project has been brought into compliance with such other requirements. Any determination by the Secretary under the preceding sentence shall be subject to judicial review.

SEC. . RURAL ACCESS.

The table contained in section 1106(a)(2) of the Intermodal Surface Transportation Efficiency Act of 1991 (105 Stat. 2037-2042) is amended in item number 52, relating to Bedford Springs, Pennsylvania—

(1) by striking "Bedford Springs,";

(2) by inserting "in Bedford Springs, Pennsylvania," after "access road"; and

(3) by inserting "or other projects in the counties of Bedford, Blair, Fulton, and Huntington, as selected by the State of Pennsylvania" after "therewith".

The PRESIDING OFFICER. The question is on agreeing to the motion.

The motion was agreed to.

Mr. LAUTENBERG. Mr. President, I move to reconsider the vote.

Mr. JEFFORDS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HOLLINGS. Mr. President, I rise in support of S. 1583, the Pipeline Safety Act of 1992. The amendment before us today reauthorizes the natural gas and hazardous liquid pipeline safety programs of the Department of Transportation [DOT] through fiscal year 1995.

While the transportation safety record of pipelines is commendable, improvements are always appropriate. In this regard, S. 1583 requires DOT to undertake enhanced pipeline safety measures in certain circumstances where there is a demonstrated safety need. One such area is the inclusion of environmental protection, in addition to the protection of life and property, in calculating pipeline safety priorities. S. 1583 also mandates the establishment of industrywide guidelines on instrumental internal inspection devices, also known as smart pigs, excess flow valves, and customer-owned service lines.

The legislation requires minimum pipeline operator training requirements and provides authority for 12 additional Federal pipeline inspectors. Additionally, the legislation includes criminal sanctions for excavators who cause major damage to pipelines after knowingly and willfully failing to use one-call utility locating systems.

I believe this is a good bill that will continue to enhance the safety of pipeline transportation. I, therefore, ask my colleagues to join me in support of this legislation.

Mr. EXON. Mr. President, as chairman of the Surface Transportation Subcommittee, I am pleased to recommend that the Senate pass S. 1583, the Pipeline Safety Act of 1992. In the first session of this Congress, on October 7, 1991, the Senate passed its original version of this bill. For the last several months, members of the Senate Commerce Committee have worked with the House Committees on Energy and Commerce and Public Works to craft a compromise bill which incorporates the best components of each committee's bill. I would like to thank the members and staffs of these committees for the bipartisan cooperation exhibited and the diligence employed in developing the legislation before you today.

The bill, as amended, expands the Department of Transportation's [DOT's] pipeline safety responsibilities to include environmental protection, in addition to the protection of life and property, in assessing safety priorities. The bill also provides the following: improved identification of pipelines in environmentally sensitive and high-density population areas through the use of inventory and mapping; penalties for pipeline operators and excavators who fail to participate in State and local one-call damage prevention programs; analysis and corrective action regarding abandoned underwater pipelines; and increased use of state-of-the-art technology, including excess flow valves for natural gas pipelines and excess flow restricting devices for hazardous liquid pipelines.

Additionally, the legislation, as amended, provides for: increased inspection requirements, including use of instrumental internal inspection devices, smart pigs; a program to improve the operation and maintenance of customer-owned service lines; better pipeline operator training; a national program to inspect underwater pipelines to ensure they are properly buried and do not impose a hazard to navigation; elimination of the blanket exemption for low internal stress pipelines; safety coverage of some gathering lines; and monitoring of the effectiveness of industry guidelines to encourage cast iron pipe replacement.

S. 1583, as amended, authorizes funding for the Federal pipeline safety programs and State grants which are all offset by users fees as follows: for the Natural Gas Pipeline Safety Act of 1968, \$6,405,000 for fiscal year 1992, \$6,857,000 for fiscal year 1993, \$7,000,000 for fiscal year 1994, and \$7,500,000 for fiscal year 1995; for the Hazardous Liquids Pipeline Safety Act, \$1,600,500 for fiscal year 1992, \$1,728,500 for fiscal year 1993, \$1,866,800 for fiscal year 1994, and \$2,000,000 for fiscal year 1995; and for the State grants-in-aid, \$7,750,000 for fiscal year 1992, \$7,750,000 for the fiscal year 1993, \$9,000,000 for the fiscal year 1994, and \$10,000,000 for the fiscal year 1995.

The amendment also provides statutory authority for the Research and Special Programs Administration within DOT. Additionally, the legislation makes various technical amendments to the Hazardous Materials Transportation Act and provides for a statutory exemption for certain rail-motor carrier mergers subject to the jurisdiction of the Interstate Commerce Commission.

I wholeheartedly encourage my colleagues to support this bipartisan effort to further improve the safety of our Nation's pipeline system.

Mr. DANFORTH. Mr. President, today the Senate takes the final step toward enactment of S. 1583, the Pipeline Safety Act of 1992. This important legislation includes provisions similar to those first proposed in S. 1055, the Pipeline Safety Improvement Act of 1991 that I introduced with Senators BOND and DOLE.

S. 1055 responded to a series of pipeline accidents in Missouri and Kansas between September 1988 and May 1991. Similarities between some of the accidents indicated that certain kinds of pipeline need more attention so potential dangers can be avoided. The bill addressed issues affecting the following kinds of pipelines:

Natural gas distribution lines caused explosions in Oak Grove, MO, 2 people killed; Kansas City, MO, 1 killed, 5 injured; and Overland Park, KS, 4 injured.

Cast iron natural gas pipelines ruptured in Kansas City, MO, 1 injured; and Topeka, KS, 1 killed, 5 injured.

Oil pipelines spilled 850,000 gallons of crude oil in Maries County into the Gasconade River, and 100,000 gallons into the Chariton River near Ethel, MO.

S. 1583, as amended by the House, requires the Department of Transportation to take the following safety actions:

First, protection of the environment, as well as lives and property, from pipeline hazards;

Second, collection of specific information on pipelines located in environmentally sensitive and highly populated areas;

Third, assessment of the effectiveness of current safety procedures, systems and equipment used for detecting, locating, and reducing damage from hazardous liquid pipeline ruptures;

Fourth, performance standards and regulations for the installation of excess flow valves on natural gas distribution lines for improving safety; and

Fifth, distribution and monitoring of new industry guidelines for cast iron pipe replacement.

In addition to reauthorizing funding for all Federal pipeline programs, the Pipeline Safety Act of 1992 also contains provisions affecting the following concerns: pipeline operator testing; the

use of instrumented internal inspection devices; identification of underwater pipelines posing navigation hazards; maintenance of customer-owned natural gas service lines; and criminal penalties for excavators who cause major damage to pipelines after knowingly and willfully failing to heed information provided to them on underground pipeline locations.

Mr. President, these initiatives would improve the safety of people, property, and the environment throughout the United States. I urge my colleagues to support final passage of S. 1583.

#### THE PAGE AVENUE EXTENSION PROJECT

Mr. President, the Page Avenue project would solve what is arguably the worst traffic congestion problem in Missouri. The project will connect St. Louis County, MO's most populous county, with St. Charles County, the fastest growing county in Missouri and one of the fastest growing in the Midwest. The main crossing between the two counties, the 10 lane I-70 bridge over the Missouri River, is the most heavily used bridge in the State, with traffic exceeding capacity during much of the day.

The Red Alignment for the Page Avenue extension project has the overwhelming support of the public and of a bipartisan list of elected officials from the area. Both Missouri Senators, both U.S. Representatives, from the area, the Governor, the county executive of St. Louis County, the presiding commissioner of St. Charles County, and the State senators and representatives all support the project. At a June 1990 public hearing in St. Charles, approximately 1,100 people showed up in support of the plan, with only a few in opposition. This was a record turnout for a highway hearing in the State of Missouri and demonstrates the tremendous public interest in expeditious approval of the Page Avenue extension project.

The Red Alignment runs across the southern end of Creve Coeur Park and would require an elevated causeway across the southern tip of Creve Coeur Lake. Since 1970, a plan similar to the Red Alignment has been part of the St. Louis region's plans to relieve area traffic problems. In 1973, the Missouri Highway and Transportation Commission approved a study which established a Page Avenue extension corridor. Since then, St. Louis County has protected the Red Alignment corridor from development. Developers made construction decisions, and individuals made purchases and rentals, with the strong expectation that the route would be developed where the county and the State planned it to be. Thousands of individuals have made decisions about purchasing or selling property with that expectation in mind.

To compensate for any environmental damage, the State will signifi-

cantly improve the park with a massive enhancement plan for Creve Coeur Lake Memorial Park. According to the St. Louis County executive, the State's enhancement plan would transform the park into the premier urban park in our State. The State will donate 640 acres to St. Louis County, increasing the size of the park by over 50 percent; develop a walking and bicycle path; construct nature trails in a wooded part of the park; develop a wetland wildlife area that includes lake areas and marshes, trails, observation points, and other environmentally compatible features; dredge Creve Coeur Lake to help remedy a chronic siltation problem; construct a new lake in one of the additions to the park; and design and construct features to minimize the visual and physical impact of the project to the park.

Because the Page Avenue extension traverses parkland, it must meet the requirements of section 4(f) of the Department of Transportation Act of 1966. The act states that the Secretary of Transportation may not approve a highway which traverses a public park unless there is no feasible and prudent alternative to the use of such land. While State and county officials believe that no such alternative exists to the Red Alignment, the courts have interpreted this standard so stringently that nearly any alternative is considered feasible and prudent despite costs, dislocations, or park enhancements. For the Secretary of Transportation this means that despite a plan to make the county park significantly larger and tremendously better—a plan that is strongly supported by St. Louis County—he risks certain court challenge, lengthy litigation, and endless delays if he approves the Page Avenue extension project along the Red Alignment. As a result, legislation is required in order to allow the State to proceed in a timely manner.

The amendment authorizes the Secretary of Transportation to waive the 4(f) requirement of the Department of Transportation Act and approve the project if: First, the State has completed its final environmental impact statement; and second, the State agrees to implement the extensive mitigation plan, and pay for it with non-Federal funds. Should the project be found not to comply with any other requirements of Federal environmental law, the 4(f) waiver would be stayed. I have been informed by the chief engineer of the Missouri Highway and Transportation Department [MHTD] that the MHTD is both willing and able to carry out its requirements. It is my understanding and expectation that this amendment will permit the Secretary of Transportation to approve

the project near the end of 1992. I anxiously look forward to the day when residents of the St. Louis area have both a much better transportation network and a much better park.

Mr. PRESSLER. Mr. President, I rise today in support of final passage of S. 1583, the Pipeline Safety Improvement Act of 1992. I believe this act will improve the safety of our Nation's energy pipelines—both for humans and the environment.

Mr. President, there have been hazardous liquid pipeline leaks in my home State of South Dakota. These have been a major concern to myself and my constituents. Significant property losses have been incurred. The environment has been damaged. Fortunately, no major injuries have occurred in South Dakota. However, this is not true elsewhere in this country. This country needs pipelines to move energy resources. Most Americans prefer pipelines over truck transportation of hazardous liquids. But there have been problems. This legislation hopefully will correct most of the problems that have occurred in the last few years.

I am proud this Act contains a portion of legislation I introduced earlier this year, S. 2375, adding 12 inspectors to the Office of Pipeline Safety. They will focus on four areas. First, they will provide technical assistance and training to State pipeline inspectors. Second, they will inspect pipeline facilities, including interstate and intrastate hazardous liquid pipeline facilities in those States that do not have a hazardous liquid pipeline safety program. Third, they will help these States develop a hazardous liquid pipeline safety program. Last, these additional 12 inspectors will inspect interstate hazardous liquid pipeline facilities constructed before 1971.

I believe that the addition of these 12 positions within the Office of Pipeline Safety, focused as I have described, will contribute substantially to the safety improvements in this act. There are other improvements in the bill that will be very helpful as well. Technological improvements in the industry have occurred in the last few years. This legislation establishes requirements to improve pipeline safety by using this technology.

I commend my colleagues and members of the committee staff who have worked so diligently to craft this compromise. I urge all of my colleagues to support its final passage.

Mr. KASTEN. Mr. President, as the Ranking Republican Member of the Senate Commerce Committee's Subcommittee on Surface Transportation, I urge my colleagues to support the Pipeline Safety Act of 1992. This legislation is important to Wisconsin and to

the United States. S. 1583 will improve the safety of transporting natural gas and hazardous liquids through this nation's extensive system of pipelines. Also, this legislation makes the Secretary of Transportation responsible for protecting the environment, in addition to lives and property, from pipeline disasters.

On September 15, the House approved an amendment in the nature of a substitute to S. 1583, the Senate-passed pipeline safety reauthorization bill. This substitute language was agreed to after extensive negotiations between the House and the Senate. Its provisions were worked out with the close cooperation of the administration and the pipeline industry.

The final version of S. 1583 that we are considering today includes the following provisions:

First, funding authority for Federal pipeline safety programs and State grants all offset by users fees;

Second, protection of the environment from pipeline hazards;

Third, identification of pipeline in environmentally sensitive or high-density populated areas;

Fourth, performance standards and regulations regarding the use of excess flow valves (EFV's) on natural gas distribution lines;

Fifth, monitoring of the effectiveness of industry guidelines to encourage cast iron pipe replacement;

Sixth, DOT assessment of procedures, systems, and equipment to detect, locate, and shut down oil pipeline ruptures;

Seventh, criminal sanctions for excavators who cause major damage to pipelines after knowingly and willfully failing to use one-call utility locating systems;

Eighth, DOT data collection and study of underwater abandoned pipelines;

Ninth, testing and certification of individuals who operate or maintain pipelines;

Tenth, DOT authority to require certain pipelines to accommodate instrumented internal inspection devices, smart pits;

Eleventh, regulation of certain gathering lines;

Twelfth, safety of customer-owned natural gas service liens;

thirteenth, State participation in DOT corrective action agreements with pipeline companies;

Fourteenth, inspection of pipelines in navigable waters or offshore;

Fifteenth, civil penalties increased from \$10,000 to \$25,000 per violation per day; and

Sixteenth authority for 12 additional Federal pipeline inspectors.

S. 1583 also includes technical amendments to previous pipeline safety acts and to the Hazardous Materials Transportation Uniform Safety Act of 1990. Finally, it makes statutory the Research and Special Programs Administration.

#### DISTRIBUTION OF MATERIAL BY USIA

Mr. LAUTENBERG. Mr. President, I ask unanimous consent that the Foreign Relations Committee be discharged from further consideration of H.R. 5751, a bill to provide for the distribution within the United States of certain material prepared by the USIA; that the Senate proceed to its immediate consideration; that the bill be read a third time and passed and the motion to reconsider be laid upon the table.

The PRESIDING OFFICER. Without objection, it is so ordered.

So the bill (H.R. 5751) was deemed read a third time and passed.

#### COMMISSION ON INFORMATION TECHNOLOGY AND PAPERWORK REDUCTION ESTABLISHMENT ACT

Mr. LAUTENBERG. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of Calendar Order No. 739, H.R. 5851, a bill to establish the Commission on Information Technology and Paperwork Reduction.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

A bill (H.R. 5851) to establish the Commission on Information Technology and Paperwork Reduction.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

AMENDMENT NO. 3405

(Purpose: To provide for the efficient and cost effective acquisition of nondevelopmental items for Federal agencies, to improve the General Accounting Office bid protest system, and for other purposes)

Mr. LAUTENBERG. Mr. President, there is an amendment at the desk on behalf of Senator LEVIN, and I ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from New Jersey [Mr. LAUTENBERG], for Mr. LEVIN, proposes an amendment numbered 3405.

Mr. LAUTENBERG. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection it is so ordered.

The amendment is as follows:

On page 1, strike out line 3 and insert in lieu thereof the following:

#### TITLE I—COMMISSION ON INFORMATION TECHNOLOGY AND PAPERWORK REDUCTION

##### SEC. 101. FINDINGS AND PURPOSE.

On page 2, line 17, strike out "SEC. 2." and insert in lieu thereof "SEC. 102."

On page 2, line 18, strike out "section 1(b)" and insert in lieu thereof "section 101(b)".

On page 2, line 22, strike out "SEC. 3." and insert in lieu thereof "SEC. 103."

On page 7, line 3, strike out "SEC. 4." and insert in lieu thereof "SEC. 104."

On page 8, line 5, strike out "SEC. 5." and insert in lieu thereof "SEC. 105."

On page 8, line 9, strike out "4" and insert in lieu thereof "IV".

On page 9, line 1, strike out "SEC. 6." and insert in lieu thereof "SEC. 106."

On page 9, line 4, strike out "Act" and insert in lieu thereof "title".

On page 9, line 19, strike out "5" and insert in lieu thereof "V".

On page 10, line 14, strike out "SEC. 7." and insert in lieu thereof "SEC. 107."

On page 10, line 21, strike out "Act" and insert in lieu thereof "title".

On page 11, line 4, strike out "SEC. 8." and insert in lieu thereof "SEC. 108."

On page 11, line 6, strike out "Act" and insert in lieu thereof "title".

On page 11, line 7, strike out "SEC. 9." and insert in lieu thereof "SEC. 109."

On page 11, line 9, strike out "section 3" and insert in lieu thereof "section 103".

On page 11, line 10, strike out "SEC. 10." and insert in lieu thereof "SEC. 110."

On page 11, line 11, strike out "Act" and insert in lieu thereof "title".

On page 11, add after line 11 the following:

#### TITLE II—NONDEVELOPMENTAL ITEMS ACQUISITION

##### SEC. 201. SHORT TITLE.

This title may be cited as the "Nondevelopmental Items Acquisition Act of 1992".

##### SEC. 202. FINDINGS AND PURPOSE.

(a) FINDINGS.—The Congress finds that—

(1) the acquisition of nondevelopmental items can lower Federal agency procurement costs by—

(A) reducing or eliminating the need for research and development;

(B) reducing acquisition lead time by making use of existing production lines and facilities;

(C) opening competition for Federal agency contracts to thousands of manufacturers who sell products in the commercial market; and

(D) increasing Federal agency access to the market-driven innovations and efficiencies available in the commercial market;

(2) the efficient acquisition of nondevelopmental items is impeded when Federal agencies impose complicated specifications and unnecessarily burdensome contract requirements on simple commercial and off-the-shelf products; and

(3) legislation is needed to reduce impediments to the acquisition of nondevelopmental items and encourage increased acquisition of such items.

(b) PURPOSE.—The purposes of this title are to—

(1) establish a preference for the use of performance specifications and the acquisition of nondevelopmental items by Federal agencies;

(2) require training of appropriate personnel in the acquisition of nondevelopmental items;

(3) require Federal agencies to designate personnel responsible for promoting the acquisition of nondevelopmental items and challenging barriers to the acquisition of nondevelopmental items; and

(4) reduce impediments to the acquisition of nondevelopmental items by Federal agencies.

##### SEC. 203. NONDEVELOPMENTAL ITEMS.

(a) AMENDMENT TO THE FEDERAL PROPERTY AND ADMINISTRATIVE SERVICES ACT OF 1949.—Title III of the Federal Property and Administrative Services Act of 1949 (41 U.S.C. 251 et seq.) is amended by inserting after section 303G the following new section:

"ACQUISITION OF NONDEVELOPMENTAL ITEMS

"SEC. 303H. (a) The Federal Acquisition Regulation issued under section 25(c) of the Office of Federal Procurement Policy Act (41 U.S.C. 421(c)) shall require that, to the maximum extent practicable—

"(1) the requirements of Federal agencies with respect to a procurement of supplies are stated in terms of—

"(A) functions to be performed;

"(B) performance required; or

"(C) essential physical characteristics;

"(2) such requirements are defined so that nondevelopmental items may be procured to fulfill such requirements;

"(3) such requirements are fulfilled through the procurement of nondevelopmental items; and

"(4) prior to developing new specifications, executive agencies conduct market research to determine whether nondevelopmental items are available or could be modified to meet agency needs.

"(b) As used in this section, the term 'nondevelopmental item' means—

"(1) any item of supply that is available in the commercial marketplace;

"(2) any previously developed item of supply that is in use by a department or agency of the United States, or a State or local government;

"(3) any item of supply described in paragraph (1) or (2) that requires only minor modification in order to meet the requirements of the procuring agency; or

"(4) any item of supply being produced that does not meet the requirements of paragraph (1), (2), or (3) solely because the item—

"(A) is not yet in use; or

"(B) is not yet available in the commercial marketplace."

(b) TECHNICAL AMENDMENT.—The table of contents for the Federal Property and Administrative Services Act of 1949 is amended by inserting after the item relating to section 303G the following:

"Sec. 303H. Acquisition of nondevelopmental items."

##### SEC. 204. COMMERCIAL ITEMS.

(a) SIMPLIFIED UNIFORM CONTRACT.—(1)(A) The Federal Acquisition Regulation issued under section 25(c) of the Office of Federal Procurement Policy Act (41 U.S.C. 421(c)) shall include a simplified uniform contract for the acquisition of commercial items by Federal agencies and shall require that such simplified uniform contract be used for the acquisition of commercial items to the maximum extent practicable. The uniform contract shall include only—

(i) those contract clauses that are required to implement provisions of law applicable to such an acquisition;

(ii) those contract clauses that are essential for the protection of the Federal Government's interest in such an acquisition; and

(iii) those contract clauses that are determined to be consistent with standard com-

mercial practice and appropriate for inclusion in such contracts.

(B) In addition to the clauses described under subparagraph (A), a contract for the acquisition of commercial items may include only such clauses as are essential for the protection of the Federal Government's interest in the particular contract, as determined in writing by the contracting officer for such contract, or in a class of contracts, as determined by the agency head with the approval of the Administrator for Federal Procurement Policy.

(2)(A) The Federal Acquisition Regulation shall require that, except as provided in subparagraph (B), a prime contractor under a Federal agency contract for the acquisition of commercial items be required to include in subcontracts under such contract only—

(i) those contract clauses that are required to implement provisions of law applicable to such subcontracts; and

(ii) those contract clauses that are essential for the protection of the Federal Government's interest in such subcontracts.

(B) In addition to the clauses described under subparagraph (A), a contractor under a Federal agency contract for the acquisition of commercial items may be required to include in a subcontract under such contract only such clauses as are essential for the protection of the Federal Government's interest in the particular subcontract, as determined in writing by the contracting officer for such contract, or in a class of subcontracts, as determined by the agency head with the approval of the Administrator for Federal Procurement Policy.

(3) Notwithstanding paragraphs (1) and (2) of this subsection, the Department of Defense may use uniform contract and subcontract clauses developed under section 824 of the National Defense Authorization Act for Fiscal Years 1990 and 1991 (10 U.S.C. 2325 note) in lieu of the uniform contract and subcontract clauses developed under this subsection.

(b) **WARRANTIES.**—The Federal Acquisition Regulation shall require that, to the maximum extent practicable, Federal agencies take advantage of warranties offered by commercial contractors and use such warranties for the repair and replacement of commercial items.

(c) **MARKET ACCEPTANCE.**—The Federal Acquisition Regulation shall direct agencies to require, where appropriate and in accordance with criteria prescribed in the regulations, offerors to demonstrate in their offers that products being offered have—

(1)(A) achieved a level of commercial market acceptance necessary to indicate that the products are suitable for the agency's use; or

(B) been satisfactorily supplied under current or recent contracts for the same or similar requirements; and

(2) otherwise meet the product description, specifications, or other criteria prescribed by the public notice and solicitation.

(d) **PAST PERFORMANCE.**—The Federal Acquisition Regulation shall provide guidance to Federal agencies on the use of past performance of products and sources as a factor in award decisions.

(e) **DEFINITIONS.**—As used in this section—

(1) the term "commercial item" means any item of supply that—

(A) requires no modifications or only minor modifications to meet the needs of the procuring agency;

(B) regularly is used for other than Government purposes; and

(C) is sold or traded to the general public in significant quantities in the course of normal business operations; and

(2) the term "Federal agency" has the meaning given such term in section 3(b) of the Federal Property and Administration Services Act of 1949 (41 U.S.C. 472(a)).

**SEC. 205. RULE OF CONSTRUCTION.**

Nothing in this title or amendments made by this title shall be construed to impair or affect the authorities or responsibilities conferred by section 111 of the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 759) with respect to the procurement of automatic data processing equipment and services.

**SEC. 206. IMPLEMENTATION.**

(a) **TRAINING.**—The Administrator for Federal Procurement Policy shall issue guidelines for the training by executive agencies of contracting officers, program managers, and other appropriate acquisition personnel in the acquisition of nondevelopmental items. The guidelines shall provide, at a minimum, for training in the requirements of this section and the implementing regulations. In addition, the program shall provide for training of appropriate personnel in—

(1) the fundamental principles of price analysis and other means of determining price reasonableness which do not require access to commercial cost data; and

(2) market research techniques and the drafting of functional and performance specifications.

(b) **NONDEVELOPMENTAL ITEMS ADVOCATES.**—Section 20(c) of the Office of Federal Procurement Policy Act (41 U.S.C. 418(c)) is amended to read as follows:

"(c) The advocate for competition for each procuring activity shall be responsible for promoting full and open competition, promoting the acquisition of nondevelopmental items, and challenging barriers to such acquisition, including such barriers as unnecessarily detailed specifications, unnecessarily restrictive statements of need, and unnecessarily burdensome contract clauses."

(c) **REGULATIONS REQUIRED.**—Within 270 days after the date of the enactment of this Act, Government-wide regulations to carry out the requirements in this section and rescind any regulations that are inconsistent with such requirements shall be published for public comment. Within one year after the date of enactment of this Act, final regulations shall be promulgated in the Federal Acquisition Regulation, and as necessary in the Federal Information Resources Management Regulation.

(d) **IMPROVED MARKET RESEARCH.**—Within 1 year after the date of the enactment of this Act, the Comptroller General of the United States shall submit to the Committee on Governmental Affairs of the Senate and the Committee on Government Operations of the House of Representatives a report and recommendations on the use of market research in support of procurement of nondevelopmental items. Such report shall include—

(1) a review of existing Government market research efforts to gather data concerning nondevelopmental items;

(2) a review of the feasibility of creating a Government-wide database for storing, retrieving, and analyzing market data, including use of existing Government resources; and

(3) such recommendations for changes in law or regulation as the Comptroller General may consider appropriate.

**TITLE III—GENERAL ACCOUNTING**

**OFFICE BID PROTEST SYSTEM.**

**SEC. 301. GENERAL ACCOUNTING OFFICE BID PROTEST SYSTEM.**

(a) **GAO RECOMMENDATIONS ON PROTESTS.**—Section 3554 of title 31, United States Code, is amended—

(1) in subsection (b) by adding at the end the following new paragraph:

"(3) The head of the procuring activity responsible for the solicitation, proposed award, or award of a contract shall report to the Comptroller General if the Federal agency has not fully implemented recommendations of the Comptroller General under this subsection with respect to that contract within 60 days after receiving the recommendations, by not later than the end of that 60-day period."

(2) in subsection (c)(1) by striking "declare an appropriate interested party to be entitled to" and inserting "recommend that the Federal agency conducting the procurement pay to an appropriate interested party";

(3) by amending subsection (c)(2) to read as follows:

"(2) If the Comptroller General recommends under paragraph (1) that a Federal agency pay an amount of costs to an interested party, the Federal agency shall—

"(A) pay the amount promptly out of amounts appropriated by section 1304 of this title for the payment of judgments, and reimburse that appropriation account out of available funds or by obtaining additional appropriations for that purpose, or

"(B) report to the Comptroller General promptly why the recommendation will not be followed by the agency.";

(4) by adding at the end of subsection (c) the following new paragraph:

"(3) An interested party to which the Comptroller General has recommended that costs be paid under paragraph (1) and the Federal agency recommended to pay those costs shall attempt to reach agreement on the amount of the costs to be paid, but if they are unable to agree, a party may request that the Comptroller General recommend the amount of the costs to be paid."; and

(5) by amending subsection (e) to read as follows:

"(e)(1) The Comptroller General shall report promptly to the Committee on Government Operations and the Committee on Appropriations of the House of Representatives and to the Committee on Governmental Affairs and the Committee on Appropriations of the Senate in any case in which a Federal agency fails to implement fully a recommendation of the Comptroller General under subsection (b) or (c). The report shall include—

"(A) a comprehensive review of the pertinent procurement, including the circumstances of the failure of the Federal agency to implement a recommendation of the Comptroller General, and

"(B) a recommendation regarding whether, in order to correct inequity or to preserve the integrity of the procurement process, the Congress should consider—

"(i) private relief legislation;

"(ii) legislative rescission or cancellation of funds;

"(iii) further investigation by the Congress; or

"(iv) other action.

"(2) Not later than January 31 of each year, the Comptroller General shall transmit to the Congress a summary report describing each instance in which a Federal agency did not fully implement a recommendation of the Comptroller General under subsection (b) or (c) during the preceding year."

(b) **RATIFICATION OF PRIOR AWARDS.**—Amounts to which the Comptroller General declared an interested party to be entitled under section 3554 of title 31, United States Code, as in effect immediately before the en-

actment of this Act, shall, if not paid or otherwise satisfied by the Federal agency concerned before the date of the enactment of this Act, be paid promptly from the appropriation made by section 1304 of title 31, United States Code, for the payment of judgments, and the Federal agency shall reimburse that appropriation account out of available funds or by obtaining additional appropriations for that purpose.

(c) EFFECTIVE DATE.—The amendments made by subsection (a) shall take effect at the end of the 45-day period beginning on the date of the enactment of this Act.

Mr. LEVIN. Mr. President, as a general rule, I am not enthusiastic about establishing new Government commissions. I am not convinced that appointing a commission is the best way to solve a problem, and I have to question whether it makes sense to try to address the issue of paperwork reduction by adding yet another report to the mound of reports we already have on this issue.

I have no doubt that the Federal paperwork continues to impose a huge burden on many sectors of our society. While much, if not most, of the information collected by the Federal Government serves important public purposes, there is plenty of room for simplification and streamlining that could substantially reduce the burdens imposed by such data collection.

For the most part, however, I believe that this problem is best addressed not through the overarching generalities typical of most studies and reports, but through the hard, focused effort of reviewing specific statutes, regulations and policies to determine how they can be streamlined to reduce burdens.

For this reason, I have worked hard on a series of initiatives to reduce paperwork burdens imposed by specific sets of statutes and regulations. For example, I have advanced proposals to streamline the use of information in the acquisition process by creating a single Federal acquisition regulation, a uniform contract for the purchase of commercial products, and a uniform rule on access to acquisition information in the Department of Defense.

Similarly, the Lobbying Disclosure Act, which I introduced earlier this year, would replace a group of duplicative and redundant disclosure requirements with a single, uniform statute which would cover all professional lobbyists and streamline disclosure requirements to eliminate needless paperwork and ensure the disclosure of meaningful information about lobbying activities.

Despite my reluctance to participate in the establishment of new Federal commissions to study old problems, however, I am prepared to support this bill for two reasons.

First, I have reviewed the final report of the original Paperwork Commission, which completed its work more than 15 years ago. On the basis of that report, I believe that the Commis-

sion did solid work, digging beyond the surface of the issue, addressing some of the hard specifics of the problem, and making some sensible recommendations which led to important changes in Federal paperwork policy. If the new Paperwork Commission follows in the footsteps of the 1974 Commission, we may be able to make some real progress on this issue.

Second, nobody has been more dedicated to the cause of streamlining Government or has worked harder to reduce unnecessary paperwork burdens than Frank Horton, who was the Chairman of the original Paperwork Commission and the author of this bill. More than anything else, it is my confidence in Mr. Horton's commitment to the kind of tough-minded review that is really needed that convinces me that this bill should go forward despite my reservations.

Mr. President, I believe that there are two other matters that are appropriately considered in conjunction with this bill, and I offer an amendment to address these issues. My amendment would not alter the substance of H.R. 5851, but would simply add two measures to this bill, both of which have already passed the Senate. It is my understanding that they are acceptable to the House and to the administration.

The first measure is the Nondevelopment Items Acquisition Act, which already passed by the Senate earlier this Congress as S. 260. S. 260 would streamline the acquisition process and reduce the paperwork burden on Government and contractor officials in the purchase of commercial items and other off-the-shelf products—known as nondevelopmental items or NDI's. In particular, the bill would require Federal agencies to:

First, purchase NDI's to the maximum extent possible;

Second, simplify their product requirements, telling companies what they want, rather than how to build it;

Third, eliminate unnecessary and burdensome contract clauses that serve as an impediment to NDI contracts;

Fourth, enhance training for acquisition personnel in the procurement of NDI's; and

Fifth, designate officials responsible for promoting the acquisition of NDI's.

These provisions are already law with respect to defense procurement, and we need this bill to cover the civilian agencies as well. In 1990, the bill was approved twice by the Senate and once by the House—all without a single dissenting vote. Unfortunately, the House version of the bill, which differed slightly from the Senate version, was passed with only a few hours left in the session. Because the Senate did not have time to pass the bill again, the bill died with the Congress. The time has come to complete this unfinished business from the last Congress.

The second measure is an amendment to one section of the Competition in

Contracting Act [CICA] to address constitutional concerns that have been raised about the section in light of the Supreme Court's decision in *Bowsher versus Synar*. While it is not certain how the constitutional issue would be resolved in court, the section at issue clearly deviates from the balance of CICA by granting the Comptroller General the power to issue binding orders, rather than recommendations, with regard to bid protest costs. This amendment would address the discrepancy in the Comptroller General's powers, thereby assuring the stability of the bid protest system and avoiding the uncertainty that would be created by protracted litigation on the constitutional issue.

Mr. President, a provision similar to this one passed the Senate as an amendment to the Defense appropriations bill in 1988, and again as an amendment to the Defense authorization bill last year. In each case, the House stated that it needed more time to study the issue. Now, however, the House appears ready to act—in fact, the language of this amendment was drafted by the committee of jurisdiction on the House side. While this language is not identical to the language previously passed by the Senate, it clearly addresses the issue in a manner that is consistent with the positions taken by both the Senate and the administration.

Mr. President, I urge the adoption of my amendment and the passage of the bill.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 3405) was agreed to.

The PRESIDING OFFICER. Without objection the bill is deemed read the third time and passed.

So the bill (H.R. 5851), as amended, was deemed read three times and passed.

Mr. LAUTENBERG. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. JEFFORDS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

#### NATIVE AMERICAN LANGUAGES ACT OF 1992

Mr. LAUTENBERG. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 2044.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

*Resolved*, That the bill from the Senate (S. 2044) entitled "An Act to assist Native Americans in assuring the survival and continuing vitality of their languages," do pass with the following amendment:

Strike out all after the enacting clause, and insert:

**SECTION 1. SHORT TITLE.**

This Act, other than section 4, may be cited as the "Native American Languages Act of 1992".

**SEC. 2. GRANT PROGRAM.**

The Native American Programs Act of 1974 (42 U.S.C. 2991 et seq.) is amended by inserting before section 804 the following:

**"SEC. 803C. GRANT PROGRAM TO ENSURE THE SURVIVAL AND CONTINUING VITALITY OF NATIVE AMERICAN LANGUAGES.**

**"(a) AUTHORITY TO AWARD GRANTS.**—The Secretary shall award a grant to any agency or organization that is—

- "(1) eligible for financial assistance under section 803(a); and
- "(2) selected under subsection (c);

to be used to assist Native Americans in ensuring the survival and continuing vitality of Native American languages.

**"(b) PURPOSES FOR WHICH GRANTS MAY BE USED.**—The purposes for which each grant awarded under subsection (a) may be used include, but are not limited to—

- "(1) the establishment and support of a community Native American language project to bring older and younger Native Americans together to facilitate and encourage the transfer of Native American language skills from one generation to another;
- "(2) the establishment of a project to train Native Americans to teach a Native American language to others or to enable them to serve as interpreters or translators of such language;
- "(3) the development, printing, and dissemination of materials to be used for the teaching and enhancement of a Native American language;
- "(4) the establishment or support of a project to train Native Americans to produce or participate in a television or radio program to be broadcast in a Native American language;
- "(5) the compilation, transcription, and analysis of oral testimony to record and preserve a Native American language; and
- "(6) the purchase of equipment (including audio and video recording equipment, computers, and software) required to conduct a Native American language project.

**"(c) APPLICATIONS.**—For the purpose of making grants under subsection (a), the Secretary shall select applicants from among agencies and organizations described in such subsection on the basis of applications submitted to the Secretary at such time, in such form, and containing such information as the Secretary shall require, but each application shall include at a minimum—

- "(1) a detailed description of the current status of the Native American language to be addressed by the project for which a grant under subsection (a) is requested, including a description of existing programs and projects, if any, in support of such language;
- "(2) a detailed description of the project for which such grant is requested;
- "(3) a statement of objectives that are consonant with the purpose described in subsection (a);
- "(4) a detailed description of a plan to be carried out by the applicant to evaluate such project, consonant with the purpose for which such grant is made;
- "(5) if appropriate, an identification of opportunities for the replication of such project or the modification of such project for use by other Native Americans; and
- "(6) a plan for the preservation of the products of the Native American language project for the benefit of future generations of Native Americans and other interested persons.

**"(d) PARTICIPATING ORGANIZATIONS.**—If a tribal organization or other eligible applicant decides that the objectives of its proposed Native

American language project would be accomplished more effectively through a partnership arrangement with a school, college, or university, the applicant shall identify such school, college, or university as a participating organization in the application submitted under subsection (c).

**"(e) LIMITATIONS ON FUNDING.**—

**"(1) SHARE.**—Notwithstanding any other provision of this title, a grant made under subsection (a) may not be expended to pay more than 80 percent of the cost of the project that is assisted by such grant. Not less than 20 percent of such cost—

**"(A)** shall be in cash or in kind, fairly evaluated, including plant, equipment, or services; and

**"(B)(i)** may be provided from any private or non-Federal source; and

**"(ii)** may include funds (including interest) distributed to a tribe—

**"(I)** by the Federal Government pursuant to the satisfaction of a claim made under Federal law;

**"(II)** from funds collected and administered by the Federal Government on behalf of such tribe or its constituent members; or

**"(III)** by the Federal Government for general tribal administration or tribal development under a formula or subject to a tribal budgeting priority system, such as, but not limited to, funds involved in the settlement of land or other judgment claims, severance or other royalty payments, or payments under the Indian Self-Determination Act (25 U.S.C. 450f et seq.) or tribal budget priority system.

**"(2) DURATION.**—The Secretary may make grants made under subsection (a) on a 1-year, 2-year, or 3-year basis.

**"(f) ADMINISTRATION.**—(1) The Secretary shall carry out this section through the Administration for Native Americans.

**"(2)(A)** Not later than 180 days after the effective date of this section, the Secretary shall appoint a panel of experts for the purpose of assisting the Secretary to review—

- "(i) applications submitted under subsection (a);
- "(ii) evaluations carried out to comply with subsection (c)(4); and
- "(iii) the preservation of products required by subsection (c)(5).

**"(B)** Such panel shall include, but not be limited to—

**"(i)** a designee of the Institute of American Indian and Alaska Native Culture and Arts Development;

**"(ii)** a designee of the regional centers funded under section 5135 of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 3215);

**"(iii)** representatives of national, tribal, and regional organizations that focus on Native American language, or Native American cultural research, development, or training; and

**"(iv)** other individuals who are recognized for their expertise in the area of Native American language.

Recommendations for appointment to such panel shall be solicited from Indian tribes and tribal organizations.

**"(C)** The duties of such panel include—

**"(i)** making recommendations regarding the development and implementation of regulations, policies, procedures, and rules of general applicability with respect to the administration of this section;

**"(ii)** reviewing applications received under subsection (c);

**"(iii)** providing to the Secretary a list of recommendations for the approval of such applications—

**"(I)** in accordance with regulations issued by the Secretary; and

**"(II)** the relative need for the project; and

**"(iv)** reviewing evaluations submitted to comply with subsection (c)(4).

**"(D)(i)** Subject to clause (ii), a copy of the products of the Native American language project for which a grant is made under subsection (a)—

**"(I)** shall be transmitted to the Institute of American Indian and Alaska Native Culture and Arts Development; and

**"(II)** may be transmitted, in the discretion of the grantee, to national and regional repositories of similar material;

for preservation and use consonant with their respective responsibilities under other Federal law.

**"(ii)** Based on the Federal recognition of the sovereign authority of Indian tribes over all aspects of their cultures and language and except as provided in clause (iii), an Indian tribes may make a determination—

**"(I)** not to transmit copies of such products under clause (i) or not to permit the redistribution of such copies; or

**"(II)** to restrict in any manner the use or redistribution of such copies after transmission under such clause.

**"(iii)** Clause (ii) shall not be construed to authorize Indian tribes—

**"(I)** to limit the access of the Secretary to such products for purposes of administering this section or evaluating such products; or

**"(II)** to sell such products, or copies of such products, for profit to the entities referred to in clause (i)."

**SEC. 3. AUTHORIZATION OF APPROPRIATIONS.**

Section 816 of the Native American Programs Act of 1974 (42 U.S.C. 2992d) is amended—

(1) by inserting "803C" after "803A" each place it appears; and

(2) by adding at the end the following:

**"(f)** There are authorized to be appropriated to carry out section 803C, \$2,000,000 for fiscal year 1993 and such sums as may be necessary for fiscal years 1994, 1995, 1996, and 1997."

**SEC. 4. NATIVE AMERICANS EDUCATIONAL ASSISTANCE ACT.**

**(a) SHORT TITLE.**—This section may be cited as the "Native Americans Educational Assistance Act".

**(b) AGREEMENT TO CARRY OUT DEMONSTRATION PROJECT.**—The Secretary of the Interior is authorized to enter into an agreement with a nonprofit captioning agency engaged in manufacturing and distributing captioning decoders, for the purpose of carrying out a demonstration project to determine the effectiveness of captioned educational materials as an educational tool in schools operated by the Bureau of Indian Affairs.

**(c) REPORT.**—Prior to the expiration of the 12-month period following the date of the agreement entered into pursuant to subsection (b), the Secretary of the Interior shall report to the Congress the results of the demonstration project carried out pursuant to such agreement, together with recommendations of the Secretary.

**(d) AUTHORIZATION.**—There are authorized to be appropriated such sums as may be necessary to carry out this section.

Mr. INOUE. Mr. President, I am pleased that the House of Representatives has acted expeditiously in approving my bill, S. 2044, and returning it to this body for final approval. I accept the amendments of the House in the spirit of advancing the enactment of the Native American Languages Act of 1992.

Since my attention has been called to a word change that may seem ambiguous, however, I need to clarify that the word change that was made by leg-

islative counsel was intended only to conform to words used in the existing Native American Programs Act, and is not a substantive modification of the bill's provisions for native language program grants.

In section 803C, establishing a program of grants to help assure the survival and continuing vitality of native American languages, the word "programs" has been replaced by the words "a project," and a question has been raised as to whether such change is intended to result in only one grant being made for a community language project bringing younger and older native Americans together, only one grant being made for teaching of teachers or interpreters, or only one grant being made for training of native Americans for programs to be broadcast in native languages.

Let me state plainly that such an outcome will not be the result of the word change. The rules of statutory construction are clear that the use of the singular includes the plural, unless the context indicates otherwise. The context in which the word "project" occurs is a bill providing for grants to be awarded for a multiplicity of native American language purposes, including such projects. The rules of construction, in other words, provide assurance that, depending upon the level of appropriations and the quality of applications received by the administration for native Americans, there could be several or many community language efforts involving older and younger native Americans, several or many teacher or interpreter training programs, several or many native language broadcast training programs, or any combination of these activities.

In closing, I thank the chairman of the Education and Labor Committee in the House, WILLIAM D. FORD, and the chairman of the Subcommittee on Human Resources, MATTHEW G. MARTINEZ, and their staffs for their vigorous support of the Native American Languages Act, and I thank my colleagues in this body for acting today so that S. 2044 may soon become law.

Mr. LAUTENBERG. I move that the Senate concur in the House amendment.

The PRESIDING OFFICER. The question is on agreeing to the motion. The motion was agreed to.

#### AUTHORIZING PRINTING OF ADDITIONAL COPIES OF "DEVELOPMENTS IN AGING: 1991"

Mr. LAUTENBERG. Mr. President, I ask unanimous consent that the Committee on Rules and Administration be discharged from further consideration of Senate Resolution 320, authorizing the printing of additional copies of a Senate report entitled "Development in Aging: 1991"; that the Senate pro-

ceed to its immediate consideration; and that the resolution be deemed agreed to and the motion to reconsider be laid upon the table.

The PRESIDING OFFICER. Without objection, it is so ordered.

So the resolution (S. Res. 320) was deemed agreed to as follows:

#### S. RES. 320

*Resolved*, That there shall be printed for the use of the Special Committee on Aging, in addition to the usual number of copies, the maximum number of copies of volumes 1 and 2 of the annual report of the committee to the Senate, entitled "Developments in Aging: 1991", which additional copies may be printed at a cost not to exceed \$1,200.

#### TED WEISS CHILD SUPPORT ENFORCEMENT ACT OF 1992

Mr. LAUTENBERG. Mr. President, I ask unanimous consent that the Banking Committee be discharged from further consideration of H.R. 6022, a bill to amend the Fair Credit Reporting Act to require the inclusion in consumer reports of information provided to consumer reporting agencies regarding the failure of consumers to pay overdue child support; that the Senate proceed to its immediate consideration; and that the bill be deemed read for the third time, passed, and the motion to reconsider be laid upon the table.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

So the bill (H.R. 6022) was deemed read three times and passed.

Mr. BRYAN. Mr. President, I rise in support of H.R. 6022, the Ted Weiss Child Support Enforcement Act. This legislation sponsored by Congressman LARRY LAROCCO of Idaho is a tribute to the late Congressman Ted Weiss of New York. Ted Weiss devoted his career to helping people, and it is only appropriate that legislation designed to help children from broken homes is named after him.

There are 12 million children in this country who get less than they deserve because their parents are not paying court-ordered child support. Because their support checks never come, some of these children have so little that the taxpayers have to help support them through the AFDC Program.

This legislation would amend the Fair Credit Reporting Act by requiring credit bureaus to record delinquencies of \$1,000 or more of the parent who has failed to make the payments. The bill requires credit bureaus to report the information when it is provided by the Child Support Enforcement Agency.

Failure of a deadbeat dad to live up to his legal obligation to support his children after separation or divorce should become a part of his financial credit history. Delinquent child support debt should be considered by credit granters, just as they consider delinquent mortgage payments or the failure to make car loan payments.

Since the Child Support Amendments of 1984, the Nation's credit bureaus have been working with the Federal Office of Child Support Enforcement to encourage State and local child support agencies to report delinquent payments to the credit bureaus. In fact, even without this legislation, 1.5 million delinquent records are currently included in credit reports. Clearly, there is a compelling moral reason to identify those individuals who have a legal obligation to provide financial support for their children and are not doing so. These families are being denied almost \$5 billion annually which they should rightfully receive.

We hope that this legislation will encourage more States to become providers of credit history information and to report this information to credit bureaus. We hope that this legislation makes parents think again before they walk away from their child support obligations. They will not be able to skip out on their children and have a clean credit report.

Mr. President, this legislation is an important first step in assuring that credit reports be used as a tool against deadbeat dads. I want to commend the gentleman from West Virginia, Mr. ROCKEFELLER and Senator LIEBERMAN for proposing legislation, S. 2596, which finishes this important job. S. 2596 would not only require consumer reporting agencies to include the information in their reports if the information is provided to them by a child support agency but it also would require all offices of child support enforcement to report all delinquent parents who are delinquent on child support payments of \$1,000 or more.

I look forward to working with Senators ROCKEFELLER and LIEBERMAN next session to pass this vital requirement because if the State child support agencies are not required to report deadbeat dads to the credit bureaus, thousands of noncustodial parents will continue to live a life of luxury with their charge cards, while the children are denied basic needs. Unfortunately, it falls to the State and Federal governments to pick up the cost of their minimal support.

In conclusion, Mr. President, this legislation says to anyone thinking of applying for credit: put your children first. You are not going to have a clean credit report until you meet your obligation to your children.

#### CORRECTING THE ENROLLMENT OF S. 523

Mr. LAUTENBERG. Mr. President, I ask unanimous consent that the enrollment of S. 523 be corrected to reflect the following changes that I send to the desk on behalf of Senator WARNER and Senator HATCH.

The PRESIDING OFFICER. Without objection, it is so ordered.

**LLOYD B. GAMBLE RELIEF ACT**

Mr. LAUTENBERG. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of Calendar No. 782, H.R. 3590, a bill for the private relief of Lloyd Gamble.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

A bill (H.R. 3590) for the relief of Lloyd B. Gamble.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Judiciary, with an amendment to strike all after the enacting clause and inserting in lieu thereof the following:

**SECTION 1. CONSENT TO SUIT.**

Notwithstanding any statute of limitations, lapse of time, bar of laches, or limitation of liability for injuries arising out of activity incident to service on behalf of the United States (i.e. *Feres Doctrine*), the Court of Claims shall have jurisdiction to hear, determine, and render judgment upon any claim of Lloyd B. Gamble of Fairfax, Virginia against the United States arising from injuries sustained by him as a result of the administration to him, without his knowledge, of lysergic acid diethylamide by United States Army personnel in 1957.

**SEC. 2. RESTRICTIONS UPON SUIT.**

Suit upon any such claim may be instituted at any time within 1 year after the date of enactment of this Act. Nothing in this Act shall be construed as an inference of liability on the part of the United States. Except as otherwise provided in this Act, proceedings for the determination of such claims, and review and payment of any judgment or judgments thereupon shall be had in the same manner as in the case of claims over which such court has jurisdiction under section 1491 of title 28, United States Code. Should the Court render judgment in favor of Lloyd B. Gamble and against the United States, any damages arising from injuries sustained by him shall not exceed \$253,488.

**AMENDMENT NO. 3406**

Mr. JEFFORDS. Mr. President, on behalf of Senator THURMOND, I send an amendment to the substitute amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Vermont [Mr. JEFFORDS], for Mr. THURMOND, proposes an amendment numbered 3406.

Mr. JEFFORDS. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 1, line 10, immediately following the words "United States arising from" add the following: "economic or noneconomic".

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 3406) was agreed to.

Mr. LAUTENBERG. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. JEFFORDS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. If there are no further amendments, the question is on agreeing to the substitute amendment, as amended.

So the substitute amendment, as amended, was agreed to.

The PRESIDING OFFICER. Without objection, the bill is deemed read a third time and passed.

So the bill (H.R. 3590), as amended, was deemed read three times and passed.

Mr. JEFFORDS. Mr. President, I move to reconsider the vote by which the bill as amended, was passed.

Mr. LAUTENBERG. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

**TECHNICAL AMENDMENT OF THE CLAYTON ACT**

Mr. LAUTENBERG. Mr. President, I ask unanimous consent that the Senate proceed to immediate consideration of S. 3330, a technical amendment of the Clayton Act which provides a 3-month extension of the deadline for the FTC to report data on interlocking directorates—this was introduced earlier by Senators METZENBAUM and THURMOND—that the bill be deemed read three times, passed, and the motion to reconsider be laid upon the table.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill (S. 3330) was considered, ordered to a third reading, deemed read the third time, and passed, as follows:

[The bill, S. 3330, will appear in a subsequent issue of the RECORD.]

**UNANIMOUS CONSENT AGREEMENT—H.R. 5427**

Mr. LAUTENBERG. Mr. President, I ask unanimous consent that when the Senate proceeds to the consideration of the conference report to accompany H.R. 5427, the legislative branch appropriations bill, that there be 30 minutes for debate on the conference report equally divided and controlled between Senators REID and GORTON, and that a rollcall vote on adoption of the conference report, if ordered, occur without any intervening action or debate immediately following the vote on the veto override of the cable bill, if the Senate has completed debate on the appropriations conference report by that time.

The PRESIDING OFFICER. Without objection, it is so ordered.

**EDUCATION OF THE DEAF ACT AMENDMENTS OF 1992**

Mr. LAUTENBERG. Mr. President, I ask unanimous consent that the Senate Labor Committee be discharged from further consideration of H.R. 5483, the Education of the Deaf Act Amendments of 1992, and that the Senate proceed to its immediate consideration, that an amendment by Senators HARKIN and DURENBERGER be agreed to, that the bill as amended be read for a third time and passed, that the motion to reconsider be laid upon the table, and any statements thereon appear at the appropriate place in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

**AMENDMENT NO. 3407**

On page 3, line 25, strike out "and".  
On page 4, line 1, strike "(B)" and insert "(C)".

On page 3, after line 25, add the following:

(B) in paragraph (4) by amending the paragraph to read as follows:

"(4) appoint a president and establish policies, guidelines, and procedures related to the appointments, the salaries, and the dismissals of professors, instructors, and other employees of Gallaudet University, including the adoption of a policy of outreach and recruitment to employ and advance in employment qualified individuals with disabilities, particularly individuals who are deaf or individuals who are hard of hearing;" and".

On page 4, line 1, strike "(B)" and insert "(C)".

Beginning on page 4, strike out line 12 and all that follows through line 17 on page 5, and insert the following new section:

**"SEC. 104. ELEMENTARY AND SECONDARY EDUCATIONAL PROGRAMS.**

"(a) GENERAL AUTHORITY.—(1)(A) The Board of Trustees of Gallaudet University is authorized, in accordance with the agreement under section 105, to maintain and operate exemplary elementary and secondary education programs, projects, and activities for the primary purpose of developing, evaluating, and disseminating innovative curricula, instructional techniques and strategies, and materials that can be used in various educational environments serving individuals who are deaf and individuals who are hard of hearing throughout the Nation.

"(B) The elementary and secondary programs described in subparagraph (A) shall serve students with a broad spectrum of needs, including students who are lower achieving academically, who come from non-English speaking homes, who have secondary disabilities, who are members of minority groups, or who are from rural areas.

"(C) The elementary and secondary programs described in subparagraph (A) shall include—

"(i) the Kendall Demonstration Elementary School, to provide day facilities for elementary education for individuals who are deaf, to provide such individuals with the vocational, transitional, independent living, and related services they need to function independently, and to prepare such individuals for high school and other secondary study; and

"(ii) the Model Secondary School for the Deaf, to provide day and residential facilities for secondary education for individuals who are deaf, to provide such individuals with the

vocational, transitional, independent living, and related services they need to function independently, and to prepare such individuals for college, other postsecondary opportunities, or the workplace."

On page 6, line 8, insert before the semicolon "or hard of hearing".

On page 6, line 11, after "deaf" insert "or hard of hearing".

On page 6, line 12, after "deaf" insert "or hard of hearing".

On page 6, line 20, after "deaf" insert "or hard of hearing".

On page 11, line 25, strike "and" after the semicolon.

On page 12, line 10, strike the period and insert "; and".

On page 12, between lines 10 and 11, insert the following:

(3) in subsection (b) by adding, at the end of the following new paragraph:

"(6) establish a policy of outreach and recruitment to employ and advance in employment qualified individuals with disabilities, particularly individuals who are deaf or individuals who are hard of hearing."

On page 15, line 5, insert before the period ", except that nothing in this subparagraph shall be construed to prohibit the University and NTID from educating the Congress, the Secretary, and others regarding programs, projects, and activities conducted at those institutions".

On page 16, line 15, strike the end quotation marks and the second period.

On page 16, between lines 15 and 16, insert the following new subparagraph:

"(C) The Secretary is not authorized to add items to those specified in subparagraph (B)."

On page 19, line 14, strike "Section" and insert "(a) EDUCATION OF THE DEAF ACT.—Section".

On page 19, line 17, strike "AND EVALUATION" and insert ", EVALUATION, AND REPORTING".

On page 20, between lines 17 and 18, insert the following new subsection:

(b) REPORT.—Not later than 180 days after the date of enactment of the Education of the Deaf Act Amendments of 1992, the Secretary of Education shall submit a report to Congress regarding progress made by the Department of Education in implementing the recommendations of the Commission on Education of the Deaf pertaining to the provision of a free and appropriate public education to children who are deaf, and children who are hard of hearing, and with respect to the establishment of standards for programs and personnel to meet the educational, communicative, and psychological needs of children who are deaf, and children who are hard of hearing. In preparing this report, the Secretary of Education shall solicit input from the community of individuals who are deaf, and individuals who are hard of hearing.

On page 21, line 2, before the period insert "or hard of hearing".

On page 21, line 14, after "deaf" insert "or hard of hearing".

Beginning on page 22, strike line 4, and all that follows through line 23 on page 27, and insert the following new subsections:

"(a) ESTABLISHMENT OF PROGRAMS.—

"(1) The Secretary and the Board of Trustees of Gallaudet University are authorized to establish the Gallaudet University Federal Endowment Fund as a permanent endowment fund, in accordance with this section, for the purpose of promoting the financial independence of the University. The Secretary and the Board of Trustees may enter into such agreements as may be necessary to

carry out the purposes of this section with respect to the University.

"(2) The Secretary and the Board of Trustees or other governing body of the institution of higher education with which the Secretary has an agreement under section 112 are authorized to establish the National Technical Institute for the Deaf Federal Endowment Fund as a permanent endowment fund, in accordance with this section, for the purpose of promoting the financial independence of NTID. The Secretary and the Board or other governing body may enter into such agreements as may be necessary to carry out the purposes of this section with respect to NTID.

"(b) FEDERAL PAYMENTS.—

"(1) The Secretary shall, consistent with this section, make payments to the Federal endowment funds established under subsection (a) from amounts appropriated under subsection (h) for the fund involved.

"(2) Subject to the availability of appropriations and the non-Federal matching requirements of paragraph (3), the Secretary shall make payments to each Federal endowment fund in amounts equal to sums contributed to the fund from non-Federal sources (excluding transfers from other endowment funds of the institution involved).

"(3) Effective for fiscal year 1993 and each succeeding fiscal year, for any fiscal year in which the sums contributed to the Federal endowment fund of the institution involved from non-Federal sources exceed \$1,000,000, the non-Federal contribution to the Federal endowment fund shall be \$2 for each Federal dollar provided in excess of \$1,000,000 (excluding transfers from other endowment funds of the institution involved).

"(c) INVESTMENTS.—

"(1) Except as provided in subsection (e), the University and NTID, respectively, shall invest its Federal endowment fund corpus and income in instruments and securities offered through one or more cooperative service organizations of operating educational organizations under section 501(f) of the Internal Revenue Code of 1986, or in low-risk instruments and securities in which a regulated insurance company may invest under the laws of the State in which the institution involved is located.

"(2) In managing the investment of its Federal endowment fund, the University or NTID shall exercise the judgment and care, under the prevailing circumstances, that a person of prudence, discretion, and intelligence would exercise in the management of that person's own business affairs.

"(3) Neither the University nor NTID may invest its Federal endowment fund corpus or income in real estate, or in instruments or securities issued by an organization in which an executive officer, a member of the Board of Trustees of the University or of the host institution, or a member of the Advisory Board of NTID is a controlling shareholder, director, or owner within the meaning of Federal securities laws and other applicable laws. Neither the University nor NTID may assign, hypothecate, encumber, or create a lien on the Federal endowment fund corpus without specific written authorization of the Secretary.

"(d) WITHDRAWALS AND EXPENDITURES.—

"(1) Except as provided in paragraph (3)(B), neither the University nor NTID may withdraw or expend any of the corpus of its Federal endowment fund.

"(2)(A) The University and NTID, respectively, may withdraw or expend the income of its Federal endowment fund only for expenses necessary to the operation of that in-

stitution, including expenses of operations and maintenance, administration, academic and support personnel, construction and renovation, community and student services programs, technical assistance, and research.

"(B) Neither the University nor NTID may withdraw or expend the income of its Federal endowment fund for any commercial purpose.

"(C) Beginning on October 1, 1992, the University and NTID shall maintain records of the income generated from its respective Federal endowment fund for the prior fiscal year.

"(3)(A) Except as provided in subparagraph (B), the University and NTID, respectively, may, on an annual basis, withdraw or expend not more than 50 percent of the income generated from its Federal endowment fund from the prior fiscal year.

"(B) The Secretary may permit the University or NTID to withdraw or expend a portion of its Federal endowment fund corpus or more than 50 percent of the income generated from its Federal endowment fund from the prior fiscal year if the institution involved demonstrates, to the Secretary's satisfaction, that such withdrawal or expenditure is necessary because of—

"(i) a financial emergency, such as a pending insolvency or temporary liquidity problem;

"(ii) a life-threatening situation occasioned by natural disaster or arson; or

"(iii) another unusual occurrence or exigent circumstance.

"(e) INVESTMENT AND EXPENDITURE FLEXIBILITY.—The corpus associated with a Federal payment (and its non-Federal match) made to the Federal endowment fund of the University or NTID shall not be subject to the investment limitations of subsection (c)(1) after 10 fiscal years following the fiscal year in which the funds are matched, and the income generated from such corpus after the tenth fiscal year described in this subsection shall not be subject to such investment limitations and to the withdrawal and expenditure limitations of subsection (d)(3).

"(f) RECOVERY OF PAYMENTS.—After notice and an opportunity for a hearing, the Secretary is authorized to recover any Federal payments under this section if the University or NTID—

"(1) makes a withdrawal or expenditure of the corpus or income of its Federal endowment fund that is not consistent with this section;

"(2) fails to comply with the investment standards and limitations under this section; or

"(3) fails to account properly to the Secretary concerning the investment of or expenditures from the Federal endowment fund corpus or income.

"(g) DEFINITIONS.—As used in this section:

"(1) The term 'corpus', with respect to a Federal endowment fund under this section, means an amount equal to the Federal payments to such fund, amounts contributed to the fund from non-Federal sources, and appreciation from capital gains and reinvestment of income.

"(2) The term 'Federal endowment fund' means a fund, or a tax-exempt foundation, established and maintained pursuant to this section by the University or NTID, as the case may be, for the purpose of generating income for the support of the institution involved.

"(3) The term 'income', with respect to a Federal endowment fund under this section, means an amount equal to the dividends and interest accruing from investments of the corpus of such fund.

"(4) The term 'institution involved' means the University or NTID, as the case may be.

"(h) AUTHORIZATION OF APPROPRIATIONS.—

"(1) In the case of the University, there are authorized to be appropriated for the purposes of this section such sums as may be necessary for each of the fiscal years 1993 through 1997.

"(2) In the case of NTID, there are authorized to be appropriated for the purposes of this section such sums as may be necessary for each of the fiscal years 1993 through 1997.

"(3) Amounts appropriated under paragraph (1) or (2) shall remain available until expended.

"(i) EFFECTIVE DATE.—The provisions of this section shall take effect as if included in the provisions of the Education of the Deaf Act of 1986."

On page 29, line 17, strike "71" and all that follows through "1997" on line 20, and insert "75 percent beginning the academic year 1993-1994, and 90 percent beginning the academic year 1994-1995".

On page 29, between lines 20 and 21, add the following new subsections:

"(c) REDUCTION OF SURCHARGE.—Beginning the academic year 1993-1994 and thereafter, the University or NTID may reduce the surcharge under subsection (b) to 50 percent if—

"(A) a student described under subsection (b) is from a developing country;

"(B) such student is unable to pay the tuition surcharge under subsection (b); and

"(C) such student has made a good faith effort to secure aid through such student's government or other sources.

"(d) DEFINITION.—For purposes of subsection (c), the term 'developing country' means a country that has a 1990 per capita income not in excess of \$4000 in 1990 United States dollars."

Beginning on page 32, strike out line 9 and all that follows through line 12 on page 36 and insert the following:

#### SEC. 201. POSTSECONDARY EDUCATION.

(a) REGIONAL CENTERS.—Section 625(a) of the Individuals with Disabilities Education Act (20 U.S.C. 1424a(a)) is amended by inserting after the first sentence in paragraph (6) the following new sentences: "The Secretary shall continue to provide assistance through September 30, 1994, to the current grantees operating the four regional centers for the deaf under subsection (a) of this section. The Secretary shall continue to provide such assistance through September 30, 1995, unless the authorization of appropriations for parts C-G of the Act is extended by September 30, 1994."

(b) STUDY.—There shall be conducted a General Accounting Office study of the four regional centers for the deaf under section 625(a)(2) of the Individuals with Disabilities Education Act (20 U.S.C. 1424(a)(2)). The scope of such study shall be determined by the Chairpersons and Ranking Minority members of the Subcommittee on Disability Policy of the Committee on Labor and Human Resources in the Senate, and of the Subcommittee on Select Education of the Committee on Education and Labor in the House of Representatives.

Beginning on page 39, strike out line 8 and all that follows through line 10 on page 40.

On page 40, line 11, strike "Subtitle C" and insert "Subtitle B".

On page 40, strike lines 13 through 16 and insert the following:

The amendments described in this title shall take effect on October 1, 1992.

Mr. HARKIN. Mr. President, I rise today on behalf of Senator DURENBURGER and myself in support of

H.R. 5483, the Education of the Deaf Act Amendments of 1992, with a series of amendments.

The Education of the Deaf Act of 1986 (Public Law 99-371) established the Commission on the Education of the Deaf [COED], it authorized funding for Gallaudet University and its two model demonstration schools, and it authorized funding for the National Technical Institute for the Deaf [NTID] at Rochester Institute of Technology. The Commission was designed to examine the status of education programs serving individuals who are deaf throughout the country, including regional postsecondary programs authorized in the Individuals with Disabilities Education Act. The purpose of the university and NTID is to provide postsecondary education and training to deaf individuals to prepare them for further education or for successful employment. The two model schools at Gallaudet, the Kendall Demonstration Elementary School and the Model Secondary School for the Deaf, are to function as national demonstration programs for developing and disseminating effective teaching techniques and materials to be used in other educational settings where students who are deaf may be found.

In 1988, the Commission reported to Congress that the "present status of education for persons who are deaf in the United States is unsatisfactory," and they cited 52 recommendations to improve education for students who are deaf and hard of hearing. The subcommittee spent a great deal of time over the past year reviewing those recommendations and discussing related issues with affected parties and members of the deaf community. We have enjoyed the support and guidance of the staff of the Department of Education, we have solicited input from representatives of the university and NTID and we have had numerous constructive conversations with those who represent the interests of the community of people who are deaf and hard of hearing. We have also had extensive communication with Dr. Frank Bowe, chairman of the COED. Finally, we have received excellent guidance from the professional staff of the Congressional Research Service, especially pertaining to technical issues including the Federal endowments and cost principles.

We were extremely pleased to find that the House bill, H.R. 5483, incorporates many of our intended modifications. We compliment Congressman OWENS, Congressman BALLENGER, and their very committed staff. Indeed, because of the House bill addresses so many of the most important issues of the reauthorization, we have found it necessary only to propose a small number of amendments. I would like to describe briefly the major provisions of the bill. I will then specify particular

changes to the legislation, section by section, and I will highlight those which represent amendments of the Senate to the House version.

Very gradually, the Education of the Deaf Act Amendments of 1992 reauthorizes the Education of the Deaf Act of 1986 through fiscal year 1997, with several amendments to the act. It extends and amends the authorizations for Gallaudet University and NTID, and it repeals parts B and C of title I of the EDA, thereby consolidating the authorities for the elementary and secondary programs under that act. The bill increases accountability for Federal funds provided to the institutions, and it improves the administration of their programs, with the intention of improving educational opportunities—from the elementary to postsecondary levels—for persons who are deaf or hard of hearing. H.R. 5483 also repeals title III of the EDA, which authorized the COED, because the Commission's duties have been completed.

I urge my colleagues to support the bill as amended.

A detailed section by section description of the bill follows.

#### SECTION-BY-SECTION ANALYSIS, EDUCATION OF THE DEAF ACT AMENDMENTS OF 1992 AS AMENDED BY THE SENATE

##### Section 1—Short title

##### TITLE I—AMENDMENTS TO THE EDUCATION OF DEAF ACT OF 1986

##### Subtitle A—Reorganization of the Act

##### Section 101—Reorganization

This section, by repealing and redesignating various provisions of the Act, has the effect of consolidating the authorities relating to Gallaudet University and NTID under one title.

##### Subtitle B—Gallaudet University

##### Section 111—Board of Trustees

This section makes technical changes to existing law relating to the composition and powers of the Board. The Senate has included an amendment that requires the Board to establish an affirmative action policy to promote employment and advancement in employment qualified individuals with disabilities.

##### Section 112—Establishment of Authority for Certain Programs

This section amends, in its entirety, part B of Title I of the existing Act to combine the authority for the elementary and secondary education programs (the Kendall Demonstration School and the Model Secondary School for the Deaf, commonly referred to collectively as the "Precollege" programs) operated by Gallaudet University under a new section 104. Current administrative requirements for both schools would be consolidated to ensure consistent application to both schools. The Senate has amended language in order to underscore the preeminence of the national mission over the actual operation of the two elementary education programs. Finally, this section makes applicable to Gallaudet University certain provisions of the Individuals With Disabilities Education Act (IDEA) when parents privately place their children at these two schools.

##### Section 113—Establishment of Certain Requirements

This section requires that the agreement between the Department of Education and

Gallaudet University for the establishment and operation of the Model Secondary School for the Deaf also include the Kendall Demonstration Elementary School. The agreement would cover the national mission activities and the operation of both school programs. A new agreement must be completed within 1 year after enactment of these amendments and can be periodically updated as determined necessary by either the Department of the University. Language has been added specifying that it is the authorizing committees of Congress who should be the recipients of the annual report that is currently required.

**Subtitle C—National Technical Institute for the Deaf**

**Section 121—Agreement for NTID**

The section requires that the current agreement be assessed for modification within 1 year of enactment of these amendments. It should also be periodically updated as determined necessary by either party. Language has been added specifying that it is the authorizing committees of Congress who should be the recipients of the annual report that is currently required. The Senate has amended the bill to require the institute to establish an affirmative action policy to promote employment and advancement in employment qualified individuals with disabilities.

**Subtitle D—General Provisions**

**Section 131—Definitions**

This section adds definitions for the terms "international student," "NTID," and "University."

**Section 132—Gifts**

This section amends section 402 of the Act by combining provisions that pertain to the receipt of certain gifts by Gallaudet University and NTID.

**Section 133—Audit**

This section adds a new subsection prohibiting the two institutions from spending any appropriated funds on certain items. While lobbying with appropriated funds is prohibited, a Senate amendment explicitly allows the University and NTID to continue to educate Congress, the Secretary of Education, and others regarding programs, projects, and activities conducted at those institutions.

This section also requires both institutions to develop policies on the allowability of expenditures with 6 months of enactment. The cost principles established by the Office of Management and Budget (OMB) for educational institutions are suggested as guidance. These general policies must address explicitly eight particular items of expense, but the Senate has included language prohibiting the Secretary from adding items to those eight specified here. These policies must be submitted to the Secretary of Education for review and comment, and also to the appropriate committees of Congress.

**Section 134—Reports**

This section amends section 404 of the existing Act, which has the effect of combining language that requires annual reports from both institutions. The submission date has been changed from October 15 of each year to "not later than 100 days after the end of each fiscal year." Some existing reporting requirements have been expanded while others have been added.

**Section 135—Monitoring, evaluation, and reporting**

This section clarifies the responsibility of the Secretary of Education for monitoring and evaluation of all activities relating to

the two institutions. It also allows the Secretary to conduct studies in the area of deaf education. This section places an existing reporting provision regarding these activities of the Secretary into this section. A Senate amendment requires an additional report from the Secretary regarding progress made by the Department of Education in implementing particular recommendations of the Commission on Education of the Deaf. Language authorizing appropriations for these activities has been included.

**Section 136—Liaison for education programs**

This section adds to the list of entities the liaison office must interact with such "other Federal and non-Federal agencies, institutions, or organizations involved" in the field of deafness. The duties of the liaison office have been expanded to include reviewing research and other activities in the field of deafness for the purpose of only determining overlap and opportunities for coordination.

**Section 137—Federal endowment programs**

By Senate amendment, this section modifies the endowment provisions in current law by making the Federal endowment fund permanent. This section also requires a two-to-one match when non-Federal contributions to the fund exceed \$1 million, thus generating two non-Federal dollars for every Federal dollar at levels over \$1 million. Provisions have been added that set out limitations on the investment of endowment funds, and the Senate has amended additional provisions that require the University and NTID to maintain records of income generated from the respective Federal endowment fund. The section specifies exceptional circumstances under which the Secretary may authorize the expenditure of a portion of the Federal endowment fund corpus or of interest income beyond the 50% currently permitted. Additionally, the Senate has included language specifying that investment limitations on the corpus, and investment limitations and withdrawal and expenditure limitations on the income generated from that corpus, shall no longer apply after a period of ten years following the fiscal year in which the funds are matched.

**Section 138—Scholarship program**

This section creates a program for the purpose of providing scholarships to individuals who are deaf or hard of hearing for careers in deaf education or special education. Grants would be given to institutions of higher education or special education. Priority consideration for the scholarships would be given by these institutions to individuals who are deaf or hard of hearing and from under-represented backgrounds, particularly minority individuals.

**Section 139—International students**

This section adds a new section limiting the international student enrollment to approximately 10% of the total student body at each institution. Additionally, the Senate has modified language that would have increased the tuition surcharge paid by international students. Whereas the House version included a figure of 135 percent in the tuition surcharge, to be phased in over a period of ten years, the Senate amendment implements an increase from the present rate of 50 percent to 75 percent for the academic year 1993-1994, and a further increase to 90 percent for the following academic year. This section, as amended by the Senate, also establishes a process whereby students from developing countries who cannot pay the surcharge can obtain a reduction each year to the 1992-1993 rate of 50 percent. In accord-

ance with pending legislation (concerning the eligibility of countries for loans from multilateral banks), and recent data from a 1990 per capita income not in excess of \$4,000 in 1990 United States dollars.

**Section 140—Authorization of appropriations**

This section extends the authorization for Gallaudet University and its two school programs and for NTID for five years and authorizes such sums for each of those years.

**Subtitle E—Technical Amendments**

**Section 151—Technical amendments**

This section makes various technical and conforming amendments particularly relating to changes in terminology.

**Subtitle F—Effective Dates**

**Section 161—Effective dates**

This section makes the effective date for this title as October 1, 1992.

**TITLE II—PROVISIONS REGARDING OTHER ACTS**

**Subtitle A—Individuals With Disabilities Education Act**

**Section 201—Postsecondary Education**

This section directs the Secretary to continue to provide assistance through September 30, 1994 to the current grantees operating for four regional centers authorized under Section 625(a) of the Individuals with Disabilities Education Act (IDEA). It also assures such assistance through September 30, 1995, unless the authorization of appropriations for parts C-G of the Act is extended by that day in 1994.

Additional provisions direct the General Accounting Office to conduct a study of the four regional centers, the scope of which is to be determined by the Chairperson and Ranking Minority members of the Subcommittee on Disability Policy of the Committee on Labor and Human Resources in the Senate, and of the Subcommittee on Select Education of the Committee on Education and Labor in the House of Representatives.

**Section 202—Training personnel; education interpreters**

This section allows the Secretary to carry out new teacher training projects under section 631(a) of the Individuals with Disabilities Education Act (IDEA) in the area of deafness. This training provision would permit education institutions in partnership with local education agencies and center schools for students who are deaf to carry out regional model demonstration programs on deafness and secondary disabilities. Types of individuals to whom pre-service and in-service training is to be provided is described.

This section additionally would amend Section 631 of IDEA permitting the Secretary to make grants to institutions of higher education and other appropriate non-profit agencies or organizations for the establishment or continuation of educational interpreter training programs to train or retrain personnel to effectively meet the various communication needs of elementary and secondary students who are deaf and deaf-blind.

**Section 203—Research and related activities**

This section authorizes new research projects under 641 of the Individuals with Disabilities Education Act. This provision permits the funding of institutions of higher education in partnership with other appropriate agencies and organizations such as local educational agencies and center schools for students who are deaf to perform

specific activities related to the unique needs of children who are deaf and each project must provide for the meaningful involvement of parents, family members, and adult role models.

The Senate deleted a house proposal modifying section 202 of the rehabilitation act of 1973. Those modifications directed secretary to expand purposes of the rehabilitation and training center on deafness/hearing impairments to include a function to develop and demonstrate effective strategies in the provision of education to students who are deaf or hard of hearing and are from minority backgrounds.

#### Subtitle B—Effective Dates

##### Section 221—Effective dates

This section makes the effective date for this title October 1, 1992.

Mr. DURENBERGER. Mr. President, I rise today to express my support of the Senate amendments to H.R. 5483, the Education of the Deaf Act Amendments of 1992, and I urge my colleagues to act swiftly to ratify the bill. I want to thank the distinguished chairman of this committee, for once again making it a pleasure to work with him. As is always the case on the Subcommittee on Disability Policy, we come to the floor completely united on this bill, and I do appreciate the fine leadership, support and assistance Senator HARKIN continues to provide as the chairman of the subcommittee. I also want to thank the talented men and women on the subcommittee staff who have worked so diligently on this bill—Bob Silverstein, Alison Rosenberg, and Annie Silberman.

By congressional standards, the Education of the Deaf Act is small in scope. The primary function of this legislation is to authorize funding for: the Commission on the Education of the Deaf; Gallaudet University and its two model demonstration schools; and the National Technical Institute for the Deaf [NTID] at the Rochester Institute of Technology. But as small as this bill is, the impact of these two schools and the Commission is enormous on the deaf community of this country and the world.

The Commission, which was established by the Education of the Deaf Act in 1986, has provided invaluable information to all involved with the deaf community in this country. The subcommittee has considered the Commission's recommendation carefully in this reauthorization, and we will continue to do so in future reviews of legislation relating to deaf education.

And we all know the important role that Gallaudet plays in the education of individuals who are deaf in this country and throughout the world. Gallaudet serves as a tremendous inspiration for individuals who are deaf both for the excellent reputation the school has for the quality of its education; and for having the first deaf president of a major educational institution in this country, King Jordan. I have had the honor of getting to know President

Jordan from working on this reauthorization, and I have been stuck by the special talent and thoughtful influence he brings to Gallaudet and to the deaf community as a whole.

I also am proud of the function that Gallaudet plays in the international deaf community. Students from developing countries who are deaf and come to America to study can have profound effects on their communities at home. Many return to their native lands to start schools where there are none, or to become teachers at existing educational facilities.

Given the serious lack of educational opportunities for individuals who are deaf worldwide, access to Gallaudet for foreign students provides a crucial educational network for people that would otherwise be totally isolated. That is why I am particularly pleased to see the Senate amendments to the House bill regarding the cap and surcharge on foreign students to include a waiver for developing countries.

I also support the Senate amendments regarding the four regional demonstration centers for the deaf. Minnesota is lucky and proud to house one of these centers, which are awarded funding on a competitive basis, in our State, the St. Paul Technical College. St. Paul Technical College, and the other three regional centers, have done much to improve the educational opportunities for students who are deaf in this Nation. There clearly exists a need in this country for numerous higher education institutions serving individuals who are deaf other than Gallaudet, and it is vitally important that the four demonstration centers remain strong and thriving.

The Senate amendment to this bill striking the House language regarding these institutions will insure that these programs, which are successfully providing direct services to students who attend them, will continue to be able to do so.

I also want to pledge here and now, that when the future of these demonstrations is revisited with the reauthorization of the Individuals with Disabilities Act, I will continue to work hard to strengthen these programs.

There are some key people at the St. Paul Technical College who have provided much needed assistance and recommendations in this reauthorization who I would like to thank: Bob Lauritsen, Patrick Duggan, and Deborah Wilcox and David Buchkoski who also participated in a working group to advise me on the Reauthorization of the Rehabilitation Act.

These people are the ones who are truly on the front lines of some of the issues facing individuals with disabilities today. Their thoughts and insights are vital to the legislative process in Washington and I continue to look forward to working with them and their fellow Minnesotans who comprise

the strong and proud disability community in my home State.

Mr. HATCH. Mr. President, passage of the Education of the Deaf Act will enable Gallaudet, the National Technical Institute for the Deaf [NTID], the Kendall Demonstration Elementary School [KDES], and the Model Secondary School for the Deaf [MSSD] to further their basic mission, which is to provide exemplary education for individuals who are deaf or hearing impaired.

NTID and Gallaudet provide quality education and training to postsecondary students on their respective campuses. Other lesser known but equally important programs reach children and youth who are deaf or hearing impaired at the Kendall Demonstration Elementary School [KDES] and the Model Secondary School for the Deaf [MSSD].

The concepts of efficiency and coordination of resources are incorporated into this legislation. This bill streamlines the administrative workings of KDES and MSSD to coordinate the programs between the two schools, making them more compatible in their educational procedures. Furthermore, the numerous financial requirements of the four schools will be organized in a manner that is more consistent with efficient management of their programs and objectives and that ensures appropriate monitoring of funds.

Mr. President, we have heard much about educational improvement and quality in this Congress. I am pleased we are passing an education bill that will really deliver. Educational opportunities and services for people who are deaf or hearing impaired will be improved with the passage of this legislation.

The bill was deemed read the third time, and passed, as follows:

[The bill H.R. 5483, will appear in a subsequent issue of the RECORD.]

#### MOWA BAND OF CHOCTAW INDIANS RECOGNITION ACT

Mr. LAUTENBERG. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 670, S. 362, the Mowa Band of Choctaw Indians Recognition Act.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

A bill (S. 362) to provide Federal recognition of the Mowa Band of Choctaw Indians in Alabama.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

The PRESIDING OFFICER. The Senator from Mississippi.

Mr. COCHRAN. Mr. President, I rise to state my opposition to the passage of this bill. I know the Senator from Alabama has worked very, very hard to

round up support, to develop a consensus for action in this body to pass the bill. Our Committee on Indian Affairs conducted hearings, looking into the merits of the proposal to legislatively grant recognition to the application of the Mowa Band of Choctaw Indians in Alabama for Federal recognition, giving them legal status as beneficiaries of Federal Indian programs and other services that would be accorded to them under the law if this bill were passed.

The reason for my opposition is simply that we have an established procedure under the law already for administrative recognition through a petitioning process that involves establishing evidence to meet certain criteria in the law so that we are upholding the framework for recognition that has now been long established.

All of those groups, tribes seeking to gain legal recognition under the existing law, must follow that procedure.

It is my understanding, and this was borne out in testimony before our committee, that this petitioning group has had a petition before the Department of the Interior under the law for some time now. Having grown impatient with that process, it has now decided to proceed in another direction and that is to go directly to Congress and to get a law passed, creating an exception by the passage of this law, certifying this group as a lawfully constituted and legally entitled group to receive benefits as an Indian Nation or an Indian tribe—a sovereign entity.

There is a Mississippi band of Choctaw Indians. There are others who have the title of the tribal name Choctaw in Oklahoma and in other States as well.

There is a great deal of controversy, Mr. President, over whether or not this petitioning group is a legitimate band of Choctaw Indians, and there is serious disagreement in Indian country on that point. We heard a lot of testimony on both sides of that issue in hearings before our committee, and I would say to the Senate that it certainly created serious doubts in the mind of at least this Senator and I know in the minds of others as well, although I am not purporting to be here today to speak for other members of the committee or other Senators on either side of the aisle.

The fact is the committee did report the bill favorably and it is pending before the Senate today and will be passed, I am sure, on a voice vote in this body. So I am not here to prolong the debate, to drag out the process, but it seemed to me important enough to come to the floor and say that I think this is a very bad precedent to depart from the existing requirements of law in a controversial recognition case and create an exception based on evidence that is in sharp dispute about the legitimacy of this petitioning group under the current standards and criteria established by law.

My hope is that the Senate will be restrained when it is called upon in future situations and refrain from creating an exception to the rule because what is going to happen is the exception will be the rule. Groups who may have a hard time establishing their legitimacy, for whatever reason, before the administrative bodies of our Federal Government will begin to ignore the requirements of existing law for recognition and come directly to the Congress, challenging their representatives in the House and the Senate to circumvent the procedures and the rules that are already established and to create a recognition process that is outside the usual channels that have been established. That is why we have the recognition law on the books now, to keep that from happening so that we in the Congress are not called upon to make these decisions.

I daresay that if you took a survey in the Senate of all members and asked questions about what the facts were in this situation, there would be very little personal knowledge about these facts in the Senate. That is not a criticism of any Senator. It is just impossible in each of these cases for each Member to know all of the facts that are relevant to the decision we are called on to make today in this bill.

So I oppose its passage, Mr. President.

I oppose S. 362, which legislatively gives Federal recognition to the MOWA Band of Choctaw Indians of Alabama.

The issue of legislative recognition of petitioning groups of Indian people is one of the more controversial issues in Indian Affairs. My position is that all groups seeking recognition should follow the Federal acknowledgment process and meet the criteria established by law. I believe legislative action creates a dual system for recognition, one system in which the Congress applies no criteria, and one system in which the Interior Department applies a set of established criteria. Unless the situation is extraordinary, Congress should not grant Federal recognition. Because of the inconsistency and unfairness it creates among petitioning groups, it should not be permitted.

As a member of the Interior Appropriations Committee, I can attest to the fact that funding for Indian programs is inadequate to meet existing tribal needs. Native Americans suffer the worst conditions of unemployment, the lowest life expectancy, inadequate education, and other serious social and economic conditions. Our Government has a special responsibility to native Americans based on treaties, statutes, and Federal court rulings. Federal acknowledgment establishes a perpetual government-to-government relationship between the tribe and United States and has major political, social, and economic implications for the petitioning tribe and Federal, State, and local governments.

