Mr. GRAHAM. Mr. President, it is my purpose to make remarks on the occasion of the issuance from the General Accounting Office of a study requested by me relative to concerns about nuclear reactors in Cuba. This report was the result of hearings held by the Nuclear Regulatory Subcommittee of the Environment and Public Works Committee on the issue of international nuclear power.

During the course of those hearings particular attention was focused on two reactors which are currently under construction on the south coast of Cuba. At my request, the General Accounting Office conducted a study of these reactors and their potential impact. These two charts, one on the right reflecting the conditions in the summer and the other, on the left, reflecting the conditions in the winter, indicate the potential fall of radioactive material upon extensive areas of the United States, as well as the Caribbean and Central America in the event of an accident at either of the two plants on the southern coast of Cuba.

Mr. President, I suggest that it is time for the international community to organize itself in a way to protect against these kinds of potential accidents from nuclear plants that are inappropriately designed, constructed or operated. I suggest, for instance, the need for international standards of nuclear plant safety; a nonproliferation treaty with those countries of the world, such as the United States, France, and others which have the capacity to provide the materials for the construction of commercial nuclear plants and will not do so unless the recipient country agrees to meet the international standards; also, the importance of supporting the International Atomic Energy Agency, which is the world's principal guardian of safety, both in military and commercial nuclear power.

Mr. President, I believe this is a very important issue. It is one in which I intend to propose legislation to the 103d Congress if the people of my State are generous enough to give me an opportunity to continue to represent them.

Mr. President, I would like to address several important issues of international nuclear safety. These issues have been presented by the construction of two nuclear powerplants in Cuba. Up until the past few months, these plants have been built with Soviet and Russian assistance.

Over the past year there have been a number of allegations, both from Cuban defectors and from Americans who have studied the designs of these plants, that there are serious defects in the construction and design of the two nuclear powerplants being built in Cuba. Additionally, a number of American and international nuclear safety experts believe that Cuba does not possess the necessary technical expertise and resources to safely operate nuclear powerplants.

The Cuban reactors could never be licensed in the United States. If completed, these nuclear powerplants could be a danger to the health and welfare of many Americans.

Unfortunately, the problems with the Cuban nuclear plants are no closer to being resolved today than they were when they were first brought to public attention a year and a half ago. If we ever are to be assured that these plants will not threaten the safety of people in the United States, the U.S. Government must do more to press for the development of international nuclear safety standards, international inspections to evaluate conformity with these standards, and an international agreement to deny nuclear technological assistance to nations that do not pledge to abide by the system of standards and inspections.

Mr. President, the problems with the Cuban nuclear powerplants have been very well documented and highlighted by a report that has just been issued by the General Accounting Office. At my request, the GAO looked into the status of the construction of these plants and the allegations regarding their safety. The GAO's findings confirm that the problems with these plants have not been resolved to anyone's satisfaction.

In brief, the GAO found that the civil construction of the first reactor is over 90 percent complete; 37 percent of the reactor equipment has been installed. The second reactor is 20 to 30 percent complete. The status of the reactor equipment for this unit is uncertain.

Due to Cuba's current lack of hard currency, Russian aid has been suspended. However, after the suspension was announced the Russians sent a delegation to Cuba to discuss whether construction assistance could be resumed. We cannot be sure that this

project will not be continued at some time in the future, either with or without Russian aid.

With respect to the safety of the Cuban nuclear powerplants, a number of Cuban defectors who formerly worked at the plants have alleged that there are numerous problems with the quality of construction. Specifically, there are allegations concerning inferior valves in the emergency core cooling system. A number of former workers have alleged that there are defective welds in piping systems outside and inside the containment.

Additionally, there are allegations that the Cubans who would be operating these plants are receiving inadequate training. One former Cuban official has alleged that the Russians are providing training on a simulator for a reactor with a design that is different from the design of the plants under construction, thus making the value of this training questionable. United States experts do not believe that Soviet-designed simulators provide realistic training for accidents.

The NRC's Director of International Programs and the Acting Director of the Department of Energy's Division of International Programs have expressed concern about the design of the Cuban plants. They believe that the containment might not be able to fully withstand the pressures that might arise in an accident. In other words, they are worried that the containment might not prevent the release of radiation if there is an accident.

According to the GAO, the NRC is particularly concerned about the adequacy of Cuba's regulatory infrastructure, the adequacy and number of trained regulatory and operational personnel, and the reports of the defective welds.

Cuba's problems with developing an adequate infrastructure for operating, maintaining, and regulating nuclear powerplants are obvious. Cuba cannot even maintain an infrastructure for basic goods and services. A recent article in the New York Times says that most vehicles have disappeared from the roads in Cuba due to a lack of fuel. Consumer goods and basic foods are scarce. Electricity is being rationed. The recent sugarcane harvest had to be extended for 2 months because machines were unavailable and manual labor had to be used instead. A country that does not have enough mechanized equipment to harvest its sugarcane can hardly be expected to operate, maintain, and regulate nuclear powerplants. If these plants in Cuba were to be completed and begin operation, the biggest risk could be from the lack of an adequate technical infrastructure in Cuba to knowledgeable and competently operate and regulate these plants.

In July 1991, the Subcommittee on Nuclear Regulation, which I chair, held a hearing on the safety of nuclear pow-

erplants designed in the former Soviet Union. At this hearing we also examined the safety of the nuclear powerplants under construction in Cuba. Many of the problems with the Cuban plants that were described by the GAO also were raised during this hearing.

For example, the Nuclear Regulatory Commission testified before the Subcommittee at this hearing, over a year ago, that "there are indications \* \* \* that there is a need for improved quality control in the construction of these plants." Prof. Nils Diaz of the University of Florida, an expert on the safety of Soviet-designed reactors, testified before the subcommittee that:

The operation of these plants, without the necessary Quality Assurance and operator qualifications, could create a significant health and environmental hazard to areas close to it, and a continued threat to the economy, agriculture and tourism in the regions around the Gulf of Mexico and the Caribbean regions.

It is frightening to consider the potential extent of a release of radiation from an accident at any of these plants. Such a release would not just affect the people in Cuba living near those plants. People in the United States could be affected too. In particular, persons in the south and southeastern United States could be harmed by radiation released from the Cuban plants.

At GAO's request, the National Oceanic and Atmospheric Administration [NOAA] analyzed the potential pathways for radioactivity that might be released from an accident at the Cuban reactors. The NOAA analysis showed that all of Florida and portions of the Gulf States as far west as Texas could be affected in the summer, and in the winter areas as far north as Virginia and Washington, DC, could be affected.

In addition to any health impacts from radiation releases, there may be serious economic consequences from radioactive fallout. The Chernobyl experience shows that a release of radiation from a reactor could cause serious economic losses to people in nations downwind from the accident, even where there are no health effects. After the Chernobyl accident, milk was thrown out in Germany. Sheep were slaughtered in England. Reindeer were killed in Scandinavia.

Even if the releases are small, the fear of radiation could cause devastating losses for agricultural and livestock industries downwind from the accident. Who will drink milk that is labeled as radioactively contaminated? Who will eat meat that is not labeled as safe, but only as "posing no undue risk to public health and safety?"

Thus, the issue of the safety of the Cuban reactors is not just a concern for the people in Cuba, the people in the Caribbean, or the people in just one or two States of the United States. The impacts could be much broader. The safety of these reactors should be a

concern for people throughout the United States.

Mr. President, the United States has no way of verifying the accuracy of the allegations regarding the safety problems at the Cuban plants. Moreover, there are no mechanisms in place for correcting deficiencies. Neither the State Department, the Nuclear Regulatory Commission, nor the Department of Energy has any way of satisfying itself or the American people that these plants will be operated in a manner that does not pose an undue risk to persons living in the United States.

At present there are no binding international nuclear safety standards. There is no internationally agreed-upon baseline to judge the safety of these or any other plants. To date, the International Atomic Energy Agency [IAEA] has established safety fundamentals, standards, guides, and practices, but they are not binding. They are general and advisory. IAEA members are not required to adhere to them.

In November, 1991, the Subcommittee on Nuclear Regulation held a hearing on whether there should be binding international nuclear safety standards. Just prior to this hearing the members of the IAEA had agreed to develop a framework convention for the establishment of international nuclear safety standards. The IAEA members, including the United States, are now working on this framework convention.

At the subcommittee's last November's hearing I expressed my strong support for the development of binding standards. At the hearing, all the witnesses from the U.S. Government—the Nuclear Regulatory Commission, the Department of Energy, and the Department of State—supported the goal of developing the framework convention for international standards. Also at the hearing, Morris Rosen, representing the IAEA, testified in favor of the development of binding international safety standards.

Last November the GAO issued a report on international nuclear safety. The GAO recommended that the United States support the development of international safety standards.

The establishment of international safety standards will provide a common baseline for judging the safety of nuclear plants around the world. Hopefully, these standards will make it easier to determine which of the existing plants should be shut down, which modifications are needed for others, and which plants are acceptable.

Once standards are developed it will be vitally important that there be some competent and independent method of inspection to determine whether nuclear powerplants under construction and in operation are in compliance with international standards. The International Atomic Energy Agency is a credible and independent

international organization with responsibility for improving international nuclear safety. There should be a mechanism for the IAEA to verify compliance with the standards that have been established.

A system of standards and inspection to determine compliance with those standards would provide much more assurance that nuclear powerplants in one country will not pose any undue risks to persons in another country.

To date, there has been no outside inspections of the nuclear powerplants under construction in Cuba. Without any such inspections, we can only speculate on the accuracy of the serious allegations that have been made regarding the safety of these plants. For some time the IAEA has been considering whether to undertake a preoperation visit to the Cuban nuclear reactors. This visit has yet to occur. Even if it were to occur, however, the purpose of such a visit would not be to verify compliance with international standards, but rather to provide suggestions as to how the construction could be improved.

Clearly, therefore, the current international regime is inadequate. It must be strengthened. The United States must aggressively push for international nuclear safety standards. The United States also must support a method of inspection for determining compliance with those standards.

Voluntary standards and voluntary inspections alone, however, may not be sufficient. International peer pressure may not be enough. There should be incentives for nations to adhere to these standards and to allow inspections.

A strong incentive to comply with these standards would be to deny nuclear assistance to those that don't. Nations that do not comply with international nuclear safety standards or that do not permit international inspections of their facilities should not be able to obtain commercial nuclear assistance from nations that do.

This type of system would be similar to the system that has been established to prevent the proliferation of nuclear weapons technology. IAEA members have agreed that civilian nuclear technology or materials will not be provided to nations that do not agree to accept IAEA safeguards to prevent that technology or materials from being used for noncivilian purposes.

There are a host of restrictions under United States and international law for the transfer of technology to nations that do not adhere to the international system of safeguards and inspections to prevent the nonproliferation of nuclear weapons technology and materials. Oddly enough, there are almost no restrictions on the transfer of technology that may be used for unsafe nuclear reactors. If the international community can restrict the export of nuclear technology that will pose an unacceptable risk of contributing to nuclear weapons

proliferation, then the international community also should be able to restrict the export of nuclear technology that will pose an unacceptable risk of a nuclear accident.

I want to make it clear that I do not advocate the creation of a worldwide, international equivalent of the Nuclear Regulatory Commission. Nuclear safety must remain the responsibility of the powerplant operators and the national regulatory bodies. I do believe, however, that the international enforcement mechanism that I have described can improve rather than detract from international nuclear safety.

Mr. President, a strong international safety regime will require a strong international agency to implement that regime. At present the International Atomic Energy Agency is the international organization responsible for international nuclear safety. In my opinion, to provide for more effective international oversight of nuclear powerplants, the United States must give greater support to the IAEA's safety activities than it has in the past.

The IAEA also is the international organization responsible for preventing the proliferation of nuclear weapons. On the safeguards side, the IAEA recently has undertaken a considerable and prominent role in verifying and ensuring that Iraq no longer has a nuclear weapons capability. It is reasonable to assume that ensuring nuclear nonproliferation in Iraq and other countries will remain a vital mission for the IAEA.

On the safety side, the IAEA has undertaken many new activities recently. Most of these have arisen as result of the collapse of the Iron Curtain. The IAEA has performed a number of safety assessments of Soviet-designed reactors in Eastern Europe. Some of these have been completed. Some are continuing. As I mentioned previously, the IAEA is now in the middle of negotiations to develop an international framework convention on nuclear safety.

Despite the increases in the IAEA's safeguards and safety activities, until this year the United States had opposed any increase in the IAEA's budget. It has been U.S. policy over these years not to support any increases in the budgets of any international agency. Unfortunately, this broad policy has had the unintended consequence of forcing the IAEA to curtail some of its activities. It is difficult to see how the IAEA can expand its activities without any increase in its budget.

At the subcommittee's hearing last November, Morris Rosen of the IAEA testified as follows:

The Agency has over the past years carried out safety activities within the budgetary limits of zero growth which have been sustained only by extrabudgetary resources and an unusually committed staff. The accom-

plishments of the Agency have had an effect on the quality of some ongoing activities and have also caused delays and cancellations of others. If the IAEA is to fulfill its safety role, there must be realistic support through the necessary expansion of resources. Currently nuclear safety and radiation protection activities are assigned \$10 million, or 6 percent of the Agency's regular budget. Building a stronger international presence in nuclear safety will not only contribute to safety, but will also help maintain the nuclear option. If called upon, a sufficiently financed agency is unquestionably ready to do its part.

This year's Commerce-Justice-State appropriations bill for fiscal year 1993 finally includes an increase for the IAEA's budget. However, this increase is only about \$4 million. The Senate version of this bill would have provided for an additional \$15 million increase. Unfortunately, the administration opposed this increase. The increase was deleted in conference with the House. I am disappointed that increases provided by the Senate were not adopted.

The United States could further improve the IAEA's budgetary situation by paying our dues in a timely manner. Typically, the U.S. pays its annual assessments for the calendar year in the third or fourth quarter of that year. This is because the U.S. dues for a calendar year are paid through the appropriations bills for the next fiscal year. Thus, dues that should be paid in January are not paid until September or October of that year. This makes it very difficult for the IAEA to plan its activities or to pay for them in a timely manner. This should be corrected.

Although I am advocating a greater international role in nuclear safety, I also believe that the United States, by itself, can do much to encourage other nations to adhere to international safety standards and practices. There are a variety of tools, such as conditions on foreign aid, or economic pressures, that the United States can use to induce other nations to follow international practices.

For this reason I cosponsored an amendment offered by my colleague from the State of Florida, Senator MACK, to prohibit United States assistance to Russia or any of the other emerging European democracies if any such country is providing assistance to Cuba for the construction of its nuclear reactors unless the President certifies that the State will not provide nuclear fuel rods to Cuba unless Cuba will first, act in a manner consistent with non-proliferation treaties; second, comply with IAEA's 1991 safety standards or the current Russian safety standards; and third, accept international inspection and verification with such safety standards.

Although this provision of the Senate bill has been modified in conference, the conference report still retains the essential element that in determining the assistance to be provided to Russia or an emerging democracy the United

States shall consider the extent to which that country is supporting the construction of a nuclear power plant in Cuba.

Through this Russian aid bill and other initiatives the United States will be providing either unilateral or multilateral assistance to improve the safety of Soviet-designed nuclear reactors in the former Soviet Union and elsewhere in Europe. However, it hardly makes sense for the United States to provide assistance to a country that at the same time is undermining nuclear safety in our own backyard. As we provide assistance to others, we must make sure that we do not facilitate or encourage practices which can lead to nuclear safety problems for persons in our own hemisphere. I strongly encourage the administration to use the leverage provided in this bill to the maximum extent possible.

I have outlined a variety of tools that the United States should use or develop to improve international nuclear safety. We should encourage the creation of binding international nuclear safety standards. We should insist upon a system of international inspection for nuclear reactors. We should develop a regime for the nonproliferation of unsafe nuclear technology.

There are a variety of policies that we should adopt with respect to the International Atomic Energy Agency. We should support an increase in the IAEA's budget appropriate to meet its expanded safety and safeguards responsibilities. We should pay our assessments on time.

Finally, we should more forcefully use bilateral and multilateral assistance to encourage improvements in nuclear safety.

International nuclear safety is not an obscure or remote issue only for people in far away places. It is an issue that could affect the health and welfare of many Americans. It is an important issue for us here at home. I hope that we will see progress on this issue in the near future.

I ask unanimous consent, Mr. President, to print the report of the General Accounting Office entitled "Nuclear Safety, Concerns About Nuclear Power Reactors in Cuba."

There being no objection, the report was ordered to be printed in the RECORD, as follows:

NUCLEAR SAFETY—CONCERNS ABOUT THE  
NUCLEAR POWER REACTORS IN CUBA

U.S. GENERAL ACCOUNTING OFFICE,  
Washington, DC, September 24, 1992.

Hon. BOB GRAHAM,  
Chairman, Subcommittee on Nuclear Regulation,  
Committee on Environment and Public Works,  
U.S. Senate.

DEAR MR. CHAIRMAN: This report responds to your June 1992 request that we provide information on the status of the construction of the two Soviet-designed nuclear power reactors in Cuba and summarize allegations by former Cuban nuclear power officials that poor construction practices and other prob-

lems could affect the safety of the nuclear reactors' operation. The report also presents information obtained from representatives of the Cuban and Russian governments about the nuclear reactors.

In addition, this report discusses concerns of officials from the State Department, the Nuclear Regulatory Commission (NRC), and the Department of Energy (DOE) about the safety of the Cuban nuclear power reactors. It further presents information from the U.S. Geological Survey (USGS) on the potential for earthquakes at the reactor site and from the National Oceanic and Atmospheric Administration (NOAA) on the probability that radioactive pollutants accidentally released into the atmosphere from the Cuban nuclear reactors could reach the United States.

RESULTS IN BRIEF

It is uncertain when Cuba's nuclear power reactors will become operational. On September 5, 1992, Fidel Castro announced the suspension of construction at both of Cuba's reactors because Cuba could not meet the financial terms set by the Russian government to complete the reactors. Cuban officials had initially planned to start up the first of the two nuclear reactors by the end of 1993. However, before the September 5 announcement, it was estimated that this reactor would not be operational until late 1995 or early 1996. The civil construction (such as floors and walls) of the first reactor is currently estimated to be about 90 percent to 97 percent complete, but only about 37 percent of the reactor equipment (such as pipes, pumps, and motors) has been installed. The civil construction of the second reactor is about 20 percent to 30 percent complete. No information was available about the status of equipment for the second reactor.

According to former Cuban nuclear power and electrical engineers and a technician, all of whom worked at the reactor site and have recently emigrated from Cuba, Cuba's nuclear power program suffers from poor construction practices and inadequate training for future reactor operators. One former official has alleged, for example, that the first reactor's containment structure, which is designed to prevent the accidental release of radioactive material into the atmosphere, contains defective welds. Another said that reactor operator trainees have received training on inadequate reactor simulators. In contrast, a representative of the Cuban government told us that Cuba wants to build its reactor in accordance with safety standards. Also, according to information provided to us by a representative of the Russian government, Cuba's reactor has been constructed according to safety rules that take into account, among other things, the possible impacts of an earthquake.

State Department, NRC, and DOE officials have expressed a number of concerns about the construction and operation of Cuba's nuclear power reactors. According to State Department officials, the United States maintains a comprehensive embargo on any U.S. transactions with Cuba and discourages other countries from providing assistance, except for safety purposes, to Cuba's nuclear power program. The United States would prefer that the construction of the reactors never be completed and wants Cuba to sign the Non-Proliferation Treaty or the Treaty of Tlatelolco, both of which bind signatories to blanket nonproliferation commitments for their entire nuclear program, before the United States considers reversing its policy of discouraging other countries from assisting Cuba with the construction of the reactors. The United States has asked Russia to

cease providing any nuclear assistance until Cuba has signed either treaty.

NRC officials are aware of, but could not verify, the Cuban émigrés' allegations of safety deficiencies because available information was limited. They said, however, that if the allegations were true, the cited deficiencies could affect the safety of the reactors' operation. In addition, they expressed concern about the ability of Cuba's industrial infrastructure to support the nuclear power reactors, the lack of a regulatory structure, the adequacy of training for reactor operators, the quality of the civil construction, and the design of the reactors' containment structure. A DOE official expressed similar concerns about the quality of the reactors' construction and design.

USGS has not assessed the risk of an earthquake at the reactor site in Cuba, in part because USGS does not have access to the information required for this type of analysis. An analysis prepared by NOAA scientists shows that there is a possibility that radioactive materials could reach the United States by air currents in the event of an accident at Cuba's nuclear power reactor site.

#### BACKGROUND

In 1976, the Soviet Union and Cuba concluded an agreement to construct two 440-megawatt nuclear power reactors near Cienfuegos on the south central coast of Cuba, about 180 miles south of Key West, Florida. (See fig. 1.) The construction of these reactors, which began around 1983, was a high priority for Cuba because of its heavy dependence on imported oil. Cuba is estimated to need an electrical generation capacity of 3,000 megawatts by the end of the decade. When completed, the first reactor unit would provide a significant percentage (estimated at over 15 percent) of Cuba's need for electricity.

Most of the reactor parts, except for civil construction materials, have been supplied by the former Soviet Union under bilateral economic cooperation agreements. Cuba planned to start up the first reactor at the end of 1993, but construction lags, technical complications, and problems with deliveries of equipment have caused delays. Following the breakup of the Soviet Union, economic links to Cuba have been disrupted as the newly formed Russian republic has shifted to a market economy and begun to provide technical assistance to Cuba on a commercial basis. These changes have contributed to the delays in the operational starting date for the reactors.

#### DESIGN OF CUBAN REACTORS

Cuba's nuclear power reactors are the newest model (known as the VVER440 model) of the Soviet-designed 440-megawatt pressurized water reactors (PWR) and are the first Soviet-designed reactors to be built in the Western Hemisphere and in a tropical environment. The Cuban model, called the VVER440 V318, is the model that the Soviet Union planned to export to other countries. The most notable difference between the Cuban model and other Soviet-designed reactors is that the Cuban reactors will have a full containment. The containment, a steel-lined concrete domelike structure, serves as the ultimate barrier to a release of radioactive material in the event of a severe accident. As discussed below, there are differences between the design of the Cuban reactors' containment and the containment of reactors designed in the United States.

#### Study of Cuban reactors

Because of Cuba's proximity to the United States and the risk to which U.S. citizens

may be exposed in case of an accident, NRC performed a limited study to examine the containment design and safety features of the Cuban nuclear power reactors. The study was completed in 1989 and discusses similarities and differences in safety characteristics between the Cuban reactors and comparable U.S. reactors.

The study noted that although the design of the Cuban reactors has many features in common with that of the U.S. PWR, several differences could lead to significantly different reaction in the event of a serious accident. For example, the Cuban reactor, like the U.S. PWR, uses water to cool the reactor core, but the Cuban reactor uses a different system for handling the steam pressure that would be generated by a severe accident. In the Cuban reactor, the steam is condensed to water in a bubbler-condenser system so that pressure is reduced in the containment structure.<sup>1</sup> If, in a worst-case scenario, the steam bypassed the bubbler-condenser system and reached the upper portion of the containment in pressures greater than the upper portion's designed pressure retention capability of 7 pounds per square inch (other portions of the containment are designed to withstand pressures of about 32 pounds per inch), the containment could be breached, and a radioactive release could occur. In contrast, the U.S. PWR is designed to accommodate pressures of about 50 pounds per square per square inch throughout the entire containment structure. The study indicated that the Cuban reactor and the comparable U.S. PWR are designed to accommodate similar types of accidents but concluded that it was difficult to compare the risk posed by the two types of reactors because the information required for such an assessment was not available.

#### STATUS OF CONSTRUCTION

On September 5, 1992, Fidel Castro announced that the construction of both of Cuba's reactors was suspended because Cuba could not meet the financial terms set by the Russian government to complete the reactors. Estimates of the amount of the civil construction (such as floors and walls) completed for the first nuclear power reactor range from 90 percent to 97 percent, but only about 37 percent of the reactor equipment (such as pipes, pumps, and motors) has been installed.<sup>2</sup> About 20 percent to 30 percent of the civil construction is estimated to be complete for the second reactor. No information was made available to us about the status of the equipment for the second reactor.

Concrete has been poured on the upper portion of the containment dome for the first unit. However, the reactor's instrumentation and control system has not been purchased because Cuba does not have the hard currency to pay for it. The reactor fuel has not been delivered, and some key or primary system components (1 reactor vessel, 6 steam generators, 5 primary coolant pumps, 12 iso-

<sup>1</sup> A bubbler-condenser pressure system is located in the containment building and is composed of towers containing trays of water that serve as suppression pools and expansion volumes connected to each tray. Steam is convected from the region around the reactor's primary system to below the surface of the water in the trays, and as the steam bubbles upward through the water, it is condensed, and gases are released into the expansion volumes. Noncondensed steam and other gases are then vented from the expansion volumes to the dome of the containment building.

<sup>2</sup> Information regarding the status of the construction of the Cuban reactors was developed from our interviews with NRC and State Department officials, Mexican nuclear power officials who had visited the nuclear power site, and the Cuban émigrés.

lation valves, 1 pressurizer and catch tank, and 4 accumulators) have been delivered but not installed. These components have been stored outside on-site since December 1990.

According to information provided to us by an official of the Embassy of the Russian Federation in Washington, D.C., the first nuclear reactor was tentatively scheduled to be operational in late 1995 or early 1996. Because Cubans constructing the reactor lack experience, all critical work was being done by Russians or under the control of Russians. As of April 1, 1992, the cost of the plant's construction totaled 1.6 billion rubles, or about \$960 million.

#### SAFETY CONCERNS RAISED BY FORMER CUBAN NUCLEAR POWER OFFICIALS

We talked with five former Cuban nuclear power officials who were identified as having concerns about the Cuban reactors. These officials included nuclear and electrical engineers and a technician who had worked at the reactor site and emigrated from Cuba. They believed that problems exist that could affect the safe operation of the reactors, such as the lack of a system to check reactor components, defective welds in the civil construction, and questionable training of future operators. The following discussion summarizes these officials' allegations as well as information that we obtained from Cuban and Russian officials knowledgeable about the nuclear reactors. Our work served neither to confirm nor to refute the allegations.

#### Allegations of problems and defects in construction

According to the former Cuban nuclear power officials, the nuclear facility does not have a good system to check reactor components. For example, two of the officials alleged that advisers from the former Soviet Union working at the reactor site could not guarantee that the valves installed in the first reactor's emergency core cooling system would function under certain conditions. Although the Soviet advisers told these officials that the valves had been tested, the advisers did not provide any documentation showing test results. Emergency core cooling systems are an important part of the reactor because they help ensure that, in the event of an accident in which coolant is lost, radioactive material does not escape into the environment.

The former Cuban technician, who was responsible for checking welds in the civil construction, told us that he and a Soviet technician had examined X-rays from about 5,000 weld sites that had passed inspection. They found that about 10 percent to 15 percent of these welds were defective. Although he did not know exactly where the pipes with the defective welds were located, it was thought that they were part of the auxiliary plumbing system. According to this former technician, a group of Soviet officials also reviewed the X-rays and confirmed that the welds were defective. Another former official said that even though defective welds were found in the containment dome, concrete was still poured.

The technician said that he had reported the defective welds to his superiors, who made an effort to locate the defects. He left Cuba shortly after reporting the problem and does not know whether any corrective action was taken. He said that Cuba's state security had classified the information about the defective welds as it routinely did any reports of problems at the plant.

In June 1991, this former Cuban official testified on problems in the reactors' civil con-

struction before the Subcommittee on Western Hemisphere Affairs of the House Committee on Foreign Affairs. State Department, DOE, and NRC officials debriefed this individual and concluded that the Cuban reactors appeared to have quality control problems but that the welding problems probably would not lead to a major accident. Two of the former Cuban officials who were still working at the nuclear power plant at the time of the hearings told us that the Cubans had paid increased attention to safety concerns after this individual testified.

Former Cuban officials alleged that defective welds were also found in hermetic seals, in support structures for the primary components, and in the spent fuel cooling system. The seals and support structures are important to safety because they are part of the containment that prevents radioactive material from leaking into the environment if an accident occurs. The spent fuel cooling system is important because it prevents radioactive material from leaking if overheating occurs.

#### *Allegations of inadequate simulator training*

According to one former Cuban official, individuals trained to be reactor operators have received 5 months of instruction from the Russians on a VVER440-megawatt model V230 reactor simulator at the Novovoronezh nuclear power plant in Russia. However, he said that the value of this training is questionable because this simulator does not resemble the reactor under construction in Cuba. In addition, he said that some Cuban reactor operator trainees had asked for training on a VVER1,000-megawatt reactor simulator because it was similar to the reactor in Cuba, but he did not know why they had not been trained on it. Furthermore, according to an NRC official, Soviet-designed simulators are slow-response simulators and are considered deficient by U.S. standards because they do not simulate an accident as it would actually happen.

#### *Assertions of adherence to safety rules*

The Acting Principal Officer of the Cuban Interests Section (at the time of our review, one of the highest-ranking Cuban officials in the United States), told us that he was aware of the allegations made by the Cuban émigrés. He said, however, that Cuba was interested in building the nuclear power reactor in accordance with recognized safety standards to avoid the effects that a "Chernobyl-type" accident could have on the Cuban people and surrounding countries. He said that Cuba had provided medical treatment to children from the former Soviet Union affected by the Chernobyl accident and, as a consequence, knew firsthand the problems that could result from a nuclear accident. He said that he did not know whether the plant would ever be finished because so much money was needed to buy equipment for the reactors (between \$100 million and \$200 million).

We submitted a list of written questions to this official about the status and quality of the reactors' construction, design and operational safety features, and nuclear fuel. He said that he would submit the questions to the appropriate nuclear power officials in his government and try to arrange for GAO staff to meet with Cuban nuclear power officials and visit the nuclear plant site. As of September 1, 1992, we had not received a response to our questions.

According to information provided to us by the Embassy of the Russian Federation, the design of Cuba's nuclear reactors takes into account special considerations, such as the

tropical environment and the impact of an earthquake (seismicity) or of an airplane's crashing into the plant.

#### *U.S. POLICY AND CONCERNS OF U.S. OFFICIALS ABOUT THE SAFE CONSTRUCTION AND OPERATION OF CUBA'S NUCLEAR REACTORS*

According to State Department officials, the United States would prefer that the nuclear reactors not be completed, NRC and DOE officials with whom we spoke also have a number of concerns about the construction and future safe operation of the reactors.

#### *United States prefers that reactors not be completed*

Currently, the United States maintains a comprehensive embargo on any U.S. transactions with Cuba and discourages other countries from providing assistance, except for safety purposes, to Cuba's nuclear program. The United States would prefer that the construction of the reactors never be completed and insists that Cuba sign either the Non-Proliferation Treaty or the Treaty of Tlatelolco—both of which bind signatories to blanket nonproliferation commitments for their entire nuclear program—before the United States considers reversing its policy of discouraging other countries from assisting Cuba with the construction of the reactors.

According to the State Department, U.S. nuclear energy officials believed, on the basis of information available about the design of the power plant, that the possibility of an off-site radiation leak was considerably lower for the Cuban reactors than for "Chernobyl-type" reactors because the design of the Cuban reactors differed from that of the Chernobyl-type reactors and the Cuban reactors had containment structures and other safety features that the other reactors did not possess. However, U.S. officials are concerned that Cuba is not equipped to deal with an accident.

In October 1989, the State Department arranged a limited visit with Cuba through which an NRC official and two U.S. nuclear power industry representatives visited the plant and met with Cuban nuclear power officials. Previously, Cuban nuclear power officials had visited a U.S. nuclear power plant. After that visit, the United States proposed further visits to look at construction, quality assurance, and operational safety. In September 1991, the then head of Cuba's Atomic Energy Commission (Fidel Castro's son) requested that a formal agreement on nuclear safety and cooperation be signed before any further exchanges took place between the United States and Cuba.

The State Department proposed instead that safety visits occur on a case-by-case basis. U.S. officials thought that a formal agreement would signal U.S. acceptance of Cuba's building a nuclear power plant without having signed the Non-Proliferation Treaty or the Treaty of Tlatelolco. Also, U.S. officials thought that the Cuban government could use a formal agreement for propaganda purposes to indicate falsely that the United States did not have concerns about the nuclear reactors. In addition, according to State Department officials, a formal agreement between the United States and Cuba would not be consistent with U.S. efforts to discourage cooperation between Russia and others in building the Cuban nuclear reactors. The State Department may seek a follow-up visit to the Cuban reactors by NRC officials if construction proceeds.

The United States continues to discuss concerns about the safety of the Cuban reactors with the Russian government. Accord-

ing to State Department officials, the Russian government has given assurances that the nuclear power reactors in Cuba will meet international safety norms. The United States has asked Russia to cease providing any nuclear assistance until Cuba has signed the Non-Proliferation Treaty or the Treaty of Tlatelolco, which would allow inspections of Cuba's nuclear facilities by the International Atomic Energy Agency (IAEA).<sup>3</sup> If Cuba signs either treaty, State Department officials believe that aid from Russia should be limited to safety matters.

We spoke with IAEA's Director, Division of Nuclear Safety, to determine whether any contacts had taken place with the Cuban government regarding possible inspections of the reactors. He said that he had discussed the possibility of IAEA's conducting a preoperational safety review team program (pre-OSART) visit with a high-ranking Cuban nuclear power official but that no date had been set for such a visit. A preoperational safety review team visits a nuclear power plant under construction to review project management; quality assurance; civil construction; mechanical, electrical, and instrumentation and control equipment; preparations for start-up and operation; training and qualification; and radiation protection and emergency response planning. Pre-OSART visits are voluntary and must be requested by the host country.

#### *NRC officials concerned about allegations of safety deficiencies*

NRC officials familiar with the allegations raised by the former Cuban nuclear power officials concluded that these officials were knowledgeable in their respective areas and that the deficiencies they alleged could affect the construction and future safe operation of Cuba's nuclear reactors. However, because detailed information available on the reactors is limited, NRC officials have no way to verifying the validity of these concerns. An NRC official told us that their concerns about the Cuban reactor include (1) the adequacy of Cuba's nuclear regulatory infrastructure, (2) the adequacy and number of trained regulatory and operational personnel, and (3) reports of defective welds.

According to NRC's Director of International Programs, before NRC could form an opinion on Cuba's nuclear reactors, a team of NRC inspectors and/or U.S. nuclear industry officials would have to conduct an extensive investigation of the plant and be given access to information about construction procedures, techniques, and test results. Such a team would also need visually to inspect construction and equipment installation as they occur. He suggested that if the plant is to be completed, he would like to see a "robust" exchange of safety experts between the United States and Cuba. The Director noted that Cuban personnel lack experience operating nuclear reactors and that Cuba lacks the industrial infrastructure to support a nuclear power plant. He also said that the Cuban government had indicated that it was planning to establish a regulatory structure similar to the NRC with inspectors who had been trained in the former Soviet Union, but he did not think that this would happen.

The Director expressed concern about the design of the plant's containment system, which he had initially thought to be similar

<sup>3</sup>IAEA is an independent intergovernmental organization within the United Nations that helps to promote, among other things, improvements in operation and maintenance practices for nuclear power plants.

to the design used in U.S. or Western-style reactors. Specifically, he said that the design of the pressure suppression system was based on analytical models and had not been tested. He added that NRC would not allow such a system in a U.S. nuclear power reactor unless it had undergone extensive testing. Furthermore, he was concerned that the upper portion of the containment dome was designed to withstand pressures of only 7 pounds per square inch. He also expressed concern that the reactor's pressure vessel and other primary reactor components have been stored outdoors since December 1990 and exposed to corrosive salt water vapor. He said that such equipment should have been stored in an enclosed building.

The Director said that other than meeting occasionally with Cuban nuclear officials at various international nuclear conferences, NRC had no plans for any substantive contacts with the Cuban government regarding nuclear safety matters.

#### *DOE official concerned about quality of reactors' construction and components*

DOE's Acting Director, Division of International Programs, told us that he was concerned about the quality of the reactors' construction and components because Soviet-designed components were never recognized for their quality and reliability. According to the Acting Director, there is no reason to believe that the quality of the Soviet components being used in the Cuban reactors is any better. In addition, he said that because the Soviet Union placed a higher priority on production than safety, a number one priority should be the development of a "safety culture"<sup>4</sup> for all Soviet-designed plants, including the plant in Cuba. Like the NRC official, he was concerned that the upper half of the containment dome might be capable of withstanding pressures of only 7 pounds of pressure per square inch. He said that since DOE's 1989 report on Soviet-designed reactors, Department of Energy's Team Analysis of Soviet Designed VVER's, which discussed the reactors being built in Cuba, DOE had not performed any additional analysis of Cuba's nuclear reactors, nor was any planned.

#### *ASSESSMENTS OF RISKS FROM EARTHQUAKES AND RADIOACTIVE POLLUTANTS*

USGS officials could not determine the potential for earthquakes at the reactor site, in part because available information was limited. NOAA scientists, at our request, prepared an analysis that shows the probability of radioactive material's reaching the United States by air currents in the event of an accident at the nuclear power reactor site.

According to the Deputy Chief, Latin American Geology, Office of International Geology, USGS, USGS has not assessed the risk of an earthquake in Cuba, in part because USGS does not have access to the information required for this type of analysis. He added that USGS had attempted to obtain this information but the Cuban government had not provided it. Therefore, the USGS official could not answer specific questions about the seismic conditions at the site of the reactors in Cuba.

According to the USGS official, the Caribbean plate, a geologic formation near the south coast of Cuba, is active and may pose

seismic risks to Cuba and the reactor site. The USGS official said that the plate could produce large to moderate earthquakes. In fact, on May 25, 1992, this plate produced an earthquake measuring about 7.0 on the Richter scale.

An international insurance group in Munich, Germany, which conducted an earthquake risk assessment of Cuba as part of a 1988 assessment of natural hazards, estimated that the Cienfuegos area, where the nuclear reactor is located, could produce an earthquake with a probable maximum magnitude of 5.0 on the Richter scale.

At our request, NOAA scientists analyzed, by season, the probability of impact, the average arrival time, and the relative concentrations of radioactive pollutants that would be released into the atmosphere by an accidental release of radioactivity from the nuclear power reactors in Cienfuegos, Cuba.<sup>5</sup> Based on climatological data for summer 1991 and winter 1991-92, the analysis showed that the summer east-to-west trade winds could carry radioactive pollutants over all of Florida and portions of the Gulf states as far west as Texas in about 4 days. In the winter, when the trade winds are weaker and less persistent, radioactive pollutants would encounter strong westerly winds that could move the pollutants towards the east, possibly as far north as Virginia and Washington, D.C., in about 4 days.

#### *CONCLUSIONS*

Although work on the Cuban nuclear power reactors has apparently been suspended, the civil construction is estimated to be 90 percent to 97 percent complete for the first unit and about 20 percent to 30 percent complete for the second unit. The primary components have not been installed, and the nuclear fuel has not been delivered. A number of concerns exist about Cuba's reactors, including the questionable quality of the civil construction, the lack of a regulatory structure, the inadequacy of training for operators, and the absence of an industrial infrastructure in Cuba to support the reactors' operation and maintenance. If the allegations of safety problems are true, the safe operation of the reactors could be affected. In addition, there are concerns that the upper portion of the containment dome was designed to withstand pressure of only 7 pounds per square inch.

Because Russia requires hard currency as payment for—and Cuba currently lacks the financial resources to buy—equipment needed for the reactors, it is uncertain when the nuclear reactors will become operational. Continued monitoring of Cuba's progress toward completing the reactors is warranted. If Cuba obtains the assistance needed to complete its nuclear power reactors, U.S. officials will need assurances that the safety concerns expressed by the former Cuban nuclear officials and others are resolved and that the nuclear reactors are built and will be operated in a manner that does not pose a risk to the United States in the event of an accidental release of radioactive material.

#### *AGENCY COMMENTS*

We discussed the facts presented in this report with the State Department's Director and Deputy Director, Office of Cuban Affairs, and Deputy Director, Office of Nuclear Technology and Safeguards; NRC's Director of International Programs; and DOE's Acting

Director, Division of International Programs. In general, these officials agreed with the facts presented and gave us additional clarifying information. We revised the text as necessary. However, as requested, we did not obtain written agency comments on a draft of this report.

#### *SCOPE AND METHODOLOGY*

To determine the status of the Cuban nuclear power reactors' construction, design, and potential safety problems, we interviewed officials and reviewed documentation from the State Department, NRC, DOE, USGS, NOAA, and the Central Intelligence Agency. We also interviewed officials from the Department of the Navy, TAEA, the World Association of Nuclear Operators, and the Institute of Nuclear Power Operations, as well as a professor of nuclear engineering at the University of Florida.

Because Mexico has a radiation safety and nuclear safety agreement with Cuba, we conducted telephone interviews on the status of the Cuban reactors' construction with several Mexican officials, including the Director General of the National Institute of Nuclear Investment and the Director of General of the National Commission of Nuclear Security and Safeguards. In addition, we interviewed, by telephone, two Mexican officials who had visited Cuba's nuclear power plant within the past year—the construction manager and the licensing manager of Mexico's Laguna Verde nuclear power plant.

We interviewed five former Cuban nuclear power officials, including nuclear and electrical engineers and a technician, all of whom had worked at the Cuban nuclear power plant and alleged that there were serious safety defects in the reactors' construction. We discussed these allegations with NRC and DOE officials. We also met with the Acting Principal Officer of the Cuban Interests Section of the Swiss Embassy and submitted a list of questions about the nuclear reactors to him to be answered by nuclear power officials in Cuba. In addition, we submitted questions about the reactors to Russian nuclear power officials through our embassy in Moscow, Russia. As of September 1, 1992, we had not received a response to our questions. We will report separately on this information after we have obtained and reviewed it.

We performed our review between June and September 1992 in accordance with generally accepted government auditing standards.

As arranged with your office, unless you publicly announce its contents earlier, we plan no further distribution of this report until 30 days after the date of this letter. At that time, we will send copies of the report to appropriate congressional committees; the Secretaries of State and Energy; and the Chairman, Nuclear Regulatory Commission. We will make copies available to others on request.

Please contact me at (202) 275-1441 if you or your staff have any questions. Major contributors to this report are listed in appendix I.

Sincerely yours,

VICTOR S. REZENDES,

*Director, Energy and Science Issues.*

Mr. COCHRAN addressed the Chair. The PRESIDING OFFICER. The Senator from Mississippi.

#### *A TRIBUTE TO PARTING MEMBERS OF THE SENATE*

Mr. COCHRAN. Mr. President, I take this time to pay tribute to our parting Members of the Senate who will not be

<sup>4</sup>A "safety culture" is the assembly of characteristics and attitudes in organizations and individuals that establishes safety issues at a nuclear power plant as an overriding priority and ensures that they receive the attention warranted by their significance.

<sup>5</sup>Transport and Dispersion for a Potential Accidental Release of Radioactive Pollutants from the Nuclear Reactor at Cienfuegos, Cuba, Jerome L. Heffer and Barbara J.B. Stunder, NOAA, Air Resources Laboratory (Aug. 1992).

back when the 103d Congress reconvenes. On our side of the aisle, JAKE GARN, WARREN RUDMAN, and STEVE SYMMS are departing. On the other side of the aisle, Senators BROCK ADAMS, JOCELYN BURDICK, ALAN CRANSTON, ALAN DIXON, and TIM WIRTH will be leaving the Senate at the conclusion of the 102d Congress.

It has really been a privilege and an honor for me personally to sit beside JAKE GARN on the Appropriations Committee since 1980. After the elections of 1980, I became a member of that committee and began immediately to realize that JAKE GARN was one of the most dedicated and conscientious members of the Appropriations Committee. He brought to that committee's deliberations unique experiences as a member of the Armed Forces, a person who felt very deeply about the security interests of the United States.

And on the Defense Subcommittee of Appropriations, he was obviously someone whose judgment was considered very sound and to whom we looked for rational and good decisions in matters that came before that subcommittee, in particular.

He served, of course, as chairman of the VA-HUD Appropriations Subcommittee that had jurisdiction over NASA programs. He had a unique understanding of the mission of our space agency and he, of course, became an astronaut himself. He gave leadership not only in that committee, but the Banking Committee as well.

My personal opinion is that if we had listened to JAKE GARN's suggestions, that if the Congress had adopted many of the recommendations that he personally made with respect to banking matters and the savings and loan crisis in particular, our country would have saved billions of dollars and a lot of heartache and pain would have been avoided in that long, drawnout and still continuing problem.

JAKE GARN is a person not only of great physical courage, which was demonstrated by participating in the shuttle flight, orbiting the Earth, but in donating his kidney to save his daughter's life.

I can remember being out at Hains Point and seeing him go all out in the Annual 3-Mile Nike Challenge Race, putting most younger people behind him as he finished in very impressive times in the 3-mile race. But his physical courage really matched the courage of his convictions that he demonstrated time and time again in debate and deliberations and actions of the Senate.

We are going to miss JAKE GARN a lot. I am going to miss him personally. It was my honor to succeed him in the Office of the Secretary of the Senate Republican Conference in leadership on the Republican side. I have gained a great deal from his advice and counsel at that time and since then and deeply appreciate his example.

WARREN RUDMAN is a person whom we instantly looked to as a leader when he came to the Senate. I do not know of anyone who so quickly established himself, and correctly so, as a person of real ability, depth of knowledge, commitment to the job of being a Senator, being a good Senator.

He served on the Appropriations Committee with me also, but we also realized because of his personal experiences as a courtroom attorney and as attorney general of the State of New Hampshire, he was equipped with special insights and abilities that we called upon time and time again when tough decisions had to be made on questions of ethics, on legal matters, and on Senate rules. We will certainly miss WARREN RUDMAN. The Senate will have a hard time finding someone who will be able to bring the kind of talent and ability that he brought to our midst to replace him. I am not sure we can replace WARREN RUDMAN.

STEVE SYMMS is my close personal friend, who was elected to Congress the same year I was in 1972. We both came to Washington in the congressional elections that year. We immediately became personal friends. He came to Washington on a campaign to take a bite out of Government.

He never forgot that. He has not only been biting and scratching and fighting to hold down the cost of Government, to eliminate waste and ineffective and inefficient programs, he has given us a sense of awareness of how our first job is to make sure that we exhibit some common sense in the decisions that we make in Washington in the Senate and Congress.

He brought a special experience as an apple grower from Idaho. He had the personal experience of running a business, meeting a payroll, getting things done, dealing with the practical problems that most Americans face every day in their lives. He has never let us forget that it is those people back home who are doing those things that are making this country what it is today and making America great.

I appreciate his friendship, his example in caring a lot about maintaining a strong national defense, recognizing the special responsibility the United States has in this world in terms of international security matters. I truly regret that STEVE is retiring, and I will miss him very much.

BROCK ADAMS

I have had a special opportunity to work with BROCK ADAMS. He is the chairman of the Aging Subcommittee. I have been the ranking Republican on that committee. This year we successfully brought out the reauthorization bill for the Older Americans Act. Working with him, he was dedicated to seeing that that bill was improved, and it was passed. We had some challenges along the way, some tough amendments that were offered in the Senate,

and it was a pleasure to work with him during the hearings trying to get at how we could best respond to the needs of older Americans by improving this legislation, and I wish him well.

QUENTIN AND JOCELYN BURDICK

JOCELYN BURDICK and her husband, Quentin, have been special friends. Quentin was chairman of the Appropriations Subcommittee on Agriculture, and I was the ranking Republican. For a while I was chairman and he was a member of the committee. We worked closely together for a good while, and I know that JOCELYN fills in here and meets a need that North Dakota has for clear thinking representation of the interests of that State. She is a fine person, and I commend her for her opportunity to demonstrate her abilities in the closing weeks of this 102d Congress. I have a special feeling of fondness and appreciation for her.

ALAN CRANSTON

ALAN CRANSTON was described so appropriately by the Senator from New York [Mr. MOYNIHAN]. ALAN CRANSTON has had a unique experience as a writer, a journalist, a person who has been very involved in many issue areas in the Senate, most notably for veterans and their interests, in housing and other issue areas. I have come to know him, and like him, and I am sorry to see him go. I hope he has many happy days of rewarding experience in the days ahead.

ALAN DIXON

ALAN DIXON and I served together on the Agriculture Committee. I came to like him immediately. He is forceful, dynamic in fighting for Illinois, for the corn growers out there. And when we crossed swords over the issue of Great Lakes ports and gulf ports, and how much tonnage was going to be shipped in those respective areas under the Public Law 480 program and others, he was a very tough adversary. Senators may remember that we were here very late one night battling over provisions of a bill that were very important to his country and mine, too. And I think we ended up compromising, I hope for the best interests of the country at large, because that was really something that he understood and appreciated. I wish ALAN DIXON well.

TIM WIRTH

TIM WIRTH has been a friend since our days in the House. We served together there. We have also worked closely together as fellow members of the Board of the Air Force Academy. I have enjoyed working with TIM WIRTH. He is a friend. He is a strong advocate for environmental interests. He is an effective advocate.

We are going to miss all of these Senators who are leaving, Mr. President, I wanted to rise on this occasion and express my fondness for each of them, my appreciation of their service to the Senate, and my very best and sincerest

good wishes to them in the years ahead.

Mr. KERREY addressed the Chair.

The PRESIDING OFFICER. The Senator from Idaho.

Mr. SYMMS. Mr. President, I might inquire, how long is my colleague going to speak? I just need about 2 minutes.

Mr. KERREY. Two minutes is the Senator's.

Mr. SYMMS. I thank my colleague for this courtesy. I do appreciate it.

#### THANKS TO THE SENATE

Mr. SYMMS. Mr. President, I rise to say thank you to the constituents in my State who have made it possible for me to be in Congress for the last 20 years. It has been a wonderful experience. I have met many, many good people here, and I want to say thank you too for the privilege that the people of my State have given me.

I would like to say thank you to my colleagues. I have heard two of you speaking this evening, the Presiding Officer and my colleague from Mississippi, and I see my friend from California, Senator CRANSTON. But I would like to thank all of my colleagues for the privilege to have worked with them and served with them in the Senate.

I also want to say what a honor it has been for me to serve in Congress during the administrations of Presidents Nixon, Ford, Carter, Reagan, and Bush. I treasure that experience.

I would like to thank the Senate staff for their courtesies, and that includes all the staff from the Sergeant at Arms office, the Secretary of the Senate, and all of those in the legislative staffs who make our lives here as good as can be in the Senate. And a special thanks to my staff, my current staff, both in Idaho and here in Washington, and also my staff over the years.

In closing, Mr. President, we have a great country. We sometimes in the political season tend to beat up on this country more than necessary. We still are the best exporter in the world. We are the best place in the world to live. We have the best opportunities for new people starting out to make a success of their lives and have an impact on their lives.

I know the problems are great which we face, but as a conservative Republican, I have great confidence that the people who will be here in this body next year, whether they be Democrats, independents, or Republicans will measure up to the task because Americans are very innovative and they will be able to come up with solutions. We are very productive people. And given just a little chance and a little freedom, we will be able to solve these problems we face. And it will make some great opportunities for new futures for millions of Americans and other people around the world.

In the last 20 years that I have been here we have witnessed a great change in the dynamics of the world, and the people of the world as a group have spoken that they want freedom and freedom works. And those people who try to always use the solutions of government to solve the problems have failed.

So I say to my colleagues that I wish you all well. I thank you for the privilege of being a part of this group. And I will surely want to continue those friendships in the future. I have great confidence that this body will do the right thing in the future to see that freedom and liberty shall prevail in this great United States.

I thank my colleagues for their indulgence. I thank my friend from Nebraska for allowing me to speak.

The PRESIDING OFFICER. The Senator from Nebraska.

#### THE PRESIDENTIAL DEBATE

Mr. KERREY. Mr. President, I rise to talk about what some of my colleagues were discussing, indeed arguing earlier this afternoon, some comments made by President Bush yesterday on Larry King wherein he questioned what Bill Clinton did when he was 22 or 23 years of age in 1969 or so traveling to Moscow.

I must say, Mr. President, that I was far more troubled by former President Reagan's trip to Moscow in 1988 when he picked up \$2 million right after having been President than I was to hear that perhaps Bill Clinton made a trip to Moscow in this early twenties.

But there are a number of questions that were raised in that debate that I think are worth discussing, and indeed I think the history of the policy during that time does have a relationship to our policies today and do reflect to a certain extent on the Presidential debate.

My friend from Idaho is here, and I will alert him that I am going to quote from his favorite American patriot, Thomas Paine. Thomas Paine understood what patriotism was, that patriotism was an expression of individuals who were and are willing to risk something, give up something, for the community. It need not be in war. It need not be in combat. It can be quiet sacrifice of parents, or quiet sacrifice of community leaders. Nonetheless, it requires an individual say that I will give up perhaps something that might be more enjoyable, more fun.

I would observe that through my colleagues would like to see George Bush get reelected, I think one cannot dispute the fact that Bill Clinton has served his country. He served his country as Governor of Arkansas, and a fair amount of grief as he has fought for improved quality of education, as he has fought to try to increase the economic growth of that State, and a vari-

ety of other things that people do as chief executive officer. I understand the nature of the argument today. Nonetheless, I would observe that I believe that Bill Clinton without a doubt has satisfied Thomas Paine's own definition.

I would read Thomas Paine's statement that he made on December 23, 1776 because it had a relationship to what I think went wrong during the Vietnam war. Thomas Paine said:

These are times that try men's souls, and some \* \* \* soldiers and some \* \* \* patriots will in this crisis shrink from the service of their country. But he that stands it now deserves the love and thanks of man and woman. Tyranny like hell is not easily conquered. Yet we have this consolation with us \* \* \* that the harder the conflict the more glorious the triumph. \* \* \* what we obtain too cheaply we esteem too lightly. It is dear-ness only that gives everything its value. Heaven knows how to put proper price upon its goods, and it would be strange indeed if so celestial an article as freedom should not be highly rated.

Mr. President, I have had the opportunity to serve on the select committee investigating the issue of POW-MIA's, chaired by the distinguished Senator from Massachusetts, Senator KERRY, and the distinguished Senator from New Hampshire, Senator SMITH. This has required us to dig, but deeper than we perhaps would like, into the events of 1969, 1970, and 1971 and those years.

It seems to me, Mr. President, that we made a number of mistakes. I, on a previous occasion, came to the floor urging the President of the United States not to reopen the wounds of Vietnam. I do not know if that was his intent on Larry King, but I, nonetheless, felt some offense.

And so I call to my colleagues, and those who are fortunate enough to be watching this right now, attention to the fact that George Bush did have significant responsibility. He was not a college student at the time. He was a Member of the House of Representatives from 1967 to 1971. He was our representative to the United Nations during the time when we negotiated the peace treaty in 1972. He was the chairman of the Republican Party in 1973. President Nixon's designee as chairman of the RNC, and he was the ambassador to the People's Republic of China in 1975 when Saigon fell in April of that year.

President Bush last night said it seemed odd—odd is not the verb I believe he used—but he said it seemed unusual to go to Moscow, referring now to Bill Clinton, after Russia had crushed the Czech rebellion.

Mr. President, let me call my colleagues' attention to the fact that the policy of the President at the time, in 1969, was to approach Russia with the hope that Russia could help resolve the conflict in Vietnam.

President Nixon, himself, began détente in 1969. President Nixon, him-

self, I might point out, began a number of good things in 1969. He started the SALT Treaty negotiations on November 7, 1969. He started a thing called the Export Administration Act which declared that United States policy was to favor the expansion of peaceful trade with the Soviet Union and Eastern Europe. He even made a remarkable trip himself to Romania.

And on August 2, 1969, in addressing hardly someone that Thomas Paine would regard as a defender of freedom, a man we now know to have been one of the world's great tyrants, Nicolae Ceausescu our President Richard Nixon said, speaking on behalf of all the American people,

I wish to express my deep appreciation for the very warm welcome that you have extended to us on this occasion, and I bring with me the warm good wishes and feelings of friendship from all of the American people to all of the people of Romania.

Well, I wonder at the time, Mr. President, did Representative George Bush, a Member of the House of Representatives at the time, rise up in anger that our President would be going to Nicolae Ceausescu and saying, "I bring you the warm good wishes and feelings of friendship from the American people." I suspect that Congressman Bush did not.

Moreover, Mr. President, Richard Nixon, himself, was encouraging our people to travel. In an address that he gave on October 14, 1969 he said that is why this administration strongly supports not only people-to-people programs as it presently exists but we hope that it can be expanded more and more through an exchange between the United States and the Soviet Union, between the United States and eastern European countries, and eventually we would hope also between the United States and that great potential power of people that exists in mainland China.

Mr. President, the man who selected George Bush to be head of the Republican National Committee was encouraging through the program of détente Americans to move closer in the direction of the Soviet Union.

So for him to say he does not understand why someone would go to Moscow after the Czech rebellion would only be something that he could say if he was entirely forgetful of what his President was advocating and indeed doing at that particular time.

Mr. President, as to the war in Vietnam itself, one of the most interesting documents that I found were campaign statements that were made as a part of the Presidential campaign in 1968. I would like to read one. It says:

We condemn the administration's breach of faith with the American people respecting our heavy involvement in Vietnam. The administration's failure to honor its own words have led millions of Americans to question its credibility. The entire Nation has been profoundly concerned by the hastily extem-

porized undeclared land wars which embroil massive U.S. Armed Forces thousands of miles from our shores. It is time to realize that not every international conflict is susceptible of solution by American ground forces. Militarily the administration's piecemeal commitment of men and material has wasted our massive military superiority and frittered it away, and as a result, it has been a long war of attrition. Throughout this period the administration has been slow in training and equipping South Vietnamese units both for fighting the war and for defending their country after the war is over.

Several additional paragraphs calling upon Americans to disengage from this war are then read and then the final paragraph, Mr. President: To resolve our dilemma, it requires new American leadership, one capable of thinking and acting anew, not hostage to the many mistakes of the past.

The Republican Party offered such leadership. The document that I have in my hand is the platform document of the Republican Party in 1968. And I must say that I read with some considerable embarrassment and shame, as well, the Democratic Party platform in 1968, which was hardly much better. Neither party, neither the Republican nor the Democratic Party talked about the freedom of the Vietnamese people in 1968. Neither the Democratic Party nor the Republican Party came to the American people and said that freedom is at stake and that it matters for us to engage on behalf of the freedom of the people of Vietnam.

The other day in the POW/MIA hearings I had a little confrontation with a man who was part of that policy at the time, Gen. Alexander Haig. General Haig said in response to a question I had about what our policies should be toward Vietnam today—not 20 years ago, but today—he said that we should probably engage them economically in trade and business and not worry about political freedom, that it is not up to us to impose western values upon the people of Vietnam.

Well, Mr. President, communism is a western value. Communism did not find itself being born in Saigon or Hanoi. It was born in the West and was imposed on the people of Vietnam, as it is imposed on the people of Vietnam today. We make a grievous error to forget that, Mr. President. I believe that the Nixon administration indeed did forget that. The President came to the American people, finally, on May 14, 1969, and he presented to the American people what he in fact was going to do. Mr. President, he had received at the time a secret—now unclassified—document from Daniel Ellsberg and Fred Ickle, who outlined a series of choices and said, most importantly, that to be successful, we needed a coherent military, political rationale; otherwise, we would not succeed. The President selected an odd course of action.

The point I am trying to make, which I will not dwell too long on, is

that President Nixon gave a speech on May 14, 1969, wherein he lays out his rationale for continuing our strategy, and he has a strategy that calls for America to "vietnamize" the war and withdraw our own troops. The draft was a big domestic political issue at the time, and the President was committed to bringing the American troops home so there would be minimal problem with the political issue of the draft. That led to our being in a very weak negotiating position in 1972.

Most important, the President of the United States, in May 1969, said:

I have tried to present the facts about Vietnam with complete honesty, and I shall continue to do so in my reports to the American people.

Mr. President, in May 1969, we were 2 months into what became known afterward as a 12-month secret bombing campaign of Cambodia, a decision made when President Nixon was in Europe, beginning to reach out to the Soviet Union, hoping that the Soviet Union would help resolve the war in Vietnam. We dropped 100,000 tons of ordnance in Cambodia, 3,800 sorties during the year, and all of it was kept secret from the American people. The reports of bombings were filed secretly with the Department of Defense, and the public records show no such action. So secret was all of this activity that the Secretary of the Air Force was not even aware of the bombing activity. It would not have been surprising that the people of the United States would have become outraged and angered, and felt they were misled and betrayed that the people of Vietnam were forgotten.

I have campaigned against Bill Clinton, and I have engaged him on the question of the draft, and I listened to him talk about the draft as well, and I have watched with anger as history is revised by President Bush today, about what happened 20 years ago. The central question for me and for all Americans, particularly those of us who served in a war, is: Will Bill Clinton's own experience, his own experience, make him a better President of the United States of America?

Mr. President, I answer that question with a resounding yes. First of all, he understands the importance of making sure that every single American has an opportunity to go to college. He understands what a college deferment provided him in 1969. It is not accidental that he is campaigning and, unlike George Bush, saying that if you do not have an opportunity to go to college, you will be denied the privilege of economic opportunity; it is not accidental that he says it is one of the most important things we must do; it is not accidental that he is talking about voluntary national service. He understands the importance of national service. He understands what it can do to young men and women to have the opportunity to serve their country. Mr.

President, he wants to make sure that it is voluntary, and that it is not just for military service; that it is an opportunity to serve in many other needed areas as well.

Mr. President, second, he is going to be a superior President because he has said all the way through the campaign that, as President, he will make sure that this country ends the divisive arguments, except for those that will lead to good policy conclusions. Bill Clinton would never try to divide the country with some painful experience such as the Vietnam war. He has struggled to pull black and white, labor and nonlabor, Republican and Democrat, together all the way through this campaign. He has said repeatedly that the problems of this country will not yield to a merely partisan solution.

Third, he will not operate a secret government. He understands that secrecy itself causes people to lose confidence in our own capacity for self-government.

Last, Mr. President, I say with great respect for those who doubt it, I believe that Bill Clinton's own experience will allow him to say that the United States of America needs to continue to fight for freedom. He went to Russia in 1969. He may not be able to remember all of the details of what he did, but I am sure he remembers what he saw.

His speeches on foreign policy reflect a desire to have America stand for freedom in this world. George Bush went to China as our Ambassador and forgot almost everything he saw while he was there.

Mr. President, this Nation needs to stand for freedom in this world, and I believe with Bill Clinton as our commander in chief, head of our foreign and domestic policy, we will, once again, do that.

I yield the floor.

Mr. HARKIN addressed the Chair.

The PRESIDING OFFICER. The Chair informs the Senator that the Chair intended to call upon the Senator from Rhode Island. He has been waiting for over an hour to speak.

Since he is not on the floor, the Chair recognizes the Senator from Iowa.

Mr. HARKIN. I am delighted to yield when he comes back. I know he has been seeking time, Mr. President, but as long as he is not here I appreciate the opportunity to speak on an issue that concerns me greatly, and that is the so-called North American Free-Trade Agreement.

#### NORTH AMERICAN FREE-TRADE AGREEMENT

Mr. HARKIN. Mr. President, an inordinate amount of effort and energy has been expended by President Bush and his administration to exploit the North American Free-Trade Agreement for political purposes in this campaign season. Now that we have had a chance

to look more carefully at the kind of agreement that George Bush wants to railroad through, I can only express astonishment that he would think there is political mileage in this agreement.

Mr. President, I said early on that I did not oppose a North American Free-Trade Agreement, but that I did not trust George Bush to negotiate an agreement that is in the best interests of our Nation. And it is clear that my mistrust was well founded. Negotiations were kept secret until the last moment. Then an agreement text of some 2,000 pages was released, and—allowing no time for study and review—George Bush went on the attack claiming that anyone who does not support his agreement unconditionally is against trade, exports, and economic growth. That is not a formula for governing or for leadership. That is cynical election-year politics, pure and simple.

The fact is that George Bush is pushing an agreement that fails utterly to resolve some of the most important issues surrounding the NAFTA.

The working men and women of our Nation have good reason to be skeptical of any agreement George Bush promotes. Look at the Bush record. The worst economic growth record of any President since the Great Depression. Remember his promise to create 30 million new jobs in 8 years? Well, since he took office we have lost 38,000 private sector jobs in our country. We are going in the wrong direction. So can anyone blame the working men and women of this country—having been burned before—who say they are not buying it when George Bush now promises his NAFTA agreement will create jobs? Even his own Secretary of Labor says it will cost as many as 150,000 U.S. jobs.

Take George Bush's economic policies—or lack of them—and mix them with his NAFTA and you have a recipe for disaster for America's working men and women and production and growth.

Wages, labor standards, and working conditions in Mexico are well below those in our Nation. We know this, yet George Bush's NAFTA is virtually silent on these issues. All you can find in some 2,000 pages is nonbinding language in the preamble referring to the importance of worker rights: no enforcement mechanism; no established standards; no emphasis on raising Mexican wages, working conditions, and labor standards.

Mr. President, George Bush's NAFTA leaves in place the incentive to gain competitive advantage through the misery and suffering of workers in Mexico. The outcome can only be more and more pressure to lower the wages, working conditions, and standards for U.S. workers. Again, that is the wrong way to go, and the American people know it. They are perfectly willing to compete, but not against unfair odds.

We all know that a NAFTA will require changes and adjustments for our Nation's work force. Let us not be coy about it. That means some workers will lose jobs. And in an economy where private sector jobs have actually declined, as I pointed out, it is no wonder that U.S. workers are afraid of George Bush's NAFTA. But George Bush's NAFTA does not address that problem. And the adjustment program he has proposed lacks substance and the funding to make it work. In fact, George Bush has repeatedly called for cutting or eliminating the Trade Adjustment Assistance Program.

No wonder working men and women do not trust George Bush with their future.

President Bush's NAFTA is also deficient from the standpoint of environmental issues. Environmental enforcement in Mexico is already lax. Yet EPA Administrator William Reilly recently testified that if Mexico relaxes its environmental standards to attract American factories, the NAFTA gives the United States no direct recourse. Such an enforcement provision could have been in the agreement—the Canadians tried to do that—but our United States negotiators shot it down. So George Bush has brought us an agreement that gives no assurances on improving environmental enforcement in Mexico, and which thus leaves in place the incentives for United States firms to move to Mexico.

The agreement also fails to address adequately the massive problems of pollution and environmental degradation along the Mexico-United States border, where we already see abnormally high rates of birth defects. The agreement contains no assurances that those who pollute or those who seek out weaker environmental rules, will pay the costs of their pollution. In fact, under George Bush's NAFTA the problems along the border can only get worse as more industrial activity is encouraged.

Mr. President, these are some of the major problems with the NAFTA that George Bush is now pushing. I believe we still can achieve a good NAFTA, but not George Bush's NAFTA. There must be changes. I believe that Gov. Bill Clinton has made sound recommendations for implementing legislation and supplemental agreements that will address these problems.

Governor Clinton has recognized that for the United States to benefit from a NAFTA our Nation must have a comprehensive agenda for economic growth. We must have a national economic strategy providing for worker retraining, environmental protection, and promoting the best interests of our farmers, businesses, and workers. Bill Clinton recognizes that we must have an economic strategy that helps our Nation compete and win again—not a strategy that cuts our workers loose in

a world of low wages, environmental pollution, and unfair competition.

Again, I want to point out that the North American Free Trade Agreement is done. That horse is out of the barn. I was one of those who opposed extending the fast track authority. I opposed giving President Bush the authority to work out this trade agreement without giving us any kind of an input into it or any kind of authority to change it. Right now we are faced with an up-or-down vote. That is it. So the NAFTA President Bush has negotiated is done but it is deficient.

Governor Clinton has called for implementing legislation that remedies, rather than rubber stamps, the deficiencies of George Bush's NAFTA. Instead of George Bush's weak approach, Bill Clinton believes we need a strong worker assistance program to help workers and their companies adjust to the changes brought by new trade relationships. He has called for halting the use of taxpayer money to export the jobs of American workers. Governor Clinton is committed to environmental cleanup along the United States-Mexico border. He will stand up for United States farmers and consumers by strictly applying U.S. pesticide requirements to imported food, something that George Bush will not do. I have often said if our farmers have to live by environmental rules, if we import food from another country they better abide by those same rules, too.

Governor Clinton will open up the dispute resolution process under the NAFTA to ensure that individuals and groups have a say in commencing actions and resolving disputes on environmental and other issues.

Governor Clinton has also recognized that George Bush's NAFTA leaves important issues unresolved, and that supplemental agreements are essential to cure its faults. These agreements would establish environmental and worker protection commissions and the authority and resources to address and resolve environmental and worker standards and safety issues. To address the flaws in George Bush's NAFTA on enforcement of environmental and worker standards, Bill Clinton has pledged that he will negotiate a supplemental agreement with Mexico and Canada to improve the enforcement of environmental and worker standards within each country.

Mr. President, I continue to have deep concerns about George Bush's NAFTA. But I am greatly encouraged by Bill Clinton's understanding of the problems and issues raised by the NAFTA in the areas of environmental protection and worker rights and standards. I believe that Governor Clinton's approach can result in a NAFTA that is good for our country, and that under President Clinton we will have a new form of NAFTA. It will not be just the North America Free

Trade Agreement. It will be the North American Fair and Free Trade Agreement, and that is what we need.

Mr. DOLE addressed the Chair.

The PRESIDING OFFICER. The Republican leader is recognized.

#### SALUTE TO JOCELYN BURDICK

Mr. DOLE. Mr. President, though JOCELYN BURDICK has only served in this Chamber for a matter of months, her retirement this December will draw to a close her three decades of association with the U.S. Senate.

Mrs. BURDICK was sworn in during a most difficult time—as the Senate mourned a colleague, and as she mourned her husband of 32 years, Senator Quentin Burdick.

I said at the time that the Governor of North Dakota could not have made a better appointment. No one knew North Dakota better, and no one knew Quentin Burdick's priorities better than JOCELYN BURDICK.

Her service here in the last busy days of the session ensured that the people of North Dakota would be very well represented.

JOCELYN BURDICK has served with grace and distinction, and the Senate is a better place for her services, just as it is a better place for having had Quentin Burdick's service.

#### SALUTE TO WARREN RUDMAN

Mr. DOLE. Mr. President, when one of my dearest friends, Senator WARREN RUDMAN, rose the other night to deliver his farewell address to the Senate, all of us who serve with him could not help but feel regret.

Regret over the fact that the Senate was losing one of our most thoughtful and courageous Members.

All of us watched Senator RUDMAN wrestle with the decision of whether or not he should run for a third term. And when the time came to make that call, WARREN RUDMAN—as always—pulled no punches.

He told the people of New Hampshire that the Senate was losing its ability to make the decisions that had to be made. And he said that the Federal deficit—particularly rising payments for Medicaid, Social Security, and Federal retirement, were crippling the economy.

When he was asked after his retirement announcement how he wanted to be remembered, Senator RUDMAN said, "I put the interests of my country over party."

Now there is an idea whose time has truly come.

Deficit problems, and most particularly rising entitlement costs are indeed, crippling the American economy, and every Member of the Senate knows it.

And when we begin to act on this problem they will be following the ex-

ample that WARREN RUDMAN has set during his 12 years in the Senate.

Independence always has been a mark of WARREN RUDMAN's life. In 1952, when he graduated from Syracuse University, he was asked to pay \$18 for a yearbook. He refused, and Syracuse withheld his diploma, even though he had completed all the requirements.

WARREN RUDMAN then volunteered for the Korean war, and before he headed into combat—where he would receive a Bronze Star as an infantry company commander—he again asked for a copy of his diploma. The school again demand payment.

Then in 1980, after he was elected to the Senate, Syracuse sent him a letter. There had been a mixup, they said. The diploma was in the mail. WARREN RUDMAN refused to accept it.

It was a characteristic Rudman stand based on principle.

When he was New Hampshire's attorney general, he stood up to the Governors who appointed him, issuing attorney general's opinions declaring several of their proposals improper or illegal.

Senator RUDMAN had many satisfying moments in the Senate, but probably one of the best was when his deputy in the New Hampshire Attorney General's Office, David Souter, was confirmed as a U.S. Supreme Court Justice.

Senator RUDMAN also fought a number of lonely battles—to preserve the Legal Services Corporation, to kill the Viper, an antitank weapon that did not kill tanks, and to preserve the Federal Trade Commission's authority to pursue consumer protection cases against doctors and professionals.

Among Senator RUDMAN's toughest jobs in the Senate was having to judge his peers as vice chairman of the Ethics Committee.

Clearly one of the hardest thing for any Senator to do, is to stand up and present the case against one of his colleagues.

WARREN RUDMAN has never shrunk from his responsibilities, whether it was his country calling him to fight in Korea, or his Senate colleagues calling him to the distasteful task of monitoring Senators' ethics.

On a personal note, I also want to add that Elizabeth and I could not have asked for a better or more loyal friend than the senior Senator from New Hampshire.

Mr. President, Senator RUDMAN ended his farewell speech with a quote from Senator DANIEL WEBSTER—whose desk he now occupies.

It was from that desk on June 3, 1834, that Webster said, "God grants liberty only to those who love it, and are always ready to guard and defend it."

Throughout his life, WARREN RUDMAN has always stood ready to guard and defend liberty. And though he is leaving the Senate, I know he will continue to do just that for many years to come.

### PASSAGE OF THE ENERGY BILL

Mr. DOLE. Mr. President, today the Senate took an historic step by acting on an issue before it became a major problem. We finally used vision to craft a comprehensive strategy to bring about a rational, dependable, and balanced energy policy. This is in no small measure due to the efforts of the senior Senator from Wyoming, MALCOLM WALLOP.

In the midst of a most acrimonious Congress—one in which the partisanship we have come to expect in Presidential election years usually leads to deadlock—as the ranking Republican on the Senate Energy Committee, Senator WALLOP joined with the committee's chairman, BENNETT JOHNSTON, to bring us a voluminous bill which clearly indicates the amount of effort put forth by the committee.

Every conceivable source of energy appears to be addressed. Senator WALLOP could be expected to be concerned with oil, natural gas, coal, and nuclear energy—all resources in abundant supply in his treasured State of Wyoming. But Senator WALLOP went beyond promoting his home State resources to address renewable energy sources, the transmission of energy, the consumption, conservation, and creation of energy to drive our country.

The Senate can adjourn with pride knowing that we have taken a great step toward reducing the threat of another energy crisis.

Mr. President, on behalf of all my colleagues, I want to congratulate Senator WALLOP and his Energy Committee colleagues for bringing us a bill of which we can all be proud.

### MONTANA WILDERNESS

Mr. DOLE. Mr. President, those serving in Congress are called upon to cast many difficult votes. Last year, we had a resolution of war, a decision to send our young men and women overseas and risk their lives for those at home. We vote on an array of proposals to strengthen the economy, to reduce the deficit, to assist those in need. And in almost each and every case, those in Congress have available to them a vast amount of information upon which to make a decision on which way to vote.

A most troubling area in which this is not always true concerns the designation of wilderness areas located primarily in the public land States of the American West. By law, only Congress can create wilderness areas—blocks of land closed to all but those able to walk long distances or those fortunate enough to be able to afford the expense of contracting for travel by horseback through outfitters.

Most of the time, debates about wilderness are couched in terms of a choice between leaving an area free from development or allowing the complete despoliation of our public lands.

Nothing is farther from the truth. Complicating our decisions is the fact that all but a very few of the 535 voters in Congress have ever visited these areas to assess the facts or even visited with those who lives will be the most affected by our decisions.

Such is true with respect to the Montana wilderness bill. Montana is one of only two States for which Congress has yet to act on the roadless area review and evaluation studies of the 1980's. As a consequence, millions of acres of public land in Montana has been held in a state of legal limbo—being held in a status some would argue is neither fish nor fowl.

As I said earlier, however, our choice is not between arresting development and forever stripping these treasured resources bare. For the vast majority of public land acreage, I would challenge any of my colleagues to accurately determine—while actually on the ground—whether they were standing in an area designated by the Congress as wilderness or in an area classified as multiple use.

But there is one big difference. Those with disabilities, families with young children, the elderly, the poor are denied access to the land we designate as wilderness because these lands are managed in a way that only those of strong body or strong wallets are permitted access.

Mr. President, I have had the opportunity to visit with a number of Montanans—those who will be most affected—about the Montana wilderness bill. I can tell you one thing, this is a divisive issue. Strong feelings on both sides have led to the current deadlock.

Therefore, I was greatly relieved when I heard the two Senators from Montana had reached agreement on Montana wilderness. I knew a great deal of effort, a great deal of compromise, a great deal of negotiating had taken place. I was relieved because it appeared we would avoid what I feared most: The decision would be made by those most unqualified to decide—the Congress.

Unfortunately, Mr. President, that agreement seems to have broken apart. The Montana wilderness bill will not become law this year. In part, it appears the action of the House of Representatives is at fault. The House, ignoring the compromise reached by Montanans, wanted to impose its own wishes. This action was taken even though the vast majority of House Members have never visited the State of Montana, let alone the areas to be designated wilderness.

The good news is that the Senate has a tradition of adopting the approach favored by the two most informed Senators—those who represent the State. The House bill was dead on arrival in the Senate and will continue to be dead on arrival next year and the year after and the year after, unless the agree-

ment of both Senators from Montana is agreed to by the House.

Mr. President, I had great hopes for the Montana wilderness bill this year. How tragic it is that the House of Representatives failed to adopt the agreement reached after so many years of acrimony.

Mr. PELL addressed the Chair.

The PRESIDING OFFICER. The Senator from Rhode Island.

### THE FOREIGN RELATIONS COMMITTEE'S RECORD IN THE 102D CONGRESS AND ITS AGENDA FOR THE 103D

Mr. PELL. Mr. President, last week the Senate gave its advice and consent to the START Treaty and approved a House-Senate conference report on aid to the countries of the former Soviet Union. These actions are the most significant achievements of the Foreign Relations Committee during the 102d Congress. Today, I would like to review that record and to discuss how the committee and the Senate as a whole can build on the record of the past 2 years in the 103d Congress.

Mr. President, this Congress has coincided with extraordinary events in the world. At the beginning of the Congress, we had great hopes for a new world order. In some ways, the results far exceeded our expectations, and in other ways, the new world order has proved bitterly disappointing. The Persian Gulf war which entailed the very first and probably most difficult decision of this Congress gave us both high hopes and keen disappointments. That war liberated Kuwait with very low coalition casualties. But it also ended with Saddam Hussein still in power bent on the destruction of his Kurdish and Shi'a populations and still determined to acquire nuclear and other weapons of mass destruction.

At the beginning of this Congress, the Foreign Relations Committee prepared for the Senate vote on going to war to liberate Kuwait. It was a tough vote for every Member in this Chamber, and I was deeply impressed by the seriousness with which all Senators made and explained their votes. I believe our committee played an important role in framing the issues for that historic debate.

After the end of the war, the committee reflected on the policy errors that preceded Saddam Hussein's invasion of Kuwait. Through the hearing process and staff investigations, the committee documented the ill-founded assumptions and mistaken policies that led to a war that might well not have occurred.

The committee was also deeply concerned with the catastrophe that threatened to overtake the Kurdish people. On the day that Desert Storm ended, the Foreign Relations Committee played host to a delegation of Kurd-

ish leaders and learned of their plans to try to oust Saddam. We tried, without success, to persuade the administration to meet with the Kurds and, had they done so, the United States might have been better prepared to help the rebellion that followed a few days later. The committee sent its staff to collect firsthand information on the rebellion and, as a result, had some of the earliest information on the flight of the Iraqi Kurds to the mountains.

Also in the aftermath of Desert Storm, the committee sought to strengthen international law by legislation directing the administration to pursue war crimes actions against Iraq. This year the committee arranged for 14 tons of Iraqi secret police documents captured by the Kurds to be turned over and brought to the United States. This extraordinary archive of genocide is now in the custody of the committee and being held at the National Archives.

In 1991, the committee moved expeditiously to dispose of its regular legislative responsibilities. Under the leadership of Senators KERRY and BROWN, we enacted authorizations for the State Department, USIA, the Arms Control and Disarmament Agency, and the Board for International Broadcasting. This legislation contains many important innovations, and I am proud of our role in the creation of the Voice of American Kurdish service and in strengthening educational exchange programs. More recently, just last week in fact, the committee, acting on the advice of a prestigious advisory commission, approved legislation to create a Radio Free Asia to broadcast to China, Tibet, Vietnam, and Burma. The 102d Congress was not able to act on this legislation, but it will be a priority objective to enact it in 1993.

In 1991, the Senate also passed under the leadership of Senators SARBANES and MCCONNELL foreign assistance legislation originating in the Foreign Relations Committee. This legislation revised and streamlined foreign assistance authorizations and began the process of adapting the foreign assistance program to the new imperatives of the post-cold-war world. Although House and Senate conferees agreed on a conference report, which the Senate passed, the House rejected it; so the many important provisions that should have become law did not. But we will take up the cudgels again next year.

The 102d Congress was also a time of great change, even upheaval, in Europe. In Eastern Europe democracy took hold, but in Yugoslavia the promise of a new world order turned into the terror of an old world disorder. The most extraordinary event of the last 2 years, and certainly the most hopeful, was the democratic revolution that brought about the dissolution of the Soviet Union, freedom for the Baltic nations, independence for the other 12

republics, and true democracy in Russia for the first time in its 1,000-year history.

The Foreign Relations Committee met frequently and spent many hours considering and assessing the implications for the United States of developments in what was the Soviet Union—developments that literally changed the world as we had known it since 1945.

Many of us in both parties on the committee concluded that it was a matter of urgent self-interest for the United States to assist the new States of the collapsed Soviet Union to consolidate their democracies and to make the transition from communism to free market economies. Eventually, the administration agreed with us, and together we worked to formulate and enact the Freedom Support Act.

This act is the most important piece of legislation dealt with by the Committee during this Congress. This bill, now on its way to the President's desk, will be critical in determining whether democracy and free markets take root in the wreckage of the former Soviet Union. And on that question will turn the issue of whether our children and grandchildren will grow up in a peaceful and democratic world or will be threatened by a revival of Russian tyranny.

The Foreign Relations Committee also spent a great deal of time on the related matter of United States-Soviet arms control, particularly on issues relating to strategic nuclear weapons and to conventional forces in Europe. Under the very able leadership of Senator BIDEN, the chairman of the European Affairs Subcommittee, the committee reported and the Senate approved the Conventional Forces in Europe [CFE] Treaty in November 1991. This treaty reduces and limits military forces and equipment from the Atlantic to the Urals and lays the foundation for further reductions to promote stability and to greatly lower the prospects for armed conflict in Europe.

The committee then moved on to address strategic nuclear forces under the United States-Soviet START treaty. I chaired 15 hearings on this treaty, but final action had to await the negotiation of a protocol to bring Ukraine, Kazakhstan, and Belarus into the treaty regime in the wake of the dissolution of the Soviet Union. On October 1, the Senate approved the treaty and its May 23, 1992, protocol with eight conditions and five declarations recommended by the Foreign Relations Committee.

This treaty is a milestone in the decades long effort to reduce the threat of nuclear war. Under the terms of the treaty, significant reductions in nuclear weapons will take place over the next 7 years, and a solid legal framework has been created for further reductions under START II, which is still being negotiated.

The committee continued to play a leading role on international environmental issues during the 102d Congress. The committee held hearings on several issues and approved ten treaties to strengthen environmental protections throughout the world. The most recent of these treaties is the United Nations Framework Convention on Climate Change, which the Senate approved on October 7. This convention marks a significant advance in international efforts to address the threat of climate change caused by greenhouse gases. I regret, however, that because of opposition by the administration, specific targets and timetables for reducing emissions of greenhouse gases were not included in the convention.

On October 7, the Senate also approved the protocol on Environmental Protection to the Antarctic Treaty. The protocol marks a significant advance in international efforts to protect the environment within the Antarctic Treaty area. It commits parties to provide comprehensive protection of the Antarctic environment and its associated and dependent ecosystems and designates Antarctica as a natural reserve, devoted to peace and science. A keystone of this commitment is the requirement that parties prepare environmental impact assessments for activities conducted in the Antarctic pursuant to procedures established in the protocol. The protocol continues a legacy of international cooperation on the frozen continent, which has contributed positively to international peace and security for over three decades.

Looking at treaties generally, the committee gave priority attention to addressing as many treaties as possible, some of which had languished since the 1970's, and one even dated back to 1963. At the committee's urging, the administration established priorities and completed reviews, which in some cases had been going on for a decade. In all, the committee completed action on 46 treaties during the 102d Congress, which I believe to be a record. These covered a diversity of issues ranging from arms control, communications, the environment, international investment, law enforcement cooperation, human rights, and civil aviation to maritime boundaries.

In addition to arms control and environmental treaties, the committee was particularly anxious to strengthen international human rights law. Under pressure from the committee, the administration agreed to support Senate action on the 1977 Covenant on Civil and Political Rights; and the committee moved promptly to secure Senate advice and consent.

Still pending, however, from 1977 are the International Convention on the Elimination of All Forms of Racial Discrimination; the International Covenant on Economic, Social and Cultural Rights; the American Convention

on Human Rights; and, of more recent vintage, the Convention on the Elimination of All Forms of Discrimination Against Women. I hope the next administration will give these conventions its support so that the Senate can move quickly to give its consent.

Mr. President, earlier I talked about the high hopes for a new world order that we all had when this Congress began 2 years ago. The Soviet Union was beginning to pass into history along with the cold war, Germany was consolidating its peaceful and democratic reunification, and in Eastern Europe democracy took hold after more than four decades of Communist enslavement.

In Yugoslavia, however, the disintegration of that country produced a political and humanitarian nightmare. The war in Croatia ended in January only to be replaced by the much bloodier conflict in Bosnia-Herzegovina, and a wider Balkan war looms just over the horizon.

If the carnage in Bosnia-Herzegovina is to end and a wider war prevented, effective U.N. action spurred by U.S. leadership will be required. The Foreign Relations Committee has been seized of the Yugoslavia situation for over 1 year. In August, the Senate adopted a resolution originating in the Foreign Relations Committee calling for the use of force if necessary to relieve the suffering in Bosnia-Herzegovina. The administration has responded to that call, and the United States is now exercising the kind of leadership that is critical to the restoration of peace in the Balkans.

The situation in the Balkans and the experience of the gulf war have pointed up the need to establish an effective collective security mechanism under the aegis of the United Nations to deal quickly with threats to international peace and security. Article 43 of the U.N. Charter provides such a mechanism—and I am proud to have worked on that article as a member of the secretariat at the San Francisco conference in 1945—but cold war politics prevented it from being activated.

Now that the cold war is over and the governments of the former Soviet Union are our partners in the pursuit of peace, we must seize the opportunity to ensure that the U.N. Security Council is able to do what was intended in 1945. In furtherance of this objective, the Foreign Relations Committee on October 1 approved the Collective Security Participation Resolution by a unanimous, bipartisan vote.

This resolution (S.J. Res. 325), introduced by Senator BIDEN, urges the negotiation, under article 43 of the U.N. Charter, of a multilateral agreement under which designated forces from various countries, including the United States, would be made available to the U.N. Security Council for the maintenance of international peace and security.

The United States cannot be the world's policeman; nor can we be expected to organize and lead an international posse every time aggression of the kind that Iraq committed against Kuwait occurs. The United States should, however, exercise leadership to ensure the creation of a standing multilateral force that could be put into action quickly by the Security Council. U.S. Secretary General Boutros Ghali has recommended such action, and the United States should support him.

These are the highlights of the committee's activities and achievements over the past 2 years, but I don't want to leave the impression that it is a complete catalogue of everything we have done. The subcommittees and the full committee have conducted oversight hearings on developments throughout the world, and I do not believe that any important issue has gone unexamined in some fashion.

In addition, the chairman and ranking minority member of the Subcommittee on Terrorism, Narcotics and International Operations—Senators KERRY and BROWN—conducted an exhaustive investigation into the activities of the Bank of Credit and Commerce International. In a report issued on October 1, they set forth the sordid story of how the bank evaded congressional inquiries into its affairs, which ranged from fraud and money laundering to support for terrorism. Their findings and recommendations merit the most serious consideration by the administration.

I wish to thank all members of the committee for their cooperation and hard work, for each and every one of them played an important role in the committee's success. I wish particularly to acknowledge and thank Senator HELMS, the committee's ranking minority member, for his cooperation, friendship and counsel during the course of this Congress. And I owe a very real debt of gratitude to Senator LUGAR for the help and leadership he gave the committee when Senator HELMS was kept away by illness.

While we can look back on these past 2 years with a great deal of satisfaction, there is much unfinished work to complete in the next Congress and new challenges to address. Further work is particularly urgent in the field of arms control. I addressed those issues in some detail in a statement in the Senate on October 1; so I would simply note today that they include START II, the Chemical Weapons Convention, and the Open Skies Treaty.

We must also strengthen controls over chemical, biological, and nuclear equipment, materials and technology trade so that those seeking weapons of mass destruction will be frustrated at every turn—the ability of our Government to deal effectively and in coordination on chemical, biological, and nu-

clear proliferation issues will be the subject of a series of hearings, which I intend to chair next year.

As I mentioned earlier, I also hope that the committee will be able to complete work on the four pending human rights conventions. It is imperative, in my view, that the United States as the greatest champion of human rights in the world not be seen as reluctant to make commitments.

We will need to build on our modest assistance program for Russia and the new democracies of Eastern Europe and Central Asia. As I said earlier, the success of these democracies is essential to a new world order, and, therefore, the money we invest in the success of democracy in these areas is money invested in our future security.

Protecting the global environment is certain to be a major priority of the new administration and the new Congress. I hope we can strengthen international environmental law by signing and ratifying a biological diversity agreement and by building on the Global Climate Change Convention approved by our committee this Congress. We also will work to strengthen the environmental component in our assistance programs.

Finally, I hope that the committee will build on the beginning made in this Congress to adapt and, where necessary, redirect the activities and structures of the foreign affairs agencies under its jurisdiction to the changed conditions and requirements of the post-cold-war world. We will be back in our legislative cycle in 1993, and consideration of the foreign assistance and foreign relations authorization bills will provide an opportunity to address these critical issues.

What I have outlined is not a complete agenda for the 103d Congress. Inevitably, it will expand, to include the specific concerns of my colleagues on the committee and the priorities of a new administration. I hope, however, that the objectives that I have discussed will be of help to members of the committee and all Senators as they look forward to and make plans for the 103d Congress.

#### U.N. PEACEKEEPING FORCE: AN IDEA WHOSE TIME HAS COME

Mr. PELL. Mr. President, nearly 50 years ago I had the great privilege of participating in the conference in San Francisco that founded the United Nations. I served as an assistant secretary of the subcommittee responsible for drafting that part of the U.N. Charter, articles 42, 43 and 44, which provide for U.N. peacekeeping forces.

In the nearly half century since that heady period in San Francisco there has been little progress toward fulfilling the hopes of the U.N. founders as expressed in the charter in this important area. There have been many U.N.

military forces serving a variety of purposes in dozens of places. But the fundamental concept of establishing a U.N. peacekeeping force at the disposal of the Security Council has not been realized.

I was heartened, therefore, by President Bush's comments in his address to the United Nations September 21 in which he outlined how he believes the international community can work to meet the challenge of U.N. peacekeeping. The President said "robust peacekeeping" by the United Nations requires men and equipment from member states, facilities for multinational units to train together, and logistical as well as planning and intelligence capabilities. He offered Fort Dix in New Jersey as a potential site for such training, and said the Pentagon would be instructed to give additional emphasis to preparing American military personnel for peacekeeping and humanitarian activities.

The President stopped short of committing U.S. units to the United Nations, which I believe is the logical next step. Governor Clinton has endorsed the concept of a U.N. peacekeeping force, so I am hopeful that the coming year will bring real progress toward this goal regardless of the outcome of the election.

Committing military forces to the United Nations may offer a way to ease the financial constraints under which U.N. peacekeeping currently operates. U.N. peacekeeping will cost at least \$27 billion over the next 12 months, and the difficulty of raising these funds provoked former Secretary General Perez de Cuellar to say: "It's a great irony the United Nations is on the brink of insolvency at the very time the world community has entrusted the organization with new and unprecedented responsibilities."

But if governments agree to provide forces on a full-time or stand-by basis this could provide a framework for drawing government contributions from military budgets rather than international aid contributions. For the United States this would mean paying our U.N. peacekeeping bills out of Defense Department appropriations rather than severely strained foreign affairs budgets. In return it would be understood that if needed for a country's own defense purposes, provisions would be negotiated for contingents to be withdrawn for urgent national needs.

As the United Nations faces one challenge after another, the time has come to revive the hopes we had at San Francisco and to put into practice the military arrangements set forth in the charter. It will take renewed vision to implement those ideas, the same kind of farsighted perspective that inspired the founders more than 45 years ago in San Francisco.

I ask that the text of an op-ed article that I wrote on this subject for the

Providence Journal October 3 be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

REVIVING HOPE AS THE U.N. FACES GREATER CHALLENGE

Next to my service in the U.S. Senate, the most fascinating involvement of my career was my small role at the founding of the United Nations in San Francisco in 1945.

It was a heady time, filled with the optimism created by the allied victory in World War II. With the enthusiasm of youth, I was proud to assist the working group drafting the very articles, 42, 43 and 44, of the U.N. Charter providing for U.N. military action to maintain international peace and security.

Within a year, it was obvious that these arrangements could not be made to work, because of the Cold War divide between the communist countries, led by the Soviet Union, and the Western nations led by the United States. In a remarkable demonstration of diplomatic ingenuity, the United States mobilized forces under the U.N. banner to oppose North Korean forces in South Korea in 1950. This year's hero, former President Harry S. Truman, led the Free World in bringing about this major military operation under the United Nations.

But a heavy price was paid, in terms of the many killed and injured in that difficult conflict, and in terms of the U.N.'s ability to conduct future military actions. Having seen a U.N. military action get started during the Soviets' temporary absence from the Security Council, they never made that mistake again.

Although the United Nations continued to mount operations to deal with threats to peace, they were undermined by the refusal of the communist states to participate—or to pay their financial share—even in areas outside their claimed sphere of interest.

But now the Cold War is over and the former Soviet Union, far from being an obstacle, appears ready to cooperate in peacekeeping efforts. This was most dramatically illustrated by the multi-lateral coalition created under U.N. auspices to respond to Iraq's Invasion of Kuwait. The high hopes we had in 1946 were rekindled by the coalition's military victories in that desert war.

The United Nations' success has brought new challenges to its door. In the post-Desert Storm world the Security Council has authorized another half dozen peacekeeping operations, led by deployments totaling more than 30,000 in Cambodia and Yugoslavia. Smaller units are involved in Angola, El Salvador, Western Sahara and Somalia. Substantial increases are under way to protect emergency relief operations in Somalia and Yugoslavia. The United Nations is being strained to the limit to find and fund the military units for all these missions.

The time has come, in my judgment, to implement the provisions of Article 43, which authorize the United Nations to have at its disposal forces from member states to deal with threats to international peace and security. Such forces would not merely act on behalf of the United Nations, as did the U.N. forces in Korea and during Desert Storm, but would be a U.N. force under control of the Security Council. This in turn would activate the U.N. military staff committee to administer and direct the U.N.'s military operations.

What was once seen as visionary has now become practical, and should be implemented as soon as possible. Secretary Gen-

eral Boutros Boutros-Ghali recently said: "The Security Council has the authority to take military action to maintain or restore international peace and security. . . . The ready availability of armed forces on call could serve, in itself, as a means of deterring breaches of the peace since a potential aggressor would know that the Security Council had at its disposal a means of response."

Article 43 provides for the United Nations to draw upon military personnel from many U.N. member states to deal with any threat to international peace. The United States would play a key leadership role as member of the military staff committee. For those who worry about American troops being under a non-U.S. command, or that our troops might be used for purposes that we don't support, they should be comforted by the thought that the United States, as a permanent member of the Security Council, has the right of veto of any action.

This proposed U.N. force, perhaps called the Blue Helmet Unit, would be trained in the military tactics needed for peacekeeping and peacemaking. It could also be deployed to protect humanitarian aid workers, who have become increasingly vulnerable as armed groups ignore the protected status even of the Red Cross. The United States could offer an American base, perhaps one that is being considered for elimination, as a site for training and maneuvers. The personnel would be volunteers serving in our own military services and those of other countries. A period of service with a U.N. detachment could be seen as a challenging assignment useful for the further careers of soldiers from many countries.

I am heartened by the support for a strengthened U.N. force expressed by President Bush in his speech to the General Assembly Sept. 21. The President said "robust peacekeeping" requires men and equipment from member states, facilities for multinational units to train together, and logistical as well as planning and intelligence capabilities. He offered Fort Dix, N.J. as a potential site for such training, and said the Pentagon would be instructed to give "new emphasis" to preparing American military personnel for peacekeeping and humanitarian activities. The Presidents stooped short of earmarking U.S. units to the United Nations, but that is the logical next step, one already endorsed by Governor Clinton.

Committing military forces to the United Nations may offer a way to ease the financial constraints under which U.N. peacekeeping currently operates. U.N. peacekeeping will cost at least \$2.7 billion over the next 12 months, and the difficulty of raising these funds provoked former Secretary General Perez de Cuellar to say: "It's a great irony the United Nations is on the brink of insolvency at the very time the world community has entrusted the organization with new and unprecedented responsibilities."

But if governments agree to provide forces on a full-time or stand-by basis this could provide a framework for drawing government contributions from military budget rather than international aid contributions. For the United States this would mean paying our U.N. peacekeeping bills out of Defense Department appropriations rather than severely strained foreign affairs budgets. In return it would be understood that if needed for a country's own defense purposes, provisions would be negotiated for contingents to be withdrawn for urgent national needs.

As the United Nations faces one challenge after another, the time has come to revive

the hopes we had at San Francisco and to put into practices the military arrangements set forth in the Charter. It will take renewed vision to implement those ideas the same kind of far-sighted perspective that inspired the founders more than 45 years ago in San Francisco.

#### PASS THE TAX BILL

Mr. PELL. Mr. President, I rise today to join the chairman of the Finance Committee in supporting the conference report to H.R. 11, the Revenue Act of 1992. While it is not a perfect bill, it is a good compromise and it includes a number of very important provisions to encourage investment, stimulate our economy, and provide much needed hope and help for individuals and communities who have been struggling during this prolonged recession.

While this conference report includes a number of provisions that will help the people and the State of Rhode Island, my most immediate reason for supporting this tax bill is because it repeals the 10-percent luxury tax on boats over \$100,000. This luxury tax on boats has had a devastating effect on the boat building industry. It has led to the loss of jobs and the disappearance of some of our Nation's finest boat building firms, many of which were located in my home State of Rhode Island. And this luxury tax has had a ripple effect, hurting individuals and companies that rely on the boating industry, including suppliers, engineers, sail makers, marinas, and even restaurant owners. The luxury tax did not have the intended effect of taxing the wealthy, but rather it imposed a heavy penalty on workers in the boat building industry. The boat building industry in Rhode Island is sinking and repealing the luxury tax may be our only hope of keeping it afloat.

The conference agreement also provides much needed help for a real estate industry in Rhode Island and across the Nation that is struggling to survive. The bill modifies the so-called passive loss rules to permit the deduction for losses on rental property by individuals who participate materially in their real estate activities and permanently extends the mortgage revenue credit certificate program and the low income housing tax credit. I was disappointed, however, that the tax credit for first time home purchases was dropped during conference negotiations.

The centerpiece of the tax bill provides incentives to invest in enterprise zones to encourage businesses to locate in distressed areas and employ local residents. Complementing the enterprise zone provisions, is funding targeted for family preservation services and enterprise zone social services. Many of these income security programs were included in S. 4 which I joined in cosponsoring. In addition, the tax bill extends a number of important

expiring tax provisions including the R&D tax credit, the targeted jobs tax credit, the 25-percent health insurance cost deduction and the exclusion for employer-provided educational assistance. The conference agreement also provides incentives for charitable giving which are crucial to the viability of nonprofit organizations.

Finally, I was pleased that the conference agreement contains an expansion of individual retirement accounts with strong saving incentives for all Americans, and with new flexibility permitting the use of IRA funds without penalty for first-time home purchases, for certain medical or educational expenses, and for the long-term unemployed.

It is vitally important that Congress acts to lift the economy out of this recession, to stimulate economic growth, and to encourage investment. This conference report includes much of what both the President and the Congress wish to accomplish, it is a bipartisan product and a balanced bill. I urge my colleagues to support it and hope the President will sign it.

#### ACCOMPLISHMENTS OF THE 102D CONGRESS

Mr. PELL. Mr. President, in spite of what often appeared to be a deadlock between Congress and the White House, it seems to me that the 102d Congress did manage to achieve a number of substantial objectives.

I am particularly pleased that several of these achievements occurred in areas in which I have a special interest.

Passage of the Higher Education Act should expand educational opportunities for millions of Americans by increasing the availability of college loans and grants, including expansion of eligibility to Pell grants.

I was delighted that the Senate ratified by a 93-to-6 margin the Strategic Arms Reduction Treaty [START], which I managed. And I was pleased that Congress passed the nuclear test ban moratorium, notwithstanding the President's objections.

Congress took constructive action to help the country adjust to lower defense expenditures, providing \$1.8 billion for adjustment assistance to workers and communities and for diversification of defense industries.

This is something I have been advocating for several years and I am glad that the problem finally got the attention it deserved, although I might note that here too, the White House was not supportive.

On a number of other important issues—family and medical leave, extension of unemployment benefits, election campaign reform, and regulation of cable TV—Congress passed constructive and helpful legislation, after long and often difficult deliberations—only to have the legislation vetoed by the President.

Overall, it has been a very trying and contentious period of divided government, where the priorities and philosophy of the congressional majority were on a collision course with that of the executive branch.

I look forward to the possibility of a period of greater unity of national purpose after the November election. Hopefully, the next Congress won't have to fight so many uphill battles.

#### THE MAJORITY LEADER

Mr. DOLE. Mr. President, I wanted to thank the majority leader for all of his courtesies in these past 2 years, and for all the cooperation that we have had from the majority leader and members of his staff. Sometimes we were not able to work out the problems. Sometimes we were. But I would indicate for the RECORD that it is not because of the majority leader's unwillingness to make the effort.

So I thank him and congratulate him on the work of this Congress. And I look forward to working with him in the next Congress. Maybe we can switch titles next time. But if not, we will be here in any event.

But I want the record to reflect my friendship and support where I could, of the majority leader's agenda. It is a very difficult job the leaders have, on both sides, because there is always the suspicion that sometimes we work too closely together, that sometimes we do not do everything we should to protect everyone.

I would just say for the RECORD that we do our best. It is sometimes very difficult, with the number of agendas in this Senate, the number of schedules that our colleagues have to meet. But I think overall we have tried to accommodate everyone that we could. Hopefully we have done it in that spirit. But we have always done it in the spirit of trying to further the business of the Senate. I just say that I appreciate working with my friend and colleague.

#### THE REPUBLICAN LEADER

Mr. MITCHELL. Mr. President, I thank my distinguished colleague and friend, Senator DOLE, for his kind remarks. I want him to know that they are very much appreciated. And very much reciprocated.

As Senator DOLE indicated, the task of leadership in an institution like the Senate is not easy. Primarily because the leaders have no real power.

Mr. DOLE. That is right.

Mr. MITCHELL. We are an institution of 100 equals. And we are leaders in name but have only the power of persuasion with our colleagues. But I have truly enjoyed working with Senator DOLE in the 4 years that I have served as majority leader.

We frequently—indeed regularly—disagree on issues, as is inevitable in

our competitive political system. But there has never been any personal disagreement and our disagreements on issues have never stood in the way of the kind of cooperative working together that is essential if the Senate is to proceed at all to meet its public responsibilities.

So I am very grateful to Senator DOLE for his comments, for his friendship, and for the cooperative working spirit which we have had over these past 4 years.

#### THE 102D CONGRESS

Mr. MITCHELL. Mr. President, the legislative accomplishments of the 102d Congress are substantial. The agenda of unfinished business is even more substantial. The next Congress will face even greater challenges.

The primary goal of the 102d Congress has been to lay the foundation for sound, sustainable economic growth and job creation. Our economy is shifting from a military to a civilian basis; from manufacturing to a service- and information-based economy. American workers must learn new skills. Military personnel and defense workers must translate their learned skills to productive civilian uses.

That shift and how best to do it will be the challenge of the next several Congresses. If we do as well as President Truman did in moving from a wartime to a peacetime footing, we, too, will lay the foundation for economic growth and broad-based prosperity for all Americans.

This Congress took a first step with the defense conversion program in the Defense Authorization Act.

We enacted an intermodal transport bill to lay the foundation for a transportation system for the 21st century. We passed a higher education act to restore middle-income students' access to a college education. We approved an energy bill, after a decade with no national energy policy.

The 102d Congress responded to immediate needs as well. Despite vetoes and denials, we passed and extended unemployment insurance for workers facing economic hardship in the recession. We reformed the unemployment insurance system to restore its value to laid-off workers and the families who depend on their paychecks.

More than 9 million Americans remain unemployed, more than 6 million under employed. Another million want a job but have given up looking, so the Labor Department acknowledges there are 16 million Americans who want full-time jobs that this economy isn't providing.

The past 3 years have seen the slowest rate of job creation in more than 60 years.

The 102d Congress has sought to combat this economic stagnation. In March 1992 we passed an economic growth pro-

gram. Unfortunately, President Bush vetoed that bill, although it included his priority proposals.

We have now passed another, more modest economic growth package, along with the urban aid our cities need. Differences in emphasis and scope, exaggerated in an election year, have unfortunately made it impossible to develop the creative kind of growth package our anemic economy needs. That will be a priority for the 103d Congress.

the 102d Congress sought list did not achieve consensus on health care reform. But a consensus now coming into focus. Major health care reform will be the work of the next Congress. But we took needed preliminary steps in giving women's health issues the emphasis they have been denied.

The world beyond our borders continues to change drastically. The 102d Congress opened with the Gulf War debate, a serious exercise of the constitutional power of the Congress to debate the circumstances under which our Government should commit Americans to war.

The tragic conflict in the Balkans continues unabated, but the great post-war fear of nuclear holocaust has receded. Congress approved aid to sustain the movement of the Russian Republic to democratic government and free-market economics.

The START Treaty was approved and, despite administration efforts to block it, we successfully passed a nuclear test ban treaty package which will reduce reliance on weapons of terror.

At home, in the wake of the gulf war, a veterans benefit package was enacted. We also successfully passed a civil rights bill to restore the right of women, disabled Americans and minorities to seek compensation for the deprivation of their rights in the workplace.

Closer to home, Congress approved the Boren-Hamilton initiative for congressional reform. A bipartisan commission will recommend changes by the close of next year.

And in the closing days of the session, the 102d Congress overrode the President's veto of the cable television bill. Cable rates have risen three times as fast as inflation since the industry was deregulated 5 years ago. The bill gives the FCC authority to establish rules for reasonable rates so long as a cable operator faces no direct competition for customers. Where competition exists, the bill does not reach. A veto of this bill was unwarranted by its scope and unsupported by the reality of cable service for consumers today. The override is a victory for American consumers.

A review of the session would not be complete without noting the standoff between Congress and the President in the past couple of years. With vetoes of

minimum wage legislation, unemployment insurance, and civil rights legislation, the President blocked action.

As a result, a great deal of work has been lost for the present.

On the foreign policy front, President Bush first discouraged action on legislation to let the victims of Tiananmen Square seek asylum in America, claiming an Executive order would protect these people. His failure to issue that order forced us to pass a law.

Since that first response to the massacre, the President has repeatedly vetoed legislation intended to require the Chinese Government to live up to its own commitments on human rights, Tibetan freedom, arms proliferation, and fair trade. Yet Chinese behavior is unchanged.

There are disappointments on the domestic front as well. For the second Congress in a row Republican Senators filibustered an education reform bill to death. Our children will pay for that. It's been 10 years since the 1982 report, "A Nation at Risk," warned that education reform was needed. The second-graders of 1982 graduated high school this year.

The same thing happened to crime control legislation, including the Brady bill, a comprehensive effort to establish a background instant-check system to prevent the sale of handguns to felons.

The President successfully killed, as well, the expectation in all families that the illness of a child or ailing parent takes precedence over anything else. By vetoing the family leave bill, he forces on Americans the cruel choice of their families or their jobs. No other advanced nation demands that sacrifice. So much for family values.

The President is now trying to have it both ways on the question of a woman's right to abortion. When he talks of the women in his own family, he says he is for the right.

But his actions speak louder. He vetoed, yet again, a suspension of the gag rule which bars health professionals from giving poor women the information and counseling every woman deserves. This hostility to women's rights injects politics into private lives. It's wrong.

The President, unfortunately and unwisely vetoed campaign finance reform and voter registration legislation, bills intended to reduce the money chase in election campaigns and to give working Americans an easier chance to register to vote.

So while there's a substantial list of accomplishments for this 102d Congress, there are also disappointments. Government by veto is not what Americans want. It is not what the times call for.

We end the 102d Congress at a time when the President feels beleaguered and falls back on all of the old, un-

workable formulas for electoral success. That is why we have faced so many vetoes with so many unpersuasive arguments to support them. It is time for change. Government by veto and obstruction is not enough to meet the challenges that face the next Congress.

Next session, we must come to grips with the deficit in a context that provides for economic and job growth. Twelve years of trickle-down economics have to be reversed. It can not be done overnight. It is going to be difficult and it will demand shared sacrifice from those who haven't lost anything in the past 12 years along with those who have. Shared sacrifice will be accepted only if it is fairly shared.

We need comprehensive health care reform. Competition drives health insurers to seek policyholders without health problems. That is what makes a health insurer profitable. But health insurance is needed by those with health problems as well as the healthy, and the free market does not provide incentives to spread the risk, because spreading the risk lowers the profit.

So there is a serious problem at the heart of the process and until it is resolved, health care costs will rise at double and triple the rate of inflation. Cost controls are the key; with cost controls we can reinvigorate the private health insurance system. Without cost controls, we will get more of the same: The healthy and the wealthy will have insurance; those who need coverage will not.

We need to move on job creation and economic growth as well. Tax and investment policies have to be directed at American job growth.

Campaign finance reform, blocked by partisan hopes of advantage, remains unfinished business that we can complete next session if the goal of the President is reform, not advantage. It is needed and it is important. We will pursue it.

Election year politics interrupted the progress of efforts to secure the rights of women to exercise choice, their rights in the workplace and in the society. The next Congress will deal with the increase in violence against women, the issue of choice, and the health care disparities that have been documented in recent years. The next Congress will not treat women's issues as matters to be set aside for more important concerns. The next Congress will recognize women's issues as American concerns and deal with them directly.

It is a mixed outcome. We have done a lot. Without Presidential vetoes we would have done far more. Now it is up to the people to judge.

The times present issues and challenges and we are judged by how we meet them, whatever our human strengths and weaknesses may be. The 102d Congress met many of its chal-

lenges well. The next Congress must do even better.

#### SHARP TONGUES AND SHORT MEMORIES

Mr. DOLE. Mr. President, there is a tendency around this town toward sharp tongues and short memories. That has been particularly evident at recent hearings of the Senate's Select Committee on POW/MIA Affairs focusing on the negotiations which ended American involvement in the wars in Indochina.

It was kind of gang-up time on former President Nixon and former Secretary of State Kissinger—the latest targets of those who are more interested in pointing fingers and assigning blame than going about the really critical business of the committee: Finding out if there are any POW/MIA's still alive and imprisoned in Indochina.

It's not my job or my intention to act as counsel for the defense for anyone. But I am here to remind the Senate, and people around the country who may be watching, that the Senate itself hasn't always exactly covered itself with glory when it comes to the issue of POW/MIA's, and according to the priority it should have on our national agenda.

I had the opportunity to visit with the committee on September 24, to put on the record a few thoughts about one particular event in Senate history which I believe reflected the prevailing Senate attitude on this issue back in 1973—a period about which a lot of revisionist history is now being written.

In particular, I described a Senate debate and vote which occurred back in June 1973, when the Senate was considering a supplemental appropriations bill. That was a time, of course, when the Senate was still very much engaged in what was going on in Vietnam, and when the issue of POW/MIA's was an immediate, front burner issue—as, appropriately, it has become once again.

It was a time when the Congress had already prohibited the Nixon administration from any use of military force against North Vietnam. Whatever the reasons and rationale for that decision, it effectively stripped the President of any real leverage to push the North Vietnamese to address our concerns on POW/MIA's or anything else.

And it was also a time when it began to be crystal clear that Hanoi was not cooperating and meeting its commitments on the issue of POW/MIA's.

It seemed to me, to Senator HELMS, and to some other Senators that we ought to give back to the President at least a credible threat of the use of force to try to get Hanoi to come clean with us on POW/MIA's. So we crafted an amendment that would have allowed the President to resume military action if Hanoi continued to stonewall, as it was then stonewalling.

We felt then that the issue of our missing American servicemen was not some kind of sideshow or second tier issue—but rather that it had to be right at the very top of our priorities as we wound down our involvement in the Indochinese wars. A lot of people are making that point now, as they look for ammunition to criticize others for their alleged actions or inactions. But the time I am describing was then—not now. It was a time when the frenzy to get out of Vietnam was at its height; not now in the warm glow of the TV cameras, and with the benefit of hindsight.

Some now charge that Nixon or Kissinger or others didn't put enough priority on the issue. But the cosponsors of the amendment wanted the Senate to go on record then that the POW/MIA's were at the very top of our agenda. Without doubt, President Nixon and Secretary Kissinger would have welcomed passage of our amendment.

But it was up to the Senate. We wanted Senators to have to stand up and be counted on that issue.

So we offered the amendment, and all of us who were in the Senate then did stand up and be counted.

And when the counting was done, the Senate—by a vote 56-25—defeated the Dole-Helms amendment.

Mr. President, 18 Senators still serving in the Senate voted that day. Only 6 of us supported the amendment: myself, Senator HELMS, and Senators DOMENICI, ROTH, STEVENS, and THURMOND. The other 12 voted against the amendment.

The six of us who voted for the amendment felt it was a vote about how important the POW/MIA issue had to be for America. It was a vote on the issue of whether we ought to make sure, before we wound up our involvement in the region, that we had a full accounting for all our POW/MIA's; or whether the call to get out was so strong that heeding it took precedence over everything else.

Obviously, those who voted on the other side may have felt otherwise. Without question, they felt they were doing what was right for America. And, also without question, their vote did not reflect any lack of concern or caring about POW/MIA's.

The point I am making, though, is that things were a lot different back in those days. Things that might look black and white today did not look so simple and clear when they were actually happening. Sharp tongues and short memories may lead people to make reckless accusations or groundless allegations. But the facts are that it was an incredibly emotional, complex and at times even chaotic time. It was a time when there was an overwhelming public and congressional—I repeat, and congressional—pressure on the Nixon administration to terminate our involvement in Vietnam, and terminate it immediately and at any cost.

It was a time when reasonable people, with sincere and humane concerns about our POW/MIA's, may not have seen the POW/MIA issue in the same light that it appears today, two decades later.

It was a time when serious mistakes were made, no doubt about it, and on all sides. No one, certainly not this Senator, suggests that the Nixon administration was blameless.

But what is abundantly clear today is that, among the many human mistakes that were made, some of the biggest doozies were made right here in the Senate of the United States. And I happen to think that the vote on the Dole amendment that June day was one of the biggest of all.

Mr. President, we had a very spirited debate on the Dole-Helms amendment, and I want to give Senators the opportunity to review that debate. So I ask unanimous consent to include the full text of the debate in the RECORD.

Reading this RECORD will remind all of us of the reality of the times in which we then lived; will remind all of us that, when it comes time to hand out blame, there is plenty to go around; and will hopefully remind us that, while it is easier to pass out blame, it is a lot fairer to do your homework, put things in their proper context, and make reasonable judgments based on the facts as they were then, and not on the basis of history rewritten to serve some contemporary political interest.

In conclusion, I want to pull one brief quote from my own remarks at that time—remarks that ring out with sad irony today.

"I am under no illusion," I said as we prepared to vote on that June day in 1973.

I do not expect this amendment \*\*\* to prevail. But I would hope those who read the RECORD and those who sit down next year or 20 years from now to read the RECORD, in the event the North Vietnamese do not carry out the agreement, will know there were those of us in the Senate who stood and let our views be known.

I ask unanimous consent the portion of the debate reported in the CONGRESSIONAL RECORD of May 31, 1973 be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Congressional Record, May 31, 1973]

SUPPLEMENTAL APPROPRIATIONS FOR FISCAL YEAR ENDING JUNE 30, 1973

The Senate continued with the consideration of the bill (H.R. 7447) making supplemental appropriations for the fiscal year ending June 30, 1973, and for other purposes.

The PRESIDING OFFICER. The question recurs on the last committee amendment. Who yields time?

Mr. MANSFIELD. Mr. President, I think the Senator from Kansas is seeking recognition.

The PRESIDING OFFICER. The Senator from Kansas is recognized.

Mr. DOLE. Mr. President, I ask unanimous consent that I might offer my amendment to the committee amendment.

The PRESIDING OFFICER. Is there objection? Mr. MANSFIELD. Mr. President, the Senator is aware of the fact that amendments to the committee amendment are considered in the first degree and that the hour limitation applies.

Mr. DOLE. I am.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered. There are 30 minutes to the side on the amendment.

The clerk will report the amendment.

The legislative clerk read as follows: On page 58, line 14, insert the following: "Provided, however, That these restrictions shall be of no force or effect if the President finds and forthwith so reports to the Congress that the Government of North Vietnam is not making an accounting, to the best of its ability, of all missing in action personnel of the United States in Southeast Asia, or is otherwise not complying with the provisions of article 8 of the agreement signed in Paris on January 27, 1973, and article 10 of the protocol to the agreement 'Concerning the Return of Captured Military Personnel and Foreign Civilians and Captured and Detained Vietnamese Civilian Personnel'."

Mr. DOLE. Mr. President, I ask unanimous consent that the names of the following Senators be added as cosponsors of the amendment proposed by myself and the Senator from North Carolina (Mr. HELMS); Mr. BARTLETT, Mr. BELLMON, Mr. BROCK, Mr. BUCKLEY, Mr. CURTIS, Mr. CANNON, Mr. GRIFFIN, Mr. HANSEN, Mr. MCCLURE, Mr. SCOTT of Pennsylvania, Mr. SPARKMAN, Mr. TAFT, Mr. THURMOND, and Mr. TOWER.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, at this time, I ask for the yeas and nays on the amendment. The yeas and nays were ordered.

Mr. DOLE. Mr. President, I think the basis for the amendment I have offered, stated in its simplest terms, is whether we provide the President any leverage with which to make certain the North Vietnamese are making a responsible effort to account for the Americans missing in action in Cambodia and Laos.

There are still some 1,300 Americans carried as missing in action. Another 1,100 are listed as dead, but their remains have not been recovered.

I do not look upon this vote as simply a money vote, and any assertion that this matter is simply a money matter, going no farther than considerations of the budget, is to my mind a complete fiction.

Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order.

REAL QUESTION

Mr. DOLE. Mr. President, the real question before the Senate today is whether the Congress—after many years of unavailing efforts by a minority of its membership—is finally going to throw in the sponge and turn Southeast Asia over to the forces of aggression.

The question is whether—after years of combat, thousands of American and Asian deaths, and billions of dollars—the Congress is going to default on the achievements made possible by these sacrifices.

The question is whether—after years of detailed, intensive and exhaustive negotiations—the Congress is going to allow the solemn obligations which resulted from these negotiations to be openly violated without fear of punishment or sanction.

I, for one, have always been proud that in times of considerable doubt, uncertainty and pessimism throughout the history of the

Vietnam conflict, the Congress stood firm and refused to enact measures which would have tied the President's hands, militarily, or would have undercut his position at the negotiating table.

I have been proud that a majority in Congress always resisted the temptation to take the expedient course—to grasp for peace at any price. And as a result of this firmness the President was able to achieve our policy objectives and successfully pursue the negotiations.

GREAT ACCOMPLISHMENTS

Now we have an agreement for peace—an imperfect and fragile agreement, perhaps—but an honorable agreement nonetheless. All American combat forces have been withdrawn from Vietnam. Our prisoners of war are home.

Everything the critics cried so loudly for and which they would have given anything to achieve has been realized—but with America's honor maintained and our credibility intact.

CANNOT TURN BACK

But with all these accomplishments, much still remains, and now is not the time to throw away these achievements by relaxing our determination or weakening our commitment to our principles. With so much accomplished, with so much behind us, we must not turn away now when ahead lies the real and realistic opportunity of securing full compliance with the Paris agreements of January 27 and the bright hope of a just and lasting peace in this troubled area.

ANOTHER END-THE-WAR AMENDMENT

The Congress has contemplated action similar to this amendment many times before. So-called "End-the-war Amendments" are not new to the Congress. Each time before, in times of peril and doubt the amendments have failed. Now, since January 27, since the signing of the agreement to end the war and restore the peace in South Vietnam, we are told that the situation in southeast Asia has changed in its essentials. The change, we are told, now justifies action by the Congress to cut off funds for military operations.

CLEAR OBLIGATIONS

The situation in Cambodia, particularly, remains essentially unchanged. And as long as it does, the full implementation of the January 27 agreement remains out of reach. Article 20 of that agreement states clearly that foreign countries shall totally withdraw from and refrain from reintroducing into Cambodia, troops, and military personnel. There is no question that North Vietnam and Cambodia are separate countries. But North Vietnamese troops are being maintained in Cambodia, and they are engaging in hostilities against the government of that country and against the governments of neighboring countries including South Vietnam.

Mr. President, let me stress the real purpose of this amendment. I think it is very simple and very clear. Aside from all the emotion, all the arguments, and all the emotional pleas we have heard yesterday and today, there is one factor, in and of itself, that provides all the argument necessary against full implementation of the Eagleton amendment.

We are all aware of the fact that the United States entered into the January 27 agreement in good faith. This agreement, in all of its terms—including article 20—was drafted jointly by the parties to the conflict. It was mutually agreed to and signed. And it was universally hailed as a just and equitable

prescription for peace in an area that all agreed had been, for far too long embroiled in war.

The principle agreed to and embodied in article 20 was that there could be no peace in any part of Southeast Asia unless there was peace in all of Southeast Asia. Specifically, article 20 referred to Laos and Cambodia.

In Laos, we have a cease-fire. Like the cease-fire in Vietnam, though, it is endangered by the continuing conflict in Cambodia, and until the Cambodian conflict ends the war and the threat of war to all of Southeast Asia will not end.

ACCOUNTING FOR THE MISSING IN ACTION

But aside from these elements, another factor in and of itself provides all the argument necessary against the Eagleton amendment. The January 27 agreement clearly calls for certain positive actions by both sides with respect to the return of those held prisoner and an accounting for the missing in action.

Now, as a result in no small way of the Congress' earlier refusals to pass such legislation, we have been blessed with the return of more than 500 of our prisoners. We are all grateful for their return. As a Nation we rejoiced with the men and with their families at their homecoming.

But in the midst of our rejoicing we cannot ignore the fact that we still lack a full and satisfactory accounting of our missing in action.

Mr. President, at this point I ask unanimous consent to have printed in the RECORD at the conclusion of my remarks the latest published list of those U.S. military personnel missing in action in Southeast Asia.

There being no objection, the list was ordered to be printed in the RECORD, as follows:  
U.S. MILITARY PERSONNEL UNACCOUNTED FOR IN SOUTHEAST ASIA, AS OF 5 MAY 1973

PREFACE

This is a listing of U.S. military personnel who are unaccounted for in Southeast Asia in connection with the conflict in Vietnam and have not returned to military control.

The listing, totaling 1,321 names, was prepared from casualty reports received as of 5 May 1973.

The grade shown in many instances reflects promotions that have been made while the military members were in missing or captured status. Likewise, the originally assigned service or file number, in many cases, has been replaced in consonance with the program for using social security account numbers for military personnel.

 Mr. DOLE. Assistance in obtaining information for an accounting was clearly and unambiguously included as a mutual commit-

ment in the January 27 agreement. Such assistance has not been forthcoming. On January 27, the Defense Department listed 1,364 Americans in missing status. Today, 4 months later, some 1,284 or more of our men have not yet been accounted for in any manner and as I said earlier, the remains of some 1,120, who have been declared dead, have not been recovered.

#### INTERESTS CONTINUE

We are told, Mr. President, that the situation in Southeast Asia has changed. Now that the involvement of American ground troops has been terminated and the prisoners have been returned, some contend we no longer have any proper concern in that area of the world, not even a concern in seeing that the peace agreement is adhered to in respect to our missing men. I cannot accept this contention.

The situation has changed. It has changed immeasurably for the better. But the American stake in securing and solidifying a lasting peace in Southeast Asia has not changed.

If the rights of the South Vietnamese people to peace and self-determination and if the American concern for securing the return of our prisoners and a satisfactory accounting of the missing in action were ever legitimate interests of this country, then they are still legitimate interests.

#### IMPATIENCE AND WEARINESS

The country has long since grown weary of war. The country has long since tired of hearing news of American military involvement in Indochina, be it the ground combat of an earlier day or the air operations of today. And, of course, the Congress too, has grown weary of the conflict.

#### FIRM COMMITMENT TO GOALS

But if we allow our weariness of the war and our understandable and quite sincere desire to see an end, for all time, of the American military presence in Southeast Asia to lead us to passage of the Eagleton amendment, we would only open up to the North Vietnamese the possibility for continuing their unfettered aggression in the area. And we would quash any hope whatsoever for securing compliance with the peace agreement with respect to our missing men.

Strong action, courage, and commitment to our principles brought about the successful negotiation of the Paris agreements. The same resolve can now secure compliance with those agreements.

I am not prepared to accept the consequences of a legislated abrogation of the Paris agreements. Of course, I am weary of this fighting. I yield to no Member of this body in desiring a peaceful and just solution to the differences which have divided this region for so long.

But we have a responsibility, an obligation to see our policy successfully through to a lasting peace. And we have an obligation to the nearly 1,300 Americans who are missing throughout Southeast Asia—in North and South Vietnam, Laos, and Cambodia.

#### LIMITING AMENDMENT

Therefore, I am joining with my colleague from North Carolina (Mr. HELMS) in offering an amendment to limit the effect of the Eagleton amendment to the supplemental appropriations bill as long as the North Vietnamese are not complying with their obligations in regard to our missing men.

There can be no justification or rationalization for defaulting on our obligations to nearly 1,300 Americans and to their families, loved ones, and friends who wait and wonder at their fates.

It is difficult for those of us who are not directly affected to grasp the agony, the nightmare being lived by the parents, wives, and children of these missing men. They are in a terrible state of suspense. Their lives, their business affairs, their legal and financial status is plagued by uncertainty. They desperately want to know the fate of their husbands, sons, and fathers, and any action which delays or hinders North Vietnamese compliance with the Paris agreements on MIA's also prolongs the uncertainty and doubt of their families.

Mr. President, I wonder how these thousands of American wives, fathers, mothers, and children would vote on a measure which remove and weaken the President's leverage for obtaining information on these men?

Success for our policies and an end to the hostilities are near. Dr. Kissinger returns to Paris next month, and he has expressed confidence in the chances for successfully reaching an agreement with North Vietnam. The Congress cannot now—at this crucial time—place these negotiations in jeopardy by enacting a measure which would reduce our leverage to achieve compliance with the Paris agreements. Neither can it further jeopardize the fate of some 1,300 missing Americans. The amendment I offer with my colleague from North Carolina and the other distinguished Senators who have joined in sponsorship, would remove this jeopardy and would maintain this bit of leverage for the President.

We all want an end to hostilities. But, as I have said so many other times on this floor when we were talking about the American prisoners of war, we can say all we want to, but we still have an obligation to the families of those now listed as missing in action. They want to know. They want verification as to whether their son or husband or father is alive or dead.

So what would we do if the Eagleton amendment is agreed to? We would remove the last bit of leverage that the President has. Why should North Vietnam comply at all?

So I suggest, Mr. President, that we are voting today on whether we want North Vietnam to continue to make a sincere effort to account for and verify the status of some 1,300 Americans.

To me, that is an important obligation.

Mr. President, I ask unanimous consent to have printed in the Record the "Agreement Ending the War and Restoring Peace in Vietnam" of January 27, 1973, and the "Protocol to the Agreement Concerning the Return of Captured Military Personnel and Foreign Civilians and Detained Vietnamese Civilian Personnel" ending the war on the same date, and I reserve the remainder of my time.

There being no objection, the agreement and the protocol were ordered to be printed in the Record, as follows:

#### AGREEMENT ON ENDING THE WAR AND RESTORING PEACE IN VIETNAM

The Parties participating in the Paris Conference on Vietnam,

With a view to ending the war and restoring peace in Vietnam on the basis of respect for the Vietnamese people's fundamental national rights and the South Vietnamese people's right to self-determination, and to contributing to the consolidation of peace in Asia and the world,

Have agreed on the following provisions and undertake to respect and to implement them:

#### CHAPTER I

##### *The Vietnamese people's fundamental national rights*

#### Article 1

The United States and all other countries respect the independence, sovereignty, unity, and territorial integrity of Vietnam as recognized by the 1954 Geneva Agreements on Vietnam.

#### CHAPTER II

##### *Cessation of hostilities—withdrawal of troops*

#### Article 2

A cease-fire shall be observed throughout South Vietnam as of 2400 hours G.M.T., on January 27, 1973.

At the same hour, the United States will stop all its military activities against the territory of the Democratic Republic of Vietnam by ground, air and naval forces, wherever they may be based, and end the mining of the territorial waters, ports, harbors, and waterways of the Democratic Republic of Vietnam. The United States will remove, permanently deactivate or destroy all the mines in the territorial waters, ports, harbors, and waterways of North Vietnam as soon as this Agreement goes into effect.

The complete cessation of hostilities mentioned in this Article shall be durable and without limit of time.

#### Article 3

The parties undertake to maintain the cease-fire and to ensure a lasting and stable peace.

As soon as the cease-fire goes into effect:

(a) The United States forces and those of the other foreign countries allied with the United States and the Republic of Vietnam shall remain in-place pending the implementation of the plan of troop withdrawal. The Four-Party Joint Military Commission described in Article 16 shall determine the modalities.

(b) The armed forces of the two South Vietnamese parties shall remain in-place. The Two-Party Joint Military Commission described in Article 17 shall determine the areas controlled by each party and the modalities of stationing.

(c) The regular forces of all services and arms and the irregular forces of the parties in South Vietnam shall stop all offensive activities against each other and shall strictly abide by the following stipulations:

All acts of force on the ground, in the air, and on the sea shall be prohibited;

All hostile acts, terrorism and reprisals by both sides will be banned.

#### Article 4

The United States will not continue its military involvement or intervene in the internal affairs of South Vietnam.

#### Article 5

Within sixty days of the signing of this agreement, there will be a total withdrawal from South Vietnam of troops, military advisers, and military personnel associated with the pacification program, armaments, munitions, and war material of the United States and those of the other foreign countries mentioned in Article 3(a). Advisers from the above-mentioned countries to all paramilitary organizations and the police force will also be withdrawn within the same period of time.

#### Article 6

The dismantlement of all military bases in South Vietnam of the United States and of the other foreign countries mentioned in article 3(a) shall be completed within sixty days of the signing of this Agreement.

## Article 7

From the enforcement of the cease-fire to the formation of the government provided for in Articles 9(b) and 14 of this Agreement, the two South Vietnamese parties shall not accept the introduction of troops, military advisers, and military personnel including technical military personnel, armaments, munitions, and war material into South Vietnam.

The two South Vietnamese parties shall be permitted to make periodic replacement of armaments, munitions and war material which have been destroyed, damaged, worn out or used up after the cease-fire, on the basis of piece-for-piece, of the same characteristics and properties, under the supervision of the Joint Military Commission of the two South Vietnamese parties and of the International Commission of Control and Supervision.

## CHAPTER III

*The return of captured military personnel and foreign civilians, and captured and detained Vietnamese civilian personnel*

## Article 8

(a) The return of captured military personnel and foreign civilians of the parties shall be carried out simultaneously with and completed not later than the same day as the troop withdrawal mentioned in Article 5. The parties shall exchange complete lists of the above-mentioned captured military personnel and foreign civilians on the day of the signing of this Agreement.

(b) The parties shall help each other to get information about those military personnel and foreign civilians of the parties missing in action, to determine the location and take care of the graves of the dead so as to facilitate the exhumation and repatriation of the remains, and to take any such other measures as may be required to get information about those still considered missing in action.

(c) The question of the return of Vietnamese civilian personnel captured and detained in South Vietnam will be resolved by the two South Vietnamese parties on the basis of the principles of Article 21(b) of the Agreement on the Cessation of Hostilities in Vietnam of July 20, 1954. The two South Vietnamese parties will do so in a spirit of national reconciliation and concord, with a view to ending hatred and enmity, in order to ease suffering and to reunite families. The two South Vietnamese parties will do their utmost to resolve this question within ninety days after the cease-fire comes into effect.

## CHAPTER IV

*The exercise of the South Vietnamese people's right to self-determination*

## Article 9

The Government of the United States of America and the Government of the Democratic Republic of Vietnam undertake to respect the following principles for the exercise of the South Vietnamese people's right to self-determination:

(a) The South Vietnamese people's right to self-determination is sacred, inalienable, and shall be respected by all countries.

(b) The South Vietnamese people shall decide themselves the political future of South Vietnam through genuinely free and democratic general elections under international supervision.

(c) Foreign countries shall not impose any political tendency or personality on the South Vietnamese people.

## Article 10

The two South Vietnamese parties undertake to respect the cease-fire and maintain

peace in South Vietnam, settle all matters of contention through negotiations, and avoid all armed conflict.

## Article 11

Immediately after the cease-fire, the two South Vietnamese parties will:

achieve national reconciliation and concord, end hatred and enmity, prohibit all acts of reprisal and discrimination against individuals or organizations that have collaborated with one side or the other;

ensure the democratic liberties of the people: personal freedom, freedom of speech, freedom of the press, freedom of meeting, freedom of organization, freedom of political activities, freedom of belief, freedom of movement, freedom of residence, freedom of work, right of property ownership, and right to free enterprise.

## Article 12

(a) Immediately after the cease-fire, the two South Vietnamese parties shall hold consultations in a spirit of national reconciliation and concord, mutual respect, and mutual non-elimination to set up a National Council of National Reconciliation and Concord of three equal segments. The Council shall operate on the principle of unanimity. After the National Council of National Reconciliation and Concord has assumed its functions, the two South Vietnamese parties will consult about the formation of councils at lower levels. The two South Vietnamese parties shall sign an agreement on the internal matters of South Vietnamese as soon as possible and do their utmost to accomplish this within ninety days after the cease-fire comes into effect, in keeping with the South Vietnamese people's aspirations for peace, independence and democracy.

(b) The National Council of National Reconciliation and Concord shall have the task of promoting the two South Vietnamese parties' implementation of this Agreement, achievement of national reconciliation and concord and ensurance of democratic liberties. The National Council of National Reconciliation and Concord will organize the free and democratic general elections provided for in Article 9 (b) and decide the procedures and modalities of these general elections. The institutions for which the general elections are to be held will be agreed upon through consultations between the two South Vietnamese parties. The National Council of National Reconciliation and Concord will also decide the procedures and modalities of such local elections as the two South Vietnamese parties agree upon.

## Article 13

The question of Vietnamese armed forces in South Vietnam shall be settled by the two South Vietnamese parties in a spirit of national reconciliation and concord, equality and mutual respect, without foreign interference, in accordance with the postwar situation. Among the questions to be discussed by the two South Vietnamese parties and steps to reduce their military effectives and to demobilize the troops being reduced. The two South Vietnamese parties will accomplish this as soon as possible.

## Article 14

South Vietnam will pursue a foreign policy of peace and independence. It will be prepared to establish relations with all countries irrespective of their political and social systems on the basis of mutual respect for independence and sovereignty and accept economic and technical aid from any country with no political conditions attached. The acceptance of military aid by South

Vietnam in the future shall come under the authority of the government set up after the general elections in South Vietnam provided for in Article 9(b).

## CHAPTER V

*The reunification of Vietnam and the relationship between North and South Vietnam*

## Article 15

The reunification of Vietnam shall be carried out step by step through peaceful means on the basis of discussions and agreements between North and South Vietnam, without coercion or annexation by either party, and without foreign interference. The time for reunification will be agreed upon by North and South Vietnam.

## Pending reunification:

(a) The military demarcation line between the two zones at the 17th parallel is only provisional and not a political or territorial boundary, as provided for in paragraph 6 of the Final Declaration of the 1954 Geneva Conference.

(b) North and South Vietnam shall respect the Demilitarized Zone on either side of the Provisional Military Demarcation Line.

(c) North and South Vietnam shall promptly start negotiations with a view to reestablishing normal relations in various fields. Among the questions to be negotiated are the modalities of civilian movement across the Provisional Military Demarcation Line.

(d) North and South Vietnam shall not join any military alliance or military bloc and shall not allow foreign powers to maintain military bases, troops, military advisers, and military personnel on their respective territories, as stipulated in the 1954 Geneva Agreements on Vietnam.

## CHAPTER VI

*The Joint Military Commissions, the International Commission of Control and Supervision, the International Conference*

## Article 16

(a) The Parties participating in the Paris Conference on Vietnam shall immediately designate representatives to form a Four-Party Joint Military Commission with the task of ensuring joint action by the parties in implementing the following provisions of this Agreement:

The first paragraph of Article 2, regarding the enforcement of the cease-fire throughout South Vietnam;

Article 3(a), regarding the cease-fire by U.S. forces and those of the other foreign countries referred to in that Article;

Article 3(c), regarding the cease-fire between all parties in South Vietnam;

Article 5, regarding the withdrawal from South Vietnam of U.S. troops and those of the other foreign countries mentioned in Article 3(a);

Article 6, regarding the dismantlement of military bases in South Vietnam of the United States and those of the other foreign countries mentioned in Article 3(a);

Article 8(a), regarding the return of captured military personnel and foreign civilians of the parties;

Article 8(b), regarding the mutual assistance of the parties in getting information about those military personnel and foreign civilians of the parties missing in action.

(b) The Four-Party Joint Military Commission shall operate in accordance with the principle of consultations and unanimity. Disagreements shall be referred to the International Commissions of Control and Supervision.

(c) The Four-Party Joint Military Commission shall begin operating immediately

after the signing of this Agreement and end its activities in sixty days, after the completion of the withdrawal of U.S. troops and those of the other foreign countries mentioned in Article 3(a) and the completion of the return of captured military personnel and foreign civilians of the parties.

(d) The four parties shall agree immediately on the organization, the working procedure, means of activity, and expenditures of the Four-Party Joint Military Commission.

Article 17

(a) The two South Vietnamese parties shall immediately designate representatives to form a Two-Party Joint Military Commission with the task of ensuring joint action by the two South Vietnamese parties in implementing the following provisions of this Agreement:

The first paragraph of Article 2, regarding the enforcement of the cease-fire throughout South Vietnam, when the Four-Party Joint Military Commission has ended its activities;

Article 3(b), regarding the cease-fire between the two South Vietnamese parties;

Article 3(c), regarding the cease-fire between all parties in South Vietnam, when the Four-Party Joint Military Commission has ended its activities;

Article 7, regarding the prohibition of the introduction of troops into South Vietnam and all other provisions of this article;

Article 8(c), regarding the question of the return of Vietnamese civilian personnel captured and detained in South Vietnam;

Article 13, regarding the reduction of the military effectives of the two South Vietnamese parties and the demobilization of the troops being reduced.

(b) Disagreements shall be referred to the International Commission of Control and Supervision.

(c) After the signing of this Agreement of the Two-Party Joint Military Commission shall agree immediately on the measures and organization aimed at enforcing the cease-fire and preserving peace in South Vietnam.

Article 18

(a) After the signing of this Agreement, an International Commission of Control and Supervision shall be established immediately.

(b) Until the International Conference provided for in Article 19 makes definite arrangements, the International Commission of Control and Supervision will report to the four parties on matters concerning the control and supervision of the implication of the following provisions of this Agreement:

The first paragraph of Article 2, regarding the enforcement of the cease-fire throughout South Vietnam;

Article 3(a), regarding the cease-fire by U.S. forces and those of the other foreign countries referred to in that Article;

Article 3(c) regarding the cease-fire between all the parties in South Vietnam;

Article 5, regarding the withdrawal from South Vietnam of U.S. troops and those of the other foreign countries mentioned in Article 3(a);

Article 19

The parties agree on the convening of an International Conference within thirty days of the signing of this Agreement to acknowledge the signed agreements; to guarantee the ending of the war, the maintenance of peace in Vietnam, the respect of the Vietnamese people's fundamental national rights, and the South Vietnamese people's right to self-determination; and to contribute to and guarantee peace in Indochina.

The United States and the Democratic Republic of Vietnam, on behalf of the parties participating in the Paris Conference on Vietnam, will propose to the following parties that they participate in this International Conference: the People's Republic of China, the Republic of France, the Union of Soviet Socialist Republics, the United Kingdom, the four countries of the International Commission of Control and Supervision, and the Secretary General of the United Nations, together with the parties participating in the Paris Conference on Vietnam.

CHAPTER VII

*Regarding Cambodia and Laos*

Article 20

(a) The parties participating in the Paris Conference on Vietnam shall strictly respect the 1954 Geneva Agreements on Cambodia and the 1962 Geneva Agreements on Laos, which recognized the Cambodian and the Lao peoples' fundamental national rights, i.e., the independence, sovereignty, unity, and territorial integrity of these countries. The parties shall respect the neutrality of Cambodia and Laos.

The parties participating in the Paris Conference on Vietnam undertake to refrain from using the territory of Cambodia and the territory of Laos to encroach on the sovereignty and security of one another and of other countries.

(b) Foreign countries shall put an end to all military activities in Cambodia and Laos, totally withdraw from and refrain from reintroducing into these two countries troops, military advisers and military personnel, armaments, munitions and war material.

(c) The internal affairs of Cambodia and Laos shall be settled by the people of each of these countries without foreign interference.

(d) The problems existing between the Indochinese countries shall be settled by the Indochinese parties on the basis of respect for each other's independence, sovereignty, and territorial integrity, and non-interference in each other's internal affairs.

CHAPTER VIII

*The relationship between the United States and the Democratic Republic of Vietnam*

Article 21

The United States anticipates that this Agreement will usher in an era of reconciliation with the Democratic Republic of Vietnam as with all the peoples of Indochina. In pursuance of its traditional policy, the United States will contribute to healing the wounds of war and to postwar reconstruction of the Democratic Republic of Vietnam and throughout Indochina.

Article 22

The ending of the war, the restoration of peace in Vietnam, and the strict implementation of this Agreement will create conditions for establishing a new, equal and mutually beneficial relationship between the United States and the Democratic Republic of Vietnam on the basis of respect for each other's independence and sovereignty, and noninterference in each other's internal affairs. At the same time this will ensure stable peace in Vietnam and contribute to the preservation of lasting peace in Indochina and Southeast Asia.

CHAPTER IX

*Other provisions*

Article 23

This Agreement shall enter into force upon signature by plenipotentiary representatives of the parties participating in the Paris Conference

on Vietnam. All the parties concerned shall strictly implement this Agreement and its Protocols.

Done in Paris this twenty-seventh day of January, One Thousand Nine Hundred and Seventy-Three, in Vietnamese and English. The Vietnamese and English texts are official and equally authentic.

AGREEMENT ON ENDING THE WAR AND RESTORING PEACE IN VIETNAM

The Government of the United States of America with the concurrence of the Government of the Republic of Vietnam.

The Government of the Democratic Republic of Vietnam, with the concurrence of the Provisional Revolutionary Government of the Republic of South Vietnam.

With a view to ending the war and restoring peace in Vietnam on the basis of respect of the Vietnamese people's fundamental national rights and the South Vietnamese people's right to self-determination, and to contributing to the consolidation of peace in Asia and the world,

Have agreed on the following provisions and undertake to respect and to implement them:

[Text of Agreement Chapters I-VIII Same As Above]

CHAPTER IX

*Other provisions*

Article 23

The Paris Agreement on Ending the War and Restoring Peace in Vietnam shall enter into force upon signature of this document by the Secretary of State of the Government of the United States of America and the Minister for Foreign Affairs of the Government of the Democratic Republic of Vietnam, and upon signature of a document in the same terms by the Secretary of State of the Government of the United States of America, the Minister for Foreign Affairs of the Government of the Republic of Vietnam, the Minister for Foreign Affairs of the Government of the Democratic Republic of Vietnam, and the Minister for Foreign Affairs of the Provisional Revolutionary Government of the Republic of South Vietnam. The Agreement and the protocols to it shall be strictly implemented by all the parties concerned.

PROTOCOL TO THE AGREEMENT ON ENDING THE WAR AND RESTORING PEACE IN VIETNAM CONCERNING THE RETURN OF CAPTURED MILITARY PERSONNEL AND FOREIGN CIVILIANS AND CAPTURED AND DETAINED VIETNAMESE CIVILIAN PERSONNEL.

The parties participating in the Paris Conference on Vietnam,

In Implementation of Article 8 of the Agreement on Ending the War and Restoring Peace in Vietnam signed on this date providing for the return of captured military personnel and foreign civilians, and captured and detained Vietnamese civilian personnel, Have agreed as follows:

THE RETURN OF CAPTURED MILITARY PERSONNEL AND FOREIGN CIVILIANS

Article 1

The parties signatory to the Agreement shall return the captured military personnel of the parties mentioned in Article 8(a) of the Agreement as follows:

All captured military personnel of the United States and those of the other foreign countries mentioned in Article 3(a) of the Agreement shall be returned to United States authorities;

All captured Vietnamese military personnel, whether belonging to regular or irregular armed forces, shall be returned to the two South Vietnamese parties; they shall be returned to that South Vietnamese party under whose command they served.

Article 2

All captured civilians who are nationals of the United States or of any other foreign countries mentioned in Article 3(a) of the Agreement shall be returned to United States authorities. All other captured foreign civilians shall be returned to the authorities of their country of nationality by any one of the parties willing and able to do so.

Article 3

The parties shall today exchange complete lists of captured persons mentioned in Articles 1 and 2 of this Protocol.

Article 4

(a) The return of all captured persons mentioned in Articles 1 and 2 of this Protocol shall be completed within sixty days of the signing of the Agreement at a rate no slower than the rate of withdrawal from South Vietnam of United States forces and those of the other foreign countries mentioned in Article 5 of the Agreement.

(b) Persons who are seriously ill, wounded or maimed, old persons and women shall be returned first. The remainder shall be returned either by returning all from one detention place after another or in order of their dates of capture, beginning with those who have been held the longest.

Article 5

The return and reception of the persons mentioned in Articles 1 and 2 of this Protocol shall be carried out at places convenient to the concerned parties. Places of return shall be agreed upon by the Four-Party Joint Military Commission. The parties shall ensure the safety of personnel engaged in the return and reception of those persons.

Article 6

Each party shall return all captured persons mentioned in Articles 1 and 2 of this Protocol without delay and shall facilitate their return and reception. The detaining parties shall not deny or delay their return for any reason, including the fact that captured persons may, on any grounds, have been prosecuted or sentenced.

THE RETURN OF CAPTURED AND DETAINED VIETNAMESE CIVILIAN PERSONNEL

Article 7

(a) The question of the return of Vietnamese civilian personnel captured and detained in South Vietnam will be resolved by the two South Vietnamese parties on the basis of the principles of Article 21(b) of the Agreement on the Cessation of Hostilities in Vietnam of July 20, 1954, which reads as follows:

"The term civilian internees' is understood to mean all persons who, having in any way contributed to the political and armed struggle between the two parties, have been arrested for that reason and have been kept in detention by either party during the period of hostilities."

(b) The two South Vietnamese parties will do so in a spirit of national reconciliation and concord with a view to end hatred and enmity in order to ease suffering and to reunite families. The two South Vietnamese parties will do their utmost to resolve this question within ninety days after the cease-fire comes into effect.

(c) Within fifteen days after the cease-fire comes into effect, the two South Vietnamese parties shall exchange lists of the Vietnamese civilian personnel captured and detained by each party and lists of the places at which they are held.

TREATMENT OF CAPTURED PERSONS DURING DETENTION

Article 8

(a) All captured military personnel of the parties and captured foreign civilians of the parties shall be treated humanely at all times, and in accordance with international practice.

They shall be protected against all violence to life and person, in particular against murder in any form, mutilation, torture and cruel treatment, and outrages upon personal dignity. These persons shall not be forced to join the armed forces of the detaining party.

They shall be given adequate food, clothing, shelter, and the medical attention required for their state of health. They shall be allowed to exchange post cards and letters with their families and receive parcels.

(b) All Vietnamese civilian personnel captured and detained in South Vietnam shall be treated humanely at all times, and in accordance with international practice.

They shall be protected against all violence to life and person, in particular against murder in any form, mutilation, torture and cruel treatment, and outrages against personal dignity. The detaining parties shall not deny or delay their return for any reason, including the fact that captured persons may, on any grounds, have been prosecuted or sentenced. These persons shall not be forced to join the armed forces of the detaining party.

They shall be given adequate food, clothing, shelter, and the medical attention required for their state of health. They shall be allowed to exchange post cards and letters with their families and receive parcels.

Article 9

(a) To contribute to improving the living conditions of the captured military personnel of the parties and foreign civilians of the parties, the parties shall, within fifteen days after the cease-fire comes into effect, agree upon the designation of two or more national Red Cross societies to visit all places where captured military personnel and foreign civilians are held.

(b) To contribute to improving the living conditions of the captured and detained Vietnamese civilian personnel, the two South Viet-

namese parties shall, within fifteen days after the cease-fire comes into effect, agree upon the designation of two or more national Red Cross societies to visit all places where the captured and detained Vietnamese civilian personnel are held.

WITH REGARD TO DEAD AND MISSING PERSONS

Article 10

(a) The Four-Party Joint Military Commission shall ensure joint action by the parties in implementing Article 8(b) of the Agreement. When the Four-Party Joint Military Commission has ended its activities, a Four-Party Joint Military team shall be maintained to carry on this task.

(b) With regard to Vietnamese civilian personnel dead or missing in South Vietnam, the two South Vietnamese parties shall help each other to obtain information about missing persons, determine the location and take care of the graves of the dead, in a spirit of national reconciliation and concord, in keeping with the people's aspirations.

OTHER PROVISIONS

Article 11

(a) The Four-Party and Two-Party Joint Military Commissions will have the responsibility of determining immediately the modalities of implementing the provisions of this Protocol consistent with their respective responsibilities under Articles 16(a) and 17(a) of the Agreement. In case the Joint Military Commissions, when carrying out their tasks, cannot reach agreement on a matter pertaining to the return of captured personnel they shall refer to the International Commission for its assistance.

(b) The Four-Party Joint Military Commission shall form, in addition to the teams established by the Protocol concerning the cease-fire in South Vietnam and the Joint Military Commissions, a subcommission on captured persons and, as required, joint military teams on captured persons to assist the Commission in its tasks.

(c) From the time the cease-fire comes into force to the time when the Two-Party Joint Military Commission becomes operational, the two South Vietnamese parties' delegations to the Four-Party Joint Military Commission shall form a provisional sub-commission and provisional joint military teams to carry out its tasks concerning captured and detained Vietnamese civilian personnel.

(d) The Four-Party Joint Military Commission shall send joint military teams to observe the return of the persons mentioned in Articles 1 and 2 of this Protocol at each place in Vietnam where such persons are being returned, and at the last detention places from which these persons will be taken to the places of return. The Two-Party Joint Military Commission shall send joint military teams to observe the return of Vietnamese civilian personnel captured and detained at each place in South Vietnam where such persons are being returned, and at the last detention places from which these persons will be taken to the places of return.

Article 12

In implementation of Articles 18(b) and 18(c) of the Agreement, the International Commission of Control and Supervision shall have the responsibility to control and supervise the observance of Articles 1 through 7 of this Protocol through observation of the return of captured military personnel, foreign civilians and captured and detained Vietnamese civilian personnel at each place in Vietnam where these persons are being returned, and at the last detention places from which these persons will be taken to the

places of return, the examination of lists, and the investigation of violations of the provisions of the above-mentioned Articles.

#### Article 13

Within five days after signature of this Protocol, each party shall publish the text of the Protocol and communicate it to all the captured persons covered by the protocol and being detained by that party.

#### Article 14

This protocol shall come into force upon signature by plenipotentiary representatives of all the parties participating in the Paris Conference on Vietnam. It shall be strictly implemented by all the parties concerned.

Done in Paris this twenty-seventh day of January, One Thousand Nine Hundred and Seventy-Three, in Vietnamese and English. The Vietnamese and English texts are official and equally authentic.

#### PROTOCOL TO THE AGREEMENT ON ENDING THE WAR AND RESTORING PEACE IN VIETNAM CONCERNING THE RETURN OF CAPTURED MILITARY PERSONNEL AND FOREIGN CIVILIANS AND CAPTURED AND DETAINED VIETNAMESE CIVILIAN PERSONNEL

The Government of the United States of America, with the concurrence of the Government of the Republic of Vietnam,

The Government of the Democratic Republic of Vietnam, with the concurrence of the Provisional Revolutionary Government of the Republic of South Vietnam.

In implementation of Article 8 of the Agreement on Ending the War and Restoring Peace in Vietnam signed on this date providing for the return of captured military personnel and foreign civilians, and captured and detained Vietnamese civilian personnel. Have agreed as follows:

[Text of Protocol Articles 1-13 same as above]

#### ARTICLE 14

The Protocol to the Paris Agreement on Ending the War and Restoring Peace in Vietnam concerning the Return of Captured Military Personnel and Foreign Civilians and Captured and Detained Vietnamese Civilian Personnel shall enter into force upon signature of this document by the Secretary of State of the Government of the United States of America and the Minister for Foreign Affairs of the Government of the Democratic Republic of Vietnam, and upon signature of a document in the same terms by the Secretary of State of the Government of the United States of America, the Minister for Foreign Affairs of the Government of the Republic of Vietnam, the Minister for Foreign Affairs of the Government of the Democratic Republic of Vietnam, and the Minister for Foreign Affairs of the Provisional Revolu-

tionary Government of the Republic of South Vietnam. The Protocol shall be strictly implemented by all the parties concerned.

Done in Paris this twenty-seventh day of January, One Thousand Nine Hundred and Seventy-Three, in Vietnamese and English. The Vietnamese and English texts are official and equally authentic.

For the Government of the United States of America:

WILLIAM P. ROGERS,  
*Secretary of State.*

For the Government of the Democratic Republic of Vietnam:

NGUYEN DUY TRINH,  
*Minister for Foreign Affairs.*

Mr. DOLE. Mr. President, I yield to the Senator from North Carolina (Mr. Helms) such time as he may require.

Mr. HELMS. Mr. President, I thank my distinguished colleague from Kansas.

The agreement which was signed in Paris on January 27, 1973, provides in article 8 that—

(b) The parties shall help each other to get information about those military personnel and foreign civilians of the parties missing in action, to determine the location and take care of the graves of the dead so as to facilitate the exhumation and repatriation of the remains, and to take any such other measures as may be required to get information about those still considered missing in action.

In addition, the protocol to the agreement "Concerning the Return of Captured Military Personnel and Foreign Civilians and Captured and Detained Vietnamese Civilian Personnel" states in article 10, "With Regard to Dead and Missing Persons," the—

(a) The Four-Party Joint Military Commission shall ensure joint action by the parties in implementing Article 8(b) of the Agreement. When the Four-Party Joint Military Commission has ended its activities, a Four-Party Joint Military team shall be maintained to carry on this task.

Furthermore, according to article 17 of the agreement, disagreements will be referred to the International Commission on Control and Supervision.

Mr. President, so far, these provisions have been substantively inoperative. The Four-Party Joint Military Commission has met for its allotted 60 days, and has left Vietnam. The Four-Party Joint Military Team remains. Two visits have been made to Hanoi under very strictly supervised circumstances. But, for the most part, the meetings of the parties have been perfunctory. We are still in the process of negotiating with the North Vietnamese for permission to visit crash sites, and possible graveyards. They have not budged 1 inch to help us substantively to identify the missing in action.

On January 27, we had 1,929 military personnel officially listed as missing in action. As of May 26, the number is 1,284 throughout Southeast Asia. This decrease has not come about because of any help from the North Vietnamese Communists; it is because some of the MIA's have been identified as returning prisoners of war. Yet we still have the right under the agreement, to remove the remains of those identified, but we have not been granted that permission.

Mr. President, the U.S. Joint Casualty Resolution Center has been established at Nakhon Phanom, Thailand, and is assigned the mission of resolving the status of U.S. missing personnel. They are ready to locate crash sites or grave sites. Their teams are ready. Their identification laboratory is

ready. All they are waiting for is permission to go out into the jungles and into the local inhabited areas to make searches and ask questions of the local inhabitants. Yet the permission to do so has not been forthcoming. The Four-Party Joint Military Team does nothing but talk. Why do not the Communists give us the permission they agreed to give us?

A further complication is that a goodly number of these MIA's may be in Cambodia and Laos, with at least 300 in Laos alone. The Khmer Rouge and the Laotian Communists are not parties to the Paris agreement. They are, however, strongly influenced by the presence of the North Vietnamese troops in that area. The only way that we can ever expect the Cambodian and Laotian Communists to give the requisite permission to visit possible sites in those areas is to continue our military operations in those areas. We must not forget that it was the decisive action of our President that brought the North Vietnamese to enter serious negotiations and forced them to agreement. Similar military activity is the only thing which will force the North Vietnamese to adhere to these agreements to withdraw from Cambodia and force the native Communists to allow us to find our MIA's, dead or alive.

Mr. President, I repeat, the only way to get a satisfactory accounting of our MIA's is to allow the President the discretion to continue air support as necessary, but to continue under the conditions which are specifically stated in our proposed amendment.

I would point out, Mr. President, and emphasize, that this amendment contains a requirement that the President report to Congress.

It is apparent from yesterday's vote that there is sentiment in this body to cut off immediately appropriations for military action in Laos and Cambodia. I disagree with this sentiment. Yet at the same time, I think that my distinguished colleagues will realize the importance of our receiving a full accounting of the MIA's. The amendment which the distinguished Senator from Kansas (Mr. DOLE) and I are offering today seeks a reasonable compromise among reasonable men. It would simply withhold the effect of the amendment offered by the junior Senator from Missouri until such time as we received a satisfactory accounting of our MIA's. I am sure that no one in this body would want to be responsible for prolonging such an accounting of our MIA's.

Under the Paris agreement, the four parties are supposed to cooperate in such an accounting. The Communists have not cooperated. At the very least, the Communists are supposed to allow the United States to take the necessary steps to arrive at an accounting. They have not given us the simple permission to make our own searches. Yet at the very moment when we are poised to begin such searches, there are some who would tie the hands of the President and remove from him the only sanctions we have to force Hanoi to comply with the agreement in respect to accounting for MIA's. If there are those who favor the Eagleton amendment, let them at least consider whether its effect should be delayed until there is a demonstration of good faith on the part of the Communists that they are willing to live up to article 8 of the agreement which they signed.

Surely we owe this to the wives and families and other loved ones of the American men who went out there to do their duty for our country—men who are now missing, men

whose wives and families still live in the agony of uncertainty.

Mr. President, I reserve the remainder of my time.

Mr. EAGLETON. Mr. President, there is not a Senator in this body who does not want the North Vietnamese to provide a full accounting of our missing in action as is required by the Paris agreement. Many would support diplomatic or economic sanctions against North Vietnam, to force that nation to uphold its obligations under the agreement.

But that is not the issue before us today. The issue is whether the combat activities being conducted in Cambodia by the President of the United States are legal or wise.

As Secretary Richardson has said, a vote to defeat section 305 would be a vote to acquiesce in the air operation. But we are now confronted with an amendment which, if adopted and passed into law along with section 305 would constitute the legal authorization of Congress to continue the bombing until the President decides it should stop. This amendment is dynamite in sheep's clothing, and the Senator from Kansas knows it.

My amendment deals only with Cambodia and Laos, nations whose governments have no obligations under the Paris agreement. North Vietnam, is obliged to carry out that agreement, but to link the failure of that country to abide by the provisions of the Paris agreement to a decision to go to war in a nation only incidentally affected by that agreement would be sheer nonsense. Yet, that is what the Dole amendment is asking us to do—to give our legal sanction to the Cambodian war.

The tactic is clear, of course—obscure the central issue with a totally unrelated matter—a matter of great concern to the Members of this body. But we have come too far to be hoodwinked into authorizing a new war in Indochina through the back door. This amendment would not only undercut section 305, it would, in effect, transform it into a declaration of war.