Congress has created special programs for federally recognized tribes, including housing, educational assistance, social services, and medical benefits. To qualify for the benefits, and services available to federally recognized tribes, a group must satisfy the requirements for recognition established by the Department of the Interior. This bill gives instant eligibility for numerous Federal programs and benefits afforded only to federally recognized tribes. The Department of the Interior's qualifications for recognized tribes are as follows:

First, the group can be identified by historical evidence, written or oral, as being an American Indian tribe;

Second, its members have existed as a distinctive Indian community viewed as American throughout history until the present;

Third, the Indian group has maintained political influence over its members as an autonomous entity throughout history until the present;

Fourth, the membership group is composed principally of persons who are not members of any other Indian tribe; and

Fifth, the tribe has not been the subject of congressional legislation expressly terminating their relationship with the Federal Government. Under this bill the 3,000 Mowa members would be given every benefit of all federally funded Indian services by circumventing the established administrative recognition process—a process that was developed in 1978 with the support of Indian tribal governments, Congress, and the administration to ensure objective and uniform evaluation.

According to the Congressional Budget Office, the cost of S. 362 to the American taxpayers is estimated at \$10 million a year. This expenditure for the congressionally recognized Mowa tribe would have a profound effect on federally recognized tribes which have met the established requirements as I listed previously.

The Congress has a consistent policy in congressional recognition by exercising a congressional prerogative when the historical record has been persuasive that a particular group was a treaty signatory or recognized in some other accepted manner. However, in the Mowa case there is no evidence that Congress would be correcting a historical oversight or neglect.

The passage of S. 362 would establish a precedent that would weaken the administrative process.

I am not opposed to the Mowa seeking Federal recognition, but I do think the tribe should follow the same recognition process as required of other groups petitioning the Federal Government for recognition. The acknowledgment process establishes the authenticity of a sovereign legal entity. If the current administrative process needs reform, then we should correct the

process, but in the meantime, individual tribes should not circumvent process all others must follow.

I ask unanimous consent that the statement of administration policy dated September 21, 1992 concerning this bill be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

OFFICE OF MANAGEMENT AND BUDGET  
Washington, DC, September 21, 1992.

STATEMENT OF ADMINISTRATION POLICY

(S. 362—Mowa Band of Choctaw Indians Recognition Act—Shelby of Alabama and Heflin of Alabama)

If S. 362 is presented to the President, the Secretary of the Interior will recommend a veto, because the bill would statutorily acknowledge the Mowa Band of Choctaw Indians in Alabama.

In 1978, the Department of the Interior established an acknowledgment process to ensure that all petitions for recognition as a federally recognized tribe would be evaluated in support of the Indian tribes, and Congress provides each petitioning group the opportunity for an unbiased, detailed review of its petition.

S. 362, however, would circumvent this process. To do so may erroneously acknowledge a group as an Indian tribe, thereby entitling the group to numerous Federal programs and benefits afforded federally recognized tribes. Recognition through legislation would be unfair to all other groups seeking Federal acknowledgment and would undermine the administrative process that was designed to eliminate the need for *ad hoc* determinations through legislation.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S. 362

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

SHORT TITLE

SECTION 1. This Act may be cited as the "Mowa Band of Choctaw Indians Recognition Act".

FEDERAL RECOGNITION

SEC. 2. Federal recognition is hereby extended to the Mowa Band of Choctaw Indians of Alabama. All Federal laws of general application to Indians and Indian tribes shall apply with respect to the Mowa Band of Choctaw Indians of Alabama.

RESTORATION OF RIGHTS

SEC. 3. (a) All rights and privileges of the Mowa Band of Choctaw Indians which may have been abrogated or diminished before the date of enactment of this Act by reason of any provision of Federal law that terminated Federal recognition of the Mowa Band of Choctaw Indians of Alabama are hereby restored and such Federal law shall no longer apply with respect to the Band or the members of the Band.

(b) Under the treaties entered into by the ancestors of the Mowa Band of Choctaws, all historical tribal lands were ceded to the United States. Congress does hereby approve

and ratify such cession effective as of the date of the said cession and said cession shall be regarded as an extinguishment of all interest of the Mowa Band of Choctaws, if any, in said lands as of the date of the cession. By virtue of the approval and ratification of the cession of said lands, all claims against the United States, any State or subdivision thereof, or any other person or entity, by the Mowa Band of Choctaws, including but not limited to, claims for trespass damages or claims for use and occupancy, arising subsequent to the cession and that are based upon any interest in or right involving such land, shall be regarded as extinguished as of the date of the cession.

(c) The Mowa Band of Choctaws has no historical land claim and cannot, and shall not utilize its Federal recognition as provided by this Act to assert any historical land claim. As used herein, "historical land claim" means a claim to land based upon a contention that the Mowa Band of Choctaws, or its ancestors, were the native inhabitants of such land or based upon the Mowa Band of Choctaws' status as native Americans or based upon the Mowa Band of Choctaws' Federal recognition as provided by this Act.

(d) Except as otherwise specifically provided in section 4 or any other provision of this Act, nothing in this Act may be construed as altering or affecting—

- (1) any rights or obligations with respect to property,
- (2) any rights or obligations under any contract, or
- (3) any obligation to pay a tax levied before the date of enactment of this Act.

LANDS

SEC. 4. (a) All legal rights, title, and interests in lands that are held by the Mowa Band of Choctaw Indians of Alabama on the date of enactment of this Act are hereby transferred to the United States in trust for the use and benefit of the Mowa Band of Choctaw Indians of Alabama.

(b)(1) Notwithstanding any other provision of law, the Mowa Band of Choctaw Indians of Alabama shall transfer to the Secretary of the Interior, and the Secretary of the Interior shall accept on behalf of the United States, any interest in lands acquired by such Band after the date of enactment of this Act. Such lands shall be held by the United States in trust for the benefit of the Mowa Band of Choctaw Indians of Alabama.

(2) Notwithstanding any other provision of law, the Attorney General of the United States shall approve any deed or other instrument used to make a conveyance under paragraph (1).

(c) Any lands held in trust by the United States for the benefit of the Mowa Band of Choctaw Indians of Alabama by reason of this section shall constitute the reservation of such Band.

(d) The Congress finds that the provisions of this section are enacted at the request of the Mowa Band of Choctaw Indians of Alabama and are in the best interests of such Band.

SERVICES

SEC. 5. The Mowa Band of Choctaw Indians of Alabama, and the members of such Band, shall be eligible for all services and benefits that are provided by the Federal Government to Indians because of their status as federally recognized Indians and, notwithstanding any other provision of law, such services and benefits shall be provided after the date of enactment of this Act to the Band, and to the members of the Band, without regard to the existence of a reservation

for the Band or the location of any of the residence of any member of the Band on or near any Indian reservation.

CONSTITUTION AND BYLAWS

SEC. 6. (a) The Mowa Band of Choctaw Indians of Alabama may organize for its common welfare and adopt a constitution and bylaws in accordance with regulations prescribed by the Secretary of the Interior. The Secretary of the Interior shall offer to assist the Band in drafting a constitution and bylaws for the Band.

(b) Any constitution, bylaws, or amendments to the constitution or bylaws that are adopted by the Mowa Band of Choctaw Indians of Alabama shall take effect only after such constitution, bylaws, or amendments are filed with the Secretary of the Interior.

MEMBERSHIP

SEC. 7. (a) Until a constitution for the Mowa Band of Choctaw Indians of Alabama is adopted, the membership of the Band shall consist of every individual who—

(1) is named in the tribal membership roll that is in effect on the date of enactment of this Act, or

(2) is a descendant of any individual described in paragraph (1).

(b) After the adoption of a constitution by the Mowa Band of Choctaw Indians of Alabama, the membership of the Band shall be determined in accordance with the terms of such constitution or any bylaws adopted under such constitution.

REGULATIONS

SEC. 8. The Secretary of the Interior shall prescribe such regulations as may be necessary to carry out the purposes of this Act.

Mr. JEFFORDS. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. PRYOR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from Vermont is recognized.

Mr. JEFFORDS. I thank the Chair. (The remarks of Mr. JEFFORDS pertaining to the introduction of S. 3316 are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

THE SATURN AUTOMOBILE

Mr. SASSER. Mr. President, I rise on the floor of the Senate this afternoon to pay tribute to the workers and the management of the Saturn automobile plant in Spring Hill, TN. These men and women have dedicated themselves to producing a world-class American product. They have dedicated themselves to restoring pride and uncompromising quality to a vital American industry.

I submit that by all measures they have succeeded brilliantly. The consumer satisfaction delivered by the Saturn Division is currently unsurpassed by any car at any price, foreign, or domestic.

Now, that is an outstanding achievement when you consider as recently as 3 years ago Saturn was still a dream on the drawing board, a bold experiment to build an automobile using the state-

of-the-art techniques at every stage of production. The ingenuity, the skill, and the plain American grit of over 6,000 Saturn employees have made what was a dream 3 years ago a wonderful reality.

In the space of a single product year, Saturn has shot to the top of the consumer surveys. Most notably, it has commanded the highest tier of the J.D. Power surveys which are the benchmark for automotive quality and consumer satisfaction.

Across a broad range of categories, Saturn has set the new standard, from sales satisfaction to delivery condition of the automobile, to retailer's happiness with their franchisees. In each case, Saturn has walloped its competitors and held its own with such luxury nameplates as Mercedes-Benz and Lexus, cars costing four or five times as much, cars that were never thought to be in competition with Saturn until suddenly, to their surprise, they found they were.

The J.D. Power organization summed it up very well by stating: "For a car in the lower middle market, Saturn is doing the best job of all. By comparison, the Japanese are doing a relatively poor job." So said J.D. Powers.

Mr. President, the men and women of Saturn are winning straight ahead. They are winning without gimmicks, without trade subsidies, without quota protection. The playing field with Japan may not yet be level, but the men and women of Saturn are winning anyway.

Consumers with the free choice to purchase the highest quality automobile at the lowest cost choosing Saturns over any imports.

Nationwide, we find that 53 percent of 1992 Saturn buyers listed an import as their second choice.

In California, where automobile buying trends have been set in the past, surveys indicate that 65 percent of Saturn buyers said they chose a Saturn over imports. The people of Saturn are taking back the market because their product is superior, because they are working overtime to meet the demand, and because their attention to quality is unequalled.

As a result, Saturn now leads the industry in new car sales per dealer, the first time in 15 years that an American automobile has held that distinction.

And the reason is simple: It is quality, American quality. The Saturn automobile is 100 percent designed, engineered, and assembled in the United States of America by Americans using American parts. You can say that about very few automobiles today.

We live in a day when Honda's plant in Ohio has more American parts in it than a Mercury Tracer assembled in Mexico, or a Plymouth Laser assembled in Japan. We get confused over the content of automobiles. Buying an American nameplate is no longer the

guaranteed best way to support the American economy, or our Nation's work force.

But, Mr. President, Saturn cuts through the confusion. It is uniquely and entirely an American achievement. There is no foreign source. There is no foreign design. There is no foreign assembly. The Saturn automobile is all American, right down to the last nut and bolt and piston and gasket.

So my message this afternoon, Mr. President, is one of gratitude, gratitude to the workers and management of Saturn, who have given us back our product. They have proven that American ingenuity and know-how still is second to none in the world. There have been many doubters along the way. Sure, they have been some mistakes and there have been some false starts. But the workers and management at Saturn have overcome them with a measure of grace and dedication that we can all admire.

The men and women at Saturn never lost confidence in their ability to excel. There have been no easy victories, no neat solutions; only the driving, creative effort to solve problems and breathe new life into the American automobile industry.

The people at Saturn are convincing the world that we are once again a can-do people, a can-do Nation. They are pioneers, building tomorrow's products. They set the standard for all of the American industry to follow.

So I know I speak for all Members of the U.S. Senate, as well as millions of Americans, when I say to the workers and managers at the Saturn plant in Spring Hill, TN: Thank you for bringing our confidence back in our ability to produce and compete; and thank you for restoring our pride in American products.

Mr. President, I yield the floor.

Mr. BIDEN addressed the Chair.

The PRESIDING OFFICER. The Senator from Delaware is recognized.

Mr. BIDEN. Mr. President, let me say to this body, I would like to associate myself with the remarks of the distinguished Senator from Tennessee. He is dead right on everything he said in his incredible story, one that I hope we are going to see repeated a number of times in other areas, with other automobiles.

#### TRIBUTE TO SENATOR ALAN CRANSTON

Mr. BIDEN. Mr. President, today, I want to pay tribute to one of our departing colleagues, a man I consider to be one of the giants of the Senate, ALAN CRANSTON.

ALAN CRANSTON's life has spanned the century—a century marked by unsurpassed human achievement in science and technology, but marred by the bottomless horror of global conflict. These contrasting images of the 20th century

remind us that despite the technological revolutions in areas from medicine to manufacturing, we have been unable to discover the key to world peace.

The search for that key has been the central guiding principle of ALAN CRANSTON's life. Throughout his 24 years in the Senate, ALAN has demonstrated an extraordinary devotion to world peace.

Some people pursue power for its own sake; they look upon issues as a means to political advancement. ALAN CRANSTON's entire political career stands in sharp contrast to such cynicism. His ambition has been driven by issues, particularly the issue of nuclear arms reduction.

If I may be forgiven a personal aside, 5 or 6 years ago I was seeking ALAN's support for an office other than the one I now hold. I was sitting with him in a taxicab, about to go into a function being held in the Loop in Chicago.

Before we got out, he said: "I only have one question for you." Of all the thousands of issues he could have asked me about, he said: "I only have one question." He said: "How devoted are you to controlling nuclear weapons—to nuclear arms control—and to changing the dynamics of the relationship between the United States and Russia?" It is the only question he asked me, Mr. President.

Time and again, ALAN CRANSTON has brought us together, Democrats and Republicans, to focus on the opportunities for curbing the arms race.

For years, he convened the informal SALT study group, which met periodically in the whip's office, where ALAN encouraged a continuing dialog among Senators about reducing our Armageddon arsenals. He carried this dialog forward in his position as Democratic whip and as a senior member of the Foreign Relations Committee.

Indeed, ALAN CRANSTON was a tireless advocate for nuclear arms control. He was a key player in passage of the landmark Nuclear Nonproliferation Act, which curbed U.S. nuclear exports and strengthened sanctions against nations that would divert nuclear energy technology into weapons.

He consistently spoke out against efforts by third world dictators to achieve nuclear weapons. He warned us about the dangers of Iraq's nuclear program—years before George Bush did.

It was ALAN CRANSTON who led the effort to curb aid to Pakistan until that nation turned away from the nuclear threshold. And it was ALAN CRANSTON who highlighted the dangers in the nuclear weapons programs of India, China, and North Korea.

ALAN CRANSTON fought—even when jobs in his home State of California were at stake—against unnecessary nuclear weapons programs and delivery systems, such as the MX missile and the B-2 bombers.

And now, in the final weeks of ALAN CRANSTON's Senate career, it is fitting that we have enacted a nuclear test moratorium and ratified the START Treaty—two historic achievements that ALAN CRANSTON played no small part in bringing about.

One of ALAN CRANSTON's great accomplishments grew from political defeat. Though he did not secure the Democratic nomination for President in 1984, ALAN achieved a larger goal by raising awareness about nuclear dangers and support for a mutual, verifiable nuclear freeze.

As the Los Angeles Times wrote the day after ALAN withdrew from the race:

His insistence that arms control and peace are a president's most important responsibility [have] raised the nuclear consciousness of the campaign. That is a noble contribution.

Of course, ALAN CRANSTON's contributions extend far beyond the arms race. In the Foreign Relations Committee, he was a forceful proponent of the South African sanctions legislation in 1986 and a critical voice in opposing the Reagan administration's misguided policies in Central America.

As chairman of the Asia Subcommittee, he has been a leading critic of the Bush administration's policy of constructive engagement with Beijing. He spearheaded the committee's effort which resulted in an about-face in United States policy toward Cambodia, where the Bush administration had underestimated the ambitions of the genocidal Khmer Rouge.

And he has provided a guiding hand in United States policy toward the Philippines. After the democratic revolution in that country in 1986, it was ALAN CRANSTON—along with our colleague Senator LUGAR and others—who urged the establishment of multilateral assistance initiative, a long-term proposal for aid and investment aimed at stabilizing the new government.

ALAN CRANSTON has made important contributions in many other areas—in protecting the environment, in advancing the cause of civil rights, in caring for the needs of our brave veterans, and in promoting the cause of equal rights for women.

For me, ALAN CRANSTON has embodied the credo stated by the American architect, Daniel Burnham:

Make no little plans—they have no magic to stir men's blood. Make big plans; aim high in hope and work, remembering that a noble, logical diagram once recorded will never die, but long after we are gone will be a living thing, asserting itself with ever-growing insistency.

ALAN, your quest for world peace will continue to stir magic in men's blood. That ideal, which you so persistently pursued, will continue to assert itself—here in this Chamber and around the world—long after we are gone.

ALAN, for 24 years, you have been a quiet leader. You have counted our votes, you have twisted our arms, and

you have brought us together to reason with one another.

It should be noted that ALAN CRANSTON is retiring from this body, but is still devoting his time in retirement to see to it that the current rapprochement between Russia and the United States becomes a permanent condition. He is still working tirelessly and will head up an institute to do this; to, in fact, bring about the prospect of continued dismantlement of the nuclear arsenals that have been brought about as a consequence of the cold war.

I would like to pay Senator CRANSTON my personal respect and gratitude for all he has done for this country.

Mr. CRANSTON addressed the Chair. The PRESIDING OFFICER. The Senator from California.

Mr. CRANSTON. Mr. President, I came to the floor, and I rise on the floor, to thank my friend from Delaware for his act of friendship and generosity. I deeply appreciate his comments on what I have sought to do in the Senate, and before the Senate, and what I will seek to do after the Senate, due to my passion for peace.

I do believe that I have made some contributions that do count in that realm.

I also say, in passing, I think I have also accomplished some things in other realms, such as the environment and the causes of equal rights, human rights, civil rights, voting rights, transportation, housing for veterans, and much else. But most of all, I was concerned through the cold war about the dangers of nuclear war, and I worked for better understanding with the Soviet Union through that long, dark period in world and American history.

Now, there are great hopes that we can avoid such dangers in the future, and I shall continue to work on that front.

I want to note also that the Senator from Delaware has made his own vast and remarkable contributions on the peace front and on the foreign affairs front, where he has provided great leadership and great thought, dedicated to the issues that confront our country.

I thank him as a wonderful friend and a great Senator.

#### NATIONAL DEFENSE AUTHORIZATION ACT FOR FISCAL YEAR 1993—CONFERENCE REPORT

The PRESIDING OFFICER (Mr. BRYAN). The Chair informs the Senate, the Senate having received the conference report on H.R. 5006, pursuant to the order of October 3, 1992, that report is considered adopted, and the motion to reconsider is laid on the table.

(The conference report is printed in the House proceedings of the RECORD of October 1, 1992.)

#### CABLE TELEVISION CONSUMER PROTECTION ACT OF 1992—VETO

The PRESIDING OFFICER. Under the previous order, the Senate will now proceed to the consideration of the President's veto message on S. 12, which the clerk will report.

The legislative clerk read as follows: A bill (S. 12), the Cable Television Consumer Protection and Competition Act of 1992.

The Senate proceeded to consider the bill.

The PRESIDING OFFICER. Under the previous order, there will now be 1 hour of debate with the time to be equally divided and controlled by the two leaders or their designees.

Mr. MITCHELL. Mr. President, I ask unanimous consent that the time on the bill be controlled by Senator DANFORTH and Senator BURNS.

The PRESIDING OFFICER. Without objection, it is so ordered.

Who yields time?

Mr. BURNS addressed the Chair.

The PRESIDING OFFICER. The Senator from Montana is recognized.

Mr. BURNS. Mr. President, I will just have an opening statement here, as we start down this road. This whole debate today regarding cable reregulation has been set up by some speeches made previously here on this floor this afternoon. One of them has to do with jobs. We beat up on our President because the economy has not grown and job creation has not really happened like we would all like to see it. Yet, we are starting right down another pathway here that is going to cost jobs here in America—reregulation. I find it ironic that this is the President's fault, and it is not the Congress' fault.

No other industry has enjoyed the growth through slow economic times like that of the cable industry. It did not do that until it was unregulated. There are a lot of things that this Government does and a lot of things this Congress does and about 2 years later we come back and look at it and say, "Whoops, we made a mistake there, maybe we should undo that." We find out that is very, very hard to do.

Mr. President, we are in another one of those situations where we might have to say whoops again. So as we look at this situation—and we will have some statements later on down the line—the underlying fact in this country is that jobs are a result of the creation of goods and services which are sold to consumers and users. This bill restrains cable's ability to create new jobs, clear and simple. There is no other argument that could even come up to that.

Senator GORE, with this bill, wants to stop this new job creation, and President Bush wants new jobs to continue to be created. If that is not a defining point, I do not know what is. President Bush has been doing everything in his power to create jobs this

last 4 years, and the Congress has stood in his way every step of the way.

Then we stand back and say, "Aren't we in bad shape?" This country is not nearly as bad as everybody thinks it is. We are still the largest economy in the world, largest exporter in the world. In fact, our economy is bigger than the next three put together, and I do not see anybody making a big exodus out of this country to live somewhere else. I do not get one letter from people wanting out. But we will, if this continues, because we are heading right down that old track.

This bill is just another example of a regulatory Congress that is trying to ram a bad piece of legislation down the President's throat.

Mr. President, I do not see my colleague on the floor, and I reserve the remainder of my time.

The PRESIDING OFFICER. Who seeks recognition?

Mr. DANFORTH addressed the Chair.

The PRESIDING OFFICER. The Senator from Missouri is recognized.

Mr. DANFORTH. Mr. President, I yield 6 minutes to the Senator from Hawaii.

Mr. INOUE. Mr. President, I rise today to urge my colleagues to support S. 12, the Cable Television Consumer Protection and Competition Act of 1992 and override the President's veto.

The purpose of this legislation is very simple and straightforward: To promote competition in the video industry and to protect consumers from excessive rates and poor customer service where no competition exists.

At the same time, it continues to permit the cable industry to grow and bring to the American public a new array of programming and other services. This bill represents a balanced and bipartisan package.

There is an effort underfoot to make this a partisan issue. It is not. This bill passed the Senate by a vote of 74 to 25, with a majority of both Democrats and Republicans voting for the bill.

If this measure does not become law the only losers will be America's consumers. This bill would not be here before us today were it not for the consumer outrage over the way they have been treated by the cable industry.

I hope that my colleagues will not let this measure fall over partisan politics. Our first responsibility is to the American people who want us to put in place protections against cable's monopoly power.

To promote competition, the bill ensures that competitors receive access to cable programming, not for free, but for the same price that the programming is sold to cable operators.

Contrary to the President's assertion, this bill does not require the government to set prices for programming nor dictate to whom it is sold. It simply provides that programmers owned

by cable operators cannot discriminate.

This bill also permits municipalities to construct their own cable systems in competition with the existing operator, and it prohibits a franchising authority from unreasonably refusing to award a second franchise.

The President says that competition will not increase under this bill. He is wrong. If we do not pass this bill, there will never be competition to cable.

On September 24 the Wall Street Journal ran an article titled "Cable Firms Say They Welcome Competition but Behave Otherwise: Some Established Systems Go to Great Lengths To Keep Rivals Out of the Game."

The article points to the tactics used by cable operators to keep out competition. The article also notes that there are a number of provisions in S. 12 that will address the very anti-competitive tactics used by cable systems. Mr. President, I ask unanimous consent that this article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Wall Street Journal, Sept. 24, 1992]

**CABLE FIRMS SAY THEY WELCOME COMPETITION BUT BEHAVE OTHERWISE—SOME ESTABLISHED SYSTEMS GO TO GREAT LENGTHS TO KEEP RIVALS OUT OF THE GAME**

(By Mark Robichaux)

ELBOW LAKE, MN.—This farming community has many charms: It is clean, friendly and nestled amid tiny lakes. And for a while there, residents could get paid for receiving cable television.

That is what happened when Triax Midwest Associates, an affiliate of Denver-based Triax Communications Corp., faced a challenge to its exclusive franchise. After years of customer complaints that Triax's service was shoddy and its rates too high, the town (pop. 1,200) decided to go into the cable business itself. It erected a 180-foot antenna across the highway from Triax's tower and hung its cables just under Triax's on the utility poles.

The municipal system quickly signed up 60% of the subscribers in town at \$14.95 a month, beating Triax's price by \$1. But last summer, in the middle of a price war, Triax matched the city's rates, then flew in a legion of salespeople to go door-to-door, offering Elbow Lakes citizens a rebate of \$100, paid on the spot, if they agreed to sign up for a year. The city countered the next day with a monthly rate of \$5.95. So did Triax. Now the town's system is struggling and faces a yearly loss. It has been forced to raise its rates back up to \$14.95, and nobody knows whether the residents will stay loyal or go for Triax's discount deals.

**SLOW MOTION**

Five years after the cable industry was deregulated, fewer than 1% of the cable markets in the U.S. are served by two or more providers, and rates have risen an average of 61% for the most popular service. Alternatives to cable, such as microwave transmission and direct-broadcast satellite reception, haven't materialized as full-fledged competitors. Complaints continue to reverberate about what many consumers perceive as cable companies' unregulated monopolies.

The bill cleared by Congress this week addresses this dissatisfaction by reimposing some community control on cable companies' behavior. The cable companies and President Bush, who says he will veto the measure, argue that the bill could actually raise costs for consumers, partly because it would enable broadcasters to obtain payments from cable companies for their signals. They maintain that competition in the cable market, not regulation would serve consumers best.

But a close look at the few markets where entrenched cable companies have been challenged by newcomers suggests that competition is the last thing that the big cable operators want. Beyond simply playing hardball, entrenched cable operators have sought to lock out or cripple would-be competitors. They have engaged in disabling price wars, filed numerous lawsuits and hobbled the sale of municipal competitors' bonds. They have vigorously lobbied local and state governments to keep their turf exclusive. In New York, an incumbent cable operator threatened apartment co-op boards with a halt in its service if the co-ops let a competitor in. In Cape Coral, Fla., a city famed for its Arbor Day celebrations, a cable provider charged that a would-be competitor planned to destroy 600 to 700 trees to string cable (it didn't actually plan to cut any).

**FRUITS OF MONOPOLY**

"The cable industry has tasted the fruits of the monopoly and they'll do whatever they can to drive a potential competitor out of town," charges Gene Kimmelman, executive director of the Consumer Federation of America, a consumer lobbying group. "They want it both ways: They argue they want competition, yet they do everything imaginable to block it."

The cable industry vigorously defends its behavior, dismissing any notion that its practices are anti-competitive. Cable companies say they are simply protecting their markets, competing as any prudent business would. The big operators feel the threat of competition acutely, because they borrowed heavily to buy up cable systems in the 1980s. Cable companies further argue that it's virtually impossible for two cable operators in one market, offering discounted prices, to make a reasonable profit. In many respects, they argue, cable is a natural monopoly.

"What do you expect the operators to do—sit there like a bump on a log and lose customers?" asks Steve Wilkerson, president of the Florida Cable Television Association. "Cable operators are going to compete head to head to keep their customers. What is so anti-competitive about that?"

**KEEPING THEIR DISTANCE**

The big cable operators haven't tried to compete with one another; they buy and sell territories, but so far they haven't sought to penetrate one another's markets. Generally the challengers are frustrated small-town governments and scrappy companies, usually undercapitalized, that operate in areas where an incumbent has a reputation for giving poor service and increasing its rates.

More than 130 disenfranchised communities are exploring the prospect of either inviting competition or starting a cable company of their own. One of them is Niceville, Fla., hamlet (formerly known as Boggy) near the end of the state panhandle. Niceville has been fighting for the better part of a decade to start its own service. Warner Cable Communications Inc., a unit of Time Warner Inc., so riled the small town with rate rises and much-criticized service that angry resi-

dents voted to tax themselves to construct a \$2 million cable system.

But Time Warner used the courts to challenge the city's right to build, arguing among other things that by operating a system of its own, the government would be infringing on Time Warner's First Amendment right to free speech. After hard-fought victories, one in state court and another in the U.S. Supreme Court, the town proceeded this year to sell the bonds to start construction. But a bond-rating agency refused to rate the bonds, despite Niceville's respectable credit history. That's because Time Warner filed yet another lawsuit in 1987. This one charged the town with "unlawful municipal competition," alleging, among other things, that it misled residents about the cable system's viability.

Today, seven years and almost \$300,000 after starting its effort, Niceville still hasn't strung its first inch of wire. "They [Time Warner] asserted every constitutional, legal and contractual theory I think I've ever seen," says Niceville city attorney Gillis Powell Sr. "It's been a very complicated, very costly, very exhausting experience."

James Moore, the attorney representing Warner Communications, argues that neither Niceville nor any other municipality belongs in the cable business. "How can the city be a regulator and a competitor at the same time?" he demands.

That is one of the questions the federal regulation bill addressed. The bill would enable local governments to regulate rates for basic cable programming based on guidelines developed by the Federal Communications Commission, and would authorize the FCC to step in when local authorities don't do the job right.

The legislation is also aimed at encouraging competition to entrenched cable operators. It would prohibit exclusive franchises, requiring cities to consider at least two applicants. Local governments could operate a cable system without going through the formal franchising process. The bill would also require cable operator-owner networks that currently sign exclusive contracts, such as TNT, to sell programming to all comers.

#### THE ALLENTOWN EXAMPLE

There is evidence that on a level playing field, cable companies can compete, with attendant benefits for consumers. In Allentown, Pa., two private cable companies started 25 years ago at opposite ends of the town, met in the middle and continued to wire over one another's neighborhoods, house by house. The two—Service Electric and Twin County Trans Video—both are profitable today, and have split the market roughly in half.

"I'm not exaggerating when I say we have no problems whatsoever with cable," says Joseph Rosenfeld, an assistant to the mayor in Allentown. "These companies are terrified of people switching. I was watching an Eagles game and that went out during an electric storm. Within half an hour, in the rain, they had the thing fixed."

Allentown is an exception mainly because it took a path that other communities didn't when cable television began: It allowed two operators into its territory. As cable spread in the early 1980s, most local governments granted a single franchise to a single operator. Running two wires along poles or digging up public roads twice seemed impractical. In return, cable operators often had to agree to costly concessions levied by city councils, which usually included a percentage of gross revenue, elaborate public-access studios and state-of-the-art equipment to televise council meetings.

Then, in 1984, cable companies argued that they needed relief from local governments' rate restrictions and unreasonable demands. Competition from emerging technologies would hold rates down, the industry argued. Besides, the broadcast networks had a far bigger audience than cable, which had wired less than half the country at the time.

So the Cable Act of 1984, which became effective in 1987, was intended to allow the industry to flourish, and at the same time open the door for competition. The industry has indeed flourished since deregulation—revenue has almost doubled in the past six years to \$22 billion—but the emerging technologies still are larval, and incumbent cable operators doing battle with newcomers can exploit the considerable advantages of having had exclusive franchises.

By far the bloodiest cable battleground, even by the industry's sanguinary standards, is in central Florida, where Telesat Cablevision Inc. has gone up against some of the nation's most powerful cable operators. The fight has taken such a heavy toll that Telsat has canceled plans for any further expansion in Florida. Telesat's parent, FPL Group, owner of Florida Power & Light, has put Telesat up for sale.

Telesat, based in Pompano Beach, touched off a price war when it marched into central Florida in 1987. It started out wiring apartment buildings, then quickly expanded to more than a dozen communities serving 53,000 cable homes. In every market, Telesat met what is president, Harry Cushing, describes as the "scorched-earth policy" of entrenched cable companies.

In the Orlando area, Telesat encountered tow of the industry's biggest operators: Cablevision Industries Corp., with 1.7 million subscribers nationwide, and Cablevision of Central Florida, a division of Time Warner Inc., with 6.7 million. (The two companies are unrelated; "cablevision" is a name widely used in the industry.) In 1987, the year Telesat made its debut in Orange County, Fla., Cablevision Industries charged \$10.95 a month in its markets, and the Times Warner unit \$12.85.

Both incumbents quickly cut their rates to \$6.50—but left prices unchanged in neighborhoods that couldn't get Telesat. William Brown, president of Time Warner's unit there, calls the simultaneous rate drop "coincidence," adding "there was absolutely no collusion."

Between the price wars and the race between companies to wire homes, Orange County quickly became a hodgepodge of different cable rates for different enclaves. Cindy Utter, who lives in one of Orlando's blue-collar subdivisions, pays the Time Warner unit \$20.70 a month. But just down the road, in an area that gets Telsat, her neighbors pay Time Warner \$13.95 monthly. "It's not fair," Ms. Utter fumes. Counters Time Warner's Brown: "It's fair to meet competition wherever it comes up. You have to protect your market share short of losing money."

#### HOMEOWNERS GET INVOLVED

In 1990, at the behest of embittered residents, the local homeowners' association took the lead in pushing for an ordinance that would prevent cable companies from charging different prices for cable in the same market. "We had a lot of people mad that they were subsidizing their neighbors' cable bill," says Cheryl Moore, then-president of the Orange County Homeowners Association.

Time Warner orchestrated the industry's counterattack, sparing no effort to make its presence felt by local politicians. On the day

the Orange County Commission voted on the proposed ordinance, big cable trucks surrounded the building, and inside, virtually every seat was taken by Time Warner employees, who had been given time off with pay to attend the meeting.

They had arrived that morning shortly after 7 a.m. for the 9 a.m. showdown. "The residents were forced to stand up in the back, and there as no parking for blocks," Ms. Moore says. "The people were livid." Time Warner's Mr. Brown says, "We gave employees time off and it was voluntary, but I'm pleased we had such a terrific turnout."

Heated debate ensued as the sides presented conflicting economic data. In the end, the ordinance failed, 3-2, with three Republican commissioners voting against it. The incumbents' presentation was made by two cable-company attorneys active in Republican fund raising. "Special interests hit a grand-slam home run and the residents lost," Linda Chapin, a commission member who spearheaded the argument for the new ordinance, said at the time. Weeks later, during a race for the job of commission chairman, Time Warner included campaign fliers for Ms. Chapin's (ultimately defeated) opponent in its monthly cable bill.

#### LEVEL PLAYING FIELD?

Telesat now blames its lower-than-projected cash flow and choked-off subscriber growth in Orange County on the failure of the ordinance. The company's 42% penetration there contrasts sharply with the 61% it achieved in nearby Citrus County, which adopted a uniform-pricing law. (A similar uniform-pricing provision is included in the regulation bill passed by the House and Senate.)

In Dade County, Telesat got stopped dead in its tracks by a state law known as the "level playing field" act. In theory, it was designed to ensure that the second cable franchise wouldn't get more favorable treatment than the incumbent. But in the 10 states where such legislation has been enacted, many cable newcomers contend it has enabled incumbents to manipulate the franchising process. Often at the established cable company's urging, local governments hold public hearings and conduct extensive studies on the impact of so-called overbuilders. In the end, communities frequently end up imposing more burdensome financial obligations and construction schedules on second cable systems. Dade County proved no exception.

For instance, a six-month, \$100,000 study into the feasibility of competition led to one delay after another in the processing of Telesat's application for a franchise. At every county meeting, Mr. Cushing, Telesat's president, says the incumbents prodded the county to ask for more data before taking any action.

Finally, after 2½ years of waiting, Telesat withdrew its application. Among other reasons, it cited in its FCC filing "no hope overcoming incumbent opposition with close political ties to commissioners." Later that year, the Dade County cable administrator who recommended doing a feasibility study was hired by Tele-Communications Inc., owner of Storer Communications Inc., one of the incumbent operators, to run its Miami cable operations. Anthony Bello, the former cable administrator, says any suggestion that the two events were related is "poppycock," stressing that Tele-Communications had no pending business with the county at the time of his job negotiations.

Elsewhere in Florida, even as Telesat toiled to lay wire, it found it couldn't get ac-

cess to popular cable program networks, many of which are at least partly owned by the largest cable operators in the country. For instance, Telesat can't get the Sunshine Sports Network, which carries Orlando Magic basketball games and Florida State University sports. The Sunshine network is 51% owned by a group of cable operators and 49% owned by a partnership between cable entrepreneur Bill Daniels and Liberty Media Corp., a spinoff of Tele-Communications. The network is distributed through exclusive contracts to incumbent systems.

Today, Telesat is struggling in virtually all its Florida markets. Several of its operations have been sold to or merged with incumbent operators, some of which charge Telesat with being a "green-mailer"—industry jargon for a company that enters a market for the purpose of inducing a buy-out. Mr. Cushing, Telesat's president, denies the charge. "I have a firm belief in the American dream," he says, "but I am disillusioned."

The few U.S. communities that have achieved cable competition have emerged as pockets of envy for the rest of America's couch potatoes.

In Paragould, Ark., the incumbent Cablevision Systems Corp. was determined to be the only game in town. When the town launched a \$3.2 million bond issue to build its own cable system, Cablevision filed two lawsuits to stop it, and even offered to finance the new system on the condition Cablevision be allowed to operate it.

But the town system is up and running, and in the face of its first competition ever, once-villified Cablevision Systems has become a paragon of service. If it doesn't repair outages within one hour, it will give \$5 off or a free month of Home Box Office. And its rates are among the lowest in the country: Cablevision charges \$9.50 a month for 45 channels; the town charges \$12.50.

Paragould property owners have to pay an average tax of \$3 a month to defray the cost of the town's new system, but many think it's worth it. Amanda Gramling waited for years on the edge of town for cable service from incumbent Cablevision. But it wasn't until the town got into the business that both companies—Cablevision and the town system—beat a path to her door. "We're a lot better informed today, and we have one of the lowest rates around," says Mrs. Gramling, who now tunes into the town's live coverage of the county fair and her second-grade daughter's school plays. "We can thank competition for that."

Mr. INOUE. The President's contention that the conference report drops the provision that would have permitted the telephone companies to provide cable service in communities with up to 10,000 residents, ignores the fact that the FCC is presently conducting a proceeding to do just that. Moreover, if the conferees had retained that provision then the FCC would have been precluded from raising the limit should it find that telephone companies should provide cable service in communities with more than 10,000 residents.

This measure also addresses the exorbitant rate increases many consumers have suffered since deregulation. Rates for cable service have risen three times faster than inflation, and complaints about poor customer service have been numerous. To protect consumers, S. 12 gives the FCC, and in some cases, local

authorities, the ability to ensure that rates are reasonable where no competition exists. It also directs the FCC to establish customer service standards.

Regarding retransmission consent and must carry, I want to note that when the Senate considered this legislation in January, the cable industry and the President supported the Packwood substitute which contained both retransmission consent and must carry. Thus, every Member that voted for the substitute or S. 12 voted for both of these provisions.

It has been argued that S. 12 will irreparably harm the cable industry. It will not. Two Wall Street Journal articles have stated that this bill will not hurt cable stocks or cable's cash-flow.

Mr. President, I ask unanimous consent that these two articles be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Wall Street Journal, Oct. 1, 1992]

Cable's carping about the cost of the reregulation bill may be exaggerated.

Wall Street analysts remain stoutly bullish on cable-TV stocks despite cable industry grouching that the bill will mean up to \$1 billion a year in payments for programs the companies now receive free. Analysts like stocks such as Tele-Communications, Inc., Comcast Corp., Time Warner Inc. and others anyway. Why? Wall Streeters believe the cable operators' cash flow won't be affected. What's more, they say the law would do away with regulatory uncertainty.

If the bill now before President Bush passes, more than 1,100 local TV stations will negotiate with the 9,000 or so local cable systems over fees for programming. But analysts expect the cost to be well below the \$1 billion estimate. Analysts say most broadcast stations may opt for the status quo: free programming in exchange for their current position on the local cable system dial. Others may forgo cash in favor of, say, cross promotions.

Smith Barney's John Reidy says he'd be "very surprised" if there were any major cash outlays by cable firms.

#### CABLE TELEVISION RE-REGULATION PASSED BY HOUSE

(By Mary Lu Carnevale)

WASHINGTON—The house voted 280-128 for a bill that would reimpose rate regulation on cable television and stimulate competition against local cable-TV monopolies.

The vote total indicates that proponents could have a difficult time overriding an expected veto by President Bush, who reiterated his opposition to imposing a lid on cable-TV rates. A two-thirds vote in both houses of Congress is required to override a presidential veto.

The bill, a compromise ironed out last week by a House and Senate conference committee, would enable local governments to regulate rates for basic cable programming, based on guidelines developed by the Federal Communications Commission. It would allow the FCC to regulate basic rates when local authorities don't follow its guidelines or don't have the legal authority or sufficient personnel to do the job. The basic tier of cable-TV service would include local broadcast stations as well as the cable system's

public access, education and government channels.

Cable rates have risen about 60% since December 1986, when they largely were deregulated under the 1984 Cable Act.

To spur competition, the bill would require cable companies' program affiliates to make their programs available to emerging competitors, including microwave services and direct broadcast satellite services. It also would bar local franchising authorities from issuing exclusive cable-TV franchises, and it would permit cities and towns to operate their own systems.

#### ENORMOUS OPPOSITION

The measure now goes to the Senate, where it has run into enormous opposition from cable companies and Hollywood studios. Opponents were heartened by a letter President Bush sent yesterday to Senate Republican Leader Robert Dole saying he would veto the bill. The president's letter suggested that "Congress would best serve consumer welfare by promoting vigorous competition, not massive re-regulation."

Although the Senate voted 78-18 for a tougher measure in February, its vote next week is expected to be closer. Cable industry lobbyists, recently joined by Hollywood moguls, have been busy in recent days making personal calls on most senators.

Opponents want to win enough votes in the Senate to ensure that the measure can withstand any attempt to override a veto. Barring that, they will try to delay the Senate vote as long as possible so that President Bush could let the bill die after Congress adjourns.

In the past few weeks, the cable industry has targeted consumers with an aggressive advertising campaign on cable stations and in newspapers as well as bill inserts warning that the legislation would force cable systems to boost rates substantially. Supporters of the bill, including the Consumer Federation of America and the National Association of Broadcasters, charge that those claims are false and have asked for a Federal Trade Commission investigation.

#### HOLLYWOOD'S POSITION

Hollywood studios, which supply many popular TV programs, oppose the bill because even though it would allow local broadcasters to charge cable systems for carrying their programs, the studios believe they are entitled to some of that money. Under current law, cable companies pick up local broadcasters' signals for free.

While directly providing for regulation only on rates for basic cable service, the measure would authorize the FCC to investigate and resolve consumer complaints about rates for cable services that aren't in the basic, regulated tier. Many cable systems have set up new levels of service in anticipation of legislation that would regulate the basic service tier.

The bill also would require cable companies to update their systems within 10 years with technology that would let customers buy the basic tier of service plus any premium channel, without having to buy expanded basic service. The new equipment, which some cable companies already are installing in their networks and at customers' homes, also is used to provide pay-per-view services such as the Olympics triplecast.

Wall Street analysts said a new law wouldn't hurt cable stocks despite operators' complaints about new financial burdens. "I don't think the revenue or cash flow of cable operators will change dramatically if the bill is passed," said Kenneth Goldman, a cable-television analyst at Bear, Stearns & Co.

But he said it is unclear whether the FCC will exercise its authority aggressively beyond regulating the basic tier of service. Another unknown is the true cost of the provision allowing broadcasters to collect fees from cable companies. He said the provision "would require thousands of different negotiations between individual cable operators and broadcast stations."

John Redy, an analyst with Smith Barney, Harris Upham & Co., agreed that the bill "would be livable for the cable industry, if not desirable." He said it at least would clear up the regulatory uncertainty that has plagued the industry in recent years.—*Mark Robichaux in New York contributed to this article.*

Mr. INOUE. S. 12 passed the Senate earlier this year by a vote of 73 to 18.

Because of its wide support and logic, a majority of both Republicans and Democrats voted in support of this bill. Supporters of S. 12 include: cities, consumer groups, unions, public and commercial broadcast stations, the religious broadcasters, and senior citizens.

S. 12 will promote competition and impose regulation until that competition develops. I urge all of my colleagues to look beyond the rhetoric being employed by the cable industry and the President to the solid foundation that supports S. 2. I urge all of my colleagues to support S. 12 and override the President's veto.

In closing, Mr. President, may I just say that, as much as I admire my friend from Montana, I am certain he will agree with me that history has demonstrated that monopolies never create jobs. It is the system that we all admire and love, the free enterprise system, the competitive system, that provides jobs. Everyone agrees, Mr. President, that the cable industry is a monopoly. It is anticompetitive. If we put into practice the free enterprise system, that is when jobs will be created.

Mr. President, I yield the floor.

The PRESIDING OFFICER. Who yields time?

Mr. BURNS. Mr. President, I yield 3 minutes to the Senator from Rhode Island.

Mr. CHAFEE. Mr. President, 2 weeks ago I voted against the conference report to S. 12, the cable television reregulation bill. Today, I will vote to sustain the President's veto on this measure.

I regret that I must vote against S. 12, because I support some form of regulation of the cable television industry. I certainly agree that consumers need to be protected from being gouged by unscrupulous cable operators. I agree that legislation is needed to ensure that cable companies provide prompt and convenient services to their subscribers.

Unfortunately, Mr. President, this bill goes way too far. Although it includes rate reregulation and service provisions, it also includes many flawed provisions that could produce

unintended and potentially harmful consequences for consumers.

In short, I believe this bill does more harm than good and could ultimately cost consumers in the form of higher cable rates. In other words, Mr. President, this is a classic case of overreaching by the broadcasting industry. I would like to cite four principal reasons for my vote to sustain the veto.

First, I oppose the retransmission consent provisions in this legislation. Under this part of the bill, cable companies, at the option of the broadcasters, could be forced to pay a fee to local broadcast stations in order to carry their signals on cable. There is a legitimate debate about who benefits more when a cable system carries broadcast signals. Cable picks up the local broadcasters, and they convey them out to their subscribers.

Who gets the most out of it? Cable charges a fee for its services and gains an attractive marketing tool when they said they would carry the local station for 7, 8 or 9 or whatever it is. Broadcasters benefit from an expanded market penetration and improved signal reception in most instances.

My concern here is that the fee mechanism established in the bill would almost certainly harm consumers. After all, if cable is going to be required to pay a fee to the broadcasters, then it must raise the revenue to cover those costs. That is clear.

I understand that the head of CBS has said that this means a billion dollars to the broadcasters. Where is that billion dollars going to come from? It is going to come from someone, obviously from the consumers, namely the ratepayers, the subscribers to the cable. Consumers will be forced to absorb these new costs in the form of rate increases.

I believe retransmission consent will produce higher, not lower, rates for cable subscribers. How odd it is that this provision that they have to pay more is included in a bill that is labeled as a Consumer Protection Act.

Second, I oppose the bill's program exclusivity or forced access provisions. Under this section of the bill, cable companies would be prohibited from developing a television program and then enter into a contract.

Under this exclusivity provision the developer of a program cannot enter an exclusive arrangement. They have to sell to whoever comes along who wants to buy it.

Clearly television subscribers, cable subscribers, want new programming. After all, superior programming is one of the reasons people are prepared to pay \$30, \$40, or even \$50 in some instances per month for cable.

Almost certainly, the exclusivity provision in this bill that says you cannot sell to whom you want, you have to sell it to anybody who comes along, clearly that is going to result in a re-

duction in the number of programs that are produced by the developers, by the programmers.

What incentive, after all, is there for a cable system to risk developing a new program which may sell and may not be good and may be bad? If they hit it, they have to sell that program to a competitor or potential competitor.

I must say this is a peculiar provision. Since when in America do we dictate to whom one must sell one's goods or one's artistic creation?

Third, this bill would establish an all-encompassing regulatory structure. It would require the FCC to adopt nearly 30 new regulations governing the cable industry. It would regulate television set technology standards, TV and VCR equipment compatibility, and pay-per-view adapters. And while I support regulation to improve customer service and control prices, I cannot in good conscience support a bill that smothered cable in the crushing embrace of Federal regulation.

And, fourth, this bill will prove costly to both consumers and the Federal Government. Retransmission consent, technology requirements, and the costs associated with complying with more than two dozen new Federal regulations will increase costs for cable companies who will inevitably pass these costs along to consumers. Not only the retransmission programs but a host of other factors will go up.

In addition, the Congressional Budget Office estimates that it will cost taxpayers more than \$100 million over 5 years to implement the requirements of this legislation.

Mr. President, most Rhode Island cable subscribers want what I want: to be assured of good service and of fair rates. Yet in this 50-page bill, just 8 pages are devoted to consumer service and rate regulation issues. The remainder of the bill is filled with regulation after regulation that has little to do with the consumer.

If the President's veto is sustained—and I hope it will be—I will be ready early next year to support genuine cable reform legislation to protect consumers from excessive rate increases and improve customer service.

The PRESIDING OFFICER. Who yields time?

The Senator from Missouri.

Mr. DANFORTH. I yield 5 minutes to the Senator from Washington.

The PRESIDING OFFICER. The Senator from Washington is recognized for 5 minutes.

Mr. GORTON. Mr. President, S. 12, this cable television bill has received great prominence over the course of the last 2 or 3 weeks, perhaps greater prominence than a bill on this subject would normally receive.

A great deal of concern has been expressed across the country and here in Washington, DC about the intensity of the lobbying over this issue, the huge

amounts of money in advertising by cable television companies and in return by television stations themselves, by the President on one side, by consumer interests on another side.

Paradoxically, it seems to this Senator that the very intensity of that lobbying, because it does come from both sides of the issue, and because in most cases it comes from groups with an obvious self interest in the outcome of the legislation, makes it easier rather than more difficult to vote for or against this bill on the merits of the bill itself.

No Member can make happy all of the lobbyists or lobbying organizations. Each Member may as well look at the provisions of the bill and make a determination as to whether or not it is good or not for himself or for herself.

One needs only to concentrate on the impact of this bill on those who are not lobbying, the unorganized consumers, the general public interests of the people of the United States. At that point it seems to me quite clear that the merits of the bill are overwhelming in favor of passing it notwithstanding the veto of the President.

Remember what caused the bill in the first place; the fact that an unregulated monopoly has increased prices of this service three times as rapidly as the Consumer Price Index has gone up over the period of time since that monopoly has been unregulated.

Remember the history of this Nation and of this body for a century and a half from the time in the middle of the second half of the 19th century when it first occurred to Congress that an unregulated railroad monopoly could not be permitted to exist. It is the theory of the free enterprise system that monopolies, where they are absolutely necessary, should in fact be regulated. But that far better than monopoly is competition. And it is the primary goal of this bill to create competition in cable television or in the provision of its goods and services not to reregulate. The reregulation takes place only where there is no competition and lasts only as long as there is no competition.

This bill is, in fact, consumer protection oriented. It is no accident that three former attorneys general of both parties are here on the floor to argue in favor of the bill.

We should not allow unregulated monopolies. We should create competition whenever possible. This bill accomplishes both goals. It is in the consumer's interest. If you vote in the interest of your unorganized constituents you will vote in favor of the bill.

The PRESIDING OFFICER. Who yields time?

Mr. DANFORTH. Mr. President, I yield 3 minutes to the Senator from Connecticut.

The PRESIDING OFFICER. The Senator from Connecticut is recognized for 3 minutes.

Mr. LIEBERMAN. I thank the Senator from Missouri and thank the Chair.

This is not, and should not be, an issue that divides us down the aisle of this Chamber that separates Republicans from Democrats.

When I first came to the Senate, I introduced a cable consumer protection bill with my Republican colleague from Connecticut, Congressman CHRIS SHAYS.

As I look around this Chamber at this moment, this bill only reached the floor of the Senate, because of the strong support given it on a bipartisan basis, including a leadership role by the Republican Senator from Missouri. A majority of both parties passed this bill on the Senate floor just 2 weeks ago. So let us stand together again today.

Let us reject the appeals of those who would make us believe that this bill has suddenly changed into a narrow struggle along party lines. Let us not let another good bill for the American people go down the drain of mindless partisanship.

The reality is that in the absence of competition the cable industry has relentlessly raised prices on the American consumer year after year. Since deregulation rates have climbed three times the rate of inflation. And the cable industry gets away with this kind of highway robbery because there is only one cable shop in most towns across America. And that is not what I take to be free enterprise.

A vote against this bill is a vote for the status quo. Without this bill there will not be nationwide minimum customer service standards for cable, and cable companies will continue to charge monopoly prices that are nearly 30 percent higher than they are in the very few markets in America where there is real competition.

Mr. President, in passing S. 12 we have heard the calls of America's cable consumers for help. We have forged changes in this bill that promote competition and protect consumers until competition arrives. Seventy-four Senators of both parties went on record supporting this bill just 2 weeks ago and nothing has changed in the cable marketplace since that time. The monopoly has not disappeared, competition has not appeared, and prices have not been controlled.

So I urge my colleagues to stand firm and together once again for fairness to cable consumers and vote to override the veto of S. 12.

I thank the Chair and I yield the floor.

The PRESIDING OFFICER. Who seeks recognition?

Mr. DANFORTH. Mr. President, I yield 5 minutes to the Senator from South Dakota.

The PRESIDING OFFICER. The Senator from South Dakota is recognized, Mr. PRESSLER.

Mr. PRESSLER. Mr. President, I rise to urge an override of the President's veto. I rise in support of S. 12, the Cable TV Consumers Protection and Competition Act. I would like to summarize my arguments in four parts.

First off, I am voting as I am because the sports fans of America are mad, and when the sports fans of America are mad, Congress must wake up.

From my State I have heard from sports fans who have been denied the option to get pay-for-view sports programs, because their local cable company has not taken the initiative to provide it. I have heard from sports fans who are in cable areas that have been denied programming from ESPN, and some of those are the rural electric cooperatives. They were not getting it until I personally intervened with the company.

The sports fans of America are mad, first of all, and they want this legislation to pass. It is a piece of consumer legislation.

The sports fans of America do not pay much attention to Congress, but they are watching this piece of legislation and they are consumers.

Second of all, small independent cable operators and others have been denied certain programming. Small, independent cable operators, home satellite dish distributors, and wireless cable operators have had to compete for years against the larger cable television operators for programming on an uneven playing field. The vertically integrated multisystem operators [MSO's] have long had a lock on programming. Outsiders find there is no way to join the MSO/video programmer club.

The cable giants have a stranglehold on programming and will not let go.

To explain what this means to the consumer: If they are in an area where there is going to be competition, the new competition cable company will be told you cannot get HBO, we have an exclusive contract with the existing company, or you cannot get the sports network ESPN, because it has an exclusive with the incumbent cable company. And frequently the incumbent cable company owns a part of the programming supplier.

This will be changed under this piece of legislation. This is true consumer legislation.

Third, access to programming is a serious problem for people in smaller cities, and most people in this country live in smaller cities. Even the people of California, most of them, live in smaller towns and cities. That is one of the reasons I disagree with the slogan of the campaign against small States. Most people think of themselves living in smaller cities or towns. But access to programming is a serious problem in many of these smaller cities, even in California. It does not have to be South Dakota.

Some programmers have absolutely refused to make programming available to those home satellite dish distributors who serve rural backyard dish consumers. Discriminatory pricing and refusals to deal with rural home satellite dish owners penalize consumers in the smallest towns and the farms and ranches in South Dakota and America. Today, satellite dish consumers pay 500 percent more for television programming than consumers using other technologies, and that is a fact. It is a very serious one.

As a Republican, I share the President's belief that competition should supplant more Government regulation. I have pointed out, this is not competition. This is monopoly and vertical monopoly, the cable companies working with the programmers to block out anybody new. I am one of those who voted for cable deregulation in 1984. I went all the way for the cable companies and at that time the broadcasters were fighting them.

Now I am back on the broadcasters' side. Who knows where we will find ourselves in the future?

But the point is, the cable people did a good job of wiring America, but then they abused their monopoly position. Then they began to invest and coinvest with programmers and now they are locking anybody new out. So we are going to have a stalemate.

The cable industry is not a competitive industry. It has no competition. It is an industry that has abused its monopoly position. Cable television rates have skyrocketed since 1984, when I and other Senators joined in deregulating the cable industry, hoping it would behave responsibly. This legislation will correct the situation.

Finally, the Consumer Federation of America and the Federal Communications Commission both estimate that this legislation will cost consumers over \$6 billion. That is in terms of the amount that will go back. The legislation will save consumers over \$6 billion in cable rate overcharges.

The PRESIDING OFFICER. The Chair informs the Senator that the 5 minutes allocated to him have expired.

Mr. PRESSLER. I ask unanimous consent for 1 more minute.

Mr. DANFORTH. I yield 1 more minute to the Senator.

Mr. PRESSLER. Opponents may contest this figure; however, earlier this year, Federal Communications Commission Chairman Al Sikes estimated that the rate of competition this bill would foster would bring about \$5.3 billion of savings to consumers.

So we have the Consumer Federation of America and Chairman Al Sikes, who is a Republican, estimating that consumers will get between \$5 and \$6 billion back in overcharges that would have been charged as a result of this bill. That is \$5 or \$6 billion.

So let us stand with the consumers.

Essentially what we are voting on today is a \$5 to \$6 billion tax relief package for cable consumers.

I urge my colleagues to support this tax cut for cable consumers, and I yield the floor.

The PRESIDING OFFICER. Who yields time?

Mr. BURNS. Mr. President, I yield 5 minutes to my friend from Mississippi.

The PRESIDING OFFICER. The Senator from Mississippi [Mr. LOTT], is recognized for 5 minutes.

Mr. LOTT. Mr. President, I thank the distinguished Senator from Montana for yielding me this 5 minutes, and congratulate him on the job that he has done on this issue.

I think just a little of history is in order here today. This bill, S. 12, has had a long and tortured history. I guess the Senator from Missouri and others have been working on it for at least 4 years, maybe longer. But it goes back beyond that. It really goes back to the early eighties when the cable industry was stifled by regulation, controlled by Government, and restricted from being able to grow and expand.

In its wisdom, the Senate, in 1984, deregulated the cable industry, and what did we have? We had an explosion of development, innovation, opportunity; things really improved all across this country. It worked. Deregulation worked.

Did they make some mistakes? Yes, because of the growth and because of the diversity, sometimes their service was not what it should be. Did rates go up? Yes, because rates had been artificially stifled by Federal Government regulation.

But, remember this, this is not an essential monopoly. It is not a utility. This is not something that is going to kill you if you do not have it. The health and safety of the community is not at stake.

The consumers still have the ultimate weapon on cable and its service and its rates. They do not have to pay it. They can demand that the rates be lower, or they can say I will go to some other option.

And there will be other options, lots of other options in the future. In the next 4 years, next 10 years, you are going to see tremendous developments in this area, many different options of how you get your cable. And I have no doubt that the telephone companies and other companies are going to be in this area offering competition and development.

Yet it is being said we must have Government reregulation. How did this happen? Some people say: Well, the service is not good enough; the rates have gone up too high.

Talking about a rural State, here is my rural State of Mississippi. I do not know how well my colleagues can see it, but all these red dots here represent cable companies in Mississippi. And

then the little black numbers right here also represent them. You see that my rural State of Mississippi is literally covered now by cable service. And that is fantastic.

But there is another interesting thing about this map. Under existing FCC regulations, all of the reds already are regulated by the Government. Only the few little black ones around Jackson and along the coast and right up into the Memphis market are not already regulated.

Under this administration, the FCC has already moved in and started doing some regulation where it is needed.

So my question is: Why do we need this at this particular time? It know it is a tough vote. It is a tough call.

There are some good things in this bill and I have supported them along the way in committee and when it was here in the full Senate.

But I continue to raise questions and reservations about too much regulation and what is going to happen when this is turned back over to municipal governments. I think in the end we end up with a bill that is too much regulation and is going to drive up costs. I cannot understand how people say this will save money.

Even the Congressional Budget Office has pointed out that for the FCC to implement these new regulatory requirements, it will cost taxpayers \$100 million over the next 5 years. State and local governments are expected to spend another \$8 to \$14 million a year to implement these regulations.

This bill will require cable operators to spend \$5.8 billion to deploy scrambling technology and equipment. The retransmission consent provision, according to the chairman of CBS, could cost the consumers up to \$1 billion.

In the end, somebody pays. Nobody is just going to absorb these additional costs.

I think any Senator in this Chamber would have to admit there will be more costs associated with more regulation. The subscribers are going to pay it; the consumers are going to pay it and the taxpayers are going to pay it.

So do not ever have any doubt in your mind that this reregulation is going to solve the problem. The thing that will solve the problem is competition.

But, this should not be the end of this process. We should vote here today to sustain the President's veto. We should come back next year and do a better job to encourage competition. We should not go for regulation and more artificial cost increases. We can do it right next year. This is not the end. This could be the beginning of what we really need to do in this legislation.

I should point out also that there are serious constitutional questions, first amendment questions.

The PRESIDING OFFICER. The Chair informs the Senator from Mis-

Mississippi that the 5 minutes allocated to him have expired.

Mr. LOTT. There are many other points I could make.

I will stop by saying this reregulation is a cost increase.

I urge my colleagues to vote to sustain the President's correct veto of this issue.

The PRESIDING OFFICER. Who yields time?

Mr. DANFORTH. Mr. President, I yield 1 minute to the Senator from Washington.

Mr. GORTON. Mr. President, in my earlier remarks I alluded to the fact that lobbying on this issue has been intense, that it has been conducted almost entirely by organizations with a financial interest in the outcome of the legislation on one side or another.

I find with some amusement that this statement applies even on the Olympian heights of newspaper editorialists who so often tell us that they act solely in the public interest.

I wish to share with my colleagues the last paragraph of a story which appeared in yesterday's Washington Post, and I will quote it:

One congressional aide who reviewed about 75 newspaper editorials about the cable bill found that newspapers owned by companies with interests in the cable industry opposed the bill uniformly. Newspapers whose companies owned only broadcast stations, or had no holdings in the TV business, favored the bill about 80 percent of the time, he said.

So, perhaps we could ignore the newspaper editorials, whichever side of the issue they find themselves on.

The PRESIDING OFFICER. Who yields time? The Senator from Missouri.

Mr. DANFORTH. How much time is left on my side?

The PRESIDING OFFICER. A little over 9 minutes.

Mr. DANFORTH. Mr. President, I yield myself 6 minutes.

I speak as a Republican politician and as a strong supporter of President Bush. And I speak as the Senator whose name happens to be first on S. 12. Along with Senator HOLLINGS and INOUE, I introduced this bill almost 2 years ago.

I want to say first of all that there are good arguments on both sides of this legislation. The President, in vetoing the bill, is true to what he takes to be basic Republican philosophy, which is that Government regulation is a problem for this country and we have to try to reduce that problem and reduce the amount of regulation.

Mr. President, I generally agree with that position. I certainly do not agree with some of the more partisan things that have been said attacking the President of the United States for his position on this bill. I do not agree, for example, with the statement of Mr. George Stephanopoulos, the communications director of the Clinton campaign, who made a statement October 3

saying that "George Bush slapped the American consumers across the face."

And I do not agree with Senator GORE's speech of September 29, when he said that the President was "owned lock, stock and barrel by the cable TV industry."

I do not agree with those statements. I do not think they are right. I do not think they are fair.

The President is doing what he thinks is correct and he believes he is opposing overregulation. The difference of opinion here has to do with when regulation is appropriate and when it is not. The President is against overregulation, against reregulation. The philosophy that is espoused by those of us who support this bill is that without regulation, cable companies in each particular community amount to unregulated monopolies, monopolies which have allowed consumer rates to go up three times the rate of inflation since 1986.

That is the difference of opinion. It is an opinion that can be fairly held by people on both sides. I would hope whoever ends up winning this argument does not gloat about it and does not try to rub it in.

I want to say a word about the role of Republicans particularly in the Senate with respect to this legislation, because Republicans have had a big hand in this legislation. Those of us who support it believe that we are very much in the tradition of a great Republican President, Theodore Roosevelt. In 1889, when the predecessor of this bill, S. 1880, was introduced, there were 7 Republican cosponsors for the bill and 8 out of 9 Republicans on the Commerce Committee voted to report the bill out of the committee. Then when S. 12 was introduced and reported out of the Commerce Committee, 6 of the Republicans on that committee voted to report S. 12 out, and 27 Republicans voted for final passage in the Senate and 24 Republicans voted for the conference report. And in the House, 98 Republican House Members voted for the bill and 71 voted of the conference report.

Since passage of the bill, when the bill was in conference, an effort was made to move in the direction of the President and during conference the President won some victories. For example, with respect to the definition of the basic tier of cable television that could be regulated by the communities, that was a victory for the administration. And there was another victory for the administration during the Senate debate in the prohibition of cities from granting exclusive franchises, moving in the administration's direction with respect to the importance of competition.

I would also like to say that I am sure that many of my friends on my side of the aisle are concerned about voting against the President, particu-

larly this close to an election, and are concerned about what is the effect of overriding a Presidential veto. I know that a lot of weight has gone on the President's perfect record on vetoes so far. But I would simply like to point out that a lot of Presidents have had vetoes overridden and a lot of them have been very strong Presidents.

Franklin Roosevelt, for example, had 9 vetoes overridden; Harry Truman had 12 vetoes overridden by Congress; Dwight Eisenhower was overridden twice; Richard Nixon 7 times; Gerald Ford 12 times; Jimmy Carter twice; Ronald Reagan was overridden 9 times.

So it is no weakness on the part of the President of the United States if he happens to have a veto overridden. It is no point of disrespect at all. It is a matter simply of disagreement.

The PRESIDING OFFICER. The Chair informs the Senator the 6 minutes he requested has expired.

Who yields time?

Mr. BURNS. I yield 5 minutes to the Senator from Colorado [Mr. WIRTH].

The PRESIDING OFFICER. The Senator from Colorado [Mr. WIRTH] is recognized for 5 minutes.

Mr. WIRTH. Mr. President, since we sent S. 12 to President Bush, the politics surrounding a possible override vote have been the focus of discussions and press reports about the bill. No matter how intriguing the political story might be, I do not think we should lose sight of the substance behind this bill.

If politics were the only factor at work here, I might want to support an override to help end President Bush's perfect record on override votes. But I will vote to sustain the President's veto because I believe S. 12 is bad communications policy and will actually hurt consumers, not help them.

#### TELECOMMUNICATIONS POLICY GOALS

S. 12, if it becomes law, will significantly influence the future shape of the telecommunications industry. We need telecommunications policies that promote the development of new technologies, products, and services. And our policies should seek to ensure that modern telecommunications is available to all Americans as we move further into the information age.

For nearly two decades we have been moving to a more competitive telecommunications marketplace. Competition spurs innovation and new technology. It also helps foster a diversity of communications equipment and information.

Innovation, lower prices, more choices, and broad access—these have been and should remain our goals. We need to consider whether the cable bill will help advance those goals or work against them. Unfortunately, the legislation does not pass that test.

#### S. 12 GOES WELL BEYOND ITS CONSUMER PROTECTION ROOTS

What began as an effort to address legitimate consumer problems has now

turned into a free-for-all involving several large and wealthy commercial interests. Cable's competitors have hidden behind consumer protection in order to advance communications policies that could never stand on their own. The financial rewards the legislation hands to these competitors clearly replaced consumer concerns as the driving force behind the bill.

For example, the broadcasting industry will benefit financially if the retransmission consent/must carry provisions become law. To get those rewards, the National Association of Broadcasters [NAB] has financed and led a massive lobbying campaign in support of the legislation. The NAB has gone so far as to implore broadcast stations to use their news programs as a lobbying tool to help the legislation become law. The legislation has gone so far beyond its pro-consumer roots that it would do consumers more harm than good.

#### CABLE ACT OF 1984

We've heard a lot of criticism of the Cable Act of 1984 as a sell-out of consumers. That criticism ignores the benefits consumers have reaped from that legislation. It has made it possible for the cable television industry to invest in new equipment, programming, and technology.

Because of those investments, consumers have access to a greater number and broader variety of programming choices. Consumers have much more to pick from today—whether they prefer news, local affairs, sports, children's, arts, movies, entertainment, or other types of programming. The rapid growth in the number of cable subscribers since 1984 confirms that consumers themselves recognize the benefits the Cable Act has made possible. Let me outline some of the programs we have seen since the Cable Act.

#### MORE CONSUMERS RECEIVE CABLE

The number of cable subscribers has increased from 30 million in 1984 to 56 million today. The number of cable systems climbed from 6,000 in 1984 to more than 11,000 today. Ninety-six percent of television homes can now receive cable. Only 72 percent could in 1984. More than 60 percent of these homes actually subscribe today.

#### CABLE VIEWERS GET MORE FOR THEIR MONEY TODAY

Ninety percent of cable subscribers received at least 30 channels, with the average subscriber getting more than 35. In 1984, only 38 percent of all cable systems offered 30 or more channels. One-third of all cable subscribers now receive 54 or more channels; channel capacity continues to increase—late last year a 150-channel system was launched in New York.

The price consumers pay for each basic channel increased at a lower rate than inflation from 1986, when rate deregulation took effect, to 1991. In 1986, consumers paid 44 cents per channel.

The inflation rate would have brought that figure up to 54 cents by 1991. Instead, consumers only paid 53 cents per channel in 1991.

#### CABLE HAS INVESTED IN NEW PROGRAMS FOR CONSUMERS

Cable operators' annual investments for basic cable programming have jumped from \$300 million in 1984 to almost \$1.8 billion this year. Overall program spending by both basic cable networks and premium cable services, like HBO, Showtime, and the Disney channel, has climbed from \$1.1 billion to \$2.8 billion during this period.

The number of cable networks—like C-SPAN, Discovery, CNN, ESPN, and TNT—has increased from 49 in 1984 to 76 in 1991, with continued expansion expected through the 1990's. These new networks have given viewers a wide choice of news, public affairs, entertainment, educational, children's, and sports programming.

#### CABLE IS MODERNIZING OUR COMMUNICATIONS INFRASTRUCTURE

Since 1984, the industry has invested more than \$5.4 billion in plant and equipment. Before the Cable Act, annual spending in this area was \$100 million. Consumers have benefits from the improved picture quality, reliability, increased availability of cable, and greater number of channels that this investment in new technology has made possible.

Technologies such as fiber optics and digital compression promise a huge jump in the number of channels available to viewers. At a time when many other industries have dropped their research capabilities, cable established CableLabs, a new research and development consortium. The industry has already begun to introduce fiber optics in many systems throughout the country and is working to bring high definition television and interactive series to consumers.

#### CABLE IS CREATING NEW JOBS FOR AMERICAN WORKERS

Cable has brought jobs to thousands of Americans since the Cable Act became law. Cable provided 67,000 jobs in 1984 and employs more than 106,000 today. The industry generates another 69,000 jobs through its suppliers.

#### CABLE'S PUBLIC INTEREST OBLIGATIONS AND EDUCATIONAL SERVICES

The Cable Act includes important equal employment opportunity provisions to prohibit discrimination in employment in the industry and encourage the industry to hire minorities and women. No other sector in the communications industry has agreed to a similar statutory obligation. The Cable Act allows franchising authorities to require that channels be dedicated to public, educational, or governmental use and requires cable systems to make channels available for commercial use. The Cable Act prohibits redlining of services, and requires operators to disclose to subscribers the kinds of infor-

mation the cable operator collects and maintains about customers.

The Cable Act permits cities to collect a franchise fee of up to 5 percent of gross revenues. The industry paid \$826 million in franchise fees in 1991, up from \$200 million in 1984. That's one quarter of the aid we provide cities through the Community Development Block Grant Program.

The cable industry's "Cable in the Classroom" program began in 1989 and now reaches nearly half of our public school junior and senior high school students with commercial-free educational programming at the industry's expense, \$53 million annually.

The industry has also developed programs that allow students to earn college and graduate degrees at home from accredited colleges and universities. These programs are available to millions of homes.

#### THE LEGISLATION WILL HURT CONSUMERS

It's true, in recent years, there have been some problems with basic cable rate increases and poor customer service that deserve out attention. I would support legislation to address the legitimate consumer issues. In fact, I worked hard 2 years ago in an attempt to pass balanced consumer protection legislation. The final legislation has become overweight with favors for cable's competitors, including: ABC, CBS, NBC, and other broadcasters; direct broadcast satellite operators like General Motors' Hughes Communications subsidiary; and wireless cable operators. These provisions do not protect consumers.

The bill will hurt consumers in a number of ways: First, it will drive up cable systems' operating costs by billions of dollars. Estimates of the bill's costs run between \$2 and \$6 per month for each cable subscriber. The sponsors of the bill argue that they do not intend for these costs to be passed along to consumers. Who are they kidding?

Where else is the money going to come from? Will the Federal Communications Commission really be able to force a cable system to leave its rates unchanged after its costs go up so dramatically?

How will the bill lead to higher rates? In some cases, it will require payment of so-called retransmission consent fees for broadcast programming that consumers receive for free today. That money will go right in the pockets of America's television broadcasters. I don't think there's any doubt that the average cable viewer needs the money more than television station owners.

The legislation will also require cable systems to install expensive new equipment. The new equipment is intended to allow consumers to pick and choose between all cable networks rather than paying for a package that includes stations they do not want.

But do not worry about the over-the-air broadcasters; they get a special

deal. If the legislation is enacted, consumers who want to buy any cable stations at all, would have to pay for the broadcast stations that they can already get over the air for free.

In order to make this transfer of income from consumers to broadcasters possible, the legislation will force the cable industry to spend as much as \$5 billion installing the new equipment. That will put upward pressure on rates.

Another part of the legislation that will hurt consumers is program access. Under this scheme, the creators of cable programs would be forced to sell the programs to their competitors. Think about that: A person creates a piece of intellectual property. Then the Government dictates who he must sell to and at what price. It's easy to see what will happen to the incentive to invest in new programs. The result will quickly be fewer choices for consumers.

Cable's competitors, not consumers, will benefit from program access. These competitors already can deliver cable programs to consumers at competitive prices. They will have no incentive to lower rates after program access lowers their expenses. They will just pocket higher profits. Retransmission consent, new equipment costs, increased operating costs, program access, and a rate regulatory structure that is overly cumbersome will all limit the cable television industry's ability to invest in new equipment, programs, and technology. As a result, the quality of cable service will stagnate. It may even decline. Viewers will get less new programming and more reruns.

Cable will also be less able to help modernize our communications infrastructure—so important to our future economic vitality—or bring consumers the wide range of new communications technologies, products, and services that are on the horizon.

#### CONCLUSION

We have not yet achieved our goal of a fully competitive marketplace. That's why it's necessary that we take some interim steps to protect consumers. However, competition is taking hold and increasing within the rapidly evolving video marketplace. Regulators have also recently taken several significant steps to accelerate the trend toward greater competition. Unfortunately, the legislation ignores these trends. It looks to the past to resolve today's problems, with no eye to the future. Whatever short-term benefits the cable bill may provide consumers will soon be dwarfed by the later costs. In the end, the only people who will be happy with the legislation are the special interests that it rewards.

If we do pass the legislation and it becomes law, we will have a great deal of explaining to do when our constituents see their cable bills increase. Are we prepared to defend our votes for leg-

islation that drove up cable rates? What will we say, that we thought it was in the public interest to hand broadcasters and other cable competitors higher profits out of consumers' pockets?

There is no question what we should do. This legislation is a handout for special interests that will hurt consumers in the long term. I wish we had not reached this point. If the legislation did not include so many extraneous provisions and instead tackled the legitimate consumer issues of rates and customer service head on, I believe it would already be law.

Unfortunately, the legislation does go well beyond consumer protection and I believe consumers will be better off if we do not enact legislation this year. The Senate should vote to sustain the President's veto.

Mr. President, this is another chapter in a very long saga related to attempts by entrenched industries in the country to stifle competition. This has been going on, particularly in the telecommunications industry now, for 60 years or more. We have had to write the Communications Act of 1934 to encourage competition in the public interest, to regulate in the public interest, convenience and necessity. Unfortunately as it related to new entries, the powers that were in the marketplace did everything they could to keep new entries out. We saw that in radio, we saw that in television, and we saw that certainly up one side and down the other related to cable.

Here was a new entrant, the new guy on the block, starting in the late 1960's as a faint sort of idea, gathering momentum in the 1970's and then enormous pressure to keep cable out of the marketplace.

Some of us who have fought that for a long time believe that our policy in the United States should be encouraging competition; it should be encouraging new entries; should be encouraging new technologies; should be encouraging new services and not leave it to a monopolistic few. That is why we passed the Cable Act of 1984, which has in fact been beyond our wildest dreams in terms of many, many of the successes it brought.

Consumers have signed up for cable very rapidly, where more than 50 percent of the households are touched by cable television; 96 percent of the television sets can receive cable. The explosion of that technology has taken off. Cable viewers get more for their money today than they ever have before. In fact, their cost per channel that they are receiving is less than it was when the legislation was passed which allowed the new entrant in. Cable itself has invested in a vast number of new services and offerings and now remains about the only public service broadcaster left around—the only public service left around.

There is no children's television, for example, on over-the-air broadcasting; look at how much time we have all spent watching CNN, and the vast number of new services offered.

Cable is remarkably also putting a huge amount of money into modernizing our whole telecommunications network. Fiberoptics is the network of the future and cable has been there first and foremost.

The public interest in educational offerings of cable are legion and I have mentioned them in this debate over and over and over again over the last number of years.

So this new entrant, bringing new services and bringing new ideas, is exactly what we ought to be encouraging. Unfortunately we now see the pressure from the established groups to try to put the new fellow down and to try to get a bigger piece of the action, transferring through regulatory and legislative action that which they could not do in the marketplace.

There are some legitimate issues that ought to be addressed in legislation. And those legitimate issues are in places where rates have been abused. There have been some cable operators who have not operated I think in the public interest, who raised their rates too rapidly. What we ought to be doing is allowing the FCC to regulate rates. That is fine. We ought to be looking at consumer issues such as quality of service. That is a perfectly legitimate thing to do. Cable has grown very rapidly and in some places has not been able to keep up with its own marketplace and we ought to be setting standards for the provision of services.

Those are legitimate issues and that is what we ought to be doing. But on top of that we have added this kind of bonanza for a whole set of interests that are out there.

What will this do? This, for example, is going to cost consumers a vast amount of money. The idea of retransmission consent alone, which arrogates to the broadcasters the right to charge for programming that is owned by a whole lot of people, for the most part is going to cost consumers a billion dollars a year. Program access is going to say to the people who are making programs: We are going to tell you how much you can sell your programs for. Can you imagine a book seller being told by the Congress who can buy his book and at what price?

Equipment mandates in this bill are going to cost the industry \$5 billion. Who is going to pay that? Is that going to come out of the blue sky? The consumers are going to pick up the equipment mandates. They are, in fact, mandated by the competing interests out there. Rates are going to go up in this bill by a great deal, probably \$2 to \$6 a month. Watch this, \$2 to \$6 a month, if this bill becomes law.

Cable is going to be discouraged, as it is already, from new investments in

the equipment which cable was doing such a good job with. That is going to come to a screeching halt. And certainly it is going to be discouraged from offering the kind of program content that we would like to see. Cable has so many promising new ideas coming to television, and these are now being stifled. People are putting on hold all these new ideas. They are not going to do it anymore.

All of these are the negatives in this bill written in by cable competitors. These have nothing to do with rates. These have nothing to do with service. These have nothing to do with legitimate issues in the bill related to services and related to rates. What these are is an attempt by a whole variety of other interests to raid through legislative action that they could not do in the marketplace.

We should not support that kind of activity. We should not support this kind of legislation. What we should do is sustain what is one of President Bush's good vetoes.

I thank the distinguished Senator from Montana for yielding.

Mr. President, I ask unanimous consent that a fact sheet on cable television since the Cable Act of 1984 and a fact sheet about what is wrong with S. 12 be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

**FACTSHEET—CABLE TELEVISION SINCE THE CABLE ACT OF 1984**

**1. More consumers receive cable.**

The number of cable subscribers has increased from 30 million in 1984 to 56 million today.

The number of cable systems climbed from 6,000 in 1984 to more than 11,000 today.

96 percent of television homes can now receive cable. Only 72 percent could in 1984. More than 60 percent of these homes actually subscribe today.

**2. Cable viewers get more for their money today.**

90 percent of cable subscribers receive at least 30 channels, with the average subscriber getting more than 35. In 1984, only 38 percent of all cable systems offered 30 or more channels.

One-third of all cable subscribers now receive fifty-four or more channels; channel capacity continues to increase—late last year a 150 channel system was launched in New York.

As a result of the increasing number of channels, cable viewers actually get a better deal today. The price consumers pay for each basic channel increased at a lower rate than inflation from 1986 (when rate deregulation took effect) to 1991.

The average price per channel has increased from 44 cents in 1986 to 53 cents in 1991. If the increase had matched inflation, the per channel cost would have reached 54 cents in 1991.

**3. Cable has invested in new programs for consumers.**

Cable operators' annual investments for basic cable programming have jumped from \$300 million in 1984 to almost \$1.8 billion this year.

Overall program spending by both basic cable networks and premium cable services,

like HBO, Showtime and the Disney Channel, has climbed from \$1.1 billion to \$2.8 billion during this period.

The number of cable networks—like C-SPAN, Discovery, CNN, ESPN, and TNT—has increased from 49 in 1984 to 76 in 1991, with continued expansion expected through the 1990s.

These new networks have given viewers a wider choice of news, public affairs, entertainment, educational, children's, and sports programming.

**4. Cable is modernizing our communications infrastructure.**

Since 1984, the industry has invested more than \$5.4 billion in plant and equipment. Before the Cable Act, annual spending in this area was \$100 million.

Consumers have benefited from the improved picture quality, reliability, increased availability of cable, and greater number of channels that this investment in new technology has made possible.

Technologies such as fiber optics and digital compression promise a huge jump in the number of channels available to viewers. At a time when many other industries have dropped their research capabilities, cable established CableLabs, a new research and development consortium.

The industry has already begun to introduce fiber optics in many systems throughout the country and is working to bring High Definition Television and interactive services to consumers.

**5. Cable is creating new jobs for American Workers.**

Cable has brought jobs to thousands of Americans since the Cable Act became law. Cable provided 67,000 jobs in 1984 and employs more than 106,000 today. The industry generates another 69,000 jobs through its suppliers.

**CABLE'S PUBLIC INTEREST OBLIGATIONS AND EDUCATIONAL SERVICES**

The Cable Act includes important Equal Employment Opportunity provisions to prohibit discrimination in employment in the industry and encourage the industry to hire minorities and women. No other sector in the communications industry has agreed to a similar statutory obligation.

The Cable Act allows franchising authorities to require that channels be dedicated to public, educational or governmental use and requires cable systems to make channels available for commercial use.

The Cable Act prohibits redlining of services, and requires operators to disclose to subscribers the kinds of information the cable operator collects and maintains about customers.

The Cable Act permits cities to collect a franchise fee of up to five percent of gross revenues. The industry paid \$826 million in franchise fees in 1991, up from \$200 million in 1984 (That's one quarter of the aid we provide cities through the Community Development Block Grant program).

The cable industry's "Cable in the Classroom" program began in 1989 and now reaches nearly half of our public school junior and senior high school students with commercial-free educational programming at the industry's expense (\$53 million annually).

The industry has also developed programs that allow students to earn college and graduate degrees at home from accredited colleges and universities. These programs are available to million of homes.

**WHAT IS WRONG WITH S. 12**

Retransmission consent: The retransmission consent provisions could force con-

sumers to pay more than \$1 billion per year for over-the-air broadcast signals they can now receive for free.

Program access: These provisions will force cable programmers to provide programs to their competitors at cut-rate prices.

Equipment mandates: Would require cable companies to install expensive new equipment that will cost the industry \$5 billion.

Likely to raise rates: The increased operating costs of retransmission consent, equipment mandated, and complying with an overly complex regulatory framework will inevitably be passed along to consumers. Estimates of these costs range from \$2 to \$6 per month for each cable subscriber.

Kills investment: The increased operating costs and program access will dramatically curtail the industry's ability to invest in new programs, equipment, and technology. Consumers will suffer as the quality of cable service quickly stagnates and eventually declines.

Handouts to cable's competitors: Retransmission consent and program access will transfer billions of dollars from consumers into the pockets of over-the-air broadcasters and satellite television distributors such as General Motors' Hughes Communications subsidiary.

Will keep a system from adding new cable networks: The prohibition on negative option billing is poorly written and unclear. It can be read as requiring a cable system to obtain the approval of every cable subscriber before adding a new cable network or other new service. That would either prevent systems from adding new networks or force them onto unregulated pay-per-view channels.

Mr. WIRTH. I yield the floor.

The PRESIDING OFFICER. Who yields time?

Mr. DANFORTH. Mr. President, I yield the remainder of my time to the Senator from Ohio.

The PRESIDING OFFICER. The Senator from Ohio is recognized for 2 minutes 56 seconds.

Mr. METZENBAUM. Mr. President, I rise to urge my colleagues to override the President's veto of S. 12. Here in the Senate, this issue has not been a partisan issue. There has been broad support for cable reform legislation among both Democrats and Republicans. And if we vote to override the President's veto, we will show just how bipartisan this issue really is.

The vote today presents my colleagues with a choice: You can vote to preserve the unrestricted power of the cable monopolies, or you can vote to protect consumers against a \$6 billion raid on their pocket by the cable monopolies.

The need for this legislation is clear. The record shows that the cable industry is abusing its power as an unregulated monopoly in overcharging consumers by billions of dollars each year.

Over 3 years ago, at a hearing held by my Antitrust Subcommittee, the Consumer Federation of America revealed that cable consumers are being overcharged by as much as \$6 billion per year. A number of other studies have shown the cable industry has been

exploiting its monopoly power and overcharging consumers ever since deregulation took effect in 1967.

The cable monopolies have overcharged consumers, stifled competition, and engaged in a propaganda campaign which distorts the truth and misleads the public. If we do not enact this bill, the consumers of this country will remain vulnerable to monopoly abuses by the cable industry.

The President made his choice. He decided to stand with the cable monopolies and against consumers. The Senate need not.

I urge my colleagues on both sides of the aisle not to repeat that mistake, too. The veto should not stand. I urge my colleagues to vote to override.

The PRESIDING OFFICER. Who yields time?

Mr. BURNS. Might I inquire of the time remaining on this side?

The PRESIDING OFFICER. There is 5 minutes, 20 seconds.

Mr. BURNS. I yield 3 minutes to my friend, Mr. STEVENS, from Alaska.

The PRESIDING OFFICER. The Senator from Alaska is recognized for 3 minutes.

Mr. STEVENS. Mr. President, I joined a bipartisan group to try and find an alternative that was acceptable to the White House. I still regret that we could not find the support in the Senate for that. It provided basic rate regulation and increased competition. It would have increased the rural exemption to 10,000, and would not have restricted program access. I am particularly concerned about the rural exemption.

Back in the time when cable first came to Alaska, it came to the small cities and it was carried over the telephone wires. That led to our insistence there be an exemption for rural areas to provide cable service through the telephone system. This bill would have increased to 10,000 that exemption, and it would have meant lower rates for many rural areas.

I think that the way to lower rates is through competition and, in my judgment, this bill goes back to reregulation and puts an additional burden now, both on the private sector and on government, to pay for reregulation, instead of trying to stimulate the competition that will come with the development of new technology.

Telephone companies in this country have almost universally deployed networks that can provide video programming. Telephone companies realize the economies of scope in the provision of voice data and video services which could lower the cost of providing each type of service.

We have new telecommunications technologies, fiber optic cable, burst cable—there are a great many technologies coming—they are on the screen; many people have talked about them today—that will make a great deal of difference to the consumer.

I regret very deeply the feeling I have that the President's veto is going to be overridden. I intend to try to sustain it. The reason I regret it is that I feel, without question, this bill will bring increased costs to cable subscribers. It will put us back into reregulation in a period when we should be going ahead into fostering more competition. Worse than anything else, it does to the rural areas of our country a great injustice in not recognizing the problems.

Take just the one example of the addressable converters. How many people in my State want an addressable converter? And yet, the system that serves them will have to buy one for each one of them, whether they need them or not. I am told that the cost of cable service for those addressable converters will be up to \$5.8 billion before this bill is totally enforced.

If the megalopolis of this country want this kind of reregulation, then they ought to have it. I do not believe we need it in rural areas.

The PRESIDING OFFICER. The Senator's time has expired. Who yields time?

Mr. BURNS. Mr. President, has all time on the other side expired?

The PRESIDING OFFICER. The answer is no; there is approximately 1 minute left.

Mr. BURNS. Mr. President, how much time remains on our side?

The PRESIDING OFFICER. The Senator controls 1 minute and 43 seconds.

Mr. BURNS. The Republican leader wants about 5 minutes, and he will take that out of his leader time, if that is possible.

So I ask unanimous consent that the Republican leader be able to take 5 minutes of his leader time to speak.

Mr. MITCHELL. What is the request, Mr. President?

Mr. BURNS. The Republican leader wants 5 minutes, but he wants to take it out of his leader time.

Mr. MITCHELL. I have no objection to that.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BURNS. Mr. President, I rise today to proudly stand, shoulder-to-shoulder, with President Bush in strong opposition to the massive, counterproductive cable reregulation bill which the President has vetoed. The cable reregulation bill promises consumer protection and competition but delivers neither. The reregulation bill will mean:

Higher cable rates for consumers;

Loss of American jobs;

A dramatic decline in the innovation of both cable technology and programming; and

Increased regulatory costs.

The President agrees with me that telephone company competition, as an alternative to reregulation, would mean:

Lower cable rates for consumers;

Improve service quality;

Offer greater richness and diversity of video programming;

Spur technological innovation by both cable television and telephone companies which will;

Improve our international competitiveness posture;

Spur domestic growth, job creation, and productivity gains; and

Through availability of education, health care, and other social services will provide Americans with a better quality of life.

I urge my colleagues to join me in:

First, sustaining the President's veto;

Second, opposing the reregulation bill; and

Third, supporting the President and me in pursuing alternative, procompetitive legislation in the next Congress.

#### BACKGROUND

I, like the President, recognize that there have been problems with basic cable rate increases and poor customer service that deserve our attention. Cable's performance, quite frankly, has been less than flawless.

The cable debate began as an attempt to address those legitimate consumer problems. The reregulation bill, however, fails to adequately address these consumer needs.

Let me make clear up front, Mr. President, that I have the greatest respect for Senators DANFORTH, INOYE, and HOLLINGS, who have diligently led the charge in support of this bill here in the Senate.

I, like President Bush, agree with my distinguished colleagues in vigorously pursuing the goal of improving service quality and lowering cable subscriber rates.

Unfortunately, these legitimate consumer issues have been used to advance communications policies that might not stand on their own. The reregulation bill includes layer upon layer of bureaucratic regulations, directives, and mandates that offer greater benefits to favored special interest sectors of the communications industry than they do to consumers. The result is a bill that is neither good communications policy nor good for consumers.

Many of the reregulation bill's provisions seek to resolve intraindustry disputes in favor of cable's competitors. Overreaching regulatory provisions will greatly limit cable's ability to invest in new programming and technologies which spur job creation.

We have seen dramatic growth in both the capacity of cable systems and the variety of programs available to viewers since the Cable Act of 1984 encouraged investment by the industry. Today there are more than 70 cable programming networks offering a highly diverse and rich range of specialized programming. Many more program-

ming networks are in the planning stage. Since 1984, the cable television industry has invested more than \$5.1 billion in plant and equipment, annual investment in basic cable programming has more than tripled, and cable service has become available to 90 percent of American homes. If that growth grinds to a halt, as a result of massive reregulation, consumers will see the quality of their service stagnate, if not regress.

In exchange, under the reregulation bill, consumers aren't ever assured of lower cable rates, as promised by reregulation proponents. It is very possible, even likely, that the legislation will actually lead to higher—not lower—cable rates, a fact which has been conceded by the supporters of the reregulation bill.

As just one of many examples, the reregulation legislation will certainly increase cable companies' operating costs by mandating that they install expensive new plant and equipment. These costs may well run into the billions of dollars. One study indicates that these and other expenses resulting from the legislation will add up to an additional \$2 to \$6 per month for each cable subscriber.

No one should be surprised if consumers wind up picking up this tab one way or another. Where else is the money going to come from? The sponsors of cable reregulation may not intend for the costs to be passed along to consumers. But will regulators be able to force cable companies to absorb those costs? I think not. And, not so surprisingly, the very sponsors of this reregulation bill have recently conceded that rate increases will continue under their bill.

The impact of this overreaching reregulation legislation will be felt by the economy as a whole, not just the cable industry and its subscribers. Moreover, the cable reregulation bill will increase Government's regulatory costs by tens of millions of dollars. In addition, cable is growing dynamic industry that is exporting its technology and programming abroad as well as expanding in the United States.

At a time when we are struggling to create new jobs and expand and improve our telecommunications infrastructure, why are we considering legislation that will damage an industry that has created nearly 40,000 new jobs since 1984 and is not now a critical component of our national communications system—which remains the envy of the world.

#### JOB AND ECONOMIC IMPACT

The cable reregulation bill will—plain and simple—cost America jobs. And in light of the economic downturn we're experiencing today, that loss of jobs is a price too high to pay.

As a policy-making body, we have a responsibility to look at the cable industry and determine how we might re-

solve some of the problems with cable without strangling it with unnecessary, counterproductive, burdensome regulations.

Our Government is good at imposing regulations and, frankly, I'm convinced that a major contributor to this recession we're experiencing today is unnecessary regulation that has strangled American business. Granted, some regulation is necessary in a free-market economy. But just last year, for instance, the Federal Government implemented 514 significant regulatory actions—significant meaning those regulations likely to have an annual effect on the economy of \$100 million or more, a major increase in costs or prices, or significant adverse effect on competition.

One recent comprehensive study conducted by Robert Hahn and John Hird from Yale found that the yearly societal cost of regulation is \$300 to \$500 billion. Regulation, down and dirty, raises costs, raises operating expenses, and raises the need for a business to make ends meet, often by laying off employees.

Right now, the citizens of this country are hurting. We've seen jobs lost throughout America, jobs with law firms, retail stores, banks, real estate enterprises, car manufacturers, and the list goes on. One industry, however, continues strong employment during these trying economic times and that is the cable industry. Throughout the last decade cable employment nearly tripled.

#### CABLE INVESTMENT IN TECHNOLOGY

In addition to job loss, let me briefly talk about the impact cable reregulation would have on cable industry investment in communications technology.

The cable industry has been at the forefront of advances in communications technology. Starting as a retransmitter of over-the-air broadcast signals, the cable industry pioneered the use of communications satellites as a distribution technology for entertainment and informational programming with the launch in 1975 of HBO's nationwide network via satellite.

The cable industry continues its advancement of technology by continually upgrading the technical quality and capacity of the more than 11,000 cable systems in the United States serving over 60 percent of television households. Moreover, cable is exploring the latest innovative services that can be provided through the cable medium. In 1989, for example, the cable industry spent close to \$1 billion rebuilding and upgrading plant and equipment—which was almost 73 percent more than the amount the industry spent improving its plant just 4 years earlier while still under rate regulatory constraints. This spending includes rapid growth in the application of cutting-edge technologies such as

fiber optic technology and high definition television.

Cable systems have also been expanding their service to more rural customers. While cable initially was only able to economically serve areas with an average population density of 60 homes per mile, due to industry research and development efforts since deregulation, cable systems can now serve areas with an average of 10 homes per mile, and in some cases areas with as few as 5 homes per mile.

Each of these technological advances would be seriously threatened if cable reregulation were enacted in its present form. As I indicated last week when debating this issue, the mere threat of reregulation had a dramatically negative impact on cable industry investment in communications technology in 1990.

And now we're thinking about committing regulation strangulation on this viable industry in an attempt to address what I believe are very legitimate concerns about cable rates, customer service, and the future of the telecommunications industry.

#### EFFECTS OF REREGULATION ON CABLE PROGRAMMING

When Congress passed the Cable Communications Policy Act of 1984, a primary purpose of the act was to "assure that cable communications provide and are encouraged to provide the widest possible diversity of information sources and services to the public." In meeting that goal, the Cable Act has been a clear success.

The number of cable program services has more than doubled since the Cable Act. Cable systems' expenditures for basic cable programming have risen from \$234 million in 1983 to \$1.4 billion in 1991. Statistics aside, any cable viewer in America can tell you that more cable networks exist and they're a lot better than they used to be.

The results of cable deregulation can be seen every day on the screens of Black Entertainment Television, the Discovery Channel, Arts and Entertainment, Turner Network Television, Cable News Network, the Family Channel, Nickelodeon and a host of other basic cable networks. Viewers clearly have noticed the improvement. That is why basic cable's share of the total U.S. television audience has risen from an 11 percent of viewing in 1983 to a 29 percent share of viewing today. That this dramatic improvement of cable programming occurred alongside deregulation is no coincidence.

Turner Broadcasting is a clear example of the success of the Cable Act in programming diversity and improvement. Since deregulation, TBS has launched two new cable networks, TNT and the Cartoon Channel—promoting diversity. And, TBS programming on all of its networks has been allowed to improve. TBS's estimated expenditures on entertainment programming, in-

cluding sports, grew from \$45 million in 1984 to over \$534 million in 1990. Made-for-TV movies now typically cost \$3 to \$4 million to produce—as much as, if not more than the cost of broadcast movies.

In a recent Roper poll, television viewers cite cable by 47 percent to 28 percent for regular broadcast television as having lots of variety. Cable networks' growth is not just a result of greater cable penetration. From 1984 to 1989, viewing of basic cable networks more than doubled the rate of cable-home growth. In the past 3 years, basic cable viewership growth outstripped cable home growth by 4 times. This growth must be attributed to both the increase in basic cable networks and the increase in original programming provided by basic cable programmers: over a quarter of the highest rated basic cable programs—excluding sports—during 1990 were original cable productions. For example, premiers of TNT-original movies and miniseries garnered audiences averaging 64 percent higher than nonoriginal programming aired in the same time periods in 1990 and 93 percent higher in 1991.

Despite the higher programming costs which go along with better programming, cost-conscious consumers have benefited. Improved basic cable allows subscribers to decrease their expenditures for pay services and to lower their overall cable bill—and many are. Pay cable penetration has declined for the past 3 years. And, while basic cable's share of viewing has doubled in the last 4 years, pay networks' share of viewing has declined slightly.

Yet, basic cable, including cable networks like CNN, Arts & Entertainment, and BET, is precisely the target for rate regulation under S. 12. Unlike rate-of-return regulation under which a cable operator could mark up and pass through programming cost increases, the regulation in S. 12 would make programming improvements of existing cable networks and the creation of new cable networks extremely difficult. Yet, few would argue that the consumer's interest really is served by freezing the status quo of programming in place.

The tension between a programmer's desire to improve his product and a cable operator's desire to hold down expenses are present already in the marketplace and create extreme difficulties between operators and program suppliers. The cable operator's reluctance to spend additional money for programming is reinforced by the priority which local regulators assign to improvements in cable plant, service, and other factors unrelated to programming.

Introduction of regulation into the equation is likely to tip the balance of cable operator incentives in a way harmful to programming development and, ultimately, consumer value.

At an average price of under \$20 per month, basic cable is still a good entertainment value, especially when compared to the price of taking a family of four to the movies, \$18.99, or a baseball game, \$32.36.

The exact result of the imposition of S. 12's rate regulation, which is far broader than what existed before the Cable Act, is impossible to quantify, but the history of cable rate regulation strongly suggests that programming quality improvement will be stunted or reversed.

#### COMPETITION VERSUS REGULATION

The 1984 Cable Act is not perfect, but it has been successful in building more systems, developing more original programming, and creating more jobs.

By injecting real and meaningful competition into the cable business, as proposed by Minority Leader DOLE and myself in S. 1200, the Communications Competitiveness and Infrastructure Modernization Act, we will lower rates, spur better programming, improve services, and enhance responsiveness.

I agree that cable's performance has been far from flawless. Consumers have expressed outrage over rate increases and poor system reliability. I, and the President, believe that strong action should be taken to lower rates and improve service quality. Reregulating the cable industry, however, is not the answer—competition is.

Reregulation will not adequately address consumer concerns. Those who propose reregulation of cable miss a key point about the 1984 Cable Act. The law's shortcoming was not that it deregulated cable rates, but that it erected a number of barriers to competition—most importantly the prohibition to telephone company competition.

As a result, there was no check on cable's ability to increase its rates. My legislation, which the President fully endorses, addresses this problem with a proposal for direct head-to-head competition between cable and telephone companies.

What some now propose as a remedy—reregulation—will undermine the benefits of greater, richer programming diversity, job creation, and technological innovation, while perpetuating its flaws—the barriers to entry. Moreover, in passing this cable reregulation bill, Congress will be giving cities an irresistible incentive to maintain cable monopolies and regulate rather than promote competition.

The President and I are in favor of increasing competition in the video programming marketplace. But this cable reregulation bill does not—and I repeat—does not promote competition among cable companies or other potential multichannel providers, namely the many local telephone companies located throughout the country.

Instead, the cable reregulation bill provides local governments with powerful new incentives to preserve cable

monopolies and it maintains the prohibition on telephone company competition.

Under current law, cities receive a lucrative franchise fee of 5 percent of their cable company's gross revenues, as a significant source of many cities' funding. In return, the municipality thwarts new competitors. One essential key to promoting competition is to reduce, if not eliminate, those fees which cities are, of course, quite reluctant to do.

Now comes this cable reregulation bill, which allows cities to continue receiving fat franchise fees. Added to this franchise fee extraction is the ability to once again regulate rates. The catch is that the city can only regulate as long as the local cable system remains a monopoly, or in the words of the reregulation bills: has no "effective competition." In other words, if a city allows a second cable system, it loses the power to regulate. With competition, the city would also come under severe pressure from the original operator to renegotiate the high franchise fee it agreed to pay only in a monopoly environment.

No incentives, however, are provided which would encourage competition from an additional multichannel provider.

In passing this reregulation bill, Congress, wittingly or unwittingly, will be giving cities an irresistible incentive to maintain cable monopolies and regulate rather than promote competition. True, the bill codifies a court decision clarifying that cities may start their own cable systems. But, while the bill instructs cities not to unreasonably deny a second cable franchise, that provision is riddled with exceptions that greatly dilutes its potential impact on competition from additional cable systems. Our alternative, pro-competitive legislation eliminates these troubling exceptions.

Moreover, under the reregulation bill, far more powerful incentives are provided to the cities to regulate the monopoly status quo. Most importantly, the cable-telco cross-ownership prohibition remains intact—even the modest increase in the rural exemption which Minority Leader DOLE and I have pushed was unceremoniously stripped from the bill in conference—which provides the best evidence that calling this reregulation bill pro-competitive is a sham.

This reregulation bill says that cable regulation should reflect what is occurring in competitive cable systems. But, Mr. President, regulation cannot imitate competition no matter how well intentioned the regulatory bureaucrat at the Federal, State or local level. When faced with competition, as will result from the President's alternative bill, a cable company must offer reasonable prices, good service, and quality programming. Under the reregula-

tion bill, regulation will not stem rate increases—this has been admitted by the sponsors of the bill. Moreover, regulation cannot motivate the level of customer service competition can. And, importantly, if history is any indication, rate regulation is likely to cause program quality and quantity to suffer, not improve.

This reregulation bill is regulatory overkill—plain and simple—which imposes far broader cable regulation than the Congress got rid of just 8 years ago. The FCC and local governments will be micromanaging every decision a cable company makes—from what prices are charged, to equipment used, to programming carried.

One clear indication of just how much regulation is contained in this reregulation bill are estimates that the FCC would have to find an amount equal to approximately 20 percent of its current budget to pay for cable reregulation. And that does not count the costs of local regulation, which comes on top of the FCC's costs.

Like the President, I believe it's high time to deal directly with the question of competition in the video programming marketplace and the many other critical questions involving national communications policy.

Our procompetitive, alternative bill, S. 1200, is designed to address the problems involving cable by injecting real competition in the cable market by permitting head-to-head telephone company-cable television competition.

I, like President Bush, believe that competition, rather than reregulation, creates the most substantial benefits for consumers and the greatest opportunities for American industry. Head-to-head competition between telephone companies and cable television companies will drive down rates and improve service quality for consumers, while promoting industry development and technological innovation.

Competition in cable TV works. In the 65 cities that allow competition, prices have fallen by 20 to 25 percent and customer service has improved greatly.

According to one independent study, competition could result in \$4.41 billion in annual benefits or \$80 per year for each cable subscriber in America.

Our alternative legislation, by taking bold, forward-looking actions to accelerate the deployment of advanced telecommunications networks, has the additional advantage of markedly improving our international competitiveness posture and dramatically spurring domestic economic growth, productivity, and job creation.

Furthermore, through advanced educational, health care, and other social services made possible with advanced telecommunications technology, we can establish a quality of life for all Americans which is unparalleled in our Nation's previous history.

CONCLUSION

The cable reregulation bill looks to the past to resolve today's problems—with no eye to the future. We need to consider how the legislation will affect telecommunications consumers tomorrow and the day after tomorrow. The ongoing digital revolution in communications products and technology that I spoke at length about last week is driving dramatic changes in the marketplace and regulations. We must not limit cable's ability to compete in the many promising new communications services that are on the horizon.

I believe the cable reregulation bill will do consumers more harm than good, particularly in the long term. Consumers will be better off if we defeat it and instead enact our alternative, procompetitive cable legislation that tackles the legitimate consumer issues of rates and customer service head on and without extraneous provisions of uncertain impact.

I urge you to join us in opposing this overreaching legislation.

I ask for your assistance in sustaining the President's veto.

And once this draconian measure is defeated, I ask you to join me in the next Congress when we debate and enact procompetitive legislation which will have a positive impact on our economic and social welfare on into the information age of the 21st century.

Mr. President, I ask unanimous consent that the following material appear immediately following my remarks:

First, the President's veto message;  
Second, a series of newspaper editorials concerning the cable reregulation bill; and

Third, a series of statistics concerning the cable television industry.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

<i>Annual regulatory costs of S. 12 to cable consumers</i>	
	<i>Millions</i>
Federal .....	\$67.9
State and local .....	264.7
<b>Total Annual Regulatory Cost ....</b>	<b>332.6</b>

Source: Hunt, Carl E., Analysis of Proposed Federal Cable Legislation, August 24, 1992.

THE WHITE HOUSE,  
October 3, 1992.

To the Senate of the United States:

I am returning herewith without my approval S. 12, the "Cable Television Consumer Protection and Competition Act of 1992." This bill illustrates good intentions gone wrong, fallen prey to special interests.

Contrary to the claims made by its proponents, this legislation will not reduce the price Americans pay for cable television service. Rather, the simple truth is that under this legislation cable television rates will go up, not down. Competition will not increase, it will stagnate. In addition, this legislation will cost American jobs and discourage investment in telecommunications, one of our fastest growing industries.

S. 12 is clearly long on promises. Unfortunately, it is just as clearly short on relief to the American families who are quite rightly

concerned about significant increases in their cable rates and poor cable service. Although the proponents of S. 12 describe the bill as procompetitive, it simply is not. Indeed, the only truly competitive provision, one that would have expanded the ability of telephone companies to compete with cable companies in rural areas, was dropped from the bill at the last minute.

S. 12 tries to address legitimate consumer concerns, but it does so by requiring cable companies to bear the costs of meeting major new federally imposed regulatory requirements and by adopting costly special interest provisions. For example, the bill requires cable companies for the first time to pay broadcasting companies, who have free access to the airwaves, to carry the broadcasters' programs. The undeniable result: higher rates for cable viewers.

Beyond increasing consumer costs, the bill takes certain key business decisions away from cable operators and puts them in the hands of the Federal Government. One provision, which is unconstitutional, requires cable companies to carry certain television stations regardless of whether the viewing public wants to see these stations. Another special interest provision would put the Federal Government in the position of dictating to cable companies to whom and at what price they could sell their programs. These types of federally mandated outcomes will discourage continued investment in new programs to the detriment of cable subscribers who have come to expect a wide variety of programming and new services.

I believe that the American people deserve cable television legislation that, unlike S. 12, will deliver what it promises: fair rates, good programming, and sound service.

GEORGE BUSH.

THE WHITE HOUSE, October 3, 1992.

[From The Wall Street Journal, Oct. 2, 1992]

THE GREAT CABLE TV BATTLE

It's a war, fought with mud and vitriol. With President Bush today vetoing a bill to reregulate cable TV, Senator Al Gore, a co-sponsor of the bill, is howling that the President is owned "lock, stock and barrel" by the cable companies. He calls himself a champion of competition.

Broadcasters, who favor regulating the rates competing cable operators charge, accuse the cable industry of price gouging. Cable operators respond by leaking a memo from broadcast lobbyists to local stations urging them to enlist their news operations in the fight to regulate cable. And the Washington-based lobbies that proclaim themselves "consumer groups" cry ceaselessly for rate regulation.

The attempt to override Mr. Bush's veto will come quickly, and it's expected to be close. The one serious question in the middle of all this is whether the bill delivers on its promise to encourage competition among the entrenched cable monopolies.

Vice presidential candidate Gore says the bill would force the price of basic cable down and promote competition by prohibiting cities from granting "exclusive" franchises.

Senator Gore is right that the cable industry has driven up prices through monopoly deals with local governments. Some of the more unseemly ways in which the industry has blocked competitors were detailed by Mark Robichaux in the Sept. 24 Journal. But anyone who looks closely at the actual content of the cable bill will discover that its pro-competitive language is largely rhetorical and provides cities with new incentives to preserve their cable monopolies, not dismantle them.

Currently, cities receive a lucrative "franchise fee" of 5% of a cable company's gross revenues. The city can extract such a high fee because in return it usually thwarts competitors (though only rarely by awarding explicitly exclusive franchises).

Under the cable bill, cities would still get the franchise fees while also receiving the power to regulate rates. As to introducing competition, consider this huge disincentive embedded in the bill: Cities may regulate rates only if their local cable systems remain a monopoly and have no "effective competition." In other words, if a city allows in a second cable system, it loses the power to regulate. It would also come under severe pressure from the incumbent operator to renegotiate the high franchise fee it agreed to pay only in a monopoly environment.

Letting in competition would force local polls to give up some of their petty power and maybe do some real work. And pigs will fly. Says Senator Conrad Burns of Montana, "Clever lawyers have written a bill that sounds procompetitive, but actually excludes any real chance for head-to-head cable competition."

Why then are cable companies so opposed to the bill? As economist Tom Hazlett notes nearby, if they have a choice between a regulated monopoly and an unregulated monopoly, they'll take the latter.

Privately, cable companies are relieved that the bill doesn't drop the barriers to letting the Baby Bells in the game. A provision to allow phone companies to compete with cable systems in rural areas was thrown overboard in conference.

The pro-competitive language that remains adds up to a form of Potemkin Competition. (That sense of illusion is how we feel about much else that Senator GORE is promising at the moment.) Emerging new technologies—from hair-thin fiber optic cable to the marriage of computers and cable—soon may revolutionize communications. But Congress's cable bill won't be joining the revolution.

That's too bad. Competition in cable TV works. In the 65 cities that allow competition, prices have fallen by 20% to 25% and customer service has improved greatly. Maybe next time.

#### BILL COULD ENTRENCH CABLE-TV MONOPOLIES

Your Sept. 24 page-one story "Captive Audience: Cable Firms Say They Welcome Competition but Behave Otherwise" makes a good point, so far as it goes: Cable-television companies do need competition. Unfortunately, the article implies that the new cable bill would help; that it would bolster local governments in their fight to bring competition to cable monopolists. Actually, it provides municipalities with powerful new incentives to preserve cable monopolies.

Under current law, cities receive a "franchise fee" of 5% of their cable company's revenues, a big source of many cities' funding. One key to promoting competition is to reduce those fees, which cities are understandably reluctant to do. The cable bill would allow cities to continue receiving high franchise fees while returning to the cities the power to regulate rates. The catch is that the city can regulate only as long as the local cable system remains a monopoly or, in the words of the bill, has no "effective competition."

Congress, wittingly or unwittingly, would be giving cities an irresistible incentive to maintain cable monopolies and to regulate rather than promote competition. True, the bill codifies a court decision clarifying that

cities may start their own cable systems. True, the bill instructs cities not to "unreasonably deny" a second cable franchise and prohibits discriminatory pricing among customers. But the bill's incentives to maintain the status quo are far more powerful.

One of the bill's goals is that regulation should reflect what is occurring in competitive cable systems. But regulation cannot imitate competition. When faced with competition, a cable company must offer reasonable prices, good service and quality programming. Although regulation might stem price increases, it cannot motivate the level of customer service—only competition can do that. And if history is any guide, rate regulation is likely to cause program quality to suffer, not improve.

This bill imposes far broader cable regulation than Congress got rid of just eight years ago. The Federal Communications Commission and local governments will be right in the middle of every decision made by a cable company.

If this cable bill passes, the more than "130 disenfranchised communities" that according to you are exploring competition will likely opt for the safety of regulation. Thus, these and hundreds of other communities will not face real competition in the foreseeable future.

Sen. CONRAD BURNS.  
Rep. NORMAN F. LENT.

WASHINGTON.

[From the Wall Street Journal, Oct. 2, 1992]

IN CABLE WAR, CONSUMERS GET SNAGGED

(By Thomas W. Hazlett)

President Bush has said he will veto the bill reregulating the cable TV industry—perhaps as early as today. This would be just the latest salvo in the high-profile debate over the bill—a debate that is being pitched as a struggle between liberals pushing pro-consumer controls and Reaganite deregulators defending the free market. Not even close.

The mythology upon which reregulation rests is that consumers were treated wisely and humanely by local regulators before the Reagan administration preempted local rate controls in the Cable Act of 1984. In fact, the deregulation of cable TV was achieved largely under the Carter administration in the late 1970s; FCC red tape had served to protect TV broadcasters from the emerging cable technology since the early '60s. When the final clearance of regulatory underbrush came in 1984, it was authored by Democratic Rep. (now Sen.) Timothy Wirth.

The Cable Television Consumer Protection and Competition Act of 1992 is a muddle, a huge opportunity foregone. There is a crying need for an honest effort to constrain the monopoly cable systems that now hog the dial, and there are even some promising starts in the legislation to do so. The provisions that open up access by competitors for satellite programming, restrict selective price cutting, and warn municipalities not to grant exclusive franchises are steps in the right direction.

Yet the bill's loophole to eliminate damage awards against cities that refuse to issue competitive franchises will negate the effect of such rules. And the stipulation that allows City Hall to get back into the cable regulation business only where monopolies prevail will positively encourage exclusive franchises. Beyond all this, there is the sinful lack of a pro-active competition policy: Where are the provisions that would let telephone companies compete with cable, or would order the FCC to make generous new

airwave space available for wireless cable technologies? These muscular measures, sadly lacking in the current bill, would put energetic rivals in the market, lowering prices while increasing quality, in two to five years.

Instead, the cable bill advertises lower consumer rates by establishing direct controls on only the "basic tier"—local broadcast signals and public access channels (Wayne's World programming). Problem: Virtually nobody subscribes to these no-frills tiers. You may have noticed your own cable company "retiering" to prepare for this end run around rate control. This is the form of regulation, but the substance of a consumer fraud.

Americans are upset about having just one company to choose from in the typical cable market. They should be: A recent survey of 100 competitive cable companies showed that their prices are about 20% below the average in areas where there is a monopoly. The idea that local rate regulation lowers effective prices, however, has already been discredited by out deregulation experiment. Since localities lost their power to set rates at the end of 1986, two things have happened: Nominal prices have increased (61% in the first 4½ years of deregulation), but so has the quality of cable programming. For instance, the average number of channels on the most popular basic package rose 30%, keeping the inflation adjusted price-per-channel just about constant. The question: Which has risen more, price or quality?

Since deregulation, a significantly higher percentage of consumers having access to cable elect to subscribe. More over, Nielsen ratings reveal that cable viewership is skyrocketing: a 60% increase in basic cable network viewership between 1986 and 1990, even subtracting out the increase in cable subscribership. In the one consumer poll that counts, viewers are voting with their time and money that the higher quality is worth the extra cost.

Besides, the dirty little secret of cable regulation is that it is legally impossible. While cities or the FCC may gain the authority to set rates, they clearly cannot dictate the quality of cable's product—TV programming. That would constitute content control, "unconstitutional under the First Amendment. A cable operator has every right to respond to rate controls by reducing either the number or quality of channels carried.

But don't believe me, don't believe consumers, and don't believe the U.S. Constitution about the likely effects of recontrolling cable television rates. The most compelling argument comes from cable's most vehement competitor, broadcast television.

The broadcasters, nostalgic, for the good old days when the feds actively suppressed their rival, are now a declining sector in mortal ratings combat with cable. The current legislation would correctly reverse an inequity voted by Congress in the Copyright Act of 1976 that allows cable systems to retransmit local off-air TV signals without compensating the stations. (Though the reform comes in a very twisted manner—adding "must carry" regulations already twice found unconstitutional by the federal courts.) But the broadcasters are also enthusiastic about rate controls on cable. They tipped their hand in a 1990 FCC proceeding, in which the sole issue was cable rate regulation; the National Association of Broadcasters filed its official position that it applauded efforts to control all basic cable rates.

Why would the NAB, whose members are hemorrhaging audience shares to their wired

competitors, favor "tough" regs said to make cable an even better bargain for consumers? The profit-motivated NAB clearly anticipates that the net effect of reregulation will be a fall-off in quality in excess of any cost savings, which will drive viewers back to "free off-the-air television." There's your smoking gun on the economic impact of cable reregulation.

Sen. Al Gore now accuses President Bush of being a tool of the cable interests for threatening to veto the new Cable Act. Oops, Senator—could you not then be called a broadcaster still for supporting it?

Having failed to seize the initiative and force a consumer-friendly solution to the cable monopoly problem, the president will now have to either hold his nose and sign-off on this contradictory policy brew, or cover his ears and veto it. If they televise this on C-Span, I'm going to turn the volume down just to see if I can make a video guess as to which of his senses he selects to abandon.

[From the Wall Street Journal, Apr. 7, 1992]

#### REREGULATING MEANS TYING UP CABLE

(By James C. Miller III)

Congress' "fine tuning" may well bring static to our TV screens. The Senate recently passed the so-called Cable Television Consumer Protection Act, which President Bush has threatened to veto. A similar bit of legislation, the Cable Television Consumer Protection and Competition Act, is wending its way from subcommittee to committee in the House.

The reformers want to hold down the rates for basic cable services. But their plan would rob us of better channels. It could also mean still-birth for innovative services that are just being developed.

In 1984, Congress exempted cable operators' from rate control by local jurisdictions where the Federal Communications Commission determined there was "effective competition." In 1985, the FCC said there was effective competition whenever a local community was served by three or more over-the-air broadcast stations. Starting January 1987, the operators serving the vast majority of cable consumers were exempt from local rate regulation for basic services.

The Reagan administration supported the 1984 Cable Act because of widespread municipal corruption and concern over the slow pace of cable expansion. Because of the power local governments wielded over cable companies, many officials were caught up in ugly charges of favoritism, bribes and kickbacks. Moreover, legal squabbles and other uncertainties over investment returns were seen to be retarding cable development.

In hindsight, it is apparent that these concerns were well-founded. Deregulation cut back local corruption. Skeptics also should look at a new study by Robert D. Tollison of George Mason University and Robert Ekelund Jr. of Auburn University. "The High Costs of Cable Reregulation" reports that following deregulation, cable service availability and programming expanded dramatically. The amount operators spent on basic programming went to \$1.5 billion in 1991 from \$302 million in 1984.

Investors also widened spending on facilities and technology. The share of systems with more than 30 channels rose to 72% in 1991 from 38% in 1984.

Messrs. Tollison and Ekelund note that rates for basic cable services have risen since deregulation. For example, the General Accounting Office found that the rate on the most popular tier of service rose to \$18.84 in April 1991 from \$11.71 in November 1988. But,

as they point out, such an increase must be placed in perspective. During the earlier period of local control, cable rates lagged far behind inflation. So it was only natural for rates to catch up after prices were freed.

It is also appropriate to adjust for changes in the quality of programming. Since the number of channels on the basic tier rose to some 35 from around 27, the rate per channel rose only nine cents during this period. (In fact, when you also adjust for inflation on this new basis, you discover that the basic rate per channel actually fell a penny.) Cable penetration increased substantially after deregulation took effect. It would appear that consumers prefer improved service, even at a higher price.

Rather than applaud this performance, many in Congress would take us back to the "good old days" of less diversity. They would do this despite the fact that the FCC tightened its definition of "effective competition" last June. Under the new rules, a community must have at least six over-the-air broadcast stations to be exempt from local control. That increases the share of cable operators subject to local rate regulation to approximately one-half of all operators.

Why is diversity so important? Because it is the specialized programming that would be jeopardized the most if rate regulation over basic services is reimposed. Regulation is price control, and price control means cable services will have fewer dollars to spend on low earners and loss makers like our educational channels.

Let me admit to a personal fondness for CNN, C-SPAN, the Discovery Channel, and Arts and Entertainment. Others no doubt prefer Black Entertainment Television, Turner Network Television or religious programming. The Spanish- and Korean-language broadcasts, MTV, home-shopping, weather and country-music channels are all part of the selection created for a society whose tastes and needs for video communications vary. In the name of "fairness," regulators are willing to punish consumers by cutting back the selection available to them.

More disturbing is the prospect that rate reregulation may truncate the development of new cable services that could prove very helpful to consumers in general; For instance, with interactive TV, viewers could register their opinions—on policy issues, or pop music—and send messages to several parties with the push of a button. Interactive TV also has tremendous potential as a long-distance classroom. GTE, for example, is already operating an interactive cable system in California.

Good intentions here mask a cruel hoax. Reregulation of cable TV might save a few dollars a month for those content with little more than rebroadcasts of over-the-air station fare. But it will do this at overwhelming cost to consumers who prefer something more.

[From the Denver Post, Oct. 1, 1992]

#### BUSH SHOULD VETO PROPOSAL TO REREGULATE CABLE TV

A congressional proposal to reregulate cable television would cost consumers dearly, and so George Bush should stick by his promise to veto this ill-conceived and poorly written piece of legislation. While sponsors have touted the measure as a consumer protection act, it really is an effort by competitors of cable TV to restrict that industry's rapid growth.

A good example of how backward this measure truly is cropped up in Denver. Right

now, Mile Hi Cablevision offers subscribers a basic package that contains public access channels, all the local commercial and public broadcast stations, and popular cable-only channels such as CNN and Nickelodeon. Under the just-passed congressional proposal, however, cable TV firms would have to offer a basic package of only the local broadcast and public access channels—CNN and other cable channels would be tossed out of the mix.

At the same time, though, the measure would increase the price that cable TV companies pay for retransmitting local broadcasts, and these higher costs would be passed on to customers. Thus, the measure would force up prices for the very cable TV services it purports to control.

That sort of goofiness is what led Bill Bradley, head of the City of Denver's telecommunications office, to write to Bush this week, pleading for the President to veto the proposal as he has said in the past he would do.

The counterproductive elements in this measure also prompted the entire Colorado congressional delegation to vote against it. Imagine a measure so outrageous that Denver liberal Pat Schroeder and Colorado Springs conservative Joel Hefley wound up on the same side of the issue. Their colleagues from other states who supported the measure apparently hadn't done their homework, for even desperate politicians wouldn't have voted for such a stupid proposal if they simply had taken time to read what it really said.

George Bush is right when he maintains these matters would be best settled in the marketplace, not on the Potomac.

[From the Philadelphia Inquirer, Sept. 29, 1992]

#### REREGULATING CABLE TV

Millions of Americans have a love-hate relationship with cable TV. With its sports, movies, home-shopping, hearings, music videos and so on, it's a many-splendored thing. But the average cost of basic cable service has risen by 60 percent since the cable industry was deregulated five years ago. Cable TV, which enjoys a government-created monopoly in all but a few local markets, simply has too much power to dictate the price of its services.

So Congress has passed a bill that combines two sound strategies: new controls on the price of cable services, and new rules to help emerging technologies become strong competitors to cable. Unfortunately, for all its claims about saving customers' money, this bill also includes an unjustified giveaway to television stations that would raise the cost of cable. That's reason enough for the measure to be vetoed, as President Bush has promised.

The worst part of the current bill from a customer's point of view is that local cable systems would lose the right to carry broadcast signals from local stations free of charge. Any station could charge a cable company for this right, and if the parties didn't reach an agreement, that station's programming wouldn't be available on cable. Consumers lose out either way—through higher costs for the cable service or less programming.

This battle isn't over some grand principle—it's about money. The television stations (and television networks) see their product being repackaged by profit-making cable companies that aren't giving them a piece of the action. The cable companies have traditionally argued that they're mere-

ly enhancing the stations' signal, helping them deliver the advertisements that are their main source of revenue.

TV stations claim that these charges would be too modest to have any significant impact on what customers pay for cable. But that's absurd. Estimates of the total charges industry-wide range up to \$1 billion a year. And if you think the cable industry is going to absorb the cost, rather than crank them into people's bills, you're dreaming.

In short, the cost of buying these broadcast rights could substantially offset what cable customers save from the bill's most-fundamental change: letting the Federal Communications Commission control what cable systems charge for a basic package of local stations. This may sound bureaucratic, but it's justified in light of the cable companies' sharp price increases. In addition, the commission would be required to judge the reasonableness of charges for extra service—channels ranging from Nickelodeon to CNN to Cinemax. We're leery of this because these channels are a playground for innovative programming, and if the commission squeezes rates too hard, it will stifle that innovation.

As for the strategy of coaxing new competitors, those parts of the bill are generally sound. The bill, for example, would give home satellite dish programmers and "wireless" cable operators more access to programming that the cable industry originates, allowing them to offer a richer mix to potential customers.

If this bill is starting to sound halfway decent, that's because it is halfway decent. But halfway isn't good enough.

At this point the only way to stop the giveaway to television stations is through a presidential veto, which, if sustained, would give the cable industry a reprieve. The hope here is that Congress would pass a less flawed, more consumer-oriented bill in 1993.

[From The Kansas City Star, Sept. 29, 1992]

#### CABLE'S CONGRESSIONAL NANNY

Since deregulation of the cable television industry, rates have increased by 61 percent. Viewers are continually upset by poor service and unanswered complaints—the usual frustrations that accompany monopoly power.

Cable, in short, has fouled its own nest. To a great extent, the industry is itself to blame for the current effort to reregulate rates. Yet the latest serving of congressional mishmash is not the answer. Implicit in this debate has been the peculiar notion that the "need" for entertainment is now on a par with that of public utilities.

The measure now on the president's desk directs the Federal Communications Commission to decree standard rates for basic cable service in markets lacking competition, and permits appeals of disputes over prices for add-on programs. The Washington bureaucracy will grow to assure that Americans—those believers in limited government, remember?—receive what the government thinks is a "fair" price for television.

Cable offers some serious fare such as C-SPAN, CNN or the Discovery Channel, and many rural residents would have little to watch without cable. But come on. This controversy has a lot less to do with fairness than with how to divvy up cable's \$22 billion a year in revenues.

One provision would allow broadcasters to charge cable companies for retransmitting the signals. That rang bells in Hollywood, which sent a horde of lobbyists east to tell its Democratic allies: "We want our cut, too,

whenever broadcasters air one of our movies." This change may well result in higher cable rates, not lower.

What Congress should have done was limit its efforts to fostering competition: sharpen anti-trust law, if necessary, to blunt the legal tools monopolists use to exclude competitors, and let technology gradually solve the problem of competition. Microwave and satellite delivery may yet help provide a counterweight. Working separately, the FCC seems determined to permit telephone companies to enter this market.

Admittedly, much of that is in the future, but even now—contrary to what some say—cable should not be seen as a natural monopoly. Some two dozen markets have competition, and in these cities rates are reasonable and service standards high.

To be sure, some of the bill's provisions would help boost competition, such as those banning exclusive franchises and those prohibiting exclusive contracts between programmers and cable operators.

Even so, President Bush should make good on his veto threat. The notion that government has some kind of duty to decree a "fair" price for what is mostly entertainment is more than sad. It's worth recalling that if government today is held in widespread contempt, it is largely because it attempts to do too much.

[From the San Diego Union Tribune, Sept. 28, 1992]

#### CABLE CAPERS: EVEN IF RATES FALL, VIEWERS COULD PAY MORE

President Bush has on his desk a bill that would re-regulate cable television. His decision to sign or veto the measure should be predicated on a simple question: Will consumers benefit?

Various consumer groups argue that cable subscribers stand to reap bountiful savings. The Consumer Federation of America, for instance, estimates that "on a national scale, people can expect a reduction in basic rates of up to 30 percent."

But basic rates could tumble 100 percent and consumers still could pay higher overall cable rates. That's because, under the language of the bill, basic service is defined as public, educational and government cable channels, as well as local over-the-air broadcast affiliates of ABC, CBS, NBC, Fox and PBS.

Such widely viewed cable offerings as CNN, MTV and ESPN, and premium channels like HBO and Showtime, are not considered basic service. Cable operators could easily charge more for these optional channels to offset a 30 percent rate reduction for basic service.

Basic cable rates rose 56 percent between 1986 and 1991, from an average \$11.14 a month to \$17.34, according to the General Accounting Office.

The cable industry has not remained in place since deregulation. It has increased the proportion of American households wired for cable from 45 percent to 90 percent. It has expanded the number of available cable channels from 29 to 72.

It is true that many local cable operators around the country enjoy effective monopolies. But lawmakers are mistaken if they think that re-regulation of the industry will check the monopoly power of cable companies and discourage artificially high prices.

In fact, prior to deregulation, 94 percent of proposed cable rate increases were approved by local governments, which typically collect 5 percent of cable system's gross revenues as a franchise fee.

A federal law written in the best interests of consumers hardly would restore a regu-

latory system in which 94 percent of rate increases are approved.

Rather, a consumerist law would promote competition in local cable markets, recognizing that only when two or more operators are vying for the same viewers will consumers be assured of the highest quality service and the most reasonable prices.

The misnamed Cable Television Consumer Protection and Competition Act falls woefully short on this count. It deserves a veto.

[From the Cleveland Plain Dealer, Sept. 25, 1992]

#### CONGRESS AT THE CABLE TV SWITCH

On principle, and heedless of political costs in an election year, President George Bush should veto legislation regulating cable television prices. In so doing he undoubtedly would risk incurring voters' displeasure and face the prospect of being overriden in Congress. But he would also display courage by taking up the gauntlet thrown down by congressional Democrats seeking to embarrass him. As well, he would rebuke fellow Republicans who for electoral reasons jumped on a bandwagon mistakenly labeled consumer protectionism.

Don't be misled by the cable bill's margins of support in the House and Senate. Far from being good legislation that would benefit consumers, the new laws could saddle the cable industry with costs that probably would be passed on to the subscriber, either directly or in the form of fewer program choices.

One need not accept the dizzying range of dollar amounts the industry contends the public will pay or cable operators will have to assume. No doubt their figures will turn out to be inflated. At the same time, however, you can bet there will be a steeper price to pay than pro-regulation lawmakers are prepared to allow.

What is most objectionable about the legislation is not that it permits the Federal Communications Commission to set rates for basic cable packages. You could argue cleanly and fairly over whether free-market considerations should prevail or whether, because it is a monopoly in some communities, cable invites government intervention.

But under pressure from over-the-air broadcasters and other interests, Congress overloaded the final bill. Some of the added provisions will benefit cable's competitors, including local TV stations that will be entitled to sell retransmission rights for their programs. Others, supposedly intended to help customers get better service, amount to governmental micromanaging of cable companies.

Cable TV, as lawmakers appear to have forgotten, is a commodity to be purchased or not, at the consumer's discretion. It is not a constitutional right. It should be noted that the industry spared no expense in its own lobbying efforts against legislation. Nonetheless, consumers one day may have cause to regret that Congress thought it had a right to dictate the terms under which cable could market its offerings.

[From the Dover (NH) Foster & Daily Democrat, Sept. 25, 1992]

#### STOP PROTECTING US

If there is an industry the Congress hasn't regulated yet, keep it a secret.

Cable television and its customers will feel the long arm of federal regulation unless President Bush vetoes a bill passed by wide margins in both the House of Representatives and the Senate. And even if there is a

veto, the size of the votes in both houses might be enough to hand the president his first defeat in a string of 31 vetoes that have withstood attempts at override.

The cable bill was sold as a consumer protection measure. Heaven protect us from congressional protection.

The regulation of cable television—or rather its re-regulation (it was de-regulated in 1984)—is supposed to provide television viewers with a shield against rising rates. That's what supporters of the measure say it will do.

What the cable bill will really do is provide the on-air broadcasters—especially the major networks—and companies that distribute television over satellite and microwave radio channels with a piece of the cable revenue pie. You can expect the networks and satellite companies to support rate increases as soon as they see some benefit to themselves.

The bill passed by the Congress requires the Federal Communications Commission to set up a "reasonable" rate schedule for a basic package of cable programs and would include more limited regulation of the expanded packages that include such things as MTV, HBO, movie channels and sports channels.

Who is going to determine the definition of the word "reasonable"—the FCC? Who is going to determine the content of a basic package—the FCC? Who is going to hold rate hearings—the FCC?

Why this insistence in the regulation of cable television? What was once ignored as an industry is now seen as a gold mine and the very people who were ignoring it—the broadcasters—want a piece of the pie with none of the expense.

Cable television is not a necessity. It is not a public utility. In the sense that electricity or telephone or water or gas is a public utility. Why do rates have to be regulated?

Let the marketplace do its work. If cable is too expensive, we won't buy it. We'll put the antenna back upon the roof or read a book.

The cable companies aren't stupid. They aren't going to kill the Golden Goose.

For cryin' out loud, stop protecting us from the boogiemans.

[From The Cincinnati Post, Sept. 25, 1992]

#### THE WRONG RE-REGULATION

One of the biggest battles Washington has seen all year is raging now, and it affects about six in 10 American households, cable television.

The Congress, by large majorities, has sent President Bush a bill that would re-regulate the cable television industry. The president has threatened to veto it, mainly on grounds that it would impose federal price controls when competition will ultimately be able to accomplish the same task.

We agree with the president—up to a point. This particular bill deserves to be defeated. But it contains much that is valuable. With some changes—notably giving state public utility regulators, rather than the Federal Communication Commission, authority to set rates in monopoly markets—it would merit support.

The measure now on the table would require the FCC to set rates for "basic" service—local commercial and public channels, plus one or two "super stations." This is a function we think would be better handled by state regulators, such as the Public Utilities Commission of Ohio, whose staffs already have expertise in monopoly rate cases and, often, in the broad field of telecommunications.

Regulation at either the state or federal level ought to be limited to monopoly franchises; its aim should be to encourage competition. As technology advances, the rationale for geographic cable monopolies will steadily diminish.

The cable bill does contain several measures aimed at promoting such competition, as well as others designed to benefit cable customers in the short term.

Local governments, for example, would be barred from issuing exclusive franchises. Within 10 years, cable companies would have to let customers buy only those channels they want, rather than the relatively large package. The bill would require certain large companies that produce what is now "cable" programming to license their products to competitors who might offer it over new transmission networks, such as satellite and "wireless" cable. And it would pave the way for consumers to buy their own converter boxes and remote control devices.

The real trigger for the lobbying battle now under way in Washington has little to do with the interests of cable customers. It deals, instead, with the proposed requirement that cable companies negotiate with local broadcasters for the right to carry their signals. In essence, Congress proposes to make cable companies pay broadcasters for a signal that the broadcasters are sending out for free over the airwaves. The cable industry argues that this provision would drive up costs for their customers, and more than offset any savings the rest of the bill might achieve. Hollywood, meanwhile, has charged into the fray on the side of cable operators—mainly out of fear that it will lose out on a slice of a new revenue pie.

Sound like a lot of static? It is. Suspect the debate has been fueled by partisan politics and by a non-partisan willingness to reap campaign contributions from competing lobbyists? No doubt.

Within, the issue is one that will ultimately touch the lives of most Americans. The public policy goal should be a flourishing telecommunications network—one capable of supporting the technology's vast potential.

[From the San Antonio Express-News, Sept. 24, 1992]

#### CABLE REGULATION WON'T REDUCE BILLS

President Bush's promised veto of a cable TV regulation bill may be overridden, but Bush is right on the issue.

The cable bill is an election-year product. The Democratic-controlled House and Senate passed the measure by large margins, claiming it would benefit consumers.

Although cable TV rates have risen more than 50 percent since they were deregulated five years ago, this bill won't do much to control them. It would put bureaucratic fingers on control knobs.

Under the bill, the Federal Communications Commission would set and enforce "fair" charges on bare-bones basic cable service. That includes local commercial and public channels, plus one or two super stations.

Expanded cable packages would have limited regulation, and added charges for them could drive monthly bills up, not down.

Congress would specify how many phone lines each cable company must have for customer complaints. It would also require operators to refine technology within 10 years so subscribers could receive one free premium channel, such as HBO.

If Bush's veto is overridden and the bill becomes law, few cable customers will see their

bills reduced. The way to bring cable charges down is through competition, not regulation.

[From the Hartford Courant, Sept. 22, 1992]

#### THIS CABLE-TV BILL ISN'T IT

"For the cable industry to claim that it's coming to the rescue of consumers is like the shark swimming to the rescue of the drowning man," said Sen. Joseph I. Lieberman of Connecticut last week after the U.S. House voted to reimpose tough regulations on cable television.

Good metaphor, but it also applies to self-proclaimed consumer advocates who say that the bill would reduce cable rates substantially. It wouldn't necessarily. In fact, it's likely to increase subscription prices.

Government regulation usually is imposed with the best of intentions, but the rules become complex and convoluted by the time special interests finish writing them. And consumers are left scratching their heads.

The Courant's corporate parent, Times Mirror Co., owns cable television systems and therefore has an interest in the bill that President Bush has vowed to veto. But no one at corporate headquarters has had any input in this editorial.

To some extent, the cable TV industry deserves the lumps it's been getting in Washington. In Connecticut, rates have increased by more than 50 percent since Congress lifted regulatory control in 1987. Service, in many instances, has been awful. Customers often feel helpless.

Given the monopoly status of cable systems and their use of public airwaves, government is justified in setting minimum service standards. Moreover, government ought not to throw a protective umbrella over the cable industry if competitors want to get into the market.

But the bill approved last week by the House does more than require the Federal Communications Commission to set a maximum price for basic cable TV service and authorize local regulators to ensure that the rates are "reasonable."

Towns and cities would be allowed to operate their own cable systems. The bill would in effect require cable operators to carry all the local channels. At the same time, operators would have to get permission from local broadcasters for "retransmission rights."

If the operators wind up having to pay the local channels for retransmission rights, the costs are likely to be passed on to consumers.

Cable companies would also be required to update their systems within 10 years to give their customers more choices. The companies already are investing in such equipment and will continue doing so because that has been the nature of the business. Survival depends on keeping up with the latest technology. But guess who will wind up paying when government gets into the business of requiring the installation of certain equipment and setting deadlines. Consumers, of course.

Perhaps the most disturbing voice being heard from supporters of cable deregulation is the one claiming that the bill would improve programming. Beware of those who want government to get involved in cable program "quality."

The cable industry should neither be shielded from competition nor permitted to get away with shoddy service or galloping rates. As U.S. Rep. Nancy L. Johnson of the 6th District noted, "We ought to do something, but this [bill] isn't it."

[From the Harlingen (TX) Valley Morning Star, Sept. 22, 1992]

#### REGULATIONS NOT NEEDED

The debate over "re-regulation" of cable television sounds suspiciously more like a battle between cable and broadcast TV over market share, two behemoth industries, each protected and regulated in various ways by the government, trying to rig the rules in their favor.

The fact is that cable television was never "deregulated" in any meaningful way in the first place. The industry was freed of federal price controls under the Cable Communications Policy Act of 1984 (which went into effect in 1987) but has never been subjected to real market competition. Cable television still operates through a system of virtual monopoly franchises granted by local governments to operate in limited areas. That is a recipe for the sorts of problems consumers complain about: higher prices, poorer service.

Legislation before Congress would, above all else, further regulate (rather than "re-regulate") the industry by virtually turning it into a public utility.

The bill would give new powers to the Federal Communications Commission to set cable service and price standards. Far from introducing competition, the bill effectively would impose a national cartel. It is difficult to see how service would improve if cable company profits are limited by political decision-making.

The bill also attempts to settle a long-standing complaint from the broadcast television industry, forcing cable firms to get permission to offer network programming on the cable. It would also force cable firms to sell their own programming to competitors. Such decisions ought not to be the province of government and would not be both broadcast and cable television truly deregulated, that is, set free from both government protection and government intervention.

The costly, anti-competitive cable re-regulation bill should be short-circuited. The real problem with cable TV is that it still is regulated too much.

[From the Akron Beacon Journal, Sept. 21, 1992]

#### MEDDLESOME BILL

All along, the trouble with congressional attempts to reregulate the cable television industry has been that lawmakers seem ill-equipped to set new rules, thousands of them, for an industry that is rapidly changing. What's written today may well be obsolete before the subject comes up again on Capitol Hill.

The result will be an industry less in tune with viewers, equipped with fewer tools to develop new programming, to provide the products the market demands.

That prospect hasn't deterred lawmakers. The House of Representatives plunged ahead last week, approving legislation that a majority claims will benefit consumers, holding prices down, ensuring that cable is affordable for most Americans.

The one encouraging thing about the vote was that the majority may not be enough to override an expected veto by President Bush. Even before the president acts, the Senate could put a halt to this shortsighted legislation. It could reject the bill, perhaps as early as this week.

To be sure, some of the nation's 11,000 cable operators have gouged their customers. Across the country, cable rates have increased 60 percent since 1986, two years after

the industry was deregulated. However, rather than write legislation that aims at the bad actors, lawmakers would penalize the industry as a whole.

Among the many new rules, Congress would expand requirements on cable operators to carry certain channels. It would more narrowly define the package of channels they can offer. It would require cable firms to pay broadcasters for the right to transmit their signals.

The latter step is particularly onerous, since cable actually extends the reach of broadcasters, even \* \* \* homes. More \* \* \* casters alone would profit from programming transmitted to cable, programs that, in many cases, it developed. Quite reasonably, Hollywood wants a share of any transmission fee.

As eager as proponents of reregulation are to point to the rising costs of cable, they should note as well that, in the same time, programming has improved dramatically; far more channels are available. And significantly, the number of subscribers continues to rise, from 17.7 million in 1980 to 56.2 million in July.

If consumers are voting with their dollars, that suggests a substantial degree of satisfaction with the cable industry.

If anything, Congress should be opening the doors to greater competition. That would not only diminish the power of the quasi-monopolies that cable franchises are, it would attract new investment to the industry, the kind of investment that encourages new programming and new methods of broadcasting, the kind of investment that, in the long run, better serves consumers of television.

[From the Denver-Rocky Mountain News, Sept. 20, 1992]

#### CABLE BILL: STATIC AND SNOW

Suddenly the commodity preoccupying the U.S. Congress isn't wheat or sugar or tobacco but potatoes—the variety that takes root on den couches. Hence, by a 280-128 vote, the House has approved a measure that would cap the rates cable TV companies can charge for basic service.

Under the House bill, bureaucratic fingers would be all over the fine-tuning knob. Congress not only would empower the Federal Communications Commission to set and enforce "fair" cable charges, Congress also would specify how many phone lines each cable company must dedicate to customer complaints. It would require cable operators to refine technology within 10 years so that subscribers to basic service could enjoy one "free" premium channel (e.g., HBO). Good grief, Congress doesn't regulate the Post Office this closely.

Most Congress members claim that reregulating cable, liberated from federal control in 1984, would save consumer dollars. But the FCC would set rate ceilings only for bedrock service—local commercial and public channels, plus one or two "super stations." These strictures would impel cable companies to charge fees for each of the 30 or so channels (ESPN, The Discovery Channel, etc.) that they now sell for one flat price. Some bargain. True, the feds could begin capping rate for these "second-tier" channels, too. But Washington cannot force a business to operate at a loss. Hold onto those rabbit ears, friends.

Yet one provision of the House bill makes sense—that barring local authorities from offering cable firms exclusive franchises. Such sweet deals explain cable overpricing; in towns where viewers can choose between two services, channel selection is greater and monthly charges average 25 percent less.

But one decent feature does not a whole bill redeem. President Bush should veto this cable regulation measure, which is mainly static and snow.

[From the Washington Post, Sept. 19, 1992]

#### UNCLE SAM IN CHARGE OF CABLE

The cable legislation approved by the House and now headed for a Senate vote calls for the federal government to step in and re-regulate the industry from rates to program packaging. But this approach assumes that cable, now supplied mostly by monopolies, is a utility as necessary as electricity or telephone service. In fact, cable is a consumer option in what should become a more competitive market. This particular bill would give government a role in cable that consumers may not find so welcome over the long haul.

Forget the cable industry ads predicting that passage of the bill would send everybody's cable rates through the ceiling. Forget as well the arguments of supporters—including over-the-air broadcasters, who like a provision that would force cable operators to negotiate with them before retransmitting their signals—that the bill would force price cuts of up to 30 percent. Both sides—and we note here that The Washington Post Co. owns cable systems as well as broadcast television stations—have restored to heavy lobbying. So has the motion picture industry, which opposes the bill because Hollywood wouldn't get any cut of the royalties that broadcasters could seek from cable operators.

Under the measure, the government would set "reasonable" rates for what it would define as "basic" programming, control prices for installation and equipment, require efficient customer service and force cable operators to equip all subscribers for channel selections that now are sold as packages of channels. The result of all these requirements is not more competition; its more likely to be cost-cutting by eliminating cable programming or even entire channels.

The effort to control gouging by cable operators should focus on increasing competition, not on heavy reregulation. Until competitors do materialize, some determination of a reasonable rate of return for certain basic cable service is a legitimate legislative pursuit next year. This bill goes overboard.

[From the Baltimore Sun, Sept. 19, 1992]

#### DISTORTING THE CABLE TV BILL

The battle now reaching a climax in Congress over re-regulating the cable television industry is a classic example of a bill intended to aid consumers that has almost been submerged by interest groups fighting each other for competitive advantages.

The bill started as a consumer protection measure. Congress lifted controls on cable TV operations in 1984. Charges promptly skyrocketed in many areas. Often service quality dipped almost as quickly. The cable TV operators gained a reputation for concentrating on expansion and amalgamation but neglecting their captive audiences. The bill would restore price controls on cable TV and impose quality standards for service. It would also ease the way for competitors in the 97 percent of areas that are saddled with monopoly franchises.

So far so good. Even some in the cable TV industry could live with that. But the bill, passed Thursday in the House of Representatives and due soon for a final vote in the Senate, goes father. It would force the cable systems to negotiate with the over-the-air

broadcasters for the right to carry their signals on their systems. Now the cable systems are required to carry local broadcasts but need not pay for them. The bill would also force the cable companies to sell programming that it has developed for its own use to potential competitors.

These latter two provisions have the cable industry howling. It had howled so loudly and, in some cases, so irresponsibly that it has damaged its own case. The cable industry contends the new regulations would increase customers' bills by perhaps \$4 a month. No one knows what, if anything, cable systems would have to pay broadcasters for the rights to carry their signals. Maybe nothing. The broadcasters and cable systems need each other: Cable would be hard to sell without network and local over-air programming, and broadcasters need to assure their advertisers the programs they pay for are reaching the whole market.

With House passage, the battle shifts to the Senate. The cable industry is lobbying furiously to get enough Senate votes to sustain a promised veto by President Bush. It's getting help from Hollywood, where movie producers have decided that if cable must pay for over-air material, they should get a cut of the programs they produced, too.

While the bill's sponsors still point to this protection for consumers as the measure's main features, it has in fact been encrusted with provisions that could mean billions of dollars to broadcasters and Hollywood producers. If the Senate fails to muster a veto-proof majority, the bill's original supporters ought to start all over next year, keeping the new proposal strictly focused on the consumer's interests.

[From the Wyoming Eagle, Sept. 17, 1992]  
CABLE BILL WOULD END UP HURTING  
CONSUMERS

It's been difficult to turn on a television set in recent days without being bombarded by commercials both for and against the cable reregulation bill now before Congress. With all of the hype, it's difficult to look beyond the emotional appeals and see how the legislation would truly impact both the industry and the consumers' wallet.

The cable industry, arguing for deregulation eight years ago, claimed that regulation had kept rates artificially low. As a result, since the industry won that battle in Congress, cable rates have risen three times faster than inflation.

Cable critics charge that for the extra money, many consumers have received shoddy service. The industry counters that it has invested in both improved equipment and programming.

In a sense, both claims have some validity. However, arguing about who's right and who's wrong in this controversy really does not get to the heart of the matter: what action will best protect the consumer in the future?

The cable bill approved by a House-Senate conference committee was originally designed as a pro-consumer piece of legislation that would hold down rates. However, it has turned into a mishmash of federal regulations that could easily lead to precisely what the cable industry has warned customers about in its campaign against the bill: higher rates.

Estimates by the Office of Management and Budget, the Department of Commerce and the industry itself indicate that the bill's passage would see cable bills rise between \$2 and \$4 per month. The increase would be justified by the cost of the bill's

provision that cable operators would have to pay local broadcast TV stations for using their signals. The cost would simply be passed on to cable customers.

Mr. KERRY. Mr. President, section 19 of the conference report directs the FCC to establish regulations to limit discrimination between satellite cable programmers and satellite broadcast programmers on the one hand, and multichannel video programming distributors on the other. Subsection 2(B)(ii) of section 19 provides that in setting its regulations the FCC shall not prohibit a programming vendor from establishing different prices, terms and conditions to take into account actual and reasonable differences in the cost of creation, sale, delivery, or transmission of satellite cable programming or satellite broadcast programming. Am I correct in understanding that as used in subsection 2(B)(ii) the cost of creation, sale, delivery or transmission of programming refers to costs incurred at the multichannel video programming distributor's level as well as at the program vendor's level?

Mr. INOUE. That is correct.

LOW-POWER TELEVISION MUST CARRY  
AGREEMENT

Mr. FORD. Mr. President, I would like to commend my colleague, the Senator from Hawaii for his efforts in moving cable legislation this year. I am unaware of any legislation that has stirred up so much activity and debate. Throughout the long hearings, negotiations in committee, on the Senate floor and in the conference committee the Senator from Hawaii is the glue that held this all together. He is very aware and has been most helpful on an issue that is important to me—must carry provisions for low-power television stations. When the Commerce Committee considered S. 12 I was successful in adding an amendment to provide must carry for low-power stations. There was no similar provision in the House cable bill. After long negotiations the conference report contains limited must carry for low-power stations and there has been some confusion about some of the limitations. I would like to address several questions to the chairman of the Subcommittee on Communications about this provision.

Mr. INOUE. I would be happy to answer questions from my colleague from Kentucky.

Mr. FORD. In section 614 low-power television stations are allowed must carry if the community of license of such stations and the franchise area of the cable system are both located outside the largest 160 metropolitan statistical areas, ranked by population, as determined by the Office of Management and Budget on June 30, 1990 and the population of such community of license does not exceed 35,000. Since the conference report was filed there have been questions raised as to whether the

cable system within the 35 miles limitation for must carry for low-power stations is in a community of over 35,000 if that cable system has to provide must carry.

Mr. INOUE. It is my understanding that the 35,000 population limit only applies to the community to which the low-power station is licensed. The limitations in this section were to make the amendment only apply to rural areas. The conferees did not intend to draw the amendment so tightly that it would not apply to any low-power station.

Mr. FORD. I would like to thank my colleague as I share his views. There is one other troubling provision that has been pointed out to me by low-power stations in Kentucky. Subsection (F) limits must carry for low-power stations if there is a full-power station licensed in the county or other political subdivision. Again, this provision only applies to the community of license and location of the low-power station, not the cable systems required to must carry a low-power station.

Mr. INOUE. That is correct. This restriction only applies to the area in which the low-power station is located.

Mr. FORD. I thank my colleague.

Mr. BROWN. Mr. President, would the chairman yield to engage in a colloquy on several provisions of the conference report on S. 12, the Cable Television Consumer Protection and Competition Act of 1992?

Mr. President, the cable industry is extremely important to my State of Colorado, and Jones International, Ltd., based in Englewood, CO, is one of the reasons why. Jones is representative of the cable industry's outstanding contribution and dedication to revitalizing America's educational system. Of particular merit is Jones' Mind Extension University [ME/U]: The Education Network, the Nation's fastest growing distance education network.

ME/U was established in 1987 to make equal access to education a reality for all Americans: regardless of where they live or what their condition in life. As a 24-hour education network, ME/U is affiliated with more than 20 prestigious universities and colleges across the United States and serves approximately 20 million households. It is the only cable program to offer a degree over the airways, offering more than 40 college courses each semester in topics ranging from mathematics to education. In addition to earning a college degree from the University of Maryland, students can earn a masters of arts degree in Education Technology from George Washington University or an MBA from Colorado State University.

I am therefore interested in two provisions in the Conference Report for the Cable Television Consumer and Protection Act of 1992. The first of these pertains to carriage of non-

commercial stations and access for "qualified educational programming sources". In reference to the non-commercial educational television provision, I feel the conferees have perhaps unintentionally slighted providers such as Jones' Mind Extension University: The Education Network.

Mr. INOUE. I would be happy to respond to my colleagues questions. First, in a report submitted to Congress in July 1990, the Federal Communication Commission, supported by a wealth of data, strongly recommended that Congress accept the noncommercial "must carry" requirement adopted by the conferees. I am very familiar with the Mind Extension University: The Education Network, and I want my good friend to know that I have been favorably impressed by its programming. In fact, as I told Glenn Jones himself, if all cable companies responded to the 1984 Cable Act as Jones International did, the legislation we are prepared to pass today may not have been necessary.

Mr. BROWN. I thank my colleague for his thoughtful comments. I now want to turn to another section of the House bill which was adopted by the conferees. In particular, I would like to address the provision related to qualified educational programming as defined in section 9(c)(3) of the conference report. The authors of this provision have chosen to define qualified educational programming source as "any programming source that has a documented annual expenditure on programming exceeding \$15,000,000", excluding general administration costs as well as operational costs. Mr. Chairman, ME/U is unequivocally one of the nation's finest educational programming initiatives. Unfortunately, it is unclear whether ME/U would meet the \$15,000,000 threshold established under this provision.

Could the chairman explain the genesis and purpose of the \$15,000,000 threshold? I am concerned that it may have the unintended effect of discouraging small educational providers from committing the resources to educational programming. Since the programming is commercial free, wouldn't the objectives of the act be best served by making the limited access available to all developers of educational programming, thereby increasing competition and quality of coverage?

Mr. INOUE. My distinguished colleague raises an important point. I do not believe it was the conferees intention, by creating a \$15,000,000 threshold, to exclude access for small private ventures. On the contrary, the intent of the legislation is to broaden the universe of providers of educational programming, and to do so in a non-discriminatory manner. If my colleague desires, I will work with him to correct any problems created by the \$15,000,000 threshold.

Mr. HOLLINGS. Mr. President, I rise in support of the conference report on the Cable Television Consumer Protection and Competition Act of 1992. I am disappointed that the President decided to veto this bill. This is a bipartisan bill, in which Congress is responding to the problems of consumers and the market. I have received thousands of consumer complaints from Americans all across the country concerning the cable industry, and I know my colleagues have received the same. In South Carolina, I have heard complaints from mayors and individual consumers about their cable rates and service. Skyrocketing charges, service outages, anticompetitive abuses, and other monopoly practices have generated an overwhelming public outcry for legislation to address these problems.

S. 12 is a carefully balanced effort to rein in the excesses of the cable industry without blocking further growth and technological innovation. Consumers will say that we should have regulated all cable services across the board. Competitors will say that we should have broken up the cable monopoly. Cable claims we are doing too much. But we have not taken a radical course. The bill that has emerged from our negotiations with the House is carefully tailored to address the most egregious cable practices—unreasonable rates, poor customer service, unfair marketplace advantages.

The President in his message vetoing this bill states that he opposes the retransmission consent and must-carry proposals in this bill. The record should reflect that earlier this year the President and the cable industry both supported those provisions when they were in the so-called Packwood substitute.

The assertion that the access to programming provisions of S. 12 will have the Government dictating the price of programs and to whom those programs must be sold is false. The access to programming provisions merely state that programmers cannot discriminate in making their programming available to other multichannel video distributors. Cable operators are free to set whatever prices they deem appropriate and sell to whomever they please so long as they do not discriminate.

Moreover, this is not the first time that action has been taken to help promote the development of competition in the video marketplace. In the late 1950's, cable operators were given the right to carry broadcast stations for free, in part, to help stimulate competition to broadcast stations. In the 1970's, in another attempt to stimulate competition, the FCC adopted the financial interest and syndication rules, which limit the ability of the networks to own and control programming. Today in the 1990's, we find that competition to cable is stifled by the in-

ability of competitors to obtain programming.

The cable industry is no longer a second-class video distributor that only retransmits broadcast programming. It has de facto exclusive franchises. It appears well on its way to becoming the dominant video distributor, and we must be attentive to the problems that monopolies create.

For instance, consider the situation in my own State of South Carolina. In Greer, Cencom Cable provides 36 channels of programming for \$23.95, while next door in Mauldin, customers pay \$25.95 for only 21 channels of programming. Consumers are paying more for less. In addition, prices have risen dramatically. In Bennettsville, the cable operator charged \$7 for basic cable in 1986; in 1991, it charged \$16.95, an increase of 142 percent for similar service. In Charleston, cable rates were \$10.45 for 35 channels; in 1992, the charge is \$22.00 for 29 channels, an increase of 111 percent, to receive fewer channels. In Spartanburg, customers were charged \$12.93 for 30 channels in 1986; in 1991, they were charged \$27.45 for the same number of channels, an increase of 112 percent. Everyone is frustrated, but there is little that the local authorities can do about these rate increases once the franchises are awarded.

When the cable debate first began 4 years ago, I was skeptical of the need for new legislation. The 1984 act seemed to have succeeded in achieving many of its goals. However, I have become convinced that there is a need to adjust the environment in which cable operates. S. 12 does not overturn the 1984 Act; it is a reasonable bill intended to address legitimate concerns about the provision of cable service.

The most ironic aspect of the cable industry's opposition to this legislation is that many of the provisions in this legislation are the result of the Commerce Committee's discussions with the cable industry last Congress when we were considering S. 1880. In fact, S. 12 contains many of the provisions that the cable industry agreed with only 3 years ago. But the cable industry walked away from the agreement we had reached. We offered to sit down several times with the cable industry to attempt to work out our differences, but the cable industry refused. Now we find that the cable industry is pulling out all the stops to oppose this legislation.

I believe that the conference report on S. 12 is a targeted approach to problems with the cable industry. It protects consumers and encourages competition, while at the same time permits the cable industry to grow. It enjoys the full support of the Consumer Federation of America, senior citizens, city and State officials, the National Association of Broadcasters, labor groups, cable competitors, and satellite

dish owners. The conference report on S. 12 is the product of many years of work by committees in both the Senate and House. The bodies have ironed out the differences between the two bills in bi-partisan and productive fashion.

I particularly thank Senators INOUE and DANFORTH for all of their hard work on this bill. This is an opportunity to show the public that Congress cares about their concerns. I urge my colleagues to support this important and necessary legislation and vote to override the President's veto.

Mr. DURENBERGER. Mr. President, I will vote today with the rural citizens of Minnesota and cable customers across my State to override this veto of the Cable Consumer Protection and Competition Act of 1992.

To say that this bill has been the subject of heavy lobbying would be an understatement. If people could get as worked up about reducing the deficit as they have on this bill, we could get somewhere.

But this issue should be decided on the merits, and it is the consumers of Minnesota who have by far the strongest case.

I have always believed that the marketplace does the best job of creating innovation, allocating resources and setting fair prices. I am generally suspicious of regulation. Government only has a reason to step in when it is clear that the market is not working.

No one can look at the cable industry now, especially in rural areas, and call that a market. These protected, regional monopolies are doing what monopolies always do: Provide a lesser quality product for a higher price.

Mr. President, my roots are in small town Minnesota. Small towns are as important to Minnesota's future as they have been to our past. But whether the issue is health care, insurance or cable television signals, rural citizens usually pay far more for far less than their fellow citizens in urban or suburban areas. That is the economic law of numbers at work.

But unless we're willing to watch those communities have their quality of life whittled away until there's no reason left to live there, Government, at times, is going to have to intervene to restore some fairness to the marketplace.

This is just such a case.

Many citizens of rural Minnesota receive their cable T.V. programming through the National Rural Telecommunications Cooperative, which was set up by REA. NRTC sells the signal at cost to 72,000 customers. Do you know what the difference in price is between the cost of this basic service that rural Minnesotans get from a non-profit group and what someone can buy in the Twin Cities? About 500 percent. It costs someone in a small town five times as much, because that is the price cable companies can demand in a

non-competitive system. There can be no justifying that.

A constituent of mine, Bob Larson of West Central Telephone called to express his support for S. 12. West Central Telephone owns United Datavision, a cable company serving the towns of Sebeka and Menahga (Wadena County).

As a cable operator, he is cognizant of the regulation embodied in the bill, but favors it because it would foster new broadcast technology benefitting both his company and the consumer.

United Datavision recently purchased the franchise for all of the non-cable portion of Wadena County. Although it is too expensive to run coaxial cable to rural households, those same noncable households can be served by direct broadcast satellite [DBS].

United Datavision will be able to provide DBS starting on April 1, 1994. The DBS satellite will be put into orbit next year.

Portions of S. 12 encourage the development of new broadcast technologies, including DBS. DBS is not a hypothetical broadcast technology but a viable system that is in operation in other countries. These new broadcast technologies not only provide competition for cable, but will provide service to areas of Minnesota that have neither cable nor adequate over the air broadcasting.

Without S. 12, there is a danger that DBS will be locked out of the programming market by the cable operators; a viable system with nothing to broadcast. By encouraging DBS through the cable bill, the question of cable regulation may eventually become an ancillary issue due to the flexibility and potential of emerging broadcast technology.

The example of United Datavision points out that both technologies can exist simultaneously, providing new business opportunities, better service, lower prices and jobs. With our without cable, much of rural America is ill-served by the broadcasting community. The cable bill contains provisions that reach beyond our existing broadcasting systems. By raising our sights above the warring factions and looking at good broadcasting itself as the aim, we can better serve the people of Minnesota and the Nation.

Like many of my colleagues, I found this far from an easy decision to make. In fact, I voted for the repeal of cable regulation in 1984. I stated then what I wanted to accomplish through deregulation. However, upon examining the state of cable service and prices since deregulation, I know that bill did not work. I have found that cable rates have skyrocketed, increasing at three times the rate of inflation, while there has been a concurrent plunge in the quality of service.

Mr. President, this bill will not stifle competition as the cable companies

have suggested because currently, there is no competition in 97 percent of the market. In the areas of the country where there is true competition in the cable industry, the rates are 30 percent of those in the monopolistic markets.

Cable operators argue that they have substantially increased the scope of options available to their subscribers; in fact, they have had a substantial increase only in price. Most of the innovation in the cable industry has come in the form of more pay channels or pay-per-view choices, while at the same time the basic rates have exhibited exponential increases. The shift toward pay-per-view maintains a cable monopoly over selected programming even in the face of competition.

In analyzing the nature of the cable television market, I have tried to determine if there is a viable solution to the problems in the industry that could be addressed through market forces. My determination is that there are significant enough impediments to an effective market place to warrant the adoption of S. 12.

The truth is that cable operators benefitted from the boost which came with deregulation back in 1986, just as Congress intended. Cable access improved, programming increased 50 percent, and market share increased.

But Mr. President, the providers of cable service consolidated their operations through leveraged buy-outs, accessibility to programming for competitors was greatly reduced, and rates increased well beyond the rates of inflation. While deregulation has achieved the goal of market expansion, it has unfortunately created a monopolistic rather than dynamic market.

Mr. President, I believe that business as usual will not achieve the goals of fair rates for consumers and a strong and competitive market for cable operators and programmers. In a vibrant market, businesses do not ignore consumer preferences with impunity.

The cable industry is not a vibrant, competitive market. It is an unregulated monopoly and takes advantage of consumers who have no choice but to accept the rising rates and deteriorating quality of service. Many of our constituents have complained that the cable operators are unresponsive. Currently, cable operators are in a position to ignore requests for services and complaints about customer service due to the complete lack of alternatives available to the customer.

When cable was in its infancy, it was granted the authority to retransmit local broadcasts without permission from or compensation to the broadcasters. That was as it should have been when cable essentially provided an antenna service for those who were not able to receive broadcast signals by conventional means. The situation, however, has changed.

After regulation ceased, cable operators became active players in all as-

pects of broadcasting, and are now direct competitors with broadcasters. They compete for advertising revenues, present alternative programming, and are a potent force in negotiating for lucrative programming such as major sports broadcasts.

Currently, cable's congressional mandate to carry programming purchased and produced at the expense of over-the-air broadcasters gives cable operators a significant advantage over broadcasters. While the availability of network programming, local programming, and public television on cable systems is a significant selling point for cable operators, broadcasters receive no reciprocal benefit from cable operators.

In the years since deregulation, cable operators have become increasingly competitive in the advertising community, and are in direct competition with the broadcasters, while using the broadcaster's programming to help sell their services. In effect, broadcasters subsidize a portion of cable programming; for cable operators, retransmission is a bonus, not a burden.

The retransmission consent portion of S. 12 will, in my judgment, ensure that FCC licensed broadcasters will not be hampered by the obligation to provide programming for their competitors in the advertising market. Under the 1934 Communications Act, broadcasters are not allowed to pick up other signals without consent. Retransmission consent would guarantee that cable operators should abide by the same rules.

Similarly, the must-carry regulation will benefit both local broadcasters and the communities which they serve by assuring that local signals are available through the local cable system. The combination of these two provisions will guarantee that broadcasters can effectively fulfill the purpose for which they were granted a license. Neither one of these provisions would necessarily require cable subscribers to pay for local broadcast television. The provisions do, however, ensure that broadcasters have a measure of control and certainty in how their programming is used.

Although my inclination is to look at regulation with a skeptical eye, the provisions of S. 12 represent a restrained approach. First, it prevents a patchwork of wild regulation by directing the FCC to establish a uniform standard under which local authorities can request regulatory authority.

Second, this regulation is only applicable to the basic tier of service and does not cover premium channels. It will manage programmers who are vertically integrated with major cable operators, by providing popular programming to competitors such as Wireless Cable. In so doing, it will send to the investment community a clear signal of support for such competitive alternatives.

Third, cable operators are afforded rights of appeal to the FCC. Finally, despite the arguments of its detractors, this bill is not an example of onerous regulation and governmental interference. The regulation embodies in S. 12 is only applicable to those areas where effective competition does not exist and its controls will be phased out upon the realization of such competition.

After long deliberation, Mr. President, I have determined that S. 12 is the best way to ensure that cable rates reflect market forces rather than indicating monopolistic prerogative. Implementation of the provisions of S. 12 are necessary to assure that cable rates and services are tied to positive market forces resulting in a discernable improvement in service, programming, and technology.

I have supported my President often on the vetoes he has sent to this Congress. I believe he has stopped a lot of bad legislation from becoming law. But I question the wisdom—both in terms of politics and public policy—of banking all that on this bill.

In 1987, President Ronald Reagan told several of us that it was crucial for Republicans to support their President and sustain his veto of the highway bill. As we all recall, it was a time when President Reagan was in very obvious political need. His Presidency was racked by the public trial called Iran-Contra. He asked us to put his interests ahead of the views of our constituents.

My message today is the same as it was then: "I'm sorry, Mr. President, Minnesota comes first."

Mr. ADAMS. Mr. President, I rise today to urge my colleagues to join me in overriding the President's veto of the Cable Television Consumer Protection Act.

This vote boils down to one issue and one issue only—greed. The cable industry exerts such an overwhelming monopoly that in more than 99 percent of the local markets, only one cable company exercises control. Since deregulation, the cable industry has established a stranglehold on the consumer pocketbook. The price of cable service has soared, more than tripling the rate of inflation.

There must be something wrong with the TV reception at the White House these days. The President receives the cable industry message sharp and clear and he never focuses on the consumer picture. Contrary to the recent wave of misinformation by the cable industry, the cable bill is a responsible approach towards reducing price gouging and encouraging increased competition in this monopolized industry. Where there is no effective competition, this legislation seeks to provide fair and responsible regulation of rates in order to protect consumers.

With unemployment at more than 9 million people and the economy in a

chronic recession, any rate increase has a harmful effect on American households. Rate increases have an especially harmful impact on people with fixed incomes. Cable TV has become a lifeline to the world for many senior citizens; and as the National Council of Senior Citizens points out, seniors on fixed incomes find it harder and harder to pay their skyrocketing cable rates.

Shocking rate increases for individual households since enactment of the 1984 Cable Communications Policy Act make the rate regulations of basic tier cable the most important provision in this bill. The average rate increase since 1986 for our five markets in Washington State was 85 percent.

A Washington State senator recently wrote me that he receives hundreds of letters annually from cable television customers complaining about poor service, increasing rates, and a lack of choice. This bill give consumers a choice and is simply the right thing to do.

A mayor of a major city in the State of Washington recently wrote me the following note:

For the past 2½ years City staff has been engaged in franchising negotiations with our local cable operator. We have discovered that few of the public benefits envisioned by the supporters of the 1984 Cable Act have come to fruition, and the process of crafting a franchise which meets the community's future cable-related needs and interests is frustrated for all sides involved.

The cable bill is a responsible measure that looks forward to future competition, especially from new wireless cable systems. It provides competitors of the existing cable system with fair access to programming. The Skyline Entertainment Network, a wireless system in Spokane, WA, claims that big cable system operators try to maintain their monopolies by limiting their competitors' access to programming. Skyline and a similar wireless system in Yakima, WA, are good examples of the type of new systems that the bill will encourage.

Let's set the record straight. Responsible regulation to protect consumers and encourage competition is not misguided micromanagement of the cable industry; it is simply common sense. Consumers cannot continue to be burdened by the unrestrained hand of an expansionist monopoly over the cable marketplace. We, in this body, have a responsibility to the public to get the cable industry headed down the right road, and eventually toward a competitive market with the consumers' best interest at heart.

It has always been the province of the President since the days of Teddy Roosevelt's trust busting to protect the American people from exploitation by the outrageous business conduct of monopolized industries. That responsibility now lies in the hands of Congress because this President has abdicated Government's role in consumer protection.

Mr. President, in conclusion, I call upon my colleagues to put partisan interests aside and champion the best interest of the American people by voting to override the President's veto. It is a good bill, it is fair bill, and will protect consumers against outrageous price gouging by the cable industry.

Mr. SIMPSON. Mr. President, I rise to discuss the veto message to S. 12, the cable bill.

This is certainly one of the toughest votes that I have cast during this session of Congress. It ought not to have been. It is not the substance of this bill that has made it such a tough and difficult vote, but rather the swirl of hype and distortion that has surrounded the issue, usually in the form of well-funded advertising from the various sides that stand to gain financially from the outcome of this vote.