I urge my colleagues, before we take the drastic step the Senator from Kansas is asking us to take, to look at the effort that has been undertaken to date in pursuit of a full accounting of our MIA's.

Before the dissolution of the Four-Party Joint Military Commission on May 28, a Four-Party Joint Team was established as an ongoing adjunct of the original Four Power Commission. This team meets regularly in Saigon and is specifically designated to carry out the portions of the cease-fire agreement on missing in action.

As a result of the continuing meetings between the Four-Party Team, two recent visits took place to North Vietnam for the purpose of identifying and recovering missing in action. On May 11, the team was taken by the North Vietnamese to an empty cemetery where, according to the North Vietnamese, 12 Americans had been buried. One week later, on May 18, the team was taken to a gravesite outside of Hanoi where they inspected 23 gravesites and verified that each contained the remains of Americans previously listed as MIA's.

The Four-Party Team continues to meet in Saigon 2 or 3 times a week and are now discussing methods to repatriate the remains of the American dead. In addition, the team is discussing with the North Vietnamese an inspection schedule whereby the team could travel to known or suspected crash sites in North Vietnam.

According to investigators from the Foreign Relations Committee, military person-

nel assigned to our Joint Casualty Resolution Center in Thailand have advised that they have no complaints of noncooperation on the part of the North Vietnamese. They indicated that the procedure may be going along slower than we would like; however, there is no indication that our Government is prepared to protest the current level of activity.

Mr. President, what we are asked to do by the Dole amendment, before we have even filed a formal protest with the ICCS, before we even communicate with the North Vietnamese with respect to the recovery of the MIA's, is to declare war in a third nation—Cambodia.

I would like to read from the testimony that is going to be delivered this afternoon by Mr. Frank A. Sieverts, special assistant to the Deputy Secretary of State for Prisoners of War and Men Missing in Action. This testimony will be delivered—perhaps it is being delivered now—before a subcommittee of the House Committee on Foreign Affairs. This is what Mr. Sieverts says about the cooperation we are receiving with respect to the MIA's. I read from page 12:

We are in direct contact with officials of the communist side. In Saigon, we are proceeding through the Four-Party Joint Military Team, established under the Viet-Nam Agreement. The Team has already made two trips to North Viet-Nam to visit cemeteries where Americans who died in captivity are buried. Communist officials have also acknowledged the existence of additional graves of Americans who died in aircraft crashes or of other causes. Our aim is to arrange the early repatriation of the remains of as many of these persons as possible.

At the same time, we have made clear our urgent interest in receiving information on the missing. Complete lists of our missing personnel have been provided to the Four-Party Team for this purpose.

In Laos, U.S. officials have been in direct contact with representatives of the Lao Patriotic Front (the Pathet Lao) to press for additional information on Americans missing or captured in Laos. We have told the communist side of our concern at the small number of Americans listed as captured in Laos, in view of past hints that a larger number were held by Pathet Lao forces, and in view of evidence that at least two others had been captured in Laos. The communist side has repeatedly told us and has recently stated publicly that there are no more Americans captured or held in Laos. They have also said that further accounting for the missing must await the formation of a coalition government, as specified in the February 21 Laos cease-fire agreement. Our efforts to convince the communist side to proceed with this accounting without waiting for a new government to be formed have thus far been in vain.

\* \* \* \* \*

We are carrying out our own efforts to search for information on our missing and dead. Specific responsibility for this has been assigned to the Joint Casualty Resolution Center (JCRC), located in Thailand near the Laos and Viet-Nam borders. The JCRC is manned by American military personnel and functions with the close assistance of our embassies and consulates in the area. We have told the communist side about the JCRC, making clear its peaceful, open, and humanitarian purpose. The JCRC already has carried out a number of searches, so far in South Viet-Nam. We plan to work in harmony with local people wherever Americans may be missing or dead, and we hope to have

the cooperation of the communist authorities. Our aim is to find the fullest possible information on each missing man. We recognize this is an enormous undertaking, and that we cannot succeed in every case, or even in a majority of cases. But we intend to try.

There are no more tragic victims of war than the families of MIA's. These families are destined to continue their life never fully knowing whether their loved one may still be alive in some far-off corner of the world. The Indochina war is not much different than other wars we have fought in that regard—the tragedy and the sorrow is the same. In World War II the United States had a total of 35,368 missing personnel; 29,151 are now considered dead and 1,754 are still carried in missing status. In the Korean war 5,178 Americans were either missing or captured. A larger percentage of that number were returned by the enemy where they had been held as POW's. But still over 1,000 are listed as missing in action.

So the unfortunate tragedy of the MIA is not unique to our most recent war experience. In every case, the U.S. Government puts forth a maximum effort to obtain a full accounting of its missing in action. But I submit that never in our history have we made the mistake of entering another war before we have exhausted all diplomatic efforts to obtain that full accounting.

Mr. President, I have received letters from the families of our missing in action. It is difficult to give these people even a little hope. Dr. Kissinger and the Defense Department have expressed strong doubts that any are still alive.

I read again from the testimony Mr. Sieverts is submitting this afternoon:

It should be noted that there is no indication from these debriefings of POW's that any American personnel continue to be held in Indochina. All American prisoners known to any of our returned POW's have either been released or been listed by the communist authorities as having died in captivity. Returnees with whom I have talked, including those who appeared before this Subcommittee May 23, are clear in their belief that no U.S. prisoners continue to be held.

It is a tragic irony that the Defense Department carried no MIA in Cambodia prior to the January 27 cease-fire agreement. Since that agreement, however, two Americans have been lost in bombing operations and are now listed as missing in action. Yet, the Senator from Kansas wants this body to give legal sanction to the combat activity which is adding Americans to the list of MIA's.

No one can return life to those who are dead, but what we can do here today, in our own way, is see to it that no more die and that there are no more missing in action. It is because we should now be well aware of the pain suffered by the families of MIA's that we must reject this amendment.

Mr. SYMINGTON. Mr. President, will the Senator yield?

The PRESIDING OFFICER. The Senator from Missouri has 9 minutes remaining.

Mr. EAGLETON. I yield 8 minutes to the Senator from Missouri.

#### BOMBING OF CAMBODIA

Mr. SYMINGTON. Mr. President, in recent days Senators advocating a continuation of the United States bombing of Cambodia have made a series of misstatements of fact in support of their positions.

I feel confident, of course, that none of those involved have made these mistaken

statements deliberately. Indeed, they appear to have been based on similar misstatements persistently made by executive branch officials in recent months.

Fortunately, in this instance the Senator does not have to rely solely on information provided by the executive branch in considering the Cambodian question. Members of the staff of the Subcommittee on U.S. Security Agreements and Commitments Abroad of the Senate Foreign Relations Committee, which subcommittee I have the honor to chair, spent the month of April in Indochina and have brought back a report which, after review by the executive branch, has been made available to the Senate and the public, and which contradicts the basic premises of the administration's argument in support of the Cambodian bombing.

I wish briefly to note some of the principal errors made by the administration and its supporters in this debate.

It has been claimed, for instance, that: We are bombing North Vietnamese troops. The fact is that the vast majority of our bombing is directed not at the North Vietnamese, but at the troops of the Cambodian faction opposing Lon Nol. In briefings at the Pentagon, at U.S. 7th Air Force Headquarters in Thailand and at the American Embassy in Phnom Penh, our staff was told that the heavy preponderance of forces opposing the Lon Nol forces are Cambodian insurgents.

It has also been claimed that— The North Vietnamese are currently maintaining some 40,000 troops in Cambodia. Of this total, some 30,000 are support troops, at least 3,500 are targeted against the Cambodian government forces, and some 30 military advisors per battalion are helping the Cambodian insurgent forces.

As is evident even from the quote itself, it is deceptive to speak of "40,000 North Vietnamese troops in Cambodia" when only a small percentage of these troops are targeted against the forces of the Phnom Penh regime. Furthermore, the number of North Vietnamese engaged against Lon Nol's forces, according to figures given the subcommittee staff as an agreed U.S. intelligence community estimate in early April, was not "at least 3,500" but probably "about 2,000 or at most 3,000." Moreover, the subcommittee staff was told that at most there were three or four advisers attached to some—but not all—insurgent battalions. Cambodian insurgent ralliers with whom our staff was asked to meet by the Cambodian Government said there were no North Vietnamese attached to their former battalions.

One of the most serious misrepresentations is that which involves the alleged North Vietnamese violation of the Vietnamese cease-fire agreement as regards Cambodia. The Administration's supporters have said, for example—

U.S. air operations were a precise response to the North Vietnamese violation of Article 20 (of the Vietnam ceasefire agreement).

The fact is that there has been no North Vietnamese violation of article 20. According to the State Department, the terms of article 20 are not yet operative and do not require withdrawal until or unless there is a cease-fire agreement in Cambodia. Secretary Rogers himself recently acknowledged in a hearing before the Foreign Relations Committee that the North Vietnamese are not in violation of article 20.

Another erroneous assertion is that which states that—

When the (Vietnam) cease-fire was signed, the Cambodian Government declared a cease-fire.

In fact, following the Vietnam cease-fire, Lon Nol announced that his troops would suspend offensive operations so that the North Vietnamese could withdraw and Lon Nol warned that if they did not withdraw, his troops would take action against them. This was not a cease-fire offer; it was an ultimatum. Furthermore, Lon Nol's troops did not all suspend operations whereas for several days most of the Cambodian insurgents apparently did.

It has also been said that— U.S. air strikes are meticulously targeted and controlled to avoid civilian casualties.

Our Air Force, while it undoubtedly does its best to avoid civilian casualties, is unable to do so because our authorities do not have available to them the type of detailed information required to avoid civilian casualties and because the airplanes being used and the manner in which they are employed make it impossible to avoid civilian casualties.

Furthermore, our staff has reported that the procedural safeguards employed in Cambodia are nowhere near as tight as those previously used in Laos where thousands of civilian casualties resulted from our devastation of the Plain of Jars. In fact, local Cambodian commanders are reported to call for air strikes without regard to possible civilian presence and an assistant air attaché in the American Embassy, far from the scene of the fighting, authorizes strikes on behalf of our Ambassador.

Mr. President, these are the facts that these men went out and obtained shortly before this debate started. There are many other misstatements of fact which I could cite that have been made on the floor in an effort to justify this incredible bombing. But those which I have noted should be sufficient to indicate that once again the American people have been given a distorted view of the war in Indo-China. What these misstatements amount to is an erroneous picture of who we are fighting, where we are bombing, and a misrepresentation of the basis for our bombing.

As mentioned previously, the legal rationale for the President's authority to continue the bombing as presented by the executive branch is equally invalid.

Mr. DOLE. Mr. President, how much time remains?

The PRESIDING OFFICER. The Senator from Kansas has 9 minutes remaining and the Senator from Missouri has 12 minutes remaining.

Mr. DOLE. Mr. President, I wish to use this time to make as a part of the RECORD a statement delivered today by Dr. Roger E. Shields, Assistant to the Assistant Secretary of Defense—International Security Affairs—before the Subcommittee on National Security Policy and Scientific Development, of the Foreign Affairs Committee on the House. I would like to make one comment with reference to the paragraph on page 8 where Dr. Shields speaks of the efforts to verify the status of our MIA's and discusses those responsible for the verifications. He states:

On two occasions, May 11 and 18, the team, along with representatives of the joint casualty resolution center, journeyed to North Vietnam where burial sites, allegedly of American servicemen, were seen. Identification and recovery of remains were not undertaken on these occasions because of lack of permission from the North Vietnamese.

Mr. President, I ask unanimous consent to have printed in the RECORD the entire statement made by Dr. Roger E. Shields, Assistant to the Assistant Secretary of Defense, to which I have just referred.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT OF DR. ROGER E. SHIELDS

Mr. Chairman, members of the committee: It is a privilege for me to represent the Department of Defense here today. I particularly welcome the opportunity to talk with you because, unlike the last time we met, part of a great effort in behalf of our missing and captured men and their families has reached a heartwarming and satisfying conclusion. I am referring specifically to the return from captivity of 566 American military personnel and 25 U.S. civilians. Nine foreign nationals were also released. I would like to insert in the record at this point a statistical summary of these 591 returned Americans.

As you know, these Americans were taken prisoner while serving in Southeast Asia. Their period of captivity ranged from only a few months to as long as ten years. During this time they faced deprivations and made sacrifices that very few men ever encounter. Here at home the families of our missing and captured endured years of frustration waiting for some word about the condition or status of their men. These families were joined by countless Americans and virtually every government agency in a great national endeavor to obtain a full and accurate accounting of all the men, and better treatment and the ultimate release of those held captive. As I have indicated, only part of our work is finished. About 1300 men still remain unaccounted for and their families continue the seemingly endless vigil in their behalf. I will discuss our current efforts to resolve the perplexing issue of those who did not return in just a moment.

During the months and years preceding the long awaited return of our men, a major part of our work involved detailed planning for their repatriation. Presentations before this and other committees usually centered around the anticipated problems of reception, processing, rehabilitation, and readjustment of the returned prisoners of war. Much of this planning was done in the face of great uncertainty. For example, we did not know how many men would be released, what condition they would be in, or even where they would be returned to us. These uncertainties necessitated planning for a wide range of possibilities with contingency plans ready at our military hospitals in Europe as well as in the Pacific Theater. I can say with considerable satisfaction that our homecoming plans were well-founded. From the moment the first 116 men were released in North Vietnam on February 12, 1973, until the last one was released by the PRG in South Vietnam on April 1, 1973, the return of our men was handled with efficiency, thoroughness, and sensitivity. The initial reception, aeromedical evacuation, enroute medical treatment, and the ultimate family reunions and processing in the United States are a tribute to the outstanding cooperation and mutual support demonstrated by the four military services. We in the Department of Defense received unparalleled cooperation and assistance from agencies in both the Federal and State Governments; especially from the Department of State, the Congress of the United States, and our President.

Our returned men have now completed the homecoming processing events. Most of them are on convalescent leave and are busy getting acquainted with their families and their country once again. Many have already received future assignments and are preparing to resume active military careers. Some are undergoing scheduled treatment to cor-

rect physical deficiencies noted during the detailed medical evaluation received overseas and here at home. All of the men have been brought up to date in personnel and financial matters and have been debriefed on their experiences in captivity. The 31 military installations that accomplished the processing in the U.S. remain as headquarters for the men while they are free on convalescent leave and until they actively resume military or civilian professions. All agencies in the Department of Defense stand ready to help the men and their families during this transition period.

In the future, we are prepared to provide whatever assistance is required for as long as may be necessary. For example, the Department of Defense has implemented a program through which returned men who leave the military prior to obtaining retirement eligibility will, along with their families, be authorized to obtain health care in any military medical facility for a period of five years from the date of separation. Near the end of the five year period, each situation will be reevaluated. This program will help guarantee that each returned prisoner of war will receive immediate and long-term medical attention from military medical specialists who are familiar with the Southeast Asia captivity environment, and who have access to complete records and documentation in the military medical archives. For those who elect to leave the military, we are also prepared to provide a full range of job counseling and assistance in cooperation with private industry. For those who remain on active duty, the Services have developed special retraining and familiarization programs. One program, for example, involves two weeks of academic updating on military, national, and international matters.

Much of the credit for the success of homecoming must be given to the men themselves and to their families. They handled the repatriation events and the reunion with families and countrymen with great dignity and patriotism. They have been an inspiration to this country. Based on the accounts of their captivity experiences, I would say that their ability to endure so long under such harsh conditions can be largely attributed to their courage and determination and to their faith in God and country.

While we are grateful for the return of these men, our joy and sense of accomplishment are tempered by the fact that others, listed by our government as missing and captured, did not return. A full accounting for these men is not yet available to us. Some fear that in the wake of homecoming, we will forget those who are unaccounted for and ignore the plight of their families. I want to assure you that this will not happen. The Department of Defense will continue to seek the fullest possible accounting for these men and to provide their families with every possible assistance just as we have in the past. In addition, we will seek to recover the remains of the missing who have died and those who are already listed as killed in action but whose remains have not been recovered.

Before discussing the preparations that we have made and the actions we are now taking to achieve our objectives, I would like to place the problem in perspective by inserting in the RECORD a statistical breakdown of some 1300 men who remain unaccounted for in Southeast Asia. In addition to this number, there are about 1100 others who have been declared dead by the Services but whose remains have not been recovered.

As the members of the committee know, every possible avenue was explored prior to

the release of our men to gain accurate information about those listed as missing or captured. Even while we planned our repatriation activities, we simultaneously prepared for the time when direct action to account for our missing would be possible through negotiation or systematic search. To date, extensive data has been gathered and stored in automated data handling systems for ease in correlation and analysis. This data includes extensive descriptive information on the individuals concerned, such as carefully plotted locations where they were last seen, and eyewitness accounts from our own forces as well as all accessible indigenous residents who were known to possess information about our prisoners or missing. One computerized program that is particularly unique contains information taken from medical records concerning all individual physical characteristics which would, with the aid of advanced technology, help facilitate the prompt and accurate identification of any remains that are recovered.

In order to update members of Congress on efforts being made to resolve the serious problem of accounting for the missing, the Department of Defense submitted a paper to them on February 2, 1973. Before proceeding further, I would like to submit for the record this paper and its memorandum of transmittal.

There are now two primary agencies upon which we are relying heavily to help resolve the status of our missing: The Four-Party Joint Military Team (FPJMT) and the Joint Casualty Resolution Center (JCRC). In accordance with the agreements signed in Paris, the Four-Party Joint Military Team was established after termination of the Four-Party Joint Military Commission expressly for the purpose of arranging for the recovery of remains and exchange information to help clarify the status of the missing. The Joint Casualty Resolution Center was activated in January of this year in South Vietnam. In February, with approval of the Royal Thai Government, the Joint Nakhon Phanom Royal Thai Air Force Base in northeastern Thailand. Within the limits imposed upon it, the Joint Casualty Resolution Center supervises and conducts search operations designed to resolve the fate of the missing and recover remains wherever possible. The entire operation is peaceful, open, and humanitarian in nature. In its current location, the Joint Casualty Resolution Center is centrally located with regard to all the areas in which American personnel were lost.

The mission of our delegation to the Four-Party Joint Military Team has three primary aspects: (1) To obtain information from the other side about U.S. military and civilian persons who are missing in action; (2) to obtain information about the location of the graves of those persons who died in captivity or were killed in action; and (3) to negotiate entry rights for U.S. search and inspection operations into areas where there are believed to be unrecovered remains or where those still unaccounted for were last believed to be located.

The chief of our delegation, an Army colonel, is responsible through the defense attaché office in Saigon and the U.S. support activity group in Thailand to the U.S. commander in chief, Pacific, Admiral Noel Gayler. Our delegation is also responsive to the policy guidance and instructions of the ambassador in Saigon. Since the first meeting of the team on April 4, over twenty sessions have been held. On two occasions, May 11 and 18, the team, along with representatives of the joint casualty resolution center,

journeyed to North Vietnam where burial sites, allegedly of American servicemen, were seen. Identification and recover of remains were not undertaken on these occasions because of lack of permission from the North Vietnamese. We are currently trying to arrange for the exhumation and repatriation of these remains and of any other American dead known to the other side.

Another issue that is of major concern to us is the acquisition of entry rights for our search teams to areas throughout Southeast Asia where our men are missing. The success of the joint casualty resolution center's mission depends heavily on the operating authorities and the cooperation of the countries involved. We believe that our search teams should be given access to all locations where our men are believed to be missing. This is especially true for Laos where only nine Americans were listed for repatriation while over 300 of our men still remain unaccounted for. Our teams possess the great expertise required for this complex and dangerous mission, as well as the motivation to do a complete and thorough job. Nevertheless, we invite and welcome host country participation in the activities of our field teams. Indeed, we feel that host country participation is essential to the safety of our own teams and to the success of the mission.

To give you a better idea of the task facing the joint casualty resolution center and our negotiators, let me turn back to some statistics that I mentioned earlier. As you recall, I said that there are some 1,300 who are unaccounted for in Southeast Asia and some 1,100 others who have been declared officially dead by the services but whose remains have not been recovered. More than 1,900 of the composite 2,400 in these two categories are the result of air crashes. There are more than 1,000 such crash sites involving over 50 different types and models of aircraft. The number varies from nearly 400 in North Vietnam to less than 20 in Cambodia. These crash sites are scattered throughout the rugged terrain in Southeast Asia—on mountains and in dense uninhabited jungles. Approximately 150 of the crashes were at sea. Some 90 percent of the sites are in militarily contested areas or in areas controlled by the other side.

So far, some five crash sites in non-contested areas of South Vietnam have been inspected. The inspection of these sites has allowed refinement of procedures and techniques in preparation for the more complex and hazardous operations to come. Pieces of aircraft wreckage and other materials have been located and are being analyzed for identification purposes. On one of the first search operations, a South Vietnamese soldier was killed by an unexploded booby trap while participating with an advance element that had been sent to clear the area for the main search party. This is a clear indication that the overall effort will be both difficult and dangerous. For the record, I would like to submit a fact sheet on the joint casualty resolution center that explains in greater detail the unit's organizational structure and methods of operation.

I would like to address now the question of the degree of success that we might ultimately achieve and how long this might take. Prior to the repatriation of our prisoners there were high expectations that large numbers of missing in action cases could be resolved from debriefing of the returned men. Unfortunately, this has not been the case. The debriefings have been performed in a professional manner with sensitivity, and the data carefully analyzed and

stored for future reference. Nevertheless, it appears that less than 100 status changes will be made on the basis of this information. We are hopeful that a significant number of additional status changes will result from negotiated arrangements for the exchange of information and the return of remains from locations throughout Indochina. How quickly we will achieve results from these efforts I cannot say. The four-party joint military team has made some progress in this area, and I am hopeful that our patience and persistence will be rewarded by ultimate success.

Even after all information has been exchanged and all known remains exhumed and repatriated, there will undoubtedly be cases which yet remain to be resolved. Take as an example the case of a missing aircraft which crashed in the sea or uninhabited jungle. It is likely neither side in the recent conflict would know the whereabouts of the wreckage or the fate of the crew. In other cases, even though the locations were once known, it is possible that both wreckage and grave sites may have succumbed to the ravages of time and the havoc of war. It is abundantly clear that the tasks of determining how some of our missing died and the recovery of remains could be prolonged if not impossible.

As for those who are thought to have been captured alive but who have not been returned, let me say that this is perhaps the most agonizing and frustrating issue of all. These are the cases of men who were seen on the ground of whose pictures were released subsequent to capture but who, for one reason or another, have not returned and for whom the other side has yet to provide a satisfactory explanation. We do not consider the lists received so far to be complete and accurate accounting for our men. We do have, though, an agreement which provides for all actions necessary to account as completely as possible for all who have not returned or are otherwise unaccounted for. We believe that implementation of this agreement will provide the speediest and most satisfactory answers to our questions.

In summary, we are working now to finalize arrangement which will provide for the speedy return of remains for our known dead from locations throughout Southeast Asia, and for the acquisition of clarify information on any others. On the other hand, the task of inspecting crash sites of locations where the missing were last seen and of finding, exhuming, and identifying remains may be difficult and prolonged, at least over several years, especially if operating limitations remain an obstacle. Some crash sites and graves may never be found.

As for status changes, I want to emphasize that they are not unalterably tied to the inspection of combat sites or to the recovery or remains. We have made changes in status from missing in action or prisoner of war to killed in action throughout the recent conflict. Since March, the services have made about 80 more status changes to killed in action, and we can expect that more will be made on a continuing basis in the future.

The recording and changing of status of the missing are governed by sections 551-558, title 37, United States Code. Under public law, the service secretaries are given responsibility for status changes. To assist him, each secretary calls upon professionals within his organization who conduct an exhaustive study, based on all available information of each individual case. Their task is a painful one requiring countless hours of deliberation and calling ultimately for difficult decisions. The subject of status deter-

minations is not a new one for the services. Those involved in this often unhappy part of the prisoner of war/missing in action issue are experienced and skilled and expert in upholding the public law and at the same time protecting, to the best of their ability, the ultimate interests of the missing men and their families.

In making status determinations, two possibilities exist besides the option of remaining the individual in a missing status. In those cases where information is received which conclusively establishes that the member is dead, then a report of death will be issued. A finding of death, commonly known as a "presumptive finding" is made when circumstances are such that the missing individual cannot reasonably be presumed to be living. An individual who was lost over water and who was not among those released or acknowledged by the other side in any way is a good example of a potential "presumptive finding."

The problems surrounding the question of those not yet accounted for are difficult in every respect. We are prepared to do the job through the machinery that we now have in motion, but we are convinced that the issue will not be resolved quickly or easily. I want to assure you again that we will uphold our responsibilities and our obligations in this matter. We will provide the families of our missing men every possible assistance. And for those who must face a final negative determination, we are prepared to offer complete counseling and guidance to help ease the resulting burdens, as well as heartfelt sympathy.

Mr. Chairman, members of this subcommittee, may I again express the appreciation of the Department of Defense for your kind invitation to appear here today and for your steadfast work in behalf of our men and their families. The opportunity to discuss the current status of our returned men and the issue of our missing is truly welcomed.

REPORTED FOR RELEASE AND RETURNED TO U.S. CONTROL—FEB. 12, APR. 1, 1973

OFFICE OF THE SECRETARY OF DEFENSE, Washington, DC, February 2, 1973.

MEMORANDUM FOR SENATORS AND MEMBERS OF THE HOUSE OF REPRESENTATIVES

I have prepared the attached information to insure that you are informed concerning the very important and serious problem of accounting for our servicemen who are missing in action in Southeast Asia.

I want to assure you personally that we in the Department of Defense will meticulously explore all avenues and exhaust all clues in our quest to account for each individual lost in Southeast Asia. Also, I want to reaffirm that we consider each of our missing equally as important as our prisoners who are returning.

Your interest and support in our endeavor is appreciated.

Sincerely,  
 ROGER E. SHIELDS,  
 Assistant for PW/MIA Matters.

OFFICE OF THE SECRETARY OF DEFENSE, Washington, D.C., February 2, 1973. ACCOUNTING FOR MILITARY PERSONNEL WHO ARE LISTED AS MISSING IN ACTION

The purpose of this memorandum is to provide a description of the efforts being made to acquire as full an accounting of our missing in action personnel as possible.

The United States Government will make every possible effort to acquire an accounting for our servicemen missing in action in Southeast Asia.

In this regard, the Agreement which was signed in Paris on January 27, 1973, provides in Article 8 that:

"\* \* \* (b) the parties shall help each other to get information about those military personnel and foreign civilians of the parties missing in action, to determine the location and take care of the graves of the dead so as to facilitate the exhumation and repatriation of the remains, and to take any such other measures as may be required to get information about those still considered missing in action."

In addition, the Protocol to the Agreement "Concerning the Return of Captured Military Personnel and Foreign Civilians and Captured and Detained Vietnamese Civilian Personnel" states in Article 10, "With regard to Dead and Missing Persons" that:

"(a) the Four-Party Joint Military Commission shall ensure joint action by the parties in implementing Article 8(b) of the Agreement. When the Four-Party Joint Military Commission has ended its activities, a Four-Party Joint Military team shall be maintained to carry on the task." Disagreements will be referred to the International Commission on Control and Supervision (Article 17 of the Agreement).

It is reemphasized that the U.S. Government will do everything in its power to insure that all parties adhere to the true sense of the Agreement. To this end, Major General Gilbert H. Woodward, United States

Army, has been appointed as the United States Representative on the Four-Party Military Commission which will have representation from the United States, South Vietnam, North Vietnam and the Viet Cong. General Woodward has had extensive experience in negotiations of this type as the Senior Member United Nations Command, Military Armistice Commission, United Nations Command/United States Forces Korea during the period leading up to and at the time of the USS PUEBLO crewmembers' release. The task of the Four-Party Military Commission will be to implement appropriate provisions of the Agreement, including Article 8 quoted above. As the U.S. Representative, General Woodward is responsible for obtaining from other members of the Commission all MIA information held by them, and will coordinate with them the investigations by U.S. teams of incidents surrounding the loss of each of our MIA personnel.

The United States Joint Casualty Resolution Center (JCRC) has been established at Nakhon Phanom (NKP), Thailand and is assigned the mission of resolving the status of U.S. missing personnel. Personnel from the JCRC will locate and investigate crash sites or grave sites throughout Southeast Asia as arranged through the Four-Party Joint Military Commission. The organization of the JCRC will provide the expertise for these investigations, utilizing air search and ground search teams and a central identification laboratory with a pool of specialist to inspect located crash and grave sites and recover remains.

It is expected that endeavors in remote areas will normally include air and ground searches for crash sites. U.S.-led teams in conjunction with an air search will thoroughly investigate assigned areas of operation for suspected crash and grave sites. If a crash or grave site is located, personnel from the Central Identification Laboratory (graves registration specialists) and crash site investigators will be utilized for a detailed on-scene investigation.

In the more inhabited areas, personal contact with the local people following extensive information programs and coordination will be a primary technique. Grave registration specialists with interpreters, exploiting information gained from all sources and with authority to grant suitable rewards for useful information will conduct the major efforts in those areas where the location of crash or grave sites is more likely to be known and reasonably accessible.

Certain areas require that highly qualified U.S. personnel lead the ground searches because many are in highly remote areas or in the vicinity of roads or trails which are heavily booby trapped and endangered by unexploded ordnance. It is anticipated that recovery detachment teams will include indigenous personnel recruited, trained, and utilized in each country of interest with the cooperation of the host government.

While the Department of Defense will strive to accomplish this massive task of accounting for the missing military personnel in the shortest possible time, it must be realized that it will not be done quickly or easily. For example, in the case of a missing aircraft which crashed in the sea or uninhabited jungle, it is likely neither side in the recent conflict would know the whereabouts of the crash.

The Secretary of Defense and all Defense Department personnel realize and accept the obligation to do their best in performing this important task. This we owe to the families of the missing in action personnel. We intend to fulfill that obligation.

#### FACT SHEET: UNITED STATES JOINT CASUALTY RESOLUTION CENTER

The Joint Casualty Resolution Center (JCRC), commanded by Army Brigadier General Robert Kingston, is a joint task force established by and under the command of the Commander in Chief Pacific. The unit is under the operational control of the Commander, United States Support Activities Group (USSAG). The Joint Casualty Resolution Center operates under Joint Chiefs of Staff approved mission and joint table of distribution.

The Joint Casualty Resolution Center is an outgrowth of United States Government efforts to identify, document, and maintain records of known and suspected missing in action and prisoners of war. These records were initially maintained by the Joint Personnel Recovery Center (JPRC), Saigon beginning in 1966. When the JCRC was established in Saigon on 23 January 1973, the records of the JCRC were turned over to the new organization.

The mission of the JCRC is to assist in resolving the status of those U.S. personnel missing in action (MIA) and those personnel declared dead whose bodies were not recovered (BNR), through the provision of information/coordination and/or conduct of operations to locate and investigate crash and grave sites and recover and identify remains throughout Southeast Asia.

In planning for our field operations, we use the following assumption:

a. All parties concerned will meet their obligations with respect to MIA's and dead assumed under the Vietnam and Lao agreements and will mutually assist in the resolution of such cases.

b. Conditions for coordination with personnel in countries concerned will be provided in accordance with terms of the cease-fire agreements.

c. Coordination of in-country activities in Laos and Cambodia will be accomplished through CINCPAC senior military representatives or designated American Embassy officers.

d. Coordination of in-country activities within North and South Vietnam will be accomplished through negotiations within the Four-Party Joint Military Team.

e. Access to all pertinent areas of Southeast Asia will be sought to allow JCRC teams to conduct casualty resolution operations.

In Saigon, an officer assigned to the Office of the Defense Attache, American Embassy has been designated to act as a channel for direct communications between JCRC Headquarters and the U.S. Delegation to the FPJMT.

The JCRC is organized under a dual deputy system: The Deputy Commander for Staff Operations is responsible for the staff planning and coordination; the Deputy Commander for the Field Operations supervises the field units.

Organizationally, the JCRC staff accomplishes the normal staff functions. Additional comments need to be made on three of the staff elements.

The Public Affairs Officer on the staff provides all available information on JCRC activities to the MACTHAI PAO in Bangkok. A JCRC officer is assigned to that office, where he serves as a casualty resolution point of contact and is in constant contact with the JCRC on all casualty resolution matters.

The Casualty Data Division assembles, correlates, and analyzes information on personnel who are missing in the vicinity of crash and burial sites. The function of this division

includes data analysis, automated data processing, photo interpretation of aerial photos of crash sites, crash/grave site identification of areas in which JCRC teams will operate, and the maintaining of casualty records or dossiers on those personnel who have been in a missing in action status at one time or another during the conflict.

The Operations Division directs activities in the areas of operations, plans and communications. It also has a Public Communications Branch which provides staff assistance in the development of public information programs in an effort to obtain additional information concerning crash and burial sites.

The major subordinate elements involved in the field operations are two control teams, one oriented toward operations in Vietnam and one toward Laos and Cambodia. These control teams provide command and control of casualty resolution field teams, each comprise of five men, and will have operational command of all special augmentation personnel needed to accomplish the mission. Each control team has the capability of launching, supporting, and extracting the field teams and provides for requisite air, communications, and logistics support.

The field teams which will search for crash or grave sites consist of an officer, a radio operator, a medic, an interviewer, and a general duty assistant to the officer in charge, who are all Special Forces Troops.

Special Forces personnel will be used because they are trained to operate harmoniously with indigenous peoples, familiar with jungle terrain and survival techniques, and are available for this humanitarian effort with minimum additional training. The field teams will be augmented, as required, by Air Force air crash investigators, ordnance demolition technicians provided to disarm unexploded ordnance and booby traps near crash sites, and by indigenous personnel who will assist in the search and on-site operations. The JCRC has 11 organic field teams, with an augmentation capability of 10 more teams from the 1st Special Forces Group on Okinawa and 16 teams from U.S. Special Forces assets in Thailand.

The Central Identification Laboratory, Thailand (CIL), located at Samae San, between U-tapao and Sattahip in Southeastern Thailand, about 80 miles from Bangkok, is under the operational command of the Joint Casualty Resolution Center. The CIL is organized into an identification laboratory and eight five-man recovery teams which will accompany the casualty resolution field teams.

The field teams will be deployed in various ways. They can be utilized as separate entities in the search operations for selected locations, or they can be deployed in a cluster arrangement. This concept visualizes a number of concurrent and consecutive crash/grave site operations located in one general area. This area would be in the vicinity of a forward operating base which ideally would be adjacent to an air strip that could accommodate arrival, resupply, and departure aircraft. The cluster concept provides a single area to concentrate on, allows for maximum advantage to be taken of predicted climatic and weather cycles, maximizes the use of helicopters by short but frequent missions to support several teams in one area, enhances the command, control, and communications support of a number of field teams from the central operating base, facilitates logistics and reduces the insertion problem of the special augmentation personnel (Explosive Ordnance Disposal [EOD], crash investigators, documentary photographers, and CIL recovery teams).

A review of the steps that would be involved in the recovery process follows. First, the Casualty Resolution Staff develops selected areas for search and investigation based on known crash and grave sites. The detailed planning and coordination effort using all available information culminates in an aerial search of the area, if authorized. This combined research will be followed by insertion of the forward operating base and later the field teams and special augmentation personnel. A detailed search and inspection will follow. The results of these missions will be carefully documented. Upon completion of the search and investigation process, the teams and forward operating base will be extracted. Remains that have been located will be flown to the CIL for identification.

After analysis and recording has been completed, a detailed report will be forwarded to the services to assist in final determination on status of the personnel. Identified remains will be returned to the United States for burial as desired by next of kin.

Mr. DOLE. Mr. President, I would hope that the North Vietnamese would carry out the agreement signed on January 27 with respect to the MIA's, even though they are not carrying out the agreement with reference to military operations in Cambodia.

But I would suggest, as I said before, that I am not attempting to restrict, in effect, the Eagleton amendment in regard to strictly military considerations. The amendment offered by me and by the Senator from North Carolina states:

"Provided, however, That these restrictions shall be of no force or effect if the President finds and forthwith so reports to the Congress that the Government of North Vietnam is not making an accounting, to the best of its ability, of all missing in action personnel of the United States in Southeast Asia, or is otherwise not complying with the provisions of article 8 of the agreement signed in Paris on January 27, 1973, and article 10 of the protocol to the agreement 'Concerning the Return of Captured Military Personnel and Foreign Civilians and Captured and Detained Vietnamese Civilian Personnel'."

That is all we suggest by this amendment. That is all we suggest, I might add, in the past 2, 3, or 4 years, with reference to POW's. We had about the same arguments for the same arguments against. No one questions that motives or patriotism of those who had a different view, but I stand here as one who has worked with families of MIA's and POW's. This is the least we can do.

Yes, we can say the North Vietnamese are going to permit us to do this and that, but what assurance do we have? What are the diplomatic sanctions referred to by the Senator from Missouri that we would impose?

I do not want the bombing of Cambodia to continue, either, but I do not want to take away from the President of the United States whether it is the present President or some other President—that leverage if the North Vietnamese turn their backs and say, "There will be no further investigation with reference to MIA's."

Having talked with some of the wives and some of the families of MIA's since January 27 of this year, I think it is fair to say that the great majority of these people, those directly involved, want to know the status of their sons or husbands. Are they dead or alive?

There was once a great hope that once the POW's came back and were debriefed, the status of many MIA's could be determined or changed, but, as I understand it, only 100

changes were made from "missing in action" to "killed in action."

I happen to believe that we owe the families of these Americans—of course they are not many; there are only 1,000—a quick accounting and a quick verification, so their status will be known.

I really cannot see that it does any great damage to the so-called Eagleton amendment to provide the President this leverage. First, the President must make a finding. Then he must make a report. And then, and only then, could he avoid the restrictions of the Eagleton amendment.

The POW's are home now, and the POW's, as I said, have been welcomed, and we all rejoice in their homecoming. We all are concerned about those who were killed in Southeast Asia, those who remain, and those who are hospitalized. And, yes, we are concerned about the MIA's, who have no voice at all, unless it comes from the Congress.

I am under no illusion. I do not expect this amendment to the Eagleton amendment to prevail. But I would hope those who read the RECORD and those who sit down next year or 20 years from now to read the RECORD, in the event the North Vietnamese do not carry out the agreement, will know there were those of us in the Senate who stood and let our views be known. Foreign Relations, entitled "U.S. Air Operations in Cambodia: April 1973."

On page 1, subparagraph (b) reads:

During the last two weeks in March, the U.S. Air Force had flown a daily average of 58 B-52 sorties, 30 F-111 sorties, 11 gunship sorties and 140 other tactical air sorties, more than two times the sortie rate before January 29.

In subparagraph (e), it states:

(e) Only 20 percent of the U.S. air strikes being flown were in support of Cambodian forces while 80 percent were directed at the interdiction of North Vietnamese lines of communication into South Vietnam.

Mr. President, I wish to reserve time for my colleague from North Carolina, but I want to conclude my statement by reading from a letter we sent to every Member of this body.

First, I ask unanimous consent that the entire letter be inserted in the RECORD, at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,

Washington, D.C., May 31, 1973.

DEAR COLLEAGUE: Today, more than four months since the Paris Peace Agreement on Vietnam was signed, some 1,300 Americans are still missing in Southeast Asia. In spite of specific provisions in Article 8 of the Agreement and its protocols for verification and information on missing men, the North Vietnamese have failed to allow inspection operations to be undertaken or to provide any information concerning the status or fate of these men.

We believe that the Senate must go on record for a clear accounting of all MIA's. We must have a full, complete, and detailed resolution of the status of each man insofar as possible. Every means of securing compliance in this respect must be available to the President. Yet the Eagleton Amendment to H.R. 7447, the Supplemental Appropriations bill, would severely limit the President's efforts to secure compliance.

Therefore, today, we intend to offer an amendment to suspend the restrictions of the Eagleton Amendment if the President finds and so reports to Congress that North Vietnam is not making an accounting as required under the Paris Agreement. Congress

needs to know if North Vietnam is not living up to the Paris Agreement; our amendment would encourage the President to keep Congress informed in this respect. At the same time, it would give the President the means to continue whatever pressure is necessary to resolve the status of the MIA's.

If you would care to join us as a co-sponsor, please contact us on the Floor, or call John Smith (ext. 6521) or Jim Lucier (ext. 6342).

Sincerely,

BOB DOLE,  
U.S. Senate.  
JESSE HELMS,  
U.S. Senate.

Mr. DOLE. Mr. President, let me read a part of that letter:

We believe that the Senate must go on record for a clear accounting of all MIA's. We must have a full, complete, and detailed resolution of the status of each man insofar as possible. Every means of securing compliance in this respect must be available to the President. Yet the Eagleton Amendment to H.R. 7447, the Supplemental Appropriations bill, would severely limit the President's efforts to secure compliance.

Mr. President, that is all we wish to do by offering this amendment. We wish to make certain that we preserve the President's right, the Commander in Chief's right, to make certain that those who are missing in action are properly accounted for.

The PRESIDING OFFICER. All of the Senator's time has expired.

Mr. EAGLETON. Mr. President, how much time remains to me?

The PRESIDING OFFICER. The Senator has 12 minutes remaining.

Mr. EAGLETON. I yield 6 minutes to the Senator from Montana.

Mr. MANSFIELD. Mr. President, if the amendment offered by the distinguished Senator from Kansas (Mr. DOLE) and the distinguished Senator from North Carolina (Mr. HELMS) is adopted, we can kiss the Eagleton-Brooke-McClellan amendment good-bye. The effect will be to nullify what the Senate Committee on Appropriations did without opposition and what the Senate itself, in effect, did by a vote of 55 to 21 on Tuesday last.

Under the amendment now being considered, the bombing in Cambodia could go on indefinitely, because I note from the news ticker this morning that "the United States is still identifying missing in action from World War II, a quarter-century ago, and it could take months—if not years—for the status of remaining Vietnam MIA's to be settled."

There is no person in this Chamber who is not interested—if not more interested—in the missing in action, just as we were interested in the release of the POW's, the return of the POW's, and the return of U.S. personnel in South Vietnam.

I think we ought to face up to the realities and recognize that our Government has created a joint committee which is now stationed, I believe, in Bangkok for the purpose of finding and identifying some 1,400 or 1,500 personnel still listed as missing in action.

As the distinguished senior Senator from Missouri said, it is a tragic irony that the Department of Defense carried no MIA's in Cambodia prior to the January 27 ceasefire agreement. Since that agreement, however, two Americans have been lost in bombing operations and are now listed as missing in action.

If Senators want to create more missing in action, let them vote to continue the bombing. If they want to acquiesce in the present

policy of the administration to continue the bombing, let them vote for this amendment. If they want to get out of Laos and Cambodia, and all of Southeast Asia, on a lock, stock, and barrel basis, they will see to it that the Eagleton-Brooke-McClellan amendment remains intact.

I have received 13 or 14 letters from men stationed at Utapao and Anderson Field in Guam.

Here is the last one:

DEAR MR. MANSFIELD: At long last, Congress is asserting itself in its opposition to American military involvement in Indochina. It is with deep interest that I have been watching the recent developments in the House and now in the Senate. I have a personal interest in such developments because I am a B-52 copilot currently stationed temporarily on Guam.

Of the several significant reasons which would justify an immediate halt to the bombing of Cambodia, the most significant is the questionable legality of the bombing. The reasoning behind the legality has thus far, at least, been flimsy.

In addition, the tremendous amount of fuel consumed by all of the B-52s in their daily missions contributes dramatically to the severe energy crisis being experienced in the United States. Utilization of B-52s alone, operating out of Guam and Thailand on bombing missions, use up approximately 2½ million gallons of fuel every day.

Also, a most serious concern is the possible loss of planes and men over Cambodia, thus resulting in additional prisoners being taken by the enemy.

The flight crews engaged in these operations are truly being utilized as mercenaries. Apparently all that is required for B-52s and the various other aircraft involved in these operations to conduct their missions is a request by a besieged government for such assistance. It is a frightening thought.

Mr. President, the only way to deal with this situation is to face up to our responsibility. The only way to do it effectively is to cut the purse strings. And that is what the Eagleton amendment does, because it locks off funds from any and all directions and any and all acts so that if the Congress speaks on this basis, it will mean that we will at long last—13 years too late—get out of Southeast Asia all the way. And, as far as the MIA's are concerned, this Government is making every effort, and will continue to do so, to attempt to identify them. But if we want more MIA's, we should vote for the pending amendment and we will get them, just as we are getting them now in Cambodia.

If we want quicker action as far as the MIA's are concerned, we should keep the Eagleton amendment intact.

The PRESIDING OFFICER. Who yields time?

Mr. EAGLETON. Mr. President, how much time remains?

The PRESIDING OFFICER. The Senator from Missouri has 4 minutes remaining.

Mr. EAGLETON. Mr. President, I will be very brief because I could not add to the excellent remarks which the distinguished majority leader has just made on this subject matter.

The Senator from Kansas (Mr. DOLE) said: "This is the least we can do," meaning the Dole-Helms amendment.

Mr. President, I say that this is the worst we could do insofar as this country is concerned. This gives the President the right to continue bombing as long as he sees fit, on and on and on, endlessly in a new area of warfare.

As the Senator from Montana said, this will not recover the MIA's, and, unquestionably, this will add to the MIA list.

I repeat, in summarizing the testimony being given today by the Assistance Secretary, the administration is in contact with the North Vietnamese, and the effort is going forward insofar as recovering and identifying the MIA's.

Insofar as the Dole amendment enhancing the possibility of peace, I point out that all it would do would be to involve us in another war, but this time it would be called the Cambodian War.

Mr. CHILES. Mr. President, will the Senator yield?

Mr. EAGLETON. I yield.

Mr. CHILES. Mr. President, I wonder if the Senator from Missouri or perhaps the Senator from Kansas could explain the meaning of the amendment to me. I am trying to understand the amendment.

The amendment says:

These restrictions shall be of no force or effect if the President finds and forthwith so reports to the Congress that the government of North Vietnam is not making an accounting, to the best of its ability, of all missing in action personnel of the United States in Southeast Asia.

That is the language as I read it. What I am trying to understand is, if this amendment is agreed to, would it not be to the advantage of North Vietnam to not make an effort, because if they did not make an effort, the restrictions would not be in effect.

Mr. DOLE. Mr. President, first there must be a finding by the President. Second, there must be a report to the Congress, and after the report is made, we could cut off the action just like that. If we did not cut it off, there would then be the bombing.

Mr. CHILES. Mr. President, would not the North Vietnamese want the restrictions not to be in effect?

Mr. DOLE. They want the Eagleton restrictions to be in effect, because then they could do anything.

All I am saying is that in this one rare instance, in this one small instance, we are talking about American MIA's. Some are from Florida, some from Kansas, and some from Missouri. In that one instance, where there is no effort made for an accounting, if the President so finds and reports to the Congress, we resume the bombing.

Mr. CHILES. Mr. President, it looks to me as this would in no way help the effort. It could confuse the effort, and I would not want to do that.

Mr. DOLE. Mr. President, I want to keep the pressure on.

The PRESIDING OFFICER. Who yields time?

Mr. EAGLETON. Mr. President, I yield back the remainder of my time.

Mr. PERCY. Mr. President, I think it is fair to say that my concern for the fate of Americans unaccounted for in Indochina is as great as any man's. I have supported every responsible effort to achieve the release of prisoners of war and a full accounting of those missing in action. I have conferred at length with the Department of Defense officials whose task is to find the missing Americans in Indochina, and I have told them that we will not be satisfied until the job is done.

However, at this time I cannot justify continued American air combat over Cambodia and Laos in an effort to put greater pressure on North Vietnam to release information about the missing in action. Passage of this amendment, I believe, would bring more American deaths, the taking of more American prisoners, and an increase in the number of Americans missing in action, for this would inevitably be the result of continued American participation in combat.

The PRESIDING OFFICER. All time has expired. The question is on agreeing to the amendment of the Senator from Kansas to the committee amendment. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS (after having voted in the affirmative). Mr. President, on this vote I have a pair with the Senator from Connecticut (Mr. Weicker). If he were present and voting, he would vote "nay"; if I were at liberty to vote, I would vote "yea." Therefore, I withdraw my vote.

Mr. ROBERT C. BYRD. I announce that the Senator from Nevada (Mr. Bible), the Senator from Nevada (Mr. Cannon), the Senator from Idaho (Mr. Church), the Senator from North Carolina (Mr. Ervin), the Senator from Connecticut (Mr. Ribicoff), the Senator from Georgia (Mr. Talmadge), and the Senator from Wyoming (Mr. McGee) are necessarily absent.

I further announce that Senator from Alabama (Mr. Allen), and the Senator from Colorado (Mr. Haskell) are absent on official business.

I also announce that the Senator from Mississippi (Mr. Stennis) is absent because of illness.

I further announce that the Senator from Maine (Mr. Muskie) is absent because of a death in the family.

I further announce that if present and voting, the Senator from Colorado (Mr. Haskell), the Senator from Idaho (Mr. Church), the Senator from Connecticut (Mr. Ribicoff), and the Senator from Nevada (Mr. Bible) would each vote "nay."

Mr. GRIFFIN. I announce that the Senator from Tennessee (Mr. Baker), the Senator from Utah (Mr. Bennett), the Senator from Colorado (Mr. Dominick), the Senator from Hawaii (Mr. Fong), and the Senator from Connecticut (Mr. Weicker) are necessarily absent.

The Senator from Arizona (Mr. Goldwater) is absent by leave of the Senate on official business.

The Senator from New Hampshire (Mr. Cotton) is absent because of illness in his family.

The pair of the Senator from Connecticut (Mr. Weicker) has been previously announced.

The result was announced—yeas 25, nays 56, as follows:

[No. 161 Leg.]

YEAS—25

Bartlett, Beall, Bellmon, Brock, Buckley, Curtis, Dole, Domenici, Eastland, Fannin, Griffin, Gurney.

Hansen, Helms, Hruska, Jackson, Long, McClure, Roth, Scott, Pa., Scott, Va., Sparkman, Taft, Thurmond, Tower.

NAYS—56

Abourezk, Aiken, Bayh, Bentsen, Biden, Brooke, Burdick, Byrd, Harry F., Jr., Byrd, Robert C., Case, Chiles, Clark, Cook, Cranston, Eagleton, Fulbright, Gravel, Hart.

Hartke, Hatfield, Hathaway, Hollings, Hudleston, Hughes, Humphrey, Inouye, Javits, Johnston, Kennedy, Magnuson, Mansfield, Mathias, McClellan, McGovern, McIntyre, Metcalf, Mondale.

Montoya, Moss, Nelson, Nunn, Packwood, Pastore, Pearson, Pell, Percy, Proxmire, Randolph, Saxbe, Schweiker, Stafford, Stevenson, Symington, Tunney, Williams, Young.

PRESENT AND GIVING A LIVE PAIR, AS PREVIOUSLY RECORDED—1

Stevens, for.

## NOT VOTING—18

Allen, Baker, Bennett, Bible, Cannon, Church, Cotton, Dominick, Ervin.

Fong, Goldwater, Haskell, McGee, Muskie, Ribicoff, Stennis, Talmadge, Weicker.

So Mr. Dole's amendment was rejected.

## PROTECTING WOMEN IS NOT A PARTISAN ISSUE

Mr. DOLE. Mr. President, the distinguished chairman of the Senate Judiciary Committee held a news conference last Friday to discuss the tragedy of violence against women.

I commend Senator BIDEN for his interest in this matter. No doubt about it, the statistics are very disturbing. A staggering 2.5 million national violent crimes are committed against women each year. In fact, according to the Senate Judiciary Committee, violent attacks by men are the No. 1 health risk to adult women in America today.

While I do not doubt Senator BIDEN's interest in this matter—or the concern of the media which ran a flurry of stories following the press conference—I would like to ask where have the media been for the past 2 years?

Mr. President, I ask unanimous consent to enter into the RECORD a detailed summary of how the Democrat leadership in Congress has consistently blocked sexual assault and victims rights provisions from becoming law.

I would urge the media to read this important document, and let me briefly summarize a few of the facts it contains.

No. 1. Congresswoman SUSAN MOLINARI and I introduced the Women's Equal Opportunity Act on February 21, 1991. This legislation is more pro-women and more anticriminal than any bill introduced by the Democrat leadership. Unfortunately, the Dole-Molinari bill has never received a hearing.

No. 2. The anticrime legislation President Bush proposed in March of 1991 contained many of the same sexual assault and victims rights provisions contained in the Dole-Molinari bill, and many of its provisions are tougher than those in Senator BIDEN's bill.

Unfortunately, the Senate Democrats would not allow the President's proposal to be used as the vehicle for the crime bill.

Not once in the past 2 years have the media come to me asking about my legislation combatting sexual assault, and not once did I see a story detailing the provisions in the President's legislation.

No. 3. Despite the lack of interest from Democrats or the media, Republicans in the House succeeded in attaching many of the sexual assault and victim's rights provisions to the crime bill which was eventually passed in the House.

They only did so, however, after the Democrats forced them to remove an amendment creating a general rule of admissibility in sexual assault and child molestation cases, of evidence

that the defendant has committed offenses of the same sort on other occasions.

No. 4. When the Democrat-controlled conference committee got hold of the House and Senate crime bills, they removed nearly every provision which got tough with those who assault women.

Some of the provisions which were removed—at the insistence of the Democrat-controlled committee—included:

A doubling of maximum penalties for recidivist sex offenders;

Authorization of restitution in sex offense cases, whether or not physical injury results; and HIV testing of defendants in sex offense cases with disclosure of test results to victims.

The incomprehensible removal of these provisions is one of the reasons I have opposed the conference report on the crime bill.

No. 5. Congresswoman MOLINARI and I are trying again, and last month, we introduced the Sexual Assault Prevention Act of 1992.

But again, the liberal Democrats in charge tell us they have problems with the bill. They have problems with authorizing the death penalty for murders committed by sex offenders. They still have problems with testing sex offenders for AIDS, and they have problems with letting evidence come in at trials that accused sex offenders or child molesters had committed offenses of the same type before.

In conclusion, Mr. President, let me just say that press releases and news conferences are nice—but they should not obscure the fact that if President Bush and Senate Republicans had their way, many of the proposals advanced by Senator BIDEN and trumpeted by the media—and some much tougher ones—would already have become law.

The summary follows:

## OBSTRUCTION OF SEXUAL VIOLENCE AND VICTIMS RIGHTS LEGISLATION BY THE DEMOCRATIC LEADERSHIP IN CONGRESS

The Dole-Molinari "Women's Equal Opportunity" bill (H.R. 1149 and S. 472) and the President's violent crime bill (H.R. 1400 and S. 635) contain a variety of important provisions to combat sexual violence and strengthen the rights of victims. These proposals have created a dilemma for the Democratic leadership in Congress: Supporting these measures would run counter to their usual identification with criminal defense interests. However, opposing them would mean being on the wrong side of anti-rape, pro-women measures.

The leadership's response has been to obstruct these provisions through procedural maneuvering, while avoiding the embarrassment of openly opposing them. The obstruction has taken place in the following stages:

## I. OBSTRUCTION IN THE HOUSE OF REPRESENTATIVES

The version of the House crime bill drafted by the Democratic leadership of the Judiciary Committee (the earliest version of H.R. 3371) contained *none* of the sexual violence and victims rights provisions from the Dole-Molinari bill and the President's bill. Rep-

resentative Sensenbrenner accordingly proposed an amendment to add these measures to the bill. The amendment included:

(1) A general rule of admissibility in sexual assault and child molestation cases for evidence that the defendant has committed offenses of the same sort on other occasions.

(2) Doubling of the maximum penalties for recidivist sex offenders.

(3) Broadened definition of "sexual act" for victims below the age of 16.

(4) Authorization of restitution for victims in all sexual assault and child molestation cases, whether or not physical injury results.

(5) HIV testing of defendants in sex offense cases with disclosure of test results to victims.

(6) Penalty enhancement for HIV positive sex offenders who risk infection of their victims.

(7) Government payment of the cost of HIV testing for victims of sexual assaults.

(8) Extension of restitution to include child care, transportation, and other expenses resulting to the victim from participation in the investigation or prosecution or attendance at proceedings.

(9) Authority for court to enforce restitution orders by suspending eligibility for federal grants, contracts, loans, and licenses.

(10) Giving victims of sexual assaults and other violent crimes the right to address the court concerning the sentence to be imposed.

(11) Protecting the victim's right to an impartial jury by equalizing at 6 the number of peremptory challenges accorded to the defense and the prosecution in jury selection.

Confronted with the Sensenbrenner amendment, the Democratic leadership of the Judiciary Committee made the following offer to Rep. Sensenbrenner: The amendment would be accepted, but only if he dropped the most important part of it—the prior-crimes evidence rule for sex offense cases (item 1) *supra*). Faced with the alternative of having the Democratic majority vote down the whole amendment, Rep. Sensenbrenner accepted this offer, and the amendment minus the prior-crimes evidence rule was adopted by the Judiciary Committee.

Following the Judiciary Committee leadership's successful move against the prior-crimes evidence rule in the context of the Committee's consideration of the general crime bill (original H.R. 3371), Rep. Sensenbrenner re-introduced the prior-crimes evidence rule as a separate bill (H.R. 3463). The Judiciary Committee leadership has never subsequently held hearings or taken any other action on this proposal.

When the general crime bill (original H.R. 3371) moved to the floor following the Committee action, Rep. Molinari proposed an amendment to restore the prior-crimes evidence rule provision. The Rules Committee allowed a large number of amendments to be proposed to the bill on the floor, including many dealing with relatively minor issues. However, it rejected Rep. Molinari's proposed amendment.

The outcome of the initial round in the House was that H.R. 3371 as originally passed included all of the measures in the Sensenbrenner amendment other than the prior-crimes evidence rule for sex offense cases. As a result of the cooperative obstruction by the Democratic leadership of the Judiciary Committee and the Rules Committee, the House of Representatives never had the opportunity to vote on the prior-crimes evidence rule, and the Democratic leaders who succeeded in burying it in the House never had to state their opposition openly.

## II. OBSTRUCTION IN THE SENATE

In March of 1991, the President transmitted his violent crime bill to Congress (S. 635 and

H.R. 1400), and challenged Congress to enact it within 100 days. Senator Biden hastened to offer his own "crime bill" in response (S. 618). Following the receipt of a letter from the Justice Department which pointed out gross deficiencies of content and formulation in S. 618—including the lack of anything comparable to the sexual violence and victims rights provisions of the President's bill—Senator Biden introduced a new bill (the original version of S. 1241).

The new Biden bill incorporated major portions of the President's bill, including virtually all of the firearms provisions and large parts of the terrorism title. However, none of the sexual violence and victims rights provisions of the President's bill were included.

The initial choice presented to the Senate was whether to use the President's bill (S. 635) or Biden's bill (S. 1241) as the basic vehicle for comprehensive anti-crime legislation. While many moderate and conservative Democrats preferred the provisions of the President's bill to the inadequate and regressive provisions of the Biden proposal, they were unwilling to cross their own leadership by voting for the President's bill as the basic vehicle. Following the Senate's vote to use S. 1241 as the vehicle, a number of important parts of the President's proposal were added or substituted for the corresponding Biden provisions through floor amendments. However, debate in the Senate closed off before amendments containing the sexual violence and victims rights provisions of the President's bill could be offered.

The outcome of the initial round in the Senate was that the Senate-passed bill (S. 1241) contained none of the President's provisions addressing sexual violence and victims rights. Like his counterparts in the House, Senator Biden was able to kill these provisions (at least for the time being) without having to oppose them openly.

### III. OBSTRUCTION AT THE CONFERENCE STAGE

Following passage of S. 1241 and H.R. 3371, a conference committee was convened on a Sunday afternoon near the end of the 1991 session. The committee was chaired by Rep. Brooks and Senator Biden.

The Democrats on the committee had unilaterally worked out their own "compromise" bill before the meeting which consistently incorporated measures from either bill that weakened existing law, and largely discarded the important pro-law enforcement measures of the House and Senate bills. This revised "crime bill" (the current version of H.R. 3371) was adopted by the conference through party-line votes. The Republican members of the committee were shut out of any role in the formulation of the bill.

The casualties of the Brooks-Biden conference's attack on the law enforcement provisions of the House and Senate bills included most of the sexual violence and victims rights provisions that the House had passed. Only two provisions were included in the conference bill: the broadened definition of "sexual act" for offenses against victims below the age of 16, and the victim's right to address the court concerning the sentence.

All of the other provisions originating in the Sensenbrenner amendment that the House had passed were excluded from the conference bill by the Brooks-Biden conference. The House-passed provisions in this area that were excluded from the conference bill included specifically: (1) doubled maximum penalties for recidivist sex offenders, (2) authorization of restitution in sex offense cases, whether or not physical injury results, (3) HIV testing of defendants in sex offense

cases with disclosure of test results to victims, (4) penalty enhancement for HIV positive sex offenders who risk infection of their victims, (5) government payment of the cost of HIV testing for victims of sexual assaults, (6) extension of restitution to include child care and other expenses of the victim resulting from participation in the case, (7) enforcement of restitution orders by suspension of certain benefits, and (8) protection of the victim's right to an impartial jury by equalizing defense and prosecution peremptory challenges.

The pseudo-crime bill adopted by the conference committee was rammed through the House of Representatives at the close of the 1991 session by the Democratic leadership (by a two vote margin), but failed to attract sufficient votes for cloture in the Senate. In the floor debate on the bill, several Members strongly objected to the deletion of the sexual violence and victims rights provisions of the House bill. See Cong. Rec. H11683 (remarks of Rep. Allen), H11683-84 (remarks of Rep. Molinari), H11684 (remarks of Rep. Sensenbrenner), H11746 (remarks of Rep. Hyde), H11750 (remarks of Rep. Harris). The sponsors of the conference bill failed to provide any explanation or justification for their decision to discard these provisions.

### IV. THE CURRENT STATE OF OBSTRUCTION

In March of 1992, Senator Thurmond introduced S. 2305 (the Thurmond-Gramm bill). Like the conference bill, S. 2305 is generally constructed from provisions that were passed in the separate House and Senate crime bills. However, the philosophy underlying the formulation of S. 2305 is directly opposite to that of the conference bill: S. 2305 excludes all provisions that weaken existing law, and includes the important pro-law enforcement provisions passed by either House.

In particular, S. 2305 includes (in title VII) all of the House-passed provisions of the Sensenbrenner amendment.

There have been several efforts by the sponsors of S. 2305 to secure votes on the bill in the Senate. In each case, the Democratic leadership has blocked a vote on S. 2305 and rejoined by holding a cloture vote on the conference bill.

The outcome of this final state of obstruction is that all avenues for advancing the sexual violence and victims rights proposals of the Dole-Molinari bill and the President's bill have been closed off. The Democratic leaderships of both Judiciary Committees have not held any hearings or taken any other action in relation to the original Dole-Molinari proposal, and they have blocked the President's bill by substituting their own pseudo-crime bills. The conference bill cannot be enacted because it is, in plain terms, pro-criminal, and in any event it was drafted to exclude almost all of the Bush-Dole-Molinari proposals. The Thurmond bill does contain most of these proposals, but it too has been blocked.

### V. CONCLUDING REMARKS ON THE DEMOCRATIC VIOLENCE AGAINST WOMEN BILL

The Members who have been responsible for obstructing the sexual violence and victims rights provisions of the Dole-Molinari bill and the President's bill may seek to excuse or justify their actions by claiming that they have their own proposal in this area: the proposed "Violence Against Women Act of 1991" (S. 15 and H.R. 1502), which is sponsored by Senator Biden and Rep. Boxer.

However, this explanation is untenable. The House Judiciary Committee has not reported H.R. 1502, and there has been no action on S. 15 in the Senate since it was re-

ported by the Senate Judiciary Committee in October 1991. More importantly, these bills contain nothing comparable to most aspects of the Bush-Dole-Molinari proposals.

The current Biden-Boxer proposals were formulated well after the introduction of the Bush-Dole-Molinari provisions: The Dole-Molinari bill was introduced as S. 472 on Feb. 21, 1991, and as H.R. 1149 on Feb. 27, 1991. The President's bill was initially introduced as S. 635 on March 13, 1991. In comparison, H.R. 1502 was introduced on March 20, 1991, and the current version of S. 15 was reported by the Senate Judiciary Committee on October 29, 1991.

The House and Senate versions of the Biden-Boxer bill contain provisions which are intended to strengthen certain aspects of restitution for victims of sexual assaults. S. 15 as reported (but not H.R. 1502) also includes the doubling of maximum penalties for recidivist sex offenders (§111) and the victim's right of allocution in sentencing (§164). However, there is nothing in the Biden-Boxer bills corresponding to any other part of the Dole-Molinari and President's provisions.

In particular, the Biden-Boxer proposal does not contain the following provisions: (1) the rule of admissibility in sex offense cases for evidence that the defendant has committed offenses of the same type on other occasions, (2) broadened definition of "sexual act" for victims below the age of 16, (3) HIV testing of sex offenders with disclosure of test result to victim, (4) penalty enhancement for HIV infected sex offenders who risk infection of the victim, (5) government payment of the cost of HIV testing for victims of sexual assaults, (6) explicit extension of restitution to include child care and other expenses to the victim resulting from participation in the case, (7) enforcement of restitution orders by suspension of benefits, and (8) protection of victims' right to impartial jury by equalizing peremptories.

### NUCLEAR TESTING

Mr. DURENBERGER. Mr. President, I rise to comment briefly on recent legislative actions regarding nuclear testing. In early August, I joined with all but 26 of my colleagues in supporting a version of the nuclear testing moratorium sponsored by my friend from Oregon, Senator HATFIELD.

Many of us had reservations about some specific aspects of the amendment, which we hoped would be worked out between Senators COHEN, HATFIELD, and MITCHELL before the DOD authorization bill came to the floor.

When the Senate returned to consideration of these issues during the debate on the DOD bill last month, Senator COHEN offered an amendment that, in my view, substantially improved upon the language that passed the Senate 1 month earlier.

Among other things, the Cohen language was more realistic regarding tests for safety and reliability purposes. These are the most compelling reasons for the United States to continue any testing at all—safety and reliability. We clearly don't need to develop new weapons, but safety and reliability are enduring concerns that don't go away just because the Berlin Wall came down.

Mr. President, I also believe that Senator COHEN's proposals more effectively linked a U.S. moratorium to other arms control and nuclear non-proliferation concerns. That's an area of particular concern and interest for this Senator.

I would note for the record, Mr. President, that my support for the Hatfield amendment in August did not stem from my opposition to nuclear testing just because it's nuclear testing. I do not believe that testing is bad per se. I do believe, however, that a testing moratorium can be effective if it's linked to broader objectives. That's exactly where Senator COHEN's version surpassed Senator HATFIELD's.

When the Senate voted in September, the parliamentary situation did not permit a vote explicitly on the Cohen proposal. It was clear, however, that the vote on the Hatfield second degree amendment was in essence a referendum on the Cohen version.

It is important to note for the record that Senator COHEN worked diligently to accommodate the concerns of Senators HATFIELD and MITCHELL, but that the differences could not be worked out and still remain within the parameters of nuclear safety that the experts believe to be imperative.

I voted against the Hatfield language not because I oppose a nuclear testing moratorium, but because I believed the Cohen proposal was stronger and more realistic, particularly regarding the need for limited continued testing for safety and reliability. The administration and other experts were particularly persuasive on these matters.

Now, according to recent press reports, we learn that in signing the energy and water appropriations bill, the administration traded off its concerns about nuclear testing in order to secure funding for the superconducting super collider. Having voted against the super collider and been persuaded by the considered judgment of nuclear experts on the safety and reliability arguments, I must admit to a certain disappointment that the administration took this position.

In any event, Mr. President, the Hatfield language is an important step forward, although I continue to believe that Senator COHEN's proposal would be much more effective.

Thank you, I yield the floor.

#### CARJACKING CRIMES ESCALATE

Mr. PRESSLER. Mr. President, over the past several weeks, I have made statements about the brutality of carjacking. It is a heinous and violent crime that risks the lives of motorists across the country. In efforts to combat this crime, I sponsored S. 2613 last April. This legislation was designed to increase the penalties for carjacking offenses and to offer other provisions aimed at deterring auto theft.

On September 26, I offered, as an amendment to the tax bill, H.R. 11, one provision from S. 2613 that would subject armed carjackers to severe criminal penalties. Unfortunately, during the conference report process, the conferees struck my amendment from the tax bill.

Since carjacking has emerged as a serious and escalating crime, it has generated significant media coverage. I ask unanimous consent to place an article that appeared on the front page of the Sunday, September 27, 1992, Washington Times and several other articles about carjacking in the RECORD immediately following my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Times]

#### SENATE VOTES LIFE FOR KILLER CARJACKERS

The Senate approved a measure yesterday that would make carjacking a federal crime punishable by up to life in prison if a death occurs.

The measure, approved without objection as an amendment to a pending \$34 billion tax bill, would subject carjackers who use firearms to at least 15 years in prison.

Sen. Larry Pressler, South Dakota Republican, who introduced the amendment, cited the recent case of a suburban Maryland woman who died after she became entangled in a seatbelt as her car was being highjacked.

Pam Basu was taking her 22-month-old adopted daughter, Sarina, to preschool Sept. 8 when she was attacked. The child was thrown, unharmed, to the pavement in her car seat. Mrs. Basu was dragged along the street for more than a mile.

Mr. Pressler called the carjacking in Savage, Md., "an act of unparalleled brutality." He said there had been four carjackings at gunpoint in Washington alone in May. The House has not taken up the measure.

His measure would subject carjackers to up to 25 years in prison if "serious bodily injury" occurs and to life in prison if someone is killed.

The measure also would double the sentence, to 10 years, for importing or exporting stolen cars and for trafficking in stolen vehicles.

Senate aides said they expected work on the overall tax bill to be finished yesterday, with a final vote on Tuesday.

The carjacking that led to the death of Pam Basu was the third attack against a female motorist that day by the two men accused in the killing, according to the grand jury indictment.

U.S. Attorney Jay Stevens and law enforcement officials from nine agencies on Sept. 16 pledged a regional effort against car thieves, and elected officials from four area jurisdictions agreed Friday to adopt uniform legislation and penalties to combat the growing number of carjackings.

The District has reported more than 200 carjackings this year, and Montgomery County more than 30.

Maryland Gov. William Donald Schaefer is preparing legislation to establish a minimum sentence of 15 years and make carjacking one of the aggravating factors in a homicide for which the death penalty could be sought.

D.C. Council member Harold Brazil has introduced emergency legislation that would

make carjacking punishable by a \$10,000 fine and up to 15 years in prison. Attempted carjacking would carry a \$1,000 fine and three years' imprisonment.

[From the Washington Post, Sept. 28, 1992]  
SENATE APPROVES STIFF PENALTIES FOR CARJACKING

Responding to an apparent increase in carjackings and to the death of a Maryland woman during one earlier this month, the Senate has approved a measure making carjacking a federal crime punishable by up to life in prison if a death occurs.

The measure, approved Saturday without objection as an amendment to a pending \$34 billion tax bill, subjects carjackers who use firearms to at least 15 years in prison.

Sen. Larry Pressler (R-S.D.), who introduced the amendment, cited the Sept. 8 death of Pamela Basu, 34, who was dragged along Howard County streets after she became entangled in a seat belt as her car was being stolen. Her toddler daughter was thrown from the car but was uninjured.

Pressler called the killing "an act of unparalleled brutality." He said there had been four carjackings at gunpoint in Washington alone in May. A computer analysis by The Washington Post found in August that at least 245 carjackings occurred in the region in the first seven months of this year—an average of slightly more than one a day.

Pressler's amendment subjects carjackers to up to 25 years in prison if "serious bodily injury" occurs.

[From the Rapid City (SD) Journal, Sept. 29, 1992]

#### PRESSLER INTRODUCES CARJACKING MEASURE (By Michelle Bisson)

WASHINGTON.—The federal government would join the hunt for carjackers under legislation introduced by Sen. Larry Pressler, R-S.D. and approved by the Senate Saturday.

The proposal, which was attached to a pending \$34 billion tax bill, would subject carjackers who use weapons to at least 15, and as many as 25 years in prison if "serious bodily injury" occurs.

Attention has focused on carjacking since a Maryland woman was dragged to her death earlier this month while her car was being stolen by an assailant who jumped into her car at a filling station. Her infant daughter was thrown from the car but was uninjured.

"Without stricter laws and tougher law enforcement innocent citizens will continue to be harassed by violent auto thieves," Pressler said.

Although there have been no reported carjackings in South Dakota, car theft is a problem everywhere, said Kristi Sommers, Pressler's press secretary. Pressler introduced the amendment, she said, because he is committed to getting violent crime under control. Sommers noted that as the rate of stolen cars goes up, car insurance rates rise nationwide.

The most recent national statistics indicate that a car is stolen somewhere in this country every 19 seconds, or 4,500 cars on a given day, said Nestor Michnyak, spokesman for the Federal Bureau of Investigation.

The FBI announced a national "Safe Streets Initiative" Sept. 15. Sixty-six task forces throughout the country will focus on what can be done to stop violent crime. No task force is slated for South Dakota, Michnyak said.

Car theft rates are relatively small in South Dakota compared to the rest of the United States, said Lt. Jeff Talbot of the South Dakota Highway Patrol.

"Tops, perhaps 120 cars are stolen each year and not recovered," he said.

But, while most of the attention surrounding carjacking has focused on the Washington area, South Dakota has its share of violent crime, said a spokesman for the Bureau of Alcohol, Tobacco, and Firearms.

Car theft and carjacking fall under federal jurisdiction, he said, when a car thief crosses state lines, or when kidnaping is involved, but there are always some gaps that new federal legislation seeks to fill, the spokesman said. Pressler's proposal would address the "most vicious segment" of this crime, he said, adding that the role of the bureau is to support state and local officers in fighting crime.

The tax bill which includes Pressler's amendment is expected to pass in the Senate and go to a joint Senate-House Conference committee later this week, but is likely to be vetoed by President Bush, according to a House press secretary.

[From the Fairfax Journal, Sept. 21, 1992]

COMMITTEE AMENDS CAR THEFT MEASURE  
(By Matt Yancey)

WASHINGTON.—Armed carjackings would become a federal crime under a bill that cleared a key congressional hurdle Thursday. But it was bruised in the process, its author said.

At the behest of the auto industry, the House Energy and Commerce Committee amended an anti-car theft bill to exempt most American models from a requirement to carry the vehicle's identification number on all major parts.

Even thieves' most popular models would not have to carry vehicle identification numbers on major parts if they come off the assembly line equipped with anti-theft devices that, ironically, some law enforcement officials blame for the increase in carjackings.

The bill's author, Rep. Charles Schumer, D-N.Y., accused the panel's chairman, Rep. John Dingell, D-Mich., of gutting the major provision to stop trafficking in stolen auto parts because of manufacturers' objections that it would add \$5 to \$7 to the cost of a car.

"This amendment creates a loophole big enough to drive a stolen Mack truck through," Schumer said, vowing to fight the issue when the bill reaches the House floor later this month. "The Big Three [auto companies] are trying to strip this bill the way chop shops strip stolen cars."

Dingell and other members of the committee said there is no conclusive evidence that stamping the ID numbers on major parts of theft-prone models, called for under a 1984 law, has deterred auto thefts.

But the amended bill does extend the parts identification requirement to light trucks, vans and specialty vehicles, which have swelled in popularity among thieves.

"It does not cover all vehicles because a large number of vehicles are simply not candidates for theft," Dingell said. "There is a real danger to small business in drafting the wrong kind of legislation on this with no significant advantages in terms of law enforcement."

Currently, only about 40 American "high-theft" models are required to carry vehicle identification numbers on 14 major parts, including transmissions, doors, deck lids, front fenders, bumpers, grills and hoods.

Schumer's bill would add windows and require every new car to have the 15 parts marked. Repair shops selling or installing used parts on a car would be required to call a toll-free number and check the identification numbers on the parts against an FBI database of stolen vehicle numbers.

Dingell's committee also amended Schumer's bill to increase his proposed punishment for an armed carjacking to 25 years in prison if it results in a serious injury or death. Schumer's bill set a maximum 15-year penalty for carjacking.

Similar legislation has been introduced in the Senate by Sen. Larry Pressler, R-S.D. A wave of carjackings in the Washington area in the last two weeks resulting in two deaths has added an impetus to get a bill on President Bush's desk before Congress adjourns early next month.

[From the Washington Times, Sept. 30, 1992]

SENATE GETS TOUGH ON CARJACKING

The Senate voted yesterday to make armed hijacking of a car a federal crime punishable by a 15-year prison term. A hijacking involving a firearm and resulting in the death of an innocent person could result in a life sentence. Trafficking in stolen cars would be punishable by five to 10 years in prison.

The legislation was approved as part of a catchall tax bill passed by the Senate. Similar legislation is pending in the House but there is a dispute over details.

Police say the increasing use of sophisticated car security devices has frustrated thieves to the extent that they find it easier to take cars at gunpoint.

AUTO INDUSTRY FEARS FAST-TRACK  
CARJACKING BILL

(By Caren Bohan)

WASHINGTON.—A bill to crack down on car theft is speeding through Congress in the wake of rising car thefts nationwide and a recent spate of violent "carjackings," particularly in the Washington area.

But auto industry representatives are pleading with lawmakers to put the brakes on the bill, which they say would hurt their livelihood and cost consumers up to \$225 million.

The proposed Anti-Car Theft Act of 1992 would toughen penalties for car theft, establish carjacking as a federal crime and set up a national clearinghouse to track used car parts.

After laying dormant for nearly a year, the bill is gaining momentum following a series of Washington-area carjackings last week.

The most notorious of these resulted in the death of a woman who was dragged on the pavement for a mile-and-a-half with her arm stuck in her car door. The thieves allegedly sped off with her infant daughter in the front seat.

Many proponents of the legislation expect Congress to pass the bill before it adjourns in October, and opponents in the auto industry fear it may be too late to make changes they want.

What irks them are provisions to establish the stolen parts clearinghouse.

"These provisions contain record-keeping and reporting requirements which could force the closing of hundreds of small automotive recycling businesses," James Watson, vice president of the Automotive Dismantlers and Recyclers Association, told a congressional committee last week.

The association represents shops that dismantle used cars and sell the parts.

The bill would require carmakers to inscribe an identification number on all major parts. That requirement expands a 1984 law that requires the identification of certain parts only for high-theft cars.

Before selling a used part, dealers would have to register the part via telephone with

an FBI service. The service would then check to see if the part belonged to a stolen car and would issue a certificate if it were legitimate.

The automotive dismantlers were joined in their opposition by the Motor Vehicle Manufacturers Association, which object to the parts labeling requirements.

Mike Stanton, a manufacturers lobbyist, estimated the provision would add up to \$10 to the cost of a new car. Other estimates have placed the cost at \$6 per car.

Stanton said money was not the only issue. "One question goes more to the issue of whether the money would be wisely spent," said Stanton, who questioned whether the parts provision would deter car thefts. He cited a federal Department of Transportation report that found no conclusive evidence that the 1984 car-labeling provision deterred theft.

Ann Waltner, an aide to South Dakota Sen. Larry Pressler, who introduced the Senate version of the bill, said the labeling requirements, combined with other provisions, should deter theft.

"The chances of being caught would be greater, and once you are caught, you'll face a higher penalty. It should serve as a deterrent," she said.

Waltner said there were still some issues to be ironed out in a Senate Judiciary Committee hearing expected to be held in the next few weeks.

The National Automobile Dealers Association is concerned about a provision that would require used car dealers to check each car part to make sure it is correctly labeled.

"It's ridiculous. It's going to raise the price of used cars," said association lobbyist Tom Green. "But it's on such a fast track because of the carjackings, people will be very hesitant to make any changes in the bill"

SENATE MAKES ARMED AUTO THEFT FEDERAL  
CRIME

WASHINGTON.—The armed hijacking of a car would be a federal crime punishable by a 15-year prison term under a bill approved by the Senate.

A hijacking involving a firearm and resulting in the death of an innocent person could result in a life sentence. Trafficking in stolen cars would be punishable by 5 to 10 years in prison.

The legislation was approved Tuesday as part of a catchall tax bill passed by the Senate. Similar legislation is pending in the House but there is a dispute over details.

Sen. Larry Pressler, R-S.D., offered the amendment as a result of a car hijacking that resulted in the death of a woman in a Washington suburb this month. She was dragged to death when an arm became entangled in a seat belt after thieves forced her out of the car carrying her baby.

Police say the increasing use of sophisticated car security devices has frustrated thieves to the extent that they find it easier to take cars at gunpoint.

"Today's criminal can just point a weapon and take a car, without the hassle of breaking the windows or popping the ignition," Pressler said. "Auto theft is a lucrative professional business. The public is sick and tired of paying the high price of criminal activities."

[From the Los Angeles (CA) Times, Oct. 4, 1992]

CARJACKERS FOUND TO BE YOUNG, VIOLENT  
HAVE NOTS SEEKING STATUS

(By Sonya Ross)

WASHINGTON.—Anyone willing to steal a car at gunpoint is probably young, urban, violent and hungry for status.

These carjackers also are likely to have been victims themselves of great personal violence, the experts add.

"They kind of treat the victim the way they feel about themselves," said Jerome Miller, president of the National Center on Institutions and Alternatives in Alexandria, VA., which conducts research for groups advocating reform in the criminal justice system.

Amid calls for FBI crackdowns and longer jail terms for carjacking—taking a vehicle by force, while the driver is still in it—sociologists and criminal justice officials are seeking causes for this trend toward deadly car theft.

They say carjacking is a crime of havens spawned by a broken-down criminal justice system that can neither contain nor help them.

Most youths who steal cars are seeking status in the criminal subculture, said Andrew Ruotolo, a New Jersey prosecutor who works with the state's anti-car theft task force.

Ruotolo said carjackings are a very small percentage of all auto theft cases the task force handles. Carjackers, he said, are the most extreme car thieves, often repeat offenders who don't want to be spotted driving in a car that appears to have been broken into.

"Carjacking is a crime of violence, certainly no different than armed robbery. By its nature you get the car intact and you get the keys. You get to keep it a little longer before it's obvious it's stolen," he said. "Our experience is cars are stolen by young adults and juveniles to commit other crimes in. So, more often than not, you're dealing with a violent offender when dealing with a car thief."

In the eight months that the task force has operated in two New Jersey counties, officers have arrested more than 250 people for stealing cars, the bulk of them juveniles on joy rides. The task force recovered an estimated \$2 million in cars, about 70% of which had little or no damage. Officials could not estimate how many of these cases were carjackings.

About 80% of those arrested had prior criminal records, often involving car theft, Ruotolo said. Sometimes, they boldly crashed stolen cars into police vehicles to taunt officers.

The Senate voted Tuesday to make armed hijacking of a car a federal crime punishable by a 15-year prison term.

A hijacking involving a firearm and resulting in the death of an innocent person could result in a life sentence. Trafficking in stolen cars would be punishable by 5 to 10 years in prison.

The legislation was approved as part of a catchall tax bill passed by the Senate. Similar legislation is pending in the House, but there is a dispute over details.

Sen. Larry Pressler (R-S.D.) offered the amendment as a result of a car hijacking that resulted in the death of a woman in a Washington suburb last month. She was dragged to death when an arm became entangled in a seat belt after thieves forced her out of the car carrying her baby.

According to FBI statistics, more than 1.7 million vehicles were stolen in 1991. That's an average of one theft every 19 seconds.

The FBI also cited a 97% increase in the number of youth under 18 arrested for car theft during the last 10 years, from 32,195 in 1982 to 63,389 last year.

There are no breakdowns on the number of carjackings nationally, although the crime

has been a problem in Newark, N.J., New York City, Los Angeles, Miami and Detroit. A computer study by The Washington Post showed at least 245 carjackings in the Washington area between Jan. 1 and Aug. 16.

At least seven people have been killed in carjackings in the Washington area. In the case cited by Pressler, Pamela Basu was dragged to her death when she became entangled in a seat belt after two men took over her car at a stop sign and sped away. Her 2-year-old daughter was deposited unharmed by the roadside.

Police arrested two suspects, Rodney Eugene Solomon, 27, and Bernard Eric Miller, 16, and charged them both with murder, kidnapping and robbery. Miller's mother said her son told her he and Solomon smoked PCP in the hours before their arrest.

Other carjackings in and around the District of Columbia involved two girls, 14 and 15, armed with a semiautomatic pistol, who stole a car from a man and went on a joy ride; and an 18-year-old high school football star was killed while trying to hijack an off-duty FBI agent's car.

The Basu case prompted calls for widespread police crackdowns, longer prison terms and tough new laws against carjackings.

#### THE ROLE OF THE COOPERATIVE EXTENSION SERVICE

Mr. PRESSLER. Mr. President, the Cooperative Extension Service is one of the Federal Government's most productive programs. Established in 1914 by the Smith-Lever Act, the CES has been serving the needs of Americans for over 75 years. The U.S. Department of Agriculture works closely with each State's land-grant university to provide a variety of educational services to millions of Americans. CES funding comes from Federal, State and local resources.

One of the greatest strengths of the Cooperative Extension Service is its one-on-one assistance. An individual, with almost any problem, can contact a CES office and receive factual information to help resolve the matter. These offices, located in most county seats, provide the latest research information in three general categories: agriculture, home economics, and youth. This information, often in pamphlet form or on video tape, is usually free of charge.

As we all know, Mr. President, not all communities have the same needs. The Cooperative Extension Service recognizes this reality. Therefore, it tailors educational programming to the specific needs of a community. This tailoring, along with the individualized service, has had a significant impact on the lives of many citizens and will continue to do so in the future.

Let me give you an example of this type of targeted programming from my home State of South Dakota. The Cooperative Extension Service, in conjunction with the Soil Conservation Service, Bureau of Indian Affairs, and South Dakota Adult Farm Management has an educational program

known as Bootstraps. This is a management program designed for farmers and ranchers. Twenty-six families in Todd and Mellette Counties participate in Bootstraps.

One couple, Bill and Chris Hutchison, are ranchers from White River, SD. Chris said, "We get something out of every meeting. It lets us clearly see what we need to do and where we need to go. It's better than college for hands-on information."

The South Dakota Cooperative Extension Service has been serving South Dakotans in programs like this for over 76 years. All 66 counties in South Dakota are served under the administrative supervision of South Dakota State University [SDSU].

Many other programs are related to agricultural operations in South Dakota. Professionals, known as Extension Agents, are available in each county to assist individuals with everything from weed control to proper animal nutrition. In addition, seminars on specialized topics are offered throughout the State. Guest speakers include Extension Specialists from SDSU, as well as industry experts.

The beef production seminar is a typical example of this type of programming. Through this program, many cattlemen in my State have an opportunity to learn the latest developments in their industry. Without these seminars, many cattlemen would go without the new cost-cutting or labor-saving procedures that are very essential in operating a profitable business.

In the home economics programming areas, the Cooperative Extension Service concentrates its efforts on improving the lives of American families. CES provides factual information and training in every area affecting the family—from diet and nutrition to clothing purchase and care.

The Expanded Food and Nutrition Education Program [EFNEP] is a program designed to help low-income families. EFNEP teaches family members proper food budgeting, nutritional information, and meal planning in individualized sessions. This program is especially helpful to single parent families living on a fixed income.

Here is a typical EFNEP success story. A few years ago, Cindy, a single parent with three small children, began taking EFNEP classes to improve the nutrition of her family. As a result of this program, Cindy improved her meal planning skills. She learned to divide her monthly food stamp allotment, budgeting her resources more wisely. Throughout the EFNEP program, Cindy gained skills and self-confidence to take control of her life. Just recently, with encouragement from the EFNEP staff, Cindy completed her licensed practical nurse [LPN] degree and is no longer dependent on food stamps to feed her family. Many other South Dakota low-income families

have been assisted through this valuable program.

Another major part of the Cooperative Extension Service is the 4-H program. The 4-H program is an educational program for all youth between the ages of 8-19, and it teaches young people a variety of life skills, often under volunteer leadership. Skills and attitudes learned while participating in the 4-H program help individuals become productive members of society. As a result of international cooperation among many countries, 4-H also is contributing to world understanding.

As a past 4-H member, I know the value of the 4-H program and how much influence it has. Our children need positive role models. These are available in the 4-H program. Eighteen thousand South Dakota youth are enrolled in the 4-H program.

Mr. President, one misconception that people have about 4-H is that it is only for farm youth. Although 50 percent of all farm youth participate in 4-H, farm youth membership only accounts for 12 percent of total 4-H membership nationwide. Every year more programs are being implemented for urban youth.

For instance, Latch Key is an after-school program intended to fill the time gap between school and home. Participants have a safe, interesting place to go. Latch Key educates children about health after school snacks and provides safety tips to children who go home to an empty house.

Although the professional extension agents are vital to the success of the Cooperative Extension Service programs, volunteers also deserve much of the credit. Across the Nation, 2.9 million volunteers offer their time to 48 million adults and youth every year. Mr. President, the value of services provided by volunteers is 5 times greater than the combined Federal, State, and local contribution.

As more citizens throughout the United States utilize the services of the Cooperative Extension Service, Congress needs to keep funding at adequate levels. In my home State, CES has expanded from serving only one Indian reservation—Cheyenne River Sioux—to serving the Rosebud Sioux and Oglala Sioux as well. Drug abuse, alcoholism, and teenage pregnancy are very serious problems on Indian reservations. The Cooperative Extension Service, through the 4-H program, is working to solve some of these social problems.

In conclusion, Mr. President, I wish to thank the many professionals and volunteers who have had a positive impact on the lives of so many thousands of Americans. This program continues to set an exemplary example of the value of education.

#### HEALTH CARE REFORM

Mr. COHEN. Mr. President, as we count down the final hours of the 102d Congress, I rise to express my disappointment that presidential politics and partisan gridlock have precluded us from moving forward on comprehensive health care reform in this country.

We knew at the start of the Congress that the task of finding a solution to the Nation's health care problems would be quite difficult. The events of the past 2 years have shown just how difficult. We have taken some small steps toward our goal, but much more remains to be done.

By now, we have all grasped the nature and magnitude of the problems plaguing our Nation's health care system. Hundreds of expert witnesses have given testimony before dozens of congressional committees. We have read the reports of the Pepper Commission and the Steelman Commission, not to mention the countless studies done by the Congressional Budget Office, the General Accounting Office, the Office of Technology Assessment, and any number of private think tanks and special interest groups. We all agree that we are spending too much, that we are not spending wisely, and that too many people do not have access to the health care they need.

The mind-numbing statistics on rising health care costs are all too familiar and have been cited so often in recent months that we are at risk of seeming immune to their impact. Health care spending is expected to top \$800 billion this year—a record 14 percent of our Gross National Product. If health care spending continues unchecked, it will climb to \$1.6 trillion by the year 2000, or 16 percent of GNP.

Clearly this growth in costs cannot be sustained. As health care spending consumes a larger and larger share of our economy, fewer and fewer dollars will be left for crucial services such as education, transportation, and housing, and for reduction of the national debt.

The problem is not simply that we are spending too much. It is that we are not getting a sufficient return on our investment. Too many dollars are going for procedures of arguable or negligible value. Too few are being spent on primary and preventive services, such as prenatal care childhood immunizations.

Rising health care costs have also created a dual system of care. The American health care system is the best in the world—but only for those who can afford it. The very factors that make it the best—the scientific, medical and technological advances; the highly trained specialists; the up-to-the-minute facilities and equipment—make it the most expensive. And, as expenditures climb, access declines.

Paradoxically, at a time when health care spending is soaring, more and

more Americans are being priced out of the market. As many as 37 million Americans—alarmingly, almost a third of them children—have no health insurance at all. Many more Americans are underinsured. And still more live in constant fear that they will lose their coverage should they become ill or change jobs.

I first introduced comprehensive health care reform legislation over 2 years ago. The legislation built upon our existing public-private health care partnership to make affordable basic health care services available for all Americans. The legislation was comprised of five major components designed to:

First, institute insurance market reforms to eliminate existing barriers to coverage and special tax incentives to make health insurance more accessible, affordable, and predictable for both individuals and small businesses;

Second, make health care services more available for rural Americans;

Third, reduce health care costs;

Fourth, provide for medical liability reform and expanded outcomes research to develop treatment practice guidelines and national standards of care;

And fifth, increase access to coverage for long-term care.

Many elements of my original proposal were later incorporated into S. 1936, the Health Equity and Access Improvement Act, which I introduced with my colleagues on the Republican Health Care Task Force, and into the administration's health care reform proposal.

In fact, more than 20 different health care plans have been introduced in the Senate alone, and there is no shortage of options from which to choose. Some plans call for the adoption of a single-payer health care system, like Canada's. Others mandate that employers either provide coverage directly or pay into a public insurance fund—the so-called play or pay proposals. Some would set national spending limits—or global budgets—for health care. And still others, like my health care bill, the Republican Health Care Task Force bill, and the chairman of the Senate Finance Committee's bill, would build upon our current employer-based system by offering financial incentives to broaden access to care.

While there are obvious differences in opinion on the direction comprehensive health care reform should take, there is much more agreement than is generally acknowledged on the steps we must take to get there.

For instance, of the Nation's 37 million uninsured, 20 million work or are dependents of people who work for companies with fewer than 100 employees. Both Republicans and Democrats agree that the creation of health insurance networks would make it easier for these small businesses to purchase in-

insurance, and insurance market reform would make insurance more available, affordable, and predictable for small businesses and their employees.

Ironically, the very people who need care most are the ones who cannot get insurance and are therefore excluded from the system. Insurance companies must stop competing with each other about whom to exclude and start concentrating on how to make affordable coverage available for all Americans.

Further, it is estimated that as many as one-quarter of the uninsured lack coverage because they have been priced out of the market by increases in state-mandated benefit laws. Most of us agree that it is time to preempt the more than 800 specific State-mandated benefits in order to make an affordable, basic benefit package emphasizing primary and preventive care, available to small businesses and individuals.

Most of us also agree that it is time to make insurance more affordable for self-employed individuals and their families by granting them the same tax benefits currently granted to big business.

We all know that insurance coverage alone will not guarantee access to care. Expanding the National Health Service Corps will help to increase the number of providers in medically underserved areas. Increasing funding for community health centers, which provide comprehensive health services to millions of Americans who need care regardless of their ability to pay, will also help to increase access to care in rural and inner-city areas.

We all agree that we could reduce administrative costs by as much as \$100 billion a year by replacing the more than 1,100 insurance forms that clog the system, with a simplified, standardized electronic claims processing system.

We also agree that increased funding should be provided for outcomes research to establish which drugs and procedures are most effective under which circumstances to improve quality of care and eliminate the costly practice of defensive medicine.

Most of us also agree that it is time to reform a medical liability system which spends more on legal overhead than on compensating victims and which adds an estimated \$21 billion a year to our Nation's health care bill.

Most of us are also concerned about the proliferation of expensive medical gadgetry and high-tech machinery that has contributed to an equally dazzling explosion in health care expenditures. These services can be delivered more efficiently and cost-effectively by encouraging hospitals and other providers to share expensive medical equipment or services.

Finally, we all know that health insurance alone will not insure good health. The best health care system in

the world will not protect a smoker from the ravages of lung cancer and emphysema; it will not protect the driver who refuses to wear a seat belt and it can do nothing to improve infant mortality if women persist in smoking, drinking, or abusing drugs during pregnancy. Americans must be encouraged to engage in healthy behavior and to accept more responsibility for their physical well-being.

These are all significant reforms that will take us closer to our goal of ensuring access to affordable health care for all Americans. Furthermore, they should have been achievable this year. They were part of my health care bill, the Republican Task Force bill, the Mitchell-Rockefeller proposal, and the Bentsen bill. They were included in a number of House proposals and have also been endorsed by the administration.

In fact, most have passed the Senate, not once, but twice—most recently, as an amendment to the urban aid/tax bill. Unfortunately, they were dropped in conference.

Opponents argued that they were not comprehensive enough, and that anything short of truly comprehensive reform simply would not do. I would argue that these reforms not only would have taken increased access to affordable health care for millions of Americans, but that their enactment also would have laid a foundation upon which we could build more comprehensive reform in the future.

While I concede that more should be done, particularly in the area of cost control, the problem is that even the proponents of so-called comprehensive reform can't agree on what form that plan should take, whether it should be single-payer, play or pay, employer mandates, global budgets, or managed competition. None of these plans has, as yet, generated sufficient support to pass.

Further, most of these plans have focused only on the problem of access to acute care services. Despite the fact that the long-term care is the major cause of catastrophic expense for our Nation's elderly, we still do not have, either in the public or private sector, satisfactory ways to help people anticipate and pay for long-term care. Any truly comprehensive proposal for health care reform must address our nation's critical need for long-term care.

I also believe that any comprehensive health care reform proposal must address the problem of skyrocketing prescription drug costs. Prescription drug price inflation for the first half of 1991 more than tripled the general inflation rate, and drug prices have risen a full 152 percent in the last decade.

High drug prices are especially devastating for senior citizens, since Medicare does not cover outpatient prescription drugs. In fact, the Congress-

sional Budget Office recently concluded that a full 60 percent of Medicare beneficiaries face potentially devastating out-of-pocket medical expenses, either because they have no Medigap coverage, or because their policies do not cover prescription drugs.

These tremendous price increases and profits of the drug companies are unacceptable in light of the fact that the Federal Government is lining the pockets of the drug companies with \$2 billion annually in tax subsidies at the same time the companies are charging these inflated prices. The \$2 billion tax subsidy is in addition to the hundreds of millions of dollars in tax credits that the drug companies receive for researching and developing new pharmaceutical products.

Legislation I introduced earlier this year with my colleague, Senator PRYOR, would take a bite out of drug companies' profits by reducing a portion of the companies' nonresearch tax subsidies if they increase their prices beyond the general inflation rate. Some of the savings from the reduced tax credits would be funneled into a new prescription drug trust fund which would finance 15 demonstration projects providing outpatient prescription drugs to Medicare beneficiaries.

Mr. President, the American people say that they want universal coverage for the full range of acute and long-term care services, but they do not necessarily want to pay for it. Similarly, while many Americans say that they want a national health plan, they don't want the Federal Government to run it or to make their health care decision for them. And, while the public wants us to bring down costs, it does not want to sacrifice access to expensive new technology on demand.

While the various interest groups want change, they can't agree on the kind of change they want, even among themselves. The AFL-CIO is split—some unions would prefer national health insurance, while others would prefer some kind of employer mandate. The business community is split, with many large corporations preferring play or pay, while small businesses contend that such a mandate would force them to lay off workers, reduce wages, or close their doors. The medical community is split on the issue of national spending limits, and even the Democratic presidential ticket is split, with the Vice-Presidential candidate speaking out in favor of a single-payer plan and the candidate for President adopting the mantle of employer mandates and managed competition.

Total restructuring of our health care system is doomed to failure without a consensus. That is the one great political lesson that we all should have learned from our experience with the catastrophic health care bill a few years ago. But we still do not have a

consensus on comprehensive health care reform. Not in the House, not in the Senate, not among the Presidential candidates, and not among the American people.

That is the challenge facing whoever is elected President in November. That is the challenge that will face the new Congress. And that is the challenge facing the American people.

#### DELUGE OF TEXTILE IMPORTS

Mr. HELMS. Mr. President, on May 6, I paid my sincere respects to the Honorable Carol Hallet, U.S. Commissioner of Customs, a remarkable lady who had earlier promised to me that she would investigate the deluge of textile imports flowing into the United States from Communist China.

We had discussed in detail the widely held suspicion that the Chinese were willfully violating the tariff and quota laws that forbid such trade practices.

Commissioner Hallett came to my office last year to discuss my serious concern about the unlawful flood of textiles coming into the United States from Communist China. I recall her concluding remark: "Senator, I give you my word. We are going to get to the bottom of this."

Mr. President, on May 6 she called to report that indictments for fraud were being filed against Chinese companies and their American subsidiaries. At the time, I speculated that the Chinese Government was an apparently willing and knowing accomplice to substantial fraudulent activity, to which various lobbyist and others said, "Oh that couldn't be true; the Chinese Government couldn't be involved in such fraud."

Well, Mr. President, Monday I received another call, informing me that charges were being filed in Federal court in New York against the Chinese Government agency.

The United States attorney explained that a major Chinese governmental entity was indicted for fraud. The Chinese entity in question is called China National Textile Import and Export Corp., which is a quasi-governmental agency that is in charge of all imports and exports of textile and apparel goods.

These latest indictments strongly indicate that the Chinese Government is in fact involved in a scheme to evade United States laws and to avoid paying millions of dollars in duties on textiles and clothing imported into the United States.

Mr. President, this reinforces my long-held conclusion that the Communist Chinese will lie and cheat and use every underhanded trick in the book to defraud the United States. But this time, they got caught.

Mr. President, the Red Chinese activity exposed today defrauded the U.S. Government of tens of millions of dol-

lars. More importantly, it destroyed thousands of American jobs. Industry experts estimate that as many as 500,000 U.S. jobs may have been lost.

The Red Chinese doubling-dealing operated in two parts: One part of the operation involved the misclassification of textile imports so as to evade United States quota laws, thereby allowing more Chinese textile and apparel imports to flood our market.

The second part of the scheme involves a deliberate understating of the value of the textiles, again defrauding the United States of tens of millions of dollars. This is no doubt just the tip of the iceberg.

Mr. President, again I commend the Customs Service and Commissioner Hallet. As I stated at the outset, I have been working with her for quite awhile. It is certainly encouraging that the Customs Service has pursued Chinese perpetrators so relentlessly.

#### SENATOR TIM WIRTH

Mr. METZENBAUM. Mr. President, our distinguished colleague from Colorado, TIM WIRTH, will be leaving the Senate at the end of this Congress.

We will miss him here in the Senate, and the people of Colorado will certainly miss him.

During his Senate term, TIM has been unafraid of the rough and tumble necessary to make things work here.

At times, we have stood shoulder to shoulder in the fight. And other times we have found ourselves on opposite sides.

Either way, the Senator from Colorado has been fair and willing to work out solutions.

We have worked together extensively to help clean up one of the worst messes in the history of this country—the S&L crisis.

TIM came to the Senate after a long career in the House, and one of his hallmarks has been a passionate commitment to the environmental issues that affect his great State and our Nation.

He is a leader on issues of conservation, global warming, and fuel efficiency.

As many of us committed to preserving the environment know, it is never easy to keep the drills and bulldozers away.

For generations to come, residents and visitors to Colorado will be able to enjoy the State's remarkable wilderness areas. TIM WIRTH was a leader in the fight to preserve them.

When he was a schoolteacher TIM educated his students. And he learned some valuable lessons. He knows what it takes to run a good school. He understands the tools teachers need to do their jobs. The experience and commitment to education is something he has carried with him to the Senate.

I don't think you can say TIM is actually retiring. I suspect that he and his wife Wren will be as active and busy working on the important issues facing this country as they always have been.

#### SOME PEOPLE JUST DON'T UNDERSTAND

Mr. ROCKEFELLER. Mr. President, on Wednesday, September 30, with several of my Senate colleagues, I cosponsored an amendment to the foreign operations appropriations bill that prohibits any Government funding of programs which try to induce U.S. Companies to relocate production and employment outside the United States, or which tolerate interference with internationally recognized workers' rights.

Never, in my years of supporting U.S. programs to promote the economic development of countries much poorer than ours, did I think that the Congress would need to be so specific in its direction to any U.S. administration when it came to such a simple, obvious, straightforward concept. It was never my intention and, I feel very safe in saying, never the intention of any of my Senate colleagues that our country's foreign assistance programs should be used to send U.S. jobs overseas or to blacklist union members.

My colleagues and I offered that amendment, Mr. President, because this concept—U.S. foreign assistance programs should not be used to send U.S. jobs overseas or to blacklist union members—unfortunately had to be explained to President Bush and members of his administration. Some people just don't get it.

Like other Americans, I was appalled last week when I heard about the charges aired on "60 Minutes" and on "Nightline" that some U.S. Government funds have been used by the Agency for International Development to export U.S. jobs to countries in Latin America and the Caribbean and to support firms in these countries that blacklist union workers. These allegations are particularly disturbing to me because the "Nightline" report indicated that AID's actions have contributed to the decision I fought in 1990 by Maidenform, Inc., to close its plants in Huntington and Princeton, WV.

In September 1990, when I heard reports that these two plants in Huntington and Princeton might be closed, I wrote to the chairperson of Maidenform, Inc., to express my concern and to indicate to her that I stood ready to assist in any way I could to keep these plants viable. I reminded Maidenform that for years these plants had been among the best and steadiest employers in these two cities and said that any closing would have a devastating impact upon these communities—and above all, on the 200 employees and their families.

Despite my efforts and those of other concerned West Virginians, the two

plants were closed. At the time, we were not able to determine what factors led to that decision. Last week we found out, when "Nightline" aired its report about how AID effectively encouraged Maidenform to invest in a foreign country. The jobs that had for so many years been performed proudly in Huntington and Princeton, WV, were moved out of this country to Honduras.

These actions were never authorized by Congress and, frankly, we naively assumed that no American President needed to be told that he should be working to create jobs in the United States, that no American President needed to be explicitly prohibited from sending U.S. jobs overseas.

This would not have happened if the Bush administration had managed the projects as Congress intended. The amendment we proposed last week will ensure that what happened never takes place again.

When properly managed, programs to stimulate economic growth in neighboring countries can lead to dramatic U.S. export growth and the creation of new U.S. jobs. The Bush administration's efforts to export American jobs are particularly outrageous when one also takes into account their 12-year effort to eliminate the trade adjustment assistance program, which is the program designed to help Americans who lose their jobs due to imports.

I was pleased last week when the Senate approved this amendment. I was pleased when the House of Representatives also gave its strong support to the action we took and joined the Senate in sending the legislation to President Bush. It is my hope that the President can be convinced to sign into law this prohibition on exporting U.S. jobs and restricting labor union activity. I only regret that such a simple, obvious, straightforward concept needed to be explained to an American President.

#### TRIBUTE FOR SENATOR ALAN DIXON OF ILLINOIS

Mr. DURENBERGER. Mr. President, I will greatly miss my colleague from Illinois, ALAN DIXON, when we return to this Chamber next year.

One of the many things we suffer from around here is a lack of a broader perspective on what we do. ALAN DIXON was an obvious and forceful antidote to that problem. He knew more about people and how they are governed than most of us will ever know.

He earned his place in the Senate. For 40 years he served the people of Illinois as a police magistrate, a secretary of state, and a U.S. Senator. The Federal Government could do a much better job of managing the intergovernmental partnership if more of us had State and local experience before we arrived here.

ALAN DIXON represented the whole State of Illinois and that's a tall order.

Just to illustrate, Illinois' upper boundary is north of Boston and its lower border is south of Richmond. In between is some of America's greatest cultural diversity. ALAN DIXON, because of the unique person he is, and the extraordinary experience he has gained, had the capacity to be a Senator for each of those citizens.

ALAN DIXON was good for the Senate. He was knowledgeable and nonpartisan on most issues. And even though he was as forceful as any of the 535 Members of the Congress, he never presented his views in a way that diminished this institution or any of the people in it.

I can remember several times when he gave me both barrels during a floor debate, and could walk over and put an arm around me and share a joke.

I'll miss what he did for the Midwestern States and the national defense of this country. But more than what he did, I'll miss the character of person he was among us here.

#### TRIBUTE TO SENATOR JAKE GARN

Mr. DURENBERGER. Mr. President, the Senate will suffer a great loss when JAKE GARN walks out of this Chamber for the last time as a Senator from Utah.

Very few of us here in the Senate, despite our responsibility to make policy, would dare to call ourselves experts on anything. JAKE GARN is an expert on two crucial issues of this country: Financial systems reform and the space program. He has filled a void in those two areas which will be painfully obvious when we reconvene next year.

He has been a serious student of issues and a forceful debater. He has been immune to some of the sillier excesses with which Washington infects many of us. He knew what he taught and believed when he arrived here, and he leaves with most of those same thoughts and beliefs.

To me, and many Senators, he has acted as a kind of moral rudder for the Senate. When he announced his retirement from the Senate, he taught us all a valuable lesson. He said the Senator wanted to keep going, but the husband and father knew it was time to go. When we try to leave the person inside behind, we cannot serve our people to the best of our ability.

I thank JAKE for his example, and for the many ways he helped me, substantively and personally, to serve the people of Minnesota.

#### TRIBUTE TO SENATOR STEVE SYMMS

Mr. DURENBERGER. Mr. President, the Senate was designed to draw strength from the individuality of its members and the diversity of our States. STEVE SYMMS came here a straight-up, honest conservative, and that's the way he leaves.

He has been in the Congress since 1972, and I can guarantee you that he has changed Washington more than Washington has changed him.

Like the President he admires so much, Ronald Reagan, STEVE SYMMS has had an absolutely consistent public philosophy that while the Government may have its heart in the right place, it usually has its hand in the wrong pockets.

It was on the Environment and Public Works Committee that I observed STEVE SYMMS doing the day to day work of the Government, and there I learned to admire his political skill. The relationship of STEVE SYMMS and Senator PAT MOYNIHAN—two people from very different backgrounds—were responsible for major steps forward in U.S. infrastructure policy.

In an age which seems to value flexibility over other political virtues, STEVE SYMMS was a model of consistency. He made Idaho a better State for his service, and he taught the House and Senate lessons we should remember long after he's gone.

#### TRIBUTE TO SENATOR WARREN RUDMAN

Mr. DURENBERGER. Mr. President, the license plate for the State of New Hampshire has the following message: "Live free or die."

Our colleague from New Hampshire, WARREN RUDMAN, has brought a measure of that same blunt, tough resolve to this chamber.

In all my 14 years in the Senate, WARREN RUDMAN has been the most thoroughly prepared Senator I have known. He has spent countless hours reading, studying, and mastering the facts of the crucial issues before us.

As the number and complexity of issues have grown exponentially, I admire WARREN RUDMAN's commitment of time to stay ahead of the knowledge curve. He has chosen to specialize in issues of crucial importance to the Nation—the budget and national security—and his contribution to both have been historic.

One of the instances where I was able to see this personally was his work on the Select Committee on Iran-Contra. Immediately after he was selected as vice chair, he came to me as chair of the Intelligence Committee and asked to see all the documents in the committee's possession. He devoted many days and nights to those documents so that by the time the formal part of the inquiry began, he had already mastered the documents involved.

As much as he loved the work of the Senate, WARREN RUDMAN disliked the trappings of Washington. Perhaps that is why he was so effective.

WARREN RUDMAN, like his New Hampshire predecessors who said "Live free or die," determined he wanted to work in an effective Senate or none at all. I

greatly hope his advocacy for fiscal sanity outside this Chamber will help change public attitudes toward the dangers of debt. Perhaps his greatest contribution to our work here, lies ahead.

#### TRIBUTE TO SENATOR TIM WIRTH

Mr. DURENBERGER. Mr. President, today I want to say a few words of appreciation to a fellow soldier in the effort to protect this planet's environment, Senator TIM WIRTH.

TIM WIRTH's unique contribution was that not only did he have an overriding vision for conservation, but he had a very practical sense of how we can get from here to there. Not content to simply articulate his view to sympathetic audiences, he was a bridge builder, who won people over to his views. That was a very valuable asset in the efforts to pass the Clean Air Act and other major environmental bills of last few years.

He was a strong member of his party, but he always knew when the interests of his State outweighed partisan considerations. He had an excellent relationship with the two conservative Senators he served with, Bill Armstrong and HANK BROWN. Colorado benefited often from their ability to work both sides of the street.

Those of us in the Senate who loved the late John Heinz and his family, owe a great debt of gratitude to TIM WIRTH for the way he has cared for the Heinz family in the aftermath of John's death.

I thank him for his many years of public service, his practical stewardship of the planet and for being the sensible, loving person he was among us here.

#### TRIBUTE TO SENATOR BROCK ADAMS

Mr. DURENBERGER. Mr. President, I want to express my gratitude and appreciation for the work that Senator BROCK ADAMS has done here in the Senate, and throughout the decades of his service to the National Government.

As a public servant, BROCK ADAMS is like a lot of people we have in Minnesota. He has an unconquerable sense of optimism that we can solve problems if we can just care enough, think clearly enough, and work hard enough to bring everyone together in the solution.

As a new member in the Senate, I respected his work in the Carter Cabinet and knew of his work on the House Budget Committee.

BROCK ADAMS, despite all that government service, came to the Senate as a freshman. He has done a remarkable job making the most of the positions available to him in this body. Over the last year, I have particularly enjoyed working with him on the Labor Committee on an issue which concerns us

both deeply: medical research on women's health problems.

As you know Mr. President, when we conduct our rollcall votes, Mr. ADAMS is the first name called. Unlike most of us, who stroll in here during the 15 minutes allotted and discuss and calculate before we vote, he was almost always there to start us off with his clear, loud vote.

I thank him on behalf of the people of Minnesota for his lifetime of public service and spirit of urgency he brought to our work here.

#### THE RIGHTS OF INDIGENOUS PEOPLES

Mr. CRANSTON. Mr. President, this week we passed the foreign operations appropriations conference bill, which included an amendment proposed by me that will greatly increase the scope of the reporting in the State Department annual human rights report on the status and conditions of indigenous peoples around the world.

The amendment, No. 3345, to the original Senate bill was an expanded version of that which came out of last year's conference report of the foreign aid authorization bill. At that time, the report requirement focused on the plight of the indigenous people of Latin America.

Mr. President, I believe that it is time that we give special attention to the human rights issues confronting the millions of tribal and otherwise underrepresented people around the world.

The amendment which became part of the conference bill is designed to do that. The annual State Department report will now have to describe the extent to which indigenous people are able to participate in decisions affecting their lands, cultures, traditions and the allocation of natural resources, and assess the extent of protection of their civil and political rights.

Later this month, attention will be focused on the plight of the more than 35 million indigenous people of Latin America, as we mark the 500th anniversary of the arrival of Europeans to the American hemisphere.

And next year has been proclaimed by the United Nations the "Year of the Indigenous People."

In some countries, such as Guatemala, Peru, Bolivia, and Ecuador—where huge populations of indigenous people are left virtually outside the realm and reach of government—the issue of their rights remains perhaps the most important roadblock to the consolidation of democracy and civilian rule.

The issue of the rights and roles of indigenous people, in some respects a traditional human rights concern, in others a cornerstone of democratic development in the Third World, are not going to go away. I believe that the

amendment we have included in the foreign operations appropriation bill will help to set the future agenda in a positive and proactive way.

Mr. President, there are several people whose advice and counsel has been very valuable to me as we have sought to provide additional protection for indigenous people. Mac Chapin of Cultural Survival; Alfredo Nakatsuma-Vaca of the United States Agency for International Development in Guatemala; Katy Moran of the Smithsonian Office of External Affairs; John Walsh of the Washington Office of Latin America; Steve Schwartzman of the Environmental Defense Fund, and Jack Healy and Carlos Salinas of Amnesty International USA have all been extremely generous with their insights and knowledge about indigenous people.

I also want to express my gratitude to my good friends and colleagues, the distinguished chairman of the Foreign Operations Subcommittee, the Senator from Vermont Mr. LEAHY, for graciously accepting the amendment to their bill.

Finally, I want to single out the efforts of Representative JOHN PORTER, cochairman of the congressional human rights caucus, for his help and support in the House-Senate conference. He too has been a leader in the area of indigenous rights, and I thank him for his bipartisan cooperation in getting this bill accepted.

Mr. President, within a few days the Congressional Research Service will be publishing a report, "Biotechnology, Indigenous Peoples, and Intellectual Property Rights," which will also be an important contribution to the literature on indigenous rights. I urge my colleagues to study it carefully as they consider future development assistance efforts around the world.

Mr. President, I ask unanimous consent that a statement on indigenous people recently released by Amnesty International USA, be included in the RECORD, as well as a letter sent by myself and nearly a score of my colleagues to Colombian President Cesar Gaviria expressing concern about the plight of indigenous people in his country.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[News release from Amnesty International USA, Oct. 6, 1992]

THE AMERICAS: AMNESTY INTERNATIONAL CALLS FOR END TO CENTURIES OF ABUSE OF INDIGENOUS HUMAN RIGHTS

The time has come for governments throughout the Americas to stop turning their backs on the human rights of indigenous peoples—and end the hundreds of years of violations they have suffered. For centuries, governments have often treated the rights of indigenous people with contempt, torturing, "disappearing", and killing them in the tens of thousands and doing virtually nothing when others murder them.

Discrimination against indigenous people means they are more likely to have their

rights trampled on in the first place and then let down by the justice system. And those most vulnerable have sometimes been hit hardest—young children have been extrajudicially executed; women have been raped by soldiers during armed conflict; and isolated Indian groups that have only recently come into contact with the surrounding society have been killed with impunity by miners and settlers.

In one striking case a one-month old baby "disappeared" with her mother in 1990 when they were among 85 Indian peasants seized by Guatemalan soldiers. Most of the others were returned to their village; Maria Josefa Tiu Tojin and her daughter have not been seen since.

As Governments must urgently tackle some of the key issues on indigenous human rights by carrying out effective investigations into abuses against indigenous peoples, bringing to justice those responsible and justly resolving land disputes that all too often lead to abuses.

For the 1993 International Year for the World's Indigenous People, Amnesty International is pushing for all governments to establish commissions to review their country's record in implementing all international human rights standards for indigenous people. Disputes over land and resources are often at the root of many of the human rights abuses against indigenous people. Thousands have also died, "disappeared" or been tortured when they've been caught in the middle of the 'war on drugs' or civil conflicts.

Some of the most horrific human rights violations inflicted on indigenous peoples have taken place during the armed conflicts that have racked countries such as Colombia, El Salvador, Guatemala, and Peru. Entire villages were destroyed and thousands of indigenous peasants massacred during the height of the armed conflict in Guatemala in the early 1980s and in Peru thousands of Indians have been tortured and killed by both sides when the loyalties of whole communities have been questioned. In Colombia, three Arhuaco indigenous leaders were abducted, tortured and killed in 1990 on suspicion that they sympathized with an armed opposition group that operated in their territories despite the Indians' protests; the army officers implicated in the killings are still in active service.

Attacks on Indians in many countries including Brazil, Chile, Honduras, and Venezuela have often been stepped up during disputes over land—which is frequently wanted by the state or others for mining, logging, energy or tourism projects. In Brazil alone, scores of Indians have been murdered in land disputes with the apparent acquiescence of the authorities and in Honduras 10 members of the Xicaque tribes have been killed in recent years. In Canada, inquiries into the allegations that several Mohawk Indians were ill-treated by police in 1990 during a prolonged confrontation over plans to develop a golf course near a sacred burial site have still not been completed.

The "war on drugs" has also taken its toll on indigenous lives, especially because many indigenous peoples live in drug growing areas. A Quechua leader in Bolivia, for example, was picked up and tortured by the security police in 1989 because they believed he had protected a drug trafficker, a charge he denied.

Prosecutions for such human rights abuses virtually never happen—whether those responsible are state agents, death squads or hired guns. In Chile, the agents who ar-

rested, "disappeared" and tortured Mapuche Indian leaders following the coup in the early 1970s were never brought to justice and in Brazil most killings of indigenous peoples are never prosecuted.

Indigenous people have at times been confronted by a different side of the law, however, being subjected to arbitrary detention and unfair trials. Last year in Mexico, members of the Ch'ol and Tzeltal indigenous communities peacefully protested against police abuse and discrimination in the courts, with more than 100 of them arrested, kicked, beaten and most of those threatened with death before being released without charge. And in the USA, Amnesty International has expressed concern about the fairness of trials of American Indian Movement leaders, including Leonard Peltier who was convicted of the murder of two Federal Bureau of Investigation (FBI) agents. In his case there is concern that fabricated evidence was used to extradite him from Canada and that FBI misconduct prejudiced the fairness of his trial.

The leaders of indigenous movements have often been singled out for attack when they speak out on environmental issues, land claims or discrimination and are seen as a threat to Government policies. In Ecuador, for example, indigenous leaders involved in land disputes have been particularly singled out as targets of abuse including harassment, torture and killing. Despite that risk, groups defending indigenous rights have been formed in increasing numbers in recent years. A number of major protest marches have been held in countries like Bolivia and Ecuador, relatives of victims have joined together in Guatemala and indigenous peoples are increasingly forming regional or international organizations to press for their rights to be respected.

From the local to the international level, the message is that the centuries of violating the rights of the region's original inhabitants must end once and for all. That's a message to governments not only in the Americas, but also in other regions of the world.

It is time for Americans to recognize and acknowledge that the abuses against indigenous peoples in this hemisphere didn't end in the last century, said John G. Healey, Executive Director, Amnesty International USA. The shocking truth is that for millions of indigenous people the nightmare is not over. If we don't join these communities in fighting to end gross human rights violations, the cruelty of the past will continue to be perpetuated.

— U.S. SENATE,

Washington, DC, October 6, 1992.

His Excellency Cesar Gaviria Trujillo,  
President, Republic of Colombia, Santa Fe de  
Bogota, Colombia.

DEAR PRESIDENT GAVIRIA: We are deeply concerned about the recent wave of attacks against human rights workers in Colombia. While we welcome your public commitment to human rights as well as the Colombian government's condemnation of attacks against human rights workers, we ask further that you do everything in your power to protect human rights workers and bring those responsible for threats and attacks against them to justice.

Dr. Jorge Gomez Lizarazo, president of the Regional Human Rights Committee, CREDHOS, which is based in Barrancabermeja, has faced repeated death threats. On June 11, 1992, Dr. Gomez, two other CREDHOS members, and three others es-

caped injury when their cars came under fire from a number of heavily armed men. However other members of CREDHOS have not been as fortunate: On January 29, 1992, Blanca Valero de Duran, secretary of CREDHOS and Dr. Jorge Gomez Lizarazo's assistant, was killed as she was leaving the office by shots fired at point blank range by armed men in civilian clothes. On June 28, 1992 another member of CREDHOS, Julio Cesar Berrio, was shot dead by two unidentified gunmen. He worked there as a security guard and had also been involved in an investigation undertaken by CREDHOS. And on July 30, 1992, Ligia Patricia Cortez, a philosophy graduate working with CREDHOS, and Parmenio Ruiz Suarez and Rene Tavera were murdered by unknown gunmen.

We are deeply disturbed by these attacks against members of CREDHOS and other human rights defenders. We are concerned about reports that among those harassing Dr. Gomez are persons on motorcycles allegedly owned by state security agencies. We are also concerned about a report that, on July 2, 1992, Dr. Gomez received information warning him that personnel from the intelligence unit of the National Police had arrived in Barrancabermeja with the intent of killing him. We are very disturbed by reports that three policemen witnessed the lethal attack on Blanca Valero yet reportedly did not respond to her cries for help or make any attempt to pursue the assailants. It is simply unacceptable that these murderous acts continue and that those responsible remain at large. We especially urge you to investigate the possible involvement, or as in the case of Ms. Valero, the selective lack of involvement of the local police and security forces in these cases.

Other human rights workers have also been targeted for violence. On May 29, 1992 Oscar Elias Lopez, a lawyer who worked as a legal advisor for the Indigenous Regional Council of the Cauca, CRIC, was killed in Santander de Quilchao by heavily armed men. He had acted as advisor to the indigenous communities of Cauca which suffered a massacre on December 16, 1992, in which at least twenty Paez Indians were killed. Three other men involved in an independent investigation also met equally distressing fates: on the night of January 8, 1992, in the city of Cali, lawyers Carlos Edgar Torres and Rodolfo Alvarez were shot dead in their homes while anthropologist Etnio Vidardo was "disappeared."

Official condemnation of violence against human rights workers is an important first step in ending these abuses but as you well know, it is not enough. We urge you to conduct impartial investigations to find those responsible for these murders, attempted murders, and threats. Once identified, these individuals must be brought to justice. In the meantime, those courageous persons working for human rights in Colombia should be protected in a manner they find appropriate.

Sincerely,  
Brock Adams,  
Albert Gore, Jr.,

#### REGARDING SECTION 907 OF S. 1569

Mr. HEFLIN. Mr. President, on October 7, 1992, the U.S. Senate cleared for the President S. 1569, the Federal Courts Administration Act.

Contained in this measure are various provisions aimed at improving the Federal claims litigation process before the U.S. claims court (hereinafter referred to as the Court of Federal Claims, as provided for in section 902 of S. 1569) and assisting the court in providing better and more efficient service to its litigants. Specifically, section 907 of S. 1569 relates to jurisdiction of the court.

Subsection (a) of section 907 will eliminate the confusion and waste of resources that has resulted from the Contract Disputes Act certification being deemed jurisdictional, while both addressing the Justice Department's concern that contractors have sufficient incentive to properly certify their claims, and ensuring that all claims are properly certified before they are paid.

Paragraph (1)(A) will amend the Contract Disputes Act certification to require that the person certifying the claim also certify that he or she is duly authorized by the contractor to execute the certification on the contractor's behalf. In addition, paragraph (B) will add a new section 6(c)(7), which will clarify that the certification must be signed by a person duly authorized to bind the contractor with respect to the claim. Together, these provisions will ensure that the certification binds the contractor and cannot later be disavowed by management. The individual will be required to have authorization, based either on the company's existing delegations of authority or a special delegation, to act on the contractor's behalf with respect to the claim, and must also have authority to execute the certification on behalf of the contractor. In most instances it is anticipated that the certification will be signed by the same person who signs the claim itself.

Paragraph (1)(B) will add a new section 6(c)(6), which will permit the contracting officer to notify a contractor within 60 days of receiving a claim that the certification is defective. If a timely notification is provided, the 60-day period for issuing a final decision will not begin to run until the defect is cured and a proper certification submitted, and the claim will not be deemed denied. This will create a strong incentive for contractors to carefully certify their claims because

until a proper certification is filed, the contractor will not be able to appeal to the Court of Federal Claims or agency board. If the contracting officer issues a final decision on a claim that is not properly certified, the contractor may appeal that decision and the Court of Federal Claims or agency board will have jurisdiction but must require that the contractor provide a valid certification before a decision is rendered or the contractor is paid.

Paragraph (a)(3) will decouple interest and certification. Interest will be paid only prospectively from the date of enactment on pending claims for which the current certification is hereafter found to be defective. In all other respects, payment of interest on existing claims will not be affected by paragraph (a)(3). In the future, any interest will always be paid from the date the contracting officer initially received the claim, regardless of any defect in certification of the claim. In order to eliminate continued litigation over certification technicalities, paragraph (a)(2) provides that new paragraph 6(c)(6) would become effective immediately with respect to all claims except those which prior to the effective date of this act are the subject of a suit filed in the claims court or an appeal filed in an agency board. If such a pending suit is dismissed for lack of jurisdiction because of a defect in certification and a new claim is thereafter filed, the new claim and certification would be governed by the Contract Disputes Act as amended by this act. Paragraph (a)(4) provides that the changes to the proposed certification would become effective 60 days after the Federal Acquisition Regulation is amended to reflect the new required phrase in the certification. The required certification is currently defined at section 33.207 of the FAR, and it would be unfair to implement the new certification until that regulation is amended to reflect the new requirement.

Subsection (b)(1) of section 907 will amend the Tucker Act to clarify the power of the Court of Federal Claims to hear appeals of all contracting officers' final decisions, regardless of whether the dispute involves a claim for money currently due. The amendment will restore the option of appealing any final decisions to either the Court of Federal Claims or agency board of contract appeals as was intended in the Contract Disputes Act. The amendment does not authorize contractors to seek declaratory judgments from the Court of Federal Claims in advance of a dispute and final decision, and will not permit contractors to seek injunctions or declaratory judgments that would interfere with the contracting officer's right to direct the manner of performance under the changes clause. A contracting officer's final decision under the Contract Disputes Act will remain a ju-

risdictional prerequisite to review by the Court of Federal Claims. This amendment would be effective immediately with respect to all pending and future cases.

As amended, the final sentence of 28 U.S.C. §1491(a)(2) will read as follows (new provision in italic):

*The Court of Federal Claims shall have jurisdiction to render judgment upon any claim by or against, or dispute with, a contractor arising under section 10(a)(1) of the Contract Disputes Act of 1978, including a dispute concerning termination of a contract, rights in tangible or intangible property, compliance with cost accounting standards, or other non-monetary dispute on which a decision of the contracting officer has been issued under section 6 of that Act.*

#### TAX ENTERPRISE ZONES ACT

Mr. WELLSTONE. Mr. President, I would like the RECORD to reflect that had there been a rollcall vote on final passage of the conference report accompanying H.R. 776 I would have voted in favor of final passage.

While I supported my colleagues from Nevada in voting against invoking cloture, the bill as reported from the committee on conference has been greatly improved. Despite the onerous provisions of the bill regarding nuclear power, there are many provisions which merit the Senate's support—the proposed programs for energy efficiency, renewable energy, and restoring health benefits for retired coal miners are particularly notable.

Most of the criticisms which I have raised about this bill have been addressed during the course of congressional action on it. Notably, the conferees greatly improved the provisions regarding the Public Utility Holding Company Act and addressed some of the taxpayer issues surrounding the bills provisions on uranium enrichment. The conferees also removed natural gas provisions which threatened farmers and ranchers with eminent domain abuses by energy companies.

In conclusion, I wish to express my support for the work of the distinguished chairman of the Senate Energy Committee and all of the conferees. While the bill we have sent to the President today is not perfect, it is on the whole a good bill which begins to respond to our Nation's need for a sound energy policy.

#### COMMENDING DR. LOUIS SULLIVAN

Mr. HATCH. Mr. President, as the 102d Congress comes to an end, I feel it appropriate to take this opportunity to recognize that our distinguished Secretary of Health and Human Services, Dr. Louis Sullivan, now exceeds all previous longevity records for stewardship of HHS. Dr. Sullivan's record of service—3 years, 6 months, 8 days, and counting—surpasses even that of his

eminent predecessor, the only other physician-Secretary of HHS, Dr. Otis Bowen.

I hope my colleagues will join with me in commending Dr. Sullivan on his outstanding record of service, and in wishing him well as he continues in what I hope will be at least another 4 years at HHS.

#### THE SITUATION IN BOSNIA

Mr. WARNER. Mr. President, over the past several months, the Senate has struggled with the tragedy in the states of the former Yugoslavia and the appropriate United States response to this civil war and humanitarian nightmare. Americans grieve as they witness the suffering, and are moved by a desire to help. But the question is, how can we help? In the closing hours of the 102d Congress, I believe it necessary to outline my concerns with the possible use of United States military force in Bosnia. I am absolutely opposed to any unilateral U.S. military involvement; but U.S. action as part of an international coalition, particularly pursuant to U.N. resolutions, should be objectively considered.

As my colleagues know, I have been in the forefront of a minority in the United States Senate urging extreme caution regarding military commitments in Bosnia. I opposed the resolution which the Senate adopted on August 11, regarding the use of force in Bosnia because the Senate resolution went well beyond what the United Nations was then considering and eventually passed.

Following that debate and vote, I felt strongly an obligation to learn more about the tragic suffering and potential use of military forces, so I traveled to Zagreb and Sarajevo at the beginning of September. I witnessed firsthand the wanton destruction and unimaginable suffering in Sarajevo. Unfortunately, this trip confirmed my belief that there is a measure of guilt on all sides in this conflict.

People throughout the territory of Bosnia, irrespective of why they are there, including those members of the international community—foreign military and civilian—who are involved in humanitarian relief operations, are subjected to great risks because of the mindless attacks from all directions. On September 3, an Italian transport plane was shot out of the sky by one of the warring factions—it remains an open case who bears responsibility. That plane was carrying blankets—an item that will be desperately needed in the winter months ahead. The plane that took me to Sarajevo was just an hour ahead and following the same fixed flight plan into the Sarajevo airport as that Italian plane. And just days thereafter, two French soldiers assigned to the U.N. peacekeeping forces at the airport were shot

and killed—ambushed—while traveling in a U.N. convoy, bringing to eight the number of members of the international community who have given their lives while trying to bring some humanitarian relief to the suffering people throughout Bosnia.

Mr. President, what we are witnessing in Sarajevo and elsewhere in Bosnia is a nation helplessly entrapped in a bloody civil war, with the roots of hatred and ethnic and religious strife dating back centuries. This tragic situation is an example of the rise of nationalism and ethnic conflict which we are experiencing—worldwide—in the post-cold-war world. One of the most difficult and complicated challenges the United States and its friends and allies will face in the years ahead is the multiplication of nationalist, ethnic and tribal conflicts around the globe—with grave consequences for regional stability and human suffering. The horrifying events in the former Yugoslavia are perhaps the most vivid demonstration of the intractability of such conflicts, as well as international pressures for American and other international involvement. And, worst of all, because so many of these conflicts are rooted in history, they are unusually resistant to diplomatic mediation or compromise, as we have seen in the former Yugoslavia. Further, given that the United States is composed of many cultures, religious and ethnic backgrounds, there is likely to be a division of opinion among our people as to whether we should become involved in helping to resolve such conflicts, and which side to back. There are strong such divisions within the United States between our citizens with ties to the former Yugoslavia.

While I share the concern of my colleagues with the daily news reports of the killings in Bosnia and the atrocities in the detention camps, both under Serb control and Bosnian Moslem control, I am concerned that U.S. military intervention—other than on a clear peacekeeping mission—will not bring peace to Bosnia but rather compound the chances for more death and destruction. The simple fact is that the United States and the international community cannot, in my opinion, impose a peace, through the use of nonpeacekeeping military force, on a warring and divided people. Even if such actions brought a reduced level of civil war, that conflict would continue to boil beneath the surface and erupt anew as the foreign intervention was lifted.

We must continue efforts, therefore, with other nations, to provide humanitarian relief, utilizing foreign military forces in limited peacekeeping roles. But military forces, of any foreign nation, should not transition from a peacekeeping role to a status of peace-making—that is, be perceived as an aggressor force. Once the foreign military

transitions, the efforts flowing from the London conference, under Secretary Vance and Lord Owen, will be undermined.

How can a situation be sustained where some foreign troops are performing peacekeeping missions, and some, perhaps U.S. air forces, are performing peacemaking activities. There is a high risk that the distinction between the two types of forces, which are exceedingly difficult to maintain, will be lost and peacekeeping forces will be unable to continue, because of increased risk to themselves, their mission of protecting the flow of humanitarian relief supplies just as winter is approaching. Winter without assistance will result in as many or more casualties than the fighting to date.

Over the course of the past week, I have had the opportunity to consult with Chairman of the Joint Chiefs Powell and Ambassador Zimmerman, our Ambassador to Yugoslavia, and to receive a Senate intelligence briefing on the situation in Bosnia. I spoke with Chairman Powell during last week's Senate consideration of a Biden amendment to the foreign operations appropriations bill which, calls for the United States to supply weapons to Bosnia, following the passage of certain additional United States resolutions. During the course of our conversation, General Powell elaborated on a September 28 New York Times article which expressed his concerns with using limited military force in Bosnia. Here is the straightforward, nonpolitical opinion of one of the most respected military professionals in the world. Unfortunately, I am restricted from inserting the entire text of his interview with the New York Times in the RECORD. However, I ask unanimous consent to have the article which was drawn from this interview as well as a follow-on op-ed by General Powell—appear in the RECORD following these remarks.

I have asked time and again during Senate debate on this issue, What is the mission for the U.S. troops that many in this Chamber would like to send to Bosnia? I have yet to receive a satisfactory answer to that question. I ask, would they be used for the limited peacekeeping objective of protecting the delivery of relief supplies? Based on events in Bosnia over the past few months, is there anyone who really believes that our military personnel would not become targets of the fighting factions and be drawn into the Bosnian civil war? Some have advocated that the international community should intervene to impose peace on the warring factions. We have a World War II history of Germany's failure to impose its will as our guide to just how successful such a suppression mission would be among the former Yugoslav people.

Mr. President, while I remain opposed to a nonpeacekeeping U.S. mili-

tary involvement in Bosnia to enforce a no-fly-zone at this time, I believe that there are things the United States and the international community should do first, before resorting to the use of force. During a luncheon meeting last week on Capitol Hill, Ambassador Zimmermann spoke of tightening the U.N. trade embargo on Serbia and Montenegro. I wonder if my colleagues are aware of the fact that while there is a U.N. Security Council resolution imposing a trade embargo on Serbia and Montenegro, there is no U.N. enforcement resolution for this embargo. Although United States ships are involved in a NATO/WEU monitoring regime in the Adriatic, which has proven helpful in curtailing trade with Serbia and Montenegro, the military forces involved in this effort are not empowered to take action to enforce the embargo—merely to monitor it.

In a step in the right direction, the international community is now in the process of stationing sanctions monitors in neighboring nations. According to the briefings that I have received, the main problem with violating the embargo comes from a proliferation of private entrepreneurs, not from governments. A way must be found to block the illegal trade and allow sanctions a chance to have an impact. The United Nations should move to specifically authorize steps to further tighten or enforce the U.N. sanctions. Such actions may encourage the parties to be more willing to come to the negotiating table to find a peaceful solution to the conflict.

I would hope that such options are fully explored and exhausted before we decide on aggressive peacemaking military involvement. Last week, President Bush called for a no-fly-zone over Bosnia. It is unclear at this point how such a restriction would be enforced, if at all. It is my understanding that discussions on the establishment of a no-fly-zone are now under way at the United Nations. I am fearful that such a step, if it included enforcement provisions, risks greater casualties among members of the international community, both in the skies over Bosnia and in reprisal attacks against U.N. peace-keeping forces on the ground struggling to keep up the flow of humanitarian supplies. In addition, such a step would risk destroying the fragile U.N. coalition regarding the former Yugoslavia and may cause Secretary Vance and Lord Owen to lose their status as honest brokers.

[From the New York Times, Sept. 28, 1992]

**POWELL DELIVERS A RESOUNDING NO ON USING LIMITED FORCE IN BOSNIA**  
(By Michael R. Gordon)

Reflecting a debate about the use of United States forces in regional conflicts, the Chairman of the Joint Chiefs of Staff is questioning even the most limited forms of military intervention to protect the Muslims in Bosnia and Herzegovina or to try to stop the fighting.

In a lengthy and sometimes emotional interview with The New York Times, the Chairman, Gen. Colin L. Powell, offered a strong defense of his philosophy that military force is best used to achieve a decisive victory and for the first time publicly explained his reluctance to intervene in Bosnia.

The remarks are the most recent and vivid example of a behind-the-scenes debate in the Bush Administration over the use of force. The debate is being joined by lawmakers and former Bush Administration officials who contend that the Pentagon has an "all or nothing" doctrine for using force that is increasingly irrelevant to a world in which violent nationalism and ethnic conflict have supplanted superpower hostilities.

**BALKANS THE THORNIEST CASE**

Explaining how his doctrine applies to the Balkans, which have become the most pressing and thorniest test case because of the mounting evidence of atrocities, General Powell assailed the proponents of limited military intervention to protect the Bosnians.

The general questioned the need to establish an air-exclusion zone over Bosnia like those the United States has imposed over parts of Iraq, where the Pentagon sees less risk. The United States and its allies are discussing setting up such a zone.

General Powell also angrily rejected suggestions by former Prime Minister Margaret Thatcher of Britain and others that the West undertake limited air strikes to deter the Serbs from shelling Sarajevo and continuing their attacks.

General Powell said: "As soon as they tell me it is limited, it means they do not care whether you achieve a result or not. As soon as they tell me 'surgical,' I head for the bunker."

Though it has largely been fought out of public view, the debate over the use of force has affected American diplomacy toward the Balkans. When Administration officials prepared a diplomatic protest to the Serbs asking them to stop shadowing relief flights with their combat planes, military and civilian officials at the Pentagon softened the language to remove any implicit threat to take military action to stop the practice.

Pentagon officials say that General Powell was the first to suggest that a protest be made and that the episode shows that the State Department was too quick to threaten force because of frustrations with the diplomatic process. But some Administration officials say that the Pentagon is too reluctant to develop military options that would add teeth to the West's diplomacy.

Though General Powell's philosophy on using force is widely shared by senior officers, who recall the Vietnam quagmire, he is the most prominent and articulate proponent. Defining the conditions when the use of force is appropriate, the general said: "It is not so much a doctrine as an approach to any crisis or situation that comes along. It does not say you have to apply overwhelming force in every situation. What it says is that you must begin with a clear understanding of what political objective is being achieved."

Once the political objective is clear, General Powell said, the next step is to determine the proper military means, whether the objective "is to win or do something else."

"Preferably, it is to win because it shows you have made a commitment to decisive results," he said. "The key is to get decisive results to accomplish the mission."

**TWO ACTIONS ARE CITED**

Most military analysts say that General Powell's approach served the United States

well in the invasion of Panama and the Persian Gulf war, where overwhelming military force was used to achieve a quick victory with minimal American casualties. But critics say that the Pentagon's doctrine seems designed to fight the last war, a no-holds-barred air and land war, rather than the next war, where force might be used selectively, not to vanquish an enemy, but to slow aggression stemming from ethnic conflicts and bolster diplomacy to end the fighting.

Les Aspin, the Wisconsin Democrat who heads the House Armed Services Committee, said "If we say it is all or nothing and then walk away from the use of force in the Balkans, we are sending a signal to other places that there is no downside to ethnic cleansing. We are not deterring anybody." Serbian forces in Bosnia have been accused of widespread "ethnic cleansing"—killing or expelling members of other groups to create "ethnically pure" areas.

And Richard Schifter, the senior State Department official for human rights in the Reagan Administration and the early part of the Bush Administration, asserted that the American military was haunted by a "Vietnam syndrome" that had paralyzed its response to the killing in Bosnia.

"It is the Vietnam syndrome—the idea that you don't get involved in any application of military force unless it is overwhelming and the purpose is to win a 'victory,'" Mr. Schifter said. "In order to get the Serbs to negotiate seriously, we and our allies have to be prepared to use force, such as establishing a no-fly zone or engaging in air strikes against military targets."

Normally calm and collected, the general spoke angrily as he complained about the impetuosity of civilians, who he said had been too quick to place American forces in jeopardy unwisely for ill-defined missions.

"These are the same folks who have stuck us into problems before that we \*\*\* sion was. They did not know really what they were doing there. It was \*\*\* have lived to regret." General Powell said. "I have some memories of us being put into situations like that which did not turn out quite the way that the people who put us in thought—i.e., Lebanon, if you want a more recent real experience, where a bunch of marines were put in there as a symbol, as a sign. Except those poor young folks did not know exactly what their mis \*\*\* very confusing. Two hundred and forty-one of them died as a result."

In the debate over using military force in the Balkans, the most pressing issue is an air-exclusion zone in Bosnia. The United States and its allies have already said that they are prepared to use force to insure the delivery of relief supplies. But threatening force to clear the skies of Serbian planes would cross a new threshold.

Proponents of an air-exclusion zone say it would insure that Serbian planes do not resume shadowing relief flights and would also be the first commitment of Western combat power to protect the Bosnians from Serbian air attack. Only the Serbian side has combat aircraft, and it is using them to attack Muslim and Croatian areas beyond the reach of artillery.

White House and State Department officials have been supportive of the concept, but the Pentagon has been wary. Administration officials say, fearing that it could be the first step toward deeper involvement and could lead to Serbian retaliation against the United Nations relief effort.

**'SERIOUS THREAT' TO FLIGHTS**

In the interview, General Powell questioned the immediate need to threaten force

to impose a ban on the flight of Serbian aircraft. He said that the Serbian practice of shadowing relief flights with their planes rarely put the relief flights in danger. In contrast, the State Department spokesman, Richard A. Boucher, has said that the Serbian shadowing has been a "serious threat to the safety of United Nations flights."

General Powell also noted that he pressed for the diplomatic protest, or *démarche*, which was delivered this month, asking the Serbs to stop the shadowing. "Before we start shooting up everybody just so everybody can have something to write about, let's see if the *démarche* works," he said.

He played down the significance of stopping Serbian combat attacks from the air. "With respect to dropping cluster bombs, that is reprehensible," he said. "But so is killing French soldiers with an AK-47. The question is: Are you intervening for the purpose of achieving a result or are you intervening because you do not like a particular weapon system that is being used? I think that is a legitimate question to ask before you apply the armed forces of the United States to the situation."

General Powell also rejected suggestions for limited bombing attacks against Serbian artillery and other military targets. "I do not know how limited bombing will stop the Serbs from doing what they are doing," he said.

#### THREE ARGUMENTS AGAINST

The general argued that it would be difficult to locate and destroy all of the Serbian artillery, that intervention would mean that Washington was taking sides in the conflict, and that the warring parties might respond by retaliating against the United Nations relief effort.

[From the New York Times, October 8, 1992]

#### WHY GENERALS GET NERVOUS

(By Colin L. Powell)

There has been a spate of commentary recently over the use of American Military force to deal with the vexing problems of an untidy post-cold war world. The military has been criticized for being too reluctant to use force. In a recent editorial, for example, the New York Times suggested that the military has a "no can do" attitude and asked whether America is getting a fair return on its defense investment.

The editorial even reached back to the famous exchange between President Lincoln and General McClellan during the Civil War. Lincoln, frustrated with McClellan's slowness in engaging the enemy, told him, "If you don't want to use the Army, I should like to borrow it for a while."

Let me respond by reviewing a little more recent history. During the last three years U.S. armed forces have been used repeatedly to defend our interests and achieve our political objectives. In December 1989, a dictator was removed from power in Panama. In that same month, when a coup threatened to topple democracy in the Philippines, a limited use of force helped prevent it.

In January 1991, a daring night raid rescued our embassy in Somalia. That same month, we rescued stranded foreigners and protected our embassy in Liberia. We waged a major war in the Persian Gulf to liberate Kuwait. Moreover, we have used our forces for humanitarian relief operations in Iraq, Somalia, Bangladesh, Russia and Bosnia. American C-130 aircraft are part of the relief effort in Sarajevo.

All of these operations had one thing in common: they were successful. There has been no Bay of Pigs, failed desert raids, Bel-

rut bombings and no Vietnam. Today, American troops around the world are protecting the peace in Europe, the Persian Gulf, Korea, Cambodia, the Sinai and the western Sahara.

Unwilling to use the armed forces? Tell that to our troops who are constantly being deployed to accomplish these missions. Americans know they are getting a hell of a return on their defense investment, even as the critics shout for imprudent reductions that would gut the armed forces.

The reason for our success is that in every instance we have carefully matched the use of military force to our political objectives. President Bush, more than any other recent President, understands the proper use of military force. In every instance, he has made sure that the objective was clear and that we knew what we were getting into. We owe it to the men and women who go in harm's way to make sure that their lives are not squandered for unclear purposes.

Military men and women recognize more than most people that not every situation will be crystal clear. We can and do operate in murky, unpredictable circumstances. We offer a range of options. But we also recognize that military force is not always the right answer. If force is used imprecisely or out of frustration rather than clear analysis, the situation can be made worse.

Decisive means and results are always to be preferred, even if they are not always possible. So you bet I get nervous when so-called experts suggest that all we need is a little surgical bombing or a limited attack. When the desired result isn't obtained, a new set of experts then comes forward with talk of a little escalation. History has not been kind to this approach.

The crisis in Bosnia is especially complex. Our policy and the policy of the international community have been to assist in providing humanitarian relief to the victims of that terrible conflict, one with deep ethnic and religious roots that go back a thousand years. The solution must ultimately be a political one. Deeper military involvement beyond humanitarian purposes requires great care and a full examination of possible outcomes. That is what we have been doing.

Whatever is decided on this or the other challenges that will come along, Americans can be sure that their armed forces will be ready, willing and able to accomplish the mission.

Finally, allow me to set the record straight on President Lincoln's frustration with General McClellan. Lincoln's problem with McClellan was that McClellan would not use the overwhelming force available to him to achieve a decisive result. Lincoln had set out clear political objectives. McClellan acted in a limited, inconclusive way.

#### I THANK YOU ALL

Mr. SYMMS. Mr. President, I wish to thank my constituents in Idaho for allowing me to represent them for the past 20 years. It has truly been an honor and a privilege.

I also wish to thank all of my staff, both here in Washington, DC, and in Idaho. The people of Idaho can be proud of their hard work and dedicated service.

I would be remiss, Mr. President, if I did not take a moment to thank all of my colleagues for their friendship throughout the years. I will not soon

forget the friends I have made, the people I have met, or the memories I take with me.

Lastly, let me thank the people who actually keep the Senate running on a daily basis—the floor staff, the Cloakroom, the pages, all of the clerks and reporters, the Sergeant at Arm's office, the Doorkeepers, the U.S. Capitol Police, the Housekeeping staff and dining services staff, and all the rest who keep the trains running on time.

Mr. President, I ask unanimous consent that the following material be printed in the RECORD.

There being no objection, the ordered material to be printed in the RECORD, follows:

[News Release, Feb. 10, 1972]

STEVEN D. SYMMS, IDAHO FRUIT GROWER,  
ANNOUNCES FOR CONGRESS

Steven D. Symms, prominent Idaho fruit grower, Caldwell, (Sunny Stope), Republican, announces that he will be a candidate for United States Congress from the First District.

Mr. Symms has issued the following statement entitled, "For Those Who Care," which explain in no uncertain terms his attitude about government in general. His statement follows:

Many of you have heard the old saying "In times of moral crisis the hottest places in hell are reserved for those who remain silent." Many of my friends have urged me to seek the First Congressional seal of Idaho. The other side of the story, which you seldom hear, is that other friends of mine have urged me not to run. I have appreciated counsel from all of them.

The purpose of my making this statement of positions is simply to clear the air for all of those who wish to participate in what could be the most unusual political campaign we have had in Idaho. This will probably bring together a very unusual cadre, who, I'm sure, will leave behind some ideas for political writers to kick around for quite some time. One of my friends told me that my appeal would be either to the very young who are striving for liberty, or to the very old, who remember what it used to be like when we were relatively free.

Now a word about how an apple grower who could consider thinking of running for Congress. Well, a couple of gentlemen I know have asked me to support their Congressional races. I have known both men for a long time, and I want everyone to understand that I respect them. But, it seems to me that they are both locked in a system of popularity politics and all they are doing is playing the game the way it has always been played. They have both asked me for support, so they can serve me. I'm like a lot of you—I don't want to be served. The bull serves the cow. Washington, D.C. is full of able politicians "serving us." It's also full of people who know their way around both Washington and politics. As I see it, the issue is WHO is going to run our lives anyway—we or the government?

All I ever hear from political candidates seeking office nowadays is some appeal to popularity which is leading us down the path of the government, by the government, for the government, and more government. It seems to me that our politicians, both Democratic and Republican, are losing their common sense. A common sense, limited approach to government has always appealed

to me. In the last ten years in Idaho under Republican leadership our state budget has gone up five times. Where does it stop? Private growth in Idaho doesn't begin to match this. I was one of those who through changing governors a few years ago was going to cut down the role of government in my life. What a surprise that was. Another group later thought we should change again. Our former governor's replacement is doing fine—with regard to keeping state meddling on the increase at our expense. (Incidentally, the Governor does promote apple juice in the Governor's office as a refreshment, so he's not all bad!) It's just another example of an extremely able politician playing the political game of "service" under the present set of rules. Remember, these are not bad fellows, but also remember that we are not cows, either!

It does seem hopeless out here on the producing end of the economy. We elect good men to public office. Sooner or later their nostrils get infected with marble or they get a dose of Potomac Fever and this somehow turns them into madmen with the public coffers. The battle ends up being between the ins and the outs—no one caring about right or wrong—just carefully worded statements so the "good guys" can replace the "bad guys"—hogwash!

I hope when any politician comes to town to tell you of his capabilities to "serve" you that you will (1) tell him about the things you hope he won't do for you, (2) grab your wallet, and (3) run for cover. Now I think it's true beyond the question of a doubt that most any politician will "serve" you better in Washington than I if you want any favors from the government. My sole aim is to reduce government—not streamline it—not make it efficient—just reduce it.

I hold that we Americans are a rational, reasonable people—otherwise how could we even get home driving in eight lanes of 5 o'clock traffic, or fly airplanes, or grow apples? Did you ever try to do that well voting? Just like a friend of mine who works at Symms Fruit Ranch—he didn't want a war so he voted for LBJ—sure enough he got a war. After four years he thought the federal budget was looking too fat and unhealthy, so he voted Republican. If he thought the budget was unhealthy then, look now.

How can we cut through all this? How about free enterprise solutions? Haven't we had enough government solutions? All the politicians get to meddling and they tend to confuse and make worse most problems we could solve ourselves. What is needed is to release creative personal initiative and human effort from government shackles at every level. Why don't we adhere to Jefferson's principle, "Throw the government in chains and free the people." Remember, government means politicians. There is work to do, houses to build, people to feed, children to educate. Bureaucracy and regulation at every level is in the way. If the politicians would work as hard to make free enterprise work as they do socialism, maybe we could get some things going.

Ask your political candidates to answer this question: "Why is it that both state and federal office holders got their pay raises prior to wage and price controls?" Just once wouldn't it be fun to freeze every level of government and give us the chance to catch up out here on the producing end of the economy?

I want to emphasize producing. I'll tell you this—I like being a producer. So it won't break my heart if I don't get elected because I am unable to get this message through a

biased anti-profit, anti-capitalistic mentality so prevalent in our opinion-making community. All I ever hear is, "Can he win?" or "Will it pass?" How refreshing it would be to have one political party in this country that just wanted to know if it was right or wrong.

What really brings this thing home to me is when our own Idaho apple industry out of desperation due to clogged apple markets is favoring a marketing order for apples which is based strictly on the premise of compulsory apple production controls. In the days when we had the little grocery stores the apple price at the retail level had a close relationship to the price received by the farmer. In other words when there were too many apples, they were sold cheaper in the stores, therefore increasing consumption and unclogging the market. Today, as apples are sold through the chain store produce counters, the price fluctuates very little with regard to supplies. My point is this—big government, big business, and big labor evolve together—all power oriented. It is just simply impossible for the small businessman to fill out all the forms and abide by all the regulations so he sells out, goes broke, or gives up. Isn't it strange that the U.S. Navy can train a carrier-qualified, high-performance, instrument-rated fighter pilot in 18 months while it takes organized labor four years to train a journeyman plumber? Trade unions and marketing orders are not aimed at increasing production, but limiting it. Common sense tells us that to increase our living standard we should increase production—not limit it.

I own an Elaine Powers Figure Salon franchise. If I didn't have the expertise of the parent company taking care of all the government regulations and all the FTC requirements, it would be impossible to operate. If you doubt me, just go to Boise, Nampa, or Lewiston and open a ladies' health club. Your education in business red tape, regulations, and free markets will really get a lesson. Believe me, the tuition is not free, and be sure you have lots of pencils to fill out all the idiotic forms.

How about your income tax form? Isn't it ridiculous that a man working for wages can't fill out his own form? Income tax forms should be simple. The only reason for taxes should be to support limited government—not some complex scheme of a social planner to level wealth or play favorites or to give special privileges to certain groups. We were promised reform by every administration since Eisenhower. Maybe I'm blind, but I don't see much change except that they are a bigger pain in the neck to complete, they still play favorites, and for the most part, they are an exploitation of individual human effort.

Some vote-buying politicians cry about rich capitalist exploiting the poor. I think all of us, both rich and poor alike have one thing in common—our lives. Moneys and privacy are being exploited by a cancerous growth like bureaucracy. Isn't enough, enough? Or do we have to let the professional politicians sell us down the river before we wake up?

Back to apples. We stick to principles to grow and sell good apples and we value our reputation with our customers, employees and people we do business with. Just how is the politician's reputation today? Is there really a dime's worth of difference?

What happened to the principles of the Republican party? How come it's more important to win an election that it is to stick to principles? We Republicans have helped in running up our nation's debt to a point that

we should be ashamed of ourselves. I want to raise my children to respect honesty as most of you do. What happened in Washington? It looks to me as though the Republicans have gone Democrat and the Democrats have gone Socialist in a mad rush for power to "serve" our good old cow. Between the bull serving us and the tax collector milking us, when are we going to produce?

It looks to me like Billy Sol Estes did the same thing with fertilizer and salad oil that the U.S. Treasury has done to gold. No wonder some of our young people get disillusioned with us. No wonder the foreign countries don't trust us. How could we be shocked by the results of the United Nations vote to dump Free China? How many of you have friends still in Viet Nam? War is "Hell", and when involved we should view it like Vince Lombardi did football, "Winning is everything." Wasn't Korea enough of a lesson in playing touch football with the tenacious, vicious enemy that plays for keeps and knows the ideals they stand for?

What this country needs is to respect property and human rights (which common sense tells us are one and the same), and to strive for maintaining free entry into the market for everyone. No favorites, no free lunches, and no exceptions.

It seems as though it is an inescapable conclusion that the people in Washington are doing their best to serve their districts. You know what that really means—there is absolutely nothing that the government ever gets that it doesn't first take away. Why don't we just once all get together and tell the tax collector to either stop interfering or we stop paying?

Still, on the plus side, some of the people in Washington do know what they are for—God bless John Ashbrook—thanks to him we still hear that Adam Smith is alive and kicking and that capitalism is a moral philosophy. Why won't the Republicans give them a hearing?

Usually all we do is holler about welfare abuses, but never ask how it is that all these people are out of work. What about minimum wage laws? What about union labor monopolies? What about politicians who dangle the welfare carrot in front of the voter and help to lock him in his present situation? What is moral about this? Give the vote-buying politician and the welfare recipients an equal opportunity to work and I'll put my bets on the character of most of the welfare recipients.

If there are enough of you that share these same ideals that I have, let me hear from you. But before you do any urging, ask yourself these questions:—

(1) Do I care about principle enough to back a candidate who is not going to participate in a popularity contest?

(2) Would I care if my candidate refused to kiss babies and would only wage a campaign on ideas?

(3) Could I afford to have a representative from Idaho who would be breaking his neck to throw rocks in the way of the bureaucracy in Washington instead of in the way of free enterprise?

(4) Would I want someone in office who isn't hungry for the job, power and prestige that goes with it and would really rather be an apple grower that the government would just leave alone?

If your answer is "no" to any of the above, please throw this in the trash.

If your answer is "yes" and you are ready for dynamic diversion from "Rah Rah" schoolboy politics into a battle of ideas which in the long run could have con-

sequences by limiting government and expanding individual freedom:

(1) This isn't a one man show—I can't do it alone—Your support will be appreciated.

(2) Show this to your friends and have it reprinted if you wish, or write me for additional copies—Stevens D. Symms, Route 6, Caldwell Idaho 83605.

(3) When the next politician tells you how he's going to "serve" you, run for cover.

Consider this my formal announcement of my candidacy for Congress from the First Congressional District, on the Republican ticket.

God save the Republic—Steven D. Symms.

[Press release from Steve Symms, Aug. 7, 1991].

Recent speculation by the media and others regarding my intentions toward another campaign for the United States Senate are symptomatic of the predicament in America and Idaho today. You're focused on the wrong thing: "Will Symms run or won't he?" This has taken center stage since the moment my prospective opponent formed an exploratory committee in Washington D.C.

There are hundreds if not thousands of other issues more significant.

In a global sense, whether or not Steve Symms runs is not important. What is important are the ideas, philosophy and principles of the candidate. Eighteen years ago an apple knocker from Sunny Slope ran for Congress, not knowing whether or not I would win, but determined to add the word freedom to the campaign rhetoric. I didn't promise to make government efficient. I didn't promise to streamline government. I said I'd try to reduce government. Those who would listen heard me say government was the problem, not the solution. Enough people agreed that the unexpected happened. I went to Congress.

For the last two decades, its been exciting—first as a candidate, then a Member of the House, and now a Senator, I have been able to press my belief that freedom works, that individuals should be able to work and enjoy the fruits of their labor unencumbered by the octopus of government. I've kept my promise. I have tried to reduce government and maintain my sense of humor and perspective in the process.

And I'm not finished! As long as there's a heartbeat in this chest, I'll continue the quest for freedom. I don't intend to give Ted Kennedy, Jesse Jackson, or Dick Stallings a free rein.

My two Senate campaigns against Frank Church and John Evans were as much fun as anything I can remember. Not because I doubted either of these men's sincerity, but because these races presented Idahoans with a clear choice between more government or more freedom. Freedom won both times. Given that choice, Idahoans will choose freedom again.

Stallings now says Idaho has changed, Steve Symms hasn't. He says I'm out of step. He cites a poll—a survey of a few hundred people—as proof. Well, he's half right. Steve Symms hasn't changed. I hope I've grown. After 18½ years my perspective is much broader—but my beliefs are even more confirmed.