It is interesting to notice how cable television and network television, who have such difficulty finding time to air important information about such issues as the Federal deficit, have managed to flood the airwaves with, to put it charitably, misleading ads about this legislation.

It has not been a pretty sight. Both sides have striven valiantly to portray themselves as being on God's side. We are defending the people, defending the consumer, the ads all imply, and anyone on the other side is a foe of the consumer.

That simply is not the situation, not by a long shot. It is, instead, a question of whether an imperfect regulatory bill is better than the status quo. It is not an easy choice, and reasonable people can disagree.

I had various concerns about this legislation, and I have them still. I voted for the Packwood substitute last January in an effort to moderate the terms of the legislation. That amendment failed, 35 to 54. Despite my concerns, I voted for this bill because I did not think the existing situation—with cable television acting as a local monopoly in almost all cases—could be made to work for the consumer. We needed some legislation to bring more competition into the system, and to regulate practices where that competition did not arise.

This was not a choice, to my mind, between doing right and doing wrong—it was a very difficult choice between a bill that I believed was imperfect and a status quo which I felt ought to end.

I am very, very disappointed to be voting to override a veto at this time. The President is perhaps the sole individual who did not play politics with this issue. His opposition to the bill was consistent from the beginning. The Congress failed to address his concerns in conference—and knowingly did so—and he was left with a bill he could not sign.

That all being said, I must hold to my position that this bill is better

than no bill. I believe that Senator DANFORTH and others have done their best to put together a bill that gives some immediate relief to the consumer while opening the door to a greater amount of competition in the cable industry. The rate regulation provisions have been moderately drawn in conference, and I have always favored the retransmission consent provision. The consumer needs some provisions like these while the provisions promoting competition take time to work.

My final view is simply that, if we pass this bill, the consumer will be better served than if we don't.

So I cast this vote with some reluctance and some frustration. I fell confident that I am acting in accordance with my view of the public interest—I am not as confident about the altruistic attitude of some others who have pontificated about this issue. It is tiresome to be lectured to about moralities by commercial interests who view this issue through the prism of their own profit motives.

But that is enough—I will now hold my peace on the subject. I will support this legislation, notwithstanding the President's veto, and I urge my colleagues to do the same.

Mr. BURNS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. WOFFORD). Without objection, it is so ordered.

Mr. DOLE. Mr. President, when it comes protecting cable consumers, the sponsors of this bill have tuned into the wrong channel.

As I see it, Congress has two responsibilities in addressing consumer problems with the cable industry. First, and foremost we must ensure that consumers are not gouged and that they are protected both today and tomorrow. And second, we should establish a strong communications policy that ensures our Nation's edge in the communications industry. Unfortunately the bill the President vetoed fails on both counts.

Consumers have asked us to address the very real problems of cable rates and service shortcomings. I cannot recall a town meeting or chamber of commerce breakfast back in Kansas that did not hear at least one complaint about this industry.

So the urge to do something is understandable and justifiable. But that something should not be a measure that will cut off the development of the programming and information that consumers really want, should not be a reregulatory scheme which will entrench and perpetuate the existing

cable monopolies, and above all, should not be something that in the end will leave consumers paying more for less, still captive to a government sanctioned monopoly.

Mr. President, from the perspective of genuine consumer protection and common sense communications policy, this bill flunks the test.

S. 13 dictates cable system architecture for the 10 years and thereby ignores more cost effective delivery systems that may come with innovation. This mandate is an expensive gambit, raising costs of cable operators up to an estimated \$5.8 billion.

S. 12 was stripped of any true competitive provisions. I supported a provision to promote competition in rural areas by permitting telephone companies to offer cable services to communities with populations smaller than 10,000. This provision would have gone a long way toward reasonable cable rates for rural America. Unfortunately, it was completely eliminated in conference.

While S. 12 does not understand competition, the FCC does. Earlier this year, the FCC authorized telephone companies to deliver video programming to consumers through video dialtone services, which I encouraged. If we were really serious about promoting free-market competition, we would have provided in this bill for telephone company entry—the only entity strong enough to go head to head with the cable companies. True competition spurs better services, innovation, and jobs.

And let us face it, S. 12 is not the consumer's Robin Hood. It does not take from the rich and give back to the poor. Cable companies are not going to get stuck with this bill. The consumer is. That means that under this bill, cable customers will pay even more to watch the proceedings of Congress on C-SPAN, or whatever their favorite programming may be.

Mr. President, as we approach the 21st century, we must also have a coherent communications policy. America has a rich history in the communications field—from the pony express to the telegraph, telephones, radios, and televisions, we have always been innovators and world leaders.

With recent and rapid developments in the communications field, including computers, fiber optics, fax machines, cellular phones, and satellites, America needs a flexible, forward-looking communications policy more than ever before. Restrictive regulatory policies will be counterproductive and will mean that the United States will lose its global competitive edge. Competition, not Federal regulations, is the only regulator that can accommodate the opportunities that will accompany advances in technology.

Mr. President, this bill is not the answer to the justifiable frustrations of

cable consumers. This cable bill is neither good for the consumer nor good communications policy. We all want to address the concerns of cable consumers, so let us change the channel, tune in next year, and do it in a responsible way.

I urge my colleagues to sustain the President's veto.

Mr. President, for all the reasons I set forth in my statement, I think the veto should be sustained. I am not certain the veto will be sustained. But I would just add one additional thing. Like any other bill near the election, there has been a lot of politics and a lot of talk about politics and a lot of comments about the President's position and others' positions with reference to this bill.

My junior colleague from Tennessee was quoted as saying in the Chicago Tribune, September 29, 1992:

George Bush knows that on this issue this cable monopoly owns him lock, stock, and barrel. If you veto the cable bill, you will have sided with the monopolies and against the American people.

Another quote in the Associated Press just a couple days ago: "President Bush has vetoed important consumer legislation to protect his rich friends in the cable monopolies."

Another in Reuters, the same date: "So he can protect the ability of big cable companies to keep soaking their consumers."

In my view, this is partisanship to the nth degree, and it makes it rather difficult, I hope, for some of my colleagues on this side of the aisle to understand that this has become a political game. This is politics. The merits of this legislation went out the window 2 weeks ago, 3 weeks ago, 30 days ago. And now we have one candidate for Vice President, my distinguished junior colleague from Tennessee, out saying the President is owned lock, stock, and barrel by the cable industry. Where is the proof? Where is the proof? And how can we continue to make reckless charges just because it may be campaign season?

So I say to my colleagues on this side of the aisle, this is politics. This is an effort to embarrass President Bush 30 days before the election, 1 week before the first debate. That is what it is all about. The merits of this legislation have been forgotten. We have a fight between big money interests on both sides, the networks, the cable companies, the movie industry, the big newspapers, and the consumer has been forgotten.

So I urge my colleagues to sustain the President's veto. He has not asked for much. We have sustained 10 vetoes in the Senate. They have sustained 10 vetoes in the House. Some have been pocket vetoed, some have been referred to committees. This is an important piece of legislation. It should not have been politicized, but it has been politi-

cized. So I ask my colleagues on this side and the others who have voted with us before to sustain the President's veto. We will get good legislation next year based on competition and not reregulation, based on policy and not based on politics.

Mr. DANFORTH addressed the Chair.

The PRESIDING OFFICER. The Senator's time has expired. The Senator from Missouri is recognized.

Mr. DANFORTH. I ask unanimous consent to proceed for 1 minute.

The PRESIDING OFFICER. The Senator indeed has 1 minute. He will be recognized.

Mr. DANFORTH. Mr. President, this is not a partisan bill. This bill was reported out of the Senate Commerce Committee with a majority of Republicans voting for it. The fact that a Presidential veto is overridden is not a slap in the face to the President. President Reagan had 9 vetoes overridden. President Nixon had 7. President Eisenhower had 2. President Truman, whom everybody is citing this year, had 12 vetoes overridden. It is not an insult to the President. It is merely a disagreement on an issue.

The PRESIDING OFFICER. The question is, Shall the bill pass, the objections of the President of the United States to the contrary notwithstanding? The yeas and nays are mandatory under the Constitution. The clerk will now call the roll.

The assistant legislative clerk called the roll.

Mr. MACK (when his name was called). Present.

The yeas and nays resulted—yeas 74, nays 25, as follows:

[Rollcall Vote No. 264 Leg.]

YEAS—74

Adams	Ford	McConnell
Akaka	Glenn	Metzenbaum
Baucus	Gore	Mikulski

ANSWERED "PRESENT"—1

Mack

The PRESIDING OFFICER. If there is no other Senator wishing to vote, on this vote the yeas are 74, the nays are 25. One Senator responded "present." Two-thirds of the Senators voting, a quorum being present, having voted in the affirmative, the bill, on reconsideration, is passed, the objections of the President of the United States to the contrary notwithstanding.

Mr. DOLE addressed the Chair. The PRESIDING OFFICER. The Republican leader is recognized.

Mr. DOLE. Mr. President, let me indicate that I am disappointed in the outcome, but I knew at the outset what the result would be. I say to my colleagues on this side, many of whom would have voted to sustain the President's veto, we were somewhere between 32 and 34 votes. We could never nail down the 33d one to get the 34th one. It has been a great effort.

I thank many of my colleagues who voted on the other side for a willingness to sustain the President's veto. This is the first time we failed to sustain the President's veto. There is still an opportunity in the House. We have sustained 10 vetoes in the Senate and 10 in the House; 7 or 8 have been pocket vetoed. Some have gone back to committees. There may be one other bill pending.

In any event, I thank my colleagues, and I thank the President of the United States for the efforts he made on a personal basis to help sustain the veto. I regret the outcome, but it is over, and I hope the right decision was made.

Mr. MITCHELL. Mr. President, I commend the authors of the legislation, the distinguished Senator from Missouri [Mr. DANFORTH], the Senator from Hawaii [Mr. INOUE], and the chairman of the committee, Senator HOLLINGS, for their diligent efforts in making the enactment of this legislation which is important to the American consumers possible.

LEGISLATIVE BRANCH APPROPRIATIONS ACT, FISCAL YEAR 1993—CONFERENCE REPORT

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of the conference report to accompany H.R. 5427, the legislative branch appropriations bill, with 30 minutes for debate, equally divided and controlled in the usual time; and at the conclusion or yielding back of that time, the Senate proceed, without any intervening action or debate, to vote on the legislative appropriations bill.

The PRESIDING OFFICER. The clerk will state the conference report.

The assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the

amendments of the Senate to the bill (H.R. 5427) making appropriations for the Legislative Branch for the fiscal year ending September 30, 1993, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of today, October 5, 1992.)

The PRESIDING OFFICER. The majority leader.

Mr. MITCHELL. Mr. President, I suggest the absence of a quorum and ask that the time be charged equally against the two sides.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. REID. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Nevada is recognized.

Mr. REID. Mr. President, the conference report on H.R. 5427, making appropriations for the legislative branch for fiscal year 1992, and for other purposes is at the desk. I have no reservation in recommending its adoption by the Senate.

The agreements incorporated in this Report 102-1007 add up to a fair, responsible, but, I stress, very tough bill. In the aggregate, the sum of the appropriations it provides is less than the amounts requested in the President's budget by \$395,216,443 in budget authority and \$319,108,000 in outlays or 12.3 percent. More significantly, it contains significant reductions in funding below current levels for the legislative branch. The net result, according to CBO scoring, is a cut in total spending of approximately \$150 million below the fiscal year that ended last Wednesday. In percentage terms, this represents a 6.5-percent cut below last year's levels of expenditure. So all my colleagues should know that this conference report that is now going to the President shortly is 6½ percent below last year's level of expenditures. This is about 1½ percent more than when we left this body last week. We have made additional significant cuts. I think the conferees from both Houses can take some justifiable pride in that achievement. To my knowledge, none of the other domestic appropriations bills for this year, all of which provide funding mainly for the other two branches of Government, have come close to meeting that standard.

The conference report and joint explanatory statement provide a detailed description of the agreements we are

recommending. Let me just touch upon a few of the more significant items.

The Senate version of this legislation included an amendment, adopted during floor consideration, calling for a 15-percent reduction in legislative branch spending over 3 years. While the conferees concluded that this provision was ultimately unworkable, I am glad to say that we are returning with a bill that surpasses the first year objective of that amendment insofar as actual spending is concerned. We have cut expenditures by 6.5 percent, a full point and one-half more than the amendment contemplated for the first year. So we are on the right trajectory and we intend to do our best to stay there.

That amendment also called for a study of the staffing requirements of the Congress. The bill before the Senate includes a legislative provision which addresses that concern in reauthorizing the Ad Hoc Joint Committee on the Congress. We also included appropriate language on this matter in the statement of managers accompanying the Conference report.

So we are going to get that also. That is study staffing levels of the Senate and the House.

This would be as to individual staffs. I know that the junior Senator from Texas was concerned about the staffing levels of the committee as compared to individual personal staffs. This will be looked into. As I said, we included a statement on this matter in the statement of managers.

Notwithstanding the very constrained levels of funding in this bill, I am pleased that we were successful in retaining half of the 141 positions the Senate had restored for the Library of Congress and Congressional Research Service.

I say to the senior Senator from Oregon, the man who has been so concerned about how the Library of Congress is treated, that we had level funding from last year. We in conference were able to split the difference so we came up with half of the increases we felt were appropriate.

The conference agreement also includes \$2 million of the \$7 million added in the Senate for the reconstruction of the Conservatory at the Botanic Garden.

The Senate bill also contained a major initiative with respect to the General Accounting Office.

Let me just say, in short, with the Government Accounting Office, I told my colleagues in the Senate those that objected to what in their minds was unfairness of some of the work done by the Government Accounting Office that I thought what we should do is have an audit of the Government Accounting Office like they audit everyone else. I think this was fair. It would not call for any cuts in the General Accounting Office.

We went to the House and some committee chairmen over there objected on

a jurisdictional basis as to our doing that. As a result of that there was a significant cut in the funding of the Government Accounting Office. I think they would have been much better off had we simply done the study that I requested.

After extensive discussions with a number of Senators, we had included provisions authorizing a comprehensive outside audit of GAO and earmarking \$2 million for the project under the Architect of the Capitol. This was offset by a comparable reduction in the GAO appropriation. These provisions reflected the ideas of several Senators, including the senior Senator from New Mexico, Senator DOMENICI, Senator BOND from Missouri, who is a member of our subcommittee, myself, and others. Moreover, these provisions had been modified in response to consultations at the staff level with the Governmental Affairs Committee before we brought the bill to the full Appropriations Committee. In fact, it is my understanding that the Governmental Affairs Committee intended to use the findings in the audit report as the basis for a series of oversight hearings on GAO's mission and performance.

Unfortunately, none of these provisions survived the conference. Several House full committee chairmen had written Chairman WHITTEN strongly opposing the Senate amendments with respect to GAO. As a consequence, the Managers for the House were absolutely adamant. And so we were forced to accept a compromise under which the GAO budget was slashed by another \$5 million and the audit provisions were deleted. I must say that I am personally disappointed in this outcome. I believe a thorough and impartial evaluation of GAO operations is long overdue and should precede any major changes in GAO's budget and program. I said on several occasions earlier this year that, absent such an audit, a large cut in GAO's budget was all but inevitable. And that, unhappily, is the way the issue came out this year.

I hope we will have better success and cooperation next Congress on this matter. But those who continue to oppose the audit approach and, at the same time, refuse to hold appropriate oversight hearings as promised almost 2 years ago now, should be on notice. No audit and no oversight will mean more and deeper cuts.

In closing, let me once again recognize Chairman FAZIO, the ranking member, Mr. LEWIS, and the other House conferees. I cannot say that meeting these gentlemen in conference is always a pleasurable experience. But it is never dull. I think we are usually able to work out a package of compromises that resolves our disagreements in a fair and responsible fashion. My thanks to them and their capable staff.

Much of the credit for what we have accomplished in this bill belongs to my

ranking member, Senator GORTON and the other Senate conferees. The Senate is particularly fortunate that Senator GORTON serves as ranking member of this subcommittee. He is committed to the welfare of this institution and of the legislative branch in general. His ideas and advice are invariably sensible and constructive.

The Senate delegation on the legislative bill, of course, always includes our full committee chairman, Senator BYRD, and his colleague and ranking member, Senator HATFIELD. Both personify what it means to be a Senator. Their guidance and assistance are invaluable.

The subcommittee is losing a valued Member in Senator ADAMS of Washington who will not be returning to the subcommittee and the Senate next Congress. His contributions to our deliberations will be missed. I extend to him my congratulations on his retirement and wish him well in his future endeavors.

Finally, I wish to acknowledge the work of our committee staff: Jim English, the full committee majority staff director; Keith Kennedy, the minority staff director for the full committee who, fortunately, is also assigned to this subcommittee; Lula Joyce and Ginny James, who provide capable administrative support; and Jerry Bonham, the majority clerk on the subcommittee.

I ask unanimous consent that an October 5 letter from the Congressional Budget Office in support of the statement I made regarding where this bill is financially, be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. CONGRESS,  
CONGRESSIONAL BUDGET OFFICE,  
Washington, DC, October 5, 1992.

Hon. HARRY REID,  
Chairman, Subcommittee on Legislative Branch,  
Committee on Appropriations, U.S. Senate,  
Washington, DC.

DEAR MR. CHAIRMAN: This letter compares the Congressional Budget Office (CBO) estimate of the budget authority and outlay scoring for the 1993 conference on Legislative Branch Appropriations, as reported on October 3, 1992, with CBO's latest estimate of the enacted 1992 bill:

LEGISLATIVE BRANCH APPROPRIATIONS BILL  
DISCRETIONARY ACCOUNTS  
(In millions of dollars and percents)

	Budget au- thority	Outlays
Fiscal year 1992 enacted .....	2,303	2,307
Fiscal year 1993 conference .....	2,275	2,157
Change .....		
Millions of dollars .....	-28	-150
Percent .....	-1.2	-6.5

The estimates shown for 1992 budget authority and outlays include the regular appropriation bill (P.L. 102-90) and the effect of the 1992 rescission bill (P.L. 102-298).

Sincerely,

JAMES L. BLUM,  
(For Robert D. Reischauer).

Mr. REID. I yield to my friend from Washington.

Mr. GORTON. Mr. President, Senator REID and I bring to the Senate today the conference report on H.R. 5427, the Legislative Branch Appropriations Act for fiscal year 1993. This measure passed the Senate last Thursday on a rollcall vote of 75 to 23. The conferees met Saturday afternoon and reached agreement promptly and amicably. I want to express my appreciation to our House counterparts, led by Representative FAZIO and Representative LEWIS, for working with us to produce an agreement that meets the requirements of fiscal constraint while providing for the services that our colleagues and our constituents demand.

Mr. President, our agreement provides a total of \$2,274,960,057 in new discretionary budget authority for all the entities of the legislative branch. This is a reduction of \$28,203,000 from the amount enacted last year.

In terms of outlays, our agreement will result in \$2,157,082,000 according to CBO, which is a reduction of \$149,827,000, or 6.5 percent below fiscal year 1992 outlays. When we brought this bill to the Senate floor, we were 5.2 percent below fiscal year 1992 outlays. Additional reductions were made in conference to bring us down to 6.5 percent below last year. I believe we have surpassed the standard set for us in the amendment offered by Senator SEYMOUR and adopted by the Senate on a 85-13 vote.

Mr. President, the changes agreed to in conference are as follows:

For the Library of Congress, the Congressional Research Service, and the Copyright Royalty Tribunal, the conferees agreed to split the difference between the House and Senate levels, increasing funding over the House level for these vital activities by nearly \$4,000,000.

For the Capitol Grounds appropriation, the House agreed to our proposal to fund the requested amount, so that we can continue the effort to improve the appearance and the accessibility of the grounds.

In other areas, the conferees were compelled to make reductions in order to achieve the savings necessary to meet the goals of the Seymour amendment. The Senate receded to the lower levels proposed by the House for the Capitol Police, and the House receded to the lower Senate levels for the office of the Architect of the Capitol. Due to our funding constraints, we were unable to sustain the Senate position of providing funding to initiate the reconstruction of the Botanic Garden conservatory. However, we were able to include funding to begin the design of that structure.

The House conferees did not wish to agree to the Senate language concerning peer review of GAO reports and reimbursement of detailees. I expect we

will pursue this matter again next year. But in exchange for agreeing to drop the language, we were able to win approval of further reductions in GAO funding to a total fiscal year 1993 level of \$435,167,000 or \$7,000,000 below last year's level.

The conferees agreed to a number of language provisions. We have extended the authorization for the Boren-Domenici joint committee to study the Congress until the end of next year, and we understand the joint committee will review the congressional staffing issue raised in the Seymour amendment. We have provided authority for the Architect of the Capitol to lease space in the Judiciary Office Building, vacating space in one of the House annexes. We have extended the deadline for the unification of the Capitol Police payroll, and we have reauthorized the Senate Caucus on International Drug Control.

We have also included, Mr. President, a provision relative to the Adams Fruit Co. versus Barrett case that was cleared on both sides of the aisle in both Houses and with OMB. We do not ordinarily agree to legislative matters beyond the jurisdiction of the subcommittee, but the widespread agreement on this matter made it difficult to resist strictly on jurisdictional grounds.

Mr. President, I recommend this bill to the Senate. I wish we could have provided more funding in some areas, but I recognize the political and fiscal imperatives that make that impossible at this time. I congratulate our chairman, Senator REID, for his deft handling of controversial bill, and thank Chairman BYRD and Senator HATFIELD for their support.

I should only like to add, Mr. President, and emphasize the point concluded in these written remarks, that by CBO scoring, we are 6.5 percent, some \$150 million, less in dollar appropriations for fiscal year 1993 than we were for fiscal year 1992. This is a most responsible proposal.

Although the amendment by the Senator from Colorado and the Senator from California was not included for future years, the goals which they set in their amendment for the year for which this appropriation is actually in effect was, in fact, met.

I believe that this goal could be met because of the hard work by the chairman, Senator REID, with whom it is a pleasure to serve, both during the long days of hearings and putting a bill together for the subcommittee, for the full committee, for the floor, and in the conference committee with the House.

I, too, want to thank our staff, without which we obviously could not have reached this point.

There are only two appropriations bills after this before the Congress can complete its work for the year. This is always a very, very difficult one, Mr.

President. But I think that we have acted responsibly, both to the people of the United States and for the proper functioning of this institution; and, for that matter, the balance of the Congress.

I am particularly happy about the support we have been able to provide for the Library of Congress which, in many respects, is the most important entity within the ambit of the legislative appropriations bill. I am sorry that it could not have been more.

I felt, and I know the chairman did, that we would like to have gotten for the Library of Congress the full Senate apportionment. But we did everything we possibly could to get the last almost \$200,000 as the last act of the conference committee.

I am also sorry that we have partly deferred rebuilding the Botanic Gardens, but I am convinced that will take place in the future.

And while we were not able to include the study of the General Accounting Office, which Senator REID and so many others wished to include in this bill, we have certainly brought some of our dissatisfactions to the attention of the GAO with an appropriation which is \$7 million less than it was for fiscal year 1992.

This is a good, sound, fiscally responsible proposal, and it should be passed.

Mr. President, I yield 5 minutes to the Senator from Colorado, [MR. BROWN].

The PRESIDING OFFICER. The Senator from Colorado.

Mr. BROWN. Thank you, Mr. President.

I want to express my profound thanks to the distinguished chairman of the subcommittee and the ranking member. These two Senators have accomplished something that I do not recall ever having been accomplished in the time that I have served in Congress—in the decade that I spent in the House and the 2 years I have spent here—and that is, Congress actually cut its own budget.

I believe it is of extreme significance because without our involvement, without our willingness to face up to the problem, without this Congress' willingness to have the cuts come to their very own budgets, the American people are not going to think we are serious. And, in fact, we may not be serious.

I must say that I wish the entire amendment had been passed that the Senate had gone on record for. I think there is much more we can do in this area.

But the courage shown by the distinguished Senator from Nevada and the distinguished Senator from Washington is a guideline to what we have to have in the future. I believe the example they set with this bill in this effort this year shows an entirely new attitude in Congress.

I had hoped, of course, that we would have a study focused on proper staffing levels. I am convinced an outside group of experts who come in and do time and motion studies, who could give an objective view of the kind of staffing that is necessary here, will show up with the enormous staffing that I believe is present in the Congress, and give us some guidelines for the proper way to go in handling it. It is very possible that the study that the conference report does refer to can accomplish this job. I think all of us will keep our fingers crossed.

The bottom line is this: We did not do nearly what we should have, but it is a remarkable beginning. And that, I think, shows enormous courage in the leadership of this Senate that moved forward in that conference committee.

The PRESIDING OFFICER. Who yields time?

Mr. REID. I yield back the remainder of my time, unless the senior Senator from Oregon wishes to speak.

Mr. GORTON. Mr. President, I yield such time to the senior Senator from Oregon as he may wish to use.

The PRESIDING OFFICER. The Senator from Oregon.

Mr. HATFIELD. Mr. President, I would like to commend the leadership of this subcommittee of our Appropriations Committee. Not only have they achieved the 602(b) allocation, but they have gone below it, as has been indicated, by 6.5 percent.

Mr. President, I just want to indicate again that the legislative branch appropriations has certainly had a great deal of focus, and sometimes I think more or less is a political football. But, nevertheless, in the time that this committee has worked, it has really, I think, addressed the components, including the legislative branch itself and the other agencies, such as the Library of Congress.

I am particularly happy about maintaining our commitment to the Library of Congress. That is a very significant part of not only the operation of the Congress, but to the entire Nation.

So I want to add my accolades for a job well done to this subcommittee and to its leadership.

Mr. GORTON. Mr. President, I yield back the remainder of my time, since no one else wishes to speak.

Mr. DOMENICI. Mr. President, I rise in opposition to H.R. 5427, the legislative branch appropriations bill for fiscal year 1993. I do not believe this bill goes far enough.

The statement of managers for this bill claims that "the conference agreement achieves an outlay reduction below the fiscal year 1992 level that surpasses the fiscal year 1993 objective" of the Senate amendment, which was a 5-percent reduction.

When all 1992 action is taken into account, including impact of the rescis-

sion bill, this conference report is basically at the 1992 level, using CBO estimates. Levels for most Senate accounts show no reduction from the Senate-reported bill.

I would also object to the deletion of language Senator BOND and I requested which would establish an Independent Peer Review Committee for the General Accounting Office.

Once again, we see where powerful House chairmen—chairmen of committees that receive the benefit of numerous GAO detailees—have moved to block any change in the status quo.

As the chairman and ranking member of the Legislative Branch Subcommittee know, for some time now I and many others have been concerned about the direction in which GAO seems to be heading—that it seems to be more interested in making policy pronouncements and grabbing headlines, rather than performing its traditional accounting and auditing functions.

My concerns have been expressed to the authorizing committee and the Legislative Branch Subcommittee. Last year, I introduced S. 1400, the General Accounting Office Reform Act, to bring attention to and to address some of these issues.

Much to my disappointment, the authorizing committee declined to examine any of the issues raised with regard to GAO. Therefore, I felt compelled to offer language in this year's legislative branch appropriations bill that addressed at least one of the issues.

The purpose of this legislation was to examine both the general procedures used in report generation, review, and issuance, as well as the methodologies employed in producing the reports.

This Peer Review Commission was not intended to be a witch hunt—it was an attempt to examine, in a fair and open manner, serious charges about GAO's objectivity and the integrity of their work.

I will not give up on this issue. Rest assured, as cochairman of the Joint Committee on the Organization of the Congress for the Senate, I intend to press for a review of GAO's role in this branch and in the Federal Government as a whole.

Mr. SEYMOUR. Mr. President, I rise to express my opposition to the conference report to H.R. 5427, the legislative branch appropriations bill.

To be frank, opposition is an understatement.

Less than a week ago, 85 Members of the U.S. Senate overwhelmingly voted for an amendment I introduced along with my good friends from Colorado and Arizona. This amendment would cut Congress' budget by 15 percent over the next 3 years, prohibit the carryover of unobligated funds, and require an independent audit of the staff needs of the current Congress. This amendment represented a commitment to long-

term reform—an effort to turn back the tide responsibly on a decade of irresponsible spending.

Eighty-five Senators, Mr. President.

This amendment represented modest reform. In fact, it was intended to be a compromise—a compromise of the majority will of the Senate, which expressed last April that our budget be reduced by 25 percent over a 2-year period.

Again, 85 votes in favor of long-term reform. A bipartisan recognition that our spending policies needed to emphasize frugal practices, not free-wheeling spends.

One day later, 402 Members of the House of Representatives instructed the conferees to retain the Seymour-Brown-McCain provision. Only one Member voted against the motion. Indeed, every House member of the conference committee—save one who did not vote—voted for the motion to instruct conferees. In effect, they were instructing themselves to keep the amendment.

What that the conference committee give us?

Not what was instructed by both Houses of Congress.

In terms of budget authority, the conference report represents merely a 1.25-percent reduction from fiscal year 1992.

In terms of outlays, the conference report represents a 6.5-percent reduction from fiscal year 1992.

I commend the conference committee for reducing fiscal year 1993 outlays beyond the 5-percent reduction I proposed last week. In that context, my efforts have been successful.

However, when it came to future cuts, the conference committee noticeably was silent. It called the proposed cuts in future years as unworkable because of the use of the word obligations rather than outlays or budget authority.

In other words, on the surface, it seems that confusion over the intent of my amendment with respect to future year cuts was the basis for its elimination.

If that was the case, Mr. President, why didn't the conferees seek the intent of the amendment from its authors? Indeed, given the extraordinary support for this amendment, its intent would seem to be clear. And if not, given the near unanimous support of the amendment, wouldn't the conference committee make a conscientious effort to clarify and work out this amendment?

Mr. REID. Mr. President, I ask unanimous consent that the pending matter be set aside for purposes of entering another unanimous-consent request.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

#### FOREIGN OPERATIONS APPROPRIATIONS ACT, FISCAL YEAR 1993—CONFERENCE REPORT

Mr. REID. Mr. President, I submit a report of the committee of conference on H.R. 5368 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 5368) making appropriations for foreign operations, export financing, and related programs for the fiscal year ending September 30, 1993, and for other purposes, having not, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of today, October 5, 1992.)

Mr. LEAHY. Mr. President, I am pleased to urge adoption of the conference report on H.R. 5368, the Foreign Operations, Export Financing, and Related Programs Appropriation for fiscal 1993.

The most important good news about this conference report is that it cuts the foreign aid program by about \$700 million below the fiscal 1992 level, and it is \$1 billion below President Bush's request. Those savings will go to reduce the Federal deficit, which was my top priority in proposing a major cut in the foreign aid program this year.

There are other important features of the conference report I would like to highlight for Senators.

I am delighted that the Leahy-Kasten amendment prohibiting the use of any foreign aid funds to subsidize or otherwise induce U.S. businesses to cut back or close their operations in the United States and to relocate abroad is retained and strengthened with language drawn from a bill offered in the House by Congressman GEORGE BROWN. The provision now also prohibits the use of U.S. foreign aid funds from contributing to the creation or operation of export processing zones abroad unless the President certifies to Congress that such support will cause no loss of jobs in the United States. As chairman of the Foreign Operations subcommittee, I am absolutely determined that the foreign aid programs will in no way assist in the export of American jobs. That would be an outrage, and none of us should tolerate it.

The conference report for the first time breaks with the cold war era and begins the difficult adjustment to the new challenges the foreign aid program must confront. All grant military aid to the so-called NATO base rights countries, Turkey, Greece, and Por-

tugal, has been eliminated. Provisions are made for loans to these nations to purchase American military equipment. But, with the collapse of the Warsaw Pact, there is no further justification for giving these NATO nations hundreds of millions of dollars every year to keep purchasing sophisticated weapons to deter a new nonexistent military threat from the Soviet Union. Our NATO friends can continue to buy American equipment, but they will have to pay back any loans they contract.

I am extremely pleased that we have been able to increase disaster assistance programs by nearly \$150 million in this conference report. We target refugee and disaster aid to the terrible catastrophes occurring in southern Africa, particularly Somalia, and in Bosnia, Slovenia, Croatia, and Kosovo in the former Yugoslavia. This is one area I felt a major increase was justified, and I know the American people want to be generous in helping these suffering people.

The conference report also seeks to strengthen U.S. export promotion programs. More U.S. exports mean more American jobs. There is a rough rule of thumb that every \$1 billion in exports supports 20,000 American jobs. The foreign aid program can, and I am determined that it will, do more to promote U.S. exports and enhance American international economic competitiveness. In addition to expanding the export assistance programs of the Export-Import Bank and the Overseas Private Investment Corporation, the conference report contains a provision drafted by the distinguished chairman of the Appropriations Committee which seeks to increase the proportion of foreign aid dollars going to capital infrastructure projects. Properly designed and executed capital projects can help meet basic infrastructure needs in the developing countries and also recycle our aid dollars back to the United States through contracts with American firms.

At my initiative, the conference report provides \$350 million for U.S. bilateral family planning programs abroad. Reducing soaring global population growth is a vital national interest of this Nation. We cannot cope with massive degradation of the international environment, enormous poverty and hopelessness in the Third World, and rapid depletion of the Earth's natural resources unless the population growth rate is brought down rapidly and substantially. United States leadership in this effort is one of my top priorities as chairman of the Foreign Operations subcommittee.

The conference report also provides funding at the President's request levels for the new independent republics of the former Soviet Union and the nations of Eastern Europe, including the Baltics. The United States must be in

the forefront of helping our former adversaries make the very difficult transition to democratic institutions and free enterprise economies. The long-term hopes for a peaceful, cooperative world depend on these nations making this transition successfully. I cannot visualize a more important security interest of the United States than to assist Eastern Europe and the former Soviet Union to build new democratic, peaceful societies.

I am especially proud that the conference report retains a provision I proposed in the Senate bill to establish a special \$50 million program to provide American agricultural commodities to help feed the poor, especially mothers and children, in the former Soviet Union. This is an urgently needed program for Russia and the other republics, where we attempt to ensure that the weakest and most vulnerable segments of society get fed. There is practically no social safety net in Russia, and the poor, weak and defenseless need special help.

The conferees also agreed to provide the quota increase for the International Monetary Fund which was included by the Senate Appropriations Committee. Although I did not recommend a U.S. contribution for the IMF quota increase in the bill I brought to the Appropriations Committee, the Committee decided to include it and the conference committee to retain it. However, I want to emphasize that this appropriation does not actually cost the American taxpayer anything. There is no budgetary effect of the appropriation, since the U.S. contribution is an exchange of assets with the IMF, akin to a bank deposit. In return for our deposit of the U.S. contribution, we receive the right to withdraw an equivalent amount in Special Drawing Rights, a basket of hard currencies polled in the IMF.

The conference report also adopts a Senate provision authorizing the President to provide up to \$10 billion in loan guarantees to Israel, in amounts up to \$2 billion per year, over 5 years. This humanitarian program is intended to help Israel in its massive task of absorbing an anticipated 1 million immigrants from the former Soviet Union.

Of special importance is that the conference report provides that Israel is to pay through fees to the U.S. Treasury all costs of this loan guarantee program. Not one dollar is appropriated in this bill to cover any costs associated with this program, and there is absolutely no cost to the American taxpayer. The bill provides that whatever the costs are determined to be, Israel must assume all of them itself. The Government of Israel has committed itself as primary guarantor of any loans taken out under this program. The U.S. guarantee would only come into effect if the government of Israel defaulted on its own guarantee. The

likelihood of such a default is virtually zero. Israel has a perfect repayment record on its loans from the United States, and there is no meaningful risk the Government of Israel would permit such a default. On the contrary, there is every reason to expect, and this is supported by a study by the General Accounting Office, that the Israeli economy will be able to service the debt taken out under this program without undue difficulty.

Finally, I want to mention military aid for Indonesia. I was pleased that the conferees chose to prohibit IMET funds for Indonesia in response to the massacre of from 75 to over 100 peaceful demonstrators in East Timor last November. The reports of both Senate and House Appropriations Committees discuss at length their concerns about this atrocity. Suffice it to say that the conferees felt the United States needed to make a strong statement in support of human rights after what happened there.

Mr. President, there are many other important aspects of the conference report, but I will not take the time of the Senate in the waning hours of this session to describe them. They are set forth fully in the printed conference report.

Before concluding, I would like once again to thank my colleague and friend, Senator KASTEN, for his leadership and cooperation in developing this bill. We have worked hard all through the 4 years of my chairmanship to prepare bipartisan foreign aid programs. He deserves the thanks of the Senate for his leadership on foreign aid.

I want also to thank the hardworking staff of the subcommittee for their dedicated assistance in producing this program. Eric Newson, the subcommittee staff director, provided strong direction and was a never ending source of ideas for how to resolve problems and to steer this unpopular bill through the political and policy reefs. Tim Rieser, as always, is the conscience of the subcommittee. Tim made sure we never overlooked the needs of real people in real situations as we worked on these programs. We must never lose sight that we are trying to help living, breathing people through these large, complicated programs. Fred Kenney did his usual superb job of making this complex process work. Without his drive, knowledge of the appropriations process, and willingness to work hours that would cause most people to drop, we could not have reached this point.

The minority staff worked cooperatively and constructively with us. I want to thank Jim Bond, the minority clerk, and Juanita Rilling for their efforts to make this a bipartisan bill. I want to make special note that Jim Bond completed 20 years of service on the Appropriations Committee as we were preparing to mark up the bill in

subcommittee. Jim is one of the most experienced, canny and imaginative members of the Appropriations Committee staff, and I congratulate him on his 20 years of service to the Senate, the committee and the American people.

Mr. KASTEN. Mr. President, I would like to say a few words about this conference agreement.

First, I wish to thank the chairman of the subcommittee, Mr. LEAHY, who ably represented the Senate throughout these negotiations, and was very helpful to me in the face of my own difficult schedule.

It is fitting that we are poised to pass the final hurdle toward enactment of the loan guarantees for Israel to help absorb Jewish immigrants the day before Yom Kippur.

I have been asked who will administer the Israeli loan program. It is expected that the Agency for International Development's Housing Investment Guarantee Office will administer these guarantees. In my view, it is important that they do so, as they have expertise based on previous experience with the \$400 million guarantee provided to Israel earlier. Obviously, the State Department will have a strong policy role, but the expertise needed to administer the guarantees and loans is AID's.

This milestone in our policy vis-a-vis Soviet Jewish refugees is an important one for United States foreign policy and for the thousands who will be helped as a result of our action.

There are many who deserve thanks and appreciation for their assistance throughout this effort, but I would like to bring to the fore the memory of our esteemed late colleague, Senator SCOOP JACKSON, who laid much of the foundation for his success, years ago.

On other issues important to the Senate, we were able to get a reasonable compromise on the Enterprise for the Americas Initiative, so that that program can get started. The House accepted our additional funding for disasters in Africa, our increase for population planning assistance, Senate earmarks for the people in Bosnia, Hercegovina, and Kosovo as well as refugee assistance in Croatia, aid to the former states of the Soviet Union, Eastern Europe, and the Baltic States, and for a number of important programs aimed at helping children.

The conference report contains an amendment offered on the Senate floor requiring that the administration provide certification that Morocco is cooperating with the United Nations with respect to the Western Sahara situation, a certification which I have no doubt will be provided quickly. Some confusion has arisen over how this provision affects the earmarks. As the Senator from Kansas made clear on the floor when she offered this amendment, it was her intent only to affect aid

above \$52 million. So, there is no intention to vitiate the earmarks. Instead, at least \$52 million must be provided for Morocco, and once the certification is made, at least another \$8 million must be made available.

I am very disappointed in the outcome of amendment numbered 153, the buy America provision which I authored and which the Senate actually passed twice—once in the context of the Freedom Support Act, and once in this bill. The House insisted that we not enact this rewrite because the authorizing committee objected to our interference in their jurisdiction. Instead, they offered a meaningless provision which is contained in other legislation and which is basically business as usual.

Mr. President, it is important to understand what business as usual means. It means that we continue to have a foreign aid program with a United States procurement content of less than 20 percent; we will see more of what we saw in Mozambique, where the United States Treasury simply writes checks to Mercedes-Benz and Toyota so that those foreign companies could start up dealerships in Moputu; and we will continue to sit while low-level officials overseas and here in Washington routinely waive what few restrictions remain in the buy America provision of the Foreign Assistance Act.

Mr. President, contained in the legislation on a related subject is the Leahy-Kasten amendment which was modified in the conference on protection of U.S. jobs. This amendment was designed to prevent the type of incidences which were reported in the "60 Minutes" program alleging actual inducement of U.S. companies to move to Central America, thereby directly costing U.S. jobs. This was an important initiative, and while I'm happy that we were successful, the buy America proposal was at least as important, and it is regrettable that the authorizers would not allow us to proceed with this rewrite.

I do not believe that the foreign aid program should be utilized as a cash cow for foreign companies, and I will continue to pursue this issue. Hopefully, those who now see differently will wake up and understand that we are talking about U.S. jobs and the effect of their loss on American families.

Mr. DECONCINI. Mr. President, I am pleased that today the Senate is again playing its proper role in forming our Nation's foreign policy. With the passage of a free-standing fiscal year 1993 Foreign Operations bill, we mark the first time since 1990 that the Senate has passed a foreign aid bill which it helped draft. For the past year, the vast majority of our foreign aid programs has been kept on a life-support system under a continuing resolution which provided funding at the level of the House-passed Foreign Operations

bill or the previous year's level—which ever was lower. Today, however, our system is back up and running.

There are a number of important provisions contained in this bill which I strongly support. It is also a good bill because it represents a real reduction in foreign aid spending. The bill before us today is approximately \$400 million below last year's level and \$800 million less than requested by President Bush.

I am pleased that the bill finally provides loan guarantees for Israel to assist that beleaguered nation in absorbing refugees from Ethiopia and the former Soviet Union and in rebuilding its battered economy. After more than a year of delay by the President, the loan guarantees will begin being made available to Israel, and at no cost to the American taxpayer. As I stated on the Senate floor last week, I am concerned that this legislation provides the President with total discretion on the disbursement of these guarantees. President Bush has not been favorably disposed toward Israel and I fear that he may use this leverage to gain other concessions from Israel or to force it into untenable positions on issues such as the peace talks. In that statement, I put the administration on notice that if any political games are played with the extension of the loan guarantees, I will amend the first available legislative vehicle to ensure that the disbursement of the guarantees is made mandatory, not discretionary. I will maintain that position even under a Clinton administration.

I am also pleased that the legislation provides, at my urging, \$25 million for much needed micronutrient programs in developing countries. Micronutrients—vitamin A, iodine, and iron—are vital to the healthy physical and mental development of infants. This funding will provide early intervention opportunities for thousands of children around the world, helping them avoid cretinism, goiter, and other preventable disabilities and putting them on the road to becoming healthy, productive citizens.

This year the bill does not specify a funding level for the Microenterprise Loan Program. The report accompanying the bill, however, spells our Congress' intent with regard to the program. It specifies that \$85 million should be allocated for loans, at least \$20 million of which should be in small amounts of under \$300, and that women and the poorest of the poor be major recipients of these loans. It is a good program and is aimed at directly helping individuals—who oftentimes do not benefit from Foreign Aid Programs—work their way out of poverty. The microenterprise program is not earmarked in the bill because the administration and the Agency for International Developmental [AID] have pleaded with Congress to be allowed flexibility in administering this and

other programs. AID has not had a great track record with this program. At first, it tried to stop it from getting started. Then it grudgingly accepted the program, but made claims that it was meeting and exceeding targets without having the data to support its claims. Things are much better today, however, and the flexibility AID has sought is being provided. I want the administrators at AID to know that I will be closely following their implementation of the microenterprise program to ensure that it complies with congressional intent. I think that AID will do its work well, but if it falters in this task, I am putting the administration on notice that I will seek an earmark in next year's bill.

I am also pleased that the bill before us today was altered, and improved, by the House and Senate conferees in a number of significant ways. In a wise move aimed at cutting foreign aid and moving to acknowledge that the cold war is over, the bill provides concessional loans, not direct grants, to Turkey, Greece, and Portugal for foreign military programs. These so-called base-rights countries are under no direct military threat at this point. Indeed, Turkey—a valued friend and ally of the United States in times of crisis such as the Korean war and Operation Desert Storm—continues to aid the illegal occupying forces on Cyprus and tacitly supports the delaying tactics used by the leader of the Turkish Cypriots, Rauf Denktash, to stall the United Nations-sponsored talks in New York. The division of Cyprus is a major irritant within NATO, and appears to be one of the primary reasons why the European Community has reacted so coolly to Turkey's overtures at being included in the EC. None of these countries really needs to buy more weapons and I am pleased that this bill encourages a move away from such practices.

Also, this bill prohibits any military training assistance for the government of Indonesia. Last year, Indonesian government troops fired on peaceful, unarmed, pro-democracy demonstrators on the island of East Timor. Accounts of the massacre state that between 75 and 125 people were killed. Many of the bodies still have not been accounted for. In the aftermath of Indonesia's Tiananmen Square, some of the unarmed protesters received sentences of up to life in prison. At the same time, the troops who fired on the peaceful demonstrators only received prison terms of 12-18 months. The Bush administration protested Congress attaching any conditions on the restoration of this aid based on claims of Indonesia's sovereignty. However, we place conditions on aid to a large number of countries, including some of our largest aid recipients. For too long, this country has turned a deaf ear to Indonesia's dictatorial rule and its sad record on human rights. Perhaps this

action will send a strong message to Jakarta that the United States is serious about human rights in every corner of the world.

This bill is not perfect. For instance, it contains a provision I strongly oppose to extend aid to Russia—whose troops continue to occupy the independent countries of Estonia, Latvia, and Lithuania. On balance, however, it is a good bill. If we must have foreign aid programs at all, I am pleased that we are ensuring that more of the aid is targeted to directly helping people. Americans are a generous people and are willing to reach out to help others. We must continue to ensure that their dollars are wisely spent.

Mr. BRADLEY. Mr. President, I rise to comment on one of the most important aspects of the bill now before us. This Foreign Operations appropriations bill provides \$417 million in aid to the countries of the former Soviet Union—aid as crucial to the people of these new countries as to the citizens of the United States who hope for a safe and profitable American future. I believe that the linchpin of this aid effort is the \$50 million appropriated to fund expanded exchange programs between the former Soviet Union and the United States. This money will go far to help instill a vision of democracy in the future leaders of the new countries, and to renew our own commitment to democratic ideals and hope for world peace.

Our most valuable resource is not our dollars, but our people. Americans are born with the understanding that in the democratic system, everyone counts. Every American can not only make a difference, but it is their duty to try. This is a power that cannot be transferred through grain credits. It must come from person-to-person contact. We must pass this vision of democracy on to the future leaders who will be shaping new countries in the former Soviet Union. It is a tall order, but America is up to the challenge.

Late last week, the Senate passed the conference report on the Freedom Support Act. Included in the bill was \$50 million in authorizations for greatly expanded exchanges of former Soviet students, young businessmen, agriculture specialists, and local officials. This appropriations bill now before us provides the \$50 million needed to implement the idea.

Mr. President, I believe the key component of the exchanges outlined in the Freedom Support Act is the high school exchange program. Out of the \$50 million appropriated in the bill before us, \$20 million is authorized through the Freedom Support Act to be used explicitly to expand programs targeted to high school students. This money will fund about 5,000 student exchanges over the next year. These youth will live with families, attend schools, and return to their own homes

having learned about our institutions, skills, and values. They will have acquired a better appreciation of how they—the future leaders of the new countries—can create their own institutions.

Because the need is so extensive, this bill is targeted to bringing as many students as possible over to study in the United States. But we want their experiences to be meaningful. For this reason, the legislation favors longer-term programs over short-term stays.

To ensure that the students gain an understanding for the foundation of our working democracy, we should enlist the help of American programs that expose students to the inner workings of our Government. Such programs, like Close Up, share the philosophy of this legislation.

Most of the authorized funds are aimed at bringing students from the former Soviet Union to the United States. Yet a percentage of the funds are set aside to send American high school students to the CIS. Cultural exchanges benefit both sides. Not only would we be assuring peaceful ties between these nations and ours, we can also learn much. Americans can learn from having foreign students in their homes and classrooms. Americans studying in Kiev, St. Petersburg, Vilnius, and Alma-Ata will return with a better understanding of the people of these new republics; they will also have the unique privilege of witnessing firsthand the new frontiers of democratic capitalism.

The remaining \$30 million appropriated for exchange programs under this bill before us are authorized to fund exchanges of older students and professionals from the public and private sectors. This money could fund as many as 5,000 exchanges of students, agricultural experts, Government officials, and young businessmen and women over the next year.

As in the high school exchanges, the undergraduate and graduate exchanges will allow future leaders of the former Soviet Union to study and experience American society. They would also create links between our universities, colleges, and community colleges, and their institutions of higher learning.

The small business exchanges would provide a means for young managers to work will small business in the United States and experience firsthand what it means to be an entrepreneur. We would like to see them spread to each of our 435 congressional districts, with local community groups helping to sponsor the trainees.

United States businesses serving as sponsors to young managers from the former Soviet Union will be establishing future business contacts in a market that includes 300 million potential new consumers. Their ability to get involved in the new States depends to a certain extent on their knowledge of

local conditions, opportunities, and their ability to work with people who are already familiar with Western business practices.

We have also appropriated \$10 million under the Commerce, Justice, State and judiciary appropriations bill to expand Fulbright programs into the countries of the former Soviet Union.

The Iron Curtain between our societies has parted, Mr. President, but contact between our people and the people of the former Soviet Union remains woefully limited. In the 1990-91 school year, the total number of undergraduate and graduate students from the former Soviet Union on USIA exchanges was 1,210. China had almost 40,000 for the same period. Even Switzerland had more students at American universities than did the former Soviet Union. The time has come to address the gravest need, and expand our contact and influence in the former Soviet Union.

It is my hope that in the years ahead we will see tens of thousands more students over here with the implementation of the Freedom Support Act funded by the bill before us today. This must be only a beginning. I am encouraged that this body has acted swiftly to address an urgent long-term need of both our new-found ally, and by extension, the United States. We must continue the momentum. The fragile reforms that President Yeltsin has set into place must be buttressed by dreams as well as reality.

It is imperative that these programs are up and running by 1993. I will urge the government agencies which will be handling the administration of these programs to expedite the process by utilizing the experience and the expertise of the nonprofit sector. The government should contract out to nonprofit organizations as much as possible to remove the exchanges from the bureaucracy that could delay their immediate implementation.

The people of the newly independent states must be brought out of their isolation now. We must make up for 40 years of barriers between our citizens, and theirs. We cannot afford to be complacent. A slow response risks retrenchment of economic and democratic reforms. It also risks the growth of new versions of authoritarian rule. Mr. President, we are at a crossroads and the time is short. We must embrace this opportunity by funding exchange programs under this bill.

Mr. LAUTENBERG. Mr. President, I am pleased that the fiscal year 1993 Foreign Operations appropriations bill includes a 2-year extension of a provision in current law which facilitates the granting of refugee status for certain historically persecuted groups.

The law is commonly referred to as the Lautenberg-Morrison refugee law, since Representative MORRISON and I were its prime sponsors. I greatly ap-

preciate the assistance of Representative BERMAN, who was the prime sponsor of the 2-year extension provision in the House this year. I also appreciate the assistance of Senator BIDEN, who championed this 2-year extension in the Senate Foreign Relations Committee.

The existing law formally recognizes that the historical experience of certain persecuted religious minorities in the Soviet Union and Indochina, and a pattern of arbitrary denials of refugee status to members of these minorities, entitles them to a relaxed standard of proof in determinations about whether they are refugees.

The law lowers the evidentiary standard required to qualify for refugee status for Soviet Jews, Soviet Evangelical Christians, religiously active Soviet Ukrainian Catholics and Orthodox, and certain categories of Vietnamese, Laotians, or Cambodians. Once a refugee applicant proves he or she is a member of one of these groups, he or she only has to prove a credible basis for concern about the possibility of persecution. Refugee applicants normally must prove a well-founded fear of persecution.

Legislation to extend the law for 2 years has been endorsed by the Council of Jewish Federations, the U.S. Catholic Conference, the American Jewish Committee, the Ukrainian National Association, Inc., the Hebrew Immigrant Aid Society, the National Conference on Soviet Jewry, the Union of Councils for Soviet Jews, the New York Association for New Americans, the Lutheran Immigration and Refugee Service, and World Relief.

This law has had a real and positive impact on refugee adjudication. This liberalized standard is still necessary because conditions for the persecuted groups in the former Soviet Union and Indochina still exist, and in some cases, have worsened.

While Soviet Jews have been permitted to emigrate in much greater numbers, those remaining face a greatly increased threat to their well-being. Anti-Semitism and heightened harassment, violence, and public expressions of hatred by anti-Semitic groups like Pamyat are still occurring, and in some areas, are on the rise. While national policies may have changed, many local officials harbor old hatred for these historically persecuted groups. Evangelical Christians and Ukrainian Catholic and Orthodox continue to experience harassment.

There is a clear case for including Indochinese in an extension of the Lautenberg amendment. Conditions have improved somewhat in these countries, but certain groups continue to suffer as a result of their previous associations with the United States, their political actions in opposing hardline Marxist governments which permits no political dissent or freedom of expression, and for their religious beliefs.

The majority of Vietnamese to whom the law applies are former reeducation camp prisoners who were sent to the camps because of their political or religious views. Many reeducation camp inmates were associated with the American Government during our Vietnam war involvement. A majority of those coming to the United States are joining families who were resettled here 10-15 years ago.

This law is working as intended. It has replaced an arbitrary and slow process of refugee adjudication in the former Soviet Union with a stable, consistent and fair process. It has meant that people already terrorized by longstanding hatred and persecution in their native lands are not further traumatized by a system that does not recognize their historical suffering, or makes arbitrary distinctions between people who have suffered similar fates.

The law originally passed the Senate by a vote of 97-0 in 1989, and became law as part of the fiscal year 1990 Foreign Aid Appropriations Act. It was extended in the fiscal year 1991 Foreign Aid Appropriations Act.

The INS estimates that it will take 2 years to process Soviet Jews who are in the pipeline, those who have begun the application process. Given questions about stability in the republics of the former Soviet Union, the law should be extended for 2 years.

I am pleased the Congress is extending this law for 2 years.

Mr. REID. Mr. President, I ask unanimous consent that the conference report be agreed to, the motion to reconsider be laid upon the table, and any statements therein appear in the RECORD at the appropriate place as though read.

The PRESIDING OFFICER. Without objection, it is so ordered.

So the conference report was agreed to.

#### LEGISLATIVE BRANCH APPROPRIATIONS ACT, FISCAL YEAR 1993—CONFERENCE REPORT

Mr. REID. Mr. President, it is my understanding we are now back on the legislative branch appropriations bill.

The PRESIDING OFFICER. The Senator is correct.

#### SUPERINTENDENT OF DOCUMENTS

Mr. FORD. Mr. President, would the senior Senator from Nevada clarify the legislative branch appropriations bill conference report language relating to the Superintendent of Documents. Is it the intention of the conferees that the feasibility study on enhancing public access to Federal electronic information proceed whether or not H.R. 5983 is enacted into law?

Mr. REID. I am pleased to respond to my friend, the senior Senator from Kentucky. The answer is "Yes." The conferees intended to direct the Superintendent of Documents to conduct a

feasibility study to enhance public access to Federal electronic information and to utilize the assistance of the Community College Distance Learning Center in Owensboro, KY, in that study. That feasibility study is not dependent on passage of H.R. 5983.

Mr. FORD. Mr. President, I thank my friend, the chairman of the Legislative Branch Appropriations Subcommittee.

Mr. REID. Mr. President, I ask for the yeas and nays on adoption of the conference report.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. FORD. I announce that the Senator from Tennessee [Mr. GORE], is necessarily absent.

Mr. SIMPSON. I announce that the Senator from Wisconsin [Mr. KASTEN], is necessarily absent.

The PRESIDING OFFICER (Mr. HARKIN). Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 68, nays 30, as follows:

[Rollcall Vote No. 265 Leg.]

#### YEAS—68

Adams	Durenberger	Moynihan
Akaka	Exon	Murkowski
Baucus	Ford	Nunn
Bentsen	Glenn	Packwood
Biden	Gorton	Pell
Bingaman	Graham	Pryor
Boren	Harkin	Reid
Bradley	Hatfield	Riegle
Breaux	Hollings	Robb
Bryan	Inouye	Rockefeller
Bumpers	Jeffords	Rudman
Burdick, Jocelyn	Johnston	Sanford
Byrd	Kennedy	Sarbanes
Cochran	Kerry	Sasser
Cranston	Kerry	Shelby
D'Amato	Lautenberg	Simon
Danforth	Leahy	Simpson
Daschle	Levin	Stevens
DeConcini	Lieberman	Thurmond
Dixon	Lugar	Wellstone
Dodd	Metzenbaum	Wirth
Dole	Mikulski	Wofford
Domenici	Mitchell	

#### NAYS—30

Bond	Gramm	McConnell
Brown	Grassley	Nickles
Burns	Hatch	Pressler
Chafee	Hefflin	Roth
Coats	Helms	Seymour
Cohen	Kassebaum	Smith
Conrad	Kohl	Specter
Craig	Lott	Symms
Fowler	Mack	Wallop
Garn	McCain	Warner

#### NOT VOTING—2

Gore	Kasten
------	--------

So the conference report was agreed to.

Mr. MITCHELL. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. FORD. I move to say that motion on the table.

The motion to lay on the table was agreed to.

#### UNANIMOUS-CONSENT AGREEMENT

Mr. MITCHELL. Mr. President, I ask unanimous consent that Senator RUDMAN be recognized to address the Senate for up to 10 minutes, and that at the conclusion of his remarks the Senate proceed to the consideration of the conference report on H.R. 5504, the defense appropriations bill, and that it be considered under the following time limitations: That there be a total of 60 minutes for debate, 20 minutes under the control of Senator STEVENS, 20 minutes under the control of Senator INOUE, and 20 minutes under the control of Senator NUNN.

Mr. STEVENS. Reserving the right to object, Mr. President, I did have a request from the Senator from Arizona [Mr. McCAIN] for 20 minutes.

Mr. MITCHELL. Mr. President, I modify my request by adding the request for 20 minutes for Senator McCAIN.

Mr. STEVENS. May I ask, did the Senator from New Hampshire want time?

Mr. RUDMAN. The majority leader has already reserved that for me.

Mr. STEVENS. I thank the Chair.

Mr. MITCHELL. Mr. President, I withhold my request.

Mr. RIEGLE. Five minutes for me.

Mr. MITCHELL. Mr. President, I ask unanimous consent that upon the completion of Senator RUDMAN's remarks, Senator RIEGLE be recognized for up to 5 minutes, and then the Senate proceed to the consideration of the conference report under the terms that I have previously stated, as modified.

The PRESIDING OFFICER (Mr. HARKIN). Is there objection? The Chair hears none, and it is so ordered.

The Senator from New Hampshire is recognized for 10 minutes.

#### FAREWELL TO THE SENATE

Mr. RUDMAN. Mr. President, I thank the majority leader for his usual courtesy, and I rise for probably the last time to address my colleagues in this great institution.

I wish to start by thanking the people of New Hampshire for giving me the opportunity, the privilege to serve. They have a special understanding of Government. They have a willingness to listen to hard truths, and they have been a wonderful constituency to represent. No man or woman can have a greater privilege bestowed on them than to represent the people of their State.

Second, let me thank the staff of all of the Members of the Senate, with whom I have worked for the last 12 years. You are truly an extraordinary group of young people, very dedicated, very knowledgeable, and certainly ease

the path of those who must cast the votes.

I want to say something to the national news media, with whom I have had a great deal to do through Iran-Contra and Gramm-Rudman, the ethics hearings, the Souter nomination, and many other instances. You have for the most part been fair. You have reported what I have said faithfully, and I want to thank you for what I think has been a marvelous understanding of your role and mine.

Finally, I want to thank the men and women of this body. I have said in recent months that the thing about the Senate which puzzles me is that lately the institution as a whole does not in my mind add up to the sum of its parts. It is quite the opposite of something that is synergistic, and I have wondered why. Maybe in the coming years that will change, because I have to say here what I have said many times. I have never met such an extraordinarily able, talented, dedicated, hardworking group of people as I have in this institution. There is so much talent, so many different personalities, different backgrounds, as I look at the people present tonight. It is a very special place, with very special people, and I hope in the coming years the institution can coalesce to bring those talents together in a bipartisan way to do what is good for America.

I want to say to the two leaders of this body that you have both been my friends: Senator MITCHELL, the majority leader, a neighbor from Maine; Senator DOLE, from Kansas, a man I admired long before I came here. I wonder if the people of this body and the people of this country recognized what extraordinarily talented men we have leading this institution.

BOB DOLE, who came from grievous wounds suffered in Italy, spent years in hospitals, entering this Congress as a very young man, and who everyone respects and recognizes is an extraordinary talent, and who has been a leader for the past two Presidents. No President could expect more.

More than that, BOB DOLE has been my friend. I will say to BOB DOLE, with no insult intended to the present occupant of the White House, who is also my friend, I wish we could have done better in New Hampshire, because he was my choice.

I want to say to the majority leader, GEORGE MITCHELL, who only arrived a couple years before I did, his rise to leadership in this body is nothing short of extraordinary. The son of immigrant parents, truly living in poverty as a young man, he aspired to greater things. He went to Bowdoin College, became a very respected U.S. attorney, a Federal judge, and then a U.S. Senator. When he became majority leader, I wrote him a little note which said, "George, I know that you are going to be fair but you will be tough." I will

say to the majority leader, he has been fair to a fault and tough, which is as it should be as we meet the adversarial interests that arise.

To all my other colleagues, I have found something special about each of you, and the bittersweet moment of leaving this week will be that I will no longer have you as everyday friends.

That moment will count to everyone in this body. I made a choice that this was my time to leave. But make no mistake; I will miss each of you.

I have looked through the history books to find a couple of quotes about the U.S. Senate, and two struck me. I am going to just read them into the RECORD. They are short.

Woodrow Wilson said this:

The Senate of the United States has been both extravagantly praised and unreasonably disparaged, according to the predisposition and temper of its various critics. \* \* \* The truth is, in this case as in so many others, something quite commonplace and practical. The Senate is just what the mode of its election and conditions of public life in this country make it.

And how true that is as we grapple with the issues of the time.

Finally, as some of you know, I have the great privilege of sitting behind the desk of Daniel Webster. It is I think the only desk in the Senate in which the top does not open. Mr. Webster sat behind this desk in the Old Senate Chamber, and then, of course, when the Senate moved, it was placed here. And inscribed in the drawer are the names of some very great U.S. Senators—Styles Bridges, Norris Cotton, Tom McIntyre, to name just a few.

Webster was a special man. He was from New Hampshire; represented Massachusetts, but probably the greatest public servant that New Hampshire ever produced. I have kind of been a student of his works, and I thought that the last words that I utter here on this floor ought to be his words. So let me give you a quote of his that I think is special and each of us should take to heart as Members of this truly great institution.

He said:

If we work upon marble, it will perish; if we work on brass, time will efface it. If we rear temples, they will crumble to dust. But if we work on men's immortal minds, if we impress on them high principles, the just fear of God, and love for their fellow-men, we engrave upon those tablets something which no time can efface, and which will brighten and brighten to all eternity.

On those great words of Daniel Webster, I say God bless all of you, and thank you each so very, very much.

#### SENATOR WARREN RUDMAN

Mr. MITCHELL. Mr. President, before the Senate adjourns sine die, I will have a more detailed statement to make about my friend and colleague

from New Hampshire, and other Senators who will be leaving at the end of this session as the distinguished Republican leader already has done in some cases, and I know intends to do with others.

But I will just take this occasion to say that the eloquence and integrity of the Senator from New Hampshire, as demonstrated in his final words, reminds all of us of how much we will miss him personally, and the extent to which this Senate will be a different and diminished place without him.

In behalf of all of our colleagues, I wish him the very best success.

#### SENATOR WARREN RUDMAN

Mr. DOLE. Mr. President, let me indicate also that I will be making a statement about my good friend, Senator Rudman. I wanted to hear what he said about me first. So I will go and finish my statement.

But, seriously, he is my friend and I will make my statement sometime tomorrow, or the following day, or maybe even Thursday. I assume we will be here.

I thank him very much for his kind remarks, but above all, his friendship and even though he is leaving, it does not mean we are going to be parting.

I thank my colleague.

#### SENATOR WARREN RUDMAN

Mr. GRAMM. Mr. President, to many who have already seen him on television, WARREN RUDMAN is just another pretty face. But to those of us who have been privileged to serve with him, it is nice, I think, as we begin to reflect on what the Senate will be without him, to be reminded that even though we read about great people in history books, we do not necessarily recognize them when we are working with them. Only when they leave do we recognize by the empty space they leave how important they were.

Mr. President, I believe that as we look back on WARREN RUDMAN's work and mission and his commitment, we will realize that he is and has been one of those great people who have served in the Senate.

#### SENATOR WARREN RUDMAN

Mr. MCCONNELL. Mr. President, listening to the distinguished Senator from New Hampshire reminds me of a brokerage commercial of some challenge which goes something like this: "When the brokerage house speaks, everyone listens."

Frankly, in the 8 years I have been in the Senate, I cannot think of anyone other than the senior Senator from New Hampshire for whom I can say when he speaks, everyone listens. Usually, in this Chamber, when we speak,

nobody listens. But it can truly be said of Senator RUDMAN that when he spoke, we all listened. He advice was invariably good advice. His integrity, of course, is absolutely unimpeachable.

Let me say to my friend from New Hampshire, most of us are easily replaced and will largely be forgotten. That is not true of the Senator from New Hampshire.

Mr. President, I yield the floor.

#### SENATOR WARREN RUDMAN

Mr. SIMPSON. Mr. President, I, too, before we adjourn will revise and extend my remarks with regard to my friend, WARREN RUDMAN.

But let me just say that it has been an adventure, an elixir of energy and spirit, and pugnacious perseverances of this man—who no wonder he was the light heavyweight NCA boxing champion at Syracuse many a year ago, not too many. My old partner was the heavyweight NCA boxing champion from Wisconsin. He said when you get to the Senate—I had been here—get to know WARREN RUDMAN. He is one of the greatest guys I have ever known and a fighter for the things he believes in, and he is.

This is not a eulogy. I will not go any further on that. But I am pleased that I have had an opportunity to share not only part of my legislative life, but my personal life with him.

I wish him well in his new quest, along with our former colleague, Senator Paul Tsongas. You will be doing great things from outside this body and hopefully in this body with people like SAM NUNN, and PETE DOMENICI, JAY ROCKEFELLER, myself, others who are involved in the CSIS activity. We can do some things inside this Chamber that deal with honest things. We all know what we have to do. You can help us, and I just say that the best tribute I can pay is a simple one. This is all the man there is.

I thank the Chair.

#### SENATOR WARREN RUDMAN

Mr. BRADLEY. Mr. President, I had not expected to be on the floor at this moment, but I do not want this moment to pass without saying just a few words.

I was actually thinking over the weekend about what I would say on the floor about Senator RUDMAN before he left the Senate, and I will indeed do that.

So these are not my final words. But in thinking about what I would say, I at least got through the first sentence of my comments. That sentence was the one thing you have to know about Senator WARREN RUDMAN is that he was once a pretty good boxer. And I think the words "pretty good" and "boxer" really define major parts of his character and personality.

There is a constant striving to be better. As those of us who have been hit in one way or another in a contest know, you can always be better, and once you are satisfied with where you are, you lose the edge. Senator RUDMAN has never lost the edge. And if I were to think about qualities in this impromptu moment, I would say: Courage, fairness, a willingness to face the truth, even if the truth hurts, a willingness to reach out and confront, as well as to try to mediate.

I have engaged in conflict with Senator RUDMAN, and I have benefited from his support. All things considered, I would rather benefit from his support. I have learned things from him, and I value his friendship, while he has been in the Senate, and I hope in years to come.

#### TRIBUTE TO SENATOR WARREN RUDMAN

Mr. STEVENS. Mr. President, I, too, will take the time to speak at length about my friend from New Hampshire. I think I will share with the Senate what I wrote to WARREN RUDMAN, that his leaving the Senate reminds me of an old cowboy song, "It Hurts So Much Without You, It's Almost Like You Were Here."

Senator RUDMAN has the ability to make us think about the things we do not want to think about, and the courage to do the things we know we have to do. I do not know that I have known any other Senator that had the courage and the conviction WARREN RUDMAN has had. I will speak at length later, but I wanted to tell him I was pleased to be here when he made his last remarks to the Senate.

#### TRIBUTE TO SENATOR WARREN RUDMAN

Mr. SMITH. Mr. President, I have had the privilege of serving in this New Hampshire delegation with Senator WARREN RUDMAN for the last 8 years, 6 years in the House of Representatives, 2 years here in the U.S. Senate. We met in 1980 as respective candidates for Federal office. He was running for the U.S. Senate, and I was running for the U.S. House, in two very crowded primaries.

WARREN RUDMAN's train came in a little bit earlier than mine. I lost a couple of elections. A lot of people may not realize, as I said to Senator RUDMAN in a tribute the other night, he was in a primary with John Sununu, along with about 9 or 10 other people, and he defeated Sununu by about 2,000 votes. It is interesting how history turned out. Maybe if Sununu would have been in the Senate, Senator RUDMAN would have been the chief of staff, and maybe the President would have been leading in the polls now. So history has a funny way of treating us sometimes.

I just want to say that in all of the years that I have known him, he has been always quite forceful. A mutual friend of ours, Bill Thompson, told me "if you do not make any enemies when you go through life, you are no damn good." I am sure WARREN has made a few, but he has also made a lot of friends. I am certainly going to miss him, and it will be strange not having WARREN RUDMAN in the delegation.

So I have to say, politically, goodbye, WARREN, but I am sure we will be seeing you from time to time as the years go by. Good luck.

#### COMMUNITY ENVIRONMENTAL RESPONSE FACILITATION ACT—CONFERENCE REPORT

Mr. MITCHELL. Mr. President, I submit a report of the Committee of Conference on H.R. 4016 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 4016) to amend the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 to require the Federal Government, before termination of Federal activities on any real property owned by the Government, to identify real property where no hazardous substance was stored, released, or disposed of, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by all of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of October 3, 1992.)

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The conference report was agreed to.

Mr. MITCHELL. Mr. President, I move to reconsider the vote.

Mr. RIEGLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. MITCHELL. Mr. President, I am pleased that today we consider the conference report on H.R. 4016, the Community Environmental Response Facilitation Act. This legislation is substantially similar to legislation I introduced with Senator COHEN, S. 2828.

The legislation clarifies a process whereby clean parcels of otherwise contaminated Federal property can be identified and transferred before the remainder of the property is fully cleaned up. This applies to a broad range of Federal property but is particularly important to maximize economic reuse of Loring Air Force Base, which the administration has decided to close.

Loring is a Superfund site, but much of the property is not believed to be contaminated. Under this legislation, the Air Force would identify the clean parcels through a process detailed in the legislation.

In addition, the Environmental Protection Agency is required to decide whether to concur in the identification of the parcels as clean. This provides greater certainty to a needed process. In addition, the concurrence by EPA provides an independent assessment of the property that is likely to be sought by investors.

The legislation also provides that contaminated property can be transferred once it is cleaned up but before long-term pumping and treating of ground water or operations and maintenance are complete. This will speed transfer by allowing third parties to receive the property before decades of ground water treatment is complete.

Nothing in the legislation in any way alters the liability of the Federal Government for fully cleaning up any contamination it causes. What the legislation will do is speed transfer of Federal property so that it can be made available for economic reuse as soon as possible. This should help alleviate the strain on communities near closing bases, such as Loring.

I thank the work of my colleague on the conference.

Mr. WARNER. Mr. President, I would like to voice my support for the conference report on H.R. 4016, the Community Environmental Response Facilitation Act. This legislation will address a number of the current roadblocks in moving Federal lands to the private sector. I am particularly interested because of its impacts on the transfer of Department of Defense lands.

The recent base closure legislation has highlighted a number of shortfalls and gaps in current environmental law. To transfer Federal lands previously designated as contaminated requires cleanup in accordance with CERCLA. But, if the property was not contaminated, but only designated incorrectly, there were no provisions on how to transfer the clean land.

This bill will provide the necessary guidelines and procedures to permit the subdivision and parcelization of clean land from previously designated contaminated, national priority list property to permit transfer. The property can be transferred only after the clean property has been identified, designated as clean, and concurred with by the responsible official.

This parcelization together with the other bill provisions should permit quicker transfers of Federal lands.

Mr. LAUTENBERG. Mr. President, today we are bringing the conference report on this important legislation to the full Senate for final passage. As an original cosponsor of H.R. 4016 and a

conferee on that bill, I urge passage of the report.

This conference report, in an environmentally protective way, responds to the adverse economic effects that base closures can have on local communities. Its goal is to expedite the process for identifying and distinguishing between contaminated and uncontaminated portions of military bases and other Federal facilities that are slated for closure. Under existing law, the Federal Government cannot transfer property that has been contaminated with hazardous substances. Because some Federal agencies have been hesitant to transfer even the clean portions of property that may have been thought to have been contaminated or included within the boundaries of Superfund sites, local development of perfectly clean parcels of property has been stymied.

The conference report that we are bringing up for passage today will solve this problem. The result will be faster, more efficient cleanups, less economic disruption for affected communities, and a fostering of the reuse and redevelopment of former Federal property. All of these goals will be achieved without reducing in any way the Federal Government's existing responsibility for cleanup of these Federal properties.

Specifically, the conference report and the underlying bill have three major components. First, it would require the Federal Government to identify, at all facilities that are going to be closed, the uncontaminated parts of such property. Such identification is analogous to the environmental auditing procedures already typically followed in the private real estate market, and requires the concurrence of the Environmental Protection Agency or the State.

Second, it would clarify a transfer condition currently in the law. The Superfund law bars contaminated or potentially contaminated Federal land from being transferred unless the U.S. covenants in the deed that all remedial action necessary to protect human health and the environment has been taken. This legislation would clarify that this condition is met when construction and installation of an approved cleanup design have been completed, and EPA has determined that cleanup mechanisms are operating properly. So even if long-term pumping and treating of groundwater is necessary, or even if the site has not yet been formally taken off the Superfund National Priorities List, the property can be transferred. This is in accord with EPA's existing policy.

Third, in the case of potentially contaminated property at bases about to be closed, the legislation requires the United States to notify the State prior to entering into any lease for the property that will run past the date of base closure.

Mr. President, I believe that this legislation exemplifies the principle that environmental protection and economic development can and will work hand in hand. I congratulate the distinguished majority leader for his role in bringing this legislation to this point, and hope that the House of Representatives and the President will soon join us in providing this benefit for communities that are poised to turn the closure of a military base into an opportunity for reuse and economic development of the property.

Mr. CHAFFEE. Mr. President, today we have before us the conference report to accompany H.R. 4016, the Community Environmental Response Facilitation Act. Over the last several days, the conferees have worked out what were fairly minor differences between the House and Senate bills, and come up with what I believe is a very good proposal.

As those of us on the Committee on Environment and Public Works have learned over the last few years, a large number of closing military installations have some contamination from hazardous substances. Some have read the Comprehensive Environmental Response, Compensation and Liability Act of 1980—or as it is more commonly known, Superfund—to require that cleanup of contaminated portions of such installations must occur before any transfer of land—including clean parcels—can occur. The conference report would amend current law to allow the identification and transfer of clean parcels of land on closing Federal installations within a specified period of time. In making this change, the conference report recognizes the legitimate desire of States and local communities and others to take title to clean Federal property without unnecessary delay.

Mr. President, I should also note that the conference agreement gives EPA and the States an important role in the process of transferring these clean parcels of land. Specifically, the conference report provides that either EPA or the State is required to concur in a judgment that a parcel is clean before it can be transferred.

In conclusion, Mr. President, I believe that the conference agreement would make an important change in existing law that will facilitate transfers of Federal property that will, in turn, spur economic development around the country, while continuing without interruption the important job of cleanup. I urge my colleagues to support the conference report.

Mr. MITCHELL. Mr. President, under the previous order, I believe the Senator from Michigan is to be recognized.

The PRESIDING OFFICER. The Senator from Michigan is recognized.

#### TRIBUTE TO SENATOR WARREN RUDMAN

Mr. RIEGLE. Mr. President, let me say with reference to WARREN RUDMAN, among other things, WARREN is also a great pilot. He has helped pilot the Senate on more occasion than one. In my view, WARREN is a great Senator and a great friend. He will be missed by all of us, and he will be very much missed by me. I add my good wishes to those that have already spoken, as he goes on to new and different challenges. It just will not quite be the same place without him, if I may say.

#### PROMPT CORRECTIVE ACTION IN BANKING SUPERVISION

Mr. RIEGLE. Mr. President, last year's banking bill included a new approach to banking supervision called prompt corrective action, which was aimed at ensuring that the American people not have to confront future failures of the deposit insurance system. That rule takes effect on December 19 of this year, and it provides important and necessary protection to American taxpayers.

Prompt corrective action generally requires regulators to close or sell banks or thrifts when shareholder capital falls below 2 percent of assets. Regulators can keep such a bank open only if doing so would better protect the deposit insurance fund, and they would have to make that certification. But properly enforced, this revision will significantly reduce future FDIC losses. This is essential to protect the \$70 billion of taxpayer money that has been loaned now to the bank deposit insurance fund.

The idea of this provision now in the law is to close an institution before its capital actually gets to zero, and while there is still some value left, because waiting for a bank or a thrift to become absolutely insolvent typically means it will have negative value by the time it is closed and therefore a corresponding loss of taxpayers' money.

The prompt corrective action provision says, in effect: Regulators, you must act earlier and more aggressively when a bank or a thrift gets into irreversible decline and is headed for insolvency. The regulators are compelled to get in there and correct the problems and turn the bank around, if it can be done. If it cannot be done, see that the bank is sold or closed before it becomes an additional loss to deposit insurance fund, and therefore a direct liability to the American people.

For 12 years the prevailing philosophy was to try to get away with merely codifying the existing discretion of the regulators. That is the same discretion whose abuse got us into this very problem, that broke first the S&L fund, and now since, the banking fund.

This legislation, however, sent the regulators and the banking system a

clear message, and that is: The era of lax supervision is over.

What is going to happen after December 19? Almost certainly, some banks will be closed or sold. Although the future is not certain, the FDIC now predicts that between 50 and 100 institutions with assets of roughly \$35 billion will require action by the regulators.

Under the leadership of the late chairman, William Taylor, the FDIC issued a public warning that 200 banks with combined assets of more than \$80 billion were projected to fail in 1992. Yet, in the first 8 months of this year, only 70 banks with \$20.9 billion of assets had failed, far below the rate of the FDIC forecast. This obviously raises the concern that the regulators are not shutting down ailing banks that should be closed and, therefore, minimizing the size of the problem that we are yet to face. If this is occurring, it will certainly raise the cost of these bank failures that will eventually fall upon the taxpayers.

While the administration has been quick to declare that banks, like the economy, have turned the corner, the late chairman Taylor clearly disagreed. He knew that many banks have not worked through their real estate problems that have severely eroded their capital. That's why last May, he urged the FDIC to hike the bank insurance premiums that are paid into the deposit insurance fund. Unfortunately, after Bill Taylor's sudden death, the FDIC Board yielding, I believe, to pressure, agreed to a much lower increase, which puts the taxpayer loan at greater risk and reduces the bank insurance costs that banks should properly bear themselves.

So prompt corrective action should not become a scapegoat for bank failures that will occur later this year. These failures will occur because of bad decisions made in past years by the managements of troubled banks, and the failure of those banks is now inevitable.

It is an inescapable problem, and if the economy sinks into greater difficulty, the number of bank failures could rise sharply. It is in that regard that it is absolutely essential that a comprehensive national economic recovery program be implemented immediately by the next President.

We haven't a moment to lose, because sustained economic recovery is vital if we are to ease the severe strains on our financial and banking structure.

So, in sum, we have a significant commercial banking problem, and prompt, corrective action will ensure that our regulators deal with it directly and at the lowest possible cost to taxpayers.

I thank the Chair and yield the floor.  
The PRESIDING OFFICER. The time has expired.

Mr. MITCHELL. Mr. President, will the Senator yield for one moment

while I make a unanimous-consent request?

Mr. INOUE. I yield.

#### UNANIMOUS-CONSENT AGREEMENT

Mr. MITCHELL. Mr. President, I have a unanimous-consent request that has been cleared by the Republican leader. I ask unanimous consent that it be in order to proceed to the conference report on H.R. 776, the National Energy Policy Act.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MITCHELL. Mr. President, I now ask unanimous consent that it now be in order to lay the conference report before the Senate.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### ENERGY EFFICIENCY ACT—CONFERENCE REPORT

Mr. MITCHELL. Mr. President, I submit a report of the committee of conference on H.R. 776 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 776) to provide for improved energy efficiency, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of today, October 5, 1992.)

#### CLOTURE MOTION

Mr. MITCHELL. Mr. President, I send a cloture motion to the desk and ask that it be stated.

The PRESIDING OFFICER. The cloture motion having been presented under rule XXII, the Chair, directs the clerk to read the motion.

The legislative clerk read as follows:

#### CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of rule XXII of the Standing Rules of the Senate, hereby move to bring to a close the debate on the conference report on H.R. 776, the National Energy Policy Act:

George Mitchell, Daniel K. Akaka, Edward M. Kennedy, J. Bennett Johnston, Daniel K. Inouye, Jeff Bingaman, Timothy E. Wirth, Wendell Ford, Bill Bradley, Lloyd Bentsen, John Breaux, Claiborne Pell, Jay Rockefeller, Malcolm Wallop, Charles S. Robb, David L. Boren.

Mr. MITCHELL. Mr. President, I now ask unanimous consent to return the conference report at the desk to its previous status and that the Senate proceed to the DOD appropriations conference report as under the previous order.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### DEPARTMENT OF DEFENSE APPROPRIATIONS ACT, FISCAL YEAR 1993—CONFERENCE REPORT

Mr. INOUE. Mr. President, I submit a report of the committee of conference on H.R. 5504 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 5504) making appropriations for the Department of Defense for the fiscal year ending September 30, 1993, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by all of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of October 4, 1992.)

The PRESIDING OFFICER. Time for debate under consideration of this conference report is limited to 80 minutes controlled as follows: 20 minutes each to the Senator from Hawaii [Mr. INOUE]; the Senator from Alaska [Mr. STEVENS]; the Senator from Georgia [Mr. NUNN]; and the Senator from Arizona [Mr. MCCAIN].

The Senator from Hawaii.

Mr. INOUE. Mr. President, I am pleased to submit the report of the committee of conference on H.R. 5504, the Department of Defense appropriations bill for fiscal year 1993. Mr. President, this has been a very difficult year for the conferees on Defense appropriations. We have worked in lengthy sessions to devise a compromise agreement which funds the essential requirements for the defense of our country in the post-Warsaw Pact world. In this bill, we propose measures to preserve the Nation's defense industrial base, and we act to ensure that sufficient funding is provided to fund the research and development programs which will protect the qualitative edge of America's military equipment in combat, whenever and wherever that might occur. Our recommended bill provides funding to keep America's men and women in uniform well equipped, well trained, and well led.

The amount of funding in the conference agreement—\$253.8 billion—is \$16.3 billion below the amounts appropriated last year for Defense. The conference bill is some \$34 billion below what was appropriated just 2 years ago. The allocation of budget authority for the Defense Appropriations Subcommittee this year is some \$14 billion below the ceiling, or cap, agreed upon in the budget summit. We have stayed

within the agreed summit level and the funding we have recommended to the Senate is under our budget allocation by nearly \$2 billion.

It has been difficult to achieve our objectives. We have met the challenge.

Mr. President, I would now like to detail some of our recommendations.

#### MILITARY PERSONNEL

Both the Senate-passed and the House-passed authorization bills reduce end strength for the Active Forces, as requested, by 98,617 from fiscal year 1992 to 1993. Funding levels contained in the conference agreement recognize this reduction.

Mr. President, I would also note that there are no recommendations for accelerating the drawdown from Europe. Our review indicates that troops are being withdrawn from Europe at rates which already impose hardships on military personnel. Indeed, because of our concern that those returning from Europe face unnecessary hardships, \$25 million is added to allow enlisted military personnel more time to find housing when they undergo a permanent change of station.

The administration requested total budget authority of \$77.4 billion for operation and maintenance [O&M] programs. The conference agreement provides \$72.8 billion, cutting \$4.6 billion from the request. The agreement is \$1.1 billion above the House level and \$1 billion below that of the Senate.

The conferees also accepted Senate recommendations which seek to encourage efficiencies and better management. The Senate recommendations proposed a series of adjustments under the heading "excess inventory initiative" which reduce the Department's request for purchasing spare parts and supplies by a total of \$3 billion. These reductions are made in light of the continuing problems DOD has had managing its supply system.

Mr. President, the conference agreement provides support for defense conversion, environmental programs, and disaster relief activities. The recommendations provide \$1.766 billion for defense conversion programs under Title 8—Defense Reinvestment for Economic Growth and under the R&D and operations and maintenance titles of the bill. These conversion programs include R&D activities, which I shall discuss later, and transition assistance for military and civilian workers. An increase in funding is provided for DOD's environmental program.