The last eighteen years have given me plenty of opportunity to joust with the news media too. Freedom is one dimensional to most folks in the media. They understand freedom of the press, but they take on a blank look when you start talking about individual liberty or the responsibility that goes along with it. What really galls the

brethren of the press is that the people of Idaho still have such good common sense in spite of the barrage of propaganda. The Idaho voter is somehow able to see through the bias. And, when given a clear choice, they consistently vote for freedom, and ignore the messianic insight of the holier-than-thou editorial writers. Fortunately, I've always tried to give them that choice.

As I said in 1972, I went to Washington to reduce government. But there are some things government should do. National defense comes to mind. I'm proud to say I've been a constant supporter of a strong national defense. I've also supported using our military to keep the peace and promote freedom. Angola and Central and Latin America are moving to democratic capitalism. The Persian Gulf experience is proof positive that my position was and is the correct one. Yet, even with the stunning victory in Kuwait, as a percent of gross national product, America is spending the least amount on national defense since just before the Korean War. History tells us this is risky at best.

I was privileged to support President Reagan when he proclaimed America was back. It's no accident the Berlin Wall came down. Who would have thought that a Soviet dictator would attend, hat in hand, an economic summit of free, capitalistic nations. Gorbachev is begging for dollars to keep his bankrupt economy afloat while he continues to spend billions on missiles, tanks, ships and bombers. The Communist/Socialist command-control societies can't compete. Gorbachev and his cronies can no longer repress their people's right to the freedom we take for granted.

Peace is breaking out in the Third World too. No doubt you didn't hear or read about it in Idaho, but I'm proud to have played a role in that process: Angola by passage of my amendment to repeal the Clark Amendment and the work of the Central America Task Force.

Transportation is another area where the federal government has been able to coordinate our resources to improve our transportation. Thanks to President Eisenhower who recognized the need to move armies rapidly, we've built the best transportation system in the world and I'm proud to have played a role in this.

Private property is the foundation of all freedom. The harshest policy is that which takes private property during one's life and the cruelest tax is that which confiscates private property upon the death of the owner.

But, all that is in the past. What is Steve Symms going to do in the future? Am I going to run or not?

I am looking forward to the 1992 Senate race. It's going to be a lot of fun. I believe Idaho voters will again have a clear choice. Stallings is on the left, sometimes the far left, of the political spectrum (left of the United Nations resolution on the gulf). Idahoans, at least the vast majority of Idahoans, are from the center to the right. Most Idahoans are common sense conservatives who believe in hard work, the family, and individual liberty.

Stallings decided to run for the U.S. Senate because he took a poll. If you ask me, a poll is a pretty shallow reason for wanting to be a Senator. What's he going to do if he's elected, take a poll every time there's a tough vote? Being a Senator means taking a stand, believing in something, voting your conscience and taking the heat.

Stallings says his poll tells him he can defeat me. That's what the polls told Frank

Church and John Evans. Well, they aren't the only ones who can take polls. I took a poll and it shows that in a contest between Steve Symms and Richard Stallings, Symms wins! When the Stallings' record is exposed, the people of Idaho reject the wet-finger policies of the left-leaning Democrat who says one thing but votes the other way.

What's more, my poll says that when you pit Stallings against either Boise Mayor Dick Kempthorne, Lieutenant Governor Butch Otter, or former Attorney General Jim Jones, he loses. And there may be others who could win if they choose to run. The candidate who reflects the center-right will win. The candidate who believes in and votes for freedom, for individual liberty, for a strong national defense and for limited government will win when they run against Stallings, a left-leaning Democrat who worships at the altar of big government and cowtows to the union bosses.

When I went to Washington, I said I wanted you to be as free when I left as when I came. At the end of my current term, I will have worked to preserve your liberty for twenty years. I think it is now my turn to seek my own.

I will not be a candidate in 1992—and I look forward to starting another career in the private sector in 1993.

I thank all Idahoans for the opportunity to have represented Idaho in the House and Senate during this time. For the next year and a half, I intend to keep up the fight. My work is not finished. There is a highway bill to complete. The Private Property Rights Act and the National Recreational Trails Fund Act are still pending and there's still plenty of battles to be fought over the budget hemorrhage. As Idaho's Senior Senator, I fully intend to lead this fight.

If there are words which best describe my feelings as I begin the final months the Senate it is undaunted and rededicated! I'm not going away. I'll be here doing my job. And I will be part of the 1992 Senate campaign.

It has been said that I am a tireless campaigner. I enjoy selling free market ideas, ideals and principles.

As you know, I've never lost a campaign and I don't intend to lose this seat to the Democrats.

I will not sit idly by while a left-leaning Democrat sells the Idaho electorate a bill of goods. Freedom is the mainspring of human progress. I believe it in 1972. I believe it even more in 1991, and it will be an issue in 1992.

I predict here and now that 1992 is going to rain on the Democrat's parade.

My goal is to return Idaho to the Republican column in both the House and Senate. I am convinced that with dedication, hard work and principled ideas—it will happen.

Special thanks goes to my family and Jim Mertz and Dick Buxton, the Chairman and Treasurer of the Symms campaigns, and my friend Ralph Smeed.

I thank all of my constituents for their support and look forward to continued contact in the future.

God bless you and God bless America.

SENATOR STEVE SYMMS' SENATE AND HOUSE STAFF, 1972-92, AN INCOMPLETE LIST

Megan Argiro, Marcia Bain, Mary Barton, Gaye Bennett, Penny Young Bond, Taylor Bowlden, Terry Burley, Rusty Butler.

(At the request of Mr. MITCHELL, the following statement was ordered to be printed in the RECORD at this point:)

• Mr. LEAHY. Mr. President, last night the Senate passed the Justice Improvements Act which included two important amendments. The purpose of the first amendment is to enable the FBI to identify the subscribers to telephones that are used to communicate with foreign powers or foreign agents who engage in clandestine intelligence activities or international terrorism. This section amends section 2709 of the Electronic Communications Privacy Act [ECPA], 18 U.S.C. 2709, to require that a wire or electronic communication service provider give the FBI access, without a court order or subpoena, to information identifying certain telephone subscribers for use in foreign counterintelligence and international terrorism investigations.

The administration initially proposed an earlier version of this amendment in September 1989 and again in successive Intelligence Authorization Acts. Indeed, I am advised that FBI Director William S. Sessions testified in favor of the amendment at a closed Intelligence Committee hearing on May 10, 1990, and that the amendment was publicly endorsed by a special counterintelligence panel established by the

Intelligence Committee on May 23, 1990. The amendment, as it was originally introduced, however, was not acted upon, largely because of civil liberties concerns raised with respect to the original wording.

In 1991, however, new wording was worked out by the House and Senate Judiciary Committees, responding to these concerns, and this provision was included in the 1991 crime bill.

#### BACKGROUND

In adopting ECPA in 1986, Congress established certain privacy protections for subscriber records and other information held by telephone companies and other electronic communication service providers. Congress provided that the Government could obtain a subscriber's transactional records or other information from a telephone company without the subscriber's permission only pursuant to a subpoena, search warrant or court order where there is reason to believe that the information is relevant to a legitimate law enforcement inquiry. 18 U.S.C. 2703.

Congress created a limited exception to this rule for use in counterintelligence and international terrorism cases. In 18 U.S.C. 2709, Congress gave the FBI authority to compel production of identifying information and toll records with a so-called national security letter, signed by an FBI official without judicial review and without relevance to a criminal investigation, where the subscriber is believed to be a foreign power or agent of a foreign power, as defined in the Foreign Intelligence Surveillance Act. Foreign power includes international terrorist groups.

The FBI has concluded that the authority in section 2709 is, in one specific respect, too narrow. To illustrate the problem, the Bureau cites the case of a former employee of the U.S. Government who called a foreign embassy and offered to provide sensitive U.S. Government information. The conversation was monitored, but the former employee did not identify himself. The former employee subsequently met with representatives of the foreign nation and compromised highly sensitive information about U.S. intelligence capabilities. The FBI argues that if it had been able to trace the number from which the first call offering information was placed, it might have been able to identify the former employee sooner or prevent the loss of information.

However, under sections 2703 and 2709 as they were adopted in 1986, the FBI could not, without a subpoena or court order, obtain the identity of a subscriber, unless there was a reason to believe that the subscriber was a foreign power or agent of a foreign power. In the case described above, the FBI did not have reason to believe that the caller was a foreign agent. Instead, the caller appeared to be a possible volun-

teer to be an agent, and therefore did not meet the section 2709 standard.

In response to this limitation, the FBI asked Congress to expand the reach of section 2709, to allow the FBI certification to require phone companies to identify not only suspected agents of foreign powers but also persons who have been in contact with foreign powers or suspected agents of foreign powers. As originally proposed by the FBI, the amendment would have applied to any caller to a foreign diplomatic establishment and any caller to official foreign visitors such as scholars from government universities abroad. This was deemed by the Judiciary Committee to be too broad.

Exempt from the judicial scrutiny normally required for compulsory process, the national security letter is an extraordinary device. New applications are disfavored. However, after careful study, the committee concluded that a narrow change in section 2709 to meet the FBI's focused and demonstrated needs was justified. The provision reported by the committee is a modification of the language originally proposed by the FBI. It allows access where: First, there is a contact with a suspected intelligence officer or a suspected terrorist; or second, the circumstances of the conversation indicate, as they did in the case described above, that it may involve spying or an offer of information.

In addition to covering a future case like the one described above, this new authority would allow the FBI to identify subscribers in the following types of cases, cited by the FBI in justifying its need for this amendment:

First, persons whose phone numbers were listed in an address book seized from a suspected terrorist;

Second, all persons who call an embassy and ask to speak with a suspected intelligence officer; and

Third, all callers to the home of a suspected intelligence officer or the apartment of a suspected terrorist.

Section 2709 as enacted in 1986 used the phrase "subscriber information and toll billing records information" to describe the information that the FBI could obtain. Instead of "subscriber information," the amendment here uses more specific terms: "names, address, length of service." As used in this section, toll billing records consist of information maintained by a wire or electronic communication service provider identifying the telephone numbers called from a particular phone or attributable to a particular account for which a communication service provider might charge a service fee. The committee intends, and the FBI agrees, that the authority to obtain subscriber information and toll billing records under section 2709 does not require communications service providers to create records which they do not maintain in the ordinary course of business.

This amendment strengthens congressional oversight of the exercise of this authority by amending section 2709(e) to add a requirement that the FBI report on its use of the authority to both House and Senate Judiciary Committees as well as both Intelligence Committees. It is the committee's intent regarding this section that the FBI should, without identifying the subjects of pending investigations, inform the committees, as part of this report, of the facts and circumstances that are the basis for obtaining information concerning any domestic political organization or groups under section 2709.

Under section 2703(e), wire or electronic communication service providers who provide information in response to a "court order, warrant, subpoena or certification under this chapter" are protected from liability for such disclosure. The certification signed by the Director or the Director's designee under the section 2709(b) is a certification for purposes of section 2703(e).

#### SECTION-BY-SECTION ANALYSIS

This proposal amends 18 U.S.C. 2709 by striking subsection (b) and inserting in lieu thereof a new subsection containing two paragraphs.

Paragraph (1) of the new section 2709(b) re-enacts the existing authority for FBI access to the name, address, length of service and toll billing records of a person or entity when the Director or the Director's designee certifies in writing to the wire or electronic communication service provider to which the request is made that—(A) the information sought is relevant to an authorized foreign counterintelligence investigation; and (B) there are specific and articulate facts giving reason to believe that the person or entity to whom the information sought pertains is a foreign power or an agent of a foreign power as defined in the Foreign Intelligence Surveillance Act.

Paragraph (2) of the new section 2709(b) authorizes the FBI Director or the Director's designee to obtain the name, address and length of service of a person or entity if the Director or the Director's designee certifies in writing to the wire or electronic communications service provider to which the request is made that—(A) the information sought is relevant to an authorized foreign counterintelligence investigation; and (B) there is reason to believe that communications facilities registered in the name of the person or entity have been used, through the services of such provider, in communication with (i) an individual who is engaging or has engaged in international terrorism or clandestine intelligence activities that involve or may involve a violation of the criminal statutes of the United States or (ii) a foreign power or an agent of a foreign power under circumstances giving rea-

son to believe that the communication concerned international terrorism or clandestine intelligence activities.

This amendment also adds the House and Senate Judiciary Committees to the oversight provision in section 2709(e).

Mr. President, I am also pleased to join with Senators BROWN and KOHL in offering the Computer Abuse Amendments Act of 1992 as an amendment to H.R. 3349.

It is important to update our laws to stay abreast of rapid changes in computer technology and computer abuse techniques. In the 101st Congress, the Senate responded to the threat posed by new forms of computer abuse—destructive viruses, worms, and Trojan horses—by unanimously passing S. 2476. That bill was not considered by the House of Representatives in the last Congress, so I joined with Senators BROWN and KOHL in reintroducing the bill, S. 1322 in this Congress. S. 1322 passed the Senate as an amendment to S. 1241, the Violent Crime Control Act. The provision was altered slightly in the crime conference with the House in November 1991. It passed the House in this modified form as part of the conference report to H.R. 3371, the Violent Crime Control Act.

The Computer Abuse Amendments Act of 1992 is the product of over 2 years of work by the Subcommittee on Technology and the Law. In the 101st Congress, I chaired two hearings on computer abuse. This proposal has been drafted and revised on the basis of careful review of issues raised in the subcommittee's hearings, and with the benefit of consultation with computer experts. The bill has been broadly supported by the computer industry and by computer users. At the subcommittee's hearing on July 31, 1990, Deputy Assistant Attorney General Mark Richard testified that this bill " \* \* \* provides a useful improvement over and clarification of, the scope of existing law.

The free flow of information is vital to our competitiveness as a nation. Innovations in computer technology create new opportunities for improving the flow of information and advancing America's economic future, but they also create new opportunities for abuse by those who seek to undermine our computer systems. The maintenance of the security and integrity of computer systems has become increasingly critical to interstate and foreign commerce, communications, education, technology, and national security.

The National Research Council [NRC] published a major study, "Computers at Risk: Safe Computing in the Information Act." The study finds that we risk computer breaches that could cause economic disaster and even threaten human life. According to the NRC study, "Tomorrow's terrorist may be able to do more damage with a key-

board than with a bomb." The NRC study underscores the need for immediate action to protect our computer systems.

This legislation deals with new technologies and newly discovered forms of computer abuse. An alarming number of new technique—computer viruses, worms, and Trojan horses—can be used to enter computers secretly. Their simple names belie their insidious nature. Thousands of virus attacks have been reported and hundreds of different viruses have been identified. Computer breaches can cause economic disaster and even threaten human life.

Hidden programs can destroy or alter data. For example, a Michigan hospital reported that its patient information had been scrambled or altered by a virus that came with a vendor's image display system. Hidden programs can also hopelessly clog computer networks, as we saw with the Internet work of November 1988.

Other computer incidents, using the same kinds of programs, have been inadvertent. For example, in December 1989, the Vermont State computer network froze. It was impossible to sign on to the system. Rather than a virus or sabotage, it turned out to be a security device in the form of a "time bomb," built into the system's hardware to deter outside access. The manufacturer of the software had failed to inform the State that a special code would be triggered after a given date, locking out access through normal channels. It was nuisance to be sure, but certainly not criminal.

The subcommittee held a hearing on May 15, 1989, to explore the threat to computers and the information stored in them posed by new forms of computer abuse. We heard testimony from FBI Director William Sessions, who stressed the seriousness of the threat posed by computer viruses and other techniques.

The subcommittee also heard testimony from Dr. Clifford Stoll, an astrophysicist at the Harvard-Smithsonian Center for Astrophysics. He testified that many researchers throughout the United States were prevented from using their computers for 2 days as a result of a worm that was introduced onto the Internet computer network in November 1988. While managing the computer system at the Lawrence Berkeley Laboratory, Dr. Stoll caught a West German spy using computer networks to try to gain access to military information.

As a prosecutor for more than 8 years in Vermont, I learned that the best deterrent to crime was the threat of swift apprehension, conviction, and punishment. Whether the offense is murder, drunk driving or computer crime, we need clear laws to bring offenders to justice. Trespassing, breaking and entering, vandalism, and stealing are against the law. They have always been

against the law because they are contrary to the values and principles that society holds dear. That has not changed and will not change.

In crafting this legislation we have been mindful of the need to balance clear punishment for destructive conduct with the need to encourage legitimate experimentation and the free flow of information. As several witnesses testified in the subcommittee's hearings, the open exchange of information is crucial to scientific development and the growth of new industries. We cannot unduly inhibit that inquisitive 13-year-old who, if left to experiment today, may tomorrow, develop the telecommunications or computer technology to lead the United States into the 21st century. He or she represents our future and our best hope to remain a technologically competitive Nation.

Mr. President, this amendment clarifies the intent standards, the actions prohibited and the jurisdiction of the current Computer Fraud and Abuse Act [CFAA], 18 U.S.C. 1030. Under the current statute, prosecution of computer abuse crimes must be predicated upon the violator's gaining "unauthorized access" to the affected "Federal interest computers." However, computer abusers have developed an arsenal of new techniques which result in the replication and transmission of destructive programs or codes that inflict damage upon remote computers to which the violator never gained access in the commonly understood sense of that term. The new subsection of the CFAA created by this bill places the focus on harmful intent and resultant harm, rather than on the technical concept of computer access.

The amendment makes it a felony intentionally to cause harm to a computer or the information stored in it by transmitting a computer program or code—including destructive computer viruses—without the knowledge and authorization of the person responsible for the computer attacked. This is broader than existing law, which prohibits "intentionally access[ing] a Federal interest computer without authorization," if that causes damage.

This legislation recognizes that some computer incidents are not malicious—or even intentional—and they are treated differently. The amendment creates a parallel misdemeanor for knowingly transmitting a computer program with reckless disregard of a substantial and unjustifiable risk that the transmission will cause harm. The standard for recklessness is taken from the Model Penal Code. This provision will give prosecutors and juries greater flexibility to get convictions for destructive conduct.

The amendment creates a new, civil remedy for those harmed by violations of the CFAA. This would boost the deterrence of the statute by allowing aggrieved individuals to obtain relief.

The legislation expands the jurisdiction of the CFAA. It would cover all computers involved in interstate commerce, not just "Federal interest computers," as the current law does. This is appropriate because of the interstate nature of computer networks. American society is increasingly dependent on computer networks that span State and national boundaries. The potential for abuse of computer networks knows no boundaries. The act addresses this threat by expanding the jurisdiction of the CFAA to the full extent of the powers of Congress under the Commerce clause of the U.S. Constitution, article I, section 8.

I want to thank Senators BROWN and KOHL for working with me on this legislation. Enactment of this sound and balanced legislation would help ensure that our laws keep pace with new forms of computer abuse.●

#### THE DEMOCRATIC POLICY COMMITTEE

Mr. DASCHLE. Mr. President, as we enter the final hours of the 102d Congress, I rise to express my appreciation for the assistance the DPC staff has provided during this Congress.

The majority leader, the Democratic leadership, and the entire Democratic Caucus have been well served by the staff of the Policy Committee. Whether through coordination of legislative initiatives, publications, voting record information, channel 18, or communication assistance, this staff has consistently and diligently provided quality services to Members and staff. For the 4 years I have served as the cochairman of the Democratic Policy Committee, I have had the privilege of being associated with one of the finest staffs in the Senate. Many of these people are truly the staff behind the scenes, providing the Senate with invaluable assistance through the many services provided by the DPC, without the personal recognition of most Senators or their staffs.

First, I want to extend my appreciation to Monica Healy. Joining the staff in March 1991, Monica has served as staff director during the period of time the DPC has had as a priority the coordination and publication of Democratic initiatives and programs. The 102d Congress saw a much sharper focus on the issues of importance to Senate Democrats, such as the economy, education and health care. Monica's role in helping to provide this attention is appreciated.

I also want to thank Greg Billings, the DPC's deputy staff director and a longtime member of my staff. He has served as my liaison to the Democratic Policy Committee for the past 4 years and has overseen the transition of the DPC services. I appreciate the time and effort he has expended to ensure that all DPC services provide quality information and that the DPC's weekly luncheon meetings are informational and useful to Democratic Senators.

The staff of the Policy Committee in the Hart Building has undertaken to

deliver some of the most important, yet under-appreciated, services provided by the Committee to Democratic Senators.

#### PUBLICATIONS

Since 1989, Senators and their staffs have come to rely on a number of publications crucial to the efficient operation of Senate offices. The Daily Report and the scheduling information it contains is on the desk of each and every Democratic Senator and their staff before the doors are unlocked in the morning. If it wasn't for the publications staff remaining until the final moments of each day's session, it would be impossible to ensure the accuracy and dependability of this important publication.

Other publications prepared by the DPC staff have reached levels of equal importance. Legislative bulletins, analyzing the important issues in major bills under floor consideration and the amendments that can be expected, are written in detail by experienced Policy Committee staff. Special Reports, with more detailed and thematic information on current issues, have been prepared regularly on topics crucial to Senate Democrats. Pocket cards highlighting the major provisions of important bills acted on by the Senate and Issue Alerts providing Senators and their staff with timely information on issues of importance to the Democratic leadership are the two other documents that round out our array of publications.

I particularly want to commend Marguerite Beck-Rex, the Policy Committee's editor. Marguerite makes certain each DPC publication is coherent, timely, and responsive to the individual needs of my colleagues and their staffs. Given the Senate's schedule and the unpredictable nature of the legislative process, ensuring that DPC's publications meet the objectives we set forth to implement over 3½ years ago is no easy task. The tenacious manner with which Marguerite has overseen this process is the main reason why DPC's publications have the best of reputations and are consistently in demand.

Meeting these objectives wouldn't be possible without the able and professional assistance of three production assistants. Lynn Terpstra was a part of the publication process from the first day, bringing a wealth of experience from her 15 years of DPC service. Victoria Thomas and Loren Burke round out a three-person production team, all of whom approach each task with enthusiasm and professionalism as if it were the first. I am aware of their commitment to work the extra hours and late evenings to see that information is provided in a timely and accurate manner to Senators and their staffs. I offer my appreciation to them for this dedication.

## VOTING RECORD INFORMATION

As chief clerk, Marian Bertram is the cornerstone of much of the history at the DPC. In addition to attending to all of her duties as clerk, Marian also serves to ensure the reliability of the committee's voting record information which is provided to Democratic Senators and their staffs. Joining the DPC in 1971, Marian holds the record as the staff person with the longest employment, spanning the chairmanships of Senators Mike Mansfield, ROBERT C. BYRD, and now GEORGE MITCHELL. She makes certain the highest standard of accuracy is followed in both the voting record information and the DPC operations.

Doug Connolly has as his primary responsibility the overall distribution of voting record information. Senators and their staffs have seen a number of new voting record products, all of which were prepared and coordinated by Doug and the voting record staff. Individualized voting record reports on major legislation and personalized voting record books are two new, specialized voting record products developed by the voting record staff under Doug's direction. In addition, many offices rely on DPC Online, a product he developed to make access to the Senate's mainframe computer more user friendly.

Colleen Brady Stephenson and Celia Maloney work with Marian and Doug to make certain all of the DPC's voting record information and attendance data is accurate, timely, and useful to the Democratic Senators for whom the DPC serves. Also, Clare Amoruso has worked diligently to ensure that DPC's computer services act as an efficient and timely conduit for this information. Calls to this five person staff are guaranteed to be handled with professionalism and accuracy, providing Senators and their staff with one of the most important DPC services. For that, I express my deepest appreciation.

## CHANNEL 18

In January 1990, channel 18 became an integral component of DPC services. It provides Senators and staffs with the most up-to-date information possible on the floor schedule and pending legislative information. Over the 3 years since its inception, Senate Democrats and their staffs have been served by a reliable and professional staff whose mission is to distribute quality and timely legislative and scheduling information each and every minute the Senate is in session.

Lisa Plante and Jeff Pray recently joined the DPC staff as the channel 18 operators. In the short time they have been directing this facet of DPC services, they have demonstrated the talents necessary to ensure the continuity of channel 18's quality information.

It isn't possible to mention channel 18 without offering my appreciation to

the two staff people who recently preceded Lisa and Jeff. Juliana Blome and Molly Donovan provided Senators and staff with reliable and consistent legislative and scheduling information over the many hours they served as channel 18 operators. Losing Juliana to the staff of Policy Committee Senator FRANK LAUTENBERG and Molly to an outside computer service left a void I'm certain Lisa and Jeff will work diligently to fill.

## DOMESTIC ISSUES

Over the past 4 years, the DPC has provided Democratic Senators and their staffs with timely, accurate, and detailed analysis of the issues considered in the Senate. Meeting this objective over the past few years would not have been possible without the commitment and dedication of many quality and professional staff.

Joining the DPC staff in his first job in the Senate, Paul Carliner primarily monitors energy and environmental issues, providing both the majority leader and the DPC with comprehensive, accurate, and timely information in these two important areas. The quality service he provided during consideration of the energy bill is appreciated.

Special reports and issue alerts on health care have been the primary responsibility of Mary Ann Hill. DPC health care publications have been consistent in quality and information. Mary Ann's steady performance in covering health care, along with a number of other issues including judiciary and campaign finance reform, has been an important asset to the DPC.

Chris Moseley originally joined the DPC staff as an intern and soon moved to a permanent policy analyst staff position, monitoring economic, appropriation, and education issues. Chris often was pressed into service to cover issues with which he wasn't familiar and did not have immediate expertise. He took them on without complaint because he wanted to see the standards of the DPC publication process maintained. Whether taking on these new responsibilities or tending to those to which he was assigned, Chris approached all of his assignments with professionalism. For that, I am appreciative.

Kris Balderston, who joined the staff earlier this year, brought to the DPC a strong background in State and local government. He has provided experienced staffing expertise to an urban affairs task force formed earlier this year by the majority leader and served as the DPC liaison to another leadership effort on defense conversion.

Health care is an issue primarily under the responsibility of Michael Werner. In order to ensure that health care remains a top priority of Senate Democrats, Michael has worked diligently to assist in coordinating the legislative efforts of Senate Democrats in the health care area, an issue that

will remain a top priority in the coming Congress.

I also want to express my appreciation to David Corbin, the DPC's researcher and author of a number of Policy Committee special reports pertaining to the economy and other issues of concern to Democratic Senators and their staffs. He has demonstrated a consistent approach in his efforts to prepare useful and timely information for our colleagues and has on more than one occasion demonstrated that his background as an author has served him well in preparing DPC publications.

Two new additions to the DPC staff include Tony Morgan and Russell Dunn. As staff economist, Tony brings a wealth of business background to the committee's service to Democratic Senators. Russell joins the DPC staff from the majority leader's office, bringing with him the experience inherent in working in that office.

The review of any professional organization would be incomplete without acknowledgment and the dedication and professionalism the support staff brings to the effort. Kelly Paisley has served as the staff director's assistant and the office manager of this facet of the organization. She ensures the efficiency of the operation by coordinating the efforts of two staff assistants, Vonzell Brown and Julie Cote. Along with Jeff Hecker, the systems administrator for the computer systems at the DPC and Senator MITCHELL's office, this four person team oversees the smooth operation of the office, the computer systems, and the Job Bank Referral Service, a resume clearinghouse for Democratic offices.

I also want to express my appreciation for the services provided by Andy Phillips and his successor, Mike Morgen. They, too, provide backup assistance to ensure the DPC's efficient operation.

As we end this session of Congress, I want to acknowledge the contribution made by five staff people who left the DPC staff during this Congress.

Brenda Corbin Sargeant completed over 10 years of service to this committee in January of this year. Brenda began her career writing and analyzing voting records, and later writing legislative bulletins on issues scheduled for floor action. The last year of her experience at the DPC saw her totally immerse herself in the complexities of health care, authoring one of the most popular DPC publications ever produced, a comparison of health care programs in Canada, Germany, Japan, and the United States.

I also want to express my appreciation for the experience Ken Jarboe brought to the DPC. Joining the committee after having served on the staff of Policy Committee Vice Chairman Jeff Bingaman and the Government Affairs Committee, Ken assumed the re-

sponsibility of making certain Senators and their staffs were well-informed on trade, economic, and technology-related issues. Many of the Democratic legislative priorities in the technology area he monitored during his service at the DPC came to fruition through the Democratic Initiatives passed in the last days of this Congress.

Charlotte Hayes brought a mixture of legislative and communications experience to the issues for which she was responsible. Quality and detailed information on education, labor, and women's issues were guaranteed to be presented in any effort Charlotte undertook. The addition of Charlotte to Senator GORE's staff truly was a loss to the DPC.

Heather Hart left the DPC staff after a year of service to become a staff assistant on the Energy Committee. Serving as an assistant to the deputy staff director, Heather demonstrated a level of professionalism and competence far beyond her level of practical experience. Her contribution to the efficient operation of this DPC office was appreciated.

Finally, I want to express my appreciation to Wanda Bailey, who served as a staff assistant for nearly 2 years. Her cheerful personality left many visitors to the DPC with a positive impression. I know she will carry these attributes throughout her career and her post graduate studies at Harvard.

#### FOREIGN POLICY ISSUES

Foreign policy issues at the Democratic Policy Committee have been developed under the expertise of three principle staff people, Sarah Sewall, Ed King, and Brett O'Brien. Sarah, a member of Senator MITCHELL's personal staff before joining the DPC in 1989, has assisted the committee's effort to make certain all Democratic Senators and their staffs are well informed of the latest developments in the former Soviet Union and Eastern Europe, her primary responsibilities.

Developments in China have been considered in great detail by the Senate. Ed King has filled an important role in making certain developments in both China and Central America are monitored and adequately explained in a timely fashion to our colleagues. I express my appreciation for the assistance he has provided in this area.

The newest addition to the Policy Committee's senior staff is Brett O'Brien. Originally joining the DPC to write foreign policy and defense publications, Brett has assumed the role of Armed Services Committee staff person for Senator MITCHELL and the Policy Committee and has provided quality military issue information to our colleagues.

Leah Titerence is the newest addition to the DPC's foreign policy staff. She joined the DPC to write foreign policy and defense publications and has

filled this role in an exemplary manner in the short time she has been a member of this staff.

I also want to express my appreciation to Wendy Dekker, an experienced staff assistant who recently retired from the DPC after nearly 10 years of service. Wendy was responsible for the organization of the foreign policy office and for the details of many of the foreign oversight trips undertaken on the part of the leadership. Over her many years of service at the DPC, many Senators and their staffs benefited from her experience and professionalism. I offer her my best as she begins her retirement.

Another longtime staff person who left during this Congress was Scott Harris, the DPC staff liaison to the Armed Services Committee. Scott's many years of legislative experience in military issues brought a wealth of experience to the DPC's informational effort. I offer my thanks to him for his many years of service to the DPC and all Democratic Senators.

#### FLOOR STAFF

There is not a Senator on either side of the aisle who has not been touched by the able and professional assistance of the DPC's floor staff. Under the direction of Charles Kinney, chief floor counsel to the DPC, and with the able assistance of the Assistant Secretary for the Majority, Marty Paone, and floor assistants Lula Davis and Art Cameron, the thousands of daily details are coordinated to guarantee the smooth operation of the Senate.

Nancy Iacomini and Brad Austin, staff assistants in DPC's Capitol office, are the important link between the floor staff and all other facets of the DPC staff and the offices of other Democratic Senators. Until he recently left the DPC staff for medical school, Pierre Golpira was a valued member of this office. I offer my appreciation to Nancy, Brad, and Pierre, not only for their efforts to coordinate the information flow within the DPC, but for their diligence in attending to the details of the Policy Committee's weekly luncheon meetings. These luncheons are among the most successful of our projects, and I know that wouldn't be possible without the attention they have provided to them.

#### COMMUNICATIONS

Finally, Mr. President, I want to recognize the role of the DPC's communications process. Notwithstanding competing demands, uncertain scheduling, and an unpredictable floor agenda, the communications staff has made certain that the Democratic Senate agenda receives the full attention of the media and the American public for our legislative accomplishments.

In addition to serving as the majority leader's press secretary, Diane Dewhirst, the DPC's Director of Communication, plays an integral role in developing this communication agenda

and making certain all Democratic Senators and their staffs are cognizant of the leadership's position on timely issues. Working in highly charged environment with many conflicting demands, Diane brings a balance of communications and legislative background to this very important position. Mary Helen Fuller and Jim Manley assist her in making certain the best possible information is provided to our colleagues.

Garth Neuffer recently joined the DPC as senior media adviser. He has had as his primary responsibility the long range planning and development of issues of primary importance to Democratic Senators. Working in coordination with the legislative schedule and other leadership priorities, Garth, along with Trish Moreis and Amy Pressman, two new staff additions to the communications effort, has played a valuable role in developing our use of new and innovative communication devices for long-range planning on our key issues.

I also want to commend the excellent service provided to Democratic Senators by the DPC's broadcast services staff. Under the experienced direction of Kevin McManus, this entire staff provide Senators and their staff with professional and timely television broadcast services. Along with Christine Deckel, Clare Flood, Kevin Kelleher, and Mark Marchione, this team upholds the Policy Committee's exemplary standards of professional service to assist Senators with their communication needs. To them, I extend my appreciation.

#### THE 10TH ANNIVERSARY OF THE DEATH OF KORCZAK ZIOLKOWSKI

Mr. DASCHLE. Mr. President, when we speak of beauty, we often divide it into two categories, that which is created by nature, and that which is created by the hand of man. Many times, however, some of the most remarkable creations involve a synthesis of the actions of man and nature.

Two such examples of this synthesis are Mount Rushmore and Stone Mountain, which are carved out of living stone of our Nation's mountains. All who view these monuments experience a profound appreciation for the history of our country and our cultural heritage.

Today, as a result of the determination of a visionary sculptor, the face of another such monument is gradually taking shape in the Black Hills of South Dakota. Nearly 40 years ago, Korczak Ziolkowski began to act on his dream to commemorate the great Sioux leader Crazy Horse by carving a monument to him in the scared mountains of the Black Hills. When it is completed, it will stand as an awe-inspiring testament to the central role played by the Native American in United States history.

Sadly, as is often the case with projects of massive scale, the person responsible for its genesis will never see its completion. Mr. Ziolkowski died on October 20, 1982 at the age of 74, after having dedicated decades of his life to the realization of his goal. Today, nearly 10 years later, the task of completing the monument is being carried out by Mr. Ziolkowski's wonderful wife, Ruth, and their children.

As we near the 10th anniversary of this great man's death, I would like to take this opportunity to recognize his contribution to the preservation of our Nation's heritage. It takes a true visionary to look into the future and conceive of a creation that will offer future generations of Americans a clearer window into their nation's past.

#### FARMERS AID IRAQI CHILDREN

Mr. DASCHLE. Mr. President, I speak today to support the humanitarian effort of farmers across the country who are working to send milk powder to disadvantaged children in Iraq.

This project is supported by a non-partisan organization known as the Committee to Save the Children in Iraq, founded in May 1991. The committee is comprised of volunteers who coordinate the entire effort, arranging transportation and overseeing the delivery of the milk powder. Although I am not very familiar with the Committee to Save the Children in Iraq and do not support all of its policy goals, I became aware of the milk lift project when dairy farmers in my State advised me of their involvement in it, and I am proud of these farmers' efforts.

I would like to relay some history about the milk lift to Iraqi children. The effort to send milk powder to Iraq on October 1, 1991, when 20 farmers from 8 States, including South Dakota, developed a plan to help children in Iraq who are being denied proper nutrition. This was conceived at a time when some dairy farmers across the country were considering dumping milk on the ground to protest low farm prices. Since then, they have sent four shipments from the United States amounting to over 9,750 pounds of non-fat dry milk, which would equal about 50,000 quarts of fluid milk for Iraqi children. Over 100 farmers in 16 states are now active in the project.

These hope to convey two key principles to the public. The first is that food should never be used as a weapon against innocent children. "The State of the World's Children 1992," a recent report by UNICEF, states that 250,000 children die every week from starvation and disease. The report also says that children in Iraq are paying the heaviest price for the gulf war. The second principle is that independent farmers in the United States, who have shown throughout history their will-

ingness and ability to feed the world's hungry people, should not be forced out of business by an unjust U.S. farm policy.

Mr. President, I share those principles and support this effort to bring humanitarian relief to Iraqi children, who bear no responsibility for the brutal circumstances to which they have been subjected.

#### IN HONOR OF FALLEN FIREFIGHTERS

Mr. RIEGLE. Mr. President, this Sunday is the 11th Annual National Fallen Firefighters' Memorial Service and Americans will gather to honor firefighters who died in the line of duty. It is right and important that we recognize the sacrifice that these citizens made in protecting their communities. We all join in the sense of loss we feel in the passing of these brave public servants.

Three Michigan citizens died last year while fighting fires: Donald J. Daughenbaugh of Romulus, and Joseph Kail and Charles Love, both of South Boardman. I would like to extend my sympathy to the family and friends of these men; they, too, have had to make sacrifices for the good of their communities while they are grieving, they can also be proud of their loved ones' selfless commitment to the public good.

As we pay our respects to our lost firefighters, I believe that we should renew our commitment to the firefighters who continue to put their lives on the line. Although fire departments are governed and financed at the local level, the Federal Government plays a role in a variety of areas including setting safety standards and requirements. We have an obligation to do what it can to help minimize the risks that firefighters face.

I am a member of the congressional fire services caucus and I commend the work the caucus is doing to raise the profile of fire issues here in Congress. I look forward to continuing to work next year on issues that will improve fire safety in this country and help protect our firefighters.

#### TRIBUTE TO LAWRENCE WEINBERG

Mr. AKAKA. Mr. President, It is with great pleasure that I rise to recognize the exceptional achievements and community involvement of an outstanding American and friend, Lawrence Weinberg.

Lawrence Weinberg was honored this past Sunday evening at AIPAC's Los Angeles Community Dinner for his ongoing commitment to community service and political activism. I can think of no individual more deserving of this special recognition, yet I am certain that Larry, in his unassuming manner, must be slightly unsettled by the out-

pouring of accolades and tributes he so richly deserves.

In every endeavor undertaken, as the founder and chief executive officer of three very successful businesses; as owner of the NBA Portland Trail Blazers; as president, CEO, chairman, and chairman emeritus of the American Israel Public Affairs Committee [AIPAC]; as Democratic National Committeeman; as chairman, director and trustee of numerous charitable organizations and foundations, Larry Weinberg's dedication, diligence, and energy have yielded a distinguished and diverse record of achievement and service to nation and community.

Lawrence Weinberg can be particularly proud of the dedication and good works he has devoted toward maintaining a strong, secure and democratic Israel and preserving the special bonds of the United States-Israel relationship. As a decorated infantryman during World War II, Larry Weinberg participated in the liberation of the Nazi death camps and witnessed firsthand the horrible aftermath of the Holocaust. As a young man, confronted by the unspeakable and unimaginable specter of death, cruelty and suffering, he made a solemn promise that he, as one individual, would make it his mission to ensure that a repetition of this genocide would never happen again. His actions from that day through the present have fulfilled that promise to the benefit of all people of goodwill. Those of us fortunate to know Larry admire the courage of his convictions and the resonance of this character.

Mr. President, a great American statesman once said, "One man with courage makes a majority." Lawrence Weinberg's good works and commitment to service are a testament to the difference that one individual can make, the impact that one voice can have in bringing people together and effecting positive change. There is a Yiddish word, "mensch", which perfectly describes Larry Weinberg and conveys the esteem, affection and respect felt for him by his friends better than the lengthiest testimonials. Lawrence Weinberg is truly an extraordinary man.

#### THE ENERGY POLICY ACT OF 1992

Mr. DOMENICI. Mr. President, our Nation's standard of living and quality of life is in great part a function of our energy policies. Energy affects every aspect of our economy—from industrial production to ensuring a reliable energy supply to support service industries—energy is a critical factor in determining our economic prosperity.

Here in the United States, we are developing a new concept of energy—one that stresses the necessity of clean fuels, conservation, mass transportation, and an emphasis on renewable energy resources. This legislation con-

tains strong provisions aimed at addressing our energy needs through efficiency and conservation. It calls for more efficient use of energy throughout our economy, including improvements in the industrial sectors, increasing energy efficiency in the Federal Government, and encouraging more efficient use of energy by utilities.

My colleagues know that I strongly supported both the National Energy Strategy proposed by President Bush and the original National Energy Security Act as reported from the Energy and Natural Resources Committee. Both represented a balanced and thoughtful approach to our need for a national energy policy. Unfortunately, not all the provisions included in those two early energy proposals have survived the legislative process. However, this legislation remains one of the most important pieces of legislation to come before this Congress.

It is impossible to speak in appropriate detail to the broad range of provisions included in this bill. I would, however, like to draw particular attention to two areas which have special importance to me.

As one of the original advocates for ensuring that America has a viable, domestic source of uranium and uranium enriched fuel, I am very pleased that we are about to enact legislation to facilitate the cleanup of mill tailings sites and to ensure the continued supply of uranium and competitively priced enriched uranium through an effectively restructured uranium enrichment enterprise [UEE]. I stated in April of 1986 during one of the first congressional hearings on this issue, that a restructured UEE is essential for the good of the nuclear energy industry, which supplies over 20 percent of the Nation's electricity, for our energy independence, for our environmental concerns, and for our economy. I believe this is true now more than ever.

While I am gratified that we are finally acting on this important energy legislation, I must remind my congressional colleagues that the long delay in getting to final action on the comprehensive uranium legislation has not been without some consequences. At one time, the United States led the world in uranium production, and my State of New Mexico was the world capitol in uranium mining. Today, however, there are few remaining uranium mining operations in the United States, with enormous uranium reserves, producing only a small portion of our domestic needs. Had we paid better attention to the policy considerations of all elements of the nuclear fuel cycle, which I attempted to do in legislation I introduced in April of 1985, I believe we would be more energy independent today. I am pleased the conference has also retained the over-feeding program to encourage the con-

sumption of domestically mined uranium.

I commend the conference for adopting the mill tailings remedial action plan. At long last, the Congress is recognizing the Nation's responsibility for the cost of decommissioning and stabilizing these mill tailings sites that came into existence under Federal contracts, yet have been left with private businesses and local communities to manage.

In this post cold war era, action on this restructuring language is very timely and is very much needed. The newly created Uranium Enrichment Corp. will play a central role in turning the weapons of the cold war into plowshares of nuclear energy fuel. I also believe the corporation will play an important role in maintaining order in the world enrichment market as the transformed highly enriched uranium enters the marketplace.

The conference committee reached an equitable solution to funding the decontamination and decommissioning program for the UEE facilities. There were many during the course of debate who would have foisted the government's responsibility onto nuclear energy ratepayers, heaping additional, and artificial, costs on nuclear energy generated electricity.

This bill also finally concludes the debate on what is the acceptable accounting principle under the 161 v. provisions in the Atomic Energy Act. Again there were many who through accounting gimmickry were plotting various taxing schemes to amass funds from utilities and their ratepayers, and drive up the cost of nuclear energy. I want to add as a postmortem on this so called unrecovered cost issue that when I first introduced my comprehensive uranium bill in 1985, I calculated that their was a shortfall in revenues over expenses. Accordingly, my proposal would have required the payment of \$350 million into the Treasury. However, since 1986, the UEE has returned to the Treasury more than \$600 million in excess revenues over appropriations. This bill rightly dismisses the unrecovered costs issues and returns to the corporation the unexpended appropriations and accounts that have been earned through appropriations.

While I am on this topic, I wish to recognize the efforts of those who have worked so hard for so long on this restructuring legislation, particularly the staff of the Senate Energy and Natural Resources Committee. I also want to thank two AAAS congressional fellows, Paul Gilman and K.P. Lau, who first worked with me on this issue 8 years ago and are responsible for putting together the framework for this comprehensive uranium bill, which is embodied in H.R. 776. They have since left my staff, but I thank and compliment them, and I applaud AAAS and IEEE for supporting the Congressional

Fellow Program that brings scientists and engineers into the legislative process.

Of equal importance are those provisions in this conference report dealing with the domestic production of oil and gas, particularly changes to the way in which oil and gas production is taxed. I represent one of the big oil and gas production States. While rigs sit idle in my State, and while wells are shut in all over the Nation, we are importing almost half the oil we consume on a gross basis. That represents an increase by almost one-half over our dependence in 1985.

The tax title contains some of the most important energy provisions for independent producers. Right now, they are being taxed out of existence by the alternative minimum tax [AMT].

Independent producers have been stuck in the AMT since it was enacted in 1986. Under the AMT there are four big penalties imposed upon investments made by U.S.-based taxpayers who explore for, and produce U.S. oil and gas reserves. These penalties hit the independent oil and gas producers who drill 85 percent of all domestic wells. There are two tax penalties on drilling investments and two penalties on asset depletion. Without the independent oil and gas producers' exploration and development activities, the options for an energy strategy would be greatly limited. The President recognized this, and fully supports AMT relief for independent oil and gas producers.

This bill also contains important reforms of the Public Utilities Holding Company Act [PUHCA] that will enable independent power producers [IPP's] to meet a significant share of our country's future power needs. I anticipate that these IPP's will, in many cases, utilize energy efficient, abundant, and clean burning, natural gas.

To the many New Mexicans involved in the production of natural gas, this bill, in conjunction with the recent rulings by the Federal Energy Regulatory Commission [FERC], sets the basis for a stable and reliable domestic natural gas market. I anticipate that the groundwork has been established for a period of growth and prosperity in the natural gas industry.

I am very pleased to have worked with my colleagues, in particular Chairman JOHNSTON and the ranking member of the Energy and Natural Resources Committee, MALCOLM WALLOP as this legislation has developed. It has been a long, and at times, frustrating process. However, today our efforts have culminated in a bill of which we can all be proud.

#### TRIBUTE TO BILL KNAPP

Mr. DURENBERGER. Mr. President, I rise today to pay tribute to someone

who has been an inspiration to me and to many Minnesotans. Bill Knapp had been a public servant in the small town of Menagha, MN, for many years. During that time he served on the city council, but like so many of the people I admire, BILL did more than make up a quorum in the council chambers.

Anyone from Menagha can tell you that Bill had been a vital part of the community. As city administrator Char West put it, "Bill was involved in everything. If you needed him to do something he would do it." That's why he would don his Santa Claus suit each holiday season for Menagha's school children. And that's why he took the time to drive meals to house-bound seniors. He was honored for those efforts recently as Menagha's Senior Citizen of the year. Bill was also active in the VFW, the local commerce organizations and the Lions Club.

Bill had the stamina it takes to be there when you need a helping hand and a warm smile. A few months before he died of cancer at age 71, he finished a 5K race at the Menagha Midsummers, accompanied by a dozen of his children and grandchildren, running with him as a team.

Mr. President, with people like Bill Knapp in their midst, communities have the spirit to hold their own in tough times. Menagha, with its 1,076 souls is a strong community, with a new city hall, a new addition to its school, and a population stronger this year by 10 percent.

Mr. President, Bill Knapp will be fondly remembered by the people of Menagha. I too will remember him, and we will all miss him.

#### TRIBUTE TO ROGER KENNEDY

Mr. DURENBERGER. Mr. President, I rise today to commemorate Roger Kennedy, a Minnesotan who has made an important contribution to the appreciation of our Nation's past.

When he became director of the National Museum of American History 13 years ago, Roger sat out to transform that institution from a kind of marbleized warehouse, if you will, into a place where visitors of all ages would feel compelled to enter into a generational conversation.

By redefining the role of the museum, Roger made history accessible, not only for scholars and researchers, but for parents, grandparents and children. When asked recently by a reporter to define his legacy, Roger responded, "I would defer to any 15-year-old passing through this place as to what we've done."

That sentiment is typical of Roger, and, I believe, of many of the Minnesotans I have come to know during my years in the Senate. It is a kind of practicality inspired by the need to discover, simply, a better way of doing things. We take for granted today Rog-

er's innovative way of bringing history alive through historical re-creations and interactive media.

Roger also brought us a new kind of history than had previously been the staple of American museums. Under his guidance, exhibits at the museum examined the internment of Japanese-Americans during World War II and explored the subjugation of African Americans. Roger Kennedy knows that the fabric of American history will be threadbare unless everyone's story is woven into it.

Roger's career before coming to the museum certainly shows his qualifications. He has been a trial attorney, a Special Assistant to the U.S. Attorney General, a foreign correspondent, a producer and public affairs broadcaster with NBC. He has served under the Secretary of Labor and the Secretary of Health, Education and Welfare. He has been a banker and a vice president at the University of Minnesota. Roger Kennedy has written seven books and is working on another. He continues to write columns and opinion pieces for a number of publications, and has appeared in 26 programs on architecture.

In short, Mr. President, Roger Kennedy has been around. Now 66, Roger will continue to write, and he plans to host a 10-hour television series for the Discovery Channel, "Roger Kennedy's Discovering America." He will remain as director emeritus of the museum.

Mr. President, Roger Kennedy is an energetic and farsighted American. Through his work at the National Museum of American History he has helped transform our view of the past, and I know he will be an important American far into the future.

#### TRIBUTE TO SENATOR TIM WIRTH

Mr. LAUTENBERG. Mr. President, I rise with more than a little sadness to note the departure from these Chambers of my good friend and colleague, the senior Senator from Colorado, TIM WIRTH. Senator WIRTH's retirement from Congress follows an impressive career as a member of Congress—first representing the Second District of Colorado for 12 years and, since 1987, as a Member of the Senate.

During his tenure in Washington, Senator WIRTH has gained a well-deserved reputation as a strong leader on important issues facing the Nation. He has dedicated long hours to making this country a better place for our children. He is most deservedly renowned for his exemplary efforts to heighten awareness of, and create solutions to, our country's serious environmental dilemmas.

But he has also been an effective advocate for promoting efforts to improve our Nation's fiscal picture, as well as promoting efforts to improve economic development, infrastructure and transportation projects in his

State. In addition, TIM WIRTH has been a long-time advocate for improving our educational system.

As a member of the Senate Energy and Natural Resources Committee and chairman of the Subcommittee on Energy Regulation and Conservation, Senator WIRTH has gained a reputation as a leader on our environment. I was with TIM WIRTH at the Rio Summit earlier this year, and my respect for him only grew. He has sent us all a wakeup call about the greenhouse effect, stressing the need for significant policy and legislative changes.

His list of accomplishments in the environmental arena is impressive. In addition to his efforts to combat global warming, he has fought hard for funding to support research on alternative energy sources; he was successful in getting financing for high-altitude air pollution research centers for the western slope; he led the fight to amend the Clean Air Act so that we could benefit from cleaner gas and cleaner cars; he has fought to protect critical areas of our Nation's wilderness.

Senator WIRTH also has a long record of supporting conventional arms control and nuclear weapons limits. As chair of the independent task force on defense spending, the economy, and the nation's security, he has been involved in analyzing the impact of declining defense spending on national and local economies, and developing ways to make sure that our Nation's industrial base can prosper.

Senator WIRTH does not hide behind a cloak of safety, advocating only for those changes for which there is widespread public support. He's not afraid to rock the boat when the boat needs to be rocked.

I respect TIM WIRTH. I have learned from TIM WIRTH. I count myself as privileged to have worked side by side with him. He is an effective advocate, an outstanding role model, and a person of great integrity. But most of all, he is a warm and compassionate person who will be deeply missed in the Senate. I wish him the very best.

#### HEALTH CARE REFORM

Mr. ROTH. Mr. President, the number one concern for millions of Americans is access to affordable quality health care. Many who have health insurance are afraid that they might lose it. Those without insurance fear major medical expenses, and delay necessary preventive care such as check ups and immunizations. Meanwhile, health care becomes more expensive, the insurance industry discriminates against those with certain medical conditions, and small businesses and the self-employed find it next to impossible to find affordable coverage. Despite the fact that we spend more on health care than any other nation, we rate below many other developed nations in terms of the health of our people.

We as a nation will spend more than \$800 billion this year on health care, yet the number of uninsured individuals continues to grow. According to the Congressional Budget Office, the number of uninsured is 33.1 million individuals. The Nation is nearing a state of crisis, and reform is direly needed. As this Congress approaches the end of its legislative work, a lack of consensus on Capitol Hill has prevented the approval of any form of sweeping health care reform. Politics and partisanship of an election year have placed health care reform in an even deeper gridlock. However, this issue is too important to leave unaddressed.

The fear of not being able to afford health care coverage is widespread and impacts virtually everyone. In Delaware, insurance premiums for a small business owner are as high as \$1,200 per month. The number of uninsured in Delaware which has a population of 666,000 is over 90,000—and the vast majority are working families trying to make ends meet. The number of uninsured Americans has grown to more than 33 million. A high percentage of these individuals are employed in small business, but their employer simply cannot afford to offer a health care benefit. Affordable health care is critical to the well-being of our Nation's people and the ability of our Nation to compete internationally.

In an effort to address this critical challenge, I have been developing a proposal to make health care more affordable to working Americans and their families' providing access to millions of those who currently do not have health insurance. On March 26, 1992, I addressed the Senate and introduced my ideas to reform the health care system. Today, I rise to provide some more detail of my proposal, which would hold down costs and provide greater access by introducing managed competition into the Federal Employee Health Benefits Program and permitting small businesses and self-employed individuals to buy-in to the high quality health care coverage currently available to all Federal employees.

This proposal will make available to millions of Americans the same exact health care plan that is available to Members of Congress, Supreme Court Justices, members of the President's Cabinet, and millions of Federal employees and retirees. While the Heritage Foundation points to the Federal employee plan as a model to promote market based reform. I view the Federal employee plan even further, as a practical plan to actually build upon.

While the Federal employee program currently provides a wide range of choice for enrollees with a high level of benefits, it must be recognized that the program is far from perfect. The total cost of the program will more than double between fiscal years 1992 and

1997 from \$14.6 billion to more than \$29 billion, according to the Office of Management and Budget. Just recently, the Office of Personnel Management announced that the average 1993 premium paid by active nonpostal employees and retirees will increase by 9 percent.

While some attempts to manage care, such as precertification before entering the hospital and preferred provider networks, have contributed to keeping the rate of increase below the 37 and 34 percent increase experienced in 1988 and 1989, the rate of increase this year is still unacceptable. In Delaware, two of the HMO's which serve Federal employees and retirees in the State increased rates by 18 and 16 percent for self coverage and 18 and 13 percent for family coverage. Clearly, we cannot be complacent at a time when health care is a major expense in American households.

In response to the announced rate increases, John Sturdivant, national president of the American Federation of Government Employees stated:

Until the FEHBP is completely overhauled to take advantage of the combined purchasing power of over 9 million Americans enrolled in the Government's health care program, premiums will continue to increase at an unacceptable level and more and more Government workers will be forced to choose inferior plans with poor health care coverage or drop out of the program entirely.

I agree with these comments completely given that the combined purchasing power of 9 million enrollees has the potential to yield a much better deal for enrollees and the Government.

My proposal retains the positive aspects of the Federal employee plan while introducing reforms to improve upon the program's deficiencies. Through the use of market based competition, we can succeed in bringing the growth of this program under control. Federal enrollees are very price sensitive in choosing their health care coverage, which means that basic market forces are already in place. My proposal will improve upon this competition among providers to keep costs down. Until comprehensive managed competition is introduced into the Federal employee program, we will continue to be subject to premium increases three and four times the rate of inflation.

This two-part approach—reforming the Federal employee plan by infusing more competition, and providing for a small business buy-in, will improve the health care coverage for those currently enrolled in the plan, and bring affordable health care within reach of millions of uninsured. My proposal is significant because it can accomplish these goals without raising taxes, setting price controls, or establishing a new government bureaucracy to become involved in the very personal health decisions of tens-of-millions of Americans.

Using the purchasing power of the Federal employee program, the Federal

Government could fundamentally reform health insurance in this country, eventually eliminating the access problems we now have. My proposal would drive down the high rate of increase for those currently enrolled in the Federal employee program through the use of managed care and injecting more competition into the program.

The ultimate goal of this proposal is to contain costs and increase access without mandates on business, price controls, or a nationalized system of medical care administered by a large Government bureaucracy. Any health care proposal advocating one of these three approaches is bound, in my opinion, to fail. As the world's most prosperous Nation, we have come to appreciate the benefits of the marketplace. And as the world's most prosperous Nation, we should be able to see to it that all Americans have basic health insurance.

Cost containment must be a key component of any health care reform. In an effort to contain cost premium increases, my proposal introduces a level of competition that does not exist in the present system. A global budget or an arbitrary cap on spending on health care to control costs will result in rationed care, long waiting periods, and remove the incentives currently within our system which promote innovation and the best health care in the world. Instead, the use of competition to contain costs will yield efficiency and quality. Global budgets yield the opposite. In other nations, global budgets have decimated a patient's ability to receive prompt, adequate care.—

My proposal also recognizes the fact that the vast majority of the uninsured are working individuals and their families. Of these individuals and families, millions are employed by small business. Unfortunately, small businesses today face the greatest difficulties in obtaining affordable health care for their employees. The insurance industry typically picks off the healthiest small groups by wooing them with low premiums, but leaves small groups assessed as a risk with no coverage or the option to enroll at a great expense. A small business can lose its insurance coverage in the middle of the year because one employee or their dependent has a heart problem or a bout of cancer. One small business in Delaware told me that not one insurance company was willing to take on their group because two women had had breast cancer.

In an effort to control costs while increasing access to affordable health care, my proposal contains three fundamental reforms: first, the proposal makes managed care the primary component of the Federal Employee Health Benefit Program; second, the proposal introduces greater competition into the Federal employee plan so that the Government can use its power as a

the Federal employee plan so that the Government can use its power as a major purchaser of health care to drive down the costs of care for Federal enrollees while maintaining high quality care and service; and third, the proposal incrementally opens the managed care component of the Federal employee plan to small business and self-employed individuals at the same premium rate for Federal enrollees.

It is my hope that interested parties will consider this proposal during the next several months, comment on it, and help refine it. It is my intention to use this time to draft the proposal for introduction at the start of the 103d Congress.

As mentioned, cost and access are the two areas where reform is needed the most in health care. This proposal addresses both of these concerns. Health care premium increases will be brought under control through the use of managed competition and much greater emphasis on the use of managed care. Less than 30 percent of those currently enrolled in the Federal employee plan are enrolled in managed care. The goal of this proposal is to provide enough incentives so that more than 80 percent of all Federal participants will be enrolled in managed care plans. Since Federal enrollees are already price sensitive, market competition based on cost and quality will favor those plans that are the most efficient.

Health plans within the system need to be more uniform so that enrollees can choose their health care plans based on two factors—the quality and price of the plan. Too often, enrollees do not understand the differences in what benefit coverage is offered. Therefore, this proposal will require that benefits be standardized. This is already being done on a large scale. For example, the California public employee's retirement system, which covers 800,000 public employees, retirees and dependents, recently approved a standardized benefits package.

To assure that competition between plans is on quality of care and efficiency in the delivery of that care, premiums will be risk adjusted. The Office of Personnel Management will be responsible for risk adjusting premiums on a prospective basis based on demographic variables. Risk adjusted premiums involve the use of subsidies and surcharges to the quoted premium offer to hold carriers harmless for enrollment risk. Price competition without risk adjustment will lead to carriers attempting to cherry pick the healthiest segments of the enrollment pool. Carriers should be rewarded based on efficient treatment and risk management, not on their ability to encourage only healthy individuals to enroll in their plan.

Federal enrollees would retain the choice to enroll in a local managed

care or fee-for-service plan. To encourage greater participation in managed care, the Federal contribution for the plans offered in each locality would be a percentage of the lowest risk adjusted premium of a managed care plan in each geographical area. In the case that a fee-for-service plan offers a plan at a lower risk adjusted rate, then it would set the standard.

Managed care providers will in most cases be able to offer the most competitive rates because of their ability to manage enrollee risk more efficiently. Overall, this proposal will help to control costs by focusing its efforts on managed care. Because managed care is primarily prepaid plans, there are great incentives on the provider to manage risk. Carriers have strong financial incentives to make sure that patients are treated correctly the first time in the most cost efficient manner.

Quality of care is central to the proposal. Managed care plans will focus more on routine primary care. Many Federal enrollees are in fee-for-service which lack preventive care coverage. The 33 million uninsured individuals have it even worse, since they have virtually no access to preventive treatments that could yield long-term improvements on health and lifespan. This is why insurers must be given incentives to make a long-term investment in the health care of their enrolled population. A visit to a physician for an uninsured individual typically means a long wait in a hospital's emergency room which translates to the most expensive care. By focusing on primary care and prevention, managed care providers can keep costs down by keeping people healthier in the long run.

The Office of Personnel Management will continue to administer the program under my proposal. I believe a plan sponsor is critical to protect enrollees and capture the purchasing power of this 9 million person pool. The Federal Government must continue to act as a guide, insuring that plans meet quality standards and helping enrollees make wise decisions by providing information about the plans all in one place. Federal employees like the choice—but they must be provided with an educated basis to make their choice and standardizing benefits will help employees choose based on price and quality. Market forces work best when there is complete information and consumers can understand the choices available to them.

Increased access for the uninsured is provided through the buy-in. The Federal employee program is in every State, every city, and every small town in America. Health care is a local phenomenon, and for that reason, I am building on the largest privately insured pool of individuals who possess the strongest health care purchasing power in the Nation. This 9-million

person pool provides a network for small business to buy-in. There is already a huge market across the United States where the Federal employee plan could begin to be a better purchaser of health care. It could be better in quality, better in price. Managed competition will allow each market to yield the best results.

Expanding the pool of those in this plan through the buy-in will benefit both Federal and private-sector enrollees. The purchasing power of this growing pool will continue to increase. The stronger, larger pool will maintain continued pressure for vigorous price competition between plans for the best quality care. As the pool of insured individuals grows with the private sector buy-in, the purchasing power of the plans will be greater, benefiting all.

At the same time, this proposal is good for those with health insurance because it will help to reduce their hospital bills. What many people do not realize is that the insured are now paying the cost of all the unpaid medical care for the uninsured. Hospitals will treat people who have no insurance or cannot pay, and pass the cost on to paying patients. This is called cost shifting, and it can inflate the bills of paying patients by as much as 30 percent. The plan I am outlining today is unique—it is affordable, feasible, and it is sensible. It will reduce the number of uninsured and ultimately work to eliminate cost shifting.

In this time of crisis in our health care system, the American expectation of what health care should be is being questioned. Carriers should be given long-term incentives to promote the health of those they insure, and prevention should be at the top of our health care agenda. These carriers need to be given strong incentives to seek out the best providers—physicians and hospitals—that deliver the best care for their patients, because when care is delivered well, in the long run, it saves money. And patients need to have access to this type of care and to see it as an investment for themselves. Patients will need to rely on their primary care physicians to make their health care decisions—this is managed care as I see it with each health care player holding a significant stake in keeping costs down and expanding access to all.

The managed care component of my proposal does not have a single form because it is a market based solution, and different market places have different needs. At a minimum, care must be well coordinated by primary physicians who guide patients through their treatment. Managed care helps ensure that there is minimum duplication of services and unneeded medical services and costs are greatly reduced. Perhaps the greatest example of this is the Mayo Clinic in Rochester, MN, which uses managed care principles to deliver top quality health care at 20-percent below the national average.

Mr. President, with more than 33 million Americans without health insurance, reform is needed. We can take steps to begin reforming our health care system. I believe my proposal is a workable solution. I urge my colleagues, Federal employees, small businesses, health care professionals, and other interested parties to review this proposal. I look forward to any and all comments and refining the proposal in the months ahead.

#### PROSTATE CANCER AWARENESS AND EDUCATION

Mr. ROTH. Mr. President, in commemoration of National Prostate Cancer Awareness Week, I would like to take a few moments to congratulate the efforts of many individuals who have worked to heighten prostate cancer awareness and education.

I rise today, Mr. President, to recognize and applaud the formation of the 100th US TOO support group establishing a worldwide link of men who had prostate cancer, their families, and the medical community. The formation of the 100th US TOO support group is a particularly momentous occasion as it will link the expertise of the medical community from two of the top cancer centers in the world. And, I am particularly pleased to see that many individuals in Delaware have contributed to realizing the formation of the support group.

Having been treated successfully for prostate cancer I can attest to the successful outcome of early treatment and intervention of the disease. In June, I was diagnosed with prostate cancer, which this year will affect an estimated 400 men in Delaware, and 120,000 nationwide. The National Cancer Institute says that, like breast cancer, because the causes of prostate cancer are unknown, prevention of the disease is not yet possible. However, when the disease is detected early, as in my case, treatment is usually successful. Efforts to increase awareness and treatment, and coping with the disease should be continued if we are to eradicate prostate cancer.

In January 1991, US TOO and the American Foundation for Urologic Disease [AFUD] formed a relationship in order to develop an international network of support groups. US TOO is a national patient support group program which serves an important role to many by assisting men who had prostate cancer and their families in dealing with all aspects of their disease.

A Delaware based pharmaceutical company has been at the forefront of these awareness efforts. Mr. President, I am pleased to inform my colleagues that ICI Pharmaceuticals will be recognized for their efforts with a special award ceremony on October 15, 1992, by the American Foundation for Urologic Disease in recognition of their initia-

tive and commitment to prostate cancer education and awareness. The award will be presented during a ceremony being held at Memorial-Sloan-Kettering Cancer Center in New York City to commemorate the formation of the 100th US TOO group.

The event will also feature the distribution of copies of a patient education manual, "Helping Your Patient Overcome the Effects of Prostate Cancer: A Guide for Establishing Support Groups." Both a public service announcement and booklet were developed as the result of generous contributions from ICI Pharmaceuticals. In addition, ICI underwrites the administration of the support group program through an education grant to the American Foundation of Urologic Disease.

ICI Pharmaceuticals Group is a business unit of ICI Americas, Inc., the U.S. subsidiary of U.K.-based Imperial Chemicals Industries, PLC. ICI Pharmaceuticals Group, based in Wilmington, DE, has approximately 3,000 employees, including some 800 of whom are engaged in research, development and quality assurance, and a sales force of 1,000 representatives.

ICI Pharmaceuticals holds a long-standing position of leadership in the area of cancer research and support. They were one of the original sponsors of National Breast Cancer Awareness Month, and they were recognized as model employers for promoting on-site breast cancer screening during a recent visit of the Vice President's wife Marilyn Quayle.

I am pleased to join Senator DOLE and other colleagues, ICI Pharmaceuticals, and the American Foundation for Urologic Disease in doing all we can to raise public awareness in regard to prostate cancer. This disease is the leading cause of death in men over the age of 45, and like breast cancer, can successfully be cured if diagnosed and treated early.

I commend and join the efforts of my colleagues, Senators DOLE, STEVENS, HELMS, CRANSTON, THURMOND, and others, along with ICI Pharmaceuticals, the American Foundation of Urologic Disease and the US TOO organization for all their efforts on behalf of the American and world public to address this vital health issue.

#### TRIBUTE TO SENATOR RUDMAN

Mr. LAUTENBERG. Mr. President, I want to pay tribute to an outstanding Senator who will be leaving at the end of this term, WARREN RUDMAN.

Mr. President, I have enormous respect for WARREN RUDMAN. And there probably is not a single Member of this body who does not feel similarly.

WARREN RUDMAN is a man of unusual intelligence and integrity. He's also a man of real intellectual independence. Senator RUDMAN is someone who

knows what he thinks, and isn't afraid to say it, and act on it, no matter who might disagree. He could be your friend or adversary without that entering the debate or his view. That independence and integrity is one reason why so many Senators look to him for guidance and leadership. And why he's proven to be such an influential member of this body.

Mr. President, I didn't agree with WARREN RUDMAN on everything. But I do have the utmost regard for his thoughts about issues. And I usually learn something by listening to his arguments.

Most Americans probably associate WARREN RUDMAN with his admirable and sincere commitment to reducing the deficit. And, clearly, he's made an enormous contribution to the debate in this area, both within the Congress and around the country. I know we will be hearing much more from him on this vitally important problem, and I'm hopeful he will be successful in convincing more Americans about the severity of this matter. It won't be easy. But few people are better equipped to make the case.

Mr. President, beyond budget policy, WARREN RUDMAN has made enormous contributions in several other vitally important, but less visible areas. For example, he has been a strong advocate for programs designed to provide legal services for the poor. He's resisted strong opposition from within his own party on that matter, and he deserves enormous credit for this support for the rights of the disadvantaged to legal representation. That support will be greatly missed in the years ahead.

Mr. President, when I think of WARREN RUDMAN, I also think of the debate on a particular amendment to the crime bill earlier in this Congress. The amendment would have expanded the good faith exception to the exclusionary rule to apply not only to searches where the police obtain a warrant, but to warrantless searches as well. To many senators, it was a rather esoteric issue, little understood by the public. And the easy thing to do would have been to vote for the amendment, just to appear tough on crime.

But WARREN RUDMAN stood up and made the case against the amendment. He was articulate. His reasoning was sound. He spoke with real passion. And, perhaps most importantly, he came with great credibility.

That amendment was defeated, Mr. President. And, while there's no way to know for sure, I believe that without WARREN RUDMAN the vote would have gone the other way. It took someone with his courage and credibility to stand up for what's right. And when he did, he brought the U.S. Senate along with him.

Another similar example, Mr. President, was the debate on resale price maintenance. Again, WARREN RUDMAN

brought his legal skills to the floor on behalf of ordinary Americans, those who must scrimp and save, and who rely on discounters to get by. Like the exclusionary rule, it was a highly technical issue. But WARREN RUDMAN made his case with clarity and passion. And, again, the Senate listened, and was convinced. It might not have happened without him.

So I salute Senator RUDMAN, and thank him for his many contributions to our Nation during his tenure in this body. I'm sure those contributions will continue for many years to come.

#### REGARDING THE RESIGNATION OF SECRETARY ED DERWINSKI

Mr. SIMPSON, Mr. President, I rise today to make a few remarks prompted by Ed Derwinski's decision to leave his Cabinet post as the Secretary of Veterans Affairs.

As a lifetime member of the Veterans of Foreign Wars and a member of the American Legion and Amvets, I comment Ed for the job he did in this very difficult veterans post.

I have known Ed Derwinski as long as I have been in Washington. He is a caring person who made a very positive impact on the Department of Veterans Affairs.

In nearly 4 years as head of the VA, Ed Derwinski has tried diligently and doggedly to put deserving veterans first—by increasing their medical care benefits.

Although he has had his share of difference with some of the veterans groups, as a former chairman of the Senate Veterans Affairs Committee, it was my view that he has always been accessible, open-minded, and very fair.

Ed Derwinski clearly understood the historic mission of the Department of Veterans Affairs. When President George Bush appointed him to that post he was given a charge which Abraham Lincoln set forth as the creed for the Veterans' Administration:

"\* \* \* To care for him who shall have borne the battle and for his widow and his orphan \* \* \*." Still today, that is the primary purpose of the VA—and Ed Derwinski has made every possible effort in the last 4 years to be true to those goals. I admire him greatly. He is a superb man.

This has been a difficult time to be at the head of the VA. There have been a lot of really tough issues, and scarce Federal dollars.

Nevertheless, in this time of budget deficits and all sorts of spending cuts, Ed Derwinski was able to wrangle \$700 million for VA Health care and do it "Right up front."

And he successfully worked to push the VA budget up by a very significant sum of \$1 billion each of the last 3 years.

Mr. President, Ed Derwinski is a man of honor, integrity, grace, and good

humor who did a most honorable job in an area where the needs are infinite, and the resources are finite. It is one of the toughest jobs in Government. He did it well. God bless him.

I wish him and his able and capable wife, Bonnie, the very best in all of their future endeavors.

#### TRIBUTE TO SENATOR BROCK ADAMS

Mr. LAUTENBERG, Mr. President, I want to pay tribute to my colleague, BROCK ADAMS, who is retiring from the Senate after over 30 years in public service. He has served in the great tradition of Washington's independent Senators—Warren Magnuson and Henry "Scoop" Jackson.

Senator ADAMS has had a distinguished career in public service. He was a U.S. attorney from 1961 to 1964, when he successfully ran for a seat in the House of Representatives. He served in the House until President Carter selected him to the Secretary of Transportation. He returned to Congress in 1987 as the junior Senator from Washington.

BROCK's interest in transportation continued during his incumbency in the Senate. In my capacity as chairman of the Transportation Appropriations Subcommittee, BROCK and I frequently discussed transportation issues and he was aggressive in seeking to meet the transportation needs of his State. As a former Secretary of Transportation, he offered this body important insights on innovative transportation policies for our future. We also worked together to enact legislation in response to the tragic *Exxon Valdez* oil spill.

With the retirement of Senator ADAMS, the Senate is losing one of its most strongest proponents of women's rights. He is a strong defender of a woman's right to choose, a woman's right to equal pay, and more aggressive research into health issues of concern to women.

He has also been a leader in the fight for greater funding for AIDS research and treatment programs. He and I have worked together on the Appropriations Committee to seek the highest level of funding possible for the Ryan White CARE Act and NIH's sponsored research on AIDS. He joined in this effort because of his concern about the tragedy AIDS leaves in its path all across this country. He took on this cause even though other States were more affected by this epidemic than his own.

The senior citizens of this country are also losing a great champion with the retirement of Senator ADAMS. As chairman of the Subcommittee on Aging, he's fought to expand programs for our Nation's seniors. He's worked hard during the past 2 years to ensure passage of the Older Americans Act.

Mr. President, BROCK ADAMS' legacy will live on after he leaves this Cham-

ber. In this Congress, he has worked diligently to enact a NIH reauthorization bill to expand women's health initiatives of NIH and permit fetal tissue research to seek a cure for Parkinson's disease, diabetes and Alzheimers. Regrettably, a handful of Members prevented this bill from final consideration and passage this year. However, the majority leader has indicated that this bill will be numbered S. 1 in the next Congress, indicating the high priority most Senators place on its enactment.

When S. 1 is introduced next year, it will be a tribute to Senator ADAMS as well as a reflection of the importance of conducting this research.

I regret BROCK's departure from the Senate but I wish him and his family the very best in the years ahead. I am sure he will continue to make a contribution.

#### CONTINUING CRISIS IN YUGOSLAVIA

Mr. SIMPSON, Mr. President, I rise to say a few words about the continuing crisis in Yugoslavia.

Mr. PRESIDENT, I think it is fair to say about most of us that we only began to learn about the intricacies of this tragic situation after that land exploded into military conflict. It has truly been on the job training for the Western democracies in developing appropriate responses.

I think that is important to understand because it is important to understand international events have played a role in Yugoslavia's current difficulties, and in the tensions that have emerged there over time. People in America turn on their televisions and they see horrifying images of brutality and terror. The easy—but incorrect—response is to turn away and to believe this is just part of the world that has gone crazy, and that is the international community has nothing to do with it. That is not true morally, nor historically; the tensions in Yugoslavia partially result from a history of international great-power conflicts which have focused on that region.

We need to remember that the development of appropriate responses, and appropriate solutions, requires us to do our best to understand what is happening there. It requires us to understand that this is not in any way analogous to the conflict that erupted 2 years ago between Iraq and Kuwait. I believe President Bush deserves our commendation for recognizing the particulars at work in Yugoslavia, an not attempting to shoehorn a policy that may have worked in other parts of the globe onto this unique situation.

We must, of course, continue to adhere to certain principles in our response. Recently the Senate called upon the United Nations to take the necessary measures to ensure that the

relief to victimized peoples there is successful. That was an appropriate response in my view. And we must also make clear that naked military aggression will be punished by the international community, by economic sanctions at the very least.

Beyond that, the situation becomes more complex, and solutions more exclusive. Identifying aggressors is not a trivial matter in a land like Bosnia-Herzegovina, where Croats, Serbs, and Moslems have fought within the borders of one Republic—and where each of those groups is divided into factions that include various levels of nationalist extremism.

We should, of course, condemn aggressive actions by Serbian leader Milosevic—but we must not delude ourselves into believing that, inaction by Serbia, as a result of international pressure, will automatically produce peace in Bosnia. The Republics of Yugoslavia were, after all, drawn up with 30 percent of the Serbs living outside of Serbia.

We must similarly not assume that Serbia is United behind the policies of Slobodan Milosevic. Of course, the growing doubts of a number of Serbs about his policies would not mean that we should relieve the international economic pressure on Serbia. But we need to do what we can to strengthen those elements within Serbia that might be more inclined to play a productive role in framing a lasting peace.

I had the pleasure this past week of meeting with Yugoslav Prime Minister, Milan Panic. I found myself impressed with the energy and enthusiasm of this man, a naturalized American citizen, for advancing ideals which he unabashedly described as "American." Milan Panic spent a great deal of his professional life in the United States, and he has returned to his country with a great enthusiasm for all things American, and I cannot help but admire him for that.

I do believe that we may need to take a good look at who we view as the real voice of Serbia—whether it is Milan Panic, or Slobodan Milosevic. Milan Panic's government of a "rump State" of Serbia and Montenegro has not been generally recognized. This is, after all, a recognition of the forces arrayed against him—not internationally, but within Serbia. I am certain that Milosevic would love for us to become so enamored of Mr. Panic that we ease the pressure on Milosevic's own regime; certainly we need to guard against that. But I do think we will be distraught with ourselves if a voice for peace and moderation within Yugoslavia is stilled by a coup or conspiracy against him by a militarist regime. We therefore have a responsibility to strengthen our support for what Mr. Panic has been saying.

I would urge my colleagues to let the word go forth that the West is in fact

receptive to possibilities for democracy and peace within the rump Yugoslavia. And, that the attitude and approach of the West will be in part determined by the extent to which real governing power passes into the hands of moderate parties within their country. Declarations of peaceful intent, of course, are not enough. But we can make clear that we do find the program of Mr. Panic—and NOT the policies of Mr. Milosevic \* \* \* to comport with our long-held views of the real aspirations of the Serbian people. Mr. Panic represents their clear and best present hope for international respect and goodwill, and that is a hope that we cannot at this tragic time afford to ignore.

#### THE SERVICE OF SENATOR ALAN DIXON

Mr. LAUTENBERG. Mr. President, I rise to acknowledge the departure of a valued colleague who has served his State and the Nation with great distinction: Senator ALAN DIXON of Illinois.

Senator DIXON has ably and effectively represented the State of Illinois during his tenure in the Senate. But Senator DIXON's interests in the Senate have not been limited to issues affecting Illinois. He has also played a leadership role, and had an impact on the major issues of our day.

A leader in banking reform, he looked into the commercial banking industry and long ago saw some of the troubling signs that led to the thrift crisis. He was a leader in introducing legislation to keep the banking industry vibrant and healthy and to head off the burden of another multibillion taxpayer bailout.

Senator DIXON has also fought to increase the supply of affordable housing for hardworking Americans. His efforts finally bore fruit when, after months of hearings, the new head of the Federal National Mortgage Association informed Senator DIXON he was announcing steps to make its home mortgage policies and procedures more amenable to working families in low- and moderate-income communities, and particularly, in minority neighborhoods.

Senator DIXON also sponsored legislation to enforce restrictions which make it illegal for banks to discriminate against mortgage applicants based on race. Senator DIXON argued for more Federal prosecutors of S&L fraud.

As chair of the Senate Armed Services Subcommittee on Readiness, he worked on procurement issues that spurred the creation of the Pentagon procurement czar, taking lucrative contracting decisions out of the hands of those who have a vested interest in their outcomes. He also saved American taxpayers \$4.5 billion by leading the fight to stop production of the faulty Sergeant York gun.

Throughout his career Senator DIXON never forgot the problems or concerns of those who sent him to the Senate. I know he will take that same devotion, dedication, and commitment to his new endeavors. Mr. President, I will miss my friend from Illinois, and I would like to wish him well. I know that he will succeed in whatever arena he decides to use his considerable talents.

#### VETERANS' ALCOHOL TREATMENT PROGRAMS

Mr. PRESSLER. Mr. President, I rise today to discuss an important issue. It is a subject I take seriously and one that Congress should further examine.

Thousands of Americans are treated for chemical substance abuse, including alcoholism, each year. Veterans reflect a disproportionately large number of these cases. I know of many hearings held and studies conducted to determine why so many of our veterans develop drug and alcohol problems. We have learned a great deal. However, we need to move ahead and evaluate the treatment these veterans receive.

In 1992, the Department of Veterans Affairs [VA] spent nearly \$418 million on substance abuse programs. VA officials inform me this care costs about \$156 per day. Typically, substance abuse treatment at a VA facility lasts 25 days. This equates to approximately \$4,680 for one veteran to get help in a VA rehabilitation program. Nearly 30 percent of the veterans who complete an alcohol treatment/counseling program are later readmitted to the program. This contrasts with the 21-percent relapse rate in the private sector.

The VA has roughly 172 hospitals around the Nation. Nearly 150 of these facilities have alcohol treatment programs. In fact, in my home State of South Dakota all three of our VA facilities have alcohol treatment programs.

You certainly cannot evaluate the effectiveness of an alcohol treatment program solely on its cost. However, it is one factor which must be considered. I have done research on the cost of treating individuals with alcohol problems. Costs vary depending upon the location of the treatment center, its reputation, and its facilities. You can obtain quality care in the private sector for a cost similar to that in the VA. However, the VA ends up spending more on an individual because of the higher relapse rate in its programs.

I intend to work with the VA and the Senate Veterans' Affairs Committee to determine how we can improve the quality of alcohol and drug treatment programs for veterans while reducing their cost. We have just completed action on the fiscal year 1993 VA appropriation bill. It contains nearly \$15 billion in health care funding. We all know this is not enough. However, we must determine how we can help the

most veterans in the most cost-effective way. I am committed to studying further the issue of VA substance abuse rehabilitation programs and to determining how—whether through in-house programs at VA facilities or through contracting out of such services—our veterans can best be served.

#### JACKSON FARM CREDIT DISTRICT COMPROMISE

Mr. HEFLIN. Mr. President, I rise in support of the Jackson Farm Credit District compromise legislation that we have included in the bill before us at this time. This provision is the result of the cooperation and hard work of many dedicated people, including my colleague the Senator from Mississippi, [Mr. COCHRAN], my colleagues on the Committee on Agriculture, Nutrition, and Forestry, and in the other body, Mr. ESPY, Chairman DE LA GARZA, Chairman WHITTEN, and many others. I was pleased to join these gentlemen in this important effort; and I must also salute the outstanding efforts of the staff of all the Members for their work and contributions to putting this particular legislative package together.

This compromise will put to rest the long-standing and divisive controversy surrounding the status and lending authorities of the Farm Credit System institutions in the Jackson district. The compromise here is fair. It upholds the principles of local control while streamlining loan operations in the district, in fulfillment of the district merger provisions in the 1987 Agricultural Credit Act. It also gives the Texas Farm Credit Bank statutory assurances about the validity of its long-term lending charter in the Jackson district.

#### BACKGROUND

The Agricultural Credit Act of 1987, in section 410, mandated the merger, within 6 months after enactment—that is, by July 6, 1988—of the Federal Intermediate Credit Bank [FICB] and the Federal Land Bank [FLB] in each of the 12 Farm Credit districts throughout the United States. The banks created by section 410 mergers are called Farm Credit Banks [FCB's] and handle both short-term and long-term lending to farmers and ranchers within the Farm Credit System.

The 1987 act did not, however, include the mandated consolidation of the 12 Farm Credit districts called for in the earlier House version of the legislation. The whole issue of local control and consolidation of districts was a contentious matter during the 1987 congressional debate; and the middle ground position reached by Congress was a finely balanced compromise.

In 11 of the 12 Farm Credit districts, the merger/creation of FCB's under section 410 of the 1987 act took place on schedule. However, the FCA failed to

charter an FCB in the Jackson district because FCA had decided to place the Jackson FLB into receivership rather than allow comprehensive assistance under the 1987 act to be provided to the district.

The Jackson FICB, nonetheless, tried to remedy the situation during 1988 and 1989 by looking for a FCB to be a voluntary merger partner.

Meanwhile, early in 1989, the FCA approved a sale of a number of long-term loans of the Jackson FLB in receivership to the Texas FCB, at the same time amending the Texas bank's charter to permit it to make new long-term loans in the Jackson district. In issuing that charter extension, the FCA for the first time in history split the long-term and short-term lending authority in a Farm Credit District between banks based in different districts.

Then, in the spring of 1989, FCA interrupted the Jackson FICB's voluntary merger process by instructing it to merge with the Texas FCB under section 410—using the legal theory that the Texas bank was the functional equivalent of a FLB in the Jackson district. The FICB successfully appealed this FCA decision to the courts. In February 1991, the U.S. Court of Appeals for the Fourth Circuit ruled definitively that section 410 did not give FCA authority to force the merger and consolidation of districts.

After the court decision, things in a sense came to a stand-still as to the future of the Jackson district; and this legislation is designed to get things moving toward a final resolution of the status of the district that retains the rights the courts have given the FICB and its associations to determine their own destiny.

#### WHAT THE LEGISLATION DOES

The language in this legislation puts in place a carefully tuned, orderly mechanism to resolve the situation in the Jackson district by facilitating a merger of the Jackson FICB with another Farm Credit Bank after a vote of the farm-borrowers and shareholders in the three States of Alabama, Louisiana, and Mississippi. If that merger process fails, the legislation then provides for a mandated but arbitrated merger with the Texas Farm Credit Bank.

I support the compromise included in this legislation based on my understanding of how it will work to accomplish the merger of the FICB of Jackson with a Farm Credit Bank.

First, the Jackson FICB will have until June 30, 1993, to find its own merger partner from among any of the other Farm Credit Banks in the Farm Credit System.

Under the provisions of the bill, the FCA will not be able to interfere with the Jackson bank's merger efforts during this window of opportunity, lasting until June 30, 1993, except to the extent that the regulator must exercise its du-

ties under the Farm Credit Act to bar unsafe and unsound practices. In that regard, the FCA under this bill has exactly the same—no more and no less—supervisory powers over the Jackson bank than it would otherwise have under the other provisions of the Farm Credit Act to ensure the safety and soundness of system institutions. Moreover, those powers are limited under the same administrative standard as in the rest of the Farm Credit Act.

Nor will the Farm Credit Bank of Texas have any authority under the statute to interfere with the Jackson bank's merger efforts during this time.

Another key provision of this bill is that the Jackson FICB and its intended merger partner may request a one-time extension if they need a little more time to work out the details of the merger. If Jackson and its intended merger partner submit a letter of intent to the FCA, the FCA has the responsibility to extend the deadline. The FCA cannot deny or revoke the extension except for the most clear signals that the deal has actually fallen through.

During this window of opportunity, under the authorities that the Jackson district production credit associations have under current law to affiliate with any Farm Credit Bank, if Northwest Louisiana PCA does not agree with the deal it may opt out and affiliate with a different bank. After the merger of the Jackson district, the Jackson production credit associations are free to reaffiliate with another district bank under the usual procedures already set up elsewhere in the Farm Credit Act. Again, principles of local control are upheld for the benefit of the farmers and ranchers in the district.

Only if the Jackson bank fails to find a merger partner in the time period allowed in the bill will it be mandated to merge with the Texas Farm Credit Bank. Even then, the bill protects the farmer-borrowers and shareholders of both banks. The whole matter will be put to an arbitrator to decide the best terms of merger for both banks and the System as a whole.

To ensure that the rights of both sides are fully protected and to ensure that both districts are treated with equal respect and deference, the bill is constructed to give the arbitrator—not one bank or the other, nor the FCA—broad power to initiate the development of, and refine, the merger terms.

Both banks involved in the mandated, arbitrated merger will be able to present their own plans for structuring the new bank for the combined districts, and they may present whatever information that would support their preferred plan. Their assets will be set at book value.

Whichever way the merger is reached, when the merger is completed,

assistance will be available to the extent necessary to facilitate the merger and ensure that stock values will not drop as a result of unforeseen financial downturns.

Either the FICB of Jackson or the Texas bank may request the establishment of agricultural credit associations [ACA's] in the district, and the arbitrator's plan may include the establishment of ACAs. A plan for ACAs would enable farmers and ranchers in the Jackson district to have one-stop shopping for all their farm credit needs, as so many other farmers and ranchers have access to elsewhere in the system. But again, it would be up to the farmer-borrowers themselves to decide whether they wanted ACAs. So long as the arbitrator found it in the interest of district farmers and ranchers, the question would go before the farmers and ranchers for their approval.

Also, if the farmers and ranchers in one State, voting in separate territories by majority vote approve ACA's, that State's associations would then be able to set up a statewide ACA down the line by separate vote.

In regard to the voting process regarding ACAs, I would make clear that we intend that the referendum majority be a majority of those voting, not those eligible to vote; and the arbitrator is expected to include such term in the referendum procedures he is required to draw up under the legislation.

The arbitrator's plan of merger of the FICB with the Texas bank would ultimately go to the FCA for certification that the plan was in compliance with the Farm Credit Act. The FCA would be able to recommend necessary changes to the arbitrator's plan to bring the plan into compliance with the law, but the FCA would not otherwise be able to withhold certification for less than the most serious of reasons. It is my understanding that the FCA has no interest in withholding certification of a lawful merger plan.

Finally, I am pleased that the farmer-borrowers will have the additional protection of expedited judicial review under the provisions of the U.S. Arbitration Act and to prevent arbitrary and capricious, illegal agency action, or actions otherwise unsupported by substantial evidence based on the entire record put before the arbitrator or the FCA, whichever is involved. This language provides extra needed protection for the farmer-borrowers that the merger process will be a fair one.

During the whole process, the Jackson FICB will have all the authority under the law it is otherwise entitled to as a fully authorized Farm Credit System institution until the time it is finally merged with another bank, or no later than June 30, 1994.

Mr. President, I ask unanimous consent to have printed in the RECORD at

this point a summary analysis of this provision of the bill.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

SUMMARY ANALYSIS OF PROVISIONS REGARDING THE FICB OF JACKSON

This provision provides a framework for, and rules to govern, the merger of the Federal Intermediate Credit Bank of Jackson, Mississippi (FICB-J) with another Farm Credit Bank (FCB).

This provision will (1) allow for the transition of the FICB-J to FCB status in a timely and equitable manner; and (2) assure the farmer-borrowers served by the FICB-J's associations that their bank will have a fair chance, within reasonable limits, to decide its own destiny on terms that will maximize benefits to farmers. The FICB-J's merger must be completed by July 1, 1994.

GENERAL SUMMARY

Specifically, the provision consists of three subsections.

First, subsection (a) has three major components:

(A) Rules for a negotiated merger.

(B) An alternative, mandated merger with the Farm Credit Bank of Texas ("the Texas bank") if a negotiated merger is impossible, under specified arbitration procedures.

(C) Provisions for expedited judicial review if problems occur in the merger process.

Then, subsection (b) will clarify the long-term lending authority of the Texas bank in the States of Louisiana, Mississippi, and Alabama. This clarification, however, in no way provides short-term or intermediate-term lending authority under title II of the Farm Credit Act of 1971 ("the Act") in those States—that authority remains exclusively that of the FICB-J and its successor merged bank (which, of course, could be the Texas bank).

Finally, subsection (c) will add language to section 5.17(a)(2) of the Act, to prohibit the issuance of competitive Farm Credit charters in the States of Louisiana, Mississippi, and Alabama.

SUMMARY OF SUBSECTION (a)

Subsection (a) will add a new subsection (e) to section 410 of the Agricultural Credit Act of 1987. Section 410, as enacted in 1987, provided the rules for the establishment of Farm Credit Banks (by merger of the Federal land bank and the FICB) in each of the 12 Farm Credit districts.

Under section 410, as currently written, each such merger was to have taken place by July 6, 1988. The problem leading to the need to enact this legislation is that the Federal Land Bank of Jackson and the FICB-J were prevented by action of the Farm Credit Administration (FCA) and other agencies from merging into a Farm Credit Bank of Jackson under the time schedule. In fact, the Jackson land bank has been in receivership since early 1988, and is expected to be completely liquidated soon. This has left the FICB-J without a merger partner under section 410 up to now.

The new subsection (e) of section 410 will provide a blueprint for the expeditious merger of the FICB-J into an FCB. The major provisions of new subsection (e) are as follows:

Initially, the FICB-J will be given until June 30, 1993, to find an FCB to voluntarily merge with.

If the FICB-J finds an FCB to voluntarily merge with by June 30, 1993, and files a letter of intent on this merger with the FCA, the

FCA must grant an extension of time—to no later than October 31, 1993—for the two banks to complete the merger, if FCA determines that—

(1) the letter of intent represents a bona fide good faith agreement; and

(2) there is at least a reasonable prospect for the timely completion of the merger.

It is expected that FCA will make a determination of "good faith" in the absence of any obvious short-coming in the letter of intent.

If the FICB-J does find a voluntary merger partner, the merger will be completed under the current merger provisions of the Act.

If the FICB-J determines to merge under this authority, the whole bank, in its entirety (except as noted in the following sentence) will have to merge; and the merged bank will only have the FICB-J short-term and intermediate-term lending authorities in the States of Louisiana, Mississippi, and Alabama. The NW Louisiana Production Credit Association could at any time invoke the current authorities of the Act to reaffiliate with another Farm Credit district.

While the FICB-J is in the process of merging (either under this provision or with the FCB-T under arbitration), it will continue to operate as a legally authorized bank, under such provisions of law that are determined by FCA to be appropriate for the bank to conduct efficient and effective operations.

Mandated, Arbitrated Merger with the FCB-T

If the FICB-J is unable to consummate a negotiated merger, the FCA, within 5 days after the initial or extended deadline for a negotiated merger expires without action, will issue an order requiring the FICB-J to merge with the Texas bank.

Within 30 days after the order for this mandated merger with the Texas bank is issued, an arbitrator will be appointed by the American Arbitration Association (AAA).

The arbitrator's job will be to determine the terms of the merger such that the terms are fair and equitable to all concerned, and protect the safety and soundness of the Farm Credit System. Subsection (e) spells out the objectives and required contents of the arbitrator's plan in more detail.

The expenses of arbitration and of the referendum of borrowers on association structure (described below) will be paid out of the Farm Credit Assistance Fund.

The arbitrator will have 100 days to develop the merger plan and submit it to the FCA for certification.

The arbitrator could include in the plan authority for the establishment of agricultural credit associations (ACAs) in Louisiana, Mississippi, and Alabama. The ACA plan would be based on proposals submitted by the FICB-J, the Texas bank, or both.

The ACA plan would call for the establishment of an ACA in each of the territories now covered by the Jackson district Federal land bank associations (FLBAs), with the territory covered by the North Louisiana FLBA further broken up into 2 ACA territories, one each for the territories covered by the NW Louisiana PCA and First South PCA. The other specific elements of the ACA plan are set out in subsection (e).

The FCA would have 30 days after it receives the arbitrator's plan of merger (including the ACA plan) to do a compliance review of the plan.

Within 170 days after the order for the mandated merger is issued, the AAA would have to complete the conduct of a referendum of all farmer-borrowers in Louisiana, Mississippi, and Alabama on the ACA plan. A majority vote in any referendum will be a

majority of those voting, not a majority of those eligible to vote.

Within 10 days after the results of the referendum are submitted, FCA must issue the charters needed to implement the mandated merger of the FICB-J and the Texas bank. Similarly, FCA would have to charter an ACA in each of the seven ACA territories in which a majority of both FLBA borrowers and PCA borrowers in the territory approved ACA status.

The Farm Credit System Insurance Corporation (FCSIC) will be required to provide funds as needed to facilitate a mandated merger with the Texas bank. However, the assistance could not exceed an amount required to maintain stockholder equity in the merged bank at book value.

In addition, FCSIC will be required to guarantee—for up to 5 years after the merger of the FICB-J—prompt payment of any loss experienced by the bank merged with the FICB-J due to the failure of an association holding stock in the FICB-J to pay its obligations to the resulting bank.

If at any time prior to the completion of the FICB-J's merger, the FCA determines (as provided in the Act) that the FICB-J is being operated in an unsafe or unsound manner, it can (1) require an assisted merger of the FICB-J, using FCSIC funds, or (2) (after the issuance of an order for a mandated merger with the Texas bank), take action under the Act to return the FICB-J to a safe and sound condition.

If all the associations in the State of Alabama, Louisiana, or Mississippi are chartered as ACAs under the arbitrator's plan, the boards of each such ACA in the State will be encouraged to submit to its stockholders a plan for merging into a statewide ACA. It is expected that FCA would expeditiously charter each such statewide ACA as approved by stockholders.

#### Review

The actions and determinations of the FCA, the FCSIC, and the arbitrator under subsection (e) will be subject only to restricted judicial review, and not be subject to the provisions of the Administrative Procedures Act.

Judicial review of FCA and FCSIC actions and determinations will be conducted exclusively in the U.S. Court of Appeals for the District of Columbia Circuit, using expedited review procedures spelled out in the bill.

Review petitions will have to be filed within 10 days after the action or determination complained of occurs. Then, the court must rule within 50 days after the petition is filed.

As to actions and determinations of the arbitrator, petitions for review will have to be filed under the U.S. Arbitration Act, using similar expedited procedures and an overall 40-day limit for court review.

#### FOREIGN REPAIR OF VESSELS

Mr. BREAUX. Mr. President, in 1990 the 101st Congress enacted section 466(h) of the Tariff Act of 1930, as amended, (19 USC 1466(h)) relating to the foreign repair of vessels. This legislation, which I introduced, exempted from the 50-percent ad valorem duty rate otherwise imposed by section 466, foreign repairs to U.S.-flag LASH—lighter-aboard ship—barges as well as vessel spare parts and equipment necessarily purchased by U.S.-flag vessel operators in foreign countries.

Section 466(h) was adopted to eliminate unfair, onerous, and costly tariff

and regulatory discrimination which over the years had developed under section 466 among competing U.S.-flag cargo vessel operators. LASH barges are basically cargo carrying containers which float. Both LASH barges and containers are originally transported by a mother ship; both LASH barges and containers after leaving the mother ship continue onward to a final destination. Not only does the old section 466 discriminate against LASH barges vis a vis containers with respect to the 50-percent ad valorem duty, but it also imposes separate and individual inspection and reporting requirements for each LASH barge where none exist for equivalent individual containers.

Unfortunately, because section 466(h) was enacted as part of an omnibus tariff bill which placed a 2 year time limitation on most of its tariff exemptions and suspensions, section 466(h) will automatically expire on December 31, 1992. Accordingly earlier this year, the House passed another omnibus tariff bill which would have renewed section 466(h) for another 2 years. I likewise introduced a similar bill in the Senate and to the best of my knowledge there is no opposition to this renewal.

In spite of the noncontroversial nature of this legislation, as we reach the end of the 102d Congress there has not been an acceptable revenue-raiser to cover the modest estimated cost of this extender. Accordingly, on January 1, 1993, the extremely burdensome tariff discrimination which section 466(h) eliminated will automatically be reinstated. For this reason as soon as the next Congress convenes, I intend to introduce a bill which if enacted will effectively remedy this injustice against the U.S. Merchant Marine.

Under these compelling circumstances, I urge the Department of the Treasury and the U.S. Customs Service, during this unavoidable interim period, to refrain from reimposing the onerous, costly and confusing administrative procedures which contributed to the enactment of section 466(h) in 1990. I refer of course to: First, the Customs Services' LASH barge inspection and multiple entry regulations and procedures; and second, the discriminatory administrative regulation, interpretations and requirements that resulted in the unjustified imposition of 50 percent ad valorem duty under section 466 on vessel spare repair parts and equipment purchased abroad.

#### IN SUPPORT OF THE CONFERENCE REPORT ON H.R. 776, THE ENERGY BILL

Mr. DODD. Mr. President, I rise today in support of the conference report on H.R. 776, the Energy Policy Act of 1992.

The Senate should act today to pass this critical legislation. The need for this legislation is clear. We need only

look back to the days when the Congress first took up the energy bill—our Nation was at war in the Persian Gulf. We were at war for many reasons, but certainly one of them was our dependence on imported foreign oil. This legislation puts us, as a Nation, on the path toward a more secure, a more sound energy future.

I am not suggesting this bill is perfect—far from it. I have concerns about the inclusion of the language regarding the Yucca Mountain site, currently under consideration for a high level waste disposal site and will carefully monitor this issue as it progresses. I also am concerned that in some areas this bill does not go far enough. I firmly believe that increased corporate average fuel economy standards belong in this bill—but they are not here. Additionally, I was disappointed that the conferees dropped the provisions for a moratorium on drilling on much of our Nation's outer continental shelf.

However, on balance, I believe the policy before us here today is sound and I will vote to support this bill.

First, the bill will promote conservation and efficiency. No matter what the energy source—we must not waste what we have. The bill sets new efficiency standards for homes, for buildings, for appliances, and for the Federal Government. It also provides incentives for utilities to pursue demand-side management to further conserve energy.

The energy bill fosters the development of renewables and the commercialization of alternative fuels. A key provision establishes a Federal production incentive for public utilities that use renewable energy sources. Additionally, the bill provides for numerous joint ventures with the Federal Government to assist in the commercialization of renewable energy sources—such as fuel cells, which hold such promise in meeting our future energy needs. The bill also takes strong steps to curb the use of imported oil on our Nation's roads. Government motor vehicle fleets would be required to purchase an increasing number of alternatively fueled vehicles.

While encouraging domestic fuel production, this bill recognizes that not all areas are appropriate for development. This bill includes important protections for several unique Connecticut areas. As many in my State know, several Connecticut town parks have been threatened with hydropower development—development which would produce little power and cause great damage. This bill protects those areas—and other parks across the country. This bill also does not include provisions to open the Arctic National Wildlife Refuge to oil and gas drilling—so for now this unique ecosystem is safe from development.

The bill provides for reform of the Public Utility Holding Company Act to

increase competition in the utility industry and ultimately to lower rates for consumers of electricity. I became personally involved in the PUHCA issue through the Banking Committee and held several hearings, here and in Connecticut, in an effort to craft legislation balancing the concerns of consumers, the utility industry, and independent producers. Although this was certainly a daunting task, I am pleased that the legislation before us today strikes that delicate balance.

In addition, the bill protects important State rights. This measure clarifies a State's right to regulate low level waste, which the Federal Nuclear Regulatory Commissions determines "below regulatory concern." This will ensure that States, such as my own State, can set standards for low level waste in the absence of Federal regulations.

The energy bill before us is a large bill and I have only sketched a few of its many provisions. It touches on nearly every aspect of our Nation's energy industry and it moves us forward on each of these fronts toward a more safe and sound energy future. In this regard, I urge my colleagues to join me in support of this vital legislation.

#### VETERANS' REEMPLOYMENT RIGHTS

Mr. CRANSTON. Mr. President, as chairman of the Committee on Veterans' Affairs, I want to express my deep disappointment in the failure of the 102d Congress to pass a much needed revision of chapter 43 of title 38, United States Code, the veterans' reemployment rights [VRR] law. I regret that, at this late hour in the session, the Committees on Veterans' Affairs of the House of Representatives and Senate were unable to reach a compromise agreement regarding VRR.

Mr. President, the VRR law, first enacted in 1940 and now codified in chapter 43 of title 38, provides job security to employees who leave their civilian jobs in order to enter military service, voluntarily or involuntarily. Within certain limits, the law generally entitles the individual who serves in the military to return to his or her former civilian job after being discharged or released from active duty under honorable conditions. For purposes of seniority, status, and pay, the employee is entitled to be treated as though he or she had never left. The effect of this law is often characterized—by the courts and others—as enabling the returning veteran to step back on the seniority escalator at the point he or she would have occupied without interruption for military service. The law applies both to active-duty service and to training periods served by reservists and members of the National Guard.

Mr. President, the VRR law is intended to encourage noncareer service

in the uniformed services by eliminating or minimizing the disadvantages to civilian careers and employment which occur as a result of such service. Unfortunately, over the last 50 years the VRR law has become a confusing and cumbersome patchwork of statutory amendments and judicial constructions that, at times, hinder the resolution of claims. Thus, the Committees on Veterans' Affairs hoped that Congress would be able to amend the VRR law to restate past amendments in a better organized, clearer manner and to incorporate important court decisions interpreting the law. The substantive rights at the heart of the VRR law would remain as valuable protection to those who provide this country with noncareer service in the uniformed services. S. 1095 and the House companion measure sought to ensure that the VRR law effectively and fairly served this purpose.

Mr. President, both Committees on Veterans' Affairs and the administration committed much time and energy to the revision and improvement of this law. For over 3 years, an executive branch task force on VRR law, including representatives of the Departments of Labor, Defense, and Justice and the Office of Personnel Management worked to develop a revision of chapter 43. H.R. 1578, the Uniformed Services Employment and Reemployment Rights Act of 1991, as passed by the House on May 14, 1991, is similar to and largely derived from the administration's March 5, 1991, draft.

Our committee was greatly assisted by the efforts of those departments, the Office of Personnel Management, and the House Committee on Veterans' Affairs, and we worked closely with representatives from each of the Federal agencies responsible for administering the VRR law in developing the Senate bill, S. 1095, entitled the Uniformed Services Employment and Reemployment Rights Act of 1991.

I introduced S. 1095 on May 16, 1991. Soon afterward, our committee held a hearing on this legislation and subsequently filed a report of S. 1095 on November 7, 1991. Unfortunately, the Senate was unable to proceed to the consideration of S. 1095 until only a few days ago, on October 1, nearly 11 months after the bill was reported out of committee.

Mr. President, this delay was the result of objections to S. 1095 by several organizations representing both large and small businesses which expressed reservations with S. 1095 as reported. These organizations raised their concerns with the committee and other members of this Chamber. In response to these concerns, various Senators opposed Senate consideration of the bill as reported and offered changes to protect the interests of businesses. The bill that the Senate finally passed on October 1, with a substantial commit-

tee modification I submitted as an amendment to the bill, reflected the only compromise I could reach with the business organizations and various Senators, while upholding the interests of veterans, to achieve unanimous Senate passage. However, that 11th-hour passage did not allow sufficient time to negotiate with the House Committee on Veterans' Affairs on the complicated and important issues of VRR.

Mr. President, I sincerely appreciate the very cooperative and patriotic manner in which the vast majority of employers have carried out their responsibilities under the VRR law. The revision of chapter 43 found in S. 1095 was designed to take into account the legitimate interests and needs of employers and to assist them by stating their obligations in a clear fashion. However, the strong efforts to delay passage of this bill prohibited the Senate from doing so until so late that negotiations with the House were rushed and unfruitful.

I regret that we were not able to complete this multiyear and multi-agency project, and I sincerely hope that the next Congress will pursue the revision of chapter 43 to its completion. I hope both Committees on Veterans' Affairs will hold hearings to shed light on the complicated and important issues involved in this revision and develop legislation that treats both veterans and employers fairly under the VRR law.

Mr. President, I thank the ranking Republican member of our committee, Mr. SPECTER, for his tireless efforts to improve S. 1095 and to push for Senate passage. I thank my good friend and chairman of the House Committee on Veterans' Affairs, Mr. MONTGOMERY, and ranking Republican member, Mr. STUMP, for their work on the revision of the VRR law. I am also grateful for the contributions of the Senate Veterans' Affairs Committee staff members who have worked on this legislation—Charlie Battaglia and Tom Roberts on the minority staff; and on the majority staff, Tom Hart, Shannon Phillips, who has left the staff to attend law school, Chuck Lee, Bill Brew, and Ed Scott.

Mr. President, it is important to our men and women when they put on the uniform that we show our support and do all we can to provide them with strong and effective employment protection. For over 50 years, the VRR law has provided this protection, however, much has changed in that time. The revision of chapter 43 of title 38 is essential to ensure that our noncareer servicemembers may leave their civilian employment to serve our country with the confidence that, upon their return, they may resume their lives with as little disruption as possible.

**TRIBUTE TO CONGRESSWOMAN SHIRLEY CHISHOLM FOR THE OCCASION OF HER APPEARANCE AT THE OCTOBER 31, 1992 ANNUAL FREEDOM FUND BANQUET OF THE MANSFIELD, OH, BRANCH OF THE NAACP**

Mr. GLENN. Mr. President, I congratulate the Mansfield Branch of the NAACP on its annual Freedom Fund Banquet and on its years of dedicated service to Ohio and the community. I also commend the organization for its visionary selection of Congresswoman Shirley Chisholm as its guest speaker.

Shirley Chisholm, the first African-American woman elected to the U.S. Congress, is an authentic American trailblazer. In 1972, Congresswoman Chisholm blazed yet another trail as she campaigned for the Democratic Party nomination for President of the United States.

In our current election cycle, the historic ground-breaking evidenced by the record of Shirley Chisholm has truly spawned this "Year of the Woman."

Because of what she has done, other women now know what can be achieved. The record number of women running for the Congress is the legacy written by Shirley Chisholm. It is not often that a person can see the fruits of their labor while they are still alive; Ms. Chisholm has that distinction. She has accomplished so much already, it is easy to forget that she is still "out there" having an impact, making a difference, and raising our consciousness on the important issues of the day.

Shirley Chisholm has accomplished so much, it is hard to tell where the myths end and reality begins.

The story has been told that when Ms. Chisholm was elected from Brooklyn, NY, the Democratic leadership appointed her to the Agriculture Committee; but the fiery newcomer didn't "sit down and be quiet." She protested saying that the Democratic leadership must have mistaken Brooklyn, NY for an agricultural center—but everyone knows that only "A Tree Grows in Brooklyn."

She was reassigned.

But just because Shirley Chisholm retired from Congress does not mean that she has retired from the battle.

As a founder and first national chair of the National Political Congress of Black Women [NPCBW], Congresswoman Chisholm has continued to shine her special light so that others may see and follow. During the recent Congressional Black Caucus legislative weekend, she was honored by NPCBW—"in this 'Year of the Women' we honor our women of 'the years'"—in recognition of her lifetime achievements. In truth, she honors us by her steadfast devotion and leadership in the area of community relations and politics.

History will treat Shirley Chisholm justly and record her name and her

deeds among those of Harriet Tubman; Mary McCloud Bethune; Fannie Lou Hamer; Sojourner Truth; Dorothy Height; and Susan B. Anthony. All of these women have made the world better and served as role models, not only for other women, but for men and children as well.

She has challenged and changed the status quo, whether the issue was equal employment opportunity, civil rights, education, Haitian refugees, or the plight of the poor. America is a better place because of Shirley Chisholm's involvement in these issues.

There is no doubt that Congresswoman Chisholm is the right messenger at the right time and if she discovered the time was wrong, she would merely change it.

"Unbought and unbossed, the Honorable Shirley Chisholm maintains her commitment to excellence and continues to fight the good fight.

**THE RETIREMENT OF SENATOR JAKE GARN**

Mr. DODD. Mr. President, for over a decade I have had the pleasure of working side by side in the Senate Banking Committee with the senior Senator from Utah, JAKE GARN. First as the chairman of that committee and then as its ranking member, JAKE GARN has spent his career as a tireless advocate of financial modernization. He has been consistently ahead of the curve on reforms to strengthen the banking system and reduce the need for costly and wasteful taxpayer bailouts.

JAKE GARN also made his mark in the areas of science and space. He has been one of the strongest supporters of NASA programs in the Senate, including the space shuttle and the space station. And Mr. President, JAKE GARN lived what he believed. In 1985, just a year before the terrible tragedy of the Space Shuttle *Challenger*, Senator GARN took a 7-day voyage himself on the *Discovery*.

Mr. President, on many issues the ideological gap between JAKE GARN and I were large. JAKE and I had different approaches and different philosophies. But we shared a common commitment to the people of the States we represented and to the people of this Nation. Most of all, we shared a close and trusted friendship that outlasted any partisan differences. As a fellow legislator, and as a friend, I will miss JAKE GARN.

**THE RETIREMENT OF SENATOR ALAN CRANSTON**

Mr. DODD. Mr. President, for almost a quarter of a century, on every subject from human rights to the plight of the urban poor, ALAN CRANSTON has truly been the conscience of the Senate. He will truly be missed by every Member of this body.

It was perhaps arms control in which ALAN CRANSTON made his biggest mark, Mr. President. From his days as part of the nuclear freeze movement to his last decade as a member of the Foreign Relations Committee, ALAN CRANSTON has campaigned tirelessly to roll back the spread of nuclear weapons. From Pakistan to China to the former Soviet Union, ALAN CRANSTON has fostered the cause of nuclear disarmament.

ALAN CRANSTON took on domestic causes with similar devotion. He was a relentless champion for campaign finance reform. He worked tirelessly to meet the housing needs of the poor and the disenfranchised. And he was an outspoken advocate of a woman's right to choose. In this Chamber, and indeed throughout the world, ALAN CRANSTON'S absence will be deeply felt.

**THE RETIREMENT OF SENATOR TIM WIRTH**

Mr. DODD. Mr. President, I rise today to say goodbye to TIM WIRTH, a colleague on the Banking Committee and a good friend. TIM and I were both elected to the House of Representatives for the first time as a part of the post-Watergate class of 1974. I was saddened and disappointed to hear of his untimely resignation from this body.

On the Banking Committee, TIM WIRTH has been a major force in helping to establish fair and open securities markets. But it is perhaps the environment where TIM WIRTH left the greatest impact, starting over a decade ago with his instrumental role in the passage of the first Clean Air Act. Since then, TIM WIRTH has helped to reshape the debate over the environment and the importance of our commitment to nature.

Just a few months ago while the President was refusing to go to Rio for the Earth summit, TIM articulated with passion and clarity why U.S. leadership was needed on this vital issue. I have no doubt that in some way TIM WIRTH will continue to exercise his own leadership, Mr. President, in the years to come.

**THE RETIREMENT OF SENATOR WARREN RUDMAN**

Mr. DODD. Mr. President, the Senate will miss the leadership of WARREN RUDMAN. He was a principal author of the 1985 Gramm-Rudman-Hollings legislation, which was the first serious effort to contain the Federal budget deficit. Of late, he has taken up a bipartisan effort with the former Senator Paul Tsongas to take his message of fiscal responsibility to the people.

WARREN RUDMAN has also taken it upon himself to ensure that Federal policies are not only fiscally sound, but fair. He has been a strong supporter of low-income home energy assistance, or

LIHEAP. He has consistently defended the Legal Services Corporation against those from his own party who would bring about its demise. And in 1988 he helped author the omnibus drug bill, to try and slow the spread of drug abuse through our Nation's cities and rural areas.

Mr. President, WARREN RUDMAN'S principled leadership is an example for anyone who would seek a career in public service. I know his dedication and integrity will serve as a valuable lesson.

#### THE RETIREMENT OF SENATOR ALAN DIXON

Mr. DODD. Mr. President, this week we part ways with Senator ALAN DIXON. ALAN DIXON joined the Senate in 1981 after more than 30 years of public service in Illinois government. His last 12 years here in the Senate, like his first three decades of public life, have been marked by a relentless dedication to the people of Illinois.

Like so many of our colleagues who are leaving this year, ALAN DIXON also served with me on the Banking Committee. As my successor on the Consumer and Regulatory Affairs Subcommittee, he was a forceful and effective advocate for fair lending practices. On the Armed Services Committee, ALAN DIXON denounced wasteful defense purchases and created a "procurement czar" to oversee spending at the Pentagon.

From his first days of public service as Belleville police magistrate in 1949 to his final days here in the Senate, ALAN DIXON never backed down from a fight. His spirit will be sorely missed in this chamber.

#### THE RETIREMENT OF SENATOR BROCK ADAMS

Mr. DODD. Mr. President, BROCK ADAMS leaves the Senate after nearly three decades of public service for the people of Washington State. BROCK ADAMS has held several posts of distinction in this Washington as well, serving as the first chairman of the House Budget Committee in 1975 and later as Secretary of Transportation from 1975 to 1977.

BROCK ADAMS' experience as Transportation Secretary later came into play as he authored measures to improve truck safety and to require double hulls on oil tankers.

BROCK ADAMS was a vocal opponent of military action, a vocal supporter of environmental causes, and a vocal advocate for fairness in the Tax Code. In his distinguished career of public service he helped shape the debate on all these issues. His fierce commitment and dedication will be missed.

#### THE RETIREMENT OF SENATOR STEVE SYMMS

Mr. DODD. Mr. President, in his 30 years as a representative of the people of Idaho, Mr. President, STEVE SYMMS has been an outspoken and dedicated spokesman for conservative causes—whether it was the pace of arms control or the burden of environmental standards. During his tenure in the Senate, he worked with a feverish dedication for the people of Idaho and the causes they supported.

Mr. President, STEVE SYMMS and I rarely saw eye-to-eye on most issues that came before this body. But with STEVE SYMMS I always knew there would be a spirited debate, an enlightened discussion, a different way of looking at the issue. I might not always agree with STEVE SYMMS, but I benefited from his perspective nonetheless.

STEVE SYMMS' positions came strictly from the heart, and from a deep and abiding commitment to conservatism. When STEVE SYMMS is gone, Mr. President, I will miss the debate.

#### THE RETIREMENT OF SENATOR JOCELYN BURDICK

Mr. DODD. Mr. President, I want to say a few words about a woman who has shown courage and determination in the face of tragedy. When Quentin Burdick died last month at the age of 84, JOCELYN BURDICK took over for her husband to become the first woman ever to represent the State of North Dakota.

While she served in this body for only a matter of weeks, JOCELYN BURDICK'S bravery and strength under these difficult circumstances are truly inspirational. She carried on her husband's mission with utter grace and determination.

Mr. President, North Dakota is lucky to have had JOCELYN BURDICK as their representative. And every Member of this body is lucky to have shared these few weeks with her.

#### H.R. 776, NATIONAL ENERGY POLICY ACT

Mr. CHAFEE. Mr. President, we have heard a great many things about this bill. It has been characterized as a major rewrite of our Nation's energy policy. It has been suggested that the bill includes a bold new program to promote energy efficiency and new, renewable sources of energy—to improve our environment and to combat the threat of global climate change.

These characterizations make great press but they are not based on the facts. This bill does too little to encourage improvements in energy efficiency. It does too much to promote increased use of fossil fuels and too little to encourage the development of non-

polluting, alternative renewable sources of energy. This bill is, in short, a bill that promotes the status quo in energy policy.

Mr. President, our national energy policy is shaped by three competing objectives. One objective is energy security typically measured by dependence on foreign sources of oil. Three oil disruptions over the last two decades, the attendant recession and inflation, and finally a war, Desert Storm, involving U.S. forces have educated all Americans to the importance of energy security.

A second objective is low energy prices. Mr. President, you don't often hear low energy prices praised in the national energy debate. Many have a stake in higher prices. The energy industries like higher prices because they raise profits and provide the funds for new exploration. The environmental community likes higher prices because they cut consumption. And those who worry about the security of our energy supplies like higher prices because they cut U.S. oil imports.

But low energy prices are of great advantage to our consumer and to our economy. The unprecedented period of economic growth experienced during the 1980's was sustained in part by the collapse of oil prices in the middle of the decade. Had it not been for falling oil prices, the current recession would likely have begun much sooner. Low prices help consumers and help our economy.

The third objective is environmental quality. There is no sector of our economy that has a greater impact on the environment than the energy sector, the production and consumption of energy. We control sulfur dioxide emissions from our powerplants to reduce acid rain. We put catalytic converters on our cars to reduce smog. We declare parts of the Continental Shelf off limits to drilling to protect marine life. We regulate strip mining of coal and the injection of brine produced with oil so that our lands are not despoiled. We impose strict liability on ocean tankers to prevent oil spills.

We do all of that and much more to protect our environment from the effects of energy production and consumption. These measures are also a part of our national energy policy.

As I said these are competing objectives. If we were willing to allow drilling in the Arctic National Wildlife Refuge, we might temporarily reduce oil imports and increase our energy security. If we were willing to pay higher prices for alternative transportation fuels from domestic sources, such as ethanol or electricity, we could improve our security. If we were willing to put a substantial tax on gasoline, we could reduce the carbon dioxide emissions that play a role in global warming. Managing these competing objectives in the context of a world energy

market dominated by Persian Gulf oil is one of our most difficult challenges as a nation.

On Tuesday night Ross Perot bought 30 minutes of TV time to discuss our Nation's problems. During that half hour, one of the things he said is that we do not have a national energy policy. When he said that, he was holding up a chart showing oil imports as a percentage of our total consumption. We now import almost half of the oil we use. Mr. Perot apparently thinks imports are too high. He said that we do not have a national energy policy because we have not succeeded in reducing oil imports to much lower levels.

Mr. Perot then went on to compare U.S. gasoline taxes to gasoline taxes in the European nations. American taxes are relatively low. In this country, combined Federal and State gasoline taxes average about 30 cents per gallon. In Europe they are much higher; \$2.57 in Britain; \$3.09 in France; \$3.92 in Italy. If gasoline taxes in the United States were \$3 per gallon, it is certain that our imports would be much lower. However, a European-type gasoline tax would have a devastating effect on our economy. We would have much lower imports but also a much slower economy.

Mr. Perot mentioned Marie Antoinette, the French queen who said, "Let them eat cake," in his talk on Tuesday evening. Just as Marie Antoinette was wrong about the availability of cake in 18th century France, Mr. Perot is wrong about the availability of energy tax dollars in late 20th-century United States. Without a massive overhaul of our tax system, American consumers and voters would reject \$3 per gallon gasoline taxes.

It is not correct to say that we have no national energy policy. We have a policy. But it is not a policy that seeks to reduce imports at any cost. We want to reduce imports but we also must consider the pocketbooks of our consumers and the quality of our environment. Current U.S. energy policy is sometimes described as market-based. It reflects the price decontrol decisions made by President Reagan in early 1981, the lack of any substantial energy taxes and little regulation of energy consumption decisions. It is a policy designed to reap the economic benefits of low prices.

The energy bill now before the Senate cannot be called a new national energy policy. H.R. 776 will not do much to reduce oil imports. This bill has no gasoline tax. It does not include a sweeping mandate for alternative fuels or conservation programs that will dramatically change the shape of U.S. energy policy. Measured by any of the three objectives, security, price or environmental protection, this bill fails to break new ground. This is a bill that continues the status quo in the big picture terms of energy policy.

There are small steps in this bill. But some of these small steps are in the wrong direction. I would prefer a policy that puts more emphasis on energy conservation and on the use of renewable sources of energy. The conservation measures in this bill simply codify a business-as-usual policy, they follow rather than lead. And to the extent that this bill encourages new domestic energy production, the sources are the synfuels that come from fossilized carbon. It is too much reliance on fossil fuels that already threatens our climate.

As science improves our understanding of the interaction between energy used and environmental quality, as we develop new technologies for energy production and consumption, it is appropriate that we adjust our national energy policy to reflect the new science and to take full advantage of new technology. One factor that must be given more weight in shaping our future energy policy is the possibility of global warming and other climate changes caused by human activity.

There is enough science available now for real concern. We are perhaps not ready to make radical changes in our energy policy, with wrenching economic effects, in an effort to head off the build up of carbon dioxide in the atmosphere. But there are many things that we can do to save energy and to use renewable resources that will protect the climate without significant economic sacrifice. Most of these measures also have the additional benefit of reducing oil imports. H.R. 776 makes too little of those opportunities.

Let me give you just one specific example. This bill contains no change in the corporate average fuel economy standards that govern automobile fuel efficiency. CAFE amendments were considered by the Energy and Natural Resources Committee and were reported by the Senate Commerce Committee. But no upward adjustment from the current standard of 27.5 mpg was made, even though we know there are available technologies that can achieve significant improvements in fuel economy without great cost.

We can understand that CAFE is controversial and could not be included here. But what is offered in its place? An alternative fuel requirement for fleets of cars and trucks. H.R. 776 mandates that all governments and some private companies operating large fleets of cars and trucks use alternative fuels. That would be fine if it wasn't for the fact that alternative fuels, as defined in this legislation, generally means methanol.

There are some specialty markets for compressed natural gas, but natural gas will never make a substantial contribution to total transportation fuel uses in the United States. And the other alternatives, principally ethanol and electricity, are so expensive that

no fleet owner will turn to them, especially if methanol is an option.

Methanol can be made from natural gas or coal. Because U.S. natural gas delivered by pipeline commands premium prices for space heating and industrial needs, any substantial increase in methanol use would be supplied either from foreign sources of gas or from domestic conversion of coal. If the methanol is made from foreign gas supplies and then imported, our energy security is not improved. If produced from domestic coal, CO<sub>2</sub> loadings to the atmosphere will be even greater than they are with the petroleum-based fuels of today.

Also important is the fact that methanol is likely to be much more expensive than the gasoline it replaces. How is our national energy policy—a balance of security, price and environment—improved by mandating the use of methanol as a transportation fuel? How can that option be justified while modest increases in CAFE are rejected?

There are alternative energy sources that are domestic and that are better for the environment. Some of these are only appropriate for use outside the transportation sector, but they could make a significant contribution nevertheless. We should be doing more to encourage their development and use. Solar and wind energy will not get much of a boost from this bill. Natural gas and coal are big winners. And there are conservation strategies for buildings, lighting, appliances, industry and transportation that could have been pushed much more aggressively.

There are other pluses and minuses in the bill. On the plus side, H.R. 776 does encourage least cost planning by electric utilities. Many utilities, including the New England Electric System, have championed energy conservation programs to deal with load growth and they have had great success. The reforms to the Public Utility Holding Company Act that are included in this bill will help hold down electric prices by bringing new competition to the utility sector.

Among the minuses, perhaps the most troubling in the role assigned to the National Academy of Sciences to develop radiation protection standards for any waste repository that might be located at Yucca Mountain, NV. By requiring that EPA adopt any NAS recommendations, the bill limits the public scrutiny and participation that would otherwise be brought to bear on the development of these important standards.

Mr. President, I admire the members of the Energy and Natural Resources Committee for their perseverance in this very difficult field. As I have said, the struggle to manage the competing goals that define a national energy policy, and to do it in the context of cartels, embargoes, recessions, revolutions, and wars, in one of the most dif-

difficult problems we face. I do not criticize their efforts for the lack of radical change in our current policy. Unlike Mr. Perot, I am not ready for \$3 per gallon gasoline taxes and crash programs for energy production to reduce our imports.

But it seems to me that this bill does not make as much as we could of the more modest opportunities that we do have for energy conservation and greater use of domestic, renewable energy resources. Rather, it tilts in the direction of more energy production and the consumption of the fossilized, carbon energy resources that pose such a threat to our environment. Without any economic penalty—in fact, with real benefits from greater economic efficiency—we could do more for your energy security and for our environment with a policy more reliant on conservation and the use of renewable energy resources.

#### ADOPTION OF THE CONFERENCE REPORT OF THE NATIONAL ENERGY POLICY ACT OF 1992

Mr. BIDEN. Mr. President, I support the passage of the national energy strategy because it starts the Nation on a course toward a comprehensive plan to reduce our dependency on foreign oil and provide incentives for wise use of existing energy resources.

While I believe the bill points us in the right direction, I cannot say that it will carry the country as far as we need to go. We can and should take bolder steps toward energy security in the next Congress. Three oil shocks in the last 20 years are undeniable evidence of the risks our Nation and our economy runs if we continue in our current policies.

Contrary to the administration's desire to seek only production-based solutions, the bill addresses the demand side of the energy equation. By diminishing and diversifying demand, we can develop enduring solutions to our energy problems. The next administration must provide stronger backing to the proven programs, such as alternative energy development and clean fuel car incentives and to novel approaches to our energy problems.

Regarding one of the shortfalls of this bill, I will continue to press the nuclear industry to adhere to the safety standards that they espouse. As I stated during debate on my amendment to create an independent nuclear safety board, we need to re-examine the energy sources we encourage and those we hinder. In addition, I have deep reservations about the Yucca Mountain nuclear waste disposal provisions in the bill. Experience has shown that the highest levels of competence and attention are required to control the potential threats posed by nuclear energy production and nuclear waste disposal.

While further improvements in the way we produce and consume energy

are necessary, the bill recognizes the threshold issue involved: the need for a comprehensive plan. We have begun to address the role of demand, as well supply, in our energy planning. That is of critical importance. As much as some would like it, a radical restructuring of our energy system is unrealistic. This bill represents an effort to turn the system in a direction that makes sense for the conditions our Nation will face in the years ahead.

Today, we have taken a step toward our future. If sincerely followed, the guideposts provided in this legislation can lead us to a more secure and efficient national energy program. I hope that we have had to learn the lesson of the Persian Gulf for the last time.

(At the request of Mr. MITCHELL, the following statement was ordered to be printed in the RECORD.)

• Mr. SANFORD. Mr. President, I support the conference report on the tax bill. Like all legislation, it required a great deal of compromise. I congratulate the managers for their hard work on this legislation.

This is important legislation. We all know that our inner cities and rural communities need help. It would be irresponsible for us to go home ignoring this problem.

We all know that approximately a dozen longstanding tax credits, such as those for low-income housing, research and development, educational assistance, mortgage revenue bonds, to name a few, are clear evidence of tax policies that have worked, so it would be irresponsible for us to go home without giving them further life.

We all know that the luxury tax has been an unmitigated disaster. This ill-advised tax, which I opposed at the outset and voted against, almost killed the boat construction industry in this country, raised virtually no revenue, and put thousands out of work. It would be irresponsible for us to go home without repealing this tax.

North Carolina used to have a significant boat building industry. Today, much of it is gone. One boat manufacturer told me that up to 8 out of every 10 boat manufacturers are either in bankruptcy or have moved their operations offshore. I have heard from hundreds of unemployed boat construction workers literally begging me to repeal this tax. I have heard from lumber, hardware, and tool suppliers, from boat retailers, and from unemployed sales representatives whose businesses rely upon the boating industry all appealing to me to repeal this tax.

There was a provision in the original draft which would have hurt the furniture industry in North Carolina. I especially want to thank the chairman for his assistance in crafting language for the temporary rental of homes for less than 15 days would still meet his goals of raising approximately \$300 million. Our mutual desire was to

avoid harming communities lacking commercial facilities which must rely upon local residents to open their homes for visitors to special events. This was particularly important to High Point's world renowned international furniture market, so I am pleased that we were able to achieve this goal.

I have heard from North Carolina contractors who utilize the low-income housing credit from North Carolina employers who utilize the targeted jobs tax credit, from students in North Carolina who rely upon the employer-provided educational credit and from organizations in North Carolina which rely upon charitable contributions for their survival and did not want those rules further restricted. In fact, I've heard from labor unions, from stock brokerages, from large companies, from small businessmen, from individual constituents, from nonprofit organizations, from coalitions that normally oppose each other, from around the entire country all seeking my support for this legislation.

Support that broad based is rare. But it means there must be something right about this bill. It appears to have bipartisan support. I only hope that President Bush recognizes how important and how broad the support for this legislation is. I certainly hope that it does not become a football that he must punt for what he deems his own political purposes, because it will hurt so many if he does.

By their nature, tax bills are going to have tax incentives and offsets. If President Bush now fears that all offsets are new taxes that breach his own pledge, this country is in more serious trouble than anyone could have imagined. That would be tantamount to a declaration that the Tax Code is perfect in its present form and requires no further change, because any change is going to move around some dollars on both the plus side and the minus side. Of course, President Bush has asked us for some tax legislation, all of it increasing the deficit, yet he has not specified any offsets. He has also blamed Congress for not balancing the unbalanced budgets he keeps sending us, though his tax initiatives would only expand the deficit. I suppose he expects the money to appear out of nowhere.

In this instance, Congress has acted in good faith. Last week, President Bush told us he objected to two provisions, the so-called Pease and PEP provisions, which extended current law on how itemized deductions and personal exemptions are treated for those earning above \$105,000. He had never given us any evidence of his objection to those provisions until last week, but as soon as he issued that message, the Congress removed them. Since then, he has been silent, but others in this Chamber tell us that he will veto this

bill. If President Bush did not like this bill, he should have told us what he didn't like so we could have fixed it. We heeded his objection on Pease and PEP, and I am confident the conferees would have made every effort. Congress should not be put in the position of having to guess what the President is thinking. To veto this bill after Congress has met his demands would not serve the interests of millions of taxpayers. It would only serve his own fear of the potential fallout created by his own promises.

Speaking for myself, I don't think the Tax Code is perfect, but on balance, this bill makes it a little better. Mr. President, we need to take a good, hard look at our tax system next year. It has clearly been a very important issue in the Presidential and congressional campaigns this year, and it is the primary fiscal tool the Government has to stimulate the economy. In the interim, this bill accomplishes many of the goals on which there has been little disagreement.

So, Mr. President. I support this bill for the progress it represents.●

#### THE TRADE AGREEMENTS COMPLIANCE ACT

Mr. BAUCUS. Mr. President, I am very pleased that the Trade Agreements Compliance Act, or TACA, has been included in this legislation. Frankly, it's long overdue.

The premise of this bill is simple—a deal is a deal.

Our country expends enormous resources negotiating trade agreements. Oftentimes, good agreements are concluded. Unfortunately, once negotiations are complete, the United States too often assumes that the game is over.

In reality, the game is just beginning. The real work lies in making sure that our trading partners live up to their promises. We're all familiar with the examples, past and present:

Japan has yet to come close to meeting the new semiconductor agreement's January 1993 target of 20 percent, and never met the target under the old semiconductor agreement;

Canada declined to fully enforce the Memorandum of Understanding on Softwood Lumber for months and then decided to unilaterally terminate the agreement;

Korea promised the United States it would liberalize its beef market, only to drag its heels for years;

In short, we have all seen outrageous examples in which our trading partners flout their trade agreements with the United States.

Under current law, injured U.S. parties have no recourse short of a full-blown section 301 case. Even with section 301, USTR has the option of declining to initiate cases.

Often, USTR's decision is a function of the demands of the moment—not the

pursuit of good trade policy. For example, it is rumored that USTR declined to enforce the United States-Japan Construction Agreement during the Gulf war for fear that Japan would reduce its contribution to Desert Storm.

TACA provides a reasonable and simple procedure for addressing this problem. It allows interested U.S. parties to request that USTR review foreign compliance with a particular agreement. USTR must complete the review within 90 days. If the trade partner is found to be in noncompliance, USTR must retaliate.

This legislation has already passed the House as part of H.R. 5100. It is endorsed by a wide range of business groups, including the U.S. Chamber of Commerce, the National Association of Manufacturers, the Semiconductor Industry of America, the National Forest Products Association, and the Telecommunications Industry of America.

I ask that a letter of support from interested business groups be included in the RECORD.

We talk a lot about getting tough on trade. Today we can actually do something. If the United States is not willing to enforce the trade agreements we have, our table policy can have no credibility. New trade agreements mean nothing if we don't stand up for the rights we have.

I urge by colleagues to support this important legislation. I urge the President to sign it into law.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

#### TRADE AGREEMENT COMPLIANCE ACT STEERING GROUP, September 29, 1992.

DEAR SENATOR: As members of a broad coalition of companies, labor organizations, and industry associations, we urge you to support the Trade Agreement Compliance Act (S. 388). It is our understanding that Senator Baucus intends to push for passage of this legislation before the 102nd Congress adjourns.

The premise of the Trade Agreement Compliance Act [TACA] is simple—"a deal is a deal." TACA is designed to ensure that our foreign trading partners honor the commitments they have made in connection with bilateral trade agreements with the United States.

If passed, TACA would allow an interested party to request a review of foreign compliance with a trade agreement, both on an annual basis and prior to the expiration of the agreement. If a foreign country is found to be in noncompliance with a trade agreement, the President would be authorized to take appropriate action under Section 301 of the 1974 Trade Act.

Passage of TACA is important for several reasons:

Foreign compliance with trade agreements remains a serious problem. In recent years, the United States has had to negotiate more than one agreement in the same sector, given the failure of the original agreement to meet its objectives.

The United States has recently entered into several bilateral trade agreements. Given the importance of increased exports to

economic growth and job creation, enforcing these agreements is as important as signing them.

While the Omnibus Trade and Competitiveness Act of 1988 did include provisions requiring monitoring of foreign compliance, those provisions do not establish a mechanism for an interested party to request and obtain a review of foreign compliance with trade agreements. TACA would eliminate this oversight.

TACA would enhance the leverage of U.S. trade negotiators. Greater participation by companies, industry associations or labor organizations in the "oversight" of a trade agreement would increase the incentive for foreign governments to fully comply with the trade agreement in question.

The House Ways and Means Subcommittee on Trade has already approved this legislation, and it is supported by a bipartisan majority of Senate Finance Committee members. We believe that the Trade Agreement Compliance Act is a reasonable approach to a serious problem.

Sincerely,

AEG/Westinghouse, American Electronics Association, Association for Manufacturing Technology/NMTBA, Automotive Parts & Accessories Association, Communications Workers of America, INTEL, Labor-Industry Coalition for International Trade, Motorola, National Association of Manufacturers, National Forest Products Association, Semiconductor Industry Association, Telecommunications Industry Association, Texas Instruments, U.S. Chamber of Commerce, U.S. Business & Industrial Council.

#### DEPOSITORY INSTITUTIONS DISASTER RELIEF ACT OF 1992

Mr. RIEGLE. Mr. President, I am pleased to support H.R. 6050, the Depository Institutions Disaster Relief Act of 1992, which will help facilitate reconstruction in the wake of such recent disasters as Hurricane Andrew, Hurricane Iniki, and the Los Angeles riots. This bill is identical to S. 3285, which I introduced on September 29, 1992, together with Senators GARN, GRAHAM, MACK, BREAU, INOUE, and AKAKA. My statement discussing the bill appears on page S15657 of the RECORD.

#### DEPOSITORY INSTITUTIONS DISASTER RELIEF ACT OF 1992

Mr. MACK. Mr. President, I rise in support of the Depository Institutions Disaster Relief Act of 1992. This legislation is critical to the revitalization of the areas in Florida that were devastated by Hurricane Andrew. Financial institutions that were in the path of the most destructive storm in the history of the United States and had a concentration of loans in that area need special consideration by the regulators during this reconstruction period.

This bill gives the regulators the flexibility to take into consideration the special circumstances existing in the hurricane ravaged areas. For example, in south Florida over 90,000 homes

were damaged or demolished in the wake of the hurricane. The requirement that appraisals be obtained when there has been obvious and material deterioration in market conditions or physical aspects of the property would be impossible under the current situation and would only serve to slow the rebuilding of this community. Another problem is the limits on growth imposed upon institutions. Financial institutions are growing very quickly because of the swelling of deposits due to the influx of Federal disaster relief funds and insurance settlements. This legislation permits the regulators to accommodate extraordinary asset growth by allowing the institution to exclude asset increases attributable to the deposit of insurance proceeds and governmental assistance when calculating its capital ratios.

This legislation also expresses the sense of the Congress that the regulators should encourage depository institutions in disaster areas to meet community financial service needs. Loans are going to have to be reworked, additional funds are going to have to be lent to rebuild and great deal of understanding and tolerance is going to have to be shown by the regulators and financial institutions.

South Florida has slipped from the front page of the newspapers and the lead story on the evening news, however the needs of the people in that area continue. I appreciate the concern of my colleagues in passing this legislation. Although it is my hope that we have done enough to cover all possible contingencies, I look forward to the same spirit of cooperation in the event of any unforeseen consequence of this disaster.

#### THE URBAN AID BILL

Mr. KERRY. Mr. President, I support the Urban Aid bill. But I do so with great ambivalence. My ambivalence is twofold. First, there are many questions about how we will pay for the tax benefits provided in the bill in the years after 1997. Second, this measure does not authorize the kind of major investments in urban America that we so urgently need. It is only a downpayment, and a small downpayment at that.

I decided to support the bill after much consideration and only after Senate acceptance of the Kennedy-Riegle amendment which I cosponsored and which targets an additional \$2.5 billion to urban areas over the next 5 years. I was swayed by the fact that the current version of the bill includes important provisions for our Nation's poor as well as other provisions that will create jobs by helping our economy. H.R. 11 includes the targeted capital gains tax cut for long-term investment in small businesses in the enterprise zones and the R&D tax credit, both of

which will spur the kind of job-creating investment that our economy so desperately needs. It includes, as well, a modification of the passive loss rules for real estate investors and a provision promoting pension plan investment in real estate. Both of these measures are needed to jump-start our Nation's ailing real estate industry. In addition, this legislation, if signed into law, would end finally the so-called luxury tax on boats which has compounded the devastation of the boat industry brought about by our sick economy.

However, I am concerned by the fact that the budget neutrality of this bill is unclear in the years outside the budget window. This is because it does not use permanent offsets to pay for the permanent benefits, especially the IRAs. I support this bill but I feel that it is imperative that if, as we approach 1997, we find that the IRAs will indeed add to the deficit, we find a way to pay for them with spending cuts. We cannot increase our \$4 trillion debt. We cannot increase the lien on our Nation's future.

I am concerned as well by the fact that less than half of the Urban Aid bill will help urban America. The urban and social spending in the bill, including the Kennedy-Riegle amendment, accounts for approximately \$11.9 billion of the bill's \$27 billion total. The expansion of the JOBS program will enable States to offer additional education and job training opportunities to move welfare recipients toward self-sufficiency. The increase in the asset limits for AFDC recipients will help families break the cycle of dependence by not punishing them for exhibiting the values we talk about in the debate on welfare reform—hard work, thrift, pursuit of educational and job training opportunities and demonstration of the belief that one's life can be improved.

And responsibility is not entirely the province of individuals. Over the past 12 years, the Reagan-Bush administrations reduced the Federal share of city expenditures from 17 percent to 6 percent. Where is the responsibility in that?

Over the same period, Federal support for housing, in real terms, dropped by 82 percent; for job training by 63 percent, for community development, by 40 percent, and for social service and community service block grants by 40 percent. What kind of choices were those?

Just this past March, the President vetoed a tax bill that would have given us urban enterprise zones; vetoed the centerpiece of what he now describes as a program of economic growth for this country; vetoed a bill designed to get this country moving again, to create jobs and to bring some real opportunity into our cities.

And now, after successfully limiting the amount and type of urban aid in

this bill, the President threatens to veto H.R. 11. His threat comes despite the fact that the bill contains all of the economic growth proposals from his State of the Union address except for a broad-based capital gains tax cut and it provides funding for 125 enterprise zones for which his Secretary of Housing and Urban Development campaigned so vociferously.

Why? The President vetoed the bill the Congress sent him this Spring because it would have taken away a portion—just a portion—of the tax breaks that were given to the richest one percent of Americans during the Reagan years. And he threatens to veto this bill because Congress has refused thus far to reopen tax loopholes for the most well-off. To protect the wealthiest of the wealthiest, the President is willing to turn his back on urban America and middle America and rural America and everyone else with an interest in getting our economy back on its feet, and an interest in restoring basic fairness to our tax system.

There are those who really don't care much about the problems of cities in America today. They point out that we are now predominantly a suburban Nation. They believe they are not affected by the fact that, because of Federal neglect, cities are being forced year by year to raise taxes, cut services and freeze or reduce public hiring. They look at urban residents and instead of understanding or helping, they turn away or lecture or assign blame. And the sad part of it is that many of these people are in the Executive Branch of the government of the United States.

One of the reasons the President is in such political trouble today is that he has so clearly lost touch with the day-to-day concerns of the American people. Other than Jack Kemp and Louis Sullivan, there isn't a member of this administration who has given any indication of understanding the kinds of choices the average kid or parent faces in our major cities today.

The crisis in our cities did not begin 3 months ago in Los Angeles. It is not a product of the Rodney King verdict. It exists—to a greater or lesser degree—in cities across America. It has been evolving for years. It has not one, but multiple causes. And it threatens literally to destroy America.

Deep down, we know we will not be able to compete internationally if too many of our young people are in jail or on drugs or always in the streets; we will never get out of debt if we must allocate billions more each year to prisons, prosecutions, emergency health care, expanded welfare and food stamps or rebuilding what the desperate among us have destroyed; and we will never have peace of mind as long as so many of us feel the need to seek security through locked doors, high fences, metal detectors and the purchase of guns.

Deep down, we also know that it doesn't have to be this way. We have the power to choose a different road.

That choice begins, although it does not end, with money and how we spend it. Let us be clear. There's a fundamental difference between spending billions for something like a B-2 bomber and spending the same amount for programs like child immunization and Head Start. It's like the difference between a family saving to send a child to college and that same family splurging on a trip to the Caribbean.

You buy a bomber, you get a bomber. You change the life of a young kid who needs help and you get a citizen. How do you measure the savings? How do you count the crimes that might have been committed, but now will not be? How do you put a value on the difference to society of a young person making responsible choices about school and drugs and sex and that same person making irresponsible choices because he had no access to Head Start, no chance at a job, no opportunity to grow up in a neighborhood with responsible models to emulate?

Mr. President, this bill is not the comprehensive urban investment package that I would have liked to see. It is a minimum response to a major problem. There are also legitimate questions about the deficit implications in the outyears, which I have described. But there is too much in this bill that I feel will help our economy for me to vote against it. Obviously, this is an election year and there will be efforts to characterize this bill one way or another for purposes of partisan gain. But I hope amidst all the rhetoric, we will keep sight of a building consensus in this country that I believe is potentially very hopeful.

It may have taken Los Angeles to do it, but I think there is growing agreement that the crisis in our cities affects us all, whether we live in a city, suburb or rural community; that our response must include incentives for the private sector and a greater effort by government; that individuals must be held accountable for their own choices and actions, but that this does not relieve the government of its own responsibilities; and that a sustained, broad-based, innovative strategy for responding to the problem is required.

This legislation constitutes only the very first steps of such a strategy, and this debate indicates that the consensus of opinion we need is only starting to form. So let us approve this bill, but let us do so with a minimum of pride in the accomplishment it represents, and a maximum of commitment to carrying forward the job that this measure so modestly and so belatedly begins.

#### TRIBUTE TO SENATOR CRANSTON

Mr. LAUTENBERG. Mr. President, I want to pay tribute to a great friend of

mine, the distinguished senator from California, Senator ALAN CRANSTON, who will be leaving the Senate at the end of this Congress.

Mr. President, ALAN CRANSTON has served the people of California and the people of this Nation with great distinction, and deserves the gratitude of all for his many accomplishments in this body. He has been a true leader on some of the most important issues facing our Nation, and often has made the difference in the success of many programs.

The range of issues on which ALAN CRANSTON has been a leader is unusually broad.

He's been out front in the battle for reproductive rights. Not only when that became the fashionable position. But for many, many years. ALAN CRANSTON is absolutely committed to a woman's right to choose, and has been way out front in his work in this area. Thank goodness he has been there over many years.

As chairman of the Veterans Affairs Committee, ALAN CRANSTON also has shown himself a true friend of the men and women who have served in our Armed Forces. The veterans of this country have known that they could count on Senator CRANSTON to speak up for them, and to fight for their interests. He's treated veterans with the respect and honor they deserve, and for that he has earned the gratitude of veterans around the Nation.

As chairman of the Subcommittee on Housing and Urban Affairs, Senator CRANSTON also has been on the cutting edge of housing policy, and helped shape a broad new approach to housing in the 1990 Cranston-Gonzalez National Affordable Housing Act. I was privileged to work with him in that, and appreciated his willingness to join with me on matters such as the Public and Assisted Housing Drug Elimination Act, and the HOME Program. Clearly, without his leadership the whole restructuring of housing policy in the 1990 act would not have been possible. Senator CRANSTON has devoted his considerable energy to refining the act, and to ensuring its funding.

ALAN CRANSTON also has been a leader in international affairs. His deep concern about the proliferation of nuclear weapons has helped guide the Senate in this most important of issues. ALAN CRANSTON has committed himself to making our world safer not only for ourselves, but for our children and grandchildren. And all Americans, all human beings, owe him a debt of thanks for his leadership.

Mr. President, one could go on and on about Senator CRANSTON's role in issue after issue. But I also want to focus for a moment on ALAN CRANSTON, the person.

As I've said, I consider ALAN a good friend. Not only because we see eye to eye on so many issues, but because he's

a man of real warmth, humility and sincerity. ALAN CRANSTON doesn't just care about people in the abstract. He cares about real people in the real world. It's one reason why he's not only been so well-liked within this institution, but why he's been so effective as a senator.

He was always ready to encourage people to seek office and to provide the counsel and advice necessary to run an effective campaign. He was very helpful to me as a candidate but also as a Senator. Alan's views were always listened to and I sought his perspective on process as well as substance.

ALAN CRANSTON was rare among us. He never sought the acclaim so often pursued. He instead received his primary satisfaction with a job well done, which he invariably accomplished.

Mr. President, ALAN CRANSTON is a special person. I will miss him. And I wish him all the best as he leaves the Senate.

#### TRIBUTE TO SENATOR STEVE SYMMS

Mr. CONRAD. Mr. President, as the 102d Congress comes to a close, I rise to wish a fond farewell to my distinguished colleague from Idaho, Senator STEVE SYMMS. After spending four terms in the House of Representatives and 12 years in the Senate fighting vigorously for his fundamental principles, STEVE SYMMS is now retiring from this body to move on to bigger and better things. Hopefully, this will include spending more time with his family enjoying the breathtaking Idaho scenery. I wish him all the best and want to say that it has been a pleasure serving with him in the U.S. Senate.

Although STEVE SYMMS and I have spent the last 6 years working on opposite sides of the Senate aisle, there have been important times when we crossed the ideological boundary to work together. From attempting to help rural hospitals achieve equity under the Medicare system to authorizing a commemorative coin for the heroes of Operation Desert Storm, I have been proud on a number of occasions to add my name to legislation introduced by STEVE SYMMS.

Perhaps most importantly, he and I have put our ideological differences aside when it comes time to help the American farmer. STEVE SYMMS knows about farmers. He received a degree in horticulture from the University of Idaho and was a fruit rancher on his family farm before entering the less pastoral world of public service. We worked together on farm debt tax reform in the 101st Congress and again during this session, trying to provide tax relief for farmers who realize capital gains or discharge of indebtedness income in the course of restructuring their debt. By cosponsoring legislation I introduced in 1989 and again in 1991,

Senator SYMMS proved that he believes in giving farm families a fresh start, free from overwhelming tax liability. I thank him for his support on this legislation.

I will greatly miss the friendship of STEVE SYMMS in the Senate, and I wish him well. Mr. President, I yield the floor.

#### SENATOR JAKE GARN

Mr. LAUTENBERG. Mr. President, I rise to pay tribute to Senator JAKE GARN.

Senator GARN and I have served in the Senate together and on the Senate Appropriations Committee for many years. Through our appropriations subcommittee assignments, we have worked together on the budget for NASA and the Defense Department, among other programs.

Over the years, I have been impressed by Senator GARN's commitment to our Nation's space program. Senator GARN has brought tremendous enthusiasm to the debate of funding for a multitude of space programs. He has tirelessly advocated for funding for NASA and space exploration programs. His commitment to funding space exploration programs has been matched by none.

In the Defense Appropriations Subcommittee, I have observed Senator GARN's work and personal commitment to national security issues.

Mr. President, Senator GARN has been bold in the Senate. He has demonstrated tremendous courage in his personal life as well. He was a Navy pilot. He served as a general in the National Guard. In 1985, he took a courageous journey into space in the space shuttle *Discovery*. And, when his daughter was sick and in need of a kidney, Senator GARN donated one of his own.

JAKE's love and support for Utah is well known and respected. Every State would be proud to have the kind of advocate he has been for them. His affection for the beautiful mountains of Utah is legend and he and I have skied together over that splendid terrain. I'm sure that our next ski outing may leave me running a poor second because I know JAKE will be mountain high with his wife and family when ever he can. He'll still have to try hard and I look to continuing to share those moments together.

I'm sure my colleagues join me in wishing Senator GARN well in his future endeavors.

#### PRESIDENT BUSH'S ECONOMIC POLICIES AND A TRIBUTE TO SECRETARY BRADY

Mr. SIMPSON. Mr. President, there has been a lot of highly undeserved criticism of President Bush and his team of economic advisors over the past few months of this Congress. We have heard many misguided pre-

dictions of gloom and doom and many outlandish accusations of mishandling and bad advice.

I stand here today in strong support of President Bush and his team. They deserve a strong defense of their record in this Chamber.

Since taking over the helm in 1989, President Bush has steered this Nation through some of the most perilous waters that this country, and the world have seen in half a century. We ought to remember that our victory in the cold war under the leadership of Presidents Reagan and Bush has made it possible for our Government and our industrial community to have this long-awaited opportunity to deal with our domestic challenges. President Bush has reacted in a responsible fashion by trimming defense spending and by fortifying our worker retraining programs to meet the realities of the new world he has helped to shape.

President Bush has proposed rational remedies for the mountains of debt our country faces. And, unlike the record of the last Democrat that occupied the White House, President Bush has seen to it that the American people have not been buried by runaway inflation rates. Americans have also had the benefit of historically low interest rates.

Consider for a moment, the shaky state of our financial system just 4 years ago. Remember the Third World debt?—and how the international problem was going to be the end of the global financial system? Well, that one can be chalked up as—solved.

Does this mean that our Nation's problems are solved? Certainly not. Would we like a stronger economy? You bet. The real news is this: Things are tough all over the world. Members of this body have essentially charged our President with responsibility for economic difficulties in Europe, in Japan, and everywhere else. Right now, every major industrialized country in the world is trying to get through hard times just as we are. And the fact is, many of them are faring far worse. Last quarter, our economic growth was stronger than Japan's, Germany's and Great Britain's. Our 3.1 percent inflation rate is among the lowest in the industrialized world.

When you cut through all the baloney, the story of the U.S. economy under President George Bush is one of effective leadership and careful management. Out in the trenches is a team of tough and highly experienced advisors.

The leader of that economic team is my lovely friend and former Senate colleague Secretary Nicholas Brady—a very fine and loyal man who has tackled problems that few Treasury Secretaries have ever even had to face. Although you don't hear much about Nick Brady's tireless work—he has surely been the guiding force behind

the successful strategy to clean up the savings and loan mess.

Earlier I mentioned the Third World debt crisis. If it had not been for Nick Brady, we would still have this problem today. Under the Brady plan, 11 countries have reached agreements to cut over 90 percent of their combined commercial bank debt—and major United States banks today have substantially reduced their exposure to Third World debt.

Secretary Brady has also been a steadfast ally of small business owners and entrepreneurs across this country. He has fought tooth and nail for lower capital gains taxes and other tax incentives for our business owners.

Despite a turbulent international financial market riddled with scandal and fraud, Secretary Brady's even and steady hand has made it possible for the United States to maintain a high level of confidence among investors. Today, thanks to swift and decisive action by the Bush administration, the stock market is strong.

Secretary Brady has led the fight for a long-overdue reform of our banking system—one that meets the international challenges that our competitors are better designed to face. Nick Brady was the first to take on the special interest groups with a proposal that will be the model for all bank reform legislation to come our way over the next 10 years.

And the list goes on: Fighting regulatory overkill, forming a coalition with our G-7 partners to achieve world growth, assisting economic reforms in emerging democracies. That is the mark of an economic team that is doing the job right and deserves high marks.

That is the record, ladies and gentlemen, and I am proud to stand here and state it on behalf of our very fine and honest President—George Bush—and his long time friend and loyal ally. We should no longer tolerate this unwarranted scalping and raw partisan political posturing that continues to be fueled by devious misinformation. It is not fair. It is not accurate. And frankly, it is simply not justified and the American people certainly ought to know that. It's all in the RECORD.

#### CONFIRMATION OF KATHRYN VRATIL

Mr. DOLE. Mr. President, the Senate has acted wisely in confirming Kathryn Vratil of Oberland Park, KS, to serve as a U.S. district judge.

When Chief Judge Earl E. O'Connor took senior status, this seat became available, and Kathy Vratil was selected from among a highly competitive group of candidates whom Senator KASSEBAUM and I recommended to the Attorney General.

It is fitting to note that Kathy was Judge O'Connors's first woman law

clerk, a position which she held from 1975 to 1978.

Kathy is a native of Kansas with undergraduate and law degrees from the University of Kansas—where she graduated in the top 10 percent of her law class. As she takes the Federal bench, she leaves behind a distinguished career as a partner in the litigation department of the Kansas City area law firm of Lathrop & Norquist.

I am confident that Kathy Vratil will do a superior job on the Federal bench, and Senator KASSEBAUM joins with me in extending our congratulations to her and her family.

#### WATER RESOURCES LEGISLATION

Mr. MITCHELL. Mr. President, I rise in support of the the water resources legislation now before us. This bill is an important step toward addressing water resources needs throughout the country.

I am especially pleased that the bill includes new authority to assess and protect the quality of coastal water and coastal sediment. Other key provisions would give small communities an additional 2 years to prepare for control of stormwater discharges to waterbodies and authorize a program for demonstration of stormwater control in critical watersheds including watersheds in my home State of Maine.

The sediment quality provisions of the bill before us are based on legislation I introduced to protect coastal waters (S. 1070). I want to thank Senators MOYNIHAN, CHAFEE, BREAU, and others for their constructive efforts to revise and improve this proposal.

There is growing evidence that sediments underlying coastal waters contain contaminants at levels which pose a threat to the quality of the aquatic environment and human health.

The National Research Council issued a report in 1989 which concluded:

Contamination of marine sediment poses a potential threat to marine resources and human health (through seafood consumption) at numerous sites around the country \* \* \* improving the nation's capability to assess, manage, and remediate these contaminated sediments is critical to the health of the marine environment.

The National Oceanic and Atmospheric Administration has published results of a national program to monitor toxic chemicals at 50 coastal and estuarine sites from Marine to Alaska. The report states:

A number of sites revealed relatively high levels of toxic contaminants in both bottom sediments and bottom dwelling fish. For example, sediment concentrations of toxic trace metals, aromatic hydrocarbons, DDT's PCB's, and sewage derived material from northeastern coast cities in Boston Harbor, Salem Harbor, and Raritan Bay are among the highest values measured nationally.

The coastal sediment provisions of the pending bill will substantially ex-

pand our information and knowledge about the condition of coastal sediments. The bill calls for a survey of sediment quality and a report to Congress on the extent and seriousness of sediment contamination nationally.

In addition, the bill provides for a National Contaminated Sediment Task Force to oversee the implementation of programs designed to protect sediment quality. The task force is to include key Federal agencies and representatives of ports, States, and public interest organizations.

I hope that this new task force will focus the attention of Federal agencies and other parties on the contaminated sediment problem and guide the development of policies to remediate existing problems and prevent future contamination.

The bill also amends the Ocean Dumping Act by clarifying the process for issuing permits for the dumping of dredged material in the ocean.

A central provision of the bill directs the Administrator of EPA to concur in writing on permits issued by the Secretary of the Army for the dumping of dredged material. This new process is intended to expand EPA's role in identifying potential environmental consequences of ocean dumping and in taking appropriate action to prevent environmental problems. This concurrence process applies to dumping authorizations for Federal projects pursuant to section 103(e).

The Administrator's concurrence may include permit conditions and may include denial of a permit. If the Administrator concurs with conditions, the conditions are to be included in the permit. If the Administrator denies the permit, the Secretary shall not issue the permit.

This legislation also brings the Ocean Dumping Act into conformance with our other environmental laws by removing the existing preemption of State environmental standards. In the case of dumping associated with Federal projects, a State may adopt a more stringent standard than a Federal standard based on a showing that such standard meets several criteria. Also, the President may exempt a Federal project from a State requirement if it is in the paramount interest of the United States to do so.

The amendment also addresses the important process of designating and managing dumpsites. Designation of dumpsites has been slow and many sites do not have final designation. The amendment provides that by 1997, all sites are to have final designations, including appropriate environmental assessment.

In addition, the amendment provides for the development of site management plans for dumpsites. The site management plans are intended to provide a comprehensive and long-term statement of the expected uses and ac-

tivities at the dumpsite. Monitoring at sites is to include monitoring of the areas surrounding the sites. Individual permits for dumping at a site are to conform to the site management plan.

The amendment also clarifies and limits the existing policy in the act concerning the dumping at sites which are not designated. This existing authority has been used on a very limited basis to date and it should continue to be used in only a very small percent of dumping cases. The Administrator is to concur in the selection of any alternative dumpsite and dumping is to be discontinued within 5 years unless the site is given a final designation by the EPA. Use of an alternative site may be extended for one 5-year period under specified conditions.

A key provision of the amendment revises the dumping permit authorities of the act. Permits are to conform to the provisions of site management plans for the dumpsite. Monitoring data collected under the site management plan is to be considered in the review of permits. Where monitoring data from a site indicates environmental problems or unintended environmental consequences associated with dumping, the permit is to be reviewed and revised or reissued.

Current law specifies that permits are to be for a specified period but does not specify the permit term. Most permits are now issued for a 3-year period. This period is sufficient to allow for the conduct of most projects and for the dumping associated with those projects to be terminated.

This 3-year period also facilitates re-issuance of permits as scientific knowledge evolves over time and does not lock in for an extended period permit conditions which may later be found to be inappropriate or inadequate to protect the environment.

In a small number of permit cases, however, it may be appropriate for permits to be for a period of up to 7 years. Permits should be issued for up to 7 years only in those few cases where dredging activity is continuous, where dumping has very limited environmental effect, and where dredged materials are not contaminated. In areas, such as urban harbors, subject to continuing or significant pollution, permit terms should be for the shortest practicable term and should not exceed 3 years.

Other important provisions of the amendment would increase penalties for violations of the act and extend authorizations for the act.

The bill also includes new authority for the Corps of Engineers to demonstrate approaches to the control of stormwater and related water pollution sources. This demonstration authority includes projects in my home State of Maine and I look forward to a successful effort to address this important problem.

I am pleased that the bill also authorizes a general investigation along the Maine and New Hampshire coastline, to determine the feasibility of water resource improvements along the coast, focusing particularly on dredging and dredged material disposal. Similar coastal studies in other States have proven beneficial for responsible long-range planning. Since the provision directs the corps to conduct the study with the understanding that all proposed dredging work would need to be evaluated based on disposing of it at a permanently designated site, it will encourage EPA to make permanent site designations for dredged material disposal, as required by title I of the Marine Protection, Research, and Sanctuaries Act. Passage of this provision will allow coastal planning to progress in Maine and New Hampshire and will prove to be a sound environmental and economic investment for New England.

I also want to express my support for the extension of the waiver of the obligation of small communities to have a stormwater discharge permit under the Clean Water Act. This provision recognizes that the EPA needs more time to address stormwater permits for large and midsized municipalities and industries and needs more time to develop an appropriate program for permits for discharges of stormwater by smaller communities.

I urge my colleagues to support this important legislation.

#### PROTECTION OF WORKERS AT NUCLEAR WEAPONS PRODUCTION COMPLEX

Mr. GLENN. Would the distinguished senior Senator from Massachusetts care to engage me in a colloquy concerning the protection of workers at our Nation's nuclear weapons production complex?

Mr. KENNEDY. I would. I would like to congratulate the Senator from Ohio for looking after the health and safety concerns of workers employed at Department of Energy nuclear weapons facilities throughout the country. One of the key achievements in the Defense authorization bill which passed this body late last week was the inclusion of provisions authored by the Senator from Ohio which ensure medical monitoring for DOE workers exposed to hazardous substances at our nuclear weapons facilities. This relief has long been sought by worker organizations and community groups.

Mr. GLENN. I thank the Senator. I am concerned with avoiding any unforeseen consequences with this legislation. In particular, I am concerned that test litigation brought in Federal court by the proponents of medical monitoring may now be held to be moot, in which case a question might arise concerning whether the court

would still retain its customary jurisdiction to award reasonable attorneys fees to the plaintiffs in cases where the remedy sought by the litigation is achieved.

As the Senator knows, this legislation was enacted against a backdrop of steadfast refusal by the Department of Energy to grant requests for medical monitoring of nuclear workers. Faced with this intransigence, unions representing workers at DOE facilities filed test cases in different parts of the country seeking legal relief against the private contractors employed by DOE at three facilities. There were no legal avenues available to sue DOE itself, and because these facilities were all operated by different private contractors it was felt that it was not logistically feasible to file a single nationwide suit. The expectation was that if these three test cases were successful, it would cause DOE to reappraise its position and withdraw its opposition to medical monitoring. It was also hoped that these cases would serve to focus public attention on the medical monitoring issue and serve as a catalyst for legislation that would remedy the situation nationally.

Throughout the litigation the defendant private contractors have been fully indemnified and reimbursed for all legal fees and expenses by DOE, which vigorously opposed the workers' claims at every stage. The defendants have raised a mass of legal defenses and the plaintiffs have had to engage in extensive discovery to establish the need for medical monitoring.

The litigation is at various stages. In my own State of Ohio, at Fernald, a class has been certified and a trial has been set for early 1993. In Rocky Flats, discovery is well under way and legal issues are currently pending before appellate courts. The Hanford case is weighed down under a mountain of discovery.

The passage of this legislation will provide most if not all of the relief sought in these cases and to that extent should make it unnecessary to proceed with the litigation. I am concerned, however, that passage of this legislation not be construed as removing from the courts, within their informed discretion, the right to award fees and expenses to the plaintiffs.

Mr. KENNEDY. I agree that it should be made clear that the legislation was not intended to change the status quo with regard to the authority of the courts to award fees and expenses if the court deems such an award to be appropriate. The decision as to whether to award fees and costs is of course entirely within the discretion of the courts. However, I agree that it is appropriate to affirm that Congress did not intend by passage of the legislation to remove that discretion from the courts.

Mr. GLENN. It should be clear, then, that as to these three cases, it is not

the intent or effect of this legislation to remove from the courts present authority to award reasonable attorneys fees to plaintiffs' counsel. They have expended years of time and effort in this struggle. Congress has recognized the merits of their position. Indeed we have enlarged upon these individual cases to extend medical monitoring to all past workers at DOE defense plants. The DOE has reversed its longstanding position opposing medical monitoring. Now that DOE accepts medical monitoring and our legislation expressly provides for it, the parties who were in part responsible for bringing this issue to the attention of Congress should not be penalized by our action. I believe that the courts by our legislative action will not be foreclosed from awarding, as they likely would have if Congress had not enacted our legislation, reasonable attorneys' fees and expenses associated with bringing the cases to the courts.

I thank the Senator from Massachusetts.

Mr. KENNEDY. I thank my friend and colleague from Ohio.

#### TRIBUTE TO DAVID BEN-RAFAEL

Mr. LAUTENBERG. Mr. President, as the Jewish people begin a new year in the Jewish calendar, they approach it with a degree of optimism rarely seen in Jewish history. For too many years the Jewish people looked ahead with significant trepidation as the next year, or a new decade, or a new century approached. Often, the Jewish people have been faced with questions including those of survival, or liberty, or when the Jewish people might have a homeland, or pray in Jerusalem, or when the Jewish people will find peace.

Many of those questions have been answered, but one that remains is the question of peace. The people of Israel yearn to have the assurance that one's children or other family members can live their lives to the fullness of their years without fear that they will be struck down by an enemy who employs violence as a means to achieve their objectives.

Even though the State of Israel was established to be a nation as long as mankind endures, the Jewish homeland is still not at peace. Its citizens are still subject to attack by terrorists whether on their own soil or while in other parts of the world. What the Israeli people anticipate with hope is the day, in the not too distant future, when peace will be realized for the land of Israel and her citizens.

While the path to peace may be arduous and circuitous, we are constantly reminded how necessary the pursuit of peace is when the price for instability and terror is so dear. We need only look back at the terrorist attack on the Israeli Embassy in Buenos Aires to be reminded of that dear price. Then, a

moment of terrorist horror claimed more than 30 lives. On March 17, a car carrying a bomb was driven into the entrance of the Buenos Aires Israel Embassy building where it exploded. The explosion caused two-thirds of the three-story embassy to collapse onto itself. Only a corner of the three-story building remained standing. The bombing not only killed at least 30 men, women, and children, but also injured more than 200 individuals who were near the Embassy at the time of the explosion.

One of those innocent victims was a member of a family with whom I have had a close and warm relationship for more than 20 years. Helen and Ralph Goldman's son, David Ben-Rafael was one of those individuals who was tragically killed in the bombing.

David Ben-Rafael was chief deputy and second in command of the Israeli Embassy. Mr. Ben-Rafael was a vibrant, intelligent man. Born and raised in New York and graduated with a bachelor's degree in international relations at George Washington University in Washington, DC, his love for Israel led him to emigrate to Israel in 1971 and adopt a Hebrew name. Mr. Ben-Rafael pursued a law degree at Hebrew University in Jerusalem, graduating in 1975.

In 1979, Mr. Ben-Rafael joined the Foreign Ministry and then served as secretary of information at the London Embassy. Later he held the position of Israel's consul in Chicago. In October, he was named to the Buenos Aires Israeli Embassy position.

Mr. President, this shocking incident and others like it must galvanize the United States and the international community to continue our resolve to combat and eradicate terrorism. Much of the world condemned this intolerable terrorist act and all should join in seeking an end to crimes of hate which only leave despair, devastation, and death in their wake.

I extend my heartfelt condolences to Mr. Ben-Rafael's wife Alisa, their children Noa and Jonathan, and his father and mother. David Ben-Rafael was a special man who left a lasting mark on the people whom he touched throughout his life.

#### THE RETIREMENT OF SENATOR STEVE SYMMS

Mr. LAUTENBERG. Mr. President, I want to take this opportunity to say a few words about a departing friend and colleague, STEVE SYMMS.

To be sure, STEVE SYMMS and I came down on opposite sides of most issues. But, while I often disagree with his views, I respect his straightforward nature. You always know where STEVE SYMMS is coming from. If he opposed you, you were up against a tough, persistent opponent. But, if he was with you, you could hardly ask for a better ally.

Last year, we worked together on the legislation that eventually became the Intermodal Surface Transportation Efficiency Act of 1991, or ISTEA. We quickly learned that, in spite of the different types of States we represent—his being largely rural, with far-flung small towns, and mine being the most densely populated State in the country—we had a lot more in common than not. In looking at the five original cosponsors of that legislation, one saw a real diversity in States represented. Rural States, Idaho and North Dakota, were teamed up with the urbanized States of New York, Rhode Island, and New Jersey. Rather than tearing us apart, that diversity gave us strength, and enabled us to push through the most important transportation legislation in the last 35 years.

STEVE SYMMS was unflinching in his efforts to show Senators from other Western, rural States that our bill was a good one, and that the traditional Western versus Eastern, rural versus urban divisions didn't apply here. His role in developing and enacting ISTEA was a critical one. It was a fitting tribute to his efforts that the House and Senate conferees chose to designate part B of title I of ISTEA as the Symms National Recreational Trails Act of 1991.

Mr. President, the people of Idaho are losing an able representative. But, I'm sure that we have not heard the last of STEVE SYMMS, and I wish him well in all his endeavors.

#### BEING SMART AIN'T EASY

Mr. PRESSLER. Mr. President, with a Rhodes scholar running for President and several in the Senate, one might think there is intelligence in Government. As a Rhodes scholar myself, on occasion I have been asked humorously, "What's in the water over there?" It's probably not the water, but the shepherd's pie.

When people ask me about Oxford, I always point out that the worst thing about being a Rhodes scholar is that people think you are incredibly smart. Recently, Jack Anderson concluded a column by quoting me in reference to that. I would like to share that column with my colleagues. I ask unanimous consent that a portion of Jack Anderson's column, which appeared in the Washington Post on September 28, 1992, be included at this point in the RECORD.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

It can be lonely at the top of the ivory tower—just ask Rhodes scholar and South Dakota Sen. Larry Pressler. Although a Republican and strong Bush backer, Pressler feels for fellow Rhodes scholar Bill Clinton because honorees can be victims of inordinately high expectations. Pressler told us

that's one of the reasons he downplays it a little bit.

You might even say it's a detriment because people think you think you're smarter than you are \* \* \* Pressler said. "I don't really consider myself a genius at anything. People assume that since I'm a Rhodes scholar I know more than I do know."

#### THE GRAND CANYON PROTECTION ACT

Mr. MCCAIN. I want to thank Senator BRADLEY for his tireless efforts on behalf of the Grand Canyon Protection Act and your work to pass this measure. I want to review briefly our goals in enacting this landmark legislation.

First, we want to ensure that operations of Glen Canyon Dam will stop damaging the downstream resources in Glen Canyon National Recreation Area and Grand Canyon National Park. We want to give the Secretary of the Interior a clear and unequivocal mandate to operate Glen Canyon Dam in a manner that protects, mitigates damage to, and improves downstream resources. We require the timely completion of an environmental impact statement to provide the scientific information that the Secretary needs to achieve that goal.

Second, pending completion of the environmental impact statement and implementation of long-term operating criteria to meet the new protective standard established in the act, we want the Secretary of the Interior to halt the adverse impacts of Glen Canyon Dam operations. Last year, Secretary Lujan directed the Bureau of Reclamation to institute interim operating criteria until the agency completes an environmental impact statement on dam operations. We commend Secretary Lujan for that action. The Grand Canyon Protection Act essentially ratifies the Secretary's decision on interim flows and ensures that those operating criteria will remain in effect until the EIS, and final criteria, and operating plans are completed, unless further action by the Secretary is necessary to protect downstream resources.

Third, we want the manner in which Glen Canyon Dam is operated to be determined in an open and public process in which all of the many parties and interests that use, benefit, and enjoy the Colorado River in Glen Canyon National Recreation Area and Grand Canyon National Park will have an opportunity to participate. We think that the process provided for in the National Environmental Policy Act is ideally suited for determining how Glen Canyon Dam is operated. The Secretary should study and develop a range of alternatives for achieving the goal of protecting, mitigating damage to, and improving the condition of downstream resources. We also want this process to be informed by the best scientific and economic information on

the environment of the Colorado River downstream from the dam, the impact of Glen Canyon Dam operations on that environment, and all of the economic and environmental costs and benefits of changing Glen Canyon Dam operations.

Fourth, we want the Department of the Interior to develop and implement a long-term monitoring program to provide information on the effect of Glen Canyon Dam operations on the downstream environment. We recognize the complex scientific and economic questions that the Federal and State resource management agencies must address in determining how Glen Canyon Dam is operated. We recognize that the environment downstream from the dam is a dynamic system. Only a program of adaptive management will serve the Grand Canyon, the wildlife, the endangered species, the native American tribes and their cultural heritage, and the recreational, water, and power users of the Colorado River. As more scientific information becomes available, the Department of the Interior may need to reevaluate the operating criteria and procedures for the dam to meet the goals and purposes of the Grand Canyon Protection Act.

Finally, we intend to ensure that the fundamental institutional arrangements for apportioning the waters of the Colorado River between the Upper Basin States and the Lower Basin States—as those arrangements have been set forth in interstate compacts, international treaties, court decisions, and laws implementing the compacts and treaties—are not affected by this legislation. Those fundamental arrangements remain fully intact under the Grand Canyon Protection Act.

Mr. BRADLEY. I appreciate the Senator's comments on the goals of this legislation, and thank him for his leadership and persistence in securing passage of the Grand Canyon Protection Act. He has clearly stated the purposes and intent of the Act.

Mr. MCCAIN. I would like to additionally pose a question to the Senator from New Jersey about the priorities among the different uses of the Colorado River and Glen Canyon Dam. As I understand it, Secretary Lujan directed the Bureau of Reclamation in July, 1991, to prepare an environmental impact statement on Glen Canyon Dam operations. The Secretary is to be commended for that action. However, the Secretary's decision with respect to interim flows and the Glen Canyon Dam EIS does not in any way lessen the need for the Grand Canyon Protection Act. Rather, the act provides the Secretary with a clearly defined legal context to prepare the EIS. The Grand Canyon Protection Act unequivocally provides that protection of the downstream resources in the Grand Canyon occupies a position of the highest pri-

ority in determining how the dam is operated, subject to and consistent with the Colorado River compact and the laws and treaties implementing the compact. There has been a long controversy over the priority of uses and values of the Colorado River and Glen Canyon Dam. The Western Area Power Administration has asserted that power generation has complete primacy over all other uses and values. Is it the Senator's understanding that the Grand Canyon Protection Act rejects the policy that power generation has any priority or primacy over protection of downstream environmental, recreation, or cultural values?

Mr. BRADLEY. Yes. The Grand Canyon Protection Act is intended to require the Secretary of the Interior to adopt operating criteria that will address, without infringing upon or affecting the Colorado River compact, the adverse impacts caused by both fluctuating flows and uncontrolled flood releases. Under the Grand Canyon Protection Act, all aspects of Glen Canyon Dam operations should be governed by the goal of protecting the downstream resources so long as those operations do not interfere with the allocation, apportionment, and deliveries provided for in the Colorado River compact.

Mr. MCCAIN. I thank the Senator for his confirmation. I would reiterate and emphasize that, while the Grand Canyon Protection Act does not change the fundamental purposes of Glen Canyon Dam, the act directs the Secretary to operate the dam to protect downstream resources.

I want to add one further comment. The Grand Canyon Protection Act requires a review by the Comptroller General of the "costs and benefits to water and power users and to the natural, recreational, and cultural resources \* \* \*" of the implementation of this legislation. It is important that this audit or study be a full economic analysis, rather than simply a financial analysis of the cost to the users of project power. In order to make the most responsible operating decisions, we must obtain a comprehensive view of the cost of this legislation. Does the distinguished chairman of the Water and Power Subcommittee intend that such a comprehensive audit take place?

Mr. BRADLEY. Yes. We intend that the audit be conducted under the Water Resource Council's 1983 "Economic and Environmental Principles and Guidelines for Water and Related Land Resources Implementation Studies," which require a full analysis of environmental and economic costs and benefits.

#### APPLICABILITY OF CAPITAL REQUIREMENTS

Mr. D'AMATO. Mr. President, I rise today to note that the U.S. Court of

Appeals for the Fifth Circuit recently decided a case of some importance with regard to the savings and loan industry, and the Government's efforts to restore that industry to health. In *Security Savings and Loan v. Director, Office of Thrift Supervision*, 960 F.2d 1318 (5th Cir. 1992), the court held that a thrift association was not required to consolidate on its balance sheet the assets and liability of a subsidiary insured institution that it acquired prior to May 1, 1989. This decision is in keeping with my understanding of the law, in particular the operation of section 301(t)(5)(E) of FIRREA, and I hope that it will be applied uniformly by the Office of Thrift Supervision.

Mr. GARN. I agree with the Senator's analysis of FIRREA. In fact, during the Senate debate on FIRREA this same issue arose, and we engaged in a colloquy on this subject at that time. I ask unanimous consent that our prior colloquy be printed in the RECORD.

The colloquy follows:

[From the CONGRESSIONAL RECORD, Aug. 4, 1989]

#### APPLICABILITY OF CAPITAL REQUIREMENTS

Mr. D'AMATO. I would like to ask Mr. GARN a question concerning the applicability of the capital requirements of the bill to savings associations. It is my understanding that the capital requirements established under the bill apply separately and not on a consolidated basis to a savings association and each existing subsidiary savings association acquired before May 1, 1989. Is my understanding correct?

Mr. GARN. The Senator is correct.

Mr. D'AMATO. Am I also correct in understanding that the capital provisions of the bill do not affect the public reporting of income or the statement of condition of savings associations under generally accepted accounting principles?

Mr. GARN. Yes, the Senator is correct.

Mr. D'AMATO. I thank the Senator.

#### STORMWATER PERMITS FOR SMALL CITIES

Mr. CHAFEE. Mr. President, H.R. 6167 also contains a provision that will extend the moratorium on Clean Water Act permit requirements for the stormwater discharges of small cities for another 2 years.

In a series of decisions stretching back over several years, the courts have found that the Clean Water Act requires cities to obtain permits for the stormwater that they discharge from pipes and ditches to surface waters. EPA and the States have been slow to comply with these court decisions because issuing permits for stormwater outfalls is a big job. The cities and counties of this Nation own and operate 8 million pipes and ditches that discharge stormwater to rivers, streams, lakes and estuaries.

To bring some order to the permitting requirement, the Congress established a schedule for stormwater permits in the 1987 Water Quality Act. Cities over 250,000 population were to

obtain permits by 1989. Cities between 100,000 and 250,000 were to obtain permits by 1991. And cities under 100,000 were not required to obtain permits until after October 1, 1992—a date that has just passed.

EPA and the States have fallen behind the schedule mandated by Congress. The larger cities are only now submitting applications for their permits. No permits have yet been issued to large cities. And no provision at all has been made for permits to the small cities under the October 1 deadline that was included in the 1987 Water Quality Act.

Therefore, the bill now before the Senate will extend the permitting deadline for cities with a population under 100,000 for another 2 years until October 1, 1994. In the interim, I expect that the Congress will consider legislation to reauthorize the Clean Water Act and that we will have an opportunity to reconsider stormwater permit requirements for small cities.

There is no doubt that stormwater is a serious water pollution problem. The States report that from 5 to 15 percent of the rivers, streams, lakes, and bays that fail to meet the fishable and swimmable goals of the Clean Water Act fail because of runoff from city streets, parking lots, industrial sites, and other developed lands. So, we must control these stormwater discharges. But whether the current Permit Program of the Clean Water Act is the right answer for our smallest cities is a question I hope we will examine early in the next Congress. In the meantime, this bill extends the moratorium for another 2 years.

#### BREAST CANCER SCREENING ACT OF 1991

Mr. COATS. Mr. President, today I rise in strong support of H.R. 6182, the Breast Cancer Screening Act of 1991. Mr. President, the facts surrounding breast cancer are numbing. The effects of breast cancer touch almost every family in America.

Recently, Tom Wyss, a State senator from Fort Wayne, IN, a personal friend of mine, informed me of his wife's bout with cancer. Tom's wife, Shirley, had a mammography screening showing no signs of irregularity in January. In July, she was diagnosed with breast cancer. Tom and several members of the Indiana breast cancer coalition have explained how this story is representative of many others. This shows why enhanced monitoring of facilities and equipment is needed and why uniform mammography rules should be put in place for all women in America.

Mr. President, these are the hard facts concerning breast cancer. It is the leading cause of cancer death among women age 15 to 54. One in nine women in the United States will develop breast cancer in their lifetime. In

the State of Indiana, nearly 4,100 cases of breast cancer will be diagnosed this year—over 1,000 of these individuals will likely die from the disease.

I believe mammography screening offers a way to save lives. Today, a mammogram costs nearly \$50 in the Midwest. The cost of a radical mastectomy and followup care often exceeds \$50,000. Every dollar spent on early detection of breast cancer can mean substantial savings for advanced patient care and treatment. A properly interpreted mammography can mean the difference between life and death for a victim who has a mammogram at an early stage.

I am a cosponsor of S. 1777, the Breast Cancer Screening Safety Act of 1991. I believe the legislation before us, which has incorporated needed modifications, does a good job in creating new quality standards for mammography facilities.

Today we have a patchwork of confusing and overlapping quality mammography standards and regulations. As a nation, I believe we must ensure that radiologists and other health professionals who administer a mammogram meet specific education, training, and professional standards. We must also ensure that facilities have ongoing quality insurance programs and that equipment is properly maintained.

The legislation before us provides for national quality standards for mammography in the area of equipment, quality assurance, personnel standards, and training. Annual onsite inspections are provided for in this bill and penalties are provided for noncompliance. These are measures whose time has come.

I believe there needs to be a guarantee that the mammography a woman gets will be safe. There needs to be a guarantee that wherever a mammogram is given—whatever the State or type of facility—quality care will be assured. I ask my colleagues to join me in supporting this important reform measure.

Mr. FORD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MITCHELL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### CONGRESSIONAL AWARD BOARD

Mr. MITCHELL. Mr. President, the Congressional Award Program recognizes personal achievement of young people from all walks of life and from every corner of this country. It bears the name of Congress because Members serve on the national board and organize programs in their individual States and districts. Through these

programs, Senators involve adults in the personal development programs for kids in their own communities.

Senator ROBB served with Senator WALLOP for the past 2 years on the Congressional Award Board. Together, they have reshaped and strengthened this program and they have served well. I thank Senator ROBB for his willingness to serve the Senate in this capacity and congratulate both he and Senator WALLOP for their tireless efforts on behalf of America's youth.

Today I nominate Senator BAUCUS to serve on the Congressional Award Board. It is my hope, and I know I speak for the Republican leader, that we see young people from every State receiving gold, silver, or bronze medals at next spring's award program here in Washington. Senator BAUCUS has a longstanding interest in helping America's young people and I am both pleased and grateful for his willingness to serve on the Congressional Award Board.

#### APPOINTMENT BY THE MAJORITY LEADER

The PRESIDING OFFICER. The Chair announces, on behalf of the majority leader, pursuant to Public Law 96-114, as amended, the appointment of the following individuals to the Congressional Award Board:

The Senator from Montana [Mr. BAUCUS], vice the Senator from Virginia [Mr. ROBB], resigned;

Walker P. Nolan, of Maryland;  
Edwin S. Jayne, of Virginia; and  
Ray N. Ivey, of Pennsylvania.

#### EXECUTIVE SESSION

#### EXECUTIVE CALENDAR

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Senate proceed to executive session to consider the following nominations: Calendar No. items 803, 804, 805, 806, 807, 808, 809, 810, 811, 812, 813, 814, 815, 816, 843, 844, 845, 846, 847, 848, 849, 850, 851.

I further ask unanimous consent that the Committee on Environment and Public Works be discharged from consideration of the following nominations for the Mississippi River Commission: Brig. Gen. Pat M. Stevens IV and Brig. Gen. Albert J. Genetti, Jr.; and the nomination reported today by the Committee on Armed Services: Maj. Gen. Steven B. Croker, to be lieutenant general.

I further ask unanimous consent that the Senate proceed to their immediate consideration; that the nominees be confirmed, en bloc; that any statements appear in the RECORD as if read; that the motions to reconsider be laid upon the table, en bloc; that the President be immediately notified of the Senate's action; and that the Senate return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

The nominations considered and confirmed, en bloc, are as follows:

#### DEPARTMENT OF STATE

Edward S. Walker, Jr., of Maryland, a career member of the senior Foreign Service, class of Minister-Counselor, to be the Deputy Representative of the United States of America to the United Nations, with the rank and status of Ambassador Extraordinary and Plenipotentiary.

Paul S. Sarbanes, of Maryland, to be a representative of the United States of America to the 47th session of the General Assembly of the United Nations.

The following-named persons to be representatives and alternate representatives of the United States of America to the 47th session of the General Assembly of the United Nations:

#### Representatives:

Edward Joseph Perkins, of Oregon.  
Alexander Fletcher Watson, of Massachusetts.

Larry Pressler, of South Dakota.

Gloria Estefan, of Florida

#### Alternate representatives:

Irvin Hicks, of Maryland.  
Shirin R. Tahir-Kheli, of Pennsylvania.  
Parker G. Montgomery, of New York.  
Prezell Russell Robinson, of North Carolina.

Margaretta F. Rockefeller, of New York.

#### NATIONAL INSTITUTE FOR LITERACY

John Corcoran, of California, to be a member of the National Institute Board for the National Institute for Literacy for a term of 3 years. (New position)

Jim Edgar, of Illinois, to be a member of the National Institute Board for the National Institute for Literacy for a term of 3 years. (New position)

Jon Deveaux, of New York, to be a member of the National Institute Board for the National Institute for Literacy for a term of 3 years. (New position)

Ronald M. Gillum, of Michigan, to be a member of the National Institute Board for the National Institute for Literacy for a term of 3 years. (New position)

Badi G. Foster, of Illinois, to be a Member of the National Institute Board for the National Institute for Literacy for a term of 3 years. (New position)

#### SUPERIOR COURT OF THE DISTRICT OF COLUMBIA

Brook Hedge, of the District of Columbia, to be an associate judge of the Superior Court of the District of Columbia for the term of 15 years.

Lee F. Satterfield, of the District of Columbia, to be an associate judge of the Superior Court of the District of Columbia for the term of 15 years.

#### FEDERAL RETIREMENT THRIFT INVESTMENT BOARD

Shirley Chilton-O'Dell, of California, to be a member of the Federal Retirement Thrift Investment Board for a term expiring September 25, 1994.

Stephen Norris, of Virginia, to be a member of the Federal Retirement Thrift Investment Board for a term expiring October 11, 1994.

#### FEDERAL LABOR RELATIONS AUTHORITY

Tony Armendariz, of Texas, to be a member of the Federal Labor Relations Authority for a term of 5 years expiring July 29, 1997. (Reappointment)

#### POSTAL RATE COMMISSION

Wayne Arthur Schley, of Alaska, to be a Commissioner of the Postal Rate Commission

for the remainder of the term expiring October 14, 1994.

#### THE JUDICIARY

Timothy K. Lewis, of Pennsylvania, to be U.S. Circuit judge for the Third circuit vice a new position created by Public Law 101-650, approved December 1, 1990.

Ursula Mancusi Ungaro, of Florida, to be U.S. district judge for the Southern District of Florida vice a new position created by Public Law 101-650, approved December 1, 1990.

John W. Sedwick, of Alaska, to be U.S. district judge for the District of Alaska.

#### DISTRICT COURT OF GUAM

John S. Unpingco, of Guam, to be judge for the District Court of Guam for the term of 10 years.

#### THE JUDICIARY

Kathryn H. Vratil, of Kansas, to be U.S. district judge for the District of Kansas vice Earl E. O'Connor, retired.

Paul J. Barbadoro, of New Hampshire, to be U.S. district judge for the District of New Hampshire.

Steven J. McAuliffe, of New Hampshire, to be U.S. district judge for the District of New Hampshire.

#### DEPARTMENT OF JUSTICE

Annette L. Kent, of Hawaii, to be United States Marshal for the District of Hawaii for the term of 4 years.

#### DEPARTMENT OF COMMERCE

Edward Ernest Kubasiewicz, of Virginia, to be an Assistant Commissioner of Patents and Trademarks.

#### THE MISSISSIPPI RIVER COMMISSION

Brig. Gen. Pat M. Stevens IV; and  
Brig. Gen. Albert J. Genetti, Jr.

#### THE NOMINATION REPORTED TODAY BY THE COMMITTEE ON ARMED SERVICES

Maj. Gen. Stephen B. Croker, to be lieutenant general.

#### STATEMENTS ON THE NOMINATION OF WAYNE SCHLEY

Mr. STEVENS. Mr. President, it is tough to say farewell to Wayne Schley who has worked closely in the Senate with me for more than two decades. But it is great to know that the new career phase that Wayne is about to launch is in an area where he is an acknowledged expert.

The selection of Wayne Schley, currently Republican staff director of the Senate Rules Committee, to be a member of the Postal Rate Commission is, indeed, a fine choice.

As a member of the Postal Rate Commission, Wayne will bring a knowledge of postal issues possessed by few congressional staffers. His is a level of expertise which will be vital to the Rate Commission.

When he first came to my personal staff in 1971, after attending graduate school at the University of Alaska Fairbanks, Wayne began working on Postal Service issues.

Through the years, as he served as majority and minority staff director of the Subcommittee on Civil Service, Post Office and General Services, Wayne has become an expert on postal issues.

He has been my trusted adviser on postal matters.

Wayne is respected for his mastery of postal issues by industry leaders, the labor community, Members of Congress and postal employees and officials across the nation.

For the past 5 years, Wayne has served as Republican staff director on the Senate Committee on Rules and Administration. In addition, he was responsible for many of the arrangements relating to the inauguration of the President and Vice President of our Nation. He worked long and hard coordinating the agencies and groups traditionally involved in inaugural activities.

And, Wayne has earned a special place in the hearts of hundreds of young Alaskans. For 20 years he has been the coordinator of my summer intern program.

Every summer, Wayne shepherds 20 or 30 graduating high school seniors who travel to Washington, DC, to work as interns in my office. He makes sure they have assignments, coordinates their housing and transportation, arranges for sightseeing trips, attendance at committee hearings and forums at other government agencies. And he's set up an intern alumni organization so that they keep in touch, even though they come from the far corners of our State.

Mr. President, when Wayne leaves the Senate, it will be a loss to me personally. It will be a loss to the Senate Rules Committee, and to his many friends and coworkers in the Senate.

But he brings to the Postal Rate Commission a great knowledge of postal issues, a capacity for hard work, and a degree of competence it would be hard to match. I look forward to our new association when we work with him on the Commission.

Mr. FORD. Mr. President, I rise to express my support for Wayne Schley to be a member of the Postal Rate Commission with both enthusiasm and regret. He has exceptional credentials to serve on the Commission. Unfortunately, this appointment means a loss to the Senate Committee on Rules and Administration where he serves as Republican staff director.

Wayne has served as TED STEVENS' key adviser on postal matters for many years. Few individuals are as well informed on the U.S. Postal Service. He is an expert on postal issues.

My association with him as Republican staff director has been excellent. He is diligent, thorough, and competent. We will miss him on the committee staff; but we look forward to working with him on the Commission.

I strongly support this appointment.

#### STATEMENT ON NOMINATION OF THE HONORABLE URSULA MANCUSI UNGARO

Mr. MACK. Mr. President, I would like to thank the Senate for confirming the Honorable Ursula Ungaro, nominee for the U.S. District Court in the Southern District of Florida.

Mr. President, Judge Ungaro was a product of my Judicial Advisory Commission, a commission comprised of prominent lawyers in my State tasked with the responsibility of recommending outstanding Federal judicial candidates for my consideration. Judge Ursula Ungaro is no exception.

Judge Ungaro has served the legal profession with distinction over the past 17 years. She graduated from the University of Florida Law School and served on the University of Florida Law Review Editorial Board. While a member of the Law Review Editorial Board, Judge Ungaro authored an article concerning the Florida Administrative Procedure Act.

Upon completing her studies at the University of Florida, Judge Ungaro practiced law in Miami for 11 years. Her practice consisted mainly of complex litigation cases involving securities fraud, partnership disputes, sophisticated real estate transactions and health care law.

In 1987, Judge Ungaro was appointed as circuit judge for the Eleventh Judicial Circuit and was reelected without opposition for a second term. As a circuit judge, she has been assigned to both the civil and criminal division. Judge Ungaro has also served as an appellate judge for appeals from the county court. Based upon her legal and judicial experience alone, Judge Ungaro is highly qualified to be a Federal judge.

Aside from being an accomplished legal advocate and circuit judge, Judge Ungaro has been active in the Florida bar and her community. She served a 3-year term on the Florida Supreme Court's Race and Ethnic Bias Study Commission. She has also been involved with the City of Miami Youth Task Force. In short, Judge Ungaro enjoys a fine reputation in her community and is well regarded by the local bar.

I trust each of you will examine Judge Ursula Ungaro's fine credentials. Judge Ungaro will make an outstanding addition to the Federal bench and I thank the Senate for confirming her nomination prior to sine die.

#### LEGISLATIVE SESSION

The PRESIDING OFFICER. Under the previous order, the Senate will now return to legislative session.

#### THANKS OF THE SENATE TO THE VICE PRESIDENT

Mr. DOLE. Mr. President I send a resolution to the desk.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

A resolution (S. Res. 359) tendering the thanks of the Senate to the Vice President for the courteous, dignified, and impartial

manner in which he has presided over the deliberations of the Senate.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 359) was agreed to, as follows:

#### S. RES. 359

*Resolved*, That the thanks of the Senate are hereby tendered to the Honorable Dan Quayle, Vice President of the United States and President of the Senate, for the courteous, dignified, and impartial manner in which he has presided over its deliberations during the second session of the One Hundred Second Congress.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. MITCHELL. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

#### THANKS OF THE SENATE TO THE PRESIDENT PRO TEMPORE

Mr. MITCHELL. Mr. President, I send a resolution to the desk.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

A resolution (S. Res. 360) tendering the thanks of the Senate to the President pro tempore for the courteous, dignified, and impartial manner in which he has presided over the deliberations of the Senate.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 360) was agreed to, as follows:

#### S. RES. 360

*Resolved*, That the thanks of the Senate are hereby tendered to the Honorable Robert C. Byrd, President pro tempore of the Senate, for the courteous, dignified, and impartial manner in which he has presided over its deliberations during the second session of the One Hundred Second Congress.

Mr. MITCHELL. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

#### COMMENDING EXEMPLARY LEADERSHIP OF THE MAJORITY LEADER

Mr. DOLE. Mr. President, I send a resolution to the desk.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

A resolution (S. Res. 361) to commend the exemplary leadership of the majority leader.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 361) was agreed to, as follows:

#### S. RES. 361

*Resolved* That the thanks of the Senate are hereby tendered to the distinguished Majority Leader, the Senator from Maine, the Honorable George J. Mitchell, for his exemplary leadership and the cooperative and dedicated manner in which he has performed his leadership responsibilities in the conduct of Senate business during the second session of the 102d Congress.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. MITCHELL. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

#### COMMENDING EXEMPLARY LEADERSHIP OF THE REPUBLICAN LEADER

Mr. MITCHELL. Mr. President, I send a resolution to the desk.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

A resolution (S. 362) to commend the exemplary leadership of the Republican leader.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. 362) was agreed to, as follows:

#### S. RES. 362

*Resolved*, That the thanks of the Senate are hereby tendered to the distinguished Republican Leader, the Senator from Kansas, the Honorable Robert Dole, for his exemplary leadership and the cooperative and dedicated manner in which he has performed his leadership responsibilities in the conduct of Senate business during the second session of the 102d Congress.

Mr. MITCHELL. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDING PARAGRAPH 5 OF  
RULE XXIX OF THE STANDING  
RULES OF THE SENATE

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of Senate Resolution 363, a resolution submitted earlier today by myself and Senator DOLE to amend paragraph 5 of rule XXIX of the Standing Rules of the Senate relating to confidential business and proceedings; that my floor statement relative to the conclusion of Mr. Peter Fleming's investigation of the unauthorized disclosures of Senate information, and the reasons for modifying rule XXIX, be inserted at this point in the RECORD; that the resolution be agreed to and the motion to reconsider laid upon the table.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution (S. Res. 363) was agreed to, as follows:

S. RES. 363

Whereas, it is the fundamental policy of the Senate to favor openness and public access to information;

Whereas, notwithstanding the Senate's policy of openness, committees, subcommittees, and offices of the Senate at times properly treat their business and proceedings as confidential in order to effectively perform their functions, and to protect the privacy and other interests of individuals and organizations who provide information or are the subject of inquiry;

Whereas, when it is determined that a committee, subcommittee, or office of the Senate should treat a proceeding or matter as confidential, a breach of that confidentiality is destructive of mutual trust and respect, reflects poorly on the institution, and may seriously harm the privacy and other interests of individuals and organizations;

Whereas, the Standing Rules of the Senate should explicitly prohibit the unauthorized disclosure of the confidential business and proceedings of the committees, subcommittees, and offices of the Senate: Now therefore be it

Resolved, That paragraph 5 of rule XXIX of the Standing Rules of the Senate is amended by—

(1) striking "or officer" and inserting " , officer, or employee";

(2) inserting " , including the business and proceedings of the committees, subcommittees and offices of the Senate," after "proceedings of the Senate"; and

(3) inserting "or employee" after "if an officer".

Mr. MITCHELL. Mr. President, as Senators will recall, on May 4, Peter Fleming, Jr., the Temporary Special Independent Counsel appointed pursuant to Senate Resolution 202 of this Congress, transmitted to the distinguished Republican Leader and to me a report of his findings concerning unauthorized disclosures of Senate information. Senator DOLE and I wish to reiterate our appreciation to Mr. Fleming and his associates for undertaking this difficult assignment, and for performing it with skill and dedication.

In accordance with section 7 of Senate Resolution 202, Senator DOLE and I

promptly made the Counsel's report available to all Senators. The report was also made available to the public and has been printed as an official document of the Senate, Senate Document 102-20.

In addition to providing that the leaders shall make the report available to all Senators, section 7 of Senate Resolution 202 places further responsibilities on the majority and minority leaders. They are to make:

(1) a determination on referral to the appropriate law enforcement authority of any possible violations of Federal law;

(2) a determination on referring to the appropriate committee any disciplinary action that should be taken against any Senator, official, employee, or person engaged by contract or otherwise to perform services for the Senate, who may have violated any rule of the Senate or of any Senate committee;

(3) a determination on referring to the appropriate executive branch [official] any questions involving the conduct of any official or employee of the executive branch responsible for the unauthorized disclosure; and

(4) recommendations for any changes in Federal law or in Senate rules that should be made to prevent similar unauthorized disclosures in the future.

Items 1 through 3, quoted above, raise the question whether, with respect to disclosures of information within the purview of Senate Resolution 202, the conduct of any individual should be the subject of further investigation by a law enforcement agency, or by either the Senate or any executive branch disciplinary body. After careful consideration of the report of the Special Independent Counsel, the distinguished Republican Leader and I share the view that it is unlikely that additional investigation would add appreciably to the knowledge obtained by Mr. Fleming in the course of his thorough inquiry. Accordingly, we have concluded that no further investigation for either criminal or disciplinary purposes is warranted.

However, concerning measures to prevent similar unauthorized disclosures in the future, we have concluded that action, in the form of a Senate rule amendment, would be beneficial. For that reason, at the conclusion of these remarks, I will send to the desk, on behalf of myself and Senator DOLE, a resolution to amend paragraph 5 of rule XXIX of the Standing Rules of the Senate on the disclosure of the confidential business and proceedings of the Senate.

Rule XXIX(5), which was initially adopted in 1844, now provides:

Any Senator or officer of the Senate who shall disclose the secret or confidential business or proceedings of the Senate shall be liable, if a Senator, to suffer expulsion from the body; and if an officer, to dismissal from the services of the Senate, and to punishment for contempt.

During the Special Independent Counsel's investigation the argument was made by some that no Senate rule

prohibits the disclosure of confidential committee information to persons outside of the Senate. That argument was based in part on the fact that rule XXIX(5) refers to Senate proceedings, and not explicitly to committee proceedings.

We believe, as did the Special Independent Counsel, that rule XXIX(5) presently applies to disclosures of committee proceedings, which are, without question, Senate proceedings. We also concur that it would be beneficial to eliminate any ambiguity on this point. Although public access to committee proceedings is almost always favored, there are special occasions when other interests warrant the judgment of Senate committees that it is essential to maintain confidentiality. By providing that the phrase "business or proceedings of the Senate" includes the business or proceedings of committees, our amendment would leave no doubt that the standing rules prescribe severe penalties for the unauthorized disclosure of the confidential business or proceedings of committees.

The events that gave rise to the Special Independent Counsel's investigation highlight why confidentiality may be important for committees. To begin with, firm promises of confidentiality may be necessary to protect individuals who have sensitive information to provide to the Senate but who do not wish their identities to be made public. Their willingness to provide information to the Senate may depend upon the ability of the Senate to keep its promises of confidentiality.

Second, fairness to individuals who are the subject of Senate inquiries often requires that a preliminary exploration of allegations, that might reflect adversely on these individuals, occur in closed session to assess their validity.

Third, candid discussions among Members depend upon a trust that is based, in part, on a willingness of all Members to abide by the practices of the Senate. Those practices place responsibility for certain decisions, such as the decision whether to release confidential information, in the hands of the Senate as a whole, or in committees of the Senate, rather than in individual Senators. The unilateral decision by a Member or employee to release confidential committee information is inconsistent with the Senate's practice of making such decisions openly and collectively. Arrogation of this responsibility by individuals can destroy mutual trust among Members and be harmful to this institution.

In addition to amending rule XXIX(5) to explicitly apply to committees and subcommittees of the Senate, the resolution would amend the rule to specify that it applies to offices of the Senate. A number of offices of the Senate have obligations both under statutes and rules to maintain the confidentiality of

certain classes of Senate information. The amendment would make clear that the rule applies to the Offices of the Secretary, Sergeant at Arms, Legislative Counsel, Legal Counsel, and Senate Fair Employment Practices, each of which has the responsibility for maintaining confidential Senate information. Finally, the resolution would amend rule XXIX(5) to make clear that it applies to employees of the Senate as well as to Members and officers of the Senate. Thus, as amended, rule XXIX(5) clearly applies to the business or proceedings of committees, subcommittees, and offices of the Senate, and to all Senate employees.

There should be no doubt that rule XXIX(5) broadly prohibits all unauthorized disclosures of the secret or confidential business or proceedings of the Senate. As used throughout rule XXIX, the words secret and confidential refer to all information the Senate treats as confidential, including information received in closed session, information obtained in the confidential phases of investigations, and classified national security information. This amendment to rule XXIX is in no way intended to modify or supersede the provisions of Senate Resolution 400 of the 94th Congress.

The Select Committee on Ethics—which has jurisdiction, under section 2(a) of the Senate Resolution 338 of the 88th Congress, as amended, over violations of Senate rules relating to the conduct of Members, officers, and employees of the Senate—would have jurisdiction to consider an allegation of a violation of rule XXIX(5). However, the jurisdiction of the Ethics Committee should be reserved for grave breaches of confidentiality that cannot be resolved by the committee or offices in which those breaches occur. Almost always, questions about leaks should be addressed first by Members or committees or offices themselves. As I stated during consideration of Senate Resolution 202, the most effective way to enforce the Senate's policy against leaks is for each Member to make clear that leaks by the Member's staff will not be tolerated. In offering this resolution, it is our intention that the Ethics Committee exercise discretion in determining the appropriate allocation of responsibility between it and the committees or other entities of the Senate in which issues of unauthorized disclosure may arise.

Senate Resolution 202 was adopted to provide for a thorough and independent investigation of alleged disclosures of Senate information so that the Senate could resolve, if possible, the particular matters that occasioned it. While individual responsibility cannot be assigned for the disclosures that were investigated, we can commit ourselves to preventing future leaks of confidential Senate information by making clear to members of our own staffs that such

conduct will not be tolerated and by removing any doubt that unauthorized disclosures, including the unauthorized disclosure of the business or proceedings of committees and offices of the Senate, are prohibited by the rules of the Senate. To that end, on behalf of myself and the distinguished Republican leader, I send to the desk a resolution to amend paragraph five of rule XXIX of the Standing Rules of the Senate.

Mr. STEVENS. Mr. President, I commend the distinguished majority and minority leaders for their resolution amending rule XXIX(5) of the Standing Rules of the Senate. I believe this is a useful clarification of the scope of rule XXIX(5).

I raised the question of the extent to which the rule XXIX(5) prohibition covers classified national security information and our Rules Committee staff discussed the matter with Senate legal counsel, the Office of Senate Security, the Intelligence Committee, the Defense Appropriations Subcommittee, Ethics Committee, and the majority staff at Rules Committee. We are in agreement that the words secret and confidential in Rules XXIX(5) clearly covers classified national security information.

I would also add that although the title of rule XXIX is, for historical reasons, executive sessions it should be clear to all Members that the scope of rule XXIX is currently far broader. When the Rules Committee, at some future time, takes up a package of technical corrections to the Standing Rules of the Senate, I will offer an amendment to the title of rule XXIX to reflect its broad scope.

I thank the leaders for their attention.

#### NOTIFICATION TO THE PRESIDENT CONCERNING THE PROPOSED SINE DIE ADJOURNMENT OF THE SESSION

Mr. MITCHELL. Mr. President, it is customary at the time of sine die adjournment for the two leaders to place a telephone call to the President to notify the President of the sine die adjournment. We have attempted to arrange such a call in conformance with the custom and practice which I just described.

However, Senator DOLE and I have been informed that the President's schedule is such that the call cannot be arranged at this time. The President is attending an event outside the city and then will be flying back to Washington later this evening.

So Senator DOLE and I have agreed to call individually and personally tomorrow to notify the President formally of the action which will occur this evening and which we would otherwise have made had we been able to arrange the call.

Mr. DOLE. Mr. President, if the majority leader will yield, I want to confirm what the majority leader stated. The President is in Texas this evening and will not be available for a couple of hours. Therefore, I think this would be the best way to proceed. We can each call him individually tomorrow and give him the appropriate remarks on the Congress, and I will do that sometime early afternoon tomorrow.

Mr. MITCHELL. So, Mr. President, we regret that we are unable to make the connection because of the President's schedule, but that is, of course, certainly understandable. No one could have known precisely when we were going to finish, including us. Therefore, we do look forward to speaking to the President tomorrow.

#### U.S. SENTENCING COMMISSION

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of H.R. 4797, a bill to direct the United States Sentencing Commission to make sentencing guidelines for Federal criminal cases that provide sentencing enhancements for hate crimes, received from the House; that the bill be deemed the third time, passed and the motion to reconsider laid upon the table.

Mr. DOLE. Mr. President, I have an objection from this side.

The PRESIDING OFFICER. Objection is heard.

Mr. DOLE. It is not by objection but there is an objection.

#### BROWN VERSUS BOARD OF EDUCATION NATIONAL HISTORIC SITE

Mr. DOLE. Mr. President I ask that the Chair lay before the Senate a message from the House of Representatives on S. 2890.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

*Resolved*, That the bill from the Senate (S. 2890) entitled "An Act to provide for the establishment of the Brown v. Board of Education National Historic Site in the State of Kansas, and for other purposes," do pass the following amendment:

Strike out all after the enacting clause, and insert:

#### TITLE I—BROWN V. BOARD OF EDUCATION NATIONAL HISTORIC SITE

##### SEC. 101. DEFINITIONS.

As used in this title—

(1) the term "Secretary" means the Secretary of the Interior.

(2) The term "historic site" means the Brown v. Board of Education National Historic Site as established in section 103.

##### SEC. 102. FINDINGS AND PURPOSES.

(a) FINDINGS.—The Congress finds as follows:

(1) The Supreme Court, in 1954, ruled that the earlier 1896 Supreme Court decision in

Plessy v. Ferguson that permitted segregation of races in elementary schools violated the fourteenth amendment to the United States Constitution, which guarantees all citizens equal protection under the law.

(2) In the 1954 proceedings, Oliver Brown and twelve other plaintiffs successfully challenged an 1879 Kansas law that had been patterned after the law in question in Plessy v. Ferguson after the Topeka, Kansas, Board of Education refused to enroll Mr. Brown's daughter, Linda.

(3) Sumner Elementary, the all-white school that refused to enroll Linda Brown, and Monroe Elementary, the segregated school she was forced to attend, have subsequently been designated National Historic Landmarks in recognition of their national significance.

(4) Sumner Elementary, an active school, is administered by the Topeka Board of Education; Monroe Elementary, closed in 1975 due to declining enrollment, is privately owned and stands vacant.

(b) PURPOSES.—The purposes of this title are—

(1) to preserve, protect, and interpret for the benefit and enjoyment of present and future generations, the places that contributed materially to the landmark United States Supreme Court decision that brought an end to segregation in public education; and

(2) to interpret the integral role of the Brown v. Board of Education case in the civil rights movement.

(3) to assist in the preservation and interpretation of related resources within the city of Topeka that further the understanding of the civil rights movement.

**SEC. 103. ESTABLISHMENT OF THE CIVIL RIGHTS IN EDUCATION: BROWN V. BOARD OF EDUCATION NATIONAL HISTORIC SITE.**

(a) IN GENERAL.—There is hereby established as a unit of the National Park System the Brown v. Board of Education National Historic Site in the State of Kansas.

(b) DESCRIPTION.—The historic site shall consist of the Monroe Elementary School site in the city of Topeka, Shawnee County, Kansas, as generally depicted on a map entitled "Brown v. Board of Education National Historic Site," numbered Appendix A and dated June 1992. Such map shall be on file and available for public inspection in the appropriate offices of the National Park Service.

**SEC. 104. PROPERTY ACQUISITION.**

The Secretary is authorized to acquire by donation, exchange, or purchase with donated or appropriated funds the real property described in section 103(b). Any property owned by the State of Kansas or any political subdivision thereof may be acquired only by donation. The Secretary may also acquire by the same methods personal property associated with, and appropriate for, the interpretation of the historic site: *Provided, however*, That the Secretary may not acquire such personal property without the consent of the owner.

**SEC. 105. ADMINISTRATION OF HISTORIC SITE.**

(a) IN GENERAL.—The Secretary shall administer the historic site in accordance with this title and the laws generally applicable to units of the National Park System, including the Act of August 25, 1916 (39 Stat. 535), and the Act of August 21, 1935, (49 Stat. 666).

(b) COOPERATIVE AGREEMENTS.—The Secretary is authorized to enter into cooperative agreements with private as well as public agencies, organizations, and institutions in furtherance of the purposes of this title.

(c) GENERAL MANAGEMENT PLAN.—Within two complete fiscal years after funds are made available, the Secretary shall prepare and submit to the Committee on Interior and Insular Affairs of the United States House of Representatives and the Committee on Energy and Natural Resources of the United States Senate a general management plan for the historic site.

**SEC. 106. AUTHORIZATION OF APPROPRIATIONS.**

There are authorized to be appropriated \$1,250,000 to carry out the purposes of this title including land acquisition and initial development.

**TITLE II—DRY TORTUGAS NATIONAL PARK**

**SEC. 201. ESTABLISHMENT OF DRY TORTUGAS NATIONAL PARK.**

(a) IN GENERAL.—In order to preserve and protect for the education, inspiration, and enjoyment of present and future generations nationally significant natural, historic, scenic, marine, and scientific values in South Florida, there is hereby established the Dry Tortugas National Park (hereinafter in this title referred to as the "park").

(b) AREA INCLUDED.—The park shall consist of the lands, waters, and interests therein generally depicted on the map entitled "Boundary Map, Fort Jefferson National Monument", numbered 364-90.001, and dated April 1980 (which is the map referenced by section 201 of Public Law 96-287. The map shall be on file and available for public inspection in the offices of the National Park Service, Department of the Interior.

(c) ABOLITION OF MONUMENT.—The Fort Jefferson National Monument is hereby abolished.

**SEC. 202. ADMINISTRATION.**

(a) IN GENERAL.—The Secretary shall administer the park in accordance with this title and with the provisions of law generally applicable to units of the national park system, including the Act entitled "An Act to establish a National Park Service, and for other purposes", approved August 25, 1916 (39 Stat. 535; U.S.C. 1, 2, 3, and 4).

(b) MANAGEMENT PURPOSES.—The park shall be managed for the following purposes, among others:

(1) To protect and interpret a pristine subtropical marine ecosystem, including an intact coral reef community.

(2) To protect populations of fish and wildlife, including (but not limited to) loggerhead and green sea turtles, sooty terns, frigate birds, and numerous migratory bird species.

(3) To protect the pristine natural environment of the Dry Tortugas group of islands.

(4) To protect, stabilize, restore, and interpret Fort Jefferson, an outstanding example of nineteenth century masonry fortification.

(5) To preserve and protect submerged cultural resources.

(6) In a manner consistent with paragraphs (1) through (5), to provide opportunities for scientific research.

**SEC. 203. LAND ACQUISITION AND TRANSFER OF PROPERTY.**

(a) IN GENERAL.—Within the boundaries of the park the Secretary may acquire lands and interests in land by donation or exchange. For the purposes of acquiring property by exchange with the State of Florida, the Secretary may, notwithstanding any other provision of law, exchange those Federal lands which were deleted from the park by the boundary modifications enacted by section 201 of the Act of June 28, 1980 (Public Law 96-287), and which are directly adjacent to lands owned by the State of Florida out-

side of the park, for lands owned by the State of Florida within the park boundary.

(b) UNITED STATES COAST GUARD LANDS.—When all or any substantial portion of lands under the administration of the United States Coast Guard located within the park boundaries, including Loggerhead Key, have been determined by the United States Coast Guard to be excess to its needs, such lands shall be transferred directly to the jurisdiction of the Secretary for the purposes of this title. The United States Coast Guard may reserve the right in such transfer to maintain and utilize the existing lighthouse on Loggerhead Key in a manner consistent with the purposes of the United States Coast Guard and the purposes of this title.

(c) ADMINISTRATIVE SITE.—The Secretary is authorized to lease or to acquire, by purchase, donation, or exchange, and to operate incidental administrative and support facilities in Key West, Florida, for park administration and to further the purposes of this title.

**SEC. 204. AUTHORIZATION OF APPROPRIATIONS.**

There are hereby authorized to be appropriated such sums as may be necessary to carry out the purposes of this title. Any funds available for the purposes of the monument shall be available for the purposes of the park, and authorizations of funds for the monument shall be available for the park.

**TITLE III—NATIONAL PARK SYSTEM ADVISORY COMMITTEES**

**SEC. 301. NATIONAL PARK SYSTEM ADVISORY COMMITTEES.**

(a) CHARTER.—The provisions of section 14(b) of the Federal Advisory Committee Act (5 U.S.C. Appendix; 86 Stat. 776) are hereby waived with respect to any advisory commission or advisory committee established by law in connection with any national park system unit during the period such advisory commission or advisory committee is authorized by law.

(b) MEMBERS.—In the case of any advisory commission or advisory committee established in connection with any national park system unit, any member of such Commission or Committee may serve after the expiration of his or her term until a successor is appointed.

**SEC. 302. MISSISSIPPI NATIONAL RIVER AND RECREATION AREA.**

Section 703(i) of the Act of November 18, 1988 entitled "An Act to provide for the designation and conservation of certain lands in the States of Arizona and Idaho, and for other purposes" (Public Law 100-696; 102 Stat. 4602; 16 U.S.C. 4602z-2) is amended by striking "3 years after enactment of this Act" and inserting "3 years after appointment of the full membership of the Commission".

**SEC. 303. EXTENSION OF GOLDEN GATE NATIONAL RECREATION AREA ADVISORY COMMITTEE.**

Section 5(g) of the Act approved October 27, 1972 (16 U.S.C. 460bb-4(g)), is amended by striking out "twenty years" and inserting in lieu thereof "thirty years".

**TITLE IV—NEW RIVER WILD AND SCENIC STUDY**

**SEC. 401. DESIGNATION OF NEW RIVER AS A STUDY RIVER.**

Section 5(a) of the Wild and Scenic Rivers Act (16 U.S.C. 1276(a)) is amended by adding the following new paragraph at the end thereof:

"( ) NEW RIVER, WEST VIRGINIA AND VIRGINIA.—The segment defined by public lands commencing at the U.S. Route 460 bridge over the New River in Virginia to the maxi-

mum summer pool elevation (one thousand four hundred and ten feet above mean sea level) of Bluestone Lake in West Virginia; by the Secretary of the Interior. Nothing in this Act shall affect or impair the management of the Bluestone project or the authority of any department, agency or instrumentality of the United States to carry out the project purposes of that project as of the date of enactment of this paragraph. The study of the river segment identified in this paragraph shall be completed and reported on within one year after the date of enactment of this paragraph."

**TITLE V—BOSTON HARBOR ISLANDS STUDY**

**SEC. 501. BOSTON HARBOR ISLANDS STUDY.**

(a) IN GENERAL.—The Secretary of the Interior shall, within 1 year after the date of the enactment of this title, conduct a study of the Boston Harbor Islands to assess the opportunities for the National Park Service to contribute to State, regional, and local efforts to promote the conservation of the Boston Harbor Islands and their use and enjoyment by the public. In conducting the study, the Secretary shall—

(1) consult closely with and explore means for expanded cooperation with the Massachusetts Department of Environmental Management, the Metropolitan District Commission, and the City of Boston;

(2) evaluate the suitability of establishing the Boston Harbor Islands as a unit of the National Park System;

(3) assess the opportunities for expanded tourism, public education, and visibility by managing the Boston Harbor Islands in conjunction with units of the National Park System in the vicinity, including the Adams National Historic Site in Quincy, Massachusetts; and

(4) evaluate the possibility for developing ferry service and other transportation links among those units to enhance their public use and enjoyment.

(b) REPORT.—The Secretary of the Interior shall submit to the Congress a report on the findings, conclusions, and recommendations of the study under subsection (a), by not later than 1 year after the date of the enactment of this title.

Mr. DOLE. Mr. President, I move that the Senate concur in the House amendment.

The motion was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. MITCHELL. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. MITCHELL. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. SIMPSON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

**RETIRING SENATORS**

**WARREN RUDMAN**

Mr. SIMPSON. Mr. President, I would like to say a few words about our col-

leagues who will no longer be with us. I would not want to interrupt the activities of the Senate because the Senator from Kentucky and I will likely be performing our duties in winding up, but I do want to say a few brief words, first about Senator WARREN RUDMAN.

There really is not much more to add to what has already been said. I have made my comments wishing him well publicly as well as privately. I cannot imagine him being retired at all! Someone said, "did you know WARREN RUDMAN was retiring?" I said, "I know WARREN RUDMAN. He is anything but retiring."

He made quite a name for himself, and as he leaves he can look back on a Senate career that has been truly exemplary. He brought us, along with his colleagues, the Gramm-Rudman-Hollings law. He earned the deep respect and admiration of all of us. My former law partner in Wyoming, a man named Bob Ranck, lovely friend, told me about this Senator RUDMAN. He said he was the toughest fighter pound for pound he ever knew when he was the light heavyweight NCAA champion at Syracuse. My partner was the NCAA heavyweight champion when he fought at Wisconsin.

Senator RUDMAN has always been rock solid, a breath of fresh air, a lovely friend, fair to an extraordinary degree. He has simply set his goal on fairness, on the rules of law, on the rules of evidence, and on the truth. He let nothing stand in the way of that. He refused to allow any man or woman to be condemned here or in the Ethics Committee based on gossip, rumor, or innuendo. He always held to that important creed. He has a remarkable legal background, and a rich understanding of the rules of evidence and the rules of procedure. He brought great honor to this body.

I admire him, and respect him so much, for bucking the tide of easy answers, swift emotion, and for just simply doing his homework. Now he will go on to work with our former colleague, Senator Paul Tsongas, and the two of them will be in the ring together. They will be doing important things outside of this Chamber. At the same time, important work will continue to be performed by Members within this Chamber, such as Senator NUNN, Senator DOMENICI, and others, who are a part of the Strengthening of America Commission. We all know what we have to do to right this country.

WARREN RUDMAN has helped to show us the way. He will depart here but he will never be very far from our thoughts. He is truly a wonderful, wonderful man. As I said recently, he is all "the man there is." I wish him well.

I congratulate Senator RUDMAN for his remarkable service in the U.S. Senate. In his term of service he accomplished more and worked harder than

some people do in a lifetime. He will be sorely missed—by the people of the United States of America, by his constituents in his beautiful home State of New Hampshire, by his colleagues in the Senate, and especially by this Senator—who always felt a very special bond of friendship with him.

He has greatly enriched my life and I thank him for it. May God bless him—for he is a very special man. He will depart from the Senate but he will never be far from our thoughts. We send with him all of our best wishes and warm regards as he begins this new chapter in his life. I will deeply miss him.

JAKE GARN

Then let me pay tribute to JAKE GARN. I watched him in this arena for nearly 14 years. He is a tireless worker, a man of great integrity. He has never, ever been afraid to state his convictions rather richly. He is a man of substance. If we had heeded his warnings about the savings and loan situation so many years ago, we would have been so much better off. He cataloged it. He described it. He said here it comes. And we ignored it.

As he leaves here, he will be deeply missed. He has a toughness, a kindness, and a sweetness which is a part of the strength of his character that we all know and admire so much in him.

When he returns to his native State of Utah and to the bosom of his family—we will be losing a very important Member of our Senate family. We will miss him. We have come to know him and come to know his marvelous wife Kathy and their children and we wish them well.

ALAN CRANSTON

I would like to say a word about Senator CRANSTON. He is on the floor. Senator CRANSTON was the chairman of the Veterans' Affairs Committee when I came here. I went to him and I said, "I know very little of this jurisdiction. I have no staff yet. I am going to deal with you right up front. I have to respect what you tell me. I know you will not trick me. I will come and learn from you and your staff until my staff is able to bring me up to speed." He said that is fair enough. And so with Senator CRANSTON, Jonathan Steinberg, Ed Scott, and Beth Paulser—I learned the ropes. I learned that when ALAN CRANSTON told me something, that was good enough for me.

There could not be two more divergent people politically than ALAN CRANSTON and ALAN SIMPSON. We have the same first name and same hairline, but that is about it. And yet this is a man for whom I came to have great affection. I watched him go through some of his own deep personal anguish. He was always available to me at any time. He was fair. I watched him seek the Presidency based upon his deep convictions. I watched him, and I came to admire the man.

I just want to say that of all the things that happened to us in this rath-

er remarkable arena, an interesting book could be written, called a "Chairman and Ranking." It is a unique and special relationship between a Chairman and the Ranking Member.

The first call I had when the Republicans took over the U.S. Senate in 1980 was a call from ALAN CRANSTON and he said, "Congratulations, Mr. Chairman," which took me aback somewhat because I had only been here 2 years and there were people who had been here 22 years who had never been chairman of a committee.

So from that point he again was there to assist, and to strengthen me. Oftentimes he would say, "Alan, if you keep going, you are going to get in deep trouble with the veterans organizations," but that just goaded me on. I still have a great deal of trouble with the professional fund raising veterans organizations.

I will miss his steady hand as he pulled me down in the Chair saying, "Not now, not now." And so to my friend ALAN CRANSTON, whom I will deeply miss in very unique ways—we never lost our mutual respect and regard for each other. This is a man who has given his entire life to his State and to his Nation. Way back in the days when he traveled as a journalist, he came back to warn us as to what Hitler was saying in Mein Kampf, the true intent of it, not what he was peddling in Germany versus what was being said in America. ALAN CRANSTON said, "You better watch this man." He brought that to the attention of the world.

It has been my great privilege to consider him my friend. We have shared much. There is not time to relate it all. I would be maudlin in doing so. But I shall miss him in a very unique way.

I commend him. I wish him well. I know only one thing—he will continue to be involved in the quest for peace. He has devoted whatever strengths he has, to seek peace in the world. I admire that very much.

Mr. CRANSTON. Mr. President, I thank the Senator from Wyoming very much. I consider him my closest friend on the other side of the aisle. It has been a great pleasure to work with him on many matters, on the Veterans' Committee where we have had our differences when we were both whips, he on his side of the aisle and I on mine. We confided in each other, worked out many problems that beset this body.

We have not always been at odds on the issues. To give one example, we both have been members of the Aspen Institute Group that has had seminars twice a year on American, Russian, and related issues, and I think we have grown together in our understanding of that part of the world and our relationship to it, and in our views of how to deal with that part of the world.

ALAN SIMPSON is a man that learns from experience and from exposure to

ideas, and it has been a wonderful pleasure to have him as a friend and to work with him.

STEVE SYMMS

Mr. President, I will truly miss my very good friend STEVEN SYMMS when he retires from the Senate at the end of this Congress. I have come to know Senator SYMMS very well through my work with him on the Senate Environment and Public Works Committee. He is a man of remarkable energy.

I have come to know him very well through my work on the Senate Environment and Public Works Committee. He is strong, tenacious, tough, fair. Ironically enough, I have never seen him better at his legislative craft than in these last months. He and Senator MOYNIHAN brought us a remarkable transportation bill that was truly significant for the Nation.

And this tough marine—is a very special person. I think all of us who know him, and I hear a chuckle from my colleague from Kentucky, because if you know STEVE SYMMS you know an old tough marine.

Mr. FORD. No, but he is not old. That is what I was chuckling about.

Mr. SIMPSON. Yes. He is younger than I.

Mr. FORD. Or us.

Mr. SIMPSON. So he believes in the old Marine creed *semper fi*.

Senator SYMMS has received numerous awards from such groups as the National Federation of Independent Business, the American Security Council, the Watchdog of the Treasury and the U.S. Chamber of Commerce. He is also the founder of Idaho's Working Partners Organization whose volunteer work finds new ways to address social problems through nongovernmental solutions.

He loves the west. He has protected western agriculture, mining, oil and gas, and energy interests. Those are the things that make up the West. Those things are not understood often in the East. So he is now retiring. His lovely wife Loretta is an asset to the entire Senate. She is a very special woman and a great asset to him. She, by virtue of her work in the Sergeant at Arms office, will continue her outstanding service here.

He will be sorely missed, by all of us. He will be sorely missed by me. He was and still is a very, very wonderful gentleman to deal with, because he is always up front direct, straight. You do not have to do any guess work. I appreciate people like that in my line of work, I tell you that.

SENATOR BROCK ADAMS

Mr. President, Senator BROCK ADAMS was first elected to Congress in 1961. He served in the house until 1977. He resigned that year to serve as President Carter's Secretary of Transportation. That is when I came to know him. From 1981 until 1986, he resumed the practice of law. In 1986, he was elected

to the Senate, and I came to know him better. I have greatly enjoyed his presence here. There are not too many people in Congress, or in the entire country, who have been so actively involved in making national policy over the course of four decades.

Although we have had numerous differences on matters of policy, no one would ever say that Senator ADAMS was not a diligent advocate for the causes he so ardently believed in. Whenever you found yourself on the opposite side of an issue from Senator ADAMS, you knew that you were going to have to be prepared—because he always would be.

Most Senators might agree that there is no real political benefit in serving as the Chairman of the D.C. Appropriations Subcommittee. However, that was not a motivating factor for Senator ADAMS. He has historically been a great advocate for the District, and coauthored legislation granting the District home rule. The fact that the chairmanship of that Subcommittee was a tough job did not alter his enthusiasm for his work. Taking on those kinds of tough legislative tasks with vigor has been the hallmark of Senator ADAMS' Government career.

The characteristics that made him an effective legislator will continue to serve him well as he enters into a new chapter in his life. I extend my best wishes to Senator ADAMS upon his retirement, and to his wife, Betty.

SENATOR ALAN DIXON

Then just a word about Senator ALAN DIXON. This man was a very important part of the Senate. Here is a man of style, substance, flair, grace, and honesty. He has honest-to-goodness concerns for his fellow men and his work has been remarkable to behold. As the old saying goes for you to have a friend, you have to be one. That is certainly true of ALAN DIXON.

I have been called a lot of things in my political career, but the one I never did mind being called was "Al the pal." I have heard ALAN DIXON called that many times, and it is very well earned, very well earned. He is blessed throughout with a remarkable helpmate at his side, Jady, a marvelous lady. Ann and I have come to know them and we wish them well in the next chapter in the real world. I wish him well. He will be a tough act to follow:

SENATOR TIM WIRTH

Finally, with 2 minutes left, the occupant of the chair.

I want to bid farewell to a colleague whose commitment to the issues he believe in takes a back seat to none in this Chamber—particularly with regards to the environment issues, as Senator WIRTH sees them to be and what he believes needs to be done.

I have watched him champion issues, get involved in issues, and help to bring them to the forefront of the na-

tional and international agendas. He is very diligent, sincere, and forceful advocate for environmental causes.

During his time in this body, Senator WIRTH has exercised a vigorous defense of woman's rights and reproductive freedom. I have always admired that.

Those two interests dovetail in the work he has done on global population issues. I think more than any other member of this body, the Senator from Colorado had considered the most fundamental, essential question of consequence to the global environment—one which I share totally—which is simply: How many footprints can this earth accommodate, and what can we, as a global community, do to keep an exploding population from devastating the planet?

I have been working with the Senator on this issue and I am sure that in the months and years to come we will see some of the fruition of our work.

As he pursues his new endeavors beyond Washington, I hope that he will continue to make his presence known and his knowledge available to me and to other members of this body.

I have greatly enjoyed working with him. And my wife Ann and I have come to enjoy him and Wren in an exceedingly rich manner.

#### TRIBUTE TO SENATOR WALLOP AND SENATOR JOHNSTON

Mr. SIMPSON. Mr. President, let me just pay special tribute to my senior colleagues, Senator WALLOP. In 40 years of friendship, we have legislated together in Cheyenne, WY, and here; in Cheyenne, in 1965; I joined him here in 1979.

In over 25 years of legislating together, I have never seen him with more prowess and skill as when he worked with Senator BENNETT JOHNSTON on the energy bill. The two of them deserve tremendous accolades from their peers, and I want to just express that, at this time, I have watched my friend legislate, work, succeed, and come up short sometimes. And I have never seen him better in any situation as he was with the energy bill where he was at the peak of his powers. I commend him, and the country will commend him, and we should commend both of them, Senator JOHNSTON and Senator WALLOP.

I thank you.

#### EXECUTIVE SESSION

Mr. FORD. Mr. President, I ask unanimous consent that the Senate proceed to executive session; that the Committee on Foreign Relations be discharged from consideration of the following nominations for the Department of State:

David J. Dunford, to be Ambassador to the Sultanate of Oman;

William A. Rugh, to be Ambassador to the United Arab Emirates;

John Cameron Monjo, to be Ambassador to the Islamic Republic of Pakistan.

I further ask unanimous consent that the Senate proceed to immediate consideration, and that the nominees be confirmed, en bloc, that any statements appear in the RECORD as if read, that the motions to reconsider be laid upon the table, en bloc, and that the President be immediately notified of the Senate's action.

THE PRESIDING OFFICER. Without objection, it is so ordered.

The nominations considered and confirmed are as follows:

#### DEPARTMENT OF STATE

David J. Dunford, to be Ambassador to the Sultanate of Oman;

William A. Rugh, to be Ambassador to the United Arab Emirates;

John Cameron Monjo, to be Ambassador to the Islamic Republic of Pakistan.

#### LEGISLATIVE SESSION

Mr. FORD. I ask unanimous consent that the Senate return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### THE INTERNATIONAL DOLPHIN CONSERVATION ACT OF 1992

Mr. FORD. Mr. President, I ask unanimous consent that the Commerce Committee be discharged from further consideration of H.R. 5419, the International Dolphin Conservation Act of 1992, that the Senate then proceed to its immediate consideration, the bill be deemed read three times, passed, the motion to reconsider laid upon the table, and any statements appear in the RECORD at the appropriate place.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill (H.R. 5419) was deemed read a third time and passed.

Mr. KERRY. I rise today in strong support of H.R. 5419, the International Dolphin Conservation Act of 1992.

The purpose of this bill is to encourage a global moratorium on fishing practices that cause the slaughter of dolphins in the course of commercial tuna fishing operations and, in so doing, to make good on the 20-year-old promise of the Marine Mammal Protection Act [MMPA]—to reduce the mortality of marine mammals in the course of fishing operations to "incidental levels, approaching zero."

For reasons that no one fully understands, schools of large yellowfin tuna associate with schools of dolphins in the eastern tropical Pacific Ocean [ETP] off the coasts of southern California and Central and South America. Since the late 1950's, fishermen have

deployed large purse seine nets around the schools of dolphin in order to harvest the tuna swimming beneath. Despite efforts by fishermen to release the encircled dolphins, some become trapped in the nets and drown. This phenomenon was one of the major problems the MMPA was enacted to address in 1972, but it has persisted—although reduced in scope—ever since.

The International Dolphin Conservation Act recognizes that domestic action alone is not sufficient to end the killing of dolphins. Throughout the past decade, the primary responsibility for dolphin mortality has rested with the foreign flag fishing fleets of Mexico, Venezuela, Vanuatu, and elsewhere. Accordingly, H.R. 5419 provides incentives for foreign nations to agree to a moratorium of at least 5 years on the commercial harvest of tuna using methods that endanger dolphins.

This action has been made necessary by the failure of the MMPA to achieve fully its goal of ending the needless destruction of marine mammals. Over the past 20 years, more than 1 million dolphins have been killed in fishing nets intentionally deployed to encircle them. Throughout this period, serious and well-intentioned efforts have been made to reduce dolphin mortality through improved fishing methods and at times heroic measures to rescue marine mammals entangled in the nets. The American tuna industry has led this effort. As a result, the number of dolphins killed by U.S. tuna fishermen in the ETP dropped from 360,000 in 1972 to an annual quota of less than 20,000 throughout the 1980's. Foreign fleets, however, killed more than 112,000 dolphins in 1986 alone.

In 1988, Congress acknowledged the international nature of the problem by requiring tough and enforceable trade sanctions against any nation that fails to adopt dolphin-protection procedures comparable to those used in the ETP by the U.S. fleet. These changes resulted in improved efforts by the foreign fleet to protect dolphins and reduced the number killed to an estimated 25,000 in 1991.

Despite the progress, however, it is clear that the promise of reducing dolphin mortality "to incidental levels, approaching zero" is not being achieved.

The tuna industry, foreign and domestic, has expressed a continued commitment to reducing dolphin mortality further through more careful methods, better enforcement, incentives for skippers and prohibitions on setting for tuna at sundown, when the greatest number of deaths occur. This has not proven sufficient, however, to ease public concern about the issue.

In April, 1990, the three principal American tuna processing companies, Starkist, Van Camp—Chicken of the Sea—and Bumblebee announced that they would stop canning tuna caught

in association with dolphin, and begin labeling their tuna products with "dolphin-safe" symbols. This voluntary action has limited the American market for canned tuna almost exclusively to that which is considered "dolphin-safe". It has also virtually ended major American participation in the tuna fishery in the ETP. The small tuna fleets of Panama and Ecuador, moreover, are now committed to a "dolphin-safe" policy and pressure is building in Europe to limit the tuna market there to "dolphin-safe" products, as well.

This was the situation earlier this year when Rep. GERRY STUDDS introduced H.R. 5419 and I put forward a sponsored companion bill, S. 3003, in the Senate.

Both bills are based on the recognition that the past strategy of trying to reduce dolphin mortality while continuing to fish for tuna in association with dolphin is no longer sufficient. They recognize, as well, the American interest in bringing foreign fishing conservation practices up to a standard comparable to that which we require of our own fishing fleet. Finally, they recognize that we have today the best opportunity we will ever have to obtain a strong and binding international agreement on this issue; an agreement that I hope and believe could end the avoidable killing of dolphins in commercial fishing operations promptly and permanently.

The timing of the bill is important because current provisions of the MMPA have resulted in an embargo of tuna and tuna products from Mexico and Venezuela, two of the most prominent foreign fleets operating in the ETP. Mexico, in particular, is interested in improving its overall trade relationship with the United States and in demonstrating a positive approach to international environmental and conservation issues. As a result, the U.S. Department of State believes it is realistic to think that Mexico will agree to a moratorium on fishing for tuna in association with dolphin, in return for a lifting of the current embargo. Obtaining such an agreement is the only practical way to be sure that further progress towards reduced dolphin mortality will occur, and that the original objectives of the MMPA are achieved.

I want to stress the compromise nature of this legislation. It is not aimed simply at "making a statement" or "sending a message". It is aimed at getting results. The bill reflects our best effort to synthesize the ideas and views of a variety of executive agencies, environmental organizations and tuna processors about how best to assure that positive results are indeed achieved.

Under the proposed bill, Mexico and other nations operating in the ETP would not be subject to trade sanctions as long as they continue to reduce dol-

phin mortality between now and March 1, 1994, and agree to suspend fishing on dolphin completely for a period of at least 5 years after that date. This arrangement allows time for negotiations and for fishermen in the region to adjust, while maintaining pressure of reduction in dolphin kill and requiring—in less than 2 years—a halt to the practice that has killed so many marine mammals over the past 30-35 years. Failure by a nation to live up to commitments made to the United States on this issue will result in sanctions that are stronger than those imposed by current law. These include a ban on the importation of all tuna products, a ban on at least 40 percent of all fish and fish products and potentially a total ban on fish products.

I am aware that the commercial west coast tuna fishing industry is opposed to this bill, just as it has opposed efforts in the past to enact and strengthen the provisions of the MMPA. I understand this and cannot criticize the industry for seeking to protect its own interests. But the fact is that the major American tuna processors have already made it clear that business as usual in the ETP is no longer acceptable. As I have said, since April, 1990, the three major processors for the American market have refused to purchase tuna for canning that is not "dolphin-safe". European governments and processors seemed poised to follow their lead. These actions, not any dictate of Congress, has caused the reduction in the size of the U.S. fleet operating in the ETP and created serious problems for the foreign boats that still fish tuna in association with dolphins.

During a hearing on S. 3003 by the Senate National Oceans Policy Study on July 23, concern was expressed by some representatives of the tuna industry about the allegedly "unilateral" nature of the bill. They ridiculed the State Department's contention that foreign nations would agree to the proposed moratorium and warned that U.S. fishermen would end up being denied the right to fish on dolphin.

Those concerns were at least partly accommodated by the House of Representatives when it approved H.R. 5419. Under the bill, if Mexico and Venezuela both fail to agree to the moratorium, U.S. fishermen would be allowed to continue fishing on dolphin until the end of 1999.

It is, of course, argued by some of the industry that fishing on dolphin is the only economic way to catch large yellowfin tuna, but the fact is that other methods have not seriously been tried—at least not recently. Past industry and government sponsored research efforts have focused primarily on refining current fishing methods, rather than developing new ones. Even a recent study by the National Academy of Sciences, which included some

research into alternative fishing techniques, can only be considered a starting point. A moratorium on dolphin-unsafe methods, accompanied by intensive research into dolphin-safe practices should make it clear within a matter of years whether a viable, dolphin-safe fishery for large yellowfin in the ETP can be established. If that were to occur, Americans would have an opportunity to re-enter the fishery in a major way, thereby creating hundreds or thousands of new jobs for American workers in fishing, ship repair, processing and marketing.

I have heard a great deal of optimism within the tuna industry in recent days, moreover, about the possibility that a new net can be developed that would permit dolphin encirclement with virtually no risk to dolphin mortality. If that, in fact, should occur, our future policy choices on this issue would be substantially broadened.

The premise of the legislation we are approving today is that we may be able to find a way once again to harvest large yellowfin tuna in the ETP with knowingly and intentionally slaughtering dolphins. If we can, that will be good for the dolphin; it will be good for America fishermen; it will benefit our economy; it will ease diplomatic tensions; and it will end a controversy that has been a source of conflict between the Pacific tuna industry and the environmental community for more than two decades.

Given the persistent mystery of the relationship that binds dolphins and large yellowfin tuna in the ETP, there is no way that we can guarantee in advance that this approach will succeed in achieving fully each of its intended goals. But we do know that past approaches have not worked economically, diplomatically or ecologically. And we know that the approach put forward in this legislation reflects the broadest degree of consensus that has ever been achieved on this issue.

After two decades of accepting half-measures, I believe that the time has come to restore meaning to the original objectives of the MMPA; to move forward aggressively both domestically and internationally; to get a real research program underway; and to end once and for all the stale debates and controversies that have divided and discouraged in the past.

Before closing, I want the record to reflect the text of a letter that I received earlier today from Richard Wamhoff, the president and chief operating officer of the Starkist Tuna Co., which was the first major American tuna company to announce a policy of purchasing only dolphin safe tuna. Accordingly, I ask unanimous consent that the text of the letter from Mr. Wamhoff appear at this point in the RECORD:

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

STARKIST SEAFOOD COMPANY,  
Long Beach, CA, October 8, 1992.

Re: International Dolphin Conservation Act of 1992

Hon. JOHN F. KERRY,  
U.S. Senate, Senate Russell Office Building,  
Washington, DC.

DEAR SENATOR KERRY: This letter is on behalf of StarKist Seafood Company and its parent, H. J. Heinz Company. StarKist was the first major American tuna company to adopt, in April 1990, a dolphin safe policy. Shortly after StarKist adopted the policy, the other major tuna companies doing business in the United States adopted similar policies.

StarKist enthusiastically supported the enactment of the Dolphin Protection Consumer Information Act in 1990 and, despite considerable economic costs, continues its firm commitment to its dolphin safe policy.

With respect to the International Dolphin Conservation Act, we would like to make clear that StarKist generally supports the Bill and the policy set forth in the Bill, as passed by the House of Representatives on September 22, 1992. We recognize the complexities of the issues involved in legislation regarding dolphin protection. We also appreciate the lengthy and difficult negotiations required between the various interested parties that resulted in the legislation progressing to its current status.

We have one concern regarding a provision of the Bill that we would like to record in the event consideration of this or similar legislation takes place in the future.

The potential for unnecessary detriment to the tuna industry without a concomitant benefit to marine mammal safety exists in the Bill as passed by the House of Representatives. Empowering the U.S. Secretary of Commerce to determine unilaterally that there exists a regular and significant association between marine mammals and tuna in an area of an ocean outside the eastern tropical Pacific could lead to significant unwarranted disruptions in tuna fishing.

StarKist agrees that tuna caught by the intentional encirclement of marine mammals should not be considered dolphin-safe. However, the determination of those areas outside the eastern tropical Pacific in which a "regular and significant association occurs between marine mammals and tuna, and in which tuna is harvested through the use of purse seine nets deployed on or to encircle marine mammals—" should be made not just by the Secretary of Commerce, but by the Secretary of Commerce after consultation with competent regional organizations, as defined in the Bill, created for the purpose of conservation of a particular ocean or oceans. The Inter-American Tropical Tuna Commission is an example. We believe this suggested change would have the effect of limiting the possibility of overbroad application of this provision as well as providing for a multilateral approach to the designation of such areas outside the eastern tropical Pacific. The above concern has been raised with many of the interested parties and suggested language to address this has been shared with appropriate staff.

Again, we want to make clear that StarKist and Heinz support the aims of the International Dolphin Conservation Act and remain firmly committed to a dolphin-safe policy. By enacting the International Dolphin Conservation Act, while addressing the important issue outlined in this letter, the United States would greatly advance the cause of protection of marine mammals

while responding to the legitimate concerns of the United States tuna industry.

We stand ready to assist you and members of your staff to address in detail means to provide solid legislation which meets the cause of marine mammal protection.

Very truly yours,

RICHARD H. WAMHOFF,

President and Chief Operating Officer.

Mr. KERRY. I note that, in his letter, Mr. Wamhoff discusses the authority of the Secretary of Commerce in section 307 of the bill to designate areas, outside the eastern tropical Pacific, in which a "regular and significant association occurs between marine mammals and tuna, and in which tuna is harvested through the use of purse seine nets deployed on or to encircle marine mammals."

I would like to assure Mr. Wamhoff that it is my expectation that the Secretary of Commerce will only exercise his or her authority to make determinations under section 307 after consulting with the appropriate segments of the tuna industry, with scientific and regional fishery management organizations, and with conservation or environmental organizations that might have access to information or evidence relevant to a possible determination. I also anticipate that the Secretary will seriously consider making a determination whenever the Secretary becomes aware of scientific documentation, log records, observer data, or photographic or video evidence that an association between tunas and marine mammals is occurring and that encirclement of marine mammals forms part of the fishing strategy used by a boat or boats in the area.

Finally, I want to note that, after House passage of H.R. 5419 in late September, a series of discussions were held between my office and some who had concerns about the bill. I made it clear, during those discussions, that I was willing to discuss any issue raised, but that I would insist on the inclusion of three basic provisions: First, an international moratorium on fishing on dolphin beginning in 1994; second, a ban on the sale of dolphin-unsafe tuna and tuna products in the United States; and third, an embargo against any foreign nation that does not adhere to the moratorium.

While engaged in these discussions, I was in contact with representatives of some of the leading conservation organizations that have helped build public support for Federal action on this issue. I found a willingness on the part of these organizations to accept reasonable changes in the bill, provided the fundamental purposes of the legislation were preserved. Unfortunately, those opposed to the bill did not evidence a comparable willingness to compromise until after the House of Representatives had essentially adjourned for the year. This left us with a choice between H.R. 5419 exactly as approved by the House—and no bill, at all. For

me, this was not a difficult choice because I strongly support H.R. 5419. But I found it ironic that those who feel differently about this measure could have had a number of their concerns eased if only they had been willing to compromise a few days ago.

Mr. President, I hope that the action we are taking today will finally put to rest the enduring controversy over tuna-dolphin. If that should happen, the highest place of honor will belong to Representative STUDDS, who has championed the fight so energetically in the House of Representatives this year, and to Representative BARBARA BOXER, who has assisted him in that effort.

On our side of the Capitol, I want to single out Senator ERNEST HOLLINGS, chairman of the Committee on Commerce, for his help in facilitating action on the bill, and Senator JOHN BREAU, for his many contributions to the debate on this issue.

Thank you, Mr. President, and I want to thank all of my colleagues, as well, for their support of this very important and long overdue piece of legislation.

#### DEPOSITORY INSTITUTIONS DISASTER RELIEF ACT OF 1992

Mr. FORD. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of H.R. 6050, a bill to facilitate recovery from recent disasters by providing greater flexibility for depository institutions and their regulators, received today from the House; that the bill be deemed read three times, passed, and the motion to reconsider be laid upon the table; and that any statements with respect to passage of this bill be inserted at the appropriate place in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. RIEGLE. Mr. President, I am pleased to support H.R. 6050, the Depository Institutions Disaster Relief Act of 1992, which will help facilitate reconstruction in the wake of such recent disasters as Hurricane Andrew, Hurricane Iniki, and the Los Angeles riots. This bill is identical to S. 3285, which I introduced on September 29, 1992, together with Senators GARN, GRAHAM, MACK, BREAU, INOUE, and AKAKA. My statement discussing the bill appears on page 28804 of the RECORD.

The bill (H.R. 6050) was deemed read the third time and passed.

#### FEDERAL AVIATION ADMINISTRATION REAUTHORIZATION

Mr. FORD. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of H.R. 6168, Federal Aviation Administration reauthorization just received from the House, that the bill be deemed read three times, passed, and the motion to reconsider be laid upon the table, and

further that any statements relating to the measure be inserted in the RECORD at the appropriate place as if read.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. FORD. Mr. President, I would like to urge my colleagues to support passage of H.R. 6168, the Airport and Airway Safety, Capacity, Noise Improvement, and Intermodal Transportation Act of 1992. Last Friday, the House of Representatives passed a second FAA reauthorization, H.R. 6093, which contained provisions from both the original House and Senate bills. On Tuesday, the House passed another reauthorization, H.R. 6168, which is a 1-year authorization for the Airport Improvement Program and 3-year authorization for other programs. I am pleased that H.R. 6168 contains many noncontroversial provisions that have been brought to my attention this week by a number of my colleagues.

H.R. 6168 also contains the provisions of H.R. 5465, the aviation and war risk insurance legislation. This provision extends the authority of the Secretary of Transportation to provide insurance to air carriers through September 1997.

Most of my colleagues are aware that during Desert Storm this coverage made it possible to use commercial aircraft in the Persian Gulf. During the Desert Storm operation, coverage of the War Risk Insurance Program only applied to aircraft engaged in foreign commerce. The Commerce Committee has had the opportunity to review the experiences during Desert Storm and recommends that the only change in the program is to expand coverage to include the domestic portion of a trip and the ground support.

Mr. President, H.R. 6168 is a 1-year authorization for AIP. A 1-year authorization is very important to me as there have been extraordinary efforts to come to an agreement on the Montreal protocols supplemental compensation plan which I added as an amendment to the FAA reauthorization legislation during the Commerce Committee consideration. I am pleased that so much progress has been made on the supplemental compensation plan and assure all parties interested that efforts have not been abandoned to complete this task. I hope to have a proposal for the Senate to consider early next year. I do not want to place blame on any party involved in the efforts to move the supplemental compensation plan. A lot of effort went into this proposal on the part of the entire aviation industry. I want to thank the individuals involved and let them know they will be hearing from me soon to reopen the talks on this important treaty.

In late July, the ranking minority on the Commerce Committee, Senator DANFORTH, brought to my attention the problem with the number of set-asides in the FAA. He was alarmed

there would not be sufficient funds for the letters of intent for airport capacity projects. It was evident that there was a program meeting the obligations of the LOI's already signed and the future for new LOI's looked bleak. Since H.R. 6168 does not address this program, the Congress will have to make decisions next year regarding the entitlement programs to guarantee adequate discretionary funds for future airport capacity projects.

Mr. President, last week an agreement was reached between the car rental industry and AACI on the disadvantaged business enterprise provision contained in the original House FAA reauthorization bill, H.R. 4691. The original DBE Provisions required that airport concessions cover businesses providing ground transportation, baggage carts, automobile rentals, and other consumer services. As a part of the agreement between the airports and the car rental companies, section 511(h)(2) of the Airport and Airway Improvement Act of 1982 [AAIA] as amended, does not apply to car rental firms doing business at an airport for the purposes of determining compliance with any requirement imposed pursuant to section 511(a)(17) of AAIA. Administration of DBE assurance for car rental firms shall be governed by section 511(h)(3) of AAIA, as amended.

Section 511(h)(3)(C) of AAIA, as amended, provides that nothing in the law on DBE assurance "shall require a car rental firm to change its corporate structure to provide for direct ownership arrangements." For example, a car rental firm is not required, but is permitted, by the DBE assurance sections 511(a)(17) and 511(h) of the AAIA, as amended, to transfer corporate assets or engage in joint ventures, partnerships, or subleases. I would like to repeat that this language has been agreed to by both the car rental industry and the airports.

I urge my colleagues to support passage of H.R. 6168.

THE AIRPORT AND AIRWAY SAFETY, CAPACITY, NOISE IMPROVEMENT, AND INTERMODAL TRANSPORTATION ACT

Mr. HOLLINGS. Mr. President, today, the Senate will consider H.R. 6168, the Airport and Airway Safety, Capacity, Noise Improvement, and Intermodal Transportation Act of 1992. H.R. 6168 was recently passed by the House. The bill reflects the interests of both the Senate and the House concerning the reauthorization of the programs of the Federal Aviation Administration [FAA].

During the last few weeks, it has become clear that the ability to pass S. 2642, the Aviation Noise Improvement and Capacity Act of 1992, as reported favorably by the Commerce Committee on August 11, 1992, was very much in doubt. S. 2642 would have authorized all of the programs of the FAA for 3 years, including facilities and equip-

ment, operations, research, engineering and development, and the Airport Improvement Program [AIP].

H.R. 6168 would authorize the Airport Improvement Program for 1 year, the facilities and equipment program and FAA operations for 3 years, and the research program for 2 years. The bill also includes several provisions of S. 2642. It clearly is important that we pass this bill and ensure that it is enacted into law.

In particular, this bill will ensure that important airport grant funds are made available. For my State of South Carolina, this program has many benefits, such as creating jobs, making the airports safer, and providing for needed expansion. The latest figures available suggests that aviation contributes \$1 billion to the economy of my State. I know this program is as important in other parts of the country.

The bill also will provide money for the military airport program. AIP funds are used to provide grants under the military airport program, which has been extremely beneficial to those airports already included in the program, so much so that there is interest in its expansion, and H.R. 6168 provides for such expansion. With respect to those airports now included in the military airport program, in 1990 Congress set aside more than \$55 million for 2 years to convert military airports to civilian use. Airports in the program include those seeking to become civilian facilities and one that is currently a joint-use facility in Myrtle Beach, SC. When the military ceases involvement in this facility early next year, the Myrtle Beach Airport will lose its primary source of operating support, which includes such important activities as running the air traffic control tower. This loss of critical support is a particular problem for Myrtle Beach, and I appreciate the FAA's efforts to ensure that the needs of the airport are met.

One matter that has been under discussion for a number of months relating to the AIP concerns the Disadvantaged Business Enterprise [DBE] Program. The car rental companies, airport representatives, and the Airport Minority Advisory Council have been meeting to resolve how this program should be structured. H.R. 6168 incorporates this agreement. Another issue related to the DBE Program concerns AIP eligibility of fund part of the DBE Program. The AIP sets goals for contracting with DBE's. It has been suggested that efforts to reach these goals could be facilitated by a headstart approach using outreach and technical assistance programs that help the DBE's to understand contracting opportunities at airports for AIP grant projects. Such technical assistance could aid the airports in attracting new DBE's to the procurement process and could enhance the performance of

DBE's in airport projects. Such technical assistance and monitoring of DBE activities could ensure a more effective DBE Program.

In addition, H.R. 6168 would provide the appropriate policy guidance to the agency in carrying out its safety mission, which is critical. With respect to these programs, I have continuing concerns with airport delays and the costs of those delays to passengers and the carriers. Completion of the Capital Investment Program [CIP] and other facilities and equipment projects are critical in coping with this problem. Two years ago, the General Accounting Office [GAO] reported that only 4 percent of the CIP projects had been completed and that there were significant delays in 12 major projects. The GAO now reports that the costs of the program have increased significantly and that delays in the program continue to be a problem. It also has indicated that the FAA's plan to consolidate over 200 air traffic control facilities into 23, which has not been finalized as yet, could add another \$2.5 billion to the CIP plan costs. The Appropriations Committees asked for a report on such consolidation plans to be submitted by February 1992, but the report has not been forthcoming. The increased program costs and project delays remain a serious problem which must continue to be reviewed carefully. The aviation infrastructure must be upgraded in a safe, cost-efficient, and timely manner to respond to the increasing demands of air travel.

The GAO has pointed out that Congress continues to provide more than sufficient funds to pay for the CIP projects, but that the unobligated balance for facilities and equipment continues to grow. The appropriated, but unobligated, balance now stands at \$1.8 billion, and has increased every year since 1987. Public Law 102-143, which I supported, decreased from 5 to 3 years the time in which congressionally appropriated funds must be spent, as a way to reduce the unobligated balance. These funds must be spent as intended.

I also join other Members in my concern about issues relating to insulin-dependent pilots. The ability of such pilots to perform their tasks is a safety issue that has been debated for a number of years, and the American Diabetes Association [ADA] petitioned the FAA to examine this issue more closely. I am aware that the FAA has initiated a review of this issue, and I anticipate that the FAA will convene a working group to study issues associated with medical certification of insulin-dependent pilots. The working group should be comprised of nationally known endocrinologists, including members of the ADA. I hope that the findings of the group could be completed by July 30, 1993, so that a resolution of this matter will be forthcoming in a timely manner.

In addition, I look forward to the report that the committee will receive from the Airline Consumer Protection and Competition Emergency Commission, established under this bill and also included in S. 2642. This Commission will have a difficult task. The airline industry is in serious financial trouble. After 12 years of a hands-off approach by the administration to the industry, a fresh look at how best to address the needs of the industry, and to ensure a viable industry, is needed. The Commission also should focus its efforts on the aviation manufacturing sector. Recent indications suggest that the manufacturing sector has been impacted negatively by the downturn in the airline travel industry. Furthermore, Airbus Industries continues to provide strong, and subsidized, competition to our U.S. aerospace manufacturers. This Commission should provide us with additional insights to assist in our continuing examination of the aviation industry.

The legislation before us also extends, through September 30, 1997, the Aviation Insurance Program, which provides insurance to air carriers under certain circumstances. At its August 11, 1992, executive session, the Commerce Committee reported favorably H.R. 5465, which has been incorporated into H.R. 6168. This program proved to be extremely valuable during Desert Storm, and I believe the program should be continued.

The Commerce Committee will continue its review of these and other issues pertaining to the many important FAA programs. I look forward to continuing to work with the industry and the airport community as well as the FAA, in particular on further reauthorization of the AIP.

Mr. MITCHELL. Mr. President, I wish to join Senator FORD in support of H.R. 6168, the Federal Aviation Act [FAA] reauthorization bill passed earlier this week by the House of Representatives, which includes a 1-year extension of the Airport Improvement Program [AIP]. The bill will allow capital improvements at airports throughout the Nation to go forward in 1993. It authorizes approximately \$2 billion in AIP grants, and will mean jobs for American workers and their communities.

H.R. 6168 represents a compromise between earlier Senate and House versions of the FAA reauthorization. It contains a number of provisions which the Senate has had under consideration in recent days, as Senator FORD has worked toward passing a reauthorization bill. The House incorporated Senate provisions before completing its legislative agenda on Tuesday, and passed what, in fact, is the third House version of the reauthorization. That is the bill now before the Senate. It is very similar to the Senate bill which Senator FORD has worked to clear for Senate action in recent days.

The Senate should adopt H.R. 6168 and send it directly to the President. The 1-year AIP extension will allow both the Senate and House of Representatives to revisit FAA provisions during the 103d Congress. Earlier this year, the Senate Commerce Committee reported the Senate version of the FAA reauthorization, S. 2642, which has been pending on the Senate Calendar. However, in recent weeks it has become clear that an impasse on provisions involving the supplemental compensation plan for the Montreal protocols would prevent Senate action on S. 2642, and would leave no time to resolve major differences with the original House version.

By passing H.R. 6168, Congress will preserve options for next year. This is a course of action that has been chosen in consultation with the administration, which strongly supported including the Montreal protocols SCP in the FAA reauthorization, and had hoped for a Senate vote on consent to ratification of the protocols after action on the FAA reauthorization had been completed. It is clear now that such action will not occur this year. However, options will remain for action on those issues in the next Congress.

As reported by the Commerce Committee, S. 2642 provides a beginning reference point for the next Congress. The Federal Aviation Administration, for example, should take careful note of sections of the committee report which do not involve changes in current law, but do establish FAA priorities for 1993. One such provision directs the FAA to conduct a study in cooperation with the Maine Department of Transportation of long-term needs, including a control tower or an auxiliary flight service station, for the Augusta State Airport in Maine. The committee has directed the FAA to report by March 1993, so that the committee can authorize necessary projects in subsequent legislation. The Augusta Airport study should be completed to meet that deadline, so that appropriate action can be taken by the next Congress.

H.R. 6168 includes an \$18 million authorization for a northern Maine long-range radar system. Northern Maine radar coverage is an important need which must be a priority both in fiscal year 1993 and fiscal year 1994, and the FAA should take careful note of the priority given to the project by both the Senate and House Aviation Subcommittees. The need for the project arises out of the Air Force's and 1991 Base Closure Commission's decision to close Loring AFB in 1994.

In addressing Northern Maine radar coverage concerns, the FAA has indicated that it was not formally consulted on potential impacts during the 1991 base closure review. The closure or realignment of military aviation facilities may pose unexpected costs to the Federal Government and impacts on ci-

vilian aviation. H.R. 6168 therefore also includes a provision which requires the FAA to report to Congress and the 1993 and 1995 Base Closure Commissions on such aviation impacts within 30 days after the Secretary of Defense announces a list of recommended base closures and realignments.

H.R. 6168 gives the FAA a formal role in the base closure review process. From the perspective of military operational needs relative to airspace, as well as potential costs to the Federal Government, and the impact on local communities or regional air traffic, the FAA's concerns need to be considered carefully in acting on the Department of Defense's recommendations.

I also wish to make clear concerns involving the Montreal protocols, and the SCP enabling legislation which was contained in S. 2642, but is not included in H.R. 6168.

The Senate Foreign Relations Committee favorably reported the Montreal protocols in 1989 and again in 1990 at the beginning of the 102d Congress. During much of the first session, in response to requests by the Republican leader, Senator DOLE, and the administration, I conducted a thorough review of the Montreal protocols. The review was recorded through several documents published in the CONGRESSIONAL RECORD during 1991, which are referenced by date and page number in the Senate committee report on S. 2642 (S. Rept. No. 102-424).

Like many other Senators, I have had reservations about consideration of the protocols without reliance on enabling legislation for the SCP. Although the administration believes that the Secretary of Transportation has existing authority necessary for administrative implementation of the SCP under the Federal Aviation Act, I have shared the Commerce Committee's concern that statutory legislation is probably most appropriate for such a measure.

In December 1991, at the request of the Secretary of Transportation, Senator FORD and I initiated discussions with the administration and with the principal proponents and opponents of the protocols, the Air Transport Association [ATA], and the Association of Trial Lawyers of America [ATLA], respectively. The discussions sought provisions for the SCP that might be mutually acceptable for further consideration.

On July 2, 1992, Senator FORD and I introduced S. 2945, which represents the product of those discussions. The administration endorsed S. 2945 and supported its incorporation into S. 2642, the FAA reauthorization.

At a late stage in discussions with the administration, representatives of airframe and engine manufacturers raised concerns about both the Montreal protocols and the SCP which had not been previously raised during the Senate Foreign Relations Committee's

consideration of the protocols over the last few years, or during my initial discussions with the administration, which again, had been noted in documents published throughout 1991 in the CONGRESSIONAL RECORD.

After S. 2945 was introduced, the administration, Senator FORD and my staff began discussions to address concerns raised by the manufacturers. Those discussions were conducted in good faith. I do not blame any party for the impasse. In fact, I appreciate the time and effort that all parties devoted to exploring issues. Unfortunately, it became clear that the manufacturer concerns cannot be addressed in any way that might have facilitated action on S. 2642, as reported by the committee. It also is clear that such concerns raise potentially broader issues that relate to the fundamental principles of the protocols themselves, and cannot be resolved if the SCP is to be kept narrowly focused.

During the discussions, it was reported that Japan Airlines is considering a voluntary waiver of the Warsaw Convention's liability limits. It was suggested that such a trend may be preferable to ratification of the Montreal protocols. However, the administration has indicated that such voluntary waivers are probably inadequate to protect the interests of Americans traveling internationally.

Mr. President, I will ask that a copy of a letter in this regard from the Assistant Secretary of Transportation for Policy and International Affairs, Mr. Jeffrey Shane, with attachments, be published in the RECORD immediately following the conclusion of my remarks.

As a result of the impasse reached on the SCP, because of the continuing concerns over the SCP, and because of the fact that the Senate cannot appropriately consider ratification of the protocols without resolving those concerns, the administration has indicated that it now may need to reconsider both the protocols and the entire Warsaw Convention system.

What happens next in Congress on international aviation liability issues may depend on the course of external events and any actions taken by the international airlines of foreign nations over the next year. If the Warsaw Convention system no longer seems viable, the Secretary of Transportation has indicated that there would be no alternative but to terminate U.S. participation in the system.

I will ask that a copy of a letter from the Secretary of Transportation in this regard also be printed in the RECORD following my remarks.

Concerns about international developments such as Japan Airlines intentions and the viability of the Warsaw Convention system are themselves reasons to avoid any precipitous action by the Senate—either to act on the proto-

cols or to make any decisions that might affect alternatives that should be considered by the next Congress.

I regret that such concerns, and the short amount of time that remained in this Congress after the impasse was reached, prevented accommodation of the Secretary of Transportation's request for Senate action on ratification of the protocols. Without the SCP enabling legislation, however, I am not sure whether the Senate in fact would be disposed to consent to ratification.

It should be clear by now that the FAA reauthorization, as reported by the Senate Commerce Committee, has implications that go well beyond the FAA or the AIP. Although I would have liked to accommodate the administration's desire to move forward with the SCP so that a decision might be reached eventually on the protocols, Congress' immediate priority must be to make sure that FAA program and AIP grants continue.

The Senate action today on H.R. 6168 is intended to do simply that: To reauthorize FAA programs and the AIP by 1 year. It does not in any way involve the protocols or the SCP, nor should it be regarded by the international community as any determinative decision on those issues.

The 1-year AIP extension will help to preserve issues for reconsideration next year. In response to any developments involving Japan Airlines or other foreign carriers, the Senate Foreign Relations Committee may wish to review the international aviation liability situation in the next Congress, while the Commerce Committee, if necessary, may wish to consider ongoing issues associated with the SCP. All issues and developments should be considered carefully at that time. Further deliberation is only prudent under the circumstances.

There is one additional issue that I feel obligated to address. In 1990, as a response to the recommendations of the President's Commission on Aviation Security and Terrorism, following the Pan Am 103 tragedy, Congress enacted the Aviation Security Act of 1990. The Montreal protocols were included within the commission's recommendations. During discussions over the SCP with manufacturers, however, another issue arose related to the Pan Am 103 Commission recommendations, concerning compensation for victims of acts of terrorism.

As part of the 1990 Aviation Security Act, Congress directed the administration to submit recommendations to Congress as to whether or not there should be legislation to provide compensation to victims of terrorism. In January 1992, along with other Senators, I wrote the administration about submitting recommendations on the terrorism compensation issue to Congress. To the best of my knowledge, Congress is still waiting for those rec-

ommendations. Although it is a slightly distinct issue from that of the protocols and the SCP, I hope such recommendations also can be considered in the next Congress.

I ask that a copy of the January 1992 letter on the terrorism compensation issue also be printed in the RECORD following my remarks.

Finally, I wish to thank the Secretary of Transportation and Senator FORD, who have worked with me on the FAA reauthorization and the SCP issues. I ask unanimous consent that along with the other letters I have referenced, letters from ATA and ATLA with regard to the protocols and the SCP be included in the RECORD.

I trust that we all will continue to work together on these issues, as necessary, in the 103d Congress.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

Re Montreal Protocols and Supplemental Compensation Plan (S. 2945)

Hon. WENDELL H. FORD,  
Chairman, Subcommittee on Aviation,  
Committee on Commerce, Science and Transportation,  
U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: I am writing in response to a suggestion made by the Aerospace Industries Association with respect to a possible waiver of the Warsaw Convention liability limits by Japanese airlines. AIA suggests that a similar waiver by U.S. airlines might be an effective alternative to ratification of the Montreal Protocols and adoption of the Supplemental Compensation Plan established by S. 2945. We respectfully disagree that such waivers could be an effective remedy for the injustice perpetrated on U.S. international airline passengers by the current Warsaw Convention.

We have been advised by the Embassy of Japan in Washington, D.C. that Japan Airlines is considering waiving the Warsaw liability limits in their entirety through a special contract with its passengers. No decision has yet been made by JAL to do so. The action, if taken, would be solely that of JAL, and would not apply to any other airline. No Government action would be involved.

There is no reason to expect that other airlines serving Japan, whether U.S. or foreign, would adopt similar policies. Unless the participation of all carriers serving a country were made mandatory by some form of regulation or legislation—and we know of no intention to do so—there could be no assurance that such a waiver would become generally available to passengers flying on other carriers.

There is another significant reason why the waiver approach would not be effective. Even assuming a country like Japan, or even the United States, could successfully require all carriers operating to its homeland to participate in an agreement waiving the Warsaw Convention liability limits for flights to and from its territory, the principle against extraterritorial application of laws would prevent that Agreement from applying in cases where its citizens traveled between two foreign countries on a foreign airline. Moreover, there could be no guarantee that other nations would adopt similar waiver requirements. Indeed, it is likely that many nations would not do so. The result of such a system would be totally unsatisfactory: a continuation of the current situation in which a

patchwork of different laws apply regarding recoveries depending on where the accident occurred, the nationality of the carrier, and the origin and destination of the passenger. Accordingly, ratification of the Protocols and adoption of the proposed Supplemental Compensation Plan (S. 2945) is clearly the sole effective means of assuring U.S. citizens of recoveries for the full amount of their damages regardless of the circumstances regarding the accident.

I am enclosing a list of countries that are parties to the Hague and Warsaw Conventions. As noted, regardless of the laws applicable for travel to and from the United States, as might be applied by U.S. courts, travel between these countries by U.S. citizens would likely result in application by the respective jurisdictions of the \$10,000 or \$20,000 liability limit applicable under these Conventions. I am also enclosing a list of countries that have already ratified Montreal Protocol No. 3, as well as a list of countries that are not members of the Warsaw system in any form.

I wish to extend special thanks to you for your contribution in moving along the long delayed process of ratification of the Montreal Protocols and adoption of a Supplemental Compensation Plan.

Sincerely,

JEFFREY N. SHANE,  
Assistant Secretary for Policy  
and International Affairs.

#### Enclosures.

COUNTRIES WHICH HAVE NOT RATIFIED THE WARSAW CONVENTION, THE 1955, HAGUE PROTOCOL TO THE WARSAW CONVENTION OR THE 1975 MONTREAL PROTOCOL NO. 3 TO THE WARSAW CONVENTION<sup>1</sup>

Albania, Andorra, Angola, Antigua and Barbuda, Bahrain, Belize, Bermuda, Bhutan, Bolivia, Burma, Burundi, Cambodia (Kampuchea), Cape Verde, Central African Republic, Ceylon, Chad, French Antilles and Guiana, Ghana, Guadeloupe, Guinea-Bissau, Guyana, Haiti, Hong Kong, Honduras, Jamaica, Macau, Maldives, Mozambique, Namibia, Netherlands Antilles, St. Kitts and Nevis, St. Lucia, San Marino, Sao Tome and Principe, Taiwan, and Thailand.

<sup>1</sup>Based on list of countries in *Countries of the World, Yearbook, 1992*, as compiled from Department of State Reports.

COUNTRIES<sup>1</sup> PARTY TO THE WARSAW CONVENTION, BUT NOT TO THE 1955 HAGUE PROTOCOL (\$10,000 LIABILITY LIMIT). TOTAL—21

(Not including the United States<sup>2</sup>)

Barbados, Botswana, Brunei Darussalam, Burkina Faso, Comoros, Equatorial Guinea, Ethiopia, Indonesia, Kenya, Liberia, Malta, Mauritania, Mongolia, Myanmar, Sierra Leone, Sri Lanka, Uganda, United Arab Emirates, United Republic of Tanzania, Uruguay, and Zaire.

<sup>1</sup>Under Article 1 of the Warsaw/Hague Convention passengers holding tickets for a round trip journey from the territory of a country party to the Warsaw Convention as Amended by the Hague Protocol would be subject to the \$20,000 liability limit of the Hague Protocol. Passengers holding a round trip ticket from the territory of a country party to the Warsaw Convention, but not the Hague Protocol, would be subject to the \$10,000 Warsaw limit. Passengers traveling on a one way ticket between countries which are both parties to Hague or Warsaw, would be subject to the limits applicable under the treaty to which they are both parties (i.e., \$20,000 for Hague, \$10,000 for Warsaw). Passengers traveling on a one way ticket between one country party to Hague, and one country party only to Warsaw, would be subject to the \$10,000 Warsaw limit. The nationality of the airline or passenger is not relevant to the applicability of the Convention's limits.

<sup>2</sup>The United States is a party to the Warsaw Convention, but not to the Hague Protocol Amendments. However, a 1966 Agreement among all carriers operating to or from the United States provides for waiver of the Warsaw limits in part, with the result that, for the United States only, passengers traveling either one way or round trip to or from, or with a stopover in, the United States would be subject to a limit of \$75,000 under strict liability.

COUNTRIES<sup>1</sup> PARTY TO THE WARSAW CONVENTION AS AMENDED BY THE 1955 HAGUE PROTOCOL (20,000 LIABILITY LIMIT). TOTAL—110

Afghanistan, Algeria, Argentina, Australia, Austria, Bahamas, Bangladesh, Belarus, Belgium, Benin, Brazil, Bulgaria, Cameroon, Canada, Chile, China, Colombia, Congo, Costa Rica, Cote d'Ivoire, Cuba, Cyprus, Czechoslovakia, Denmark, Dominican Republic, Ecuador, Egypt, El Salvador, Fiji, Finland, France, Gabon, Germany, Greece, Grenada, Guatemala, Guinea, Hungary, Iceland, India, Iran, Iraq, Ireland, Israel, Italy, Japan, Jordan, Korea, Dem. People's Rep. Kuwait, Laos, Lebanon, Lesotho, Libya, Liechtenstein, Luxembourg, Madagascar, Malawi, Malaysia, Mali, Mauritius, Mexico, Monaco, Morocco, Nauru, Nepal, Netherlands, New Zealand, Niger, Nigeria, Norway, Oman, Pakistan, Papua New Guinea, Paraguay, Peru, Philippines, Poland, Portugal, Qatar, Republic of Korea, Romania, Russian Federation, Rwanda, Saudi Arabia, Senegal, Seychelles, Singapore, Solomon Is., South Africa, Spain, Sudan, Swaziland, Sweden, Switzerland, Syrian Arab Rep., Togo, Tonga, Trinidad & Tobago, Tunisia, Turkey, Ukraine, United Kingdom, Vanuatu, Venezuela, Vietnam, Western Samoa, Yemen, Yugoslavia, Zambia, and Zimbabwe.

<sup>1</sup>Under Article 1 of the Warsaw/Hague Convention passengers holding tickets for a round trip journey from the territory of a country party to the Warsaw Convention as Amended by the Hague Protocol would be subject to the \$20,000 liability limit of the Hague Protocol. Passengers holding a round trip ticket from the territory of a country party to the Warsaw Convention, but not the Hague Protocol, would be subject to the \$10,000 Warsaw limit. Passengers traveling on a one way ticket between countries which are both parties to Hague or Warsaw, would be subject to the limits applicable under the treaty to which they are both parties (i.e., \$20,000 for Hague, \$10,000 for Warsaw). Passengers traveling on a one way ticket between one country party to Hague, and one country party only to Warsaw, would be subject to the \$10,000 Warsaw limit. The nationality of the airline or passenger is not relevant to the applicability of the Convention's limits.

COUNTRIES WHICH HAVE RATIFIED MONTREAL PROTOCOLS NO. 3<sup>1</sup>

Argentina, Brazil, Colombia, Denmark, Ethiopia, Finland, Greece, Hungary, Ireland, Israel, Italy, Netherlands, Norway, Portugal, Spain, Sweden, Togo, Switzerland, United Kingdom.

<sup>1</sup>To date nineteen countries have ratified Montreal Protocol No. 3, governing passenger liability. The Protocol will come into force upon ratification by thirty countries. Following United States ratification, we anticipate that the remaining ten ratifications required for entry into force will follow rapidly. This is particularly true since it is the United States plan to denounce the Warsaw Convention except with respect to countries which have ratified Montreal Protocol No. 3, so that the United States will remain party only with countries which have also ratified Montreal Protocol No. 3. This will necessitate ratification by other countries which desire the protection of the Convention's limits for their air carriers on flights to and from the United States.

THE SECRETARY OF TRANSPORTATION,  
Washington, DC, September 23, 1992.

Hon. GEORGE J. MITCHELL,  
U.S. Senate, Washington, DC.

DEAR MR. LEADER: The purpose of this letter is to seek your help in bringing the Mon-

treational Protocols to the Warsaw Convention to a vote on the Senate floor before the end of the 102d Congress.

Late last year, we instructed our staffs to explore the possibility of developing a statutory basis for establishing the supplemental compensation plan. Concern was expressed at that time that such legislation, if treated as a prerequisite to a Senate vote on ratification, would risk undue delay by providing a target for those who oppose modernizing the out-dated and unfair Warsaw system; or who might seek a vehicle to advance unrelated agendas. The only other alternative would be to rely on existing authority under the Federal Aviation Act to establish a supplemental compensation plan administratively.

Regrettably, these fears have now been realized. Even though a satisfactory legislative compromise has been reached that is acceptable to the Administration, to Senator FORD and to yourself, continued controversy makes it unlikely that this compromise can be acted upon.

Indeed, the situation is worse than we foresaw. Because the statutory language establishing the supplemental compensation plan is now incorporated in S. 2642, the Federal Aviation Administration's reauthorization bill, opposition by representatives of the airframe and engine manufacturer is currently impeding the prospects for further action on that important legislation.

You asked that the supplemental compensation plan be established through legislation in order to ensure that the Senate fully understood, prior to considering the Protocols, the plans' impact on the parties most directly affected—air travelers, airlines, and the trial bar. The legislation developed by staff would have fulfilled that objective. I can make the following commitment. If the Senate gives its advice and consent to ratification of the Montreal Protocols, the Department of Transportation will propose regulations establishing a supplemental compensation plan identical to that contemplated in the enabling legislation currently incorporated in S. 2642.

I must also tell you that, if the Senate does not approve ratification of the Protocols prior to the end of the present Congress, the utility of the Warsaw regime will almost certainly come to an end. Other nations, themselves unhappy with the present Warsaw liability limits, have been threatening to establish their own separate systems if the United States does not adopt the Protocols. Only those nations comfortable with the lowest liability limits will remain in the Warsaw regime, leading to the very patchwork we sought to avoid.

Once it became evident that the Warsaw System was no longer viable, of course, no further effort to obtain Senate approval of the Montreal Protocols would be justified. Under those circumstances, I would have no alternative but to recommend to the President that the United States terminate its participation in the Warsaw Convention. It would be unconscionable, in my view, to maintain the requirement that claimants and their lawyers spend years in expensive litigation trying to prove "willful misconduct" on the part of an airline simply to qualify for damages in excess of \$75,000.

I urge you in the strongest possible terms to bring the Montreal Protocols to a vote on the Senate floor before the end of this Congress.

With best personal regards.

Sincerely,

ANDREW H. CARD, Jr.

U.S. SENATE,

Washington, DC, January 10, 1992.

THE PRESIDENT,

The White House, Washington, DC.

DEAR MR. PRESIDENT: We are writing to express our concern about the issue of compensation for victims of terrorism.

Section 211(a) of the Aviation Security Improvement Act of 1990 (P.L. 101-604), enacted in the wake of the terrorist bombing of Pan Am Flight 103 and the May 1990 report of the Presidential Commission on Aviation Security and Terrorism, required the Administration to submit recommendations to Congress as to whether or not legislation should be enacted to authorize the United States to provide compensation to Americans who are victims of terrorism. These recommendations were required to be submitted by November 1991, one year after the Act became law. However, it is our understanding that the work of the inter-agency group responsible for preparing these recommendations is still far from being complete.

We are concerned about the delay in submitting these recommendations and the failure to meet the deadline. The tragedy of Pan Am 103 has had profound consequences for the families of the innocent victims of this terrorist atrocity and they have already waited too long for relief.

We urge you to expedite this current process and to ensure that the Administration's recommendations are submitted to Congress as soon as possible.

Respectfully,

EDWARD M. KENNEDY, GEORGE J. MITCHELL, FRANK R. LAUTENBERG, DANIEL PATRICK MOYNIHAN, BILL BRADLEY, ALFONSO M. D'AMATO, CHRISTOPHER J. DODD, HARRIS WOFFORD.

AIR TRANSPORT ASSOCIATION,

September 28, 1992.

Hon. GEORGE MITCHELL,

U.S. Senate, Washington, DC.

DEAR SENATOR MITCHELL: Last Friday I addressed the National Press Club about the state of the U.S. airline industry and at the end of my speech I took a few moments to reflect on the current legislative impasse which will prevent any further action on the Montreal Protocols and the Supplemental Compensation Plan. What saddens me most about the deadlock we have reached on this important treaty is the impact that this issue has on every American who travels abroad.

Ratification of the Montreal Protocols has been far more than a professional obligation for me—it has been a very personal goal—a goal which I know would have had a permanent and positive impact on the future of international aviation law. I want to express my personal appreciation for your active interest, commitment and leadership on the Protocols during the 102d Congress. You and Senator Ford successfully brought together parties—the world's airlines, the U.S. Government and the trial lawyers—which had been at odds over the substance of the Supplemental Compensation Plan for decades. And while U.S. airlines are deeply disappointed that neither the Treaty nor the Supplemental Compensation Plan will come before the Senate in 1992, we are grateful for your persistence as well as the dedicated and capable staff work of Bob Carolla.

The future of the Warsaw Convention remains unclear. However, it is both my professional and personal wish that as time passes and the Administration considers its policy options, that it is the best interests of the international travelling public which

will determine the ultimate outcome. Again, many thanks.

Sincerely,

JAMES E. LANDRY.

ASSOCIATION OF TRIAL  
LAWYERS OF AMERICA,

Washington, DC, September 25, 1992.

Hon. WENDELL H. FORD,

U.S. Senate, Washington, DC.

DEAR SENATOR FORD: I am writing to clarify any lingering misunderstanding that may exist regarding the position of the Association of Trial Lawyers of America regarding S. 2945, the Supplemental Compensation Act of 1992, and its inclusion as an amendment to S. 2462, the F.A.A. authorization bill.

ATLA welcomed the opportunity to participate—we hope constructively—in the lengthy discussions that led to the development of this bill. We will make ourselves available to you and to your staff at any time. Without question, you and Senator Mitchell have worked diligently on behalf of those who may be injured or killed in an international aviation accident.

As you know, for a host of compelling reasons that we articulated elsewhere, we urged upon the Senate the position that if it is to ratify the Montreal Protocols it should insist first, as a condition for depositing the instruments of ratification, that a satisfactory Supplemental Compensation Plan be enacted statutorily. The content and implementation of any Supplemental Plan, however, is not our sole concern regarding the Protocols. We have larger concerns relating to the principle that people and institutions in this country are individually accountable and responsible for their behavior and for the harm they cause. That is not only a bulwark principle of our jurisprudence, it is a hallmark of our free society. It concerns us, therefore, that the airlines would be relieved of responsibility and liability while the flying public would be required to fund that special relief.

We do understand and appreciate that S. 2945 is a step in the direction of the fuller protection of American travelers. While we will ask no member of the Senate to oppose it, however, it would mischaracterize our position to say that ATLA has endorsed the bill.

With best wishes,

Sincerely,

ROXANNE BARTON CONLIN,  
President.

Mr. LAUTENBERG. Mr. President, I am pleased to note that the FAA reauthorization bill we are considering contains a provision similar to legislation I introduced in the Senate, to promote the development and use of a new generation of quieter airplanes.

This legislation will establish a focused, coordinated research and development program, to be carried out jointly by the FAA and NASA. The goal of this program is to develop, by the turn of the century, the technology that would result in a quieter generation of commercial aircraft.

While the establishment of this new program is a major step forward in efforts to combat aircraft noise, the House-passed provision is not as strong as that that was contained in my bill, or that approved by the Commerce Committee. The Senate provision, in keeping with my bill, set out more spe-

cific goals for the joint NASA-FAA program: to reduce noise generated by commercial airplanes by 4-6 decibels, making them as much as 30 percent quieter than the quietest planes flying today. While this specificity is lacking in the House-passed bill, I continue to believe that these goals are achievable, and urge the FAA and NASA to work toward them. And, as chairman of the Transportation Appropriations Subcommittee, I'll be monitoring the progress of this important new program.

Aircraft noise is a serious problem throughout the country, and particularly in the northern New Jersey-New York metropolitan region, where according to the FAA, one-third of all people who are noise-impacted live. I am working with affected citizens in New Jersey to address their problems, through such means as potential route changes, and an accelerated phase-out of noisy stage 2 aircraft at the region's three major airports. Another way that we can look to provide relief is to attack the problems at its source—to improve the planes that serve our communities.

Over the last 20 years, tremendous improvements have been made in commercial aircraft. The planes being produced today are quieter, more efficient, and safer than those that were the mainstays of the fleet in the past.

Today's new aircraft—planes such as Boeing's 767 or McDonnell-Douglas' MD-80—are truly generations ahead of their predecessors, like the Boeing 707 or DC-8. Stage 3 planes are as much as 25 decibels quieter than early stage 1 planes. With every 10 decibels representing about a 50-percent reduction in apparent noise, this means the newer planes are as much as 85 percent quieter than the old ones.

Additionally, stage 3 aircraft, on average, consume about 30 percent less fuel than stage 2 planes. This is important, particularly in view of our unhealthy dependence on shaky foreign oil sources.

The U.S. aircraft manufacturing industry has led the world in developing these new generations of airplanes. Our manufacturers continue to have the lion's share of the global aircraft market. Time after time, commercial aircraft are the single largest component of our export market.

The push to develop these new aircraft has come, in part, through the Federal Government. In 1969, standards were set for stage 2 aircraft, and in 1973, all new aircraft were required to meet those standards. In 1977, new planes were required to meet the tougher standards of the stage 3 classification. And, in 1985, all stage 1 commercial jets were taken out of service. In 1990, Congress enacted legislation, similar to a bill that I authorized, to phase out stage 2 aircraft by the turn of the century.

Now, it is time to keep things moving forward. It is time to develop the next generation of planes. Call it stage 3.5 or stage 4. Whatever its name, it'll be a quieter and more efficient fleet.

Some may believe that new advances just are not achievable. As someone who spent 30 years in the technology industry before coming to the Senate, I just won't accept that our top engineering and design minds can't do it. Just in the last few years, we've seen radical advances in aircraft design. The Stealth aircraft have features that were thought to be fantasy not too long ago. Development of that technology came through a combination of government and private sector resources. It's that type of dedication that's needed to develop the next generation of commercial aircraft.

This is an ambitious goal, but not an unrealistic one. It is based on the recommendations of an industry task force, including aircraft manufacturers. It's a goal that, for several reasons, we should make every effort to achieve. There are indications that the European Community is moving toward tougher standards, along the lines of goal of my bill, in the near future. Our citizens deserve no less. And, if our domestic aircraft manufacturers are to maintain their leadership role, the development of this technology is critical.

Under this provision, the FAA and NASA will be required to submit annual reports on the progress of this R&D program. The focus here is on the development half of research and development. My expectation is that the technological improvements—such as improved engines and airframes—are achievable. Under my original bill, the FAA Administrator would be required to submit by 1998 to Congress a proposal for requiring that new aircraft certified by the FAA would meet the quieter standards. The intent was not to force our carriers to abandon their stage 3 fleets. Rather, the goal was to ensure that all new aircraft entering the fleet would be quieter. In making this proposal, the Administrator was to consider such factors as the reduction in noise, the economic impacts, and the capacity of the domestic industry to produce such aircraft.

The Federal Government has pushed the development and use of quieter and more advanced aircraft. This bill would continue that pattern, and help reduce the impacts of aircraft noise for people across this country.

Mr. President, I think the distinguished chairman of the Aviation Subcommittee, Senator FORD, for his efforts and cooperation in having this provision included as part of the reauthorization, and look forward to working with him to strengthen it in the next Congress. I urge my colleagues to support this bill.

## PITKIN COUNTY AIRPORT

Mr. WIRTH. Mr. President, I want to take this opportunity to thank my good friend the senior Senator from Kentucky and the majority whip, WENDELL FORD, for all his help over the years on not only my State's airports and airways but on many issues of concern to the people of Colorado. His help has been indispensable.

Recently, he and I initiated a study by the General Accounting Office to examine certain safety issues of particular concern to mountain airports. This matter came to our attention because the Federal Aviation Administration [FAA] began proceedings to penalize an airport in Colorado—Pitkin County Airport, aka Sardy Field—for maintaining safety standards above and beyond those required by the Federal Government.

Pitkin County Airport is located in the Roaring Fork Valley in the Rocky Mountains. The facility is surrounded by high peaks, severely restricting the approach to the airfield and forcing aircraft to travel over populous sections of the valley. The region is characterized by high levels of air traffic and extremely variable weather, particularly during the winter months.

Under local rules, aircraft operations cease a half hour after sundown with the exception of commercial airlines. These carriers operate under a waiver, having met certain requirements laid out by the facility managers and the FAA.

These regulations require airline pilots to undertake special training on a recurring basis for flying into certain mountain airports, require commercial aircraft to be specially equipped for mountain airport operations and mandate the use of instrument flight rules at all times, regardless of weather conditions. In contrast, the FAA does not impose these or comparable special safety requirements on general aviation operations at the same airports, even though many such operations are commercial in nature, with paying passengers flying on air taxi aircraft.

Instead, the FAA's regulatory approach has been to impose a broad obligation on general aviation pilots to operate safely, to see and be seen, declining to establish more detailed or site-specific safety requirements on general aviation operations.

Rather than recognizing that Pitkin County's rules make the airport safer for flying passengers as well as the facility's neighbors, the FAA has ordered the county to permit visual flight rules [VFR] general aviation operations after dark—a major relaxation of regulations designed to protect the traveling public. If they do not, Sardy Field could lose all access to Federal funds as a commercial service airport.

Mr. President, the Congress needs to assure itself that all commercial passengers, as well as general aviation pi-

lots themselves, are protected by adequate FAA safety regulations at mountain and non-mountain airports alike. As to mountain airports, a 1991 air safety study commissioned by Pitkin County concluded from National Transportation Safety Board [NTSB] accident data that the risks of a general aviation pilot crashing near that airport using visual flight rules during nighttime hours are five times as high as at non-mountain airports—an alarming finding.

Senator FORD and I requested that the GAO undertake a study to help us determine whether FAA safety standards for general aviation operations at mountain airports are adequate. This examination will consider whether the FAA regulatory requirements imposed on airline operations at mountain airports have been successful in reducing risks from those operations, whether parallel requirements on general aviation operations would or would not substantially reduce risks and to consider the costs of imposing and complying with such requirements on the pilot and general aviation business.

It seems reasonable that the FAA would not pursue enforcement actions based substantially on laws and regulations currently under the active examination of the Congress, in this case via a GAO study. Unfortunately, I have been unable to secure such assurances from FAA officials.

Mr. President, I would like to ask Senator FORD if he concurs with this position.

Mr. FORD. Mr. President, I do concur with my friend from Colorado, Senator WIRTH. The Congress has the constitutional right and obligation to review all actions by the FAA and that is what we are doing now. The GAO is the investigative arm of Congress, and we have asked them to examine Pitkin County's, and other mountain airports', flight rules and determine how and if they contribute to safer air travel, or if more is needed.

If the FAA were to interfere with Pitkin County's airport operations while a GAO study is underway, it would compromise the outcome of the examination. I would strongly recommend to the FAA that it not force the airport to allow general aviation VFR operations after dark during the pendency of the study. These regulations have been in existence with the full knowledge of the FAA for more than twelve years—a little longer while this study is under way seems reasonable and necessary.

Mr. WIRTH. I thank the distinguished Senator for his efforts and hope that we will have the opportunity to work together again in the future.

Thank you, Mr. President. I yield the floor.

#### SPECIAL USE AIRSPACE

Mr. MACK. Mr. President, I would make an inquiry on behalf of the senior

Senator from Florida, Mr. GRAHAM, and myself, of the floor manager as to the participation of appropriate State agencies with the FAA and DOD in any discussion pertaining to special use airspace. It is our understanding that currently such discussions may include only the FAA and DOD. It is reasonable to assume that in light of the ongoing defense drawdowns and corresponding reductions in existing airspace requirements, a review of special use airspace may occur. It would therefore seem appropriate to include State agencies in such discussions between the FAA and DOD when they do occur.

Mr. GRAHAM. Mr. President, the Florida Department of Transportation brought this matter to Senator MACK's and my attention early this year. My hope is that by encouraging the FAA Administrator to ensure full State participation we will address the concerns of all state DOT's impacted by special use airspace.

Mr. FORD. Mr. President, both Senators from Florida have outlined the impact of special use airspace on the Nation's aviation system and Florida's unique circumstances.

It would indeed be appropriate to involve the relevant State agencies in any discussions between the FAA and DOD on special use airspace. As chairman of the Senate Subcommittee on Aviation, I encourage the Administrator to accommodate States in this manner. I thank my colleagues for making mention of this matter.

#### HUNTSVILLE AIRPORT NORTH

Mr. HEFLIN. Mr. President, in recent weeks, I have discussed with my distinguished colleague from Kentucky an unusual situation in Alabama involving the Huntsville Airport North which handles a large volume of general aviation traffic and operates a fully accredited flight school. This airport provides an important service for north Alabama. Unfortunately, this airport has not been designated as a reliever airport for Huntsville International Airport because the primary airport does not have the requisite amount of traffic. Moreover, while Huntsville Airport North operates as a public facility, it is privately owned and therefore not able to receive the type of Federal assistance it could were it a publicly owned facility.

I would like to ask my colleague if, after learning of the circumstances surrounding the operation of this airport, he believes it is in the public's interest that the Federal Aviation Administration do all it can to work with Huntsville Airport North to ensure its continued viability and ability to provide the important services on which so many people rely.

Mr. FORD. Mr. President, I agree with my colleague that his airport merits the strong efforts of the Federal Aviation Administration to ensure its ability to continue meeting the general

aviation and pilot training needs in that area.

Mr. HEFLIN. I thank the Senator from Kentucky for his interest in any matter.

#### REAUTHORIZATION OF FEDERAL AVIATION ADMINISTRATION

Mr. DANFORTH. Mr. President, this 1-year reauthorization of the Federal Aviation Administration's [FAA] Airport Improvement Program [AIP] will ensure that funds are available in fiscal year 1993 for airport capacity and improvement projects. Without this legislation, Federal airport funding would virtually shut down, jeopardizing ongoing projects and tens of thousands of jobs.

Of particular importance to the State of Missouri is the availability of Federal funds to begin the expansion of Lambert St. Louis International Airport. Lambert Field is the 15th largest airport in the United States, with over 10 million enplanements per year.

Lambert currently suffers average delays of 13 minutes per operation. The expansion of Lambert will allow the airport to reduce delays by operating with two independent runways, under all weather conditions, and will position the St. Louis region to continue to grow as an important transportation hub.

The 3-year reauthorization reported by the Senate Committee on Commerce, Science, and Transportation earlier this year—S. 2642, the Aviation Noise Improvement and Capacity Act of 1992—set aside sufficient AIP funds to fund major capacity enhancing projects such as the Lambert expansion. Indeed, that legislation was carefully crafted to ensure that the FAA could continue to issue letters of intent for projects like Lambert.

The 1-year extension before us today also provides sufficient funds to proceed with the Lambert expansion. While the legislation only provides AIP spending authority for 1 year, the formulas governing set-asides and discretionary funds allow sufficient resources for the FAA to fund new capacity enhancing projects. Even with commitments under previously issued letters of intent, the FAA will have at its disposal ample AIP funds to begin the Lambert expansion and issue a letter of intent for the project.

Mr. McCAIN. Mr. President, this 1-year extension is necessary to ensure the continued funding of Federal airport grants. Without further authorization of the Airport Improvement Program [AIP] under the Federal Aviation Administration [FAA], all but a tiny trickle of Federal funding for airport expansion and improvement would end.

Federal AIP funds support some 75,000 jobs, which would be in jeopardy should Congress fail to act on this critical legislation. In the State of Arizona alone, over \$45 million in AIP funds was spent in 1991. Further, the Sec-

retary of Transportation has written to Congress asking for this action to assure continued airport grant funding.

Mr. President, I ask unanimous consent that a letter from Secretary of Transportation, Andrew Card, dated October 7, 1992, appear in the record following my remarks.

The PRESIDING OFFICER. Without objection it is so ordered.

(See exhibit 1.)

Mr. McCAIN. While this legislation reauthorizes FAA airport grants for only 1 year, it does contain many provisions important to Arizona.

This legislation contains a study requiring the FAA Administrator to report to Congress by May 1, 1993, on the current and projected need for air traffic control and related services in the airspace in the vicinity of Tucson.

As part of a nationwide consolidation of flight service stations, the FAA plans to close the Tucson station. The report to Congress requires the FAA to focus on special circumstances regarding Tucson, including the handling of border traffic, flight plan filings, and notifications to law enforcement agencies that monitor international air traffic between Arizona and Mexico. To ensure that these issues are adequately resolved, the legislation prohibits any change in the current status of the Tucson flight service station until 60 days after Congress receives this report.

Another issue of concern to Arizona is the safety and environmental effect of air traffic in the vicinity of the Grand Canyon. Earlier this year, I chaired a field hearing in Flagstaff to hear testimony on these issues from representatives of Federal agencies, tour operators, and environmental interests. Testimony at that hearing indicated the need for further study of measures to improve both air safety and the noise environment.

This legislation includes a requirement that the FAA Administrator, in conjunction with the Director of the National Park Service, the State of Arizona, affected Indian tribes, the State of Nevada, and the general public, conduct a study on increased air traffic over Grand Canyon National Park. This report to Congress will include: a report on the increase in air traffic since 1987; a forecast of the increase projected through 2010; a report on the carrying capacity of the airspace over the Grand Canyon to ensure aviation safety and to meet noise reduction requirements; and a plan of action to manage increased air traffic to meet the goals of aviation safety and noise reduction.

In addition to reauthorizing the airport grant program, the bill before us today makes changes in the AIP program that will benefit Arizona. Terminal development projects at medium-sized airports—such as Bullhead City, Flagstaff, Fort Huachuca, Kingman,

Page, Prescott, Sedona, and Yuma—will now be fully eligible for federal funding with an 85-percent federal match.

An increase in the minimum federal airport allocation from \$3000,000 to \$400,000 will benefit Flagstaff and Sierra Vista Airports. In addition, Phoenix Sky Harbor Airport will have its funding under the cargo funding program increase by 17 percent. In 1992, Phoenix received \$556,000 in cargo related grant funds.

Initiatives to deal with the issue of airport and aircraft noise are included in this legislation. Within the overall airport grant program, funding available to airports for noise abatement projects, such as soundproofing, are increased by 25 percent to \$225 million. In addition, the FAA is required to study the effect of noise on communities surrounding airport property and to allocate more research funds to the study of technologies to reduce aircraft noise.

This legislation includes an expansion in the military airport program within the FAA to help convert closing military airbases to civilian use. The FAA has already identified Williams Air Force Base as a prime candidate for this program and last week I announced a major planning grant from the FAA to study civilian uses for Williams. With this expansion in the FAA's military airport program, Williams will be eligible to apply for a share of the \$36 million made available for conversion of military airbases. The actual application for this grant will depend on the decision of the Governor's commission and local communities.

Finally, I note that this legislation includes a 5-year extension of the war risk insurance program. This program provides air carriers with Government-sponsored insurance when commercial insurance is unavailable or available at unreasonable rates due to world events. This program was extensively utilized during the Persian Gulf conflict with commercial aircraft conducting more than 5,000 flights under this program.

#### EXHIBIT 1

THE SECRETARY OF TRANSPORTATION,  
Washington, DC, October 7, 1992.

HON. ERNEST F. HOLLINGS,  
Chairman, Committee on Commerce, Science,  
and Transportation, U.S. Senate, Wash-  
ington, DC.

DEAR MR. CHAIRMAN: In the short time remaining before adjournment of the 102d Congress, I urge Congress to adopt the necessary authorization for continuation of airport planning and construction activities in the current fiscal year. Without action, the Federal Aviation Administration (FAA) will be unable to apportion badly needed safety and capacity funds to the nation's airports to totaling \$1.8 billion.

Yesterday, the President signed the Transportation Appropriations bill into law. This legislation paves the way for a \$1.8 billion airport improvement program to support more than 75,000 jobs in airport construction,

design, and related industries, which are significant to building new economic momentum across the nation. However, Senate action on authorizations is required to make the funds available. There is dispute as to the value of these projects or the requirements of the program as a whole. Particularly for the hard-hit airline industry, these federally assisted airport improvement projects are needed now.

The Department of Transportation and the Administration stand ready to work with you and the entire Senate leadership to put the place this necessary FY 1993 authority. I know you share a commitment to continuity in airport funding. The Office of Management and Budget advises that, from the standpoint of the Administration's program, there is no objection to the submission of these views for the consideration of Congress.

Sincerely,

ANDREW H. CARD, JR.

The bill (H.R. 6168) was deemed read the third time and passed.

#### OMNIBUS WATER RESOURCES DEVELOPMENT ACT

Mr. FORD. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of H.R. 6167, the Omnibus Water Resources Development Act, just received from the House, that the bill be deemed read three times, passed, and the motion to reconsider laid upon the table; further, that any statements relating to this measure be inserted in the record at the appropriate place as if read.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MOYNIHAN. Mr. President, I am delighted to see that the Senate will pass the next in our series of authorization bills for the domestic water resources program of the Army Corps of Engineers. The bill, H.R. 6167, has been passed by the House and we have every reason to believe that the President will sign the bill.

Mr. President, this bill continues the orderly process of authorizing water resources development projects every two years, a precedent established and honored since 1986. These project authorizations for the Army Corps of Engineers provide for necessary internal improvement for our nation. My colleagues should know that this is an historic occasion, being the fourth connective water resources bill since 1986. This is the longest continuous series of Water Resources Act in the Nation's history.

This bill provides for the conservation and development of our valuable water resources. It provides for improvements to the Nation's commercial waterways and ports and harbors. It provides for environmental protection and restoration.

It also provides jobs. From Maine to California to Alaska. From Wisconsin to Florida. The economic benefits of this bill touch nearly all 50 States. With passage of this bill into law,

about \$4 billion would be invested in America's future. The 22 new projects authorized for construction accounts for \$3 billion in infrastructure improvements. And the resulting jobs. A little more than half the cost of these projects would be borne by non-Federal sponsors.

On that basis, the water development program cannot be seen to be a wasteful or bloated consumption of public goods. Our water resources program is a nationwide investment partnership between the Government and the State and local beneficiaries.

Mr. President, for 16 years the water resources infrastructure needs of this Nation went unattended. From 1970 to the passage of the 1986 act we paid less attention to this life giving resource than most third world nations. Many of my distinguished colleagues have joined with me since 1986 to regain our sense of national priority for these water programs. Thus, this historic bill.

Mr. President, we also build from the foundation set by the Intermodal Surface Transportation Efficiency Act of last year, or ISTEA as it has come to be known. We apply to water resources the same tests which governed the ISTEA. Efficiency, productivity and pricing. The need to develop new technologies and stimulate innovation is just as important for our water resources program. Particularly so for our water transportation system. Linkage between surface and water transportation is addressed. And, like ISTEA, we have included in this bill provisions for better management of our existing infrastructure.

Mr. President, we move our water resources development forward. We did so in the 1986 Water Resources Act. We did so in 1988 and 1990. We again do.

Mr. President, I ask unanimous consent a letter to me from the Acting Assistant Secretary of the Army for Civil Works in support of the bill be placed in the RECORD at this point. This letter was signed by Mr. Morgan Reese in the place of Dr. Edward Dickey.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF THE ARMY,

OFFICE OF THE ASSISTANT SECRETARY,

Washington, DC, October 5, 1992.

Hon. DANIEL PATRICK MOYNIHAN,  
Chairman, Committee on Environment and Public Works, U.S. Senate, Washington, DC

DEAR MR. CHAIRMAN: I am pleased to inform you that if Congress passes the version of the Water Resources Development Act of 1992, completed on October 5, 1992, by Senate and House committee staffs, the Department of the Army would recommend that the legislation be approved by the President.

We appreciate the diligent efforts of all involved to produce a bill that continues the vital role of the Army Corps of Engineers in building and maintaining a strong water resources program within a consistent policy framework and realistic fiscal expectations. Equally important, the bill continues and

strengthens the basic principles of partnership and cost sharing with non-Federal sponsors, and extends those principles to the environmental restoration missions of the Army civil works program.

MORGAN REESE

(ACTING FOR G. EDWARD DICKEY,

ACTING ASSISTANT SECRETARY OF  
THE ARMY, CIVIL WORKS).

Mr. MITCHELL. Mr. President, I rise in support of the water resources legislation now before us. This bill is an important step toward addressing water resources needs throughout the country.

I am especially pleased that the bill includes new authority to assess and protect the quality of coastal waters and coastal sediment. The bill also gives small communities an additional 2 years to prepare for control of stormwater discharges to waterbodies and authorizes a demonstration program for the control of stormwater in critical watersheds, including watersheds in my home State of Maine.

The sediment quality provisions are based on legislation I introduced to protect coastal waters—S. 1070. I want to thank Senators MOYNIHAN, CHAFEE, BREAUX, and others for their constructive suggestions to revise and improve these provisions.

There is growing evidence that sediments underlying coastal waters contain contaminants at levels which pose a threat to the quality of the aquatic environment and human health.

The National Research Council issued a report in 1989 which concluded:

Contamination of marine sediment poses a potential threat to marine resources and human health (through seafood consumption) at numerous sites around the country \* \* \* improving the nation's capability to assess, manage, and remediate these contaminated sediments is critical to the health of the marine environment.

The National Oceanic and Atmospheric Administration has published results of a national program to monitor toxic chemicals at 50 coastal and estuarine sites from Maine to Alaska. The report states:

A number of sites revealed relatively high levels of toxic contaminants in both bottom sediments and bottom dwelling fish. For example, sediment concentrations of toxic trace metals, aromatic hydrocarbons, DDT's PCBs, and sewage derived material from northeastern coast cities in Boston Harbor, Salem Harbor, and Raritan Bay are among the highest vales measured nationally.

The coastal sediment provisions of the pending bill will substantially expand our information and knowledge about the condition of coastal sediments. The bill calls for a survey of sediment quality and a report to Congress on the extent and seriousness of sediment contamination nationally.

In addition, the bill provides for a national contaminated sediment task force to oversee the implementation of programs designed to protect sediment quality. The task force is to include key Federal agencies and representa-

tives of ports, States, and public interest organizations.

I hope that this task force will focus the attention of Federal agencies and other parties on the contaminated sediment problem and guide the development of policies to remediate existing problems and prevent future contamination.

The bill also amends the Ocean Dumping Act by clarifying the process for issuing permits for the dumping of dredged material in the ocean.

A central provision of the bill directs the Administrator of EPA to concur in writing on permits issued by the Secretary of the Army for the dumping of dredged material. This new process is intended to expand EPA's role in identifying potential environmental consequences of ocean dumping and in taking appropriate action to prevent environmental problems. This concurrence process applies to dumping authorizations for Federal projects pursuant to section 103(e).

The Administrator's concurrence may include permit conditions and may include denial of a permit. If the Administrator concurs with conditions, the conditions are to be included in the permit. If the Administrator denies the permit, the Secretary shall not issue the permit.

This legislation also brings the Ocean Dumping Act into conformance with our other environmental laws by removing the existing preemption of State environmental standards. In the case of dumping associated with Federal projects, a State may adopt a more stringent standard than a Federal standard based on a showing that such standard meets several criteria. Also, the President may exempt a Federal project from a State requirement if it is in the paramount interest of the United States to do so.

The amendment also addresses the important process of designating and managing dumpsites. Designation of dumpsites has been slow and many sites do not have final designation. The amendment provides that by 1997, all sites are to have final designations, including appropriate environmental assessment.

In addition, the amendment provides for the development of site management plans for dumpsites. The site management plans are intended to provide a comprehensive and long-term statement of the expected uses and activities at the dumpsite. Monitoring at sites is to include monitoring of the areas surrounding the sites. Individual permits for dumping at a site are to conform to the site management plan.

The amendment also clarifies and limits the existing policy in the act concerning the dumping at sites which are not designated. This existing authority has been used on a very limited basis to date and it should continue to be used in only a very small percent of

dumping cases. The Administrator is to concur in the selection of any alternative dump site and dumping is to be discontinued within 5 years unless the site is given a final designation by the EPA. Use of an alternative site may be extended for one 5-year period under specified conditions.

A key provision of the amendment revises the dumping permit authorities of the act. Permits are to conform to the provisions of site management plans for the dumpsite. Monitoring data collected under the site management plan is to be considered in the review of permits. Where monitoring data from a site indicates environmental problems or unintended environmental consequences associated with dumping, the permit is to be reviewed and revised or reissued.

Current law specifies that permits are to be for a specified period but does not specify the permit term. Most permits are now issued for a 3-year period. This period is sufficient to allow for the conduct of most projects and for the dumping associated with those projects to be terminated.

This 3-year period also facilitates reassessment of permits as scientific knowledge evolves over time and does not lock in for an extended period permit conditions which may later be found to be inappropriate or inadequate to protect the environment.

In a small number of permit cases, however, it may be appropriate for permits to be for a period of up to 7 years. Permits should be issued for up to 7 years only in those few cases where dredging activity is continuous, where dumping has very limited environmental effect, and where dredged materials are not contaminated. In areas such as urban harbors, subject to continuing or significant pollution, permit terms should be for the shortest practicable term and should not exceed three years.

Other important provisions of the amendment would increase penalties for violations of the act and extend authorizations for the act.

I am pleased that the bill also authorizes a general investigation along the Maine and New Hampshire coastline, to determine the feasibility of water resource improvements along the coast, focusing particularly on dredging and dredged material disposal. Passage of this provision will allow coastal planning to progress in Maine and New Hampshire and will prove to be a sound environmental and economic investment for New England. The corps is to conduct the study with the understanding that all proposed dredging work would need to be evaluated based on disposing of it at a permanently designated site. I hope that EPA will facilitate this effort by making permanent site designations for dredged material disposal, as required by title I of the Marine Protection, Research and Sanctuaries Act.

I also want to express my support for the extension of the waiver of the obligation of small communities to have a stormwater discharge permit under the Clean Water Act. This provision recognizes that EPA has focused on stormwater permits for large- and mid-sized municipalities and industries and needs more time to develop an appropriate program for permits for discharge of stormwater by smaller communities.

This bill also includes new authority for the Corps of Engineers to demonstrate approaches to the control of stormwater and related water pollution sources. This demonstration authority includes projects in my home State of Maine, and I look forward to a successful effort to address this important problem.

I urge my colleagues to support this important legislation.

Mr. BAUCUS. Mr. President, I rise in support of the water resources legislation now before the Senate.

I am pleased that the bill continues for 2 years the provisions in the Clean Water Act exempting communities under 100,000 persons from the requirement to obtain permits for discharges of stormwater.

Over the past year, I have been working with Senator CHAFEE and other members of the Environment and Public Works Committee to develop legislation to reauthorize the Clean Water Act. This effort included review of section 402(p) of the act which provides for permits of stormwater discharges. The stormwater program has been a special interest of Senator CHAFEE and he has taken the lead in developing amendments to this part of the Clean Water Program.

Unfortunately, it was not possible to pass a comprehensive Clean Water Act reauthorization bill this year. I expect to reintroduce comprehensive clean water legislation next year. This legislation will include several needed changes to the stormwater permit program.

The legislation we are considering today extends for 2 years the exemption for communities under 100,000 persons from the obligation to have permits for stormwater discharges. This bill will benefit small communities by removing any uncertainty concerning whether they must seek discharge permits over the coming 2 years. The bill has the related benefit of allowing the Environmental Protection Agency to issue the best possible stormwater permits for larger communities and to develop appropriate regulations for other stormwater sources.

This extension is not intended to grant any relief to stormwater sources that are required to be permitted under sections 402(p) (2) and (3) of the act. In NRDC versus EPA, the Ninth Circuit Court of Appeals ruled correctly that EPA illegally exempted certain indus-

trial sources and construction sites from stormwater permitting requirements. These sources remain subject to the deadlines for industrial permits included in the 1987 provision. In addition, this extension does not exempt EPA from the requirement and existing deadline to issue regulations covering remaining stormwater sources under sections 402(p) (5) and (6).

Mr. President, it is essential that this amendment to the stormwater program be passed this year and I urge my colleagues to support this important bill.

Mr. LAUTENBERG. Mr. President, I rise in support of H.R. 6167, the Water Resources Development Act of 1992. The bill contains numerous provisions of importance to the Nation and New Jersey. I commend Senator MOYNIHAN, the chairman of the Environment and Public Works Committee, for his persistence in pushing this legislation toward enactment.

Section 405, which was developed by Senator MOYNIHAN and myself, requires EPA and the Corps of Engineers to undertake a program of research on sediment decontamination in the New York-New Jersey Harbor. Contaminated sediments is a problem which plagues many of our coastal ports. Environmentalists, fisherman and members of the port community are concerned about disposal of these sediments. Section 405 authorizes \$5 million to EPA and the Corps of Engineers to conduct a sediment decontamination research program to explore new ways to deal with contaminated sediments. Earlier this year I was successful in having \$2.7 million appropriated to EPA to begin to conduct this research. EPA and the corps should explore decontamination technologies being developed for freshwater sediments in the Great Lakes.

Title V of H.R. 6167 establishes a sediment survey and monitoring program and contains amendments to the Ocean Dumping Act which will improve the management of ocean dumping of dredged material. As chairman of the Superfund, Ocean and Water Resources Subcommittee which has jurisdiction over the Ocean Dumping Act, I am pleased that the bill contains these improvements. Title V requires EPA to concur in permit decisions made by the Corps of Engineers, enhances the role of States in ocean dumping permit decisions in waters within the jurisdiction of the State, and establishes new provisions for disposal site management. I commend Senator MOYNIHAN for developing the language for the sediment survey and monitoring program and Senator MITCHELL for his work on the dredged material disposal amendments.

The bill contains several provisions of importance to New Jersey in the area of flood control. Authorization is included for the Corps of Engineers to

assume full operating authority for the Passaic River Basin advance flood warning system. Additional funds are authorized for the Newark streambank revitalization project, which will help protect against floods in Newark and contribute to ongoing efforts in the city to enhance the river and make it more accessible and attractive to residents. The bill also directs the corps to assess means of controlling flooding in Rahway and Paterson, and provides funds for an environmental improvement program in New Jersey's meadowlands, a vast area that we have worked hard to restore to its natural state.

Mr. President, New Jersey's shoreline is among its most precious resources. It is a destination for hundreds of thousands of vacationers, and accounts for \$13 billion in economic activity each year. Unfortunately, periodic storms threaten our coastline, and everything that the coastline means to New Jerseyans. I have worked to secure authorization and appropriations for a number of shore protection projects, which are critical to maintaining our coastal resources. This bill contains a provision I sponsored to direct the corps to conduct an economic impact study of New Jersey shore protection projects. In computing the economic benefits of a project, the corps would be directed to compare the cost of the project to its benefits, with the benefits, including the damage to the shoreline and local economies that will be prevented if these investments are made. This type of assessment puts the focus where it belongs, and will be important in the future when the Congress and the corps consider future shore protection projects.

I urge my colleagues to support H.R. 6167.

Mr. HARKIN. Mr. President, Sioux City, IA, has a major flood control project, Perry Creek, that is nearing the construction stage. The final work on the design and environmental assessments for the project should be finished in this fiscal year. Initial construction funds have been appropriated.

Perry Creek does not flood often, but when it does, flash floods can develop that may cause loss of life and property. A large number of moderate- and low-income homes are in the flood area.

The project is estimated to cost \$71,200,000 with Sioux City's share for land, easements, right of way, and relocation—traditional locally-borne costs—now estimated by the corps to total \$27,200,000. That is 38 percent of the project cost. In addition, under the Water Resources Act of 1986, the city would have to pay an additional \$3,512,000 given the current cost estimate if the 5-percent cash payment is required.

I understand that when the formula for the cash payment was established,

the average percentage to be paid under the traditional local government costs was expected to be about 20 percent and the intent of the 5-percent cash payment was to have cities pay at least 25 percent of the cost. Sioux City has a burden almost twice the traditional size.

Sioux City is not a wealthy community. The per capita income was only \$10,784 in 1987. The average home is worth only \$41,000 according to the last census.

The city is already at the maximum general levy allowed under Iowa law. A special taxing district was established to provide additional funds to pay for the bonds that will be issued to pay for the city's share of the costs. Nevertheless, the city still can ill afford the cost of moving forward with this project so necessary for the safety of its citizens.

Frankly, without a waiver of the 5-percent provision, Sioux City is going to have a very difficult time acquiring the funds for this project to proceed.

Mr. MOYNIHAN. Mr. President, I appreciate the Senator's remarks. The history of the 5-percent cash payment that he presented is accurate. And, I believe that the case he has presented for Sioux City has merit. For that reason, the Environment and Public Works Committee did place a provision in the Water Resources Development Act of 1992 to provide relief. When the provision for a cash payment was developed in 1986, there was provision made for cases of hardship. It appears to me that the Perry Creek project should have been a solid candidate for relief under that provision if it were administered as the Congress intended. The Congress made an effort to correct the problem in the 1990 water Resources Reauthorization. Unfortunately, the corps' cash payment rule did not follow congressional intent.

The provision in the Senate amendment gives the corps the discretion on this issue. A fair reading of the specifics of the project and the legislative history should, in my view, result in a waiver being granted.

PROVISION REGARDING OPERATIONS AND MAINTENANCE OF THE CROSS FLORIDA BARGE CANAL, AS REVISED, IN THE WATER RESOURCES DEVELOPMENT ACT OF 1992

Mr. GRAHAM. Mr. President, after thorough consultation with all parties concerned, we have arrived at a consensus on substitute language to section 321 of S. 2734, as reported by the Senate Environment and Public Works Committee, regarding the Cross Florida Barge Canal.

The revised language, graciously added by the managers of the bill, is meant only to extend for an additional 10 months beyond that provided in the 1990 Water Resources Development Act, the Corps of Engineers' role in operating and maintaining the constructed portions of the project. It explicitly

does not postpone the previously established schedule for deauthorization or the transfer of lands and structures, or otherwise slow the progress of converting the canal to a greenway.

To the contrary, we have arrived at a solution that provides for the State to contract with the corps to conduct basis operations and maintenance for a period of 10 months while the State completes the anticipated management plan. The revised language also equitably cost-shares this operations and maintenance extension among the corps, the canal authority, and the relevant water management districts.

I wish to thank all the parties involved—the corps, the Governor's Office, the St. Johns River Water Management District, the South West Florida Water Management District, the State canal authority, and Florida Defenders of the Environment—for their patience and willingness to reach a fair compromise.

THE KISSIMMEE RIVER RESTORATION PROJECT, AUTHORIZED BY THE WATER RESOURCES DEVELOPMENT ACT OF 1992

Mr. GRAHAM. Mr. President, I rise to thank the chairman of the subcommittee, the senior Senator from New York, for another robust, well-balanced and forward-thinking water resources bill. Every 2 years since 1986, just as he promised, the chairman has succeeded in whipping the subcommittee and the full Senate into shape to put together a comprehensive water projects package.

I would like to particularly acknowledge the chairman's foresight, first in seeing that environmental restoration will be a key part of the future mission of the Corps of Engineers, and second in authorizing the most ambitious riverine restoration project in North America, if not the world: the Kissimmee River project.

I would like to thank the many people in the corps who have seized the opportunity presented by this new vision and demonstrated a willingness to work with all concerned to craft an excellent plan: Nancy Dorn, Assistant Secretary for Civil Works; Lt. Gen. Henry Hatch, Chief of Engineers; Ed Dickey, Ph.D., Acting Principal Deputy Assistant Secretary; John Rushing of the South Atlantic Division; and Col. Terrence "Rock" Salt, Richard Bonner, and Louis Hornung with the Jacksonville district office.

We must also acknowledge the untiring efforts of the local sponsor, the South Florida Water Management District. First and foremost we owe a major debt of gratitude to our late friend Timer Powers. In addition, I wish to recognize the other keys to our success: Kent Loftin, the original project manager; Woody Woodraska, the previous Executive Director; Til Creel, Woody's successor; Patricia Sculley, the current project manager; and Kathy Copeland, government liaison.

Of course this project could not have gone forward without the strong support of our very active environmental community, represented in large part by the Everglades Coalition and led by Theresa Woody of the Sierra Club.

Finally, let me acknowledge the outstanding leadership of Congressman BILL LEHMAN, ably assisted by his staff person Nadine Berg.

Mr. President, the people I have personally named are among the many individuals and groups who have helped us get to this point. To all I say that I look forward to working with them to secure the annual appropriations for this precedent-setting restoration and to watching our river carefully brought back to life.

#### LAKE PONTCHARTRAIN CLEANUP

Mr. JOHNSTON. Mr. President, today I rise in support of the Water Resources Development Act of 1992. A portion of this legislation provides for comprehensive management of storm water runoff, a problem perplexing our Nation's urban areas. One of the Nation's most difficult storm water pollution problems is located in the State of Louisiana. Therefore it is with my particular interest that this legislation targets one of Louisiana's premier environmental treasures: Lake Pontchartrain.