#### TITLE III—PROCUREMENT

Mr. President, under the procurement accounts, the conferees were concerned with the protection of the defense industrial base as well as the procurement of needed military equipment. Accordingly, the conference agreement recommends actions to various investment programs that reflect the need to decrease the Defense budget, but at the same time, build down

investment programs in such a way that the industrial base is maintained in a viable manner. Where possible, the recommendations support conversion of the industrial base to civilian applications.

In particular, I would call attention to the armament retooling and manufacturing support [ARMS] initiative, which will restructure the ammunition industrial base to make more efficient, cost effective use of its industrial capacity. This initiative will boost defense readiness, preserve jobs, and form the basis for economic growth in regions affected by Government plant closures.

Mr. President, I ask unanimous consent that an amendment which I had intended to propose to the Defense authorization bill be inserted into the RECORD at the conclusion of my remarks. I have asked for inclusion of this text into the RECORD because it may help to guide those who will implement the arms initiative as it appears in the Defense Authorization Act for fiscal year 1993.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. INOUE. (See exhibit 1.)

Mr. President, while still under the procurement title, I would like to discuss our recommendations for various aircraft programs.

First, the F-16 program.

The budget proposed to buy 25 F-16 aircraft for the air force in the final procurement of that airplane. The conference agreement supports the procurement of 24 F-16's in fiscal year 1993.

Second, the C-17 program.

The C-17 is an airlift airplane intended to become the mainstay of air mobility for U.S. forces. The C-17 program, however, is again behind schedule and its prospects for getting back on schedule do not look good. Consequently, the conference agreement fund six aircraft instead of the eight requested in the budget.

Now, we get to the B-2 bomber program.

The conference recommendation fully funds the four remaining B-2 aircraft for a total program of 20 aircraft.

TITLE IV: RESEARCH, DEVELOPMENT, TEST AND EVALUATION

Mr. President, we have now come to the last major division of the bill which I propose to discuss in detail today and that is Title IV—Research, Development, Test and Evaluation.

The largest program under the R&D accounts is also the most problematic. It is the strategic defense initiative. The Pentagon sought \$5.3 billion in fiscal year 1993 for the strategic defense initiative [SDI] and theater missile defense initiative programs. The recommendation which the Senator from Alaska and I brought to the Senate on September 21 was to provide \$3.8 billion to establish a more fiscally supportable level and to permit more time for ade-

quate test and evaluation to occur before equipment is fielded.

Some Members wanted to reduce funding well below that level but the Senate accepted the committee approved recommendation and \$3.8 billion was the amount the Senate conferees carried into conference.

Mr. President, I know that while we were in conference, ill-founded rumors were spread by persons who apparently sought to discredit the conference agreement on SDI even before it was completed. I am pleased to inform my colleagues that Senator STEVENS and I did not waver, we did not break faith with our colleagues, we brought back a conference agreement which provides \$3.8 billion for SDI in fiscal year 1993—no more, no less—\$3.8 billion is the amount we pledged and it is the amount we delivered.

UNIVERSITY GRANTS

The Senate conferees have responded to requests for earmarking of funds for university grants in the same manner as the Congress resolved this issue in the fiscal year 1992 rescission bill. That is, we have put these university grants into a single provision granting the Secretary of Defense the discretion to award any particular grant.

Mr. President, that concludes my presentation of major recommendations. In a bill of the size and scope of the Defense appropriations bill there are many items of particular interest to individual Members. I would hope the Members would judge the work of the committee by its achievements and not by what they perceive to be its shortcomings. We have a good bill, a balanced bill, and one which I believe deserves the support of every Member of the Senate.

Mr. President, a bill of this magnitude and complexity cannot be managed by one man alone; it requires a team. We have a team—it is called the Appropriations Subcommittee on defense. Each member on that committee has contributed to the Senate's understanding of this important piece of legislation. Chairman BYRD, Senator HATFIELD and other members of the full committee have facilitated our work. I am deeply grateful to each of them—the members of the subcommittee, the members of the full committee, and my other colleagues.

But, Mr. President, I would be remiss if I failed to give special recognition to a singular presence, a Senator whose understanding of matters related to the national defense is unsurpassed. I have an undying debt of gratitude to my good friend the senior Senator from Alaska [Mr. STEVENS] for his support, his encouragement, and his willingness to help shoulder the burden of carrying this bill before the Committee and the Senate and in conference with the House. I treasure the opportunity to work with him in partnership on these weighty matters.

Mr. President, I also wish to recognize the tireless dedication of the staff of the subcommittee. Through the long hours they have labored to give effect to our actions. Selflessly, respectfully, and I might add, tenaciously, the staff of the subcommittee has struggled to bring to fruition the legislative actions of the Senate and the Congress. I wish to recognize; Richard Collins, Steve Cortese, Dick D'Amato, Hoot Albaugh, Rand Fishbein, Charlie Houy, Jay Kimmitt, Peter Lennon, Mary Marshall, Mavis Masaki, Jane McMullan, Jim Morhard, David Morrison, Mazie Mattson, Donna Pate, and John Young.

TRIBUTE TO JAY KIMMITT

Mr. INOUE. Mr. President, it is my pleasure to call to the attention of the Senate the dedication and service of one of the most trusted member of my staff. He is a man who does not seek recognition, but who nonetheless rises above the crowd by his sheer determination to get the job done, and who has gained the respect and admiration of his colleagues and those who know him as a man whose integrity is unimpeachable and whose commitment to securing the objectives of those he serves never falters.

His character was shaped by his service as an officer in the U.S. Army and his education at the U.S. Military Academy at West Point. He is marked by an unwavering allegiance to the Senate and to the Committee on Appropriations.

The man of whom I speak is Jay Kimmitt, and I am indeed fortunate that he is a member of my staff on the Subcommittee on Defense Appropriations.

Mr. President, Jay has worked for the Congress for nearly 10 years. The majority of that time he has spent on the Defense Appropriations Subcommittee where his responsibilities have grown with each year of service. He is now the primary staff analyst for Department of Defense procurement and for Army research and development programs.

Jay is known, both here in the Senate and in the Pentagon, as one whose incisive analysis, when jointed with his background and experiences in the military, can deflate the pretensions of those who would seek to "bamboozle" the Committee on Appropriations. He presents a formidable obstacle to those who would try to outrun caution or to dodge the careful examination of their requests for funding.

Mr. President, I am proud of Jay Kimmitt. It is an honor for me to work with him.

Mr. President, it is now my pressure to yield to my colleague, the chairman of the authorization committee, the Senator from Georgia [Mr. NUNN].

The PRESIDING OFFICER. The Senator from Georgia is recognized for up to 20 minutes.

Mr. NUNN. Mr. President, I thank the Chair, and I thank my colleague

from Hawaii and my colleague from Alaska for their very thorough and very commendable job in managing what everyone knows is one of the most difficult bills to manage.

Mr. President, under the circumstances, I think this bill is a good bill. I particularly want to commend the conferees for their support of several different provisions that originated in the authorization bill but that we worked side by side with the appropriators on all year, particularly the initiatives on defense conversion and transition initiatives that are so important to our men and women in the military and also to our communities throughout the Nation that are losing defense industry and are losing military bases.

We have worked very hard in the Senate this year to put together a bipartisan package of recommendations in this area and I think enactment of these initiatives will certainly be among the most important work done in the Congress this year.

I am also pleased the appropriation conference agreement follows the authorization conference agreement on the tactical aircraft modernization programs which are enormously important and which all of us know we have not solved this year. But at least we are trying to point in the right direction and we are awaiting both an affordability study and a roles and mission study to release all funding.

I would say the same in terms of the funding for the Nunn-Lugar demilitarization legislation which is so enormously important in preventing the spread of nuclear weapons and chemical weapons and countermissile technology around the world as the former Soviet Union undergoes its transition.

And there are a number of other funding provisions that are enormously important that I will not detail tonight.

Mr. President, I will support this conference report, and I do commend the managers of the bill. I do have some concerns that I think need to be set forth.

One concern is the direction in this bill to the Secretary of Navy to settle certain specific shipbuilding claims and several transfers of funds to non-DOD agencies for nondefense purposes.

There may be a good case for these shipbuilding claims to be settled. I hope that there is a good case, because each one of these three that have been identified in this bill have been found unjustified by the Navy.

There is one provision here to pay Bethlehem Steel, Sparrows Point, \$40 million using 1992 funds; \$55 million was appropriated last year. Secretary Garrett found these claims were unjustified.

There is \$13.3 million for Tampa Shipbuilding in Florida, and this was also found to be unjustified by the

Navy. The Navy and the Maritime Administration also had another claim for the same company, Tampa Shipbuilding, for TACS-7 and TACS-8, \$30.3 million. Each of these claims was found to be unjustified. I hope there is a better explanation than I have received on this, and I certainly do not discount the fact that there may be an explanation.

But any time we overrule a finding by the Navy or by the military services that the taxpayers of the United States do not owe this money and it is put in the bill as a directive to pay, it raises concerns, at least on my part.

Mr. President, my other major concern about the conference report is an old one that has come up several years in a row, and that is the university research earmarks. A little legislative history is in order here.

Two years ago, this issue was hotly debated before this body on the very day of sine die adjournment. When that difficult debate was over, the Senate adopted a provision, and the House followed when the conference report was sent back over, to stop the earmarking of university research funds in the DOD bill.

In the next year's Defense Authorization Act, we passed a provision that called for all university contracting grants to be awarded on a competitive merit selection basis. We also required a specific waiver of this provision in order to make it harder to earmark research projects for specific universities.

The very next year, Mr. President, the appropriations conference report, with no earmarks having been included in either the House or Senate passed bill, waived the competition requirements in the law and again brought us a bill loaded with university earmarks, and that bill was unamendable.

Last year it was the same story. The bill was brought to us at the last minute full of university earmarks. I reluctantly opposed the report last year because of this.

When the Department of Defense subsequently proposed to rescind the earmarked funds, the Appropriation Committee included the rescissions in both bills that passed the House and the Senate.

But something strange happened in conference. When the rescission bill came back from conference, the rescissions of the earmarks were dropped in spite of the fact they were in both bills. The earmarks then were added back, but they did include a provision that said the Secretary of Defense could spend an amount of each case that he felt was appropriate based on the contribution of the project to our national scientific and technology posture.

Obviously, the Secretary did not see much merit in these projects because they were on his rescission list. I understand, although I am not certain,

that none of these funds have been spent to date.

Mr. President, when the defense appropriation bill came before the Senate last week, there was approximately \$90 million in earmarked funds, but the Senator from Hawaii had done what he said he was going to do last year, and he carried out his word completely. These were discretionary. They were up to the Secretary of Defense.

I proposed an amendment to ensure that all of these grants and contracts to universities would be awarded on a competitive basis, in accordance with the current law which we passed 2 years ago. This amendment also called for a new procedure to use a merit-based review process rather than the oil peer review process that so many Members of the Congress have found objectionable in the past because there is considerable evidence it becomes an old boys network.

This new process would basically include the land grant colleges. I think we need to take another look at that procedure next year and perhaps broaden the group of colleges represented there.

But in any event, I think there is a strong case that our private colleges and universities ought to also be represented. My amendment was adopted giving the Senate a strong mandate to resist earmarking of these funds during the conference.

Now that the conference is complete, and despite the strong message against earmarking of these funds which has been given over and over again by this body, \$176 million has been earmarked for 28 colleges and universities.

I would note very quickly, however, that this \$176 million is divided into two parts: Those projects which came from the Senate and those which came from the House. The seven Senate earmarks, which total about \$75 million, are subject to the amendment I referred to and they will be subject to the competitive requirements of the law.

In other words, Mr. President, they will be selected on the merits. And if there are other schools that are not named in this report that have a better proposal, those other schools will also be able to compete.

The 21 House earmarks, which total \$101 million, on the other hand, are to be exempted from the law and awarded without competition. They are outright mandates to spend the money only on those projects. The conferees placed specific language in the report providing that.

To make matters worse, this conference report authorized 10 earmarks, in addition to those that I just mentioned, which are valued at \$94.8 million that were rejected and deleted from the fiscal year 1993 Energy and Water Appropriations Act and never passed by either legislative body.

Mr. President, I recognize the dilemma that our Senate conferees were in. I sympathize with their position. I understand the House is adamant on these projects. But I would have to say that this is a slap in the face of good Government.

Mr. President, I am disappointed by this blatant disregard on the part of the House conferees for the strong sentiment of most of the Members of the Senate and I believe also the House. I believe also at least the House is having second thoughts on this subject, because we have to ask the questions of ourselves: What kind of message does this send to the Department of Defense? Does it tell them that we in the Congress mean what we say when we call for increased oversight as our defense dollars become more scarce? I think not.

Also, Mr. President, we must ask ourselves what kind of message we are sending to colleges and universities that are the very foundation of the technology and management we will need in the future: Are we telling them that we value excellence in the research they do? I think not. Are we telling them that the sure way to be funded is not through excellence or performance or through merit-based selection: the way to be funded is through the office of a Member of Congress, regardless of the value and the merit of the proposed research.

Some of these may be worthwhile projects. They may be the best projects available. We may get our money's worth. But if they are good projects, they should stand up to a merit selection process.

And the thing that is most unfair, Mr. President, when you have these provisions inserted year after year by the House, is the fact that schools that are qualified, that are capable, are getting out of the process.

Mr. President, I am disappointed in these particular provisions. I do not know what can be done at this late date but I hope we can turn this around. I hope the projects will be on the rescission list and I hope that we will be able to readdress this, either before this session ends or early next year.

Mr. President, again I commend the Senator from Alaska and I again commend the Senator from Hawaii for the very difficult job under great time pressure.

I would also add that job was made more difficult this year because our authorization bill was not passed in an early stage, and I understand that makes it much more difficult for the appropriators to act. We were forced by circumstances beyond our own control not to pass our bill at the end of August and that made the process more complex for all.

Mr. President, before yielding the floor, yielding back the remainder of

my time, we had a little dialog here a few minutes ago with a marvelous going away speech and presentation by the Senator from new Hampshire, Senator RUDMAN. I will have more remarks to make about him later but he is a man of splendid ability, he has tremendous integrity, he has wisdom, he has common sense, and most of all he has fortitude. He has the courage of his convictions.

WARREN RUDMAN will be missed. Mr. President, I yield the floor.

I yield the remainder of my time.

The PRESIDING OFFICER (Mr. SARBANES). The Senator from Georgia yields the remainder of his time.

Under the agreement, 20 minutes is reserved to the Senator from Alaska, Mr. STEVENS, and 20 minutes to the Senator from Arizona, Mr. MCCAIN, which has not been used. The Senator from Hawaii has used 6 minutes of his time.

Who seeks recognition?

Mr. MCCAIN addressed the Chair.

The PRESIDING OFFICER. The Senator from Arizona is recognized.

Mr. MCCAIN. Mr. President, while the distinguished chairman of the Armed Services Committee is on the floor I would like to express my appreciation for, again, his achievements in carrying out a very difficult, arduous bill and especially for his continued support as we address the difficult personnel issues that affect our Armed Forces. As you all know, we are forcing thousands of young men and women to leave the military. I appreciate the concern and commitment on the part of the chairman in trying to ease the transmission and burden we are placing on these young men and women.

I would also like to express my appreciation to the distinguished chairman of the defense appropriations subcommittee and the ranking member, Senator STEVENS.

Senator INOUE and Senator STEVENS worked very hard on this bill and I think they have shaped a very difficult compromise that in policy areas I am fully supportive of.

I also rise again though, this year, Mr. President, to strongly oppose many of the add-ons, unauthorized and authorized, to this bill which we can frankly no longer afford. I find them, again, totally unacceptable.

I also want to admit from the start that I am not without sin in casting the first stone. All of us have had to accept legislation that contains items we wish had not been added to our bills. Further, all of us have to fight hard for our State and constituent interests. If we do not, the end result is inevitably to see our programs lose funding, regardless of their merit, and add-ons and pork take their place.

There is no man or woman in this body who can point the finger at others in innocence. In fact, it is one of our key functions to fight for the interests of the constituents we serve.

I do not believe, however, that we should close out this year's defense debate without at least some review of the problems we have created for our Nation's defense. I do not believe that we should ignore the fact we have created a new case for the line item veto, for restraint in disrupting the President's defense budget, and for eliminating the pork we insert into the defense budget.

We are in the process of making draconian cuts in defense spending. We are cutting spending on procurement in ways that threaten our defense industrial base. We are cutting spending on operations and maintenance in ways which threaten to recreate a hollow Army, a hollow Navy, a hollow Marine Corps, and a hollow Air Force. We are cutting force levels to a point which threatens our ability to fight another Desert Storm in a world that still has its tyrants and aggressors.

We are also cutting defense at a time when we face a major recession. We are forcing millions of Americans to find new jobs—Americans who won the cold war and many of whom fought in Desert Storm. Every time we put \$35,000 into any area that does not reflect a legitimate high priority need, we take a job away from an American who earned it and give it to someone who did not.

Let me repeat this point, Mr. President. There is no such thing as a free lunch and there is no such thing as free pork.

Every dollar any Senator or Congressman moves out of the President's defense budget request contributes to costing some American his or her job. Every time these dollars total up to \$35,000, they cost an entire job.

All of us tend to conveniently forget this when we make claims to our constituents. We all list what we added, but we never list what we took away. None of us go home and state what our net impact was on our States and districts. Quite frankly, most of us do not even know at the end of our deliberations whether we produced a net increase in jobs or spending unless we focus almost solely on pork and forget our Nation's security needs.

I believe that we need to remind ourselves of these facts before we finish our debates on this year's defense bills. I believe that we must lay the ground work for a searching examination of the add-ons we have made to the President's defense budget request. I believe that we should lay the ground work for open Government and for media review of what we have done.

#### FINDING DEFENSE PORK

In saying this, I must note that we face a very real problem this year in laying that ground work. We are rushing forward with legislation that none of us have really had the time to review.

I think that I can assert with absolute certainty that no member of this

body or the House has had time to read the entire fiscal year 1993 Defense Authorization Act or Defense Appropriations Act. We may be the world's greatest deliberative body, but no member has had timely access to the detailed tables that describe the spending patterns in our bills in the rush to complete this year's legislation.

No one really knows the details of all the add-ons to either defense bill. Further, even if we had days to review each act, the truth is that it takes weeks for even the Comptroller's office of the Secretary of Defense to document exactly what has been added to, to deleted from, the President's request.

These problems are further complicated by the fact that our bills are not designed to reveal the details of add-ons or pork, and our report language rarely explains the real reason for many changes.

In fact, the thousand or more pages of report language and hundreds of pages of bill language are designed to conceal such details. Many words and funding shifts are worked out at the last moment and behind closed doors. Many are hard fought compromises between the public need and private influence. Many are so vaguely worded that it can take the Department of Defense months to fully interpret what they mean.

Not every addition we make to the defense budget represents the misuse of defense funds, and many cuts are also justified. Many add-ons to the defense budget are actually requested by the Department. Many reflect the changing needs that develop during the months between the President's budget request and the time we complete action. Many are the outcome of legitimate defense debates. We are not a rubber stamp for the Executive Branch.

I have, however, reviewed the Senate version of the FY1993 Defense Appropriations Act, and I have found a number of areas that seem to turn a silk purse into a sow's ear. I have found areas that do seem to merit both searching media examination and a line item veto.

As a result, I have a list of questions for the managers of this bill. I hope that they will be able to answer these questions at this time. If not, I hope that they will be able to provide the answers for the record.

First administrative Aircraft for the National Guard. Could it be explained to me why the Appropriations Act earmarks specific expenditures for administrative aircraft for the National Guard? This whole expenditure area has been the subject of intense media scrutiny because it involves the purchase of aircraft that often are not requested or needed by the Guard.

We made at least a start in reducing the amount of pork spent on such items in the Authorization bill by not

earmarking specific buys of specific aircraft. Why was this funding retained in the Appropriations Act?

Second, National Security Education Fund. Could it be explained to me why we have added \$35 million to the National Security Education Fund? We already authorized \$150 million for this program last year. We did so although it was largely undefined and little supporting analysis and justification. We also treated it as a fully mature program.

We did not provide funds to try it out. We did not even authorize the \$4 or \$5 million needed to fully fund it for a year. Instead, we spent \$150 million at a time when countless public and private educational institutions all over the Nation need additional funds. We did it at a time when we are losing military and defense jobs all over the country—and let me note that \$150 million is enough money to generate 4,000 to 8,000 jobs. We did it at a time when we have pressing social needs throughout our society.

There still is no agreed Department of Defense directive or implementing instruction for the program. The Board that is supposed to administer the program is still not fully selected. Two basic studies that are supposed to help define the purpose and implementation of the program are not funded, much less completed. The first is a large-scale study of higher education needs in foreign languages, area studies, and international fields. The second is assessments of how international events will affect future U.S. prospects for economics, foreign affairs, and defense as part of national security.

In other words, we still do not have an implementable program, no one is really in charge, and we haven't done the research necessary to use the money effectively.

Why are we putting \$35 million more into this program?

#### UNIVERSITY SET ASIDES

The distinguished chairman of the Armed Services Committee explained how unacceptable this is. I gather that Senators made a major effort to make these set-asides competitive and were denied this by the House. Why did the other body take this position?

Does the Montana College of Science and Technology get \$10 million? Does the University of Wisconsin Center for Advanced Propulsion get \$15 million and the Medical College of Wisconsin still get \$15 million more? Has Wisconsin won some lottery we don't know about this year?

Does the University of St. Thomas in St. Paul still get \$15 million, and if so, why? What about \$15 million for Johns Hopkins? What about \$5 million for the University of New Orleans School of Naval Architecture? What about \$16.45 million for other selected universities?

I think the American people deserve an explanation of why these specific in-

stitutions deserve taxpayer money without competition, review by their academic peers, or detailed justification?

#### DOC FISHERIES GRANT PROGRAM FOR DISASTER RELIEF

I believe in disaster relief, but could it be explained to me why \$100 million for the DOC fisheries grant program for disaster relief was in the Senate version of the Defense Appropriations bill, and whether it still is in the conference report?

#### PROJECT PEACE AND STUDY OF NUCLEAR WASTE IN THE USSR ARCTIC

Is \$35 million in additional transfer authority still being provided for Project Peace and the study of nuclear waste in the U.S.S.R. Arctic? If so, how did we determine the priority for these projects?

#### MONEY FOR HOLIDAYS AND SPORTS

What is the status of the various proposals for spending money on holidays and sports? What does defense have to do with spending \$6 million on the World University games? Why is defense spending \$2 million on the Olympic games in Atlanta that will not even be held until 1996? Why should defense spend \$9 million for World Cup USA? Have we replaced the bomber and missile gaps with some new sports gap, and an athletic threat that we are not yet aware of?

#### NATIONAL PRESTO INDUSTRIES CLEANUP AT EAU CLAIRE, WI

Is \$7 million being spent on the National Presto Industries Clean Up in Eau Claire, WI? If so, what reasoning went into assigning this activity special priority?

#### EXTENDED COLD WEATHER CLOTHING SYSTEM

Is \$36 million still being spent on the Extended Cold Weather Clothing System? Once again, what is the reasoning behind this? Why does this add-on have priority?

#### AMMUNITION ADD-ONS

Are we still spending \$340 million for ammunition add-ons? If so, is there any documentation from a military service showing we need these add-ons? Is there any testimony or staff analysis?

#### TACTICAL TRAILERS AND DOLLY SETS

Are we still spending \$30 million for tactical trailers and dolly sets for the Army? Is not this an add-on for which the military services have no requirement at all?

#### NIGHT VISION DEVICES

Do we still have a \$5 million add-on for night vision devices? If so, what is the military requirement and how was it validated?

#### REAL PROPERTY MAINTENANCE AT THE PRESIDIO

Are we still going to spend \$28 million for real property maintenance at the Presidio even though we are going to close the base? If so, what defense function does this aid?

#### M-1 TANK UPGRADES

Is there some U.S. Army analysis or documentation showing that we need

to spend \$122.1 million on upgrading the M-1 tank?

**SNAKE CONTROL**

What is the sudden problem that led us to consider to spend \$1 million under O&M Health for snake control? Is this still in the act?

Mr. President, the cases I have listed are only the small tip of the iceberg. They involve comparatively small amounts, and my reason for raising them as questions is not because they are the most important problems in our defense legislation, but because they are easier to understand than the broader problems that involve billions of defense dollars.

There are far more serious reasons to fight defense pork, to reduce the burden on the taxpayer, to reduce the deficit, and to save the jobs of those who have earned them. These cases are only symbols of our need to come to grips with the fact that we simply do not have the total funds in the defense and intelligence budgets to fund anything other than necessary defense programs.

**THE OVERALL PROBLEM OF ALLOCATING DEFENSE DOLLARS IN A TIME OF DEFENSE SCARCITY**

If I may now turn to the broader issues at hand, we need to start facing a new defense facts of life. We keep talking about the base force as if we were funding it. We keep advancing plans for peace dividends and defense savings as if we had provided the money to maintain the base force levels.

The base force, however, was announced in August 1990, and we have already cut the defense budget at more than twice the rate the President planned in both fiscal years 1991 and 1992. Early this year, President Bush proposed a defense budget that was 7 percent lower in real terms than last year's defense budget—which again was an annual cut about twice the level that was planned in sizing the base force.

While it is impossible to make precise estimates because of the ongoing changes in our force structure, we will be spending about 10-12 percent less in fiscal year 1993 than defense planners counted on in sizing the base force.

Nevertheless, each key committee made major cuts in the President's fiscal year 1993 defense budget request of \$281 billion.

The budget resolution, provided \$277.4 billion, a cut of \$4.2 billion, or 1.5 percent.

The Senate passed a fiscal year 1993 Defense Authorization Act that provides \$274.2 billion. This is a cut of \$7.4 billion, or 2.6 percent.

The House Armed Services Committee passed an act that provides \$271.1 billion. This is \$10.5 billion below the President's request, and a cut of 3.7 percent.

The House Appropriations Committee passed an act that appropriates \$273.9 billion, a cut of \$7.7 billion, or 2.7 percent.

The Senate Appropriations Committee has produced a bill that appropriates \$272.5 billion, a cut of \$9.1 billion, or 3.2 percent.

We have now passed a final Authorization Act which is \$274.2 billion, or 2.4 percent, below the President's request, and the Appropriations Act funds roughly the same level.

This means that we have added cuts of 9.4 percent in real defense spending to the cuts of 12.3 percent we made in fiscal years 1991 and 1992. This is a total of 21.7 percent, and it means that we have taken actions that mean we must cut the base force by about 10-12 percent more than the level called for in the President's original plans to cut our forces by an average of 25 percent. We are talking about 35 percent force cuts, not 25 percent.

I am deeply concerned that we may be accelerating the cuts in our national security faster than problems we face justify and faster than our economy can absorb. However, the cuts we are making in defense spending are only part of the story. The specific items I have just discussed are only a small fraction of the total add-ons to the defense budget that must be funded by cutting items in the base force.

They are part of a much broader process that makes all the problems in funding effective forces far worse.

We are shifting so many dollars out of programs that the President, Secretary Cheney, and General Powell assumed we would have in planning our forces and strategy, and putting them into other areas that we are forcing additional force cuts on the military. We are pushing our entire military structure towards hollow forces.

As I have said before, we do not yet have a detailed list of the changes and add-ons included in the final conference reports on the fiscal year 1993 Defense Authorization and Defense Appropriations Acts. However, the Comptroller of the Department of Defense has provided me with a detailed list of the add-ons and cuts that the the Senate and House authorizers and appropriators have made in President Bush's original proposal for the fiscal year 1993. I ask unanimous consent that these lists, and the relevant totals, be printed in the RECORD at the end of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.  
(See exhibit 1.)

Mr. McCAIN Mr. President, if we look at such add-ons and cuts in the defense budget, we see the House authorizers added \$9.8 billion in programs the President did not request, and took \$14.9 billion away from the programs he asked for. Similarly, we see that the Senate authorizers inserted \$10.4 billion and removed \$13.8 billion.

If we look at such add-ons and cuts in the defense budget, we see that the House appropriators added \$15.8 billion

in programs the President did not request, and took \$18.6 billion away from the programs he asked for. Similarly, we see that the Senate appropriators inserted \$10.5 billion and removed \$19.7 billion.

Now, let me repeat that some of these changes were valuable and necessary. We have a very real responsibility to ensure that defense dollars are spent wisely. We must recognize the fact that nearly a year elapses between the drafting of the budget and our action on that budget, and time alone requires change. Our hearings and debates often reveal a distinct need for change.

We need to remember, however, that all of these changes have an effect that is incremental to our cuts in defense budgets. Every time we make a change that is not vitally needed, we make further cuts in national security, and we take jobs and income away from the people who have earned them and we give them to people who have not.

Perhaps the best way to put this issue in perspective is to illustrate what happens in terms of jobs. And this time, let me single out the authorizers to balance out my previous comments on the appropriators.

If we take the most conservative possible assumption—and assume an average job cost of \$75,000 per job, including overhead—the Senate cuts in defense spending will take about 100,000 jobs away from people who had earned them under the President's defense budget request. If we look at the \$10.3 billion in add-ons, we will shift another 137,000 jobs.

If we use a more realistic figure of about \$35,000 per defense job, we will shift 214,000 to 293,000 jobs—including all defense industry, active and reserve military Department of Defense civilian, and defense-related jobs.

Let me stress that word shift. We are not creating jobs by moving money from one part of the defense budget, nor by cutting defense spending faster than the economy and the pace of defense conversion can absorb.

As I noted earlier, our add-ons and cuts only move jobs. In most cases, they take jobs away from companies and peoples who earned them by competing in the areas that contribute to security. Our defense cuts eliminate current jobs in the hope that the money will eventually be used to create other jobs later.

Mr. President, we must not continue to judge the budget request of the executive branch with one standard and then apply a far less demanding standard to ourselves. We cannot go on claiming to be funding good causes and to create jobs when we are actually taking money and jobs away.

The items I listed earlier are only a tiny part of this problem, and it is in some ways unfair to single out this one example. But, Mr. President, we must

9/21/92 1400

CONGRESSIONAL ACTIONS

<b>Reproductive Services</b>		Permits abortions to be performed at overseas military installations.	Permits abortions to be performed at overseas military installations.	No funds shall be available to enforce DoD policy prohibiting non-funded abortions in military facilities overseas.	Permits abortions to be performed at overseas military installations
<b>Nuclear Testing (comparison attached)</b>		Imposes one-year moratorium on nuclear testing unless the President certifies that any of the independent republics of the former Soviet Union has conducted a nuclear test during that period.	Imposes nine-month moratorium on nuclear testing and a complete test ban after September 30, 1996. Between 1993 and 1997, limits number and types of tests that may be conducted (subject to disapproval by the Congress).	Language identical to House authorization contained in Energy & Water Appropriations bill.	Imposes 9-month moratorium, subject to Joint Resolution of disapproval, and CTB by October, 1996; limits number and purposes of tests (Energy & Water Appropriations)

CONFERENCE

Adds Cuts	
<b>Total</b>	

The PRESIDING OFFICER. The Senator's time has expired.

The Chair recognizes the Senator from Alaska.

Mr. STEVENS. I thank the Chair.

Mr. President, I shall attempt to answer some of the questions of the Senator from Arizona at the end of my remarks.

Mr. President, in 1988, as we reviewed the defense plan for 5 years, we saw that the year we are dealing with in this bill, 1993, would have requested somewhat in excess of \$350 billion for defense. This bill is slightly over \$250 billion for defense. If we really look at it, the end of the cold war has brought about a reduction in the planned expenditures for the Department of Defense of over \$100 billion. I think there are some Members of this body who have come to the floor and suggest that the priorities of the Bush administration are mired in the past, "with a cold war mentality" I think someone said.

Mr. President, I join the distinguished chairman of the Defense Appropriations Subcommittee, Senator INOUE, in recommending passage of this conference report to the Senate. He has discussed many of the details and programs contained in this report, and I will not take the Senate's time on this busy day to repeat his account.

I do wish to explain to the Senate why I believe this is an important bill, and one which every Member can support as a significant step in the continued downsizing of our military establishment. I will state at the outset that I remain concerned we may be lowering our defense program at too fast a rate, and losing some capabilities that will be very difficult to replace quickly in time of need. I do share the fervent commitment of the chairman that at whatever rate we cut defense, we do so in a manner that does not repeat the mistakes of previous postwar drawdowns.

Some Members have come to the floor of this body and suggested that the defense priorities of this administration are mired in the past, with a cold war mentality. I think it might be useful to look at the changes we have witnessed during the 4 years of the first Bush administration.

When this President took office in January 1989, the world was a very different place. Hardline Communists held power in Moscow, in Prague, and in Berlin. We saw some hope for change, the result of the 8 years of the Reagan-Bush administration, but the full fruits of that national commitment to reject and turn back communism had yet to be realized.

This President, aided by Secretary of Defense Dick Cheney, Chairman of the Joint Chiefs Colin Powell, and Secretary of State Jim Baker labored to advance the gains made during the Reagan-Bush years, and truly change

the world. A key to accomplishing that change was the maintenance of our military strength.

Even while working to bring to a close the chapter of Communist totalitarianism that had so dominated world affairs in the second half of the 20th century, this administration was already looking to the future. In August of 1990, not even 1 year after the fall of the Berlin Wall, and before the coup attempt in Moscow that was the dying gasp of the old guard in the Politburo, this administration came forward with a blueprint for the future of our military.

The new priorities announced in the President's speech in Aspen, CO, and the base force plan presented by Gen. Colin Powell provide a framework for a U.S. military force that can address the challenges of the next century. Within that plan was a drawdown in defense spending unparalleled since the end of the Second World War. The President, Secretary Cheney, and General Powell asked one thing of us, the Congress, in presenting this plan. That we afford them the time and flexibility to not repeat the mistakes of the past, and to take care of our people.

Mr. President, I am most proud that this bill fulfills the request they made of us, and I am grateful to the chairman for his unflagging determination that we not be distracted from this task.

Let me say parenthetically, Mr. President, I do not think I have ever had the privilege to work with so great a gentleman as the Senator from Hawaii. He is not only the chairman of this subcommittee that I had the honor to chair for 6 years, and he now has chaired it for 6 years, but we have worked together as a team without regard to partisan differences. We have none in the operation of this subcommittee. But we have had the privilege of working with the gentleman from Pennsylvania [Mr. MURTHA], and the gentleman from Pennsylvania [Mr. MCDADE]. And I call attention to the fact Senator INOUE, a distinguished Army veteran; Mr. MURTHA, a distinguished Marine veteran; Mr. MCDADE, a veteran of the Navy, equally distinguished, and I had the privilege and honor of being in the Air Force, the four of us really have worked as a team in trying to work out the difficult problems of the authorization-appropriations process, and I do believe that this bill will show that that work has been successful.

In this bill we have sustained the rate of drawdown for active component military requested by DOD. We have continued the necessary separation benefits to avoid involuntary RIFs and cutbacks against the dedicated men and women who serve in the military. We have worked to mitigate the impact on the civilian workers at the Department of Defense, by funding addi-

tional conversion and transition benefits to recognize their needs and dedicated service to our country.

This bill does make deep cuts in defense procurement, slashing the total for acquisition by more than \$9 billion from the level appropriated for 1992. The bill continues reductions in key R&D efforts, cutting more than \$1.2 billion from the level approved by the Congress for 1992. Even that figure is deceiving, because many of the high-technology defense conversion initiatives are funded within the R&D appropriations—the real cut against purely defense priorities amounts to almost another billion dollars from the 1992 level.

For 1993 and the coming years, we will face many more defense program terminations. This year we have ended production of the B-2 bomber, the *Seawolf* submarine, the F-15 fighter, the advanced cruise missile, the Apache Helicopter, and new production of the M1-A2 tank. Instead, we see coming initiatives to upgrade and modernize existing military equipment, such as the conversion of older tanks to the M1-A2 configuration. We cannot permit the defense industrial base to simply wither away, while expecting that capability to remain for the future. I commend the chairman and the committee for its work in these areas, which I know mean so much to the men and women who produce the equipment vital to our military forces.

The extraordinary capabilities that exist in the Department of Defense are directed in this bill to many of the challenges facing this Nation, that have not traditionally been the primary mission of our military forces. We include in this bill over \$1 billion for the military's role in the war on drugs. The leadership of the Army's Walter Reed research facilities will again be tapped to fight AIDS, prostate cancer, and in an initiative which this body established by an overwhelming bipartisan vote, harness the expertise of the military research community to fight breast cancer. Senator SPECTER, and Senator D'AMATO, particularly Senator HARKIN—it was his initiative—deserve special praise for this effort, and I commend the chairman for his work in maintaining the commitments that we made to the Senate with regard to military research to fight breast cancer.

Mr. President, this bill in total is nearly \$8 billion less than the amount requested by the President for 1993, and is less than the total amount authorized for defense in the armed services conference report that passed the Senate on Saturday. Again this year, the committee did not have the results of the armed services conference until after work had been completed on this bill. He did work to track as closely as possible with the product of the authorization conference, and on all

major defense items, I believe this bill comports with the Authorization Act. Because that bill was not available to us in a completed form, there may be some small discrepancies, but under the guidance of the chairman of the committee, the President pro tempore, we have worked to reflect the key policy issue resolved in their bill.

Mr. President, despite the looming presence of the upcoming election, which has increasingly affected the work of this body, I believe this bill represents the partisan work of both the Senate and House Appropriations Committees. Political posturing had no place in our conference sessions, only the best interests of the men and women who serve our Nation in the military, and the concerns and interests of the Members of this body who have worked with us to present this bill to the floor.

I appreciate the consideration and courtesies extended by the Senator from Hawaii to me, and the other Republican members of the committee and the Senate. We worked together to accommodate the interests of all Senators, and this bill is a fair compromise of all the competing demands that were placed on the committee.

Mr. President, I again wish to recommend this bill to all Members of the Senate, and I urge the speedy adoption of this conference report.

Mr. President, let me turn now just briefly to the comments made by the Senator from Arizona. It is difficult for us in the appropriations process to track the authorization process. I point out that we received a copy of the defense authorization bill on Sunday. I saw it for the first time this morning. We through our staffers tried to keep in touch with what was going on.

For instance, the National Guard aircraft that the Senator from Arizona mentioned in his first point, those aircraft were authorized in the Senate version of the authorization bill but dropped in the conference just prior to the time they wound up but we had already decided to fund the Senate version of the authorization bill. This causes a difficulty.

Incidentally, I agree with the National Guard aircraft acquisition. I agreed with them in the Senate, and I continue to support it now.

The Senator from Arizona mentioned the National Security Education Trust Fund which was authorized by the Intelligence Committee Authorization Act. It is not funded in this bill. We dropped it in conference.

The Senator mentioned the problem of the university grants, the university awards. We reached a compromise which I think is sensible. Those initiated in the House are governed by the House authorization and House procedures that were sought by Members of the House. The Senate set for this subcommittee a new peer review process,

and a process of competition. We have made those provisions still apply to these university grants and matters for the universities initiated by the Senate.

The disaster relief measure for the fisheries grant that was mentioned by the Senator from Arizona was also authorized by an amendment adopted by the Senate on the floor.

As far as the nuclear waste provision, it was one that I sponsored. Mr. Gates from CIA was in Alaska and testified concerning the problem of an increased evidence that Soviets have disposed of nuclear waste in the Arctic in a manner that may well contaminate the Arctic and the North Pacific. So this funding, incidentally, was authorized through the authorization process.

I could continue through with regard to comments about the night vision, the M-1 tank upgrade. All of those were in the authorization bill that passed here Saturday without debate and without comment.

I respect my friend for disagreeing with some of those provisions. But this year we have tried to track the military funding through the authorization process. We tried to avoid controversy, and we have received some criticism because we did track the authorization process apparently.

I believe this bill represents a bipartisan work of both the Senate and House appropriations committees. As I pointed out, although we are partisans, and I certainly defend the Bush administration for the planning it has done, and their bill funds, I think the Senate should realize that political posturing had no place in our conference. We had long sessions. And I join my colleague from Hawaii in commending the staff. The staff has been not only extremely diligent but they have worked much longer hours than the Members did, and we thought we had long sessions.

There is no question. This is a very dedicated staff. They all have been listed by the Senator from Hawaii, and I join in commending them and appreciate the work of my good friend, and associate here, Mr. Cortese.

Mr. President, in closing, the only thing I would say is I did not intend to make this long statement this year. But I do think that under the circumstances the comments were raised concerning the bill, and it is necessary for us to point out that we have in this bill to the best extent, the greatest extent possible, and more so than any year that I have been working on the Defense Appropriations Subcommittee, keyed our efforts to those in the authorization process.

I find it interesting that some of the comments that we have received that are critical come from those who worked on that bill. But I believe this bill is a fair compromise of all the competing demands placed on the committee, and placed on us in terms of de-

mands for assistance. I would point out that of the \$254 billion a considerable portion of it represents the transition from our cold war status. It represents the moneys that are necessary for the conversion of our industrial base, for assistance to our military, to our uniformed and our civilians who are working with both the industry and the Department of Defense.

Mr. President, if I have any time left, I yield the remainder of my time.

Mr. BOND. Mr. President, I rise today to address a provision of the fiscal 1993 Defense authorization bill affecting the private sector defense industrial base. This provision singles out a specific depot for an increase in Army aviation maintenance and repair work that heretofore was performed by private sector firms. The provision not only increases the level of this work for the coming fiscal year, but calls for additional increases in the work to be sent to this Government facility in each of the two succeeding fiscal years.

I have several concerns with this provision, Mr. President. First, it pulls more work away from the defense industry which is already suffering from the decrease in defense spending; a situation which is likely to get worse in the coming years.

Second, this provision targets a single Government facility, not on the basis of what is most cost effective or in the best interest of defense preparedness, but purely on the basis of the political leverage of the Member in whose district the depot facility resides.

Third and finally, this provision reflects a preference for the assignment of defense maintenance and repair work to public sector facilities instead of to private sector firms which are the keystone of our free enterprise system and the backbone of our economy.

The Department of Defense has vigorously opposed restrictions and special targeting in proposals such as this provision, and I think properly so.

There is no question that defense spending will decline in the coming years, and it should in light of the dramatically changing nature of the global threats we face as a nation. I believe that even most defense contractors agree with this and are taking their fair share of the reductions. But they should not experience an inordinate share of the lost business opportunities due to the shift of business to public sector facilities in order to needlessly support or maintain public sector jobs. This is not fair, it is not right and it is not in the Government's best interest.

In my view, Mr. President, except for those core capabilities that Government must retain as its own, the presumption should be that defense related maintenance support work be performed by private firms after full and open competition. This is a cost-effective way of sustaining the private sector defense industrial base during this

period of defense downsizing. If we are to have the defense base to rely on when we need it in the future in terms of technological and production capability we must shift the support work at issue to private firms during the current downturn in defense spending.

I believe the Senate Armed Services Committee and its Readiness Subcommittee share this view. Moreover, the proposal seems to contradict the policy direction taken in the extensive report on the defense industrial base issued by the House Armed Services Committee earlier this year, as well as the thrust of both the Republican and Democratic Defense Industrial Base Task Forces. The provision in the conference agreement we consider today moves us in a direction contrary to that suggested by all of these efforts, further placing at risk the defense industrial base.

While it is too late to amend this provision of the conference report before us, I want to state my opposition to it and that I will remain vigilant in the new Congress and oppose sweeping proposals of this nature. This is not the legislation we need to help transition to a smaller defense structure or ensure the health of the private sector defense industrial base.

Mr. COCHRAN. Mr. President, this conference report provides \$305 million to initiate the purchase of an LHD-1 class amphibious assault ship. As I understand it, the total amount of \$1.205 billion is estimated to be required to complete the purchase. In the bill, the Secretary of the Navy is authorized to contract on an incremental basis for the purchase of this ship. Is my understanding consistent with the intent of the bill managers that this will enable the Navy Secretary to exercise the existing option that expires on December 31, 1992, and contract for the purchase of the ship with funds that are provided in this bill and that will be requested in next year's budget, or later, as may be required to meet the construction schedule under the contract if the Secretary exercises this authority?

Mr. INOUE. I thank the senior Senator from Mississippi for raising this issue so that it can be clarified. The language in the bill is intended to permit the option to be exercised before the end of this calendar year, which will result in significant savings to the Navy over a later procurement. This will protect the option price and scheduled delivery of the ship. The language enables the contract price to be funded in increments over the period of the scheduled construction. That is the express intent of the conferees.

Mr. COCHRAN. For further clarification, as I understand the meaning of this, if the Secretary of the Navy exercises this authority, it would be under the tacit assumption that the Administration will request the remaining \$900 million at some time in the future. Is this correct?

Mr. STEVENS. The Senator's understanding is correct. The Navy could either fully fund the remainder, or fund that amount which would allow the construction to remain uninterrupted and on schedule. That last is critical. While it appears that the total required funds have not been provided for this ship, this approach was taken by the conferees to enable the Navy to comply with the terms of the existing contract option, both as to price and schedule, and to obtain the funds, incrementally over time as needed to satisfy the terms of the construction contract.

Mr. COCHRAN. I thank both managers. I appreciate the Senator's efforts on this bill in general, and on the LHD in particular, and I thank him for helping me to clarify this matter for the RECORD.

Mr. DOMENICI. Mr. President, I rise in support of the conference report to accompany H.R. 5504, the Department of Defense appropriations bill for fiscal year 1993.

This bill provides \$253.8 billion in budget authority and \$166.0 billion in new outlays for the Department of Defense in fiscal year 1993. When outlays from prior-year budget authority are taken into account the bill provides a total of \$264.9 billion in outlays in 1993.

These totals are \$7.5 billion in budget authority and \$6.8 billion in outlays below the President's request for defense discretionary spending.

While the chairman and ranking member have worked very hard on this bill I question whether the overall total will be acceptable to the administration.

Nonetheless, I expect it is the best we can do given the time constraints we face.

I do note that the final outcome is below the subcommittee's 602(b) allocation, and that the resulting reductions in spending will go toward reducing the deficit as required in the 1990 bipartisan budget agreement.

I greatly appreciate the consideration the distinguished chairman and ranking member have given to several important defense matters that I raised with the subcommittee, and for the courtesies they have extended to me and my staff.

Given the short time remaining in this congressional session, I urge my colleagues to adopt this conference report.

Mr. BINGAMAN. Mr. President, I want to commend the chairman of the Defense Appropriations Subcommittee, the Senator from Hawaii, for his effort in conference to keep the defense conversion initiative in the appropriations bill consistent with the authorization bill. In particular, I appreciate his retaining the programs which were included in the amendment Senator PRYOR and I offered on September 22.

I had a great interest in the technology and industry provisions in the

conversion package, which total \$575 million in the appropriations bill. I also note that, as the Senator from Hawaii committed when this bill was debated in the Senate September 22, the conference committee has fully funded at the authorized level a series of ongoing industry-driven technology programs, namely Sematech, high resolution displays, advanced lithography, multichip modules, and high performance computing. I know these are all programs which the Senator from Hawaii strongly supports and I look forward to his support in future years.

Mr. President, I note that the appropriations conference report in its discussion of the technology component of the conversion initiative makes several suggestions as to how money within these programs might be spent. The authorization bill, H.R. 5006, which we adopted on Saturday, requires cost-sharing from industry and/or the states and use of competitive procedures in each of the programs in question: the dual-use technology partnerships, the commercial-military integration partnerships, the Defense Manufacturing Extension Program, the Regional Technology Alliance Program, and the Dual-Use Extension Program.

Mr. President, the projects mentioned in the appropriations conference report may be very worthy ones. But my view is that they need to compete on an equal basis with other projects which will be submitted to the Department of Defense to implement these programs and they will need to meet the statutory cost-sharing requirements even to be considered. Frankly, many other projects were brought to the attention of the Armed Services Committee during our development of these programs. Our decision was to put in place fair and equitable procedures under which all of these ideas could be considered by the Department of Defense. I am grateful that the appropriations conferees have supported the principle that these conversion programs should be implemented on the basis of merit and that cost-sharing should be required.

Mr. President, let me conclude by again commending the Senator from Hawaii for his tremendous assistance in getting all of the authorization initiatives funded, in all but one case at the full authorization level. I believe that in the authorization and appropriations bills we have truly taken an enormous step toward helping reorient defense-dependent firms, especially small firms at the lower tiers, toward the commercial marketplace. We have put teeth in the notion of commercial-military integration in our Defense R&D enterprise. As the Senator from Hawaii knows, I have been urging the approach we are adopting here tonight for several years. I am grateful to the chairman as I finally see these ideas reach fruition and I look forward to his

help in insuring the conversion technologies programs are vigorously implemented by the Department of Defense.

Mr. DOLE. Mr. President, I want to take just a few minutes to commend the managers of this important bill, Senator INOUE and Senator STEVENS, for their hard work and sustained commitment to a strong national defense. I believe that through their efforts, we have struck the right balance.

As we draw down our force structure—in a world that appears more peaceful—Senators INOUE and STEVENS have interjected the right amount of caution. This bill recognizes that the world remains a dangerous place and protects our ability to respond to any contingency.

Tough compromises have been struck on SDI, the B-2 bomber, manpower, armor modernization, and a myriad of controversial issues. Throughout the process, the managers have stood steadfast to their commitment to a strong America. This has not been easy.

Many of my colleagues have sought to gut our national defenses. They would burn down rather than build down our force structure. This might be politically popular, but it would surely result in disaster. There is no question that deeper cuts demanded by some would cost an estimated 2 million jobs—at a time when our economy is already weak. But the real danger would be to our future security. Returning to a hollow army, as the demands to slash more would cause, means that America might, once again, find itself unable to defend our vital interests. The lessons of history on this matter are written in blood—weakness begs aggression and war. So I commend senators INOUE and STEVENS for their prudent approach.

Let me also extend a special thank you to Steve Cortese, Jim Morhard, and the other staff members for their tireless effort on this important bill. Their dedication and commitment have made a difference. The Senate and the Nation owes each of you a debt of gratitude.

Also, I wish to thank the managers for their strong bipartisan support for a number of programs important to our national security and to Kansas. The Congress has, once again, joined me in giving Kansas manufacturers a strong vote of confidence for their quality and value.

The KC-135R tanker program of Boeing Wichita—the C-12 and T-1A Jayhawk by Beechcraft—Cessna's T-47—the P-180D by Piaggio—the sensor fused weapon—and the combined effects munition assembled in Parsons—major assemblies for the M1A2 main battle tank from Atchison Castings—and scores of other Kansas subcontractors who received a strong vote of confidence in this bill are proud of their contribution to our security and proud

of the value they give the taxpayer. I thank Senators INOUE and STEVENS for their support for my requests on behalf of these programs and for their recognition of Kansas quality and value.

Let me also extend my appreciation to the managers for the bipartisan endorsement for my requests to modernize the Kansas National Guard. By adding funds for modern communications equipment, a state-of-the-art fire arms training simulator, and for the Blackhawk helicopters, they have greatly assisted my efforts to see that the Kansas guard is able to meet its mission and sustain its proud history and service to Kansas and to the Nation. Without these additional funds, many of these upgrades would come way down the road or not at all.

Lastly, let me thank my colleagues for their overwhelming support for my armament retooling and manufacturing initiative so generously supported in this bill. The arms initiative will break new ground in defense conversion, keeping jobs in communities like Parsons, KS. This innovative program will provide loan guarantees, grants, and other incentives that will begin the transition of excess ammunition plants once slated for closure, to vibrant commercial operations. Converting from the load, assembly, and pack of tank rounds to the load, assembly and pack of automobile airbags is just one example of the possibilities of this initiative. As my colleagues know, I have been working this project for over a year. I am gratified by the strong support and funding provided by this bill. We can build our defenses down without callously displacing workers and their families if we apply new thinking and innovative approaches such as these.

Again, I thank the managers for their hard work, for their dedication, and for their support and vote of confidence they have extended to Kansas.

The PRESIDING OFFICER. The only time remaining is that of the Senator from Hawaii.

Mr. INOUE. Mr. President, I yield the remainder of my time. I urge that the Senate adopt the conference report.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The conference report was agreed to.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. INOUE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. MITCHELL addressed the Chair. The PRESIDING OFFICER. The Chair recognizes the majority leader.

Mr. MITCHELL. Mr. President, I commend the Senators from Hawaii and Alaska for their diligence and perseverance in the adoption of this conference report.

And I am pleased to advise the Senate that this completes action on all 13 of the appropriations bills for this year. We have been advised that they will be signed.

I thank all of my colleagues for their cooperation in making this possible.

#### MORNING BUSINESS

Mr. MITCHELL. Mr. President, I ask unanimous consent that there now be a period for morning business with Senators permitted to speak therein. And I will have an announcement regarding the schedule for the remainder of the evening in the very near future.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### THE BRADY BILL

Mr. LAUTENBERG. Mr. President, I rise in strong support of the Brady bill, to require a waiting period for handgun purchases. This is a vitally important and entirely reasonable bill. It is not a cure-all, nothing is. But it will make a real difference in the fight against violent crime.

Mr. President, waiting periods can reduce violence in two primary ways. First, they help prevent the purchase of guns by people acting in the heat of passion or in the depths of depression. That is important, because so many crimes are caused by a temporary loss of emotional control. A cooling-off period can make an enormous difference.

In addition, Mr. President, the Brady bill can help ensure that handguns are kept away from convicted felons, and others who, in general, are prohibited from possessing firearms. In New Jersey, a similar law has helped stop more than 10,000 convicted felons from buying handguns. Unfortunately, the effectiveness of New Jersey's law is undermined if criminals can go into other States, buy a carload of handguns, and bring them back to New Jersey. That is one reason why Federal legislation is so important.

As I see it, Mr. President, the bottom line is this. The Brady bill will save lives. A lot of lives.

Mr. President, it is not every day that we can save human lives at so little cost. If we fail to do so, make no mistake about it: the blood of many innocent Americans will be on our hands.

Mr. President, the reluctance of President Bush and many of my colleagues to support the Brady bill is particularly disturbing when one considers that this proposal enjoys overwhelming public support. And that includes the support of many legitimate firearm owners. Even former President Reagan supports this bill, and strongly.

Mr. President, as important as the Brady bill is, we need to do even more to reduce gun-related crime. For example, we should promptly close loopholes in the law that are allowing convicted felons to own guns.

Many of my colleagues may be shocked to know that taxpayers have

been paying over \$4 million annually so that even violent felons can legally get access to firearms. It is a perverse situation that would be corrected under legislation Senator SIMON and I have introduced, the Stop Arming Felons Act, S. 2304.

Mr. President, this Nation is facing an epidemic of gun violence. It is a national tragedy.

Consider these figures.

In 1990, handguns killed 22 people in Great Britain; 13 in Sweden; 87 in Japan; 10 in Australia; 68 in Canada; and 10,567 in the United States.

Mr. President, that is more than tragic. It is sick. Handgun violence is a deadly cancer in our society. And the longer we let that cancer spread, the more innocent Americans will die.

Handgun violence is a central part of a larger problem of crime in our society. On average, there is a violent crime in America every 17 seconds. There is one murder every 21 seconds, a forcible rape every 5 minutes, and a robbery every 46 seconds.

The problem of violent crime infects every region of our country, and all social and economic groups. Fear pervades our inner cities, our suburbs and even many of our rural areas. It is a national disgrace, and addressing it must be a top national priority.

Mr. President, there are other steps to take to fight crime. We need to get tougher with criminals. Those who violate basic social norms must be held accountable for their actions, and pay a severe price for their behavior. Too many criminals today are escaping meaningful punishment, even after they're convicted. That has to change.

We also need to provide additional support to the law enforcement community, particularly at the local and State levels. In 1950, the Nation had more than three police officers to respond to every one violent crime committed. In 1990, the Nation had fewer than one police officer for every three violent crimes. This trend must be reversed.

We also have to do more to prevent crime from happening in the first place. By getting citizens involved, educating them about ways to prevent crime, and devising new and innovative methods of deterring criminals, we can make an enormous difference.

We also need to crack down on assault weapons. These weapons of war are designed primarily to kill human beings. And they are good at it. They should be banned outright. In fact, I am proud to note that my State of New Jersey has been a leader in this area, and has enacted a prohibition on assault weapons.

In sum, Mr. President, firearm violence has reached epidemic proportions. And we have a responsibility to the victims and prospective victims to take all reasonable steps to keep this violence to a minimum. I strongly urge

my colleagues to support the Brady bill.

It is a matter of life and death, Mr. President. Nothing less.

TRIBUTE TO CHARLES B. SAUNDERS, JR.

Mr. KENNEDY. Mr. President, I would like to take this opportunity to pay tribute upon his retirement to a man who, for the past 35 years, has embodied the highest standard in service to the public interest. Charles B. Saunders, Jr. retired at the end of August as Senior Vice President and Director of Governmental Relations at the American Council on Education, the umbrella organization that represents the Nation's colleges and universities here in Washington, DC. During his distinguished career, Mr. Saunders, or Charlie, as he is known to everyone, left an indelible mark on this Nation's system of higher education, and on the programs of Federal aid on which millions of students depend to pursue their educational objectives.

Charlie Saunders' career has a long and close association with education. A native of Boston in my home State of Massachusetts and a graduate of St. Mark's School in Southboro, Charlie graduated from Princeton University in 1950. Charlie was a promising athlete and had a tryout with the Boston Red Sox. An injury forced him to give up that career, but it led him in another direction, a direction that would have a great deal to do with expanding access to education. Charlie first came to Washington in 1957 as a Legislative Assistant to the late Senator H. Alexander Smith of New Jersey.

Since then he has served in a number of crucial positions that enhanced education for all Americans including various positions at the Department of Health, Education, and Welfare. While at the Department of HEW he played a central role in developing the Elementary and Secondary Education Amendments of 1970, the Emergency School Aid Act of 1972, and the Higher Education Amendments of 1972. In 1973, Charlie served for 7 months as acting Assistant Secretary of Education, and then as principal deputy to Assistant Secretary Virginia Y. Trotter. From 1971 to 1975, he was acting chairman of the Federal Interagency Committee on Education, and the principal Federal representative with the Education Commission of the States.

Charlie joined the American Council on Education in 1975, and between then and now represented the views and concerns of higher education to the Congress and the Executive Branch. During the last 18 years, he served on various other commissions and chairmanships including the Committee for Education Funding, Coalition for Coordination of Student Financial Aid, Veterans Administration's Advisory Committee on Education and Rehabilitation, and the National Advisory Commission on Higher Education for Police Officers

Charlie Saunders' selfless service on behalf of the Nation's youth has extended well beyond his paid employment. From 1966 to 1970, he was an elected member of the Montgomery County, MD, Board of Education, and he was a member of the first independent board of trustees of Montgomery Junior College serving in 1969 and 1970. He recently was appointed by Governor William Donald Schaefer to a second four-year term on the Maryland Higher Education Commission—so his service on behalf of higher education will continue even after he retires.

Among the numerous honors Charlie has received are leadership awards from the Association of Community College Trustees, the National Association of Student Financial Aid Administrators, and the National Association for Equal Opportunity in Higher Education. In 1972, he received the Service Award of the National Association of State Boards of Education, for distinguished service to public education.

Mr. President, it has been my privilege and pleasure to work with Charlie Saunders over the years on many issues that have come before the Committee on Labor and Human Resources. He enjoys a well deserved reputation for absolute honesty and unimpeachable integrity. His encyclopedic knowledge of higher education legislation and the legislative history surrounding it have made him an invaluable resource and a formidable proponent of educational opportunity. He has been passionate in his conviction that the Federal Government should help guarantee access to higher education for all qualified students and their ability to choose the institution that best suits their needs and interests. He will be sorely missed.

Too rarely do we honor those who, laboring out of the public spotlight, attend to the important work of making our Government more effective and our society more equitable. For this reason, it was gratifying to see the Washington Post run a long and laudatory profile of Charlie Saunders on the occasion of his retirement. With your permission, Mr. President, I ask unanimous consent that the article be printed in the CONGRESSIONAL RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Aug. 11, 1992]

CLOSING A CAREER OF "MAKING A DIFFERENCE" FOR COLLEGES

(By Mary Jordan)

He's the guy in the bow tie, the gentleman crusader on Capitol Hill.

Charles B. Saunders Jr., the dean of higher education lobbyists, next week concludes a career that is a story of the anonymous powerhouses in Washington who change American life.

"He has had a great influence on education opportunity and education equality," said Thomas Wolanin, staff director of the House Education and Labor subcommittee on post-secondary education.

For the past three decades, Saunders has been at or near the negotiating table for virtually every major piece of legislation concerning college students. He retires a month after President Bush signed the 1992 Higher Education Amendments, which authorize more than \$100 billion over the next five years for student aid and college programs.

Saunders, 63, can recite that book-size bill item by item. As each line was haggled over, he was in the hallways of the Hill. Sometimes he wore white shoes and a straw hat. Always, it seemed, he had the air of an English patrician out for an afternoon stroll.

"It's been rewarding," he said, sitting in his office of the last 18 years, the Dupont Circle headquarters of the American Council on Education (ACE). "I felt I was making a difference, helping higher education make its case to Congress."

As chief lobbyist for a group that represents 1,800 colleges and universities, much of Saunders' time has been spent persuading contentious factions—the private and public colleges, the Jesuit and Methodist, the historically black and brand new—to march in lock step.

A descendant of Pocahontas, the Indian princess who made peace between the English settlers and Native Americans, Saunders is said to have inherited her knack for consensus. (He even named one of his five children after Pocahontas's husband, English settler John Rolfe.)

"The ACE is sort of the United Nations of higher education and Charlie is the Dag Hammarskjöld," said William A. "Buddy" Blakey, partner in the education law firm of Clohan & Dean. "He gets them organized to express a unified position before Congress and the executive branch."

"We fall apart quite easily into special interest groups," acknowledged Robert Atwell, ACE president. Saunders, he said, is a master at uniting the education community to magnify its voice.

"There are very few people in Washington who do what Charlie does and who have the moral compass, absolute integrity, that he does," said Atwell. "Here's a guy who doesn't even gossip."

"He's a Princetonian, reserved, right out of the '50s," Atwell added—though sometimes, he said Saunders dresses as they did in the '40s.

When Saunders first arrived in Washington, he was not long out of Princeton, and had spent a few years covering education for two small New England newspapers. In 1957, he landed his first job in the capital, as an aide to then-Sen. H. Alexander Smith (R-N.J.).

Immediately, he dived into the area that would be his mission for the next 35 years. Sputnik had just been launched, and he and others were corralled into drafting the legislation that was America's response: the National Defense Education Act of 1958. That bill, for the first time, made the federal government—not just state governments—responsible for funding education. Basically, Saunders has been arguing ever since that the federal government owes even more when it comes to education.

"I think one of the biggest problems [in higher education] is still the funding of student aid," he said, surrounded in his office by volumes of congressional bills and budget books, some dating back decades.

"I was lucky," Saunders explained. "I went to college because I got a scholarship and I always thought everybody should have the same opportunity."

One of the endangered Washington species known as liberal Republicans, Saunders held

a variety of education jobs before assuming his post at ACE, including acting assistant secretary of health, education and welfare under President Richard M. Nixon. In the tumultuous 1960s, he was elected to the Montgomery County School Board, arguing against dress codes and for underground newspapers.

Bob Hochstein, assistant to the president of the Carnegie Foundation for the Advancement of Teaching, said part of the reason Saunders is so well-respected on both sides of the political aisle is he has never been an extremist. "Charlie is the top-flight professional who was always above politics," he said.

Elliot L. Richardson, who was secretary of health, education and welfare in 1971 when Saunders worked there, agreed: "Charlie came across as straight, direct. He wouldn't try to con you."

Blakey said he argued often with Saunders because he did not believe ACE was "pushing hard enough" in behalf of historically black colleges or minorities. "We have had some god-awful dogfights," Blakey said. "But he's always been straight, always been honest."

The son of a poorly paid New England preparatory school teacher, Saunders was accepted to Harvard, Yale and Princeton after graduating from St. Mark's school in Southboro, Mass. He chose Princeton because it wasn't in a big city or too near his Boston home.

At 17, the red-hot high school pitcher won a tryout with the Boston Red Sox, but an injury cast aside his dreams of the major leagues.

He thought about teaching, as his father and uncle had done, but said he never had the patience. Instead, he chose a different path in education. Looking back now, he recalls the bigger moments: working for the passage of Pell grants, which give college money to low-income students; writing the Emergency School Aid bill under Nixon to give millions to southern schools that were desegregating; and flying around the country after Congress passed the Title IX amendment in 1972 that prohibited discrimination against women, even in sports. "Some high school administrators were very upset," he recalled of the trip to inform officials of the law. "Of course, it turned out to be a great thing."

"Charlie is synonymous with education," said Blakey. "He's to education what Tom Landry was to the Cowboys."

In all his time in Washington, Saunders said, the biggest disappointment was the Reagan years.

"The Nixon administration had a very strong education program. It was the Reagan administration that derailed a long bipartisan history of support for federal aid in education," he said. It also decimated federal funding for schools and led to an exodus of good people from government, he said.

Saunders said that Bush dashed early hopes that he would follow through on his promise to be the "education president." Saunders said all he's seen is "rhetoric, lip service."

He said he wants more details of Democratic presidential nominee Bill Clinton's plans, but believes that the governor already "demonstrated his commitment to education" in Arkansas.

Now at the end of 35 years of work in Washington, Saunders is retiring from negotiating and numbers crunching to tennis and travel.

"It wasn't as if I was intending to devote my life to education," he said. "It's just the way it worked out."

Mr. KENNEDY. Mr. President, permit me one final observation on this occasion. Some who enjoy success in this world try to pull the ladder of opportunity up behind them. Others reach back and lend a helping hand so that more may follow. In his career, Charlie Saunders helped build thousands of ladders up which millions of Americans have climbed to a better life. We are a better Nation for his efforts. I ask all my colleagues to join me in wishing him and his wife, Marnie, both dedicated bird watchers, a long, happy and healthy retirement.

#### GOVERNOR CLINTON SETS FORTH HIS VISION FOR "AMERICAN FOREIGN POLICY AND THE DEMOCRATIC IDEAL"

Mr. PELL. Mr. President, on October 1, in Milwaukee, Gov. Bill Clinton spoke eloquently about the need to restore the democratic ideal to its proper place at the center of American foreign policy. He described this as "an idea that it is at the heart of this campaign, and at the center of my vision for the country and the world," and noted "A pro-democracy foreign policy is neither liberal nor conservative; neither Democrat nor Republican; it is a deep American tradition."

Governor Clinton rightly stated that "No American foreign policy can succeed if it neglects our domestic needs. And no American foreign policy can succeed if it slightes our commitment to democracy."

I ask that the full text of Governor Clinton's speech "American Foreign Policy and the Democratic Ideal" delivered October 1, 1992, at the Pabst Theater in Milwaukee, WI, be printed in the RECORD at this point.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

#### AMERICAN FOREIGN POLICY AND THE DEMOCRATIC IDEAL

(Remarks by Gov. Bill Clinton)

Thank you very, very much. Thank you very much. I want to thank Carol Bauman and the Institute of World Affairs for hosting us here. I want to say how delighted I am to be in this magnificent theater and this wonderful city. I want to say a special word of thanks to the mayor of Milwaukee, John Norquist for this outstanding work to bring together representatives of all racial and ethnic groups, and to promote the preservation of the cultures of this great American city.

I also want to say a special word of homage to George Kennan, a native of this city, for the work that he did, and has done, over the entire 20th century to support freedom and democracy.

And finally, I would just like to thank all of you who have come here. I'm not exactly sure what the number is, but I am sure there are representatives of at least 35 different racial and ethnic groups in this audience today, representing not only the future of democracy in America, but the future of democracy in the world.

I want to talk about an idea that is at the heart of this campaign, and at the center of my vision for our country and the world, an idea that generations of people around the world have fought and died for, and lived by—an American idea called democracy.

I know we may have more immediate problems on our minds. But even at a time when America's needs here at home are crying for attention, we cannot forget that the person we elect to lead America will also be the protector of our interests, and the champions of our values around the world.

Democracy has always been our nation's perfecting impulse. It transformed us from a nation of slavery to a land of civil rights; from a land of male suffrage to a land of universal suffrage. And now it is transforming the entire world.

Many of you here in this audience have taken part in this democratic revolution. Your contributions to the nation have been matched by your devotion to the cause of freedom abroad. Here at home you have built schools, research institutions, and libraries that have preserved your cultures, your values, and your faith.

You have raised your children to be proud of their heritage. As the freedom movements in your homelands have gained strength, you have marched and organized. And as the voice of John Paul II gave that movement inspiration, so you gave your moral and your financial support to Solidarnosc in Poland. You helped keep RUKH alive in Ukraine, Sajudis in Lithuania, and the pro-democracy movement in China, as the freedom-loving people in each of those nations rose up to challenge communist orthodoxy.

You stood behind those in this hemisphere and in Africa who fought to gain and preserve their freedom. You have been stalwart in your support for our democratic ally, Israel.

Your passionate commitment to democracy has helped carry the torch of freedom both here and abroad.

Many factors contributed to the downfall of the Soviet empire. But the decisive blow was clearly delivered by the peoples imprisoned within it.

Some Americans, especially within this election season, are tempted to overstate their role in ending the Cold War. But still it would be wrong, and dangerous, for Americans to underestimate the part that our country did play in the victory that was won. It would be wrong, because there is still great work to be done.

The Cold War is won, but democracy's victory is far from assured. It could be dangerous, for the world is still full of perils and of nations that could easily drift toward violence.

If this work is left half-finished, then we, our children, and multitudes abroad who now stand at the threshold of a new life, will suffer a crushing disappointment, and live in a more dangerous world.

One of the reasons that I'm running for president is that I believe Americans must help see that this work continues. We cannot turn away now and rest on our laurels. Our national interests oblige us to join in building a just, enduring and ever-more democratic peace in the world.

This is not the first time that our nation, victorious in a foreign struggle, has faced such challenges. In the aftermath of World War I, Woodrow Wilson argued that we had to make the world a safer place, and that it should be made more democratic.

But the isolationists prevailed. And it took the leadership of Franklin Roosevelt, and

the sacrifices of the American people in the Second World War to protect the world's democracies from the aggression that followed from our isolationism after World War I.

After World War II, it fell to Harry Truman to shape a postwar world. He led in the creation of the United Nations, and aid to Greece and Turkey; in the Marshall Plan, and the policy of containment. And this time America joined behind a pro-democracy foreign policy.

Throughout the Cold War our nation's leaders carried on this tradition of supporting democracy around the world. From the gates of the Berlin Wall, John Kennedy reaffirmed America's commitment to liberty around the world. Senator Henry Jackson gave strength and hope to those seeking to escape tyranny behind the Iron Curtain. President Jimmy Carter challenged dictators of the left and the right when finally he put human rights on America's and the world's agenda.

But to be fair, Republicans also played a very important part in sustaining a bipartisan pro-democracy policy. From Senator Arthur Vandenberg, who was such a model of putting country ahead of party, that tradition spanned the decades after World War II, from President Eisenhower, who sustained the NATO alliance through some of the darkest days of the Cold War, to President Reagan who spoke out against communist aggression.

A pro-democracy foreign policy is neither liberal nor conservative; neither Democrat nor Republican; it is a deep American tradition.

And this is so for good reason. For no foreign policy can long succeed if it does not reflect the enduring values of the American people. We do not stand behind the cause of democracy simply because of the goodness of our hearts. The fact is, democracy abroad also protects our own concrete economic and security interests here at home.

Democratic countries do not go to war with one another. They don't sponsor terrorism, or threaten one another with weapons of mass destruction.

Precisely because they are more likely to respect civil liberties, property rights, and the rule of law within their own borders, democracies provide the best foundations on which to build international order. Democracies make more reliable partners in diplomacy and trade, and in protecting the global environment, something we must do more of in the years ahead.

It is no accident that in those countries where the environment has been most devastated, human suffering is the most severe; where there is freedom of expression and economic pursuit, there is also determination to use natural resources more wisely.

Our task then is to stand up for democracy as it remakes the world. That challenge will have its costs and its burdens. But it need not divert us from the pressing need for economic, educational and social reconstruction here at home.

Indeed, I have argued repeatedly from the beginning of this campaign that America cannot be strong abroad unless we rebuild our strength here at home.

As Admiral William Crowe, the chairman of the Joint Chiefs of Staff under Presidents Reagan and Bush, said recently, in endorsing my candidacy, the world needs a strong America, but American strength must begin here at home, facing our problems here at home, making progress on those problems here at home.

But we cannot choose between international engagement and domestic recon-

struction. They are two sides of the same coin. Our economy is increasingly tied to the global economy. Our access to energy supplies, export markets, new scientific developments, and even our ability to create a healthier planet, all of these things require our active engagement in the world.

And there are still other reasons why we cannot retreat to a fortress America. The collapse of Soviet communism has not only brought new democratic forces onto the world stage, it has also unleashed some darker undercurrents: civil war, ethnic hatred, intolerance, and the spread of dangerous military technologies. There is the risk that the pendulum could swing back against democracy, freedom and the hope for peace in many places in this world.

In the face of these opportunities and these dangers, we must have a President who can conduct both a domestic policy and a foreign policy.

Franklin Roosevelt fought the great depression, when 25 percent of our people were out of work, and in places like my home state, one-half the people were in abject poverty. But he fought the great depression and the rise of fascism at the same time.

Harry Truman carried out the fair deal at home, the GI bill, a new housing program, and economic reconstruction, and at the same time moved to contain communist aggression in Eastern Europe and Korea.

They would have laughed, these presidents, at the idea of conducting foreign affairs in the first term, and then switching to domestic affairs in the second.

In saying this, I do not in any way belittle President Bush's accomplishments abroad, from putting together the international coalition and war effort against Iraq, after Saddam Hussein invaded Kuwait, to his success in getting the Middle East peace talks moving. Indeed, I have supported those efforts.

But no American foreign policy can succeed if it neglects our domestic needs. And no American foreign policy can succeed if it shifts our commitment to democracy.

The president often takes a lot of credit for communism's downfall, but fails to recognize that the global democratic revolution actually gave freedom its birth. He simply does not seem at home in the mainstream pro-democracy tradition of American foreign policy. He shows little regard for the idea that we must have a principled and coherent American purpose in international affairs—something he calls "the vision thing."

Instead, President Bush seems too often to prefer a foreign policy that embraces stability at the expense of freedom; a foreign policy built more on personal relationships with foreign leaders than on consideration of how those leaders acquired and maintained their power.

It is almost as if this administration were nostalgic for a world of times past, when foreign policy was the exclusive preserve of a few aristocrats.

This approach to foreign policy is sometimes described as "power politics," to distinguish it from what some contend is sentimentalism and idealism of a pro-democracy foreign policy.

But in a world where freedom, not tyranny, is on the march, the cynical calculus of pure power politics simply does not compute. It is ill-suited to a new era in which ideas and information are broadcast around the globe before ambassadors can read their cables.

Simple reliance on old balance-of-power strategies cannot bring the same practical success as a foreign policy that draws more generously from American democratic expe-

rience and ideals, and lights fires in the hearts of millions of freedom-loving people around the world.

Let there be no mistake, this world is still a dangerous place. Military power still matters. And I am committed to maintaining a strong and ready defense. I will use that strength where necessary to defend our vital interests. But power must be accompanied by clear purpose.

Mr. Bush's ambivalence about supporting democracy, his eagerness to defend potentates and dictators, has shown itself time and again. It has been a disservice not only to our democratic values, but also to our national interest. For in the long run, I believe that Mr. Bush's neglect of our democratic ideals abroad could do as much harm as our neglect of our economic needs at home.

Let us look at the record. It reflects an unmistakable pattern in the Bush administration's foreign policy.

Fearing attacks by isolationists in his own party, President Bush was reluctant to offer Boris Yeltsin, Russia's freely-elected president, a helping hand. It took a chorus of complaints, culminating with the prodding of another Republican, Richard Nixon, to move him into action on the Russian aid package.

Just weeks before the attempted coup in Moscow, President Bush travelled to Ukraine. There he lectured a people subjected to genocidal starvation in the Stalin era, warning that their aspirations for independence constituted, and I quote, a suicidal nationalism. A few months later the people of Ukraine voted by a huge margin for the immediate and total dissolution of the Soviet Union.

For over 40 years, the United States refused to recognize Soviet claims to the Baltic nations—Lithuania, Latvia, and Estonia. But when at long last, the moment of Baltic independence came, President Bush suddenly became a reluctant bridegroom.

The United States was 37th among the world's nations to extend diplomatic recognition to these countries. We should have been first.

A year ago last June, Mr. Bush sent his secretary of state to Belgrade, where in the name of stability, he urged the members of the dying Yugoslav federation to resist dissolution. This would have required the peoples of Bosnia, Croatia and Slovenia, to knuckle under to Europe's last communist strongman.

When, instead, these new republics asserted their independence, the emboldened Milosevic regime launched the bloodiest war in Europe in over 40 years.

When I argued that the United States, in cooperation with international community efforts, should be prepared to use military force to help the U.S. relief effort in Bosnia, Mr. Bush's spokesman quickly denounced me as reckless. Yet a few days later the administration adopted the very same position.

While the administration goes back and forth, more lives are being lost and the situation grows more desperate by the day.

In the Middle East, I supported the President when it became necessary to evict Saddam Hussein from Kuwait, and I support his decision now to provide air cover to Saddam's Kurdish and Shiite opponents in the north and the south of Iraq.

But I am angered by the administration's appeasement of Saddam Hussein before the war, and disappointed by its callous disregard for democratic principles after the war. Just this week another friend of freedom, my running mate, Senator Gore, laid

out in precise and devastating detail the errors of this administration in dealing with Saddam Hussein.

President Bush showered government-backed grain credits and high technology on a regime that had used poison gas on its own people. After the war, Mr. Bush encouraged the Iraqi people to revolt against Saddam Hussein but then abandoned them.

The administration has sometimes treated the conflict between Israel and the Arab states as just another quarrel between religions and nations rather than one in which the survival of a democratic ally, Israel, has been at stake.

I support strongly the peace talks that are underway, and if elected, I will continue, without interruption, America's role in them. I also believe that America's policy in the Middle East should be guided by a vision of the region in which Israel and our Arab partners are secure in their peace, and where the practices and principles of personal liberty and governmental accountability are spreading.

For example, I believe we can and must work with others to build a more democratic and more free Lebanon.

This pattern continues in other parts of the world. In South Africa, Republican administrations had to be prodded by a bipartisan coalition in the Congress to abandon their failed policy of constructive engagement, and to impose sanctions on the apartheid regime in Pretoria.

President Bush has been slow to place America's support behind the fledgling democratic movements in other democratic nations, or to distance ourselves from corrupt and dictatorial leaders elsewhere in Africa. We should encourage and nurture the stirrings for democratic reform that are surfacing all across Africa, from the birth of an independent Namibia, to the pressure for democratic reforms in Kenya.

In Central and South America, the democratic revolution has won the first round, but our efforts to strengthen the fragile democracies in this hemisphere are still directed too much toward the central government and the wealthy.

We should do more to support those struggling to establish grassroots democracy in South America and to strengthen the courageous small entrepreneurs who are burdened by corruption and bloated bureaucracy.

We have a particular democratic responsibility in our own hemisphere to help end the cycle of violence in Haiti; to help restore democracy to Peru, even as it struggles to end the murderous violence of the Shining Path. And to help Cuba's repressive regime join its communist cousins, to borrow a phrase, in the dustbin of history.

There is no more striking example of Mr. Bush's indifference toward democracy than this policy toward China. None of us will ever forget the images of the millions of Chinese people demonstrating peacefully for democracy; the solitary young man staring down a tank; or the students raising a model of our Statute of Liberty in Tiananmen Square.

Neither will we ever forget the horror of seeing hundreds of innocent people mowed down for their belief in freedom.

But instead of allying himself with the democratic movement in China, Mr. Bush sent secret emissaries to raise a toast to those who crushed it.

The stakes in China's future are very high—for the course taken by that great nation will help shape the future of Asia and the world. Three years after the Tiananmen

Square tragedy, the tremors of change continue to shake China. We do not want China to fall apart, to descend into chaos or go back into isolation. But rather, we want to use our relationship and influence to work with the Chinese for a peaceful transition to democracy and the spread of free markets.

Today, however, we must ask ourselves, what has the president's China policy really achieved? The Chinese leadership still sells missiles and nuclear technology to Middle Eastern dictators who threaten us and our friends.

They still arrest and hold in prison leaders of the pro-democracy movement. They restrict American access to their markets, while our trade deficit with China will reach \$15 billion this year. The Chinese now have the second biggest trade surplus of any nation in the World.

Just a few days ago, President Bush vetoed legislation, passed with bipartisan congressional majorities, that would have placed conditions on Most Favored Nation trade status for China's state-owned enterprises. And just today the Senate failed, by a vote of 59 to 40, to override that veto.

But 59 senators, Republicans and Democrats, believe that we have a right to ask a country that has a \$15 billion trade surplus with us not only not to export goods made with prison labor, but to observe basic human rights while building market strength.

I will say again, I do not want to isolate China. There is much to admire in the phenomenal progress that has been made there. But I do believe our nation has a higher purpose than to coddle dictators and to stand aside from the global movement toward democracy.

For the greatest strength that America can count on in today's world is not our personal relationship with foreign leaders. Individual leaders come and go—even in the United States, I hope. It is the powerful appeal of our democratic values and our enduring political institutions for people around the world that make us special.

This does not mean we can embark on reckless crusades, or that we can force every ideal, including the promotion of democracy, on other people.

Our actions must be tempered with prudence and common sense. We know that ballot boxes alone do not solve every world problem, and that some countries and cultures are many steps away from democratic institutions.

We know there may be times when other security needs or economic interests, even in the aftermath of the bipolar Cold War world, will diverge from our commitment to democracy and human rights.

We know we cannot support every group's hopes for self determination. We know that the dissolution of old and repressive empires will often be complex, and contentious.

Moreover, we know there will always be those in the world who pursue their goals through force and violence. But they should know that a Clinton administration will maintain the military strength we need to defend our people, our vital interests, and our values.

They should also know that the danger that we will get carried away with our ideals does not loom large. That has not been our problem in the last four years.

The real danger is that in this time of wrenching, sweeping change, under President Bush, we will cling to tired and outdated notions that do not work, and cannot inspire.

Even within our budgetary constraints, we can contribute a great deal to help democ-

racy take root around the world. But while the new democracies will need financial assistance from the international community, they also need our help in learning how democracy and free institutions work; about freedom's institutions, its culture, its values; and yes, about its problems.

As president, I will reorganize and redirect our foreign assistance programs. I believe we should stress not only sustainable development but also the development of skills, of values, and the institutions of free society. But I do not believe in this difficult time we should spend American foreign aid dollars, as the Bush administration has done, to subsidize American companies to shut down plants in the United States and move them overseas.

I do not believe we should use taxpayer dollars, as this administration has done, to pay for advertisements to entice people to shut down their plants in America, and take advantage of 57-cent-an-hour labor in other countries.

I do not believe we should have one more year in which we spend more federal tax dollars training workers in another region of the world than we train people who lose their jobs here at home. I do not believe that. That not only does not make sense; it is absolutely wrong.

But I will support the establishment of a Democracy Corps, which could provide teams of experienced Americans in local centers throughout the former Soviet Union, to help grassroots leaders overcome bottlenecks to democratic development. We will renew our support for institutions like the bipartisan National Endowment for Democracy, and its partners in business, labor, and political leadership.

We will revive the spirit of the Peace Corps, offering young people the opportunity to take part in the central political experience of their time. We will rely on America's voluntary organizations to help in the development of independent, civic and service sectors in the new democracies.

My administration will work in partnership with business and professional leaders, trade unionists, environmentalists, representatives of state and local government and other skilled practitioners of our own democratic life. We will enlist the untapped skills of the many immigrants and their descendants in cities like Milwaukee, Chicago and Cleveland, who came to our shores to escape oppression and to build America—to help build democracies in the countries from which they came.

One of the most effective things we can do in international affairs is what is called public diplomacy. This covers a multitude of our government's activities such as radio broadcasting that allows us to speak to peoples of foreign lands directly. When Lech Walesa was asked if Radio Free Europe gave birth to the Solidarity movement he said, "Would there be an earth without the sun."

We should build on the success of Radio Free Europe and Radio Liberty and expand our successful surrogate broadcasting by bringing news and information to the despotisms that remain in Asia, in China, in Vietnam, Laos, North Korea and Burma.

The President's opposition to Asian Democracy Radio is further evidence that he still thinks it's more important to talk to dictators than to their oppressed subjects.

Finally, building democracy is not a job for America alone. We will strengthen the United Nations and seek more support from our democratic allies in Europe and Japan in strengthening the world's new democracies.

We all have a stake in the democratic revolution.

America's purpose in the world is not simply to be another great power in history. As the flow of resources and information and people's causes and people cause this old world to shrink, we have a particular contribution to make to the march of human progress. I call on us to set an example of how a nation of many peoples can harvest strength from diversity.

It calls on us to give back to a contentious world some of the lessons we have learned during our own democratic voyage. It calls on us, also my fellow Americans, to deal with the increasingly racial and ethnic tensions here at home in a spirit of humility and generosity—reaching out to one another and binding up our own nation's wounds.

For we have learned here in America, and we relearn every day that democracy is not always easy and tidy. We have learned that it is a process of trial and error—that it suffers from all the imperfections known to humankind. But it is also the only system we know that can produce wisdom out of disagreement, and peace out of our warring hours. America's power, prosperity and sense of justice may be providential. But they are not accidental. For those blessings flow from the world's greatest peaceful experiment in making one out of many, our motto, *E Pluribus Unum*.