Lake Pontchartrain and its adjacent lakes form one of the largest estuaries in the United States. In my generation, thousands can recall a time when the lake offered the residents of New Orleans and surrounding communities with an unparalleled urban lake experience. From the forties through the early sixties, Lake Pontchartrain was a place to enjoy the fruits of freshwater seafood, the thrills of a lakeside resort, and the benefits of swimming and other nautical activities. Commercial fishermen, seafood dealers, and restaurateurs prospered from the lakes' bounty of shell and fin fish.

However, the lake now suffers from prolonged neglect and the problems associated with its proximity to a large metropolitan area. The transformation of the surrounding communities of the lake from small waterside villages to growing metropolitan suburbs outpaced the ability of the combined storm water and sewage treatment infrastructure to properly dispose of its municipal runoff. Parish governments in the Lake Pontchartrain Basin simply lack the resources to meet these pollution challenges and comply with Federal water quality standards.

The result has been tragic. In the past three decades Lake Pontchartrain's water quality has declined to the point where water born recreation has been posted by local health officials as hazardous to human health. Last summer the Tangipahoa, a picturesque river long used for canoeing, tubing, and swimming which flows into Lake Pontchartrain was declared

a public health threat by State officials, canceling activities of local Girl Scouts and other recreational users.

In the last several years, community leaders in the State organized the Lake Pontchartrain Basin Foundation to stimulate community awareness and to promote restoration activities for the lake. I intend for the Foundation to continue playing a formal consultative role in the comprehensive management process. In this way, the legislation responds to the community effort to reclaim a vital environmental and economic resource.

The Lake Pontchartrain restoration effort poses unique environmental challenges which are truly national in importance. The majority of land surrounding Lake Pontchartrain is below sea level, making any secondary treatment of storm water municipal runoff a difficult prospect. Drainage canals which lead from municipal areas into the lake simply do not have the capacity to store storm water runoff for treatment purposes before the water drains into the lake. Therefore, innovative filtration techniques, such as the construction of man-made wetlands, in some cases is the only means to provide adequate secondary treatment.

In order to address the problems associated with storm water runoff into Lake Pontchartrain, this legislation authorizes Federal funds to address water quality problems associated with storm water discharges into the Lake Pontchartrain Basin. It is fair to say that without these funds, State and local government will fall far short of the amount required to fund this enormous undertaking and come into compliance with Federal water quality standards.

Mr. President, this legislation is an enormous undertaking of great national and regional significance. It is estimated that restoration of Lake Pontchartrain will directly produce at least 1,000 jobs locally and will have economic benefits of at least \$750 million. Under this criteria, the restoration project which we propose today more than pays for itself in ancillary economic, as well as social benefits.

Mr. CHAFEE. Mr. President, I rise in strong support of H.R. 6167, the Water Resources Development Act of 1992. The bill is the authorizing legislation for the Army Corps of Engineers water resources program. I would like to thank Senator MOYNIHAN, the chairman of the Environment Committee and Senator SYMMS, the ranking member of the Water Resources Subcommittee for their tireless efforts in crafting this bill. The effort has paid off, and I might add, the administration supports the bill strongly. I would also like to thank Ms. Nancy Dorn, the Assistant Secretary of the Army, Civil Works, Dr. G. Edward Dickey, Acting Secretary of the Army, Mr. Morgan Rees, Deputy Assistant Secretary, and

Mr. James Rausch, chief of the legislative initiatives branch at the corps. Without their work and desire to negotiate a compromise, we would not have H.R. 6167 before the Senate.

H.R. 6167 represents a continuation of the Environment Committee's commitment to report authorizing legislation for the Army Corps of Engineers civil works program on a biennial basis. As you may know, Mr. President, the 1970's and early 1980's saw a departure from the previous practice of approving omnibus authorization bills and predictable appropriations for the construction of water projects. In 1986, however, Congress broke the logjam. After years of legislative-executive policy confrontations over the role of the Federal Government in water policy, the 99th Congress approved the Water Resources Development Act of 1986.

The 1986 act was truly landmark legislation in the area of water policy and formed the basis of the Water Resources Development Acts of 1988 and 1990 and the bill before us today. Most importantly, the 1986 act contains the framework for local cost-sharing of Army Corps of Engineer projects. I support that framework wholeheartedly, and I might add, the intent of cost-sharing is not to prevent the construction of a particular project, but rather to recognize our limited Federal resources and the financial responsibility of local project sponsors. The 1986 act has brought a sense of fiscal sanity to the authorization and appropriation process.

As the Environment Committee moved forward to enact legislation this year, we remained faithful to the provisions of the 1986 Act. The bill includes 22 major cost-shared water resources projects from across the country. These include critical construction at Locks and Dams Nos. 2, 3, and 4 on the Monongahela River in Pennsylvania, navigation improvements at Sargent Beach in Texas, and the environmental restoration of the Kissimmee River in Florida. In addition, the bill includes provisions for the beneficial use of dredge material and a corps review of the regulations dealing with local sponsors' ability to pay for flood control projects.

Mr. President, H.R. 6167 is balanced legislation incorporating the Nation's water-related infrastructure needs with a focus on environmental protection. Again, I would like to praise the efforts of Senator MOYNIHAN and Senator SYMMS and urge my colleagues to support the bill.

Mr. SMITH. Mr. President, earlier this year the Environment and Public Works Committee reported S. 2734, the Water Resources Development Act, with an amendment that caused great concern to all our Nation's ports and harbors, as well as the Environmental Protection Agency [EPA] and the Army Corps of Engineers. This con-

troversial amendment, relating to contaminated sediments and ocean dumping activities, has been sufficiently modified to address most of the concerns voiced by port authorities and the Corps of Engineers. What we have before us is a compromise version of both Senate and House bills.

Although I will not oppose enactment of this legislation, I still have reservations with language regarding the permanent designation of disposal sites that could have a detrimental impact on Portsmouth Harbor and the New Hampshire Port Authority. EPA and the Corps of Engineers must exercise their responsibility in a timely manner to permanently designate these sites, particularly in the case of northern New England.

It is my understanding that the chairman, ranking member and other members of the Environment and Public Works Committee do not intend to hamper, impede or shut down New Hampshire's dredging activities by proposing these provisions. However, it will be important for Congress to monitor the implementation of this legislation and ensure that dredging activities are not negatively affected.

Mr. President, I will conclude by stating that I hope EPA will take its responsibility seriously and start addressing the needs of Portsmouth Harbor and other harbors around the country without congressional intervention.

Mr. WARNER. Mr. President, as a member of the Committee on Environment and Public Works, I am pleased to support the Water Resources Development Act of 1992 which authorizes many needed flood control, hurricane protection, and erosion control projects for the Corps of Engineers to undertake in Virginia.

Full credit for bringing this legislation to the Senate today goes to my distinguished chairman, Senator MOYNIHAN, my good friend and ranking member, Senator CHAFEE and their staffs. Without their dedication and perseverance in working with members of the House Committee on Public Works and Transportation to put together this responsible package, the congress would not have maintained the 2-year authorization cycle for the civilian programs the U.S. Army Corps of Engineers.

For Virginia, the 2-year cycle which Congress has kept since 1986 is important to local governments—who provide a minimum of 25 percent of the cost of these projects—as they attempt to meet their cost-sharing obligations.

Mr. President, it is no exaggeration that these projects are vital to protecting the lives and property of Virginians from the violent storms which have devastated our State. Since the treacherous Hurricane Camille in 1969, Virginia has been prone to flash flooding, hurricanes, and coastal storms which

have taken the lives of 166 persons and left damages totalling \$1.7 billion.

Virginia has seen much progress since the passage of the 1986 landmark water resources legislation which broke the decade-long stalemate over the financing of these projects and established responsible cost-sharing principles. A project that I was dedicated to since coming to the Senate—the deepening of the Hampton Roads Channel—has been completed. We have also completed, or have under construction, life-saving flood control projects for the cities of Virginia Beach, Richmond, and Roanoke. We have stabilized severe erosion at Tangier Island which threatened the very existence of the island and their unique way of life.

This water resources legislation is also extremely important to Virginia localities who are committed to providing significant financing to see that the projects authorized in this legislation become a reality. I am pleased that this bill provides a new authorization for hurricane protection for the Sandbridge area of Virginia Beach, project modifications for hurricane protection along the resort area of Virginia Beach, a navigation project for Tangier Island, and assistance for combined sewer overflow projects in Richmond and Lynchburg.

Mr. President, again I extend my congratulations to Chairman MOYNIHAN and Senator CHAFEE for addressing many complex water resource issues and for bringing before the Senate a good bill which provides needed protection to many Virginia communities.

#### THE MOREHEAD CITY CHANNEL DEEPENING PROJECT

• Mr. HELMS. Mr. President, I am pleased that H.R. 6167 contains an authorization for a project at the Morehead City Port in Morehead City, NC. This project will deepen the harbor which will allow more deep draft vessels to call on the port.

While I am grateful that this authorization has been included in this bill, there is a technical problem with the description of the project's specifications found on pages 17 and 18 of the Senate Committee report for S. 2734.

The committee report says:

Recommended Plan-Channel improvement to 45 feet from existing 40-foot depths and extending the channel to 4,300 feet and deepening the turning basin to 45 feet.

I understand it was the intent of the managers that the authorization for this project conform to the specifications in the report issued by the Chief of Engineers dated May 21, 1991. That report called for deepening to 45 feet all portions of the inner harbor that are presently at 40 feet, deepening to 47 feet the entrance channel that is presently at 42 feet. In addition, the report calls for extending the channel approximately 4,300 feet to deep water, enlarging the turning basin to 1,350 feet from 1,200 feet, and deepening the

turning basin to 45 feet from 40 feet, adding three channel widenings on the northernmost part of range A ocean bar channel, and Federal assumption of maintenance on the northwest leg and east leg extension.

So that the legislative record can be made clear, I have a question which I would pose to the managers of the bill: Is it the intent of the managers that this authorization conform to the specifications in the report issued by the Chief of Engineers?

Mr. MOYNIHAN. Mr. President, that is correct.

Mr. CHAFEE. Mr. President, that is correct.

Mr. HELMS. Mr. President, I thank the managers of the bill and ask for unanimous consent that relevant sections of the report of the Chief of Engineers be inserted at the end of my remarks.

Mr. HELMS. Mr. President, I thank the Chair and yield the floor.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF THE ARMY,  
Washington, DC, May 21, 1991.

CECW-PM (10-1-7a)

Subject: Morehead City Harbor, North Carolina.

THE SECRETARY OF THE ARMY: I submit for transmission to Congress my report on Morehead City Harbor, North Carolina. It is accompanied by the reports of the Board of Engineers for Rivers and Harbors and the district and division engineers. These reports are in final response to a resolution adopted 8 August 1984 by the Committee on Public Works and Transportation of the United States House of Representatives. The Committee requested the Board of Engineers for Rivers and Harbors to review the report of the Chief of Engineers on Morehead City Harbor, and other pertinent reports, with a view to determining whether any modifications therein are advisable at the present time, with a particular view toward deepening and enlarging the existing navigation project. Preconstruction engineering and design activities for the Morehead City Harbor project are being continued under authority provided by the 8 August 1984 resolution.

2. The district and division engineers considered various plans to solve the navigation problems at Morehead City Harbor. The reporting officers recommend deepening the entrance channel from 42 feet to 47 feet (including a 2-foot allowance for wave action), deepening the main harbor channel from 40 feet to 45 feet, enlarging the existing turning basin to a diameter of 1,350 feet, widening a 3,400-foot-long portion of the entrance channel from 400 feet to 650 feet, and assuming Federal maintenance of the northwest leg and east leg extensions of the main harbor channel.

3. The report has been reviewed by the Washington Level Review Center (WLRC). The review indicates that the proposed project complies with applicable U.S. Army Corps of Engineers planning procedures and regulations. However, WLRC determined that benefits attributed to future shipment of coal were inadequately supported and should be deleted from the analysis. Even without coal benefits, WLRC finds that the recommended harbor modification is eco-

nominally justified and environmentally and socially acceptable and that it is the national economic development plan.

4. The Board of Engineers for Rivers and Harbors concurs in the views and recommendation of the reporting officers and the review conclusions of WLRC. At October 1990 price levels, the first cost of the improvement is estimated at \$9,620,000, of which \$6,096,000 would be Federal. Based on a 50-year period of analysis, an interest rate of 8-3/4 percent, and excluding coal benefits, the estimated annual benefits and costs would be \$3,069,000 and \$1,839,000, respectively, yielding a benefit-cost ratio of 1.7.

5. I concur in the findings and recommendation of the Board.

6. The recommendation contained herein reflects the information available at this time and current departmental policies governing formulation of individual projects. It does not reflect program and budgeting priorities inherent in the formulation of a national civil works construction program nor the perspective of higher review levels within the executive branch. Consequently, the recommendation may be modified before it is transmitted to the Congress as a proposal for authorization and implementation funding. However, prior to transmittal to the Congress, the State of North Carolina, interested Federal agencies, and other parties will be advised of any modifications and will be afforded an opportunity to comment further.

H. J. HATCH,  
Lieutenant General, USA,  
Chief of Engineers.●

Mr. CHAFEE. Mr. President, I am pleased that the bill before us, H.R. 6167, contains a provision I authored to provide relief to the local sponsor of the southeast light project in Block Island, RI. As you know, the southeast light is an historic structure located on the edge of an eroding bluff in Block Island. The light is in serious danger of toppling into the ocean. This provision will do much to speed up the pace of the relocation project. Section 357 of the bill states:

The non-Federal share of the cost of relocating the lighthouse shall be \$970,000. Administrative costs of the Army Corps of Engineers in carrying out this section shall not be treated, for purposes of this section, as costs of relocating the lighthouse and shall not be paid from amounts appropriated to carry out this section.

In effect, this provision will allow the Army Corps to award the relocation contract without additional Federal appropriations. Mr. President, is that in fact the understanding of the provision?

Mr. MOYNIHAN. That is correct. I am well aware of the situation at the light. The corps has balked at awarding the relocation contract due to a prohibition on spending in excess of \$970,000 on the project. This provision removes that prohibition and directs the corps to disregard internal administrative expenses associated with the project. The intention of the Congress is that additional appropriated money for relocation will not be required to move the project forward. The corps now has the authority to award the contract under the current cost estimates.

Mr. CHAFEE. I thank the chairman for this clarification.

The bill (H.R. 6167) was deemed read the third time and passed.

#### THE TELECOMMUNICATIONS AUTHORIZATION ACT OF 1992

Mr. FORD. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of H.R. 6180, the Telecommunications Authorization Act of 1992, just received from the House, that the bill be deemed read three times, passed, the motion to reconsider laid upon the table.

THE PRESIDING OFFICER. WITHOUT OBJECTION, IT IS SO ORDERED.

#### THE NTIA AUTHORIZATION BILL

Mr. HOLLINGS. I rise in support of H.R. 6180, the National Telecommunications and Information Administration [NTIA] authorization bill. NTIA serves as the primary adviser to the President on telecommunications policy. NTIA plays a vital role in setting and coordinating the nation's telecommunications policy. This role is becoming more difficult. Advances in telecommunications technology raise new policy issues before the old issues have been resolved. The precedents and traditions of the past will no longer serve us in the future. Each issue requires an independent review; each problem a fresh look.

Senator INOUE has worked hard to craft this consensus substitute amendment to reauthorize NTIA. I am pleased to join him in supporting this amendment and urge my colleagues to vote for H.R. 6180.

Mr. INOUE. Mr. President, I rise to support H.R. 6180, the Telecommunications Authorization Act of 1992. This bill includes the authorization for the National Telecommunications and Information Administration [NTIA] within the Department of Commerce. I have worked with the chairman of the Commerce Committee, Senator HOLLINGS, and the minority leader of the Commerce Committee, Senator DANFORTH, in crafting this bill with my House colleagues.

This bill contains a number of provisions that should aid the NTIA in the performance of its functions. The bill also contains a number of provisions relating to the functions of the Federal Communications Commission [FCC] that were initially contained in the FCC authorization bill. The substitute also contains a few additional provisions. I do not believe that these provisions are controversial. I welcome and encourage my colleagues support for final passage of this bill.

Let me summarize the major provisions of the House bill. First, the bill reauthorizes funding for the National Telecommunications and Information Administration [NTIA] for fiscal years 1992 and 1993. NTIA fulfills a valuable role as an independent, unbiased ad-

viser to the President on communications policy. I expect NTIA to continue to maintain that independence and to consider all points of view in making its recommendations.

The bill retains the authorization figure for fiscal year 1992 of \$17,500,000, the same amount appropriated for that year. The substitute increases NTIA's authorization amount for fiscal year 1993 to \$17,900,000, which reflects the amount contained in the appropriated bill that has passed Congress and that is expected to be signed into law shortly. While I had hoped that NTIA could receive greater funding to provide telecommunications assistance to Eastern Europe and to promote new spectrum-based technologies, the appropriated amounts are consistent with the need to exercise fiscal responsibility.

The bill also reauthorizes the Peacesat Program, which was first authorized in the NTIA authorization bill for fiscal years 1988 and 1989. NTIA has made substantial progress in reestablishing the Peacesat Program. It has secured the agreement of the National Oceanic and Atmospheric Administration to use a GOES satellite for the Peacesat Program. It has also installed several earth terminals in the Pacific for the purpose of providing the Peacesat service. Because of these successful efforts, the Peacesat Program will once again provide the only means by which many island communities can maintain contact with the developed world. We expect NTIA to continue to monitor the administration of the Peacesat Program to ensure that additional Earth terminals are installed in the Pacific region and that the Peacesat Program continues to expand. We also expect NTIA to continue its efforts to locate and contract for additional satellite capacity necessary to replace the GOES satellite beyond the end of 1994.

This bill also amends the findings for the Peacesat Program to clarify that Peacesat may engage in negotiations to use the satellite facilities of foreign-owned satellites as long as control over the operation of the Peacesat Program remains based in the United States.

This bill also includes an additional authorization of \$1 million in funding to the Secretary of Commerce to convene, along with the Secretary of Health and Human Services, a panel to consider ways of satisfying the needs of rural health care providers for enhanced telecommunications facilities and services. This provision is based upon a report released 2 years ago by the Office of Technology Assessment [OTA] that details the severe difficulties faced by rural health care providers, especially nurse practitioners, in keeping up with the latest advances in medical science.

The report makes clear that the lack of adequate telecommunications facilities makes it very difficult for rural

health practitioners to provide health care using the same advanced and essential information that is available to those serving the urban areas.

This provision is supported by the National Rural Health Association and Senator BURDICK. This provision is identical to the provision passed as part of the NTIA authorization bill in the 101st Congress. NTIA did not convene the rural health panel or conduct the study required by that bill. I expect that NTIA will find a way to comply with this provision in the coming year.

This legislation also authorizes funding for the National Endowment for Children's Educational Television. The endowment was created to provide funding for educational and instructional television programs. The House bill authorizes \$5 million in funding for fiscal year 1993 and \$6 million in funding for fiscal year 1994. These are the same amounts contained in the Senate bill as introduced. Although the amount of funds actually appropriated for fiscal year 1993 is less than \$5 million, it is my hope that we can fully fund this program in fiscal year 1994.

Also, the House bill includes provisions to encourage the Federal Government to make more efficient use of the spectrum. Many Federal Government agencies received licenses to use the spectrum several years ago, before new innovative spectrum technologies had been developed. For example, trunking and narrowband technologies were developed many years ago, but have only recently been implemented by some Federal users and others have not instituted trunking at all.

I understand that NTIA is currently considering proposals for Federal users to move to trunking technologies, and I encourage such proposals to be deployed on a wide scale. This language, which the NTIA supports, would explicitly recognize that NTIA should promote spectrum efficiency, that it has the authority to withhold or deny frequency assignments in order to further that goal, and that NTIA must develop a plan to adopt more spectrum-efficient technologies for mobile radio users.

The House bill also incorporates two provisions included in the NTIA authorization bill, H.R. 3031, that passed the House last year. The first would give statutory recognition to the NTIA. Currently, NTIA derives its operating authority from an executive order of the President. The bill simply codifies that Executive order. In addition, the bill codifies recommendations made by the NITA in its report on spectrum regarding the need for public participation and openness in the proceedings of the Intergovernmental Radio Advisory Committee.

The following provisions that are currently included in the FCC authorization bill, S. 1132, are also included, with some modifications, in the House bill:

First, the FCC's travel reimbursement program is reauthorized until 1994.

Second, the language to encourage negotiations for the Hawaii monitoring station is reauthorized for 2 additional years.

Third, the FCC's authority to issue refunds is expanded slightly to cover cases where rates decline but do not decline enough. As stated in the House report accompanying the FCC authorization bill, this authority is not intended to be used retroactively against the telephone companies.

Fourth, the FCC is given the authority to allow electronic filing of applications.

Fifth, broadcasters may employ automated technology rather than licensed operators in response to new technological developments.

Sixth, the statute of limitations for forfeiture proceedings is amended to correspond with the terms of broadcast licenses.

Seventh, aggregators of operator services traffic must comply with standards regarding emergency ("911") calls.

Eighth, the FCC is permitted to receive gifts and bequests as long as the receipt does not create conflict of interest or an appearance of a conflict of interest.

Ninth, low-Earth-orbit satellite systems are required to pay fees similar to the fees paid by other satellite systems.

Tenth, the FCC's Older Americans Program is extended for 2 additional years.

The language in the FCC authorization bill concerning the licensing of consortiums is not included in this substitute. Not including this provision is intended to cast no judgment on the question of whether the FCC already has this authority or not. The question of the FCC's authority to require consortiums under the Communications Act is currently before the courts, and this legislation does not resolve that question.

Finally, the House bill includes several new provisions. These provisions are as follows:

First, NTIA shall prepare a report on the role of telecommunications in crimes of hate and violent acts against ethnic, religious, and racial minorities. In preparing this report, I do not intend that NTIA or any other Government official should violate the privacy rights of those who use communications, or become involved in monitoring the content of communications. The provision is drafted to require NTIA to analyze and report on information concerning these activities. I encourage NTIA to draw mainly upon published and other publicly available information in conducting its study in order to avoid excessive governmental interference in the content of commu-

nications. Although NTIA may request information from communications entities, these communications entities may refuse to provide such information if releasing such information would affect the privacy interests of communications users. I have no intention that NTIA or any Government official should pressure communications entities to gather information concerning the use of their facilities that they would not otherwise gather in the normal course of their business practices.

Second, the FCC is given the authority to assess fines against tower owners as well as radio licensees in the case of towers that do not comply with the FCC's tower requirements.

Third, the FCC shall report to Congress 30 days prior to authorizing any transfer of a television broadcast license involving a corporation organized pursuant to the Alaska Native Claims Settlement Act.

Fourth, the FCC shall make efforts to reduce telephone rates for Armed Forces personnel in foreign countries.

Fifth, the FCC shall adopt a standard for AM radio.

I strongly urge my colleagues to give their support to this bill.

#### CELLULAR COMPETITION

Mr. BRYAN. Mr. President, I would like to engage the senior Senator from Hawaii and chairman of the Communications Subcommittee in a brief colloquy. In July, the subcommittee held a hearing on mobile communications. The testimony received in that hearing raised numerous questions about the degree of competition in the cellular industry and whether the absence of vigorous competition may result in consumers being overcharged for these services.

The General Accounting Office conducted a study on cellular competition which was released at the hearing, and it, too, seriously questioned the Federal Communications Commission's approach to the industry. The study found that FCC policies allowing only two licensees in each market leads to limited competition which could be producing artificially high service rates.

I am troubled by the FCC's decision not to collect any data on cellular market performance. Due to the FCC's unique two-carrier regulatory structure for cellular, the agency at a minimum should closely monitor how this industry operates. Without such a check, the Commission cannot gauge whether its approach is providing real price competition.

Mr. INOUE. I appreciate the comments of my friend from Nevada. I also was struck by how little the FCC monitors this industry, particularly given its unusual regulatory approach to cellular. With the cable industry's problem fresh in our minds, we need to make certain that consumers are benefiting from competition or, in its absence, from regulation of this market.

Mr. BRYAN. I thank the chairman for those thoughts. Las Vegas, the largest city in Nevada, has the highest rate of cellular service penetration in the country. Consumers in my State and elsewhere deserve some measure of confidence that they are paying fair rates for this service. I would hope that as the FCC sets its priorities for next year it will pay particular attention to collecting and making available to the public all information relevant to the cellular policy debate.

Mr. INOUE. I heartily agree with the Senator's view. The FCC's mere reliance upon the future deployment of so-called emerging technologies to provide the competition necessary to drive down cellular rates does little to help cellular customers in the short run. I also hope that the Commission will examine a full range of policy options for mobile services to address these concerns.

Mr. BRYAN. I thank the distinguished chairman and look forward to working together on these matters. Mr. President, I yield the floor.

Mr. DANFORTH. Mr. President, I strongly object to a provision in H.R. 6180, the Telecommunications Authorization Act of 1992, which permits the Federal Communications Commission to accept gifts and bequests. I have agreed to allow this bill to be considered by the Senate, despite my serious reservations, because the bill contains provisions which are important to my colleagues, and we have no option but to pass the House bill at this late hour.

I believe that a regulatory agency should not be permitted to accept gifts from those entities which it regulates under any circumstances. I believe this provision has a certain aroma. I have reluctantly agreed to lift my hold on this bill if certain conditions are met.

The gift and bequest provision in H.R. 6180 requires the FCC to engage in a rulemaking to promulgate regulations which would preclude acceptance by the Commission of any gift, donation, or bequest that would create even the appearance of a conflict of interest. Along with others, I am sending a letter to the Chairman of the FCC requesting that the public comment period for such rulemaking be of at least 90 days duration, and that it will occur in its entirety during a period in which the Congress is in session. The Committee on Commerce, Science, and Transportation will conduct a hearing on this matter during that period, and would like to be certain that the committee's views are included in the FCC's record.

The letter makes clear that it is our intent that the FCC be permitted to accept no gift, donation, or bequest from any person, entity, or any affiliate of an entity that is regulated by, or has any matters before, the Commission. The letter states that the acceptance of items of value, even if uncondi-

tional, from such persons or entities creates an automatic and inherent conflict of interest.

The letter also states that it is our intent that the Commission would be unable to accept any gifts, donations, or bequests until the rulemaking required by section 4(g)(3) of the Communications Act of 1934 (47 U.S.C. 154(g)(3)), as amended by the Telecommunications Authorization Act of 1992, is completed.

It is my firm belief that the Commerce Committee must maintain careful oversight of the implementation of this provision, and I intend to make every effort to ensure that the committee undertakes that task.

The bill (H.R. 6180) was deemed read the third time and passed.

#### CORRECTIONS IN THE ENROLLMENT OF H.R. 429.

Mr. FORD. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of House Concurrent Resolution 382, just received from the House, that the concurrent resolution be agreed to and the motion to reconsider laid upon the table.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### CORRECTING THE ENROLLMENT OF H.R. 429

Mr. FORD. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of Senate Concurrent Resolution 142, a concurrent resolution to direct the Clerk of the House to make additional corrections in the enrollment of H.R. 429, submitted earlier today by Senator JOHNSTON; that the resolution be agreed to and the motion to reconsider laid upon the table.

The PRESIDING OFFICER. Without objection, it is so ordered.

The concurrent resolution was considered and agreed to as follows:

#### S. CON. RES. 142

*Resolved by the House of Representatives (the Senate concurring), That in the enrollment of the bill (H.R. 429) to amend certain Federal reclamation laws to improve enforcement of acreage limitations, and for other purposes, the Clerk of the House of Representatives shall make the following additional corrections:*

In section 3004(b), delete "eighteen" and insert in lieu thereof "twenty-two".

Amend section 212 to read as follows:

#### SEC. 212. CROPS FOR WHICH AN ACREAGE REDUCTION PROGRAM IS IN EFFECT.

Notwithstanding any other provision of law relating to a charge for irrigation water supplied to crops for which an acreage reduction program is in effect, until the construction costs of the facilities authorized by this title are repaid, the Secretary is directed to charge an acreage reduction program crop production charge equal to 10 percent of full cost for all water delivered by the Central Utah Water Project, as defined in section 202

of the Reclamation Reform Act of 1982 (43 U.S.C. 390bb), for the delivery of project water used in the production of any crop of an agricultural commodity for which an acreage reduction program is in effect under the provision of the Agricultural Act of 1949, as amended, if the total supply of such commodity for the marketing years in which the bulk of the crop would normally be marketed is in excess of the normal supply as determined by the Secretary of Agriculture. The Secretary of the Interior shall announce the amount of the acreage reduction program crop production charge for the succeeding year on or before July 1 of each year.

#### NEZ PERCE NATIONAL HISTORICAL PARK

Mr. FORD. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on H.R. 2032.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

*Resolved, That the House agree to the amendments of the Senate numbered 1, 2, and 3 to the bill (H.R. 2032) entitled "An Act to amend the Act of May 15, 1965, authorizing the Secretary of the Interior to designate the Nez Perce National Historical Park in the State of Idaho, and for other purposes."*

*Resolved, That the House agree to the amendment of the Senate numbered 4 to the aforesaid bill, with the following Amendment:*

Page 1, strike out line 6 and all that follows through page 2, line 2 and insert:

(3) In section 3, strike the proviso in the first sentence and insert in lieu thereof the following: "Lands or interest therein owned by a State or political subdivision of a State may be acquired under this section only by donation or exchange. In the case of sites designated as components of the Nez Perce National Historical Park after November 1, 1991, the Secretary may not acquire privately owned land or interest in land without the consent of the owner unless the Secretary finds that—

"(1) the nature of land use has changed significantly or that the landowner has demonstrated intent to change the land use significantly from the condition which existed on the date of the enactment of the Nez Perce National Historical Park Addition Act of 1991;

"(2) the acquisition by the Secretary of such land or interest in land is essential to assure its use for purposes set forth in this Act; and

"(3) such lands or interests are located:

"(A) within an area depicted on Sheet 3, 4, or 5 of the map entitled 'Nez Perce Additions', numbered 429-20018, and dated September 1991, or

"(B) within the 8-acre parcel of Old Chief Joseph's Gravesite and Cemetery, Oregon, depicted as 'Parcel A' on Sheet 2 of such map."

Mr. FORD. Mr. President, I move that the Senate concur in the House amendment.

The PRESIDING OFFICER. The question is on agreeing to the motion. The motion was agreed to.

Mr. FORD. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. SIMPSON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ADAMS. Mr. President, I am pleased to join with my colleague Senator HATFIELD in urging passage of H.R. 2032, the Nez Perce Park Additions Act of 1992. This bill answers many years of prayers from the Nez Perce Tribe who have sought a means of providing additional protection for their sacred sites, graveyards, and historic battlefields located throughout the Pacific Northwest. To even begin to understand the significance of this legislation to the Nez Perce people, it is necessary to revisit events and chapters in our history that contain many painful memories for a tribe that is known for having assisted the Lewis and Clark Expedition in 1803, and for having gone to great lengths to avoid a war that was forced upon them in 1877.

In April 1879, the North American Review published a statement entitled, "An Indian's View of Indian Affairs" containing the words of Chief Joseph of the Nez Perce, one of the great figures of Northwest history. He stated:

I want the white people to understand my people. Some of you think an Indian is like a wild animal. This is a great mistake. I will tell you about our people, and then you can judge whether an Indian is a man or not. I believe much trouble and blood would be saved if we opened our hearts more \* \* \*.

[On his deathbed my father said:] "My son, never forget my dying words. This country holds your father's body. Never sell the bones of your father and mother." I pressed my father's hand and told him I would protect his grave with my life. My father smiled and passed away to the spiritland.

I buried him in that beautiful valley of winding waters. I love that land more than all the rest of the world. A man who would not love his father's grave is worse than a wild animal \* \* \*.

Several weeks ago, I had the pleasure of meeting with Joe Redthunder, the oldest surviving member of the Chief Joseph Band of Nez Perce Indians. He had come to Washington on a midnight flight to make one final appeal that we pass H.R. 2032, the Nez Perce park additional bill. This legislation will add 14 additional historically significant sites located throughout the Pacific Northwest to the existing Nez Perce National Park, which presently includes only sites located in the State of Idaho. Most prominent among those proposed additional sites are the gravesite of Old Joseph at Wallowa Lake, OR, the Young Chief Joseph campsite and grave at Nespelem, WA, and the battle sites located along the Big Hole River and in the Bear Paw Mountains of Montana.

Similar legislation, S. 2804, passed the Senate in the waning days of the 101st Congress, but was not acted upon in the House. On March 1, 1991, I was pleased to join with Senators HATFIELD, BAUCUS, CRAIG, BURNS, and SYMMS in reintroducing the legislation, S. 550, which was reported unanimously by the Senate Energy and Natural Resources Committee on July 17, 1991.

H.R. 2032 passed the House last year, was amended in the Senate and returned to the House where it was further amended and sent back to the Senate. Today, the Senate of the United States honors the request of 84-year-old Joe Redthunder, Chief Joseph's great-grandnephew by passing H.R. 2032 and protecting the graves of his ancestors and the other hallowed places that earned Chief Joseph and the Nez Perce a special place in our Nation's history.

In light of the fact that our Nation is embarked upon a yearlong celebration of the 500th anniversary of the arrival of Columbus in North America, I believe this legislation has special importance and significance. In addition, under the prime sponsorship of Senator HATFIELD, the U.S. Senate passed Senate Joint Resolution 217 asking the President to declare 1992 "The Year of the American Indian". As Senator HATFIELD so eloquently stated in his floor statement introducing Senate Joint Resolution 217, " \* \* \* the 500th anniversary of the discovery of the new world is the perfect opportunity to reflect on the countless contributions made to America by the Indian community. Reflections on history, however, must often include examinations of unpleasant events."

In passing this legislation this evening we provide the President of the United States with the historic opportunity to sign the Nez Perce Park Additions Act of 1992. That occasion will finally bring closure to a long and sad saga for the Joseph Band of Nez Perce Indians. And it will demonstrate that the U.S. Senate took the time to reflect upon those unpleasant events that gave rise to the Nez Perce war of 1877 and led to the banishment of the Joseph Band from their homeland.

The Nez Perce war of 1877 was the last major military engagement between the United States and a native American tribe. After being forcibly evicted from their ancestral lands near Wallowa Lake in present day Oregon, the Joseph Band embarked upon an epic flight for survival that began with the White Bird Battle on June 17, 1877, and ended 115 years ago today, on October 5, 1877 at the Bear Paw Battle. On that later date, only 40 miles from Canada, Chief Joseph and 86 men, 184 women, and 147 children surrendered to Col. Nelson A. Miles after being assured they would be returned home. Chief Joseph stated:

It is cold and we have no blankets. The little children are freezing to death. My people, some of them, have run away to the hills, and have no blankets, no food. No one knows where they are, perhaps freezing to death. I want to have time to look for my children, and see how many of them I can find. Maybe I shall find them among the dead. Hear me, my chiefs! I am tired. My heart is sick and sad. From where the Sun now stands I will fight no more forever.

Joseph and his band endured 8 years of exile in Kansas and Oklahoma,

where many died as a result of the harsh, unfamiliar climate. During those years, Chief Joseph never gave up his hope of returning to the Wallowa Valley, to be near the graves of his father and ancestors. Joseph visited Washington, pleading his cause to President Rutherford B. Hayes in 1879, to no avail. The Joseph Band was finally returned to the Northwest in 1885, and were confined on the Colville Reservation in eastern Washington, never to return to the Wallowa Valley.

On November 11, 1903, Chief Joseph visited Seattle with his nephew Redthunder, the grandfather of Joe Redthunder. Speaking to students at my alma mater, the University of Washington, Chief Joseph said:

In my declining years, I long to return to my old home in Wallowa Valley, where most of my relatives and friends are sleeping their last sleep. I have repeatedly petitioned the Great Father in Washington to transfer myself and small band to our old home, that we may die in the Country, having so many tender memories. I have made frequent visits to Washington and have met many persons high in official life. They have all promised to render their assistance, but it has been wait, wait, wait.

On my last visit to the Capital City, I had the honor and pleasure of meeting President Roosevelt who treated me with much kind consideration. He assured me that a committee would be sent out to investigate my conditions and surroundings. This committee was to be at my home last July but they have not yet come. This is but one instance of the duplicity shown me by the Government. I hope you will be able to help me and render me what assistance you can in securing long delayed justice. To return to Wallowa Valley, is a wish I cherish very dearly. That is all.

Chief Joseph's final wish was never realized, for he died at his camp at Nespelem on September 21, 1904, 88 years ago this past Monday. Through all those years of hardship and exile, he never forgot the promise made to Old Joseph on his deathbed. Although the graves of Young Joseph and Old Joseph are now located in two different States, the land remains sacred to their memory, and worthy of the special recognition and protection that will be provided under H.R. 2032.

Mr. President, I compliment my good friend and colleague, the senior Senator from Oregon, Mr. HATFIELD for working to break the impasse that threatened to prevent passage of H.R. 2032. I know that Joe Redthunder, together with Nez Perce Tribal Council Vice Chairman Charles "Pete" Hayes, greatly appreciated the honor of meeting with Senator HATFIELD to discuss their mutual interest in the success of this legislative effort. In addition, the Senators from Idaho, Mr. SYMMS and Mr. CRAIG and the Senators from Montana, Mr. BAUCUS and Mr. BURNS, were generous with their time in meeting with Joe Redthunder during his recent visit. Their sponsorship of this legislation demonstrated the level of bipartisan cooperation that was critical to its success.

In closing, I want to express to the many members of the Nez Perce Tribe from Lapwai and Kamiah on the tribal reservation in Idaho, to the Joseph Band of Nez Perce and the Colville Tribe at "Nespelem, and to the citizens of Wallowa County, OR, my deep admiration for the years of hard work that made this day possible. H.R. 2032 reaffirms that the heroic struggle of "Hin mah too yah lat kekt," Young Chief Joseph, to preserve the grave of his father was not fought in vain. As the senior Senator from the State of Washington I am deeply honored to have been a part of this effort.

Mr. HATFIELD. Mr. President, I wish to express my support for H.R. 2032, the Nez Perce National Park additions bill. This bill is extremely important to the heritage of the Nez Perce people and to all Americans interested in conserving areas of extraordinary historic and cultural value.

I would like to take just a moment of the Senate's time to explain recent efforts to resolve differences about this bill. These differences revolved around two distinct approaches to the condemnation of private property containing significant public and cultural value.

The basic disagreement involved the power of condemnation. In my years as a freshman Senator, I had the distinct pleasure of knowing and serving with one of the Senate's most able constitutional scholars—Senator Wayne Morse. I gained much from the wisdom of Senator Morse, including his views regarding the power of condemnation. Senator Morse felt the power of condemnation—next to the power of taxation—is one of the Government's most powerful controls over individual lives.

While occasionally necessary, condemnation authority should be exercised almost always as a last resort, when all other efforts to resolve a resource management problem have failed. As a general principle, and one about which I feel very strongly, I apply three strict criteria to any decision to include condemnation authority in any congressional legislation:

First, the property in question must have significant public value;

Second, the owner of the significant property must be unwilling to sell, or earlier negotiations to sell the property have failed; and

Third, the property must be subject to an imminent threat of destruction or irreversible harm.

When Congress passed the Columbia River Gorge Scenic Area Act in 1986, limited condemnation authority was applied to certain scenically significant areas in a land area of approximately 183,000 acres. These significant areas were called special management areas [SMA's] and contained hundreds of parcels of federally and privately owned land of particular scenic, natural, cultural and recreational value to

the Columbia Gorge. On a number of these privately owned parcels of land, the threat of development was imminent. Therefore, I supported authorizing the condemnation power with respect to these lands, but only when all other efforts to protect them had failed, in order to protect the scenic and cultural integrity of the gorge.

As in the case of the Columbia Gorge, I applied the three strict criteria regarding condemnation to my decision to approve of the House of Representatives' version of the Nez Perce Park additions bill, which also contains limited condemnation authority.

The issue in the case of the Nez Perce parks legislation involved the ownership of lands on which the sacred gravesite of Chief Joseph of the Nez Perce Tribe is located. This land is now in private ownership, and the owners, at least until recently, were willing to sell those lands to the Federal Government for inclusion in the Nez Perce National Historical Park. Although no agreement on the price of the land at the gravesite had been reached, it was my view that so long as negotiations between a willing seller and the Government were underway, there was no need to authorize condemnation of the land.

This situation changed, however, when the property owner withdrew from the negotiations and informed the Government that the land would be subdivided and sold on the open market. This is a course which I cannot accept. Not only is the land owner no longer a willing seller, the cultural integrity of the gravesite is being threatened by the irreversible action of subdivision and development.

It is my duty to take whatever steps possible to preserve these lands so critical to the heritage of the Nez Perce people. I therefore offer my support to the House version of the Nez Perce Park additions bill, H.R. 2032, and will work with my colleagues in the House and the Senate to pass the bill as rapidly as possible.

#### COLVILLE INDIAN RESERVATION

Mr. GORTON. Concern has been raised by the Colville Confederated Tribe with respect to the impact passage of this legislation might have upon the use of trust lands located on the Colville Indian Reservation. Does this legislation, in any manner, alter the current status or use of any such land?

Mr. ADAMS. I have been made aware of those concerns as well, and I compliment my colleague for seeking this clarification. H.R. 2032 has no impact upon such land. For example, the gravesite of Chief Joseph, located in a traditional cemetery in Nespelem shall remain under the control of the Joseph Band of Nez Perce, a constituent band of the Confederated Tribes of the Colville reservation. Unless the band agrees to have the site included within

the park addition, it would remain inactive. In the absence of a cooperative agreement with the Joseph Band, the gravesite of young Joseph would not be included.

Mr. GORTON. Does this legislation contain any mechanism that could be used to force an agreement upon the Joseph Band or the Colville Tribe without their consent?

Mr. ADAMS. Absolutely not. There is no mechanism in this legislation to force any agreement upon the tribe or band. In fact, no site located anywhere in the State of Washington could be acquired without the consent of the property owner.

Mr. GORTON. Does this legislation contemplate participation by the Joseph Band of Nez Perce in developing other aspects of the expanded Nez Perce National Park?

Mr. ADAMS. My colleague is correct. The additional sites located in Oregon, Montana, and Idaho will be an important addition to the present park, now located solely within the State of Idaho. I understand that the Nez Perce tribe of Idaho today committed in writing their understanding that the Joseph Band would be consulted, and would participate in the interpretation of all other sites in the park system, with the exception of the sites located on the Nez Perce Reservation.

Mr. GORTON. I ask unanimous consent that a letter from the Nez Perce tribal executive committee to the Confederated Tribes of the Colville Reservation be made a part of the RECORD at this point.

#### TRIBAL EXECUTIVE COMMITTEE

October 7, 1992.

Re: Nez Perce park additions bill

EDDIE PALMATEER, JR.,

Chairman, Confederated Tribes of the Colville Reservation, Nespelem, WA.

DEAR CHAIRMAN PALMATEER: I am very concerned about the Nez Perce Park Additions Bill and its chances of passing this 102d Congress. The bill would authorize the National Park Service to designate specific sites significant to the history and culture of the Nez Perce people. The hold placed on the bill by Senator GORTON threatens to kill this bill. If this bill dies, it is highly unlikely we will be able to stop condominium development from encroaching upon the Old Joseph Monument site near Wallowa Lake. This has been our primary driving force in pushing this additions bill. I want to provide the following assurances to the Chief Joseph Band of Nez Perce and to the Confederated Tribes of the Colville Reservation:

1. Categorically and without exception, the Chief Joseph Band of Nez Perce will have complete and total purview over any sites designated under the Nez Perce National Historical Park within the boundary of the Colville Reservation. If the Chief Joseph Band of Nez Perce chooses not to establish any recognition of the sites, then the sites would remain inactive.

2. The Chief Joseph Band of Nez Perce on the Colville Reservation will be consulted and participate in the interpretation of all other sites of the park system, with the exception of those located within the boundary of the Nez Perce Reservation.

3. If the Chief Joseph Band of Nez Perce requests, the Nez Perce Tribe will support an amendment to the Nez Perce National Historical Park in the 103d Congress to remove the Washington State sites from the park system.

I hope this letter addresses your concerns.

Sincerely,

SAM PENNEY,  
Chairman, Nez Perce  
Tribal Executive Committee.

#### CONSOLIDATED FARM AND RURAL DEVELOPMENT ACT AMENDMENTS

Mr. FORD. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of H.R. 6129, Agricultural Credit Improvement Act of 1992, just received from the House, that the bill be deemed read three times, passed, and the motion to reconsider be laid upon the table.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CONRAD. Mr. President, it is my pleasure to present to the Senate the Agricultural Credit Improvement Act of 1992. This bill incorporates much of my bill, S. 3310, entitled the Agricultural Credit Amendments Act of 1992, which was designed to provide credit to beginning farmers and ranchers, as well as H.R. 4906, a similar bill in the House.

The bill before the Senate today establishes a down payment loan program under the Farmers Home Administration [FmHA]. Under this proposal, a beginning farmer or rancher who wishes to purchase land may receive a 10-year, low-interest FmHA loan for 30 percent of the value of that land if the beginning farmer provides a 10 percent down payment, and a commercial, cooperative or other lender makes a loan for the remaining 60 percent. When the beginning farmer or rancher has repaid the FmHA loan at the end of 10 years, he or she will have at least 40 percent equity in the land, which should provide an adequate asset base on which to obtain future private credit and operate a successful farm operation.

This bill also establishes a beginning farmer operating loan program which ensures a borrower a reliable source of FmHA-assisted operating credit for up to 10 years if the borrower develops and meets a long-term operating plan.

Mr. President, I would like to explain the intent of a number of provisions in this bill to guide the administration, in particular, the Department of Agriculture, in their interpretation of the provisions contained in the bill.

Federal-State beginning farmer partnership: Section 5 establishes a new partnership between the Farmers Home Administration [FmHA] and beginning farmer programs in the States. It is the intent of the committee that FmHA notify States of this new partnership as soon as possible after enactment. It is further the intent of the committee that FmHA respond quickly and posi-

tively to requests from a State beginning farmer program for assistance, including but not limited to down payment loans to be used in conjunction with State financing of the remainder of the loan and Federal guarantees of State aggie bond and other types of State beginning farm loans. The committee hopes that this change in policy will spur many additional States to revive or establish beginning farmer programs. With respect to the advisory committee on beginning farmers and ranchers, the committee encourages the Secretary to establish this group as quickly as possible, at no cost to the government if necessary, so that it can assist in developing the program and program regulations.

Down payment loan program: Section 7 establishes the time period for down payment loans at 10 years, or less at the option of the borrower. It is the intent of the committee that, should the need arise, the down payment borrowers will be subject to the same loan servicing and debt restructuring options as any other farm ownership borrower.

Special assistance to qualified beginning farmers and ranchers: Section 8 establishes a special assistance option for beginning farmer and ranchers that requires FmHA to provide assistance for a 10-year commitment period. Beginning farmers and ranchers may apply as regular operating loan borrowers, if they so choose.

This section also requires the applicant to submit a plan of farm operation. It is the intent of the committee that the Secretary, in coordinating this program with borrower training, loan assessment, supervised credit, and market placement, devise a single planning instrument to eliminate unnecessary paperwork.

This section also provides that the farm plan contain "specific goals that the applicant projects to meet in order to progress toward graduation as expeditiously as possible." It is the intent of the committee that such goals are to be guidelines for each individual borrower, with assistance from the Secretary, to progress toward graduation. The goal during the commitment period, is to move the borrower through the continuum of assistance, ranging from reduced interest rate direct loans, regular interest rate direct loans, subsidized guaranteed loans, and unsubsidized guaranteed loans, and ultimately graduation to private credit. Depending on the applicant's particular circumstances and farm plan, one or more of these options may be used during the commitment period. It is the intent of the committee that this process take place in conjunction with the loan assessment program established by the Food, Agriculture, Conservation, and Trade Act of 1990, Public Law 101-624. Section 8 limits beginning farmers and ranchers who choose to

participate in the special operating loans assistance program to not more than 8 years of direct loans within the 10-year commitment period. It is the intent of the committee that this limit does not preclude the borrower from receiving another 2 years of direct loans, if necessary, under the regular operating loan program, consistent with the overall graduation requirement in section 9.

This section also provides that the Secretary:

Shall revoke any commitment for assistance made to an applicant under this section if the operation of the applicant fails, for two consecutive years, to meet the goals specified in the plan, unless the failure is due to circumstances beyond the control of the applicant and has not materially reduced the likelihood of the operation becoming financially viable.

It is the intent of the committee that "goals specified in the plan" refers to the general financial and farm income goals identified in the plan, but does not include the details of the plan such as projections concerning crop selection, yields, production methods and practices, conservation measures, equipment, specific income and expense figures, specific credit needs, and farmsites. It is not the intent of the committee that production choices are locked in by the plan nor is the intent to the committee that income and credit projections will be used as an absolute measure of success.

Definition of qualified beginning farmer or rancher: Section 19 changes the current "majority of labor and management" test to "substantial day-to-day labor and management of the farm or ranch, consistent with the practices of the State or county in which the farm or ranch is located." This change is intended to apply only to beginning farmers and ranchers. The committee does not intend this change to apply to other applicants and does not intend to signal that any application of this change beyond this specific instance would be acceptable.

This section also establishes the definition of qualified beginning farmer or rancher to be applied to all farmer loan and inventory sale and lease programs. These requirements are in addition to, and do not supersede, existing eligibility requirements for each program. The committee intends that a farmer or rancher who previously farmed or ranches and is restarting in agriculture shall be considered a beginning farmer or rancher if they otherwise satisfy the terms of the definition.

This section applies the definition of qualified beginning farmer or rancher to all farm loan and inventory sale and lease programs. These requirements are in addition to, and do not supersede, existing eligibility requirements for each program. The committee intends that a farmer or rancher who previously farmed or ranches and is restarting in agriculture shall be consid-

ered a beginning farmer or rancher if they otherwise satisfy the terms of the definition.

Equal access to FmHA assistance by gender: The intention of section 21 is to take all feasible steps to ensure that there is no discrimination or perception of discrimination by gender in administering FmHA's farm loan programs.

It is the intention that this section will increase the number of farm ownership and operating loans made to female farmers. To meet current and future needs for credit, the managers expect that the Secretary will determine the current number of female farmers in each State and add to that number an estimated number reflecting the trend toward increased numbers of female farmers in the State, instead of setting the loan participation rates by gender at a static level.

This targeted rate of loanmaking by gender could be further adjusted as research data on the credit needs of female farmers, as well as recordkeeping on female farmer applicants by gender, becomes available.

Certified lender program and preferred lender program: In general, I am very pleased with this bill. However, it contains one provision which causes me great concern. Section 18 establishes a certified lender program, under which commercial or cooperative lenders, once certified, would receive approval or disapproval of guaranteed loan applications within 14 days. This program will expedite the guaranteed loan process. I support such a program, as long as it is implemented in a way that prevents lender abuse.

However, this provision also allows the Secretary to establish in 2 years a preferred lender program. Under this program, a lender certified by FmHA as a preferred lender who submits a guaranteed loan application would receive the guarantee if FmHA did not act on the application within 14 days. Mr. President, I believe that enactment of that program at this time is simply bad policy. I strongly opposed its inclusion in this bill.

This committee is aware of serious problems with FmHA's guaranteed loan program. The General Accounting Office has repeatedly reported that FmHA does not adequately review guaranteed loan applications nor verify financial information contained in them. After making guaranteed loans, it does not adequately monitor lenders to ensure that they are properly servicing the loan. It has shown that the program can be easily abused by lenders wanting to reduce their losses. This poor management of the program results in unnecessary losses, losses which I am gravely concerned will increase under the preferred lender program if improperly implemented.

I strongly believe that we must significantly improve FmHA's manage-

ment of the guaranteed loan program before we even consider allowing guaranteed loans to be made without FmHA's review. Without such improvement, this preferred lender program puts taxpayer's money at significant risk. If I am reelected, I intend to monitor implementation of the certified and preferred lender program very carefully to ensure that we do not create programs that make the Government vulnerable to abuse by lenders.

The language in section 18 makes clear that any loan under these programs is "subject to county committee certification that the borrower of the loan meets the eligibility requirements and such other criteria as may be applicable to loans guaranteed by the Secretary under the provisions of this title" and that the Secretary has the responsibility "to certify eligibility review financial information, and otherwise assess an application." It is the intent of the committee that no applicant determined to be ineligible by the county committee, and no applicant yet to be considered by the county committee, be permitted to have a loan guaranteed under either of these programs under any circumstances. It is further the intent of the committee that the Secretary thoroughly review each guaranteed loan application submitted by certified and preferred certified lenders to determine if the financial information is correct, and whether the borrower shows adequate repayment ability and has adequate collateral. It is the committee's intent that the Secretary ensure that guarantees are approved only for applications that are consistent with the agency's mission, rules and regulations.

Section 18 also requires the lending institution to make appropriate certifications "that the borrower is in compliance with all requirements of law, including regulations issued by the Secretary." It is the intent of the committee that such a certification by the certified or preferred lender is strictly limited to issues directly and substantially related to creditworthiness, repayment ability, and adequacy of collateral. Broader issues of compliance with laws and regulations not related to the loan and loan terms remain the responsibility of the Secretary.

I urge my colleagues to support passage of this bill.

The bill (H.R. 6129) was deemed read the third time and passed.

#### FEDERALLY SUPPORTED HEALTH CENTERS ASSISTANCE ACT OF 1992

Mr. FORD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of H.R. 6183, a bill to provide protection from legal liability for certain health care professionals, now at the desk, that the bill be read three times, passed, the motion

to reconsider be laid upon the table, and any statements thereupon appear in the RECORD at the appropriate place as though read.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KENNEDY. Mr. President, in passing the Federally Supported Health Centers Assistance Act of 1992, the Senate responds to an unusual aspect of the crisis in maternal and child health care that threatens to leave large numbers of low-income women and children without critically needed services. This measure enables community health centers to obtain malpractice insurance under the Federal Tort Claims Act, freeing up at least \$30 million during the first year to expand critically needed services.

Community and migrant health centers, the front-line providers of health care services for the poor, spend an incredible \$60 million a year on malpractice insurance—10 percent of their entire annual appropriation. The cost of malpractice insurance for some clinics has risen 30 to 40 percent in the last 2 years, and has increased fourfold in the last decade, even though many clinics have not paid a cent in malpractice claims. Under the Federal Tort Claims Act, the cost of malpractice will drop to about \$10 million a year for these clinics. In effect, this legislation is the equivalent of an additional \$50 million appropriation for the clinics.

Medical insurers treat the poor, especially pregnant women, as high malpractice risks because they often delay in seeking health care they cannot afford. Unlike private physicians, community health centers cannot pass the malpractice insurance costs on to their patients. Instead, clinics struggling to meet rising insurance premiums often find it necessary to cut back obstetrical and other services when they become too expensive.

By providing community health centers with malpractice coverage under the Federal Tort Claims Act, health centers will be able to attract qualified obstetricians and other physicians, and provide quality prenatal care to more low-income women. Savings to health centers under this legislation can also be used to expand services to children and provide vital postnatal health care, immunizations, health screening, and primary care.

In related legislation approved by Congress this week, one-stop shopping programs will be created to offer maternal and child health care services within community health centers. The savings gained through FTCA coverage will be targeted for this purpose. With such coverage, 250,000 more people can be served, with no additional cost to the Government.

By enacting this legislation, Congress is giving innovative and effective support to community health centers

to serve those who depend on them for access to basic health care. By delivering prenatal care and early childhood services, we will reduce infancy mortality rates among those at greatest risk for this tragedy.

The legislation extends Federal Tort Claim Act coverage to all full-time employees and contractors of community, migrant, and homeless health centers. It also authorizes the Department of Health and Human Services to establish a judgment fund sufficient to cover the cost of claims paid out under FCTA. The authorization allows up to \$30 million a year to be transferred for this purpose. However, the health centers have been paying more than \$60 million a year for their private sector malpractice premiums, despite the fact that their claims experience has been approximately \$5 million annually. Under FTCA coverage, the Federal Government will only be responsible for actual claims, which means that the legislation is likely to save the clinics approximately \$55 million a year.

These savings can make a major contribution to the all-important effort by the clinics to reduce infant mortality. Today, more than 20 percent of American children live in poverty—the highest rate in three decades. Although the United States spends more on health care than most industrialized nations, 14 million women of child-bearing age and 12 million children lack health insurance. On a typical day in America, 107 infants die, and 700 babies are born with birthweights so low that they are 40 times more likely to die in the first month of life.

The rate of infant mortality in this country is a national disgrace. The United States ranks 24th in the world in overall infant mortality, and the rate is even higher for minorities.

This tragedy is directly related to the lack of adequate prenatal health care. A woman who receives little or no prenatal care is more likely to have a low-birthweight child. Such infants are more likely to develop long-term physical and mental disabilities, to suffer delays in development and to have a range of other illnesses. For every infant who dies, 10 others are disabled for life—400,000 children a year.

As more and more women slip into poverty, access to essential prenatal health care has become increasingly difficult to obtain. The malpractice crisis, particularly in obstetrics, where the insurance premiums are astronomical, has become a major barrier to needed health care for hundreds of thousands of pregnant women, and the problem is especially serious for public health clinics. Our action today is a needed response to this unsatisfactory situation, and I commend all those who have worked with us to achieve this solution.

In particular, I commend Senator HATCH for his strong support for this

legislation, and for his commitment to community health center programs. I also commend Senator HEFLIN for his assistance in shaping this worthwhile legislation.

With Federal Tort Claims Act coverage, health centers can move forward in fulfilling their essential mission, providing needed health services to large numbers of Americans whose only doctor has too often been the hospital emergency room. The timely preventive care made possible by this legislation will save lives, save dollars, and create a healthier nation.

Mr. KOHL. Mr. President, though I recognize the valuable care that community and migrant health centers provide for our Nation's rural poor, I do want to express some reservations about H.R. 6183, the Federally Supported Health Centers Assistance Act of 1992.

The medical professionals who would benefit from this legislation are among America's most dedicated public servants. And the sad truth is that today they are forced to pay out far too much money for medical malpractice insurance—money that ought to be spent on more and better health care services. That is a serious problem, Mr. President, and it is a problem that Congress ought to move aggressively to solve.

I am concerned, though, about the measure's effect on patients of persons who would be covered by it. As I understand it, this bill would require victims of medical malpractice to bring lawsuits under the Federal Tort Claims Act [FTCA] rather than under State common law. The FTCA does not allow jury trials or punitive damages. This means that low-income patients who must go to community health centers for their medical care would not be granted the same free access to a jury trial as the more well off in our society. And it means that these same low-income patients would not be entitled to punitive damages in those cases where such damages are warranted. Finally, this legislation would require Federal Government to absorb all the costs of successful malpractice claims, and that is yet another financial burden we would place on the shoulders of our deficit-ridden Federal Government.

Mr. President, by its very language, H.R. 6183 sunsets on January 1, 1996. I hope that between now and then, Congress can explore other ways to reduce sky-high malpractice premiums for community health centers and ensure that those who most desperately need access to health care—the most vulnerable members of society—still have full redress for injury.

Mr. HATCH. Mr. President, I am pleased to submit today a substitute amendment to H.R. 3591, the Federally Supported Health Centers Assistance Act of 1992. This legislation will allow the Nation's 2,000 community, migrant, homeless, and public housing health

centers to obtain liability protection by placing them under the umbrella of the Federal Tort Claims Act for a limited period of time.

This legislation will reduce the malpractice insurance premium costs of these facilities and their doctors. Consequently, funds will be made more available for services to people instead of being tied up in malpractice premiums. This is real health care reform and reflects a part of President Bush's health care reform package.

The Federal Government, through the Department of Justice, becomes the malpractice insurer for clinics funded by the Public Health Service. They have requested, and we have provided, changes from the original bill to increase quality assurance programs in the clinics. The Federal obligation will not be present if the clinics fail to take appropriate steps in risk management.

This is a 3-year program which will provide the basis for risk analysis. At the end of this period, the clinics will possess quantitative information to utilize in seeking insurance in the private sector.

The funding of this legislation will be handled by a portion of the clinic appropriation going to the Department of Justice to cover administrative and settlement costs.

Again, I am pleased that we have been able to work out the details of this legislation. This is just one example of the health care reforms sought by the administration and one example of what we can accomplish working together in a bipartisan way. I am pleased to support it.

The bill (H.R. 6183) was deemed read the third time and passed.

#### THOMAS T. CONNALLY DEPARTMENT OF VETERANS AFFAIRS MEDICAL CENTER

Mr. FORD. Mr. President, I ask unanimous consent that Veterans' Affairs Committee be discharged from further consideration of H.R. 5491, relating to a medical center in Texas, and that the Senate proceed to its immediate consideration, that the bill be deemed read three times, passed and the motion to reconsider be laid upon the table.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BENTSEN. Mr. President, I rise to express my pleasure at the Senate's unanimous passage today of H.R. 5491. I requested that the Senate expeditiously pass this bill which honors the late Tom Connally who represented Texas in the U.S. Senate from 1928 to 1952. The legislation renames the Veterans' Affairs Medical Center in Senator Connally's home town of Marlin, TX to the Thomas T. Connally Department of Veterans' Affairs Medical Center.

Commemorating Senator Connally at a facility dedicated to the care of

American veterans is an especially fitting honor. Senator Connally was himself a soldier and a veteran before and during his career as a public servant. Senator Connally first served his country as a member of the Texas Volunteer Infantry during the Spanish-American War. Afterwards, he served in the Texas House of Representatives and later as a county prosecutor. The people of Texas then sent Tom Connally to the House of Representatives in 1917. But soon thereafter, he took a leave of absence to fight for his country in the First World War.

After the war, Tom Connally resumed his duties in the House. He served there until he was elected in 1928 to the Senate, where he served for 24 years. While in the Senate, Senator Connally rose to the chairmanship of the Foreign Relations Committee. As chairman, he showed the Senate and the world the intelligence, integrity, and strength of character that won him the respect and admiration of the good people of Marlin, TX, many years before.

Mr. President, Senator Connally died in 1963, having dedicated his life to Marlin, TX, and the Nation. I am very pleased that the Senate has decided to pay fitting tribute to his dedication by passing this bill. We have renamed the Marlin VA Medical Center after one of that community's and Texas' greatest sons.

I thank the distinguished chairman of the Veterans' Affairs Committee, Senator CRANSTON, and the majority leader for their cooperation in moving this legislation. This legislation has now passed both the House and the Senate and will now go to the White House for final approval.

The bill (H.R. 5491) was deemed read the third time and passed.

#### AMERICAN DISCOVERY TRAIL STUDY

Mr. FORD. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of H.R. 6184, relating to the American Discovery Trail, just received from the House, that the bill be read a third time, passed, that the motion to reconsider be laid upon the table and any statements relative to the passage of this item be inserted in the appropriate place in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BROWN. Mr. President, today I would like to rise in support of legislation to authorize the study our Nation's first coast-to-coast hiking trail, the American Discovery Trail. While the Appalachian Continental Divide, and Pacific Crest Trails each provide hiking opportunities traversing the United States from North to South, we lack an East-West backbone with which to link up these trails. The ADT

would serve as this backbone, totaling nearly 5,500 miles in length.

The American Discovery Trail will give the American people greater access to some of our country's most beautiful scenic vistas. People all across this country would be able to hike, bike, horseback, or simply walk along such historic trails as the Pony Express route and Santa Fe National Trail which played an important part in America's history.

The trail begins at Point Reyes National Seashore near San Francisco, and travels eastward through Nevada, Utah, Colorado, Kansas, Missouri, Illinois, Indiana, Ohio, West Virginia, and Maryland, ending at Cape Henlopen State Park in Delaware. By linking over 17 existing scenic and historic trails, the ADT will form a national network of trails encompassing 27 States and over 30,000 trail miles.

In Colorado, the American Discovery Trail is routed through some of the State's most beautiful and historic areas. On the west slope, hikers would pass through the Colorado National Monument and cross the Grand Mesa and Gunnison National Forests. Heading north, the route would scale the Collegiate Peaks and then hitch up with the Colorado Trail. Once the trail descends from the Rockies into the suburban areas of Denver, it follows along the foothills of the front range through Cripple Creek to Canon City and then heads west to hook up with the Santa Fe Trail.

Support for such a comprehensive system of trails has been spectacular. In fact, members of the Nebraska delegation contacted me to specifically request that a northern leg of the trail following the South Platte River through Nebraska and Iowa be studied for possible inclusion in the ADT. This has been included in the bill reported by the Energy and Natural Resources Committee.

Thanks to the efforts of the American Hiking Society, Backpacker magazine, as well as many other State and local trails organizations, a three-person team successfully led a scouting expedition in June of 1990 from California to Delaware in order to determine a feasible route for the ADT. Nearly 2 years later, this expedition completed much of the groundwork for the ADT utilizing existing trails wherever possible.

In addition, committees in each State participated to make sure that local interest existed for such a trail and that potential conflicts were avoided.

Because of this groundwork, the cost of studying the proposed route for designation will be small. Within 3 years, the National Park Service must conduct the study and provide its recommendations to Congress. At that time, additional legislation will provide for the actual designation of the trail.

Because the ADT has been purposefully routed in and around major metropolitan areas to link up with urban greenways and rail-to-trail conversions, the ADT also helps achieve the goal set forth by the President's Commission on Americans Outdoors—that everyone live within 15 minutes of a trail. This same Commission found that walking for pleasure is the No. 1 activity for Americans. In addition, the presence of trails has been shown to positively impact real estate property value, small business revenues, and tourism.

Mr. President, I was happy to sponsor this legislation. In these times of physical awareness and fiscal restraint, the American Discovery Trail provides healthy inexpensive entertainment opportunities for all age groups.

It is my hope that the trail also will foster increased appreciation of and responsibility for our public lands, as well as heightened awareness of our cultural heritage.

Mr. President, I am pleased Congress has passed this legislation.

As you know, yesterday the Senate passed H.R. 3011, which is identical to H.R. 6184. However, because H.R. 6184 already has been passed by the House, it will not be necessary to return the bill to the House for further review. Thus, the passage of H.R. 6184 by the Senate immediately clears the bill for the President's signature into law.

The bill (H.R. 6184) was deemed read the third time and passed.

#### DRY TORTUGAS NATIONAL PARK

Mr. FORD. Mr. President, I ask unanimous consent that the Energy Committee be discharged from further consideration of H.R. 5061, a bill relating to the Dry Tortugas National Park; that the Senate proceed to its immediate consideration; that the bill be deemed read a third time, passed; that the motion to reconsider be laid upon the table; that any statements relative to the passage of this item appear at the appropriate place in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill (H.R. 5061) was deemed read the third time and passed.

#### ED JENKINS RECREATIONAL AREA

Mr. FORD. Mr. President, I ask unanimous consent that the Energy Committee be discharged from further consideration of H.R. 6000, a bill relating to the Ed Jenkins Recreational Area; that the Senate proceed to its immediate consideration; that the bill be deemed read a third time, passed, the motion to reconsider laid upon the table, and that any statements relative to the passage of this item appear at the appropriate place in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill (H.R. 6000) was deemed read the third time and passed.

#### EXCHANGE OF LAND IN COLORADO

Mr. FORD. Mr. President, I ask unanimous consent that the Energy Committee be discharged from further consideration of H.R. 1182, relating to an exchange of land in Colorado; that the Senate proceed to its immediate consideration; that an amendment at the desk by Senator BROWN be agreed to; that the bill be deemed read a third time, passed; that the motion to reconsider be laid upon the table; that any statements relative to passage of this item be inserted in the RECORD at the appropriate place.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### AMENDMENT NO. 3434

(Statement of purpose: To improve the bill)

Mr. SIMPSON. Mr. President, I send an amendment to the desk on behalf of Mr. BROWN and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows: The Senator from Wyoming [Mr. SIMPSON], for Mr. BROWN proposes an amendment numbered 3434.

Mr. SIMPSON. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 13, line 18, strike "of" and insert in lieu thereof, "after".

On page 14, beginning on line 2, strike, "No such provision of water to the United States shall in any way be construed to constitute an abandonment of such water by the Counties".

The PRESIDING OFFICER. The questions is on agreeing to the amendment.

The amendment (No. 3434) was agreed to.

So the bill (H.R. 1182), as amended, was deemed read the third time, and passed.

Mr. FORD. Mr. President, I move to reconsider the vote.

Mr. SIMPSON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

#### CONVEYANCE OF CERTAIN LAND

Mr. FORD. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 1439.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

*Resolved*, That the bill from the Senate (S. 1439) entitled "An Act to authorize and direct the Secretary of the Interior to convey certain lands in Livingston, Parish, Louisiana", do pass with the following amendments:

Strike out all after the enacting clause, and insert:

#### TITLE I—LAND CONVEYANCE

##### SEC. 101. FINDINGS.

The Congress finds and declares that—

(1) there is a history of adverse claims and title confusion relating to certain lands in Livingston Parish, Louisiana, arising from private land claims predating the Louisiana Purchase;

(2) numerous parties have in good faith placed valuable improvements upon such lands in the belief that they owned such lands; and

(3) the public interest will be best served by clarifying the uncertainty of title by conveying the interest of the United States in such lands to those affected parties.

##### SEC. 102. CONVEYANCE OF LANDS.

(a) IN GENERAL.—Notwithstanding any other provision of law, and subject to the reservation in subsection (b), the United States hereby grants all right, title, and interest of the United States in and to certain lands in Livingston Parish, Louisiana, as described in section 103, to those parties who, as of the date of enactment of this Act, would be recognized as holders of a right, title, or interest to any portion of such lands under the laws of the State of Louisiana, but for the interest of the United States in such lands.

(b) RESERVATION OF MINERAL RIGHTS.—The United States hereby excepts and reserves from the provisions of subsection (a) of this section, all minerals underlying such lands, along with the right to prospect for, mine, and remove the minerals under applicable law and such regulations as the Secretary of the Interior may prescribe.

##### SEC. 103. DESCRIPTION OF LANDS TO BE CONVEYED.

The lands to be conveyed pursuant to this title are those lands located in section 37, township 5 south, range 4 east, St. Helena Meridian, in Livingston Parish, Louisiana.

#### TITLE II—PORT CHICAGO NATIONAL MEMORIAL

##### SEC. 201. SHORT TITLE.

This title may be referred to as the "Port Chicago National Memorial Act of 1992".

##### SEC. 202. FINDINGS.

The Congress hereby finds that—

(1) the Port Chicago Naval Magazine, located in Contra Costa County, California, served as the major West Coast munitions supply facility during World War II, during which time the facility played a critical role in the success of the war effort;

(2) on July 17, 1944, an explosion at Port Chicago, the origin of which has never been determined, resulted in the deaths of 320 officers and sailors, the largest domestic loss of life during World War II, and the injury of many others; and

(3) it is fitting and appropriate that the site of the Port Chicago Naval Magazine, which is currently included in the Concord Naval Weapons Station, be designated as a National Memorial to commemorate the role of the facility during World War II, to recognize those who served at the facility, and to honor the memory of those who gave their lives and were injured in the explosion on July 17, 1944.

##### SEC. 203. PORT CHICAGO NATIONAL MEMORIAL.

(a) DESIGNATION.—In order to recognize the critical role Port Chicago, located at the Concord Naval Weapons Station in Contra Costa County, California, played in the Second World War by serving as the main facility for the Pacific Theater and the historic

importance of the explosion which occurred at the Port Chicago Naval Magazine on July 17, 1944, such Naval Magazine is hereby designated as a National Memorial, to be known as the Port Chicago Naval Magazine National Memorial. The Secretary of the Interior shall take appropriate action to assure that the Memorial is announced in the Federal Register and that official records and lists are amended, in due course, to reflect the inclusion of this memorial along with other national memorials established by an Act of Congress.

(b) MARKER.—The Secretary of the Interior, with the concurrence of the Secretary of Defense, is authorized and directed to place at the site the Port Chicago Naval Magazine National Memorial, as designated under subsection (a), an appropriate plaque or marker commemorating the critical role Port Chicago played in the Second World War and the historic importance of the explosion which occurred at that location on July 17, 1944. The plaque or marker shall include a listing of the names of those who lost their lives during the explosion.

(c) PUBLIC ACCESS.—The Secretary of the Interior shall enter into a cooperative agreement with the Secretary of the Navy to provide for public access to the Memorial.

##### SEC. 204. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated such sums as are necessary to carry out this title.

Amend the title so as to read: "An Act to authorize and direct the Secretary of the Interior to convey certain lands in Livingston Parish, Louisiana, and for other purposes."

Mr. FORD. Mr. President, I move that the Senate concur in the House amendments.

The motion was agreed to.

Mr. FORD. Mr. President, I move to reconsider the vote.

Mr. SIMPSON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

#### MIKE MANSFIELD FELLOWSHIP ACT

Mr. FORD. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of calendar No. 697, S. 2763, the Mike Mansfield Fellowship Act; that the bill be deemed read the third time, passed; that the motion to reconsider laid upon the table; further that any statements regarding the measure be placed in the RECORD at the appropriate place.

The PRESIDING OFFICER. Without objection, it is so ordered.

So the bill (S. 2763) was deemed read the third time, and passed, as follows:

S. 2763

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

##### SECTION 1. SHORT TITLE.

This Act may be cited as the "Mike Mansfield Fellowship Act".

##### SEC. 2. FINDINGS.

The Congress finds that—

(1) because Senator Mike Mansfield served his country with distinction and has had a lasting impact on America's relationship with Japan during his tenure in the Senate

and later as the United States Ambassador to Japan, it is a fitting tribute to establish the following Fellowship in his name for promising officials of the Federal Government;

(2) Japan is America's second largest trading partner, the second biggest investor in the United States, and America's most serious economic competitor;

(3) despite the challenge and importance of Japan to the United States, few Americans speak Japanese or understand how the country and its government works; and

(4) key agencies of the United States Government involved in United States-Japan relations often lack sufficient personnel versed in the functioning of the Japanese policy-making apparatus.

#### SEC. 3. PURPOSES.

The purposes of this Act are—

(1) to enable the United States Government to respond more effectively to the Japanese challenge; and

(2) to provide officials from any branch of the United States Federal Government with intensive Japanese language training and an opportunity to be placed as a Fellow in the Government of Japan.

#### SEC. 4. DEFINITIONS.

For purposes of this Act—

(1) the term "agency of the United States Government" includes any agency of the legislative branch and any court of the judicial branch as well as any agency of the executive branch;

(2) the term "agency head" means—

(A) in the case of the Senate, the President pro tempore, in consultation with the Majority Leader and Minority Leader of the Senate;

(B) in the case of the House of Representatives, the Speaker of the House, in consultation with the Majority Leader and Minority Leader of the House;

(C) in the case of the judicial branch of Government, the chief judge of the respective court; and

(D) in the case of the executive branch of Government, the head of the respective agency;

(3) the term "Board" means the Mike Mansfield Fellowship Review Board; and

(4) the term "Center" means the Mansfield Center for Pacific Affairs.

#### SEC. 5. ESTABLISHMENT OF FELLOWSHIP PROGRAM.

(a) ESTABLISHMENT.—(1) There is hereby established the "Mike Mansfield Fellowship Program" pursuant to which the Secretary of State will make grants to the Mansfield Center for Pacific Affairs to award fellowships for periods of 2 years each to eligible United States citizens, as follows:

(A) During the first year each fellowship recipient will study the Japanese language as well as the Japanese political economy.

(B) During the second year each fellowship recipient will serve as a Fellow in a parliamentary office, ministry, or other agency of the Government of Japan or, subject to the approval of the Center, a nongovernmental Japanese institution associated with the interests of the fellowship recipient, consistent with the purposes of this Act.

(2) Fellowships under this Act may be known as "Mansfield Fellowships", and individuals awarded such fellowships may be known as "Mansfield Fellows".

(b) ELIGIBILITY OF CENTER FOR GRANTS.—Grants may be made to the Center under this section only if the Center agrees to comply with the requirements of section 7.

(c) INTERNATIONAL ARRANGEMENT.—The Secretary of State is authorized to enter

into an arrangement with the Government of Japan for the purpose of placing Fellows in the Government of Japan.

(d) USE OF FEDERAL FACILITIES.—The Foreign Service Institute is authorized and encouraged to assist in carrying out Japanese language training by the Center through the provision of classroom space, teaching materials, and facilities, to the extent that such provision is not detrimental to the Institute's carrying out its other responsibilities under law.

#### SEC. 6. FUNDING.

(a) PRIVATE SOURCES.—The Center is authorized to accept, use, and dispose of gifts or donations of services or property in carrying out the fellowship program, subject to the review and approval of the Board described in section 9.

(b) AVAILABILITY OF FUNDS.—Of any funds appropriated or otherwise made available to the Department of State pursuant to law—

(1) for fiscal year 1993, \$1,000,000,

(2) for each of the fiscal years 1994 and 1995, \$1,500,000, and,

(3) for fiscal year 1996, \$750,000

shall be available to the Secretary of State to make grants to the Center pursuant to section 5(a)(1).

#### SEC. 7. PROGRAM REQUIREMENTS.

The program established under this Act shall comply with the following requirements:

(1) United States citizens who are eligible for fellowships under this Act shall be employees of the Federal Government having at least two years experience in any branch of the Government and having a strong career interest in United States-Japan relations and a demonstrated commitment to further service in the Federal Government.

(2) Not less than 10 fellowships shall be awarded each year.

(3) Mansfield Fellows shall agree—

(A) to maintain satisfactory progress in language training and appropriate behavior in Japan, as determined by the Center, as a condition of continued receipt of Federal funds; and

(B) to return to the Federal Government for further employment for, such period as the Center may require or, if the Center makes no requirement, then for a period of at least 2 years following the end of their fellowships.

(4) During the period of the fellowship, the Center shall pay each Mansfield Fellow (including any Mansfield Fellow previously employed in the legislative branch of Government)—

(A) a stipend at a rate of pay equal to the rate of pay which would have been paid to that individual in such position but for his separation from Government service; and

(B) a cost of living adjustment or adjustments calculated at the same rate of pay, and for the same period of time, for which such adjustments were made to the salaries of individuals occupying competitive positions in the civil service during the same period as the fellowship.

(5)(A) For the first year of each fellowship, the Center shall provide fellows with intensive Japanese language training in Washington, D.C., as well as courses in the political economy of Japan.

(B) Such training shall be of the same quality as training provided to Foreign Service officers before they are assigned to Japan.

(C) The Center may waive any or all of the training required by subparagraph (A) to the extent that a Fellow has Japanese language skills or knowledge of Japan's political economy.

(6) Any Mansfield Fellow not complying with the requirements of this section shall reimburse the Federal Government for the Federal funds used in the fellowship, together with interest at a rate determined by the Center.

(7) The Center shall select Mansfield Fellows based solely on merit, but to the extent possible, reflecting the cultural, racial, and ethnic diversity of the United States.

(8) The Center shall assist any Mansfield Fellow to find employment in the Federal Government if such Fellow was employed in the legislative branch before the fellowship began and was not able, at the end of the fellowship, to be reemployed in the legislative branch.

(9) No Mansfield Fellow may engage in any intelligence or intelligence-related activity on behalf of the United States Government.

(10) The accounts of the Center shall be audited annually in accordance with generally accepted auditing standards by independent certified public accountants or independent licensed public accountants, certified or licensed by a regulatory authority of a State or other political subdivision of the United States. The audit shall be conducted at the place or places where the accounts of the Center are normally kept. All books, accounts, financial records, files, and other papers, things, and property belonging to or in use by the Center and necessary to facilitate the audit shall be made available to the person or persons conducting the audit, and full facilities for verifying transactions with the balances or securities held by depositories, fiscal agents, and custodians shall be afforded to such person or persons.

(11) The Center shall provide a report of the audit to the Board no later than six months following the close of the fiscal year for which the audit is made. The report shall set forth the scope of the audit and include such statements, together with the independent auditor's opinion of those statements, as are necessary to present fairly the Center's assets and liabilities, surplus or deficit, with reasonable detail, including a statement of the Center's income and expenses during the year, including a schedule of all contracts and grants requiring payments in excess of \$5,000 and any payments of compensation, salaries, or fees at a rate in excess of \$5,000 per year. The report shall be produced in sufficient copies for the public.

#### SEC. 8. SEPARATION OF GOVERNMENT PERSONNEL DURING THE FELLOWSHIPS.

(a) SEPARATION.—Under such terms and conditions as the agency head may direct, any agency of the United States Government may separate from Government service for a specified period any officer or employee of that agency who accepts a fellowship under the program established by this Act.

(b) REEMPLOYMENT OR REINSTATEMENT.—An officer or employee separated by an agency of the executive or the judicial branch of Government under subsection (a) for purposes of becoming a Fellow shall be entitled upon termination of the fellowship to reemployment or reinstatement with such agency (or a successor agency) in an appropriate position with the attendant rights, privileges, and benefits which the officer or employee would have had or acquired had he or she not been so separated, subject to such time period and other conditions as the agency head may prescribe.

(c) BENEFIT PROGRAM.—(1) An officer or employee entitled to reemployment or reinstatement rights under subsection (b) shall, while continuously serving as a Mansfield Fellow with no break in continuity of serv-

ice, continue to participate in any benefit program in which such officer or employee was participating prior to the Mansfield Fellowship, including—

(A) programs for compensation for job-related death, injury, or illness;

(B) programs for health and life insurance;

(C) programs for annual, sick, and other statutory leave; and

(D) programs for retirement under any system established by the laws of the United States,

except that participation in such programs shall be credited only to the extent that employee deductions and employer contributions, as required, in payment for such participation for the period of the fellowship, are currently deposited in the program's or system's fund or depository. For purposes of the preceding sentence, employer contributions shall be paid by the Center and employee deductions shall be made from stipends paid to the Mansfield Fellows by the Center pursuant to section 7(4).

(2) Death or retirement of any such officer or employee during approved service as a Mansfield Fellow and prior to reemployment or reinstatement shall be considered a death in or retirement from Government service for purposes of any employee or survivor benefits acquired by reason of service with an agency of the United States Government.

(d) COMPLIANCE WITH BUDGET ACT.—Funds are available under this section to the extent and in the amounts provided in appropriation Acts.

#### SEC. 9. MANSFIELD FELLOWSHIP REVIEW BOARD.

(a) ESTABLISHMENT.—There is established the Mansfield Fellowship Review Board.

(b) COMPOSITION.—The Board shall be composed of 9 individuals, as follows:

(1) The Secretary of State, who shall serve as the chairperson of the Board, or his designee.

(2) The Secretary of Defense or his designee.

(3) The Secretary of the Treasury or his designee.

(4) The Secretary of Commerce or his designee.

(5) The United States Trade Representative or his designee.

(6) Four persons, appointed by the President, by and with the advice and consent of the Senate, who, to the extent possible, are experts in the field of United States-Japan relations.

(c) TERMS OF SERVICE.—Each member of the Board appointed under subsection (b)(6) shall serve terms of 4 years, except that the President shall designate 2 of the initial appointees to serve terms of 2 years.

(d) FUNCTIONS.—(1) The Board shall review the administration of the program assisted under this Act.

(2)(A) Each year at the time of the submission of the President's budget request to the Congress, the Board shall submit to the Congress a report completed by the Center with the approval of the Board on the conduct of the program during the preceding year.

(B) Each such report shall contain—

(i) an analysis of the assistance provided under the program for the previous fiscal year and the nature of the assistance provided;

(ii) an analysis of the performance of the individuals who received assistance under the program during the previous fiscal year, including the degree to which assistance was terminated under the program and the extent to which individual recipients failed to meet their obligations under the program; and

(iii) an analysis of the results of the program for the previous fiscal year, and cumulatively, including, at a minimum, the percentage of individuals who have received assistance under the program who subsequently became employees of the United States Government and, in the case of individuals who did not subsequently become employees of the United States Government, an analysis of the reasons why they did not become employees and an explanation as to what use, if any, was made of the assistance given to those recipients.

(e) COMPENSATION.—(1) Members of the Board—

(A) shall not be paid compensation for services performed on the Board, except as provided in paragraph (2); and

(B) shall be allowed travel expenses, including per diem in lieu of subsistence at rates authorized for employees of agencies under subchapter I of chapter 57 of title 5, United States Code, while away from their homes or regular places of business in the performance of services for the Board.

(2) Each Member of the Board appointed under subsection (b)(6) shall receive compensation, subject to the availability of appropriations, at a rate of not to exceed the daily equivalent of the annual rate of basic pay payable for positions above GS-15 of the General Schedule under section 5332 of title 5, United States Code, for each day such member is engaged in the actual performance of the duties of the Board.

(f) AVAILABILITY OF SUPPORT STAFF.—The Secretary of State is authorized to provide for necessary secretarial and staff assistance for the Board.

(g) RELATIONSHIP TO FEDERAL ADVISORY COMMITTEE ACT.—The Federal Advisory Committee Act shall not apply to the Board to the extent that the provisions of this section are inconsistent therewith.

(h) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to the Board such sums as may be necessary to carry out this section.

Mr. ROTH. I would like to express my appreciation to those who supported S. 2763. This bill, the Mansfield Fellowship Act, is designed to fill one of the biggest gaps in the policymaking capabilities of the Federal Government—the severe shortage of personnel who understand the inner workings of the Japanese Government.

What this bill proposes is a 2-year fellowship that will provide the next generation of public sector leaders intensive instruction in the Japanese language and political economy, and hands-on experience actually working within the ministries and agencies of the Government of Japan. I believe this program, within a small number of years, will vastly strengthen the Federal Government's ability to meet the Japanese challenge.

Although he is not interested in monuments and does not encourage those who seek to honor him, this program fittingly is named after a man who served his country with immense distinction both in this Chamber and as Ambassador to Japan. That man of course, is Mike Mansfield. I thank this body for recognizing Mike Mansfield's contributions, and the bilateral relationship in which he played such an

important role, by supporting the creation of the Mike Mansfield Fellowship Program.

#### DESIGNATING THE ESEL D. BELL POST OFFICE BUILDING IN TEXAS

Mr. FORD. Mr. President, I ask unanimous consent that the Governmental Affairs Committee be discharged from further consideration of H.R. 4771, designating the Esel D. Bell Post Office Building in Texas; that the Senate then proceed to its immediate consideration; that the bill be deemed read the third time passed; and the motion to reconsider be laid upon the table, and that any statements relating to this bill appear in the RECORD at the appropriate place.

The PRESIDING OFFICER. Without objection, it is so ordered.

So the bill (H.R. 4771) was deemed read the third time, and passed.

#### ARMENIA AND AZERBAIJAN HOSTILITIES

Mr. FORD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of calendar 767, Senate Resolution 349, a resolution relating to the hostilities between the Republic of Armenia and Azerbaijan; that the resolution be deemed agreed to, the motion to reconsider be laid upon the table, and that any statements thereon appear at the appropriate place in the RECORD as though read.

The PRESIDING OFFICER. Without objection, it is so ordered.

So the Resolution (S. Res. 349) was deemed agreed to.

The preamble was agreed to. The resolution, with its preamble, is as follows:

Whereas the Republic of Armenia and the Republic of Azerbaijan have been engaged in armed conflict since 1988, primarily over the disputed Armenian-majority enclave of Nagorno-Karabakh;

Whereas numerous attempts to end this conflict have failed;

Whereas the recent mediation effort by the Conference on Security and Cooperation in Europe (CSCE), which featured a proposal for a sixty-day cease-fire and the placement of military observers, was not agreed to;

Whereas President Nursultan Nazarbayev of Kazakhstan brought about through his good offices a preliminary cease-fire agreement that was signed on August 27, 1992, but was never observed;

Whereas the Russian Federation helped bring about a cease-fire agreement on September 19, 1992, scheduled to begin at midnight, September 25, 1992;

Whereas fighting has intensified both in Nagorno-Karabakh and along the Armenian-Azerbaijan border since this most recent agreement was concluded on September 19, 1992;

Whereas on August 24, 1992, the Republic of Armenia formally requested the convening of the United Nations Security Council to address the situation on Nagorno-Karabakh; and

Whereas both the Republic of Azerbaijan and the Republic of Armenia have requested the deployment of cease-fire monitors: Now, therefore, be it

*Resolved*, That it is the sense of the Senate that—

(1) the Republic of Armenia and the Republic of Azerbaijan should immediately cease all hostilities and abide by the cease-fire resolution of September 19, 1992; and

(2) failing an immediate cessation of hostilities, and considering the collapse of the regional mediation attempts, the United Nations Security Council should meet to address the situation in Nagorno-Karabakh and should authorize the Secretary-General of the United Nations to take appropriate steps to bring about an end to the conflict, including, if necessary, the use of United Nations peacekeepers.

#### GREATER SAFETY FOR FORKLIFT OPERATIONS

Mr. FORD. Mr. President, I ask unanimous consent that the Labor Committee be discharged from further consideration of Senate Concurrent Resolution 17, regarding forklift operations, I ask for its immediate consideration.

The PRESIDING OFFICER. The concurrent resolution will be stated by title.

The legislative clerk read as follows:

A concurrent resolution (S. Con. Res. 17) expressing the sense of Congress with respect to certain regulations of the Occupational Safety and Health Administration.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the concurrent resolution?

There being no objection, the Senate proceeded to consider the concurrent resolution.

#### AMENDMENT NO. 3435

Mr. SIMPSON. Mr. President, I send an amendment to the desk on behalf of Mr. HATCH and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Wyoming [Mr. SIMPSON], for Mr. HATCH, proposes an amendment numbered 3435.

Mr. SIMPSON. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 2, beginning on line 3, strike out "before the expiration of the One Hundred Second Congress" and insert in lieu thereof "within one year of passage of this resolution".

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 3435) was agreed to.

Mr. KENNEDY. Mr. President, I support Senate Concurrent Resolution 17, a sense-of-the-Congress resolution urging the Occupational Safety and Health Administration to take steps to provide greater safety for forklift operators.

A study by the National Institute for Occupational Safety and Health found that in 1985, 34,000 workers were injured in forklift truck accidents and required emergency room treatment. As in other areas of worker safety and health, proper training can contribute to enhanced workplace safety. For this reason, I support this resolution asking OSHA to address this problem.

I am concerned, however, that the resolution addresses only one aspect of the problem. It ignores another very significant health risk faced by many of these workers. NIOSH has also found that diesel exhaust fumes can cause cancer and other serious illnesses, and forklift operators deserve protection here too. In a 1987 investigation of the exposure of dock workers, NIOSH

In accordance with [its] policy considering diesel exhaust as a potential occupational carcinogen, suggested measures to reduce exposures to the lowest feasible limits.

There are many steps OSHA could take to provide protection against diesel exhaust fumes. It could require employers to avoid the use of diesel engines indoors, when there are safer alternatives; it could require adequate ventilation when diesel engines are operated indoors; it could require exhaust filters on diesel engines; and it could require other steps to reduce the fumes breathed by workers.

Unfortunately, the current resolution is being promoted by manufacturers of forklift trucks. With better training workers will have fewer accidents, thereby reducing the number of lawsuits against manufacturers.

As we all know, different constituencies often work together for different reasons to improve safety and health, and the interests of manufacturers do not always coincide with the interests of workers. I wish that we could have addressed more in this resolution. But it responds to an identified workplace hazard. It is a worthwhile step toward preventing injuries to forklift operators. I urge the Senate to approve the resolution.

The PRESIDING OFFICER. The question is on agreeing to the concurrent resolution.

The concurrent resolution (S. Con. Res. 17) was agreed to.

The preamble was agreed to.

#### S. CON. RES. 17

Whereas it is in the public interest to reduce the frequency of workplace accidents and the human and economic costs associated with such injuries;

Whereas workplace accidents involving powered industrial trucks are often the result of operation by poorly trained, untrained, or unauthorized operators;

Whereas Federal regulations promulgated by the Occupational Safety and Health Administration and codified at section 1910.178, title 29, Code of Federal Regulations, require that operators of powered industrial trucks be trained and authorized;

Whereas existing regulations lack any guidelines to measure whether operators of powered industrial trucks are in fact trained and authorized;

Whereas operator training programs have been demonstrated to reduce the frequency and severity of workplace accidents involving powered industrial trucks; and

Whereas a petition to amend existing regulations to specify the proper components of a training program for operation of powered industrial trucks has been pending before the Occupational Safety and Health Administration since March 1988: Now, therefore, be it

*Resolved by the Senate (the House of Representatives concurring)*, That the Occupational Safety and Health Administration is requested to publish, within one year of passage of this resolution, proposed regulations amending section 1910.178, title 29, Code of Federal Regulations, that specify the components of an adequate operator training program and that only trained employees be authorized to operate powered industrial trucks.

Mr. FORD. Mr. President, I move to reconsider the vote.

Mr. SIMPSON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

#### HELEN DAY U.S. POST OFFICE BUILDING IN ALEXANDRIA, VA

Mr. FORD. Mr. President, I ask unanimous consent that the Governmental Affairs Committee be discharged from further consideration on H.R. 5479, designating the Helen Day U.S. Post Office Building in Alexandria, Va., and that the Senate then proceed to its immediate consideration; that the bill be deemed read the third time, passed, and the motion to reconsider be laid upon the table.

The PRESIDING OFFICER. Without objection, it is so ordered.

So the bill (H.R. 5479) was deemed read the third time, and passed.

#### COMMODITY FUTURES IMPROVEMENTS ACT OF 1991—CONFERENCE REPORT

Mr. FORD. Mr. President, I submit a report of the committee of conference on H.R. 707 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 707) to amend the Commodity Exchange Act to improve the regulation of futures and options traded under rules and regulations of the Commodity Futures Trading Commission; to establish registration standards for all exchange floor traders; to restrict practices which may lead to the abuse of outside customers of the marketplace; to reinforce development of exchange audit trails to better enable the detection and prevention of such practices; to establish higher standards for service on governing boards and disciplinary committees of self-regulatory organizations; to enhance the international regulation of futures trading; to regularize the process of authorizing appropriations for the Commodity Futures Trading Commission; and for other purposes, having met, after full

and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by all of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of October 2, 1992.)

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The conference report was agreed to.

Mr. FORD. Mr. President, I move to reconsider the vote.

Mr. SIMPSON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. LEAHY. This bill is about fighting white-collar crime. We have before us the toughest futures reform package in decades, and probably the most significant law for the financial services industry in this session of Congress.

It is nearly 4 years since we first learned of the FBI's massive sting operation on the floor of the Chicago exchanges which resulted in the indictments of 46 traders, but the reasons for this legislation are just as real and immediate today as they were in early 1989 when we started this process.

This bill is a major accomplishment achieved under the most difficult of circumstances. Powerful interests have lined up in opposition to many provisions. We were hampered by a 2-year jurisdiction fight within the administration.

But in the end, we emerge from conference with the House having taken two very strong pro-consumer, anti-crime bills and making them stronger. In doing so, we have sent a powerful message to the futures industry and beyond: We will not tolerate white-collar crime in the financial services or any other industry.

The Futures Trading Practices Act of 1992 will restore confidence and integrity to futures markets covering farm goods, financial instruments, precious metals, crude oil, foreign currencies, and a host of other items vital to consumers and to our national economy. The bill is tough, but fair. It is a code of conduct that any honest trader can live by. Very simply, under this bill, any floor trader cheating a customer will be severely punished; any exchange not policing its floor will be forced to clean up its act.

The legislation also responds to concerns raised about the role of futures in the stock price crashes of October 1987 and 1989 and about the role of expanding off-exchange markets in derivative financial instruments such as swaps and hybrids.

The legislative history behind the specific provisions of this legislation is spelled out in detail in the report of the committee on conference.

Back in October 1989 when I first introduced this legislation into the Senate along with Senators LUGAR and LEAHY, I stated my intention to enact a futures trading reform package that was efficient, effective, and fair—tough medicine needed for the futures industry to regain the confidence of the trading public.

Today, I am pleased to deliver on that promise.

Mr. President, without objection, I ask that a colloquy between myself and Senator DIXON on dual trading and audit trail and a list of some of the organizations supporting adoption of this conference report be inserted in the RECORD this point.

• Mr. DIXON. Mr. President, I want to congratulate my good friend, the distinguished chairman of the Agriculture Committee, on the successful completion of the Conference on an excellent piece of legislation entitled the Futures Trading Practices Act of 1992. I know that he has worked diligently to bring before the Senate a bill that would make needed reforms in futures regulation while preserving the current act's reliance on vigorous exchange self-regulation subject to oversight by the Commodity Futures Trading Commission to combat any abusive practices that may arise.

I particularly want to commend the chairman for crafting workable compromises in the inter-related areas of dual trading and audit trails. As I understand the final bill, dual trading would be banned on those contract markets that do not have adequate trade monitoring systems to police dual trading unless the markets would qualify for another form of exemption. The dual trading ban would take effect after the Commission issues rules within 270 days after enactment. At the same time, the bill calls for the contract markets to implement, within 3 years, an electronic audit trail that would reflect "independent, precise, and complete" trade-timing data. If a contract market is proceeding in affirmative good faith to develop its new system, but circumstances beyond its control delay completion or implementation of the system, the Commission may extend this 3 year effective date.

I have a question, concerning these different requirements. First, the bill calls for the Commission to decide whether to exempt a contract market from the dual trading ban before the new audit trail provisions become effective. If a contract market is making an affirmative good faith effort to develop its electronic audit trail at the time the Commission considers its exemptive petition, is it contemplated that the Commission would ban dual trading on that market until the new audit trail is completed?

Mr. LEAHY. No, so long as the contract market continues to satisfy its statutory and regulatory duties to po-

lice dual trading in the interim as outlined in the bill. The purpose of this bill is to encourage the exchanges to integrate as much as possible state-of-the-art technology and strict regulatory protections in applying them to current pit practices, including dual trading. I understand that, to date, the Chicago exchanges through their electronic trading card called AUDIT and other related mechanisms have made considerable progress toward achieving the objectives of the bill. Other exchanges, I understand, also are hard at work developing their own systems or planning to adapt the Chicago systems to their markets.

This does not mean, of course, that exchanges can let down their efforts on floor trading regulation in the meantime until the new electronic systems are completed, and the legislation spells out the standards that would control until that time. However, so long as these exchange efforts toward developing the new systems continue in affirmative good faith and the contract market continues to comply with its dual trading policing duties, the bill does not contemplate that the Commission would ban dual trading.

Mr. DIXON. Thank you for your response. I greatly appreciate your recognition of the substantial efforts that have been made by the Chicago exchanges to create AUDIT and other related systems. As you know, these new technological mechanisms are very costly to develop. Some concern has been expressed that, under the bill, the Commission could require exchanges to expend considerable sums to improve their existing audit trail systems even though the bill contemplates that those systems will be outdated and replaced by the new trading technology within that 3 year interim period. Does the bill contemplate that, during that three year interim period, the Commission would compel exchanges to undergo costly enhancements to their existing systems in order to obtain an exemption from the dual trading ban or for other purposes?

Mr. LEAHY. Again, although each exchange's system will have to be assessed on a case-by-case basis, the answer generally is no.

The conference report explains that "existing audit trail systems that qualify under section 5a(b)(2) of the act, if implemented effectively and diligently, would meet the initial audit trail requirements for a dual trading exemption insofar as those systems are capable of detecting, and are being used in any disciplinary actions for prosecuting, violations attributable to dual trading."

Also, the bill gives the Commission broad authority to implement and to enforce interim audit trail and floor policing standards until the new electronic systems are put in place. The exchanges are on the technological fore-

front in many areas, like Globex, and I am confident that they will stay abreast of technological changes during the 3 years that they are developing and installing their audit trail systems. However, in exercising this authority, we do expect the Commission to be mindful of the size of financial commitments that exchanges may be making in order to develop and implement their new audit trail systems to satisfy the bill's "independent, precise, and complete" requirement. Recognizing that commitment and the ultimate objective of an electronic audit trail, the Commission, during the interim, should avoid requiring fundamental changes to existing audit trail systems which would require disproportionate expense and might significantly delay final completion of the new electronic systems.

Again, this does not mean that exchanges can let down on their floor policing efforts in the meantime and we anticipate that some modifications in existing requirements may occur in some contract markets. Three years is a long time, and the Commission has a continuing duty to protect customers during this period. However, the Commission should be cognizant of significant expenditures that exchanges may be incurring in developing the required new electronic trade monitoring systems contemplated by the bill, so long as the regulatory requirements of the statute and applicable rules are met. Limited resources available to an exchange may simply be better spent in many cases toward expeditiously achieving the new technology standard rather than fine-tuning a system that will be obsolete over the short term.

I ask unanimous consent to have a list of supporters of the legislation printed in the RECORD.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

#### ORGANIZATION SUPPORTING H.R. 707

We, the undersigned, support the legislation unanimously adopted by the House/Senate Conference Committee on H.R. 707, The Commodity Future Trading Commission Reauthorization, and urge the Congress to move expeditiously to adopt the conference report.

Mr. LUGAR. Mr. President, I rise today with Chairman LEAHY in support of the conference report on H.R. 707, the Futures Trading Practices Act of 1992. The bill reauthorizes and provides new powers to the Commodity Futures Trading Commission [CFTC], the agency charged with overseeing the Nation's futures markets. I urge other Senators to support this measure.

Mr. President, this bill contains important reforms to preserve market integrity, and is designed to instill greater investor confidence in the futures market. This bill puts into place mechanisms under which futures markets will be required to develop and implement new "audit trail" technology to monitor, capture and record trades occurring on their trading floors. This new audit trail will provide the data for exchanges and regulators to quickly detect unusual and potentially illegal trading practices and patterns.

The bill also vests in the Board of Governors of the Federal Reserve the responsibility for the general oversight of margins levels on stock index futures. Low margins levels on stock index futures have been criticized by some as one of the factors attributable to the stock market crashes in 1987 and 1989. This provision, by expanding the FED's authority over stock margins to also include stock index futures margins, is designed to ensure that actions on either the futures or securities markets do not pose a risk to the entire financial system of this country. The Federal Reserve, with its expertise in banking securities and other financial matters will provide the expertise necessary for this oversight responsibility.

The effort to reauthorize the CFTC began in early 1989, during an environment of investor distrust and dissatisfaction with the operation of the futures markets and their regulatory body. That distrust stemmed primarily from the results of an FBI undercover operation that was designed to detect corruption and market manipulation in the commodities markets.

Confronted with this very unsettling environment, the Agriculture Committee fashioned tough far-reaching reforms of the regulatory authority of the CFTC. The committee recognized the value of investor confidence in the markets and the necessity of re-establishing a framework from which the U.S. markets can continue their international preeminence in futures trading. And the committee acted forcefully. Some have characterized our effort as the most significant reform of the Commodity Exchange Act in the 15-year history of the Commodity Fu-

tures Trading Commission, and I agree with that characterization.

In April 1991, 18 months after the committee completed its markup of the bill, the full Senate finally debated this bill. The delay in the full Senate consideration stemmed from controversial issues pertaining to the jurisdictional provisions contained in title III of the bill. Those issues pitted the interests of the futures industry against the interests of the securities industry and proved to be the most controversial aspects of that debate and the subsequent debate in the House-Senate conference.

The conference committee began work to finalize the bill in November 1991. In addition to the House and Senate Agriculture Committees, the conference involved the participation of the House Energy and Commerce Committee and the House Banking Committee. Notwithstanding the divergent interests brought to the conference table by those House committees and the controversy that generally accompanies any measure that alters jurisdictional boundaries, the conference was able to complete its work and produce a fair and equitable piece of legislation.

The conference report before you today is similar in content and effect to the bill adopted by the Senate in 1991.

In titles I and II, the bill expands the CFTC's power to force exchanges to improve their trade practice oversight and disciplinary systems, and provides the CFTC with the regulatory and enforcement tools to foster and police integrity in the futures markets.

The bill also requires exchanges to take actions to prevent conflicts of interest and insider trading, provides for increased civil and criminal penalties, requires CFTC action to deal with trading abuses attributable to the practice of dual trading and, requires CFTC monitoring of broker associations.

In titles III, as previously mentioned, the bill provides new oversight authority over stock index margins to the Board of Governors of the Federal Reserve System. It also gives new authority to the CFTC to exempt from regulation products not suited for futures type regulation. With regard to this exemption authority, the conferees intend that this new authority is not to be used to deregulate, in a wholesale manner, a wide list of financial products. Instead the conferees plan to conduct over the next 2 years a comprehensive review of the regulatory requirements for hybrid financial instruments.

Mr. President, the issues in this bill have been thoroughly reviewed, discussed and debated over the past 4 years. Not every party is completely pleased with the outcome, but such is the nature of a democracy. It is a good compromise and one that should be

adopted. Reauthorization of the CFTC is a necessary element to establishing the market reform so important to investor confidence and to the health of our markets.

I strongly urge my colleagues to join with me in support of this conference report.

#### CONCERNING THE HUMANITARIAN CRISIS IN SOMALIA

Mr. FORD. Mr. President, I ask unanimous consent that the Foreign Relations Committee be discharged from further consideration of House Concurrent Resolution 370, concurrent resolution concerning the humanitarian crisis in Somalia; that the Senate proceed to its consideration; that the concurrent resolution be agreed to, and the motion to reconsider be laid upon the table.

The PRESIDING OFFICER. Without objection, it is so ordered.

The PRESIDING OFFICER. The question is on agreeing to the concurrent resolution.

The concurrent resolution (H. Con. Res. 370) was agreed to.

The preamble was agreed to.

#### OVERSEAS PRIVATE INVESTMENT CORPORATION AMENDMENTS—CONFERENCE REPORT

Mr. FORD. Mr. President, I submit a report of the committee of conference on H.R. 4996, and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 4996) to extend the authorities of the Overseas Private Investment Corporation, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of October 5, 1992.)

Mr. McCONNELL. Mr. President, I rise in strong support of this legislation to reauthorize the Overseas Private Investment Corporation and the Trade Development Agency as well as provide for other trade development and promotion activities. Over the past year, Senator SARBANES and I have worked closely together in the Subcommittee on International Economic and Trade Policy of the Foreign Relations Committee in support of agencies and programs which expand American opportunities abroad as they strengthen American income, exports, and our job base here at home.

The two principal agencies we will authorize funding for today are something of a success story. In particular, the hearings we held on OPIC illustrated that the Corporation has a solid foundation of good management and business judgment which has assured it is self-sustaining financially. It's not often an agency can make that claim.

After several years of discussion, we are also finally elevating the Trade Development Program to agency status which I consider an important reflection of the priority the Congress attaches to our emphasis on international trade. In addition, we have increased the overall funding levels to assure the agency can meet the rapidly growing demand for its services in the Newly Independent States and emerging market economies around the world.

The bill includes a number of other provisions which will enhance the competitive position of American businesses as they venture abroad. I am particularly pleased that we have broken the lock on the exclusive arrangement foreign insurance companies have maintained on export transactions. Senator ROTH deserves a great deal of credit for his diligence in opening the international insurance market up to American companies by guaranteeing free and fair competition.

I urge my colleagues to take a look at both this legislation and the services offered by the agencies covered. As the global economy opens up, these programs will give American companies—large and small—the kind of support, advice, and financial assistance they need to compete successfully in the international arena.

I thank my colleague, the ever-determined and distinguished senior Senator from Maryland for his leadership in seeing this bill through to final passage. We have spent a great deal of time exploring ways to bring foreign aid and trade more in line with our national priorities. The bill before the Senate reflects a first step in what I hope will be a more comprehensive review of these programs. As we conclude our work, let me add one more word of thanks. I know the Senator will join me in expressing appreciation for the many long hours of hard work that Marcia Verville put in to bring this bill to final passage. Perhaps, we should thank her daughter and husband as well, since they, too, have had to endure these last chaotic days. After all, we are here to work for a better future for our families, they deserve a little recognition now and then.

Mr. SARBANES. Mr. President, I am pleased that the Senate is considering the conference report to accompany H.R. 4996, the Jobs Through Exports Act of 1992. This legislation contains a variety of provisions that will enhance the ability of the U.S. Government to carry out feasibility studies for capital

projects overseas; will provide grants for capital projects using U.S. exports and services; will reauthorize legislation providing loans, loan guarantees, and risk insurance for U.S. investments overseas; and will build the partnership between the U.S. public and private sectors to identify and pursue aggressively strategic export markets.

There is little question that exports are significant to our economic future. Export promotion programs play an important role in increasing exports when U.S. firms lack export awareness because markets have failed to give the right information to producers who otherwise would export; when U.S. businesses are aware of export opportunities but need additional technical assistance to consummate export sales; when U.S. firms need representational assistance from the U.S. Government in opening doors overseas; and when U.S. businesses need competitive financing, loan guarantees, or insurance to close an export sale.

In addition, the conference agreement contains an important provision prohibiting any funds made available under this act or amendments made by this act from being used for any financial incentive to a business currently located in the United States to induce such business to relocate outside the United States, or from being used in a manner that is likely to reduce the number of employees in the United States because U.S. production is being taken overseas. Further, this bill prohibits any funds under this act or amendments made by this act from being used for any project or activity that contributes to the violation of internationally recognized worker rights.

Briefly, let me summarize the provisions of the conference report. Title I extends the authority of the Overseas Private Investment Corporation [OPIC] for fiscal years 1993 and 1994; amends the eligibility criteria for participating countries to include countries that are making the transition from nonmarket to market economies; instructs OPIC to include additional text in all contracts protecting the free association of labor, the enforcement of child labor laws, and protections against forced labor; amends OPIC's reporting requirements to include any loss of U.S. jobs created by a project, whether or not the project itself would create other U.S. jobs; contains a series of technical amendments to conform existing law to the provisions of the Federal Credit Reform Act of 1990 and authorizes OPIC to draw from its non-credit account revolving fund to cover the costs of its activities; sets fines for an investor who knowingly commits fraud in activities of the Corporation; and requires any OPIC investor to certify to the Corporation that any contract for the export of goods will include a requirement that U.S. insur-

ance companies have a fair and open competitive opportunity to provide insurance.

Title II elevates the present Trade and Development Program [TDP] to the Trade and Development Agency [TDA], authorizes the Director of TDA to provide funds for feasibility studies and other activities related to developing projects which use U.S. exports, and expands the mandate of the Agency to include architectural and engineering design, an important factor in insuring U.S. exports by setting U.S. standards in overseas projects in the earliest stages. This title is virtually identical to the provisions passed by the Senate last year as a part of the International Cooperation Act of 1991.

Title III establishes by statute the existing Office of Capital Projects within the Agency for International Development. In coordination with the appropriate agencies of the Trade Policy Coordinating Committee [TPCC], AID is directed to review periodically the infrastructure needs of developing countries and countries making the transition from nonmarket to market economies. This title directs the Capital Projects Office to support developmentally sound capital projects that utilize U.S. exports and services and also focuses on capital projects to alleviate the worst manifestations of poverty or directly promote environmental safety and sustainability at the community level. The conference agreement also urges the President to use \$650 million for fiscal year 1993 and \$700 million for fiscal year 1994 for capital projects.

Title IV authorizes and encourages the Secretary of Commerce to establish United States Commercial Centers in one country in Asia, Latin America, and Africa, to provide additional resources for the promotion of United States exports and familiarize United States exporters with the industries, markets, and customs of the host countries. The conference committee took special note of the leadership role of U.S. producers of environmental goods and services, and urges the Department of Commerce to give particular attention to assist U.S. firms in the export of technologies, manufacturing processes, products, and services that will help protect the environment and natural resources around the globe.

Title V of the conference agreement authorizes \$1 million for each of fiscal years 1993 and 1994 for the placement of additional procurement officers at the multilateral development banks.

Title VI authorizes the Enterprise for the Americas Initiative, which establishes basic criteria which Latin American or Caribbean countries must meet in order to qualify for debt-reduction benefits. This title is identical to the EAI authority approved by the Senate last year in the International Cooperation Act of 1991.

Title VII provides additional funding to the Secretary of Commerce for the purpose of placing additional Foreign Commercial Service officers in countries with which the United States has the largest trade deficit and in newly democratic countries of Central and Eastern Europe.

Title VIII, as mentioned earlier, includes language which prohibits funds authorized under this act from being expended for any financial incentive to a U.S. business for the purpose of inducing that business to relocate overseas. This title reflects the concern of the committee of conference over recent reports that foreign assistance funds may have been used to entice U.S. companies to relocate overseas and thereby displace American workers.

Mr. President, I urge adoption of the conference report.

Mr. KERRY. Mr. President, as the Senate considers legislation to reauthorize the Overseas Private Investment Corporation, I want to thank the subcommittee and full committee leadership for including a provision in the conference report to recognize an outstanding initiative in my State of Massachusetts that will have a beneficial impact on the competitiveness of American business in a vastly changing global economy. I am referring to Babson College's proposed Center for Global Competitiveness and Entrepreneurship—a center that represents a bold approach for assisting U.S. companies to improve their international capabilities and corporate development.

To help small businesses and companies compete in the international marketplace, Babson College proposes to establish the Center for Global Competitiveness and Entrepreneurship. Babson seeks to accomplish two important goals with this new center: First, increasing the international competitiveness of emerging growth companies as well as other corporations seeking to expand their international operations; and second, educating present and future managers through participation in actual business problem solving and exposure to a new curriculum. Babson College will accomplish these goals through a range of new programs and activities, which include organizing original training programs, establishing comprehensive information systems for international statistics, conducting market analyses, and developing new publications and case studies on the methods and success of emerging growth companies in achieving international competitiveness.

Mr. President, Congress has recognized the strength of Babson's proposed center and its contribution to the enhancement of our economic competitiveness in a changing global environment. The conferees have further concluded that the center at Babson College will play a critical role in enhanc-

ing support for exporters, and that its expertise in training business leaders for the global market will be invaluable to the export promotion objective contained in the report. I commend Babson College for initiating such an ambitious and forward-thinking proposal as the Center for Global Competitiveness and Entrepreneurship, and I look forward to assisting in the effort to make it a reality.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The conference report was agreed to.

#### RELATING TO THE DELAWARE RIVER

Mr. FORD. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of H.R. 6179, relating to the Delaware River, just received from the House; that the bill be deemed read a third time, passed; that the motion to reconsider be laid upon the table, and that any statement relative to passage of this item be included in the RECORD at the appropriate place.

The PRESIDING OFFICER. Without objection, it is so ordered.

So the bill (H.R. 6179) was deemed read the third time, and passed.

#### FERTILITY CLINIC SUCCESS RATE AND CERTIFICATION ACT OF 1992

Mr. FORD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 774, H.R. 4773, the Fertility Clinic Success Rate and Certification Act; that the bill be deemed read the third time, passed; that the motion to reconsider be laid upon the table, and statements thereon be printed in the appropriate place in the RECORD.

The PRESIDING OFFICER. Without objection, it is ordered.

So the bill (H.R. 4773) was deemed read the third time, and passed.

#### VETERANS HEALTH CARE ACT OF 1992

Mr. FORD. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on H.R. 5193.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

*Resolved*, That the House agree to the amendment of the Senate to the text of the bill (H.R. 5193) entitled "An Act to improve the delivery of health-care services to eligible veterans and to clarify the authority of the Secretary of Veterans Affairs", with the following amendment:

In lieu of the matter inserted by said amendment, insert:

#### SECTION 1. SHORT TITLE; TABLE OF CONTENTS.

(a) SHORT TITLE.—This Act may be cited as the "Veterans Health Care Act of 1992".

(b) TABLE OF CONTENTS.—The table of contents of this Act is as follows:

- Sec. 1. Short title; table of contents.  
Sec. 2. References to title 38, United States Code.

#### TITLE I—WOMEN VETERANS HEALTH PROGRAMS

- Sec. 101. Short title.  
Sec. 102. Sexual trauma counseling.  
Sec. 103. Priority for outpatient care for sexual trauma counseling.  
Sec. 104. Commencement of provision of information on services.  
Sec. 105. Report on implementation of sexual trauma counseling program.  
Sec. 106. Health care services for women.  
Sec. 107. Report on health care and research.  
Sec. 108. Coordination of services.  
Sec. 109. Research relating to women veterans health.  
Sec. 110. Population study of women veterans.

#### TITLE II—HEALTH-CARE SHARING AGREEMENTS BETWEEN DEPARTMENT OF VETERANS AFFAIRS AND DEPARTMENT OF DEFENSE

- Sec. 201. Temporary expansion of authority for sharing agreements.  
Sec. 202. Requirement for improvement in services for veterans.  
Sec. 203. Expanded sharing agreements with Department of Defense.  
Sec. 204. Expiration of authority.  
Sec. 205. Consultation with veterans service organizations.  
Sec. 206. Annual report.

#### TITLE III—NURSE PAY

- Sec. 301. Revision to nurse pay grade schedule.  
Sec. 302. Authority to establish special rates of pay for employees of facilities located outside the contiguous United States, Alaska, and Hawaii.  
Sec. 303. Salary data for nurse anesthetists.  
Sec. 304. Rates of pay for transferring nurses.  
Sec. 305. Nursing personnel qualification standards.  
Sec. 306. Report on pay for chief nurse position.  
Sec. 307. Report on pay compression.

#### TITLE IV—STATE HOME AMENDMENTS

- Sec. 401. Treatment of earnings of veterans under certain rehabilitative services programs.  
Sec. 402. Permanent authority to make grants to States relating to State homes.  
Sec. 403. Extension of period for completion of conditionally approved applications for construction.  
Sec. 404. Limited prohibition on obligation of funds for rescinded projects.  
Sec. 405. Commencement date for recapture period.  
Sec. 406. Commencement date for payment of per diem.

#### TITLE V—GENERAL HEALTH CARE AND ADMINISTRATION

##### Subtitle A—General Health

- Sec. 501. Contract hospital care for veterans with permanent and total service-connected disabilities.  
Sec. 502. Permanent authority for respite care program.  
Sec. 503. Extension of authority to contract with the Veterans Memorial Medical Center, Republic of the Philippines.

##### Subtitle B—Preventive Health

- Sec. 511. National Center for Preventive Health.  
Sec. 512. Annual report on preventive health services.  
Sec. 513. Preventive health services.  
Sec. 514. Repeal of pilot program.

##### Subtitle C—Health Care Administration and Personnel

- Sec. 521. Geriatric research, education, and clinical centers.  
Sec. 522. Extension of authority to waive certain limitations applicable to receipt of retirement pay by nurses.  
Sec. 523. Health professionals education programs.  
Sec. 524. Real property at Temple Junior College, Temple, Texas.  
Sec. 525. Demonstration project to evaluate installation of telephones for patient use at Department health-care facilities.  
Sec. 526. Use of Tobacco Products in Department Facilities.

#### TITLE VI—DRUG PRICING AGREEMENTS

- Sec. 601. Treatment of prescription drugs procured by Department of Veterans Affairs or purchased by certain clinics and hospitals.  
Sec. 602. Limitations on prices of drugs purchased by certain clinics and hospitals.  
Sec. 603. Limitation on prices of drugs procured by Department of Veterans Affairs and certain other Federal agencies.

#### TITLE VII—PERSIAN GULF WAR VETERANS' HEALTH STATUS

- Sec. 701. Short title.  
Sec. 702. Persian Gulf War Veterans Health Registry.  
Sec. 703. Health examinations and counseling for veterans eligible for inclusion in certain health-related registries.  
Sec. 704. Expansion of coverage of Persian Gulf registry.  
Sec. 705. Study by Office of Technology Assessment of Persian Gulf Registry and Persian Gulf War Veterans Health Registry.  
Sec. 706. Agreement with National Academy of Sciences for review of health consequences of service during the Persian Gulf War.  
Sec. 707. Coordination of government activities on health-related research on the Persian Gulf War.  
Sec. 708. Definition.

#### TITLE VIII—COURT OF VETERANS APPEALS

- Sec. 801. Disciplinary procedures for judges of Court of Veterans Appeals.

#### SEC. 2. REFERENCES TO TITLE 38, UNITED STATES CODE.

Except as otherwise expressly provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to or repeal of a section or other provision, the reference shall be considered to be made to a section or other provision of title 38, United States Code.

#### TITLE I—WOMEN VETERANS HEALTH PROGRAMS

##### SEC. 101. SHORT TITLE.

This title may be cited as the "Women Veterans Health Programs Act of 1992".

##### SEC. 102. SEXUAL TRAUMA COUNSELING.

(a) IN GENERAL.—(1) Chapter 17 of title 38, United States Code, is amended by adding at the end of subchapter II the following new section:

##### "§ 1720D. Counseling to women veterans for sexual trauma

"(a)(1) During the period through December 31, 1995, the Secretary may provide counseling to a woman veteran who the Secretary determines requires such counseling to overcome psychological trauma, which in the judgment of a mental health professional employed by the Department, resulted from a physical assault of a sexual nature, battery of a sexual nature, or sexual harassment which occurred while the veteran was serving on active duty.

"(2) To be eligible to receive counseling under this subsection, a veteran must seek such counseling from the Secretary within two years after the date of the veteran's discharge or release from active military, naval, or air service.

"(3) In furnishing counseling to a veteran under this subsection, the Secretary may, during the period through December 31, 1994, provide such counseling pursuant to a contract with a qualified mental health professional if (A) in the judgment of a mental health professional employed by the Department, the receipt of counseling by that veteran in facilities of the Department would be clinically inadvisable, or (B) Department facilities are not capable of furnishing such counseling to that veteran economically because of geographical inaccessibility.

"(b) In providing services to a veteran under subsection (a), the period for which counseling is provided may not exceed one year from the date of the commencement of the furnishing of such counseling to the veteran. However, the Secretary may authorize a longer period in any case if, in the judgment of the Secretary, a longer period of counseling is required.

"(c)(1) The Secretary shall give priority to the establishment and operation of the program to provide counseling under subsection (a). In the case of a veteran eligible for such counseling who requires other care or services under this chapter for trauma described in subsection (a)(1), the Secretary shall ensure that the veteran is furnished counseling under this section in a way that is coordinated with the furnishing of such other care and services under this chapter.

"(2) In establishing a program to provide counseling under subsection (a), the Secretary shall—

"(A) provide for appropriate training of mental health professionals and such other health care personnel as the Secretary determines necessary to carry out the program effectively;

"(B) seek to ensure that such counseling is furnished in a setting that is therapeutically appropriate, taking into account the circumstances that resulted in the need for such counseling; and

"(C) provide referral services to assist women veterans who are not eligible for services under this chapter to obtain those from sources outside the Department.

"(d) The Secretary shall provide information on the counseling available to women veterans under this section. Efforts by the Secretary to provide such information—

"(1) may include establishment of an information system involving the use of a toll-free telephone number (commonly referred to as an 800 number), and

"(2) shall include coordination with the Secretary of Defense seeking to ensure that women who are being separated from active military, naval, or air service are provided appropriate information about programs, requirements, and procedures for applying for counseling under this section.

"(e) In this section, the term 'sexual harassment' means repeated, unsolicited verbal or physical contact of a sexual nature which is threatening in character."

(2) The table of sections at the beginning of chapter 17 is amended by inserting after the item relating to section 1720C the following new item:

"1720D. Counseling to women veterans for sexual trauma."

(b) **TRANSITION PROVISION.**—In the case of a veteran who was discharged or released from active military, naval, or air service before December 31, 1991, the two-year period specified in section 1720D(a)(2) of title 38, United States Code, as added by subsection (a), shall be treated as ending on December 31, 1993.

**SEC. 103. PRIORITY FOR OUTPATIENT CARE FOR SEXUAL TRAUMA COUNSELING.**

Section 1712(i)(2) is amended—

(1) by striking out "or (B)" and inserting in lieu thereof ", (B)"; and

(2) by inserting before the period at the end thereof the following: ", or (C) who is eligible for counseling under section 1720D of this title, for the purposes of such counseling".

**SEC. 104. COMMENCEMENT OF PROVISION OF INFORMATION ON SERVICES.**

Not later than 90 days after the date of the enactment of this Act, the Secretary of Veterans Affairs shall commence the provision of information on the counseling relating to sexual trauma that is available to women veterans under section 1720D of title 38, United States Code (as added by section 102) in accordance with the provisions of subsection (d) of that section.

**SEC. 105. REPORT ON IMPLEMENTATION OF SEXUAL TRAUMA COUNSELING PROGRAM.**

Not later than March 31, 1994, the Secretary of Veterans Affairs shall submit to the Committees on Veterans' Affairs of the Senate and House of Representatives a comprehensive report on the Secretary's actions under section 1720D of title 38, United States Code (as added by section 102), and on the use made of the authority provided under that section. The report shall include the following:

(1) The numbers of veterans who have received counseling under such section, shown by reference to the facility that provided that counseling and including the use made of the contract authority under such section.

(2) The number of veterans who received care or services under chapter 17 of title 38, United States Code, under the circumstances described in subsection (c)(1) of such section and the numbers referred to sources outside the Department, shown by reference to the facility that provided those services or made those referrals.

(3) A listing and description of the specific training programs which the Secretary has instituted to ensure that the counseling program established under such section is carried out effectively.

(4) A description of the specific efforts taken by the Secretary to ensure that the counseling furnished by the Secretary under such section is furnished in settings that are therapeutically appropriate, taking into account the circumstances that resulted in the need for such counseling.

**SEC. 106. HEALTH CARE SERVICES FOR WOMEN.**

(a) **GENERAL AUTHORITY.**—In furnishing hospital care and medical services under chapter 17 of title 38, United States Code, the Secretary of Veterans Affairs may provide to women the following health care services:

- (1) Papanicolaou tests (pap smears).
- (2) Breast examinations and mammography.

(3) General reproductive health care, including the management of menopause, but not including under this section infertility services, abortions, or pregnancy care (including prenatal and delivery care), except for such care relating to a pregnancy that is complicated or in which the risks of complication are increased by a service-connected condition.

(b) **RESPONSIBILITIES OF DIRECTORS OF FACILITIES.**—The Secretary shall ensure that directors of medical facilities of the Department identify and assess opportunities under the authority provided in title II of this Act to (1) expand the availability of, and access to, health care services for women veterans under sections 1710 and 1712 of title 38, United States Code, and (2) provide counseling, care, and services authorized by this title.

**SEC. 107. REPORT ON HEALTH CARE AND RESEARCH.**

(a) **IN GENERAL.**—Not later than January 1, 1993, January 1, 1994, and January 1, 1995, the Secretary of Veterans Affairs shall submit to the Committees on Veterans' Affairs of the Senate and House of Representatives a report on the provision of health care services and the conduct of research carried out by, or under the jurisdiction of, the Secretary relating to women veterans.

(b) **CONTENTS.**—The report under subsection (a) shall include the following information with respect to the most recent fiscal year before the date of the report:

(1) The number of women veterans who have received services described in section 106 of this Act in facilities under the jurisdiction of the Secretary (or the Secretary of Defense), shown by reference to the Department facility which provided (or, in the case of Department of Defense facilities, arranged) those services;

(2) A description of (A) the services provided at each such facility, and (B) the extent to which each such facility relies on contractual arrangements under section 1703 or 8153 of title 38, United States Code, to furnish care to women veterans in facilities which are not under the jurisdiction of the Secretary where the provision of such care is not furnished in a medical emergency.

(3) The steps taken by each such facility to expand the provision of services at such facility (or under arrangements with a Department of Defense facility) to women veterans.

(4) A description (as of October 1 of the year preceding the year in which the report is submitted) of the status of any research relating to women veterans being carried out by or under the jurisdiction of the Secretary, including research under section 109 of this Act.

**SEC. 108. COORDINATION OF SERVICES.**

The Secretary of Veterans Affairs shall ensure that an official in each regional office of the Veterans Health Administration shall serve as a coordinator of women's services. The responsibilities of such official shall include the following:

(1) Conducting periodic assessments of the needs for services of women veterans within such region.

(2) Planning to meet such needs.

(3) Assisting in carrying out the purposes of section 106(b) of this title.

(4) Coordinating the training of women veterans coordinators who are assigned to Department facilities in the region under the jurisdiction of such regional coordinator.

(5) Providing appropriate technical support and guidance to Department facilities in that region with respect to outreach activities to women veterans.

**SEC. 109. RESEARCH RELATING TO WOMEN VETERANS HEALTH.**

(a) **INITIATION AND EXPANSION OF RESEARCH.**—The Secretary of Veterans Affairs, in carrying out the Secretary's responsibilities under section 7303 of title 38, United States Code, shall foster and encourage the initiation and expansion of research relating to the health of veterans who are women.

(b) **AUTHORIZATION OF APPROPRIATIONS.**—(1) Funds are authorized to be appropriated to the Secretary to initiate new studies in accordance with subsection (a) as follows:

(A) For fiscal year 1993, \$1,500,000.

(B) For fiscal year 1994, \$2,000,000.

(C) For fiscal year 1995, \$2,500,000.

(2) Amounts appropriated pursuant to the authorization of appropriations in paragraph (1) are in addition to other funds appropriated or otherwise made available to the Department of Veterans Affairs for research.

**SEC. 110. POPULATION STUDY OF WOMEN VETERANS.**

(a) **STUDY.**—(1) The Secretary, subject to subsection (d), shall conduct a study to determine the needs of veterans who are women for health-care services. The study shall be based on an appropriate sample of veterans who are women.

(2) Before carrying out the study, the Secretary shall request the advice of the Advisory Committee on Women Veterans on the conduct of the study.

(3) In carrying out the study, the Secretary shall include in the sample veterans who are women and members of the Armed Forces serving on active duty who are women.

(b) **REPORTS.**—The Secretary shall submit to the Committees on Veterans Affairs of the Senate and House of Representatives reports relating to the study as follows:

(1) Not later than 9 months after the date of the enactment of this Act, an interim report describing (A) the information and advice obtained by the Secretary from the Advisory Committee on Women Veterans, and (B) the status of the study.

(2) Not later than December 31, 1995, a final report describing the results of the study.

(c) **AUTHORIZATION OF APPROPRIATIONS.**—There is authorized to be appropriated to the general operating expenses account of the Department of Veterans Affairs \$2,000,000 to carry out the purposes of this section. Amounts appropriated pursuant to this authorization of appropriations shall be available for obligation until expended without fiscal year limitation.

(d) **LIMITATION.**—No funds may be used to conduct the study described in subsection (a) unless expressly provided for in an appropriation Act.

**TITLE II—HEALTH-CARE SHARING AGREEMENTS BETWEEN DEPARTMENT OF VETERANS AFFAIRS AND DEPARTMENT OF DEFENSE**

**SEC. 201. TEMPORARY EXPANSION OF AUTHORITY FOR SHARING AGREEMENTS.**

The Secretary of Veterans Affairs may enter into an agreement with the Secretary of Defense under this section to expand the availability of health-care sharing arrangements with the Department of Defense under section 811(c) of title 38, United States Code. Under such an agreement—

(1) the head of a Department of Veterans Affairs medical facility may enter into agreements under section 811(d) of that title with (A) the head of a Department of Defense medical facility, (B) with any other official of the Department of Defense responsible for the provision of care under chapter 55 of title 10, United States Code, to persons who are covered beneficiaries under that chapter, in

the region of the Department of Veterans Affairs medical facility, or (C) with a contractor of the Department of Defense responsible for the provision of care under chapter 55 of title 10, United States Code, to persons who are covered beneficiaries under that chapter, in the region of the Department of Veterans Affairs medical facility; and

(2) the term "primary beneficiary" shall be treated as including—

(A) with respect to the Department of Veterans Affairs, any person who is described in section 1713 of title 38, United States Code; and

(B) with respect to the Department of Defense, any person who is a covered beneficiary under chapter 55 of title 10, United States Code.

#### SEC. 202. REQUIREMENT FOR IMPROVEMENT IN SERVICES FOR VETERANS.

A proposed agreement authorized by section 201 that is entered into by the head of a Department of Veterans Affairs medical facility may take effect only if the Chief Medical Director finds, and certifies to the Secretary of Veterans Affairs, that implementation of the agreement—

(1) will result in the improvement of services to eligible veterans at that facility; and

(2) will not result in the denial of, or a delay in providing, access to care for any veteran at that facility.

#### SEC. 203. EXPANDED SHARING AGREEMENTS WITH DEPARTMENT OF DEFENSE.

Under an agreement under section 201, guidelines under section 811(b) of title 38, United States Code, may be modified to provide that, notwithstanding any other provision of law, any person who is a covered beneficiary under chapter 55 of title 10 and who is furnished care or services by a facility of the Department of Veterans Affairs under an agreement entered into under section 811 of that title, or who is described in section 1713 of title 38, United States Code, and who is furnished care or services by a facility of the Department of Defense, may be authorized to receive such care or services—

(1) without regard to any otherwise applicable requirement for the payment of a copayment or deductible; or

(2) subject to a requirement to pay only part of any such otherwise applicable copayment or deductible, as specified in the guidelines.

#### SEC. 204. EXPIRATION OF AUTHORITY.

The authority to provide services pursuant to agreements entered into under section 201 expires on October 1, 1996.

#### SEC. 205. CONSULTATION WITH VETERANS SERVICE ORGANIZATIONS.

In carrying out this title, the Secretary of Veterans Affairs shall consult with organizations named in or approved under section 5902 of title 38, United States Code.

#### SEC. 206. ANNUAL REPORT.

(a) IN GENERAL.—For each of fiscal years 1993 through 1996, the Secretary of Defense and the Secretary of Veterans Affairs shall include in the annual report of the Secretaries under section 811(f) of title 38, United States Code, a description of the Secretaries' implementation of this section.

(b) ADDITIONAL MATTERS FOR FISCAL YEAR 1996 REPORT.—In the report under subsection (a) for fiscal year 1996, the Secretaries shall include the following:

(1) An assessment of the effect of agreements entered into under section 201 on the delivery of health care to eligible veterans.

(2) An assessment of the cost savings, if any, associated with provision of services under such agreements to retired members of the Armed Forces, dependents of members or

former members of a uniformed service, and beneficiaries under section 1713 of title 38, United States Code.

(3) Any plans for administrative action, and any recommendations for legislation, that the Secretaries consider appropriate to include in the report.

### TITLE III—NURSE PAY

#### SEC. 301. REVISION TO NURSE PAY GRADE SCHEDULE.

(a) REVISION.—Section 7404(b)(1) is amended in the matter relating to "NURSE SCHEDULE" by striking out "Director grade," and all that follows through "Entry grade," and inserting in lieu thereof the following:

"Nurse V.

"Nurse IV.

"Nurse III.

"Nurse II.

"Nurse I."

(b) CONFORMING AMENDMENT.—Section 7451(b) of such title is amended by striking out "four" and inserting in lieu thereof "five".

#### SEC. 302. AUTHORITY TO ESTABLISH SPECIAL RATES OF PAY FOR EMPLOYEES OF FACILITIES LOCATED OUTSIDE THE CONTIGUOUS UNITED STATES, ALASKA, AND HAWAII.

Section 7451(a)(3) is amended—

(1) by striking out "(3) The rates" and inserting in lieu thereof "(3)(A) Except as provided in subparagraph (B), the rates"; and

(2) by adding at the end the following new subparagraph:

"(B) Under such regulations as the Secretary shall prescribe, the Secretary shall establish and adjust the rates of basic pay for covered positions at the following health-care facilities in order to provide rates of basic pay that enable the Secretary to recruit and retain sufficient numbers of health-care personnel in such positions at those facilities:

"(i) The Veterans Memorial Medical Center in the Republic of the Philippines.

"(ii) Department of Veterans Affairs health-care facilities located outside the contiguous States, Alaska, and Hawaii."

#### SEC. 303. SALARY DATA FOR NURSE ANESTHETISTS.

Section 7451(d)(3) is amended—

(1) by redesignating subparagraphs (C) and (D) as subparagraphs (D) and (E), respectively; and

(2) by inserting after subparagraph (B) the following new subparagraph (C):

"(C)(i) A director of a Department health-care facility may use data on the beginning rates of compensation paid to certified registered nurse anesthetists who are employed on a salary basis by entities that provide anesthesia services through certified registered nurse anesthetists in the labor-market area only if the director—

"(I) has conducted a survey of beginning rates of compensation for certified registered nurse anesthetists in the local labor market area of the facility under subparagraph (B);

"(II) has used all available administrative authority with regard to collection of survey data; and

"(III) makes a determination (under regulations prescribed by the Secretary) that such survey methods are insufficient to permit the adjustments referred to in subparagraph (B) for such nurse anesthetists employed by the facility.

"(ii) For the purposes of this subparagraph, certified registered nurse anesthetists who are so employed by such entities shall be deemed to be corresponding health-care professionals to the certified registered nurse anesthetists employed by the facility.

"(iii) The authority of the director to use such additional data under this subparagraph with respect to certified registered nurse anesthetists expires on April 1, 1995."

#### SEC. 304. RATES OF PAY FOR TRANSFERRING NURSES.

(a) SAVE-PAY AUTHORITY FOR NURSES TRANSFERRING TO ANOTHER FACILITY.—Section 7452(e) is amended by striking out the period at the end and inserting in lieu thereof ", except that in the case of an employee whose transfer (other than pursuant to a disciplinary action otherwise authorized by law) to another health-care facility is at the request of the Secretary, the Secretary may provide that for at least the first year following such transfer the employee shall be paid at a rate of basic pay up to the rate applicable to such employee before the transfer, if the Secretary determines that such rate of pay is necessary to fill the position. Whenever the Secretary exercises the authority under the preceding sentence relating to the rate of basic pay of a transferred employee, the Secretary shall, in the next annual report required under section 7451(g) of this title, provide justification for doing so."

(b) CONFORMING AMENDMENT.—Section 7451(g) is amended by adding at the end the following new paragraph:

"(9) The justification required by section 7452(e) of this title."

#### SEC. 305. NURSING PERSONNEL QUALIFICATION STANDARDS.

(a) REVISION.—The Secretary of Veterans Affairs shall conduct a review of the qualification standards used for nursing personnel at Department health-care facilities and the relationship between those standards and the compression of nursing personnel in the existing intermediate and senior grades. Based upon that review, the Secretary shall revise those qualification standards—

(1) to reflect the five grade levels for nursing personnel under the Nurse Schedule, as amended by section 301; and

(2) to reduce the compression of nursing personnel in the existing intermediate and senior grades.

(b) DEADLINE FOR PRESCRIBING STANDARDS.—The Secretary shall prescribe revised qualification standards for nursing personnel pursuant to subsection (a) not later than six months after the date of the enactment of this Act.

(c) REPORT.—The Secretary shall submit to the Committees on Veterans' Affairs of the Senate and House of Representatives a report on the Secretary's findings and actions under this section. The report shall be submitted not later than six months after the date on which revised qualification standards for nursing personnel are prescribed pursuant to subsection (b).

#### SEC. 306. REPORT ON PAY FOR CHIEF NURSE POSITION.

(a) REVIEW.—The Secretary of Veterans Affairs shall conduct a review of—

(1) the process for determining the rate of basic pay applicable to the Chief Nurse position at Department of Veterans Affairs health-care facilities; and

(2) the relationship between the rate of such basic pay and the rate of basic pay applicable to nurses in positions subordinate to the Chief Nurse at the respective Department facilities.

The review shall include an assessment of the adequacy of that process in determining an equitable pay rate for the Chief Nurse position, including an assessment of the accuracy of data collected in the survey process and the difficulties in obtaining accurate data.

(b) REPORT.—The Secretary shall submit to the Committees on Veterans' Affairs of the Senate and House of Representatives a report on the review and assessment conducted under subsection (a). To the extent that the review discloses difficulties in obtaining accurate data in the survey process with respect to the Chief Nurse position at Department facilities, the Secretary shall include in the report recommendations for corrective action. The Secretary shall also include in the report (1) a listing of the salary differential (expressed as a percentage) between the Chief Nurse at a facility and the highest paid nurse (excluding certified registered nurse anesthetists) serving in a position subordinate to the Chief Nurse, and (2) an analysis of such data. The report shall be submitted not later than 12 months after the date of the enactment of this Act.

#### SEC. 307. REPORT ON PAY COMPRESSION.

Section 7451(g) (as amended by section 304(b)) is further amended by adding at the end the following new paragraph:

"(10) The number of nurses, shown by facility and by grade, who are on pay retention or in the top step of any grade and, with respect to those employees, comprehensive information (by facility) as to whether an extension of the pay grades was sought for these positions, and with respect to each such request for extension, whether such request was granted or denied."

#### SEC. 308. EFFECTIVE DATE.

The amendments made by sections 301, 302, 303, and 304 shall take effect with respect to the first pay period beginning on or after the end of the six-month period beginning on the date of the enactment of this Act.

### TITLE IV—STATE HOME AMENDMENTS

#### SEC. 401. TREATMENT OF EARNINGS OF VETERANS UNDER CERTAIN REHABILITATIVE SERVICES PROGRAMS.

Subsection (f) of section 1718 is amended to read as follows:

"(f)(1) The Secretary may not consider any of the matters stated in paragraph (2) as a basis for the denial or discontinuance of a rating of total disability for purposes of compensation or pension based on the veteran's inability to secure or follow a substantially gainful occupation as a result of disability.

"(2) Paragraph (1) applies to the following:  
 "(A) A veteran's participation in an activity carried out under this section.

"(B) A veteran's receipt of a distribution as a result of participation in an activity carried out under this section.

"(C) A veteran's participation in a program of rehabilitative services that (i) is provided as part of the veteran's care furnished by a State home and (ii) is approved by the Secretary as conforming appropriately to standards for activities carried out under this section.

"(D) A veteran's receipt of payment as a result of participation in a program described in subparagraph (C).

"(3) A distribution of funds made under this section and a payment made to a veteran under a program of rehabilitative services described in paragraph (2)(C) shall be considered for the purposes of chapter 15 of this title to be a donation from a public or private relief or welfare organization."

#### SEC. 402. PERMANENT AUTHORITY TO MAKE GRANTS TO STATES RELATING TO STATE HOMES.

Section 8133(a) is amended in the first sentence by striking out "through September 30, 1992".

#### SEC. 403. EXTENSION OF PERIOD FOR COMPLETION OF CONDITIONALLY APPROVED APPLICATIONS FOR CONSTRUCTION.

(a) EXTENSION OF PERIOD.—Section 8135(b)(6)(A) is amended by striking out "90 days" and inserting in lieu thereof "180 days".

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply to projects that are conditionally approved after September 30, 1992.

#### SEC. 404. LIMITED PROHIBITION ON OBLIGATION OF FUNDS FOR RESCINDED PROJECTS.

(a) PROHIBITION.—Section 8135(b)(6)(B) is amended by adding at the end the following: "In the event the Secretary rescinds conditional approval of a project under this subparagraph, the Secretary may not further obligate funds for the project during the fiscal year in which the Secretary rescinds such approval."

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply to rescissions of conditional approval of projects after the date of the enactment of this Act.

#### SEC. 405. COMMENCEMENT DATE FOR RECAPTURE PERIOD.

(a) COMMENCEMENT DATE.—Section 8136 is amended by striking out "If, within 20 years after completion of any project" and inserting in lieu thereof "If, within the 20-year period beginning on the date of the approval by the Secretary of the final architectural and engineering inspection of any project".

(b) TECHNICAL AMENDMENT.—Such section is further amended by striking out "such facilities cease" and inserting in lieu thereof "the facilities covered by the project cease".

#### SEC. 406. COMMENCEMENT DATE FOR PAYMENT OF PER DIEM.

Section 1741 is amended by adding at the end the following new subsection:

"(e) Subject to section 1743 of this title, the payment of per diem for care furnished in a State home facility shall commence on the date of the completion of the inspection for recognition of the facility under section 1742(a) of this title if the Secretary determines, as a result of that inspection, that the State home meets the standards described in such section."

### TITLE V—GENERAL HEALTH CARE AND ADMINISTRATION

#### Subtitle A—General Health

#### SEC. 501. CONTRACT HOSPITAL CARE FOR VETERANS WITH PERMANENT AND TOTAL SERVICE-CONNECTED DISABILITIES.

Section 1703(a)(1) is amended—

(1) by striking out "or" at the end of subparagraph (A);

(2) by striking out the period at the end of subparagraph (B) and inserting in lieu thereof "; or"; and

(3) by adding at the end the following new subparagraph:

"(C) a disability of a veteran who has a total disability permanent in nature from a service-connected disability."

#### SEC. 502. PERMANENT AUTHORITY FOR RESPITE CARE PROGRAM.

Section 1720B is amended by striking out subsection (c).

#### SEC. 503. EXTENSION OF AUTHORITY TO CONTRACT WITH THE VETERANS MEMORIAL MEDICAL CENTER, REPUBLIC OF THE PHILIPPINES.

Section 1732(a) is amended by striking out "September 30, 1992" and inserting in lieu thereof "September 30, 1994".

#### Subtitle B—Preventive Health

#### SEC. 511. NATIONAL CENTER FOR PREVENTIVE HEALTH.

(a) ESTABLISHMENT.—(1) Subchapter II of chapter 73 is amended by adding at the end the following new section:

#### "§ 7318. National Center for Preventive Health

"(a)(1) The Chief Medical Director shall establish and operate in the Veterans Health Administration a National Center for Preventive Health (hereinafter in this section referred to as the 'Center'). The Center shall be located at a Department health care facility.

"(2) The head of the Center is the Director of Preventive Health (hereinafter in this section referred to as the 'Director').

"(3) The Chief Medical Director shall provide the Center with such staff and other support as may be necessary for the Center to carry out effectively its functions under this section.

"(b) The purposes of the Center are the following:

"(1) To provide a central office for monitoring and encouraging the activities of the Veterans Health Administration with respect to the provision, evaluation, and improvement of preventive health services.

"(2) To promote the expansion and improvement of clinical, research, and educational activities of the Veterans Health Administration with respect to such services.

"(c) In carrying out the purposes of the Center, the Director shall do the following:

"(1) Develop and maintain current information on clinical activities of the Veterans Health Administration relating to preventive health services, including activities relating to—

"(A) the on-going provision of regularly-furnished services; and

"(B) patient education and screening programs carried out throughout the Administration.

"(2) Develop and maintain detailed current information on research activities of the Veterans Health Administration relating to preventive health services.

"(3) In order to encourage the effective provision of preventive health services by Veterans Health Administration personnel—

"(A) ensure the dissemination to such personnel of any appropriate information on such services that is derived from research carried out by the Administration; and

"(B) acquire and ensure the dissemination to such personnel of any appropriate information on research and clinical practices relating to such services that are carried out by researchers, clinicians, and educators who are not affiliated with the Administration.

"(4) Facilitate the optimal use of the unique resources of the Department for cooperative research into health outcomes by initiating recommendations, and responding to requests of the Chief Medical Director and the Director of the Medical and Prosthetic Research Service, for such research into preventive health services.

"(5) Provide advisory services to personnel of Department health-care facilities with respect to the planning or furnishing of preventive health services by such personnel.

"(d) There is authorized to be appropriated \$1,500,000 to the Medical Care General and Special Fund of the Department of Veterans Affairs for each fiscal year for the purpose of permitting the National Center for Preventive Health to carry out research, clinical, educational, and administrative activities under this section. Such activities shall be

considered to be part of the operation of health-care facilities of the Department without regard to the location at which such activities are carried out.

"(e) In this section, the term 'preventive health services' has the meaning given such term in section 1701(9) of this title."

(2) The table of sections at the beginning of chapter 73 is amended by inserting after the item relating section 7317 the following new item:

"7318. National Center for Preventive Health."

(b) DIRECTOR OF CENTER.—(1) Subsection (a) of section 7306 is amended—

(A) by redesignating paragraph (7) as paragraph (8); and

(B) by inserting after paragraph (6) the following new paragraph (7):

"(7) The Director of the National Center for Preventive Health, who shall be responsible to the Chief Medical Director for the operation of the Center."

(2) Subsection (c) of such section is amended in the second sentence by striking out "and (4)" and inserting in lieu thereof "(4), and (7)".

(c) SELECTION OF FACILITY AT WHICH CENTER IS TO BE ESTABLISHED.—In order to establish the National Center for Preventive Health pursuant to section 7318 of title 38, United States Code, as added by subsection (a), the Chief Medical Director of the Department of Veterans Affairs shall solicit proposals from Department health care facilities to establish the center. The Chief Medical Director shall establish such center at the facility or facilities which the Chief Medical Director determines, on the basis of a review and analysis of such proposals, would most effectively carry out the purposes set forth in subsection (b) of such section.

**SEC. 512. ANNUAL REPORT ON PREVENTIVE HEALTH SERVICES.**

(a) ANNUAL REPORT.—Chapter 17 is amended by inserting after section 1703 the following new section:

**"§ 1704. Preventive health services: annual report**

"Not later than October 31 each year, the Secretary shall submit to the Committees on Veterans' Affairs of the Senate and House of Representatives a report on preventive health services. Each such report shall include the following:

"(1) A description of the programs and activities of the Department with respect to preventive health services during the preceding fiscal year, including a description of the following:

"(A) The programs conducted by the Department—

"(i) to educate veterans with respect to health promotion and disease prevention; and

"(ii) to provide veterans with preventive health screenings and other clinical services, with such description setting forth the types of resources used by the Department to conduct such screenings and services and the number of veterans reached by such screenings and services.

"(B) The means by which the Secretary addressed the specific preventive health services needs of particular groups of veterans (including veterans with service-connected disabilities, elderly veterans, low-income veterans, women veterans, institutionalized veterans, and veterans who are at risk for mental illness).

"(C) The manner in which the provision of such services was coordinated with the activities of the Medical and Prosthetic Research Service of the Department and the National Center for Preventive Health.

"(D) The manner in which the provision of such services was integrated into training programs of the Department, including initial and continuing medical training of medical students, residents, and Department staff.

"(E) The manner in which the Department participated in cooperative preventive health efforts with other governmental and private entities (including State and local health promotion offices and not-for-profit organizations).

"(F) The specific research carried out by the Department with respect to the long-term relationships among screening activities, treatment, and morbidity and mortality outcomes.

"(G) The cost effectiveness of such programs and activities, including an explanation of the means by which the costs and benefits (including the quality of life of veterans who participate in such programs and activities) of such programs and activities are measured.

"(2) A specific description of research activities on preventive health services carried out during that period using employees, funds, equipment, office space, or other support services of the Department, with such description setting forth—

"(A) the source of funds for those activities;

"(B) the articles or publications (including the authors of the articles and publications) in which those activities are described;

"(C) the Federal, State, or local governmental entity or private entity, if any, with which such activities were carried out; and

"(D) the clinical, research, or staff education projects for which funding applications were submitted (including the source of the funds applied for) and upon which a decision is pending or was denied.

"(3) An accounting of the expenditure of funds during that period by the National Center for Preventive Health under section 7318 of this title."

(b) CLERICAL AMENDMENT.—The table of sections at the beginning of such chapter is amended by inserting after the item relating to section 1703 the following new item:

"1704. Preventive health services: annual report."

**SEC. 513. PREVENTIVE HEALTH SERVICES.**

(a) IN GENERAL.—The text of section 1762 is transferred to the end of section 1701, redesignated as paragraph (9), and amended—

(1) by striking out "For the purposes of this subchapter, the term 'preventive health-care services' means" and inserting in lieu thereof "The term 'preventive health services' means"; and

(2) by redesignating paragraphs (1), (2), (3), (4), (5), (6), (7), (8), (9), (10), and (11) as subparagraphs (A), (B), (C), (D), (E), (F), (G), (H), (I), (J), and (K), respectively.

(b) CONFORMING AMENDMENT.—Section 1701(6)(A)(i) is amended by striking out "preventive health-care services as defined in section 1762 of this title," and inserting in lieu thereof "preventive health services."

**SEC. 514. REPEAL OF PILOT PROGRAM.**

(a) REPEAL.—Subchapter VII of chapter 17 is repealed.

(b) CLERICAL AMENDMENT.—The table of sections at the beginning of chapter 17 is amended by striking out the items relating to subchapter VII (including the items relating to the sections of that subchapter).

**Subtitle C—Health Care Administration and Personnel**

**SEC. 521. GERIATRIC RESEARCH, EDUCATION, AND CLINICAL CENTERS.**

Section 7314 is amended—

(1) in subsection (c), by inserting after "unless" in the matter preceding paragraph (1) the following: "the peer review panel established under subsection (d) has determined under that subsection that the proposal submitted by such facility as a location for a new center under subsection (a) is among those proposals which have met the highest competitive standards of scientific and clinical merit, and";

(2) by redesignating subsections (d), (e), and (f) as subsections (e), (f), and (g), respectively; and

(3) by inserting after subsection (c) the following new subsection (d):

"(d)(1) In order to provide advice to assist the Chief Medical Director and the Secretary to carry out their responsibilities under this section, the Assistant Chief Medical Director described in section 7306(b)(3) of this title shall establish a panel to assess the scientific and clinical merit of proposals that are submitted to the Secretary for the establishment of new centers under this section.

"(2) The membership of the panel shall consist of experts in the fields of geriatric and gerontological research, education, and clinical care. Members of the panel shall serve as consultants to the Department for a period of no longer than six months.

"(3) The panel shall review each proposal submitted to the panel by the Assistant Chief Medical Director and shall submit its views on the relative scientific and clinical merit of each such proposal to the Assistant Chief Medical Director.

"(4) The panel shall not be subject to the Federal Advisory Committee Act."

**SEC. 522. EXTENSION OF AUTHORITY TO WAIVE CERTAIN LIMITATIONS APPLICABLE TO RECEIPT OF RETIREMENT PAY BY NURSES.**

Section 7426(c) is amended by striking out "September 30, 1992" and inserting in lieu thereof "December 31, 1994".

**SEC. 523. HEALTH PROFESSIONALS EDUCATION PROGRAMS.**

(a) EXTENSION OF HEALTH SCHOLARSHIP PROGRAM.—Section 7618 is amended by striking out "September 30, 1992" and inserting in lieu thereof "December 31, 1995".

(b) HEALTH PROFESSIONALS.—Notwithstanding any other provision of law, the Secretary of Veterans Affairs may not provide payments to health-care professional employees of the Department of Veterans Affairs for payment of tuition loans.

**SEC. 524. REAL PROPERTY AT TEMPLE JUNIOR COLLEGE, TEMPLE, TEXAS.**

(a) REMOVAL OF RESTRICTIONS ON USE OF PREVIOUSLY CONVEYED LAND.—Subject to subsection (b), the Secretary of Veterans Affairs shall release all restrictions and conditions (including a right of reverter) imposed in a quitclaim deed executed by the Administrator of Veterans' Affairs on March 8, 1968, pursuant to Public Law 90-197 (81 Stat. 582; December 14, 1967), in which the United States, acting through the Administrator of Veterans Affairs, conveyed a tract of land consisting of 73 acres, more or less, to Temple Junior College, Temple, Texas.

(b) REQUIREMENT FOR PAYMENT.—Subsection (a) shall be effective upon the payment to the Secretary of Veterans Affairs of such monetary consideration as the Secretary determines to be appropriate. Any amount received by the Secretary pursuant to this subsection shall be deposited in the general fund of the Treasury.

(c) EXECUTION OF LEGAL INSTRUMENTS.—The Secretary of Veterans Affairs shall execute such legal documents as necessary to carry out subsection (a). The Secretary may

include in such legal documents such terms, conditions, reservations, easements, and restrictions (other than those released pursuant to subsection (a)) as the Secretary considers necessary to protect the interest of the United States.

**SEC. 525. DEMONSTRATION PROJECT TO EVALUATE INSTALLATION OF TELEPHONES FOR PATIENT USE AT DEPARTMENT HEALTH-CARE FACILITIES.**

(a) **DEMONSTRATION PROJECT.**—The Secretary of Veterans Affairs shall carry out a demonstration project to evaluate—

(1) the feasibility and desirability of (A) providing telephone service in patient rooms in Department of Veterans Affairs health-care facilities which do not currently provide such service, and (B) the use of telephones by the patients of such health-care facilities; and

(2) the relative feasibility and cost-effectiveness of a variety of options for providing such service.

(b) **PROJECT ACTIVITIES.**—(1) In carrying out the demonstration project under this section, the Secretary shall, at an appropriate number (as determined by the Secretary) of health care facilities, provide patients reasonable access to telephone service in patients' rooms to the extent feasible, and subject to paragraph (2).

(2) The Secretary shall ensure that patients who use such telephones bear financial responsibility for the cost of any long-distance telephone calls made during such use.

(c) **PROJECT EVALUATION.**—In carrying out the evaluation under subsection (a), the Secretary shall determine—

(1) the cost of the installation, use, and maintenance of such telephones, including—

(A) the amount of any savings which accrue to the facility by reason of such installation and use (including the amount of any savings that may result from any decrease in the amount of assistance in using telephones that the staff of the facility would otherwise provide to patients); and

(B) any costs that result from providing special telephones or other special equipment to facilitate the use of telephones by disabled veterans; and

(2) the effect of the use of such telephones on the therapeutic course of veterans who receive care at the facility; and

(3) the relative feasibility and cost effectiveness of a range of options for providing access to telephone service, including—

(A) the expenditure of appropriated funds;

(B) the receipt of donated funds, equipment, and services; and

(C) the procuring of equipment and services by the Veterans Canteen Service.

(d) **REPORT.**—Not later than September 30, 1994, the Secretary shall submit to the Committees on Veterans' Affairs of the Senate and the House of Representatives a report on the demonstration project. The report shall contain the following:

(1) The determinations of the Secretary under subsection (c).

(2) An assessment by the Secretary of the feasibility and desirability of providing telephones for patients in other health-care facilities of the Department.

(3) The experience of the Secretary in using, and an assessment by the Secretary of the feasibility and cost effectiveness of, alternative arrangements to the expenditure of appropriated funds for securing telephone service for patients in health-care facilities of the Department.

(4) Any additional information and recommendations with respect to the provision and use of patient telephones at Department health-care facilities as the Secretary considers appropriate.

**SEC. 526. USE OF TOBACCO PRODUCTS IN DEPARTMENT FACILITIES.**

(a) **IN GENERAL.**—The Secretary of Veterans Affairs shall take appropriate actions to ensure that, consistent with medical requirements and limitations, each facility of the Department described in subsection (b)—

(1) establishes and maintains—

(A) a suitable indoor area in which patients or residents may smoke and which is ventilated in a manner that, to the maximum extent feasible, prevents smoke from entering other areas of the facility; or

(B) an area in a building that—

(i) is detached from the facility;

(ii) is accessible to patients or residents of the facility; and

(iii) has appropriate heating and air conditioning; and

(2) provides access to an area established and maintained under paragraph (1), consistent with medical requirements and limitations, for patients or residents of the facility who are receiving care or services (other than acute medical or surgical care or services) and who desire to smoke tobacco products.

(b) **COVERED FACILITIES.**—A Department facility referred to in subsection (a) is any Department of Veterans Affairs medical center, nursing home, or domiciliary care facility.

(c) **REPORTS.**—(1) Not later than 180 days after the date of the enactment of this Act, the Comptroller General shall submit to the Committees on Veterans' Affairs of the Senate and House of Representatives a report on the feasibility of the establishment and maintenance of areas for smoking in Department facilities under this section. The report shall include information on—

(A) the cost of, and a proposed schedule for, the establishment of such an area at each Department facility covered by this section;

(B) the extent to which the ventilating system of each facility is adequate to ensure that use of the area for smoking does not result in health problems for other patients or residents of the facility; and

(C) the effect of the establishment and maintenance of an area for smoking in each facility on the accreditation score issued for the facility by the Joint Commission on the Accreditation of Health Organizations.

(2) Not later than 120 days after the effective date of this section, the Secretary shall submit to the committees referred to in paragraph (1) a report on the implementation of this section. The report shall include a description of the actions taken at each covered facility to ensure compliance with this section.

(d) **EFFECTIVE DATE.**—The requirement to establish and maintain areas for smoking under subsection (a) shall take effect 60 days after the date on which the Comptroller General submits to the committees referred to in subsection (c)(1) that report required under that subsection.

**TITLE VI—DRUG PRICING AGREEMENTS**  
**SEC. 601. TREATMENT OF PRESCRIPTION DRUGS PROCURED BY DEPARTMENT OF VETERANS AFFAIRS OR PURCHASED BY CERTAIN CLINICS AND HOSPITALS.**

(a) **EXCLUSION OF PRICES FROM CALCULATION OF BEST PRICES FOR MEDICAID REBATE AGREEMENTS.**—Section 1927(c)(1)(C) of the Social Security Act (42 U.S.C. 1396r-8(c)(1)(C)) is amended by striking "(excluding)" and inserting "(excluding any prices charged on or after October 1, 1992, to the Indian Health Service, the Department of Veterans Affairs, a State home receiving funds

under section 1741 of title 38, United States Code, the Department of Defense, the Public Health Service, or a covered entity described in subsection (a)(5)(B), any prices charged under the Federal Supply Schedule of the General Services Administration, or any prices used under a State pharmaceutical assistance program, and excluding".

(b) **AGREEMENTS REQUIRED TO RECEIVE PAYMENT.**—

(1) **IN GENERAL.**—The first sentence of section 1927(a)(1) of such Act (42 U.S.C. 1396r-8(a)(1)) is amended by striking "manufacturer)" and inserting "manufacturer)", and must meet the requirements of paragraph (5) (with respect to drugs purchased by a covered entity on or after the first day of the first month that begins after the date of the enactment of title VI of the Veterans Health Care Act of 1992) and paragraph (6)".

(2) **AGREEMENTS DESCRIBED.**—Section 1927(a) of such Act (42 U.S.C. 1396r-8(a)) is amended by adding at the end the following new paragraphs:

"(5) **LIMITATION ON PRICES OF DRUGS PURCHASED BY COVERED ENTITIES.**—

"(A) **AGREEMENT WITH SECRETARY.**—A manufacturer meets the requirements of this paragraph if the manufacturer has entered into an agreement with the Secretary that meets the requirements of section 340B of the Public Health Service Act with respect to covered outpatient drugs purchased by a covered entity on or after the first day of the first month that begins after the date of the enactment of this paragraph.

"(B) **COVERED ENTITY DEFINED.**—In this subsection, the term 'covered entity' means an entity described in section 340B(a)(4) of the Public Health Service Act.

"(C) **ESTABLISHMENT OF ALTERNATIVE MECHANISM TO ENSURE AGAINST DUPLICATE DISCOUNTS OR REBATES.**—If the Secretary does not establish a mechanism under section 340B(a)(5)(A) of the Public Health Service Act within 12 months of the date of the enactment of such section, the following requirements shall apply:

"(i) **ENTITIES.**—Each covered entity shall inform the single State agency under section 1902(a)(5) when it is seeking reimbursement from the State plan for medical assistance described in section 1905(a)(12) with respect to a unit of any covered outpatient drug which is subject to an agreement under section 340B(a) of such Act.

"(ii) **STATE AGENCY.**—Each such single State agency shall provide a means by which a covered entity shall indicate on any drug reimbursement claims form (or format, where electronic claims management is used) that a unit of the drug that is the subject of the form is subject to an agreement under section 340B of such Act, and not submit to any manufacturer a claim for a rebate payment under subsection (b) with respect to such a drug.

"(D) **EFFECT OF SUBSEQUENT AMENDMENTS.**—In determining whether an agreement under subparagraph (A) meets the requirements of section 340B of the Public Health Service Act, the Secretary shall not take into account any amendments to such section that are enacted after the enactment of title VI of the Veterans Health Care Act of 1992.

"(E) **DETERMINATION OF COMPLIANCE.**—A manufacturer is deemed to meet the requirements of this paragraph if the manufacturer establishes to the satisfaction of the Secretary that the manufacturer would comply (and has offered to comply) with the provisions of section 340B of the Public Health Service Act (as in effect immediately after the

enactment of this paragraph) and would have entered into an agreement under such section (as such section was in effect at such time), but for a legislative change in such section after the date of the enactment of this paragraph.

"(6) REQUIREMENTS RELATING TO MASTER AGREEMENTS FOR DRUGS PROCURED BY DEPARTMENT OF VETERANS AFFAIRS AND CERTAIN OTHER FEDERAL AGENCIES.—

"(A) IN GENERAL.—A manufacturer meets the requirements of this paragraph if the manufacturer complies with the provisions of section 8126 of title 38, United States Code, including the requirement of entering into a master agreement with the Secretary of Veterans Affairs under such section.

"(B) EFFECT OF SUBSEQUENT AMENDMENTS.—In determining whether a master agreement described in subparagraph (A) meets the requirements of section 8126 of title 38, United States Code, the Secretary shall not take into account any amendments to such section that are enacted after the enactment of title VI of the Veterans Health Care Act of 1992.

"(C) DETERMINATION OF COMPLIANCE.—A manufacturer is deemed to meet the requirements of this paragraph if the manufacturer establishes to the satisfaction of the Secretary that the manufacturer would comply (and has offered to comply) with the provisions of section 8126 of title 38, United States Code (as in effect immediately after the enactment of this paragraph) and would have entered into an agreement under such section (as such section was in effect at such time), but for a legislative change in such section after the date of the enactment of this paragraph."

(3) CONFIDENTIALITY OF INFORMATION.—Section 1927(b)(3)(D) of such Act (42 U.S.C. 1396r-8(b)(3)(D)) is amended—

(A) by striking "this paragraph" and inserting "this paragraph or under an agreement with the Secretary of Veterans Affairs described in subsection (a)(6)(A)(ii)";

(B) by striking "Secretary" each place it appears and inserting "Secretary or the Secretary of Veterans Affairs"; and

(C) by striking "except" and all that follows through the period and inserting: "except—

(i) as the Secretary determines to be necessary to carry out this section,

(ii) to permit the Comptroller General to review the information provided, and

(iii) to permit the Director of the Congressional Budget Office to review the information provided."

(4) TERMINATION OF REBATE AGREEMENTS.—Section 1927(b)(4)(B) of such Act (42 U.S.C. 1396r-8(b)(4)(B)) is amended—

(i) in clause (ii), by striking "such period" and inserting "the calendar quarter beginning at least 60 days";

(ii) in clause (ii), by striking "of the notice" and all through "the agreement." and inserting "the manufacturer provides notice to the Secretary.", and

(iii) by adding at the end the following new clauses:

"(iv) NOTICE TO STATES.—In the case of a termination under this subparagraph, the Secretary shall provide notice of such termination to the States within not less than 30 days before the effective date of such termination.

"(v) APPLICATION TO TERMINATIONS OF OTHER AGREEMENTS.—The provisions of this subparagraph shall apply to the terminations of agreements described in section 340B(a)(1) of the Public Health Service Act and master agreements described in section 8126(a) of title 38, United States Code."

(c) BUDGET NEUTRALITY ADJUSTMENT.—Section 1927(c)(1)(B) of the Social Security Act (42 U.S.C. 1396r-8(c)(1)(B)) is amended—

(1) by striking "January 1, 1993," and inserting "October 1, 1992,";

(2) by striking "and" at the end of clause (i); and

(3) by striking clause (ii) and inserting the following:

"(ii) for quarters (or other periods) beginning after September 30, 1992, and before January 1, 1994, the greater of—

"(I) 15.7 percent of the average manufacturer price for the drug, or

"(II) the difference between the average manufacturer price for the drug and the best price (as defined in subparagraph (C)) for such quarter (or period) for such drug;

"(iii) for quarters (or other periods) beginning after December 31, 1993, and before January 1, 1995, the greater of—

"(I) 15.4 percent of the average manufacturer price for the drug, or

"(II) the difference between the average manufacturer price for the drug and the best price (as defined in subparagraph (C)) for such quarter (or period) for such drug;

"(iv) for quarters (or other periods) beginning after December 31, 1994, and before January 1, 1996, the greater of—

"(I) 15.2 percent of the average manufacturer price for the drug, or

"(II) the difference between the average manufacturer price for the drug and the best price (as defined in subparagraph (C)) for such quarter (or period) for such drug; and

"(v) for quarters (or other periods) beginning after December 31, 1995, the greater of—

"(I) 15.1 percent of the average manufacturer price for the drug, or

"(II) the difference between the average manufacturer price for the drug and the best price (as defined in subparagraph (C)) for such quarter (or period) for such drug."

(d) REPORTS ON BEST PRICE CHANGES AND PAYMENT OF REBATES.—

(1) IN GENERAL.—Not later than 90 days after the expiration of each calendar quarter that begins on or after October 1, 1992, and ends on or before December 31, 1995, the Secretary of Health and Human Services shall submit a report to Congress that contains the following information relating to prescription drugs dispensed in the quarter (subject to paragraph (2)):

(A) With respect to single source drugs and innovator multiple source drugs (as such terms are defined in section 1927(k)(7) of the Social Security Act)—

(i) the percentage of such drugs whose best price (as reported to the Secretary under section 1927(b) of the Social Security Act) increased compared to the best price during the previous calendar quarter, and the amount of expenditures under State plans under title XIX of such Act attributable to such drugs;

(ii) the percentage of such drugs whose best price (as so reported) decreased compared to the best price during the previous calendar quarter, and the amount of expenditures under State plans under title XIX of such Act attributable to such drugs;

(iii) the percentage of such drugs whose best price (as so reported) was the same as the best price during the previous calendar quarter, and the amount of expenditures under State plans under title XIX of such Act attributable to such drugs;

(iv) the median and mean percentage increase (or decrease) in the best price of such single source drugs (as so reported) compared to the best price during the previous calendar quarter, unweighted and weighted (in

the case of the mean percentage increase or decrease) by the dollar volume of drugs dispensed;

(v) the median and mean percentage increase (or decrease) in the best price of such innovator multiple source drugs (as so reported) compared to the best price during the previous calendar quarter, unweighted and weighted (in the case of the mean percentage increase or decrease) by the dollar volume of drugs dispensed; and

(vi) the median and mean percentage increase (or decrease) in the best price of all such drugs (as so reported) compared to the best price during the previous calendar quarter, unweighted and weighted (in the case of the mean percentage increase or decrease) by the dollar volume of drugs dispensed.

(B) With respect to all drugs for which manufacturers are required to pay rebates under section 1927(c) of the Social Security Act, the Secretary's estimate, on a State-by-State and a national aggregate basis, of—

(i) the total amount of all rebates paid under such section during the quarter, broken down by the portions of such total amount attributable to rebates described in paragraphs (1), (2), and (3) of such section;

(ii) the percentages of such total amount attributable to rebates described in paragraphs (1), (2), and (3) of such section; and

(iii) the amount of the portion of such total amount attributable to the rebate described in paragraph (1) of such section that is solely attributable to the application of subclause (II) of clause (i), (ii), (iii), (iv), or (v) of such paragraph.

(2) LIMITATION ON DRUGS SUBJECT TO REPORT.—No report submitted under paragraph (1) shall include any information relating to any prescription drug unless the Secretary finds that expenditures for the drug are significant expenditures under the Medicaid program. In the previous sentence, expenditures for a drug are "significant" if the drug was one of the 1,000 drugs for which the greatest amount of the Federal financial assistance attributable to prescription drugs was paid under section 1903(a) of the Social Security Act during calendar year 1991.

(3) SPECIAL RULE FOR INITIAL REPORT.—For purposes of the first report required to be submitted under paragraph (1)—

(A) the Secretary shall submit the report not later than May 1, 1993; and

(B) the information contained in the report shall include information on prescription drugs dispensed during each calendar quarter that began on or after January 1, 1991, and ended on or before December 31, 1992.

(e) EFFECTIVE DATE.—The amendments made by this section shall apply with respect to payments to State plans under title XIX of the Social Security Act for calendar quarters (or periods) beginning on or after January 1, 1993 (without regard to whether or not regulations to carry out such amendments have been promulgated by such date).

**SEC. 602. LIMITATIONS ON PRICES OF DRUGS PURCHASED BY CERTAIN CLINICS AND HOSPITALS.**

(a) IN GENERAL.—Part D of title III of the Public Health Service Act is amended by adding the following subpart:

"Subpart VII—Drug Pricing Agreements  
"LIMITATION ON PRICES OF DRUGS PURCHASED BY COVERED ENTITIES

"SEC. 340B. (a) REQUIREMENTS FOR AGREEMENT WITH SECRETARY.—

"(1) IN GENERAL.—The Secretary shall enter into an agreement with each manufacturer of covered drugs under which the amount required to be paid (taking into account any rebate or discount, as provided by

the Secretary) to the manufacturer for covered drugs (other than drugs described in paragraph (3)) purchased by a covered entity on or after the first day of the first month that begins after the date of the enactment of this section, does not exceed an amount equal to the average manufacturer price for the drug under title XIX of the Social Security Act in the preceding calendar quarter, reduced by the rebate percentage described in paragraph (2).

**"(2) REBATE PERCENTAGE DEFINED.—**

**"(A) IN GENERAL.—**For a covered outpatient drug purchased in a calendar quarter, the 'rebate percentage' is the amount (expressed as a percentage) equal to—

**"(i)** the average total rebate required under section 1927(c) of the Social Security Act with respect to the drug (for a unit of the dosage form and strength involved) during the preceding calendar quarter; divided by

**"(ii)** the average manufacturer price for such a unit of the drug during such quarter.

**"(B) OVER THE COUNTER DRUGS.—**

**"(i) IN GENERAL.—**For purposes of subparagraph (A), in the case of over the counter drugs, the 'rebate percentage' shall be determined as if the rebate required under section 1927(c) of the Social Security Act is based on the applicable percentage provided under section 1927(c)(4) of such Act.

**"(ii) DEFINITION.—**The term 'over the counter drug' means a drug that may be sold without a prescription and which is prescribed by a physician (or other persons authorized to prescribe such drug under State law).

**"(3) DRUGS PROVIDED UNDER STATE MEDICAID PLANS.—**Drugs described in this paragraph are drugs purchased by the entity for which payment is made by the State under the State plan for medical assistance under title XIX of the Social Security Act.

**"(4) COVERED ENTITY DEFINED.—**In this section, the term 'covered entity' means an entity that meets the requirements described in paragraph (5) and is one of the following:

**"(A)** A Federally-qualified health center (as defined in section 1905(l)(2)(B) of the Social Security Act).

**"(B)** An entity receiving a grant under section 340A.

**"(C)** A family planning project receiving a grant or contract under section 1001.

**"(D)** An entity receiving a grant under subpart II of part C of title XXVI (relating to categorical grants for outpatient early intervention services for HIV disease).

**"(E)** A State-operated AIDS drug purchasing assistance program receiving financial assistance under title XXVI.

**"(F)** A black lung clinic receiving funds under section 427(a) of the Black Lung Benefits Act.

**"(G)** A comprehensive hemophilia diagnostic treatment center receiving a grant under section 501(a)(2) of the Social Security Act.

**"(H)** A Native Hawaiian Health Center receiving funds under the Native Hawaiian Health Care Act of 1988.

**"(I)** An urban Indian organization receiving funds under title V of the Indian Health Care Improvement Act.

**"(J)** Any entity receiving assistance under title XXVI (other than a State or unit of local government or an entity described in subparagraph (D)), but only if the entity is certified by the Secretary pursuant to paragraph (7).

**"(K)** An entity receiving funds under section 318 (relating to treatment of sexually transmitted diseases) or section 317(j)(2) (re-

lating to treatment of tuberculosis) through a State or unit of local government, but only if the entity is certified by the Secretary pursuant to paragraph (7).

**"(L)** A subsection (d) hospital (as defined in section 1886(d)(1)(B) of the Social Security Act) that—

**"(i)** is owned or operated by a unit of State or local government, is a public or private non-profit corporation which is formally granted governmental powers by a unit of State or local government, or is a private non-profit hospital which has a contract with a State or local government to provide health care services to low income individuals who are not entitled to benefits under title XVIII of the Social Security Act or eligible for assistance under the State plan under this title;

**"(ii)** for the most recent cost reporting period that ended before the calendar quarter involved, had a disproportionate share adjustment percentage (as determined under section 1886(d)(5)(F) of the Social Security Act) greater than 11.75 percent or was described in section 1886(d)(5)(F)(i)(II) of such Act; and

**"(iii)** does not obtain covered outpatient drugs through a group purchasing organization or other group purchasing arrangement.

**"(5) REQUIREMENTS FOR COVERED ENTITIES.—**

**"(A) PROHIBITING DUPLICATE DISCOUNTS OR REBATES.—**

**"(i) IN GENERAL.—**A covered entity shall not request payment under title XIX of the Social Security Act for medical assistance described in section 1905(a)(12) of such Act with respect to a drug that is subject to an agreement under this section if the drug is subject to the payment of a rebate to the State under section 1927 of such Act.

**"(ii) ESTABLISHMENT OF MECHANISM.—**The Secretary shall establish a mechanism to ensure that covered entities comply with clause (i). If the Secretary does not establish a mechanism within 12 months under the previous sentence, the requirements of section 1927(a)(5)(C) of the Social Security Act shall apply.

**"(B) PROHIBITING RESALE OF DRUGS.—**With respect to any covered outpatient drug that is subject to an agreement under this subsection, a covered entity shall not resell or otherwise transfer the drug to a person who is not a patient of the entity.

**"(C) AUDITING.—**A covered entity shall permit the Secretary and the manufacturer of a covered outpatient drug that is subject to an agreement under this subsection with the entity (acting in accordance with procedures established by the Secretary relating to the number, duration, and scope of audits) to audit at the Secretary's or the manufacturer's expense the records of the entity that directly pertain to the entity's compliance with the requirements described in subparagraphs (A) or (B) with respect to drugs of the manufacturer.

**"(D) ADDITIONAL SANCTION FOR NONCOMPLIANCE.—**If the Secretary finds, after notice and hearing, that a covered entity is in violation of a requirement described in subparagraphs (A) or (B), the covered entity shall be liable to the manufacturer of the covered outpatient drug that is the subject of the violation in an amount equal to the reduction in the price of the drug (as described in subparagraph (A)) provided under the agreement between the entity and the manufacturer under this paragraph.

**"(6) TREATMENT OF DISTINCT UNITS OF HOSPITALS.—**In the case of a covered entity that is a distinct part of a hospital, the hospital

shall not be considered a covered entity under this paragraph unless the hospital is otherwise a covered entity under this subsection.

**"(7) CERTIFICATION OF CERTAIN COVERED ENTITIES.—**

**"(A) DEVELOPMENT OF PROCESS.—**Not later than 60 days after the date of enactment of this subsection, the Secretary shall develop and implement a process for the certification of entities described in subparagraphs (J) and (K) of paragraph (4).

**"(B) INCLUSION OF PURCHASE INFORMATION.—**The process developed under subparagraph (A) shall include a requirement that an entity applying for certification under this paragraph submit information to the Secretary concerning the amount such entity expended for covered outpatient drugs in the preceding year so as to assist the Secretary in evaluating the validity of the entity's subsequent purchases of covered outpatient drugs at discounted prices.

**"(C) CRITERIA.—**The Secretary shall make available to all manufacturers of covered outpatient drugs a description of the criteria for certification under this paragraph.

**"(D) LIST OF PURCHASERS AND DISPENSERS.—**The certification process developed by the Secretary under subparagraph (A) shall include procedures under which each State shall, not later than 30 days after the submission of the descriptions under subparagraph (C), prepare and submit a report to the Secretary that contains a list of entities described in subparagraphs (J) and (K) of paragraph (4) that are located in the State.

**"(E) RECERTIFICATION.—**The Secretary shall require the recertification of entities certified pursuant to this paragraph on a not more frequent than annual basis, and shall require that such entities submit information to the Secretary to permit the Secretary to evaluate the validity of subsequent purchases by such entities in the same manner as that required under subparagraph (B).

**"(6) DEVELOPMENT OF PRIME VENDOR PROGRAM.—**The Secretary shall establish a prime vendor program under which covered entities may enter into contracts with prime vendors for the distribution of covered outpatient drugs. If a covered entity obtains drugs directly from a manufacturer, the manufacturer shall be responsible for the costs of distribution.

**"(9) NOTICE TO MANUFACTURERS.—**The Secretary shall notify manufacturers of covered outpatient drugs and single State agencies under section 1902(a)(5) of the Social Security Act of the identities of covered entities under this paragraph, and of entities that no longer meet the requirements of paragraph (5) or that are no longer certified pursuant to paragraph (7).

**"(10) NO PROHIBITION ON LARGER DISCOUNT.—**Nothing in this subsection shall prohibit a manufacturer from charging a price for a drug that is lower than the maximum price that may be charged under paragraph (1).

**"(b) OTHER DEFINITIONS.—**In this section, the terms 'average manufacturer price', 'covered outpatient drug', and 'manufacturer' have the meaning given such terms in section 1927(k) of the Social Security Act.

**"(c) REFERENCES TO SOCIAL SECURITY ACT.—**Any reference in this section to a provision of the Social Security Act shall be deemed to be a reference to the provision as in effect on the date of the enactment of this section.

**"(d) COMPLIANCE WITH REQUIREMENTS.—**A manufacturer is deemed to meet the requirements of subsection (a) if the manufacturer

establishes to the satisfaction of the Secretary that the manufacturer would comply (and has offered to comply) with the provisions of this section (as in effect immediately after the enactment of the Veterans Health Care Act of 1992), as applied by the Secretary, and would have entered into an agreement under this section (as such section was in effect at such time), but for a legislative change in this section (or the application of this section) after the date of the enactment of such Act."

(b) STUDY OF TREATMENT OF CERTAIN CLINICS AS COVERED ENTITIES ELIGIBLE FOR PRESCRIPTION DRUG DISCOUNTS.—

(1) STUDY.—The Secretary of Health and Human Services shall conduct a study of the feasibility and desirability of including entities described in paragraph (3) as covered entities eligible for limitations on the prices of covered outpatient drugs under section 340B(a) of the Public Health Service Act (as added by subsection (a)).

(2) REPORT.—Not later than 1 year after the date of the enactment of this Act, the Secretary shall submit a report to Congress on the study conducted under paragraph (1), and shall include in the report—

(A) a description of the entities that are the subject of the study;

(B) an analysis of the extent to which such entities procure prescription drugs; and

(C) an analysis of the impact of the inclusion of such entities as covered entities under section 340B(a) of the Public Health Service Act on the quality of care provided to and the health status of the patients of such entities.

(3) ENTITIES DESCRIBED.—An entity described in this paragraph is an entity—

(A) receiving funds from a State for the provision of mental health or substance abuse treatment services under subparts I or II of part B of title XIX of the Public Health Service Act or under title V of such Act; or

(B) receiving funds from a State under title V of the Social Security Act for the provision of maternal and child health services that are furnished on an outpatient basis (other than an entity described in section 340B(a)(4)(G) of the Public Health Service Act).

**SEC. 603. LIMITATION ON PRICES OF DRUGS PROCURED BY DEPARTMENT OF VETERANS AFFAIRS AND CERTAIN OTHER FEDERAL AGENCIES.**

(a) AGREEMENTS WITH SECRETARY OF VETERANS AFFAIRS.—(1) Subchapter II of chapter 81 is amended by adding at the end the following new section:

**"§8126. Limitation on prices of drugs procured by Department and certain other Federal agencies**

"(a) Each manufacturer of covered drugs shall enter into a master agreement with the Secretary under which—

"(1) beginning January 1, 1993, the manufacturer shall make available for procurement on the Federal Supply Schedule of the General Services Administration each covered drug of the manufacturer;

"(2) with respect to each covered drug of the manufacturer procured by a Federal agency described in subsection (b) on or after January 1, 1993, that is purchased under depot contracting systems or listed on the Federal Supply Schedule, the manufacturer has entered into and has in effect a pharmaceutical pricing agreement with the Secretary (or the Federal agency involved, if the Secretary delegates to the Federal agency the authority to enter into such a pharmaceutical pricing agreement) under which the price charged during the one-year period be-

ginning on the date on which the agreement takes effect may not exceed 76 percent of the non-Federal average manufacturer price (less the amount of any additional discount required under subsection (c)) during the one-year period ending one month before such date (or, in the case of a covered drug for which sufficient data for determining the non-Federal average manufacturer price during such period are not available, during such period preceding such date as the Secretary considers appropriate), except that such price may nominally exceed such amount if found by the Secretary to be in the best interests of the Department or such Federal agencies;

"(3) with respect to each covered drug of the manufacturer procured by a State home receiving funds under section 1741 of this title, the price charged may not exceed the price charged under the Federal Supply Schedule at the time the drug is procured; and

"(4) unless the manufacturer meets the requirements of paragraphs (1), (2), and (3), the manufacturer may not receive payment for the purchase of drugs or biologicals from—

"(A) a State plan under title XIX of the Social Security Act, except as authorized under section 1927(a)(3) of such Act,

"(B) any Federal agency described in subsection (b), or

"(C) any entity that receives funds under the Public Health Service Act.

"(b) The Federal agencies described in this subsection are as follows:

"(1) The Department.

"(2) The Department of Defense.

"(3) The Public Health Service, including the Indian Health Service.

"(c) With respect to any covered drug the price of which is determined in accordance with a pharmaceutical pricing agreement entered into pursuant to subsection (a)(2), for calendar quarters beginning on or after January 1, 1993, the manufacturer shall provide a discount in an amount equal to the amount by which the change in non-Federal price exceeds the amount equal to—

"(1) the non-Federal average manufacturer price of the drug during the 3-month period that ends one year before the last day of the month preceding the month during which the contract for the covered drug goes into effect (or, in the case of a covered drug for which sufficient data for determining the non-Federal average manufacturer price during such period is not available, during such period preceding the month during which the contract goes into effect as the Secretary considers appropriate); increased by

"(2) the percentage increase in the Consumer Price Index for all urban consumers (U.S. city average) between the last month of the period described in paragraph (1) and the last month preceding the month during which the contract goes into effect for which Consumer Price Index data is available.

"(d) In the case of a covered drug of a manufacturer that has entered into a multi-year contract with the Secretary under subsection (a)(2) for the procurement of the drug—

"(1) during any one-year period that follows the first year for which the contract is in effect, the price charged may not exceed the price charged during the preceding one-year period, increased by the percentage increase in the Consumer Price Index for all urban consumers (U.S. city average) between the last months of such one-year periods for which Consumer Price Index data is available; and

"(2) in applying subsection (c) to determine the amount of the discount provided with respect to the drug during a year that follows the first year for which the contract is in effect, any reference in such subsection to 'the month during which the contract goes into effect' shall be considered a reference to the first month of such following year.

"(e)(1) The manufacturer of any covered drug the price of which is determined in accordance with a pharmaceutical pricing agreement entered into pursuant to subsection (a)(2) shall—

"(A) not later than 30 days after the first day of the last quarter that begins before the agreement takes effect (or, in the case of an agreement that takes effect on January 1, 1993, not later than 30 days after the date of the enactment of this section), report to the Secretary the non-Federal average manufacturer price for the drug during the 1-year period that ends on the last day of the previous quarter; and

"(B) not later than 30 days after the last day of each quarter for which the agreement is in effect, report to the Secretary the non-Federal average manufacturer price for the drug during such quarter.

"(2) The provisions of subparagraphs (B) and (C) of section 1927(b)(3) of the Social Security Act shall apply to drugs described in paragraph (1) and the Secretary in the same manner as such provisions apply to covered outpatient drugs and the Secretary of Health and Human Services under such subparagraphs, except that references in such subparagraphs to prices or information reported or required under 'subparagraph (A)' shall be deemed to refer to information reported under paragraph (1).

"(3) In order to determine the accuracy of a drug price that is reported to the Secretary under paragraph (1), the Secretary may audit the relevant records of the manufacturer or of any wholesaler that distributes the drug, and may delegate the authority to audit such records to the appropriate Federal agency described in subsection (b).

"(4) Any information contained in a report submitted to the Secretary under paragraph (1) or obtained by the Secretary through any audit conducted under paragraph (3) shall remain confidential, except as the Secretary determines necessary to carry out this section and to permit the Comptroller General and the Director of the Congressional Budget Office to review the information provided.

"(f) The Secretary shall supply to the Secretary of Health and Human Services—

"(1) upon the execution or termination of any master agreement, the name of the manufacturer, and

"(2) on a quarterly basis, a list of manufacturers who have entered into master agreements under this section, and

"(g)(1) Any reference in this section to a provision of the Social Security Act shall be deemed to be a reference to the provision as in effect on the date of the enactment of this section.

"(2) A manufacturer is deemed to meet the requirements of subsection (a) if the manufacturer establishes to the satisfaction of the Secretary that the manufacturer would comply (and has offered to comply) with the provisions of this section (as in effect immediately after the enactment of this section), and would have entered into an agreement under this section (as such section was in effect at such time), but for a legislative change in this section after the date of the enactment of this section.

"(h) In this section:

"(1) The term 'change in non-Federal price' means, with respect to a covered drug that is subject to an agreement under this section, an amount equal to—

"(A) the non-Federal average manufacturer price of the drug during the 3-month period that ends with the month preceding the month during which a contract goes into effect (or, in the case of a covered drug for which sufficient data for determining the non-Federal average manufacturer price during such period is not available, during such period as the Secretary considers appropriate); minus

"(B) the non-Federal average manufacturer price of the drug during the 3-month period that ends one year before the end of the period described in subparagraph (A) (or, in the case of a covered drug for which sufficient data for determining the non-Federal average manufacturer price during such period is not available, during such period preceding the period described in subparagraph (A) as the Secretary considers appropriate).

"(2) The term 'covered drug' means—

"(A) a drug described in section 1927(k)(7)(A)(ii) of the Social Security Act, or that would be described in such section but for the application of the first sentence of section 1927(k)(3) of such Act;

"(B) a drug described in section 1927(k)(7)(A)(iv) of the Social Security Act, or that would be described in such section but for the application of the first sentence of section 1927(k)(3) of such Act;

"(C) any biological product identified under section 600.3 of title 21, Code of Federal Regulations; or

"(D) insulin certified under section 506 of the Federal Food, Drug, and Cosmetic Act.

"(3) The term 'depot' means a centralized commodity management system through which covered drugs procured by an agency of the Federal Government are—

"(A) received, stored, and delivered through—

"(i) a federally owned and operated warehouse system, or

"(ii) a commercial entity operating under contract with such agency; or

"(B) delivered directly from the commercial source to the entity using such covered drugs.

"(4) The term 'manufacturer' means any entity which is engaged in—

"(A) the production, preparation, propagation, compounding, conversion, or processing of prescription drug products, either directly or indirectly by extraction from substances of natural origin, or independently by means of chemical synthesis, or by a combination of extraction and chemical synthesis, or

"(B) in the packaging, repackaging, labeling, relabeling, or distribution of prescription drug products.

Such term does not include a wholesale distributor of drugs or a retail pharmacy licensed under State law.

"(5) The term 'non-Federal average manufacturer price' means, with respect to a covered drug and a period of time (as determined by the Secretary), the weighted average price of a single form and dosage unit of the drug that is paid by wholesalers in the United States to the manufacturer, taking into account any cash discounts or similar price reductions during that period, but not taking into account—

"(A) any prices paid by the Federal Government; or

"(B) any prices found by the Secretary to be merely nominal in amount.

"(6) The term 'weighted average price' means, with respect to a covered drug and a

period of time (as determined by the Secretary) an amount equal to—

"(A) the sum of the products of the average price per package unit of each quantity of the drug sold during the period and the number of package units of the drug sold during the period; divided by

"(B) the total number of package units of the drug sold during the period."

(2) The table of sections at the beginning of such chapter is amended by inserting after the item relating to section 8125 the following new item:

"8126. Limitation on prices of drugs procured by Department."

**TITLE VII—PERSIAN GULF WAR VETERANS' HEALTH STATUS**

**SEC. 701. SHORT TITLE.**

This title may be cited as the "Persian Gulf War Veterans' Health Status Act".

**SEC. 702. PERSIAN GULF WAR VETERANS HEALTH REGISTRY.**

(a) ESTABLISHMENT OF REGISTRY.—The Secretary of Veterans Affairs shall establish and maintain a special record to be known as the "Persian Gulf War Veterans Health Registry" (in this section referred to as the "Registry").

(b) CONTENTS OF REGISTRY.—Except as provided in subsection (c), the Registry shall include the following information:

(1) A list containing the name of each individual who served as a member of the Armed Forces in the Persian Gulf theater of operations during the Persian Gulf War and who—

(A) applies for care or services from the Department of Veterans Affairs under chapter 17 of title 38, United States Code;

(B) files a claim for compensation under chapter 11 of such title on the basis of any disability which may be associated with such service;

(C) dies and is survived by a spouse, child, or parent who files a claim for dependency and indemnity compensation under chapter 13 of such title on the basis of such service;

(D) requests from the Department a health examination under section 703; or

(E) receives from the Department of Defense a health examination similar to the health examination referred to in subparagraph (D) and requests inclusion in the Registry.

(2) Relevant medical data relating to the health status of, and other information that the Secretary considers relevant and appropriate with respect to, each individual described in paragraph (1) who—

(A) grants to the Secretary permission to include such information in the Registry; or

(B) at the time the individual is listed in the Registry, is deceased.

**(c) INDIVIDUALS SUBMITTING CLAIMS OR MAKING REQUESTS BEFORE DATE OF ENACTMENT.**

—If in the case of an individual described in subsection (b)(1) the application, claim, or request referred to in such subsection was submitted, filed, or made, before the date of the enactment of this Act, the Secretary shall, to the extent feasible, include in the Registry such individual's name and the data and information, if any, described in subsection (b)(2) relating to the individual.

**(d) DEPARTMENT OF DEFENSE INFORMATION.**—The Secretary of Defense shall furnish to the Secretary of Veterans Affairs such information maintained by the Department of Defense as the Secretary of Veterans Affairs considers necessary to establish and maintain the Registry.

**(e) RELATION TO DEPARTMENT OF DEFENSE REGISTRY.**—The Secretary of Veterans Af-

fairs, in consultation with the Secretary of Defense, shall ensure that information is collected and maintained in the Registry in a manner that permits effective and efficient cross-reference between the Registry and the registry established under section 734 of the National Defense Authorization Act for Fiscal Years 1992 and 1993 (Public Law 102-190; 105 Stat. 1411; 10 U.S.C. 1074 note), as amended by section 704.

**(f) ONGOING OUTREACH TO INDIVIDUALS LISTED IN REGISTRY.**—The Secretary of Veterans Affairs shall, from time to time, notify individuals listed in the Registry of significant developments in research on the health consequences of military service in the Persian Gulf theater of operations during the Persian Gulf War.

**SEC. 703. HEALTH EXAMINATIONS AND COUNSELING FOR VETERANS ELIGIBLE FOR INCLUSION IN CERTAIN HEALTH-RELATED REGISTRIES.**

**(a) IN GENERAL.**—(1) The Secretary of Veterans Affairs—

(A) shall, upon the request of a veteran described in subsection (b)(1), provide the veteran with a health examination and consultation and counseling with respect to the results of the examination; and

(B) may, upon the request of a veteran described in subsection (b)(2), provide the veteran with such an examination and such consultation and counseling.

(2) The Secretary shall carry out appropriate outreach activities with respect to the provision of any health examinations and consultation and counseling services under paragraph (1).

**(b) COVERED VETERANS.**—(1) In accordance with subsection (a)(1)(A), the Secretary shall provide an examination, consultation, and counseling under that subsection to any veteran who is eligible for listing or inclusion in the Persian Gulf War Veterans Health Registry established by section 702.

(2) In accordance with subsection (a)(1)(B), the Secretary may provide an examination, consultation, and counseling under that subsection to any veteran who is eligible for listing or inclusion in any other similar health-related registry administered by the Secretary.

**SEC. 704. EXPANSION OF COVERAGE OF PERSIAN GULF REGISTRY.**

**(a) IN GENERAL.**—Subsections (a) and (b) of section 734 of the National Defense Authorization Act for Fiscal Years 1992 and 1993 (Public Law 102-190; 105 Stat. 1411; 10 U.S.C. 1074 note) are amended to read as follows:

"(a) ESTABLISHMENT OF REGISTRY.—The Secretary of Defense shall establish and maintain a special record (in this section referred to as the 'Registry') relating to the following members of the Armed Forces:

"(1) Members who, as determined by the Secretary, were exposed to the fumes of burning oil in the Operation Desert Storm theater of operations during the Persian Gulf conflict.

"(2) Any other members who served in the Operation Desert Storm theater of operations during the Persian Gulf conflict.

"(b) CONTENTS OF REGISTRY.—(1) The Registry shall include—

"(A) with respect to each class of members referred to in each of paragraphs (1) and (2) of subsection (a)—

"(i) a list containing each such member's name and other relevant identifying information with respect to the member; and

"(ii) to the extent that data are available and inclusion of the data is feasible, a description of the circumstances of the member's service during the Persian Gulf con-

fluct, including the locations in the Operation Desert Storm theater of operations in which such service occurred and the atmospheric and other environmental circumstances in such locations at the time of such service; and

"(B) with respect to the members referred to in subsection (a)(1), a description of the circumstances of each exposure of each such member to the fumes of burning oil as described in such subsection (a)(1), including the length of time of the exposure.

"(2) The Secretary shall establish the Registry with the advice of an independent scientific organization."

(b) CONFORMING AMENDMENTS.—(1) Subsection (c)(1) of such section is amended by striking out "subsection (a)" and inserting in lieu thereof "subsection (a)(1)".

(2) Subsection (d) of such section is amended by inserting "pursuant to subsection (a)(1)" after "Registry".

**SEC. 705. STUDY BY OFFICE OF TECHNOLOGY ASSESSMENT OF PERSIAN GULF REGISTRY AND PERSIAN GULF WAR VETERANS HEALTH REGISTRY.**

(a) STUDY.—The Director of the Office of Technology Assessment shall, in a manner consistent with the Technology Assessment Act of 1972 (2 U.S.C. 472(d)), assess—

(1) the potential utility of each of the Persian Gulf Registry and the Persian Gulf War Veterans Health Registry for scientific study and assessment of the intermediate and long-term health consequences of military service in the Persian Gulf theater of operations during the Persian Gulf War;

(2) the extent to which each registry meets the requirements of the provisions of law under which the registry is established;

(3) the extent to which data contained in each registry—

(A) are maintained in a manner that ensures permanent preservation and facilitates the effective, efficient retrieval of information that is potentially relevant to the scientific study of the intermediate and long-term health consequences of military service in the Persian Gulf theater of operations during the Persian Gulf War; and

(B) would be useful for scientific study regarding such health consequences;

(4) the adequacy of any plans to update each of the registries;

(5) the extent to which the Department of Defense or the Department of Veterans Affairs, as the case may be, is assembling and maintaining information on the Persian Gulf theater of operations (including information on troop locations and atmospheric and weather conditions) in a manner that facilitates the usefulness of, maintenance of, and retrieval of information from, the applicable registry; and

(6) the adequacy and compatibility of protocols for the health examinations and counseling provided under section 703 and health examinations provided by the Department of Defense to members of the Armed Forces for the purpose of assessing the health status of members of the Armed Forces who served in the Persian Gulf theater of operations during the Persian Gulf War.

(b) ACCESS TO INFORMATION.—The Secretary of Veterans Affairs and the Secretary of Defense shall provide the Director with access to such records and information under the jurisdiction of each such secretary as the Director determines necessary to permit the Director to carry out the study required under this section.

(c) REPORTS.—The Director shall—

(1) not later than 270 days after the date of the enactment of this Act, submit to Congress a report on the results of the assess-

ment carried out under this section of the Persian Gulf Registry and health-examination protocols; and

(2) not later than 15 months after such date, submit to Congress a report on the results of the assessment carried out under this section of the Persian Gulf War Veterans Health Registry.

(d) DEFINITIONS.—For the purposes of this section:

(1) The term "Persian Gulf Registry" means the registry established under section 734 of the National Defense Authorization Act for Fiscal Years 1992 and 1993 (Public Law 102-190; 105 Stat. 1411; 10 U.S.C. 1074 note), as amended by section 704.

(2) The term "Persian Gulf War Veterans Health Registry" means the Persian Gulf War Veterans Health Registry established under section 702.

**SEC. 706. AGREEMENT WITH NATIONAL ACADEMY OF SCIENCES FOR REVIEW OF HEALTH CONSEQUENCES OF SERVICE DURING THE PERSIAN GULF WAR.**

(a) AGREEMENT.—(1) The Secretary of Veterans Affairs and Secretary of Defense jointly shall seek to enter into an agreement with the National Academy of Sciences for the Medical Follow-Up Agency (MFUA) of the Institute of Medicine of the Academy to review existing scientific, medical, and other information on the health consequences of military service in the Persian Gulf theater of operations during the Persian Gulf War.

(2) The agreement shall require MFUA to provide members of veterans organizations and members of the scientific community (including the Director of the Office of Technology Assessment) with the opportunity to comment on the method or methods MFUA proposes to use in conducting the review.

(3) The agreement shall permit MFUA, in conducting the review, to examine and evaluate medical records of individuals who are included in the registries referred to in section 705(d) for purposes that MFUA considers appropriate, including the purpose of identifying illnesses of those individuals.

(4) The Secretary of Veterans Affairs and the Secretary of Defense shall seek to enter into the agreement under this section not later than 180 days after the date of the enactment of this Act.

(b) REPORT.—(1) The agreement under this section shall require the National Academy of Sciences to submit to the committees and secretaries referred to in paragraph (2) a report on the results of the review carried out under the agreement. Such report shall contain the following:

(A) An assessment of the effectiveness of actions taken by the Secretary of Veterans Affairs and the Secretary of Defense to collect and maintain information that is potentially useful for assessing the health consequences of the military service referred to in subsection (a).

(B) Recommendations on means of improving the collection and maintenance of such information.

(C) Recommendations on whether there is sound scientific basis for an epidemiological study or studies on the health consequences of such service, and if the recommendation is that there is sound scientific basis for such a study or studies, the nature of the study or studies.

(2) The committees and secretaries referred to in paragraph (1) are the following:

(A) The Committees on Veterans' Affairs of the Senate and House of Representatives.

(B) The Committees on Armed Services of the Senate and House of Representatives.

(C) The Secretary of Veterans Affairs.

(D) The Secretary of Defense.

(c) FUNDING.—(1) The Secretary of Veterans Affairs and the Secretary of Defense shall make available up to a total of \$500,000 in fiscal year 1993, from funds available to the Department of Veterans Affairs and the Department of Defense in that fiscal year, to carry out the review. Any amounts provided by the two departments shall be provided in equal amounts.

(2) If the Secretary of Veterans Affairs and the Secretary of Defense enter into an agreement under subsection (a) with the National Academy of Sciences—

(A) the Secretary of Veterans Affairs shall make available \$250,000 in each of fiscal years 1994 through 2003, from amounts available to the Department of Veterans Affairs in each such fiscal year, to the National Academy of Sciences for the general purposes of conducting epidemiological research with respect to military and veterans populations; and

(B) the Secretary of Defense shall make available \$250,000 in each of fiscal years 1994 through 2003, from amounts available to the Department of Defense in each such fiscal year, to the National Academy of Sciences for the purposes of carrying the research referred to in subparagraph (A).

**SEC. 707. COORDINATION OF GOVERNMENT ACTIVITIES ON HEALTH-RELATED RESEARCH ON THE PERSIAN GULF WAR.**

(a) DESIGNATION OF COORDINATING ORGANIZATION.—The President shall designate, and may redesignate from time to time, the head of an appropriate department or agency of the Federal Government to coordinate all research activities undertaken or funded by the Executive Branch of the Federal Government on the health consequences of military service in the Persian Gulf theater of operations during the Persian Gulf War.

(b) REPORT.—Not later than March 1 of each year, the head of the department or agency designated under subsection (a) shall submit to the Committees on Veterans' Affairs of the Senate and House of Representatives a report on the status and results of all such research activities undertaken or by the Executive Branch of the Federal Government during the previous year.

**SEC. 708. DEFINITION.**

For the purposes of this title, the term "Persian Gulf War" has the meaning given such term in section 101(33) of title 38, United States Code.

**TITLE VIII—COURT OF VETERANS APPEALS**

**SEC. 801. DISCIPLINARY PROCEDURES FOR JUDGES OF COURT OF VETERANS APPEALS.**

Section 7253(g) is amended—

(1) by inserting "(1)" after "(g)"; and

(2) by adding at the end the following:

"(2) The provisions of paragraphs (7) through (15) of section 372(c) of title 28, regarding referral or certification to, and petition for review in, the Judicial Conference of the United States and action thereon, shall apply to the exercise by the Court of the powers of a judicial council under paragraph (1) of this subsection. The grounds for removal from office specified in subsection (f)(1) shall provide a basis for a determination pursuant to paragraph (7) or (8) of section 372(c) of title 28, and certification and transmittal by the Conference shall be made to the President for consideration under subsection (f).

"(3)(A) In conducting hearings pursuant to paragraph (1), the Court may exercise the authority provided under section 1821 of title 28

to pay the fees and allowances described in that section.

"(B) The Court shall have the power provided under section 372(c)(16) of title 28 to award reimbursement for the reasonable expenses described in that section. Reimbursements under this subparagraph shall be made from funds appropriated to the Court."

In lieu of the Senate amendment to the title of the bill, amend the title so as to read: "An Act to amend title 38, United States Code, to improve health care services for women veterans, to expand authority for health care sharing agreements between the Department of Veterans Affairs and the Department of Defense to revise certain pay authorities that apply to Department of Veterans Affairs nurses, to improve preventive health services for veterans, to establish discounts on pharmaceuticals purchased by the Department of Veterans Affairs, to provide for a Persian Gulf War Veterans Health Registry, and to make other improvements in the delivery and administration of health care by the Department of Veterans Affairs."

Resolved, That the House agree to the Senate amendment to the title of the bill.

#### VETERANS HEALTH CARE ACT OF 1992

Mr. CRANSTON. Mr. President, as the chairman of the Committee on Veterans' Affairs, I urge my colleagues to approve the compromise agreement on H.R. 5193, the proposed Veterans Health Care Act of 1992. This compromise agreement is the final result of efforts by the Senate and House Veterans' Affairs Committee to reach a compromise on a variety of important issues. It also contains provisions worked out between the House Committee on Energy and Commerce and the Senate Labor and Human Resources Committee and Finance Committee with regard to drug prices for various Federal and federally aided health care facilities.

Mr. President, this is a vitally important measure that will touch the lives of millions of veterans, most especially the many tens of thousands of women veterans who were raped or sexually assaulted while in service, who will now have access to needed counseling to help them deal with their trauma. The bill will also address the needs of veterans of Persian Gulf service who are concerned that their health may have been affected by their service, who will now have greater assurance that their Government is listening to and responding to their concerns.

Other very major provisions would provide VA much needed relief from the escalating drug price increases it has experienced since the enactment of the Omnibus Budget Reconciliation Act of 1990. The bill will create a National Center for Preventive Health, thereby capitalizing on VA's unique position as a nationwide health care system to learn more about the impact of preventive care. The bill would also improve VA's new, locality pay system for nurses so as to enhance VA's ability to recruit and retain topflight nurses.

Mr. President, this is the last of countless veterans' bills that I've shepherded through the Senate and to en-

actment into law during my 24 years in the Senate. I am proud of this bill, as I am proud of the others.

Mr. President, I will at this time summarize the compromise agreement and discuss certain key provisions. Detailed descriptions of all provisions are set forth in the explanatory statement accompanying the compromise agreement which was developed in cooperation with the House Veterans' Affairs Committee.

#### SUMMARY OF PROVISIONS

The compromise agreement has eight titles: Women Veterans Health Programs; Health-Care Sharing Agreements Between Department of Veterans Affairs and Department of Defense; Nurse Pay; State Home Amendments; and General Health Care and Administration, which has three subtitles, General Health, Preventive Health, and Health Care Administration and Personnel; Pharmaceutical Pricing; Persian Gulf War Veterans' Health Status; and Court of Veterans Appeals.

#### WOMEN VETERANS HEALTH PROGRAMS

Provisions of title I would:

First, authorize VA, through December 31, 1995, to provide needed counseling on a priority basis to any woman veteran who (a) seeks counseling from the VA within (1) two years after her discharge from service or (2) in the case of veterans who were discharged from service prior to December 31, 1991, not later than December 31, 1993, and (b) requires counseling to overcome psychological trauma which, in the judgment of a VA mental health professional, resulted from a physical assault or battery of a sexual nature or sexual harassment.

Second, authorize VA, through December 31, 1994, to provide the counseling services through contracts with non-VA providers in the case of women veterans for whom, in the judgment of a mental health professional employed by the VA, the receipt of counseling in VA facilities would be clinically inadvisable or where VA facilities are unavailable because of geographic inaccessibility.

Third, prohibit VA from providing counseling to a veteran under this measure for a period in excess of one year unless the Secretary determines that a longer period of counseling is necessary.

Fourth, require the Secretary to take action to ensure that a veteran eligible for counseling under this program who also requires medical services relating to the aftereffects of sexual violence (and is eligible for the care from VA) is furnished such care and services in a coordinated way.

Fifth, require the Secretary, in establishing this program, to (a) provide for appropriate training of mental health professionals and other health-care personnel to carry out this program effectively; (b) seek to ensure that counseling provided under the program is furnished in a therapeutically appropriate setting, taking into account the circumstances which gave rise to the need for such counseling; and (c) provide referral services to assist women veterans who are not eligible for other needed health care from VA to obtain services from non-VA sources.

Sixth, require the Secretary (a)(1) not later than 90 days after enactment, to commence the provision of information on the counseling relating to sexual trauma that is available to women veterans under this program, including the time limitations on applying for such counseling, and (2) in coordination

with the Secretary of Defense, to seek to ensure that women who are being separated from active duty are provided with information about the requirements and procedures for applying for counseling under this program, and (b) authorize VA to establish an information system involving a toll-free telephone number.

Seventh, would require the Secretary, not later than March 31, 1994, to submit to the Veterans' Affairs Committees a comprehensive report on the Secretary's actions taken under this authority.

Eighth, authorize the Secretary, in furnishing hospital and medical services, to provide pap smears, breast examinations and mammography, and general reproductive health care, including the management of menopause but not including under this authority infertility services, abortions, or pregnancy care except for such care relating to a pregnancy that is complicated or in which the risks of complication are increased by a service-connected condition.

Ninth, require the Secretary to ensure that directors of VA medical facilities identify and assess opportunities under the DOD-VA health-care sharing agreement authority expanded by this measure to increase the availability of, and access to, health care services, including sexual trauma counseling, for women veterans.

Tenth, require the Secretary to report annually to the Congressional Committees on Veterans' Affairs on the provision of health-care services, and the conduct of research carried out by, or under the jurisdiction of, the Secretary relating to women veterans.

Eleventh, require the Secretary to ensure that an official in each Veterans Health Administration regional office serves as a coordinator of women's services.

Twelfth (a) require the Secretary to foster and encourage the initiation and expansion of research relating to women veterans health, and (b) authorize the appropriation of \$6 million through FY 1995 to initiate such new studies.

Thirteenth, require the Secretary, subject to the appropriation of \$2 million for this purpose, to (a) conduct a study to determine the needs of women veterans for health-care services, and (b) submit to the Congressional Committees on Veterans' Affairs an interim report not later than 9 months after the date of the enactment of this Act and a final report describing the results of the study not later than December 31, 1995.

#### HEALTH-CARE SHARING AGREEMENTS BETWEEN DEPARTMENT OF VETERANS AFFAIRS AND DEPARTMENT OF DEFENSE

Provisions of title II would:

First, expand, through September 30, 1996, the Secretary's authority to enter into health-care resource sharing agreements with the Secretary of Defense so as to authorize the head of a VA health-care facility (a) to enter into sharing agreements with (1) the head of a DoD health-care facility, (2) any other DoD official responsible for the furnishing of health-care services to Civilian Health and Medical Program of the Uniformed Services (CHAMPUS) beneficiaries in the region in which the VA facility is located, or (3) a contractor responsible for the furnishing of health-care services to CHAMPUS beneficiaries in the region in which the VA facility is located; and (b) to enter into sharing agreements that would provide for the furnishing of care to Civilian Health and Medical Program of the Department of Veterans Affairs (CHAMPVA) and CHAMPUS beneficiaries.

Second, prohibit any sharing agreement proposed by the director of a VA health-care

facility from taking effect, unless the CMD determines and certifies to the Secretary that implementation of the agreement (a) would result in the improvement of services to eligible veterans at the facility; and (b) would not result in the denial of, or a delay in providing access to, care for any veteran at that facility.

Third, provide authority, notwithstanding any other provision of law, under a sharing agreement, for any CHAMPUS beneficiary furnished care or services by a VA health-care facility or any CHAMPVA beneficiary furnished care or services by a DoD facility to receive such care or services (a) without regard to any otherwise applicable requirement for the payment of a copayment or deductible; or (b) subject to a requirement to pay only part of any such otherwise applicable copayment or deductible, as specified in the guidelines.

Fourth, require the Secretary to consult with veterans service organizations in carrying out this authority.

Fifth, require the Secretaries of VA and Defense, (a) for each fiscal year from 1993 through 1996, to include in the annual report on the VA-DoD sharing authority a description of the use of the expanded sharing authority; (b) in the annual report for fiscal year 1996, (1) an assessment of the effect of agreements entered into under the expanded sharing authority on the furnishing of health-care services to eligible veterans, and (2) an assessment of the cost savings, if any, associated with provision of services under such agreements to retired members of the armed forces, dependents of members or former members of a uniformed service, and CHAMPVA beneficiaries; and (c) any plans for administrative action and any recommendations for legislation that the Secretaries consider appropriate for inclusion in the report.

#### NURSE PAY

The provisions of title III would:

First, replace the four-grade nurse pay schedule with a schedule of five grades, designated Nurse I through Nurse V.

Second, authorize the Secretary, in order to provide rates of pay necessary to recruit and retain sufficient numbers of employees in covered positions at the VAMC in the Philippines and the VAMC in San Juan, Puerto Rico, and its satellite facilities, to establish and adjust the rates of basic pay for employees in covered positions at those facilities on a basis prescribed by the Secretary.

Third, authorize the director of a VA health-care facility, through September 30, 1995, in conducting a local wage survey, to use data on compensation received by CRNAs employed in salaried positions by firms that provide anesthesia services on a contract basis within the local labor-market area in which the VA facility is located, if the director (a) has conducted a survey of beginning rates of compensation paid to CRNAs in the local labor-market area in which the VA facility is located, (b) has used all available administrative authority with regard to the collection of data on such compensation, and (c) makes a determination, under regulations prescribed by the Secretary, that such data collection methods are insufficient to permit the establishment of locally-competitive rates of pay for CRNAs.

Fourth (a) authorize the Secretary, if the Secretary determines that a higher rate of pay is necessary to obtain the employee's agreement to the transfer, to increase the rate of basic pay of an employee in a covered

position who transfers, upon the request of the Secretary, to a comparable or more responsible position at a VA health-care facility at which the rate of pay for the position is lower than the rate paid for such a position by the VA facility from which the employee is transferring; (b) provide that such increase in the transferring employee's rate of basic pay be applicable for at least the first year following the employee's transfer; (c) provide that the rate of basic pay paid to the transferring employee would not exceed the rate of basic pay applicable to the employee prior to the transfer; and (d) require the Secretary to include information on the use of this authority in the annual report to the Congressional Committees on Veterans' Affairs on the implementation of the VA Nurse Pay Act.

Fifth, require the Secretary, (a) not later than six months after enactment, to revise the qualification standards used for nursing personnel at VA health-care facilities in order to (1) reflect the addition of a fifth grade to the nurse pay schedule, and (2) reduce the compression of pay for nursing personnel in the intermediate and senior grades; and (b) not later than six months after the date on which the revised qualification standards are issued, to submit to the Congressional Committees on Veterans' Affairs a report on the implementation of the revised standards.

Sixth, require the Secretary (a) to conduct a review of the process for determining rates of basic pay applicable to RNs employed in Chief Nurse positions, including an assessment of (1) the adequacy of that process, (2) the accuracy of data collected in that process, and (3) the difficulties encountered in obtaining accurate data; and (b) not later than 12 months after enactment, submit to the Congressional Committees on Veterans' Affairs a report regarding that review, including recommendations for corrective action.

Seventh, require the Secretary to include in the annual report on the implementation of the VA Nurse Pay Act of 1990 information concerning (a) the number of nurses, by facility and by grade, who are on pay retention or in the top step of any grade, (b) comprehensive information, by facility, as to whether the facility director requested permission to extend the range of rates of basic pay for employees within such grade(s), and (c) whether each request was approved or disapproved.

Eighth, require that the provisions regarding the addition of a fifth grade to the nurse schedule, rates of pay for persons employed in covered positions at the Veterans Memorial Medical Center and VA health-care facilities outside of the contiguous United States, Alaska, and Hawaii, use of rates of pay paid to CRNAs employed on a salaried basis by anesthesia contractors, and rates of pay for RNs and CRNAs who transfer at the Secretary's request take effect with respect to the first pay period beginning on or after the date which is six months after the date of enactment.

#### STATE HOME AMENDMENTS

The provisions of title IV would:

First, make permanent the Secretary's authority to make grants to States for the construction, expansion, or remodeling of facilities for the furnishing of nursing home and domiciliary care to veterans eligible to receive such care in a VA facility.

Second, provide that a veteran's participation in a VA-approved work-therapy program operated by a State home facility and the veteran's receipt of compensation as a result

of such participation shall be considered in the same manner as in the case of a veteran participating in a VA work therapy program.

Third, extend from 90 days to 180 days the period within which a State must complete the application for a State home program grant and meet other requirements for grant approval.

Fourth, prohibit the Secretary, in the event that the Secretary rescinds conditional approval for a State home project, from obligating further funds for that project during the fiscal year in which the Secretary rescinds such approval.

Fifth, provide that the recapture period—the 20-year period during which the United States can recover its portion of the cost of constructing a facility—for a State home project would begin on the date of the approval by the Secretary of the final architectural and engineering inspection of the facility.

Sixth, require payment of VA per diem for care furnished in a State home facility to begin as of the date of the completion of the inspection for recognition of the facility if the Secretary determines, as a result of that inspection, that the State home meets applicable standards.

#### GENERAL HEALTH CARE AND ADMINISTRATION

The provisions of title V would:

##### Subtitle A—General Health

First, extend the Secretary's authority to contract with non-VA health-care facilities in order to include the furnishing of care or services for the treatment of any disability of a veteran who has a total disability permanent in nature resulting from a service-connected disability.

Second, make permanent VA's authority to furnish respite care service.

Third, extend for four years and three months, through December 31, 1996, VA's authority to contract with the Veterans Memorial Medical Center in Manila for care for certain U.S. veterans.

##### Subtitle B—Preventive Health

First (a) require the Chief Medical Director to establish a National Center for Preventive Health; (b) require the Director of the Center to (1) acquire, maintain, and disseminate current information on VA and non-VA clinical practices and research concerning preventive health services, (2) facilitate cooperative research concerning health outcomes resulting from various preventive services, and (3) advise VA health-care personnel regarding the conduct of preventive health services activities and research; and (c) authorize the appropriation of \$1,500,000 annually to fund the Center's research, clinical, educational, and administrative activities and specify that the cost of the Center be paid from VA's Medical Care account.

Second, require the Secretary to submit to the Congressional Committees on Veterans' Affairs an annual report that would include information regarding (a) the furnishing of preventive health services to veterans, (b) VA preventive health services research, and (c) the activities of the National Center for Preventive Health.

##### Subtitle C—Health Care Administration and Personnel

First (a) prohibit the Secretary from designating a VA health-care facility as a location for a GRECC unless a peer review panel established by the Assistant Chief Medical Director for Geriatrics and Extended Care to assess the scientific and clinical merit of proposals submitted to the Secretary for the establishment of new GRECCs has deter-

mined that the facility meets the highest standards of scientific and clinical merit; (b) require that the membership of the peer review panel consist of experts in the fields of geriatric and gerontological research, education, and clinical care who shall serve as consultants to VA for a period of no longer than six months; (c) require that the panel review each GRECC proposal submitted to the panel by the Assistant Chief Medical Director for Geriatrics and Extended Care and provide its views on the relative scientific and clinical merit of each proposal; and (d) provide that the panel not be subject to the provisions of the Federal Advisory Committee Act.

Second, extend for two years and three months, through December 31, 1994, the Secretary's authority to waive the restrictions in title 5 on receipt of military retirement pay by federal employees if the Secretary determines that such waiver is necessary to meet special or emergency employment needs for RNs which result from a severe shortage of well-qualified candidates for RN positions.

Third, extend VA's authority to carry out the Health Professional Scholarship program for three years and three months, through December 31, 1995.

Fourth, prohibit VA, notwithstanding any other provision of law, from providing payments to health-care professional employees for payment of tuition loans.

Fifth, remove restrictions contained in a deed which conveyed certain land from the Temple, Texas, VA Medical Center to Temple Junior College.

Sixth, require the Secretary (a) to carry out a demonstration project to evaluate the desirability and feasibility of installing telephones in VA health-care facilities for patient use; (b) to evaluate the costs of such installations (including costs associated with the provision of special equipment to facilitate the use of telephones by disabled veterans receiving medical care); (c) to evaluate the benefits of such equipment, including the therapeutic benefits to VA patients, including disabled patients, of ready telephone availability and the savings associated with hospital staff being relieved of the need to assist patients in using public telephone facilities; and (d) to report, not later than September 30, 1994, on such costs and benefits, the feasibility and desirability, of installing telephones in patient rooms in other VA health-care facilities, and the relative feasibility and cost effectiveness of a range of options for the installation and maintenance of bedside telephones for patient use. This section would also require that the Secretary ensure that costs associated with patient use of bedside telephones for long distance calls be borne by the patient.

Seventh (a) require the Secretary to ensure (consistent with medical requirements and limitations) that each facility maintains a suitable, well-ventilated indoor patient smoking area and provide access to that area for patients or residents who desire to use tobacco products; (b) provide as an alternative to the ventilated indoor patient smoking area, a smoking area in a detached, accessible building with heating and air conditioning; (c) requires GAO to do a report within 180 days after enactment on the feasibility of VA establishing smoking areas, the cost and timetable for creating such areas, the adequacy of VA's ventilating systems to support such areas without causing health problems for other patients, and the impact of this policy on VA hospitals' JCAHO accreditation scores; (d) make the

provisions relating to the establishment of smoking areas effective 60 days after the Committees on Veterans' Affairs receive the GAO report; and (e) require the Secretary to report to the Congressional Committees on Veterans' Affairs, not later than 120 days after the date of enactment, on the implementation of this section.

#### DRUG PRICING AGREEMENTS

The provisions of title VI would: First, in conjunction with other provisions in title VI relating to drug prices for such entities, exclude farm Medicaid best-price rebate calculations prices (a) charged to (1) VA; (2) a State Veterans Home; (3) the Indian Health Service; (4) the Department of Defense (DoD); (5) the Public Health Service (PHS); (6) certain federally assisted health-care facilities; (b) any prices charged under the Federal Supply Schedule; and (c) any prices used under a State pharmaceutical assistance program.

Second, provide that, after January 1, 1993, use of federal matching funds under Medicaid for payment for a covered outpatient drug would be contingent on (in addition to a Medicaid rebate agreement) a manufacturer's (a) entering into an agreement with the Secretary of HHS under which the manufacturer agrees to provide rebates or discounts to certain PHS-funded entities and disproportionate-share hospitals; and (b) complying with the requirements of proposed new section 8126 of title 38, which I will discuss shortly, including the requirement to enter into a master agreement with the Secretary of VA.

Third, require a manufacturer entering into a master agreement with the Secretary of VA (a) beginning on January 1, 1993, to make available for procurement through the FSS each covered drug of the manufacturer; (b) with respect to each covered drug of the manufacturer procured by VA, the DoD, or the PHS through the FSS or a depot contracting system, to enter into a pharmaceutical pricing agreement with the Secretary of VA (or the Federal agency involved, if the Secretary delegates the authority to enter into such an agreement) under which the price charged during the one-year period beginning on the effective date of the agreement may not exceed the price determined using the 24-percent and additional price discount mechanism established in proposed new section 8126(c) of title 38; and (c) with respect to each covered drug of the manufacturer procured by a State Veterans Home, not to charge a price in excess of the price charged under the FSS at the time the drug is procured.

Fourth, prohibit a manufacturer, unless the manufacturer enters into and complies with the provisions of the master agreement, from receiving payment for drugs and biologicals from (a) the Medicaid program, except as authorized in section 1927(a)(3) of the SSA; (b) any VA, DoD, a PHS (including IHS) facility; or (c) any entity that receives funds under the PHSA Act.

Fifth, require that the Secretary of Health and Human Services, in determining whether a master agreement entered into between the Secretary of VA and a manufacturer meets the requirements of proposed new section 8126 of title 38, not take into account any amendments to that section that are enacted after the enactment of the Veterans Health Care Act of 1992.

Sixth, provide that a manufacturer would be deemed to meet the requirement that a manufacturer, as a condition of participation in the Medicaid program, enter into a master agreement with the Secretary of VA or an

agreement with the Secretary of HHS to provide discounts to certain PHS-funded entities, if the manufacturer establishes to the satisfaction of the Secretary of HHS that it would comply and has offered to comply with the provisions of proposed new section 8126 of title 38 as originally enacted and would have entered into a master agreement with the Secretary of VA, but for a legislative change in that section after the date of its original enactment.

Seventh, (a) require that data regarding non-Federal Average Manufacturer Prices (non-FAMPs) provided to the Secretary of VA remain confidential; and (b) authorize the Comptroller General and the Director of the Congressional Budget Office to review data provided to the Secretary of VA on non-FAMPs.

Eighth (a) provide that the termination of a Medicaid rebate agreement would not be effective until 60 days after the manufacturer notifies the Secretary of HHS; and (b) require the Secretary of HHS to notify State Medicaid programs of the termination not less than 30 days before the effective date of the termination.

Ninth, increase the Medicaid minimum rebate percentage for a single source or innovator multiple source drug to (a) 15.7 percent, from October 1, 1992, through December 31, 1993; (b) 15.4 percent, from January 1, 1994, through December 31, 1994; (c) 15.2 percent, from January 1, 1995, through December 31, 1995; and (d) 15.1 percent thereafter.

Tenth (a) require the Secretary of HHS, not later than 180 days after the expiration of each calendar quarter beginning on or after October 1, 1992, and ending on or before December 31, 1995, to submit to Congress a report containing information on (1) changes in best prices for single source and innovator multiple source drugs during the previous calendar quarter, (2) the total amount of all rebates paid under the Medicaid rebate program, broken down by the portions and percentages of the total amount attributable to the various rebate mechanisms established in section 1927(c) of the SSA, and (3) the amount of the portion of the total amount attributable to the best-price rebate mechanism; (b) provide that these reports are to cover the 1,000 drugs for which the greatest amount of Federal financial assistance was provided during calendar year 1991; and (c) require that the Secretary submit the first report not later than May 1, 1993, and that that report include information on prescription drugs dispensed during each calendar quarter that began on or after January 1, 1991, and ended on or before December 31, 1992.

#### LIMITATIONS ON PRICES OF DRUGS PURCHASED BY CERTAIN FEDERALLY ASSISTED CLINICS AND HOSPITALS

Eleventh, require a manufacturer to enter into an agreement with the Secretary of HHS under which the manufacturer must agree to extend to a covered entity a discount for a covered outpatient drug or biological equal to or greater than the discount provided for that drug or biological under the Medicaid outpatient drug rebate program.

Twelfth, define the term "covered entity" to include the following: (a) a Federally-qualified health center; (b) an entity receiving a grant under section 340A of the Public Health Service Act (PHSA); (c) a family planning project receiving PHS funds; (d) an entity receiving PHS funds for outpatient early intervention services for HIV disease; (e) a State-operated AIDS drug purchasing assistance program receiving PHS funds; (f)

a black lung clinic receiving PHS funds; (g) a comprehensive hemophilia diagnostic treatment center receiving a grant under section 501(a)(2) of the SSA; (h) a Native Hawaiian Health Center receiving funds under the Native Hawaiian Health Care Act of 1988; (i) an urban Indian organization receiving funds under title V of the Indian Health Care Improvement Act; (j) any entity receiving funds under title XXVI of the Public Health Service Act (other than a State or unit of local government) certified by the Secretary of HHS to receive discounts under proposed new section 340B of the PHSA; (k) a sexually transmitted disease clinic or a tuberculosis clinic receiving PHS funds certified by the Secretary of HHS to receive discounts under proposed new section 340B of the PHSA; and (l) certain public, acute care disproportionate-share hospitals.

Thirteenth (a) require the Secretary of HHS to develop a mechanism to implement the prohibition on duplicate rebates and discounts; and (b) if the Secretary has not acted in 12 months to develop such a mechanism, require a covered entity to follow a specific procedure to eliminate duplicate rebates and discounts.

Fourteenth, prohibit a covered entity from reselling or otherwise transferring a covered outpatient drug subject to a rebate or discount agreement to a person who is not a patient of a covered entity.

Fifteenth, require a covered entity to permit the Secretary of HHS and the manufacturer of a drug subject to a rebate or discount agreement to audit, at the Secretary of manufacturer's expense, the records of the entity that directly pertain to the entity's compliance with the prohibitions against duplicate rebates and resale of covered drugs.

Sixteenth, require a covered entity, if the Secretary of HHS finds that it is in violation of the prohibitions against duplicate rebates and resale of covered outpatient drugs, to be liable to the manufacturer in an amount equal to the reduction in the price of the drug provided under the rebate or discount agreement with the Secretary of HHS.

Seventeenth, provide that a hospital that operates a covered entity that is a distinct unit of the hospital not be entitled to rebates or discounts under this measure unless the hospital is a disproportionate-share hospital that would otherwise be eligible for such rebates or discounts.

Eighteenth, require the Secretary of HHS to develop and implement a process for certifying that the following entities are eligible to enter into rebate or discount agreements under proposed new section 340B: (a) any entity receiving assistance under title XXVI of the PHSA (other than a State or unit of local government or an entity receiving categorical grants for outpatient early intervention services for HIV disease); and (b) an entity receiving PHS funds for treatment of sexually transmitted diseases or tuberculosis through a State or a unit of local government.

Nineteenth, require the Secretary to establish a prime vendor program under which covered entities may enter into contracts with wholesalers for the distribution of covered outpatient drugs.

Twentieth, require the Secretary of HHS to notify manufacturers of covered outpatient drugs and State agencies (as defined under section 1902(a)(5) of the SSA) of the identities of covered entities and entities that no longer meet the requirements for covered entities as specified in proposed new section 340B of the PHSA.

Twenty-first, require the Secretary of HHS (a) to conduct a study of the feasibility and

desirability of including, as covered entities eligible to receive discounts or rebates under proposed new section 340B of the PHSA, entities receiving federal block grant funds from a State for funds (1) for the provision of mental health or substance abuse services, or (2) for furnishing maternal and child health services on an outpatient basis; and (b) not later than one year after enactment, to submit a report to Congress on the results of this study.

LIMITATIONS ON PRICES OF DRUGS PROCURED BY DEPARTMENT OF VETERANS AFFAIRS AND CERTAIN OTHER FEDERAL AGENCIES

Twenty-second, in proposed new section 8126 of title 38, United States Code, require a manufacturer (a) by January 1, 1993, to make available through the FSS each covered drug it manufactures; and (b) with respect to each covered drug it manufactures that is procured by VA, DoD, or PHS through the FSS or a federal depot, to enter into a pharmaceutical pricing agreement under which the manufacturer agrees to sell the covered drug through the FSS and the depot at a price determined in accordance with the price-discounting mechanisms established in other provisions in proposed new section 8126, which I will now describe.

Twenty-third, require that the price for a covered drug procured through the FSS or the VA depot contracting system during the 1-year period beginning on the effective date of the contract for that drug not exceed (a) 0.76 multiplied by the non-Federal average manufacturer price (non-FAMP) for the drug or biological during the most recent 12-month period prior to the effective date of a new FSS or VA depot agreement, respectively, for which non-FAMP data are available (unless the non-FAMP cannot be calculated for 15 months prior to the effective date, in which case the non-FAMP would be calculated during such period preceding the month during which the contract goes into effect as the Secretary considers appropriate.)

Twenty-fourth, define the term "non-Federal average manufacturer price" (non-FAMP), with respect to a covered drug and a period of time (as determined by the Secretary of VA), as the weighted average price of a single form and dosage unit of the drug that is paid by wholesalers to the manufacturer, taking into account any cash discounts or similar price reductions during that period, but not taking into account (a) any prices paid by the Federal Government, and (b) prices determined by the Secretary to be nominal in amount.

Twenty-fifth, define the additional price discount amount as the amount of the difference, if any, between (a) the non-FAMP of a covered drug for the quarter ending on the last day of the last month before the effective date of the agreement for which CPI-U data are available minus the non-FAMP for the quarter ending one year prior to that day, and (b) the non-FAMP for the quarter ending one year prior to that day multiplied by an amount equal to the increase in the CPI-U during that period. In the case of a drug or biological for which 15 months of non-FAMP data are not available, the additional price discount amount would be calculated on the basis of non-FAMP data during such period preceding the month during which the contract goes into effect as the Secretary considers appropriate.

Twenty-sixth, require that a manufacturer who enters into a master agreement with the Secretary of VA to enter into a pharmaceutical pricing agreement (PPA) with the Secretary of VA (or the Federal agency in-

volved, if the Secretary delegates to the Federal agency the authority to enter into a PPA) with respect to each covered drug procured by a Federal agency through the FSS or a depot after January 1, 1993.

Twenty-seventh, provide, in the case of a multi-year FSS or federal depot contract, that the price of a covered drug during the 1st year of the contract would be determined using the 24-percent and additional price discount mechanisms and may be increased on an annual basis by a percentage no greater than the increase in the CPI-U during the preceding year.

Twenty-eighth, authorize the Secretary of VA to negotiate a price that is nominally higher, as determined by the Secretary, than the FSS or federal depot price that would otherwise be established for that covered drug under the 24-percent and additional price discount mechanisms established in proposed new section 8126 of title 38, if the Secretary determines that payment of the excess price is in the best interests of VA.

Twenty-ninth, define the term "covered drug" as (a) a single source drug as defined under section 1927(k)(7)(A)(iv) of the SSA; (b) a drug that would be a single source drug but for the application of section 1927(k)(3) of the SSA; (c) an innovator multiple source drug as defined under section 1927(k)(7)(A)(ii) of the SSA; (d) a drug that would be a single source drug but for the application of section 1927(k)(3) of the SSA; (e) a biological product identified under section 600.3 of title 21, C.F.R.; and (f) insulin certified under section 506 of the Federal Food, Drug, and Cosmetic Act in accordance with the pricing provisions of these proposed sections.

Thirtieth, require that the provisions of section 1927(b)(3) of the SSA regarding civil penalties for the reporting of false or inaccurate information regarding pharmaceutical prices apply to covered drugs in the same manner as those provisions apply to covered outpatient drugs under the Medicaid rebate program.

Thirty-first (a) require a manufacturer of any covered drug for which the manufacturer has entered into an FSS or VA depot price agreement (1) to report to the Secretary of VA the non-FAMP for the drug during the one-year period that ends on the last day of the previous quarter, and (2) not later than 30 days after the last day of each quarter for which the agreement is in effect, to report to the Secretary the non-FAMP for the drug during that quarter; and (b) authorize the Secretary of VA, in order to determine the accuracy of a price reported to the Secretary under proposed new section 8126(b), to audit the relevant records of the manufacturer or of any wholesaler that distributes the covered drug.

Thirty-second, require the Secretary of VA to supply the following information to the Secretary of HHS: (a) upon the execution or termination of any master agreement, the name of the manufacturer; and (b) on a quarterly basis, a list of manufacturers who have entered into master agreements with the Secretary of VA.

Thirty-third, require that a manufacturer, as a condition of compliance with a master agreement entered into with the Secretary of VA, charge a State Veterans Home prices no higher than the FSS prices for covered drugs.

PERSIAN GULF WAR VETERANS' HEALTH STATUS

Mr. President, title VII contains provisions that would:

*Persian Gulf war veterans' health registry*

First, require the Secretary of Veterans Affairs to establish and maintain a Persian

Gulf War Veterans Health Registry listing the name of each individual who served in the Persian Gulf War theater of operations during the war and who, (a) applies for VA care or services, (b) files a claim for VA compensation based on any disability that might be associated with this service, (c) dies and is survived by a spouse, child, or parent who files a claim for dependency and indemnity compensation (DIC) based on this service, (d) requests a health examination from VA, as authorized in this measure, or (e) receives from the Department of Defense a health examination similar to the health examination given by VA to veterans under the bill and requests inclusion in the Registry.

Second, require that the Registry include relevant medical data relating to the health status of, and other information that the Secretary considers relevant and appropriate with respect to, each individual listed in the Registry who either grants permission to include this type of information in the Registry or is deceased at the time the individual is listed in the Registry.

Third, require the Secretary to include in the Registry, to the extent feasible, similar information about such individuals who served in the Persian Gulf that is developed in connection with similar actions occurring prior to enactment of this legislation.

Fourth, require the Secretary of Defense to provide to the Secretary of Veterans Affairs any information the Secretary of Veterans Affairs considers necessary to establish and maintain the Registry.

Fifth, require the Secretary of Veterans Affairs, in consultation with the Secretary of Defense, to ensure that information in the Registry is collected and maintained in a manner that permits effective and efficient cross-reference between the Registry and DOD Persian Gulf Registry, established under section 734 of the National Defense Authorization Act for Fiscal Years 1992 and 1993 (Public Law 102-190), as modified by this measure.

Sixth, require VA, from time to time, to notify individuals listed in the Registry of significant research developments regarding the health consequences of military service in the Persian Gulf War.

*Health examinations and counseling for veterans eligible for inclusion in certain health-related registries*

Seventh, require VA to provide, upon the request of a veteran, a health examination and consultation and counseling concerning the results of the examination to any veteran eligible for listing or inclusion in the VA Persian Gulf War Veterans Health Registry and authorize these services for any veteran eligible for listing or inclusion in any other health-related registry established by VA who requests the services.

Eighth, require VA to carry out appropriate outreach activities to inform veterans of the availability of the health examinations.

*Expansion of coverage of Persian Gulf War Registry*

Ninth, expand the DOD registry—established under section 734 of Public Law 102-190 for listing members of the Armed Forces who were exposed to the fumes of burning oil in the Operation Desert Storm theater of operations during the Persian Gulf conflict—to include any other member of the Armed Forces who served in the Operation Desert Storm theater of operations during the Persian Gulf conflict.

Tenth, expand the contents of the DOD registry to include, in addition to the name

of listed members, other relevant identifying information and, to the extent that data are available and inclusion of the data is feasible, a description of the circumstances of the member's service during the war, including the locations in the theater of operations in which the member's service occurred and the atmospheric and other environmental circumstances in those locations at the time.

Eleventh, recodify the requirement in current law that the DOD registry include, with respect to the listed members exposed to the fumes of burning oil, a description of the circumstances of each exposure of each such member to the fumes, including the length of time of the exposure.

Twelfth, recodify the requirement in current law that the Secretary establish the DOD registry with the advice of an independent scientific organization.

*Study of Persian Gulf Registry and Persian Gulf war veterans health registry*

Thirteenth, require the Director of the Office of Technology Assessment to assess:

(a) the potential utility of each of the VA and DOD registries for scientific study of the health consequences of military service in the Persian Gulf theater of operations;

(b) the extent to which each of the registries meets the requirements of the respective laws establishing that registry;

(c) the extent to which data in each registry (i) are maintained in a manner that ensures permanent preservation and allows effective, efficient retrieval of information potentially relevant to scientific study of the health consequences of military service in the Persian Gulf and (ii) would be useful for scientific study regarding these health consequences;

(d) the adequacy of any plans to update each of the registries;

(e) the extent to which VA and DOD are assembling and maintaining information on the Persian Gulf theater of operations, including troop locations and environmental conditions, in a manner that facilitates the usefulness, maintenance, and retrieval of information from the respective registry; and

(f) the adequacy and compatibility of VA and DOD's protocols for health examinations provided for the purpose of determining the health status of any member of the Armed Forces or any reserve component thereof who served in the Persian Gulf War.

Fourteenth, require VA and DOD to give OTA access to the records and information under each department's jurisdiction that OTA determines is necessary to permit OTA to carry out the assessments.

Fifteenth, require OTA to report to Congress on the assessments regarding the DOD registry and the compatibility of health-examination protocols within 270 days after enactment of the legislation and regarding the VA registry within 15 months after enactment.

*Agreement with National Academy of Sciences for review of health consequences of service during the Persian Gulf war*

Sixteenth, require the Secretaries of Veterans Affairs and of Defense, within 180 days after enactment, to seek to contract with the National Academy of Sciences (NAS) to have the NAS Medical Follow-Up Agency (MFUA) review existing scientific, medical, and other information on the health consequences of in-theater service during the Persian Gulf War.

Seventeenth, provide that the agreement shall require MFUA to provide veterans organizations and the scientific community (including the Director of the Office of Tech-

nology Assessment) with an opportunity to comment on the method or methods that MFUA proposes to use to conduct the review.

Eighteenth, require that the agreement allow MFUA, in conducting the review, to examine and evaluate medical records of individuals included in the two registries for purposes MFUA considers appropriate, including the purpose of identifying illnesses of these individuals.

Nineteenth, require MFUA to report the results of its review to the Senate and House Committees on Veterans' Affairs and on Armed Services and to the Secretaries of Veterans Affairs and of Defense, including MFUA's, (a) assessment of the effectiveness of actions by the two Secretaries to collect and maintain information potentially useful for assessing the health consequences of in-theater service; (b) recommendations on how to improve collection and maintenance of this information; and (c) recommendations on whether there is a sound scientific basis for an epidemiologic study or studies of the health consequences of this service and, if so, the nature of any such study.

Twentieth, require the two Secretaries to make available up to \$500,000 in FY 1993, from funds available to the two respective departments for that fiscal year, divided equally between the departments, to carry out the review.

Twenty-first, if VA and DOD contract with NAS for the MFUA study, require each department to provide \$250,000 in each of FYs 1994 through 2003, from amounts available to each department in each of these fiscal years, to NAS for the general purpose of conducting epidemiologic research with respect to military and veterans populations.

*Coordination of government activities on health-related research on the Persian Gulf war*

Twenty-second, require the President to designate the head of an appropriate federal agency to coordinate all research activities undertaken or funded by the Executive Branch of the federal government on the health consequences of in-theater service during the Persian Gulf War. The coordinator would be required to report to the Committees on Veterans' Affairs by March 1 of each year after 1992 on the status and results of this research.

*COURT OF VETERANS APPEALS*

Mr. President, the provision of title VIII would:

First, authorize the Judicial Conference of the United States to review judicial conduct and disability actions taken by the court of Veterans Appeals and authorize the payment of per diem and transportation costs for witnesses in connection with such hearings.

Second, authorize the Court of Veterans Appeals to award reimbursement for the reasonable expenses, including attorneys' fees, incurred by a judge against whom a complaint is brought and dismissed.

*SEXUAL TRAUMA SERVICES*

Mr. President, the provisions relating to sexual trauma services are derived from S. 2973, which I introduced on July 2, 1992, with the cosponsorship of Committee members Dennis DeConcini, John D. Rockefeller, IV, Bob Graham, Daniel K. Akaka, Thomas A. Daschle, and James M. Jeffords, and Senators Paul Simon and John F. Kerry. Joining later as cosponsors were Committee member George J. Mitchell, and Senators Edward M. Kennedy, Alan J. Dixon, Kent Conrad, Barbara Mikulski, and the late Senator Quentin N. Brudick. For further information on our Committee's efforts on this legislation, I refer my colleagues and others to the Com-

mittee's report accompanying S. 2973 (S. Rept. No. 102-409) and to my statement on Senate passage of these provisions on October 1, 1992, which begins on page S16113 of the Record.

The sexual trauma provisions in the compromise agreement are the result of efforts by the Senate and House Veterans' Affairs Committees to reach a compromise on the provisions of S. 2973 as passed by the Senate in H.R. 5193 and separately on October 1.

Mr. President, I am very pleased that these provisions are included in this measure and being sent to the President for signature. This legislation, though not all I believe is needed in this extremely important area, will help to usher in a new day in the furnishing of sexual-trauma services to the tens of thousands of women veterans who were the victims of sexual violence—and the many thousands more who may require counseling for trauma resulting from sexual harassment—during military service.

The Committee's experience with regard to the effects of trauma related to combat has shown us that symptoms stemming from trauma do not go away by themselves. They do not go away over time if ignored or if the veteran suffering from those symptoms is provided with inappropriate or inadequate treatment. Up to this point, the federal government has not met its very fundamental obligations to help these women veterans deal with these problems. This has to change.

Mr. President, in the negotiations with the House Committee on Veterans' Affairs regarding this matter, major concessions had to be made in order to obtain the agreement of that Committee's leaders. Although they shared a deep concern for the wellbeing of these women veterans, they were reluctant to make changes in VA eligibility rules in advance of the expected effort in the 103rd Congress to make major reforms in VA health-care entitlements and eligibilities. Thus, I appreciate their willingness to craft this particular compromise this year.

The compromise agreement will authorize VA to provide counseling to survivors of sexual violence that occurred on active duty without regard to determinations of service connection. This should be a major first step on the road toward improving and expanding VA services for veterans suffering from sexual trauma. However, I am very concerned that many women veterans may not be able to receive the full range of health-care, and other services, to which they truly should be entitled.

Mr. President, it is my view that much, much more needs to be done to improve the services VA provides to women veterans who experience sexual violence while on active duty. I am hopeful, however, that the provisions of this compromise agreement will force VA to take a hard look at existing services for the survivors of sexual violence and take steps to make needed improvements in those services. In addition, there are certain issues in and surrounding this provision that should ensure that this matter is revisited by Congress in the near future. First, under the limitations in this compromise, the vast majority of the women who may need sexual trauma counseling will lose the special eligibility that this legislation would create at the end of calendar year 1993. In my view, that limit clearly should be revisited next year.

In addition, as Congress deals with the issues of VA health-care entitlement and eligibility reform in the 103rd Congress, the special needs of women veterans who were vic-

tims of sexual assault while on active duty should be given very serious, special consideration.

Finally, since this special authority itself expires at the end of 1995, Congress will be forced to revisit this issue fully in three years if it has not done so earlier.

Thus, Mr. President, as my 24 years of service in the Senate on behalf of America's veterans comes to a close, fully meeting the needs of women veterans who have suffered sexual violence or harassment will remain unfinished business. But I leave knowing that, in the past five months since the problem came to my attention in a dramatic way, I have done all that I could on their behalf, and I leave knowing that the momentum for progress had been created.

I am confident that my colleagues on the Committee and in the Senate who will be returning—and the new members who will arrive in January—will carry this work forward. I expect that Congress eventually will do all that is necessary to assist women veterans who experienced sexual violence while serving their country in securing all the services that they need and truly deserve.

#### HEALTH CARE FOR WOMEN VETERANS

Mr. President, we have been able to include in the compromise agreement provisions which would improve the health care available to women veterans. As I just mentioned regarding care for sexual trauma, VA has been slow to reach out to women veterans—both regarding health problems that are unique to women and those experienced by men and women but with gender specific diagnosis or treatment implications. The provisions for women's care in this compromise agreement are not as extensive as those passed by the Senate but they do represent progress.

I am disappointed about two provisions in the Senate-passed bill that are not included in this compromise agreement, each which would have required the Secretary to provide better support for programs designed to improve health-care services to women veterans. The Senate bill would have directed the Secretary to provide sufficient funding to each VA health-care facility so that each women veterans coordinator could carry out the position's functions effectively. It also would have required the Secretary to provide sufficient funding so that the members of the Advisory Committee on Women Veterans could travel to make a reasonable number of site visits as well as attend Committee meetings. I urge VA to provide resources for these purposes under current authority.

#### NURSE PAY AMENDMENTS

Mr. President, the Nurse Pay Act of 1990, enacted as Public Law 101-366, of which I was the author in the Senate, paved the way for locality pay for federal employees. Overall, this act is succeeding in helping VA recruit and retain a strong nursing personnel force. There have been some problems—including problems with ascertaining valid comparison standards for nurse anesthetists and problems associated with the way in which VA is using the four grades mandated by the Nurse Pay Act. The compromise agreement addresses both of these issues. With reference to the nurse anesthetists, the measure would give VA an additional tool that could be used to determine fair compensation rates in those situations in which the other basic tools of the locality pay survey process are not sufficient. With respect to the nurse pay grades, the Committee agreement would establish a fifth pay grade in the title 38 Nurse Schedule and would direct the Secretary to

review VA's qualification standards to distribute more evenly the range of nurse education, experience, and responsibility represented by VA's nursing staff across the pay grades.

#### PREVENTIVE HEALTH

Mr. President, I am pleased that my colleagues in the House have agreed to my proposal for a National Center for Preventive Health at the Department of Veterans Affairs. I expect that VA will make good use of this impetus to expand the work that its clinicians, scientists, and educators are doing currently in the area of preventive health. The heightened focus on preventive health, provided by the core funding and attention, should enable efficient and creative use of other funding, such as VA's own investigator-initiated research and NIH and other public and private grant sources.

Mr. President, VA is in a unique position—in terms of its structure, organization, personnel, and patient population—to further the nation's knowledge of relationships among screening for disease, educating about modifying risky behaviors, counseling regarding the management of early symptoms, treatment of early disease manifestations, measures of morbidity such as days lost from work, or days in the hospital, or kinds of medications required, and, finally, mortality rates. This National Center, I hope, will tap that strength.

#### PRICES FOR DRUGS AND BIOLOGICALS

Mr. President, the provisions of the compromise agreement regarding prices for drugs and biologicals purchased by VA would reverse the unintended adverse consequences that the Medicaid outpatient drug rebate program has had on VA's prices for drugs and biologicals and ensure that VA will once again be able to purchase them at reasonable prices. The strongly bipartisan VA drug price provisions in this bill are derived from provisions that Senators Rockefeller, Simpson, Murkowski, and I offered at the August 7, 1992, Committee on Veterans' Affairs' markup. Other provisions would provide similar discounts on drug prices for other federal agencies, State Veterans Homes, disproportionate-share hospitals, community and migrant health centers, and certain other PHS-funded entities.

My distinguished colleague on the Committee, Senator Rockefeller, has worked extremely long and hard with me on this issue through almost the entire 102nd Congress. During the past several weeks he has skillfully devoted an extraordinary amount of time and energy to securing Senate passage of S. 2575, which contained the original Senate drug price provisions, and negotiation of a compromise agreement with our colleagues on the Committees on Energy and Commerce and Veterans' Affairs in the House of Representatives. He has worked tirelessly with other Senators, VA officials, and pharmaceutical manufacturers to resolve their differences regarding the drug-price provisions. In addition, I have worked closely with Senator Kennedy, Senator Mikulski, and Senator Pryor in developing the legislation from which the drug-price amendment approved by our Committee was derived. Senators Murkowski and Simpson also have been very helpful in this effort.

Mr. President, unless drug price provisions such as those in the compromise agreement are enacted, VA will continue to lose about \$90 million a year as a result of the dramatic escalation of the prices VA pays for prescription drugs. In light of the tight constraints on VA's budget, this simply must not con-

tinue. In an effort to cope with these price increases, some VA medical centers have refused to provide certain very effective, but high-cost drugs and biologicals. Others have diverted funds from other aspects of their operations to pay for drugs and biologicals. Those kinds of actions mean longer waiting times for scheduled appointments or loss of access to VA health-care services for individual veterans, fewer nurses on inpatient wards to respond to patient needs, and continued use of worn-out or out-dated medical equipment.

Specifically, the provisions of the compromise agreement would require manufacturers to provide VA with minimum percentage discounts for single source and innovator multiple source drugs and biologicals purchased through the Federal Supply Schedule and VA depots. In general, manufacturers would be required to provide at least a 24-percent discount off the average price charged to wholesalers in the United States for distribution to all classes of trade less an additional price discount amount.

The purpose of the additional price discount amount is to protect VA against an increase in the price of a covered drug greater than the general rate of inflation in a manner comparable to how the additional rebate mechanism protects Medicaid from such an increase in the average manufacturer price of a drug covered under the Medicaid outpatient drug rebate program. In determining the maximum FSS or VA depot price for a covered drug during the first year of a contract, the 24-percent discount would be applied after the wholesalers' average price has been reduced by the additional price discount amount.

#### PERSIAN GULF VETERANS' HEALTH STATUS

Mr. President, my colleagues are well aware that some veterans and current active-duty service members who served in the Persian Gulf War theater of operations are experiencing serious, unexplained health problems that some suspect are related to in-theater service before, during, or after the war. A small number also have experienced specific health problems that clearly are related to this service, such as leishmaniasis, which results from infection by a known tropical parasite.

All of us have seen the press reference to "mysterious illnesses" in Persian Gulf veterans. Some of the 540,000 American troops who served in the Persian Gulf have reported lingering health problems, such as joint pain, chronic fatigue, hair loss, bleeding gums, and skin rashes. Some concern has focused on the effects of the burning oil from wells in Kuwait that were set afire by enemy troops. Scientists have not as yet, however, been able to establish a link between the unexplained symptoms and the oil fires. In fact, environmental scientists have advised our Committee that the oil fires burned so hot that they emitted only soot and other particulate matter, with practically no detectable levels of the volatile petrochemicals that might cause health problems.

Mr. President, military health authorities have reported that some of the symptoms could be related to the stresses of combat and returning home from combat. Some have interpreted this as a denial of the observed medical problems. This is not necessarily the case. Our experience with post-traumatic stress disorder clearly shows that stress can create or aggravate real physical symptoms that require treatment. On this point, the Army physician in charge of the Office of Professional Services and Chief of Medical Corps Affairs of the Office of the Surgeon

General, Brigadier General Ronald Blanck, readily acknowledges that "these people have a real disease."

Mr. President, Senators Kohl and Daschle and I co-authored an amendment to last year's defense authorization measure, Public Law 102-190, that established a Department of Defense registry of all servicemembers who were exposed to the fumes of burning oil during service in the Persian Gulf. The registry is intended to preserve information about these troops that could prove vital in assessing the health impact of the oil fires.

The Senate adopted our amendment less than 6 months after Operation Desert Storm began. I believe that quick action in the Congress demonstrated how much we have learned from our experience with Agent Orange. One of the great difficulties in trying to resolve whether certain diseases are related to exposure to Agent Orange in Vietnam has been the effort to document who was exposed, using old and inadequate information about troop locations and other circumstances of veterans' service in Vietnam. Establishing a DOD registry is an attempt to compile and analyze this type of data regarding Persian Gulf veterans before the information is lost or hopelessly dispersed.

Mr. President, with the appearance of these newly recognized, unexplained medical problems in Persian Gulf veterans, it is clear that a DOD registry limited to servicemembers exposed to fumes, by itself, is not sufficient. The DOD registry must be expanded and we must require the Department of Veterans Affairs to collect and preserve information about the health of these veterans.

Mr. President, I congratulate former Secretary of Veterans Affairs, Edward J. Derwinski, and Deputy Secretary Anthony J. Principi, now the Acting Secretary, for VA's request for legislation to establish a VA health registry and authorize medical examinations for Persian Gulf veterans. Their leadership on this issue is an encouraging sign of how far our government has come in recognizing its responsibilities to veterans exposed to environmental dangers during service. This is an especially welcome signal to those of us who have spent so many years seeking equitable compensation and medical treatment for veterans exposed to radiation or Agent Orange.

#### NEED FOR SCIENTIFIC APPROACH

Mr. President, while I applaud VA's proposal, I believe that it left out some important elements. Even VA was careful to point out that the registry it proposed, which would include a largely self-selected group of veterans, is not very useful scientifically. In announcing the proposed registry and health examinations, however, VA asserted that the registry and examinations would "reassure veterans that VA will keep ahead of the science and remain committed to long-term monitoring" of these veterans. The VA proposal itself, however, did not address the scientific issues involved in determining whether or not those who served in the Persian Gulf experience long-term adverse health consequences.

Mr. President, the legislation we are introducing today does address the need for valid, long-term scientific study of these reported medical problems—without reaching any conclusions at this time about specific conditions or mandating any particular studies. The best scientific advice available to us at this point indicates that such legislation would be premature.

Our legislation, in addition to creating a VA health registry and authorizing health

examinations, would require VA and DOD to contract with the National Academy of Sciences' Medical Follow-Up Agency (MFUA) to review the existing scientific, medical, and other information on the health consequences of military service in the Persian Gulf theater of operations. MFUA also would assess the effectiveness of VA's and DOD's efforts to collect and maintain information potentially useful for assessing these health consequences. Finally, MFUA would evaluate and recommend whether there is a scientific basis for VA and DOD to undertake an epidemiological study or studies, and, if so, what types of studies would be appropriate.

#### ADEQUACY OF VA AND DOD REGISTRY DATA

Mr. President, the compromise agreement also would direct the Office of Technology Assessment, an agency of the Congress, to evaluate the potential scientific usefulness of both the new VA registry and the existing DOD registry.

Mr. President, the DOD registry currently must include only those servicemembers who were exposed to the fumes of burning oil during the war, as determined by the Secretary of Defense. The compromise agreement would expand the DOD registry to include all others who served in the Persian Gulf War theater of operations. The expanded registry would be required to include information about the circumstances of the service of all servicemembers who served in the Persian Gulf, such as troop-location data and atmospheric and environmental measurements for specific locations and times. I thank the distinguished Chairman of the Armed Services Committee and cosponsor of this legislation (Mr. NUNN) for his leadership on the provisions expanding the DOD registry.

Mr. President, the VA registry in this legislation is modeled closely on the Ionizing Radiation Registry created by the Veterans' Benefits Improvement and Health-Care Authorization Act of 1986, Public Law 99-576, which I co-authored in the Senate with the Senator from Wyoming (Mr. SIMPSON).

#### COORDINATION OF FEDERAL RESEARCH REGARDING HEALTH EFFECTS OF PERSIAN GULF SERVICE

A final part of the compromise agreement would require the President to designate a senior government official to coordinate all research activities undertaken or funded by the Executive Branch on the health consequences of military service in the Persian Gulf. This provision is modeled on another law I co-authored, the Veterans Health Programs Extension and Improvement Act of 1979, Public Law 96-151, which required the President to ensure that agencies coordinate all federal research on Agent Orange. The White House Domestic Policy Council currently has the responsibility for coordinating federal research on Agent Orange, and I expect that an official at a similarly high-ranking level would be appointed to coordinate federal research on Persian Gulf War health issues.

#### CONCLUSION

Mr. President, in closing, I thank our committee's ranking Republican member, Senator SPECTER, for his cooperation and help with this compromise agreement. I also am grateful to other members of the committee for their support of and cooperation on this measure.

I also express my gratitude for their work on this legislation to the committee's minority staff, Carrie Gavora, Bill

Tuerk, Yvonne Santa Anna, who has moved to Senator SPECTER's personal staff, and Tom Roberts, and, for all their help to me on this measure, majority staff members Janet Coffman, Virginia Rowthorn-Apel, Neil Koren, Susan Thaul, Michael Cogan, Thomas Tighe, Bill Brew, and Ed Scott.

I also thank the chairman of the House Veterans' Affairs Committee, G.V. "SONNY" MONTGOMERY, and the committee's ranking Republican member, BOB STUMP, as well as the other members of the House committee, for their great cooperative spirit in working with our committee to reach an agreement on this important legislation. For their assistance and fine work in developing this compromise agreement, I also thank House Veterans' Affairs Committee minority staff members Sarah Boyd, Tina Alvarado, Carl Commenator, and Kingston Smith and majority staff members Greg Matton, Ralph Ibson, Pay Ryan, and Mack Fleming.

In addition, with regard to the drug-provision provisions, I thank House Committee on Energy and Commerce Chairman, JOHN DINGELL, and ranking Republican member, NORMAN LENT, as well as that committee's Health and the Environment Subcommittee Chairman, HENRY WAXMAN, and ranking Republican member, WILLIAM DANNEMEYER, for the thoughtfulness and cooperation they displayed in developing a compromise agreement on these provisions. Great thanks are also due to Senate Finance Committee's Chairman, LLOYD BENTSEN, and ranking Republican member, BOB PACKWOOD. For their tireless efforts in pursuit of this agreement, I also extend thanks to Barbara Pryor, Ellen Doneski, and Tamera Stanton of Senator ROCKEFELLER's staff; John Coster and Chris Jennings of the Special Committee on Aging staff; Marsha Simon of the majority staff and Ann LaBelle of the minority staff of the Committee on Labor and Human Resources; Phyllis Albritton of Senator MIKULSKI's staff; David Balland of Senator SIMPSON's staff; John Bradley of Senator MURKOWSKI's staff; Marina Weiss and Janis Guerny of the majority staff and Roy Ramthun of the minority staff of the Finance Committee; and Donald Shriber, Karen Nelson, and Andreas Schneider of the majority staff and Howard Cohen of the minority staff of the House Committee on Energy and Commerce.

We also owe a debt of gratitude to Charlie Armstrong and Mark Mathiesen of the Senate Legislative Counsel's Office and to Noah Wofsy and Edward Grossman of the House Legislative Counsel's Office for the painstaking care and skill they devoted to the drafting of this legislation.

Finally, I acknowledge and thank the many VA officials who were so very helpful in the development of this

measure, especially Louise Rodriguez, Chief of Clinical Pharmacy/Quality Management, VA's Pharmacy Service, for her enormously valuable assistance on the countless complex issues with which we had to deal over the past year; Deputy Assistant Secretary for Legislative Affairs Jo Sherman and Congressional Relations Officer Nurit Erger for their excellent work; and the acting Secretary of Veterans Affairs Tony Principi, a great friend of veterans, who has devoted a great deal of his personal attention to this issue.

Mr. President, I ask unanimous consent that the explanatory statement on this compromise agreement prepared by the House and Senate Veterans' Affairs Committees be printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

JOINT EXPLANATORY STATEMENT ON H.R. 5193,  
THE PROPOSED VETERANS HEALTH CARE ACT  
OF 1992

H.R. 5193, the proposed "Veterans Health Care Act of 1992" reflects a compromise agreement that the Senate and House of Representatives Committees on Veterans' Affairs have reached on certain bills considered in the Senate and the House during the 102nd Congress. These are H.R. 5193 as passed by the House on August 4, 1992 (hereinafter referred to as "H.R. 5193"); H.R. 2890 as passed by the House on September 22, 1992 (hereinafter referred to as "H.R. 2890"); H.R. 5192 as passed by the House on October 1, 1992 (hereinafter referred to as "H.R. 5192"); S. 2575 as passed by the Senate as a substitute amendment for H.R. 5193 on October 1, 1992 (hereinafter referred to as "S. 2575"); S. 2973 as passed by the Senate on October 1, 1992, as part of the amendment for H.R. 5193 and as a separate bill (hereinafter referred to as "S. 2973"); and S. 2974 as passed by the Senate on October 1, 1992, (hereinafter referred to as "S. 2974").

The Committees on Veterans' Affairs have prepared the following explanation of the Compromise agreement on H.R. 5193 (hereinafter referred to as "compromise agreement"). Differences between the provisions contained in the compromise agreement and the related provisions in the bills noted above are noted in this document, except for clerical corrections and conforming changes made necessary by the compromise agreement and minor drafting, technical, and clarifying changes.

#### TITLE I—WOMEN VETERANS HEALTH PROGRAMS

##### *Sexual trauma counseling*

*Current law:* Access to VA health care is based on specific entitlements and eligibilities. There is no specific provision relating to counseling or treatment for sexual trauma.

*House bill:* No provision.

*Senate amendment:* Section 701 of S. 2575 would require VA, in the case of a woman veteran whom a VA health-care professional designated by the Chief Medical Director has found to be in need of counseling or treatment for sexual trauma resulting from events that occurred during service, to provide the veteran with health-care services necessary in connection with the trauma on the same basis as VA is required to provide care for service-connected disabilities. Sexual trauma would be defined as the imme-

diately and long-term physical or psychological trauma resulting from rape, sexual assault, sexual harassment or other act of sexual violence.

*Compromise agreement:* Section 102 would amend chapter 17 of title 38, United States Code, to add a new section, 1720D, "Counseling to Women Veterans for Sexual Trauma". Subsection (a) of new Section 1720D would authorize the Secretary, through December 31, 1995, to provide needed counseling to any woman veteran who (a) seeks counseling from VA (1) within two years after her discharge from service or, (2) in the case of a veteran who was discharged from service prior to December 31, 1992, not later than December 31, 1993, and (b) the Secretary determines requires counseling to overcome psychological trauma which, in the judgment of a VA health-care professional, resulted from physical assault, battery of a sexual nature, or sexual harassment which occurred during active duty. Sexual harassment would be defined as repeated, unsolicited verbal or physical contact of a sexual nature which is threatening in character.

Subsection (b) of new section 1720D of title 38 would prohibit the Secretary, in providing services under this section to a veteran for a condition which has not been determined to be service connected, from providing counseling for a period in excess of one year unless the Secretary determines that a longer period of counseling is necessary.

Subsection (c)(1) of new section 1720D would require the Secretary to take action to ensure that, if a veteran eligible for counseling under this section also requires other medical services under chapter 17 relating to sexual trauma for which she is eligible, she is furnished such care and services in coordination with the counseling.

Subsection (c)(2) of new section 1720D would require the Secretary, in establishing the program authorized in his new section, to (a) provide for appropriate training of mental health professionals and other health care personnel as is necessary to carry out the program effectively; (b) seek to ensure that counseling under the program is furnished in a therapeutically appropriate setting, taking into account the circumstances which provoked the need for such counseling; and (c) provide referral services to assist women veterans who are not eligible for other needed treatment and services from VA to obtain such treatment and services from sources outside VA.

It is the view of the Committee that the counseling authorized in this section may be provided appropriately in any Department facility—including outpatient clinics, mobile or satellite clinics, and Vet Centers—that has staff with the specialized training necessary to counsel individuals who suffer from sexual trauma.

The Committees note that this provision is designed to provide access to counseling for women veterans who suffer from sexual trauma related to incidents of sexual violence or harassment that occurred during active duty and does not provide access to individuals who may be in need of counseling or other medical services for trauma arising from incidents of a non-sexual nature that occurred in the course of basic or other military training.

The Committees also urge the Secretary of Defense to take all reasonable actions necessary to protect women in the military from sexual violence and to provide the victims of such violence with the administrative, legal, and medical assistance they require. With respect to the reporting of inci-

dents of sexual violence, the Committees urge the Secretary of Defense to establish a confidential and safe method for service-members to report such incidents. Although formal reporting mechanisms may exist currently, the reluctance of women to use these channels in the past indicates that they are not as effective as they should be. This underreporting of such incidents—and the resulting absence of information in military records to substantiate a woman veteran's claim that an incident of sexual violence occurred—can thwart totally a veteran's ability to produce the substantiating evidence necessary to establish service connection of disabilities related to the sexual violence and thus secure needed care at VA facilities on a priority basis. The Committees call on the Secretary of Defense to ameliorate this problem of underreporting so that women veterans seeking VA medical services will have the documentation necessary to be determined eligible for such services on the basis of service connection.

*Contract care authority*

*House bill:* No provision.

*Senate amendment:* Section 701 of S. 2575 would authorize VA, through December 31, 1994, to furnish sexual-trauma counseling services through contracts with non-VA providers and require VA to provide to the Senate and House Veterans' Affairs Committees by March 31, 1994, a report on the use of that authority.

*Compromise agreement:* Subsection (a)(2) of new section 1720D of title 38 follows the Senate amendment with an amendment to limit the contract authority to situations in which, in the judgment of a VA mental health professional, the receipt of counseling in VA facilities would be clinically inadvisable or where VA facilities are unavailable because of geographic inaccessibility.

*Priority for outpatient care for sexual-trauma counseling*

*House bill:* No provision.

*Senate amendment:* Section 701 of S. 2575 would require that women veterans eligible for services under that section be accorded the same priority as veterans receiving care for service-connected disabilities.

*Compromise agreement:* Section 103 would amend section 1712(1)(2) to provide that the furnishing of counseling for women veterans who are eligible for counseling under new section 1720D receive the same priority as is accorded veterans who have service-connected disabilities rated at less than 30 percent or who are being examined to determine if they have a service-connected disability.

*Commencement of provision of information on services*

*Current law:* Section 7722 of title 38 requires VA to conduct outreach services to ensure that all veterans are informed of the benefits for which they may be eligible or to which they may be entitled.

*House bill:* No provision.

*Senate amendment:* Section 702 of S. 2575 would require VA to provide a toll-free, 24-hour information and referral telephone line to provide information regarding the availability of care and services relating to sexual trauma. The toll-free line would be staffed by personnel trained to facilitate access to services relating to sexual trauma and operated in a way that protects the confidentiality of callers.

Section 705 of S. 2575 would require the Secretaries of VA and Defense jointly to ensure that all women being separated from active duty are given appropriate advice regarding (a) the availability of counseling,

medical care, and other services and assistance from VA with respect to sexual trauma; and (b) the requirements for eligibility for, or entitlement to, and the procedures for applying for, such counseling, medical care, and other services and assistance.

*Compromise agreement:* Section 104 would require the Secretary, not later than 90 days after enactment, to commence the provision of information on the counseling relating to sexual trauma that is available to women veterans under this legislation, including the time limitations on applying for such counseling. In carrying out this section, the Secretary (a) would be required, in coordination with the Secretary of Defense, to ensure that women who are being separated from active duty are provided with information about the requirements and procedures for applying for counseling under this program, and (b) may establish an information system involving a toll-free telephone number.

*Report on implementation of Sexual Trauma Counseling Program*

*House bill:* No provision.

*Senate amendment:* Section 704 of S. 2575 would require the Secretary of VA, by March 1, 1993, and by December 31 of each of calendar years 1993 through 1997, to provide the Veterans' Affairs Committees with a comprehensive report on VA services available to veterans who experienced sexual trauma, including (a) information on the medical care, counseling, outreach and other services for veterans who have experienced sexual trauma, and the numbers of male and female counselors who have been provided with specialized training in counseling for sexual trauma; (b) an assessment of deficiencies in meeting the needs of veterans for such counseling, medical care, and other services; and (c) plans to correct such deficiencies.

*Compromise agreement:* Section 105 would require the Secretary, by March 31, 1994, to submit to the Veterans' Affairs Committees a comprehensive report on the Secretary's actions taken under this legislation. The report would be required to include (a) the numbers of veterans, by facility, who received counseling under this program, including the use made of the contract authority provided for under section 102; (b) the numbers of veterans, by facility, who received other care or services in connection with the aftereffects of sexual trauma and the numbers of veterans referred to non-VA sources; (c) a listing and description of the specific training programs which the Secretary instituted to ensure that the counseling program established under this legislation is carried out effectively; and (d) a description of the specific efforts taken by the Secretary to seek to ensure that the counseling under this legislation is furnished in therapeutically appropriate settings taking into account the circumstances which provoked the need for the counseling.

*Health-care services for women veterans*

*House bill:* No provision.

*Senate amendment:* Section 801 of S. 2575 would (a) add "well-women care services" to the definition of medical services in section 1701 of title 38 and provide that such term (1) includes counseling and services relating to Papanicolaou tests, breast examinations and mammography, general reproductive health care, the management of infertility, menopause, and physical or psychological conditions arising out of acts of sexual violence; and (2) does not include pregnancy care, except care relating to a pregnancy that is complicated, or in which the risks of complication are increased, by a service-con-

nected condition; or abortion; and (b) authorize the Secretary, through the period ending on December 31, 1994, to contract with non-VA facilities for the furnishing of well-women care services to veterans on an outpatient basis.

*Compromise agreement:* Section 106 would authorize the Secretary, in furnishing hospital care and medical services under Chapter 17 of title 38, United States Code, to provide certain health care services to women veterans. These services are "pap smears," breast exams and mammography, and general reproductive health care. The measure expressly provides that the phrase "general reproductive health care" includes the management of menopause, but does not include under this section infertility services, abortions, or pregnancy care (including prenatal and delivery care). The inclusion of the phrase "under this section" underscores the intent of the Committees not to limit such authority as the Secretary may have to provide any infertility services under chapter 17. The use of that phrase does not, however, signal an intent to expand such authority. The measure also incorporates the exception to the bar on furnishing pregnancy care reflected in VA regulations (at 39 CFR sec. 17.48(h)) associated with care relating to a complicated pregnancy, as well as the instance in which the risks of complication are increased by a service-connected condition.

Section 106(b) would require that the Secretary ensure that the directors of VA health care facilities identify and assess opportunities under the expanded VA-DOD sharing authority provided under title II of this Act to (a) expand the availability of, and access to, health care services for women veterans under sections 1710 and 1712 of title 38, U.S.C., and (b) provide counseling, care, and services authorized by title I of this Act.

*Report on health care and research*

*House bill:* No provision

*Senate amendment:* Section 801(c) of S. 2575 would require the Secretary, during the period ending on January 1, 1997, to submit annual reports to the Committees on Veterans' Affairs, not later than January 1st of each year, which must contain descriptions of (1) the types and numbers of VA personnel who provided health-care services to women veterans, (2) any actions taken by the Secretary to ensure the retention of such personnel and any actions undertaken to replace such personnel or recruit additional personnel, (3) the type and amount of well-women care services furnished by such personnel, (4) the type and amount of well-women care services provided under contracts with non-VA facilities, (5) any difficulties experienced by the Secretary in the furnishing of well-women care services and the actions taken by the Secretary to resolve such difficulties, and (6) actions taken by the Secretary to foster and encourage the expansion of research relating to health-care issues of concern to women veterans.

Section 805 of S. 2575 would require the Secretary, not later than July 1, of 1992, 1993, 1994, and 1995 to submit to the Committees on Veterans' Affairs a report containing (a) a description of the status of any research relating to women veterans being carried out by or under the jurisdiction of the Secretary; and (b) the recommendations of the Secretary regarding future research.

*Compromise agreement:* Section 107 would require that, not later than January 1 of 1993, 1994 and 1995, the Secretary submit to Congress a report on the provision of health care services, and the conduct of research carried out by, or under the jurisdiction of, the Sec-

retary relating to women veterans. This report would include the following information with respect to the most recent fiscal year before the date of the report:

(a) The number of women veterans who have received services described in section 106 of this Act in facilities under the jurisdiction of the Secretary (or the Secretary of Defense), tabulated by reference to the Department facility which provided (or, in the case of the Department of Defense, arranged) those services;

(b) A description of the services provided at each of these facilities;

(c) A description of the extent to which each these facilities rely on contractual arrangements under sections 1703 (relating to contract authority at non-Department facilities) or 8153 (relating to sharing of specialized medical resources) of title 38, U.S.C., to furnish care to women veterans in facilities which are not under the jurisdiction of the Secretary where the provision of such care is not furnished in a medical emergency;

(d) The steps taken by each such facility to expand the provision of services at such facility (or under arrangements with the Department of Defense facility) to women veterans; and

(e) A description, as of October 1 of the year preceding the year in which the report is submitted, of the status of any research relating to women veterans being carried out by or under the jurisdiction of the Secretary.

#### *Coordination of services*

*House bill:* No provision.

*Senate amendment:* Section 807 of S. 2575 would (a) require the Secretary to appoint a regional women veterans coordinator to serve in each VHA regional office on a full-time basis; and (b) require each regional women veterans coordinator to (1) coordinate the training of women veterans coordinators who are assigned to VA health-care facilities in that region, and (2) provide appropriate technical support and guidance to VA facilities in that region with respect to outreach activities to women veteran.

*Compromise agreement:* Section 108 would require the Secretary to ensure that an official in each regional office of the Veterans Health Administration serve as a regional women veterans coordinator. The responsibilities of these coordinators would include (a) conducting periodic assessments of the needs for services of women veterans within such region; (b) planning to meet such needs; (c) assisting in carrying out the purpose of title II of this Act relating to encouraging expansion of VA-DOD sharing to expand the availability of women's health care services; (d) coordinating the training of women veterans coordinators who are assigned to VA facilities in the region under jurisdiction of such regional coordinator; and (e) providing appropriate technical support and guidance to VA facilities in that region with respect to outreach activities to women veterans.

While the Committees do not anticipate the need to hire an additional regional office employee to fulfill these duties, it is intended that the regional women veterans coordinator have adequate time to perform the prescribed duties that this position requires.

#### *Support for women veterans coordinators*

*House bill:* No provision.

*Senate amendment:* Section 806 of S. 2575 would require the Secretary to take appropriate actions to ensure that (a) sufficient funding is provided to each VA facility to permit women veterans coordinators to carry out their duties; (b) sufficient clerical and communications support is provided to

each women veterans coordinator to enable each coordinator to carry out the duties of that position; and (c) each women veterans coordinator has direct access to the Director or Chief of Staff of the VA facility at which the coordinator is employed.

*Compromise agreement:* No provision. The Committees understand that the job of a women veterans coordinator is, in most cases, a part-time position and the person performing this job is often responsible for many other duties in a VA facility. The Committees believe that this position is vital to ensuring women veterans receive the health care services and benefits they deserve under the law. Therefore, the Committees encourage the Secretary to provide, by whatever means available, and to whatever extent practicable, support for women veterans coordinators in the performance of their duties.

#### *Funding for advisory committee on women veterans*

*House bill:* No provision.

*Senate amendment:* Section 808 of S. 2575 would require the Secretary to provide funds for use by the members of the Advisory Committee on Women Veterans for (a) travel in connection with a reasonable number of site visits to VA health-care facilities; and (b) the conduct of Advisory Committee meetings.

*Compromise agreement:* No provision.

The Committees urge the Secretary to review the budget of the Advisory Committee on Women Veterans to ascertain whether there is adequate funding to fulfill the Advisory Committee's mission as stated in its charter, which includes holding at least one annual meeting and performing site visits to VA facilities.

#### *Research relating to women veterans health*

*House bill:* No provision.

*Senate amendment:* Section 802 of S. 2575 would (a) require the Secretary, in consultation with the Chief Medical Director (who would be required to consult with other specified VA officials), to foster and encourage the initiation and expansion of research into the health consequences for women veterans of (1) breast cancer, (2) gynecological and hormonal matters, (3) cancer of the reproductive organs, (4) Alzheimer's Disease, (5) osteoporosis, (6) post-traumatic stress disorder, (7) substance abuse, and (8) sexual violence; (b) require the Comptroller General to carry out a study to determine (1) the percentage of all admissions of women veterans admitted to VA facilities on the basis of a diagnosis of psychotic illness, (2) the percentage of all admissions of men veterans admitted to VA facilities on the basis of such a diagnosis, and (3) an explanation of the difference, if any, between these percentages; and (c) authorize, in addition to other funds appropriated to VA for medical research the appropriation of funds to VA for the purposes described in (a) and (b), above, as follows: (1) for FY 1993, \$1,500,000, (2) for FY 1994, \$2,000,000, and (3) for FY 1995, \$2,500,000.

*Compromise agreement:* Section 109 would require the Secretary, in carrying out the Secretary's responsibilities to perform research on disease and disabilities relating to medical care and treatment of veterans, to foster and encourage the initiation and expansion of research relating to women veterans health. This provision is subject to section 7307(a)(3) of title 38.

The Committees encourage the Secretary, when initiating new research projects on women veterans health, to consult with relevant offices within VHA such as Nursing

Service, the Office of Women Veterans Programs, the Advisory Committee on Women Veterans and pertinent task forces. The Secretary is also encouraged to draw on the expertise of VA health care professionals, including those who work in specialized programs such as the Geriatric Research, Education and Clinical Centers program and those conducting research with the National Center for Post-Traumatic Stress Disorder.

Section 109 would authorize, in addition to other funds appropriated or otherwise made available to VA for medical research, the appropriation of funds to VA for the purpose of carrying out new research projects relating to women veterans as follows: (1) for FY 1993, \$1,500,000, (2) for FY 1994, \$2,000,000, and (3) for FY 1995, \$2,500,000.

#### *Population study of women veterans*

*House bill:* No provision.

*Senate amendment:* Section 804 of S. 2575 would (a) require the Secretary to conduct a study to determine the health-care needs of women veterans; (b) require the Secretary, prior to conducting the study, to request the advice of the VA Advisory Committee on Women Veterans and the Defense Advisory Committee on Women in the Services; (c) require the Secretary (with the assistance of the Secretary of Defense), in carrying out the study, to examine the medical, biopsychosocial, and demographic histories of an appropriate sample of women veterans and women serving on active duty; (d) require the Secretary to submit biannual reports not later than April 1, 1994 through 2004, to the Committees on Veterans' Affairs relating to the results of the study; and (e) authorize appropriation of \$1,500,000 to carry out the purposes of this section.

*Compromise agreement:* Section 110 would require the Secretary to conduct a study to determine the needs of women veterans for health-care services. Prior to initiating the study, the Secretary is required to request the advice of the Advisory Committee on Women Veterans. In conducting the study, the Secretary is required to include an appropriate sampling of women veterans and women members of the Armed Forces who are serving on active duty.

For the purposes of this study, the Committees intend the term "appropriate sampling" to include, but not be limited to, the selection of a representative sampling of the ages, the ethnic, social and economic backgrounds, the enlisted and officer grades, and the branches of service of all women veterans and women members of the Armed Forces.

Section 110 also would require the Secretary to submit the following reports relating to the study to the House and Senate Committees on Veterans' Affairs: (a) an interim report nine months after the date of enactment of this Act describing the current status of the study and any information and advice obtained by the Secretary from the Advisory Committee on Women Veterans; and (b) a final report describing the results of the study to be submitted no later than December 31, 1995. Section 110 would authorize the appropriation of \$2.0 million to conduct a population study of women veterans. Funding for this study is pursuant to specific appropriations to the general operating expenses account of the Department of Veterans Affairs and would be available for obligation until expended without fiscal year limitation.

**TITLE II—HEALTH-CARE SHARING AGREEMENTS  
BETWEEN DEPARTMENT OF VETERANS AFFAIRS  
AND DEPARTMENT OF DEFENSE**

*Sharing agreements*

**Current law:** Section 8111(c) of title 38 requires the Secretary of Veterans Affairs and the Secretary of Defense jointly to establish guidelines to promote the sharing of health-care resources between the two Departments. The guidelines must (a) provide for sharing that is consistent with the health-care responsibilities of VA and DOD and does not adversely affect the range of services, quality of care, or established priorities for care in either VA or DOD Department; and (b) authorize the heads of individual VA and DOD medical facilities to enter into health-care resource sharing agreements.

**House bill:** Sections 1(a) and (d) of H.R. 5193 would, through September 30, 1996, expand the authority of the Secretary of VA to enter into health-care resource sharing agreements with the Secretary of Defense so as to authorize the head of a VA health-care facility (a) to enter into sharing agreements with (1) the head of a DOD health-care facility, (2) any other DOD official responsible for the furnishing of health-care services to Civilian Health and Medical Program of the Uniformed Services (CHAMPUS) beneficiaries in the region in which the VA facility is located, or (3) a contractor responsible for the furnishing of health-care services to CHAMPUS beneficiaries in the region in which the VA facility is located; and (b) to enter into sharing agreements that would provide for the furnishing of care to Civilian Health and Medical Program of the Department of Veterans Affairs (CHAMPVA) and CHAMPUS beneficiaries.

**Senate amendment:** No provision.

**Compromise agreement:** Section 201 follows the House bill.

*Requirement for improvement in services for veterans*

**House bill:** Section 1(b) of H.R. 5193 would prohibit any sharing agreement proposed by the director of a VA health-care facility from taking effect, unless VA's Chief Medical Director determines and certifies to the Secretary, that implementation of the agreement (a) will result in the improvement of services to eligible veterans at the facility; and (b) will not result in the denial of, or a delay in providing access to care for, any veteran at that facility.

**Senate amendment:** No provision.

**Compromise agreement:** Section 202 follows the House bill.

*Expanded sharing agreements with Department of Defense*

**Current law:** Under current law, a veteran furnished care or services by a DOD health-care facility under a sharing agreement is subject to the same copayment requirements that would be applicable to the veteran if the care or services were furnished by a VA health-care facility. Likewise, there is no provision in current law for the waiver of any CHAMPUS copayments or deductible for care furnished at VA facilities.

**House bill:** Section 1(c) of H.R. 5193 would provide authority for VA-DOD sharing agreements to provide for the waiver, in whole or in part, of copayments and deductibles for care provided under an agreement.

**Senate amendment:** No provision.

**Compromise agreement:** Section 203 follows the House bill.

*Expiration of Authority*

**House bill:** Section 1 of H.R. 5193 limits authority to enter into agreements under this

section to a period not later than October 1, 1993.

**Senate amendment:** No provision.

**Compromise agreement:** Section 204 follows the House bill.

*Consultation with veterans service organizations*

**Current law:** Section 8111 does not require the Secretary to consult with veterans service organizations in carrying out the VA-DOD sharing authority.

**House bill:** Section 1(e) of H.R. 5193 would require the Secretary to consult with veterans service organizations named in or approved under section 5902 of title 38 in carrying out the expanded authority.

**Senate amendment:** No provision.

**Compromise agreement:** Section 205 follows the House bill.

*Annual report*

**Current law:** Section 8111(f) requires the Secretaries of VA and Defense to submit a joint annual report to Congress on the implementation of the VA-DOD health-care resources sharing authority during the fiscal year that ended during the previous calendar year.

**House bill:** Section 1(f) of H.R. 5193 would require the secretaries (a) for each fiscal year from 1993 through 1996, to include in the annual report on the VA-DOD sharing authority a description of the use of the expanded sharing authority; and (b) to include in the annual report for fiscal year 1996 (1) an assessment of the effect of agreements entered into under the expanded sharing authority on the furnishing of health-care services to eligible veterans, (2) an assessment of the cost savings, if any, associated with provision of services under such agreements to retired members of the Armed Forces, dependents of members or former members of a uniformed service, and CHAMPVA beneficiaries, and (3) any plans for administrative action and any recommendations for legislation that the Secretaries consider appropriate.

**Senate amendment:** No provision.

**Compromise agreement:** Section 206 follows the House bill.

**TITLE III—NURSE PAY AMENDMENTS**

*Revision to nurse pay grade schedule*

**Current law:** Section 7404(b)(1) provides for a nurse pay schedule consisting of four grades—"Director grade," "Senior grade," "Intermediate grade," and "Entry grade."

**House bill:** Section 6(a) of H.R. 5192 would add to the four-grade nurse pay schedule, between the "Director grade" and the "Senior grade," a fifth grade, "Assistant Director grade."

**Senate amendment:** Section 101 of S. 2575 would replace the four-grade nurse pay schedule with a schedule of five grades, designated Nurse I through Nurse V.

**Compromise agreement:** Section 301 follows the Senate amendment.

The Committees intend for VA to use the additional grade to alleviate the pay compression experienced by RNs in the upper steps of the intermediate and senior grades under the current four-grade pay schedule. The use of Roman numerals to designate the five grades is intended to encourage VA to revise VA's nurse qualification standards in a manner that will facilitate a more even distribution of nursing positions throughout the pay schedule.

**Authority to establish special rates of pay for employees of facilities located outside the contiguous United States, Alaska, and Hawaii**

**Current law:** Section 7451 requires that the rates of basic pay for registered nurses (RNs)

and certified registered nurse anesthetists (CRNAs) at a VA health-care facility be (a) based on information regarding the pay of RNs and CRNAs by non-VA health-care facilities from a Bureau of Labor Statistics (BLS) industry-wage survey for the local labor-market area in which the VA facility is located, or (b) if current information is not available from BLS for the local labor-market area, on the basis of a survey conducted by the VA facility director, using methodology comparable to that used by BLS, of compensation paid to RNs and CRNAs by non-VA health-care facilities in the local labor-market area.

**House bill:** No provision.

**Senate amendment:** Section 102 of S. 2575 would authorize the Secretary, in order to provide rates of pay necessary to recruit and retain sufficient numbers of employees in covered positions at the VMMC in the Philippines and the VAMC in San Juan, Puerto Rico, and its satellite facilities, to establish and adjust the rates of basic pay for employees in covered positions at those facilities on a basis prescribed by the Secretary.

**Compromise agreement:** Section 302 follows the Senate amendment.

*Salary data for nurse anesthetists*

**Current law:** Section 7451 requires the director of a VA health-care facility to establish rates of basic pay for RNs and CRNAs at a VA health-care facility be (a) based on information regarding the pay of RNs and CRNAs by non-VA health-care facilities from a BLS industry-wage survey for the local labor-market area in which the VA facility is located, or (b) if current information is not available from BLS for the local labor-market area, on the basis of a survey conducted by the VA facility director, using methodology comparable to that used by BLS, of compensation paid to RNs and CRNAs by non-VA health-care facilities in the local labor-market area.

**House bill:** No provision.

**Senate amendment:** Section 103 of S. 2575 would (a) authorize the director of a VA health-care facility, in conducting a local wage survey for a covered position, to use data on beginning rates of compensation for employees in comparable positions at non-VA facilities in a comparable labor-market area, if the director determines, in accordance with regulations prescribed by the Secretary, that sufficient data cannot be obtained within the local labor-market area to establish competitive salaries; and (b) authorize the director of a VA health-care facility, in conducting a local wage survey, to use data on compensation received by CRNAs employed in salaried positions by firms that provide anesthesia services on a contract basis within the local labor-market area in which the VA facility is located, if the director can demonstrate, in accordance with regulations prescribed by the Secretary, that data on salaries paid to CRNAs employed by health-care facilities in that area and, if appropriate, in other geographic areas, are not sufficient to establish competitive salary rates.

**Compromise agreement:** Section 303 follows the Senate amendment with amendments that would (a) prohibit a VA health-care facility director from using the authority to use data on compensation paid to CRNAs by anesthesia contractors unless the director (1) has conducted a survey of beginning rates of compensation paid to CRNAs in the local labor-market area in which the VA facility is located, (2) has used all available administrative authority with regard to the collection of data on such compensation, and (3)

makes a determination, under regulations prescribed by the Secretary, that such data collection methods are insufficient to permit the establishment of locally-competitive rates of pay for CRNAs; and (b) provide that this authority would expire on September 30, 1995.

*Revision of basis for calculation of compensation of corresponding health-care positions*

**Current law:** Subchapter IV of chapter 74 provides for a locality-based pay system for VA personnel in covered positions—RNs and CRNAs by statute and certain other health professions that the Secretary elects to cover (but no others are covered as yet). Section 7451(d)(2) requires the director of a VA health-care facility to adjust the minimum rate of basic pay for a grade in a covered position so as to achieve consistency with the beginning rate of compensation for the corresponding health-care professionals employed by non-VA health-care facilities in the local labor-market area in which the facility is located. Section 7451(d)(6)(A) defines a beginning rate of compensation for those corresponding non-VA health-care professionals as the sum of (a) the minimum rate of pay established for those who have education, training, and experience equivalent or similar to the education, training, and experience required for health-care personnel employed in comparable positions at the VA facility, and (b) other employee benefits to the extent that those benefits are reasonably quantifiable.

**House bill:** No provision.

**Senate amendment:** Section 104 of S. 2575 would require the director of a VA health-care facility to include in the survey the minimum rates of pay actually paid to employees in covered positions by non-VA facilities in the local labor-market area rather than the rates established for such employees.

**Compromise agreement:** No provision.

The Committees note that VA officials have revised the implementing regulations for the Nurse Pay Act of 1990 so as to authorize directors of VA health-care facilities, in conducting local wage surveys, to use data on "above-minimum rates of pay" in cases in which the minimum rates of pay actually paid to employees in covered positions by non-VA facilities are greater than the rates listed in their salary schedules. The Committees believe that this revision in VA's regulations will facilitate the establishment of rates of pay that are competitive with those paid by non-VA facilities in the local labor-market areas in which the VA facilities are located. The Committees strongly urge that these elements of the regulations be retained when the regulations are revised to reflect the enactment of this measure.

*Rates of pay for transferring nurses*

**Current law:** Subchapter IV of chapter 74 provides for a locality-based pay system for VA personnel in covered positions—RNs and CRNAs by statute and certain other health professions that the Secretary elects to cover (but no others are covered yet). Section 7452(e) requires (a) that an employee in a covered position who transfers from a position at one VA health-care facility to a similar position at another VA facility not be reduced in grade or step (except pursuant to a disciplinary action authorized by law), and (b) that the rate of basic pay for such an employee be established at the facility to which the employee transfers in a manner consistent with practices at that facility for an employee of that grade or step.

**House bill:** Section 6(c) of H.R. 5192 would authorize the Secretary in certain cases, if

the Secretary determines that a higher rate of pay is necessary to obtain the covered employee's agreement to a transfer, to pay the employee at a rate of basic pay up to the rate applicable to such employee before the transfer. Thus the Secretary would be authorized to maintain the amount of basic pay of an employee who transfers upon the request of the Secretary to a comparable or more responsible position at a VA health-care facility at which the rate of pay for the position is lower than the rate paid for such a position by the VA facility from which the employee is transferring. If authorized by the Secretary, the rate of basic pay for such a transferred employee would be applicable for at least the first year following the employee's transfer, and (b) the rate of basic pay could not exceed the rate of basic pay applicable to the employee prior to the transfer.

**Senate amendment:** Section 105 of S. 2575 is similar to the House provision except that it (a) would not specify that the increased pay must be paid for at least one year, (b) does not contain a limit on the increase, (c) would not apply to an employee transferred as a result of disciplinary actions, and (d) would require the Secretary to include information on the use of this authority in the annual report to the Congressional Committees on Veterans' Affairs on the implementation of the Department of Veterans Affairs Nurse Pay Act of 1990.

**Compromise agreement:** Section 304 follows the House bill with amendments to include the Senate amendment language (a) requiring a report and (b) excluding from this coverage an employee transferred as a result of disciplinary action.

*Minimum pay differential for chief of nursing service at a facility*

**Current law:** Current law does not provide a basis for the Secretary to provide a differential between the rate of basic pay for an RN serving in a Chief Nurse position at a VA health-care facility and the rate of basic pay applicable to any other RN employed by that facility, unless the differential is justified on the basis of a survey of rates of pay for RNs and CRNAs at non-VA health-care facilities in the local labor-market area in which the VA facility is located.

**House bill:** Section 6(b) of H.R. 5192 would authorize the Secretary to increase the rate of basic pay for an RN serving in a Chief Nurse position at a VA health-care facility to a rate no more than six percent greater than the rate of basic pay applicable to any other RN employed by that facility.

**Senate amendment:** No provision.

**Compromise agreement:** The compromise agreement does not contain this provision. However the Committees agreed to include a reporting requirement in section 306 to gather data on chief nurse salaries in relation to other nursing salaries.

*Nursing personnel qualification standards*

**Current law:** Under current law, the Secretary has implicit authority to revise the qualification standards used for nursing personnel.

**House bill:** Section 6(d) of H.R. 5192 would require the Secretary, not later than six months after enactment, to revise the qualification standards used for nursing personnel at VA health-care facilities in order to (a) reflect the five grade levels under the Nurse Schedule (as proposed in section 6(a) of the House bill), and (b) reduce the compression of pay for nursing personnel in the intermediate and senior grades. Not later than six months after the date on which the revised

qualification standards are issued, the Secretary would be required to submit to the Congressional Committees on Veterans' Affairs a report on the implementation of the revised standards.

**Senate amendment:** No provision.

**Compromise agreement:** Section 305 follows the House bill.

Although the Committees acknowledge that the reduction of the total number of grades in the nurse pay schedule from eight to four under the Nurse Pay Act of 1990 has contributed to the serious pay compression experienced by RNs and CRNAs in the intermediate and senior grades, VA officials' failure to revise the nurse qualification standards to adjust for this reduction also has contributed to the problem. Thus, the Committees consider it necessary to require VA officials to revise the qualification standards in a manner that will result in effective use of the fifth grade that will be added to the nurse pay schedule under the compromise agreement. The Committees urge VA officials, in revising the qualification standards, to provide for a more even distribution of nursing personnel throughout the nurse pay schedule.

*Report on pay for chief nurse position*

**Current law:** Current law does not require the Secretary to conduct a review of the process for determining rates of basic pay for Chief Nurses.

**House bill:** Section 6(e) of H.R. 5192 would require the Secretary to conduct a review of the process for determining rates of basic pay applicable to RNs employed in Chief Nurse positions, including an assessment of (a) the adequacy of that process, (b) the accuracy of data collected in that process, and (c) the difficulties encountered in obtaining accurate data. Not later than six months after enactment, the Secretary would be required to submit to the Congressional Committees on Veterans' Affairs a report regarding that review, including recommendations for corrective action.

**Senate amendment:** No provision.

**Compromise agreement:** Section 306 follows the House bill with amendments to require the Secretary (a) to review the relationship between the rate of basic pay for Chief Nurses and the basic pay applicable to subordinate nurses, and to furnish data on salary differentials, (b) to submit the report to Congress within 12 months or as part of the next submitted annual report to Congress, and (c) and to include a description of the impact of the addition of a fifth grade to the nurse pay schedule on VA facility directors' ability to establish locally-competitive rates of pay for RNs employed in Chief Nurse positions.

*Report on pay compression*

**Current law:** Section 7451(g) requires the Secretary, not later than December 1 of 1991, 1992, and 1993, to submit to the Committees on Veterans' Affairs an annual report on various aspects of the implementation of the Nurse Pay Act of 1990.

**House bill:** Section 6(f) of H.R. 5192 would require the Secretary to include in the annual report information concerning (a) the number of employees, by facility and by covered position, who are on pay retention or in the top step of any grade, (b) comprehensive information, by facility, as to whether the facility director requested permission to extend the range of rates of basic pay for employees within such grade(s), and (c) whether each request was approved or disapproved.

**Senate amendment:** No provision.

**Compromise agreement:** Section 307 follows the House bill.

*Effective date*

*House bill:* Section 6(g) of H.R. 5192 would require that the provisions of the House bill regarding the addition of a fifth grade to the nurse schedule, minimum pay differential for Chiefs of Nursing Service, and rates of pay for RNs who transfer at the Secretary's request take effect with respect to the first pay period beginning on or after the later of (a) April 1, 1993, or (b) six months after the date of enactment.

*Senate amendment:* The nurse pay provisions of the Senate bill would take effect on the date of enactment.

*Compromise agreement:* Section 308 follows the House bill, with the effective date being the first pay period beginning on or after the end of the six-month period beginning on the date of enactment.

## TITLE IV—STATE HOME AMENDMENTS

*Treatment of earnings of veterans under certain rehabilitative services programs*

*Current law:* Section 1718(f) provides that (a) neither a veteran's participation in a VA work therapy program nor a veteran's receipt of compensation as a result of participating in such a program may be considered as a basis for denying or discontinuing a veteran's rating of total disability for VA compensation or pension on the basis of the veteran's unemployment, and (b) a distribution of funds to a veteran participating in such a work therapy program shall be considered a donation from a public or private relief or welfare organization for purposes of VA pension (which, under section 1503, is not to be counted as income for VA pension purposes).

*House bill:* Section 3 of H.R. 5192 would provide that a veteran's participation in a VA-approved work-therapy program operated by a State home facility and the veteran's receipt of compensation as a result of such participation shall be considered in the same manner as in the case of a veteran participating in a VA work therapy program.

*Senate amendment:* Section 301 of S. 2575 is substantively identical.

*Compromise agreement:* Section 401 contains this provision.

*Permanent authority to make grants to states relating to state homes*

*Current law:* Subchapter III of chapter 81 authorizes the Secretary to make grants to States for the construction, expansion, or remodeling of facilities for the furnishing of nursing home domiciliary care to veterans eligible to receive such care in a VA facility. Section 8133(a) authorizes appropriations for the program through September 30, 1992.

*House bill:* Section 2(b) of H.R. 5192 would extend the authorization of appropriations for four years, through September 30, 1996.

*Senate amendment:* Section 905 of S. 2575 would make the authorization of appropriations permanent.

*Compromise agreement:* Section 402 follows the Senate amendment.

*Extension of period for completion of conditionally approved applications for construction*

*Current law:* Section 8135(b)(6)(A) authorizes the Secretary to approve conditionally a State home construction, expansion, or remodeling project, conditionally award a grant for the project, and obligate funds for the grant if the Secretary determines that (a) the application for the grant is sufficiently complete to warrant awarding the grant and (b) that, based on assurances provided by the State submitting the application, the State will complete the application

and meet all specified requirements within 90 days of the date of which the Secretary conditionally approves the project.

*House bill:* No provision.

*Senate amendment:* Section 302 of S. 2575 would extend from 90 days to 180 days the period within which a State must complete the application for a State home program grant and meet the specified requirements.

*Compromise agreement:* Section 403 follows the Senate amendment.

*Limited prohibition on the obligation of funds for rescinded projects*

*Current law:* Section 8135(b)(6)(B) requires the Secretary, when a State fails to complete the application for a State home construction grant and meet the specified requirements within 90 days of the date on which the Secretary conditionally approves the project, to (a) rescind the conditional approval and grant award for a State home project, and (b) deobligate the funds previously obligated in connection with the application.

*House bill:* No provision.

*Senate amendment:* Section 303 of S. 2575 would prohibit the Secretary, in the event that the Secretary rescinds conditional approval for a State home project, from obligating further funds for that project during the fiscal year in which the Secretary rescinds such approval.

*Compromise agreement:* Section 404 follows the Senate amendment.

*Commencement date for recapture period*

*Current law:* Under section 8136, if a State ceases to operate a VA-grant-assisted facility principally for furnishing of domiciliary, nursing home, or hospital care to veterans, within the "recapture period"—the 20-year period after completion of the facility—the United States is entitled to recover from the State, or the then-owner of the facility, 65 percent of the value of the facility.

*House bill:* No provision.

*Senate amendment:* Section 304 of S. 2575 would provide that the recapture period for a State home project would begin on the date of the approval by the Secretary of the final architectural and engineering inspection of the facility.

*Compromise agreement:* Section 405 follows the Senate amendment.

*Commencement date for payment of per diem*

*Current law:* Section 1741(a) requires the Secretary to pay each State a per diem payment for domiciliary, nursing home, and hospital care furnished to each veteran receiving care in a State home who would be eligible for that care in a VA facility.

*House bill:* No provision.

*Senate amendment:* Section 305 of S. 2575 would require payment of VA per diem for care furnished in a State home facility to begin as of the date of the completion of the inspection for recognition of the facility under section 1742(a) if the Secretary determines, as a result of that inspection, that the State home meets the standards described in such section.

*Compromise agreement:* Section 406 contains the Senate amendment.

## TITLE V—GENERAL HEALTH CARE AND ADMINISTRATION

## SUBTITLE A—GENERAL HEALTH

*Contract hospital care for veterans with permanent and total service-connected disabilities*

*Current law:* Section 1703(a)(1) authorizes the Secretary, when VA facilities are not capable of furnishing hospital care or medical services to a veteran because of geographical inaccessibility or lack of capacity to furnish

the care or services required, to contract with non-VA health-care facilities in order to furnish hospital care or medical services for the treatment of (1) a service-connected disability, or (2) a disability for which a veteran was discharged or released from the active military, naval, or air service.

*House bill:* Section 101 of H.R. 2280 would extend the Secretary's authority under section 1703(a)(1) to include the furnishing of hospital care or medical services for the treatment of any disability of a veteran who has a total disability permanent in nature resulting from a service-connected disability.

*Senate amendment:* No provision.

*Compromise agreement:* Section 501 follows the House bill.

*Permanent authority for respite care program*

*Current law:* Section 1720B authorizes VA to furnish certain veterans respite care through September 30, 1992.

*House bill:* Section 2(a) of H.R. 5192 would make VA's authority to furnish respite care services permanent.

*Senate amendment:* Section 901 of S. 2575 is identical.

*Compromise agreement:* Section 502 contains this provision.

*Extension of authority to contract with the veterans memorial medical center, Republic of the Philippines*

*Current law:* Section 1732(a) authorizes the President, with the concurrence of the Republic of the Philippines, to authorize the Secretary, through the period ending on September 30, 1992, to enter into contracts with the Veterans Memorial Medical Center (VMMC) in the Philippines which (a) provide for VA to pay for VMMC health-care services furnished to eligible United States veterans at a per diem rate jointly determined by the United States and the Philippines, and (b) may provide that the VA payments may consist in whole or in part of available medicines, medical supplies, and equipment.

*House bill:* No provision.

*Senate amendment:* Section 902 of S. 2575 would extend for four years and three months, through December 31, 1996, VA's authority to contract with the VMMC for care for certain U.S. veterans.

*Compromise agreement:* Section 503 would extend this authority for two years, through fiscal year 1994.

## SUBTITLE B—PREVENTIVE HEALTH

*National center for preventive health*

*Current law:* VA has no express authority to operate a National Center for Preventive Health.

*House bill:* No provision.

*Senate amendment:* Section 203 of S. 2575 would (a) require the Chief Medical Director to establish a National Center for Preventive Health (Center); (b) require the Director of the Center to (1) acquire, maintain, and disseminate current information on VA and non-VA clinical practices and research concerning preventive health services, (2) monitor implementation of the recommendations of the Preventive Health Services Advisory Committee, (3) facilitate cooperative research concerning health outcomes resulting from various preventive services, (4) advise VA health-care personnel regarding the conduct of preventive health services activities and research, and (5) issue annual reports regarding VA's preventive health services activities and research findings to health-care professionals and organizations interested in such activities and findings; and (c) authorize the appropriation of \$2,500,000 annually to fund the Center's research, clinical, edu-

ational, and administrative activities and specify that the cost of the Center be paid from VA's Medical Care account.

**Compromise agreement:** Section 511 follows the Senate amendment with amendments requiring that the selection of a site or sites for such center be based on a merit-review process, reducing the authorization of appropriations to \$1,500,000 annually, and eliminating references to an Advisory Committee.

*Advisory committee on preventive health services*

**Current law:** VA has no express authority to establish an Advisory Committee on Preventive Health Services.

**House bill:** No provision.

**Senate amendment:** Section 204 of S. 2575 would require the Secretary to establish a Preventive Health Services Advisory Committee.

**Compromise agreement:** No provision.

*Annual report on preventive health services*

**Current law:** Under section 1764 of title 38, the Secretary was required, through fiscal year 1988, to include in the annual report to the Congressional Committees on Veterans' Affairs required under section 529 of title 38 a comprehensive report on the administration of the preventive health-care services pilot program, including such recommendation for additional legislation as the Secretary considered necessary.

**House bill:** No provision.

**Senate amendment:** Section 205 of S. 2575 would require the Secretary to submit to the Congressional Committees on Veterans' Affairs a report containing information concerning (a) the types of preventive health services furnished by VA, the resources used to furnish those services, and the number of veterans furnished such services; (b) the means by which VA addressed the specific preventive health services needs of particular groups of veterans; (c) the coordination of the furnishing of preventive health services within VA; (d) the integration of preventive health services into VA training programs for health-care professionals; (e) VA's participation in cooperative preventive health efforts with other governmental and nongovernmental entities; (f) specific VA research concerning the long-term relationships among screening activities, treatment, and morbidity and mortality outcomes; (g) the cost effectiveness of specific preventive health services; (h) preventive health services research carried out by VA employees or using VA funds, equipment, office space, or other support services; (i) the membership, activities, and report of the Advisory Committee; and (j) an accounting of the expenditure of funds by the National Center for Preventive Health.

**Compromise agreement:** Section 512 follows the Senate amendment with an amendment to eliminate the references to the Advisory Committee.

*Preventive health services*

**Current law:** Section 1762 defines the term "preventive health-care services" to include expressly various screening, immunization, and patient education services.

**House bill:** No provision.

**Senate amendment:** Section 201 of S. 2575 would (a) transfer the text of section 1762 to section 1701 and (b) revise the definition of "preventive health services" to include expressly (1) as part of periodic medical and dental examinations, screening for high blood pressure, glaucoma, high cholesterol, and colorectal and gender-specific cancers, and (2) as part of patient health education, stress management, physical fitness, and smoking cessation.

**Compromise agreement:** Section 513 would transfer the definition of preventive health services to section 1701 of title 38 and make other conforming changes.

*Repeal of pilot program*

**Current law:** Subchapter VII of chapter 17 established, through fiscal year 1988, a pilot preventive health-care service pilot program in order to (a) furnish feasible and appropriate preventive health-care services to veterans having service-connected disabilities rated 50 percent or more and veterans being furnished care or services involving a service-connected disability; and (b) determine the cost-effectiveness and medical advantages of furnishing such preventive health-care services.

**House bill:** No provision.

**Senate amendment:** Section 202 of S. 2575 would repeal subchapter VII of chapter 17 effective on the date of enactment of this Act.

**Compromise agreement:** Section 514 follows the Senate amendment.

SUBTITLE C—HEALTH CARE ADMINISTRATION AND PERSONNEL

*Geriatric research, education, and clinical centers*

**Current law:** Section 7314(c) prohibits the Secretary from designating a VA health-care facility as a location for a Geriatric Research, Education, and Clinical Center (GRECC) unless the Secretary (upon the recommendation of the Chief Medical Director) determines that the facility has (a) an arrangement with an accredited medical school which provides education and training in geriatrics; (b) an arrangement under which nursing or allied health personnel receive training and education in geriatrics; (c) the ability to attract the participation of scientists who are capable of ingenuity and creativity in health-care research efforts; (d) a policy-making advisory committee composed of appropriate health-care and research representatives of the facility and of the affiliated school(s); and (e) the capability to conduct effectively evaluations of the activities of the center.

**House bill:** Section 5 of H.R. 5192 would (a) prohibit the Secretary from designating a VA health-care facility as a location for a GRECC unless the Secretary (upon the recommendation of the Chief Medical Director) has considered the recommendations of a peer review panel established by the Assistant Chief Medical Director for Geriatrics and Extended Care to assess the scientific and clinical merit of proposals submitted to the Secretary for the establishment of new GRECCs; (b) require that the membership of the panel consist of experts in the fields of geriatric and gerontological research, education, and clinical care who shall serve as consultants to VA for a period of no longer than six months; (c) require that the panel review each proposal submitted to the panel by the Assistant Chief Medical Director for Geriatrics and Extended Care and submit its views on the relative scientific and clinical merit of each proposal; and (d) provide that the panel not be subject to the provisions of the Federal Advisory Committee Act.

**Senate amendment:** No provision.

**Compromise agreement:** Section 521 follows the House bill with an amendment prohibiting the Secretary from designating a facility as a GRECC unless the panel, in conducting its merit review and ranking of proposals under new section 7314(d), has determined that the facility meets the highest standards of scientific and clinical merit.

*Extension of authority to waive certain limitations applicable to receipt of retirement pay by nurses*

**Current law:** Section 7426(c) authorizes the Secretary, through September 30, 1992, to waive the restrictions in section 5536 of title 5 on receipt of military retirement pay by federal employees if the Secretary determines that such waiver is necessary to meet special or emergency employment needs for RNs which result from a severe shortage of well-qualified candidates for RN positions.

**House bill:** No provision.

**Senate amendment:** Section 903 of S. 2575 would make this authority permanent.

**Compromise agreement:** Section 522 would extend this authority for two years and three months, through December 31, 1994.

*Health professionals education programs*

**Current law:** Section 7618 authorizes the Secretary, through September 30, 1992, to furnish scholarships to new participants in the Health Professional Scholarship program, under which scholarships may be awarded to certain VA employees for education and training in certain health professions in exchange for commitments to employment in VA health-care facilities.

**House bill:** Section 2(c) of H.R. 5192 would extend VA's authority to carry out this program for two years, through September 30, 1994, VA's authority to carry out the health professional scholarship program.

**Senate amendment:** Section 904 of S. 2575 would extend this authority for five years and three months, through December 31, 1997.

**Compromise agreement:** Section 523 would extend this authority for three years and three months, through December 31, 1995. Section 505(b) would provide that, notwithstanding any other provision of law, VA shall not provide payments to health-care professional employees for payment of tuition loan.

*Real property at Temple Junior College, Temple, Texas*

**House bill:** H.R. 5816 as introduced on August 11, 1992, would remove restrictions contained in a deed which conveyed certain land from the Temple, Texas, VA Medical Center to Temple Junior College.

**Senate bill:** S. 1268 which was introduced, by request of the Administration, on June 11, 1991, is substantively identical.

**Compromise agreement:** Section 524 contains this provision.

*Demonstration project to evaluate telephones for patient use at department health-care facilities*

**Current law:** Telephone may be installed in VA medical facilities for patient use, on a "bedside" basis or otherwise, under existing statutory authorities, including the authority granted to the Secretary of Veterans Affairs by section 303 of title 38, to administer, control, direct and manage VA, and the authority granted by section 513 of title 38, to contract with private or public entities for services deemed necessary in the execution of those duties. VA has, to a limited extent, installed bedside telephones in VA medical facilities under existing authorities, and it has purchased equipment and services, including telephones, switching capacity and wiring, with funds received by VA under its gift-acceptance authorities, sections 7802(8) and 8301 of title 38. However, nothing in current law requires that the Department of Veterans Affairs install telephones for patient use in VA medical facilities.

**House bill:** No provision.

**Senate amendment:** Section 501 of S. 2575 would require the Secretary (a) to carry out

a demonstration project to evaluate the desirability and feasibility of installing telephones in VA health-care facilities for patient use; (b) to carry out the program by installing and maintaining telephones in patient rooms in two VA health-care facilities, the VA medical centers in Philadelphia, Pennsylvania, and Tucson, Arizona; (c) to evaluate the cost of such installations (including costs associated with the provision of special equipment to facilitate the use of telephones by disabled veterans receiving medical care); (d) to evaluate the benefits of such equipment, including the therapeutic benefits to VA patients, including disabled patients, of ready telephone availability and the savings associated with hospital staff being relieved of the need to assist patients in using public telephone facilities; and (e) to report, not later than September 30, 1994, on such costs and benefits, and on the feasibility and desirability, of installing telephones in patient rooms in other VA health-care facilities. The Senate amendment would also require that the Secretary ensure that costs associated with patient use of bedside telephones for long distance calls be borne by the patient.

**Compromise agreement:** Section 525 follows the Senate amendment with amendments (a) to delete explicit references to the sites where VA would carry out the demonstration project; and (b) to expand the listing of matters concerning which VA would be required to report. The compromise agreement would specify that, in addition to the matters to be evaluated and reported on in the Senate amendment, VA must also determine and report on the relative feasibility and cost effectiveness of a range of options for the installation and maintenance of bedside telephones for patient use. Among the options to be considered by VA are the procuring of the services through conventional procurement processes using appropriated funds; through donations of equipment and services; and through the procuring of equipment and services in connection with contracts for the provision of long distance telephone service by the Veterans Canteen Service or otherwise.

The Committees note their concern that by specifying that the telephone demonstration project would occur at two VA medical centers, the Senate amendment may have implied an intention that VA should proceed only at those sites. The Committees have, therefore, deleted statutory references to the two sites specified in the Senate amendment. The Committees understand that VA is examining those two sites for participation in the demonstration project and do not object to their inclusion. However, the Committees intend that the demonstration project be expanded to allow for the analysis of a range of installation options. The Committees do not intend to discourage donations from the public, industry, or labor groups. Nor do they intend to inhibit VA, through the Veterans Canteen Service or otherwise, from exploring creative, cost-effective, alternatives for the securing of telecommunications services at the bedside or elsewhere.

#### *Use of tobacco products in Department facilities*

**Current law:** Current statutory law contains no provisions regarding the use of tobacco products within VA facilities.

**House bill:** Section 7 of H.R. 5192 would (a) state that each veteran who is a patient or resident in a VA medical center, nursing home, or domiciliary has the right (consistent with medical requirements and limitations) to use tobacco products; (b) require

the Secretary to ensure (consistent with medical requirements and limitations) that each facility maintains a suitable indoor patient smoking area and provides access to that area for patients or residents who desire to use tobacco products; and (c) require the Secretary to report to the Congressional Committees on Veterans' Affairs, not later than 120 days after the date of enactment, on the implementation of this section, including a description of the steps at each VA facility to achieve compliance.

**Senate amendment:** No provision.

**Compromise agreement:** Section 526 would follow generally the House bill with an amendment to (a) omit the statement regarding the right to use tobacco products; (b) in reference to the indoor patient smoking area, require that any such area be ventilated in such a manner as to, to the maximum extent feasible, prevent smoke from entering other areas of the facility; (c) provide as an alternative to the ventilated indoor patient smoking area, a smoking area in a detached, accessible building with heating and air conditioning; (d) require GAO to do a report without 180 days after enactment on the feasibility of VA establishing smoking areas, the cost and timetable for creating such areas, the adequacy of VA's ventilating systems to support such areas without causing health problems for other patients, and the impact of this policy on VA hospitals' JCAHO accreditation scores; and (f) make the provisions relating to the establishment of smoking areas effective 60 days after the Committees on Veterans' Affairs receive the GAO report.

The Committees note that, although VA's current policy is for all VA health-care facilities to be smoke-free by December 31, 1993, some long-term care programs allow some psychiatric and long-term nursing home patients to smoke inside VA medical facilities. In determining the standard to be applied in subsection (a)(1)(A) of this section, the Committees anticipate that the Secretary will be guided by the standard now being applied in facilities that allow indoor smoking and will place maximum emphasis on avoiding exposing non-smokers to second-hand smoke.

#### *Recovery of care furnished to CHAMPVA beneficiaries*

**Current law:** Section 1729 authorizes the Secretary to recover from a third party payor the reasonable cost of care or services furnished under section 1710 or 1712 (a) to a veteran who does not have a service-connected disability for any disability, or (b) through September 30, 1992, to a veteran who has a service-connected disability for a non-service-connected disability, to the extent that the veteran (or provider of such care or services) would be eligible to receive payment for the care or services from such third party if they had not been furnished by a department or agency of the United States.

**House bill:** section 4(a) of H.R. 5192 would extend VA's authority to collect reimbursement from third-party payors to beneficiaries of the Civilian Health and Medical Program of the Department of Veterans Affairs (CHAMPVA).

**Senate amendment:** Section 906(a) of S. 2575 is substantively identical.

**Compromise agreement:** No provision.

#### *Explicit inclusion of Medicare supplemental insurance policy as a health-plan contract*

**Current law:** Section 1729(1)(1)(A) defines a "health-plan contract" to mean an insurance policy or contract, medical or hospital service agreement, membership or subscription

contract, or similar arrangement under which health services for individuals are provided or the expenses of such services are paid.

**House bill:** Section 4(b) of H.R. 5192 would (a) specify that the definition of a "health-plan contract" under section 1729(1)(1)(A) includes a Medicare supplemental insurance policy; (b) provide that the modified definition would apply as if included in the enactment of that provision on April 7, 1986, in Public Law 99-272; (c) require the Secretary to (1) compile a list of all insurers that issue Medicare supplemental insurance policies and from which VA recovered reimbursement before June 1, 1992, and (2) submit that list to the Congressional Committees on Veterans' Affairs as soon as possible after the date of enactment; and (d) prohibit, after September 30, 1993, the collection of reimbursement for care or services furnished to a veteran covered by a Medicare supplemental insurance policy issued by an insurer not named on the list compiled by the Secretary.

**Senate amendment:** Section 906(b) of S. 2575 would (a) specify that the definition of a "health-plan contract" under section 1729(1)(1)(A) includes a Medicare supplemental insurance policy; and (b) provides that definition would take effect on the date of enactment.

**Compromise agreement:** No provision.

#### *Liability determination of issuers of Medicare supplemental insurance*

**Current law:** Section 1729(c)(2) requires the Secretary, after consultation with the Comptroller General of the United States, to prescribe regulations for the purpose of determining the reasonable cost of care or services furnished to a veteran, which must provide that the amount the Secretary recovers or collects from the issuer of a health-plan contract not exceed the amount that the third party demonstrates to the satisfaction of the Secretary it would pay for the care or services if provided by a non-VA health-care facility in the same geographic area.

**House bill:** No provision.

**Senate amendment:** Section 906(c) of S. 2575, effective on the date of enactment, would (a) require the Secretary, in consultation with the Secretary of Health and Human Services, to establish procedures for the treatment of claims for the recovery of the cost of care or services furnished to a veteran covered by a Medicare supplemental insurance policy for treatment of a nonservice-connected disability or condition; (b) require the Secretary, in establishing those procedures, to provide for (1) the review of the claims by entities jointly designated by the Secretary of VA and the Secretary of HHS for the purpose of determining which services would be covered under the Medicare program if provided by a Medicare-participating provider, and (2) the transmittal to third party issuers of the results of such reviews and any additional information necessary to determine the liability of the issuer of a Medicare supplemental insurance policy; (c) require that such results and information be transmitted to issuers of Medicare supplemental insurance policies not later than (1) the expiration of the period provided for under title XVII of the Social Security Act for the timely filing of claims, or (2) the expiration of the period provided for in the Medicare supplemental insurance policy for filing; and (d) require the Secretary of HHS to establish fees for the review of claims, with the fees to be based on the estimated costs of processing claims and deducted from the amount recovered by the Secretary.

**Compromise agreement:** No provision.

*Use of funds recovered from third parties*

**Current law:** Section 1729(g) of title 38 establishes in the U.S. Treasury the Department of Veterans Affairs Medical-Care Cost Recovery Fund (MCCR Fund) and requires that amounts recovered or collected under section 1729 be deposited in the MCCR Fund. Sums in the MCCR Fund are available to the Secretary for payment of (a) necessary expenses relating to administration of third-party recovery activities and collection of copayments for VA-furnished care, and (b) reasonable charges, as determined by the Secretary, imposed for (1) services and utilities furnished by the Secretary, (2) recovery and collection activities under section 1729, and (3) administration of the Fund. By January 1 of each year, an amount equal to the unobligated balance in the Fund at the close of business on the preceding September 30 minus the amount that the Secretary determines necessary to defray, during the year in which the deposit is made, the administrative costs of the MCCR program must be deposited into the Treasury as miscellaneous receipts.