The force of democracy's magnetism is reflected in the stories still told around holiday dinner tables today. The story of the young couple who abandoned Havana for the promise and safety and opportunity in the United States. The stories sprinkled with Yiddish of the family from Minsk who fled to the land of religious freedom. The story hardly known of forced exodus from Africa, and a slow exodus from slavery and hardship to liberty. The stories still told in Polish of the farmers who left the old country for the rich and limitless land of our own Midwest.

In this election, let us join together to ensure that our American epic can offer meaning and guidance to freedom loving people around the world. Let us seize this historic moment to help expand democracy's embrace. And let us act toward the world in a manner worthy of our heritage, our ideals and our name.

Thank you very much.

#### BURST OF ENERGY

Mr. JOHNSTON. Mr. President, I wish to call to the attention of my colleagues an excellent editorial in the *New Republic* about the Energy Policy Act of 1992. Under the headline "Burst of Energy" the editors note the bill's provisions for decontrol of electric generation stating:

Society's total cost of electricity should be driven down by competition among generators, while entrepreneurs will be freed to attack the power monopoly with energy-saving new ideas."

The editors also note that:

To the dismay of the left, the energy bill provides for simpler licensing of new nuclear power stations. No new plant will be commissioned in the coming decade. But a decade from now that may change, and by then a new category of reactors, incorporating passive-safety and waste-reducing features, should be ready.

The *New Republic* concludes that:

The energy bill is the perfect opportunity for liberals to drop their irrational fear of

nuclear energy. Power reactors emit no greenhouse gases or other air pollution. Worker fatalities in the nuclear power business have been nearly nonexistent for twenty years. The coal industry, by contrast, reliably kills 200-300 workers annually, mainly in mining accidents. Another consideration: power reactors are the best place in which to destroy the radioactive cores being removed from nuclear warheads by the United States and the old USSR.

I ask unanimous consent that the full text of the editorial be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the *New Republic*, Oct. 19, 1992]

#### BURST OF ENERGY

Some eighteen months ago, when George Bush unveiled his National Energy Strategy, most people were able to restrain their enthusiasm. (See "Waste of Energy" by Gregg Easterbrook, *TNR*, March 18, 1991.) The proposal was long on favors to oil and coal interests, short on market logic and conservation. But in recent months the energy strategy has mutated into a progressive bill worth passing. Democrats will be tempted to put off a final vote with Congress about to recess, to deny President Bush a domestic policy achievement so close to the election. They should not succumb to the temptation. The bill represents something of a breakthrough.

Gone from the bill are higher mileage standards for cars and oil exploration in Alaska's National Arctic Wildlife Refuge, hand-grenade issues for the right and left respectively. Included now are real energy conservation plans; electric utility deregulation; equalization between mass transit allowances and the tax breaks that subsidize parking; global warming provisions; simplified nuclear licensing; and other advances.

On energy conservation—a central aim of any serious energy strategy—the bill extends to the rest of the country California's energy-efficiency standards for appliances and buildings. Through the 1980s California reduced its net energy consumption even as its numbers of cars and people rose. By adopting this model, national electricity demand will decline, conserving fossil fuels and holding down the world oil price as U.S. economic output expands. The bill also helps utilities promote energy efficiency, and encourages the public commissions that control them to put conservation before new production. And then there are new national water-flow standards for plumbing, which will lower the power needed for pumping, treating, and heating water. (At this writing, conferees had yet to agree on the issue of which plumbing fixtures would be covered. "The Senate will go along with showerheads but is opposed to urinals," one negotiator noted.)

The bill also marks a blow to electric power monopolies. In the future utility deregulation may have greater impact than airline and telephone decontrol combined. Society's total cost for electricity should be driven down by competition among generators, while entrepreneurs will be freed to attack the power monopoly with energy-saving new ideas. Jesse Helms has threatened to filibuster the bill to protect his inefficient home-state Carolina Power & Light—as good an indication as any that the bill is worth passing.

On measures to combat global warming, the bill also represents a milestone. Since the Earth Summit in Rio, many large cor-

porations have been leery of cutting greenhouse emissions voluntarily, fearing they could end up in a worse position if mandatory controls come later. Their later cuts would come from a smaller base, in the same way that a law to end obesity by requiring everyone to lose twenty pounds would be harder on the slender than the well-padded. The bill removes this excuse by allowing corporation to register current output of greenhouse gases and, in the event of mandatory controls, receive credits for voluntary cuts. This measure could allow the United States to meet Rio's first-round greenhouse goals more quickly than first thought—and with scant dislocation.

To the dismay of the left, the energy bill provides for simpler licensing of new nuclear power stations. No new plant will be commissioned in the coming decade, if only because conservation investments are currently much less expensive than reactor construction. But a decade from now that may change, and by then a new category of reactors, incorporating passing-safety and waste-reducing features, should be ready. (See "Safe Nuclear Power" by Lawrence M. Lidsky, *TNR*, December 28, 1987.) It is in everyone's interest to let them be licensed in a rational manner, if only to replace old, coal-fired power stations.

The energy bill is the perfect opportunity for liberals to drop their irrational fear of nuclear energy. Power reactors emit no greenhouse gases or other air pollution. Worker fatalities in the nuclear power business have been nearly nonexistent for twenty years. The coal industry, by contrast, reliably kills 200-300 workers annually, mainly in mining accidents. Another consideration: power reactors are the best place in which to destroy the radioactive cores being removed from nuclear warheads by the United States and the old USSR.

In this year of Capitol Hill embarrassment and White House excuses, the energy bill provides the many departing congressmen and the perhaps departing president a rare chance to enact a law that will create many general benefits at no one's expense. It will be a deep indictment of the system if politics as usual prevents this from happening.

#### FETAL TISSUE RESEARCH BAN

Mr. ROCKEFELLER. I am extremely disappointed that the Senate will not be able to complete action of S. 2899, the National Institutes of Health Revitalization Amendments of 1992 this year. While it is the clear view of the majority of the Senate that we move forward with this legislation, a few in the minority have thwarted our efforts. For that, I am deeply sorry, and I share the frustration of my colleagues in the Senate, including Senator KENNEDY, who has labored long and hard on this legislation and our majority leader, Senator MITCHELL. I commend the Majority Leader for identifying this issue as a top priority when Congress reconvenes in January.

Mr. President, many of my colleagues are aware of the enormous cost and human tragedy that our families and constituents experience with such chronic conditions as Parkinson's disease, diabetes mellitus and Alzheimer's disease. All too often these illnesses lead to premature death and deprive in-

dividuals from realizing their full potential.

But today there is new hope. Scientists tell us that experiments with transplanted fetal tissue may save lives and eliminate pain and suffering. For years, people with these maladies have wished for such medical breakthroughs. What a cruel hoax it is for them when the Bush administration says no to this promising research. Why? We're told that to permit medical experimentation with fetal tissue will encourage women to undergo abortions to provide human material for research. Never mind that a panel of experts recommend to Secretary Sullivan to lift the moratorium on fetal tissue research and reassured him that appropriate safeguards could be established to prevent this possibility.

The NIH Reauthorization Act that the President vetoed several weeks ago included all the safeguards called for by the Commission. It was carefully crafted to address the Administration's concerns. Yet, it was still vetoed. Now the Bush administration tells us that it's all right to use fetal tissue from spontaneous abortions, but not from induced abortions. Never mind that scientists tell us that this tissue will be inadequate, and that the end result will be to abandon such research and to take away hope.

It seems clear that the Bush administration continues to rationalize its actions, when the real reason for the moratorium is opposition to abortion at any time. I am revitalized by the efforts of those individuals in the medical and scientific community who have not given up and who helped craft a compromise proposal that met new concerns raised by the President in his veto message. The compromise calls for the use of fetal tissue from all sources only if insufficient spontaneously aborted fetal tissue was available from the President's NIH tissue bank. And, it includes all of the safeguards for fetal tissue transplantation research from the earlier vetoed bill.

At a time when scientists are on the verge of ameliorating the terrible burden of otherwise incurable diseases, it seems to me that it is a pro-life decision to allow fetal tissue research. I think of our former colleague Mo Udall, who might be here today, had he not been ravaged by Parkinson's disease. I think of STROM THURMOND, who like all parents, wants desperately to find a cure for his daughter's diabetes.

And, I think about the last 7 years, as I have watched my mother transformed from a vivacious, loving woman, into a shell of a confused human being. Nothing I have ever done, or seen, or attempted, has been as sad or frustrating as watching Alzheimer's disease claim my mother's life. In my entire life, I have never felt so helpless and useless.

I am committed to fostering promising, life-saving research. In my mind,

it is criminal to discard fetal tissue when it might conceivably provide a cure for so many sick American citizens.

Again, Mr. President, I regret that the Senate will not be able to act on this legislation this year. But I look forward to an opportunity early next year to move forward on this very important legislation.

#### TRIBUTE TO SENATOR ALAN CRANSTON

Mr. ROCKEFELLER. Mr. President, since 1985, I have had the honor of serving on the Veterans' Affairs Committee under the superb chairmanship of Senator ALAN CRANSTON. I would like to take a moment to pay tribute to our colleague's endless dedication to the veterans of this country, and his extraordinary record of leadership and dedication to our country during his 24 years of public service in the United States Senate.

Senator CRANSTON has been an integral part of the Senate Veterans' Affairs Committee since coming to the Senate in 1969. Throughout this time, he has demonstrated his commitment to those men and women who have risked their lives for the safety and welfare of our Nation.

His vision, that this country uphold its obligation to ensure that the needs of veterans and their families are taken care of, has been the inspiration for much of the legislation that has passed in favor of veterans. He has supported increases in compensation that were necessary for the veterans to keep pace with the cost of living. The Senator has shown his concern for disabled veterans and their families by authorizing support programs that provide for more grants, increased allowances, adaptive equipment, rehabilitation, and other such services. Senator CRANSTON'S record on issues related to the employment and education of veterans is unequalled. In 1970, the Veterans' Education and Training Amendments Act was passed, which displayed the Senator's heartfelt concern for Vietnam-era veterans and has been the foundation for other key initiatives.

As a strong advocate of health care reform myself, I applaud Senator CRANSTON'S efforts to improve veterans' health care through affirmative legislation. He has brought national attention to the many needs of VA health care facilities, which has resulted in the improvement of the quality of their staffs, facilities and services. Without the steadfast efforts of Senator CRANSTON, these VA facilities would not be as readily accessible as they are today.

Senator CRANSTON introduced legislation in 1971, which would ultimately lead to the establishment of a VA readjustment counseling program for Vietnam veterans. Never giving up on his vision, the Senator introduced the leg-

islation for four consecutive Congresses before it was passed by the House of Representatives. The VA's Vet Center Program was established in 1979, which helped many veterans returning to civilian life after the Vietnam war cope with such obstacles as post traumatic stress disorder. Since its establishment, the Senator has fought to make this service permanent, enabling the centers to survive proposed cuts by the Reagan administration and extend the eligibility period for veterans. In 1991, Senator CRANSTON authored legislation which allows the veterans of the Persian Gulf war, Panama, Grenada, and Lebanon to take advantage of the services of the vet centers as well.

As a result of Senator CRANSTON'S hard work and dedication, the list of his accomplishments in veterans' affairs is almost endless. He has indeed fulfilled his vision and has provided the veterans of this country with a voice in Congress.

Senator CRANSTON'S commitment and leadership have had a long reach, way beyond the concerns of veterans. He has reached out to help all Americans in one way or another, and his efforts on international affairs have made our world safer and stronger. For nearly a quarter of a century, ALAN CRANSTON has been a true fighter for the less fortunate among our society.

The list of Senator CRANSTON'S achievements are vast—for veterans, his home State of California, our country and the world. From housing policy to education to civil rights, Senator CRANSTON has fought to do the right thing, with energy and passion. His legacy is immense, and I know that his leadership in this Chamber will be missed. Personally, I consider myself fortunate to have had the opportunity to work side-by-side with him over the years. I pledge to do my part in honoring his service by continuing his fight for the people we represent and the ideals we were elected to uphold.

#### SAVING THE U.S. SPACE LAUNCH INDUSTRY

Mr. ROCKEFELLER. Mr. President, today I want to bring the Senators' attention to recent actions taken by the Bush administration which could jeopardize the U.S. space launch industry—an industry which is essential to our national security and employs 6,000 Americans—and destroy the credibility of important elements of our trade policy.

There should not be any question that the space launch industry embodies critical technology; indeed the entire aeronautics sector is generally put on that list, not to mention the many electronics-related technologies that are key parts of the launch process. The establishment of the U.S. commercial space launch industry was en-

couraged and fostered by administration and congressional actions over a long period of time.

Beyond its economic and technological importance, it is also an industry with a very special set of economics, characterized by very high costs and very low sales. Launching satellites is expensive, and with less than a dozen launches per year worldwide, it is difficult for individual companies to survive if they cannot do a reasonable number of launches each year and recover their costs on each launch.

Therefore, to maximize its viability, the U.S. launch industry must be able to compete effectively in the international market and not limit itself to domestic launches. But this requires a system of trade rules which must be negotiated and subsequently enforced by the United States Government because of the dumping of launch services that is rampant in this industry, largely by the Chinese and the Russians. Unfortunately, actions of the Bush administration have allowed our trading partners to violate their international obligations and thereby undermine the U.S. industry.

For example, in 1989 China entered into an agreement with the United States regarding international trade in commercial launch services. China, however, has consistently violated its commitment under that agreement to price its launch services on a par with those of Western launch providers, and the administration has just as consistently failed to enforce the agreement. In 1989, China offered to launch, for one-half of Western prices, a communications satellite to be procured by the member countries of the Arab League. Last year the Chinese made similar unfair offers when bidding to launch two satellites for Mexico, and in Indonesia and Korea, the Chinese offered to launch certain satellites for one-third of Western prices.

Earlier this year, 22 Senators, including myself, wrote Secretary of State Baker urging the administration to closely monitor and strictly enforce the Agreement. Mr. President, I ask unanimous consent that the text of that letter be printed in the RECORD at the conclusion of my remarks. It would be nice to think, Mr. President, that the Secretary of State pays some attention to letters from a group of Members of Congress. Unfortunately, that seems not to be the case. Instead, the administration has shown little interest in any enforcement action at all.

In fact, on September 14, the administration approved waivers necessary to grant export licenses for six satellites to China. One of the administration's justifications for this action was that it sends a message to China that its renewed promise to observe proliferation guidelines has yielded concrete results. Yet 4 days later, the Chinese refused to attend a U.N. Security

Council meeting on arms control. A sequence of events like this makes a mockery of our credibility in trying to maintain some semblance of control over transfers of missile technology and the dumping of launch services.

We know the Chinese are laughing at us—part of the larger laugh over George Bush's China policy, but in recent weeks the audience has gotten larger. Adding to the difficult situation the U.S. launch industry faces internationally is the fact that member nations of the Commonwealth of Independent States [CIS] are also attempting to enter the space launch market, once again with the unfair advantage of government subsidization.

On June 17, 1992, our long-standing policy of prohibiting export of United States satellites for launch from the former Soviet Union was waived as a one-time exception for the Inmarsat communications organization if it selected Proton for a planned launch. While encouraging economic reform and growth in the emerging Russian democracy is good for us and good for them, I have serious concerns about this recent action by the administration.

First, there are reports that KB Salyut—the Russian bureau responsible for the design and development of the Proton—is also the group providing technology to India in violation of its obligations under the Missile Technology Control Regime. While the State Department found the Indian rocket deal to be an MTCR violation, it has apparently attributed it to a Russian entity other than KB Salyut, despite mounting evidence that it is, in fact, the latter that is responsible.

Second, the administration's repeated willingness to ignore these violations only serves to further injure the U.S. launch industry by impeding its ability to compete internationally. The continuation of dumped launch services that undercut market pricing will seriously disadvantage our companies' ability to compete and survive. If they do not survive, then the U.S. Government will become dependent on foreign launch providers. That very dependence, along with the fact that our actions are helping to keep in business Russian missile production capacity, threaten our national security.

The administration must recognize now that an industry of great importance to our national security and economy is in grave jeopardy. Two actions are needed:

First, the United States should strictly enforce the existing agreement with China.

Second, the administration should seriously examine whether United States trade and foreign policy interests are being adequately protected by its recent failures. Not only are such actions seriously endangering the U.S. launch industry, but, by assisting the

Russian commercial launch industry, the United States is also ensuring that Russia's ballistic missile production and operations establishment will continue to function.

It is past time for the administration to reevaluate its actions and do a better job of balancing U.S. national security and economic interests with our desire to cooperate with international partners and assist developing countries. The free world will not benefit if, in the long run, U.S. national security and economic strength are undermined. I urge the administration to stop using the U.S. launch industry as a pawn and to start recognizing it for what it is—an essential U.S. industry which is vital to U.S. national security and which provides thousands of quality jobs to Americans.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,

Washington, DC, March 13, 1992.

Hon. JAMES A. BAKER III,  
Secretary, U.S. Department of State, Main State  
Department Building, Washington, DC.

DEAR MR. SECRETARY: Recently, the U.S. lifted certain sanctions against the People's Republic of China in return for China's written commitment to follow the guidelines established by the Missile Technology Control Regime (MTCR). The sanctions had essentially prohibited the export of U.S. satellites to China for launching from Chinese "Long March" rockets.

Since these sanctions have been lifted, it is extremely important that the Administration closely monitor and strictly enforce the People's Republic of China's compliance with the Memorandum of Agreement (MOA) on Commercial Launch Services.

The U.S. entered into the 1989 U.S.-China Memorandum of Agreement Regarding International Trade in Commercial Launch Services in an attempt to end China's predatory pricing practices. Unfortunately, however, China has consistently violated the MOA.

In 1989, for example, China offered to launch for one-half the then-prevailing Western price a communications satellite to be procured by the member countries of the Arab League. Last year, China made similar below-cost offers when bidding to launch two Mexican satellites. China also offered to launch certain Indonesian satellites for one-third of Western prices. China has reportedly repeated this offer to Korea.

On several occasions, Congress has expressed its concern regarding the failure of China to abide by the MOA and the failure of the U.S. to enforce the agreement. We are gravely concerned that not only is the U.S. space launch industry being significantly harmed by the lack of enforcement of the MOA, but that China is using its commercial launch service to gain foreign aerospace technology that would otherwise be unavailable to it.

Congress has clearly expressed its position on the enforcement of the Commercial Launch Services MOA. The Export Administration Act reauthorization legislation prohibits the export of U.S. satellites to China for launching unless the U.S. Trade Representative can certify that China is in full compliance with the Commercial Launch Services MOA.

We urge the Administration's strict enforcement of the Commercial Launch Serv-

ices MOA. In addition, we urge you to closely monitor and to enforce, with sanctions if necessary, China's compliance with the MTCR. Finally, we urge you to promptly implement the policy guidance contained in the pending Export Administration Act reauthorization legislation. We appreciate your consideration of this important request.

Sincerely,

#### DEDICATION OF HOOD COLLEGE'S NEW LIBRARY

Mr. SARBANES. Mr. President, On September 1, 1992, Hood College in Frederick, MD dedicated the Beneficial-Hodson Library and Information Technology Center, a superb new facility designed to meet the needs of its students well into the next century. On this bright, sunny day, Dr. James E. Billington, Librarian of Congress, gave the principal address; and I was honored to assist Hood's president, Martha E. Church, and her college marshals and trustees in conferring on him the degree of doctor of humane letters. Also honored on this splendid day was Finn M. W. Caspersen, chairman of the Beneficial-Hodson Trust, which played such a key role in funding the construction of the new library and has been a generous benefactor of higher education in Maryland for many years.

Founded in 1893, Hood College is in the forefront of America's small residential liberal arts colleges for women and has earned a well-deserved national reputation for academic excellence. It has been consistently ranked by the annual U.S. News & World Report survey as one of America's best colleges. Hood also plays a central role in the educational and economic life of the Frederick region. The graduate school offers master's degrees in afternoon and evening programs designed for those who work and live in the region. In addition, Hood contributes more than \$40 million to the area economy annually, as well as serving as a cultural center for the community, offering drama, concerts, lectures, workshops, and seminars.

Hood's 1,100 undergraduates may choose from among 31 majors in the

traditional liberal arts and sciences and other career-oriented study areas. Although most classes are offered on its 50-acre campus in Frederick, Hood also has an academic center in Montgomery County. Hood's program for adult learners, based on streamlined admissions, pre-enrollment advising, credit for life experience, and special support services, is now recognized as a national model. Classes are small—averaging 15-18 students—and are taught by outstanding faculty. Hood has one of the most advanced intern placement programs in the country and encourages students to take internships at one of many sites throughout the U.S. and abroad.

In 1975, Dr. Martha Church was selected as the first woman president of Hood, and has been chosen by her peers as one of the 100 most effective college presidents in the United States. In her years at the college, she has concentrated on improving its academic reputation by upgrading the curriculum, stressing faculty development, and instituting an honors program. She has also recognized that the future of the school demands a comprehensive plan for its physical plant, especially the building of a modern, state-of-the-art library. She and her dedicated and able board of trustees, chaired by Lois Harrison, set out to achieve this in an imaginative and determined manner. In addition to the Beneficial-Hodson Trust, the library was funded by private donations and the State of Maryland.

Located near the main entrance to the college, the library is designed in an architectural style compatible with that of the existing campus. It is a beautiful building, admirably suited to its purpose. Benjamin Forgey, the well-respected architecture critic of the Washington Post praised it by saying,

\*\*\* this is a good building in the right place. To settle in it for an afternoon's work would be a privilege. Its principal spaces are commodious and handsomely fitted out. \*\*\* places to study are inventively varied and are pushed toward the natural light of the exterior walls.

The library is designed to house 200,000 volumes and 1,000 periodicals. One of its most notable, functional, and beautiful feature is the lobby with its cherry wood trim, custom-made tables, and a call desk offering easy access to the library's extensive collections. The building is also adapted to the needs of the modern electronic information systems so important to today's library systems. Hood's new Beneficial-Hodson Library and Information Technology Center gives students, alumnae, faculty, staff, and community members access to collections all over the world and is a model for small colleges as they prepare for the 21st century. The career center, thanks to recent gifts, has obtained state-of-the-art computer equipment and software

that will give students and alumnae the same job market advantages offered at far larger colleges and universities.

Hood College is now beginning the celebration of its 100th anniversary. The centennial kickoff included the library dedication and other academic and social activities. Alumnae across the country are hosting centennial events in 60 cities, and the celebration will culminate in Frederick in September 1993.

The dedication of this library fulfills the commitment of Martha Church, Finn Caspersen, the other donors, the trustees, faculty, staff, and alumnae to provide Hood one of the best library facilities of its size in the country. Dr. Billington, in his address, spoke of the changing nature of library science and the fundamental importance of education and an informed population to maintaining democracy in a complex age. He described the importance of our Nation's libraries by saying,

You are celebrating today not just a building but an idea—a wonderful, deeply American idea—that people want and need knowledge; that the pursuit of truth is the highest form of Jefferson's pursuit of happiness \* \* \*

I congratulate all those involved in making this splendid building a reality. I would like to share with all my colleagues in the Senate Dr. Billington's eloquent address dedicating Hood College's Beneficial-Hodson Library and ask unanimous consent that it be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

REMARKS BY JAMES H. BILLINGTON, HOOD COLLEGE LIBRARY DEDICATION, SEPTEMBER 11, 1992

Thank you, President Church, Mrs. Harrison, Mr. Caspersen, and distinguished guests. It really is a pleasure and honor to think of joining the company of honorary degree recipients from this fine institution, the company populated by people as wonderful as your benefactor Mr. Caspersen and others whom I see from Washington, like the mighty Kay Shouse, down in the front row, that wonderful first lady of culture in our city who I know is a friend of this college as well.

It is a further honor to be here today with Senator Sarbanes who is surely one of the most faithfully supportive and deeply appreciative friends of libraries and of learning in the Congress. He is, moreover, one of the most skilled and honorable practitioners of that most difficult and democratic of all the verbal arts—genuine dialogue on matters of real substance. He is a man of strong views and deep convictions who is one of the fairest and most ecumenically probing lawmakers in congressional hearings and in questioning foreign leaders that I have ever heard or appeared before. It's always a challenging experience to appear before him in a hearing. The enquiring scholarly spirit surely has rarely had a better friend or more skilled practitioner in the public arena than your senator. And it is a pleasure to be in Frederick, the home of one of the Library of Congress' most essential and most admired figures, my strong right arm, Janet Chase,

and with many alumnae of this wonderful institution such as Sandra Newing, who also happens to be the wife of our director of communications at the Library.

So, it is, in all kinds of respects, a pleasure. But of course, we are here today to not so much to talk about individuals as to celebrate this lively centennial of Hood College, the dedication of its new library and information technology center, an event that lifts the spirits of anyone concerned about libraries, about the promise of quality of American education, about the health of our knowledge-based democracy and, indeed, about hope for our economic productivity in a harshly competitive new world.

Hood's commitment-supported by the State of Maryland, the Beneficial Hodson Trust, and other private donors—to the centrality of a library to learning will hearten educators and librarians far beyond the boundaries of this lovely country in this state. Because you are celebrating here today not just a building but an idea—a wonderful, deeply American idea—that people want and need knowledge; that the pursuit of truth is the highest form of Jefferson's pursuit of happiness; and that wherever the old presume to teach the young, it is important to have a place that is central to the community in which the vast world of information out there intersects with the defined human community of learning right here. That special, even magical, kind of a place where those worlds intersect is what you have built and what we are celebrating here today.

I want to say something today about both the world of information out there and the community of learning here. I am pleased that the two main contributions the Library of Congress will make to the celebrations later this afternoon will illustrate each of these two aspects of the library of tomorrow which you have built and are dedicating today.

The Library of Congress' American Memory project, which will be demonstrated here this afternoon, is today's vehicle for electronically sharing with the nation the primary documents of America's many yesterday's in a form that everyone everywhere will be able to use tomorrow. LC's John Cole will participate in your seminars this afternoon. He is the director of one the Library's smallest yet most important units, the Center for the Book, a human-scale, low-tech unit in which we celebrate and perpetuate the culture of the book in collaboration with 100 other national organizations and 26 state centers for the book throughout the country.

Now that big world of information out there is frightening, sometimes overwhelming—it is essentially now a rapidly growing electronic network of increasingly instantaneously available raw material for the inquiring mind. Much is mere data—continuously changing, becoming outmoded as soon as it is frozen in hard copy. Some of it has undergone the minimal ordering by the human mind which makes data into information that can be printed out on sheets of paper. Some of it has been further processed and refined beyond that by the critical human intellect into knowledge that can be packaged into coherent units—some of it even into that old-fashioned unit we call a book. But, in principle, the emerging electronic world of information exists no place in particular and is becoming available everywhere in general.

That is what makes the community of learning that you have here so terribly important. It is only in human communities

that all of this can be reduced into manageable human dimensions and converted into creative human uses. Humanism and democracy were created by the culture of the book. Humanism and democracy, to be sustainable on a continental scale and to be competitive in the global market place, must have the dynamism that comes from constant renewal through an ever-expanding base of knowledge. Humanism and democracy, if they are to flourish and perhaps even survive in a multicultural context, must have both some shared common values and, at the same time a tolerance for variety and difference. And that is precisely what the openly accessible American library represents. My predecessor Archibald MacLeish described librarians as the sentinels of liberty, and we might describe the libraries that librarians tend to as temples of pluralism, if you like. Because in a library and variety of opinions sit next to each other on shelves—as you add new books, you don't burn the old ones, just as when you add new immigrants, you don't destroy the values and the ideals of the old ones. America is a country which adds without subtracting, and that's what a library does. And yet it shares the certain common values of all those who enter in and partake of its life. The value of the pursuit of truth keeps us from the pursuit of one another and is the only kind of pursuit, in the arena of the mind and spirit, where the horizons can remain infinite for our cherished ideal of freedom in a time of increasing physical constraints.

The ultimate human payoff of all this accumulated information and knowledge especially occurs in and around libraries where the human qualities of wisdom and creativity are fostered and promoted. Remember Santayana's great quote, "It is not wisdom to be only wise, but it is wisdom to believe the heart, act well your part, there all the honor lies. \* \* \*". Wisdom is a quality, a cohering human quality, and has practical consequences. It is the practical wisdom of judgment, knowledge that is convertible into a definable human uses in a wise and humane way. And this is a quality that develops in people who grow up with books around them and who cultivate the active mind and expand their range of knowledge and perception. And then there is creativity, that special gift that comes to a few to make the leaps of perception imagination that bring things together rather than just take them apart, that result in the creative leaps forward that make new possibilities for the human adventure.

What we see here today, it seems to me, is an excellent model for small colleges entering the Age of Information across the country—a place of human scale for turning information and knowledge into wisdom and creativity for real people in a concrete place. Students can use the new technology to find books in a remarkably inviting, reader-friendly building. Faculty and students can hook up to the Colorado Alliance of Research Libraries, including the University of Maryland system, for journal indexes and bibliographic data. They can order materials from other libraries. The Hood library will get involved in computer imaging technology. As time goes on, it will be connected to more and more sources of information, including perhaps, even the unique collections of the Library of Congress.

The Hood library is more than a high-tech model for small college libraries. In its services to the local community, in its hospitality to diversity, in its practical yet progressive approach to education, Hood College

is a community of learning and its library is a kind of base camp for the broader horizons of learning that will have to come with the 21st Century. As distances shrink and human abrasions tend to heighten in the increasingly overpopulated, interconnected world as we are already seeing in surprising and disturbing ways in places like Yugoslavia, libraries and educators, to keep the indispensable democratic values of their enterprise going, will have to depend in the future on more cooperation, more networking, more joint public-private ventures, more openness to cultural diversity, more ingenious uses of technology to organize, share, preserve, and disseminate knowledge and information.

It will have to involve more of us in the enterprise; not just professional scholars are going to have to be involved in more ways with the common unifying and ennobling task to which libraries, like colleges, are dedicated: the pursuit of truth, the unifying adventure in which all benefit from the discoveries of each in which there is not really competition but mutual benefit from one another's discoveries.

What are we doing at the Library of Congress as we near our 200th birthday, with almost 100 million items in our collections? Much of what we are doing, alone and with others, should benefit Hood's library and the entire library and educational community in the 21st Century.

Some efforts are simply new variations on old themes. We are developing new technology to do what we have done since 1902—producing and distributing most of the book cataloging for the nation's libraries, a very practical service that saves America's libraries about \$370 million a year—considerably more than the Library of Congress' annual appropriation. Once we printed and distributed the paper catalog cards; for 20 years now we have been producing and distributing the same kind of information on electronic tapes and CD-ROM disks. Now we are working on ways to make our great cumulative bibliographic data base available electronically on-line to libraries and other institutions—possibly via the National Research and Education Network, which is now being developed with Federal support as a successor to Internet, the nation's "electronic highway" of the future.

None of this is uncomplicated. But new technology offers the Library of Congress and the country an unprecedented opportunity to make available to Americans everywhere the unique collections of its national library—accumulated, of course, through the copyright deposit, the official record of the American creative spirit. An unprecedented opportunity to make these collections available everywhere, not just in Washington, going beyond making simple references to the books, to the text and the content themselves. Moving beyond people who live in the nation's capital or can afford to visit it to scholars, teachers, public officials, industry researchers, students, and other citizens with any kind of curiosity in all the 50 states and eventually the whole world.

We are a uniquely wide window to the world, since well over two-thirds of our books and materials are in foreign languages. The Library of Congress is almost certainly the largest Spanish and Arabic as well as English-language library in the world and has the largest collections of Slavic, Germanic, Chinese, Japanese, and Korean materials outside of those countries themselves. All this constitutes an international resource for scientists, economists, policy-

makers, and others in our own country, and it should be made widely available.

Right now, we have a number of optical disk imaging projects at various stages of development. In addition to books and periodicals, the Library's collections encompass many formats: maps, motion pictures, prints and photographs, recorded sound, and computer software. Once these materials are scanned, they will, like printed materials, become part of an evolving, national, digital library.

One of our leading initial projects is American Memory, which digitizes selected collections of the Library's vast holdings of American historical and cultural publications and artifacts—Mathew Brady's famous photographs of the Civil War, turn-of-the-century movies of New York City, sound recordings of President Warren Harding and General John J. Pershing, scores of documents from the Founding Fathers' Constitutional Convention of 1789, hundreds of African-American political pamphlets published after the Civil War, thousands of interviews with ordinary Americans conducted during the Great Depression. Now being tested at 44 colleges, schools, and libraries throughout the country, this program has generated an enthusiastic response. You will see a demonstration here today. We continue to search for more ways to make unique and rare Library of Congress materials which have only been available to the public, using such new technologies.

We recently used the Internet, as well as commercial services, to disseminate an electronic version of a major Library of Congress exhibition of documents from the formerly highly secret archives of the former Soviet Union. Our plans include having electronic versions in future exhibitions as part of our outreach to the library and scholarly communities.

The Library of Congress has been working with the private as well as public sector. In December 1991, we established a privately-supported National Demonstration Laboratory at the Library of Congress that is open to the public and provides access to all the newest technologies in the field of education.

We have recently undertaken an experiment with a private corporation involving the digitization and high-speed transmission of multimedia materials from the Library's collections that will connect us during the next year via fiber optic networks, to approximately ten sites around the country—primarily state, municipal, and university libraries. During three two-week periods, we will transmit high-resolution images, text, sound, and full-motion video to these sites.

I've almost completed this little inventory, in case you were wondering if I'm conducting a Washington filibuster here, but since you pay your taxes, you're entitled to some report on what we're doing with it all.

The Library's science and technology information initiative is beginning network-based activities. An electronic bulletin board is being established on Internet to support a possible National Engineering Information Service as a joint project of the Library of Congress and the Association of Research Libraries. We are participating in a NASA-sponsored project to put the full contents of five recent years of three major astronomical journals on Internet for use by astronomers, providing document delivery through our existing Photoduplication Service. And we are considering putting an updated version of our existing National Referral Center Masterfile on Internet as the prototype of an expanded network-based Automated Referral Center system.

The overall goal of this acronymic avalanche that I just confronted you with is to make the Library's resources more useful, more accessible, more productive—to the country as a whole and to individuals with special needs. Our traditional free core services to the public and to the nation's libraries—cataloging, general reference, exhibits, inter-library loan—will continue and expand as we become more efficient through new technology. We have also asked Congress for authority to charge cost-recovery fees to lawyers, publishers, business enterprises, and others for "customized" services which go beyond what the taxpayer can or should support. These "customized" services include translations, rapid document retrieval and transmission, certain database searches, special research, and, in some cases, electronic access to the complex collections. The idea, again, is to provide the "extra" service not provided by the private sector, but to provide it without adding cost to the taxpayer.

We have lots of company in this endeavor; more than 400 libraries in America, without much attention from the library press or anyone else since nobody ever writes much about what libraries do, were offering such fee-based services last year, including the New York Public Library and several state university libraries. Such service makes sense: not everyone in America needs to have 72-hour translations and copies of the latest Japanese technical papers on space exploration from the Library of Congress. But the space researcher in Houston who does need such fast customized service ought to be able to get it at cost—in the national interest. Otherwise, some of our unique assets go unused.

But our main goal overall is to deliver our unique collections by electronic means to libraries in schools, colleges, cities, and towns to reinforce the local communities of learning where wisdom and creativity are generated—not to further the individual home entertainment center. We want to be a benevolent wholesaler to enrich and reinforce local libraries. Because local libraries like this in real communities with solid constituencies are the most efficient retailers of information to students, teachers, and the public. They are open to all Americans. And libraries will be the best venues for the kinds of materials that, in the next twenty years, probably will be most useful via electronic dissemination: technical material of all kinds, from legal cases to census statistics; scholarly journals from around the world; manuscripts.

We see all these materials from the Library of Congress, organized and cataloged in various ways for quick search and retrieval, as enormously useful to librarians at schools and colleges in particular. When the computer center is in the library, as it should be and as it is here at Hood, it is close to books. This helps in the all-important business of driving people back into books for further elaboration, further answers, further creative speculations on the things that are raised by electronic means but cannot really be answered by this constant overflow of electronic information. The computer center is close to the world of books in which the active mind is the central driving force rather than the passive emotions which is what television essentially feeds.

The materials, especially visual materials, available on the computer screen, should act as a spur to the student's curiosity, a spur to look further and more broadly, to conduct a personal voyage of discovery in books. That is our goal in American Memory, and as we

digitize more of our collections, we hope to provide both teachers and librarians with well-organized materials, available on-line, that can both buttress local libraries and serve as a stimulus to the minds of the Americans who use them.

So we see the library of the 21st Century as growing out of what we see here today at Hood College—linked very more directly by technology to the resources of other libraries, including the Library of Congress, able to supply a concrete local community with access to a whole world of information and knowledge and, at the same time, be a source of inspiration for lifelong learning through reading and discussion of what one has read.

One of our greatest problems in this country is not only illiteracy but what my predecessor called "aliteracy," that is, people who can read but don't, whose minds have gone brain dead, who were perhaps force fed in college with too much reading which they couldn't digest and who made a firm, yet unstated, resolution at graduation never to read another book. One of the most alarming statistics is the decline of reading among retired people. Those are the same people who once said, "I have no time to read now but when I retire, I will."

At Hood, as elsewhere, books will remain, even as the new technology advances. They are simply too user-friendly to disappear. And the new technology makes the librarian more important, not less. In an age of increased access to a growing flood of data and ocean of information, the librarian will serve her or his constituents as a knowledge navigator. She must answer the old questions: How? Where? Which? What? Why? Who? (How do I find this? Where do I go for that? Which is a really good book? What is useful? Why is this important?) The librarian will have to know more because there will be more possible connections, more possible answers and hopefully, if democracy is to survive, and active citizenry with more people asking more questions.

So my belief is that, in the 21st Century, the library in the school, in the college, in the government agency, in the private research sector, in the town and the city has enormous potential for helping the United States move forward.

Information technology, properly organized and supported, can greatly reduce the wide disparities among local schools and colleges across America in access to knowledge even as, on a different level, it boosts productivity and creativity among widely dispersed scientists and scholars. No less important, the new technology can make accessible through libraries and smart librarians a vast range of up-to-date information to local businessmen, public officials, and ordinary citizens far from the great research universities or the think-tanks of Washington. Much of this information will be free; some will require payment to recover only the costs of distribution; some will require full cost-recovery, including royalties paid to publishers and authors. Some specialized frequent users will bypass the local library entirely, going instead to data banks or NREN.

But the library, properly staffed and equipped, and that is the great glory of what you have done here at Hood College, will remain central to the Information Age, no matter how glitzy the new technology becomes. The technology is a means to an end, only part of the transmission that leads data into information into knowledge flowering into wisdom and creativity, the twin peaks that lie at the top. Wisdom is an extension of common sense, expended by experience,

deepened by reflection. Creativity is that mysterious process of breakthrough that brings inspiration out of perspiration. Both wisdom and creativity are most likely to happen to people who do hard work in and around libraries.

So it is especially fitting that, along with its high-tech local area network of computers and its eMail, Hood placed the new library at the center of its campus, and its computer center in the library, not parked off somewhere else, far from the books. President Church, the trustees, the donors, and all the people who made this day possible knew that the library, both symbolically and as a practical matter, remains central to the operation of this fine college. Indeed, in its commitment to the library, Hood reminds us of the great universities that developed in the late 18th and 19th Centuries, first in Germany, that really transformed the use of knowledge in the modern world by building around the library and laboratory rather than the lecture hall. The idea was to introduce the student directly to the sources of knowledge, to bring him into contact with the books, going beyond passively taking lecture notes to actively pursuing study and exploration. This spread to the United States as the University of Berlin became the model for many of the American state universities that came into being under the 1862 Morrill Act. Indeed, these state universities were to develop some of the strongest library collections in the land, even as they opened up higher education to more people than ever before in the world's history.

So, in effect, Hood, like the Library of Congress, is betting on the positive evolution of electronic information technology. During the past three decades, in its powerful popular video manifestations, this technology seems to have worked against reading, against learning, against active curiosity in the young; at the very least, television's daily clamor took up more hours on average than we spent in the classroom or in any other activity, except possibly, sleep. Television was the family's babysitter but the teacher's rival and the librarian's enemy, one more agent of mediocrity, relentless stirring and soothing the emotions of an increasingly passive viewer. A pessimist might say, today, surveying the scene, that this seductive technology has contributed heavily to the not-so-benign neglect of the cultural institutions left to us with so much hope by our forbears. Market research indicates that despite the vast costly expansion of higher education, sizeable numbers of nominally well-educated Americans today have deserted the possibilities of the book. Too often our public officials, our prominent educators, our media moguls have sought not to counter this shift but to accommodate themselves to it. Such abdication has been no service to either the citizenry or to the country's future. But I do see changes in the air, particularly on this beautiful day and in this creative place. It reinforces my basic optimism that the new technology, properly organized and supported, can bring more knowledge to more Americans in more places than man ever dreamed before \* \* \* advancing the health of our democracy and our competitive efforts in science, business, and the professions. Properly used to re-enforce libraries and schools, with the guidance of teachers and librarians, it can draw the new generation to exciting prospects for learning and exploration through reading that can compete with the flashes of sex, violence, and sheer noise of the emerging MTV

culture. And it can greatly enrich the already popular concept of lifetime learning among adults.

So we praise this library, we honor the people working in and around it. They are not just gatekeepers but they are something else. This came to me when I attended a conference in the Midwest not long ago and was using the term "gatekeeper" to describe the librarians in small, rural communities of the Great Plains areas in Central Nebraska. And afterwards somebody got up in the back of the room. He was one of the Native Americans on one of the Indian reservations and he said, "You know, these librarians are not just gatekeepers, they are heirs to a tradition we had long before the settlers arrived where someone old in the community was the repository for an oral culture and he kept it alive and transmitted it to the young. We did not call them gatekeepers. We called them 'dreamkeepers.'" So I think that is to a large extent what the librarians, those who are the custodians of the legacies of the past, stored and preserved and transmitted to the next generation, will be.

We must keep alive then the dream of understanding, the pursuit of truth, the dream of America that whatever the problems of today, tomorrow can still be better than yesterday even if we don't always succeed or don't always answer the question. One of my favorite quotes was a quote out of the failure of one of the most ambitious attempts at international understanding ever undertaken—the great Jesuit mission to China at the dawn of the modern era. And when the Jesuits left China in the early 18th Century after the most scholarly and most nearly successful effort in history to build a bridge between the most ancient of Eastern cultures and the Christian West, they left behind as their last legacy to that effort a haunting epitaph, "Abi viator congratulari mor tuis condoli vives ora pro omnibu mirali tace." "Go now voyager, move on, congratulate the dead, console the living, pray for everyone, wonder and be silent." Wonder and silence are easier for readers than for TV viewers, for adventurers than spectators, dreamkeepers than for imagemakers.

So, may the adventure of learning and discovery go on from this base camp you've created here for the millennium to come. May knowledge slowly ripen into wisdom, secure in the knowledge that a better life will come in America, not just from more data and a modem, but from a better understanding of one another that comes from books. May your appreciation grow of the values of the book, here in this wonderful place, which favors active minds over spectator passivity, putting things together rather than just taking them apart. For whatever the confusion of our own minds and the profusion of our information in that big world out there, things can still come together in a book—just as the left and right halves of the brain come together in one human mind, and the hemispheres—East and West, North and South—in a single planet.

#### DELUGE OF TEXTILE IMPORTS

Mr. HELMS. Mr. President, on May 6, I paid my sincere respects to the Honorable Carol Hallett, U.S. Commissioner of Customs, a remarkable lady who had earlier promised to me that she would investigate the deluge of textile imports flowing into the United States from Communist China.

We had discussed in detail the widely held suspicion that the Chinese were

willfully violating the tariff and quota laws that forbid such trade practices.

Commissioner Hallett came to my office last year to discuss my serious concern about the unlawful flood of textiles coming into the United States from Communist China. I recall her concluding remark: "Senator, I give you my word. We are going to get to the bottom of this."

Mr. President, on May 6, she called to report that indictments for fraud were being filed against Chinese companies and their American subsidiaries. At the time, I speculated that the Chinese Government was an apparently willing and knowing accomplice to substantial fraudulent activity, to which various lobbyists and others said, "Oh that couldn't be true; the Chinese Government couldn't be involved in such fraud."

Well, Mr. President, today I received another call, informing me that charges were being filed this afternoon in Federal Court in New York against the Chinese Government agency.

The U.S. attorney explained today that a major Chinese governmental entity was indicted for fraud. The Chinese entity in question is called China National Textile Import and Export Corp., which is a quasi governmental agency that is in charge of all imports and exports of textile and apparel goods.

These latest indictments strongly indicate that the Chinese Government is in fact involved in a scheme to evade United States laws and to avoid paying millions of dollars in duties on textiles and clothing imported into the United States.

Mr. President, this reinforces my long-held conclusion that the Communist Chinese will lie and cheat and use every underhanded trick in the book to defraud the United States. But this time, they got caught.

Mr. President, the Red Chinese activity exposed today defrauded the U.S. Government of tens of millions of dollars. More importantly, it destroyed thousands of American jobs. Industry experts estimate that as many as 500,000 United States jobs may have been lost.

The Red Chinese double-dealing operated in two parts: One part of the operation involved in the misclassification of textile imports so as to evade United States quota laws, thereby allowing more Chinese textile and apparel imports to flood our market.

The second part of the scheme involves a deliberate understanding of the value of the textiles, again defrauding the United States of tens of millions of dollars. This is no doubt just the tip of the iceberg.

Mr. President, again I commend the Customs Service and Commissioner Hallett. As I stated at the outset, I have been working with her for quite awhile. It is certainly encouraging that

the Customs Service has pursued Chinese perpetrators so relentlessly.

#### YOUTH DEVELOPMENT PROGRAM

Mr. HARKIN. Mr. President, On September 20, Jane Quinn, the project director of the Carnegie Council on Adolescent Development, delivered the key-note address at the University of Northern Iowa's National Youth Leadership Symposium. In her remarks she outlined the findings of a 2 year study conducted by the Carnegie Council on Adolescent Development and the Carnegie Task Force on Youth Development and Community Programs.

In the course of this study, which was an effort to compile data on America's youth organizations, the researchers at Carnegie found that although there are many organizations providing positive experiences for today's young people, there are several problem areas that need to be addressed. In particular, the study points to a lack of sufficient and stable financial support; a marked disparity in both number and quality of programs between low and higher income neighborhoods; the failure of many programs to gauge the true composition of the population they serve, or provide appropriate assistance and activities that will aid them in retaining the interest of their members; the failure of many organizations to effectively compete with gangs; and the lack of adequate financial and statistical accounting which would help membership organizations measure their effectiveness. The study, as Ms. Quinn indicated, however, addresses these deficiencies, and makes sound recommendations on the way to overcome such problems.

It has become increasingly apparent in recent years, as Ms. Quinn pointed out in her speech to the Symposium, that it is time to move beyond rhetoric. As our children more and more become grim statistics instead of productive adults, we must reach further for answers. The Carnegie Council's findings, and its recommendations for improving our Nation's youth organizations, are an important step.

Ms. Quinn, and all of those at the Carnegie Council on Adolescent Development who contributed to this study, should be congratulated on their fine work. I therefore ask, Mr. President, that the text of Ms. Quinn's speech be inserted in the RECORD.

There being no objection, the lecture was ordered to be printed in the RECORD, as follows:

#### YOUTH DEVELOPMENT AND COMMUNITY PROGRAMS: STRATEGIES FOR APPLYING WHAT WE KNOW

(By Jane Quinn, Carnegie Council on Adolescent Development)

##### I. INTRODUCTION

It is really a great pleasure to have this opportunity to talk with you tonight. For starters, this is the first time that I have

been asked to give a NAMED address—and so I thank Mr. McElroy as well as our more immediate hosts at the University of Northern Iowa's Youth and Human Service Administration Program. Second, this annual Youth Leadership Symposium—and in fact all of the work of the Institute for Youth Leaders—have a critical role to play in a society that tends to undervalue both *youth* and *leadership*. The prestigious National Commission on Children has urged our society to move "beyond rhetoric"—beyond the rhetoric that says children and youth are our most valuable resource, and then allows more than 20 percent of them to live in poverty; beyond the rhetoric that says children and youth are a precious investment, and then undercapitalizes all of its social institutions that are supposed to develop that investment.

Given these realities that face our nation on the eve of the 21st century, it is a special pleasure and privilege to be among people who are personally and professionally willing to invest in children and youth—who moved beyond rhetoric by *living* the commitment to young people on a daily basis.

The theme of this symposium is "Building Practice on Knowledge," and I have been asked to talk with you this evening about one aspect of this challenge—Youth Development and Community Programs: Strategies for Applying What We Know. In my presentation, I will be reporting to you—for the first time in a public forum—the findings of a two-year national study conducted by the Carnegie Council on Adolescent Development and its Task Force on Youth Development and Community Programs. This study has attempted to bring together information about contemporary American youth organizations—broadly defined—with a view toward strengthening community-based programs and services for young people. A particular focus of our work, because it is a particular focus of the Carnegie Council on Adolescent Development, has been young adolescents—youth people between the ages of roughly 10 and 15. But much of what we have learned—and of what I will be discussing tonight—applies to both younger and older children and youth. The Carnegie Council study, to be published in early December, is entitled *A Matter of Time: Risk and Opportunity in the Non-School Hours*. The title is intended to call attention to the fact that some 40 percent of the hours available to our nation's youth are discretionary, meaning that they are not already committed to such activities as attending school, doing homework, assisting with household errands and chores, or working for pay.

##### II. THE STUDY ITSELF

One of the most amazing parts of directing a study that is sponsored by a private foundation is that you don't have to write a grants proposal. Having spent the previous ten years raising money for youth organization programs, I greeted this news with some enthusiasm, as you can imagine. But I quickly found out that designing such a study is very much like writing a proposal—you have to define the scope of the problem you are going to address, determine the possible alternative approaches, and select the ones that seem most reasonable. I make this comparison between fundraising and action research by way of telling you there were many decisions facing Carnegie staff and our Task Force on Youth Development and Community Programs as we started our work together.

The first major decision was how we were going to define the universe of organizations

to be examined. We initially determined that we wanted to focus on youth development and primary prevention, rather than on remediation and treatment of problems; second, we decided to take as inclusive an approach as possible, and that meant taking a look at local as well as national groups, religious as well as secular, public as well as private institutions. After some deliberation, we decided to include the following five sectors of community programs for young adolescents:

(1) Private, nonprofit, national organizations that serve youth (including organizations that are primarily or exclusively youth-serving in their focus—such as Boy Scouts, Camp Fire, Boys and Girls Clubs—as well as multi-service organizations, such as the YMCA and YWCA, that offer substantial service to youth);

(2) Grassroots youth-development organizations not affiliated with any national structure;

(3) Religious youth organizations;

(4) Youth programs run by privately sponsored adult service clubs, sports organizations, senior citizens groups, and museums; and

(5) Youth programs run by selected public sector institutions, including libraries and parks and recreation departments.

Since most of you in this audience are youth work professionals in one capacity or another, you have some idea of the immensity of this undertaking. According to the National Center for Charitable Statistics, an arm of Independent Sector, there are 17,000 youth development organizations in America, and that does not include many of the religious groups (which are counted in a different category for their purposes), sports programs, municipal services, or the youth programs sponsored by adult service clubs, senior citizens groups or museums. How then were we going to wrap our arms—or, more accurately, our brains—around this huge universe?

We decided to follow the dictate of Jane Addams, who advised social workers to keep "one foot in the library and one foot in the street." We knew that a literature search would quite naturally be a part of our study; but we also knew that, by itself, a literature review would constitute an inadequate data-gathering mechanism in a field like youth development, where knowledge is based as much on experience as on research. So we attempted to combine the best of both worlds—the practice world and the research world—by employing nine different methods in our study design;

(1) We started by convening the 27-member Task Force mentioned earlier, to guide and oversee the project. This group is composed of national policymakers, researchers, youth organization executives, local and national funders, and other civic leaders. At least one member of the Task Force, Judith Erickson, is here tonight. The Task Force met six times during the course of the research phase, participated in research interviews and planning subcommittees, and in many rounds of reviews of its final report;

(2) Next, we conducted focus groups with young people in the age range that was of interest to us (young adolescents). In all, we conducted 16 groups that were then separated by race, gender, and age. We talked with these young people about how they spend their non-school time, about activity preferences during the non-school hours, about the characteristics they do and don't like in adult leaders, and about how they would design an ideal youth center.

(3) We did conduct an extensive literature review, combing through research and practice literature, both published and unpublished. This literature has been described as having two primary characteristics—"fugitive" and "untamed." The fugitive part is that much of the best, most useful literature is unpublished and difficult to obtain; the untamed part is that relevant information exists in many different social science disciplines and that this information remains largely unsynthesized. As we conducted our review, we were interested in building both the theoretical and empirical cases that youth development programs can and do make a difference in the lives of young people.

(4) We commissioned 13 papers, researched and written by specialists in various aspects of youth development, on topics ranging from adolescent time use to the funding of American youth organizations to cross-national perspectives on youth development.

(5) Members of the Task Force and I interviewed scores of youth leaders, including the board presidents and executive directors of the 20 major national youth organizations. Other key informants were local youth work practitioners—including direct service workers, agency administrators, and volunteers.

(6) A major challenge in this study was how to learn anything coherent and systematic about the hundreds of independent, grassroots youth development organizations that exist in cities and towns across America. We decided to conduct a national survey of these groups, using the Independent Sector data base as a means to identify them.

(7) We consulted with other national experts, bringing some of them in to meet with the Task Force. For example, Francis Ianni met with the Task Force early in its deliberations and reported on his 13-year investigation of adolescent development in ten American communities—research that is reported in his wonderful book, *The Search for Structure*. Lisle Carter of United Way of America made a presentation on that organization's new 20-year initiative directed toward children-at-risk, called the Mobilization for America's Children.

(8) Staff and commissioned paper authors visited programs and communities, in an effort to learn at the ground level about exemplary program practices and about models for comprehensive community-wide planning of youth services.

(9) Finally, we held two consultations—one-day meetings with practitioners and researchers—to discuss the urgent and important issues of program evaluation and professional development of youth workers. In both cases, we were seeking to establish a consensus about the current state of the art and about recommendations for improving those states. Both of these consultations have resulted in written reports that are available free from the Carnegie Council.

### III. FINDINGS FROM THE CARNEGIE STUDY

So that is what we did. Now let me tell you what we learned. In synthesizing the results of its various analyses of the universe of America's youth organizations, the Task Force saw 10 clear themes emerge:

Many strengths characterize the existing array of community-based youth development programs. These strengths include tradition, durability, commitment, credibility, diversity, widespread support, and an extensive current reach;

Yet many youth programs are not responding as fully as they might to the needs and wants of young adolescents, and are thus failing to attract young people after the age

of 12 or 13—even to such potentially attractive offerings as sports;

In particular, youth programs are failing to reach out to young people in low-income environments, to solicit their views, to listen to them, and to act on their suggestions for appealing, accessible activities;

Programs do not adequately address the needs of young adolescents, especially those in low-income neighborhoods, for earned income and initial paid employment experience;

In general, programs do not adequately acknowledge the role of young gangs in addressing young adolescents' needs (for safety, status, meaningful roles, a sense of belonging, a sense of competence) and they do not actively compete with gangs for youth membership;

Intensity levels of many programs are far below what it takes to be effective in helping young adolescents to mature in a healthy manner;

Financial support for youth programs is grossly inadequate to current needs and is, in the eyes of many fund-raising experts, likely to become even worse. As libraries, parks and recreation departments, and other public sector institutions increasingly compete for private dollars, and as both public and private agencies cope with deepening government cutbacks, support for youth-oriented programs will doubtless become more difficult to generate;

Recruiting, training, and retaining mature, dedicated, top-quality adult leaders—both paid and volunteer—is a constant challenge to youth organizations;

Many organizations that offer programs for youth know little about the characteristics of the youth they serve, and therefore find it difficult to plan effective outreach strategies; and

Few organizations conduct regular and systematic evaluations of their program.

### IV. RECOMMENDATIONS FOR CHANGE—APPLYING WHAT WE KNOW

Let me take each of these themes, as we do in our report, and make recommendations for change, being careful to apply what we know from research and experience to future practice.

#### *Theme #1: Building on current strengths*

As we examine the vast universe of American youth organizations, let us acknowledge and celebrate the fact that the glass is definitely at least half full. The extensive and impressive reach of these services is documented in several places—probably nowhere better than the 1988 National Education Longitudinal Study, which found 71 percent of their nationally-representative sample of eighth graders to be involved in at least one type of organized, out-of-school activity. I would like to see this number approach 100 percent in future national surveys—because I believe that all young people can benefit from participation in well-planned youth development programs. It might interest you to learn that some other developed countries do articulate this type of universal participation or "attachment" as a national goal. As we look to the future, let's make sure that we build on the other current strengths—a broad base of committed adult leadership, both paid and unpaid; widespread financial and other support, both private and public; and permanence and durability that allow for meaningful strategic planning.

#### *Theme #2: Responding to the needs and wants of young people*

Most current youth development programs are planned, led, run, and controlled by

adults. This strategy works much better with five-year-olds than with fifteen-year-olds, who want and need a bigger piece of the action. Regardless of which sub-sector in the broad universe we were examining at any particular point in our study, we found that participation tends to drop off at about age 12. This is true among sports organizations and religious youth groups, as well as among the well-known national youth agencies. Yet young people—in our own focus groups and other surveys—consistently report that they want places to go, things to do, people to care about them. Our research found a clear developmental mismatch between the practices of many youth organizations and the needs of young adolescents.

Let me provide a few examples. While teenagers frequently voice their need for help in understanding and exploring such topics as human sexuality and violence prevention, many youth organizations avoid or water down discussions on these and other issues that might be deemed as controversial by adult leaders, donors, or board members. While adolescents need to develop an array of complex life skills, some programs are of insufficient frequency and duration to allow for the acquisition of such skills through practice and repetition, while other programs rely on didactic teaching methods that also do not allow for needed practice. And while adolescents want to be and feel useful, many youth agencies provide insufficient opportunities for young people to participate in organizational decisionmaking, to determine the goals and methods of programs, and to make meaningful contributions throughout the organization.

The voluntary nature of youth agencies suggests that young people should have a great deal of autonomy in structuring and selecting activities in which they will participate. And when they are not granted such autonomy, many youth people "vote with their feet."

*Theme #3: Reaching out to young people in low-income areas*

The positive news cited earlier in the data from the 1988 National Education Longitudinal Study was coupled with some rather definitive and disheartening information about the disparity in access to out-of-school programs on the basis of income. While only 17 percent of eighth graders from upper-income families reported no current participation in organized out-of-school activities, fully 40 percent of low-income youth reported no such involvement. Because parents and adolescents in low-income neighborhoods express a desire for increased services, the likely explanation for differences in program participation levels is access (including cost) and availability. Confirmation of this explanation can be found in other studies. For example, a recent national child care survey reported sharp differences by socioeconomic levels in school-age children's enrollment in structured after-school activities. Parents from higher-income group relied on lessons, clubs, sports, and similar enrichment activities to supplement other child care arrangements to a much greater extent than did lower-income parents. And a comparison of services for 11- to 14-year-old adolescents in the inner city and a nearby suburb of Chicago showed wide differences in available resources for young people. The suburb had nearly three times more non-religious organizations and three times more activities per 1,000 youth, and it offered a range of programs that include arts activities, classes, clubs, or groups, sports, and social or civic events. Inner-city neighborhood pro-

grams focussed more on personal support and tutoring. Increasing the access of young people living in low-income areas to supportive community programs will require individual and collective action at both the local and national levels. Community programs for youth should view themselves as actors in a network of services, and these networks should engage in systematic planning and coordinated decision-making. Youth and community needs, rather than organizational concerns, should remain at the center of these efforts from their inception. An expanded and realigned set of services should build on the strengths of current programs and organizations; but all actors in the network should anticipate that ongoing adaptation and change will be required.

*Theme #4: Addressing economic and employment issues*

Young adolescents consistently name economic and employment issues as a priority for them, yet few organizations respond overtly to these concerns. Approximately 20 percent of 14- and 15-year-olds work for pay outside the home, often in jobs that are routine, boring, and devoid of positive interaction with adults. Some youth organizations offer young people a "career path" that includes voluntary service within the organization or club to learn and practice basic skills, with movement to junior counselor or leadership roles (usually with a stipend of some sort), and then progressing toward paid employment on a part-time basis. Similarly, some of the libraries participating in the San Francisco Bay Area Youth-At-Risk Program responded to a youth needs assessment by providing paid employment for young people, particularly in low-income neighborhoods. In addition to offering paid employment when possible, youth organizations should capitalize on the interest of young people in the world of work by providing career awareness, pre-employment training, jobs skills training, and internship programs on an ongoing basis.

*Theme #5: Responding pro-actively to competition from youth gangs*

American society has witnessed several waves of youth gangs throughout its history, and much is known about their formation, organization, and functioning. Recent research on gang involvement indicates that early adolescence represents the critical decision period for initial gang activity, with most involvement beginning between ages 13 and 16, and some as early as age 8. Youth gangs address many of young adolescents' developmental needs, including safety, status, meaningful roles, income, and a sense of competence and belonging. One researcher, James Diego Vigil, has correlated the rise of youth gangs in Los Angeles over the past 15 years with the dismantling of social programs available to youth. He notes, for example, that the city of Los Angeles sponsored 130 inner-city Teen Posts in the late 1970's and that only five such centers remain in the 1990's. Youth development programs can—and in some cases do—actively compete with gangs for the time, attention, energy, and commitment of young people. But in order to do so, these pro-social programs must offer meaningful alternatives to gang involvement. One promising initiative, sponsored by Youth Development, Inc., in Albuquerque, New Mexico is the Gang Prevention and Intervention Program. This effort is not directed toward disbanding youth gangs, but toward preventing initial gang involvement among younger teens and providing constructive, non-violent activities for current

gang members. A structured seven-week program for gang members includes involving them in community service, teaching non-violent conflict resolution skills, visiting adult corrections facilities, obtaining employment and legal assistance, and counseling with family members.

*Theme #6: Matching program intensity with program goals*

To be responsive to the needs of today's young people, many community programs will need to increase the level of their involvement and make their services more intense in both frequency and duration. Evidence is growing that, to be effective, community-based interventions—particularly those designed to serve young people from less advantaged backgrounds—must be intensive and sustained. This does not mean that every program or service needs to be comprehensive and intensive, but rather that young people should have access to an array of services that meet these criteria. The frequency and duration of any particular program's activities should be adequate relative to its own goals and objectives and to the needs of the young people it serves. If a program is building-based, the facility that houses the program should be open long hours, at times that are convenient for young people. Effective community programs should actively seek ways to intensify their contact with young people—for example, by providing camping or retreat experiences, particularly when youth have more discretionary time (weekends and summer).

*Theme #7: Increasing and stabilizing the funding bases of youth organizations*

One of the most striking features of America's youth development organizations is the precariousness of their funding. Although a few organizations enjoy regular annual surpluses and substantial assets, most depend heavily on outside funding, over which they have little control. Because of this dependence on others, community programs for youth cannot stabilize their funding bases by themselves. Specific actions they can take are: diversify their funding sources; make best use of existing resources; continually work to develop innovative and stable sources of core support for their organizations (comparable to sales campaigns for Girl Scout cookies, which provide an average of 60 percent of the core support for the work of local Girl Scout Councils); work collectively with other youth organizations to increase the stability and total level of support for the sector's work, through action directed toward both traditional sources and innovative new mechanisms—for example, a Children's Investment Trust that would earmark public funds for youth services or a semi-postal stamp that would allow individuals to make voluntary contributions to youth programs each time they purchased stamps through the U.S. Postal Service.

Furthermore, youth organizations should view themselves as having an interdependent relationship with funders, which means educating funders about their real needs and responding to funders' requests for greater accountability and responsiveness to community needs. For their part, youth organization funders can help to stabilize and expand their base of support for youth development work in a variety of specific ways. Local United Ways, community foundations, national foundations, businesses, individual donors, and government at all levels need to work together to address the three major current problems with youth organization funding: the inadequacy of the overall level

of support; the tendency to support remediation, treatment and control rather than youth development and primary prevention; and the tendency to fund categorically, by problem area, rather than comprehensively.

*Theme #8: Investing in adult leadership*

At a conference of youth leaders, this part of my talk may be preaching to the converted. You can probably guess what I am going to tell you: that across all sub-sectors of the vast universe of community programs studied by the Task Force, the quality of adult leadership was consistently named as both vitally important and inadequately addressed. Youth-serving agencies, religious youth groups, sports programs, parks and recreation services, and libraries all report that the adults who work with young people in their systems, whether serving on a paid or pro-bono basis, are the most critical factor in whether a program succeeds. Why then do they frequently not receive adequate training, ongoing support and supervision, or public recognition? Training and supervision problems are reported to be the result largely of resource constraints, although they may also be tied to the widely held views that work with youth is neither highly valued nor particularly difficult.

The importance of adult leadership in program delivery is well documented in the research literature, and the qualities that contribute to program success in these empirical studies are strikingly similar to the qualities that adolescents say they value in leaders of community programs. These qualities include: competence in group processes; ability to act as a guide and facilitator, as opposed to seeking a dominant authority role; respect for adolescents, and ability to empower them to make good decisions and to encourage freedom of choice and individual self-determination. In addition to these skills, adolescents want leaders who are kind, nurturing, consistent, trustworthy, and genuinely interested in young people. They want leaders who know how to create a welcoming and supportive atmosphere in the organization or program, and who do not single out, exclude, or embarrass individual young people. Youth of color want assurances that leaders will not discriminate against them, and many immigrant and refugee youth want bilingual leaders who can speak with them in their own language as well as help them learn English.

Improving the quality of adult leadership involves matters of pre- and in-service training, recruitment and retention, and paid and unpaid staff at all levels. An immediate first step is for community programs to expand greatly the availability of appropriate training and other forms of staff development for all adults who work directly with young people whether on a paid or volunteer basis. Program administrators should begin by assessing the effectiveness of existing training models to identify what works for whom and why. They should then promote a range of successful models that include one-on-one coaching, mentoring, and supervision in addition to experience-based workshops and courses.

*Theme #9: Achieving greater accountability through more systematic documentation of services*

Again, across the many sub-sectors of youth development services that we examined, the Task Force was dismayed to find that many programs and organizations do not collect even basic information about the youth they are currently serving. Many na-

tional organizations do not know the age, gender, racial, ethnic, or economic backgrounds of their current service populations. In fact, of the 20 national organizations that we interviewed and examined in depth, nine have no data on the ages of current participants, seven keep no statistics according to gender, five had no information on the racial or ethnic background of members, and fewer still had reliable data on family income levels. Such a situation makes it extremely difficult for these groups to assess their current reach and to conduct strategic planning activities. Local youth organizations are more likely to have at least some of this data, in part because United Way and other local funders have come to require it. In several of the other sub-sectors we examined, even the basic head-count type of documentation was missing. For example, many religious youth groups and adult service clubs had little or no idea of how many young people were reached by their services.

It goes without saying that much could be done—quickly and inexpensively—to rectify this problem. Ideally, all youth organizations would keep basic, accurate, regular, and consistent information about service demographics. Such a system would allow individual organizations to conduct more effective planning, and would also enable groups of agencies to plan collaboratively around outreach to underserved groups of youth.

*Theme #10: Specifying program outcomes and measuring progress toward their achievement*

A problem that plagues the field of youth development is the poor overall state of program evaluation. Many youth development programs have unclear, unspecific, or global (and therefore unmeasurable) goals and objectives, and more still have no reliable basis for claiming that their services are effective. This problem confronts individual agencies as they seek funding and it hampers collective efforts to advocate for expansion of services.

Program developers should seek clarity and realism when defining outcomes of their efforts. As much as possible, these outcomes should focus on the end point of positive youth development rather than solely on preventing problem behaviors such as substance abuse, delinquency, and adolescent pregnancy. The outcomes should be stated in terms of behavioral functioning in the real world, and the indicators associated with each outcome should also be identified.

Once clear program outcomes are established, evaluation measures can be developed to assess whether the program is effective in reaching its own goals. Some type of assessment mechanism should be built into every community program for youth. The level of the assessment or evaluation should match the needs of the sponsoring organization and the state of the program's evolution. For example, a new program should be subject to process evaluation that is directed toward program improvement, while a more mature program that has shown promising initial results should undergo outcome evaluation to determine objectively whether the program is producing its intended effects. In a world of scarce resources, the best candidates for rigorous outcome evaluations are those programs that are carefully designed and implemented, that have shown promising results, and that seem amenable to large-scale replication. Because of the many challenges in conducting appropriate evaluations in the real-world setting of the youth organization, many agencies have found it useful to work with evaluation experts from other institutions, including universities and nonprofit

technical assistance organizations. In effective collaborations, outside evaluators see themselves as equal partners with youth agency personnel in designing and implementing program assessments, and young people are active participants in the evaluation process.

V. CONCLUSION

In conclusion, I would like to return to a point I made at the beginning of my talk, and that is the way our society undervalues leadership. We will not be able to address the issues I have raised tonight without effective youth leaders, because the world is complex, and so are the problems facing young people and the systems that we have already constructed to support and guide them. In his book entitled "On Leadership", John Gardner notes that "history will judge its leaders on—among other things—how well they understand the traditional framework of values, and on how they renew the tradition by adapting it to contemporary dilemmas." This notion of the role of leadership might be useful to us as we begin the third annual Youth Leadership Symposium—an effort that, according to the preview brochure, "focuses on solving practical problems and addressing current issues." I look forward to being part of the deliberations over the next two days and to working with all of you on the challenge of building practice on knowledge.

TRIBUTE TO PFC DONALD L. SELLMAN

Mr. JOHNSTON. Mr. President, I would like to take just a few minutes to pay tribute to Pfc. Donald L. Sellman, who retired from the U.S. Capitol Police on September 26. Officer Sellman, known as "Tex" to his many friends on Capitol Hill, retired on September 26, after 21 years of dedicated service.

During his tenure with the police force here in the Senate, Officer Sellman on numerous occasions was called upon to provide security for Energy and Natural Resources Committee hearings and business meetings. He always carried out his duties with the utmost professionalism. Tex had the special ability for keeping order while at the same time maintaining a friendly and cheerful demeanor.

Prior to his service with the U.S. Capitol Police, Officer Sellman spent 23 years with the U.S. Army where he was awarded numerous medals and honors, including the Silver Star and the Bronze Star with three oak leaf clusters.

Officer Sellman has given over 40 years of devoted service to our Nation. On behalf of the committee members and staff, I would like to congratulate Officer Sellman on an outstanding career and thank him for his excellent service to the committee. May he enjoy to the fullest a well-deserved retirement.

WILLIAM F. DEGAN, JR., OF MASSACHUSETTS—A LAW ENFORCEMENT HERO

Mr. KENNEDY. Mr. President, in August, Massachusetts and America lost a

genuine law enforcement hero when Inspector William F. Degan, Jr., of the United States Marshals Service was killed in the line of duty in Idaho. Mr. Degan was part of a team of Federal marshals who were conducting surveillance of the home of an ultra-right-wing extremist and fugitive, when he was killed by gunfire from the home.

A resident of North Quincy, MA, Bill Degan served as an officer in the Marines before joining the Marshals Service. He spent much of his career in Massachusetts, where he served brilliantly, and was involved in the apprehension of many dangerous criminals. Mr. Degan earned the Attorney General's Distinguished Service Award and the Marshals Service Director's Award for his outstanding performance as Commander of a Special Operations Task Force sent in to restore order in St. Croix following the devastation caused by hurricane Hugo. As a Lieutenant Colonel in the Marine Reserves, he served with distinction in the Persian Gulf in Operations Desert Shield and Desert Storm.

As a tribute to Mr. Degan's valor and the sacrifice that he has made for his country, the Marshals Service has named its facility at Camp Beauregard in Pineville, LA, as the Inspector William F. Degan, Jr., Special Operations Tactical Training Facility.

I extend my deepest sympathy to Mr. Degan's wife, Karen, and to their two sons, William and Brian. Their husband and father made the ultimate sacrifice for his country, and all of us share their sense of loss at his untimely passing.

#### THE START TREATY

Mr. WARNER. Mr. President, last week, the Senate voted to give its consent to ratification of the historic Strategic Arms Reduction Treaty [START I] by a vote of 93 to 6. One of the most important reasons for the Senate's overwhelming support of the START Treaty was the fact that, throughout the negotiating process, our negotiators set their standards high and negotiated with tenacity. The vital contributions to these negotiations of one true statesman, a former colleague, must never be forgotten. I am speaking of my good friend, the late Senator John Tower.

John Tower played an instrumental role in the great national debate over the never-ratified SALT II Treaty. That debate helped mold a national consensus that the United States needed to restore its defenses so that we might deal with our adversaries from a position of strength. As chairman of the Senate Armed Services Committee, John Tower presided over the rebuilding of America's national defenses. But he did more.

In 1985, when the new Strategic Arms Negotiations began in Geneva, John

Tower accepted the request of President Ronald Reagan to serve as chief U.S. negotiator. He was given the task of getting the talks back on track leading in a direction the United States wanted to go. He did that job magnificently.

John Tower used the skills that he had fine-tuned in the Senate to conduct negotiations with his Soviet counterparts. He was always a gentleman, but always pressed to explain to and persuade the other side of the merits of the American approach.

We should not be surprised that the final START Treaty bears such a close relationship to the positions that John Tower presented in Geneva. The basic structure of the agreement was shaped then. I remember vividly John Tower's efforts to ensure that the emerging START Treaty took account of the important differences between stabilizing, slow-flying bombers on the one hand, and fast-flying, potentially first-strike, ballistic missiles on the other hand. In particular, he stressed the dangers posed by large MIRVed land-based missiles which present the greatest threat to the strategic deterrent of the United States.

His persistence paid off, as we see today. While the START Treaty does not fulfill every one of the goals he had set, the Treaty does place tight limitations on fast-flying ballistic missiles and particularly, reduces by half the number of heavy, land-based, MIRVed SS-18 missiles. Always a strong supporter of America's allies, he forcefully rejected Soviet efforts to include British and French forces in the negotiations. He broke the back of this demand and set the stage for the basic outline of the agreement. He made clear that the United States could not accept a treaty that was not effectively verifiable, and he pressed hard for the necessary on-site inspections and openness. Indeed, after leaving Geneva, he sponsored the highly acclaimed verification conference held annually at Southern Methodist University in Dallas, Texas.

During the time John Tower was in Geneva, he was visited by members of the Senate Arms Control Observer Group and a number of his other former colleagues. He understood the importance of congressional support for the ongoing negotiations if we were to have a START Treaty that would be ratified. He worked hard to ensure that members of the Senate understood the goals of the United States in the negotiations and the strategy for getting there. More important, however, he understood that the Treaty would be judged on its merits, that substance mattered, and that the details of provisions negotiated were often every bit as important as the basic concept of limitations.

We have lost John Tower, but we will live more securely because of his leg-

acy. He understood that arms control is an integral part of our foreign policy and national security strategy. He understood that agreements for agreements' sake was a dangerous psychology. He recognized that if we negotiated from strength, we could create opportunities to enhance our security. In short, he knew how to think about strategy and he knew how to implement it.

Now that the Senate has approved ratification of the START I Treaty, it is only appropriate that we take a moment to remember that John Tower, the Senator, was also John Tower, the negotiator.

#### CONGRATULATIONS TO CENTRAL CITY CONCERN

Mr. HATFIELD. Mr. President, I would like to take a moment to congratulate the people of Central City Concern in Portland, OR, who recently received the Interagency Council on the Homeless' Award for Excellence in Community Service. Central City Concern was honored by the Interagency Council, Secretary Jack Kemp, and Secretary Louis Sullivan for their highly successful programs which have had a tremendous record of ending the cycle of homelessness.

Central City Concern currently owns, manages, or has under development 1,061 housing units in 12 buildings, making them the largest nonprofit housing agency in the Pacific Northwest. Their combination of housing and chemical dependency treatment services in Portland's urban core area is unique nationally, and allows for a meaningful and permanent impact on the lives of thousands of Oregonians each year.

The Downtown Housing and Preservation Partnership, with a membership including the Portland Development Commission, the Chamber of Commerce, the Housing Authority of Portland and Central City Concern, has been able to develop the first undertaking of its kind in the Nation. This project, which brings together chemical dependency resources with a housing facility called the Sally McCracken Building, is managed by Central City. It offers an opportunity for people who have worked to address their addictions, and are trying to end their cycle of alcoholism, drug abuse, and homelessness, to pursue their lives as clean and sober. Many of these people have formerly been written off as being hopeless members of their community; however, with the hard work and dedication of the people at Central City, 85 percent of these tenants have been able to end their cycle of despair.

For the short period of time that this project has been in existence, 21 people have been able to go forward with their lives successfully. In fact, the two

major reasons people leave the Sally McCracken project is because: First, they have been able to regain custody of their children or second, they have been able to secure full-time employment and are able to afford private market rental rates.

Central City has 190 employees, 140 of which are formerly homeless, typically recovering alcoholics or drug abusers. Many of these individuals have advanced to positions of responsibility and show not only to their colleagues, but also to their clients, that they too can become productive members of their community. They all bring their talents, abilities, and experiences to help those who have been unable to help themselves. The people of Central City Concern have given the ultimate gift through their effort—they have renewed self-esteem in each and every life they have touched.

#### REGARDING THE BRADY BILL

Mr. HARKIN. Mr. President, once again, Republican Members of this body have acted to stop the Brady bill from being considered and enacted into law. I have long supported this legislation. Despite being passed in both bodies, this legislation will not become law, due to the intransigence of those who would prefer to advance the interests of the NRA over the interests of the overwhelming majority of Americans.

The Brady bill is a simple, common-sense measure to keep guns out of the hands of criminals. It is ludicrous for us to have a statutory prohibition on felons owning or buying handguns, but no effective mechanism to enforce it. The Brady bill would provide for criminal background checks, and also help update criminal records to make those checks more effective.

In my State of Iowa, a criminal background check system is already in place that would comply with the Brady bill. Iowans wait 3 days before they are able to purchase a gun. It hasn't been a tremendous inconvenience to gun purchasers. This bill would not require any change in Iowa's gun laws. But this bill is important to the people of Iowa nonetheless. The problem is that guns purchased in jurisdictions with lax gun laws are brought across State lines and get into the criminal gun pipeline.

Contrary to the often repeated claims of Brady bill opponents, it is not true that "they'll just get their guns somewhere else." Nobody thinks that the Brady bill will prevent guns from being used in crime, or ensure that guns will never get into the wrong hands. But isn't it reasonable to try to make it more difficult to obtain guns? Criminals aren't brain surgeons or rocket scientists. As the distinguished chairman of the Judiciary Committee

pointed out, of the first 1,063 in his State of Delaware to apply for a permit under that State's waiting period, 10 percent—106—were ineligible to buy guns. That's 106 convicted felons who would be armed now, if it wasn't for a criminal background check. The question we must ask is whether the Brady bill will save lives, and I think it is undeniable that it would.

Unfortunately, as in so many other instances, George Bush is giving lip service to supporting the Mitchell-Dole compromise Brady bill, but he and many of the Republicans in this body have stopped its consideration. Just last night, on "Larry King Live," he said "Dole and Mitchell have a bill on that \* \* \* one that I support." But if President Bush really wanted to enact this bill, it would be enacted. I hope and believe that next year, the President of the United States will fight for the interests of the people, rather than those of the NRA. I look forward to taking quick action on this legislation when the 103d Congress convenes.

#### INDIAN TECHNICAL AMENDMENTS

Mr. STEVENS. Mr. President, yesterday the House passed by suspension the Indian technical amendments bill passed by the Senate a few days earlier. One of the Senate amendments approved by the House authorizes the Bureau of Indian Affairs to reenroll Yvonne LeCornu and her son Andres Manual Salazar into Shaan-Seet Corp. This will rectify a clerical error made by the Bureau when it accidentally dropped the family from the official rolls in the early 1970's.

The amendment will enable the LeCornu family to receive, after years of waiting, all the benefits of membership in Shaan-Seet, Inc. after the effective date. Past distributions made by the corporation will not be affected and will not be paid to the LeCornus. Likewise, the land distributions under the Alaska Native Claims Settlement Act will not be altered.

The bill will grant Yvonne and her son full status as village corporation settlement common stock shareholders in Shaan Seet with the same rights as they would have had if they had been enrolled during the original enrollment period. It is not intended that they have any rights beyond those of ordinary shareholders Shaan Seet.

The legislation is not intended to affect any prior distributions to the shareholders or to require any readjustments of cash allocations between Sealaska Corp. and/or Shaan Seet. Similarly, past distributions made by Sealaska and/or Shaan Seet to the LeCornus shall not be affected. This act will not give rise to any claim between Shaan Seet and Sealaska based upon such prior distributions. It is expected that Sealaska will cancel the

existing class C at large stock held by Yvonne and her son and reissue class A village stock in its place.

The amendment simply corrects an administrative error, and I am grateful to Congressman GEORGE MILLER, the chairman of the House Interior Committee and Congressman DON YOUNG, the ranking member for their support of this provision and for approving it in such an expedited manner.

#### NIH REVITALIZATION

Mr. PACKWOOD. Mr. President, I rise today in support of S. 2899, the National Institutes of Health [NIH] Revitalization Amendments of 1992.

I would like to speak to the section of the bill that deals with fetal tissue transplantation research, especially as it affects our senior citizens.

The American Medical Association has stated that fetal tissue transplantation research is morally acceptable and a promising area of clinical investigation.

Fetal tissue research has already given the world vaccines against polio and German measles.

Breakthroughs in medical research should not be compromised because of politics, Mr. President. And, that is just what is happening to this legislation that would ensure progress in research for diseases such as Alzheimers and Parkinsons, which together afflict over 5.5 million of our elderly population.

Scientists are very encouraged about a breakthrough in the understanding and treatment of Alzheimers, for instance, but this can only occur if they are able to conduct research in fetal tissue transplantation.

Alzheimers affects one in every three American families, one in three—what a terrible burden on so many.

Because Alzheimers is so closely linked with age, demographic changes alone means that by the middle of the 21st century, 14 million Americans, 1 in every 2 persons over the age of 85, will have Alzheimers.

Science is the only place we can turn to for clues and eventual answers to this heartbreaking disease.

The first results of fetal tissue transplantation also offer great hope to the 1.5 million Americans who suffer from Parkinson's disease. Every day of their lives, these people have to cope with this progressively debilitating disease for which there is no cure.

The NIH legislation has the support of the Alliance for Aging Research, the Alzheimers Association, the Parkinson's Disease Foundation, and the Parkinson's action network, along with many other national groups.

The American Geriatric Society, made up of 6,000 physicians and other health professionals dedicated to meeting the special needs of the elderly patient, also supports fetal tissue transplantation research.

The American Jewish Congress says that the present Government moratorium stopping fetal tissue research ignores the suffering of millions of Americans who endure these diseases.

The National Arthritis Foundation, and organization dedicated to improving the quality of life for the 37 million Americans with arthritis, supports fetal tissue research that will lead to the achievement of this goal.

The American Cancer Society has also stated that several areas of research directly related to the cancer problem have benefited from the use of human fetal tissue.

The elderly, as the grandparents and great-grandparents of the children who are the future of our country, should also know that the Juvenile Diabetes Foundation International supports the research because it may hold the answer to a cure for diabetes.

And, the March of Dimes supports fetal tissue research because it has the potential to ensure the birth of many more health babies.

Also, many antiabortion Members of Congress also support fetal tissue transplantation research, saying that the research protocol ensures adequate safeguards for fetal tissue collection.

It will be a sad day for our senior citizens, Mr. President, if we cannot pass this bill out of the Congress.

While we can return another day to address the entire NIH reauthorization bill, by not passing this bill now, we are saying to our suffering elderly, you have no hope to cling to, we are very sorry, but don't expect a better quality of life because Congress won't allow us to move forward with this vital research.

Well, Mr. President, this Senator has a very, very hard time with this message.

I strongly urge my colleagues to pass this legislation and get on with helping our elderly to live out their years without the needless pain of these diseases. I thank the Chair.

#### ENVIRONMENTAL ASPECTS OF NAFTA

Mr. CHAFEE. Mr. President, nearly 3 weeks ago, the Senate Finance Committee held a hearing focusing on the environmental aspects of the North American Free-Trade Agreement [NAFTA].

I found the testimony presented at this hearing to be timely and informative. I believe it is important that Members of the Senate, who ultimately must give their approval to implementing legislation, be aware of the expert comments—both pro and con—on the green aspects of the NAFTA.

Toward that end, I am placing in the RECORD a statement released last Wednesday by the National Wildlife Federation, one of the environmental organizations that testified at the Sep-

tember 16 hearing. I hope my colleagues find it useful in the coming months as they study the environmental provisions of the agreement text.

[Press release from the National Wildlife Federation]

#### ENVIRONMENTAL PROVISIONS OF FREE TRADE AGREEMENT WIN SUPPORT OF NATIONAL WILDLIFE FEDERATION

WASHINGTON, D.C.—Following closely on the heels of a pledge from North American Free Trade Agreement (NAFTA) governments to create a commission on the environment, the National Wildlife Federation (NWF) announced its support today for the NAFTA's environmental provisions.