**House bill:** Section 4(c) of H.R. 5192 would (a) provide that funds deposited in the MCCR Fund may be used (1) to purchase medical equipment, and (2) for other purposes as may be specifically authorized by law; (b) require the Secretary to promulgate regulations for the allocation of MCCR Fund monies to VA medical centers which would require that (1) 20 percent of the funds be made available directly to VA medical centers at which third-party collections have been at above-average levels, (2) the remaining 80 percent of such funds be allocated at the Secretary's discretion; (c) require that (1) the total amount expended for purposes described in (a), above, not exceed the amount by which the amount in the MCCR Fund attributable to collections during fiscal year 1993 (other than amounts recovered or collected under Medicare supplemental insurance policies issued by carriers other than those named on the list described in section 4(b)(2)) exceeds the Congressional Budget Office baseline for the MCCR fund in fiscal year 1993, and (2) any such amount expended during the first quarter of fiscal year 1994 be attributed to collections during fiscal year 1993; (d) prohibit the expenditure of MCCR Fund monies for purposes described in (a), above, during (1) the last three quarters of fiscal year 1994 and (2) fiscal year 1995.

**Senate amendment:** No provision.

**Compromise agreement:** No provision.

## PROCUREMENT OF PHARMACEUTICALS

**Section 601—Exclusion of prices from calculation of "best prices" for Medicaid rebate agreements**

**Current law:** Section 1927(c)(1) of the Social Security Act (SSA) requires a manufacturer that enters into a Medicaid outpatient drug rebate agreement to provide a rebate for a covered single source or innovator multiple source drug in an amount equal to the lower of (a) through December 31, 1992, 12.5 percent of the average manufacturer price (AMP), as defined in section 1927(k)(1) of the SSA, and 15 percent of the AMP thereafter; or (b) the difference between the AMP and the "best price" for the drug—defined as the lowest price charged to any wholesaler, retailer, nonprofit entity, or governmental entity in the United States excluding depot prices and single award contract prices of any agency of the Federal Government; subject through December 31, 1992, to a maximum discount of 50 percent of AMP.

**House bill:** Section 2(a) of H.R. 2890 would exclude from "best-price" rebate calculations,

in addition to depot prices and single award contract prices, any prices (a) charged to (1) the Indian Health Service; (2) the Department of Veterans Affairs; (3) a Federally-qualified health center as defined in section 1905(1)(2)(B) of the SSA; (4) an entity receiving Public Health Service (PHS) funds to provide primary health services to residents of public housing; (5) a family planning project receiving PHS funds; (6) an entity receiving PHS funds for outpatient early intervention services for HIV; (7) a State-operated AIDS drug purchasing assistance program receiving PHS funds; (8) a comprehensive hemophilia diagnostic treatment center; (9) certain disproportionate share hospitals (as defined in section 1886(d)(1)(B) of the SSA); (10) listed on the Federal Supply Schedule (FSS); or (b) used under a State pharmaceutical assistance program by reference to prices charged to the Department of Veterans Affairs.

**Senate provision:** Section 15281 of H.R. 11 as passed by the Senate on September 29, 1992, would exclude from "best-price" rebate calculations, in addition to depot prices and single award contract prices, prices charged to the same entities described in (a)(3)-(5) in the description of the House bill and any prices charged under the FSS and prices charged to (a) an alcohol or drug treatment entity or mental health entity receiving PHS funds; (b) an entity receiving funds under title XXVI of the Public Health Service Act; (c) a sexually-transmitted disease clinic authorized under section 318 of the Public Health Service Act; (d) a black lung clinic authorized under the Public Health Service Act; (e) a non-Federal entity authorized under the Indian Self-Determination Act; (f) a tuberculosis clinic receiving PHS funds.

**Compromise agreement:** Section 601(a) would, effective October 1, 1992, exclude from "best-price" rebate calculations prices charged to (a) the same entities described in (a)(3)-(8) in the description of the House bill; (b) the Indian Health Service; (c) VA; (d) a State Veterans Home receiving funds under section 1741 of title 38; (e) the Department of Defense; (f) the Public Health Service; (g) a black lung clinic authorized under the PHSA; (h) a Native Hawaiian Health Center receiving funds under the Native Hawaiian Health Care Act of 1988; (i) an urban Indian organization receiving funds under title V of the Indian Health Care Improvement Act; (j) any entity receiving funds under title XXVI of the Public Health Service Act (other than a State or unit of local government or an entity described under (a)(6) in the description of the House bill); (k) a sexually transmitted disease clinic receiving PHS funds; (l) a tuberculosis clinic receiving PHS funds; (m) any prices charged under the Federal Supply Schedule; and (n) any prices used under a State pharmaceutical assistance program.

*Agreements required to receive payment*

**Current law:** Section 1927(a)(1) of the SSA prohibits a State Medicaid Program from using federal matching funds for payment for any covered outpatient drug sold by a manufacturer unless the manufacturer has entered into a Medicaid outpatient drug rebate agreement.

**House bill:** Section 2(b)(1) of H.R. 2890 would provide that, after October 1, 1992, use of federal matching funds for payment for a covered outpatient drug would be contingent on (in addition to a Medicaid rebate agreement) a manufacturer's entering into (a) an agreement with the Secretary of Health and Human Services (HHS) under which the manufacturer agrees to provide rebates or dis-

counts to the entities described below under "Covered Entities"; and (b) FSS and depot price agreements with the Secretary of Veterans Affairs (VA).

**Senate amendment:** Section 602 would add to the Federal Property and Administrative Services Act of 1949 (FPASA) a new section 1001 that would (a) require a manufacturer of a drug or biological—as a condition of (1) selling the drug or biological to a Federal agency, (2) receiving payment for the drug or biological under the Medicaid program, and (3) receiving payment for the drug or biological directly or indirectly from any entity that receives funds under the Public Health Service Act—not later than five months after the date of enactment, to enter into a master agreement with the Administrator of the General Services Administration (GSA) under which the manufacturer must agree to enter into FSS, VA depot, DoD depot, and PHS depot pharmaceutical pricing agreements; (b) require the manufacturer to enter into FSS, VA depot, DoD depot, and PHS depot pricing agreements for a drug or biological within six months after the date of enactment, or, if the Secretary of VA or Defense does not desire to enter into such an agreement during that time period, within 30 days after the Secretary makes a request to enter into a pricing agreement; (c) require that prices charged to a Federal agency under FSS, VA depot, DoD depot, or PHS depot pharmaceutical pricing agreements be established in accordance with the provisions of proposed sections 8172 and 8174 of title 38, proposed section 1107 of title 10, and proposed section 2142 of the Public Health Service Act (PHSA); (d) require that the Administrator of GSA prescribe procedures under which the Secretary of VA, Defense, or HHS must notify a manufacturer of the Secretary's desire to enter into an FSS, VA depot, DoD depot, or PHS depot pharmaceutical pricing agreement; and (e) with respect to a drug or biological first marketed after the date of enactment, require the manufacturer (1) within two months after the date on which such marketing begins (A) if the manufacturer has previously entered into a master agreement with the Administrator of GSA, to amend that agreement to cover the new drug or biological, or (B) if the manufacturer has not previously entered into a master agreement, to enter into one, and (2) to enter into FSS, VA depot, DoD depot, and PHS depot pharmaceutical pricing agreements within three months after the drug or biological is first marketed or, if the Secretary of VA, Defense, or HHS does not desire to enter into such an agreement during that time period, within 30 days after the Secretary makes a request to enter into such a pricing agreement.

**Compromise agreement:** Section 601(b) would provide that, after January 1, 1993, use of federal matching funds under Medicaid for payment for a covered outpatient drug would be contingent on (in addition to a Medicaid rebate agreement) a manufacturer's (a) entering into an agreement with the Secretary of HHS under which the manufacturer agrees to provide rebates or discounts to certain PHS-funded entities and public disproportionate-share hospitals; and (b) complying with the requirements of proposed new section 8126 of title 38, including the requirement to enter into a master agreement with the Secretary of VA. Section 603(a)(1), in proposed new section 8126(a) of title 38, would specify that a manufacturer (1) entering into a master agreement with the Secretary of VA must (A) beginning on January 1, 1993, make available for procurement through the FSS each

covered drug of the manufacturer, (B) with respect to each covered drug of the manufacturer procured by VA, the Department of Defense, or the PHS (including the Indian Health Service) through the FSS or a depot contracting system, enter into a pharmaceutical pricing agreement with the Secretary of VA (or the Federal agency involved, if the Secretary delegates the authority to enter into such an agreement) under which the price charged during the one-year period beginning on the effective date of the agreement may not exceed 76 percent of the non-Federal average manufacturer price less the amount of any additional discount required under proposed new section 8126(c) of title 38; and (C) with respect to each covered drug of the manufacturer procured by a State Veterans Home, not charge a price in excess the price charged under the FSS at the time the drug is procured; and (2) prohibit a manufacturer, unless the manufacturer meets the requirements of the master agreement, receive payment for drugs and biologicals from (i) a State Medicaid program, except as authorized in section 1927(a)(3) of the SSA; (ii) VA, DoD, a PHS (including IHS) facility; or (iii) any entity that receives funds under the PHSA Act.

#### Effect of subsequent amendments

*House bill:* No provision.

*Senate amendment:* No provision.

*Compromise agreement:* Section 601(b)(2) would, in proposed new section 1927(a)(6)(B) of the SSA, require that the Secretary of HHS, in determining whether a master agreement entered into between the Secretary of VA and a manufacturer meets the requirements of section 8126 of title 38, not take into account any amendments to such section that are enacted after the enactment of the Veterans Health Care Act of 1992. Section 601(b)(2) also would contain, in proposed new section 1927(a)(5)(D), a parallel provision regarding the effect of subsequent amendments to provisions of this Act that apply to PHS-funded entities.

#### Determination of compliance

*House bill:* No provision.

*Senate amendment:* No provision.

*Compromise agreement:* Section 601(b)(2) and section 603(a) would, in proposed new section 1927(a)(6)(C) of the SSA and proposed new section 8126(g) of title 38, respectively, authorize the Secretary of HHS to deem a manufacturer to meet the requirement that a manufacturer, as a condition of participation in the Medicaid program, enter into a master agreement with the Secretary of VA, if the manufacturer establishes to the satisfaction of the Secretary of HHS that the manufacturer would comply and has offered to comply with the provisions of new section 8126 of title 38 as originally enacted and would have entered into a master agreement with the Secretary of VA, but for a legislative change in that section after the date of its original enactment. Section 601(b)(2) also would contain, in proposed new section 1927(a)(5)(E) of the SSA, a parallel provision regarding the effect of subsequent amendments to provisions of this measure that apply to PHS-funded entities.

#### Confidentiality of information

*Current law:* Section 1927(b)(3)(D) of the SSA requires that information provided by a manufacturer or a wholesaler to the Secretary of HHS under the reporting requirements of section 1927(b)(3) remain confidential and not be disclosed by the Secretary, State agency, or contractor therewith in a form which discloses the identity of the manufacturer or wholesaler, except as the Sec-

retary determines necessary to carry out this section and to permit the Comptroller General to review the information provided.

*House bill:* Section 2(b)(3) of H.R. 2890 would require that the data regarding non-FAMPs of covered drugs provided to the Secretary of VA under proposed new section 1927(a)(6)(A)(ii) of the SSA remain confidential. Proposed new section 8126(b)(4) of title 38, as would be added by section 3(a), would contain a substantively identical provision.

*Senate amendment:* Proposed new section 8173(d) of title 38, as would be added by section 603, is substantively identical.

*Compromise agreement:* Section 601(b)(3) follows the House bill, except that the Comptroller General and the Director of the Congressional Budget Office would be permitted to review the data provided to the Secretary of VA. Section 603(a) would add to title 38 a parallel provision in proposed new section 8126(e)(4).

#### Termination of rebate agreements

*Current law:* Section 1927(b)(4)(B)(ii) of the SSA (a) allows a manufacturer to terminate a Medicaid rebate agreement for any reason; and (b) requires that the termination not be effective until such period after the date on which the manufacturer notifies the Secretary of HHS as the Secretary may provide.

*House bill:* No provision.

*Senate amendment:* No provision.

*Compromise agreement:* Section 601(b)(4) would amend section 1927(b)(4)(B) of the SSA to (a) require that the termination of the rebate agreement not be effective until 60 days after the manufacturer notifies the Secretary of HHS; and (b) add a new clause (iv) that would require the Secretary of HHS to notify State Medicaid programs of the termination not less than 30 days before the effective date of the termination.

#### Budget neutrality adjustment

*Current law:* Section 1927(c)(1) of the SSA requires a manufacturer that enters into a Medicaid outpatient drug rebate agreement to provide a rebate for a covered single source or innovator multiple source drug in an amount equal to the lower of (a) through December 31, 1992, 12.5 percent of the average manufacturer price (AMP), as defined in section 1927(k)(1), and 15 percent of the AMP thereafter; or (b) the difference between the AMP and the "best price" for that drug (as defined in section 1927(c)(1)(C)), subject, through December 31, 1992, to a maximum discount of 50 percent of the AMP.

*House bill:* Section 2(c) of H.R. 2890 would increase the Medicaid minimum rebate percentage for a single source or innovator multiple drug to (a) 15.7 percent, from October 1, 1992, through December 31, 1993; (b) 15.4 percent, from January 1, 1994, through December 31, 1994; (c) 15.2 percent, from January 1, 1995, through December 31, 1995; and (d) 15.1 percent thereafter.

*Senate amendment:* Section 15281 of H.R. 11 as passed by the Senate is identical to the House provision except that the increase in the minimum rebate percentage to 15.7 percent would not take effect until January 1, 1993.

*Compromise agreement:* Section 601(c) follows the House bill.

#### Report on best price changes and payment of rebates

*Current law:* Section 1927(i) of the SSA requires the Secretary of HHS, not later than May 1 of each year, to transmit to the Committee on Finance of the Senate, the Committee on Energy and Commerce in the House of Representatives, and the Special Committees on Aging of the Senate and the

House of Representatives a report on the operation of the Medicaid outpatient drug rebate program during the preceding fiscal year, which must include information on (a) ingredient costs paid under title XIX of the SSA for single source drugs, multiple source drugs, and nonprescription covered outpatient drugs; (b) the total value of rebates received and number of manufacturers providing the rebates; (c) how the size of the rebates compares with the size of rebates offered to other purchasers of covered outpatient drugs; (d) the effect of inflation on the value of rebates required under the Medicaid rebate program; (e) trends in prices paid under title XIX of the SSA for covered outpatient drugs; and (f) federal and State administrative costs associated with compliance with the provisions of title XIX of the SSA.

*House bill:* Section 2(d) of H.R. 2890 would (a) require the Secretary of Health and Human Services, not later than 180 days after the expiration of each calendar quarter beginning on or after October 1, 1992, and ending on or before December 31, 1995, to submit to Congress a report containing information on (1) changes in best prices for single source and innovator multiple source drugs during the previous calendar quarter, (2) the total amount of all rebates paid under the Medicaid rebate program, broken down by the portions and percentages of the total amount attributable to the various rebate mechanisms established in section 1927(c) of the SSA, (3) the amount of the portion of the total amount attributable to the best-price rebate mechanism; (b) require that information relating to a covered drug not be contained in the report unless the Secretary determines that the drug was one of the 1,000 drugs for which the greatest amount of Federal financial assistance attributable to prescription drugs was provided during calendar year 1991; and (c) require that the Secretary submit the first report not later than July 1, 1993, and that the report include information on prescription drugs dispensed during each calendar quarter that began on or after January 1, 1991, and ended on or before December 31, 1992.

*Senate amendment:* No provision.

*Compromise agreement:* Section 601(d) follows the House bill, with a modification that the first report would be due on May 1, 1993.

#### Section 602—Limitations on prices of drugs procured by covered entities discount or rebate percentage defined

*House bill:* Section 2(b)(2) of H.R. 2890 would, in proposed new section 1927(a)(5) of the SSA, require a manufacturer to extend the same price reduction to a covered entity for a drug or biological as is provided under the Medicaid outpatient drug rebate program.

*Senate amendment:* Proposed new section 2145(b) of the Public Health Service Act (PHSA) would contain substantively identical provisions.

*Compromise agreement:* Section 601(b)(2) would add substantively identical provisions to proposed new section 340B(a)(2) of the PHSA.

#### Covered entity defined

*House bill:* Section 2(b)(2) would amend section 1927(a) of the SSA to add a new subsection (5)(D) defining the term "covered entity" to include any of the following: (a) a Federally-qualified health center; (b) an entity receiving PHS funds to provide primary health services to residents of public housing; (c) a family planning project receiving PHS funds; (d) an entity receiving PHS funds

for outpatient early intervention services for HIV; (e) a State-operated AIDS drug purchasing assistance program receiving PHS funds; (f) a comprehensive hemophilia diagnostic treatment center; (g) an acute care a disproportionate share hospital that (1) is owned or operated by (A) a unit of a State or local government, (B) a non-profit corporation formally granted governmental powers by a unit of State or local government, or (C) has a contract with a State or local government to provide health-care services to low income individuals not entitled to Medicaid benefits, (2) for the most recent cost reporting period before the calendar quarter involved, had a Medicare disproportionate share adjustment percentage greater than 12.5 percent, or is described in section 1886(d)(5)(F)(i)(II) of the Social Security Act, and (3) does not obtain covered drugs through a group purchasing organization or other group purchasing arrangement.

The House bill also would direct the Secretary of HHS to report to Congress within 1 year after enactment on the feasibility and desirability of including the following as "covered entities": (a) mental health or alcohol and drug abuse treatment providers receiving Federal Block Grant funds; (b) sexually transmitted disease and tuberculosis treatment providers receiving PHS funds through State or local government; and (3) outpatient maternal and child health providers receiving Federal Block Grant funds.

**Senate amendment:** Section 609 would, in proposed new section 2145(a) of the Public Health Service Act, define the term "covered entity" to include the following entities: (a) a migrant health center receiving PHS funds; (b) a community health center receiving PHS funds; (c) an entity receiving assistance under section 340 of the PHSA; (d) an alcohol or drug abuse treatment entity or mental health entity receiving PHS funds; (e) a family planning project described in section 1001 of the PHSA; (f) an entity receiving assistance under title XXVI of the PHSA; (g) a black lung clinic authorized under the PHSA; (h) an entity receiving PHS funds for the treatment of sexually transmitted diseases; (i) an entity receiving PHS funds to provide primary health services to residents of public housing; (j) non-Federal entities authorized under the Indian Self-Determination Act and receiving PHS funds; (k) a tuberculosis clinic receiving PHS funds; and (l) a disproportionate share hospital meeting the criteria specified in the House bill, except that the hospital must receive a disproportionate share adjustment percentage greater than 11.75 percent.

**Compromise agreement:** Section 602(a) would, in proposed new section 340B(a)(4) of the PHSA, define the term "covered entity" to include all of the entities listed in the description of the Senate bill, except an alcohol or drug treatment entity or mental health entity receiving PHS funds, and would also include (a) a comprehensive hemophilia diagnostic treatment center; (b) a Native Hawaiian Health Center; and (c) an urban Indian organization receiving funds under title V of the SSA. As in the House bill, the Secretary of HHS would be directed to report on the feasibility and desirability of including certain additional entities, described under the description of the House bill, as "covered entities."

#### *Certification of eligible entities*

**House bill:** No provision.

**Senate amendment:** Proposed new section 2145(c) of the PHSA would require the Secretary of HHS to certify all covered entities for participation in the discount program.

**Compromise agreement:** Section 601(b)(2) would, in proposed new section 340B(a)(7) of the PHSA, require the Secretary of HHS to certify only for non-categorical programs receiving Federal funds through Block Grants to States or localities.

#### *Prohibition against duplicative rebates/discounts*

**House bill:** Section 2(b)(2) would, in proposed new section 1927(a)(5) of the SSA, prohibit a covered entity from submitting a claim to the State Medicaid Agency for a drug prescribed to a Medicaid beneficiary.

**Senate amendment:** Proposed new section 2145(g) of the PHSA would require the Secretary of HHS to develop a mechanism to implement the prohibition on duplicate rebates and discounts.

**Compromise agreement:** Section 602 would, in proposed new section 340B(a)(5)(A) of the PHSA, follow the Senate amendment but also provide that, if the Secretary has not acted in 12 months to develop such a mechanism, a covered entity would follow a procedure specified in proposed section 1927(a)(5)(C) of the SSA under which the entity would notify the State Medicaid program whether a drug for which payment is sought has been subject to a discount under the agreement with the Secretary of HHS.

#### *Drugs subject to discounts and rebates*

**House bill:** Section 2(b)(2) would, in proposed section 1927(a)(5), require manufacturers to provide covered entities with the same net prices for single source, innovator multiple source, generic, and over-the-counter drugs as received by Medicaid under the Medicaid outpatient drug rebate program.

**Senate amendment:** Proposed section 2145(b)(2) of the PHSA follows the House bill except that prices for over-the-counter drugs not covered under a State's Medicaid Program, vaccines and birth control devices also would be subject to the minimum discount percentages as applied under the Medicaid rebate program.

**Compromise agreements:** Section 602(a) would, in new proposed section 340B(a)(2)(B) of the PHSA, include a provision substantively identical to the provision in the House bill.

#### *Treatment of distinct units of hospitals*

**House bill:** Section 2(b)(2) would, in proposed new section 1927(a)(5) of the SSA, provide that a hospital which operates a covered entity as a distinct part of the hospital would not be eligible for rebates or discounts unless the hospital is otherwise eligible as a covered entity.

**Senate amendment:** No provision.

**Compromise agreement:** Section 602(a) would contain, in proposed new section 340B(a)(6) of the PHSA, a provision substantively identical to the provision in the House bill.

#### *Definition of over-the-counter drug*

**House bill:** Section 2(b)(2) would provide, in proposed new section 1927(a)(5), that the definition of over-the-counter drug in section 1927 of the SSA would apply to covered entities.

**Senate amendment:** Proposed new section 2141 of the PHSA would provide that all over-the-counter drugs are subject to the generic drug rebate and discount percentage applicable to over-the-counter drugs under the Medicaid outpatient drug rebate program.

**Compromise agreement:** Section 601 would include, in proposed new section 340B(a)(2)(B), a provision substantively identical to the Senate provision.

#### *Section 603—Requirements relating to drugs procured by the Department of Veterans Affairs Minimum discount*

**Current law:** Current law contains no requirement that manufacturers sell drugs and biologicals through the FSS or VA depots at discounted prices.

**House bill:** Section 2(b)(2) of H.R. 2890 would, in proposed new section 1927(A)(6)(ii) of the SSA, require that the price of a covered drug procured through the FSS or the VA depot contracting system not exceed 76 percent of the non-Federal average manufacturer price (non-FAMP) for the drug or biological (less the amount of any additional discount). The additional discount would be defined as an amount equal to the amount by which (a) the change in the non-FAMP during the 12-month period ending with the month preceding the month during which the FSS or VA depot agreement goes into effect exceeds (b) the non-FAMP for the 3-month period ending one year before the last day of the month prior to the month in which the contract goes into effect multiplied by the percentage increase in the Consumer Price Index for all urban consumers (U.S. city average) (CPI-U) during that period. In the case of a covered drug for which sufficient data is not available to calculate the change in the non-FAMP during that 12-month period, the non-FAMP would be calculated during a period preceding the effective date which the Secretary considers to be appropriate. Section 3 would add to title 38 a new section 8126(a)(2) that would contain parallel provisions.

**Senate amendment:** Section 603 would, in proposed new section 8172(b)-(f) of title 38, require that the price for a covered drug or biological procured through the FSS or the VA depot contracting system not exceed 76 percent multiplied by (a) an amount equal to the non-Federal average manufacturer price (non-FAMP) for the drug or biological during the most recent 12-month period prior to the effective date of a new FSS or VA depot agreement, respectively, for which non-FAMP data are available (unless the non-FAMP cannot be calculated for 15 months prior to the effective date, in which case the non-FAMP would be calculated from the first day of the first month after the month in which marketing begins and ending on the last day of the last month before the effective date), minus (b) in the case of a drug or biological for which the non-FAMP has increased during the applicable period, the additional price discount amount. Section 604 would add new sections 8174(c)-(f) that would contain parallel provisions regarding VA depot prices.

The additional price discount amount would be defined as the amount of the difference, if any, between (a) the non-FAMP for the quarter ending on the last day of the last month before the effective date of the agreement minus the non-FAMP for the quarter ending one year prior to that day, and (b) the non-FAMP for the quarter ending on one year prior to that day multiplied by an amount equal to the increase in the CPI-U during that year. In the case of a drug or biological for which 15 months of non-FAMP data are not available, the additional price discount amount would be calculated on the basis of non-FAMP data for the period beginning on the first day of the month next following the month in which marketing of the drug or biological begins and ending on the last day of the last month before the effective date of the agreement for which CPI-U data are available.

**Compromise agreement:** Section 602 would, in proposed new section 8126(a)(2) of title 38, re-

quire that a manufacturer who enters into a master agreement with the Secretary of VA to enter into a pharmaceutical pricing agreement (PPA) with the Secretary of VA (or the Federal agency involved, if the Secretary delegates to the Federal agency the authority to enter into a PPA) with respect to each covered drug procured by a Federal agency through the FSS or a depot after January 1, 1993. Under the PPA, the price for the covered drug involved during the 1-year period beginning on the date the agreement takes effect would be established in accordance with a pricing mechanism substantively identical to the mechanism described in the description of the House bill.

*Calculation of discounts under multi-year contracts*

**House bill:** Section 2(b)(2) of H.R. 2890 would, in proposed new section 1927(a)(6)(C) of the SSA, require that, in the case of a covered drug produced by a manufacturer that has entered into a multi-year FSS or VA depot contract, the amount of the additional discount for the drug during a year following the first year in which the contract is in effect be determined on the basis of data on the change in the non-FAMP and the CPI-U during the preceding year. Section 3 would contain a new section 8126(c) of title 38 that would contain similar provisions.

**Senate amendment:** Section 603 would, in proposed new section 8172(b)-(f) of title 38, provide that, in the case of a multi-year FSS contract, the price of a covered drug or biological may be increased on an annual basis by a percentage no greater than the increase in the CPI-U during the preceding year. Section 604 would add to title 38 a new section 8174(c)-(f) containing parallel provisions regarding VA depot prices.

**Compromise agreement:** Section 603(a) would, in proposed new section 8126(d) of title 38, provide that, in the case of a multi-year FSS or federal depot contract, during any one-year period that follows the first year for which the contract is in effect, the price charged may not exceed the price charged during the preceding one-year period, increased by the percentage increase in the CPI-U between the last months of such one-year periods for which CPI-U data are available. The price during the first year for which the contract is in effect would be determined using the mechanisms in the compromise agreement described above under "Minimum Discount."

*Prices nominally in excess*

**House bill:** No provision.

**Senate amendment:** Section 603 would, in proposed new section 8172(g) of title 38, authorize the Secretary of VA to negotiate a price that is nominally higher, as determined by the Secretary, than the maximum FSS price that would be established for that covered drug or biological under the mechanisms established under proposed sections 8172 and 8174, if the Secretary determines that payment of the excess price is in the best interests of VA. Section 604 would add to title 38 a new section 8174(c)(2) containing a parallel provision regarding VA depot prices.

**Compromise agreement:** Section 603(a) would, in proposed new section 8126(a)(2) of title 38, follow the Senate bill.

*Covered drugs*

**House bill:** Sections 2(b)(2) and 3 of H.R. 2890 would, in proposed new sections 1927(a)(6)(A)(i) of the SSA and proposed new section 8126(a)(2) of title 38, require a manufacturer to sell any "covered drug" through the FSS or the VA depot contracting system

at a price determined in accordance with the minimum and additional discount mechanisms established in these proposed sections. Sections 2(b)(2) and (3) would, in proposed new sections 1927(a)(6)(E)(ii) of the SSA and 8126(d)(2) of title 38, respectively, define the term "covered drug" as (a) a single source drug as defined under section 1927(k)(7)(A)(iv) of the SSA; (b) a drug that would be a single source drug but for the application of section 1927(k)(3) of the SSA; (c) a biological product identified under section 600.3 of title 21, Code of Federal Regulations; and (d) insulin certified under section 506 of the Federal Food, Drug, and Cosmetic Act in accordance with the pricing provisions of these proposed sections.

**Senate amendment:** Sections 603 and 604 would, in proposed new sections 8172(b)-(f) and 8174(c)-(f) of title 38, respectively, require a manufacturer to sell any "covered drug or biological" through the FSS or the VA depots at a price determined in accordance with the minimum and additional discount mechanisms established in these proposed sections. Section 603 would add to title 38 a new section 8171 defining the term "covered drug or biological" as (a) any biological marketed under a product licensing application approved by the Administrator of FDA; or (b) any drug marketed under a new drug application approved by FDA.

**Compromise agreement:** Section 603(a), in proposed new section 8126(h)(2) of title 38, follows the House bill and also would include (a) an innovator multiple source drug as defined under section 1927(k)(7)(A)(ii) of the SSA; and (b) a drug that would be a single source drug but for the application of section 1927(k)(3) of the SSA.

*Reporting and Auditing of Prices Reported to the Secretary of Veterans Affairs*

**Current Law:** Section 1927(b)(3) of the SSA requires a manufacturer of a covered outpatient drug (as defined in section 1927 of the SSA) to report to the Secretary of HHS, in a manner specified in that section, information regarding the average manufacturer price and the best price for the drug (as defined in section 1927 of the SSA).

**House bill:** Section 2(b)(2) of H.R. 2890 would, in proposed new section 1927(a)(6)(D) of the SSA, provide that the provisions of section 1927(b)(3) of the SSA would apply to covered drugs (as defined in proposed section 1927(a)(6)(E)(ii)), and the Secretary of VA in the same manner as those provisions apply to covered outpatient drugs under the Medicaid rebate program and the Secretary of HHS. Section 3(b) of H.R. 2890 would add to title 38 a proposed new section 8126(b) that would contain a substantively identical provision and also would (a) require a manufacturer of any covered drug for which the manufacturer has entered into an FSS or VA depot price agreement (1) not later than 30 days after the first day of the last quarter that begins before the agreement takes effect (or, in the case of the first agreement that takes effect after the date of enactment, not later than 30 days after enactment) report to the Secretary of VA the non-FAMP for the drug during the one-year period that ends on the last day of the previous quarter, and (2) not later than 30 days after the last day of each quarter for which the agreement is in effect, report to the Secretary the non-FAMP for the drug during that quarter; and (b) authorize the Secretary of VA, in order to determine the accuracy of a price reported to the Secretary under proposed section 8126(b), to audit the relevant records of the manufacturer or of any wholesaler that distributes the covered drug.

**Senate amendment:** Section 603, in proposed new section 8173 of title 38, would (a) require a manufacturer of a covered drug or biological to report, in a manner determined by the Secretary of VA, non-FAMP data to the Secretary, (1) before entering into an FSS (or VA depot) pricing agreement, for the 12-month period prior to the effective date of such an agreement, and (2) not more than 30 days after the end of the previous calendar quarter for each calendar quarter in which the FSS (or VA depot) agreement is in force; (b) authorize the Secretary to impose civil monetary penalties on manufacturers that fail to report data on their non-FAMPs in a timely fashion or that report false information; and (c) authorize the Secretary to audit the relevant records of (1) the manufacturer of a covered drug or biological for which the manufacturer has entered into an FSS (or VA depot) pricing agreement to determine the accuracy of non-FAMP data reported to the Secretary by the manufacturer, and (2) any wholesaler that distributes that drug or biological.

**Compromise agreement:** Section 603(a), in proposed new section 8126(e) of title 38, follows the House bill, except that, in the case of a covered drug subject to pharmaceutical pricing agreement that takes effect on January 1, 1993, the manufacturer would be required to report the non-FAMP for the covered drug during the 1-year period that ends on the last day of the previous quarter not later than 30 days after the date of the enactment of this section.

*Reports to the Secretary of Health and Human Services regarding master agreements*

**House bill:** No provision.

**Senate bill:** No provision.

**Compromise agreement:** Section 603(a) would, in proposed new section 8126(f) require the Secretary of VA to supply the following information to the Secretary of HHS: (a) upon the execution or termination of any master agreement, the name of the manufacturer; and (b) on a quarterly basis, a list of manufacturers who have entered into master agreements with the Secretary of VA.

*Deadline for entering into agreements*

**House bill:** Section 2(b)(2) of H.R. 2890, in proposed new section 1927(a)(6)(A) of the SSA, would (a) beginning on January 1, 1993, require a manufacturer to make available for procurement through the FSS each drug or biological it manufactures that is (1) an innovator multiple source drug, or (2) a covered drug as described above under "Covered Drugs"; and (b) beginning on October 1, 1992, require that the price charged for a covered drug procured through the FSS or a VA depot be determined in accordance with the minimum and additional discount mechanisms that would be established in these proposed sections. Section 3 would add to title 38 proposed new section 8126(a)(1) containing parallel provisions.

**Senate amendment:** Section 603 would, in proposed new section 8172(i) of title 38, require a manufacturer to enter into FSS pricing agreements (a) for a drug or biological on the market as of the date of enactment, within six months after the date of enactment, or, if the Secretary of VA or Defense does not desire to enter into such an agreement during that time period, within 30 days after the Secretary makes a request to enter into a pricing agreement; and (b) for a drug or biological first marketed after the date of enactment, within three months after the date of enactment, or, if the Secretary of VA or Defense does not desire to enter into such an agreement during that time period, with-

in 30 days after the Secretary makes a request to enter into a pricing agreement. In the case of a "covered drug or biological," as described above under "Covered Drugs," the price under an FSS pricing agreement would be determined in accordance with the minimum and additional price discount mechanisms that would be established in these proposed sections. Section 604 contains, in proposed new section 8174(h), a parallel provision regarding VA depot prices.

**Compromise agreement:** Section 603(a) would, in proposed new section 8126(a) of title 38, require a manufacturer to (a) not later than January 1, 1993, make available through the FSS each covered drug it manufactures; and (b) with respect to each covered drug it manufactures that is procured by VA, DoD, or PHS through the FSS or a federal depot, enter into a pharmaceutical pricing agreement under which the manufacturer agrees to sell the covered drug through the FSS and depot at a price not to exceed .76 of the non-FAMP minus the additional price discount amount, if any.

**Non-Federal average manufacturer price**

**House bill:** Section 2(b)(2) of H.R. 2890 would, in proposed new section 1927(a)(6)(E)(iv) of the SSA, define the term "non-Federal average manufacturer price," with respect to a covered drug and a period of time (as determined by the Secretary of VA), as the weighted average price of a single form and dosage unit of the drug that is paid by wholesalers to the manufacturer, taking into account any cash discounts or similar price reductions during that period, but not taking into account any prices paid by the Federal Government. Section 3 would, in proposed new section 8126(d)(6) of title 38, provide an identical definition.

**Senate amendment:** Section 603 would, in proposed new section 8171 of title 38, define the term "non-Federal average manufacturer price," with respect to a covered drug or biological and a specified period of time, as (a) in the case of a covered drug or biological for which the majority of units were distributed to the retail class of trade during that period, the weighted average price of a single form and dose unit of the drug or biological that is paid during that period in the United States to the manufacturer by wholesalers for distribution to the retail class of trade, taking into account any prompt payment discounts, cash discounts, rebates, or similar price reductions, or (b) in the case of a covered drug or biological for which the majority of units were not distributed to the retail class of trade during that period, the weighted average price of a single form and dose unit of the drug or biological that is paid during that period in the United States to the manufacturer, taking into account any prompt payment discounts, cash discounts, rebates, or similar price reductions by wholesalers. Prices paid by the federal government would not be taken into account in the calculations under either (a) or (b).

**Compromise agreement:** Section 603(a), in proposed new section 8126(h)(5) of title 38, follows the House bill, except that (a) only prices paid by wholesalers in the United States would be used to calculate the non-FAMP; and (b) prices determined by the Secretary to be merely nominal in amount would be excluded from non-FAMP calculations.

The Committees note that the exclusion of nominal prices from non-FAMP calculations is consistent with section 1927(c)(1)(C) of the SSA, which excludes prices that are nominal in amount from Medicaid best-price rebate calculations. Health Care Financing Admin-

istration regulations define a "nominal price" as a price that is 10 percent or less of the average manufacturer price (AMP) for a drug or biological. However, the compromise agreement leaves such determination to the Secretary. The exclusion of nominal prices from calculation of the non-FAMP of a covered drug is intended to preclude a negative effect on industry pricing policies toward non-federal entities that rely on nominally-priced products.

**Prices of drugs and biologicals procured by State homes**

**Current law:** No provision in current law addresses the issue of the prices charged to State Veterans Homes for drugs and biologicals.

**House bill:** No provision.

**Senate amendment:** Section 605 would, in proposed new section 8175 of title 38, provide that, when a State Veterans Home purchases drugs and biologicals that are listed on the FSS, the prices paid by the Home shall be no greater than FSS prices.

**Compromise agreement:** Section 602 would, in proposed new section 8126(a)(3), require that a manufacturer, as a condition of compliance with a master agreement entered into with the Secretary of VA, charge a State Veterans Home receiving funds under section 1741, prices no higher than the FSS prices for covered drugs.

**Unified pharmaceutical award contracts**

**Current law:** Section 1535 of title 31, United States Code, authorizes the Secretary of VA to purchase goods and services on behalf of other federal agencies. The Secretary has no express statutory authority to enter into contracts on behalf of State Veterans Homes and entities receiving Public Health Service funds.

**House bill:** No provision.

**Senate amendment:** Section 606, in proposed new section 8176 of title 38, would establish a five-year demonstration project under which the Secretary of VA, to evaluate the cost and effectiveness of a unified contracting process for procuring pharmaceuticals, would be authorized to negotiate and enter into pharmaceutical contracts, to be known as Unified Pharmaceutical Award Contracts (UPACs), on behalf of (1) VA, (2) other federal agencies that directly furnish patient care, (3) State Veterans Homes, and (4) certain PHS-funded entities that directly furnish patient care. An entity that desires to participate in a UPAC would be required to (a) enter into an agreement with VA to participate in a UPAC, (b) make a commitment to purchase a certain quantity of the drug or biological during the UPAC contract period, (c) provide adequate proof of fiscal capability to meet the purchase volume commitment, (d) provide reasonable evidence that the drug will not be diverted to for-profit sales, and (e) pay to VA's revolving supply fund a contract user fee to offset VA's administrative costs relating to UPACs. The Secretary would determine which entities could participate in a UPAC and would be authorized to impose civil monetary penalties on any governmental entity that diverts to for-profit sales any drug or biological procured through a UPAC agreement. The Secretary would be required, not later than March 31, 1997, to submit a report to the Senate and House of Representatives Committees on Veterans' Affairs on the use of this authority.

**Compromise agreement:** No provision.

**Procurement of drugs and biologicals under contracts relating to Department of Defense depots**

**House bill:** No provision.

**Senate amendment:** Section 607 would, in proposed new section 1107 of title 10, require manufacturers to (a) provide minimum percentage and additional price discounts to the Department of Defense (DOD) for drugs and biologicals purchased through DOD depots, and (b) report non-FAMP data to the Secretary of Defense under provisions substantially identical to the provisions that would apply to the FSS and VA depots under proposed sections 8171, 8172, 8173, and 8174 of title 38.

**Compromise agreement:** Section 602(a) would, in proposed new section 8126(a) of title 38, require a manufacturer, as a condition of compliance with a master agreement, with respect to each covered drug procured by a Federal agency through the FSS or a federal depot on or after January 1, 1993, to have in effect a pharmaceutical pricing agreement with the Secretary of VA (or the Federal agency involved, if the Secretary delegates to the agency the authority to enter into such an agreement) under which the manufacturer agrees to sell covered through the FSS and federal depots at prices determined under the discount mechanisms described above under "Minimum Discounts."

**TITLE VII—PERSIAN GULF WAR VETERANS HEALTH STATUS**

**Persian Gulf War Veterans Health Registry (Section 702)**

1. Require the Secretary of Veterans of Affairs to establish and maintain a Persian Gulf War Veterans Health Registry listing the name of each individual who served in the Persian Gulf War theater of operations during the war and who (a) applies for Department of Veterans Affairs (VA) care or services, (b) files a claim for VA compensation based on any disability that might be associated with this service, (c) dies and is survived by a spouse, child, or parent who files a claim for dependence and indemnity compensation (DIC) based on this service, (d) requests a health examination from VA, as authorized in section 3 of the bill, or (e) receives from the Department of Defense (DOD) a health examination similar to the health examination given by VA to veterans under section 3 of the bill and requests inclusion in the Registry.

2. Require that the Registry include relevant medical data relating to the health status of, and other information that the Secretary considers relevant and appropriate with respect to, each individual listed in the Registry who either grants permission to include this type of information in the Registry or is deceased at the time the individual is listed in the Registry.

3. Require the Secretary to include in the Registry, to the extent feasible, similar information about such individuals who served in the Persian Gulf that is developed in connection with similar actions occurring prior to enactment of this legislation.

4. Require the Secretary of Defense to provide to the Secretary of Veterans Affairs any information the Secretary of Veterans Affairs considers necessary to establish and maintain the Registry.

5. Require the Secretary of Veterans Affairs, in consultation with the Secretary of Defense, to ensure that information in the Registry is collected and maintained in a manner that permits effective and efficient cross-reference between the Registry and the Department of Defense (DOD) Persian Gulf Registry, established under section 734 of the National Defense Authorization Act for Fiscal Years 1992 and 1993 (Public Law 102-190), as modified by this measure.

6. Require VA, from time to time, to notify individuals listed in the Registry of significant research developments regarding the health consequences of military service in the Persian Gulf War.

*Health examinations and counseling for veterans eligible for inclusion in certain health-related registries*

(Section 703)

7. Require VA to provide, upon the request of a veteran, a health examination and consultation and counseling concerning the results of the examination to any veteran eligible for listing or inclusion in the VA Persian Gulf War Veterans Health Registry and authorize these services for any veteran eligible for listing or inclusion in any other health-related registry established by VA who requests the services.

8. Require VA to carry out appropriate outreach activities to inform veterans of the availability of the health examinations.

*Expansion of coverage of Persian Gulf War Registry*

(Section 704)

9. Expand the DOD registry—established under section 734 of Public Law 102-190 for listing members of the Armed Forces who were exposed to the fumes of burning oil in the Operation Desert Storm theater of operations during the Persian Gulf conflict—to include any other member of the Armed Forces who served in the Operation Desert Storm theater of operations during the Persian Gulf conflict.

10. Recodify the requirement in current law that the DOD registry include, with respect to the listed members exposed to the fumes of burning oil, a description of the circumstances of each exposure of each such member to the fumes, including the length of time of the exposure.

11. Expand the contents of the DOD registry to include, in addition to the names of listed members, other relevant identifying information and, to the extent that data are available and inclusion of the data is feasible, a description of the circumstances of the member's service during the war, including the locations in the theater of operations in which the member's service occurred and the atmospheric and other environmental circumstances in those locations at the time.

The Committees wish to caution veterans and servicemembers against unreasonable expectations about what changes the expanded coverage of the DOD registry authorized by the bill may produce in the contents of the registry. While the Committees are informed that DOD already is including in the DOD registry all members who served in the Operation Desert Storm theater of operations, and that DOD is capable of providing data described in proposed section 734(b)(1)(A)(ii) for some personnel, as agreed by both the Secretary of Defense and the Secretary of Veterans Affairs, from records DOD or other agencies have developed and which DOD plans to maintain permanently about atmospheric and environmental circumstances during the Persian Gulf War, this bill does not require such information to be inserted in individual-specific detail for all persons who served in the theater of operations. The Committees encourage DOD to complete its documentation of environmental circumstances to which servicemembers may have been exposed so that it can explore feasible means of making such information available in the future in the case of select servicemembers listed in the DOD registry.

12. Recodify the requirement in current law that the Secretary establish the DOD

registry with the advice of an independent scientific organization.

*Study by Office of Technology Assessment of Persian Gulf Registry and Persian Gulf War Veterans Health Registry*

(Section 705)

13. Require the Director of the Office of Technology Assessment (OTA) to assess—

(a) the potential utility of each of the VA and DOD registries for scientific study of the health consequences of military service in the Persian Gulf theater of operations;

(b) the extent to which each of the registries meets the requirements of the respective laws establishing that registry;

(c) the extent to which data in each registry (i) are maintained in a manner that ensures permanent preservation and allows effective, efficient retrieval of information potentially relevant to scientific study of the health consequences of military service in the Persian Gulf and (ii) would be useful for scientific study regarding these health consequences;

(d) the adequacy of any plans to update each of the registries;

(e) the extent to which VA and DOD are assembling and maintaining information on the Persian Gulf theater of operations, including troop locations and environmental conditions, in a manner that facilitates the usefulness, maintenance, and retrieval of information from the respective registry; and

(f) the adequacy and compatibility of VA and DOD's protocols for health examination provided for the purpose of determining the health status of any member of the Armed Forces or any reserve component thereof who served in the Persian Gulf War.

14. Require VA and DOD to give OTA access to the records and information under each department's jurisdiction that OTA determines is necessary to permit OTA to carry out the assessments.

15. Require OTA to report to Congress on the assessments regarding the DOD registry and the compatibility of health-examination protocols within 270 days after enactment of the legislation and regarding the VA registry within 15 months after enactment.

*Agreement with National Academy of Sciences for review of health consequences of service during the Persian Gulf war*

(Section 796)

16. Require the Secretaries of Veterans Affairs and of Defense, within 180 days after enactment, to seek to contract with the National Academy of Science (NAS) to have the NAS Medical Follow-up Agency (MFUA) review existing scientific, medical, and other information on the health consequences of in-theater service during the Persian Gulf War.

17. Provide that the agreement shall require MFUA to provide veterans organizations and the scientific community (including the Director of the Office of Technology Assessment) with an opportunity to comment on the method or methods that MFUA proposes to use to conduct the review.

18. Require that the agreement allow MFUA, in conducting the review, to examine and evaluate medical records of individuals included in the two registries for purposes MFUA considers appropriate, including the purpose of identifying illnesses of these individuals.

19. Require MFUA to report the results of its review to the Senate and House Committees on Veterans' Affairs and on Armed Services and to the Secretaries of Veterans Affairs and of Defense, including MFUA's (a) assessment of the effectiveness of actions by

the two Secretaries to collect and maintain information potentially useful for assessing the health consequences of in-theater service; (b) recommendations on how to improve collection and maintenance of this information; and (c) recommendations on whether there is a sound scientific basis for an epidemiological study or studies of the health consequences of this service and, if so, the nature of any such study.

20. Require the two Secretaries to make available, up to \$500,000 in FY 1993, from funds available to the two respective departments for that fiscal year, divided equally between the departments, to carry out the review.

21. If VA and DOD contract with NAS for the MFUA study, require each department to provide \$250,000 in each of FYs 1994 through 2003, from amounts available to each department in each of these fiscal years, to NAS for the general purpose of conducting epidemiological research with respect to military and veterans populations.

*Coordination of Government activities on health-related research on the Persian Gulf War*

(Section 707)

22. Require the President to designate the head of an appropriate federal agency to coordinate all research activities undertaken or funded by the Executive Branch of the federal government on the health consequences of in-theater service during the Persian Gulf War. The coordinator would be required to report to the Committees on Veterans' Affairs by March 1 of each year after 1992 on the status and results of this research.

TITLE VIII—COURT OF VETERANS APPEALS

*Disciplinary procedures for judges of Court of Veterans Appeals*

*Current law:* Section 7253(g) of title 38 requires the Court of Veterans Appeals to establish procedures, consistent with the provisions of section 372(c) of title 28, for the filing of complaints with respect to the conduct of any judge of the Court and for investigation and resolution of such complaints. There is no provision under current law for any entity to review such judicial conduct and disability actions of the Court of Veterans Appeals.

*House bill:* No provision.

*Senate amendment:* Section 3 of S. 2974 would amend section 7253(g) of title 38 so as to (a) authorize the Judicial Conference of the United States to review judicial conduct and disability actions taken by the Court of Veterans Appeals, (b) authorize the payment of per diem and transportation costs for witnesses in connection with judicial conduct or disability hearing conducted by the Court of Veterans Appeals, and (c) authorize the Court to award reimbursement for the reasonable expenses, including attorneys fees, incurred by a judge against whom a complaint is brought and dismissed.

*Compromise agreement:* Section 801 follows the Senate provision.

Mr. KENNEDY. Mr. President, the Senate has acted in two unusually innovative ways today that will substantially increase health services to low-income Americans.

Two bills are now being sent to the President which will substantially cut costs for public health clinics by reducing their malpractice insurance expenses and enabling them to participate in Medicaid price discounts for prescription drugs.

Taken together, according to estimates by the Congressional Budget Office, the two bills will save \$522 million for these clinics over the next 5 years and enable them to use the savings to serve millions of additional low-income citizens over this period.

The services provided by these clinics are indispensable to poor and underserved Americans. Rising costs and inadequate appropriations make it urgent for us to find new ways to stretch current resources further, and these two bills are an impressive bipartisan response by Congress to this need.

The Federally supported Health Centers Assistance Act of 1992 puts claims for medical malpractice against two types of these clinics—community health centers and migrant health centers—under the Federal Tort Claims Act. Currently, these centers spend \$60 million a year on private malpractice insurance premiums—10 percent of their annual appropriation.

In some cases, the centers are unable to get malpractice insurance at all, which makes it impossible to hire physicians in specialties like obstetrics.

The high cost of malpractice insurance for the centers is fueled by the perception of the insurance industry that the poor, especially pregnant women, are high legal risks because they delay seeking care they cannot afford. Unlike private physicians, the centers cannot pass the cost on to their patients; instead the center must absorb these costs and reduce other services. Clinics struggling to meet rising malpractice premiums face difficult choices in deciding which services to cut back.

By giving these health centers the protection of the Federal Tort Claims Act, they will be able to attract qualified obstetricians with full malpractice coverage, and provide quality prenatal care to more low-income women. Savings to the centers can also be redirected to expand services for children by providing vital postnatal health care, immunizations, health screening, and primary care.

Just yesterday, Congress enacted separate legislation to create and expand one-stop-shopping programs specializing in maternal and child health care services by these centers—and the savings gained through today's action can also be targeted for this purpose.

With Federal Tort Claims Act protection, suits against the centers will be treated like suits against the Federal Government. Malpractice claims will be defended by the Justice Department, and the cost to the centers will be limited to the actual claims paid out and the actual costs incurred by the Justice Department in defending the centers.

The Congressional Budget Office estimates that the annual costs of the clinics will be reduced to about \$15 million, compared to \$60 million being spent for

their current coverage. The other \$45 million a year represents the risk premium currently charged by private insurance companies to cover the clinics, but which the clinics will no longer have to pay.

The second measure, part of the Veterans' Health Care Act of 1992, will provide the same discounted drug prices to public health clinics that are now available to the Medicaid Program. The discounted prices will be available not only to community health centers and migrant health centers, but to a range of other clinics as well, including: Black lung clinics, drug treatment clinics, community mental health clinics, and other public and nonprofit agencies that receive Federal funds and serve low-income patients. It is estimated that these discounts will save the clinics an estimated \$60 million a year in funds that can be used to provide better care in the future; \$20 million of these savings will go to community health centers and migrant health centers, and the other \$40 million will go to the other public health clinics and public hospitals.

When the Federal Government receives quantity discounts from drug companies, those discounts should apply to the entire Federal health effort, not just a part of it. Actions that benefit one agency should also help comparable Federal programs.

At a time when Federal resources are stretched to the limit and health needs are greater than ever, it is essential to obtain the kind of savings that these two measures will achieve.

Together with the FDA user fee legislation approved yesterday to defray the cost of expediting approval of new drugs, it is clear that Congress, the administration, and the private sector have begun working effectively together, to fashion innovative alternatives to stretch scarce health resources, reduce unnecessary costs, and do a better job of meeting the Nation's health care needs.

REGARDING TITLE VI OF H.R. 5193, THE  
VETERANS HEALTH CARE ACT OF 1992

Mr. BENTSEN. Mr. President, I would like to engage my distinguished colleague, the senior Senator from California [Mr. CRANSTON], who chairs the Committee on Veterans' Affairs, in a colloquy regarding some provisions in the pending bill, H.R. 5193, the Veterans Health Care Act of 1992.

Specifically, my concern relates to title VI. That title of the bill amends the VA title of the United States Code, title 38, to establish a discount program for the Department of Veterans Affairs [VA], Department of Defense [DOD], and the Public Health Service [PHS], amends the Public Health Service Act to establish a discount program for federally funded health clinics and certain public disproportionate share hospitals, and amends the Social Security Act so that the Medicaid Program

serves as an enforcement mechanism for these new discount programs. That is, if a manufacturer does not agree to sell to VA, DOD, PHS and PHS clinics or disproportionate share hospitals at the discounted amounts, then the manufacturer's products will not be paid for under Medicaid.

My concern relates to the linkage created in this bill between the Medicaid Program and the discount programs for these other purchasers of prescription drugs. As chairman of the Finance Committee, with jurisdiction over the Medicaid Program, I would like to underscore the importance of ensuring that Medicaid beneficiaries' access to prescription drugs is protected. I believe the bill under consideration minimizes risk to beneficiaries as much as possible. But, in the future, it will be critical that the Committee on Veterans' Affairs, the Committee on Labor and Human Resources, and the Committee on Finance work closely together to coordinate legislation.

Mr. CRANSTON. Mr. President, I agree wholeheartedly with the Senator from Texas. It is in the best interest of both the Medicaid Program and the VA health program to maintain a close working relationship between our committees now that the programs have this linkage in the area of prescription drugs. I believe my colleague can be assured that the chairman of the Committee on Veterans' Affairs will continue to consult with him about any provisions under consideration in the Committee on Veterans' Affairs that might affect the Medicaid Program—either directly or indirectly—and that I view the Finance Committee as the appropriate committee to amend the Medicaid statute. Likewise, I am confident that the chairman of the Committee on Finance will consult equally closely with the chairman of the Committee on Veterans' Affairs with respect to matters before the Finance Committee that might directly or indirectly affect the VA health care programs.

Mr. KENNEDY. Likewise, I agree that cooperation among our committees is essential to ensure that the objective of this legislation is achieved. Clearly, cooperation is a two-way street, and I am sure that the chairman of the Finance Committee will consult closely with the chairman of the Labor Committee on any changes in this law affecting the programs within the Labor Committee's jurisdiction. I would like to thank you and your staff—particularly Marina Weiss and Janis Guernsey—for your cooperation in reaching a compromise on this important matter.

I can assure my colleague from Texas that I, too, view the Finance Committee as the appropriate committee for amendments to the Medicaid Program and that I will consult with him whenever modifications to Medicaid law ap-

pear to be necessary for the purposes of the drug rebate program operated by the Public Health Service.

Mr. BENTSEN. Thank you, I appreciate your assurances. I would also like the chairman of the Committee on Veterans' Affairs to help me clarify the intent of H.R. 5193 with respect to its Social Security Act provisions. It is my understanding that the agreement reflected in this legislation assumes that the Secretary of Health and Human Services [HHS] makes the ultimate decision about whether the Medicaid Program may continue to pay for the products of a pharmaceutical manufacturer. I hope and expect that the Secretaries of HHS and the VA will cooperate in coordinating the administration of their two programs to the extent made necessary by this legislation. But if there are any cases where there is doubt or conflict about a manufacturer's compliance with the requirements of the Social Security Act, I think it is clear that the Secretary of HHS have the ultimate decisionmaking authority.

Mr. CRANSTON. Yes, clearly the Secretary of HHS must have the authority to determine whether a pharmaceutical manufacturer's products may be paid for under the Medicaid Program, and I share my colleague's hope and expectation that the two Secretaries will work closely together to ensure that this law is implemented properly.

Mr. BENTSEN. I would like to thank the distinguished chairman of the Committee on Veterans' Affairs for clarifying this issue, and also express my appreciation for his cooperation, and the cooperation of his staff—particularly Ed Scott and Janet Coffman—to ensure, to the extent possible, that the legislation gives each of the committees involved in these programs its full measure of control over legislation affecting the programs within its jurisdiction, and that program administration will be well coordinated between the Department of Veterans Affairs and the Department of Health and Human Services.

On that point, I would also like to thank my colleague the Senator from West Virginia [Mr. ROCKEFELLER] and his staff, particularly Ellen Doneski and Barbara Pryor, for their cooperation in pursuing an approach to this legislation designed to ensure that the Finance Committee will continue to be the venue for any amendments required to the Social Security Act. My colleague from West Virginia is a senior member of the Committee on Veterans' Affairs as well as a member of the Committee on Finance. Because of his dual interest in the health of veterans and the low-income individuals served by the Medicaid Program, I am confident that he will continue to be as cooperative as he has been in developing this legislation.

Mr. ROCKEFELLER. I appreciate the chairman's vote of confidence, and can assure him that I will continue to do all I can to ensure that the Finance Committee is closely consulted with respect to any legislation in the Committee on Veterans' Affairs that might affect the Medicaid Program. Furthermore, I can assure the chairman that I view the Finance Committee as the appropriate venue for any modifications to the Medicaid statute.

Mr. BENTSEN. Finally, I would like to thank the other Senators involved in this legislation—Senator PRYOR and Senator MIKULSKI—for their cooperation with the Finance Committee during the development of this legislation, the staff members of Senators PRYOR, MIKULSKI, and KENNEDY—particularly Chris Jennings, John Coster, Phyllis Albritton, and Marsha Simon—for their efforts to work closely with the staff of the Senate Finance Committee.

Mr. FORD. Mr. President, I move that the Senate concur in the House amendments.

The motion was agreed to.

Mr. FORD. Mr. President, I move to reconsider the vote.

Mr. SIMPSON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. CRANSTON. Mr. President, I rise briefly to thank the leaders on both sides of the aisle for their great help in clearing the barriers that might have prevented passage of the very important veterans bill that will do so much for America's veterans.

I thank also the Presiding Officer, the Senator from West Virginia [Mr. ROCKEFELLER], for his great help. I thank the marvelous staff of the veterans committee for their diligence and perseverance and dedication that led to this moment, including Bruce Katz and Ed Scott, who are seated next to me.

I thank my staff and all others on the floor who have helped bring us to this point.

#### MAKING CERTAIN CORRECTIONS IN THE ENROLLMENT OF THE BILL H.R. 5006

Mr. FORD. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of House Concurrent Resolution 379 now at the desk, that the concurrent resolution be agreed to, the motion to reconsider be laid upon the table.

The PRESIDING OFFICER. Without objection, it is so ordered.

So the concurrent resolution (H. Con. Res. 379) was agreed to.

#### HOUSING AND COMMUNITY DEVELOPMENT ACT—CONFERENCE REPORT

Mr. FORD. Mr. President, I submit a report of the committee of conference

on H.R. 5334 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 5334) to amend and extend certain laws relating to housing and community development, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of October 5, 1992.)

The PRESIDING OFFICER. The Senator from California is recognized.

Mr. CRANSTON. Mr. President, I rise to say, briefly, that I am pleased that the Senate is about to take final action on the conference report on H.R. 5334, the Housing and Community Development Act of 1992.

It reauthorizes and refines key programs which were passed in 1990 as part of the landmark National Affordable Housing Act. It represents a marriage of different philosophies about the best ways to improve the housing conditions of millions of Americans, and is the result of an extraordinary amount of cooperation and effort—both bipartisan and bicameral.

During the last several weeks, House and Senate conferees took on the difficult task of merging the Senate and House bills into one coherent piece of legislation. We have incorporated administration suggestions. We have resolved a number of very tough and controversial issues. This conference report is a result of those efforts. It both builds upon existing efforts and establishes new initiatives to address the Nation's affordable housing problem. These include:

Expanding funding for the HOME program and easing the regulatory restrictions that have inhibited local flexibility;

Strengthening fair housing enforcement;

Significantly expanding Federal efforts to prevent childhood lead poisoning—the No. 1 environmental health problem facing American children today—through the assessment and reduction of lead paint hazards in private, public, and assisted housing;

Establishing the YouthBuild program to help nonprofits train, educate, and employ low-income youth in the construction and rehabilitation of affordable housing;

Expanding and preserving the supply of affordable rental housing by giving FHA the ability to tap the resources and expertise of State housing finance agencies; and

Increasing funds for the HOPE program and incorporating, in whole or in part, several key administration proposals.

Mr. President, this will be my last housing bill—not only as chairman of the Subcommittee on Housing and Urban Affairs—but also as a Member of this distinguished body. As subcommittee chairman for the last 6 years, I have attempted to further what we have long espoused as the Nation's goal: to provide decent, safe, and affordable housing for all Americans. Throughout most of the decade of the 1980's, our Nation's housing goals faltered under the weight of benign neglect at the Federal level. Despite some important and significant gains, we have a very long way to go.

I urge my colleagues to continue to pursue the goal of affordable housing. No one of us should be content to rest while so many of us remain in need.

I am encouraged by the fact that the affordable housing effort will be furthered by two of my very distinguished and dedicated colleagues on the Senate Banking Committee. Over the years, both Chairman RIEGLE and Senator SARBANES have been strong and ardent advocates of affordable housing. I am confident that under their leadership, affordable housing needs will continue to rise to the forefront of the Nation's agenda.

I believe that we have produced a very good bill. More importantly, it represents a legislative product which can provide a direct response to the dire economic and social conditions existing in many of our inner cities, our suburbs, and our rural areas.

Mr. President, our mission is clear and our options straightforward—if we are to make a difference in the urban housing crisis, we must implement solutions that go directly to the heart of the matter.

Mr. President, as I said, I am pleased that the Senate is about to take action on the conference report on H.R. 5334, the Housing and Community Development Act of 1992.

The conference report before us today reauthorizes and refines key programs which were passed in 1990 as part of the landmark National Affordable Housing Act. It represents a marriage of different philosophies about the best ways to improve the housing conditions of millions of Americans, and is the result of an extraordinary amount of cooperation and effort,—both bipartisan and bicameral.

The need for such cooperation has never been greater. Events in recent months have brought the Nation to a watershed in its response to the urban crisis. Issues that have been shunted aside for years—urban poverty, pervasive discrimination, lack of affordable housing, the future of inner city youth—have now moved to the frontburner of the domestic agenda.

Report after report demonstrates that the Nation's affordable housing crisis, despite the efforts of tens of thousands of committed individuals across the Nation, continues to worsen. Even conservative observers estimate that over 1 million persons are homeless at some point during the year.

The persistent lack of a decent and affordable rental housing supply has also placed many low-income families on the brink of homelessness. And the failure of incomes to keep pace with housing costs over the past two decades has put homeownership beyond the reach of many young, middle class families. Despite depressed home purchase prices in some markets and low interest rates, the gap between income and price remains difficult to bridge.

The Housing and Community Development Act of 1992, presents us with an opportunity to unleash enormous resources and energies across the country to bring good, affordable homes within the reach of young families, of working people, of families with low incomes, of elderly Americans, and of people with special needs.

As chairman of the Subcommittee on Housing, I began work on this bill early this year. In January, Senator D'AMATO—the ranking member of the subcommittee—and I invited a wide variety of housing organizations to submit recommendations for the reauthorization of the National Affordable Housing Act. The response was overwhelming and many of the recommendations are reflected in this conference report.

The subcommittee also held a number of hearings which focused on a range of topics relevant to the legislation including lead based paint; multi-family finance; distressed public housing; and housing needs.

In addition, the subcommittee held a series of staff symposia designed to explore and discuss specific issues in more detail. These included: the HOME Investment Partnerships Program; the Community Development Block Grant [CDBG] Program; the mixing of elderly and disabled populations; the preservation of older housing stock; rural housing, and local housing planning.

Over the course of this year, the subcommittee has built a careful record on what needs to be done in housing and what a reauthorization bill should contain. During the last several weeks, House and Senate conferees took on the difficult task of merging the Senate and House bills into one, coherent piece of legislation. We have incorporated many administration suggestions. We have resolved a number of very tough and controversial issues. The conference report on the Housing and Community Development Act of 1992 is a result of those efforts. It both builds upon existing efforts and establishes new initiatives to address the Nation's affordable housing problem.

The conference report accomplishes three key objectives: to reauthorize and revise programs authorized by the National Affordable Housing Act—programs that support local and community-based housing networks; to incorporate a series of new initiatives proposed by the administration; and to incorporate several new initiatives proposed by Members of the Senate as well as the House.

First, the bill provides additional support for community-based housing efforts—efforts that enable local communities to identify their housing needs and create programs and strategies to meet those needs. Across the Nation, tenants, advocates, nonprofits and others have begun implementing the HOME Program—the primary vehicle for community-based housing efforts.

In response to virtually hundreds of comments from the people in the trenches, the bill would expand funding for the HOME Program and ease the regulatory restrictions that have inhibited local flexibility.

Second, the bill would significantly expand federal efforts to prevent childhood lead poisoning—the number one environmental health problem facing American children today. Despite two decades of congressional mandates, the Federal Government still lacks a comprehensive, coherent, and cost-effective strategy to reduce the hazards of lead-based paint. I believe, however, that this legislation represents a watershed in the national response to childhood lead poisoning.

The lead provisions included in this bill would take significant steps in the prevention of childhood lead poisoning by expanding the Federal Government's commitment to the assessment and reduction of lead paint hazards in private, public and assisted housing. It would put an end to the indecisiveness that has characterized Federal action and get the nation moving quickly on the most dangerous lead-based paint hazards. The bill would promote sensible solutions to reduce lead hazards in housing and would inform parents and others on easy preventative steps that can be taken.

Third, the bill strengthens fair housing enforcement. Despite passage of fair housing and fair lending laws, recent reports show alarming evidence of discrimination in both the rental and mortgage markets. The reauthorization would expand and revise the Fair Housing Initiatives Program, the primary support for private fair housing enforcement efforts around the Nation. It would also increase funding for Federal efforts to weed out discriminatory behavior in the marketplace and to expand the housing options of minorities.

Fourth, the bill uses housing development to empower low-income youth, the so-called hardcore unemployed. The bill would establish the

YouthBuild Program to help nonprofits train, educate and employ low-income youth in the construction and rehabilitation of affordable housing. YouthBuild would help replicate throughout the nation exciting and innovative partnerships that, as the New York Times recently reported, are "gaining recognition as a wellspring of human reclamation."

Fifth, the bill would help expand and preserve the supply of affordable rental housing by giving FHA the ability to tap the resources and expertise of State housing finance agencies.

The shutdown of FHA multifamily activity has placed a tremendous strain on the multifamily housing finance system. Since the FHA was created, one of its primary missions has been to provide insurance for low-cost multifamily housing. But since 1982, FHA's percentage of insured multifamily mortgages dropped from 35 percent to just under 7 percent in 1990. Reports indicate that FHA's current processing capacity is minimal at best. I am continually dismayed that such a vital mission could be so callously disregarded.

The multifamily finance demonstration included in this bill was recommended by a wide coalition of experts from GAO to a private sector task force on multifamily finance. It will help test new forms of credit enhancement with minimal risk to the Federal Government. The demonstration would expand and preserve the supply of affordable rental housing—the primary source of affordable housing for low-income families—by enabling FHA to tap the resources and expertise of State housing finance agencies, Federal Government sponsored enterprises and other market participants.

Finally, the bill contains many of the initiatives proposed by HUD Secretary Jack Kemp. Most significantly, the bill would fund the HOPE Program at \$885 million, \$540 million over last year's appropriations. In addition, the bill would incorporate, in whole or in part, other key administration proposals that are designed to help families with children move out of areas with high concentrations of persons living in poverty; to permit recipients of vouchers to use their rental assistance toward mortgage payments; to provide small residential facilities for seriously mentally ill homeless persons; and to enhance owner accountability and increase resident involvement in the preservation of troubled multifamily housing.

I must, however, express my grave disappointment with the fact that Secretary Kemp has indicated that he will recommend that the President veto this legislation. Since the beginning of this process, I have worked very hard to ensure that this bill was fashioned in a truly bipartisan manner. I have

sought to work in a cooperative manner with the administration—not only to include their initiatives—but also to resolve a significant number of the issues and concerns which they raised. Throughout the course of the conference on H.R. 5334, we made additional changes to move the bill more significantly in the direction of the administration. I feel strongly that the conference report represents a true compromise for all sides—one that I hope that Secretary Kemp will support.

Mr. President, this will be my last housing bill not only as chairman of the Subcommittee on Housing and Urban Affairs but also as a Member of this distinguished body. As subcommittee chairman for the last 6 years, I have attempted to further what we have long espoused as the Nation's goal: To provide decent, safe, and affordable housing for all Americans. Fulfilling that goal has not been either easy or enormously successful. Throughout most of the decade of the 1980's, our Nation's housing goals faltered under the weight of benign neglect at the Federal level. Despite some important and significant gains, we have a very long way to go.

I urge my colleagues to continue to pursue the goal of affordable housing. No one of us should be content to rest while so many of us remain in need.

I am encouraged by the fact that the affordable housing effort will be furthered by two of my very distinguished and dedicated colleagues on the Senate Banking Committee. Over the years, both Chairman RIEGLE and Senator SARBANES have been strong and ardent advocates of affordable housing. I am confident that under their leadership, affordable housing needs will continue to rise to the forefront of the Nation's agenda.

I believe that we have before us a very good bill. More importantly, it represents a legislative product—which, if enacted—could provide a direct response to the dire economic and social conditions existing in many of our inner cities, our suburbs, and our rural areas.

Mr. President, our mission is clear and our options straightforward. If we are to make a difference in the urban housing crisis, we must implement solutions that go directly to the heart of the matter. That task begins today.

I urge my colleagues to support this conference report.

Mr. President, I also have a summary of the conference report. I ask unanimous consent that it be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

**THE HOUSING AND COMMUNITY DEVELOPMENT ACT OF 1992 HIGHLIGHTS OF HOUSING PROVISIONS OF REPORT**

**AUTHORIZATION LEVELS**

Authorizes federal housing and community development programs at \$24.3 billion in FY 1993 and \$25.4 billion in FY 1994.

The following are FY 1993 authorization levels for major programs: \$4 billion for the Community Development Block Grant program (CDBG); \$2.1 billion for the HOME program; \$3.1 billion for public housing modernization; \$1.9 billion for incremental section 8 rental assistance; \$855 million for the HOPE program, of which up to \$40 million is available for Youthbuild; and \$806 million for McKinney housing programs for the homeless.

**TITLE I—PUBLIC AND ASSISTED HOUSING PROGRAMS**

Reauthorizes major public and assisted housing programs including public housing operating subsidies, modernization and development, section 8 rental assistance, Public and Assisted Housing Drug Elimination Grants, HOPE, and the National Homeownership Trust.

Incorporates the following new Administration initiatives:

Choice in Management, designed to test the effectiveness of giving residents of housing administered by troubled PHAs the ability to choose alternative management;

Moving to Opportunity, designed to help families with children move out of areas with high concentrations of persons living in poverty; and

Vouchers for Homeownership, designed to permit recipients of vouchers or certificates who are first-time homebuyers to use their rental assistance towards mortgage payments; and

Incorporates two initiatives on distressed public housing to: give HUD additional resources and powers to reform and, if necessary, take over troubled public housing agencies; and authorize a separate program to revitalize the most distressed public housing developments by involving residents and community groups in comprehensive planning, major reconstruction, supportive services and economic development activities.

Makes the following major refinements to existing public and assisted housing programs: eases the requirements governing the replacement of public housing that is demolished or sold; eases the matching requirements in the HOPE program; and modifies the National Homeownership Trust to provide grants to capitalize local homeownership trusts and to allow NHT funds to be used in conjunction with the Mortgage Revenue Bond program.

Establishes a new HOPE for Youth: Youthbuild program to provide training and employment opportunities to young adults through their involvement in the rehabilitation and construction of low-income housing.

Establishes a new Indian Housing Loan Guarantee program to enable Indian families to construct, acquire, or rehabilitate dwellings located on trust land.

Establishes a new Enterprise Zone Homeownership program.

**TITLE II—HOME INVESTMENT PARTNERSHIPS PROGRAM**

Reauthorizes the HOME program with several program modifications:

Establishes a two tiered local match of: 25% for substantial rehabilitation, moderate rehabilitation, and tenant based assistance and 30% for new construction.

Eliminates restrictions on new construction activities.

Allows a portion of publicly issued debt to be recognized as match, for up to 25% of the total match. Up to 50% of the face value of debt issued for multifamily housing and 25% of the face value of debt issued for single family housing could be recognized.

Establishes a match reduction for fiscally distressed communities with extremely high poverty rates or low per capita income, and for those in disaster areas.

Allows up to 10 percent of HOME funds to be used for administrative costs.

#### TITLE III—PRESERVATION

Reauthorizes the 1990 preservation program with several modifications:

Eliminates the windfall profits test.

Establishes (generally) a 40 year loan term for section 241(f) loans.

Establishes a technical assistance and capacity building grant program for resident organizations and priority purchasers (non-profits) of properties eligible for prepayment.

Expands notification requirements for tenants and priority purchasers.

Requires the Secretary to implement provisions delegating prepayment processing to state housing finance agencies and requiring risk sharing arrangements with state housing finance agencies.

Enhances the ability of nonprofits to purchase eligible projects through various technical refinements.

#### TITLE IV—MULTIFAMILY HOUSING PLANNING AND INVESTMENT STRATEGIES

Establishes a comprehensive planning and assessment process for owners of HUD assisted multifamily and elderly housing properties.

Reauthorizes the Flexible Subsidy/Capital Improvements program with several modifications.

#### TITLE V—MORTGAGE INSURANCE AND SECONDARY MORTGAGE MARKET

Raises the FHA single family loan limits to the lesser of 95% of area median home price or 75% of the 1992 Freddie Mac conforming loan limit (\$151,725). Requires FHA to disclose annually the extent to which FHA is serving low and moderate income homebuyers, minority homebuyers and homebuyers who live in central cities and rural areas.

Increases the FHA multifamily and Title I manufactured home loan limits by 20%.

Authorizes an FHA demonstration program to test several different types of credit enhancement for multifamily housing. This demonstration would expand and preserve the supply of affordable rental housing—the primary source of affordable housing for low income families—by enabling FHA to tap the resources and expertise of state housing finance agencies, housing GSEs and other market participants.

Establishes an Interagency Task Force on Multifamily Housing to develop recommendations for establishing a national database on multifamily housing loans.

Requires first-time homebuyers to obtain prepurchase counseling, where available, prior to obtaining FHA insurance.

Establishes an Energy Efficient Mortgage Pilot Program in five states for existing residential buildings.

Requires a HUD study of home warranty protection plans and extends existing homeowner warranty protections to owners of FHA-insured condominiums.

#### TITLE VI—HOUSING FOR ELDERLY PERSONS AND PERSON WITH DISABILITIES

Reauthorizes supportive housing programs for the elderly, persons with disabilities and persons with AIDS, combining authorizations for the 202 elderly program and 811 disability program.

Makes various programmatic and technical changes to the AIDS Housing Opportunity program.

Authorizes PHAs to designate age or disability distinct housing, subject to HUD approval of the PHAs' allocation plan. Plans would demonstrate that the PHAs' allocations are responsive to the needs of residents and applicants. Additional authority and resources would be provided to PHAs to enable them to help persons with disabilities who are losing access to housing which is currently available to them. This includes development funding for small, professionally managed supportive housing projects for persons with disabilities and a new voucher and certificate program reserved for public housing applicants with disabilities.

Affirms the ability of owners of federally-assisted non-profit housing designed for the elderly to abide by the contracts and regulatory framework in place at the time the projects were developed. Permits owners of project-based section 8 housing designed for the elderly to give preference to elderly persons, with a minimum set-aside for persons with disabilities.

Authorizes additional funding for service coordinators in public and assisted housing. Establishes a task force and requires HUD by regulation to establish criteria for tenant selection and rules of occupancy in federally assisted housing. Requires HUD to report to Congress on the allocation of federal housing assistance for families with children, elderly persons and persons with disabilities.

#### TITLE VII—RURAL HOUSING

Reauthorizes the major rural housing grant and loan programs with modifications. Reauthorizes the set-aside for underserved areas and colonias. Includes Indian Trust lands as eligible and corrects the definition of colonias.

Raises the income limit for the 502 guaranteed loan program to 115 percent of median. Extends the authority for the section 502 deferred mortgage demonstration program.

Increases the equity requirement from 3 percent to 5 percent for all section 515 projects receiving a low income housing tax credit allocation. Provides technical changes to coordinate rental assistance with loan approvals, to expand the definition of development costs, and to improve the coordination of section 515 with the low income housing tax credit. Reauthorizes the 9% non-profit set-aside, removes the prohibition on using the set-aside in conjunction with the low income housing tax credits, and establishes a national pool of all unused set-aside funds.

Permanently authorizes the mutual and self-help housing programs. Adds the repair of section 502 inventory properties as an activity.

Provides authority for nonprofits to establish site acquisition and development revolving loan funds.

Allows housing preservation grants to be used for replacement housing, when rehabilitation is not practical, at a cost not to exceed \$15,000 per unit.

Extends the 1987 Act rural housing preservation provisions to section 515 projects financed between 1979 and 1989. Amends the preservation provisions to allow project owners to tap excess section 8 reserves in exchange for extending the long term use restrictions on the project. Establishes an Office of Rural Housing Preservation in FmHA.

Allows the Agriculture Secretary to accept subdivision approvals from local, state, and county agencies in lieu of FmHA subdivision approvals.

Establishes a permanent rural housing voucher program.

#### TITLE VIII—COMMUNITY DEVELOPMENT

Reauthorizes the Community Development Block Grant (CDBG) program with some modifications.

Revises the non-housing community development plans, required in current law, to include only priority needs eligible under CDBG and to reduce reporting requirements. Establishes a demonstration program for computerized database of priority non-housing community development needs.

Revises the CDBG program to enhance the ability of grantees and subgrantees to effectively pursue economic development activities including creation and retention of jobs. Creates a presumption of benefit for activities employing people who live in areas with high concentrations of low and moderate income households. Prohibits the Secretary from limiting economic development assistance to activities which could not be accomplished but for assistance. Provides guidelines for the evaluation, selection and review of economic development projects.

Adds as eligible activities under CDBG, community-university partnerships, assistance to microenterprises, administrative costs to establish federal enterprise zones and extends eligibility for direct homeownership assistance activities.

Provides assistance to communities impacted by defense cutbacks for planning economic adjustments and diversification.

Creates a Community Outreach Partnership demonstration program to facilitate linkages between institutions of higher education and communities to solve urban problems.

Authorizes the Neighborhood Development Program and encourages neighborhood development organizations to work with local lending institutions.

Creates a five year demonstration program to build a network of proactive financial institutions, like South Shore Bank in Chicago, whose primary mission is to rebuild distressed communities.

#### TITLE IX—REGULATORY AND MISCELLANEOUS PROGRAMS

Expands and revises the Fair Housing Initiatives Program to take account of the expanded coverage of federal fair housing and fair lending laws and the increase evidence of discrimination in the housing markets.

Authorizes salaries and expenses for HUD and provides set-asides to increase the multifamily housing field office staff and to provide ongoing training and capacity building for HUD personnel.

Amends the Home Mortgage Disclosure Act to require financial institutions to disclose loan applicant register data and sets six and nine month deadlines for disclosure of aggregate data by the Federal Reserve.

Amends the Community Reinvestment Act to clarify that regulators may give credit for community lending projects undertaken by nonminority-owned or non-women-owned financial institutions in partnership with minority-owned or women-owned institutions if those projects meet the credit needs of the community.

Prohibits use of the Rule of 78s to calculate interest owed on prepayment of consumer loans with terms longer than 61 months.

Extends the Real Estate Settlement Procedures Act to include the making of a loan as a settlement service and to include refinancings and second mortgages within the provisions of the Act.

Updates and strengthens the requirements of Section 3 of the Housing and Community Development Act of 1968, which requires that jobs and contracting opportunities created by federal housing and community development assistance be directed, to the greatest extent feasible, to low-income people.

Provides for staff of the National Commission on Manufactured Housing and adds new functions for the Commission including evaluating the extent of compliance with warranties and standards governing transportation and on-site set-up. Requires the Secretary to establish a new standard on hard-board siding in manufactured homes.

Reestablishes the solar energy bank to assist in financing solar and renewable energy capital investments in residential and commercial buildings.

Permits the HUD Secretary to establish goals and performance measures for several HUD programs including FHA single and multi-family and public housing.

Real Estate Settlement Costs. Specifies that a lender need not provide an applicant with a booklet if the lender denies the application within three days after receiving it.

Adjustable Rate Mortgage Caps. Exempts commercial loans and other non-consumer loans secured by residential real-estate from a certain consumer-oriented limitation on adjustable rates.

Modifying Separate Capitalization Rule for Savings Associations' Subsidiaries. Authorizes regulators to grant savings associations case-by-case extensions of up to two years in the schedule for phasing direct real-estate investments out of their capital.

The 1989 thrift reform law generally prohibited a thrift institution from counting as capital its investments in and loans to subsidiaries engaged in activities not permissible for a national bank. It also established a schedule for thrifts to phase existing investments out of their capital. In response to recent problems in real-estate markets, this bill gives regulators case-by-case discretion to extend the schedule by up to two years.

To qualify for an extension, a thrift must have clean, competent management; and must be adequately capitalized, or in compliance with an approved capital plan and not critically undercapitalized. Regulators must specifically find that the extension would not be unsafe or unsound or otherwise increase the risk to the deposit insurance fund.

Real Estate Appraisal Amendment. Clarifies regulators' authority not to require a certified or licensed appraiser for loans below a dollar limit set by the agency (e.g., \$100,000).

Insider Lending. Authorizes the Federal Reserve Board to make exceptions to the statutory restrictions on loans to executive officers, directors, and principal shareholders for transactions that pose only minimal risk.

Codifies the Federal Reserve Board's long-standing rule that a depository institution's transactions with its parent holding company are governed by section 23A of the Federal Reserve Act—and that the statute governing loans to principal shareholders does not impose duplicative restrictions.

Clarification of Compensation Standards. Clarifies that 1991 legislation requiring regulators to establish standards limiting excessive compensation to depository institutions' officers, directors, and employees generally does not authorize regulators to set specific pay scales. But the clarification does not limit regulators' other authority to limit compensation (e.g., under the prompt corrective action provisions of the 1991 legislation; through supervisory agreements or cease-and-desist orders; or as otherwise necessary to keep an institution safe and sound).

Truth in Savings. Delays effective date of Truth in Savings regulations by 90 days. Also clarifies that signs on a depository institu-

tion's own premises indicating interest rates (e.g., rate boards) need not contain the details disclosures that the Truth in Savings Act requires of other advertising.

#### TITLE X—RESIDENTIAL LEAD-BASED PAINT HAZARD REDUCTION ACT OF 1992

Establishes a new more workable framework to reduce and eliminate lead-based paint poisoning hazards in private and assisted housing.

Provides grants to states and localities to reduce hazards in low income housing where children are at risk of lead poisoning. Phases in requirements for lead-based hazard evaluation and reduction in federally assisted housing. Requires inspection, and in some cases abatement, for residential property sold by the federal government. Requires sellers and lessors of private and assisted housing to disclose known lead-based paint hazards and distribute lead hazard pamphlets developed by EPA. Homebuyers will have the opportunity to test for lead paint prior to purchase.

Imposes training and certification requirements for lead contractors, and directs EPA to establish or approve state certification programs. Strengthens worker protections.

#### TITLE XI—NEW TOWNS DEMONSTRATION

Authorizes a program to provide assistance for distressed, riot-torn areas in Los Angeles to carry out a comprehensive community revitalization strategy.

#### TITLE XII—BARRIERS TO AFFORDABLE HOUSING

Establishes the Removal of Regulatory Barriers to Affordable Housing Act. Provides grants to states to identify barriers to providing affordable housing. Creates clearinghouse on information relating to such barriers.

#### TITLE XIII—GSE REFORM

In General. Provides for a complete overhaul and substantial enhancement of the regulatory structure for the two housing-related government-sponsored enterprises (GSEs), Fannie Mae and Freddie Mac.

As requested by the Administration, it reduces the public's potential exposure to financial risk related to the \$1 trillion of GSE liabilities by establishing meaningful and enforceable capital standards.

But unlike the Administration's bill, it also expands and clarifies the GSEs' mandate to serve the housing finance needs of families with low and moderate incomes and families living in central cities and other credit-starved areas.

Capital Requirements. Provides a state-of-the-art set of capital requirements and enforcement tools that should ensure that taxpayers never have to bail out either of these financial giants. It looks beyond current balance sheets to the survival ability of the GSEs during a prolonged period of high default rates and larger, adverse interest rate changes. In anticipation of this legislation, both GSEs have recently made substantial additions to capital, and more will be required.

Housing Goals. Establishes three annual housing goals that will require the GSEs to increase the proportion of their mortgage purchases benefiting homebuyers and renters whose incomes and location have put them at a disadvantage in housing finance markets.

Codifies and improves long-standing but mostly ignored HUD regulations. A 30% target for the proportion of the housing units (both single family and multifamily) financed by each GSE's mortgage purchases that benefit families with below median in-

come will be phased in over the next two years. HUD regulations currently have a similar 30 percent goal, but uses a proxy for income that greatly overstates the true shares of mortgages benefiting this half of the population. After the transition period, HUD will have the discretion to adjust the goal after a consideration of data that measures the GSEs' actual and potential ability to serve this group.

Phases in another 30 percent target for purchases of mortgages in central cities. After the first two years, HUD will expand the goal to cover rural areas and other underserved areas. While HUD regulations have included a similar goal since 1978, the Department does not even collect data to assess compliance. Recently released HMDA data indicate that it is not being met.

Introduces a third goal relating to various categories of families that fall below 80 percent of median income. The GSEs will spend \$3.5 billion over the next two years to help meet the needs of these families.

Provides specific powers to enforce compliance with goals. A GSE that misses a goal that HUD judges to be feasible, after consideration of relevant market factors, must submit a plan acceptable to the regulator for meeting future goals. Failure to comply with a plan can lead to fines and a cease and desist order.

Data Collection. Provides for increased data collection and reporting to ensure that Congress receives an annual assessment and critical analysis of the performance of the housing GSEs.

Fair Housing. Strengthens and clarifies the GSEs' responsibilities under fair housing laws.

Regulatory Structure. Creates a new, independent office within HUD. This office is given freedom to set its own pay scales, write its own budgets (funded totally by the GSEs), and testify without clearance. It will have exclusive authority to issue and enforce safety and soundness regulations. Housing regulations will continue to be administered by the HUD Secretary who will now have explicit enforcement authority.

#### TITLE XIV—HOMELESS PROGRAMS

Reauthorizes the HUD McKinney programs, with technical and programmatic changes.

Establishes a single permanent supportive housing for the homeless program which incorporates the Supportive Housing Demonstration Program, (including transitional housing and permanent housing for homeless persons with disabilities) and Supplemental Assistance for Facilities to Assist the Homeless (SAFAH).

Consolidates the three Shelter Plus Care programs.

Permits non-profit organizations to apply directly for section 8 SRO funding.

Enacts, with modifications, the Administration's Safe Havens for Homeless Individuals Demonstration program. Provides grants to establish facilities where seriously mentally ill persons can live for an indefinite period and receive, on a voluntary basis, mental health and other supportive services including substance abuse treatment.

Establishes a new HUD-administered Rural Homelessness Grant Program to provide emergency shelter, homelessness prevention assistance and assistance in obtaining permanent housing for in rural areas.

Reauthorizes and extends the Interagency Council on the Homeless and reauthorizes and modifies the FEMA Food and Shelter Program.

TITLE XV—ANNUNZIO-WYLIE ANTI-MONEY  
LAUNDERING ACT

*In General.* Strengthens the money laundering requirements as they apply to nonbank financial institutions, and authorizes regulatory sanctions against financial institutions convicted of money laundering and related offenses. Includes certain law enforcement provisions recommended by the Justice Department that would address some of the issues raised in the BCCI forfeiture action and generally forestalls situations where the government ends up turning money or property back to drug dealers or other criminals.

*Appointment of Conservator or Termination of Charters, Insurance and Offices.* Provides that the appropriate Federal banking agency may appoint a conservator or receiver for any insured financial institution convicted of money laundering upon notification by the Attorney General in writing of such conviction.

Provides for the revocation of the charters of federally-chartered institutions and the termination of insurance for state-chartered financial institutions convicted of money laundering and related offenses, after a hearing and due process. Also, provides for the removal of parties involved in currency reporting violations.

Allows state financial institution supervisory agencies access to currency transaction reports maintained by the Treasury Department.

*Nonbank Financial Institutions and General Provisions.* Requires the Treasury to prescribe regulations by January 1, 1994 which would require depository institutions to identify certain nonbank financial institution customers.

Prohibits the operation of illegal money transmitting businesses.

Provides the Treasury with the authority to require financial institutions and their management and employees to keep the existence of targeted currency orders confidential.

Requires the Treasury and the Federal Reserve to prescribe regulations requiring all financial institutions, including businesses that cash checks or issue money orders or travelers' checks, to maintain records of payment orders that involve wire transfer transactions and will have a high degree of usefulness in criminal, tax, or regulatory investigations or proceedings.

Authorizes the Treasury to require nonbank financial institutions and their directors, officers and others to report, without fear of liability, suspicious transactions relevant to possible violations of law or regulation.

Requires the Treasury and the Justice Department to establish a team of experts to assist and train foreign governments in developing their expertise in money laundering investigations and prosecutions.

*Money Laundering Improvements.* Generally provides new procedures that would enhance the ability of the Department of Justice to use the civil forfeiture statutes in money laundering cases. The forfeiture procedures under existing law may be satisfactory for customs cases, but they are not appropriate, and were not designed to be used, in complex financial cases involving bank records, electronic funds, and the complex transactions that often are central to money laundering activity.

Also addresses problems that have arisen with the use of existing money laundering laws, as well as removes obstacles in other statutes that unnecessarily limit the Justice

Department's ability to use the money laundering statutes.

*Reports and Miscellaneous.* Requires the Attorney General to conduct a study of the effects of reimbursing financial institutions and non-depository entities for providing financial records.

Clarifies that inter-agency sharing of information among the Federal bank regulatory agencies does not result in the loss of any applicable legal privileges, and requires U.S. agencies to share any information affecting the safety and soundness of the U.S. banking system with the proper Federal banking agencies.

Provides the Federal Reserve Board of Governors, in conjunction with the Department of Justice, the power to grant limited immunity to witnesses.

*Counterfeiting Deterrence.* Amends the counterfeiting statutes by increasing the sanctions that may be imposed against convicted counterfeiters, by providing the Secretary of the Treasury with the authority to designate "distinctive counterfeit deterrents" which may not be used by the general public, and by clarifying the scope of existing counterfeiting statutes to encompass electronic means of counterfeiting.

*Other Provisions.* Authorizes the Secretary of the Treasury to fine any financial institution for violation of currency reporting requirements.

Authorizes the Secretary of the Treasury to require financial institutions to request copies of currency transaction reports from their customers.

Extends whistleblower protection to employees of nondepository financial institutions.

Requires the Secretary of the Treasury to establish an Advisory Group on Reporting Requirements.

Requires the General Accounting Office to conduct a feasibility study of the Financial Crimes Enforcement Network.

TITLE XVI—TECHNICAL CORRECTIONS OF  
BANKING LAWS

Makes technical corrections to the FDIC Improvement Act of 1991 and the Resolution Trust Corporation Refinancing, Restructuring, and Improvement Act of 1991.

CLARIFICATION OF CERTAIN ISSUES IN  
CONFERENCE REPORT

Mr. CRANSTON. Mr. President, I would like to clarify the intent behind a series of provisions contained in the conference report.

PRESERVATION/NOTICE

A provision in the "Preservation" title improves the access of tenants, public agencies and other interested persons to information provided to HUD by project owners involved in the preservation process. It permits access to all information submitted that is relevant to the preservation process, with a narrow exception. Only proprietary information is privileged. The privilege extends only to information which is equivalent to trade secrets, confidential financial information, such as partnership audits, personal financial information about partners in the ownership entity, or project tenants. I would like to clarify at this time that in the case of documents that include both proprietary and non-privileged information, it is the intent of the conferees that the documents be

released, with the proprietary information redacted.

PRESERVATION/LOAN TERM

The "Preservation" title also sets the terms for section 241(f) loans. The Senate committee report provides instructive background:

The Section 241(f) insurance program was the center of much discussion and debate during the legislative process. Congressional discussion always assumed that the Department's practice of underwriting 241(f) loans for 40-years—established under the emergency preservation solution enacted in 1987—would continue under the permanent preservation program. This expectation is evidenced by the conference report to the 1990 Act, which specifically used a 40-year loan term in explaining how the section 241(f) loan would work.

Despite Congressional protestations, HUD's regulations would restrict the term for section 241(f) loans to the lesser of 20 years or the remaining term of the first insured mortgage. The committee strongly believes that HUD's action is contrary to the general goals of the preservation program and the specific intent expressed in the statement of managers. Shortening the loan term will, *inter alia*, force more projects into the mandatory sales process and potentially lead to greater displacement of tenants in tight rental markets.

The conference report attempts to bring regulatory practice into conformity with congressional intent. With respect to loans provided pursuant to the Emergency Low-Income Housing Preservation Act of 1987 [ELIPHA], HUD is directed to provide equitable treatment to owners filing a notice of intent prior to October 15, 1991. The conferees are disturbed that owners were induced to file title II notice of intent and proceed with plans of action, based on HUD's practice of providing a 40-year loan, only to have HUD change the rules in April 1992. The foreshortening of the 241(f) loan term is jeopardizing pending sales of title II projects to nonprofits and public agencies, and undermining the legitimate expectations of owners who are willing to extend affordability restrictions in exchange for incentives. The clear intent of the conferees is to require 40-year section 241(f) loans for projects proceeding under ELIPHA.

With respect to acquisition loans provided pursuant to the Low-Income Housing Preservation and Resident Homeownership Act of 1990 [LIHPRHA], the conference report requires HUD to provide 40-year loans. This will minimize the threat of displacement discussed in the Senate report.

Finally, with respect to equity take-out loans provided pursuant to the Low-Income Housing Preservation and Resident Homeownership Act of 1990 [LIHPRHA], the conference report requires a loan term and amortization period of up to 40-years to support the loan amount authorized by section 241(f)(2)(B).

PRESERVATION/PROJECT OVERSIGHT COSTS

The "Preservation" title requires the HUD Secretary to provide an allowance

for a priority purchaser's project oversight costs with respect to acquisitions under the LIHPRHA Program. This expense would be recognized and built into the project preservation rents under a plan of action. The "Preservation" title also extends this incentive to nonprofit organizations that have purchased or will purchase properties under ELIPHA. Over the life of the program, nonprofits have closed on approximately 10 projects in diverse locations including Minnesota, Illinois, Massachusetts, California, Vermont, and Rhode Island. These pioneering successes prompted Congress to adopt a full-fledged sale program in the LIHPRHA Program. The conferees expect the Secretary to adjust project rents and increase the section 8 assistance provided to these purchasers—amending the approved plan of action, if necessary—in order to cover project oversight expenses, and to adopt this practice with respect to future nonprofit purchases under the transitional rule.

#### PRESERVATION/TECHNICAL ASSISTANCE FUNDING

The conferees are aware that after a year of delay, HUD has finally put out a \$15 million notice of funding availability to provide technical assistance grants to resident-based purchasers and community-based nonprofit purchasers of ELIPHA and LIHPRHA projects. The funding provided falls far short of the \$25 million provided in the fiscal year 1992 appropriations law. The "Preservation" title addresses the training requirement of the September 3d NOFA, which the conferees believe to be an unreasonable impediment given the delay, the Department's lack of readiness to provide training and the urgent need for funding by prospective purchasers. The preservation title also authorizes a permanent \$25 million resident capacity and technical assistance program. The conferees expect HUD to proceed expeditiously with the pending NOFA and receive and approve grant applications on the 30 day schedule provided, while moving forward with the implementation of the new technical assistance program. The Department may run the programs concurrently, or sequentially, but must take steps to assure that no funding gap occurs between the temporary technical assistance grant program and the permanent program authorized by this title.

#### MULTIFAMILY FINANCE DEMONSTRATION

Section 542(b) of the conference report establishes an FHA Risk Sharing Pilot Program. The intent of the program is to invigorate the Federal Government's effort to expand the supply of affordable housing. To this end the program is intended to encourage risk sharing arrangements between FHA and various housing entities. The provision is not intended to provide program participants with a mechanism for refinancing mortgages from their

own portfolios that have an implicit or explicit Federal guarantee. Refinancing such mortgages will not in all probability expand the supply of affordable housing.

#### TITLE IX ISSUES

Three provisions in title IX regulatory programs also need clarification.

Section 907 requires the Secretary of HUD to establish a new standard for hardboard siding in manufactured homes. In establishing this standard, the Secretary should take into account the effect of moisture in maintaining the durability of hardboard siding.

The flood restoration zone establishes a new zone "AR" under the flood insurance program for communities in which an existing structural flood control system that provided at least 100-year frequency flood protection, no longer does so. Communities that meet the eligibility criteria as of January 1, 1992, specifically Sacramento and Los Angeles, would be subject to specific construction requirements. The delineated elevation restrictions and the continued eligibility for c zone rates would apply only to developed areas in Sacramento and Los Angeles provided the decertified flood protection system can be restored in a period not to exceed 10 years from the date of enactment of this provision. For other communities that may become eligible for the AR zone and for less developed areas of Los Angeles and Sacramento, the Director of the Federal Emergency Management Agency shall establish floodplain management criteria for new construction and the substantial improvement of existing structures. The flood restoration zone is intended to address problems experienced by existing communities that temporarily are not afforded 100-year frequency flood protection. The flood restoration zone is not intended to allow the development of undeveloped areas including the Natomas basin area in Sacramento. In addition, only structural projects that are decertified by the Corp of Engineers could be considered eligible under the AR zone. Beach nourishment and other such projects would not be eligible.

Another provision in title IX provides for equitable treatment for recipients of utility allowances in federally assisted housing and other households eligible for energy assistance. This provision would clarify that recipients of utility allowances that are liable for payments—whether or not they are reimbursed—shall be treated equally with other households eligible for energy assistance programs. Recipients could not be denied benefits, for example, under the Low-Income Home Energy Assistance Program solely because they receive utility allowances. Nor could they be denied a deduction generally available to Low-Income-Home Energy Assistance Program recipients.

I understand the need for these supplementary programs was highlighted by a recently published report that low-income children ages 6 to 18 months had the lowest body weights, often reaching dangerous low levels, in the months following the coldest parts of the year: apparently high heating bills forced these families to choose between heating and eating, with severe consequences for their young children whichever the choice. This provision seeks to protect families from that choice.

#### ADDITIONAL CLARIFICATION

A provision in title IX creates a Special Assistant for Indian and Alaska Native Programs under the Assistant Secretary for Public and Indian Housing. This position is not a political appointment. Given the responsibilities of the position, however, it is intended to be an Executive Service position with the according pay scale.

Mr. President, in closing I want to again thank the leadership on both sides of the aisle for their help in clearing away barriers to the final disposition and passage of this important legislation. I thank all those who have contributed so much, Members of the Senate, people outside the Senate, the heads of a task force that did so much work in preparing the way on this, Jim Rouse and David Maxwell, and I want to thank the remarkable staff of the subcommittee, the Housing Subcommittee, that has done so much to make all this possible, that staff led by Bruce Katz who is seated beside me now on the Senate floor.

I urge all Senators to support this conference report.

Mr. RIEGLE. Mr. President, I would like to make some additional comments regarding certain provisions of the Housing and Community Development Act of 1992, the conference report to which the Senate is considering today.

With regard to the amendments extending certain consumer protections regarding real estate loan settlements, I want to clarify that the amendment made to the Real Estate Settlement Procedures Act of 1974 by section 908 of the legislation, which enumerates the services encompassed within the term origination, is not intended to prohibit lenders from contracting out all or a portion of their loan origination services, including processing and underwriting services. The conferees recognized that lenders must sometimes contract out processing and underwriting services to accommodate a surge of loan applications received in peak periods.

The section is also not intended to require a lender to disclose to a borrower that the lender is using a third party to perform such back office type loan origination services provided that these third parties are not involved in the referral or marketing of the lend-

er's services to the public. Similarly, payments by a lender to such a third party contractor are not subjected to disclosure by this amendment. It is within a lender's discretion to determine how to manage its origination services.

I also want to elaborate further on the new YouthBuild Program established in title I of the legislation. This program authorizes the Secretary to make planning and implementation grants to capable non-profit organizations to train and educate low income youth while they rehabilitate and construct affordable housing. This program, which has broad bipartisan support, builds on a model which has proven successful at the grass roots level. The New York Times recently called the YouthBuild Programs across the Nation "a wellspring of human reclamation."

The conference agreement provides a set-aside of 5 percent of funds appropriated for HOPE programs to fund this new program. It was the conferees' intention that HUD quickly implement this program. In selecting a technical assistance provider for the program, pursuant to the act, we expect that HUD will ensure that such an organization has experience and a demonstrated record of achievement in working with existing YouthBuild sites. Adequate technical assistance will be crucial to the successful replication of this successful experiment in bringing disadvantaged youth into the economic and social mainstream of our society.

Mr. LIEBERMAN. Mr. President, I rise today to express my support for the Housing and Community Development Act amendments. I am particularly pleased that the bill addresses the lead paint problem which plagues this country. Title X of the bill, the Residential Lead-Based Paint Hazard Reduction Act of 1992, tackles many of the issues that a number of us in the Senate and House have been working on for several years. I want to congratulate Senator CRANSTON for drafting title X and Senator REID and Congressmen WAXMAN and SWIFT for their work to ensure that portions of S. 391, which I was pleased to work on as a chief cosponsor with Senator REID, and H.R. 5730 were included in title X.

Lead poisoning is a silent enemy attacking millions of American Children. It can lower their IQ's, cause learning and reading disabilities, reduce their attention span, and contribute to behavior problems. While the Government has known of the dangers of lead for many years, it has moved much too slowly to test our children, and our homes, and even more slowly to begin the process of cleaning up homes and other buildings which are poisoning our children. Because lead poisoning is invisible we have been able to ignore this issue for much too long, but our children cannot ignore it. Lead poison-

ing is hurting them every day; today we take an important step towards easing their pain.

Title X of the housing amendments is very important both because it provides critical funds to the States to begin efforts to abate lead paint in private dwellings and because it requires the Federal Government to establish guidelines for the training of abatement workers. Lead exposure can actually be worsened by improper abatement which increases the amount of lead dust, it is therefore imperative that all abatement workers be properly trained and certified. The bill also takes important steps to reduce the incidence of childhood lead poisoning in housing owned, assisted or transferred by the Federal Government and to provide public education concerning the risks posed by lead-based paint.

The grant program will make funds available to States and local governments to provide grants for inspecting and abating private housing, monitoring abatement workers, temporarily relocating families in order to perform abatements, public education, and testing interior dust, soil, and children's blood leads following abatement work. This program will provide assistance to those States that have been grappling with how to help private homeowners and landlords with the high costs of abatement and will encourage those States which have not yet formulated a State plan of action to do so. The bill also requires the Federal Government to more carefully monitor federally owned and assisted housing and increase its efforts to abate these properties.

Title X also includes language very similar to S. 391 on the disclosure of known lead paint in the sale or lease of housing built before 1978 and on the provision of information on lead to all people purchasing or renting homes. Under this provision purchasers and renters must be provided with a lead hazard information pamphlet, and told of any known lead-based paint hazards. Purchasers must be given a 10-day period to conduct an inspection for lead-based paint. Every contract for purchase and sale must contain a lead warning statement and a statement signed by the purchaser that they have read the warning, received the pamphlet, and had an opportunity to inspect the home.

In addition, this bill, like S. 391, takes important steps towards ensuring that abatements are done properly. It requires the EPA to promulgate regulations to ensure that individuals performing abatements are properly trained, that training programs are accredited, and that contractors engaged in abatement are certified. EPA will also promulgate a model State program and provide grants to States to carry out State programs for training and certification. Like S. 391, title X

requires the EPA to issue regulations identifying what constitutes dangerous levels of lead in soil. The issue of lead contamination of soil and the risks it poses to children who may be exposed at home, in the park, or on a school playground have not been sufficiently addressed by Federal, State, or local governments. I hope that by providing guidance on what levels raise concerns, EPA will be taking a necessary first step toward addressing the risks of lead poisoning from contaminated soil.

S. 391 focused significant attention on providing standards for lead testing and abatement as well as continuing research on testing and abatement techniques and on the effects of sources of lead exposure. I am very pleased that a number of similar provisions were included in title X. The bill does require that EPA set standards for laboratory testing of lead in paint, soil, and dust and establish a program to certify labs as qualified to test for lead. The bill instructs HUD to conduct research on improved methods of testing for and abating lead paint hazards, and develop standards for lead detection methods and lead hazard reduction methods. The bill also initiates a study of the sources of lead exposure in children with elevated blood lead levels and a study of how to reduce hazardous occupational lead abatement exposures.

I am particularly pleased that title X included a provision also in S. 391 which establishes critical public education and outreach activities. These activities will be designed to increase public awareness of the severity and scope of childhood lead poisoning, the risks of potential exposure in schools and day care centers, the health implications of exposure for men and women of childbearing age, and other important information on abatement, prevention, and screening. The activities will be directed at the general public, health care professionals, homeowners, home renovators, and others.

Title X is a very important step forward, but there are more steps to be taken. I look forward to working with my colleagues next year to work on the provisions of S. 391 that we were not able to enact this year. I am concerned that we renew our efforts to reduce overall lead exposure by eliminating unnecessary lead in many consumer products and requiring labels on those products that continue to have lead in them. We must focus on the elimination of lead in solders used in plumbing systems and on the reduction of lead leaching from plumbing fittings and fixtures. We must also act to remove lead from the packaging materials which wrap our food and end up in our municipal waste stream. I would hope we could also mandate the recycling of all lead-acid batteries, assemble an inventory of lead-containing products, and devise a way to review

those new products which could pose an exposure risk.

Mr. RIEGLE. Mr. President, I rise in support of the conference report on the Housing and Community Development Act of 1992. This legislation includes important reforms in four different areas: housing, government sponsored enterprises, money laundering and counterfeit deterrence, as well as some banking provisions, each of which in some form have previously been adopted by the Senate. I will briefly discuss each of these areas.

#### HOUSING

The housing reauthorization, H.R. 5334, builds upon the base that was created in 1990 with passage of the National Affordable Housing Act. It refines many of the initiatives enacted in that legislation and continues the evolution toward a new Federal partnership in urban policy. The National Affordable Housing Act of 1990 gives communities more flexibility, greater ability to set local priorities, and empowers people to work together to solve some of the most difficult problems on our domestic home front. This bill provides \$24.3 billion in budget authority for fiscal 1993 and \$25.4 billion in fiscal 1994. It also reauthorizes a variety of existing housing and community development programs including the HOME investment partnership block grant, the community development block grant, public housing, housing for the elderly and disabled, homeless assistance, rural housing programs, and the administration's HOPE Program. This bill contains many new initiatives that I am proud of—including several that provide economic development tools that will empower communities and residents to rebuild and create new economic opportunities.

#### GSE'S

Enactment of the Federal Housing Enterprise Financial Safety and Soundness Act of 1992 will provide for the first time an adequate framework for the regulation of the two federally chartered secondary mortgage market government sponsored enterprises: the Federal National Mortgage Association [Fannie Mae] and the Federal Home Loan Mortgage Corporation [Freddie Mac].

Fannie Mae and Freddie Mac were created by Federal law and have been given a number of special advantages. Among their advantages, these GSE's are exempt from State and local income taxes; they each have a \$2.25 billion line of credit with the Treasury; their securities are exempt from SEC registration and are eligible for purchase by the Federal Reserve, Federal Reserve member banks, and nationally chartered thrifts; and their securities are eligible for use as collateral by depository institutions for public deposits of the Federal Government and most State and local governments. These benefits help reduce home mort-

gage interest rates, but the investment community also perceives that the liabilities of Fannie Mae and Freddie Mac, which amount to more than \$1 trillion, are implicitly guaranteed by the Federal Government.

Given their goals and the benefits provided by the Government, as well as their implicit guarantee and potential taxpayer liability, it is essential that an adequate system of regulation be set in place to ensure that these GSE's will be adequately capitalized and operating safely and that their participation in secondary mortgage markets serves to the maximum extent possible the housing needs of poorer families and those in central cities and other areas where access to mortgage credit has been deficient.

This bill accomplishes those goals. It creates a new office, within HUD, with authority to enforce a new set of meaningful capital requirements.

The bill also requires Fannie Mae and Freddie Mac to meet a new set of housing goals, which will ensure increases in the proportions of families served with below median incomes and of families in central cities. And it provides enhanced GSE responsibility for fair housing.

This legislation is the culmination of 3 years of studies, hearings, and discussions. It has the strongest support of the administration, low-income housing groups, and the GSE's. Secretary Brady, in a letter to the majority leader, describes it as balanced, responsible, and prudent and I ask unanimous consent that his letter be inserted in the RECORD as well as a letter of support from 10 national low-income housing organizations.

#### MONEY LAUNDERING

This conference report also includes provisions that combat the continued efforts of drug dealers and other criminals to use the banking system to launder their ill gotten gains. This critical legislation, which among other things addresses the conduct exposed in the BCCI scandal, represents the best of the money laundering provisions that separately have been previously passed by the Senate and the House. It will give the banking regulators additional enforcement tools and methods to use against financial institutions involved with money laundering. In addition, this legislation strengthens money laundering requirements as they apply to nonbank financial institutions as well as removes obstacles in present law which inadvertently impede prosecution of institutions and individuals involved in money laundering. This legislation also strengthens the counterfeit deterrence laws, including those that relate to electronic means of counterfeiting.

#### BANKING

This conference report also makes changes in seven areas of the banking laws—changes that have each in some

form previously passed the Senate—which I will briefly summarize.

First, regulators may grant savings associations case-by-case extensions of up to 2 years in the schedule for phasing direct real estate investments out of their capital. This provides flexibility to deal with the current weakness of real estate markets.

Second, the Federal Reserve Board may make exceptions to restrictions on depository institutions' loans to their officers, directors, and principal shareholders for loans that pose only minimal risk. The bill also codifies the Fed's longstanding rule that those restrictions do not create duplicative rules for a depository institution's transactions with its parent holding company.

Third, executive compensation standards required under last year's banking legislation will not set specific levels or ranges of compensation.

Fourth, the bill clarifies regulators' authority not to require an appraisal by a certified or licensed appraiser for loans below a dollar threshold set by the regulators.

Fifth, if a lender denies a residential mortgage loan application within 3 days after receiving it, the lender need not give the applicant a special information booklet on real estate settlement services.

Sixth, nonconsumer loans are exempted from a consumer-oriented limitation on adjustable rate mortgages.

And seventh, depository institutions receive 3 additional months to get ready to comply with truth-in-savings regulations, and can post interest rate signs on their own premises without including the detailed disclosures required of other advertising.

This completes a brief summary of the major provisions of the conference report on the Housing and Community Development Act of 1992. I urge its immediate enactment.

I would now like to describe in more detail certain aspects of this important piece of legislation.

#### HOUSING REAUTHORIZATION

Two years ago, the National Affordable Housing Act of 1990 [NAHA] was passed by Congress. This conference report builds upon the base that was created in 1990, refines many of NAHA's initiatives, and continues the evolution to a new Federal partnership in urban policy. These new initiatives give communities more flexibility, greater ability to set local priorities, and empowers people to work together to solve some of the most difficult problems on the domestic home front.

The need for Federal housing assistance is growing. It is estimated that one in every seven Americans lives in poverty. Meanwhile, the supply of inexpensive rental housing continues to decrease. In 1989, there were 4.1 million more poor households looking for affordable apartments than the number

of units available. Even in the area of home ownership, we are losing ground. During the 1980's, the Nation's home ownership rate dropped for the first time since the Great Depression.

In my home State of Michigan, the need for housing assistance is also growing more acute. Ninety percent of all needy renter households pay more than 30 percent of their incomes in rent. This rent burden places a tremendous strain on poor families. This strain has been made worse by the recession and State welfare cuts, which have caused the number of homeless people to rise significantly.

The violence that occurred in Los Angeles and several other major cities was another example of the growing crisis in America's cities and demonstrates why this legislation is so badly needed.

H.R. 5334 provides \$24.3 billion in budget authority for fiscal 1993 and \$25.4 billion in fiscal 1994. The bill reauthorizes a variety of existing housing and community development programs including the HOME investment partnership block grant, the community development block grant, public housing, housing for the elderly and disabled, homeless assistance, rural housing programs, and the administration's HOPE Program. In recent years, financing sources for multifamily housing have dried up—leaving a significant gap. The bill creates an FHA multifamily demonstration program to expand the supply of affordable rental housing—the most important source of affordable housing for low-income families.

Major public housing reforms are also incorporated into H.R. 5334 which gives HUD additional resources and powers to reform and, if necessary, take over troubled agencies. A second initiative will revitalize the most distressed public housing projects through comprehensive planning, major reconstruction, support services, and economic development.

Childhood lead poisoning, which has been identified as the most significant environmental hazard for children, has been addressed in the bill. This provision will expand the Federal Government's commitment to the assessment and reduction of lead paint hazards in private, public, and assisted housing. This initiative is critical to ensure our children's health and future well-being.

The Fair Housing Initiatives Program will be expanded and revised to take into account expanded coverage of housing and fair lending laws and to address increased evidence of discrimination.

One of the most difficult issues we have struggled with in developing this legislation has been the mixing of elderly and disabled persons in public and assisted housing.

Several key community development initiatives of which I am particularly

proud have been incorporated into H.R. 5334:

A \$43 million program to seed and expand community development banks and build a network of proactive institutions whose primary mission is to rebuild distressed communities;

A \$40 million YouthBuild Program which provides grants to community-based groups to educate and train disadvantaged high school dropouts through construction and rehabilitation of low income housing;

A refined CDBG program that gives communities flexibility in creating and retaining jobs and pursuing other economic development strategies;

A revamped employment initiative that directs jobs and other economic opportunities created through Federal housing and community development assistance to low-income people; and

A new initiative designed to build bridges between communities and institutions of higher education to solve urban problems.

Over the last ten months, the Senate Committee on Banking, Housing, and Urban Affairs has worked to craft legislation that is responsive to the needs of communities across the nation. We have also gone the extra mile to address the concerns of the administration. To that end, we have incorporated many of Secretary Kemp's initiatives and provided sufficient authorizations for his initiatives that were created in 1990.

With respect to the housing reauthorization provisions of this conference report, I would like to recognize the efforts of several of my colleagues who provided the leadership needed to move this bill through the legislative process. In particular, I would like to thank Housing Subcommittee Chairman ALAN CRANSTON, ranking minority member ALFONSE D'AMATO, and fellow conferees PAUL SARBANES and CHRISTOPHER BOND.

This bill is a solid piece of legislation which deserves the support of the Congress, as well as the administration.

#### GSE'S

The conference report, with respect to the Federal Housing Enterprises provides for a complete overhaul and substantial enhancement of the regulatory structure for the two housing-related government-sponsored enterprises [GSE's], Fannie Mae and Freddie Mac. As requested by the administration, it reduces the public's potential exposure to financial risk related to the \$1 trillion of GSE liabilities by establishing meaningful and enforceable capital standards. But unlike the administration's bill, it also expands and clarifies the GSE's mandate to serve the housing finance needs of families with low and moderate incomes and families living in central cities and other credit-starved areas.

Given the persistence of the Nation's affordable housing crisis and the perva-

sive evidence of continuing mortgage and rental discrimination, this legislation is timely and valuable. It will increase the availability and affordability of housing finance to those who need it most, while strengthening the safety and soundness of these critical entities and ensuring their right to a reasonable economic return.

#### CAPITAL

This legislation provides a state-of-the-art set of capital requirements and enforcement tools that should ensure that taxpayers never have to bail out either of these financial giants. It looks beyond current balance sheets to the survival ability of the GSE's during a prolonged period of high default rates and larger, adverse interest rate changes. In anticipation of this legislation, both GSE's have recently made substantial additions to capital, and more will be required.

#### ENFORCEABLE HOUSING GOALS

This legislation establishes three annual housing goals that will require the GSE's to increase the proportion of their mortgage purchases benefiting homebuyers and renters whose incomes and location have put them at a disadvantage in housing finance markets.

The first two goals codify and improve long-standing but mostly ignored HUD regulations. A 30-percent target for the proportion of the housing units (both single family and multifamily) financed by each GSE's mortgage purchases that benefit families with below median income will be phased in over the next 2 years. HUD regulations currently have a similar 30 percent goal, but uses a proxy for income that greatly overstates the true shares of mortgages benefiting this half of the population. After the transition period, HUD will have the discretion to adjust the goal after a consideration of data that measures the GSE's actual and potential ability to serve this group.

Another 30-percent target will be phased in for purchases of mortgages in central cities. After the first 2 years, HUD will expand the goal to cover rural areas and other underserved areas. While HUD regulations have included a similar goal since 1978, the Department does not even collect data to assess compliance. Recently released HMDA data indicate that it is not being met.

The third goal relates to various categories of families that fall below 80 percent of median income. The GSE's will spend \$3.5 billion over the next two years to help meet the needs of these families.

These goals cannot be satisfied solely by good intentions. For the first time, this legislation provides specific enforcement powers. A GSE that misses a goal that HUD judges to be feasible, after consideration of relevant market factors, must submit a plan acceptable to the regulator for meeting future goals. Failure to comply with a plan

can lead to fines and a cease and desist order.

#### OTHER HOUSING PROVISIONS

Data limitations restrict the ability of Congress and the public to assess their public purposes. This legislation provides for increased data collection and reporting to ensure that Congress receives an annual assessment and critical analysis of the performance of the housing GSEs.

The legislation also strengthens and clarifies the GSEs' responsibilities under fair housing laws.

#### REGULATORY STRUCTURE

HUD's regulation of GSEs has been greatly hampered by the distractions of other problems and difficulties in maintaining a strong oversight staff. This legislation creates a new, independent office within HUD. This office is given freedom to set its own pay scales, write its own budgets [funded totally by the GSEs], and testify without clearance. It will have exclusive authority to issue and enforce safety and soundness regulations. Housing regulations will continue to be administered by the HUD Secretary who will now have explicit enforcement authority, except that the requirements of section 1335 may be enforced by the Director under the supervision of the Secretary.

The conference report provides that the new office is subject to appropriations. This process must not be allowed to prevent the Director from obtaining adequate funds. It would be improper for a GSE to lobby for appropriations in amounts less than requested by the Director to try to influence the Director's safety and soundness standards or the outcome of an administration or enforcement proceeding.

#### MONEY LAUNDERING

The money laundering provisions of this conference report represent the best of the respective House and Senate money laundering bills which have been passed by each body several times during this Congress and the previous one. Just last week the need for this legislation was underscored once again when a worldwide money laundering scheme, operation Green Ice, was broken up and Senators KERRY and BROWN released their comprehensive report on the BCCI scandal. All of this suggests to me that this legislation is needed as much as ever.

Specifically, this legislation would strengthen the money laundering requirements as they apply to nonbank financial institutions but also would provide for limited safe harbor coverage from liability for nonbanks, and banks, when they disclose violations of law or regulations related to money laundering offenses. The legislation also would authorize regulatory sanctions against financial institutions convicted of money laundering, as well as implement certain law enforcement

provisions recommended by the Justice Department. Additionally, the legislation would strengthen the counterfeiting deterrence laws of the United States, including clarifying that those laws encompass electronic means of counterfeiting. A full section by section analysis of this legislation appears at the conclusion of this statement.

Passage of this legislation is extremely important to the curtailment of money laundering activities, both domestically and internationally. Furthermore, Secretary Brady has advised me that adoption of this legislation will give the United States greater international leverage at the multinational Financial Action Task Force meetings, where other countries will be encouraged to adopt parallel money laundering laws. For the RECORD, I include that letter at the conclusion of this statement.

In summary, this legislation enjoys broad based bipartisan support.

#### BANKING PROVISIONS

##### SENATE-PASSED BANKING PROVISIONS

This conference report also contains substantive changes to seven areas of the banking laws, along with a set of technical corrections to banking legislation passed in 1991. The substantive changes have, in some form, previously passed the Senate, mostly as amendments to the Federal Housing Enterprises Regulatory Reform Act, S. 2733.

##### MODIFYING SEPARATE CAPITALIZATION RULE FOR SAVINGS ASSOCIATIONS' SUBSIDIARIES

The bill authorizes regulators to grant savings associations limited extensions of the schedule for phasing direct real estate investments out of their capital. This authority closely resembles a provision in the Senate-passed Resolution Trust Corporation Funding Act of 1992, S. 2482.

Under the 1989 thrift reform law, if an FDIC-insured savings association engages through a subsidiary in activities not permissible for a national bank, the savings association generally cannot count its investments in and loans to the subsidiary as part of its own capital. Direct real estate investments and other nontraditional activities caused thrifts large losses, and Congress enacted this safeguard to help protect the deposit insurance fund and the taxpayer.

A transition rule permits the savings association to include in its capital until November 1, 1992, 75 percent of its investments in and loans to the subsidiary. That percentage will decline to 60 percent on November 1, 1992, 40 percent on July 1, 1993, and 0 percent on July 1, 1994.

Because of the nationwide decline in commercial real estate markets, the Director of the Office of Thrift Supervision has asked us to allow thrifts additional time to comply with the separate capitalization requirement.

The bill gives the Director case-by-case discretion to extend the phase-out

schedule by two years. The Director could allow a particular savings association to include in its capital, until July 1, 1994, up to 75 percent of its investments in and loans to a subsidiary. The maximum percentage would decline to 60 percent on July 1, 1994, 40 percent on July 1, 1995, and 0 percent on July 1, 1996. The FDIC would retain its existing authority to specify a lower percentage than that allowed by the Director.

To be eligible for such relief, a savings association must satisfy a four-part test.

First, the separate capitalization requirement must apply only because of the subsidiary's real estate investments or other real estate activities—and not because of junk-bond investments or other non-real estate activities.

Second, the savings association must be either adequately capitalized, or in compliance with an approved capital restoration plan meeting the requirements of section 38 of the Federal Deposit Insurance Act. Among other things, such a plan must specify the steps the savings association will take to become adequately capitalized, the levels of capital to be attained during each year in which the plan will be in effect, how the association will comply with the restrictions or requirements of section 38, and the types and levels of activities in which the association will engage. In addition, the plan must be based on realistic assumptions, and be likely to succeed in restoring the savings association's capital; not appreciably increase the risk to which the association is exposed; and be guaranteed by each company controlling the association. A savings association with a plan approved under the Home Owners' Loan Act need not necessarily submit a new plan, much less wait until section 38 becomes effective, to obtain relief under this provision: if the prior plan satisfies the requirements of section 38, it suffices for purposes of this requirement.

Third, the savings association must be an eligible savings association as defined in the Home Owners' Loan Act. This means that the association's management must be competent; the association must be in substantial compliance with all applicable statutes, regulations, orders, and supervisory agreements and directives; and its management must not have engaged in insider dealing, speculative practices, or any other activities that have jeopardized the institution's safety and soundness or contributed to impairing the institution's capital.

Fourth, the Director of the OTS must determine that granting the relief in question to the particular savings association would not be unsafe or unsound or otherwise increase the risk to the deposit insurance fund.

If the savings association is under a capital restoration plan, capital direc-

tive, or prompt corrective action order, the extension is effective only while the association remains in substantial compliance.

If the savings association became critically undercapitalized after obtaining an extension, the FDIC would administer the extension in place of the OTS.

In sum, the bill strikes a responsible balance between providing flexibility to deal with a weakened real estate markets and maintaining regulatory accountability and the taxpayer protections of the basic separate capitalization requirement.

#### INSIDER LENDING

Last year's banking reform legislation generally limits an FDIC-insured depository institution's aggregate loans to its executive officers, directors, and principal shareholders to 100 percent of the institution's capital. An institution with less than \$100 million in deposits—and that includes 74 percent of the nation's banks—can loan its insiders up to 200 percent of its capital.

This year the Senate passed a provision exempting from those limits loans fully secured by insured deposits or U.S. Government securities. Such an exemption makes sense because transactions thus secured pose only minimal risk to the depository institution.

During the conference on this bill, the House conferees sought broader changes in the insider lending restrictions than the Senate had adopted in S. 2733. The House proposal, captioned "Requirement for Collateralized Lending," would have weakened statutory safeguards on insider lending without necessarily requiring collateral. In addition, it would have categorically exempted from the 100- and 200-percent limits all loans that are exempt from the limit loans to one borrower by national banks. Although current regulations generally require readily marketable collateral for those loans, section 5200(d) of the Revised Statutes—which the House proposal would have incorporated by reference—lets the Comptroller of the Currency "establish limits or requirements other than those specified in this section for particular classes or categories of loans." Thus the Comptroller has discretion to dispense with those collateral requirements or create new exemptions. In other words, the Comptroller can do as he pleases.

Even insofar as collateral is required, the evidence now before the Congress does not substantiate the safety of the statutory exceptions to the loan to one borrower limit, especially in the context of large concentrations of loans to insiders. Perhaps they are all safe; perhaps not. The matter warrants rigorous analysis of banks' actual experience with insider loans of this sort. But the arguments made by opponents of last year's reforms come down to this: "We like to do it this way, we have always

done it this way, and we don't want to even think about doing it some other way." That is a weak basis for legislation.

Now let us assume, for purposes of discussion, that the existing loan-to-one-borrower exceptions do make sense as applied to individual loans. That does not necessarily mean we should incorporate them wholesale into the statutory limits on aggregate loans to insiders. An arm's length loan to a single borrower involving 25 or 35 percent of your capital raises very different issues than insider self-dealing amounting to 500 percent of your capital. No one has shown that compliance with existing exemptions—such as those for livestock or dealers in dairy cattle—removes the inherent problems of letting insiders use a federally insured institution as a piggy-bank for their own pursuits.

This bill takes a more limited approach. It authorizes the Federal Reserve Board to make exceptions to the statutory restrictions on insider lending for loans that pose only minimal risk. It also codifies the Fed's longstanding rule exempting from those restrictions a depository institution's transactions with its parent holding company.

The Fed could use this authority to make exceptions to the aggregate limit on loans to one borrower or to bolster the existing regulatory exception for credit card debt of up to \$5,000.

But the Fed need not make exceptions: the authority is discretionary. Anyone who says Congress expects the Fed to repromulgate all the old exemptions without thinking about them has not read the bill. That certainly is not my expectation. The Fed should undertake a zero-based review of existing exemptions before deciding whether to re-propose them. And before actually making any exceptions, the Fed should ensure that the loans in question really do pose only minimal risk of causing any loss to the institution—risk that is minuscule compared to that of other loans.

I ask that copies of letters from Chairman Greenspan, dated June 18 and September 30, 1992, be printed in the RECORD.

#### CLARIFICATION OF COMPENSATION STANDARDS

The FDIC Improvement Act of 1991 contained an amendment by Senator LEVIN requiring regulators to establish standards prohibiting FDIC-insured depository institutions from paying excessive compensation to their officers, directors, and employees. This bill contains a provision, authored by Senator GARN, clarifying that the Levin Amendment does not authorize regulators to set specific levels or ranges of compensation. But the clarification does not restrict regulators' other authority to set or limit compensation—for example, under the prompt corrective action provisions of the 1991 legis-

lation, through supervisory agreements or cease-and-desist orders, or as otherwise necessary to keep an institution safe and sound.

#### REAL ESTATE APPRAISAL AMENDMENT

The bill clarifies regulators' existing authority not to require an appraisal by a certified or licensed appraiser for loans below a dollar threshold set by the regulators.

#### REAL ESTATE SETTLEMENT COSTS

The bill specifies that if a lender denies a residential mortgage loan application within three days after receiving it, the lender need to give the applicant a special information booklet on real estate settlement services.

#### ADJUSTABLE RATE MORTGAGE CAPS

Existing law generally requires adjustable rate residential mortgage loans to contain an upper limit on the interest rate that may be charged. The bill makes clear that this requirement does not apply to nonconsumer loans, such as a commercial loan secured by a mortgage on the borrower's residence.

#### TRUTH IN SAVINGS

The bill delays the effective date of truth-in-savings regulations by three months. It also clarifies that signs on a depository institution's own premises indicating interest rates—such as rate boards—need not contain the detailed disclosures that the Truth in Savings Act requires of other advertising.

#### TECHNICAL CORRECTION

Finally, the bill makes technical corrections to FDIC Improvement Act of 1991 and the Resolution Trust Corporation Refinancing, Restructuring, and Improvement Act of 1991.

Mr. President, I ask unanimous consent to have printed in the RECORD material pertaining to this measure.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

#### ATTACHMENT: BANKING PROVISIONS

#### BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM,

Washington, DC, June 18, 1992.

HON. DONALD W. RIEGLE, JR.,  
Chairman, Committee on Banking, Housing,  
and Urban Affairs, U.S. Senate, Wash-  
ington, DC.

DEAR MR. CHAIRMAN: One of the provisions of the Federal Deposit Insurance Corporation Improvement Act of 1991 (the "FDICIA") amended section 22(h) of the Federal Reserve Act relating to lending to insiders by a member bank. In the course of implementing the new statute, the Board identified two areas that we believe need revision. First, the amended statute's coverage overlaps with that of section 23A of the Federal Reserve Act governing a member bank's transactions with its affiliates without, however, incorporating the exemptions provided for in that section. Second, its treatment of lending limits with respect to an individual incorporates exemptions provided for in the National Bank Act, while its provision regarding aggregate lending limits does not. As it appears that these discrepancies were unintended, the Board recommends that the statute be amended. I have attached draft language that would accomplish these recommendations.

### 1. Inconsistency with Section 23A

Section 22(h) of the Federal Reserve Act (12 U.S.C. §375b) restricts the amount and terms of extensions of credit from a bank to its executive officers, directors and principal shareholders (collectively, "insiders") and to any company or political campaign controlled by an insider ("related interests"). As amended by FDICIA, section 22(h) establishes a limit on the total amount a member bank may lend to its insiders and their related interests as a class. This aggregate lending limit by its terms applies to all extensions of credit by a bank to principal shareholders and their related interests, thereby covering extensions of credit to parent holding companies and the companies they control.

Section 23A of the Federal Reserve Act (12 U.S.C. §371c) also restricts extensions of credit between a member bank and its parent. Under section 23A, a member bank's transactions with any one affiliate are limited to 10 percent of the bank's capital and surplus; an aggregate 20 percent limit applies to transactions with all affiliates.<sup>1</sup> However, several types of transactions that present little or no risk to the bank are excluded from the quantitative limits of section 23A. These transactions include loans that are fully secured by the obligations of the United States or certain Federal agencies or by segregated, earmarked deposit accounts.

The FDICIA aggregate lending limit does not provide for any exemptions. Thus, section 22(h) imposes a quantitative limit on all extensions of credit from a bank to its parent companies regardless of whether such extensions of credit would be exempt from the quantitative limits of section 23A. The Board believes that section 23A adequately and comprehensively regulates inter-affiliate transactions. Moreover, there is no indication that Congress judged section 23A's longstanding safeguards against unsound affiliate transactions to be deficient. Indeed, section 22(h) was enacted originally in 1978 to regulate insider credit transactions that previously had not been regulated. FDICIA's coverage under section 22(h)'s aggregate lending limit of transactions already within the scope of the restrictions of section 23A seems to have been inadvertent.

Therefore, the Board recommends that the definition of "principal shareholder" in section 22(h) as amended by FDICIA be amended to exclude a company of which a member bank is a subsidiary. This revision would leave the coverage of affiliate transactions solely within the scope of sections 23A and 23B of the Federal Reserve Act without otherwise affecting the applicability of section 22(h) to other insider transactions.

### 2. Inconsistent treatment of low risk loans

Section 22(h), as amended by FDICIA, provides that a member bank may extend credit to an individual insider only if, when aggregated, all such loans to the individual fall within the single borrower limit of the National Bank Act (12 U.S.C. §84). The National Bank Act exempts from the computation of the lending limits certain transactions that pose little or no risk to the lending institu-

tion, such as loans secured by obligations of the United States. While the lending limit of section 22(h) applicable to individuals incorporates these exemptions by reference, the aggregate limit of section 22(h) does not. The anomalous result is that banks are required to include some loans for purposes of calculating aggregate lending limits that would not be included in arriving at lending limits to individuals.

The Board believes that section 22(h) should be amended so that loans posing little or no risk to the lending institution are given the same treatment under the aggregate lending limit as under the individual lending limit. This result could be attained by providing the Board explicit authority to exclude from the definition of "extension of credit" transactions that are consistent with prudent, safe and sound banking practices. On the basis of such authority, the Board could revise Regulation O to exclude from the aggregate lending limit certain transactions that present little or no risk to the bank, including transactions that are exempt under the National Bank Act or section 23A.

The Board is of the view that the amendments proposed above will ensure consistent treatment of insider lending transactions without compromising in any way the goals of safety and soundness shared by sections 22(h), section 23A and the lending limit provisions of the National Bank Act. Members of the Board's staff are prepared to assist the Committee in any way they can in its consideration of this proposal.

Sincerely,

ALAN GREENSPAN.

#### PROPOSED AMENDMENTS TO SECTION 22(H) OF THE FEDERAL RESERVE ACT

Section 22(h) of the Federal Reserve Act (12 U.S.C. §375b) is amended—

(1) in subsection (9)(D) by adding after the period a new sentence to read as follows: "The Board of Governors of the Federal Reserve System may prescribe by regulation exceptions from the term 'extension of credit' in the case of transactions that are consistent with safe and sound banking practices."

(2) in subsection (9)(F) by adding after the period a new sentence to read as follows: "The term 'principal shareholder' shall not include a company of which a member bank is a subsidiary."

BOARD OF GOVERNORS OF THE  
FEDERAL RESERVE SYSTEM,  
Washington, DC, September 30, 1992.

Hon. CHALMERS P. WYLIE,  
House of Representatives, Washington, DC.

DEAR CONGRESSMAN: I am writing in response to your request for my comments on the attached amendments to the lending limitations of section 22(h) of the Federal Reserve Act. Earlier this year, the Board recommended that Congress adopt changes to section 22(h) that would provide additional flexibility and eliminate unnecessary regulation without compromising in any way the goals of safety and soundness that underlie the lending limit statutes. We continue to support changes to section 22(h) that would add flexibility and remove unnecessary regulation.

In particular, Board supports the repeal of the statutory definition of extension of credit, as proposed in the legislation that you have asked me to comment on. This change would restore to the Board the authority removed by the Federal Deposit Insurance Corporation Improvement Act of 1991 to act by

regulation to exclude from the limits transactions that do not pose any risk to safety and soundness.

The Board has also requested general authority to adopt exceptions to the lending limits in section 22(h), such as the Board has under other statutes. In the absence of that authority, the Board would support statutory exclusions from the aggregate lending limit that do not impact safety and soundness, such as the exclusion proposed in the attached legislation for transactions that are exempt from the national bank lending limit and that are already exempt from the individual lending limit in section 22(h) itself.

In addition, the Board continues to support the adoption, proposed in the attached legislation, of a provision excluding loans to holding companies and their affiliates from the limits of section 22(h). These loans are already adequately governed by the lending limitations of section 23A and 23B of the Federal Reserve Act.

I am enclosing a copy of my letter of June 18, 1992, that more fully discusses the Board's views of these matters.

Sincerely,

ALAN GREENSPAN.

#### SEC. 13. REQUIREMENT FOR COLLATERALIZED LENDING.

(a) IN GENERAL.—Section 22(h)(5) of the Federal Reserve Act (12 U.S.C. 375b(h)(5)) is amended by adding at the end the following new subparagraph:

"(D) COLLATERALIZED LENDING REQUIREMENT.—Any extension of credit by a member bank which, if section 5200 of the Revised Statutes were applicable to such bank, would qualify for an exception to the limitations of subsection (a) of such section because such extension of credit meets the collateral or other requirements of subsection (c) of such section, shall not be included, in or aggregated with, the total amount of all outstanding extensions of credit taken into account for purposes of subparagraph (A) of this section."

(b) PRINCIPAL SHAREHOLDER DEFINED.—Section 22(h)(9)(F) of the Federal Reserve Act (12 U.S.C. 375b(h)(9)(F)) is amended—

(1) by striking "shareholder" means any person" and inserting "shareholder"—

"(i) means any person"; and

(2) by striking the period at the end of clause (i) (as so redesignated by paragraph (1) of this subsection) and inserting "; and"; and

(3) by adding at the end the following new clause:

"(ii) does not include a company of which a member bank is a subsidiary."

(c) AMENDMENTS TO DEFINITIONS.—Section 22(h)(9) of the Federal Reserve Act (12 U.S.C. 375b(9)) is amended—

(1) by striking subparagraph (D);

(2) by redesignating subparagraphs (E) and (F) as subparagraphs (D) and (E), respectively; and

(3) by moving the left margin of subparagraph (D) (as so redesignated) 2 ems to the right.

ATTACHMENTS: GSEs

THE SECRETARY OF THE TREASURY,  
Washington, DC, October 1, 1992.

Hon. George J. Mitchell,  
Majority Leader, U.S. Senate, Washington, DC.

DEAR MR. LEADER: The Administration strongly supports legislation that would protect the taxpayer from risks posed by Government-sponsored enterprises (GSEs) engaged in housing finance. After three years of painstaking studies, debate, and negotia-

<sup>1</sup>Section 23A also applies qualitative restrictions to all covered transactions, whether or not a transaction is exempt from the quantitative restrictions. For example, the transactions must be on terms and conditions that are consistent with safe and sound banking practices, and the member bank may not purchase low-quality assets from its affiliates. Section 23B of the Federal Reserve Act, which requires that transactions between banks and their affiliates be on fair market terms, also applies to these transactions.

tion, similar versions of this legislation have passed overwhelmingly in both the House and the Senate, and now an even stronger version has been agreed to by the bipartisan leadership of the Senate and House Banking Committees. We understand that this final agreement will be considered by the Senate before adjournment. For the reasons set forth below, I strongly urge your support.

We recognize the important benefits the housing GSEs provide to housing finance. But with over \$1 trillion in securities issued or guaranteed by these same GSEs, they also pose tremendous risk to the taxpayer. The many federal benefits the GSEs receive—a line of credit from the Treasury, tax exemptions, and securities law exemptions, to name a few—are the very characteristics that convince the marketplace that the federal government will pick up the tab for a GSE failure.

As you know, the federal government is not legally obligated to cover GSE losses, and this Administration would oppose any such taxpayer bailout. Nevertheless, the risk of such a bailout is far more than idle speculation. Congress provided up to \$4 billion in federal guarantees to assist the Farm Credit System, the farming GSE that experienced severe losses during the early 1980s. Similarly, while the housing GSEs appear to be healthy now, one of them experienced extreme financial difficulties only ten years ago because of the same interest rate mismatch that bankrupted so many savings and loans. Unless Congress acts now to establish strong capital standards and meaningful safety and soundness oversight, the taxpayer remains far too exposed to a recurrence of exactly these kinds of problems.

The legislation you will take up addresses these risks. For example, it establishes strong capital requirements to absorb future losses. Indeed, the required levels of minimum, critical, and transition capital are higher than in either of the bills passed earlier by the House and Senate. At the same time, the risk-based capital provision preserves the strong standards in the Senate-passed bill: the GSEs must hold enough capital to survive long periods of extreme financial difficulty; the capital must be held for credit risk, interest rate risk, and management and operations risk; and the definition of the elements of capital is appropriately narrow.

Similarly, the legislation establishes a strong, arms-length regulator within the Department of Housing and Urban Development whose responsibility is to ensure that the housing GSEs are adequately capitalized and operated safely. At the same time, the Secretary of HUD will remain exclusive authority over the housing responsibilities of the GSEs, which are expanded in the bill. This authority specifically includes the discretion to disapprove any proposed new program that is not in the public interest.

In short, this legislation is balanced, responsible, and prudent. It establishes a sound framework for safety and soundness oversight, yet prevents the federal government from micro-managing GSE business. It establishes meaningful goals for affordable housing for low- and moderate-income families. And it would greatly enhance the stability, affordability, and availability of housing finance well into the 21st century.

Once more, I strongly urge your support. The American taxpayers and consumers deserve no less.

Sincerely,

NICHOLAS F. BRADY.

NATIONAL COUNCIL OF  
STATE HOUSING AGENCIES,

April 7, 1992.

Hon. DONALD W. RIEGLE, JR.,  
Chairman, Committee on Banking, Housing,  
and Urban Affairs,  
Dirksen Senate Office Building, Washington,  
DC.

DEAR CHAIRMAN RIEGLE: The undersigned state, local, and nonprofit organizations strongly endorse the overall provisions of Title V of the Federal Housing Enterprises Regulatory Reform Act of 1992. Title V establishes a comprehensive framework of goal setting, data collection, reporting, monitoring and enforcement which will compel Fannie Mae and Freddie Mac to significantly expand their commitment to affordable housing. We urge you to aggressively oppose any amendments to make optional or otherwise weaken these landmark housing provisions.

Legislation to ensure the safety and soundness of Fannie Mae and Freddie Mac must not ignore their Congressionally-mandated public purpose. Congress has entrusted Fannie Mae and Freddie Mac with the responsibility to assure low and moderate income families and other underserved sectors of the mortgage market broad access to housing credit. At a time of severe affordability problems for the very families Fannie Mae and Freddie Mac are intended to serve, these corporations must be directed to do far more than they are currently doing to increase low and moderate income housing opportunities.

The rigorous housing goals established under Title V challenge Fannie Mae and Freddie Mac to expand, diversify, and mainstream their affordable housing lending programs. Specifically, the legislation requires that in the first two years:

At least 30 percent of the corporations' mortgage purchases be secured by housing located in central cities annually;

At least 30 percent of the corporations' mortgage purchases be secured by housing serving families of low and moderate income annually; and

Not less than \$3.5 billion be invested by the corporations in the purchase of mortgages securing single and multifamily housing serving families with incomes which do not exceed 80 percent of the area median income. More than half of these mortgages must be secured by housing for families with incomes of 60 percent of the area median or less.

In subsequent years, the goals would be established by the Director of the Office of Federal Housing Enterprise Oversight at HUD, and the central city goal would be expanded to include rural and other underserved areas.

Fannie Mae and Freddie Mac play a unique and vital role in the financing of our nation's housing. It is imperative that the public benefits conferred with these corporations' congressionally granted charters are made available for all income groups without regard to race or location of the residence. We believe this legislation takes reasonable and timely steps to assure that equal credit opportunities are available to all those who seek affordable ownership and rental housing.

We appreciate the opportunity to work with you in developing this crucial housing legislation. We look to you to reaffirm Fannie Mae and Freddie Mac's public mission through its adoption. Thank you for your consideration.

Sincerely,

Association of Community Organizations  
for Reform Now (ACORN), The Enter-

prise Foundation, Local Enterprise Foundation, Local Initiatives Support Corporation, National Council of La Raza, National Council of State Housing agencies, National Housing Conference, National League of Cities, National low Income Housing Coalition, National Neighborhood Coalition, United States Conference of Mayors.

ATTACHMENTS: MONEY LAUNDERING

THE SECRETARY OF THE TREASURY,

Washington, DC, February 11, 1992.

Hon. DONALD W. RIEGLE, JR.,  
Chairman, Committee on Banking, Housing and  
Urban Affairs,  
U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: The Department of the Treasury urges enactment of legislation which was pending at the end of the first session of the 102d Congress that contains many provisions essential to the fight against money laundering. The House-passed version of this legislation was H.R. 26 and the Senate version was contained in Title IX of S. 543, a title deleted prior to enactment. Similar legislation was passed in the House and reported by the Senate Banking Committee during the second session of the 101st Congress, but not enacted.

While these bills contain many provisions useful to Treasury's anti-money laundering program, a few areas are of particular concern to us:

First, of the utmost importance are amendments that will allow us to fulfill our international commitment to implement the recommendations of the Financial Action Task Force on money laundering. These amendments were set forth in section 927 of S. 543. Almost two years ago, the United States endorsed the recommendations of this 27-nation multinational group for effective domestic and international anti-money laundering measures. It is becoming increasingly important to our participation that we obtain enactment of provisions that would refine the anti-money laundering laws of the United States to meet the FATF requirements.

Also in furtherance of the FATF recommendations, the Administration has been seeking inclusion of a provision to protect non-bank financial institutions which report suspicious transactions from civil liability to their customers similar to the protection available to banks.

Treasury also has been seeking an amendment to the Right to Financial Privacy Act to enable transfer of financial records from other federal agencies to Treasury enforcement agencies, including the Financial Crimes Enforcement Network (FinCEN), for analysis and use in targeting money laundering and other financial crimes. Towards the end of last session an agreement in principle was reached with Senate Banking Committee staff to include such an amendment in the money laundering legislation.

I hope that you will take immediate action in this session of Congress so that we can be fully armed in our war against money laundering and can meet our obligations to our partners in the Financial Action Task Force. It is important that we demonstrate our commitment if we are to encourage progress in the international community.

Sincerely,

NICHOLAS F. BRADY.

TITLE XV, ANNUNZIO-WYLIE ANTI-MONEY LAUNDERING ACT, SECTION-BY-SECTION ANALYSIS  
Section 1500—Short Title and Table of  
Contents

The bill may be cited as the Financial Institutions Enforcement Improvements Act.

**SUBTITLE A—TERMINATION OF CHARTERS, INSURANCE AND OFFICES**

**Section 1501—Appointment of Conservator**

Effective December 20, 1992, the appropriate Federal banking agency may appoint a conservator for any insured depository institution convicted of money laundering upon notification by the Attorney General in writing of such conviction.

**Section 1502—Charter Revocation**

This section requires that the appropriate Federal regulator hold a hearing to decide whether to revoke the charter of a Federally chartered bank, branch, agency, savings association, or credit union after the conviction of such institution for money laundering under 18 U.S.C. 1956 or 1957. The appropriate agency may hold such a hearing in the case of a conviction under 31 U.S.C. 5322. In determining whether to revoke a charter, the regulator must consider the following factors: (1) the extent to which directors or senior executive officers were involved, (2) whether the institution had policies and procedures designed to prevent money laundering, (3) the degree to which the institution cooperated with law enforcement officials, (4) whether the institution has implemented new procedures to prevent the recurrence of the offense, and (5) the effect of the forfeiture of the franchise on the local community's interest in adequate credit and depository services. This section does not apply to a successor to the interests of the institution or to an acquirer of the institution if the acquisition was made in good faith and not to evade this section.

**Section 1503—Termination of Deposit Insurance**

This section provides that after notification by the Attorney General of the conviction of a Federally-insured State chartered bank, savings association, credit union, or uninsured branch or agency of a foreign bank for money laundering under 18 U.S.C. 1956 or 1957, the FDIC or National Credit Union Administration Board (NCUA), as appropriate, shall hold a hearing to decide whether to terminate the institution's deposit insurance. The FDIC or NCUA may hold such a hearing in the case of a Federally-insured, state chartered institution convicted of an offense under 31 U.S.C. 5322. The FDIC or NCUA shall consider the following factors: (1) the extent to which directors or senior executive officers were involved, (2) whether the institution had policies and procedures designed to prevent money laundering, (3) the degree to which the institution cooperated with law enforcement officials, (4) whether the institution has implemented new procedures to prevent the recurrence of the offense, and (5) the effect of the termination of insurance on the local community's interest in adequate credit and depository services. The FDIC or NCUA must notify the appropriate State regulator ten days before deposit insurance is revoked and publish notice of the termination of insurance in the *Federal Register*. This section does not apply to a successor to the interests of the institution or to an acquirer of the institution if the acquisition was made in good faith and not to evade this section.

**Section 1504—Removal of Money Launderers Involved in Currency Reporting Violations**

This section bars any person affiliated with a financial institution who is convicted for money laundering or structuring transactions to evade reporting requirements from future employment or affiliation with financial institutions. The appropriate Fed-

eral banking agencies are also empowered to bar officers and directors who had knowledge of money laundering and to suspend affiliated persons charged with money laundering.

**Section 1505—Unauthorized Participation**

This section prohibits the participation of a person convicted of a money laundering offense in the affairs of a depository institution.

**Section 1506—State Regulator Access to Currency Transactions Reports**

This section provides State financial institution regulators with access to currency transaction reports maintained by the Secretary of the Treasury.

**Section 1507—Money Laundering by Foreign Agencies and Branches**

This section provides that upon the conviction of a foreign bank operating in the U.S. or the branch, agency or lending subsidiary of a foreign bank, the Federal Reserve must commence proceedings to terminate the activities of the branch, agency or subsidiary.

**SUBTITLE B—NONBANK FINANCIAL INSTITUTIONS AND GENERAL PROVISIONS**

**Section 1511—Identification of Financial Institutions**

This section requires the Secretary of the Treasury to prescribe regulations by January 1, 1994 requiring depository institutions to identify and report to the Secretary of the Treasury the names of all financial institution customers (other than depository institutions) who must file currency transaction reports on their own behalf, such as auto and boat dealers, jewelry stores and others. Willful violators of this section may be subject to a civil money penalty of up to \$10,000 per day for each unfiled or incomplete report.

**Section 1512—Prohibition of Illegal Money Transmitting Businesses**

This section makes it a criminal violation of Federal law to conduct, control, manage, supervise, direct or own a money transmitting business that is illegal under State law. The proceeds of such businesses are liable to seizure by and forfeiture to the United States.

**Section 1513—Compliance Procedures**

This section gives the Secretary of the Treasury authority to proscribe compliance procedure regulations for financial institutions to guard against money laundering.

**Section 1514—Nondisclosure of Orders**

This section requires financial institutions to keep the existence of targeted currency reporting orders confidential.

**Section 1515—Wire Transfer Recordkeeping**

This section requires the Secretary of the Treasury and the Federal Reserve Board to jointly adopt regulations by January 1, 1994 requiring insured depository institutions and money transmitting businesses to maintain records of international transactions involving wire transfers or transfers on the books of the institution or money transmitting business that have a high degree of usefulness in criminal, tax, or regulatory investigations or proceedings. The Secretary of the Treasury and the Federal Reserve Board may also prescribe such regulations for domestic fund transfers.

**Section 1516—Treasury Access to Records of Other Agencies**

This section permits agencies to provide financial records to the Secretary of the Treasury to investigate money laundering and other financial crimes without violating the Right to Financial Privacy Act.

**Section 1517—Suspicious Transactions and Financial Institution Anti-Money Laundering**

This section permits the Secretary of the Treasury to require financial institutions and directors, officers, employees and agents of financial institutions to report suspicious transactions relevant to possible violations of law or regulation to the Secretary. Such persons are prohibited from notifying the subject of the report of the filing of such information. This section also provides a civil safe harbor for such disclosures. In addition, this section gives the Secretary of the Treasury the authority to require financial institutions to carry out anti-money laundering programs.

**Section 1518—Anti-Money Laundering Training Team**

This section requires the Secretary of the Treasury and the Attorney General to jointly establish an anti-money laundering training team to assist and provide training to foreign governments in developing and expanding their capabilities for money laundering investigation and prosecution.

**Section 1519—International Money Laundering Reports**

This section requires the President to report annually to Congress on major money laundering countries. The report must identify such countries and include information as to the status of their ratification and implementation of bi-lateral and multi-lateral agreements relating to international narcotic trafficking, adoption of laws and regulations to prevent narcotic-related money laundering, and instances of refusals to cooperate with foreign governments, among other things. This report must also specify the strategies pursued by relevant U.S. agencies to ensure the cooperation of foreign governments as to narcotic-related money laundering and demonstrate that all U.S. agencies are pursuing a common strategy with respect to achieving international cooperation against money laundering and with respect to major money laundering countries.

**SUBTITLE C—MONEY LAUNDERING IMPROVEMENTS**

**Section 1521—Jurisdiction in Civil Forfeiture Cases**

This section provides Federal district courts with jurisdiction over civil forfeiture cases. In addition, this section grants such courts authority to issue warrants nationwide in order to bring property before the court for trial. It is anticipated that in implementing this provision, the Justice Department should take measures so that all potentially affected parties may have knowledge of its intended actions, such as filing a *lis pendens* in the public records of the jurisdiction where property is being seized at the commencement of the forfeiture action.

**Section 1522—Civil Forfeiture of Fungible Property**

This section authorizes and provides procedures for the civil forfeiture of fungible property (including cash, monetary instruments, and deposits) in connection with any money laundering offense under 18 U.S.C. 1956, 1957 or 1960 or 31 U.S.C. 5322. Such forfeiture involving property not traceable directly to the offense must commence within one year of the date of the offense.

**Section 1523—Procedure for Subpoenaing Bank Records**

This section authorizes the use of subpoenas and establishes procedures to obtain bank records after the commencement of a civil

forfeiture in rem proceeding relating to a money laundering offense under 18 U.S.C. 1956, 1957 or 1960 or 31 U.S.C. 5322, or a violation of the Controlled Substances Act.

#### Section 1524—Technical Correction

This section removes an erroneous reference in the prohibition against money laundering in 18 U.S.C. 1956 and makes other technical corrections.

#### Section 1525—Structuring CMIR

Transactions to Evade CMIR Requirements  
This section makes it a crime to structure international monetary instrument transactions that avoid the currency import or export reporting requirements of 31 U.S.C. 5316 and provides for the forfeiture of any property involved in such a transaction.

#### Section 1526—Clarification of Definition of Financial Institution

This section clarifies the definition of "financial institution" in sections 1956(c)(6) and 1957(f)(1) of title 18, U.S. Code.

#### Section 1527—Definition of Financial Transactions

This section clarifies the definition of "financial transaction" in sections 1956(c)(6) and 1957(f)(1) of title 18, U.S. Code.

#### Section 1528—Obstructing a Money Laundering Investigation

This section makes the obstruction of money laundering investigations a Federal crime.

#### Section 1529—Awards in Money Laundering Cases

This section provides for the payment of awards by the Attorney General (from the Department of Justice Assets Forfeiture Fund) for information or assistance directly relating to violations of money laundering under 18 U.S.C. 1956 and 1957, 31 U.S.C. 5313 and 5324, and section 6050I of the Internal Revenue Code of 1986.

#### Section 1530—Penalties for Money Laundering Conspiracies

This section increases the penalty for the offense of conspiracy to commit money laundering under 19 U.S.C. 1956 or 1957 to the penalty for the substantive money laundering offense.

#### Section 1531—Technical and Confirming Amendments to Money Laundering Provision

This section makes various technical and conforming amendments to the definition of money laundering found in Section 1956(a)(2), (a)(3), and (b) of title 18, U.S. Code.

#### Section 1532—Preclusion of Notice

This section amends the Right to Financial Privacy Act to preclude notice to possible suspects of the existence of a grant jury subpoena for bank records in investigations relating to violations of the Controlled Substance Act, the Controlled Substances Import and Export Act, section 6050I of the Internal Revenue Code of 1986, 18 U.S.C. 1956 or 1957, or 31 U.S.C. 5313, 5316, and 5324.

#### Section 1533—Elimination of Restrictions on Disposal of Forfeited Property

This section eliminates restrictions on the disposal of administratively forfeited property held by the Secretary of the Treasury and the Postal Service.

#### Section 1534—New Money Laundering Predicate Offenses

This section adds violations of the Food Stamp Act of 1977 involving fraud and the Foreign Corrupt Practices Act as new money laundering predicate offenses under 18 U.S.C. 1956.

#### Section 1535—Amendments to Bank Secrecy Act

This section makes various technical amendments to the Bank Secrecy Act.

#### Section 1536—Expansion of Money Laundering to Cover Certain Foreign Crimes

This section expands money laundering offenses under 18 U.S.C. 1956(c)(7)(B) to include an offense against a foreign nation involving kidnaping, robbery, extortion, or fraud by or against a foreign bank.

#### SUBTITLE D—REPORTS AND MISCELLANEOUS

##### Section 1541—Study and Report on Reimbursing Financial Institutions

This section requires the Attorney General, in consultation with appropriate bank regulatory agencies, to study and report to Congress as to amending the Right to Financial Privacy Act to allow the reimbursing of financial institutions and non-depository licensed transmitters for the assembly and provision of certain financial records.

##### Section 1542—Reports of Information Regarding Safety and Soundness of Depository Institutions

This section requires the head of all U.S. agencies and instrumentalities, including the Secretary of the Treasury and the Attorney General, (unless prohibited by law) to provide the appropriate banking agencies with any information that such agency head believes raises significant concerns over the safety and soundness of any depository institution doing business in the U.S., and requires such banking agencies to establish procedures for the receipt of such information. This section provides specific procedures for intelligence information, information relating to a pending civil investigation or litigation or a pending criminal investigation or prosecution, information that may result in serious bodily injury or death, or information that may disclose sensitive investigative techniques. In addition, this section exempts information related to a grand jury investigation.

##### Section 1543—Immunity

This section amends 18 U.S.C. 6001(1) relating to the criminal immunity of witnesses to include proceedings involving the Federal Reserve Board.

##### Section 1544—Interagency Information Sharing

This section allows Federal banking agencies, the RTC, the Farm Credit Administration, the Farm Credit System Insurance Corporation, and the National Credit Union Administration to share information with each other and other Federal agencies without waiving any work-product, attorney-client, or other privilege.

#### SUBTITLE E—COUNTERFEIT DETERRENCE

##### Section 1551—Short Title

This title may be cited as the Counterfeit Deterrence Act of 1992.

##### Section 1552—Increase in Penalties

This section increases the penalty for the use of plates or stones or any other thing in the counterfeiting of U.S. obligations or securities to that of a class C felony. This section also updates the definition of "plate", "stone", or "thing" to include electronic methods of reproduction, acquisition, recording, retrieval or transmission. In addition, this section requires the Secretary of the Treasury to ensure that the legitimate use of such electronic methods and retention of such reproductions are not unduly restricted.

##### Section 1553—Deterrents to Counterfeiting

This section makes the unauthorized possession or control of paper similar to that adopted by the Secretary of the Treasury to print obligations and other U.S. securities or the possession or control of any counterfeit deterrent feature or device identical to that adopted by the Secretary to make such obligation or security a class C felony.

##### Section 1554—Reproductions of Currency

This section prohibits the unauthorized reproduction through electronic methods of illustrations of obligations or other U.S. securities and requires the Secretary of the Treasury to establish a system to ensure that legitimate reproductions by businesses, hobbyists, press and others will not be unduly restricted. This section also permits color illustrations of currency under regulations adopted by the Secretary.

#### SUBTITLE F—MISCELLANEOUS PROVISIONS

##### Section 1561—Civil Money Penalties for Negligence

This section authorizes the Secretary of the Treasury to impose on any financial institution a civil money penalty up to \$500 for a negligent violation of currency reporting requirements and \$50,000 for a pattern of such violations.

##### Section 1562—Requiring Copies of CTR's to be Filed with Financial Institutions

This section authorizes the Secretary of the Treasury to require depository institutions to request copies of currency transaction reports from their non-depository financial institution customers, and to report to the Secretary when no copies are provided.

##### Section 1563—Money Laundering Whistleblower Protection

This section provides whistleblower protection to employees of non-depository financial institutions who report money laundering to regulators or law enforcement officials.

##### Section 1564—Establishment of Advisory Group on Reporting Requirements

This section requires the Secretary of the Treasury to establish a Bank Secrecy Act Advisory Group to advise the Secretary on how to modify reporting requirements to enhance law enforcement and to inform the private sector on the uses of reported information.

##### Section 1565—GAO Study of FINCEN

This section requires the General Accounting Office to conduct a feasibility study of the Financial Crimes Enforcement Network (FINCEN) and to report to Congress within one year of enactment on the FINCEN's effectiveness.

#### COMMUNITY INVESTMENT CORPORATION DEMONSTRATION ACT

Mr. RIEGLE. Mr. President, today I would like to provide clarification on a provision that is included in H.R. 5334—the conference report on the Housing and Community Development Act of 1992. The provision I would like to discuss is section 953, which creates a community investment corporation demonstration program.