"We are satisfied that substantial progress has been made towards establishing protection of the environment as a cornerstone of NAFTA," said NWF President Jay D. Hair. "We believe the North American Commission on the Environment is essential to assure that the NAFTA's environmental provisions will be implemented effectively."

The U.S. government's support for NWF's specific recommendations for the Commission was confirmed in a letter sent to Hair yesterday from U.S. Trade Representative Carla A. Hills.

In its announcement, the largest conservation organization in the United States made clear that its support extends only to the agreement's environmental provisions and should not be misinterpreted as a green light for the whole of NAFTA. Further, NWF urged the next Congress to carefully consider the evolution of the environmental commission as details are negotiated, the language crafted for legislation implementing NAFTA, and the treatment of funding issues related to trade and environment.

"Vigorous implementation of the agreement's environmental concepts will be crucial to accomplishing responsible free trade," Hair said. "Good intentions and the right ideas alone just aren't enough."

For the past two years, NWF has played a lead role in establishing an agenda for NAFTA environmental considerations. In addition to the Federation's work with the U.S. Trade Representative's (USTR) office and the Environmental Protection Agency (EPA), Hair was appointed to serve on the Investment Policy Advisory Committee to the USTR.

"A key factor in these negotiations has been Ambassador Hills' and EPA Administrator Reilly's ability to advance trade-related environmental concerns beyond the status quo. Together with their proficient staffs, they have engaged these important issues in a forthright and professional manner. They are to be commended for their excellent efforts," Hair said. "These important environmental provisions represent a first step in achieving the goals of sustainable development as articulated at the Earth Summit in Rio last June."

The Federation's affirmative support of these provisions does not extend to aspects of the NAFTA other than those related to the environment, nor does it extend to other actions taken by the Administration on environmental issues.

The National Wildlife Federation is the nation's largest conservation organization. Founded in 1936, the Federation, its 5.3 million members and supporters, and 51 affiliated organizations, work to educate individuals and organizations to conserve natural resources, to protect the environment, and to build a globally sustainable future.

#### NATIONAL INSTITUTES OF HEALTH REVITALIZATION AMENDMENTS OF 1992

Mr. DODD. Mr. President, I am disappointed that the administration and a few Members of the Senate have prevented the passage of legislation to reauthorize the National Institutes of Health. This legislation would have provided critical support for the kind of biomedical research that has made NIH the leading research institution in this Nation and throughout the world.

President Bush vetoed very similar legislation despite the fact it clearly had overwhelming bipartisan support in Congress. The Senate passed this earlier measure by a vote of 85-12. The legislation, as revised in recent days, responds to many of the concerns raised by the President in his veto message. Compromises were made on a number of key issues including the most controversial issue—fetal tissue transplantation research. The White House, however, is clearly not interested in compromising. Many of the most ardent pro-life advocates in the Senate support this legislation and recognize that it in no way encourages women to have abortions. They recognize that women would not have abortions to donate tissue for research. The administration, however, appears to only be listening to extremists in the Republican Party.

Mr. President, the Senate has clearly expressed support for lifting the ban on Federal funding for fetal tissue transplantation research. New provisions in the bill respond to the concerns of the administration but would allow this much needed research to move forward under carefully regulated conditions. This research must continue—it holds the promise of cure for the millions who suffer from diabetes, Parkinson's disease, spinal cord injuries, and other chronic disorders. It is time to end this unnecessary restraint on biomedical research.

Mr. President, the revised legislation contains all the safeguards for fetal tissue research contained in the original legislation. These safeguards ensure that the decision to terminate a pregnancy will be independent from the retrieval and use of fetal tissue. The safeguards in this bill are not a substitute for—but additions to—the already extensive ethical, technical, and scientific review that all research applications undergo. For example, the legislation requires that informed consent to donate the tissue be obtained only after the decision to terminate the pregnancy has been made. Women would be prohibited from designating the recipient, or from being informed of the identity of the recipient. This legislation would make it illegal for any person to purchase or sell fetal tissue.

Mr. President, the administration has insisted that fetal tissue collected

from miscarriages and from ectopic pregnancies would be sufficient to meet medical research needs. The administration has proposed the establishment of a tissue bank composed of tissue from these sources. The new legislation gives the President's tissue bank a year to become operational. After this year researchers must continue to apply to the bank for tissue, and only if the bank is unable to provide suitable material within a 2-week period, are researchers free to obtain it from other sources. If, as the President claims, there are sufficient amounts of tissue from these sources, the use of fetal tissue from induced abortions will never be necessary.

Mr. President, I am also concerned about the administration's objections to provisions in the legislation requiring, when appropriate, the inclusion of women and minorities as subjects in clinical research conducted by NIH. In the past, NIH has failed to adequately involve women in NIH-sponsored clinical research and has failed to sufficiently support research on conditions that have particular significance for women—osteoporosis, breast cancer, and ovarian cancer. The administration has stated that the inclusion of women and minorities in clinical trials will force NIH to conduct impractical and costly studies. The failure of NIH to include women and minorities in research has resulted in their receiving second rate care. It is absolutely inexcusable that the administration is willing to allow this situation to continue. Women and minorities must be included in clinical trials and their health concerns should not take a back seat to the health concerns of white males.

Mr. President, this legislation provided an opportunity to help end the suffering of millions. It held hope for people with Parkinson's, Alzheimer's, diabetes, and other chronic and crippling diseases. Research on women's health would have received long overdue attention and increased support. It is unfortunate that the administration has chosen to put politics and the wishes of the extremists in the Republican Party ahead of medical research that holds promise for so many in this country. Mr. President, while the administration efforts to hold up this legislation have succeeded for the present time, I am pleased that the majority leader, Senator MITCHELL has committed to making this legislation the first order of business in the next Congress. I am certain that at that time we will succeed in enacting legislation that will allow critical biomedical research to proceed.

#### TRIBUTE TO SENATOR ALAN DIXON

Mr. SIMON. Mr. President, now that we are in the waning hours of this ses-

sion I think it is an appropriate time to pay tribute to my colleague, the senior Senator from Illinois, who is retiring from this body. He was defeated in a primary election in an unusual set of circumstances. I do not say that in any way demeaning his distinguished opponent who won the nomination, and as some of my colleagues know, I am doing everything I can to help her candidacy.

But ALAN DIXON through the years has contributed a great deal to the State of Illinois and to our Nation. I served in the State legislature with him. We were seatmates in the State legislature, both in the House and in the State senate.

I saw him contribute significantly in areas of civil liberties. We had something called the Broyles bills, which required people to sign papers saying they were patriotic Americans, to affirm that by oath. Of course, the net result was not to catch people who were unpatriotic Americans but simply to cause people who did not believe in taking oaths, Quakers for example, not to sign. And therefore they could not teach in Illinois or serve under State government there.

But one of the more significant contributions that he made was to revise the judicial system in the State of Illinois. We had, in Illinois, a justice of the peace system, where if you went through a community and you were guilty of speeding, you would be hauled before a justice of the peace and you might possibly not pay the fine but you would pay court costs. You could be sure. We had an extremely partisan judicial setup, where everyone had to run at all times on a party label.

We still have some deficiencies in our judicial system in Illinois, but we made giant steps forward, and there is no question that was because of Senator DIXON. And here my colleagues have seen the contributions he has made in a number of areas, particularly on the Armed Services committee.

But for the State of Illinois, I will mention one final contribution that is significant. Back in the old days when the mayor of Chicago had tremendous influence, particularly with the Chicago delegation of the House, we did not have meetings of the Illinois delegation, either Democrats or Republicans, except on very rare occasions. Senator DIXON was elected to the Senate. I was then serving the House, and he said, the Illinois delegation ought to meet and meet regularly. We started doing it and we have become a much more effective body because of that.

His contributions to this body are significant. As I said to him in a letter that I sent to him, in generations to come, his children, his grandchildren, his great grandchildren will look back and say with great pride: ALAN DIXON was my father, my grandfather, my great grandfather, whatever the relationship will be.

I have been proud to serve with him. I think I speak for all of my colleagues when I say we have been proud to serve with ALAN DIXON in the U.S. Senate.

#### FAREWELL TO SENATOR BROCK ADAMS

Mr. MITCHELL. The Senate is losing a valued Member with the retirement of Senator BROCK ADAMS. The State of Washington is losing an effective advocate.

BROCK ADAMS has had a long and diverse career in public service. Throughout his career, he has never been afraid to challenge the status quo and to forge new ground.

President Kennedy, committed to bringing the best and the brightest into Government service, recognized the talents of BROCK ADAMS more than 30 years ago, when he appointed him U.S. Attorney for the Western District of Washington. BROCK ADAMS has been committed to public service ever since.

He came to the House of Representatives in 1965 as our Nation was becoming increasingly involved in the Vietnam war. His service in the House during that divisive and controversial war gave him an understanding of the importance of congressional involvement in decisions to commit our Nation to war. It's not surprising that he was one of the primary advocates of invoking the War Powers Act in connection with the Bush invasion of Panama and the Persian Gulf war.

His forceful and compelling arguments during these crises served as a necessary reminder that Congress must never abdicate its responsibility to represent the American people on the most difficult decision elected officials must ever make—whether to send our young people to war.

BROCK's understanding of the need to maintain a careful balance of power between the executive and legislative branches reflects three decades of experience in both legislative and executive branches. After serving in the House for 12 years, he was chosen by President Carter to serve as Secretary of Transportation. His concern with and emphasis on transportation safety moved that Department forward from a focus solely on the movement of goods and people to the recognition that the safe movement of goods and people is equally a part of a sound national transportation policy.

For BROCK, the bottom line has always been how Government policies will affect people. His work on the Labor and Human Resources Committee has reflected this priority. His support of women on reproductive health issues has been unfailing. His work on behalf of the elderly has been unwavering and effective. Many Americans enjoy a better quality of life because of the work of BROCK ADAMS.

While BROCK's views have not always prevailed, he has always argued his po-

sitions articulately. BROCK's skill in debate has advanced the discussion of important issues facing Americans. His contributions to the national debate will be missed in this Chamber.

#### FAREWELL TO JOCELYN BIRCH BURDICK

Mr. MITCHELL. Mr. President, the close of the 102d Congress will see the departure of many of our colleagues. Among them will be Senator JOCELYN BIRCH BURDICK.

Mrs. BURDICK assumed her husband's position as Senator of North Dakota in the most difficult of times. While all of the Senate mourned the loss of Quentin Burdick, no one felt that loss as deeply as JOCELYN BIRCH BURDICK. Yet Mrs. BURDICK rose above her own personal tragedy to complete her husband's term in the Senate. Her personal sacrifice ensured that North Dakotans continued to have a voice in the legislative process during the last hectic days of the 102d Congress.

While Mrs. BURDICK's time with us was short, we will not soon forget the strength and graciousness with which she served in the 102d Congress. We have all learned a great deal about overcoming adversity from JOSELYN BIRCH BURDICK. I am confident that the courage and perseverance she demonstrated in carrying out her duties as a U.S. Senator will serve her well in whatever she chooses to do. We will miss her and wish her well.

#### FAREWELL TO SENATOR ALAN CRANSTON

Mr. MITCHELL. Mr. President, when the 103d Congress convenes in January, the Senate will be without the sound voice of experience of Senator ALAN CRANSTON.

The veterans of America are losing a friend. Advocates of world peace and a sound disarmament policy are losing a voice. Environmentalists are losing an effective proponent. Women are losing a champion for equality and reproductive freedom.

ALAN CRANSTON's dedication to promoting world peace comes from a personal and varied experience with war. As a young journalist, he covered the rise of fascism in Europe. He translated and published an English version of *Mein Kampf* in America to warn the public of the threat of nazism. During World War II, he enlisted in the Army as a private. As chairman of the Veterans Affairs Committee he has heard personal accounts from American veterans of the horrors of war and the lingering aftereffects of armed conflict.

ALAN CRANSTON's work for world peace has been far-sighted. His assignment to the Foreign Relations Committee has given him an effective forum in which to pursue methods to make our world more peaceful and se-

cure. He supported bilateral nuclear arms reduction negotiations. He was a leading advocate of the SALT II and START treaties. Most recently, he proposed legislation to purchase weapons-grade uranium from the former Soviet Union. Such a move will help prevent nuclear arms proliferation and will also serve as an efficient and low-cost fuel for U.S. nuclear power plants. Recently, the President adopted Senator CRANSTON's initiative and announced that the United States will begin to purchase high-grade uranium from Russia next year.

I have had the pleasure to work with Senator CRANSTON on a number of legislative initiatives since my arrival in the Senate. I have had the honor to work on the Veterans Affairs Committee under his chairmanship. In this capacity, I have found him to be compassionate and attentive to the needs of American veterans.

I recently worked with him to introduce a clarified version of the Freedom of Choice Act. In this effort, he was a tireless and firm advocate of a woman's right to choose. ALAN CRANSTON has initiated and persevered in the modern movement to pay equity for women. His recognition of the essential equality of rights of all human beings under our Constitution has been constant throughout his career, and it is a record in which he can take great pride. It is a record for which American women, African-Americans, Hispanic-Americans, and native Americans honor him, and it is an honor fairly earned.

I have admired and shared his dedication to preserving the environment. California and the Nation has benefited from ALAN CRANSTON's efforts to create and maintain our National Park System.

In examining ALAN CRANSTON's record one common theme appears. Throughout his career, ALAN CRANSTON has been concerned with improving our world and our country. Thanks to ALAN's work, the world is safer, cleaner, and more just than it would have been without his efforts. Conditions for American women, minorities, immigrants, and the disabled have improved because of ALAN CRANSTON's dedication to solving their problems.

Senator CRANSTON has brought vision and initiative to the Senate that I will sorely miss. I wish him well and thank him for his contributions to this institution and our Nation.

#### FAREWELL TO SENATOR ALAN J. DIXON

Mr. MITCHELL. Mr. President, with the retirement of ALAN DIXON, the Senate is losing one of its most fiercely independent Democrats. Political independence is an important part of our system. Willingness to challenge conventional thinking drives political dis-

cussion and helps form the consensus necessary to govern.

ALAN DIXON has had the difficult job of balancing the contrasting demands and needs of a very diverse and populous State. He has had to represent one of the largest cities in our Nation, and also the vast farmlands of southern Illinois, and the industrial centers of the small Illinois cities. That is a task that ALAN DIXON has always pursued with vigor, enthusiasm, and effectiveness.

His work on the Small Business Committee allowed him to serve all Illinois communities—rural, suburban, and urban—for small business in Illinois, as in most of our Nation, is the backbone of the economy. Preserving and protecting small businesses has not been an easy task during this prolonged recession, but ALAN DIXON has consistently fought to stimulate business and protect American jobs.

ALAN DIXON's spirit, vigor, and articulate debate will be missed in the Senate. He always added a unique perspective to our deliberations. We wish him well and thank him for his service.

#### RETIREMENT OF SENATOR JAKE GARN

Mr. MITCHELL. Mr. President, the Senate is losing a man of courage and conviction in JAKE GARN, a man who has literally explored new frontiers as a Senator and a man who has put his own life on the line for his family. His work in the Senate has been an example of a man committed to his principles, not only on the Senate floor, but also in his personal life.

The work we perform in the Senate is often abstract. It is frequently difficult to fully gauge the impact our work and decisions have on the everyday lives of Americans. As a result, when we are not in Washington, we are frequently traveling back to our home States, or visiting sites of Government programs to get a sense of what needs to be done. This is a practice as old as the Senate itself. However, JAKE GARN took this personal involvement to an historic extreme.

In 1985, Senator GARN participated in a flight of the space shuttle *Discovery*. At the time, he was chairman of the Appropriations Subcommittee responsible for NASA. He was understandably curious about the space programs for which his subcommittee has appropriated so much money. We all wonder if the Nation is getting its money's worth for various Government programs. JAKE GARN decided to find out first-hand whether the space shuttle was a worthy investment.

Despite years of waiting and many hours of intense training, JAKE's enthusiasm for his journey never diminished. He returned from space more convinced than ever of the necessity of space exploration; he has since been a committed and eloquent advocate for funding of NASA.

JAKE has not only distinguished himself with his dedication to his work, but also with his love for and devotion to his family. JAKE'S belief that government is not the solution to all problems and that individuals must commit themselves to solving social problems is not just a political view; it is a way of life. When JAKE'S daughter was facing kidney failure from diabetes, he donated one of his kidneys so she could live. Again, his personal experience has made him a credible spokesman on the need to encourage organ donors.

JAKE has taught his Senate colleagues much about living by the ideals we espouse on the floor. He has been an example of dedication to his work. Utah will lose a hard-working man of principle with the departure of JAKE GARN. I wish him well and thank him for his service.

#### FAREWELL TO SENATOR WARREN RUDMAN

Mr. MITCHELL. Mr. President, it is with great regret that I note the departure from the Senate of my good friend and respected colleague, WARREN RUDMAN. Senator RUDMAN possesses one of the most penetrating legal minds in recent Senate history and his departure diminishes the stature of the body.

WARREN RUDMAN is a thoughtful and fair man for whom I have the utmost respect. He has had many difficult jobs in the Senate and has always fulfilled his responsibilities in a thorough and just manner.

I served with WARREN on the Iran-Contra Committee of which he was the vice-chair. It would have been easy for him to play a partisan role and defend a Republican administration. Instead, he conducted himself in an impartial and thoughtful way. His judicious demeanor in those hearings reflected the integrity and independence he demonstrated in a long and prestigious legal career coming to the Senate. He listened to all of the facts and reviewed all of the possible arguments before making a judgment about the activities of those involved.

As the ranking minority member on the Ethics Committee, Senator RUDMAN has had the unenviable and painful task of reaching judgments on the conduct of colleagues. It is a job that no Senator seeks, but it is an essential role that maintains the integrity of the institutions. WARREN RUDMAN has shown reason and fortitude in carrying out burdensome task of judging his colleague's behavior. We too seldom thank our colleagues for serving on the Ethics Committee. They perform a truly necessary but unappreciated task. I take this opportunity now to let Senator RUDMAN and the other members of that committee know how much I value their efforts on the Ethics Committee.

Senator RUDMAN has a respect for and commitment to justice that has

permeated all he has done in the Senate. He has supported legal services for the poor because he understands that legal representation is essential if our judicial system is going to be fair. Yet he knows that the great constitutional guarantees alone are of little value to people struggling for survival. So he has also fought for heating assistance to the poor because he knows that this help is essential to thousands of Americans facing the harsh New England winters and the blizzards of the Great Plains. It is a tribute to his honor of both the Constitution and common sense that he understands that the human goals of a good life will not be preserved if the essentials of a decent level of human comfort are not assured.

Senator RUDMAN is not only a fair man, but his name has become permanently associated with fiscal responsibility. His work on the Gramm-Rudman-Hollings deficit reduction act put the issue of continuing large budget deficits at the forefront of public policy discussion. More remains to be done, but public attention has been focused on the problem because of Senator RUDMAN'S efforts to heighten awareness of the issue.

I am pleased that Senator RUDMAN is considering continuing work on the issue of deficit reduction after he leaves the Senate. His reputation and credibility will do much to advance public discourse on the issue and no doubt will help promote solutions to our fiscal problems. I look forward to his work in the private sector. I have no doubt whatever he does will be productive, thoughtful, and intellectually sound. WARREN RUDMAN has been an asset to the Senate as well as a close personal friend. I have enjoyed working with him and I will greatly miss him.

#### RETIREMENT OF SENATOR STEVE SYMMS

Mr. MITCHELL. Mr. President, I also say goodbye to a colleague with whom I have had the pleasure of serving on both the Environment and Public Works Committee and the Finance Committee. Senator STEVE SYMMS has represented the rugged frontier individualism of the Idaho wilderness well. He has consistently fought for the rights of gunowners and private property owners. He has worked to make wilderness areas accessible to outdoor enthusiasts. He has tirelessly sought to protect the unique way of life that is Idaho.

While STEVE and I often disagreed on issues, the similar nature of our rural States bridged our political differences when we worked on infrastructure issues on the Environment and Public Works Committee.

We both understand that a sound transportation system is literally a lifeline for rural States. Well-paved

roads, sound bridges, and secure rail lines link remote parts of our States with the larger cities on which they rely for the necessities of life. Reliable transportation systems mean economic development and flexibility for rural areas whose economies are undergoing change.

STEVE'S position as the ranking minority member of the Subcommittee on Water Resources, Transportation and Infrastructure has enabled him to work effectively on transportation issues. I personally appreciated his help in getting the Intermodal Surface Transportation Act passed last year. His efforts have helped to put thousands of Americans back to work and to lay the groundwork for future economic growth. That is a record of which he can be justifiably proud.

STEVE has always demonstrated a sense of humor and a good spirit that has made otherwise difficult committee work a pleasure. That is a gift that will be sorely missed. I have no doubt that STEVE'S ability to see the light side in any situation will help him to succeed in whatever he chooses to do after leaving the Senate. I appreciate having had the opportunity to work with STEVE and wish him well in the future.

#### RETIREMENT OF SENATOR TIM WIRTH

Mr. MITCHELL. Mr. President, I am personally very saddened to say goodbye to TIM WIRTH. TIM and I have shared many legislative interests in the Senate. Perhaps most important among these has been our shared interest in preserving and protecting the environment.

TIM has served but one term in the U.S. Senate. But in one term has done more to draw attention to the problems of the deterioration of the ozone layer, acid rain, and global deforestation than many who have served much longer. I was disappointed that TIM decided not to run for reelection. His departure will leave a void in the Senate's environmental work that will be difficult to fill.

TIM'S concern for the future is not limited to environmental concerns. He has dedicated himself to ensuring equal opportunities for all Americans. He has always understood that fully utilizing the abilities of every citizen is the best way to ensure a bright future for our Nation. He has been a staunch supporter of women's rights. His work on women's issues has demonstrated a fundamental respect for women that has in turn won him the respect of every women's organization in the country. American women have lost an unquestionable champion of equality with the departure of TIM WIRTH.

TIM came to Washington as a Member of the House of Representatives in 1975. He came promising change. He

came to instill confidence in the Government in the wake of the Watergate scandal. I did not have the pleasure of serving with him in the House, but during our time together in the Senate, I have found him to be sincere and deeply committed to improvement of the environment. He has never forgotten the reasons that he came to Washington nearly 18 years ago. I know that at times, he, like the rest of us, has found the legislative process frustrating, but I hope when he leaves, he will take with him a sense that his work has made a difference.

Environmental concerns are now at the forefront of the American and even the international agenda. Public opinion increasingly supports women's reproductive rights. TIM WIRTH's reasoned, measured contributions to these debates has made these advances possible. I will miss his assistance in advancing these causes when the 103rd Congress convenes. But I respect his desire to pursue other endeavors and have no doubt that he will succeed in all that he does. To TIM WIRTH, I say, thank you and we wish you well.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll to ascertain the presence of a quorum.

The legislative clerk proceeded to call the roll.

Mr. D'AMATO. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### FAIR TRADE AND FREE TRADE

Mr. D'AMATO. Mr. President, thank you.

Mr. President, for some period of time now, the Senators from New York, the senior Senator, Senator MOYNIHAN, and this Senator, have attempted to deal with an inequity, the very real problem as it relates to American jobs.

Mr. President, I am here to talk about this business of fair trade and free trade. It seems to me that we have run into a situation where free trade oftentimes in the manner in which it has been handled has not been fair. Free trade means to many that we open up our markets to competition and we see closed markets when it comes to our products.

Even more insidious is when we open up our markets and we find that not only are markets closed to us for fair competition abroad, but that, in addition, there are unfair, illegal practices that are utilized in bringing the competitors product into this country.

One of these methods is called dumping. I wonder what the average person knows when they hear about dumping. Let me give you an example.

When we are talking about automobiles and the price and the cost to

produce a comparable automobile is \$6,000, that is what it cost someone to produce it, \$6,000. And if they were to sell it for \$5,000, sustaining a \$1,000 loss, that is illegal. That is dumping. We can understand that.

If one were to manufacture a typewriter, and the cost of that typewriter to the manufacturer were \$250, and if they were to sell that typewriter for \$200, \$50 below what it cost them, that is dumping. It is illegal.

Mr. President, we have had exactly that kind of thing taking place.

People might say how can that be? You cannot stay in business if you are manufacturing automobiles and typewriters and selling them at below cost. Sooner or later you will go out of business.

But, Mr. President, if that manufacturer is selling those products here in the United States, and absorbing a loss of \$50 for each typewriter; and, when he or she sells them abroad in their own closed market, they increase the price by that additional \$50 to their consumers; they sustain no loss; and, eventually they will drive all of their competitors out of business here in America.

Indeed, that is a sorry saga of the case of Brother, which is a Japanese corporation that does not manufacture the typewriters here; that has them come from foreign sources, Malaysia, and Singapore; that has what we call a "screw plant" which is a plant where the parts come in and are simply assembled where there is American content; and where the products are then dumped below cost, below what it costs them to produce illegally, and immorally. And we have not done a darn thing to stop it. Finally, we get the trade people and others in the administration who should have been pursuing a course diplomatically through all of the courses left open to us, why they were recalcitrant and slow. This is not the story of partisanship. This is a story of neglect.

Mr. President, understand that what we are talking about here is a situation that resulted in all competitors being driven out of business, a situation that has resulted in only one last American manufacturing company, Smith Corona, manufacturing a portable typewriter or word processor, and faced with the continuation, notwithstanding that it has won every court case it has brought against this illegal dumping, but with Brother circumventing the orders, moving the areas by which the products come, same product, same manufacturer, same practice; they have managed to thwart the tariffs that have been placed upon them.

And we finally reach a point in time, where after 8 to 10 years of litigation, where after Smith Corona has won every single suit that it has brought, every single suit, and it finds itself in a situation where the tariff order still

cannot be enforced, because of this classical case of circumvention.

So no longer does the order lay against a country and a product which comes from a particular country, they circumvent it by moving the places by which the parts are manufactured and then reassembled.

People at Smith Corona, chairman of the board, Mr. Lee Thompson, made a rather sad announcement several months ago. He said that he could no longer compete with these kinds of practices, that notwithstanding the fact that the company had achieved unprecedented results in terms of their efficiency, in terms of productivity—700-percent increase in productivity over a 12-year period of time—a product that was every bit as good and competitive as their competitors'; faced with this dumping, there was no other recourse for them, other than to totally close and eliminate that plant and that operation in this area, or to move its manufacturing base and components of that plant to Mexico.

How often have we heard that sorry saga? How often have we heard of the plants and the jobs that are lost, and then only to hear and have insult added to injury, that the job that paid \$17 an hour in the small town of Cortlandville, outside of Syracuse, NY, would be moved down south to be replaced by a job that pays \$3 an hour.

Mr. President, both Senator MOYNIHAN and I and our staffs, and, yes, the Commerce Department and others, and some at the White House, have worked in a last ditch effort, an 11th hour effort, to remedy this situation, and to bring about a process whereby an enforcement order can lie for these kinds of illegal activities, which will force the closure of this plant.

Legislation was provided for both in the energy bill and in the tax bill to amend this, to make that legislation more palatable, so that it would not come into conflict with GATT. Indeed, exhaustive negotiations so that we would not come into collision with the general overall theme of free trade were conducted. Indeed, legislation that the administration had agreed not to veto had come to be. And that legislation was submitted to the conference. It was submitted by my colleague, Senator MOYNIHAN, and myself. It was submitted to staff. They were told that in the balance lay 875 jobs, 875 families, who would lose their jobs, the closure of a plant that would have a devastating impact in the region of Cortland, NY; a loss not only of payroll, but of a lifestyle to that community. We had an opportunity, not to keep them in business if they could not compete on their own, but to see to it that those who were violating the law, those who were engaging in unfair practices, would be pursued in a court of law, that a tariff would lie against them.

Mr. President, now we find that the conferees, after all of their exhaustive

work, after all of their hours of negotiation, after all of their work over the weekend, somehow did not include this provision. Somehow, it did not get in, and what an incredible nonsense excuse-filled laden story we hear. What a story. They would have you believe that it was the staffers' fault on the House side. Oh, no, it was the staffers' fault on the Senate side. Oh, it was the Congressman from Illinois who did not want it. I guess our Senators were not even aware.

Let me tell you something. The Senator from Texas was doggone well aware of this provision. If you want to say, so long to New York, if it was not because we did not have a plant that was deep down in the heart of Texas, that is right; it is in central New York, not in Texas. But those jobs are every bit as important, and those people are entitled to every bit of protection as anyone from any other place in this country. And if it is important to protect jobs in other regions, then it is important to protect not just jobs on the basis that we keep people in non-productive jobs that can compete, but to allow them to compete, and that is what we seek.

When I came to the floor and we offered this, we said let me tell you, this is important, and I said that if this is not included in the tax bill, then do not expect this Senator to just go along, that I will do and use whatever method I can to see to it that we address that situation.

I do not intend to yield. I do not intend to just sit willy-nilly by and say there is nothing we can do, because the House is going out by 12 o'clock. I do not care if the House goes out by 12 o'clock. Unless we get that provision included in the bill, this Senator will not allow that bill to come for a vote. If I have to stay on the floor all night and all day tomorrow and do whatever I have to, I am prepared to do it. My people are not going to be sold out for cheap partisan politics.

And that is the way I see this situation.

Mr. President, I did not come down here to be the best loved. I am not. I want to tell you something. You may not agree with me on every issue. Not even my momma does that. But I am not going to be rolled up, because a bunch of staffers play games and take it onto themselves that they know what is best. They think they know what is best. OK.

I want to tell you 875 peoples' lives are on the line and I am not going to permit it simply because we are going to do business as usual and we have this little deal and that is what it is. It is a little smart guys deal that over there we go out and we send you this and if you do not get it back to us at 12 o'clock the way we like it too bad. I have to tell you we serve notice, both Senator MOYNIHAN and me, and let me

refer to an article in the Syracuse Herald published on this past Sunday, entitled "Pair Tried to Save Cortland Jobs."

WASHINGTON.—Two New York Senators, Senator D'Amato and Senator Moynihan, Saturday threatened to hold up passage of a tax bill unless it includes a provision to save the jobs of Smith Corona workers in Cortland. With Congress trying to adjourn before Wednesday's Yom Kippur holiday the Republican and Democrat can use parliamentary procedures such as a filibuster to delay or prevent passage of the legislation.

So it goes on to say, and I quote:

It is a matter of wanting fairness for our workers in the Smith Corona plant.

Mr. President, that is exactly what it is. If they cannot compete against the foreign product, that is one thing. But when the courts have ruled repeatedly that that company has been dumping, that is another thing.

And these people as in any other plant, in any other case, deserve to see to it that there is enforcement, that will not permit this circumvention.

I have to tell you, I intend to see that I do everything possible to bring that about.

Here is a question, and some have asked me, "Senator, if this legislation is passed, will that save the jobs?"

I can only tell you that we have to rely upon the word of those in charge at Smith Corona. They did not just fold up the plant and move it out after they lost or after the first case was decided in their favor and they still did not get addressed their grievances or the second case or the third year or the fourth year or the fifth year. They hung in and they played by the rules and when it finally came down to a point where circumvention continued and the pattern of dumping illegally continued, they had no recourse. I believe that those workers at that plant should be given an opportunity to give that plant management to give the Smith Corona people an opportunity to see if the law is applied, if fairness is applied, whether or not they will change their mind. That is what this is about.

I cannot understand how it is that we have reached this stage in this time in this glorious body that we do not care about the little guy. If there is animosity out there in the country toward government, toward politics, toward politicians, I understand it.

If I lived in that community, or if I were one of those workers, I would be wondering how is it that you allow this to take place. How is it that this Government, that our Congress, that our Senate, that our trade people, cannot bring about a redress of this situation?

How is it that when we talk about freedom to compete and competition and fairness that it turns into empty, shallow words? We wonder why there is a lack of faith in terms of those who look upon us in Government. No one dear.

Who will put food on the tables of those families? Who will take care of

their needs? Some of them have worked in that plant since 1947 and 1948, a lifetime, and now in their senior years to lose their job, some with children in college, mortgages, notes to pay, automobiles to run, responsibilities. What is their fate? Is it to turn to the public assistance rolls? I hear all this rhetoric about jobs. I hear all this talk about who is going to do best for what. Elect me. I am going to help. I am going to give you job training. I am going to give you public works.

BS. That is what they should say to all of us. You are all a bunch of nonsense, and I have to tell you the first place where you go to see the biggest bunch of hypocrites is right here, right here. You do not give a damn about the people, not a damn, because if you did, you would not let this take place. It is an outrage, absolutely a disgraceful outrage. And then I will hear some Senator come and he will tell me, oh, Senator, we will give you hearings, early hearings in the first part of the year.

Is that really going to help these people when their jobs are gone? They are gone. You know something: There has never been a good-faith effort on the part of the international staff on the finance side to come and to understand what we were trying to do and to work with us. Never. Stonewalled us. Stone face—give me his name. People should know his name. Robert Kyle, chief international trade counsel, Senate Committee on Finance.

Oh yes, Kyle, you have a job. You have a job, but 875 people, they will not have a job. They will be out. They will be out on their can. Did you ever try to meet with our staff to look at what could be done? No. No. Absolutely not.

And then I hear my other colleagues say, oh, I cannot lose jobs, because this company is headquartered in my State.

Let me tell you something. If Smith Corona were dumping illegally and they were breaking the law, I would not be down here making this battle, and I do not think any other representative should be saying we are going to countenance the breaking of the law simply because the company is in his or her State. That is bull.

I want to tell you I did not get elected to be anybody's favorite friend, and I am not. And if you think I am going to roll over on this, you are wrong, and I am not.

I want to read, Kyle, what you have done. Very, very interesting. Give me the list. You will have your job. You will have your job. But these people, it is a good chance, most of them will not.

Robert DeGroff. He just started August 24, 1992. Helen, Joseph. He works at Smith Corona. Most of these people get paid \$17 an hour. Maybe they can follow their job. Maybe they can go down to Mexico and get \$3 an hour.

Christine Pirozzi. She started on May 26 of this year. I guess it is going to be

pretty tough. She will be one of the first laid off. Angela Chatterton. She started May 6, 1992.

These are the people who stand a good chance of getting laid off. No one knows but we know there are 875 and that is most of the manufacturing base.

Starkweather, Paul. He started in April of 1992. And there is Williams, Adam. He started April 1. What a joke on him. Here he is before the end of the year. April 1. He may or may not have a job the end of this year.

Veronica Fisch. She started March 30, 1992. Lawrence Merrithew. He started same day, March 30, 1992. And Tracy Truman. Tracy started same day, March 30, 1992. And Janine Flynn. She also started March 9, 1992. Miles McCarty, March 9, 1992.

Michael Driscoll, he started February 17, 1992; Douglas Tiedemann, he started February 3, 1992; David Quijano, he started on January 27, 1992; April Lawton, she started on January 5, 1992; Donald Anderson started January 2, 1992; and John Piontkowski started on December 16, 1991; Donald Sevey started on December 2, 1991; Mark Bates, started on November 25, 1991; Craig Calzone started on November 11, 1991; James Bottrill started on November 28, 1991; Susan Tripp started on November 18, 1991; Martin Brown, he started on the 14th of November, 1991; Karen Westlake started on November 7, 1991; Cindy Ondrak, she started on October 3, 1991. And then we have Victoria Smith, she started on September 30, 1991; and Everest Tucker, he started November 5, 1991; and Evelyn Chung, she started on November 3, 1991; Amy Berger, started on August 26, 1991; and Bridgette McAdams, she started on August 19, 1991; Stephen Proscia, he started in May, May 13, 1991; Maurine Jaworski, she started in April, April 22, 1991; and David Stahl, he started April 1, 1991; and Amanda Wauchope, she started March 25, 1991; Michel Sukkarieh, he started on March 11, 1991; Thomas Geremski, he started on March 6, 1991.

These are real people, Mr. President. These are real people who should have an opportunity to keep their jobs. And that opportunity should not be precluded because we have a bunch of fat, happy politicians who want to keep doing business as usual and do not have the courage or the guts to stand up and protect American jobs, protect them when they have been dealt with unfairly, when we have had the kind of practices that I have outlined, where there has been dumping.

It is one thing to say, "We don't make a good product; we can't compete." It is another thing to have somebody breaking the law. It is another thing to have my own colleagues who just turn their backs on this thing with cold indifference, that they would just go on their way as if this was not happening.

Well it is happening. And I hope it bothers them, and I hope I bother them, and I hope that hearing this over and over is going to make a difference. And if I get them angry, maybe they should take a look. And I say, I am sorry if I got on your nerves, but what are you going to say to Thomas Geremski, who just started working on March 6, 1991; or to Scott Brown, who started on March 4, 1991; or Scott Hilbert, who started the same day, March 4; or Jody Rawson, who started on March 4, 1991; or Paul Sheldon? Because at least one or two, if not all of those people, are going to be laid off, they are going to be fired.

And I have to tell you, if we want to go home without completing our business, let us understand that these people are going to be victimized as a result of that. And I am not going to stand by and go home with business as usual. Their lives are going to be dramatically changed.

And when people say to me, well, Senator, How do you know if indeed you passed this legislation something would take place, that their jobs would be saved? I cannot tell you with definiteness that I absolutely know with assuredness that their jobs would be saved.

But I can tell you this: that the chairman of their board spoke to me this evening, just 2 hours ago. And I told Mr. Lee Thompson, it does not look good.

I will characterize his reaction by saying that he was deeply, deeply saddened and taken aback. I would characterize him by saying he is an honorable man who, if given the opportunity would do, and already has done, everything he can to keep this company from being closed, at least that portion of the manufacturing that would be sent to Mexico.

I would say to you that we have an opportunity, even at the eleventh and a half hour—and I cannot understand why people do not want to give these people a chance.

I do not know Paul Sheldon—I know that he is a worker there; he started on March 4, 1991—or James Porter, who started on January 28, 1991.

But I can tell you that each and every one of them should be given an opportunity to hold his or her job on their ability. I can tell you that a plant line and a production line should not be closed down because we lacked the courage to stand up to the special interest groups.

Oh, yeah, and those special interest groups are plenty.

Well, let me tell you something. We have some of the biggest corporations even in New York who do not want companies who are breaking the law to have an enforcement procedure against them. Incredible. They are more interested in their bottom line than what is right, and that is jobs for Americans.

I guess them getting up there, making their highfalutin speeches about free trade. Well, I am for free trade, but I am for fair trade and I am for fairness. And what we are about to perpetuate by passing this bill without including that provision which would see to it that this illegality is not perpetuated—Is it free; is it fair? It is not free, and it is not fair, and it is a disgrace and a discredit to this body.

And to say, oh, it is the House, you know, we will blame the House. Our conferees had to sign off on that report. They signed that report. They approved that report.

And let me tell you, they knew that both Senator MOYNIHAN and I had a just cause and a just case and we said if you are going to have a tax bill, we want to see that this situation, this situation that threatens the livelihoods and has already resulted in the loss of many manufacturing jobs, that it is stopped; that there is given an opportunity for this company to say we will stay here now; that we can compete fairly, now that a tariff law and order which has been approved by the courts will have the opportunity of being enforced.

So, Mr. President, I do not intend to make it easy for this body to look the other way and to shirk its responsibilities. I do not intend to be everybody's best friend and walk out on the jobs and the hopes and the aspirations of these 875 families. And it is more than 875 families.

If we can look the other way with such indifference now, then what is to say that we are not going to in the future. What is it to say that we have looked the other way over and over in the past and because we did it in the past, does that mean that we should continue this?

Now, again, we are in an election year. And I hear the Presidential candidates talking about who is for jobs and who is for fairness and how they are going to protect them.

Well, I want to ask you something, Mr. Clinton: What are you going to do as it relates to this situation? What would you do? I would like to know.

Would he walk home and allow this situation to take place if he were here in my place? Or would he say, no, I am not going to allow this to continue?

And I tell you, I went to the President and his people and said: Are we going to allow this to continue? And I understand they want free trade. I want free trade, but it has to be fair.

That has been an element that has been missing for far too long. Who hires the big fancy lobbyists on both sides, who come in and who plead very persuasively, but just leave out some of the salient points and facts? And how do we get these laws manipulated in such a way?

Then, I think the best argument of all, which really makes me sick, is

when I hear them actually talk about the consumer. They say, "We are worried about the consumer because, if we can get a price cheaper, is that not better for the consumer?"

They are not interested in the consumer. What happens when Smith Corona is totally out of business? What happens if the only way they can compete is to go offshore to cut down their payroll so they can compete against those who are illegally dumping? Incredible. What happens to the taxes that those 75 people pay, both Federal income tax, State income tax, and those revenues that were produced as a result of their home ownership, and they are paying taxes locally, and they are purchasing goods and services that they are no longer able to participate in? What happens?

Then we hear the shoddy, ridiculous argument that is put forth—in some of the great newspapers, too, of our time, some of the great financial papers, who would have you jump over the process and who will excoriate me on the editorial pages and say I am trying to be a protectionist.

I am not trying to be a protectionist. What I am saying is, if an order is made in a court of law against a company for an illegal practice, by gosh, do not circumvent it by a little trickery, then let them start the whole case all over again, and then they move their manufacturing base and again the order is not applicable. The same product, same corporation, same illegal dumping. Yet we do not have the courage to stand and to do.

So, Mr. President, maybe this is because I should have moved and others should have moved more forcefully that I make this plea. And I make this statement. But I am not going to turn my back on Drew Thogode, who started working on January 28, or those who started before him or those who started after him: Joe Mastrangelo; Michael Motyka, they started on December 31, 1990—imagine, on that fateful night, New Years. Andrea Zopf, who started October 22, 1990; and Julie Mazzanti, who started October 1; and Anthony Frutche, who started September 17; and Julianne Wilcox, who started on September 4; and Susan Bova, who started on May 30, 1990; and Kelli Truman, who started on May 1, 1990; and Stephen Gilmore, who started on March 19, 1990; and Frank West, who started on March 5, 1990; and Kevin Gates, who started on February 26, 1990; and Gregory Smiley, who started on January 29, 1990; and Gretchen Sweeney, who started on December 4, 1989; and Brian Belyea, who started on November 13, 1989; and Richard Crow, who started on November 1, 1989; and Lisa Wheeler, and she started on May 5, 1989; and Betty Larson, she started on June 12, 1989; and Thomas Rogers. Thomas Rogers started on May 22, 1989; and James Karpinski, he started on

April 17, 1989; and Elmer McNeal, he started on April 17, 1989; Robert Rycroft, he started on March 28, 1989; and Eric Thorsen, he started on March 20, 1989; and Eugene Allegretto, he started on March 13, 1989; and David Henderson, he started on March 13, 1989; and Keith Hill, he started on March 6, 1989; and Ralph Hill, who started on March 6, 1989; and Karl Oltz, who started on March 1, 1989; and Mark Steiner, he started on March 1, 1989; and Carmen Chappell, who started on February 27, 1989; and Karen Pappalardo, who started on February 27, 1989; and Carol Snover, who started on February 27, 1989; and Patricia Shaver, who started on February 20, 1989; and Stephen Stone, who started on February 14, 1989; and Sandra Weigel, who started on February 13, 1989; and Mary Cleveland, who started on February 6, 1989; and Daniel Frost, who started on January 30, 1989; and Kristine Lane, who started on January 30, 1989; and Robert Dodds, who started on January 4, 1989; and Christopher Abbe, who started on December 28, 1988; and Jeffrey Dann, who started on December 22, 1988; and Judy Sliker, who started on December 19, 1988; and Paul Palen, who started on December 5, 1988; and Frank Racciatti, who started on November 28, 1988; Jeffrey Leitch, who started on October 24, 1988; and Arthur James, who started on October 5, 1988; William Gage who started on October 3, 1988; and Bassam Chamoun who started on September 19, 1988.

You know, Mr. President, something just came to mind, and that is, as you hear these various dates—and these are people, real live people—they started working on those dates. I notice some dates, for example, February 27, three people in 1989 were hired that day: Carmen Chappell, Karen Pappalardo, and Carol Snover—three. Who will provide that employment opportunity in the future?

Some of these people who are now working will undoubtedly move, retire, some may pass away. There has been a continuing of employment opportunity as a result of this facility, as a result of this work. So it is not only the incredible brutality of having these jobs terminated unnecessarily with a company that is willing to stay, that says, "Give us an opportunity to compete fairly. Give us an opportunity and we will reconsider our decision." It is not just 875 jobs—and that is a tragedy. I think it is the callousness in the way we proceed, the callousness in the way we proceed. And it is also the loss of opportunity as this plant continues on an annual basis to hire people.

Certainly it does not hire people at the rate that it once did when we had the great Smith Corona. I remember in those days when I would go to school in Syracuse where I went to college and law school when it employed 3,000 and 4,000 people and when the employment opportunities were even greater.

But even that opportunity of hiring, 30, 40, and 50 people annually no longer will be the case. What a devastating blow to our country. What a devastating blow to this community. What a devastating, I think, insight into what Government has come to. We are so big that we take ourselves to be so important that we do not take time out to make a difference for the little guy, for the people who are important, for the people who are taken for granted.

So we will go back to our States and to our communities and to our undertakings. And, oh, they will be so important for us. But the lives of these people we will have consigned to Lord knows what. Maybe a job training program. Maybe some will be able to land on their feet, maybe even get a better job. But for the most of them, Mr. President, let me tell you that this is by far the highest paying job that they will ever have any opportunity to even hope for remotely. For most of them, they will be lucky if they can find a job for \$5 or \$6 or \$7 an hour. For those who need these dollars to support a family, it is a life and death matter.

We trivialize it by our inadequate response. This matter was discussed at conference for maybe 5 minutes. There was no debate at conference with respect to the importance or the relevance of this matter. There was no debate in conference with respect to whether or not this broke any of the provisions of GATT. There was no debate in conference with respect to whether legally this could be done. There was no debate in conference with respect to the merits. Shame on us. Shame.

And I have to tell you, I understand what is going to take place: Oh, we will sit down; oh, we will do that; oh, we will do the other thing. And people are going to be annoyed, and they are going to be angry, and they should be. They really should be angry at themselves. Every Member of this body has a responsibility. This is not mine. This is not mine alone. Let me tell you something, that if the President, or any other Member of this body, were to come to me and say, "Al, this is a situation that is taking place, I need your help to address this," that I would be there to try to make a difference. And if I did not, then shame on me, and I should not be here.

I am telling my friends, and I am telling my colleagues, that they can and should make a difference, that we should not accept this conference report. And I want to tell you something else, and we will not go into the little favors that were done for this one, and that one, and the other one, and that bill is jammed full of them. This matter that I speak about is every bit as important as any matter in that bill. Any matter. It is the lives of people.

For God's sake, when are we going to stand up and do what is right and not

what is politically expedient? That is why people have disdain for the institutions, and for Government, and for this place as well. Imagine, backing down? We did not stand up. You really mean to tell me that Chairman ROSTENKOWSKI did not want this provision? Nonsense. Nonsense. Anybody who knows the good Congressman understands and knows that, indeed, he has championed causes that parallel very closely if not exactly this situation.

We did not have the courage to stand up and to do what is right. Why? Because we have a Japanese company who has a headquarters in one State and a plant in another State? Nobody tells them to close their plant, nobody tells them to cease manufacturing. What we say is: Compete fairly. Obey the law. And what we want to do is to see to it that there is an opportunity to have enforcement of the law. That is what we want.

Am I angered? Yes. But I am more sickened by our attitude.

Great Senators. I wonder why we dillied and dallied when it came to deciding what to do, whether it be a cable bill, or whether it be taking on Saddam Hussein, or whether it would be dealing—oh, I hear this great body now, oh, what happened, Iraqgate? Let me tell you something, everybody heard that debate. They were down here. We tried to cut off giving that guy money. I remember that. I said: Why are we giving Saddam Hussein loan guarantees? You would have thought I was attacking Mother Teresa. The place filled up. Filled up. Oh, no, we should not do this, it will cost us money. We should not do this. We did that with Jimmy Carter.

Now all of my colleagues woke up, why? Because it is political time. So the whole side over there says, what was Bush hiding? For God's sake, everybody knew it or should have known it.

What are you hiding today: 875 jobs. If you did not have the courage to stand up to Saddam Hussein and cut off loan guarantees before he made an invasion, then do not go talking about Bush and the State Department were cozying up to him because you all knew and you should have known and made believe we did not.

What State had rice? And what State had oil? And what State had this, and what State had that? They did not care about morally that he was gassing and killing Kurds and innocent women and children. They did not give too damns and a holler.

No wonder people think what a bunch of hypocrites this great august body and Government is about, because we are. But when it becomes the rule of the day—I understand not having the courage to stand up on every issue, but when every issue that has any import and it means that you have to make any decision, you are afraid to make a

decision, you know what? We do not deserve to be in office. I have to tell you, I will not miss this body. Incredible. Incredible. This is a joke. Absolute joke.

I wonder if somebody is going to come out there and say because I have referred to the body in the disparaging terms that I have that I have violated some rule. That will be the next thing. Well, too bad. Too bad. There is a higher rule. And you know something, we all violate that if we allow these kinds of things to take place. I have to tell you, I am not asking for any medals for courage or for leadership. But I have to tell you there are very few around here who should get any of those medals.

Mr. President, I am going to do everything I can to block the bill that has more special interest and it has less concern for real people, people of Cortland. They are entitled to that. They are entitled to have somebody stand and make this battle.

I am pleased that my distinguished senior colleague, Senator MOYNIHAN, feels the same way. No doubt he will express himself in a much more congenial and maybe even a more cogent manner than this Senator. But I respect the fact that he has the courage to indicate that he is going to do everything that he can to see to it that the legislation that we have sponsored is at least given an opportunity to be enacted.

Let me say to my colleagues and to my friends, before you come back and say there is nothing we can do, that the House has gone out, there is something you can do. You can go back and reopen the conference. You can send that back tonight. You can send it back in the morning. You can send it back before the House goes out at 12 o'clock.

I do not give a darn that there is one person or two people with their special interests who say, oh, no, this is going to hurt my constituency. Look, if enforcing the law and doing what is right is going to hurt your constituency, they cannot complain. People are entitled to protection under the law. If you want to be a special interest, that is a different matter, then say it, it is a special interest. It is not grounded in any kind of morality, or legality, or fairness. It is not grounded in equity to argue to say, well, this plant is headquartered in my community and, therefore, I have to condone what they do and how they break the law.

Logic 101, if you say that because they are a company that is in your community and that you are a Representative, does that mean you turn your head the other way as they undertake practices, whether it be polluting the lake or polluting the rivers? And we did that for years because they were the biggest employers, and that is why we have so many problems. Does it mean that we condone unfair labor

practices where they take advantage of their workers, because, after all, they live in our community? Or that we take for granted the fact that might have a subsidiary that is breaking the trade laws and violating the dumping provisions and putting people out of work in other areas of the country?

But after all, that is OK, it is acceptable because, why? They are in my community.

That is not what this is about. That is not what a nation of laws is about. And that is not what our representation of our constituents is to be about.

It is not. And this is not a matter that should be equated to whether or not a military base or a Government facility is developed in my State as opposed to your State whereby reasonable people could disagree on the merits. This is a situation where there is no case. There is no argument. You are breaking the law. You are evading the law. Now we want to make believe it is not happening.

Now, let me tell you. I do not intend to get into the nitty-gritty of the bill yet, but I will tell you that we have the provisions of that bill read, every single line, every single word, and I intend to examine some of those provisions in the Tax Code to ascertain how it is that they found their way into this conference report, how it is that they had the time to discuss these wonderful and illuminating matters but they did not have the time to discuss and debate more than in a very perfunctory manner the question of whether or not legislation that would remedy this evil, remedy this wrong, should be included; why it is that the people of Portlandville in central New York were not every bit as important as the people in every area of this country who sought to have legislatively their grievances dealt with, the inequities the tax and tariff provisions may have created, or as a result of lack of provisions have opened loopholes for them to be taken advantage of.

Now, why is that? Why is it at this hour, at 20 minutes to 11, we cannot take up these provisions?

Now, let me tell you. Some have warned me. They said, "Alfonse, you should not say those things. You should not talk about the staff."

Why not? Why? Why should I not? Is it good enough for Lisa Wheeler, if she loses her job, or she may lose her job, or Betty Larson? Are they just a statistic? Are those people who have this great power to recommend to just willy-nilly turn it over—let me tell you something. I do not believe that staff really determined what got into this bill. I think the staff was used, and so what we hear is so-and-so does not want it in. And then at the end we hear some Senator say, "Oh, I did not know you wanted it in. Oh, I did not know anybody really wanted it."

Come on. Senator MOYNIHAN and I were down on the floor Saturday. We

spoke about this. We brought this issue up months ago, weeks ago. Our staffs came together.

Now, why is this? Why is this?

Why is it that we can just shut it out so easily? How can it be? How can it be?

And I have to tell you something, I do not believe that my colleagues on this side fought for this provision. They gave it lipservice, absolutely gave it lipservice. There is just no doubt in my mind—just gave it lipservice.

And so there goes 875 jobs and the potential for other people and the fact that we now will not have fair competition.

Oh, by the way, that will be nice. I guess Brother would be even happier if the Smith Corona people could not move their manufacturing facility to Mexico because then it would not have any competition whatsoever. And then, Mr. President, do you not think that it would be selling its typewriters at \$50 or \$75 or whatever. In some cases they have a 60-percent tariff, 60-percent tariff placed on them below what it cost them to produce. Because we understand that where there is competition, we have an opportunity—and we have laws to see to it that there is competition—why then there are competitive prices. Where there is no competition, then there will be no relationship between what the cost and what the eventual price of that product will be.

I daresay, given Brother's record as it relates to breaking the law—and I say that because they have broken the law systematically for these past 10 years—who is going to protect the consumer then? And then we will hear people say, well, we should be—and by the way, there may be some who are happy with the fact that there are jobs that Brother allows to stay in this country because if we continue to see the spiral continue, we lose \$17 jobs, Mexico gets the \$3 jobs, Tennessee gets the \$6 jobs. At some point in time, if enough jobs go down to Mexico, why, they will probably be contracting the jobs back with us as their wage rate goes up. And who knows, maybe we will get some of those jobs back, screwing these parts together. We just put the people there and screw them together because that is what they are doing now.

That is a pretty apropos word about screwing the parts together, and they call it a screw plant. I have not made that up. It brings some humor to this Senator, as I mention this, that they have this screw plant in Tennessee where they literally take these parts that come from Malaysia and Singapore, and they put them there and they screw them together. It is really a phantom plant.

There has been a court decision recently which is being appealed that said it is not a phantom plant; it is a

real operation. That is testimony to the Justice Department and their inadequate representations. That is about all that it is, because they sent a rather inexperienced lawyer up to handle this court case. Between the International Court of Trade and the Mamelukes they have on that court and the Justice Department's people, who leave something to be desired, why, we had this incredible decision notwithstanding that there was no foreign content of any kind—and only the wrapper, et cetera, was purchased here—that they came out with this contorted decision, some would say, that makes it a legitimate plant.

I thought I would share with you a little bit of this almost humorous comedy, and it is really a comedy. If it were not so tragic, one could sit down and laugh at how they have thwarted and dealt with the law. It is a fiasco. It is an incredible fiasco.

Now, I have to tell you something. I know DAN ROSTENKOWSKI. I did not grow up with DAN ROSTENKOWSKI, but I have been here for 12 years. He has been here for longer. I have had an opportunity to observe the Congressman and the chairman of the Ways and Means Committee. I cannot believe some of the notes that have been passed to me that would suggest it is the Congressman who is opposed to this. I do not believe it. I do not believe it. I do not believe that he would be opposed to a provision that would bring about some fairness.

We may differ on philosophies, but that is not the Congressman who I have come to know and respect. That is not the person I know. There is more to this. Because I want to sell you something. Anybody, anybody looking at this matter on the merits regardless of where this plant is located—Portlandville happens to be in central New York—if they could not come to the same conclusion, I would stop talking. If they would look at this objectively and say that these people are not, should not be given this opportunity, I would stop. I do not believe that to be the case.

I know we have some thunderheads in the Congress, but I have to tell you something. It seems to me that a majority, the vast majority, no matter how contorted the reasoning or logic, if you were to say that this plant was in a different area and they had no local considerations, and it was not this Senator offering this amendment but anybody else, it was Senator Anonymous, or Congressman Anonymous, they would have to say, yes, of course, we should do this. Of course, we should see that the law is adhered to, that the law is obeyed.

Now, let me, if I might, take a brief respite from the reading of the names so that—and I wonder; here is a name, young lady, Lori Biviano, started April 5, 1988. I am wondering if Lori Biviano

is not related to Judy Biviano, who has worked with our distinguished minority leader, Senator DOLE, for so many years.

I would not be a bit surprised. What I am suggesting to you is that these families reach far and wide. The consequences sometimes reach a lot closer than one would think.

Let me read the testimony, if I might—this is when this matter really came to my attention in a very vivid way by—Mr. Lee Thompson. He is chairman of Smith Corona. This was testimony that he gave to the Banking Committee on July 23, of this year.

Prior to his giving his testimony to the Banking Committee, he had paid a visit to my office. He went over in some detail this incredible saga of how it was that he had come to this conclusion and his board of directors had finally taken that action of saying no longer can we continue this money-losing operation, because Smith Corona indeed, as a result of this dumping by the Brother Corp., is absorbing some huge losses.

He starts out:

Mr. Chairman, members of the committee, my name is Lee Thompson. I am chairman of Smith Corona Corporation. Thank you for the opportunity to testify before you today on U.S. competitiveness.

U.S. business can compete with anyone. Our companies are competitive in the production of goods and services across a broad spectrum of business endeavors.

What is competitiveness? The President's Commission on Industrial Competitiveness put forward a useful definition in 1985: "Competitiveness for a nation is the degree to which it can, under free and fair market conditions, produce goods and services that meet the test of international markets while simultaneously maintaining or expanding the real incomes of its citizens.

Competitiveness is the basis for a nation's standard of living."

Note the important qualifier, "under free and fair market conditions." This is where I want to put the emphasis of my statement today, and it is where I have the most direct experience.

Today Smith Corona stands as the Nation's last remaining manufacturer of portable electric typewriters and word processors. In the coming months, however, Smith Corona will join the ranks of so many of our Nation's former domestic manufacturing concerns headquartered in the United States but forced to move manufacturing operations offshore to compete against foreign competitors who compete on terms inconsistent with fair trade.

The prospect of losing U.S. manufacturing in the typewriter industry to low wage foreign sources may seem a small footnote to "globalization."

Oh, Mr. President, how so true those words are. Here is Mr. Smith testifying before our committee. You know, I know, and I have a feeling that while I make this statement and try to get some kind of recognition as it relates to what this loss means, that it pales in importance to "Monday Night Football." It pales in importance to one's own concerns of when am I going to go

home, or when are we going to wrap this up, or when is the Senator from New York going to sit down, and when can we get on with this.

Listen to his statement. It is pathetic:

The prospect of losing U.S. manufacturing in the typewriter industry to low wage foreign sources may seem a small footnote to "globalization."

It is a small footnote to just about anything, anything that is going to interfere with what we like to do with our creature comforts, with our own comfort for the moment.

I think we lost heart. We lost feeling. We have lost compassion for people. Maybe we have to become to traumatized by the machine of bureaucracy and Government that even those of us in this august body have lost the capacity to continue to battle and to fight on to try to change, to make a difference. It seems to me that that is kind of what it is about.

We have become so engrossed in our own creature comforts and our own concerns that the citizen is almost secondary. And he or she would be grateful if we lend them an ear, to give them attention. Most of the time we are so busy that we can barely stand still long enough to give any meaningful consideration to their cry of pain or suffering.

So why should things change at the 11th and a half hour when people have places to go, things to do, campaigns to run? Why should the plight of these people be any different today than it was last year or the year before?

We have become so enmeshed in the trappings of the office and the power, and all that goes with it, that I think that many good people have forgotten why they started on this journey of public service.

I cannot believe that, for most people because they thought they could make a difference. Somehow along the way it is easy to become jaded, to lose that sense of doing what is right because it is the right thing. Maybe, as this session winds down, it gives at least this Senator an opportunity to take a look at where I have been, and maybe more importantly what I should be doing and should not be doing as it relates to the conduct of this Senator, and standing up and listening and trying to make a difference for our people.

Mr. Thompson's testimony goes on. He said:

Where borders are coming down and the production engine is fueled by the lowest cost, most efficient inputs in open competition, while their ideal seems to represent what is best about the hope and opportunity inherent in the United States, it also represents a naive, simplistic, and destructive approach to real-world public policymaking.

Domestic manufacturing is the driving force behind much of the growth and expansion in our economy. Based on quantitative information, the Chamber of Commerce fig-

ured the importance of domestic manufacturing and its contributions to a community's economy to be an additional 64 non-manufacturing jobs for every 100 manufacturing jobs.

That is an incredible statistic. So when we talk about losing almost 1,000 jobs, manufacturing jobs, in Cortland, we are also talking about the loss of almost 600 nonmanufacturing jobs in Cortland.

These jobs range from wholesale and retail trade to transportation, finance, business services and so forth. Aggregate personnel income associated with additional manufacturing jobs was sufficient to spawn seven new retail establishments. Maintaining domestic manufacturing is clearly a key to global competitiveness and our continued economic success.

While pursuing a fuzzy notion of global free trade, our Government has missed its real effects on American manufacturing. I fear, Mr. Chairman, that our current trade and competition policy will lead to the eventual demise of U.S. manufacturing, competitiveness and opportunity, and destroy all that led companies like Smith Corona to become world leaders.

Smith Corona is a valid illustration of both the success of U.S. competitiveness and the failure of our Government to sustain a competitive marketplace.

For more than 100 years, Smith Corona has been the world leader in the manufacturing of portable typewriters; first manual, then electric, then electronic, leading us to word processing. The typewriter industry has long been driven by design ingenuity, features, consumer needs, and market dynamics such as pricing. In the mid 1970's, our foreign competitors took a new approach—unfair pricing. This divergence from fair competition sent the industry on a race to the bottom.

Just two days ago, we announced the eventual relocation of our manufacturing operations to Mexico, costing 775 of our employees their jobs. Intense predatory pricing recharacterized the whole nature of our business. Were this pricing based on features, quality, performance, or most importantly, efficiencies, the market would have been enhanced for both consumer and producer. However, our foreign competition did not have better costs of production, efficiencies, or other means to reduce prices.

Rather, a protected home market permitted them to set upon the U.S. market, knowing that barriers to price competition protected them at home.

Mr. President, what Mr. Thompson was talking about was exactly what was taking place. Brother—that is a good name, Brother. You do not need a brother like this around. This is Brother. They had no competition at home. We do not get access to their market. So they can keep their prices at whatever level they want, and then dump their typewriters here. That is exactly what they did, because I do not say this. There are a number of court cases, over and over and over. Commerce Department rulings. Portable electric typewriters from Japan, Treasury Department, Federal Register notice, 1975; portable electric typewriter from Japan, 1980, antidumping order, 45

Register 3618, Department. First dumping order in 1980, Mr. President, 1983, portable electric typewriters from Japan. Final result, administrative review. Portable electric typewriters from Japan. Final result, administrative review. And on and on and on and on, and in every one of these cases, we find antidumping orders.

Finally, we come down to certain personal word processors from Japan, antidumping order, 1991. They just circumvented it. Nine affirmative decisions. Nine. And we cannot get a tariff order placed on it. I did not say they were dumping. And, Lord knows, if you get the Commerce Department to find out and come down with a ruling that this has been the case, and the Treasury people, I mean, we are talking about the world's greatest free traders. They do everything to look the other way. When they come down in nine cases and find that there has been dumping, that is rather indisputable.

So he says, "To wit, the managing director of our Japanese competitors recently admitted in the June 22 Financial Times article," and the articles were attached, "that his company, Brother Industries, has tolerated"—listen to this, because this is the Japanese manufacturer himself—"has tolerated losses in its U.S. operations to secure market share. Put another way, they circumvented U.S. laws and continued dumping their products to increase sales at the expense of U.S. manufacturers. As each of you must know, U.S. companies cannot survive by selling below-cost overtime."

Some of my colleagues were a little bit upset with Mr. Thompson for what he went on to say. I can tell you that he should be upset with us. He should be upset with us tonight in the Senate for acquiescing, for keeping legislation dealing with this problem out of the conference. He should be upset with the House of Representatives, the people's body, for not permitting this legislation to even be considered, and I have to tell you that I do not blame him. I think he was rather mild in his criticism, absolutely. He said, "To our Government I say, wake up, this is the real world of competition. If companies cannot turn to their Government to provide conditions of fair competition, predatory pricing will force U.S. companies out of business or offshore."

Mr. BAUCUS. Will the Senator from New York yield, without losing his right to the floor, so I might make a unanimous-consent request on behalf of the leader as a technical formality so that he might undertake certain actions.

Mr. D'AMATO. Yes.

The PRESIDING OFFICER. The Senator from Montana is recognized.

#### UNANIMOUS-CONSENT AGREEMENT

Mr. BAUCUS. Mr. President, I ask unanimous consent that the majority

leader, the Senator from Maine [Mr. MITCHELL] be designated as an Acting President pro tempore until the Senate next convenes for the purpose of signing duly enrolled bills and joint resolutions.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAUCUS. I thank the Senator.

#### FAIR TRADE AND FREE TRADE

Mr. D'AMATO. To continue, Mr. President, our hearing that was conducted on July 23 got quite some attention, because Mr. Thompson went on to say: "In an effort to end the dumping, Smith Corona initiated actions to obtain relief through the fair trade regime mandated by Congress. Since 1979, we have prevailed in eight"—excuse me, I said nine, but it was in 8—separate antidumping decisions.

Despite this string of successes, the dumpers have never been forced to comply with the dumping orders. Instead, the targets of our action have persistently, cleverly and with the support of our Government, circumvented U.S. antidumping laws.

In 1988 Congress responded by creating an anticircumvention law. It was intended to be "black and white", with just enough gray to give the administrators at the Commerce Department the flexibility to address new types of avoidance. Yet, Mr. Chairman, as we have experienced time and time again, discretion divorced from a focus on the statutory purpose too often results in bad decisions and lost jobs.

For example, after passage of the 1988 trade bill, foreign manufacturers found that shifting the base of a company's assembly operations would allow them to evade dumping duties. By establishing a "phantom factory," where virtually no value is added other than "mere assembly".

Mr. President, if you recall, I said if we had this plant that is otherwise known, because sometimes the plant itself is put up in a way where they literally use screwdrivers and prefabricate the parts that come in, none of them manufactured in this country, all of them from abroad are then basically assembled here. We call that a phantom factory where virtually no value is added other than the assembly, the workers who are hired to put these parts together but no content from this country, no engineering from this country, no skills other than putting together.

It is an avoidance. It is a sham, it is circumvention. It is wrong. It is wrong.

A dumper can claim that the U.S.-assembled typewriter is no longer the object of a dumping order—even when the final product is the same identical product subject to an order.

Mr. President, that is what has been going on. It is wrong. It is not right. I do not care how many courts tell you that that plant is not a phantom plant. We know it and in the real world and so when Mr. Thompson says get into the real world, take a look and see what is taking place here, he is not wrong.

For those who decry Smith Corona moving offshore, maybe we should decry the lack of action by the Commerce Department over the years, the lack of Congress over the years passing legislation to deal with this and in other cases wherever they may be, these situations.

We should not criticize, oh maybe, we should have sought another remedy, another forum. Our business should be how do we help him. I tell you something. I as a Senator from New York have a responsibility to do and help even those that may take place somewhere else, if it is taking place in New Jersey, if it is taking place in Hawaii, wherever it might be taking place.

So if we become so parochial that we cannot see the justice and the merit of seeing to it that every person's opportunity to earn a living and a livelihood should be protected by elements of fairness, that we say fairness, that we do not allow people to break the law to threaten and endanger that job. We are not talking about protecting against fair competition but we do say against breaking the law.

Despite this string of successes, the dumpers have never been forced to comply with the dumping orders. Instead, the targets of our action have persistently, cleverly and with the support of our Government, circumvented U.S. antidumping trade laws.

In 1988 Congress responded by creating an anticircumvention law. It was intended to be "black and white", with just enough gray to give the administrators at the Commerce Department the flexibility to address new types of avoidance. Yet, Mr. Chairman, as we have experienced time and time again, discretion divorced from a focus on the statutory purpose too often results in bad decisions and lost jobs.

For example, after passage of the 1988 trade bill, foreign manufacturers found that shifting the base of a company's assembly operations would allow them to evade dumping duties. By establishing a "phantom factory," where virtually no value is added other than "mere assembly", a dumper can claim that the U.S.-assembled typewriter is no longer the object of a dumping order—even when the final product is the same identical product subject to an order.

Does this make sense? It does if your intention is to circumvent U.S. trade laws. Is it good public policy? Only if we wish to displace U.S. manufacturing with assembly line work.

Assembly operations do not generate the high wages, high tech jobs created by real manufacturing. The level of related activity in other sectors I mentioned earlier does not occur. Even recognizing the positive spin-off from a few assembly positions in a transplant operation, the assembly-only operation obviously requires far fewer workers per unit of production.

Think of that. How many workers does it take to put these parts together as opposed to creating them? The grinding, the precision, the kind of technical work, the kinds of creativity, the capacity necessary to train, the ingenuity, and that is why it is for every 1,000 manufacturing jobs there is a similar 650 collateral jobs, if you were

to measure the effect and the impact in terms of assembly jobs, in terms of the spin-off, far, far fewer. If to measure the rate of compensation, I can tell you \$6 to \$7 an hour in this case on the assembly jobs; \$17 an hour for the production for the high skill for the high tech.

Is that what we are about? Is that what this trade policy is supposed to be about? I do not think so. Is that what the law is supposed to be about? Yes. The law says we should not permit companies to dump and to sell below cost. The law says that Brother has to sell its product at or about at least what it cost it to manufacture, not below cost. How is it that decisions have come down that said that 60 percent duty must be paid. It is because they found out that the predatory pricing practices of Brother's was so out of the marketplace, so out of the realm of reality that it came in and imposed this huge fine.

Mr. President, you cannot compete against someone who is engaged in this kind of predatory practice, this dumping.

So, indeed, we find the situation where unfortunately not only Smith Corona but others have been forced out of business or to shift their manufacturing, the very thing that we cling and try so desperately to keep from the United States to a lower cost manufacturing area.

For more than a dozen years Smith Corona has fought at the front lines—

And this is Mr. Thompson in his testimony before our committee—

using every legal and political weapon in the arsenal available to U.S. manufacturers. Yet, we have consistently come up empty. The laws do not move fast enough to keep up with new techniques designed to attack manufacturers; Government officials charged with enforcing our laws have unfortunately too often exercised discretion to let the dumping continue. The natural interest of shareholders in maximizing return on investment says you play Don Quixote only so long.

Mr. Chairman, from the front lines of U.S. Manufacturing, I have witnessed the ravages of unfair trade and noted the inability of administrative discretion to support the advancement of U.S. industry. As vice president of Sylvania Television, and then as president of Singer Sewing Machine, industry's calls for fair trade were dismissed as protectionist.

And how often have we heard that in this Chamber. How often have we heard the arguments that you just want protectionism.

I think there is a big difference and distinction, and it can clearly be made between protectionism and fairness, between equal protection, equal protection under the law and the discriminatory, arbitrary recalcitrance of those charged with enforcing the law and also those charged with the responsibility of dealing with the apparent inequities of the law.

We, Mr. President, fall in that later case. Those of us who have a respon-

sibility to deal with the inequities that would allow a situation to fall through the cracks, we have a responsibility and an obligation to deal with those inequities.

And do you know, that is what my plea is. And it may be a harangue to some. But when I spoke softly, when I asked, when I pleaded, when I had staff go, when we went on bended knee, we met polite but, I must say, nonresponsive replies. They were not responsive. No one has said, "Senator, this bill runs afoul of the dumping provisions of the GATT provisions. We cannot enforce it." No one has said that, because it does not, because it was carefully crafted in a manner to get GATT neutral. It was crafted to seek fairness and fair play.

So, if at times I might appear to be somewhat annoyed, dismayed, and even angry at the lack of response, it is because these people have been denied their petition. This is not my petition. This is not Senator MOYNIHAN's petition. This is their petition for fairness. It has not been given a hearing. It has been denied. And it has not been a subject that came up at the last minute. By gosh, everybody knows that.

But now we find one would say, "Oh, I did not know it. I did not know it was in there, the other one did," "No, this one did." "Oh, no, this staffer did." "No, it is the other staffer."

No, it is all of us collectively. I want to know how we can deny our responsibility collectively.

It is now 25 minutes after 11. I think the House is still in session. I know that some of the conferees certainly have heard this Senator, and they are going to hear him for a lot longer, a lot longer. And, as you know, they can still go back and reopen the conference and say, "Let us look at this. Why should we not take this?"

And I want to know, I would like to know, as a person who brings this petition on behalf of these people, why it is, what is so bad, what is the evil in saying that the law shall be enforced? I would like to know that. Is that something that is terrible? Is that something that is too much to expect for the American workers to have the law enforced that people cannot illegally dump, so that an antidumping order can be enforced?

By the way, that is all we want. We want it so that in the event of a dumping order is found, a company is found to violate the law, that a tariff can be placed against them; not that they circumvent them and they now say, "Oh, no, that was against the company. I am still the corporation comes from Japan, but now the operation comes from Malaysia and Singapore."

And then they meet over here in the States and they put together this phantom factory and they screw these things together and now you know it is no longer subject.

Come on, let us get real. And that is why this gentleman, Mr. Thompson, said, "Let us get into the real world." Maybe I would like to be—because I heard that expression before when I spoke to Alan Greenspan and he told me that all was well, and I told him to get into the real world, because it may be well in your little cocoon where everybody talks to you and everything is well in this plastic bubble of Washington, but it is certainly not well on Main Street. And so when I heard him talk about "let us get into the real world," it made an impression.

I have to tell you, Mr. Thompson went on and he said:

Mr. Chairman, from the front lines of U.S. manufacturing, I have witnessed the ravages of unfair trade and noted the inability of administrative discretion to support the advancement of U.S. industry.

In their wake, we clearly see that a failure to act leads to the wholesale devastation of entire industries and a further erosion of the U.S. commercial base. My experiences have revealed to me certain basic shortcomings in American competitiveness.

First, Americans fail to understand or appreciate the substantial importance of manufacturing. To many, investment in America is investment, without regard to its source or character. The continuing thirst for capital investment has led many of our communities and their political leaders to race to the bottom, willing to displace manufacturing with assembly jobs, so long as the job lands in their community. We ignore national interests in our pursuit of the parochial.

How true that is.

Second, I am concerned about the failure of Government to respond in a timely fashion. By the time relief comes to industry, or even the prospect of relief, it may be too little too late, such as with Smith Corona.

Mr. President, I tell you, I really thought that we could make a difference here. I really thought that this case and the examples of eight dumping cases, eight findings of dumping, was so clear that all of my colleagues on both sides of the aisle, Republicans and Democrats, regardless of where they come from, would come together and say, "Let us deal with this."

I have to tell you that Mr. Thompson's statement as it related to our drive to get those other jobs regardless is true. We have become so mired down in this parochialism that we have lost the bigger picture.

I have no illusions about what will be the outcome. I guess I did have some. I guess maybe I really did think that we could make a difference.

I approached this with my colleague from New York, Senator MOYNIHAN, a wonderful and gracious individual, and he understood the pitfalls. But he approached it, I think, with a very real dedication and fervor to try, even at the last hour, to make a difference. And do you know what bothers me more than anything else is that the very group that over the years has not shown the kind of flexibility I think

necessary to distinguish between free trade and unfair trade; they finally came around. And it was not easy—and it was not easy. And it was not made on any promises. It was made on attempting to do the right thing.

I think maybe some of my colleagues here in the Senate and the House said, oh, well, we will never get the Commerce people or the White House people to sign off on this. And, indeed, when we went to them, we met obstacle after obstacle after obstacle.

We did not give up. Our staffs worked and worked—the first time, the second time, the third time. Finally, when in the energy bill, in the tariff side, we included a provision they understood that we were really serious. Then they looked at that, and they said, no, this provision is violative of GATT. We understand the objective that you are attempting to attain but it is violative.

And the lawyers worked harder and some mornings until 2 and 4 o'clock in the morning. And we finally came up with a proposal that reluctantly—reluctantly—the administration agreed not to oppose.

They were not jumping up and down. They were not celebrating. But, I tell you, I guess it is an admission of my naivete—yes, it is—I was celebrating.

I honestly thought that we were on the threshold of making a major breakthrough. Shame on me. I really thought that we had overcome the major obstacle, the intransigence of the administration. It was an obstacle and it was a major one.

I could not fathom it, Mr. President. My colleagues in both Houses were sent here to represent the interests of all Americans, the unheard of Americans, whose names I read to you—whether it is Biviano or Tracy; that there would be unanimity, not just overwhelming support, but unanimity in saying let us see whether the chairman of the board of Smith Corona is real when he says if given an opportunity, a real opportunity, he would try to keep those jobs here.

We are not even willing to see whether or not that is the case. And in so doing, we destroy the hopes and opportunities of lots of people. It is not just those 775 whose jobs will be lost immediately, but it is those who might have had a job. It is those who earn a living as a result of these people and their employment.

We break a contract—we break a contract with what? Public service. Not just in the Congress, but I guess that is probably one of the more exalted positions of public service. We break a contract with what those who are elected in a democracy should be doing. That is not making a difference to enhance ourselves but it is to make a difference enhancing the quality of life for our constituents; it is for fighting for fairness. And this issue is one where it just cries out for fairness.

Listen, it might be that a year from now, even if we were able to pass this legislation and even if the Commerce Department pursued aggressively the antidumping orders and enforced the tariffs, the Smith Corona people might decide to close and to move. I cannot tell you, or the workers, with any definitiveness that this might not ultimately be the case.

But why should they not have an opportunity to compete fairly? Why should they have a situation where they cannot compete? I look around in the Halls, and I see people who understand this. And they should. I do not question the motivations of my colleagues, they are good and decent people.

But I am saying should we continue business as usual? Why should it be on a bended knee to a parochial interest that does not represent one iota of interest of fairness? That is not why my friends came to the Senate or to the House. I think they came here to seek fairness and to stand up.

And it is not just a matter of what I can get for my State or for my community. This is not a question of where we open a new Federal facility. Reasonable people could disagree as to where or how the merits or the opportunities, and the closeness of the issue is one where it comes down to—yes, politics and political power. We understand that and that is part of the process. And I am going to continue to talk and talk and talk, because someone just asked me about that.

And I have just begun. I have lots of energy. I have lots of time. And, indeed, I have not made many remarks as it relates to this important legislation heretofore, other than to indicate for a very short period of time my deep concern with respect to those provisions that would give to the people in central New York, outside of Syracuse, NY, in the county of Cortland, an opportunity to compete fairly. That is all we want. That is all we want.

By the way, who knows, maybe the Commerce Department will not pursue with the vigorosity, these antidumping cases. I cannot guarantee that they will. The law will be there. They will have the opportunity, the discretion to do this. We close a gaping hole and that is why I was so excited. Because, if you look at the history and the litany of these cases, all throughout the avoidance of these eight cases where they won, eight cases where they prevailed, eight cases where they said Brother is breaking the law, eight cases, eight times we get the circumvention, the pattern of evading the law, they evaded the law.

Oh, well, now what can we do? Close the loophole.

What is wrong with closing the loophole? Why is it that we are afraid to close the loophole, may I ask that question? I ask this rhetorical ques-

tion, why are we afraid to close the loophole? Will we close it after Smith Corona makes its final decision, its irrevocable decision to move? It that what we are going to do?

Are we going to wait for the Smith Corona people to actually consummate a contract for the construction of their plant in Mexico? Is that what we will do? Will we come back here in January, have the induction of our President in late January, have our mighty 100 days, and in some time or some place hold a hearing on circumvention? And if, indeed, at that point in time we pass this legislation, or even legislation which is broader to deal with the variety of problems that exist in this area—and I understand that there are some and I understand that some of my colleagues might be very vexed and say why do you think that this is special? Why is it special for you? I have a situation and it is special to me.

I want to tell you something. As far as I am concerned, I will be supportive of those areas and those conditions which are special and where the law is being violated and where people have a right to petition their Government for a change, to see to it they are given fair play.

Mr. President, I have to tell you, and I do it again. If you told me that the administration would be opposed to this, I want to tell you something, I was prepared to come to this floor and chew them out. And you can believe that. I was going to take them on. I had a speech prepared to say, you want to know something, it is not good enough to talk about jobs, here you have an opportunity to do something about jobs.

I am not making that speech tonight about the administration. I am making that speech about this body and every Member in this body and in the other House. Do not, anybody here, talk about saving American jobs. You do not have the right to do it. And if you do it, I want to know why you did not do something as it related to the people in Cortland, the people in Smith Corona.

Am I getting angry? You better believe it. A bunch of sanctimonious nonsense. That is what I hear. I do not want to hear how am I best to do jobs, what can I do about America. You have a chance to make a difference and to stand up for what is right. That is all we are asking for and not this business about, oh, I have a company and it is headquartered over here and I have a plant.

Let me tell you something. I wish them luck and fair competition. They should grow. They employ Americans. They employ people in this country.

I do not want to discourage foreign investment. I want it here. But they still want to see that whoever it is competes fairly and that American corporations are not disadvantaged. We

just cannot say, oh, it is the administration, the administration. Because I want to tell you something, the administration signed off on this bill and then when it reached the House and they wanted to change it more and make it a little broader, they agreed to sign off on the second provision. Then they did a third one.

Now come on. What has happened? What is up? Let us stop the nonsense. I am not going to let people off the hook, I am not. Absolutely not. Those guys in the House say they want jobs. You want jobs? Here is an opportunity to create and save jobs. Over here in the Senate, the same thing.

We ought to send back that conference report. Absolutely, send it back. This Senator will know when to sit down: When I am told and I am given the assurance that we will send this bill back and insist that that provision be put in. That is when this Senator will be ready to sit down. That is when I will be ready to yield the floor. And if it means I have to keep people in an embarrassing position, why then let us do it.

I have gone to so many banquets and so many campaign stops and so many parades and so many this and that and been nice to so many people, this group, that group, that is nonsense, that is irrelevant. I want to tell you something, all of our campaigning, all that pandering, that is pandering. I am for jobs. Are you really for jobs? I have some program tonight. The woman said to me, the reporter, well, Senator, what about jobs? I said investment tax credits, we have to cap spending. I believe in those. But let me tell you something, something so basic. We should not be debating this. The powers to be—and I am not one of the powers to be, you know that—the powers to be should say, Alfonse, we are going to settle this, we are going to do this. We are going to do whatever is necessary to see to it that it is handled correctly. We are sick and tired to listening to you, besides, and they should be. They should be, really.

I think we all ought to be ashamed. We ought to be ashamed we waited to this point. We all should be saddened. Really. It is not a tribute to what we are supposed to be about. It is not a tribute to public service. It is absolutely an abysmal record.

So when we talk about jobs and how do we produce them, here is a good way. What would it cost you to replicate a Smith Corona plant because it is disassembled? What would it cost you to put in a manufacturing operation like this which, by the way, has increased its productivity and efficiency 700 percent over the last 12 years? Mr. Thompson says I can compete with any manufacturer of these typewriters fairly. I cannot compete if they are selling below market and absorbing the losses in their protected

market. That I cannot do. No one can do that. You can be a genius and cannot do it. You just cannot deal in that kind of situation.

So I have to tell you, I understand this action, but what would it cost us? How much do we pay to create a job when a person goes on the relief rolls and then we get into a job-training program and then we send that person to an education, vocational whatnot, then we try to find an entry-level position.

Did you ever figure out how much we would pay for that job? Here we have 775 high-paying, high-skill jobs paying \$17 an hour, gone. I think this case epitomizes the kind of almost indifference you see. It is not good enough to say that it is the administration. Now, we can blame it on them, and I want to tell you and I do not know whether the President or others really believe what I tell you, and my staffers will tell you, I would have come down and probably been much harder on the administration had they refused to attempt to deal with this problem. I would have because I would have seen that as a betrayal of everything I really believe that we are about.

Mr. President, Mr. Thompson went on to say, in pursuing relief:

We frequently heard the claim that adequate discretion existed to remedy our problem.

He asked the question:

How useful is discretion if it is in the hands of those who, for whatever reason, choose not to act? Political leaders need to reflect on why it matters if a manufacturing job is displaced with assembly. Where does the manufacturing go? Where will the skilled labor reside? Where is the value and what are the wages? Does foreign ownership matter? Of course. Who will make the decisions of where we manufacture, do our engineering and design, high technology and where will the profits go? Do these phantom factories represent the future of American manufacturing? To claim them as manufacturing is an exaggeration. To encourage their growth is a national resignation to low wages and decline.

In closing, let me underscore that Smith Corona has pursued every available means to ensure fair trade and secure a competitive marketplace for U.S. manufactured goods. The failure of our Government responding in a timely and effective manner has denied us the opportunities for competitiveness and forced us to join other U.S. manufacturers offshore.

Mr. President, that speech was made by Mr. Thompson on July 23 before the Banking Committee. I think it is a sorry testimony to the lack of action and to the fact that over the years if there was a deficiency in the law, that the people at Commerce and Trade should have been suggesting either administrative changes to deal with this or the legislative changes necessary. I do not think we should have been reduced to this last minute situation where we come in and say, look, this is how desperate a manufacturer becomes, and by the way he has not

promised to keep his plant here and operating if the law is changed.

And I do not blame him. He wants to see it changed. He does not want to give false hope to those people. I understand what it is. And I could not even begin to fathom the kind of feelings they must have. Roller coaster, I was on the roller coaster. I was up on the high point just 2, or 3 days ago, when we finally got the administration and its representatives to say: All right, we are not happy but we see the need, and we are willing to take what they call this rifle-shot approach that would deal with this one inequity and not open up the whole question, which is a very technical legal one, of circumvention.

And so with that, I was so elated and I felt that here we have an opportunity to show people we hear them, that we hear their pain, that we hear their anxiety. I mean these people are crying out for help. And they are so much a part of this great country because in their anguish they have not come and marched on Washington. Lord knows, they have every reason to do that.

These are the good, the quiet people, the enduring people. They pay their taxes. They love their community. They love their country. They educate their children. They do not have time maybe for protests.

Oh, yes, they came together on more than one occasion locally to express their concern and dismay. They have a right to.

I can only tell you that I felt this incredible disappointment where I went from this high of saying: My gosh, we have a chance to save these jobs, and save these people, save their lives, to a point where I was absolutely devastated this evening to learn of how we handled this matter with a casual indifference that some might characterize as bordering on contempt.

That is tough language. But it was a casual indifference. It is a casual indifference when a matter of this importance cannot get all of the conferees to sit down and to discuss this matter in depth for 10, 15, or 20 minutes, for a half-hour, where it can just be waved away, waved away. That is the lives of 775 people, just treated with contempt. That is what we do. And if my colleagues are distressed at that characterization, I am distressed at the facts and the indifference in which this serious situation was handled. I think it is inexcusable.

Now, some might say, well, there are some good things in this tax bill, Alfonse. You will have to pay the price if you stand up here.

And I say to you, we have a chance to let the bill get to the President, let people vote one way or the other. "The final tax bill was being negotiated behind closed doors." This is this article, Syracuse Herald, Sunday, October 4. That was yesterday, I think. "Final tax

bill was being negotiated behind closed doors by House Ways and Means Chairman ROSTENKOWSKI and Senate Finance Chairman LLOYD BENTSEN of Texas. It sets up enterprise zones in cities and makes other changes in the Tax Code." That is an article by Jonathan Skalan.

Now, the point I wanted to make is that this was being done literally at the last minute behind closed doors. This Senator did not get an opportunity, nor was I asked, to come on down and to discuss it. Not even behind closed doors. I was not given an opportunity. And I do not believe Senator MOYNIHAN got an opportunity to lay out the facts, and certainly if he did it was not for any extended period of time.

Now, I understand that we have to do the business of the people, and I understand that we cannot be at every committee meeting at the same time and that we have conflicting responsibilities. Nobody ever even asked this Senator: Do you want to make known your view? Can we get a response back? Can we hear what you think? Can we tell you what our problems were? Can we tell you that the drafting of this legislation is inappropriate?

Now, I tell you, there were lots of things that got into that bill that were not in that bill when it left this Senate. They are not in there. How did that happen? Were there big, deliberate discussions? How did other provisions affecting some of the same things that I am talking about get into that bill?

Mr. President, workers and citizens in my State deserve every bit of protection, as much as the citizens in any other State—maybe not more, but certainly every bit as much. And if that bill does not have provisions dealing with the inequities that I have outlined, then this Senator, as I have indicated, and as Senator MOYNIHAN indicated, will do everything necessary to see to it that it is not adopted in this form. It would be wrong and it would be a betrayal of what I consider to be my solemn obligation, and that is to fight for what is just and what is right and particularly when it is a situation that is brought to my attention in such a vivid manner, when the man who has to make this decision about disbanding this plant is heartsick about it and says: Give us an opportunity and we will fight to save those jobs and keep those jobs in the United States.

I would think the least we could do would be to consider that legislative remedy, that relief which we sought. No one has yet explained to me, either informally or formally, why it is that this provision was not included in the legislation. No one. Staff cannot tell me, staff of the minority on the Senate side. On the House side, forget it, what stories we get. A mixed array: Oh, no, it is not there; this is it; I am going to take it.

Who speaks up for the little guy? Who is going to hear their voice and their plea for fairness? Have we really become so jaded we can sit by and just watch this take place and go on to our next adventure, our next challenge? Maybe ours is such an exciting life that we can pass with indifference this tragedy. If this is not the traveler who finds himself stranded on the road in the wilderness, frightened, not knowing what will take place next, I do not know what is.

Most people have a lot more courage than I do. They are taking the plant shutdown and the termination of their work, not because they did not work their hearts out, not because their plant cannot compete—because it cannot because they have not improved their productivity to incredible levels, but because all of us collectively, both the administration and the Congress, could not treat them fairly, could not see to it the predatory pricing practices which are illegal were not stopped. And on the altar of political expedience, why, we take a copout because, after all, my friend has a plant in his State. They are a competitor of this Smith Corona. So this gives us a reason to look the other way, and we do not look at the merits. My other good friend has one that is headquartered in his State. We do not look at the reason or the merits. So we look the other way.

I wonder, if we were traveling down that road and we saw as we came upon the weary traveler delaying in that road, a sign that identified him as a citizen of another State, we would go by indifferently? I do not think so. I hope not. But what are we doing here? We go by indifferently. "After all, this is not my fight."

I wonder why it is not. I wonder how we can go back to all the American Legions and talk to them about America, how great it is. I wonder how we can go back and talk about how it is that we have a position on the fair free trade bill.

I have heard so many of my colleagues express reservations because they wanted to be sure that there was fairness. They wanted to be sure that American jobs would not be displaced. Here is an opportunity to back up your rhetoric and do something.

So, if we go home and we fail to even attempt to take this up—and I think that collectively we have all failed—and I hope maybe when people give one of these patented speeches about how they are for the American jobs, how they do not want to see these jobs go someplace else. And the American worker—I have to tell you, it would not bother me if somebody stumbled a little bit on those words and maybe think about what our lack of action is and whether we really meant what we said; and, if we become again so enamored at the trappings of our office and

this office that we forgot our real responsibility, responsibility for that weary traveler who is on the roadside or to that factory worker who has done one heck of a job, is a good and decent citizen, who loves his family, protects his community, and adheres to the laws, and is a good worker and produces a good product, and his company produces a good product, but is literally going to close on him, close on him because the people who are elected did not have the courage to do what was right.

They not only did not have the courage to do what was right, but they did not even have the courage to tell him why they refused to do what was right. They did not have the courage to tell his elected representatives why they refused to do what was right.

I would like to know why they would not do what was right. I do not want to hear one of the sanctimonious speeches about we will take it up next year and we will consider it because it is too late for them. Those jobs are gone. That plant, that manufacturing plant will be closed. Those people will be terminated. Smith Corona will make its decision to start to build in Mexico, and they are not going to wait. And every day that goes by has increased the cost to Smith Corona.

If anybody should be commended, I guess they should for not having pulled out of this fight a long time ago. They had every right to. They have never seen a responsive administration or, on the administrative side, they have never seen a responsive legislative initiative that has gotten off the ground. I guess they never will. That is too bad. That is too bad as it relates to this body.

Mr. President, there is an interesting article that appeared in the New York Times on September 1 of this year. It is called "Global Issues Weigh on Town As Factory Heads to Mexico."

When the red brick buildings on Main Street were new eight decades ago, and the autos were bulky, black and few, a local steel company brought hundreds of low-wage workers here to upstate New York from Italy and the Ukraine rather than pay more to local workers.

Today, the steel company has long since closed and a rainbow of sleeker vehicles cruises Main Street. But once again a big local employer, this time the Smith Corona Corporation, is looking for cheap foreign labor.

Rather than importing foreign workers, however, Smith Corona announced last month that it was moving its typewriter manufacturing operations to Mexico, most likely to Tijuana. Although it plans to keep its much smaller engineering, distribution and customer service divisions here, Smith Corona will lay off 875 of its 1,300 workers in the next 12 months.

#### STARTING ALL OVER AGAIN

Smith Corona workers were generally unwilling to discuss the pending layoffs. But one worker who did talk was Barbara E. Miller, who assembles the typewriter mecha-

nism that flicks the correction ribbon into place. "At 50, I'm not really looking forward to starting all over again," she said recently, as she sat on a hay bale near the large gray barn that she rents with her husband. "I have five weeks of vacation; it's back to scratch."

The decision by the company, whose typewriters have been a common graduation gift for several generations of Americans, has become a centerpiece in the national debate over President Bush's recently announced free trade agreement with Mexico and Canada.

Mr. President, how apropos. You see, if indeed we are concerned about the free trade agreement that is being negotiated, if indeed there are those who say, "I want to keep jobs from going to Mexico, I don't want to be trading high-wage, high-production jobs for the low-wage assembly jobs," then here is an opportunity for those who have raised those considerations to do something about it. Here is a chance to act. We actually have the administration ready to sign off. They have.

So, Mr. President, this is not a situation where it is the administration that we can hold responsible for the loss of 875 manufacturing jobs.

The responsibility at this point for the loss of those jobs rests right here, right here in the U.S. Senate. That is right. Because we have not had the courage to stand up and say, wait a second, Lee Thompson at Smith Corona, we are going to give you a chance. You say this is taking place because of unfair dumping. We are going to give you a chance and hold you accountable. We are going to find out whether or not you and your board are ready to back up your rhetoric. You went and testified before the Banking Committee and made other statements. OK, now we are going to give you a chance.

Now, Mr. President, who has the courage to stand up and act? It is one thing to bash the President and to bash the administration on their lack of enforcement, and it is another thing when we have the ball in our court. We have a chance to do something here. Are we just going to let those jobs in that factory close down, and then we will say the Bush administration did it? They did it?

I want to tell you right here and now that we did it. We failed to act on this. We did it. I have not heard any redeeming arguments as to why we do not stand up and stop that, or at least give us an opportunity to stop it. No. In the conference committee where these things are supposed to be debated, none, none.

Then we hear the House would not take it. You know those deals. You tell me you do not really want this thing, so I will reject it, and that is what happens. That is what happens. We have "ROSTY" taking the blame.

Do you really think he is really upset about the fact that Smith Corona

might, if they get this legislation, decide to stay? Do you really think we are going to blame that on Congressman ROSTENKOWSKI? Come on. I mean, I know I do not come from the big city, and I know I do not come from those areas where they spin these yarns. That is inconceivable. It is nonsense. "ROSTY killed this." What a nice way to cover our political you-know-whats here. Well, it is not going to work, because I do not believe it, and you do not believe it. Nobody believes it. If you said we want to consider something else and you made a demand that is incredible, you know there are lots of ways to do that kind of thing.

It is inconceivable to me, having seen how tenaciously Congressman ROSTENKOWSKI has fought for fairness as it relates to these issues of trade, that he opposed this. Maybe if we were unwilling to undertake something that he deemed important, then you call that a deal killer. Is it not incredible that I now have to speculate? I do not know. Nobody really knows, because we did not really have a discussion, Republicans and Democrats sitting down at the conference discussing this. They did not do this. One chairman, the majority, sat down with the other chairman and, poof, here we have this wonderful thing called this tax package. What kind of discussion did we get? I did not see it, says one to the other. I did not know you really wanted it, says one Senator to the other. I did not really know you wanted it, said one Congressman to the other Senator.

We are supposed to just accept that? So we leave the traveler in the road, and more than that, we run over him. You see, when you cannot make a difference by merely extending a hand, and you do not do that, that is probably a far greater sin than maybe the person who struck the traveler in the first place and left him in the road.

I cannot even be angry at Brother here. They did what they could get away with. But I certainly can be terribly disappointed with the person who walked by and did not even extend a hand when they have an opportunity.

As we talk, we still have that chance, and we still have that opportunity. Maybe I am talking in vain, and maybe I am wasting my voice, and maybe I am taxing people's patience, but it just seems to me that I have no other recourse. I hope that some of us will be embarrassed. I hope that some of us will be shamed. I hope that maybe some of us will say, what is this about, if it is not coming together for the right thing. I have seen so much cheering over the years, over victories that have nothing to do with reality. They have to do with vain, partisan politics and one-upsmanship, one side over the other.

Those are not victories. But I will tell you, this is a defeat. It is not my defeat. I think it is a defeat for every-

body in this Congress, certainly in this Senate. I do not know who spoke to this issue in the House. They have different rules. They have a 2-minute rule. I know some people around here wish we had a 2-minute rule. But the fact is that I think this is a tragic defeat for this institution, that we can go about our business as if this was not taking place.

I guess that most of my colleagues, if they have not already left for home, soon will, and we are probably not getting through to any of them. I really do not know if we can get through to most of them if they would have the courage to do anything to try to change the situation. It is pretty easy to say: I do not have a dog in this fight, so why should I get involved? Why should I get involved? Those 875 people, I do not know any of them, and they cannot even vote for me, and they do not know and would not know what I did or did not do in their case, so why should I rock the boat?

Well, maybe because we are here. Maybe because we should do what is right. But I guess the more I have seen in business and politics—and I have been involved in it for 30 years, maybe a little longer—I really should not be surprised at that.

I remember when I thought that the greatest thing one could do would be to attempt to deal with the inequities that existed in Government and try to make a difference in that way. I guess sometimes I have strayed and lost my perspective. I think probably many do at times. And you can become enamored of the job, meeting the President, the Prime Minister, hearing people make big speeches, and coming to different occasions that only as a result of your office would you ever have an opportunity to be at.

That is nice. But it really falls short of what we should be about.

I am not going to read you the rest of this article that talks about the despair of people and how it is that they are losing their jobs and how it is that the sales have gone down as a result of the kind of competition that they face.

And then you look and you see the manner in which they have to deal with this. If I were to read you this article, then I would probably start telling, guess what I thought about all the Presidential candidates and the debate that goes on, because I think it is all a lot of nonsense, because here we have both Gov. Bill Clinton, Democratic Presidential candidate, and President Bush have detailed plans for extra Federal spending on job training programs.

I cannot believe it. I should not have read that. That is a little piece of the article. Both Governor Clinton, the Democratic Presidential candidate, and President Bush have detailed plans for extra Federal spending on job training programs to help unskilled, and it seems to me skilled workers like those at Smith Corona.

My gosh, wake up, wake up and smell the flowers. Do not wait until it is dead. You have an opportunity. Why should you wait for them to be unemployed? Why should we wait to have to spend millions in job training for jobs that do not exist in that area?

This is incredible. I do not believe it. I do not believe it. You have a chance to save 875 jobs and we have 2 guys running around saying they are for job training. If I were both of them I would hold a conference and say, my gosh, pass that bill; maybe we will get Clinton to do it and get the President to do it and then maybe these turkeys over here will act. Incredible. Incredible.

Mr. FORD. Mr. President, will the Senator yield?

Mr. D'AMATO. For a question.

Mr. FORD. For a question?

Mr. D'AMATO. Certainly.

Mr. FORD. Who is the Senator referring to as turkeys?

Mr. D'AMATO. Collectively.

Mr. FORD. Collectively?

Mr. D'AMATO. Collectively the inaction of the Congress of the United States.

Mr. FORD. I say, Mr. President, I think the speaker ought to be a little more careful.

Mr. D'AMATO. And I recognize my distinguished colleague's admonition and I will attempt to do so, I really will.

I also think that my good friend from Kentucky realizes my frustration with this situation, because there are lives at stake here, and when there is such an obvious remedy to at least help and make a difference, that is what leads to frustration, because we certainly are not acting as responsible legislators and people who care.

This is an action that cries out for us to act and if not by my legislation or legislative action that has been crafted by Senator MOYNIHAN and myself, then some alternative that can deal with this problem, and it is there. Stop an illegal dumping, predatory pricing. We did not say stop competition; we said stop the illegal act. What more do we need? And why is it, why is it that we cannot get it done?

Why? That question begs for an answer. And I have not heard one, and this Senator is not going to be silenced on this issue until it becomes so painful that maybe we will adjourn and others can use their parliamentary maneuvers of privileges to do what they must, and I have no doubt that eventually they will.

But I have to tell you again when we have a situation where both the administration and those who seek the Presidency claim that they want more in job training, they want to help people, I say, look, an ounce of prevention is worth much more than the proverbial pound of cure. Better to prevent that unemployment, better to save that money, better to keep people with

their self-respect and their dignity, better to show people that we do care. What a wonderful thing if we could show people that we really care. What a wonderful thing. Maybe this is one little example. There are many others. This is a way to show people we really care and it will make a difference. It was not to tell them to get the number of dollars for Route 17. This is not that.

This is saying that we are going to give a company an opportunity to compete, an opportunity that otherwise will be lost, and they will simply have no other action than to move to another area to offset the cost differential which they cannot offset if they stayed here. So they then do something that we all abhor. And how many times do we hear the steelworkers and others say why is it you are sending our jobs, trading our jobs for jobs that pay less?

We cannot say that is just someone. That is not a mythical body that is doing that. We are. We are responsible for this reaction. Every Member of this Senate and people might resent that, but by our indifference and our failure to consider to debate to really have a go at this, and we did not even have a go at this, certainly not on the merits and certainly not in terms of any discussion that was held even at a committee level with any degree of exchange. No merits. It is who has the power. I did not know that that was what this was about. I thought that even in the most partisan situations we attempted to look at the merits.

And indeed more often than not many times when I have gone to Members on the opposite side with those matters where the facts establish a need, I have to tell you that more often than not my colleagues on the Democratic side, on the opposite side, have responded. They have.

But this is a matter that is not partisan. This is a matter that enjoys the support of both the distinguished Senator from New York [Mr. MOYNIHAN] and myself. This is a matter that is based on equity, on fairness, and we say that if everybody is so concerned about jobs then, my gosh, how can we be so blind as to turn away from an opportunity to make a difference?

And what will it cost? It does not cost this Government not one penny, not one penny. No revenue is lost, but indeed it is an opportunity to keep taxpayers paying taxes, to keep wage earners earning wages to keep them in a position where they maintain their dignity, their dignity. Do not we care about them?

I have to tell you I would not vote for anybody if I were them, absolutely not. They have a right to absolutely totally say forget it. You do not care for anybody. And I have to tell you I think if we turn our backs on them they have the right to their total disdain of us, total disdain. There is no earthly reason for this not to be and certainly not

to be handled in the manner in which it was. No reason. That is wrong.

Let me read you part of this:

Smith Corona must reduce its costs to compete with low-priced typewriters imported from Japan and Southeast Asia, Mr. Thompson said. Labor costs in Asia are considerably lower than in the United States, though Japan's advantage may be partly a function of more efficient manufacturing processes. Mr. Thompson, however, blames the Bush Administration for not doing more to shield the company from unfairly cheap imports.

He is right. They should have done something prior.

Over the last 12 years, the Commerce Department has repeatedly found Smith Corona's archival, Brother Industries of Japan, guilty of selling its typewriters at unfairly low prices. But Brother has mostly avoided paying punitive Customs duties, by selling typewriters not subject to duties and by opening a typewriter assembly factory in Bartlett, Tenn.

Both Gov. Bill Clinton, the Democratic Presidential candidate, and President Bush have detailed plans for extra Federal spending on job training programs to help unskilled and semiskilled workers like those at Smith Corona.

Let me tell you, the people are more important. They do not want their job training money. They do not want their job training program. They do not want Federal subsidies. They want a chance to work. They want a chance to compete fairly. And if a Japanese company knocks them out, fine; so be it. But they are entitled to compete fairly. That is what they want. That is what this bill does.

If anybody can say that the bill is illegal and it violates GATT, it is not something that is right, I understand it. But nobody has come to this Senator, not one Senator, not one staffer, no one, and said that that is the case. No one.

Now why should these people be sacrificed? Why?

And I will tell you, I am not going to give us a gold star. We flunked. This body and the other body flunks—care, compassion, F; rhetoric, A, A-plus, A-plus, plus. It is a great place for rhetorical. It is a great place for political demagoguery.

Oh, we bash the President. We come down, we hit him, we smack him. Hey, I was ready to do that. I was ready to come down here and take him on and you say you did not give a darn about these workers when they said, we will sign off on this.

And we spent weeks and hour after hour, hundreds of hours working, dotting the "i's," working one out, putting another one in, doing that so that we could craft it so that we could not get into a situation where we were being unduly restrictive and where we could keep real competition but give an opportunity to see to it where the law was being violated that we could stop the circumvention of the law.

Now I tell you, those people, they do not need these programs, programs to

help unskilled and semiskilled workers like those at Smith Corona.

The article goes on to say:

But these programs will not help Smith Corona's workers if the economy does not start growing more quickly.

Well, look, even if the economy grows more quickly, it is not going to help them. There are no \$17 an hour jobs for these people, \$16, \$15 an hour jobs. They are just not there. They are not going to help them. And this 50-year-old woman, she says, at 50 I am not looking forward to starting all over again; a worker at the Smith Corona plant.

And the sad thing is, if it happened and if it had to happen that the plant were closed down, I understand that. That is a tragedy in itself. And then we try to martial our collective forces—State, Federal, local—to do what we can, job training, try to bring in some kind of other alternative employment for people. We understand that.

But, you know, this should not be happening. There is no reason for this to happen.

There is a reason, and that reason is our reluctance to do what is right.

Now I hope I am not violating any rules by saying, we lack the moral courage to do what is right. We do not have the fiber to stand up and say we want this corrected, we want to address this.

Now, if that be a violation, then I violated, I have to tell you.

The article goes on to say:

The New York Department of Labor has "a lot of money ready to spend, but after 18 months of recession here in New York, what can we do?" said Roger A. Evans, a department economist. "The tougher issue is the job market."

Judy K. Davison, Cortland County's employment and training grant administrator, said her office had over the years met virtually all requests for help, although it has sometimes done so by asking local schools and colleges to accept students without collecting any tuition.

Aside from the job impact, city and county leaders played down the overall effect on the community. Smith Corona plans to keep the only large building it owns here while allowing leases on other buildings to expire, so local leaders do not expect an immediate drop in property tax revenues. Local leaders also say that a third of the company's workers commute from neighboring counties and that the company has not been a strong supporter of civic causes.

Smith Corona's severance pay policies are quite limited. The company, which earned \$22.1 million on sales of \$371.7 million during its fiscal year that ended on June 30, is offering half a week's pay for each year of service.

Mr. President, here is an opportunity to save a lot of money and to do what is right, and again I would hope that even as time goes on my colleagues would consider.

Mr. President, as I have said in many ways tonight, the United States today rests precariously on the edge of an economic disaster. In almost every

American industry, from automobiles to semiconductors, our position of world leadership is eroding or has already been lost, where the decline of the American industry has been no more apparent than in the consumer electronic industry where the United States, once dominant, now holds less than 5 percent of the world market share.

Our position of world leadership is being lost because our industry simply has not been able to stand up to vigorous and often unfair competition from abroad. We are still No. 1 in the world, but that position of world leadership is now even more in danger than at any time in the last 50 years.

Of course, all is not lost. U.S. economy retains tremendous strength. Unfortunately, what strengths our economy retains are quickly being overwhelmed by its weakness.

While the economy contains tremendous resources for productive investment, many of these resources are either tied up in capital markets, which discourage patient, long-term investment, or are being absorbed by our country's massive budget deficit.

While our workers, far from being lazy, have shown a willingness to work hard for the benefit of their companies, their productivity is impaired by an educational system which does not prepare them to work in the high-tech industries of today and tomorrow.

And while we may lead the world in technological innovation, we lag far behind our competitors in the ability to translate such innovation into competitive workclass products.

This productivity gap exists because of a lack of integration in U.S. industry between research, product development, supplier, and manufacturers. The end result is that it takes United States companies twice as long as the Japanese on average to go from innovation to finished product.

Overcoming these problems will require an aggressive effort on the part of industry to restore itself to viability.

Industry must move vigorously to respond to competitive challenges posed by the development of other nations, of revolutionary new management and production techniques. In short, American industry must be willing to take a critical look at itself and adjust to the new demands of the global marketplace.

But industry cannot do it alone. The need for assertive Government action in this area cannot be ignored. Our Government must act aggressively to ensure that our industries have every opportunity to be competitive in the world marketplace.

At home, Government must work to remove anticompetitive barriers in our legal and regulatory structure which put our industries at a disadvantage in the global marketplace.

More importantly, however, our Government must act in the international arena to ensure that our industries have a level playing field on which to compete.

It is the fundamental responsibility of the American Government to make sure that American industries are not denied the opportunity to compete in all world markets.

Mr. President, I believe that if we talk about competition globally, then certainly we have an obligation to see to it that we use our resources to give us an opportunity to compete competitively here within our own Nation.

And when our domestic production and competitiveness is savaged by the lack of Government action to ensure fairness—and by the way I have heard more times, “just give me a level playing field” than I care to even think about. Nobody wants a level playing field. I mean they want this field so that our companies, they have to go up this hill. That is how Smith Corona has to compete, up the hill.

Now, that is just not wise. It is not wise. Because if we leave here, and I think we will, without enacting remedial legislation that will give them half a chance at a level playing field—half a chance, I do not think we are going to get it, certainly not easily—they will have court actions, et cetera—why, then, they are not going to continue to compete, certainly not, as we have seen, as it relates to their production.

And who will have won? Who will have won? Will Brother have won? I do not think Brother will have won because now they will find a company that, by transferring its manufacturing base to Mexico will save millions of dollars annually. It will probably now put Brother in a situation where, in order to maintain its domestic sales here in the United States of these products, it will have to either cut its prices even more and sustain a larger loss on this or it will give way to greater market share. So Brother has not won. And the American worker has lost out. And, I suggest, that we in the Congress have trivialized our responsibility.

Some people might say, what are we doing as it relates to the situation in our economy? And I would say we have mostly made great big speeches and there is very little substance behind what the bodies of the House and Senate have done. Absent the roads, which have a highway trust fund, and the bridges and the highways and the airports—again most of those coming from airport trust funds, absent our appropriating money for these special public works projects—you know, what have we done?

I will tell you, any darned fool can do that. It does not take a great genius to go and vote, to try to cut up this diminishing pie. The pie is really diminishing. I do not care whether we spent

more money for public works projects because where are we getting that money from? We are borrowing that money. We are borrowing it.

So one of these days we are going to find out that when we go to hand out the pie to our constituents, whether it be roads and bridges and highways and what not—guess what? It is not going to be there. Because we will not be able to borrow enough. And that pie is, all of a sudden, going to collapse. It is going to collapse. Did you ever see a pie when it collapses? It is going to be mush. We are not going to have much to give out, much of those goodies that we have been getting away with. It is not going to be there. And then you are going to really see a revolution.

Here is a chance, we do not even have to go borrow. We do not have to borrow. We do not have to raise taxes. As a matter of fact we can keep more money coming in. We can make the pie bigger. We do not have to raise taxes. We do not have to increase Federal spending. We do not have to increase Federal borrowing. All we have to do is to say we will not be opposed to trying to give a company an opportunity to compete fairly.

Now, I would like to refer to the Banking Committee. We had some testimony on July 23d, from a Mr. Choat. He wrote a certain book.

The question was:

Question: Mr. Choat, let me ask you, you have written a book: Agents Of Influence. I would like you to comment, if you would, about the people who have been in charge of trying to stop the trade cheating and trade abuse, who, when they got out went and signed up on the other side and got some big salaries? Tell us about that problem.

Mr. CHOAT: I would be pleased to. I would like to preface those remarks with a couple of comments about manufacturing. What we have today is a circumstance where manufacturing, in this country, has gone in the past quarter of a century from something in the neighborhood of 27 to 28 percent of our gross national product, down to about 19 percent. We are at a point today for the first time in the century where we literally have more people employed by government than we have employed in manufacturing in the United States.

Imagine that. We have more people employed by Government today than we do in manufacturing. That is for the first time in the history of this country. So, I guess, my friends, that there are those in Government and in the Congress of the United States in particular, who must see this as a gain, as a sign of economic prosperity. That is why they would like to block this legislation.

I mean, after all, if our goal is to create more people with jobs in Government then this is a good way to do it. Do not do anything that would permit a manufacturing company to stay in business and to compete, while we go out and reach out for foreign companies—and I have to say, what an incredible travesty. If this was a foreign

manufacturer that was going to come into a community and locate there and bring 875 jobs to pay \$17 an hour, we would have a bidding war. Every State that we represent, every State would be saying, "Come here, come here, we want you here, we want you here. We will give you the subsidy, we will give you cheap electric power, we will give you tax abatements, we will give you long-term bonds, we will give you—what do you want? Name it, name it, we will do it, we will waive local taxes for the first 10 years. Absolutely." We would be down on our knees, "Please, come here, please, come here." What would we do to bring 875 jobs, I ask anybody here, in their community? What would they pay? Oh, the mayors would be out there, the Governors would be out there, the Senators, the Congressmen, "Oh, I brought these jobs here, my people have good jobs and the hope for the future is there will be more."

Let me tell you, I am giving you all a chance now to do something even better because it is far worse to take people who are meaningfully employed and assign them, for the most part, to the uncertainty of a job market which at best is bleak and for a good percentage of these workers is nil, zero, far worse than we, who have an opportunity to stop this from taking place, fail to exercise our legislative responsibility in undertaking that duty.

I say that we fail to exercise our responsibility not because you have to accept legislation that this Senator offers, but because this legislation that was crafted with the view to give an opportunity to these people, to their employer to stay in that community. Far worse than we take from this community and strip it down, strip it down, and if we look the other way at an opportunity to create new jobs, each and every one of us in our own way are contributing to the stripping down and tearing down of that community and, more important, of the people who work there and of those families and of the horrors and, yes, the ills and misfortunes that will take place to those people and their families. We do it. And do we save the taxpayers money? No. Do we help other workers? No. What do we gain? What satisfaction?

Mr. President, this Senator again hopes that even at this late hour, even in the closing hours of this session, that the overwhelming arguments and facts and substance and the compelling case for the people who work at Smith Corona will carry the day. I believe that it can. I believe that it should, and, notwithstanding that I see and understand what is unfolding before us, I believe it will. You see, because I believe that we can accomplish anything we want. It is a just cause, and, if we are determined to pursue all avenues to bring it about, I know that the cause of trying to keep and to give these people

an opportunity to work meaningfully in their home communities is a just cause. It is the right cause.

Maybe the messenger is flawed. I know the messenger has flaws, but certainly the petition is not. If I thought that it was because this message of necessity on behalf of these constituents was not being addressed because of the messenger, I would be more than happy and, indeed, would seek the help of others and give to them the opportunity to help change a situation that will be a desperate one, that will be a bleak one this Christmas and this holiday season and this new year when so many of us will be celebrating with our families and so many of these people will face a very bleak and a very uncertain future.

I know that Senator MOYNIHAN will be speaking to my colleagues. I know he feels deeply about this matter, and I am hoping that, notwithstanding the lateness of the hour, he will be able to convey to you the sense of urgency and, indeed, the desperate necessity that this situation cries out for action.

Mr. President, I do not believe that this body or the House really wants more people to be employed by Government than we have employed in manufacturing. I cannot believe that we are not totally cognizant and aware that the private sector, private employment, capital system that creates wealth and then gives Government an opportunity to meet those needs collectively as a Nation and our responsibilities we must face, I cannot believe that we really do not want to help these people. If someone can show me a better way to try to help them, offer it. I would be willing to entertain it.

Mr. SEYMOUR. Will the Senator yield for a question?

Mr. D'AMATO. Certainly.

Mr. SEYMOUR. Mr. President, I have been listening to the Senator from New York discuss the very sad and unfortunate conditions that these employees with Smith Corona face.

In fact, I recall the Senator telling me the other day on the floor that he thought he had this all worked out. The Senator was with that Italian smile from ear to ear and now what I have heard the Senator saying in the last, I do not know—how long has the Senator been going?

Mr. D'AMATO. Three hours.

Mr. SEYMOUR. Three hours—is that the deal the Senator had going in to conference was not the deal that came out, is that correct?

Mr. D'AMATO. Yes; that is an understatement. That is true. The proposal which Senator MOYNIHAN and I had worked on and which the administration had finally signed off on and which we had given to staff—by the way, the stronger language that was accepted on this body in the energy bill, in the tax portion of the energy bill, was one that we were confident would be accepted by the conferees.

Mr. SEYMOUR. Will the Senator yield again?

Mr. D'AMATO. Certainly.

Mr. SEYMOUR. The Senator knows I have really been a Member of this body for a little under 21 months, and so I am not familiar with all the movements and strategies and things that take place. I can empathize with what has happened to the Senator. As a matter of fact, I felt that same joy the Senator felt just the other day on the legislative appropriations bill.

The Senator might recall, because I think he supported me back in April on the Senate budget resolution, I tried to cut the budget of the Senate and Congress by 25 percent over 2 years and that passed by 52 votes. And so I was going to try to do that again to the legislative appropriations bill, and I was told that if I would settle for 15 percent cut over 3 years instead of 25 percent over 2 years, that in fact they would take that to conference committee and really do their very best to ensure that stayed.

The same thing happened to me. That bill came out of conference committee and was nowhere to be found. And so I empathize with what the Senator is going to do. Smith Corona, is this the company that has been in business in New York, one known as L.C. Smith? Is that the same company?

Mr. D'AMATO. That is correct. This company has a history that goes back well over 100 years, a preeminent manufacturer of typewriters.

Mr. SEYMOUR. I know a little something about the company the Senator is trying to represent. My grandfather worked for L.C. Smith. My father worked for L.C. Smith. My father's brother worked for L.C. Smith. It, indeed, is a fine company.

Is it that we just do not care any more about old line companies like that, that we want to drive them out? Is that the problem?

Mr. D'AMATO. I think the Senator has touched on something. It is almost an attitude that exists in America today, and if you speak to people they almost come to accept that we cannot compete with foreign manufacturers—the auto side, the appliance side, the typewriter here—and that is not always the case. And while we may have gotten at times in various industries kind of fat and sloppy and noncompetitive, here we have a situation where the company's productivity—and this is a staggering thing, I am delighted the Senator raises this—has increased by 700 percent in the manufacture of these typewriters over the past 12 years. That is the only reason they have been able to even stay in business, given the predatory practices of their competitors dumping these products into the marketplace at below cost.

So we have been too ready to believe when an American company comes to the Commerce Department or to others

seeking a fair application of the law that, oh, they are just trying to use the Government to kind of protect them because they cannot compete.

Now, indeed, we have some industries today that as a result of the dominance in market share, et cetera—machine tools, for example—unless they are given some protection, they cannot compete. Here we have a situation where that is the last manufacturer, where there have been eight dumping cases, where Brother, the company has been found violating the law and where they circumvent it by way of moving its manufacturing operation around.

I do not know if we want to assist in terminating, in ending manufacturing in this country. I cannot believe that we do. But by way of no action in this Congress, in this body, why, then, we certainly would give to all concerned the right to believe that.

Mr. SEYMOUR. Does the Senator have any idea of how much it might take to retrain, how many dollars it might take to retrain 775 employees of Smith Corona who are going to lose their job because the conference committee cut out what the Senator thought was an ironclad agreement?

Mr. D'AMATO. Well, let me first, if I might, say this. I cannot say that there was an ironclad agreement. That would be unfair. That would be unfair. This is not the case.

But I certainly had every expectation, given the nonpolitical nature of this petition, of this amendment, given the support of the distinguished Senator, the senior Senator from New York, given the elements of fairness and what is sought to redress, the grievance, which was basically to say, look, we are going to compete on a fair basis, this amendment would have been retained, that it would have been retained instead of meeting with the situation where it was greeted—our question as to how it was that it did not find itself in the conference, that it was greeted with, well, we never considered it or we did not know, or et cetera, or it is one person's fault.

So it would be unfair to say—but given the history of the conferees on both the Senate side and the House side, it was reasonable to anticipate that this legislation was legislation that all of the conferees at one time or another had been supportive of, provided that the administration was on board.

In other words, there have been cases, maybe slightly different fact situations, where there has not been a member of the conference committee who has not taken an interest, who has not sought protection, fairness, and where the opposition of the administration has generally resulted in a reluctant withdrawal or defeat of that legislation.

And so tantamount to acceptance as a necessary prerequisite is the adminis-

tration signing off. When they do that, it is almost tantamount to being agreed to. There was no reason to anticipate that there would be other than that kind of acceptance. None.

And, indeed, that is why I have said if the messenger is flawed, let us get a new messenger. Let us have another Senator. Let us have someone else sponsor it.

I have not run into that kind of situation in this body. I have to say as I look around, and I see the various Members, and there are few who are here, several on the other side that I do not recall of being turned down or very seldom being turned down on the matter of some fairness or consequences to constituents whether they be mine or people throughout the country, where my colleagues have acted with anything other than respectful response and, more often than not, attempting to deal with the situation. So I expected that here.

Mr. SEYMOUR. Would the Senator yield for another question?

Mr. D'AMATO. Certainly.

Mr. SEYMOUR. The dilemma you find yourself in I find myself and in yet another bill that is about to come to this body. So I truly feel the anguish and the frustration that not only you feel but you show eloquently defending your State and 775 jobs.

What is it? Is there any way that this body, this U.S. Senate, if they really wanted to help, if they really wanted to help preserve those 775 jobs, is there anything this body could do at this late hour to possibly turn the clock back, if you will, to go back to whoever you talked to, and made part of the bill that went into conference and was assured that it was going to remain in the bill in the conference? Is there any possible way that if this body had the will, if they really cared, if they really wanted to do something, that they might extend a hand and help?

Mr. D'AMATO. I think that could be done. Indeed, that is really what I am asking. I am really asking my colleagues to put aside any considerations other than fairness for these people and take a look at this case. I know there can be arguments that can be made that you are going to take jobs from one area or the other. It is not. It really gets down to that. It really gets down to trying to give this company an opportunity to compete fairly. And if indeed by their competition, if they compete fairly, if their competitors are required to compete fairly, that means they may not be able to hold jobs. That is the way the cookie crumbles. But indeed they are able to continue and to hold jobs, that is the way it is.

No one can give a lifetime guarantee to these jobs. That would not be the kind of system we would want. But we can say that under the law, your competition should be required to meet the same standards of conduct that you

are. While we cannot have a company breaking the labor laws, bringing in children to work, how do we think Smith Corona is going to lower its cost? We would run it out of town on the rail. Why is it OK for a foreign competitor to break the law and sell at below cost? Why should they not be run out on a rail?

Indeed, the courts have come up with fines. They said, yes. OK. Then we cannot enforce them. They move. They jiggle it. They jiggle a little bit. The same company, the same exact product, does the same thing. They just change the distribution method a little bit, and they assemble it.

So I would hope that fairness, I would hope that a sense of collegiality in that we do not try to one-up each other. That is not what this body has been about.

We have our disputes. We have our political partisan votes. We understand that. We know we have to adhere to particular ones. That is not this case. This does not involve that. It is a case of what is fair.

I hope my colleagues will go back to the conferees and say: Look, let me tell you something. There is no way that DANNY ROSTENKOWSKI killed this provision. That is nonsense. It is nonsense. Maybe he agreed to take the fall. Maybe he agreed to say, OK, you know, I am not going to go along with this.

But don't you tell me, nobody can tell me that ROSTENKOWSKI did not like this provision because it was going to help the people in Cortland and Syracuse, NY.

Why? To get an opportunity to see to it that the tariffs that were laid against a company for unfair dumping will be enforced. I do not believe it.

If ROSTY came over, and took me in a room, took me aside, and said: "That is all right, Alfonse, I killed it," then I would believe it. But he would not tell me that. And that he is covering up for somebody else, for some other little kind of thing, this is nonsense. Come on. We are grown people here. Now he has put too many things in too many bills to be opposed to this; too many, too many.

If you think that this provision offended his sensitivities, why, I can tell you something. I can sell you that bridge. I can sell you more than the Brooklyn Bridge. I mean it is just not credible.

I have not gone into any kind of specifics because then I would be crossing that line. I do not want to cross the line.

My good friend from Kentucky is saying: All right, come on now, do not get too absurd here. But it is an absurd situation that we find ourselves in. It is an abdication of our responsibility, and it is an abdication of things that are fair.

I do not think we went out of our way to do those kinds of things. Is it

because the Senator from New York is championing this cause? I will withdraw from it. Let somebody else take it up. Let someone else take it up.

By the way, my distinguished colleague from New York, Senator MOYNIHAN, has been most eloquent and has been certainly involved as much as this Senator in propounding this request for jobs for fairness.

Look. If we had a chance to attract, by the way, 875 jobs paying \$17 an hour, we would have a bidding war. Every one of our Governors would be saying: Come here, come here. We would have press releases, saying: This way. We got the jobs. We do not want to lose them.

The Senator from California asked: How much would it cost for job training? You tell me. Would it cost \$7,000, \$8,000, or \$10,000 per person? At least. Then we do not know at the end of that if we are paying \$10,000 for a job training, and you multiply 10 times, that is over \$8 million for the first year.

How many of those people are going to wind up on social services, home relief? How many of those people will never pay Federal taxes again? Never pay State taxes again? How many of those people are going to be forced to sell their home and leave the region?

If that is what we would like to see the people leaving because of these economic situations, how many businesses will no longer operate because they do not have the 875 factory workers who were there coming by? Whether it is at the deli, whether it is at the coffee shop, whether it is at the automobile repair shop. So when we talk about 875 jobs, remember the statistics is at least another 500 jobs in related areas of commerce, in industry, that will also be lost. We are not talking 875. You are talking closer to 1,500 jobs.

That is what we are talking about. That is a little tiny county. Indeed, only one-third of those people come from that county. But they all come from the environs. If they do not come from Cortland County itself, they come from Madison. And it is a rather rural area. I have to tell you that is a hint. But that would be a hint if the Senator was going to—for example, if your community was Princeton, NJ, which is an affluent place, very affluent, this Senator would be mindful that it would be wrong not to stand up for people who are having this done to them because they come from New Jersey. Or if they came from California, it would be wrong to turn our backs on them. If they came from Texas, we would have to sing a song, but it would be wrong to turn backs on them if they were losing these jobs, not because they were being outproduced, not because the competitor had a better product, could put it out there cheaper, but because they were breaking the law. It would be wrong to bring in forced labor and have them operate this plant and then com-

pete and beat out Brother. We would not countenance it.

Why is it not wrong and why is it that we do not take corrective action to keep Brother from breaking the law? I still have not heard that answer. This is not a question that one company is headquartered at X place as opposed to Y place. Do you mean to say because a company is headquartered in your home State, you turn away and allow them to break the law, and that is OK, we have to be a supplicant for them? If they were pumping toxics into the lake, you would look the other way because they are from your home State, and, therefore, I should not worry that they are polluting the lake in another community, because they are headquartered in my State.

It is the same analogy. We may not want to look at it that way, but that is exactly what it is. Brother should not be allowed to break the law simply because they have an assembly plant in Tennessee and because they are headquartered in New Jersey.

Now we are getting a little more specific about it. I hope it does not come to that, but if it does, then we are going to have it out. I am going to tell you we are not going to have a tax bill, not unless we are willing to stay and stay and stay and stay and stay. Then I suggest the other people do not want a tax bill. They do not want it. Let me tell you the conferees were told this early on, and I happen to know that Senator PACKWOOD told one of the conferees before the conference broke up, that if you do not include this provision, remember, the Senators from New York have given warning. We did not wait for this to take place and come back here and people would say: Why did you not tell us? We did not know. They knew. They knew. They knew.

Do you want to play hard ball politics? Is that what it comes down to? That is what it comes down to. The people from New York, the hell with them and their jobs. Is that what we are saying? Because that is what we are saying. That is what is being said right here. OK, we are going to repeat it over and over and over. If it embarrasses people, then so be it. But we are not going to do business like it did not happen, because it did happen and people were given warning and the opportunity.

If there are some provisions in this bill that are unfair, that are illegal, that should not be there, I would like to know it. But not one time was this discussed, not at one point was it said we could not do this because it violates policy. As a matter of fact, that is why I said "roller coaster." Oh, boy, absolutely.

Mr. SEYMOUR. If the Senator will yield, I heard the Senator say earlier that he had gone so far as to contact the White House to get it cleared through them; is that right?

Mr. D'AMATO. That is in essence correct, that I met with representatives of the White House, the Commerce Department staffers, to review these provisions.

Mr. SEYMOUR. I am sure that was no easy task, just that alone.

Mr. D'AMATO. That is a fair statement.

Mr. SEYMOUR. And the Senator met on numerous occasions with members of the conference committee?

Mr. D'AMATO. No. I met with Senator MOYNIHAN and his staff, and he is a conferee. I discussed this matter on numerous occasions with Senator PACKWOOD and other Members on the Republican side, the distinguished minority leader and, of course, the distinguished senior Senator from New York [Mr. MOYNIHAN] who is also a conferee. So it was no secret to the conference as to what we were attempting to do.

Mr. SEYMOUR. Do you have some feeling that perhaps this might have something to do with the fact that there will be an election about 4 weeks from yesterday?

Mr. D'AMATO. I do not think so.

Mr. SEYMOUR. If you had all that agreement, Senator, what possibly could have gone wrong? Was it a clerical mistake?

Mr. D'AMATO. I want to be fair to all involved here. I do not believe it had anything to do with an election. I absolutely reject that. That is not the case. But I do believe it has to do with parochial interests, as I read before in some reports, and I think sometimes we can become so parochial that we lose sight of fairness. And I can understand that. I think it was that parochial interest which led the conferees to come down on the other side, not elective politics. That is a lot different.

But in the final analysis, it is so devastating to these people. It does not matter how it happened. The patient is going to be dead. It does not matter if you did it intentionally. That is not good, but if you created a grievous error by not paying attention or you just—it is avoidable, you see. If it was not avoidable, then we would understand. But this is avoidable. We still have time, and we can still deal with it.

So I think what it is is the politics of competition. We have a number of dollars to give out in the highway project, mass transit project, housing project. There is competition. The needs are relatively the same. We can argue them and debate them, and so we come to reality. The majority says, look, we have to take care of X, Y, and Z. We understand that, and we make our accommodations. We understand that. That is give and take.

This is not that kind of situation. We are not talking about whether the military base is going to be in Texas or in New York, and one can make arguments for both sides, and reasonable

people can disagree. This is not close. This is a question of whether or not we are going to give to our citizens fairness, equal protection.

Let me ask you, if we are going to give our people equal protection, should the people in New York be protected as well as the people from any other State? Due process, all of them?

By the way, those who live and work in New Jersey for Brother and who live and work in Tennessee and work for Brother there, they should not be disadvantaged. Yet, we are all operators of the law. Nor should they, because they have a Representative with clout or some power here, have the sins of the parent forgiven and wiped out so they can just move along.

That is not what this is about. It is about fairness. So when my good friend asks the question about politics, it is not the politics of elections. It is the politics of power, the politics of just looking the other way.

I have a letter here. Somebody says I should read it. Staff tell you lots of things. So they told me to do this. I do not know the content of this letter, but I hope it is good:

The Honorable AL D'AMATO, U.S. Senator, written from P.O. Box 3861, Portsmouth, NH, October 6.

Here it is 12:30. I have to be up by 6:30. Yet, your presentation on the floor is captivating and right on target. The fight for the little guy is always an uphill battle and not always won. But without the effort, how can one look at oneself in the mirror and say, "At least I tried." Keep it up and you have this New Hampshire resident's support.

Sincerely,

PETER P. PERCIANO.

That is a pretty powerful note. You know something, the fight for the little guy is not always easy but you know something: tonight I am going to ask for the indulgence of all of my colleagues and ask that they bear with me. I know GEORGE MITCHELL will. I have worked with him for 12 years and he is a great, good, and a decent man. I hope that our majority leader and some of the others take a look and maybe urge upon some of our colleagues even at this late time to see what can be done to deal with this obviously difficult situation, and from the bottom of my heart I know what I say in that regard it is true. There has never been a time when this Senator seeking advice and counsel from the distinguished majority leader has ever come up short.

It may be tough, but maybe we can do it. I do not enjoy the acrimony. I enjoy a good battle at times, and this is not a win or lose. I think it is a win or lose for all of us, though, and I do not know if people, I do not know that Peter P. Perciano saw that or anybody saw that. Probably not too many people are at home seeing it. I did not really plan on coming down here until I heard when I came back from dinner that conferees had come to this decision.

You know what it is all about? What is our service about? When it is all said and done we are all alone with ourselves. And we know and we are accountable.

I just think that there is some way that we can make a difference here and we can really serve a noble cause and feel good that we made a difference. I like to think maybe, and I do not know what the future is going to hold for me. Talking about politics, I am in a tough race. I think I am going to win. I like the battles. But you do not know.

But I tell you this: it is all nonsense, winning or losing; that is nothing. It is what have we done with that opportunity that we have to make a difference and that is real.

So if I should go home and think I made a difference that is pretty good. I think I have in certain cases; maybe people think I could have done better and done more or that the things I did not do outweigh the things I did.

But we have to live with that. I have to tell you that is why it is easy for me when people on the other side come up and ask for help, and where I can and where I could, because I presume that my colleagues when they come to this Senator, whether they be Democrats or Republicans, and ask for consideration they are doing it because it is important to their constituents. They are their elected guardians and representatives, and they come to me with something that they think is important.

I do not try to substitute and get into the nitty-gritty of every one of their petitions, because you just could not do that. I have to tell you, you have to look pretty far and wide and pretty deep to find cases when I have not attempted to, and it is not because maybe I like that colleague but because I credit him with coming to me on behalf of a cause that is important for people and it is in the interest of fairness, not a business of log rolling. It is not going to give me anything other than; probably will give me more than all of the other achievements or any other achievement. You know, if you can save a life or make a difference, boy, that is a pretty powerful thing.

And each person in his way and he does not have to be in elective office, he can do it, and people make some profound differences on others.

One of the reasons I undertook public service is that I thought maybe I could make a difference. I think sometimes you can lose your way and you can lose that sense of it, but, boy, I tell you we could make a difference here, and I think we can do it in a way maybe quietly tomorrow morning, you know, seek the counsels of the wise men; keep me out of it.

Mr. GRAMM. This is tomorrow morning.

Mr. D'AMATO. This is tomorrow morning but we still have a couple

hours to go, and we have some pretty talented people; we really do. Senator BENTSEN, Senator DOLE, the majority leader, ROSTY, a couple others; Senator MOYNIHAN, Senator BRADLEY. They can find a way to deal with this and to deal with this in such a way that the little guy does win, that we make a difference and that is what this is about. That is really what this is about.

So, even at the 11th and half hour and I spoke to Robert Thompson, I did not have courage to call him back—he is the chairman of the board of Smith Corona—because I tell you something. He is a pretty big guy and kind of tough guy and very straightforward. And when I spoke to him just before I went out to dinner, which was about 8 o'clock, he really sounded broken up and almost distraught when I told him that it had not been kept in the conference and had been cut out.

I told him, "Look, you know," and I was crushed—I was not crushed, but I had an inkling that certain things were going on, because we were not getting answers back. We were getting different stories back. I said to him: "Look, you know, it is not over and we are going to keep trying and it is not over."

It is not over until and unless this body really decides that maybe it has more important things to do and there are important things. I do not mean to minimize those and use that as the vehicle by which to kind of look the other way. We cannot have a dog in every fight. I heard that and I know that. I have not asked people to put a dog in every fight. But I do ask that the leader and possibly some others take a look at this and see if we cannot do something in a way that will make people, every one on both sides, feel good about the situation and, more importantly, get these people some help.

I do not know if we want to do things.

Well, I guess some Senators on my side would like to know how much longer I intend to speak. I do not know if you have some other business, and I guess that I have to get some advice as to whether or not if I yield the floor, whether or not we are going to use the ability to keep this going so maybe some of my parliamentarian friends here would let me know, because if I give up the floor then there is a unique parliamentary situation; they can cut me but they cannot cut me off provided I do not yield the floor. If I yield for a question I cannot physically leave the floor.

So that means I have to keep talking and that is what I will do. I have been very blessed, although I almost lost my voice here, with great family, and I have pretty good stamina. I do not know if I am the strongest of them all, but I think I can keep this thing going to at least 8 o'clock or 9 o'clock unless we can come to some kind of agreement.

Mr. DOLE. Do you want me to get you some more water?

Mr. D'AMATO. You do not want me to get too much water. I can get a couple of throat lozenges. If somebody at some point in time can say to me maybe they are trying to work out an accommodation—the record is 24 hours 18 minutes. My gosh I am not trying to set a record. I just want to get a piece of legislation passed.

If we could do that, and my parliamentarians stay around and give some advice, why then, I do not think the leader would do anything in any mean-spirited way to cut me off or anything; would not sucker me into anything, put it that way. I know that.

But, look, I did not say that I would avail myself of the parliamentary prerequisites just to hear myself speak. And I am still willing and indeed I am more than willing, I am anxious, to make it possible for us to try to work out an accord. And I do not think that is asking too much. I just really do not.

Again, if my colleagues would explain to me how what we have asked is upsetting to the conference, or would violate the spirit of the conference, or would unduly disadvantage someone, why then I could understand. But that really has not been the case. No one has really explained that to me, or indeed given that kind of advice to Senator MOYNIHAN or to our staff. Indeed, we have labored over various methodologies for dealing with this.

But, I would really hope that we could still work out something. I am getting lots of telegrams pouring in here from colleagues. One said, "You are great, but I'm going to sleep." So that was the last one. That was Senator anonymous—DOMENICI.

Senator GARN is saying, if he has not: Alfonse, come on. I want to catch a plane. He has not said it yet, but he generally says it. He has kept me from making all these speeches in the Banking Committee. And usually I just submit my statement in its entirety, and JAKE is very happy when I do that. Now I am going to have to ask him for some more statements to make.

But you know I do not want to read just anything. I would like it to have some relevance.

So let me read to you this letter that I got on July 21, 1992. It comes from Mr. Thompson. He says:

DEAR SENATOR D'AMATO: It is with great sadness that I advise you that the last U.S. plant of the last American consumer typewriter company, Smith Corona, is forced to phase out its manufacturing operations at its Cortland, New York, facility. You are well aware of the long, lonely, expensive and often bitter struggle to combat the predatory pricing, dumping and circumvention practices of our Far Eastern competitors. Even though our charges have been substantiated, and we have won in all of our main struggles, our Government has been politically unwilling to support these findings.

And you know, that is the sad thing. Our Government, even when it finds a situation that cries out for fairness, turns its back.

You know, I have to tell you something else. I am going to give you a little thing that I am concerned about. Today we have this situation now where, as Congressman and Senators, you cannot even write letters to the agencies for fear if you are asking them what they are doing that you are going to be accused of interfering with the bureaucracy.

If you want to talk about a Government that is coming into this incredible thing, it used to be, you know, in Europe that people understood and knew that the bureaucracy was all powerful. Forget the elected officials. They did not mean a darn thing. And we are now having that kind of a situation here.

And of course in the commerce and trade area, you have this myopic group that just came down and free trade became the symbol and it did not matter and people looked the other way when it, the law, was being violated.

And as I look around and I see my colleagues, how many of you have experienced or seen situations that really cried out for some help? And if you went and you asked commerce or trade or whatnot, they turned the other way with a deaf ear.

So, if I might, we understood that we could not look to U.S. trade. Now, the irony of this particular situation and the thing that is so frustrating is that we worked with commerce, trade, one group after the other to try to bring this about. And we were not getting there very fast, I have to tell you.

So my friends understand when they ask me what was happening, I have to tell you it was not easy. It was not easy. And when the people at the Commerce Department and the White House—I have to tell you, we have some terrific people who finally said, "Look, let us see if we cannot do something so that we do not violate the GATT provisions." And when they met with us and we began working this out—and we had two or three drafts and they were rejected a few at a time—and we finally came up with an approach that would not violate GATT, well, I will tell you, that was a great victory. That was a great and terrific victory.

And I had the support of Senator MOYNIHAN, not only his support and encouragement, his staff worked on this. If you want to talk about bipartisan, this was a totally bipartisan effort to do what was right.

And so I have to tell you when I found out tonight that this last ditch effort to help Smith Corona fell on the deaf ears of my colleagues, I just felt that we had to come back and bring this situation to the attention of the whole Senate.

And that we had to talk about fairness. If we are talking about political power we do not have it. But I think the power of the little guy, and I think the power of the people in the long run will persevere.

Let me tell you about a little guy. This was an article entitled "Jobs Move to Mexico."

"Chris Torbitt, Marathon"—that is Marathon, NY. This is a marathon—maybe we are doing it for Chris. " \* \* \* who has worked for Smith Corona since he was 16 years old said Tuesday's announcement was inevitable."

"How can we compete against the Japanese," he asked. "Everybody knew it was going to happen eventually."

#### MY WHOLE FAMILY DEPENDS ON IT

Florence Brooks was feeding her 28 beef cows Tuesday morning when she heard the news: Smith Corona, her employer for the last 20 years—and Cortland County's largest employer—is moving its manufacturing operations to Mexico.

"I was up in the barn, and my brother yelled it out the door. He had heard it on the news," Brooks said Tuesday. "I was just sort of stunned."

Smith Corona plans to lay off 875 of the 1,250 workers at its plant in Cortlandville, which is the company's last domestic factory. The company will keep 375 workers, most of whom will be involved in engineering product design and customer service.

"It's pretty upsetting because my whole family depends on it," Brooks said as she headed into the sprawling Route 13 plant to work the 3-to-11 shift p.m. shift on a wordprocessor assembly line. She lives in Richford, Tioga County, about 25 miles southeast of the Smith Corona plant.

Brooks and other workers at the plant said Smith Corona's plans would leave them unemployed and likely mean harder work for less pay in the future. The workers are not unionized.

"I make nearly \$13 an hour here. Where am I going to find a job like that?" Brooks said. She said she supports her fiance and their young children.

Don Cree, a quality inspector who has worked seven years at the factory, said he and his wife may have to depend on her paycheck for awhile after he loses his job.

"My wife has a pretty good job, so I'm not crippled, \* \* \* but still it's tough," Cree said. Assembly line worker Patricia Leonard said she may have to move out of her home in Genoa to find as good a job. She said she has worked 20 years at the Cortlandville plant and makes more than \$10 per hour.

"I make good money here," she said. "I may have to sell out and leave the area."

Leonard blamed high state and local taxes. "The taxes are killing us all. Pretty soon New York state's gonna be a ghost town," Leonard said before she hurried to punch in before 2:30 p.m.

Other workers joined company officials in blaming the federal government. Smith Corona executives said federal trade laws have given the Japanese typewriter companies such an advantage that the company cannot pay the salaries American workers demand and remain competitive.

"How can we compete against the Japanese?" asked Chris Torbitt of Marathon. He has worked for Smith Corona for 10 years, since he was 16 years old.

"This is to be expected if the government ain't going to protect our jobs," said mainte-

nance worker Warren Greene, a 15-year veteran.

Now, listen to that. Here is a fellow, his first job, his only job. And he says, "This is to be expected if the Government ain't going to protect our jobs."

You know, he is right and he is wrong. He is right to expect that the Government insist on fair play. He is right to insist that the law be adhered to. He is right to expect that his Government cares every bit as much about him and his security and his welfare, and gives it more than political rhetoric.

You know, I do not blame him for being annoyed. I do not blame him for being angry. And I tell you something, I wonder how it is and why it is that the Smith Corona people did not move their plant out. It is because, you know, there are some corporate executives and corporate families who do care and have a conscience about their community. And they stayed here. They endured. They won lawsuit after lawsuit after lawsuit after lawsuit, only to no avail.

And now I have to tell you, it is pretty rough for this Senator to have to sit by and endure, when I know that we really as a body collectively know what should be done to remedy this situation. And what could be done is not being done. That is wrong. That is just plain wrong.

Let me ask you. How would you rate, if you were a teacher, a student given a course in government, and given this dilemma of a company that was going to have to leave because it could cut its costs by \$15 million a year and therefore compete? And, if there was an opportunity to keep that company from leaving or if we would simply allow it to leave and put \$10 million a year for job training? If that student said that you should allow the company to leave and simply make available job training for the displaced workers instead of seeking a legislative solution that might permit that company to stay and compete, what would you give the student who said let them leave and bring in the Federal Government for job training? What would you give him?

Would you pass him? Would you give him an A; a B; a C, or a D?

Or would you flunk him? You would flunk him. And that is what we give this Congress, the Senate and the House. Flunk them—F, F. That is what they deserve. You would rather pay millions—can you imagine that, millions for job training rather than to do what is right.

I will tell you something, the people who oppose this, they cannot even conspire a reasonable retort. There is no way they can answer this—no way. You cannot even defend the inaction of this Congress. Flunk—you would flunk the student. Flunk him—F, F. So when we

get up and we talk about jobs, remember, you know what it is, in Italian do you know you say? Chiacchierone, a parrot, just talk. That is what it is, chiacchierone. Yes? A parrot. A parrot.

Do not believe—whoever is watching the show now they have to be nuts. It is 2 o'clock, what time is it? Two o'clock? My gosh, you should go home and go to bed. If you have a job to go to. That is something. You may not have a job. If we keep operating this way, forget about it. Forget about it. I would have to employ you in a Government job because there are more Government jobs than manufacturing jobs, so you have a Government job. Come down here. You can do a better job than we are. I have to tell you, everybody should run, really. This is fantastic.

So, you would have to flunk. You know, it is as a matter of being—chiacchierone is kind of nice. It just talks a little too much. We talk much too much, and we get paid for it besides. It is incredible. Incredible.

Jobs. Where is that article in the New York Times? Both candidates talked about job training. Well, this is terrific. Now they will be able to vote for more money so they can give job training money to the people in Cortland instead of both of them saying it.

I want to tell you something. I do not know where Governor Clinton is, but if he is around where he can watch this thing, maybe he can call over here and say is it true, is it true Congress is going to go out of session and they are not going to give us money for job training.

He is concerned about free trade with Mexico, and I believe him. So I hope maybe he could call and say, "Fellas, let us do this on a bipartisan basis. If, after all, President Bush is for this, we should not appear that we are opposed to it."

But I have to ask you, who controls the House? Who controls the Senate? And I tell you this. I think the exercise of political power and leadership in this really does not put us in a good light, because nobody has even attempted—

Mr. SEYMOUR. Will the Senator yield for a question?

Mr. D'AMATO. Certainly.

Mr. SEYMOUR. On that particular point again, listening to the Senator try to work as hard and diligently as the Senator has now for some 4 hours to protect 875 jobs, because the Senator was unable to realize the commitments the Senator thought he had when he went into conference committee—as a matter of fact, it is my understanding that that conference committee really did not meet as a committee; some of the leading members met as a committee, and they decided what was going to be in that bill or not in that tax bill. We now have a bill that has come over

from the House that causes me great concern for my State. It is H.R. 429, the water bill. And we had a conference committee. In fact, I was on that conference committee, a little bit different than what the Senator had experienced. We had one conference committee meeting, and then the chairman of the conference committee laid out his idea of what the bill should be.

Mr. MITCHELL. Mr. President, parliamentary inquiry. Am I correct that the Senator may yield only for the purposes of asking a question?

Mr. D'AMATO. Let me say I—

The PRESIDING OFFICER. The majority leader is correct.

Mr. SEYMOUR. Mr. President, I was about to ask a question.

And so I guess what I am trying to ask here, Mr. President, is if perhaps the Senator had the same experience with that conference committee on the tax bill as I had the same experience on the water bill. It sounds similar. Is it?

Mr. D'AMATO. Very similar. Very similar. But let me tell the Senator why in certain respects this was even more unexpected. Because heretofore my colleagues on the Democratic side of the aisle have been most willing to entertain legislative relief for cases of a similar type and kind. The objection did not come from the Democratic side of the aisle. Traditionally and historically, the objection has been raised by a number of our colleagues that are called purists on free trade who do not want to look to see if there are any kinds of mitigating circumstances. It is one thing if your company cannot compete with another and losing money, and it is because they are putting out a poor quality product; it is because they are charging too much; it is because they are behind the times. We understand that. And therefore a foreign producer comes in and beats their pants off. They are not entitled to Government help. The competitor is paying fair wages. The competitor is charging a price which is commensurate with what its costs are. It is not dumping.

That is competition. And then we say, well, productivity moves to that area which can deal with that. We oftentimes complain—and that is another issue, another question—and say but we want access in their markets with the products and goods and services that we can produce as effectively or efficiently or in some cases cheaper.

This is part of the system. That oftentimes has not been the case. But in this situation we have a clearly defined pattern of illegal activity. In this case, we constructed a law which did not say we are going to give a preference to our company because it is an American company. Indeed, our law must deal with the business realities that confront U.S. industry today. Many companies in the United States import source parts from a number of coun-

tries. Where a pattern of circumvention is occurring the law must be able to reach it whether the underlying parts originate in the same country as the finished product that is subject to the antidumping order or not. If not, we should tell business and the workers in America that problems of circumvention are not capable of being addressed. It is that simple. It is that important.

It is important that the Congress address the circumvention question now.

Now, tonight we have a situation where unless we do something, it is going to be too late for these people.

Now, let me deal with the issue of disingenuous—and I say disingenuous— attribution for the responsibility or for the acceptance of why it is and how it is that this language which would bring about fair play was dropped out.

You see, language which was broader, which did exactly and even more than what this language would have done, passed the House of Representatives. And let me read you this. It passed the House of Representatives in April. And I have to ask the question, how is it that the House of Representatives, Chairman ROSTENKOWSKI, was willing to pass this legislation in April but suddenly we use him and find him as the convenient foil to say no, I am going to stop it now? Indeed, this language was sponsored by the majority leader, Congressman GEPHARDT. Let me read it to you.

It is a press release: Smith Corona Applauds House Efforts To Plug Trade Loopholes Such as "Phantom Factories." New Caanan, CT, April 30, 1992.

In response to today's introduction in the House of Representatives of a bill designed to make it more difficult for foreign manufacturers to outwit U.S. trade laws, G.H. Thompson, Chief Executive of Smith Corona Corporation, issued the following statement:

This week several Members of Congress took aggressive steps to firmly plug loopholes in U.S. trade laws allowing circumvention of antidumping duties. For Smith Corona and other U.S. manufacturers who have been victimized by companies that ingeniously ignore fair trade laws, Congress's action is a welcome sign of strengthening American resolve.

Smith Corona is one of many American companies fighting foreign competition on an unlevel playing field. Despite Congress's best efforts to ensure fairness with tough antidumping and countervailing duty laws, the 1988 amendments to the Trade Act miss the target as foreign companies cleverly take advantage of loopholes by putting up phantom factories to assemble parts made off shore.

Mr. SEYMOUR. Will the Senator yield for a question?

Mr. D'AMATO. Yes, for a question.

Mr. SEYMOUR. Mr. President, as I understand the Senator gave forth on this current reading, is there not some agency, the U.S. Trade Representative—who is in our great bureaucracy who has the responsibility to look out for these dumping situations that

could possibly persist over such a long period of time?

As a matter of fact, I heard the Senator say earlier this evening that there had been four, five, six, seven, eight attempts to stop this dumping. Is there not somebody in Washington, DC, in the Federal Government, whose job it is to say, "This is unfair; we do not want you doing this to one of our American companies," and risking the loss that the Senator is now faced with in the State of New York of some 875 jobs, a tremendous loss to a city in the Senator's State? It just seems to me that the appropriate agency—and I think the Senator in his diligence probably has already contacted them, but perhaps for my edification the Senator might be able to enlighten me as to whose job it is to look out for the little guy, to see that a Japanese competitor or some other foreign competitor does not dump and continue to dump and ultimately leading a United States Senator who is interested in protecting 875 jobs—and, my gosh, that must seem like very little in the great State of New York—doing what he can to protect those 875 jobs.

And so my question really has to do with who would be the appropriate Federal agency that one would appeal to? And did this company, Smith Corona, try to do that at all?

Mr. D'AMATO. Yes, they did. As a matter of fact, the U.S. Trade Representative and the Commerce Department are really the groups that should be aggressively pursuing a policy of free trade but fair trade. I say free trade but fair trade.

Now, I do not mean to be disparaging of their role. And, indeed, I have to say that, as it relates to this particular legislation, we have received very fine support, rather unexpectedly, but particularly from those at the White House who did intervene to that point of saying, "Let us look and see if we can handle this," because all too often and heretofore companies in a similar position have faced an impregnable wall, kind of like what I am facing here tonight; an impregnable wall of silence, an impregnable wall of indifference.

It does not do my any good, does not do the people of Cortland any good if you are saddened by their plight but you do not do anything to address it.

Then we have some other kinds of crazy laws, really whacky, just really incredible. You can prove a case, you can prove the competitors are breaking the law, violating the law. It has to be damaging to the industry. You have to be out of business. I never heard of such nonsense.

So that even when in some cases you prove what these people are doing, you have to prove that the industry is being so damaged before you can get any relief. Now look that is whacky. That is wrong.

I have to tell you something. If the people hear some of our colleagues here in this Congress—and I respect them, and they sign off on that, they really do. They sign off on that. I do not understand that. Maybe I come from a different world. I just do not understand that if someone is doing something that is wrong, you mean to tell me you can come up and smack someone, but unless you show it is really going to be injurious to them, that is the way the law is that it has to really be injurious to their body. If you are going to hurt them, you have not committed the crime.

In essence, what they are saying is you can come in, commit these violations of law, all kinds of incredible things in terms of trade practices, but unless you show that the industry is in danger or in real hardship, or, I guess, you have to start losing money before you can even get some of these laws effectuated. Nonsense.

But we have had this policy. You cannot break through it until recently. We met stonewall after stonewall, and we helped Smith-Corona, and the reason that we tried to, indeed, my Congressman colleague, I say my Congressman, because I grew up in the same town, and worked together for many years—Congressman MCGRATH sponsored legislation to deal with this.

By the way, here is one of the great ironies. Here is a letter dated May 20, 1992, and it is written by none other than DAN ROSTENKOWSKI, chairman, and he is writing this letter to Congressman MCGRATH. That is why I said, and I laughed, that the opposition to this legislation really comes from this body.

You cannot tell me that any Congressman from Tennessee in the minority is stopping this legislation. That would be the first time in the history of DAN ROSTENKOWSKI being chairman of that committee that that is what is taking place. That is balderdash. I do not think that is an offensive word. It is unbelievable. It is not credible.

Can you imagine DAN ROSTENKOWSKI rolling up to some junior Member from Tennessee in a minority party who is not even on the committee? I mean, he will not roll over for Presidents. He does not roll over for leaders. You think he is really going to roll over for a minority Member, for the distinguished Member of the House of Representatives from Tennessee.

I really whistle a song from Dixie. That is incomprehensible. Let me tell you why. He was not rolling over on May 20, 1992.

He writes this letter:

DEAR RAY: I apologize for the delay in responding to your letter seeking my views on legislation you have sponsored which would strengthen the existing anticircumvention provisions of the U.S. antidumping laws.

In response to your request, I have asked the Trade staff of the Committee on Ways and Means to work with your staff on this

matter. As you know, the work done by our staffers I was pleased to include in H.R. 5100 which I introduced on May 7 with your sponsorship. Most of the provisions on anticircumvention you have included in H.R. 5045, your own legislation on this matter.

I recognize that our proposals to strengthen the law on circumvention have provoked a lively debate on the subject at the request of the administration.

You see here is ROSTENKOWSKI. He says I understand that our pushing for this has had a lively debate with the administration. Yes. That is true.

It is not credible. But now to come forward and to blame ROSTY—by the way he is a terrific guy. He is. He will take the blame. He is not going to give up anybody. He is not going to say, hey, listen I did this or because of, whatever. It was on the committee on the Senate side that really did not want this. It is not "we do not want you to take it."

Do I believe that if the press calls Congressman ROSTENKOWSKI that he is going to for one second to back out of it?

No; he is a trooper. He is from Chicago. When he gives you his word, he keeps his word. When he makes a deal, he keeps the deal. He is not about to go back and give anybody up. We would be kidding ourselves, and I do not have to be a magician to figure it out. It is not hard to figure it out.

So the fact of the matter is the people can blame the Congressman all they want but the blame is here. The blame is here.

Mr. SEYMOUR. Mr. President, will the Senator yield for a question?

Mr. D'AMATO. Certainly.

Mr. SEYMOUR. I ask the Senator: In looking over statements that the Senator made on July 30, 1992, in that statement the Senator says it is absolutely necessary in order to give the 875 workers in Cortland, NY, and other American workers a second chance on a level playing field; is that what the Senator said?

Mr. D'AMATO. That is correct.

Mr. SEYMOUR. Did the Senator also go on and say that without action in this amendment and without a strong commitment to our U.S. fair trade laws, companies and workers from all across this Nation will end up like Smith Corona. And you have Senator MOYNIHAN joining with you in this; is that correct?

Mr. D'AMATO. The Senator from California is absolutely correct and that is why I said this was an action, it was based not in partisanship and I know some people may be saying why are you doing this? I am doing this because it is so right for us to be doing this.

Senator MOYNIHAN is on the tax-writing committee. He is the No. 2 person on it. He studied this issue. I went to him. He said, right, we have to work on this. We did.

ROSTENKOWSKI, he says, I think we can use this debate to help advance our

legislation initiatives in this area. I look forward to working with you on this important trade matter with legislative consideration.

This is why we are here. And that is why I am fighting, because, as I said on July 30, this is our last chance. Help these people. Do not let us adjourn this Congress and do business as usual and send them out on the unemployment lines.

Mr. SEYMOUR. If the Senator will yield, it just is mind boggling. It is mind boggling to believe that we are about to engage and have already begun engaging—and I am sure the Senator has himself engaged in some discourse on the North American Free-Trade Agreement and President Clinton wants to be President Clinton and President Bush and both are out talking about the potential loss of jobs. The only difference I see in what the Senator has been talking about and what he is trying to do with this amendment is he is dealing with the Japanese and they are talking about Mexico. Is that right?

Mr. D'AMATO. Yes; the Senator is right. But the tragedy and the irony of this whole thing is that while Mr. Clinton said, look, I want to see it that, you know, we do not lose these jobs unfairly, and I am going to look at this thing, here is an opportunity to keep us from losing 875 jobs, and you know what is going to be in the minds of people. What is going to be in the minds of people is that as a result of this treaty that we are negotiating, that somehow we are going to be losing these jobs because of that treaty, because they are going to see these 875 jobs moving down to Mexico.

In the minds of the average workers in this country, he is going to attribute that loss of jobs to Mexico somehow unfortunately with the treaty and that is not the case.

But that is what will be the perception. More cruelly, more cruelly, more accurately the Congress by adjourning and voting on a tax bill without including this provision is absolutely belittling itself. Every Member that goes out there and makes a statement, people should vote against them. They should ask, let me ask you something: Did you vote to give the people in Cortland a chance to keep their jobs?

I will tell you something. If those people came from a different State and said to me, Senator, that factory was going to close in Texas, they were being competed against unfairly, did you vote to give those people a chance? If I did some hoofing and woofing and would say, why those jobs did not matter, they did not really, that was not in my State, they should vote against me. They should vote against me.

I have to tell you, I hope that somehow the American people get to find out that the Congress was so busy, so busy doing their thing that they did

not have time to keep a little provision that the chairman of the Ways and Means Committee wrote to my distinguished colleague who has just come on to the floor from the House Ways and Means Committee, Congressman ROSTENKOWSKI, to Congressman McGRATH and say just give us a chance to save some jobs.

This is good. We should have a lively debate with the administration. But we finally got the darn fools over there opposing today. Things come around. I am not talking about the House. I am talking about the administration. And say, "Hey, here is a bill; take this bill."

What happens, miraculously, suddenly, we are supposed to believe that Congressman ROSTENKOWSKI, himself, switched his position. Anyone who knows DAN ROSTENKOWSKI knows something else. This guy does not switch. He will carry someone's else water. He is not about to give anybody up. But he does not have to tell me. I can look him in the eye.

He comes from Chicago. I was in Brooklyn. We kind of know these things. I do not even have to talk to him. You know what? He is taking the heat for some people from here because somehow it does not matter. It does not matter because maybe these people come from his little town in Cortland, NY. They are only little people. You know what? Like most little people, they have taken this beating. This is a beating, and they have taken it in almost stoically. You know, it is, what can we do?

You know, it is like, what can we do? One lady says: I will sell my house, and the other says: I will have to move. People say where am I going to go? Boy, oh, boy, I will tell you what. You talk about people power. They should be down here. They should be down here. I will tell you something. They should find out some of the Members who do not give a darn, and they should be at their house. Yes. They should be there.

These unions, they all talk about them. Where is the UAW? Where in the heck are you? Where are the great unions that are going to stand up for the little people? They are a bunch of baloney artists. UAW—that is take care of yourself. That is what you want to do. Why do you not stand up for these little people? Because they do not belong to a union?

Call up some of these guys here. Do not let us go out. Call up the Congressmen and Senators and tell them: How dare you leave and throw those jobs out on a scrap heap and treat the people like they do not count. Because that is what they are doing. That is what they are doing. AFL-CIO. What a lot of hokum. You guys are a bunch of political you know whats. I cannot use that word. You care about how much you get paid. You care about how many

conventions you go to. You care about how many perks you get. Why do you not stand up for the little people and wake up? You big baloney artists, come on. I am not out of order.

Mr. FORD. I did not say anything.

Mr. D'AMATO. You were about to.

Mr. FORD. But I will.

Mr. D'AMATO. Kirkland, stand up for the people. Stand up for them. Come on down here. Get on the telephone. Call some of these people up. That is right. You can still save their jobs. We will call it the Lane Kirkland bill. It shows great power. You are talking—you are against this manipulating of trade.

Let me tell you something: Car truck car. I brought it up on this floor. I did not tell DON RIEGLE from Michigan, hey, that was my bill, you cannot take my bill. I brought it up on the floor and had the chairman oppose me, because he said that is a revenue measure, and it has to come from the other side, so we pulled it down. Truck car truck. A truck became a car and then a truck so they can escape a tariff. That was terrific. We owe that to that master genius who helped this economy. You know who that is: Brady. You know where we are going to wind up because of that guy, Secretary Brady. You wake up. Incredible. Truck car truck. How a truck could become a car for taxation purposes so it could escape the tariff. The USTR people know about that. Willie von Raab was the only guy. He was dumb. They said: This, Willie, is a car. He said: No, it is really a truck. He did not get the wink, so they canned him. Incredible. Truck car truck.

Let me tell you something. This is job, job, job. Why should we trade an American high paying job? Why? Why? I will tell you why. Because Brother is located in New Jersey. So let me tell you fellows, if you want to break the law, open up a corporate headquarters in New Jersey, and then you can engage in this stuff and if you build an assembly plant, which is not really a plant, but a screw plant where a bunch of people screw things together, you put that in Tennessee. If it just so happens that it is a company that does business in New York, I guess it is easy. I guess it is easy. We can all look the other way.

Well, you know, I just might be able to keep on and be a big surprise for my friends. I thought that I would end this about 8 o'clock. But I am feeling a little better. I have great kidneys, and I have some of these lozenges here, and, Lord knows, would it not be wonderful if my colleagues could all get up and have breakfast and come in here, and the first thing they hear is my dulcet tones. Would that not be a wonderful thing? God, that would be a nightmare. Most of them could not go to bed if they thought they had to get up and hear ALFONSE in the morning here.

Of course, I will look a little better and grow a little fuzz here. But would

it not be nice if a couple of union leaders just came in from all of their work, or their convention, or whatever, and say what is that going on down there and hear me say that you have a chance to save some jobs for Smith Corona, and I think you are a bunch of phony baloneys. If you really cared about people—my God, just the internationals that you have here, you will begin to call up and find out, is that true that the Democratic leadership of the Senate would not go along with a provision to save jobs, that would not cost taxpayers one penny, and that only sought to give the ability to the trade people to have the laws pursue? Can you imagine that?

By the way, this does not say that the plant in Tennessee is out. It does not say we are going to take jobs away from anybody. All it says is that if you break the law, violate the law, then we are going to pursue you, and you can actually bring a tariff case against them. Can you imagine that, if you have a corporate headquarters and a foreign corporation that sets up a foreign headquarters in certain States, and you decide to set up these little phony assembly plants in other States, that you can get a pass; you do not have to follow the law. You do not have to follow the law.

Let me tell you, DANNY ROSTENKOWSKI, I know him. I did not grow up with him, but I grew up with people like him, and I tell you something: He did not drop this thing out on his own. He was asked to take it out, and he was not asked to take it out by some minor leaguer on the minority. He did not listen to him. That is nonsense. He took it out because over here on the Senate side, they wanted to cover up, and he took the heat. He took the heat.

I do not even know if he is taking the heat, because he did not tell me he did it. I do not think he would tell me that anyway. I think he would tell me off the record what happened, and on the record he is a man. We are not being men, but we are doing business as usual. That is what we are doing. My colleagues who want to partition out illegality—and that is what we are doing—and look the other way, as the law is being broken and treat this thing like this is the project for where a government contractor is going to go, or where a new prison is going to be built, whether in my area—today people even fight for prisons—or where a new military installation is going to be built.

This is not the case. I have to tell you something, and again I appeal to some of my friends. Believe it or not, I have a friend on this floor who is not a Republican. I consider him to be a friend. I hope that we can make a difference. I hope that we can say to our colleagues, why do you want to do this? Why make this a battle of party loyalty? Why should this be a battle be-

tween the Senators from New York or a Senator from New York and colleagues that come from other States on a partisan political matter? That is not what it should be about. It should be about some element of fairness. The situation is: What is right? By the way, how would Brother be disadvantaged? I want to know. This great manufacturing company called Brother. Would we be disadvantaging them by saying that they have to adhere to the law?

I did not know that was so bad. Imagine. And I have colleagues here who say they do not want a foreign corporation to adhere to the law, because they are headquartered in their State, or because it might cost jobs in another State. The fact that jobs will be lost irrevocably to this Nation, that U.S. citizens are being disadvantaged, that we will have an exodus of jobs, apparently, does not matter. As I said, if this company was polluting a lake or a stream, would the same logic be employed?

If they were headquartered in my State, would it be acceptable for them to pollute a lake in someone else's State? You would not buy that for a minute. You would say, wait a minute, the environmentalists will be down on you. We do not have them here to scream and yell at Smith Corona, and we have to appeal to the labor unions. Anybody who is watching who belongs to a union, you ought to call up your union leader and say to them: How is it that we are going to let them pass a tax bill, or any legislation, that does not have a provision that says that you should see to it that this foreign corporation adheres to these circumvention provisions, these antidumping provisions, and is not permitted to break the law?

If that is what unions are for—by the way, I did not know unions only stood up for their own membership. I thought the AFL-CIO also stood up for people—they were for working people and what was right and to have the law enforced. As a matter of fact, they would have undertaken all kinds of causes. Here is a cause, and I wish I thought about it before.

But, you see, I was caught short. I really thought that this provision would be included. I really did. So, at about 8 o'clock, my staff told me that they had received the word that it was definitely outskye, and I did not call Thompson and tell him it was definitely out, because I had spoken to him earlier, and I was concerned and told him it did not look good, but I still thought maybe we had a chance. But I have to tell you that here is a chance to use your power. Of course, you could opt for the job training program and spend \$10 or \$15 million a year trying to train these people, and I guess some people like that. I have heard this contention. Tonight I was asked what would you do to help the economy and, you know, right away, "job training."

Hell, these people do not want job training. They have a job and they do a good job. They have increased their productivity.

By the way, for those who do not know, these workers produce a better typewriter, a cheaper typewriter, a more competitive typewriter than Brother, the Japanese company. So why are they losing out? Because Brother breaks the law. Brother dumps what Brother sells.

As a matter of fact, it sells in such a—so markedly below cost that one of the dumping orders was actually a 60-percent order—60-percent order. I am reading here.

Congressman SOLOMON offered an amendment to the proposed rule on H.R. 11, the urban tax bill:

At the end of the resolution, add the following:

Upon the adoption of the conference report the House shall be considered to have adopted the concurrent resolution (H. Con. Res. 380) introduced by Representative Solomon of New York on October 5, 1992, directing the Clerk of the House to make corrections in the enrollment of the bill (H.R. 11) to amend the Internal Revenue Code of 1986 to provide tax incentives for the establishment of tax enterprise zones, and for other purposes.

Explanation: This amendment to the rule provides for the automatic adoption of H. Con. Res. 380, introduced by Rep. Solomon on Oct. 5, 1992, and originally sponsored by Representatives McGrath, Levin and Gephardt as part of H.R. 5100, the Trade Expansion Act of 1992, which passed the House on July 8, 1992, by a vote of 280-145.

By the way, this is the thing that DANNY pushed and supported—280 to 145—

The provision would blunt efforts by foreign manufacturers to evade anti-dumping duties by establishing plants in the U.S. for assembly of foreign made parts into products for sale here.

Did we get a vote on it? Failed? What did we lose by?

We lost very closely. But let me tell you something, if they want a tax bill maybe they will bring it up for reconsideration. I do not know.

Because I have to tell you something, I do not know when they intend to go home. But I do not intend to yield on this issue. And, if they want a tax bill I have to tell you something. Maybe if we keep in long enough—I guess I have to yield at some point. But there are others. I think there are other Members who are willing to be supportive of my position. And I have to tell you I am truly, truly impressed. I say to my colleagues from the other body who have taken the time to come and to be here, and there are a number of Members—more Members than I have seen here before. I do not know what they are doing up at this hour. But I thank them for coming and, I think, adding their support. I know that is why they are here.

And I thank the gentleman and my friend and colleague, Congressman SOLOMON, for attempting to bring about a solution to this.

I still appeal to my good friends on the other side of the aisle in the Senate. I want to tell you something. This should not be a battle of winners or losers. But it should be a fight to make everybody a winner.

I tell you something, we can go home making this body and the House look a lot better by doing what is right. That is what that legislation was about and that is why we worked and crafted it and we toned it down and we did everything that was possible. I have not taken to trying to say take a look at this bill or that bill.