During the 102d Congress, the Senate Committee on Banking, Housing, and Urban Affairs held several hearings on the problems of urban America. Numerous witnesses testified that lack of access to credit and other forms of in-

vestment capital is a significant factor leading to disinvestment and disintegration of our urban neighborhoods. This spring's riots in Los Angeles demonstrated how dire the situation has become in our nation's cities. In section 953, the Congress found that new models for revitalization are needed. In 1988, the Rouse-Maxwell Task Force on Affordable Housing first recommended the creation of a major national demonstration program based on the model provided by South Shore Bank in Chicago.

This program is intended to plant the seeds of a network of financial institutions dedicated to the revitalization of our inner cities and distressed communities across the Nation. Community investment corporations, also known as community development banks, are organizations whose primary mission is to revitalize their communities by investing in them. They are an innovative mechanism for bringing private capital into low-income neighborhoods. Currently, there are four such institutions in the Nation—South Shore Bank, Chicago, IL, Southern Development Bankcorporation, Arkadelphia, AR, Center for Community Self Help, Durham, NC, and the Community Capital Bank, Brooklyn, NY. These institutions have impressive track records of facilitating small business development, financing and constructing affordable housing, creating and retaining jobs, and building new ladders of opportunity for low-income residents.

The success of existing community development banks has inspired others across the Nation to explore the creation of new community-oriented financial institutions. One of the greatest obstacles new institutions face is raising capital. This program is designed to aid these institutions in raising the capital they need to start and expand, and to provide assistance for the comprehensive range of development services offered by community investment corporations which contribute to their success as a revitalization tool.

Organizations eligible to apply to participate in the demonstration include: First, depository institution holding companies; second, nonprofit organizations that are affiliated with regulated financial institutions; and third, nonprofit organizations that are affiliated with nondepository lending institutions. A key element distinguishing eligible organizations from noneligible organizations is that a central part of its mission is the revitalization of a targeted geographic area. In the case of a depository institution holding company or an affiliated regulated financial institution, it is not the intention of Congress that this provision permit the waiver of any other law relating to the safe and sound operation and management of such institutions. These institutions

are expected to balance the competing goals of safe and sound lending and investment practices and community impact.

All eligible organizations are required to serve a targeted geographic area that meets indicators of general economic distress. While the eligible organization may serve a larger area than the targeted geographic area, Federal assistance may only be used in the targeted geographic area identified in its application.

The Secretary of Housing and Urban Development shall select institutions to participate in the program based on criteria including institutional capacity, the range of development services to be offered, the types of development strategies to be pursued, the extent of need in the targeted geographic area or among the targeted populations to be served, and an appropriate geographic distribution of the institutions among regions of the Nation.

Eligible organizations are expected to match any assistance received on a dollar-for-dollar basis. It is intended that the Secretary exercise flexibility in his interpretation of what constitutes matching funds. In making such determinations, the Secretary shall take into consideration the limitations faced by new institutions in raising startup capital.

The Secretary shall make grants and loans for capital assistance to eligible organizations. If an eligible organization is a depository institution holding company, the Secretary shall only issue capital assistance in the form of a loan. These loans shall be repaid to the Secretary. The Secretary is given discretion to issue loans at terms and conditions that are appropriate to the ability of the institution to repay without significantly reducing its community development activities. During the initial phases, when an eligible organization is establishing or expending its activities, the Secretary may defer payments of principal and interest until such time when the institution can begin repaying the loan without significantly reducing its community development activities. This provision is not intended to limit, in any manner, a depository institution holding company's use of funds derived from sources other than assistance provided under this section.

If an eligible organization is a nonprofit organization, the Secretary shall provide capital assistance in the form of a grant. A nonprofit organization that receives capital assistance may only provide assistance to a for-profit entity in the form of a loan. The proceeds of such loans shall be repaid to the nonprofit and must be used for activities consistent with the purposes of this section. This provision is not intended to limit, in any manner, a nonprofit organization's use of funds derived from sources other than assistance provided under this section.

Capital assistance may be used by eligible organizations for a variety of purposes including increasing capital available for providing loans, subsidizing interest rates, providing credit enhancement or guarantees, making direct investments in projects, and providing a portion of loan loss reserves.

The Secretary shall provide grants or loans to eligible organizations for development services and technical assistance. Eligible organizations receiving assistance shall provide development services which complement its lending and investment activities, and which facilitate revitalization. Development services are provided by the eligible organization to borrowers and other appropriate recipients. Development services can include business planning and counseling, marketing and management assistance, administrative costs, capacity building activities, and development of real estate. Technical assistance is considered to be assistance provided by the Secretary to eligible organizations or their subsidiaries or affiliates to establish a community investment corporation. In addition to providing technical assistance, to establish such institutions, the Secretary shall provide, or contract to provide, an ongoing training program to ensure that eligible organizations possess the expertise necessary to successfully run a community investment corporation.

The Secretary is required to consult with an advisory board comprised of experts on lending and community development in devising regulations and other necessary program guidelines, and in considering applications.

To the maximum extent feasible, the Secretary and the Federal financial regulatory agencies shall coordinate the development of regulations and other program requirements. It is intended that the agencies will work together to ensure that their requirements are consistent and create the least amount of regulatory burden necessary. The Federal financial regulatory agencies shall be responsible for ensuring that eligible organizations that are depository institution holding companies or an affiliate or subsidiary of such an organization are operated in a safe and sound manner. The Secretary shall also be responsible for all regulation of nonprofit organizations that are affiliated with a nondepository lending institution. The Secretary shall be responsible for ensuring that all eligible organizations use their assistance for activities that are consistent with the purposes of this section.

It is the intention of Congress that no provision in this section be interpreted to limit the applicability of other laws relating to the safe and sound operation of a regulated financial institution or a depository institution holding company.

I believe that community investment corporations hold great potential as a new tool to address blight and disinvestment in our inner cities. I am pleased to see it incorporated as part of H.R. 5334.

COLLOQUY

Mr. CRANSTON. Before we vote on this bill, I would like to ask the chairman and ranking member of the Banking Committee to explain what the origins of the legislation contained in title XIII are and how it differs from the Senate-passed bill on this subject, S. 2733.

Mr. RIEGLE. I would be happy to.

On September 25, 1991, the House passed H.R. 2900 dealing with the regulation of government-sponsored housing enterprises. On July 1, 1992, the Senate passed S. 2733 with provisions dealing with the same subject matter, but also including a range of additional banking legislation. Procedural problems made the appointment of a House-Senate conference committee difficult. In order to proceed with the bill, an informal conference including Senator RIEGLE, Senator GARN, Congressman GONZALEZ, and Congressman WYLIE met to resolve differences between the House and Senate bills with respect to the GSE issues. Title XIII of the Housing and Community Development Act of 1992 concerns only the GSE provisions.

The capital requirements follow the Senate bill quite closely. The only material changes are the following:

First, the requirement that shapes of the yield curve be "within the range of historical experience" was changed to "reasonably related to historical experience" and specific restrictions about the shape of the yield curve over the last 6 years of the stress period were removed. During the stress period, yield curve shapes and durations should be reasonably related to historical experience. Yield curve shapes should be smooth, and should not fluctuate erratically. The Director may require a GSE to meet the requirements imposed by more than one set of projected yield curves.

Second, the requirement for a study by the Director on new business assumptions was deleted.

Third, alternatives to the Constant Quality House Price Index are required to be authoritative, publicly available, and regularly used by the Federal Government. In considering whether to use a different index, the Director should be guided primarily by index quality considerations. Whatever index is used, it should be accessible by the public and used consistently by the Director or other Federal agencies, and

Fourth, the risk-based capital regulations are required to be sufficiently specific to permit an individual other than the Director to apply the test. This means that the regulations and any accompanying orders or guidelines

must be sufficiently detailed to allow a competent person with full access to detailed GSE data to be able to perform the test and obtain the same results as the Director. For example, if the Department of the Treasury, the Federal Reserve Board, the CBO, GAO, OMB, or a consultant to one of those agencies is able to apply the test, after obtaining the required information, this condition would be satisfied.

Minimum and critical capital levels are computed in the same manner as under the Senate passed bill, with one exception. Under this bill, capital must be held against 50 percent of the average amount of commitments outstanding over the 12-month period immediately preceding the date for which the capital amounts is being computed. The Senate-passed bill required capital to be held instead only on commitments with terms remaining of 6 months or more.

The definitions of capital are modified in two ways: First, for the purpose of the minimum and critical capital standards, no provision is made to permit the inclusion of capital instruments other than those specifically described; and second, for all purposes, reserves made or held against specific assets are excluded from capital.

With regard to capital enforcement, there is a difference in nomenclature that should be noted, even though it does not have a substantive effect. Under the Senate-passed bill, the undercapitalized category includes all undercapitalized institutions, institutions that are significantly undercapitalized and critically undercapitalized. Similarly, in the Senate-passed bill, the significantly undercapitalized category includes critically undercapitalized institutions. In this bill, each capital category is discrete, and a GSE cannot be in two categories simultaneously.

In the bill, as in the Senate-passed bill, the Director is given exclusive authority to issue all regulations dealing with the GSE's safety and soundness. The Secretary of Housing and Urban Development is given general regulatory authority over all other issues to ensure that the purposes of the enterprises' charter acts are accomplished. Thus, the general regulatory authority does not extend to matters relating primarily to safety and soundness, which are in the Director's exclusive authority. Further the Director retains, as in the Senate bill, full and independent authority to issue and enforce all regulations and orders necessary to carry out his or her duty to ensure that the enterprises are adequately capitalized and operating safely in accordance with the act, and to enforce the provisions of part of subtitle A, subtitle B, and subtitle C of this title of the act, and sections of the charter acts dealing with capital distribution, financial reporting, execu-

tive officer compensation, and any other provision relating primarily to safety and soundness.

The authority given the Director under this bill, including the power to issue and enforce regulations and orders necessary to carry out his or her duty is sufficiently broad to enable the Director to meet new circumstances reflecting changes in the structure of the mortgage finance markets, major technical changes in the activities of the enterprises, or other relevant developments. This bill, by including a specific statement of the Director's duty and granting him full authority to carry out portions of the act, which include that statement, follows the Senate bill rather than the House bill in regard to these authorities.

The Director also retains full and independent authority for the management of the Office. This bill differs from the Senate bill in that the Director's authority to enforce provisions of the act and the charter acts not dealing primarily with safety and soundness is subject to the review and approval of the Secretary. Furthermore, enforcement of housing goals under sections 156 and 157 of the act and report requirements under sections 309(m) and 309(n) of the FNMA Act and sections 307(e) and 307(f) of the FHLMA Act is undertaken solely by the Secretary.

This bill also differs from the Senate bill in that assessments collected from the enterprises and expenditures of the Office may not exceed amounts provided for in appropriation acts. Since GSE funds, rather than taxpayer money, would be used to meet the needs of the Office, and since the Office must be able to hire individuals with the necessary expertise to adequately evaluate the condition of the GSE's, it is extremely important that this procedure not be used to hamstring the effectiveness of the Office in the name of cost savings.

An initial assessment of \$1.5 million on each of the enterprises is explicitly provided in the bill along with appropriation of those funds. A supplemental appropriation for the Office will be needed as soon as practicable after a Director is appointed.

With regard to new programs, this bill, like the Senate bill provides new standards for the approval of new conventional mortgage programs. The test of whether an activity is a new program is the same as in the Senate bill: whether the activity is significantly different from existing programs. The approval standards and procedures in this bill differ in four ways:

First, the standard for the Secretary's approval is whether the program is authorized by the relevant charter act and is in the public interest, rather than whether it is authorized and would not have a deleterious effect on housing finance. The public

interest standard would ensure that the Secretary could consider a broad range of factors in making his determination. Such factors might include, but are not limited to, the following examples: The effect of the new program on the affordability or availability of housing, the degree to which the private sector is efficiently providing the product, and the likely effect of increased competition. The Secretary is not expected to micromanage the affairs of the GSE or interfere with normal business judgments under this test.

Second, the director's authority to disapprove a program of an enterprise that is not adequately capitalized is explicitly incorporated in the authority to disapprove a capital restoration plan under subtitle B.

Third, the expedited approval procedure for adequately capitalized enterprises under the Senate bill is deleted.

Fourth, an enterprise whose program is disapproved on public interest grounds, or during the period before the risk-based capital standards become effective, safety and soundness grounds, is accorded a hearing on the record concerning the Secretary's action.

With regard to housing goals and reporting requirements, this bill follows the Senate bill quite closely, although the provisions have been rearranged by placing them in different titles. Enforcement of any housing goals other than those described in sections 1332, 1333, and 1334 of this bill is not authorized for either the Director or the Secretary. The goals established under those sections are enforceable by the Secretary. If the Secretary determines, after an opportunity for the enterprise to review and supplement the record, that an enterprise failed to meet a goal, or that there is a substantial probability that an enterprise will fail to meet a goal, and that the goal was or is feasible, the Secretary must require the enterprise to submit a housing plan likely to succeed in meeting the goal for the following year or make such improvements as are reasonable in the current year that is acceptable to the Secretary. If the enterprise fails to submit an acceptable plan that is substantially in compliance with the requirements of a housing plan, fails to make a good faith effort to comply with an approved plan, or fails to submit in a timely manner reports relating to the housing goals, the Secretary may issue a cease-and-desist order requiring compliance with the law or the plan and may assess civil money penalties.

The cease-and-desist and civil money penalty authority of the Secretary differs from the corresponding authority of the Director in that the grounds for issuance and assessment are different. Procedures for issuance, hearings, judicial review, and enforcement relating

to the Secretary's enforcement action are intended to parallel provisions relating to the Director's enforcement authority. No significance should be attached to minor variations in the wording or organization of these provisions.

There are also differences with regard to due process procedures and conservatorship rules. This bill resembles the Senate bill in affording the enterprises notice and an opportunity to supplement the administrative record prior to Director's classifying the capital status of an enterprise or taking a discretionary supervisory action other than appointment of a conservator. This bill differs from the Senate bill in providing for an informal hearing rather than a hearing on the record prior to the Director's reclassification of an enterprise based upon conduct that could result in a rapid depletion of core capital or a significant decrease in the value of mortgage collateral.

This bill does not provide for an administrative hearing prior to the appointment of a conservator on grounds other than capital classification. Under the Senate bill the Director could waive such a hearing, but only in certain circumstances. In the absence of hearings, due process with respect to such appointments is limited to judicial review.

This bill differs from the Senate bill regarding two grounds for appointment of a conservator for an enterprise other than capital classification. This bill adds the inability of an enterprise to pay its obligation in the normal course of business as a ground. It also provides that a conservator may be appointed if the Director finds a reasonable likelihood that the GSE may lose substantially all of its core capital and is not likely to be able to restore its capital.

This bill also differs from the Senate bill in permitting the Director to appoint another government agency as conservator and in mandating the termination of a conservatorship that is based upon the classification of an enterprise as significantly or critically undercapitalized, when the enterprise restores its capital to the minimum required capital level.

Subtitle C of this title, dealing with enforcement, closely tracks the Senate bill. However, sections 1371 and 1376 differ from the Senate bill in not making reference to violations of conditions in written approval actions. This bill does provide sanctions for violations of orders and written agreements, which adequately encompass violations of written conditions.

Finally, this bill requires that regulations to implement the bill be issued pursuant to section 553 of title V, U.S. Code. That section allows exceptions from the general requirement to provide a comment period before final regulations are issued. The ability to issue regulations under those exceptions should not be abused by overuse.

Mr. GARN. I believe the chairman has stated the differences quite well. I concur with his response to your question.

Mr. CRANSTON. Thank you both.

Mr. GARN. Mr. President, I want to compliment Senator RIEGLE on the development of important legislation on Government-sponsored enterprises. Under his guidance and leadership, the Banking Committee formulated a landmark bill that will ensure the safety and soundness of the housing Government-sponsored enterprises. Also, Mr. President, this legislation will serve as the catalyst for the financing of considerably more housing for those households with low to moderate income levels. For this the Chairman should be congratulated.

I am pleased, that this legislation requires a thorough investigative study into the role, structure, governance and stockholder interests of the Federal Home Loan Banks. I am sorry, though, that we were unable to include in this bill substantive language that would address much needed reforms to the Federal Home Loan Bank System, such as those undertaken for Fannie Mae and Freddie Mac.

One set of studies of the FHLB System called for in this legislation by the Federal Housing Finance Board, the Comptroller General of the United States, the Director of the Congressional Budget Office, and the Secretary of Housing and Urban Development will be most helpful in determining proper governance and capital standards. Also the studies will focus on products and services, the proper relationship between the system and other Government-sponsored enterprises, financial obligations, the impact of consolidation of the system would have on availability of housing credit, and the interests and investments of the system's stockholders. I am also pleased that provided in this bill is a study of the system by a study committee composed of individuals whose institutions own stock in the 12 Federal Home Loan Banks.

I would ask the Senator if I am correct in saying that it is the purpose of these studies to assist Congress in the development of legislation next year that will preserve and enhance the Federal Home Loan Bank's role as an important source of credit for housing, and to protect the financial investment of the system's member institutions?

Mr. RIEGLE. Yes, Senator GARN, if after reviewing the studies, it becomes apparent that legislation is appropriate, it would be my hope that the Congress would consider addressing these issues.

#### REAL ESTATE APPRAISALS

Mr. GARN. Mr. President, one provision of this bill clarifies that existing law authorizes the Federal banking agencies, the National Credit Union Administration, and the Resolution

Trust Corporation each to determine that certain real estate-related financial transactions do not require the services of a certified or licensed appraiser. In exercising their authority, the agencies may prescribe—and have prescribed—regulations establishing threshold levels below which appraisals are not required and using other criteria to specify categories of transactions that do not require appraisals by certified or licensed appraisers. Now this provision simply clarifies existing law. So I would ask the Senator from Michigan whether he would agree that the agencies need not re promulgate those regulations.

Mr. RIEGLE. The Senator from Utah is correct. Since this provision clarifies existing law, the agencies do not have to re promulgate those regulations.

THE FAIR HOUSING PROVISIONS OF THE GSE  
LEGISLATION

Mr. CRANSTON. Mr. President, I would commend Senator RIEGLE for his leadership in moving this important legislation to ensure the safety and soundness of Fannie Mae and Freddie Mac and to ensure that these enterprises increase their commitment to serve low and moderate income families and urban communities. I also believe the strengthened fair housing requirements for the GSE's are very important.

Mr. RIEGLE. I thank Senator CRANSTON for his work as chairman of the Housing Subcommittee in helping to craft this GSE legislation.

Mr. CRANSTON. I am concerned that one of the fair housing provisions which was contained in the Senate passed version of the GSE legislation, S. 2733, is not contained in the final version of the legislation. The provision required the enterprises to have underwriting and appraisal guidelines which prohibited the use of criteria or policies which have a discriminatory effect, including any consideration of the age or location of the housing. This provision is very important given the persistent evidence of mortgage lending discrimination suggested by the HMDA data.

Mr. RIEGLE. I share Senator CRANSTON's concern about the continued ill of mortgage discrimination. He and I have worked closely together on fair lending legislation and oversight. Discrimination in mortgage lending is a situation that we cannot allow to persist in this Nation. The particular provision that you referred to is not included in the final version of the legislation because the final legislation contains a broad provision, which was also included in S. 2733, which prohibits the GSE's from discriminating in any manner in the purchase of mortgages which has a discriminatory effect, including the age and location of housing. This broad provision is intended to encompass any of the practices and policies of the GSE's, including their

underwriting and appraisal guidelines and the underwriting and appraisal guidelines of those mortgage lenders that sell mortgages to the GSE's. Accordingly, the specific provision you are inquiring about is covered under the provision and was merely redundant in S. 2733, and as such was not included in the final bill. The deletion of that particular provision is not intended to suggest that the GSE's or the mortgage lenders who sell mortgages to them can maintain appraisal and underwriting guidelines which have a discriminatory effect based on race, color, religion, sex, handicap, familial status, age or national origin, including the age or location of the dwelling or the age of the neighborhood or census tract where the dwelling is located.

LEGISLATION TO TIGHTEN CONTROLS IN HOUSING  
ENTERPRISES

Mr. LEVIN. Mr. President, although it is not as strong as I would have liked, I plan to vote for the legislation before us because it is an improvement over the unacceptably weak controls that now exist over the two housing enterprises, Fannie Mae and Freddie Mac.

Mr. President, as the S&L scandal continues to pull billions of taxpayer dollars from other pressing needs, this country has learned that Federal regulation is not always a bad thing. Sometimes it is all that stands between the taxpayer and another multi-billion-dollar millstone around their necks.

Fannie Mae and Freddie Mac need stronger controls. Together they have about \$900 billion in assets and liabilities and enjoy an implicit Federal guarantee of their solvency. Yet these organizations currently operate virtually outside the financial oversight authority of the Federal Government, despite a checkered history of financial performance.

One indicator of the need for stronger controls erupted on the scene in January 1991, when the chief executive officer [CEO] of Fannie Mae, David Maxwell, resigned and, upon his departure, received from Fannie Mae cash benefits worth \$27 million. This huge payment made Mr. Maxwell one of the highest paid executives in America that year. This payment demonstrated all too painfully that Fannie Mae was so free of fiscal constraint that it could pay an employee tens of millions of dollars in cash—as he was walking out the door.

The S&L scandal has taught us that this type of excessive executive pay is a danger signal that can't be ignored when taxpayer dollars are at risk. That is why, when this legislation came before the Senate some months ago, I proposed adding a provision to prohibit compensation abuses. I modeled it after a provision I authored last year—now law—which clarified and strengthened the authority of Federal regulators to stop compensation abuses at federally insured banks and S&L's.

The managers of the bill, my colleagues Senator RIEGLE and Senator GARN, agreed that a similar system ought to apply to Fannie Mae and Freddie Mac. We were able, on a bipartisan basis, to work out a floor amendment which made several changes in the bill's language and created a new section 118 to prohibit excessive compensation.

The legislation before us now retains the essence of section 118, but has collapsed its approximately 10 paragraphs into a new section 108 that consists of 2 short paragraphs. Section 108 retains the basic prohibition against compensation abuses at GSEs and makes it clear that the regulator has the authority, without the HUD Secretary's review or approval, to take action to stop such abuses. In so doing, the provision clearly enables the new regulator to establish a system to identify compensation abuses at Fannie Mae and Freddie Mac and take prompt action to stop them. That's important.

At the same time, the section replaces the specific provisions and definitions that were in the Senate bill in favor of more general language. For example, instead of directing the new regulator to prohibit excessive compensation, defining those terms and listing the factors the regulator should consider in evaluating compensation practices, section 108 simply directs the regulator to prohibit compensation which is "not reasonable and comparable" to the compensation paid by similar businesses including major financial services companies.

By retaining the term, "compensation," section 108 clearly intends to permit the regulator to consider a broad range of payments and benefits provided by an enterprise to an executive in exchange for services, including cash payments, fees, noncash benefits, financial counseling, insurance, perquisites, stock options, stock, stock-based compensation and post-employment benefits. That is the same as the Senate bill and is comparable to current practice by bank and S&L regulators who exercise compensation oversight at federally-insured financial institutions.

Unlike the Senate bill, section 108 does not indicate how the regulator is to determine whether particular compensation items or total compensation packages are reasonable and comparable. It is my understanding, however, that this standard is intended to parallel the standard in the Senate bill which directed the regulator to prohibit compensation which is "unreasonable or disproportionate to the services actually performed by the executive officer" and listed specific factors to be taken into consideration.

Section 108 does contain one troublesome reference. It suggests that the regulator evaluate GSE compensation by considering comparable compensa-

tion practices at major financial services companies. For the past 2 years, media story after media story has recounted the excessive compensation that American corporations often pay their executives. The average pay of CEO's today is about \$2.5 million. The outcry over excessive executive pay in corporate America is one of the reasons this provision is needed—to stop our GSEs from engaging in similar outrages. We specifically don't want Fannie Mae paying its executives as much as "major financial services companies" pay their executives—not when taxpayer dollars are at risk.

That's why the Senate floor amendment struck the reference to "major financial services companies" from its bill. Since Fannie Mae and Freddie Mac have public purposes, enjoy Federal benefits, and pose taxpayer risks that don't apply to private sector companies, the Senate had determined that the more appropriate pay comparison was to "publicly held financial institutions" meaning federally-insured banks and S&Ls as well as other GSEs. I think this legislation makes a major mistake in restoring the "major financial services companies" reference, and I hope to correct that mistake in the next Congress.

If this legislation becomes law, in developing criteria and procedures to implement Section 108, it will be important for the regulator to consult with the Federal Reserve, Comptroller of the Currency and Office of Thrift Supervision to see how they exercise their compensation oversight authority and to set up a comparable system, so that S&L, bank and housing enterprise executives operate under the same prohibitions against compensation abuse. The regulator should also use the authority provided in Section 108, not only to monitor compensation practices and prohibit future abuses, but also to take a hard look at the compensation arrangements already in place for Fannie Mae and Freddie Mac executives. Those arrangements are more than generous, and taxpayers shouldn't be asked to incur the risks involved in another \$27 million payout.

In conclusion, while the legislation before us is not as strong as I would have liked, it represents a needed improvement over the status quo, and I support its enactment. At the same time, I urge my colleagues to return to this subject next Congress to tighten the controls further. Fannie Mae and Freddie Mac, with their billions of dollars in assets and potential liabilities, pose risks to the Federal treasury that must not be ignored.

Mr. KENNEDY. Mr. President, I would like to commend Senator CRANSTON and the members of the Banking Committees in both Houses for their tireless efforts to bring this conference report to the floor, and to assure that this Congress enacts housing legislation this session.

The National Affordable Housing Act, passed by Congress in 1990, gave us a new comprehensive housing policy designed to increase the supply of affordability of housing in America, a policy that was long overdue. Since the passage of that act we have made important strides in our cities and rural areas in efforts to house those most in need, to repair our deteriorating low-income housing stock, to provide shelter for the homeless and to give communities the flexibility they need to develop local solutions.

But the need for affordable housing continues to outstrip our efforts. Today there are countless cities in which families must wait over a decade for subsidized housing. Housing conditions in many areas continue to deteriorate due to the virtual elimination of funding for renovation and rehabilitation. Homelessness continues to grow, affecting more and more families. These critical amendments to the National Affordable Housing Act affirm our commitment to provide decent and affordable housing to every American.

This bill reauthorizes programs for rental assistance and public housing—essential programs that are providing housing to the most needy Americans. It provides greater support to local jurisdictions through the HOME Program and CDBG to help them continue to develop appropriate local solutions to the housing shortage. It helps our country meet the challenge of homelessness by authorizing several important programs, including emergency shelter grants to service those living on the streets, transitional housing to assist people in making the transition back into society and shelter-plus care which provides homeless people who have special needs with both the housing and services they require to live with independence and dignity.

Along with maintaining these important programs, this bill includes several new initiatives that will improve housing opportunities and conditions for millions of Americans. I congratulate Senator CRANSTON on his lead-based paint abatement initiative that comprehensively addresses the growing scourge of childhood lead poisoning. The bill's expansion of the Fair Housing Program will provide greater support and resources to combat the continuing disgrace of housing discrimination. I also wish to congratulate Senator KERRY for ensuring the inclusion of the YouthBuild Program. This program will not only increase the construction and rehabilitation of affordable housing, it will also train and employ low-income youth and prepare them for future employment. I am proud to be a cosponsor of this critically important program.

I would like to thank the chairman for his agreement in making certain amendments to the Family Self-Sufficiency Program. While we support and

encourage the position that those who rely on Government subsidies to seek economic independence, we must also guarantee that no one loses desperately needed housing because they are unable to participate in a Government job training program that is not appropriately targeted to their needs. Our changes to the Family Self-Sufficiency Program will make it more equitable and more meaningful in helping the residents of public housing reach economical self-sufficiency.

Finally I want to express my hope that the compromise reached on elderly and disabled housing will meet the need of elderly residents for security while assuring that people with all types of disabilities are guaranteed a range of appropriate housing options. It is critical that the provisions in the bill not be used to isolate people with disabilities in segregated housing. I urge the Department of Housing and Urban Development to be vigilant in implementing this compromise, in accordance with the Fair Housing Act, the Civil Rights Act, and the Americans With Disabilities Act, and to assure that no individual is unjustly excluded from affordable housing. In the future I hope Congress will provide the resources and incentives needed for the successful management of mixed housing.

Finally, Mr. President, I urge my colleagues to vote for the 1992 Amendments to the National Affordable Housing Act. It is vital that we pass a housing act this year so that we may continue the work begun in 1990 to deal with this country's want housing crisis and ensure decent and affordable housing and appropriate support to all our citizens.

Mr. SIMON. I wish to briefly discuss the conference report on the National Affordable Housing Act Amendments of 1992.

I commend the members of the Banking Committee and the Housing Subcommittee, particularly Senator CRANSTON, for all the important work that went into this piece of legislation. Overall, I believe this is good legislation that will improve our low-income housing crisis.

I have been particularly concerned about an issue that has been controversial: The mixed housing issue, which involves housing people with disabilities with the elderly. It is unfortunate that this issue brought into conflict two groups who must need assistance. Both seniors and persons with disabilities clearly need and deserve our support, and we have done far too little for both in the past in regard to safe, accessible, and affordable housing.

I was joined by seven of my colleagues in writing to the conferees on this issue. It was critical to us that certain principles of equity be adhered to in the conference. Although the provisions in the conference agreement

have raised concerns about a reduction in availability of housing, particularly mixed housing, for persons with disabilities, it is my understanding that it is the intent of the conferees that these provisions will not be used in such a way as to have that negative impact. I am assured that the conferees desired to be fair to both seniors and individuals with disabilities, and that their agreement must be interpreted in that light.

I, therefore, join my colleagues in stating to HUD and Public Housing Authorities [PHA's] that these amendments do not authorize the use of age-distinct housing in a manner that denies opportunity for housing to persons with disabilities, and that the change adopted in these amendments, particularly through expansion of tenant-based assistance, specifically encourage the integration of persons with disabilities into mixed housing.

This carries forward the agenda adopted by the administration and Congress in the enactment of the Americans With Disabilities Act. We made a commitment in that legislation to end the exclusion of persons with disabilities and to enable their participation in all parts of society. Although some types of housing may be age-distinct under these housing amendments, it is important to note that a large percentage of persons in this housing will themselves have disabilities.

The Americans With Disabilities Act [ADA] is premised on the principle that people with disabilities want and deserve to be in the mainstream of American life. It must be clear in interpreting the provisions of this conference agreement that a person with a disability cannot be required to accept placement in segregated public housing. A public housing authority designating such housing must also make available to a person with a disability housing that is not segregated. Consistency with the ADA requires that PHA's provide disability specific housing only when the PHA offers integrated housing as well, and can demonstrate that disabled-only housing is as effective as housing provided to others.

In permitting PHA's to designate age-distinct housing for the elderly, the conference report includes specific protections that will ensure no one will be evicted from where he or she now lives. It will require diligence, however, to make certain that people with disabilities who are now on waiting lists for housing are not passed over with nowhere to turn if PHA's create age-distinct housing. The time that individuals with disabilities are on waiting lists could increase dramatically unless PHA's recognize their responsibility to prevent this from happening. HUD and Congress must keep a watchful eye on this possibility.

In order to make up for potential loss of housing opportunity for persons

with disabilities, changes have been made in the authorizations for the section 202 and the section 811 programs. While the split of money for elderly and disabled used to be about 80-20 under these two programs, it will now be 70-30. This change is intended to compensate for the creation of age-distinct housing. If these resources are not sufficient, however, it is clearly not the intent of Congress that persons with disabilities be denied housing opportunities. Among other actions, it will be essential for HUD and local housing authorities to alert the appropriate committees of Congress of the need for additional funds when necessary to ensure inequities do not occur.

There are provisions included in the conference report that require PHA's to keep records so that we will know if any people are passed over on waiting lists. I intend to monitor this issue closely, and I know that my colleagues here in the Senate will be doing the same. The Department of Housing and Urban Development, as well as the Banking Committee, has an obligation to monitor implementation of the housing provisions and any impact on the housing opportunities of individuals with disabilities.

There are other instances in which HUD has important oversight responsibilities. Under this conference agreement, a PHA will submit an allocation plan to HUD. If HUD does not act within 45 days, or 90 days when there are comments, that plan will go into effect. It is critical that HUD look carefully at the process used to develop the PHA plan. HUD must ensure not only that the statutory requirements for involvement of all parts of the community in developing the plan have been fulfilled, but that the needs of all parts of the local community have been addressed in an equitable manner. Specifically, HUD must ensure that the needs of persons with disabilities have not been neglected in the development of plans to establish age-distinct housing and act promptly to require revisions of plans when necessary. In order to carry out these responsibilities, it seems reasonable for HUD to develop clear guidelines or regulations for PHA's to follow in the development of their plans.

The creation of age-distinct housing is meant to provide more flexibility to PHA's. I realize that there are places where flexibility is needed. But this flexibility must not be used to encourage attitudes of intolerance. It cannot be used to allow people who are afraid of individuals with disabilities to say, "You can't live here." Without appropriate monitoring and acceptance of responsibility, this could occur in areas where there have never been any problems at all between seniors and younger persons with disabilities.

If we start accepting policies based on misunderstanding and fears, we will

have forgotten the important principles we stood for when we passed the Americans with Disabilities Act, the Civil Rights Act, and the Fair Housing Act. I trust that this has not been the case with the agreement on this conference report, and I will join my colleagues in watching carefully for its appropriate implementation.

(At the request of Mr. MITCHELL, the following statement was ordered to be printed in the RECORD:)

● Mr. SANFORD. Mr. President, I rise to express my strong support of the conference report which contains both the Housing and Community Development Act of 1992 and the Federal Housing Enterprise Financial Safety and Soundness Act of 1992.

THE HOUSING AND COMMUNITY DEVELOPMENT  
ACT OF 1992

I am particularly pleased that we were able to get this important housing legislation finished this year. Passage of this legislation allows us to improve upon the efforts which we committed ourselves to in 1990, when we passed the National Affordable Housing Act which was aimed at expanding the supply of affordable housing which we so desperately needed and continue to need in our country.

As many of my colleagues are aware, since I came to the Senate I have worked hard to bring to the attention of the Congress the inadequacies of rural housing in America. So often, housing legislation and funding measures are focused on urban housing initiatives. The bill we passed in 1990 included large portions of a bill I introduced in 1989, the Rural Housing Revitalization Act. The increased funding and new programs included in this legislation represented a great step by Congress to begin to address our country's rural housing needs.

However, now more action is needed. Huge backlogs in applications for the popular Farmers Home Administration [FmHA] housing programs persist. At the beginning of 1990, FmHA had close to four times the fiscal year 1990 appropriation for section 515 rural rental housing funds, and less than one-third of eligible applicants for section 502 direct loans received assistance in 1991. Meanwhile, our rural residents continue to live in overcrowded and substandard dwellings with leaky roofs, inadequate plumbing and faulty heating systems.

I am pleased to see that a large portion of my rural housing legislation was included in the Senate housing bill and is now a part of this conference report. I believe that the inclusion of many of my proposals will go a long way toward improving the state of rural housing in America.

First, this legislation increases authorization levels for the highly effective Farmers Home Administration housing programs. It also makes positive changes in rural housing programs

to increase the ability of the Farmers Home Administration, private developers and nonprofit providers to address rural housing needs. For instance, this bill modifies the section 533 Housing Preservation Grant Program to include replacement housing. In many cases, the dilapidated rural housing owned by low-income individuals who qualify for the section 533 program is simply beyond rehabilitation, and replacement is the only viable option. Thus, this change will give the housing preservation grant program the flexibility to better address the needs of these individuals by allowing grants to be used to replace housing when rehabilitation becomes economically infeasible.

The bill also contains new incentives to certain projects financed through section 515 and section 8 programs which will extend the use restrictions and keep these projects available for low-income residents. Many projects financed through these programs have been prepaid at a disproportionate rate. In the past, FmHA has offered incentive packages to encourage owners to maintain the low income use of their property. FmHA has been criticized for their efforts to monitor cases where an owner has accepted the incentive package. This bill requires that an Office of Rural Rental Housing Preservation be established in FmHA national headquarters to consistently monitor and process all prepayment applications.

Also, this legislation creates a new FmHA program to provide grants to nonprofit housing agencies to establish revolving loan funds to cover the acquisition and preparation of building sites for low-income housing. These funds will provide tremendous resources to nonprofit providers during the early phases of housing development when few Federal resources are available.

This bill permanently authorizes the section 515 and section 523 FmHA programs. These are the only two FmHA programs which lack permanent authorization, and the efficiency of the programs have been compromised by repeated disruptions in funding availability. Permanent authorization will give the section 515 and 523 programs uniformity with other FmHA housing programs and allow them to operate most effectively.

Finally, this legislation makes needed changes in the HOME Investment Program created by the National Affordable Housing Act. While the HOME Program provides great opportunities for public/private/nonprofit partnerships to create more affordable housing, rural areas have had difficulty utilizing the program because of inadequate funds and burdensome restrictions which disregard the specific needs of rural areas.

As I traveled through North Carolina and also when I held a field hearing

last spring in Greensboro, it became clear that the HOME Program was not operating as effectively as it should. I learned that local communities, particularly some of the poorer, more rural ones, were having trouble implementing the HOME Program. Prohibitions on new construction in rural areas and complex matching requirements were making the program problematic and unworkable.

I am pleased to note that the final version of this legislation addresses this issue. The basic intent of the HOME Program was to create partnerships with state and local folks and give them the flexibility they need to implement the program to ensure that specific, local housing needs are met. As it currently operates, there is a tiered system which determines the amount the community must put up to receive matching funds from the Government. The match is significantly higher for new construction proposals versus rehabilitation and rental assistance. In many rural areas, there are no structures to rehabilitate and new construction is the only alternative. I believe that the higher match requirement indicates a bias that works against rural housing needs and against the local flexibility the program seeks to enhance. While this bill still contains a tiered system, I am pleased that the match requirements have been changed to decrease the difference between the tiers.

THE FEDERAL HOUSING ENTERPRISE FINANCIAL SAFETY AND SOUNDNESS ACT OF 1992

I am also very pleased that the Senate is prepared to move forward on the Federal Housing Enterprises Regulator Reform Act of 1992. This is a solid piece of legislation. We have worked on this bill for quite some time, and I am pleased that we were able to craft a feasible compromise that will truly overhaul the regulatory structure of Fannie Mae and Freddie Mac.

Fannie Mae and Freddie Mac have played a major role in expanding the supply of mortgage credit. Overall, I have been very pleased with the manner in which these two housing-related Government Sponsored Enterprises [GSE] have operated, however, the \$90 billion these two GSE's liabilities hold does pose potential financial risk to the taxpayers. I am particularly pleased with the sound and responsible financial standards contained in this bill. By including capital requirements which require GSE's to maintain capital not only responsibly addresses the current financial condition of GSE's but also the potential financial condition of GSE's in periods of adverse economic conditions.

In addition, I am pleased that this legislation includes needed incentives to clarify and ensure that Fannie Mae and Freddie Mac meet the housing missions that are so clearly defined in their charters. It is important that

they meet the housing finance needs of low and moderate income residents.

REGULATORY RELIEF FOR BANKS

Finally, Mr. President, I am pleased to note that this conference report contains some important provisions related to the paperwork burden imposed on banks. I believe that a strong economy is dependent on a strong banking system and our current banking system is in need of major reform. Laws written in the 1930's that continue to govern our banks have become obsolete in today's modern financial arena. Furthermore, when Congress last attempted to modernize our banking system through the Federal Deposit Insurance Corporation Improvement Act, well-intended efforts were thwarted and the end result was extensive safety and soundness regulations and no reform.

I voted against that measure because I believed and continue to believe that it placed too many regulatory burdens on our banks. Banks are struggling, and ultimately, with added regulations, the costs of keeping up will be passed on to consumers. While I do not oppose measures meant to increase safety and soundness, I think it is vital that we take a realistic look at the regulatory burden such measures place on banks, especially small banks. We need to ensure that banks are not placed in a dangerous, noncompetitive situation while also maintaining high standards of safety and soundness.

When it became clear that we would be unable to achieve major banking reform this legislative year, I began personally to seek relief for the banks from some of this regulatory burden created by the Federal Deposit Insurance Corporation Improvement Act [FDICIA]. I prepared an amendment to the housing bill which included some small, yet significant provisions to help banks concentrate more on promoting growth in their communities, including housing finance, rather than preparing redundant and often costly paperwork. I would like to thank my colleagues who supported my amendment, and express my deep appreciation to the conferees for accepting my proposal.

While passage of these relief provisions does not cure all of the overly intrusive regulations placed on the banking industry, I do think it symbolizes that the Congress is beginning to understand the extent of the paperwork burden on banks and the resulting negative effect on local economies. It is my hope that this small step will lead to a more comprehensive effort to reduce unnecessary burdens and implement major banking reform next year.

Again Mr. President, I strongly support this conference report and hope that it is quickly passed and signed into law.

Mr. WELLSTONE. Mr. President, I rise today to express my support for one of the best and most important

pieces of legislation we have had come before us in this Congress, the Housing and Community Development Act of 1992. This legislation is important because, in a year in which many Americans have been rudely awakened to the needs of our cities, it is the closest thing we have had to a real urban aid package. And, in a year in which we have been told that it is time for Government to pay more attention to the middle class, this is also legislation that provides real help for middle-income Americans. This conference report represents the reauthorization of some of the best programs we have developed to make our communities strong again. It also contains a number of new provisions, many of which are likely to be important steps in helping communities rebuild and recover from this recession. I would like to commend Senator CRANSTON and the other conferees on the work they have done to put this conference report together.

There is much in this conference report that shows that we are committed, as a Nation, to providing poor and low-income Americans with decent, affordable housing, and safe, healthy neighborhoods. There are many elements of this package that address these needs, all of which have been fundamental in helping States and cities meet the housing needs of poor people. This includes the HOME program, which provides grants to States and local governments for housing production, rehabilitation, and rental assistance. It includes funding for many public and assisted housing programs. And, perhaps above all, it includes authorization for the Community Development Block Grant Program [CDBG] which the National Association of Housing and Redevelopment Officials [NAHRO] has characterized as the mainstay of neighborhood and community preservation since 1974. These programs all demonstrate the best of what this Government can do for Americans. I am glad to see we can all agree on their reauthorization.

This conference report also carries with it the reauthorization of many of the programs first authorized in title XIV, the Stewart B. McKinney Homeless Assistance Act. These are the programs with which we try to address the problems of homelessness in our country. I am proud to note that one of the changes in this package of programs is the addition of a new rural homelessness grant program, which contains provisions from legislation I cosponsored with Senator BUMPERS. This is perhaps the first step we can take in addressing the fastest growing part of homelessness in this country. Title XIV will provide resources to expand the network of resources available to address the needs of homeless Americans outside of urban areas.

In following the progress of this report, I have been especially concerned

about the manner in which the so-called mixed population problems would be addressed. Because of the shortage of affordable housing alternatives in this country it seemed to me that we needed to avoid, if at all possible, allowing housing authorities to designate certain types of housing as available only to the elderly or to people with disabilities. There can be no doubt that places where these groups have been mixed there have been some problems. I am concerned that public housing authorities, faced with a lack of resources and the difficulties in housing both of these groups, will, if authorized, turn to the simple solution of designating buildings "elderly only" and thereby exclude people with disabilities. I can understand the frustration of the housing authorities, faced with housing people who are difficult to house, who need specialized services, and who sometimes are said to create particular security problems. But I continue to believe that these are problems that can be addressed without segregating people. And while I believe that no housing official would willingly put people out on the street, unless there are more housing resources available, I am afraid a policy that designates some housing as "elderly only" could result in an increase in homelessness.

We need to recognize that problems do not arise wherever elderly people and people with disabilities live together, but only in some of those situations. I want to stress that we are addressing problems that have arisen due to the actions of some individuals rather than a whole category of the population of mixed housing projects. In Minnesota, as well as in other States, the elderly are certainly not alone in their feelings of insecurity in some public housing projects. I have heard from people with disabilities in my State who live in mixed highrises and who are also afraid to walk in the hallways of their buildings. Through incentives for integration, such as on-site management, enhanced security arrangements, and clarification of the eviction process, we can improve tenant satisfaction and safety in mixed housing and the quality of life of elderly and of nonelderly disabled individuals.

I want to compliment the conferees on reaching what I think is a useful compromise in this matter. The report provides more assisted housing for people with disabilities. It protects people against eviction. It requires housing authorities to examine other methods of addressing the problems that can arise where there are mixed populations when they are making their allocation plans for a variety of different types of housing. It authorizes funding for service coordinators. While I believe that this report may still make it too easy for housing authorities to

choose to segregate their housing projects, this language represents a good compromise.

Mr. President, I think we need to watch carefully as the policies authorized in this report are implemented. We must be careful that by allowing segregated housing we do not end up with a de facto reinstitutionalization of people with disabilities. We need to make certain that all possible efforts are made to make it possible for people to live together, rather than taking the easy expedient of separating yet another group away from mainstream society. Above all, we must make certain that this policy helps forward the overall goals of this report: To make certain that all Americans have access to affordable housing, in decent, safe neighborhoods. I think this report represents a broad step in that direction and I would like to compliment the conferees on a job well done.

Mr. REID. Mr. President, I am pleased to support the conference report accompanying H.R. 5334, the Affordable Housing and Community Development Reauthorization Act. I served as a conferee to title X of H.R. 5334, the Residential Lead-Based Paint Hazard Reduction Act of 1991. Title X establishes a comprehensive program to reduce lead poisoning hazards in private and assisted housing and housing sold to the public by the Federal Government. Title X's provisions relating to lead abatement worker training and certification programs, public education programs, and exposure studies are modeled upon provisions contained in S. 391, the Lead Exposure Reduction Act, which I introduced in the 102d Congress. This legislation is long overdue.

Lead exposure is widely recognized by health and environmental officials as the No. 1 environmental health problem in American children. Between 3 and 4 million children are at risk. Lead paint alone poses a risk in an estimated 57 million homes across the country. The Agency for Toxic Substances and Disease Registry estimates that 16 percent of all American children, at this moment, have blood lead levels that are within the range that can cause brain damage. That means one out of every six children is at risk. In children of the poorer urban communities, the number of children with toxic lead levels in their bodies approaches 50 to 60 percent.

Lead is pervasive in our environment. There are, in fact, many sources of exposure to this toxic metal. The highest risk to children is from exposure to dust from deteriorating lead-based paint in homes built before 1980. Children swallow or inhale lead dust, which is toxic in extremely small amounts. A child can become lead poisoned by swallowing just one sugar granule size particle of lead per day during his or her childhood.

In spite of our awareness of the problem, heart wrenching stories about

lead-poisoned families still make headlines on a regular basis. In 1990, a 28-month-old boy from Wisconsin died from lead poisoning after living just a few months in an abandoned office building contaminated with deteriorating lead paint. He had so much lead in his body, it had begun to replace the calcium in his bones.

Although death from lead poisoning is very rare now, this is still the typical lead poisoning story the public expects to hear. Many people are under the misconception that lead poisoning only occurs in poor urban dwellers. However, the truth of the matter is this deadly poison affects all aspects of our society, the rich, the poor, and the middle class.

A much more typical story of lead poisoning occurs when older homes with lead-based paint are being renovated. The Children's Hospital of Boston reported that fully 40 percent of the infant-poisoning cases they treated from 1987 to 1990 were due to infants swallowing lead dust during home renovations.

A case in point is the 1991 Newsweek report on the Tackling family of Connecticut. This successful middle-class family had both their 2-year-old daughter and newborn infant significantly poisoned by the lead dust, generated by scraping and sanding old lead paint surfaces while renovating their new home. Had they just known the facts about lead paint before they bought the house, their tragedy could have been avoided. Now, they will probably never know just how much damage the lead did to their children's intellectual potential.

This story hits home with me and my family, as well. I became more aware of the lead problem during the course of the early hearings on this issue in 1990. At that same time, my daughter and son-in-law, living here in Washington, DC, were expecting their first child. I learned that right here in the Nation's Capital, 51 percent of preschool-age children have high lead levels and I became very concerned about the health of my daughter and grandchild to be. Their home was tested and the presence of lead paint hazards was confirmed. Fortunately, my daughter and her husband were able to move in with us while the lead hazards were corrected and they now live in a healthy environment. But it might not have been such a happy outcome without knowing about the potential damage in time. Far too many families either don't know the hazards they face from lead paint or they cannot afford to move or have the paint safely abated.

Millions of children are literally at risk, living in every State in this country. They are the children of rich and poor alike, who represent the hope and the future of our Nation.

The biological facts about lead toxicity are well known. Lead is a basic

heavy metal toxin. It enters the body by ingestion, inhalation, or absorption through the skin, and is toxic in extremely small amounts. Once poisoned the body cannot get rid of the lead. It stays and accumulates in the bones for a lifetime. A statement from the Agency for Toxic Substances and Disease Registry sums up the problem: "Lead is potentially toxic wherever it is found, and it is found everywhere."

Lead exposure in children is particularly harmful because they are more susceptible to its damaging effects. Even at low levels, this toxic metal attacks the developing nervous system and other body organs. The problems caused by moderate lead exposure in children, measured as 25-35 micrograms per deciliter of blood, can include chronic anemia, kidney disease, stomachaches, hearing loss, obvious learning disabilities, lower IQ levels, and behavior disturbances. Researchers have linked this level of exposure with a 6-fold increase in reading disorders and a 7-fold increase in high school dropout rate.

Research has now shown that even low-level lead poisoning can also adversely affect IQ level, mental development, and behavior in children exposed in their preschool-age years. The blood-lead level considered to be safe by CDC has been revised downward several times, as dozens of new reports on low-level toxicity, add to our knowledge of the adverse effects of this toxin. CDC has recently announced that the threshold for possible adverse effects has again been lowered to 10 to 15 micrograms of lead per deciliter of blood. This means that 10 times more children are potentially at risk than was previously estimated.

When children are exposed to even low lead exposure, measured as 10 to 20 micrograms per deciliter, they are known to have subtle learning disabilities measured as slow growth, slow mental development, hearing loss, and lowered IQ scores. Mild lead poisoning in children is also associated with abnormal behavior patterns, such as hyperactivity, attention deficit disorders, and antisocial or even aggressive behavior. These characteristics are known to be predictors of future criminality. From this research it is clear that these learning disabilities and behavior problems affect more than just parent and child, they potentially affect all of society.

Lead also poses significant risks to animal populations. Household pets may be the first to indicate a lead problem in the home. The danger to our pets was dramatized when Millie, President Bush's English springer spaniel, was diagnosed as having acute lead poisoning. Like many children, Millie was lead poisoned during renovations that stirred up the old lead paint at the White House.

The Residential Lead-Based Paint Hazard Reduction Act establishes a

comprehensive research, training, and education program on lead testing and abatement by environmental professionals. This program answers the urgent cry for Federal help by both the public and an emerging industry, which is struggling to establish acceptable standards for safe lead paint abatement.

Informing the public on what to do about lead problems is a vital part of the formula for correcting lead problems. Title X establishes various long-term health studies and public education programs. As a part of public education, the bill requires that home buyers and renters be informed by lead disclosure statements before entering new housing where lead hazards are known to exist.

Many will argue that we cannot afford to do this. That it will cost too much money. Knowing what we know about the damage lead causes, it is clear to me that it costs us a great deal more to do nothing than it does to correct the problems. The costs to society caused by lead poisoning include increased health care costs on a massive scale. The State of Maryland alone spent \$1.5 million last year through the Medicaid Program alone to treat lead poisoned children.

In addition to direct medical expenses, the costs to society also include increased disability and welfare costs, and increased crime and law enforcement costs. At the same time lead is costing us a decrease in the intellectual capacity of our children, a decrease in our ability to compete internationally in the world economy, and a general loss of the social structure in our family life.

When looking at the big picture, the cost of prevention clearly comes out to be less than the cost of the cure. Indeed, preventing lead poisoning is an investment in the future for the sake of our children and generations to come; and there is no more worthwhile investment to make.

Mr. ADAMS. Mr. President, I applaud the conferees for reaching agreement on the National Affordable Housing Act, and join in urging my colleagues to quickly adopt the conference agreement. This act tackles many difficult issues, among them the issue of the mixing of elderly and disabled populations in public and other forms of federally assisted housing. I know that this has been an exceedingly difficult matter for the Members of both the Senate and House committees with jurisdiction over housing, and that the Members have worked hard to find a fair and compassionate way to address it.

I believe the conferees have, in fact, achieved the appropriate balance in this bill. During the first session of this Congress the issue of mixing the elderly with younger persons with disabilities in assisted housing was

brought to my attention in the form of a proposed amendment to my legislation reauthorizing the Older Americans Act [OAA]. It was my view that particular proposal was not appropriate in terms of both substance and the legislative vehicle. My reading was that the proposed amendment would only exacerbate tensions with advocates for people with disabilities. So I rejected that proposal and said that not only would the issue be better addressed through housing legislation, but that resolution could only be reached by a truly joint effort by advocates for the elderly and the disabled.

As a member of the Subcommittee on Disability Policy as well as the chairman of the Subcommittee on Aging, I fully recognize the very real housing needs of both low-income older Americans and people with disabilities. Both need access to decent, safe and affordable housing. Unfortunately, the extraordinary reductions in Federal support for housing assistance over the past 12 years, coupled with the tremendous housing needs of these populations has created this issue. The bottom line is that the housing resources are far too inadequate to meet the need. A recent report by the National Alliance for the Mentally Ill noted that over 30,000 persons with mental disabilities are in the Nation's jails—not because they have committed terrible crimes, but because they have nowhere else to go.

Mr. President, this terrible situation has pitted the elderly who wish to reside in age-distinct housing against younger disabled individuals who have even fewer housing options than do the elderly. Make no mistakes about it, the draconian housing policies of the Reagan-Bush administrations has brought us to the brink of a Hobson's choice: provide more housing options for younger persons with disabilities by taking resources from the elderly poor.

While this issue has been the subject of tremendous debate and even angst during the deliberations on the housing bill, it has been the source of conflict and serious tension in many cities across the country. Newspaper articles have outlined in great detail numerous tragic stories concerning the mixing of older persons, mostly very old single women, and younger persons with disabilities, mostly young men, in common housing. This mix has sometimes been violent with tragic outcomes.

Seattle, my home town, has been no exception. Last year, I directed the staff director of my Aging Subcommittee to Seattle to get a first hand look at the situation there. He toured several different kinds of housing facilities. He visited the room of a retired member of the clergy who showed him the scars of a ricocheting bullet that entered his bedroom and exited just above his bed in which he was lying. The bullet had been fired by a young person residing in an adjacent room.

My staff member encountered older people who wanted to preserve the opportunity to live in housing that was intended to be for the elderly only. But he also spoke with older people who enjoyed the diversity of having people of different ages residing together. In short, older people in publicly assisted housing are like other people everywhere: their needs and wants vary; they are not homogeneous group. They want options. That's what our nation's housing policy should encourage. I am convinced, as are my constituents, that local flexibility is essential to providing those options.

Mr. President, I would like to take a few more moments to describe an important effort in the city of Seattle, where the disabled currently outnumber the elderly in housing.

I am very proud of the work of my office in helping to bring together in Seattle a coalition of organizations and agencies that serve the elderly and the disabled to build a consensus on strategies and solutions to the mixed housing issue. Raising the issue through the Older Americans Act spawned a response to the tension that was clearly increasing between advocates for the elderly and the disabled over access to federally assisted housing.

Through my Seattle office, the Task Force on Elderly/Disabled Housing for Seattle/King County was convened comprised of representatives of key organizations serving persons with disabilities and the elderly, the Seattle Public Housing Authorities, law enforcement, congressional offices, and others. For over a year, this group met regularly to debate the many issues associated with mixed housing and to attempt to reach agreement on what can and should be done about these issues. As far as I know, the task force to deal with this problem in Seattle is unique in the Nation.

I am pleased to say that the majority of this group has just recently reached agreement on a position statement in which they conclude:

The solutions to this complex problem must be locally designed, flexible, multi-faceted, and creative based upon national standards but local conditions. At a minimum, these solutions should include strong management, more services and [emphasis added] housing reserved for persons aged 62 years or older.

Of particular note is the fact that they have concluded, as have the conferees, that we must maintain some housing solely for older persons aged 62 and over and that we must increase the amount of housing available to people with disabilities. The task force position statement includes a number of key principles and goals in addition to preserving age-distinct housing. These include improved housing options for disabled individuals, increased staff and support services—such as case management and referral services, a commitment from local housing pro-

viders to work with client populations to improve the current housing situation, planning through local comprehensive housing affordability strategies, and allegiance to laws and principles which ensure no discrimination.

The members of the Seattle Housing Task Force that signed the position paper include: the Easter Seals Society of Washington; the Seattle-King County Area Agency on Aging; the administrators of Council House, a section 236 project; the Seattle Housing Authority; the King County Mental Health Division; the administrator of Hilltop House; and the Puget Sound Council of Senior Citizens.

Mr. President, I am confident that my constituents who have worked so hard to reach consensus on tackling this tough issue will be pleased with the agreement reached on this bill. The conferees have largely adopted the House language on this matter and have provided additional protections and resources for non-elderly persons with disabilities. No one will argue that conference agreement is perfect; certainly not from the perspectives of each of the affected parties. It is a compromise that represents a sound and compassionate approach to guide housing policy in this area.

I have had the opportunity to work closely on the mixed housing issue over the past year with both the elderly and disability communities. They each care passionately about those they are committed to representing. I not only appeal to all affected parties to support this agreement and to ensure that it is implemented as smoothly as possible, but to work together to obtain the resources that are necessary if all low-income seniors and persons with disabilities are to have the decent and affordable housing options that they seek.

There are, of course, many other important provisions in the housing bill, including others that are very important for the elderly. As with the mixed housing issue, I believe the conferees have achieved a solid agreement on the key issues and compliment them for that. Earlier today, I introduced a housing bill that builds upon several provisions that are in this bill. I hope that these additional provisions will be given full consideration when the Congress turns again to housing policy.

Mr. President, I ask unanimous consent to have printed in the RECORD a copy of the Mixed Populations Position Statement of the Task Force on Elderly/Disabled Housing For Seattle/King County, WA.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

#### MIXED POPULATIONS POSITION STATEMENT

The issue of "mixed-populations" or two very different groups of people living in the same low-income federally assisted housing which was initially intended for and occupied by elderly households has grown dra-

matically in the last few years. The increasing pressure of younger, disabled households moving into these buildings has created a situation which can no longer be ignored and must be addressed with logical and reasonable methods of relief if this type of housing is to be preserved as an affordable housing resource.

The solutions to this complex problem must be locally designed, flexible, multifaceted, and creative based upon national standards but local conditions. At a minimum, these solutions should include strong management, more services and housing reserved for persons aged 62 years or older.

An opportunity to reserve some housing solely for persons 62 years of age and older.

A commitment to maintain and/or increase the amount of housing available to the large numbers of disabled households on waiting lists.

Funding to develop new federally assisted housing resources (such as public housing and Section 8) which are appropriately designed and operated and in which service and treatment needs of the elderly and disabled persons can be met.

Authorization and funding for appropriate and adequate support services for federally assisted housing residents that will include case management, assistance, and referral services.

A commitment on the part of local low-income housing providers to work cooperatively with other organizations and groups which represent client populations to insure that all needs are considered and addressed and which insures that there will be no large concentrations of disabled persons in a single facility. These local plans should be incorporated into the local Comprehensive Housing Affordability Strategy (CHAS).

Authorization and funding to provide adequate facility staffing which insures security and safety.

Allegiance to laws and principles which ensure no discrimination.

Mr. BRYAN. Mr. President, I would like to bring to Senator CRANSTON's attention a particular housing problem in Nevada. As you know, according to the 1990 census, Nevada was the fastest growing State in the Nation. The 65-year-old and over population has doubled over the past 10 years. There is an urgent need for housing the greater number of elderly residents living on fixed incomes.

The city of Henderson, a suburb of Las Vegas, is a community of about 80,000 residents. In 1982, the city's population was 26,000. The community has reacted admirably to the heavy demands of such rapid growth. The Henderson Association for Senior Citizen Housing is a voluntary, nonprofit organization which was organized to respond to the expanding need for elderly housing. They successfully built a 40-unit section 202 project 8 years ago and have procured the land, water allocation rights, and low-income tax credits to develop an additional 60 units.

For the past 6 years, the Henderson Association for Senior Citizen Housing has tried unsuccessfully to obtain section 202 funding for 60 units of elderly housing. Although the application was determined "approvable" by the Department of Housing and Urban Development

Region IX office, their request was consistently denied. The application was rejected because "there is no reasonable expectation that the sponsor can meet the minimum capital investment requirement and startup expenses."

The Henderson Association for Senior Citizen Housing has the land for these 60 units debt-free, most infrastructure to support the units is available, and they have \$28,000 for incidental startup expenses. The association also will work closely with the Clark County Public Housing Authority to provide the best service to the residents.

I am aware that funds for section 202 projects are limited. Nevertheless, when emphasis is placed on the amount of assets available, it becomes impossible for small, community-based nonprofits to compete with large multifunction national organizations. However, small community-based nonprofits play a significant role in providing for the needs of low-income residents in our Nation's suburbs and rural areas.

Several hundred residents are currently on the section 202 waiting list. It is clear that Nevada has a pressing demand for housing and supportive services for low-income senior citizens.

Mr. CRANSTON. The problem confronting the Henderson Association is shared by a number of small nonprofit organizations competing for section 202 funds. The involvement of community-based organizations in the development of supportive housing for the elderly should be considered a positive, not a negative, factor when HUD is selecting applicants for this assistance. For this reason H.R. 5334 includes a waiver of the owner deposit for applicants who are not affiliated with a national sponsor. This provision should ensure fair treatment for worthy organizations such as the Henderson Association for Senior Citizen Housing.

Mr. BRYAN. I thank Senator CRANSTON. I am pleased the conferees have addressed this important issue. I would also like to ask the Department of Housing and Urban Development to give the Henderson Association for Senior Citizen Housing application for section 202 funds, its highest priority for review in the new fiscal year.

Mr. GARN. Mr. President, I would like to take this opportunity to make a few comments about some of the provisions of this legislation other than the housing and Government-sponsored enterprise titles.

With respect to the money laundering title, I am pleased that the Banking Committee has been able to work with the administration in providing new enforcement authorities to deal with the most egregious cases of financial institutions involved in illicit money laundering activities. I would note, however, that one of the tools

provided in this bill, section 302, could be used to seize funds belonging to innocent third parties or institutions, when those funds are located in interbank accounts which have been previously used illegally.

It is important that this seizure authority be used judiciously and with significant attention to the effect such seizures might have on the interbank payment and clearing system. In order to ensure that imprudent use of this mechanism would not provoke uncertainty in markets leading to defaults in interbank payments, I would urge the Justice Department to consult closely with the Department of the Treasury in such cases.

The legislation also includes language that I authored to clarify the authority of the appropriate Federal bank regulatory agencies to prescribe pay standards for financial institutions. This language provides that the regulatory agencies are not to prescribe compensation standards that set a specific level or range of compensation for directors, officers, or employees of insured depository institutions.

Further, if an agency determines that excessive compensation is being paid to an officer, director, or employee, it must act on a case-by-case basis by issuing an order under section 8 of the Federal Deposit Insurance Act, or by issuing an order under other statutory authority. Further, it is expected that any such enforcement actions will be directed toward serious abuses and that the regulators will not micromanage the affairs of health institutions.

Mr. D'AMATO. Mr. President, I support the conference report to H.R. 5334, the Housing and Community Development Act of 1992. This legislation includes technical improvements to current housing programs and several new initiatives.

I am pleased that the conference report authorizes two programs which I proposed this year, the Enterprise Zone Homeownership Opportunity Grants Program and the National Cities in Schools Community Development Program. The EZ Home Program, by enabling moderate income home buyers to purchase homes in enterprise zones, will help stabilize communities and bring the benefits of home ownership to distressed areas. The Cities in Schools Program, already a demonstrated success, will support valuable locally based programs that encourage students to pursue their education and development strong job skills to position them for their careers.

The bill also includes \$40 million for the YouthBuild Program, which provides funds to develop low-income housing through programs that give disadvantaged youth education and employment opportunity.

Several provisions in this bill are very important to communities

throughout my State because they streamline and improve existing programs, such as the Home Program and public housing. These changes will allow current programs to operate more effectively and serve persons in need of affordable housing more successfully.

This bill also includes administration initiatives to improve public housing management, promote home ownership through vouchers, improve HUD's Multifamily Housing Management Program, create safe havens for mentally ill homeless persons, and promote upward mobility through the Moving to Opportunity Program.

I'd like to salute those who have contributed to this process, especially my colleague ALAN CRANSTON, the chairman of the Subcommittee on Housing and Urban Affairs, and Department of Housing and Urban Development Secretary Jack Kemp, who have both exhibited exceptional courtesy, commitment, perseverance, and fairness as they have strived to meet their goals in housing legislation this year. I feel that both should be proud of what they have achieved in this bill.

Mr. BROWN. Mr. President, today the Senate takes up the the conference report to accompany H.R. 5334, the National Affordable Housing Act Amendments of 1992. One important section of that bill is title X, the Residential Lead-Based Paint Hazard Reduction Act of 1992. This title includes important provisions aimed at reducing the threat of lead poisoning in children.

In addition, title X contains a provision directing the Environmental Protection Agency to promulgate regulations, within 18 months, to identify lead-contaminated soils. This provision and the definition in the bill of "lead-contaminated soils" is of concern to me and to the citizens of Aspen, Telluride, Leadville, and other Colorado communities.

EPA should interpret the language in title X as an indication of the need for regulations that reflect appropriate and varying action levels for lead in soils. EPA's rules should provide for the necessary site-by-site analysis that is implicit in the bill's definition of "lead-contaminated soil."

EPA's rules on identification of lead-contaminated soils should take into account site-specific factors and all current scientific knowledge and should not be based on a single uniform level of contamination.

Colorado communities such as Aspen and Telluride have one major historical feature in common. They were established from mine development in the late 1800's, and a portion of the towns were built on mine tailings. Many mine tailings continue to be contaminated with varying levels of lead. In some cases, these old mine tailings have been identified by the EPA as posing a risk to public health. The EPA

should identify such potential health risks, and I would encourage them to consider exposure risks based on site specific characteristics.

In the case of Aspen, which was placed on the National Priorities List in 1986, area residents have lived on the Smuggler site for over 100 years. There has never been a case of elevated blood lead levels reported during this time. Current tests conducted by the Agency for Toxic Substances and Disease Registry [ATSDR] to determine blood lead levels in children indicate that Aspen area children were not at risk. Their blood lead levels were found to be 2.7 ug/dl on a scale where the Centers for Disease Control finds a level below 10 to be at no risk.

EPA's plan for the remediation of the Smuggler site calls for digging up to 1 foot of lead-contaminated soil in residential areas to be replaced by uncontaminated soil placed over a felt-like liner. Other parts of the site, roads and parking areas are to be covered with asphalt. It is EPA's belief that remediation of this nature—digging up the lead tailing, causing some of it to become airborne—would place Aspen area residents at a lesser risk than if the soil were left undisturbed—despite 100 years of evidence to the contrary.

In Aspen, many health specialists including the ASTDR, Colorado Department of Health, and the Centers for Disease Control feel that there is no direct relationship between blood lead levels and soil lead levels.

These health specialists are more concerned, in fact, that the risk of exposure would dramatically increase if EPA carried out its proposed remediation plan by causing the lead to become airborne.

In order to avoid similar situations from occurring elsewhere, we should encourage EPA to establish guidelines for lead in soil remediation that allow for site-specific information to determine the appropriate level of cleanup.

EPA, industry and numerous communities are facing major decisions as to what are appropriate cleanup levels for soils contaminated with lead at Superfund sites. Studies continue to support the premise that numerous factors must be considered when characterizing lead exposures and appropriate remediation measures for all kinds of sites. It is known that potential health impacts from lead in soils vary greatly depending on the type of site and potential exposure routes.

Therefore, it is important for Congress, in this bill, to give the EPA direction on establishing appropriate guidelines that take into account this site specific information.

This will allow for more valid assumptions at particular sites and will result in corresponding action levels that are appropriate for the site. This will help to ensure that reasonable methods will be used to protect com-

munities from inappropriate, potentially unsafe, and costly cleanup remedies.

Mr. BOND. Mr. President, I rise in support of the conference report on the Housing and Community Development Act of 1992. This legislation reauthorizes and makes improvements in our housing and community development programs. This bill has been through a long process of negotiation and discussion both with the House of Representatives and the administration, and I think that it is a fair compromise which advances sensible housing policy. I hope that the administration will reconsider their threats to veto this bill. There are several sections of the bill which I think are particularly worthwhile.

The first is public housing management reform and the revitalization program for severely distressed public housing. The vast majority of the public housing units in the United States provides decent, safe, and sanitary housing for the 1.4 million families who live there. There are a significant number of public housing units, however, which house families in dangerous and dilapidated conditions. The National Commission on Severely Distressed Public Housing estimates that approximately 6 percent of the public housing stock—or 86,000 units—falls into this category.

It is simply inexcusable that the Federal Government spends billions of dollars on a program which houses poor families in squalor and crime. The problems associated with the inner-city poor—high rates of unemployment and teenage pregnancy, broken families, lack of education, drugs and crime—are exacerbated by packing families with children into dense, highrise buildings. The intolerable and seemingly intractable conditions at these developments have persisted for years.

The Federal Government built this housing. It continues to pay for its upkeep and modernization. There is no excuse for the Federal Government being the worst slumlord in America. It is time for a concerted attack on the problems at troubled public housing developments so that all public housing residents have a decent place to live.

Reforms need to proceed along two tracks. The first track is management reform aimed at improving the operating performance of public housing authorities which have been consistently mismanaged over the years. This legislation contains several management reforms, including Secretary Kemp's choice in management initiative, which will allow residents of severely distressed public housing to vote to choose new management for their development. This legislation will help HUD and the residents to take action to improve the management and accountability of the PHA by either find-

ing new management for the development or by petitioning the courts to put the PHA into receivership.

The second option which also must be pursued is to allow Federal housing dollars to be spent in new and innovative ways on severely distressed public housing. The current public housing modernization program is simply not adequate to remedy conditions at severely distressed developments. In these cases, where PHA mismanagement is not the issue, the problems at distressed developments have to be solved by residents and community groups being involved in a comprehensive process to rebuild and reconfigure existing buildings and to provide social services—health care, day care, job training—to address the root causes of social and economic distress. This bill contains an important new initiative to begin the process of solving the problems at severely distressed public housing.

The Government should not be operating a program which houses families in inhumane squalor and exacerbates their problems. Both management reform and money for renovation and social services are needed so public housing can provide all of its residents with a decent place to live.

Another important section of this bill makes some changes in the Home Program so that cities and States will be able to use the program more easily. In 1990, Congress recognized that the United States needed a new national housing policy that addressed housing needs more effectively than the old developer-driven housing programs of the past. The result of Congress' deliberations was the Home Program—a flexible system of Federal funding to State and local governments to maintain the supply of affordable housing.

One of the guiding principles behind the Home Program is that Federal money should be used to leverage other resources so that we can get the most housing for our dollars spent. All of the different pieces of the housing puzzle need to fit together—the low-income housing tax credit, rental assistance, public housing, State and local programs—all need to be coordinated locally as part of an overall housing strategy for the community.

State and local governments and community based nonprofits have a fine track record in creating affordable housing—in many ways better than the Federal Government—and Home taps their expertise. The Home Program will give cities and States a chance to carry out innovative housing strategies that meet local needs.

Another provision I really like in this housing bill is the Youthbuild Program. This is a terrific program which has a chapter in St. Louis. It couples job training with the creation of affordable housing by training low-income young people to renovate or con-

struct housing. Coupled with the authorization for Youthbuild is a provision giving low-income residents preference, where possible, for Federal construction and rehabilitation jobs in their neighborhoods. Housing programs ought to help create jobs in the inner city so that we get a double benefit for every tax dollar spent.

Housing problems can be addressed. It takes well-designed programs with decentralized decisionmaking, coordination with social services, and adequate Federal funding. Millions of Americans will be left behind unless we address this fundamental human need—fit and affordable housing. Housing will not solve all of the social problems plaguing America, but without decent housing, the problems can't be solved. This bill take us in the right direction, and I encourage my colleagues to support it.

Mr. CHAFEE. Mr. President, I would like to take this opportunity to say a few words about the lead provisions contained in title X of the housing bill.

Three of us from the Senate Environment Committee were named as conferees for purposes of title X—the lead abatement portion of the bill. The conferees from the Banking Committee worked with us for several days to develop what I believe is an excellent agreement.

Mr. President, the lead provisions break significant new ground in the effort to protect our children and others from exposure to lead. Specifically, subtitle B of title X makes amendments to the Toxic Substances Control Act that would require EPA to issue training and certification standards for those who are involved in lead abatement activities in public and private housing, public and commercial buildings, bridges, and other structures. These standards could then be implemented by States as part of an authorized State lead control program. States would be assisted in developing these programs through Federal grants from EPA and HUD.

In addition, Mr. President, I am pleased to report that the conference report contains a requirement that hazards from lead-based paint be disclosed during transactions for the purchase of residential real estate or the leasing of property. The provision incorporates a concept I have long advocated and contains language similar to an amendment I offered, and the Environment Committee accepted unanimously, last year during consideration of S. 391, the Lead Exposure Reduction Act, a bill authored by Senator REID.

In conclusion, Mr. President, I would like to thank my colleague, Senator CRANSTON, who has long been concerned with the issue of lead poisoning, for working with those of us on the Environmental Committee, and for accommodating so many of our concerns in title X. I would also like to thank

my colleague on the Environmental Committee, Senator REID, who for 3 years has tirelessly fought for legislation to reduce exposure to lead.

I look forward to seeing the results from this significant new program.

Mr. FORD. Mr. President, I ask unanimous consent that the conference report be deemed agreed to.

The PRESIDING OFFICER. Without objection, it is so ordered.

So the conference report was deemed agreed to.

Mr. BAUCUS addressed the Chair.

The PRESIDING OFFICER. The Senator from Montana.

#### THE MONTANA WILDERNESS BILL

Mr. BAUCUS. Mr. President, earlier today, I indicated that this evening I would call up for passage the Montana wilderness bill.

I do so because we in our State of Montana congressional delegation have been working on this issue for 12 years. At one time, we in the Congress passed a bill. It was in 1988. It was put together by the Montana delegation, two Senators and two House Members; three Democrats, one Republican.

President Reagan, unfortunately, vetoed that bill and we are back here 4 years later attempting to once again pass the Montana wilderness bill.

I will not take the time of my colleagues except to say that we are here tonight faced with one solution and one solution only that can be enacted into law. The Senate passed its version of the Montana wilderness bill not too long ago. The House of Representatives passed its own separate different version of the Montana wilderness bill just a week ago, last Friday, to be exact.

I have offered a compromise, a midway position, which essentially splits the difference between the House-passed bill and the Senate-passed bill.

I am confident that is the only version that can be enacted into law in this Congress. I say that because it is a midway position.

I also say that because I have checked with my side of the aisle here in the Senate, with my Democratic colleagues, who have agreed to this version. It has been cleared on the Democratic side.

In addition, the chairman of the House Interior Committee, GEORGE MILLER, and the subcommittee chairman of the relevant jurisdiction, BRUCE VENTO, and others who are interested in this issue in the House on the Democratic side, have also all indicated their agreement to this compromised version of the bill.

I also say it is probably the only version that can be passed because Montana editorial writers have editorialized in favor of this approach. Essentially, they want us in the Montana delegation to finally pass legislation, finally resolve it. And they all are also

indicating that, among the various versions, the midway provision is probably about the only solution that can be passed and enacted into law.

Now I know that this compromise version is not what I would prefer. It is not the bill that I first introduced, but I must work with my colleagues, both here in the Senate, with my colleague from Montana, Senator BURNS, as well as with my two colleagues in the House.

I also know that this compromise version is not the preferred version of my colleague from Montana. He would prefer a different version. I prefer a different version.

But we must face reality. We must realize that in politics, as if life, usually some compromise is necessary if we are going to get along with each other, if we are going to reach resolutions. We must all remember, and particularly those interest groups that have a very great stake in this bill, that when the interest groups ask for everything and they want more for themselves, they are most likely going to get nothing. It is far better usually to ask for a half loaf, or three-quarters of a loaf, rather than the whole loaf.

As I stand here and describe the Montana wilderness bill, I am reminded of the Clean Air Act. I am reminded because I see my colleague from Wyoming, Senator SIMPSON. We all will remember that when we finally enacted the Clean Air Act it was a compromise. It was a compromise between the House and the Senate, a compromise between the Congress and the President, between the Congress and the executive branch.

Many of us met in S-224, a room not too far from this Chamber, for approximately a month, where we hammered out a resolution. We hammered out a solution, we hammered out a compromise, because it was only a compromise that would be enacted into law. It was a collection and accumulation of the interests, of the views of those in the Congress who were interested in the issue.

In the same vein, the compromise I have before the Senate here tonight is also a compromise. It is the hammered out resolution among all of those who have competing points of view.

Now, I urge the other side to accept this. This is a compromise.

I understand that Senators from Colorado—one Republican, one Democrat—have just today reached their agreement, their compromise, their resolution of the Colorado wilderness bill. I further understand that it has been cleared on both sides—on the Democratic side, on the Republican side—and it will be brought up in a matter of minutes later tonight for approval by this body.

It seems to me that if the State of Colorado can agree upon its wilderness bill—an issue which must be almost as

contentious in Colorado as it is in our State of Montana—that so too can we in the Montana delegation reach an agreement, reach a resolution, reach a compromise.

I also have heard that perhaps the other body tomorrow when it meets may or may not consider measures passed by the Senate. We do not know what measures, if any, the other body will receive and allow to pass tomorrow when it does meet.

I have heard various versions of what the House has said. And I have heard various versions of what the House might do tomorrow. I do not know what the House is going to do tomorrow. I do not know Mr. President, that the House knows what the House is going to do tomorrow.

But I do know this. I do know that it is impossible for the House to receive the Montana wilderness bill if we do not pass it out of this body here tonight. I also know that the version that the House will accept will be this version.

I have checked with so many House Members and I can tell this body that if this version I present tonight were amended in any significant way, it could not possibly pass that other body.

So if our goal is to pass a wilderness bill, to finally put to rest this issue which has bedeviled our State for so long, this issue which has been an albatross around the neck of our State, this issue which has been such a burden on the back of Montanans, I ask us to resolve it and pass it tonight.

I see my colleague from Montana, Senator BURNS, is on the floor. He well knows how hard we both have worked on this issue. I know how desperately much the Senator from Montana, my colleague, wants to resolve this, too. But I also know this issue has been cleared on the Democratic side. I would hope that the Senator from Montana, my colleague, Senator BURNS, would talk to other Republican colleagues to be sure, since this is a Montana resolution, that we Montanans decide this issue.

Because it is clear to me if the Senator from Montana, my colleague, would like this version, this compromise, this midway position to be enacted, that he would have significant influence on other colleagues on his side, I very much hope—I see him on the floor—that he has done that.

I very much hope he himself would agree to this compromise, because if he does agree to this compromise he would have significant influence on his colleagues.

So, Mr. President, I urge us tonight, in these few remaining minutes before the Senate adjourns, to put this issue behind us. It is a midway position. It is a resolution. And I can tell my colleagues if we do not pass this compromise tonight, we will be faced with

it next year. We will be faced with this issue next year. And it will be, in my judgment, even more contentious, even more complicated than it is now.

This is the last hope, the last best chance for our State. I urge us to resolve it this evening.

Mr. SIMPSON. I understand.

#### UNANIMOUS CONSENT REQUEST

Mr. BAUCUS. Mr. President, I ask unanimous consent that the Chair lay before the Senate a message from the House on S. 1696, the Montana wilderness bill; that the Senate concur in the amendment of the House with my substitute amendment at the desk; that the motion be agreed to; that the motion to reconsider be laid upon the table, and that my proposed amendment be entered in the RECORD.

The proposed amendment is as follows:

In lieu of the matter proposed by the House of Representatives, insert the following:

#### SECTION 1. SHORT TITLE.

This Act may be referred to as the "Montana National Forest Management Act of 1992".

#### SEC. 2. FINDINGS AND PURPOSES.

(a) FINDINGS.—The Congress finds that—  
(1) Many areas of undeveloped National Forest System lands in the State of Montana possess outstanding natural characteristics which give them high value as wilderness and will, if properly preserved, contribute as an enduring resource of wild land for the benefit of the American people.

(2) The existing Department of Agriculture Land and Resource Management Plans for Forest System lands in the State of Montana have identified areas which, on the basis of their land form, ecosystem, associated wildlife, and location will help to fulfill the National Forest System's share of a quality National Wilderness Preservation System.

(3) The existing Department of Agriculture Land and Resource Management Plans for National Forest System lands in the State of Montana and the related congressional review of such lands have also identified areas that do not possess outstanding wilderness attributes or possess outstanding energy, mineral, timber, grazing, dispersed recreation, or other values. Such areas should not be designated as components of the National Wilderness Preservation System but should be available for multiple uses under the land management planning process and other applicable law.

(b) PURPOSES.—The purposes of this Act are to—

(1) designate certain National Forest System lands in the State of Montana as components of the National Wilderness Preservation System, in furtherance of the purposes of the Wilderness Act (16 U.S.C. 1131 et seq.), in order to preserve the wilderness character of the land and to protect watersheds and wildlife habitat, preserve scenic and historic resources, and promote scientific research, primitive recreation, solitude, and physical and mental challenge; and

(2) ensure that certain other National Forest System lands in the State of Montana will be managed under the national forest land and resource management plans.

#### SEC. 3. WILDERNESS DESIGNATIONS.

(a) DESIGNATION.—In furtherance of the purposes of the Wilderness Act of 1964, the

following lands in the State of Montana are designated as wilderness and, therefore, as components of the National Wilderness Preservation System:

(1) Certain lands in the Beaverhead, Bitterroot, and Deerlodge National Forests, which comprise approximately 31,660 acres, as generally depicted on a map entitled "Anaconda-Pintler Wilderness Additions—Proposed" (North Big Hole, Storm Lake, Upper East Fork), dated September 1992, and which are hereby incorporated in and shall be deemed to be a part of the Anaconda-Pintler Wilderness.

(2) Certain lands in the Beaverhead National Forest, which comprise approximately 25,000 acres, as generally depicted on a map entitled "Italian Peaks Wilderness—Proposed", dated September 1992, and which shall be known as the Italian Peaks Unit of the Great Divide Wilderness.

(3) Certain lands in the Beaverhead National Forest, which comprise approximately 80,500 acres, as generally depicted on a map entitled "East Pioneer Wilderness—Proposed", dated September 1992, and which shall be known as the East Pioneer Wilderness.

(4) Certain lands in the Beaverhead National Forest, Montana, comprising approximately 35,000 acres, as generally depicted on a map entitled "West Big Hole Wilderness—Proposed", dated September 1992, and which shall be known as the West Big Hole Unit of the Great Divide Wilderness.

(5) Certain lands in the Bitterroot, Deerlodge, and Lolo National Forests, which comprise approximately 64,800 acres, as generally depicted on a map entitled "Stony Mountain Wilderness—Proposed", dated September 1992, and which shall be known as the Stony Mountain Wilderness.

(6) Certain lands in the Bitterroot and Lolo National Forests, which comprise approximately 55,600 acres, as generally depicted on maps entitled "Selway-Bitterroot Wilderness Additions—Proposed", dated September 1992, and which are hereby incorporated in and shall be deemed to be a part of the Selway-Bitterroot Wilderness.

(7) Certain lands in the Custer National Forest, which comprise approximately 5,800 acres, as generally depicted on a map entitled "Lost Water Canyon Wilderness—Proposed", dated September 1991, and which shall be known as the Lost Water Canyon Wilderness.

(8) Certain lands in the Custer National Forest, which comprise approximately 6,000 acres, as generally depicted on a map entitled "Custer Absaroka Beartooth Wilderness Additions—Proposed" (Burnt Mountain, Timberline Creek, Stateline and Mystic Lake), dated November 1991, and which are hereby incorporated in and shall be deemed to be a part of the Absaroka Beartooth Wilderness.

(9) Certain lands in the Deerlodge and Helena National Forests, which comprise approximately 19,000 acres, as generally depicted on a map entitled "Blackfoot Meadow-Electric Peak Wilderness—Proposed", dated September 1992, and which shall be known as the Blackfoot Meadow Unit of the Great Divide Wilderness.

(10) Certain lands in the Flathead and Kootenai National Forests, which comprise approximately 118,000 acres, as generally depicted on a map entitled "North Fork Wilderness—Proposed" (Tuchuck, Thompson-Seton, and Mount Hefty)", dated September 1992, and which shall be known as the North Fork Wilderness.

(11) Certain lands in the Flathead, Helena, Lolo, and Lewis and Clark National Forests,

which comprise approximately 223,080 acres, as generally depicted on maps entitled "Arnold Bolle Additions to the Bob Marshall Wilderness—Proposed" (Silver King-Falls Creek, Renshaw, Clearwater-Monture, Deep Creek, Teton High Peak, Volcano Reef, Slippery Bill, Limestone Cave, Choteau Mountain, and Crown Mountain), dated October 1992, which shall be known as the Arnold Bolle-Bob Marshall Wilderness Additions and are incorporated in and shall be deemed to be a part of the Bob Marshall Wilderness.

(12) Certain lands in the Flathead National Forest, which comprise approximately 960 acres, as generally depicted on a map entitled "Mission Mountains Wilderness Additions—Proposed", dated September 1991, and which are hereby incorporated in and shall be deemed to be a part of the Mission Mountain Wilderness.

(13) Certain lands in the Flathead and Lolo National Forests, comprising approximately 159,500 acres, as generally depicted on maps entitled "Jewel Basin/Swan Wilderness—Proposed", dated October 1992. Those lands contiguous to the west slope of the Bob Marshall Wilderness referred to in this paragraph are hereby incorporated in and shall be deemed to be a part of the Bob Marshall Wilderness, while the remaining lands shall be known as the Swan Crest Wilderness.

(14) Certain lands in the Gallatin National Forest, which comprise approximately 14,440 acres, as generally depicted on a map entitled "Gallatin Absaroka Beartooth Wilderness Additions—Proposed" (Dexter Point Tie Creek and Mt. Rae), dated September 1992, and which are hereby incorporated in and shall be deemed to be a part of the Absaroka Beartooth Wilderness.

(15) Certain lands in the Gallatin and Beaverhead National Forests, which comprise approximately 20,100 acres, as generally depicted on a map entitled "Lee Metcalf Cowboys Heaven Addition—Proposed", dated September 1992, and which are hereby incorporated in and shall be deemed to be a part of the Lee Metcalf Wilderness.

(16) Certain lands in the Gallatin National Forest, which comprise approximately 19,000 acres, as generally depicted on a map entitled "Earthquake Wilderness—Proposed", dated October 1992, and which shall be known as the Earthquake Unit of the Great Divide Wilderness.

(17) Certain lands in the Helena National Forest, which comprise approximately 24,000 acres, as generally depicted on a map entitled "Camas Creek Wilderness—Proposed", dated September 1992, and which shall be known as the Camas Creek Wilderness.

(18) Certain lands in the Helena National Forest, which comprise approximately 15,000 acres, as generally depicted on a map entitled "Mount Baldy Wilderness—Proposed", dated September 1991, and which shall be known as the Mount Baldy Wilderness.

(19) Certain lands in the Helena National Forest, Montana, which comprise approximately 10,500 acres, as generally depicted on a map entitled "Gates of the Mountains Wilderness Additions—Proposed" (Big Log), dated September 1992, and which are hereby incorporated in and shall be deemed to be a part of the Gates of the Mountain Wilderness.

(20) Certain lands in the Helena National Forest, which comprise approximately 8,500 acres, as generally depicted on a map entitled "Black Mountain Wilderness—Proposed", dated September 1992, and which shall be known as the Black Mountain Unit of the Great Divide Wilderness.

(21) Certain lands in the Kootenai National Forest, which comprise approximately 34,840

acres, as generally depicted on a map entitled "Cabinet Mountains Wilderness Additions—Proposed", dated September 1992, and which are hereby incorporated in and shall be deemed to be part of the Cabinet Mountains Wilderness.

(22) Certain lands in the Kaniksu and Kootenai National Forest, which comprise approximately 50,000 acres, as generally depicted on a map entitled "Scotchman Peaks Wilderness—Proposed", dated September 1991, which shall be known as the Scotchman Peaks Wilderness.

(23) Certain lands in the Kootenai National Forest which comprise approximately 22,000 acres, as generally depicted on a map entitled "Yaak Wilderness—Proposed" (Roderick Mountain), dated September 1992, which shall be known as the Yaak Wilderness.

(24) Certain lands in the Kootenai and Lolo National Forests, which comprise approximately 17,900 acres, as generally depicted on a map entitled "Cataract Peak Wilderness—Proposed", dated September 1991, which shall be known as the Cataract Peak Wilderness.

(25) Certain lands in the Lolo National Forest, which comprise approximately 17,900 acres, as generally depicted on a map entitled "Cube Iron/Mount Silcox Wilderness—Proposed", dated November 1991, which shall be known as the Cube Iron/Mount Silcox Wilderness.

(26) Certain lands in the Lolo National Forest, which comprise approximately 94,700 acres, as generally depicted on a map entitled "Great Burn Wilderness—Proposed", dated September 1991, which shall be known as the Great Burn Wilderness.

(27) Certain lands in the Lolo National Forest, which comprise approximately 60,100 acres, as generally depicted on a map entitled "Quigg Peak Wilderness—Proposed", dated September 1991, which shall be known as the Quigg Peak Wilderness.

(28) Certain lands in the Kootenai National Forest, which comprise approximately 25,000 acres, as generally depicted on a map entitled "Trout Creek Wilderness—Proposed", dated September 1992, and which shall be known as the Trout Creek Wilderness.

(29) Certain lands in the Helena National Forest, which comprise approximately 19,000 acres, as generally depicted on a map entitled "Nevada Mountain Wilderness—Proposed", dated September 1992, and which shall be known as the Nevada Mountain Unit of the Great Divide Wilderness.

(30) Certain lands in the Helena National Forest, which comprise approximately 60,000 acres, as generally depicted on a map entitled "Elkhorn Wilderness—Proposed", dated September 1992, and which shall be known as the Elkhorn Wilderness.

(31) Certain lands in the Gallatin National Forest, which comprise approximately 500 acres, as generally depicted on a map entitled "North Absaroka Wilderness Addition—Proposed (Republic Mountain)", dated September 1992, and which are hereby incorporated in and shall be deemed a part of the North Absaroka Wilderness.

(b) MAPS AND LEGAL DESCRIPTIONS.—(1) The Secretary of Agriculture (hereinafter referred to as the "Secretary") shall file the maps referred to in this section and legal descriptions of each wilderness area designated by this section with the Committee on Energy and Natural Resources of the United States Senate and the Committee on Interior and Insular Affairs of the United States House of Representatives, and each such map and legal description shall have the same force and effect as if included in this Act.

(2) The Secretary may correct clerical and typographical errors in the maps and the legal descriptions submitted pursuant to this section.

(3) Each map and legal description referred to in this section shall be on file and available for public inspection in the office of the Chief of the Forest Service, Washington, D.C. and at the office of the Regional Forester of the Northern Region.

(c) ADMINISTRATION.—Subject to valid existing rights, each wilderness area designated by this section shall be administered by the Secretary of Agriculture in accordance with the provisions of the Wilderness Act of 1964, except that, with respect to any area designated in this section, any reference to the effective date of the Wilderness Act shall be deemed to be a reference to the date of enactment of this Act.

(d) WILDERNESS AREA PERIMETERS.—Congress does not intend that the designation of wilderness areas in this section will lead to the creation of protective perimeters or buffer zones around such areas. The fact that nonwilderness activities or uses can be seen or heard from areas within a wilderness area shall not, of itself, preclude such activities or uses up to the boundary of the wilderness area.

(e) GRAZING.—The grazing of livestock, where established prior to the date of enactment of this Act, in wilderness areas designated in this section shall be administered in accordance with section 4(d)(4) of the Wilderness Act of 1964 and section 108 of an Act entitled "An Act to designate certain National Forest System Lands in the States of Colorado, South Dakota, Missouri, South Carolina, and Louisiana for inclusion in the National Wilderness Preservation System, and for other purposes" (94 Stat. 3271; 16 U.S.C. 1133 note).

(f) STATE FISH AND GAME AUTHORITY.—In accordance with section 4(d)(7) of the Wilderness Act of 1964, nothing in this Act shall be construed as affecting the jurisdiction or responsibilities of the State of Montana with respect to wildlife and fish in the national forests of Montana.

(g) HUNTING.—Nothing in this Act or the Wilderness Act of 1964 shall be construed to prohibit hunting within the wilderness areas designated in this section.

(h) COLLECTION DEVICES.—(1) Within the wilderness areas designated in this section, the installation and maintenance of essential hydrological, meteorological, or climatological collection devices and ancillary facilities is permitted, subject to such conditions as the Secretary deems desirable.

(2) Access to the devices and facilities described in paragraph (1) shall be by the means historically used, if that method is the least intrusive practicable means available. Access, installation, and maintenance shall be compatible with the provisions of the Wilderness Act.

#### SEC. 4. WATER.

(a) FINDINGS, PURPOSE, AND DEFINITIONS.—(1) Congress finds that—

(A) the lands designated as wilderness by this Act are located at the headwaters of the streams and rivers on those lands, with no actual or proposed water resource facilities located upstream from such lands and no opportunities for diversion, storage, or other uses of water occurring outside such lands that would adversely affect the wilderness values of such lands;

(B) the lands designated as wilderness by this Act are not suitable for use for development of new water resource facilities, or for the expansion of existing facilities; and

(C) therefore, it is possible to provide for proper management and protection of the water-related wilderness values of such lands in ways different from those utilized in other legislation designated as wilderness lands not sharing the attributes of the lands designated as wilderness by this Act.

(2) The purpose of this section is to protect the water-related wilderness values of the lands designated as wilderness by this Act by means other than those based on a Federal reserved water right.

(3) As used in this section—

(A) the term "water resource facility" means irrigation and pumping facilities, reservoirs, water conservation works, aqueducts, canals, ditches, pipelines, wells, hydropower projects, and transmission and other ancillary facilities, and other water diversion, storage, and carriage structures; and

(B) the term "historic", used with reference to rates of flow, quantities of use, or timing of use of water, means the pattern of actual use or operation of a facility over a representative period of time prior to the date of enactment of this Act.

(b) RESTRICTION ON RIGHTS AND DISCLAIMER OF EFFECT.—(1) Neither the Secretary nor any other officer, employee, or agent of the United States shall assert any claim, and no court or agency of the United States shall consider any claim asserted by any other person, to any right with respect to any waters in the State of Montana based on any construction of any portion of this Act or the designation of any lands as wilderness by this Act as constituting an express or implied reservation of water or water rights.

(2)(A) Nothing in this Act shall be construed as a creation, recognition, disclaimer, relinquishment, or reduction of any water rights of the United States in the State of Montana existing before the date of enactment of this Act.

(B) Nothing in this Act shall be construed as constituting an interpretation of any other Act or any designation made by or pursuant thereto.

(C) Nothing in this section shall be construed as establishing a precedent with regard to any future wilderness designations.

(c) NEW OR EXPANDED PROJECTS.—Notwithstanding any other provision of law, on and after the date of enactment of this Act neither the President nor any other officer, employee, or agent of the United States shall fund, assist, authorize, or issue a license or permit for—

(1) the development of any new water resource facility within the lands designated as wilderness by this Act; or

(2) the enlargement of a water resource facility or the expansion of the historic rate of diversion, quantity of use, or timing of use of a water resource facility within the lands designated as wilderness by this Act.

(3) except as provided in subsection (d) of this section, nothing in this Act shall be construed to affect or limit operation, maintenance, repair, modification, or replacement of water resource facilities in existence on the date of enactment of this Act within the boundaries of the lands designated as wilderness by this Act.

(d) ACCESS AND OPERATION.—(1) Subject to the provisions of this subsection, the Secretary shall allow reasonable access to water resource facilities in existence on the date of enactment of this Act within lands designated as wilderness by this Act, including motorized access where necessary and customarily employed on routes existing as of the date of enactment of this Act.

(2) Subject to the provisions of this subsection, the Secretary shall allow the present diversion, carriage, and storage capacity of water resource facilities existing on the date of enactment of this Act within wilderness areas designated by this Act, and access routes to such facilities existing and customarily employed as of such date, to be operated, maintained, repaired, and replaced as necessary to maintain the present function, design, and serviceable operation of the facilities, so long as such activities have no greater adverse impacts on wilderness values than as of the date of enactment of this Act.

(3) Water resource facilities, and access routes serving such facilities, existing on the date of enactment of this Act shall be maintained and repaired when and to the extent necessary to prevent increased adverse impacts on wilderness values.

(4) The historic rate of diversion, quantity of use, or timing of use of water resource facilities existing on the date of enactment of this Act within lands designated as wilderness by this Act shall not be increased.

(e) MONITORING AND IMPLEMENTATION.—The Secretaries of Agriculture and the Interior shall monitor the operation of and access to water resource facilities within the boundaries of the lands designated as wilderness by this Act and take all steps necessary to implement the provisions of this section.

#### SEC. 5. SPECIAL MANAGEMENT AREAS.

(a) DESIGNATIONS.—For the purposes of conserving, protecting and enhancing the exceptional scenic, fish and wildlife, biological, educational and recreational values of certain National Forest System lands in the State of Montana, the following designations are made:

(1) The Mount Helena National Education and Recreation Area located in the Helena National Forest, comprising approximately 5,120 acres, as generally depicted on a map entitled "Mount Helena National Education and Recreation Area—Proposed", dated September 1992.

(2) The Hyalite National Education and Recreation Area located in the Gallatin National Forest, comprising approximately 18,900 acres, as generally depicted on a map entitled "Hyalite National Education and Recreation Area—Proposed", dated September 1992.

(3) The Northwest Peak National Recreation Area located in the Kaniksu and Kootenai National Forests, comprising approximately 16,700 acres, as generally depicted on a map entitled "Northwest Peak National Recreation and Scenic Area—Proposed", dated September 1991.

(4) The Buckhorn Ridge National Recreation Area located in the Kaniksu and Kootenai National Forests, comprising approximately 20,000 acres, as generally depicted on a map entitled "Buckhorn Ridge National Recreation Area—Proposed", dated September 1991.

(5) The West Big Hole National Recreation Area located in the Beaverhead National Forest, comprising approximately 90,000 acres, as generally depicted on a map entitled "West Big Hole National Recreation Area—Proposed", dated September 1992, and which shall be known as the West Big Hole National Recreation Area.

(b) MAPS.—The Secretary shall file the maps referred to in this section with the Committee on Energy and Natural Resources, United States Senate, and the Committee on Interior and Insular Affairs, United States House of Representatives, and each such map shall have the same force and effect as if included in this Act: *Provided*, That

correction of clerical and typographical errors in such maps may be made. Each such map shall be on file and available for public inspection in the office of the Chief of the Forest Service and the office of the Regional Forester of the Northern Region.

(c) **MANAGEMENT.**—(1) Except as otherwise may be provided in this subsection, the Secretary shall administer the areas designated in subsection (a) so as to achieve the purposes of their designation and in accordance with the laws and regulations applicable to the National Forest System.

(2) Subject to valid existing rights, all federally owned lands within the areas designated in subsection (a) are hereby withdrawn from all forms of entry, appropriation and disposal under the mining and public land laws, and disposition under the geothermal and mineral leasing laws.

(3) Commercial timber harvesting is prohibited in the areas designated by this section with the following exceptions:

(A) Nothing in this Act shall preclude such measures which the Secretary, in his discretion, deems necessary in the event of fire, or infestation of insects or disease.

(B) Fuel wood, post and pole gathering may be permitted.

(C) Commercial timber harvesting may be permitted in the Hyalite National Recreation and Education Area, but must be compatible with the purposes of its designation.

(4) Where the Secretary determines that such use is compatible with the purposes for which an area is designated, the use of motorized equipment may be permitted in the areas subject to applicable law and applicable land and resource management plans.

(5) The grazing of livestock, where established prior to the date of enactment of this Act may be permitted to continue subject to applicable law and regulations of the Secretary.

(d) **NATIONAL RECREATION AREAS.**—The Secretary shall manage the Mount Helena and Hyalite National Education and Recreation Areas with a focus on education. All management activities shall be conducted in a manner that provides the public with an opportunity to become better informed about natural resource protection and management.

(e) **LAND AND RESOURCE MANAGEMENT PLANS.**—Those areas established pursuant to subsection (a) shall be administered as components of the national forests wherein they are located. Land and resource management plans for the affected national forests prepared in accordance with the Forest and Rangeland Renewable Resources Planning Act, as amended by the National Forest Management Act, shall achieve the purposes for which the areas are designated. The provisions of the national forest land and resource management plan, relating to each area designated by this section, shall also be available to the public in a document separate from the rest of the forest plan.

#### SEC. 6. WILDERNESS STUDY AREAS.

(a) **DESIGNATION.**—The following areas are hereby designated as wilderness study areas and shall be managed in accordance with the provisions of this section:

(1) Certain lands in the Custer National Forest, comprising approximately 22,000 acres, as generally depicted on a map entitled "Line Creek Plateau Wilderness Study Area—Proposed", dated October 1992.

(2) Certain lands in the Lewis and Clark and Gallatin National Forests, which comprise approximately 115,000 acres, as generally depicted on a map entitled "Crazy Mountain Wilderness Study Area—Pro-

posed", dated October 1992. The Forest Service shall complete a study of public and private land consolidation alternatives for this area which shall be submitted to the appropriate committees of Congress 2 years after the date of the enactment of this Act.

(3) Certain lands in the Flathead National Forest, which comprise approximately 16,000 acres, as generally depicted on a map entitled "North Swan Wilderness Study Area—Proposed", dated September 1992.

(b) **REPORT.**—When the forest plans are revised, the Secretary shall submit a report to the Committee on Energy and Natural Resources of the United States Senate and the Committee on Interior and Insular Affairs of the United States House of Representatives containing recommendations as to whether the areas designated in subsection (a) should be added as components of the National Wilderness Preservation System.

(c) **MANAGEMENT.**—Subject to valid existing rights, the wilderness study areas designated in subsection (a) shall be managed to protect their suitability for inclusion in the National Wilderness Preservation System.

(d) **MAPS.**—The Secretary shall file the maps referred to in this section with the Committee on Interior and Insular Affairs, United States House of Representatives, and the Committee on Energy and Natural Resources, United States Senate, and each such map shall have the same force and effect as if included in this Act: *Provided*, That correction of clerical and typographical errors in these maps may be made. Each map shall be on file and available for public inspection in the office of the Chief of the Forest Service and the Regional Forester of the Northern Region.

(e) **ADJUSTMENT.**—Certain lands in the Beaverhead National Forest, which comprise approximately 700 acres, as generally depicted on a map entitled "The West Pioneers Boundary Adjustment—Proposed," dated September 1992, shall be deleted from the West Pioneers Wilderness Study Area and shall no longer be subject to the provisions of Public Law 95-150.

#### SEC. 7. BADGER-TWO MEDICINE AREA.

(a) **WITHDRAWAL.**—(1) Subject to valid existing rights including rights held by the Blackfeet nation under existing treaties and statute, all federally owned lands as depicted on a map entitled "Badger-Two Medicine Area", dated September 1991, comprising approximately 116,600 acres, are withdrawn from all forms of entry, appropriation, and disposal under the mining and public land laws and from disposition under the geothermal and mineral leasing laws. Until otherwise directed by Congress, the Secretary shall manage this area so as to protect its wilderness qualities.

(2) Nothing in this section shall preclude the gathering of timber by the Blackfeet Tribe (the "Tribe") in exercise of valid treaty rights within the Badger-Two Medicine Area.

(3)(A) With respect to oil and gas leases on Federal lands within the Badger-Two Medicine Area, no surface disturbance shall be permitted pursuant to such leases until Congress determines otherwise.

(B) Notwithstanding any other law, the term of any oil and gas lease subject to the limitations imposed by this section shall be extended for a period of time equal to the term that such limitation remains in effect.

(b) **REVIEW.**—The Secretary shall conduct a review of the area referred to in subsection (a) in accordance with the Wilderness Act of 1964 and the provisions of this subsection. Not later than 5 years after the date of en-

actment of this Act, the Secretary shall report to Congress. In conducting this review:

(1) The Secretary shall establish a committee composed of 1 representative each from the Blackfeet Tribal Business Council, the Blackfeet Tribal traditionalists, and the National Park Service, as well as at least one representative of various concerned user groups, including proportional representation for environmental groups and industry groups. The Committee shall not exceed eleven members. The Blackfeet Tribal Business Council shall choose the 2 Tribal representatives. The Blackfeet Tribal Business Council shall conduct a public meeting to receive recommendations of the community regarding the selection of these members. The committee shall regularly advise the Secretary during the preparation of the report required in this subsection and submit its findings to Congress concurrently with those of the Secretary.

(2) Special consideration shall be given to the religious, wilderness and wildlife uses of the area, taking into account any treaties the United States has entered into with the Blackfeet Nation.

(3) In consultation with the committee, the Secretary shall establish a process to provide information to the Tribe and interested public about options for future designation of the Badger-Two Medicine Area.

(c) **RIGHTS.**—Nothing in this section shall be construed to diminish, prejudice, add to, or otherwise affect the treaty rights of the Blackfeet Tribe or the rights of the United States.

#### SEC. 8. SEVERED MINERALS EXCHANGE.

(a) **FINDINGS.**—The Congress finds that—

(1) underlying certain areas in Montana described in subsection (b) are mineral rights owned by subsidiaries of Burlington Resources, Incorporated (hereinafter collectively referred to in this section as the "company");

(2) there are federally owned minerals underlying privately owned lands lying outside those areas;

(3) the company has agreed in principle with the Department of Agriculture to an exchange of mineral rights to consolidate Federal surface and subsurface ownerships and to avoid potential conflicts with the surface management of such areas; and

(4) it is desirable that an exchange be completed within 2 years after the date of enactment of this Act.

(b) **DESCRIPTION OF MINERAL INTERESTS.**—

(1) Pursuant to an exchange agreement between the Secretary and the company, the Secretary may acquire mineral interests owned by the company underlying surface lands owned by the United States located in the areas depicted on the maps entitled "Severed Minerals Exchange, Clearwater-Monture Area", dated September 1988 and "Severed Minerals Exchanges, Gallatin Area", dated September 1988, or in fractional sections adjacent to those areas.

(2) In exchange for the mineral interests conveyed to the Secretary pursuant to paragraph (1), the Secretary of the Interior shall convey, subject to valid existing rights, such federally owned mineral interests as the Secretary and the company may agree upon.

(c) **EQUAL VALUE.**—(1) The value of mineral interests exchanged pursuant to this section shall be approximately equal based on available information.

(2) To ensure that the wilderness or other natural values of the areas are not affected, a formal appraisal based upon drilling or other surface disturbing activities shall not be required for any mineral interest proposed

for exchange, but the Secretary and the company shall fully share all available information on the quality and quantity of mineral interests proposed for exchange.

(3) In the absence of adequate information regarding values of minerals proposed for exchange, the Secretary and the company may agree to an exchange on the basis of mineral interests of similar development potential, geologic character, and similar factors.

(d) IDENTIFICATION OF FEDERALLY OWNED MINERAL INTERESTS.—(1) Subject to paragraph (2), mineral interests conveyed by the United States pursuant to this section shall underlie lands the surface of which were owned by the company or its predecessor on September 16, 1987.

(2) If there are not sufficient federally owned mineral interests of approximately equal value underlying the lands identified in paragraph (1), the Secretary and the Secretary of the Interior may identify for exchange any other federally owned mineral interest in land in the State of Montana of which the surface estate is in private ownership.

(e) CONSULTATION WITH THE DEPARTMENT OF THE INTERIOR.—(1) The Secretary shall consult with the Secretary of the Interior in the negotiation of the exchange agreement authorized by subsection (b), particularly with respect to the inclusion in such an agreement of a provision calling for the exchange of federally owned mineral interests lying outside the boundaries of units of the National Forest System.

(2) Notwithstanding any other law, the Secretary of the Interior shall convey the federally owned mineral interests identified in a final exchange agreement between the Secretary of Agriculture and the company.

(f) DEFINITION.—For purposes of this section, the term "mineral interests" includes all locatable and leasable minerals, including oil and gas, geothermal resources, and all other subsurface rights.

(g) ENVIRONMENTAL LAW.—The execution and performance of an exchange agreement and the taking of other actions pursuant to this section shall not be deemed a major Federal action significantly affecting the quality of the environment within the meaning of section 102 of the National Environmental Policy Act of 1969 (42 U.S.C. 4332), nor shall they require the preparation of an environmental assessment under this Act.

#### SEC. 9. LANDS ADMINISTERED BY BUREAU OF LAND MANAGEMENT.

(a) FINDING.—The Congress has reviewed the suitability of the Bitter Creek Wilderness Study Area (MT-064-356, BLM Wilderness Study Number) and approximately two thousand five hundred acres of the Axolotl Lakes Wilderness Study Area (MT-076-069, BLM Wilderness Study Number) as generally depicted on a map entitled "Axolotl Lakes WSA", dated March 1990, for wilderness designation and finds that those lands have been sufficiently studied for wilderness pursuant to section 603 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1782).

(b) DIRECTION.—The area described in subsection (a) shall no longer be subject to the requirement of section 603(c) of the Federal Land Policy and Management Act of 1976 pertaining to management in a manner that does not impair suitability for preservation as wilderness.

(c) ADMINISTRATIVE JURISDICTION.—Those lands designated as wilderness pursuant to paragraphs (3) and (27) of section 3(a) of this Act, which, as of the date of enactment of this Act, are administered by the Secretary

of the Interior as public lands (as defined in the Federal Land Policy and Management Act of 1976), are hereby transferred to the jurisdiction of the Secretary of Agriculture, and shall be added to and managed as part of the National Forest System, and the boundaries of the adjacent National Forests are hereby modified to include such lands.

(d) LAND AND WATER CONSERVATION FUND.—For purposes of section 7 of the Land and Water Conservation Fund Act of 1965 (16 U.S.C. 4601-9), the boundaries of affected National Forests, as modified by this section, shall be considered to be the boundaries of such National Forests as if they were the boundaries of the National Forests as of January 1, 1965. Money appropriated from the Land and Water Conservation Fund shall be available for the acquisition of lands, waters, and interests therein in furtherance of the purposes of this Act.

#### SEC. 10. MONTANA ECOSYSTEM AND ECONOMICS STUDY.

(a) PURPOSE.—The purpose of this section is to protect and enhance ecological values of the Northern Rockies Ecosystem within the State of Montana and to assure that disruptions to communities and local economies are minimized through the sustainable use of the natural resources in the State of Montana: *Provided*, That the scope of the study shall be limited to the State of Montana. To accomplish the purpose, the Secretary shall—

(1) assess current environmental and economic conditions in the Montana ecosystem;

(2) evaluate the recent and likely trends in those conditions under current management;

(3) determine sustainable environmental conditions and economies dependent thereon; and

(4) identify opportunities and requirements to achieve and improve sustainability of the natural resources and the economy.

(b) STUDY.—(1) The Secretary of Agriculture, acting through the Forest Service Research Branch, shall undertake a Montana Ecosystem and Economics Study ("Study"). In conducting the study, the Forest Service shall draw from expertise throughout the Research Branch and cooperate with other Federal agencies, relevant State agencies, local governments, Tribal governments, and the relevant departments (such as biology, ecology, forestry, range, wildlife and fish, recreation, business, economics, law, etc.) of public universities in the State of Montana.

(2) The Secretary of Agriculture shall establish an Advisory Panel consistent with the Federal Advisory Committee Act to meet to review and comment on: (A) the study plan; (B) contractor, background, and interim reports, if any; and (C) the final report. The Advisory Panel shall represent a balance of groups and individuals interested in or affected by natural resource management, in an equitable manner.

(3) The Study shall address the following topics:

(A) The current ecological trends and conditions, environmental sustainability within the State of Montana, including but not limited to—

(i) air and water quality;

(ii) timber quantity, quality, and growth;

(iii) rangeland quality;

(iv) riparian areas;

(v) diversity of native plant and animal species;

(vi) connectivity among isolated ecosystems;

(vii) uncommon, rare, threatened, and endangered species;

(viii) populations of animals for consumptive and nonconsumptive uses;

(ix) wilderness areas;

(x) dispersed recreation opportunities; and

(xi) developed recreation facilities.

(B) The current contribution of commodity and non-commodity uses and output of natural resources to the local and regional economies, including, but not limited to—

(i) distinguishing among the various resource uses and outputs;

(ii) examining the distribution of resource-related economic activities among local communities; and

(iii) distinguishing the contributions from each landowner class: Federal, State, Tribal, other government, forest industry, other major private corporations, and other private (non-industrial) landowners.

(C) The sustainable contribution of commodity and non-commodity uses and outputs of natural resources, using the same distinctions specified in subparagraph (B), and assuming:

(i) achievement of State air and water quality standards; and

(ii) maintenance of or increase in the quality of natural resources in the State of Montana, including: the timber available; range lands grazed by livestock; riparian areas; the diversity of plant and animal species; connectivity among isolated ecosystems; uncommon, rare, threatened, and endangered native species; populations of animals for consumptive and nonconsumptive uses; wilderness areas; dispersed recreation opportunities and developed recreation facilities.

(D) Opportunities to improve environmental conditions that could permit an expansion of the sustainable contribution of commodity and non-commodity uses and outputs of natural resources. The assessment shall identify the financial and non-financial costs for the various opportunities, and the likely or possible incidence of those costs. Opportunities shall include each of the following:

(i) Increasing desirable natural vegetative growth including: reforestation with native species, thinning and other timber stand modifications, prescribed burning, and seeding or planting native grasses, forbs, and shrubs.

(ii) Improving the quality of other biological resources (such as species diversity and animal populations), including: habitat restoration, extended timber rotations, alternative timber harvesting systems and grazing regimes, reserves to protect and improve connectivity among isolated ecosystems, and different standards and methods for road construction, maintenance, closure, and eradication.

(iii) Enhancing the quality of non-biological resources (such as recreation trails and facilities, wilderness areas, and watersheds and streams), including: site restoration and rehabilitation, demand management (user regulation and enforcement, marketing to shift timing and location of uses, etc.) and different standards and methods for road construction, maintenance, closure, and eradication.

(E) Recommendations on investments and practices for agencies responsible for natural resource management.

(c) SCHEDULE.—(1) The study plan shall be ready for review by the Advisory Panel within one year after the enactment of this Act.

(2) Contractor, background, and interim reports shall be presented to the Advisory Panel as they are completed.

(3) The draft report shall be ready for review by the Advisory Panel within 2 years after the Panel's meeting to review the study plan. With Advisory Committee input,

the Secretary shall arrange peer review of the draft report among appropriate independent experts in the relevant fields.

(4) The final report shall be presented to the Committee on Interior and Insular Affairs of the United States House of Representatives, the Committee on Energy and Natural Resources of the United States Senate, to the Chief of the Forest Service, and to the heads of other Federal and State agencies who have jurisdiction over wild land management or are responsible for regulating management practices or impacts in the State of Montana.

#### SEC. 11. MISCELLANEOUS PROVISIONS.

(a) REDESIGNATION.—Those lands comprising the Rattlesnake National Recreation Area and Wilderness, as designated in Public Law 96-476 are hereby redesignated as the "Rattlesnake National Education and Recreation Area and Wilderness".

(b) WITHDRAWAL.—Those lands comprising approximately 27,000 acres, as generally depicted on a map entitled "Gibson Reservoir Mineral Withdrawal Area—Proposed", dated October 1992, are hereby withdrawn from all forms of entry, appropriation and disposal under the mining and public land laws, and disposition under the geothermal and mineral leasing laws.

(c) ACREAGES.—All acreages cited in this Act are approximate and in the event of discrepancies between cited acreage and the lands depicted on referenced maps, the maps shall control.

(d) ACCESS.—It is the policy of Congress that the Forest Service acquire and maintain reasonable public access to National Forest System lands in the State of Montana.

(e) SCAPEGOAT AND GREAT BEAR WILDERNESS NAMES.—In order to consolidate existing contiguous wilderness areas, those lands comprising the Great Bear Wilderness Area designated by Public Law 95-946 and any amendments thereto and the Scapegoat Wilderness Area designated by Public Law 92-395 and any amendments thereto are hereby incorporated in and deemed to be a part of the Bob Marshall Wilderness. The designations of the Great Bear Wilderness and Scapegoat Wilderness shall refer to units within the Bob Marshall Wilderness.

#### SEC. 12. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated—

(1) such sums as are necessary for the development of a wilderness education and ranger training complex at the Ninemile Ranger Station, Lolo National Forest, Montana; and

(2) such sums as are necessary to carry out this Act.

#### SEC. 13. WILDERNESS REVIEW.

(a) FINDINGS.—The Congress finds that—

(1) the Department of Agriculture has studied the suitability of roadless areas for inclusion in the National Wilderness Preservation System; and

(2) the Congress has made its own review and examination of National Forest System roadless areas in the State of Montana and the environmental impacts associated with alternative allocations of such areas.

(b) RELEASE.—Those National Forest System lands in the State of Montana which were not designated as wilderness, special management, national recreation, or wilderness study areas by this Act or Public Law 95-150 shall be managed for multiple use in accordance with land and resource management plans developed pursuant to section 6 of the forest and Rangeland Renewable Resources Planning Act of 1974, as amended by the National Forest Management Act of 1976,

and other applicable law, and those areas need not be managed for the purpose of protecting their suitability for wilderness designation prior to or during revision of the land and resource management plans.

(c) PLAN REVISIONS.—In the event that revised land management plans in the State of Montana are implemented pursuant to section 6 of the Forest and Rangeland Renewable Resources Planning Act of 1974, as amended by the National Forest Management Act of 1976, and other applicable law, areas not recommended for wilderness designation, need not be managed for the purpose of protecting their suitability for wilderness designation prior to or during revision of such plans, and areas recommended for wilderness designation shall be managed for the purpose of protecting their suitability for wilderness designation.

(d) FURTHER REVIEW.—Unless expressly authorized by Congress, the Department of Agriculture shall not conduct any further statewide roadless area review and evaluation of National Forest System lands in the State of Montana for the purpose of determining their suitability for inclusion in the National Wilderness Preservation System.

(e) PREVIOUS PLANS.—Except as specifically provided in sections 3, 5, 6, and 7 of this Act and in Public Law 95-150, with respect to the National Forest System lands in the State of Montana which were reviewed by the Department of Agriculture under Public Law 94-557, the unit plans that were in effect prior to completion of RARE II, the 1978 Forest Plan for the Beaverhead National Forest, that such reviews shall be deemed an adequate consideration of the suitability of such lands for inclusion in the National Wilderness Preservation System, and the Department of Agriculture shall not be required to review the wilderness option prior to the revision of the Land and Resource Management Plans.

(f) REVISIONS.—As used in this section, and as provided in section 6 of the Forest and Rangeland Renewable Resources Planning Act, as amended by the National Forest Management Act, the term "revision" shall not include an amendment to a land and resource management plan.

(g) SIZE.—The provisions of this section shall apply to those National Forest System roadless lands in the State of Montana which are less than 5,000 acres in size.

(h) WILDERNESS SUITABILITY REVIEW.—Except as provided in Public Law 95-150, the wilderness suitability review and evaluation of national forest system lands in the State of Montana completed as a part of Land and Resource Management Plans that were completed prior to the enactment of this Act, constitute an adequate consideration of the suitability of such lands for inclusion in the National Wilderness Preservation System and the Department of Agriculture shall not be required to review the wilderness option prior to the revision of the plans, but shall review the wilderness option when the plans are revised, which revisions will ordinarily occur on a 10-year cycle, or at least every 15 years, unless, prior to such time the Secretary finds that conditions in a unit have significantly changed.

(i) MIDDLE FORK JUDITH WILDERNESS STUDY AREA.—Notwithstanding the provisions of this section, the requirements of Public Law 95-150 are deemed to be satisfied with respect to the Middle Fork Judith Wilderness Study Area.

#### SEC. 14. LAND EXCHANGE—GALLATIN AREA.

(a) IN GENERAL.—The Secretary shall, subject to the provisions of section 15(b) and

section 16(b) and, notwithstanding any other law, acquire by exchange and cash equalization in the amount of \$3,400,000, certain lands and interests in land of the Plum Creek Timber, L.P. (referred to in this section as the "company") in and adjacent to the Hyalite-Porcupine-Buffalo Horn Wilderness Study Area, the Scapegoat Wilderness Area, and other land in the Gallatin National Forest in accordance with this section.

(b)(1) DESCRIPTION OF LANDS.—If the company offers to the United States the fee title, including mineral interests, to approximately 37,752 and  $\frac{1}{100}$  acres of land owned by the company which is available for exchange to the United States as depicted on a map entitled "Plum Creek Timber and Forest Service Proposed Gallatin Land Exchange", dated May 20, 1988, the Secretary shall accept a warranty deed to such land and, in exchange therefor, and subject to valid existing rights, recommend that the Secretary of the Interior convey, subject to valid existing rights, by patent the fee title to approximately 12,414 and  $\frac{9}{100}$  acres of National Forest System lands available for exchange to the company as depicted on such map, subject to—

(A) the reservation of ditches and canals required by the Act entitled "An Act making appropriations for sundry civil expenses of the Government for the fiscal year ending June thirtieth, eighteen hundred and ninety-one, and for other purposes", approved August 30, 1890 (26 Stat. 391; 43 U.S.C. 945);

(B) the reservation of rights under Federal Oil and Gas Lease numbers 49739, 55610, 40389, 53670, 40215, 33385, 53736, and 38684; and

(C) such other terms, conditions, reservations and exceptions as may be agreed upon by the Secretary of Agriculture and the company.

(2) On termination or relinquishment of the leases referred to in paragraph (1), all the rights and interests in land granted therein shall immediately vest in the company, its successors and assigns, and the Secretary shall give notice of that event by a document suitable for recording in the county wherein the leased lands are situated.

(c) EASEMENTS.—At closing on the conveyances authorized by this section—

(1) in consideration of the easements conveyed by the company as provided in paragraph 2 of this subsection, the Secretary of Agriculture shall, under authority of the National Forest Roads and Trails Act of October 13, 1964, or the Federal Land Policy and Management Act of 1976, execute and deliver to the company such easements and authorizations over federally owned lands included in this exchange as may be agreed to by the Secretary and the company in the exchange agreement.

(2) In consideration of the easements conveyed by the United States as provided in paragraph (1), the company shall execute and deliver to the United States such easements and authorizations across company-owned lands included in this exchange as may be agreed to by the Secretary and the company in the exchange agreement.

(d) MAPS.—The maps referred to in subsection (b) are subject to such minor corrections as may be agreed upon by the Secretary and the company. The Secretary shall notify the Committee on Energy and Natural Resources of the United States Senate and the Committee on Interior and Insular Affairs of the United States House of Representatives of any corrections made pursuant to the subsection.

(e) TIMING OF TRANSACTION.—It is the intent of Congress that the conveyances au-

thorized by this section be completed within 90 days after the date of enactment of an Act making the appropriation authorized by subsection (g).

(f) **FOREST LANDS.**—All lands conveyed to the United States pursuant to this section shall become national forest system lands to be administered by the Secretary in accordance with applicable law.

(g) **AUTHORIZATION OF APPROPRIATIONS.**—There is authorized to be appropriated to carry out this section the sum \$3,400,000, which amount the Secretary shall, when appropriated, pay to the company to equalize the value of the exchange of land authorized by this section.

(h) **QUALITY OF TITLE.**—Title to the properties referenced in this section and sections 15, 16, and 17 to be offered to the United States by Big Sky Lumber Company, its assignees or successors in interest, shall be inclusive of the entire surface and subsurface estates without reservation or exception. The owner shall be required to reacquire any outstanding interest in mineral or mineral rights, timber or timber rights, water or water rights, or any other outstanding interest in the property, except reservations by the United States or the State of Montana by patent, in order to assure that title to the property is transferred as described in this section and sections 15, 16, and 17. The agreement shall clearly evidence that the owners have the legal capacity to accomplish the foregoing requirements. Title standards for acquisition shall otherwise be in compliance with Forest Service policies and procedures.

(i) **REFERENCES.**—The reference and authorities of this section referring to Plum Creek Timber Company, L.P., shall also refer to its successors.

#### SEC. 15. LAND CONSOLIDATION; PORCUPINE AREA.

(a) **IN GENERAL.**—The exchange described in section 14 of this Act shall not be consummated by the Secretary until the conditions of this section are met.

(b) **CONDITIONS.**—The Secretary or a qualified section 501(c)(3) conservation entity, acting on its behalf for later disposition to the United States, shall have acquired, by purchase or option to acquire, or exchange, all of the Porcupine property for its fair market value, determined at the time of acquisition in accordance with appraisal standards acceptable to the Secretary by an appraiser acceptable to the Secretary and the owner. Any appraisal for exchange purposes shall be conducted by the same parties, utilizing the same standards noted above.

(c) **DESCRIPTION OF LANDS.**—The Secretary is authorized and directed to acquire by purchase or exchange the lands and interests therein as depicted on a map entitled "Porcupine Area", dated September, 1992.

(d) **LAND ACQUISITION AUTHORITIES.**—Acquisitions pursuant to this section shall be under existing authorities available to the Secretary.

(e) **AUTHORIZATION OF APPROPRIATIONS.**—There are authorized to be appropriated such sums as are necessary to carry out the purposes of this section. Funds necessary for land acquisition are authorized to be appropriated from the Land and Water Conservation Fund.

(f) **AUTHORIZATION OF EXCHANGE.**—The Secretary is authorized to offer the lands and interests described on a map entitled "Porcupine Exchange Lands", dated September, 1992, to Big Sky Lumber Company, its assignee or successors in interest to fulfill the purposes of this section: *Provided*, That the lands shall not transfer to the company until

the provisions of this section and section 16 are met.

(g) **EQUAL VALUE.**—Any exchange of lands between Big Sky Lumber Company and the United States shall be for equal value.

(h) **REFERENCES.**—The reference and authorities of this section referring to the Big Sky Lumber Company, shall also refer to its successors.

#### SEC. 16. LAND CONSOLIDATION—TAYLOR FORK AREA.

(a) **IN GENERAL.**—The exchange described in section 14 of this Act shall not be consummated by the Secretary until the conditions of this section are met.

(b) **CONDITIONS.**—The Secretary or a qualified section 501(c)(3) conservation entity, acting on its behalf for later disposition to the United States, shall have acquired, by purchase or option to acquire, or exchange, all of the Taylor Fork property for its fair market value, determined at the time of acquisition in accordance with appraisal standards acceptable to the Secretary by an appraiser acceptable to the Secretary and the owner. Any appraisal for exchange purposes shall be conducted by the same parties, utilizing the same standards noted above.

(c) **DIRECTION.**—The Secretary is directed to provide Congress, within 2 years, recommendations designed to acquire by purchase or exchange Taylor Fork Area lands owned by Big Sky Timber Company: *Provided*, That such recommendations are agreed to by Big Sky Lumber Company: *Provided further*, That nothing in this section limits the Secretary's authority to acquire or purchase said lands.

(d) **DESCRIPTION OF LANDS.**—The Secretary is authorized and directed to acquire by purchase or exchange the lands and interests therein as depicted on a map entitled "Taylor Fork Area", dated September, 1992.

(e) **LAND ACQUISITION AUTHORITIES.**—Acquisition pursuant to this section shall be under existing authorities available to the Secretary: *Provided*, That notwithstanding any other law, exchanges authorized in this section shall not be restricted within the same State.

(f) **AUTHORIZATION OF APPROPRIATIONS.**—There are authorized to be appropriated such sums as are necessary to carry out the purposes of this section. Funds necessary for land acquisition are authorized to be appropriated from the Land and Water Conservation Fund.

(g) **EQUAL VALUE.**—Any exchange of lands between Big Sky Lumber Company and the United States shall be for equal value.

(h) **REFERENCES.**—The reference and authorities of this section referring to the Big Sky Lumber Company, shall also refer to its successors.

(i) **REPORTS TO CONGRESS.**—For a period of 2 years from the date of enactment of this Act, the Secretary shall report annually to the Committee on Interior and Insular Affairs of the House of Representatives and the Committee on Energy and Natural Resources of the Senate, on the status of the negotiations with the company or its successors in interest to effect the land consolidation authorized by this section.

#### SEC. 17. LAND CONSOLIDATION—GALLATIN AREA.

(a) **IN GENERAL.**—The Secretary shall work diligently to assure all lands within what is generally known as the Gallatin Range owned by Big Sky Lumber Company, its assignee or successors in interest, not acquired, purchased or exchanged pursuant to sections 14 and 15 of this Act are acquired by the United States through exchange or purchase.

(b) **DIRECTION.**—The Secretary is directed to provide Congress, within 3 years, recommendations designed to acquire by purchase or exchange Gallatin Area lands owned by Big Sky Lumber Company: *Provided*, That such recommendations are agreed to by Big Sky Lumber Company: *Provided further*, That nothing in this section limits the Secretary's authority to acquire or purchase said lands.

(c) **DESCRIPTION OF LANDS.**—The Secretary is authorized and directed to acquire by purchase or exchange the lands and interests therein as depicted on a map entitled "Gallatin Area", dated September, 1992.

(d) **LAND ACQUISITION AUTHORITIES.**—Acquisitions pursuant to this section shall be under existing authorities available to the Secretary: *Provided*, That notwithstanding any other law, exchanges authorized in this section shall not be restricted within the same State.

(e) **AUTHORIZATION OF APPROPRIATIONS.**—There are authorized to be appropriated such sums as are necessary to carry out the purposes of this section. Funds necessary for land acquisition are authorized to be appropriated from the Land and Water Conservation Fund.

(f) **EQUAL VALUE.**—Any exchange of lands between Big Sky Lumber Company and the United States shall be for equal value.

(g) **REFERENCES.**—The reference and authorities of this section referring to the Big Sky Lumber Company, shall also refer to its successors.

(h) **REPORTS TO CONGRESS.**—For a period of 3 years from the date of enactment of this Act, the Secretary shall report annually to the Committee on Interior and Insular Affairs of the House of Representatives and the Committee on Energy and Natural Resources of the Senate, on the status of the negotiations with the company or its successors in interest to effect the land consolidation authorized by this section.

The PRESIDING OFFICER. Is there objection to the request of the Senator?

Mr. SIMPSON. Mr. President, reserving the right to object, and I shall object on behalf of others and not the Senator from Montana, the Senator's colleague. But there are several on our side of the aisle who have asked me to object. I understand fully the pain and the anguish because Wyoming went through this.

The Wyoming wilderness bill took years. Finally a Democrat Governor, Ed Herschler, a marvelous man, Senator WALLOP, myself, and Representative CHENEY, finally just took all those groups and just got them in a room and just beat them around the head and shoulders.

Because they are so greedy and so obscene in what they want, that they get nothing. And you are going through that. It must be anguishing to you.

I just say, and I have worked with this Senator from Montana on the Clean Air Act, we were the last two standing at 5:30 a.m. in the morning, side by side. And we did our compromise and we did our good job and a good piece of work, and it was a great treat to go through that exercise with the Senator from Montana. We were the walking wounded, but we prevailed.

So, I just say to you, on behalf of our leader, Senator DOLE, who has left the

Chamber momentarily, he has been in contact with the Speaker's office, BOB MICHEL, the Republican leader there, repeatedly today on various issues. These contacts concerned our efforts to get urgent—urgent legislation, essential legislative measures considered tomorrow by the House. A raft of vital material.

Senator DOLE received the very same response each and every time. There will be no legislative business in the House tomorrow; none. Absolutely none. This means, Mr. President, that were the Senate to consider the Montana wilderness bill tonight under any scenario, and were we able to complete action on that subject under any scenario, it would still require further action by the House, action which both the Speaker, Congressman FOLEY, and Congressman MICHEL have said will simply not occur.

Therefore, any action the Senate takes tonight would only be in vain. The House would not act and the measure would die. It would be truly a feckless endeavor.

On behalf of several on our side of the aisle, I regretfully, but necessarily, object.

Mr. BAUCUS. Before the Senator objects, might I ask the Senator, does the Senator not know that many times views change? And many times, certainly the Senator from Wyoming knows, that when an issue seems hopeless, when it looks like legislation may not pass, for some reason sometimes miracles occur, the sky opens, there is blue sky and the measure in fact goes through?

I know that there is some concern about whether the House is going to accept measures passed by the Senate tonight. But I also know there is no hurt in trying.

It just seems to me we have two choices here. We could either try or we can do nothing. Of course to ask the question is to answer it. If we do pass the legislation tonight, it is possible—it may be a small probability—it may be a large probability—but it is possible that the House might act.

On the other hand, if the Senate tonight does not pass this bill, it is impossible—impossible for the other body to act.

So it seems to me this matter, which is extremely urgent, I might say to the Senator—extremely urgent to the people of Montana, that we should at least try. We should at least send it over there and see if we can in some way persuade the House to take, not only this bill but all the other bills that the Senate will be sending to the House, and the House will have before it.

With respect to the other concern I heard from the Senator, that is there are two other Senators who may have concerns—

Mr. SIMPSON. More than two.

Mr. BAUCUS. One other? Five? Well that has grown significantly as it

sometimes does around here, for some strange reasons, nefarious strange ways. Not always nefarious but for some strange reasons in the last minutes.

That I say is very unfortunate. Because other Senators on the Democratic side have decided that because this is a Montana issue, it should be decided by the Montana delegation and a Montana compromise.

I would hope that the Senators on the other side of the aisle would see that this is a Montana bill. It affects no other States whatsoever. It is only a Montana bill. I hope that they would allow the Montana delegation to work out the solution for Montana.

Any other wilderness bill that might come along, whether it is Idaho, for example, or whatever State it might be, will be a wilderness bill that will affect that State, and release language or water rights language or whatever would only apply to that State.

In the same vein, water rights release language in this bill applies only to Montana. It applies to no other State.

We know in this body when we pass wilderness bills, the water rights language in each State wilderness bill is a little bit different. It is tailored to each State. The same is true with release language. The release language in every wilderness bill is slightly tailored to each State.

I would hope that Senators on the other side of the aisle would let this be a Montana bill, recognizing that when wilderness bills come up in their States, we will defer to those Senators so they can come up with their own solution.

Mr. SIMPSON. Mr. President, I understand the true anguish of the Senator from Montana, but I have a duty to object on the merits, not just the issue of the fact that the House will not process this.

There are many reasons that have been presented to me. A few of them, so the Senator knows that certainly this Senator is not trying to intrude on Montana's issues, because it is tough enough—as we did the Wyoming wilderness bill and had every kind of hold from people all over the United States, who had never even been to Wyoming.

So, I have been there. I know the feeling. But I regret that the objection is there. This bill does have some repercussions in regard to the ecosystem. And when you talk to the ecosystem, you are outside the wilderness area. That is a concern.

Then of course the ancient, ancient one of reserved water rights and water rights.

That is all I can share with the Senator from Montana because it is not my hold or my wish to do this. But it is my duty and I have no other course but to object to the unanimous-consent request.

Mr. BAUCUS. I understand the Senator's duties. I understand that. But

before he fully objects I just might, without taking much of the Senate's time—if we are going to send a Colorado wilderness bill to the House, it seems to me we ought to send the Montana wilderness bill to the House. If the House is going to take one it might as well take the other.

Second, though, with respect to water rights, there is a wide variety of water rights language, as the Senator knows, in different wilderness bills. In the Nevada water rights language, which has a very environmental water view, there is a Federal reserve water right. Then there is a Colorado water rights language that passed this body with exactly the opposite direction.

Those were water rights language and provisions tailored to each State, essentially according to the wishes of the State's delegation.

So I hear the Senator. I know that he must object because other Senators, for whatever reasons, have asked the Senator from Wyoming to make that objection. I honor that. That is the institution of the Senate.

I must say, too, that the ecosystem which the Senator may be referring to has been modified in this compromise, so it affects no other State, the ecosystem study which only affects Montana. My compromise—I deleted the changes other States because I was sensitive to the current concerns, the potential concerns of Senators in other States, and that is why it is modified to affect only Montana.

Mr. SIMPSON. I respectfully object and yield the floor.

The PRESIDING OFFICER. Objection is heard.

Mr. BURNS addressed the Chair.

The PRESIDING OFFICER. The Senator from Montana.

Mr. BURNS. Mr. President, I guess a lot of us are sort of disappointed in this whole process. Senator BAUCUS and I went through this negotiating and hammering out a balanced bill for the State of Montana about a year ago and passed it through this body, to be only taken to the House of Representatives and changed considerably. It just upset the balance altogether.

I am not one of those who is objecting tonight to the consideration of this version of this act. However, I must go on record that I will reserve my right to debate the merits of this bill and also offer four amendments. We can see how futile that would be with the message coming over from the House of Representatives.

I understand the other objections, too, because of the new language that has been circulating, also new water language that has been changed two or three times. Those are tough issues. The Chair would understand that. He has been going through that kind of a wringer all day long. They are very difficult issues and they are issues that are understood in the West that cannot

be taken lightly because of our water laws in the State.

So I am, too, disappointed that we did not get it done this year. We will continue to work on it and to resolve it. I agree with my senior Senator, that these groups come in and say there is gridlock in the Congress. I will say this, it is not a partisan gridlock and it is not a gridlock between the Congress and the White House. The gridlock comes within each body of Congress. It is a gridlock of interest groups that absolutely set the satchel down and will not accept compromise in most areas and, therefore, it paralyzes this body and the House, and of course, the administration.

I, too, am disappointed. I am not to the point where I feel this cannot be accomplished and done in a proper way. Again, Senator BAUCUS and I will sit down and start all over again next year and try to resolve this problem. We will try to really resolve the problem once and for all for our State.

Mr. BAUCUS. Will the Senator yield for a question?

Mr. BURNS. I sure will.

Mr. BAUCUS. Mr. President, I want to ask my colleague what the nature of those amendments might be that he would like to see changed in the compromise, which is a midway position which the Senator knows is probably about the only version that can be enacted by both bodies. But nevertheless, even if the compromise cannot be enacted, what would the amendments be? The Senator had not shared them with me. I am curious what they would be.

Mr. BURNS. The Senator asks a good question. I think in light of the evening and in light of the work of the Senate and all this, I think a couple of them have been raised in the language because it is all new. I think the merits of those amendments and also what the Senator from Montana [Mr. BAUCUS] would like would have to be debated in the light of day and on this floor or in the proper committee or in negotiations, whichever. I think that is the proper place to do that.

I want to leave it open so that we can debate the bill on the floor and on the merits of the bill and, of course, on any of the amendments.

Mr. BAUCUS. I appreciate my colleague's answer. It seems to me, in listening to my colleague, that he does object to this compromise if he has lots of ideas and amendments. It sounds like he, in fact, does object to this compromise.

Mr. ROCKEFELLER addressed the Chair.

The PRESIDING OFFICER. The Senator from West Virginia.

#### ROBERT C. BYRD LOCKS AND DAM

Mr. ROCKEFELLER. Mr. President, I had sometime ago introduced a free-standing bill in the Senate, to name

the Gallipolis Locks and Dam project after ROBERT C. BYRD. It was a free-standing bill and that bill failed. That was a matter of sadness for me, but I am happy to report that the Senate has, just within the last half hour, passed H.R. 6167. And due to the work of several, that contains the language now accepted by both the House and the Senate, and it is on its way to the President which renames the Gallipolis Locks and Dams for my senior colleague, Senator BYRD.

I worked when I was Governor with Senator BYRD on this project, NICK RAYHALL, BOB WISEMAN and many others have worked with him. That lock and dam is going to be dedicated on this Saturday. I will not have the privilege of being there, but I do have a profound sense of personal satisfaction and pride because of the nature of my senior colleague, who is a quintessential mountaineer and a man I admire in so many ways I cannot say, who has worked his way up in the classic American fashion to make himself a master of the Senate. When he goes to that ceremony, he will be going to a lock and dam he, in fact, did make possible, did create and which will bear his name.

I thank the Chair, and I yield the floor.

Mr. FORD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. FORD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### FEDERAL RESERVE BANK BRANCH MODERNIZATION ACT

Mr. FORD. Mr. President, I ask unanimous consent the Senate proceed to the immediate consideration of Calendar No. 541, H.R. 4398, a bill to remove outdated limitations on the acquisition or construction of branch buildings by Federal Reserve banks which are necessary for branch expansion if the acquisition or construction is approved by the Board of Governors of the Federal Reserve System.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

A bill (H.R. 4398) to remove outdated limitations on the acquisition or construction of branch buildings by the Federal Reserve banks.

There being no objection, the bill (H.R. 4398) was considered, ordered to a third reading, read the third time, and passed.

Mr. FORD. Mr. President, I move to reconsider the vote.

Mr. SIMPSON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

#### RELIEF OF C.T. & C.L. BOYLE AND RODGITO KELLER

Mr. FORD. Mr. President, I ask unanimous consent the Senate proceed en bloc to Calendar Nos. 777 and 780.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

A bill (S. 287) for the relief of Clayton Timothy Boyle and Clayton Louis Boyle, son and father.

A bill (H.R. 240) for the relief of Rodgito Keller.

There being no objection, the bill (H.R. 240) was considered, ordered to a third reading and passed;

The bill (S. 287) was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

S. 287

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That notwithstanding the provisions of section 2401 of title 28, United States Code, or any other legal or equitable bar or limitation, the United States District Court for the District of Hawaii shall have jurisdiction (as otherwise conferred by section 1346(b) of title 28, United States Code) to hear, determine, and render a judgment for damages upon any claims of Clayton Timothy Boyle and his father, Clayton Louis Boyle, of Honolulu, Hawaii, against the United States of America, arising out of injuries allegedly suffered by Clayton Timothy Boyle as the result of the failure of the United States Navy to provide proper diagnostic care or medical treatment on or about November, 1965.

SEC. 2. Suit upon any claims referred to in section 1 may be instituted at any time within six months after the date of the enactment of this Act.

SEC. 3. Nothing in this Act shall be construed as an admission of liability on the part of the United States.

Passed the Senate October 8 (legislative day, September 30), 1992.

Attest: Secretary.

Mr. FORD. Mr. President, I move to reconsider the vote.

Mr. SIMPSON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

#### EXTENSION OF TERMS OF THE OLESTRA PATENTS

Mr. FORD. Mr. President, I ask unanimous consent the Senate proceed to the immediate consideration of Calendar No. 696, a bill to extend the terms of the olestra patents, and for other purposes.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

A bill (S. 1506) to extend the terms of the olestra patents, and for other purposes.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill which had been reported from the Committee on the Judiciary, with an amendment to strike all after the enacting clause and inserting in lieu thereof the following:

#### SECTION 1. PATENT TERM EXTENSION.

(a) **OLESTRA PATENTS.**—The terms of United States patents numbers 4,005,195, 4,005,196, and 4,034,083 (relating to olestra), and any reissues of said patents, shall be extended for a period beginning on the date of its expiration through December 31, 1997.

(b) **POST-MARKET SURVEILLANCE.**—At the time that the owner of record of patent requests that the Commissioner of Patents and Trademarks certify its patent extension, it shall submit with such request a statement from the Commissioner of the Food and Drug Administration indicating that the Food and Drug Administration and the proposed marketing entity for olestra have agreed upon a postmarket surveillance program which will provide data regarding the influence of olestra-containing products upon the overall dietary intake of fats. Such data will be subject to the usual standards of professional peer review. At the end of the study period, it will be submitted to the Food and Drug Administration for review. Such study data shall be in a format which will be made available to Congress for public review. The requirements of this section shall not in any manner preempt the authority of the Food and Drug Administration to request and to receive any other information it deems necessary in the course of its ongoing regulatory activities.

#### SEC. 2. NOTIFICATION.

The patentee of any patent described in section 1 shall, within 90 days after the date of enactment of this Act, notify the Commissioner of Patents and Trademarks of the number of any patent extended under such section. On receipt of such notice, the Commissioner shall confirm such extension by placing a notice thereof in the official file of such patent and publishing an appropriate notice of such extension in the Official Gazette of the Patent and Trademark Office.

#### SEC. 3. DEFINITION.

For purposes of this Act the term "olestra" means sucrose esterified with four or more fatty acid groups.

#### SEC. 4. EFFECTIVE DATE.

The provisions of this Act shall take effect on the date of enactment of this Act.

AMENDMENT NO. 3436.

Mr. FORD. Mr. President, on behalf of Senator GLENN, RIEGLE, LEVIN, DECONCINI, and HATCH, I send a substitute amendment to the desk.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Kentucky [Mr. FORD], for himself, Mr. GLENN, Mr. RIEGLE, Mr. LEVIN, Mr. DECONCINI, and Mr. HATCH, proposes an amendment numbered 3436:

Strike out all after the enacting clause and insert in lieu thereof the following:

#### SECTION 1. PATENT EXTENSION.

That the Secretary of Commerce, acting through the Commissioner of Patents shall, when United States Patent Number 3,892,824 (relating to the drugs S-2-(3-aminopropylamino) ethyl dihydrogen phosphorothioate (Ethiofos) and S-3-(3-methylaminopropyl-

amino) propyl dihydrogen phosphorothioate, including hydrates and alkali metal salts thereof) expires, or as soon thereafter as possible, extend such patent for three years, with all the rights pertaining thereto.

#### SEC. 2. STATUTORY EXTENSION OF PATENT TERMS.

(a) **IN GENERAL.**—The Congress finds that, in the future, any bill providing for the extension of the term of a patent should not be approved by the Congress unless the requirements set forth in subsection (b) or (c) are met.

(b) **REQUESTS BASED ON DELAY IN PRE-MARKET APPROVAL.**—When the basis for a bill providing for a patent extension is delayed in premarket regulatory approval of a patented invention, the following requirements should be met before the bill is approved by the Congress:

(1) **GOVERNMENTAL MISCONDUCT.**—(A) Delay in the approval process must have been beyond the control of the patent holder and directly caused by governmental misconduct.

(B) For purposes of this paragraph, governmental misconduct is established by presentation of adequate proof of—

- (i) dishonest or deceitful conduct,
- (ii) vindictive or retaliatory action, or
- (iii) serious failure to perform governmental duties or comply with governmental standards,

by the Federal Government.

(C) Unusual or unexpected delay alone does not constitute governmental misconduct for purposes of this paragraph.

(2) **UNJUSTIFIED INJURY TO THE PATENT HOLDER.**—The governmental misconduct under paragraph (1) must have caused a substantial inequity to the patent holder who, without the extension of the patent term, will suffer material harm directly attributable to the delay in the approval process. The unjustified harm to the patent holder if relief is not granted must outweigh any harm to the public (such as through higher prices) or to competitors that will result from extension of the patent.

(3) **EXPIRED PATENTS.**—Expired patents shall not be revived and extended, except under the most extraordinary and compelling circumstances. In no such case shall an extension be granted unless the patent holder exercised due diligence to prevent the invention from entering the public domain.

(4) **INTERVENING RIGHTS.**—In the event extraordinary circumstances justify the revival and extension of an expired patent, intervening rights shall be extended to persons using the subject matter of the patent after its expiration. Such rights shall not be provided in the case of statutory extension of unexpired patents, except that, in a case in which extreme injustice would result from the failure to provide such rights, they may be extended to persons who have, in good faith expectation of the expiration of the patent, made substantial preparation for use of the subject matter of the patent after its expiration.

(c) **OTHER REQUESTS.**—When the basis for a bill providing for a patent term extension is other than delay in premarket regulatory approval, the following requirements should be met before the bill is approved by the Congress:

(1)(A) Either governmental misconduct (as described in subsection (b)(1)), or action or inaction by the United States Government, contributed substantially to significant injury to the patent rights of the person requesting extension of the patent.

(B) For purposes of subparagraph (A), the action or inaction by the Government need

not constitute governmental misconduct (as described in subsection (b)(1)), but must be of such a nature as to create a moral or ethical obligation on the part of the Government to provide relief to a person whose patent rights have been substantially injured by the action or inaction by the Government. Such action or inaction may include altering, by statute or rule, the regulatory approval procedures, standards, or requirements in a case in which there has been material reliance by an applicant on the prior procedures, standards, or requirements.

(2) The requirements set forth in paragraphs (2) through (4) of subsection (b) are met, except that—

(A) the reference in subsection (b)(2) to "governmental misconduct" shall be deemed to include, as applicable, the action or inaction by the Government described in paragraph (1) of this subsection; and

(B) the reference in subsection (b)(2) to "delay in the approval process" shall be deemed to refer to "governmental misconduct", which shall be deemed to include, as applicable, the action or inaction by the Government described in paragraph (1) of this subsection.

(d) **LACK OF DUE DILIGENCE.**—Notwithstanding the preceding provisions of this section, in no case should the Congress approve a bill providing for the extension of the term of a patent in the case of delay attributable to a lack of due diligence by the patent holder.

#### SEC. 3. PATENT EXTENSION FOR NONSTEROIDAL ANTI-INFLAMMATORY DRUGS.

(a) **IN GENERAL.**—The term of United States patent numbered 3,793,457 shall be extended for a period of 2 years beginning on the date of its expiration.

(b) **LIMITATION ON RIGHTS.**—The rights derived from any patent which is extended by this section shall be limited during the period of such extension to any use for which the subject matter of the patent was approved by the Food and Drug Administration before the date of the enactment of this Act.

#### SEC. 4. PATENT TERM EXTENSION FOR OLESTRA.

(a) **IN GENERAL.**—The terms of United States patents numbered 4,005,195, 4,005,196, and 4,034,083 (and any reissues of such patents) shall each be extended for a period beginning on the date of its expiration through December 31, 1997.

(b) **POST-MARKET SURVEILLANCE.**—At the time that the owner of record of the patent requests that the Commissioner of Patents and Trademarks certify its patent extension, it shall submit with such request a statement from the Commissioner of the Food and Drug Administration indicating that the Food and Drug Administration and the proposed marketing entity for olestra have agreed upon a post-market surveillance program which shall provide data regarding the influence of olestra-containing products upon the overall dietary intake of fats. Such data shall be subject to the usual standards of professional peer review. At the end of the study period, such data shall be submitted to the Food and Drug Administration for review. Such study data shall be in a format which shall be made available to Congress for public review. The requirements of this section shall not in any manner preempt the authority of the Food and Drug Administration to request and to receive any other information it deems necessary in the course of its ongoing regulatory activities.

#### SEC. 5. EXTENSION OF PATENT FOR INSIGNIA.

A certain design patent numbered 29,611, which was issued by the United States Patent Office on November 8, 1898, which is the

insignia of the United Daughters of the Confederacy, and which was renewed and extended for a period of 14 years by the Act entitled "An Act granting an extension of patent to the United Daughters of the Confederacy", approved November 11, 1977 (Public Law 95-168; 91 Stat. 1349), is renewed and extended for an additional period of 14 years beginning on the date of the enactment of this Act, with all the rights and privileges pertaining to such patent.

#### SEC. 6. PATENT TERM EXTENSIONS FOR AMERICAN LEGION.

(a) **BADGE OF AMERICAN LEGION.**—The term of a certain design patent numbered 54,296 (for the badge of the American Legion) is renewed and extended for a period of 14 years beginning on the date of the enactment of this Act, with all the rights and privileges pertaining to such patent.

(b) **BADGE OF AMERICAN LEGION WOMEN'S AUXILIARY.**—The term of a certain design patent numbered 55,398 (for the badge of the American Legion Women's Auxiliary) is renewed and extended for a period of 14 years beginning on the date of the enactment of this Act, with all the rights and privileges pertaining to such patent.

(c) **BADGE OF SONS OF THE AMERICAN LEGION.**—The term of a certain design patent numbered 92,187 (for the badge of the Sons of the American Legion) is renewed and extended for a period of 14 years beginning on the date of the enactment of this Act, with all the rights and privileges pertaining to such patent.

#### SEC. 7. INTERVENING RIGHTS.

The renewals and extensions of the patents under sections 5 and 6 shall not result in infringement of any such patent on account of any use of the subject matter of the patent, or substantial preparation for such use, which began after the patent expired but before the enactment of this Act.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 3436) was agreed to.

Mr. GLENN. Mr. President, I rise in support of a provision to extend three key patents on olestra, an innovative, zero-calorie, zero-cholesterol fat replacement, which may help Americans reach the Surgeon General's goal of dramatically reducing the amount of fat in the American diet to no more than 30 percent.

The provision of this bill was included in H.R. 5475 which was passed by the House by an overwhelming margin on August 4, 1992, and S. 1506 which was reported by the Senate Judiciary Committee on September 22, 1992.

Olestra was invented by the Procter & Gamble Co. in 1968. Although P&G filed for regulatory approval with the FDA in 1971, more than two decades later, olestra has still not been approved. The FDA has informed P&G that the earliest that olestra could be approved is late 1993. P&G has already invested \$180 million on olestra and is expected to invest several hundred million more to construct manufacturing facilities to produce this product.

The problem arises because patents are only for 17 years. The primary olestra patent expired in 1988 and the

other three will expire in late 1993. Accordingly, this amendment would extend the three primary olestra patents until December 31, 1997, to enable Procter and Gamble some time to market their product and recoup the cost of its invention and investment.

American business must have the incentive to invent, innovate and to produce new products if we wish to stay competitive. This provision will send a strong signal that our economy is willing to invest in the long-term and invest hundreds of millions of dollars on important innovations.

In order to move this bill on olestra through the Senate the substitute includes several provisions which have been passed by the House. The substitute includes the extension of the patents held by the U.S. Bioscience, an extension of the patent on ansaid, the insignia of the United Daughters of the Confederacy, and badges of the American Legion, and a section regarding the standards by which patents are extended.

Mr. President, I urge the passage of this legislation.

Mr. ADAMS. Mr. President, I am pleased to be added as a cosponsor of this amended version of S. 1506, which will make the process by which Congress considers requests for patent extensions more rigorous, and extend the patents on several products and designs.

My strong support for this legislation reflects much more than my assessment of the underlying merits of the patent extensions granted herein, and the standards for future review of requests for extensions. My confidence in the public interest being served by these extensions is, in a major way, motivated by my respect for, and confidence in, the valuable expertise of the subcommittee and full committee chairmen in both the Senate and the House who have judged this legislation to be worthy of support.

There can be no doubt that these issues have had the benefit of full debate in the Senate, including a set of hearings in 1991 before the Subcommittee on Patents, Copyrights and Trademarks of the Senate Judiciary Committee as well as before the Subcommittee on Intellectual Property and Judicial Administration of the House Judiciary Committee.

When the hearing record suggested that the several requests for patent extensions involved factually complicated issues, the respective chairmen of the relevant subcommittees, the Senator from Arizona, Mr. DECONCINI and the Senator from New York, Mr. HUGHES, wisely requested that the General Accounting Office study the merits of the requests. The respective Senate and House subcommittees marked up and reported the legislation with full confidence that the underlying issues had been thoroughly studied by the GAO.

The question of the extension of these patents was then subject to further amendment in the respective full committees. It cannot be honestly argued that any group, whether commercial competitors, makers of the products, or consumer advocacy groups, was left out of the process of developing this legislation. It is a measure of the strong bipartisan support these matters enjoyed that the Senate and House Judiciary Committees passed these patent extensions by wide margins. The matter passed the House of Representatives by a margin of sufficient size to overcome a presidential veto.

In passing S. 1506 today, the Senate of the United States confirms that fundamental fairness to the holders of the patents covered by this legislation is served by granting the extensions contained in this bill. Having been directly involved in helping to develop this legislation, I urge my colleagues to vote favorably on this measure.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on agreeing to the committee amendment in the nature of a substitute, as amended.

The committee amendment in the nature of a substitute, as amended, was agreed to.

The PRESIDING OFFICER. The question is on the engrossment and third reading of the bill.

The bill was ordered to engross for a third reading, was read the third time, and passed, as follows:

(The text of S. 1506, as passed by the Senate, will be printed in a future edition of the RECORD.)

#### DEFENSE PRODUCTION ACT AMENDMENTS OF 1992—CONFERENCE REPORT

Mr. FORD. Mr. President, I submit a report of the committee of conference on S. 347 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the to the bill (H.R. 347) to amend the Defense Production Act of 1950 to revitalize the defense industrial base of the United States, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of October 5, 1992.)

Mr. RIEGLE. Mr. President, I rise in favor of the conference report on S. 347,

the Defense Production Act Amendments of 1992. This legislation, among other things, renews and amends the Defense Production Act.

The Defense Production Act, DPA, was originally passed to meet the national emergency caused by the Korean war. Only three titles of the seven titles of the original law—I, III, and VII—were kept in effect after that war. Title I of the DPA provides the President with authority to require the priority performance of contracts which have been determined to be necessary for the national defense. Title III authorizes the use of a broad range of economic incentives to assure that American industry will be able to provide the broad range of materials and services that are required for the national defense. These incentives include purchase guarantees, loan guarantees and loans. Title VII authorizes the President to encourage joint industry undertakings to improve industrial preparedness and provides protection from antitrust suits for such cooperative efforts carried out in accordance with approved arrangements.

The amendments to the DPA provided for in this legislation address several issues affecting the health of America's industrial and technology base. A healthy and vibrant industrial and technology base is needed to ensure both the national security and a rising standard of living for our people. This bill gives the President new tools to combat the steady erosion of that base. This erosion is clearly evidenced by the dramatic decline during the 1980's of many critical industries vital to our national defense. Among other things, the legislation authorizes the President to use the DPA to assist in the development or expansion of U.S. sources for critical components, critical technology items, or industrial resources essential for the execution of the U.S. national security strategy.

Another problem this bill attempts to address is the growing U.S. dependence on foreign suppliers of critical components of essential weapons systems. We know these dependencies are growing but presently there is no Government-wide or DOD-wide system for gathering data on this issue. To better identify and analyze areas of U.S. dependence on foreign suppliers of critical defense components and technology, the legislation establishes a continuous data collection system with respect to the operations of defense contractors and subcontractors. We will be in a much better position to develop policies to deal with foreign dependencies for critical items once we know how extensive they are and on whom we are dependent.

The legislation also improves current reporting requirements on offset agreements. Offset agreements frequently require major U.S. exporters to transfer production of a certain portion of

the overall export product to foreign suppliers. These agreements can result in the export of technology as well as the loss of manufacturing opportunities for domestic prime contractors and subcontractors. We must better evaluate the cumulative effects of offsets on our defense industrial base and non-defense industry sectors, including the effects resulting from technology transfers. This legislation improves data gathering procedures on offset agreements so that their effects can be more fully assessed.

Section 721 of the DPA contains the so-called Exon-Florio provision, which was added to the DPA by the Omnibus Trade and Competitiveness Act of 1988. This provision gives the President the authority to suspend or prohibit the acquisition, merger or takeover of a domestic firm by a foreign firm if such action would threaten to impair the national security. The bill adds a new provision to the DPA to help Congress carry out its oversight responsibilities with regard to Exon-Florio. The provision requires the President to prepare a quadrennial report on foreign investment patterns in the United States to determine the existence of any coordinated strategy by foreign governments or foreign firms to acquire U.S. companies involved in critical technologies. In this report the President is also required to examine the extent of industrial espionage activities related to critical technologies directed at U.S. firms by foreign governments.

A major concern that prompts this provision is the potential threat to our national security preparedness posed by foreign domination of key dual use technologies. It is in this connection that foreign acquisitions of American producers of strategic goods becomes an important issue. Concerns have been expressed that the interagency committee chaired by the Treasury Department to implement Exon-Florio [CFIUS] has not been fully cognizant of the increasing need to have a broad understanding of the financial and trade strategies of our industrial competitors in order to carry out properly its responsibilities under section 721.

The General Accounting Office in a March 1990 report entitled "Foreign Investment: Analyzing National Security Concerns" noted that the CFIUS takes a reactive case-by-case approach to exercising its section 721 responsibilities. It further states that the CFIUS is not structured to examine other larger questions such as: First, which industry sectors, technologies, or types of firms to preserve for U.S. ownership; second, why foreign investors place more value than U.S. firms do on developing predominance in certain high technology sectors; and third, what parts of the U.S. defense industrial base are being hollowed out as foreign investors acquire U.S. firms which are lower-tier suppliers to the Department of Defense.

The study required in this legislation is designed to provide the Congress with a better understanding of these concerns so that it can adequately oversee executive branch administration of section 721. It will provide needed information to assess the credibility of allegations that foreign governments have directed industrial espionage against U.S. firms to obtain commercial secrets related to critical technologies. In conducting this study, the President is expected to utilize the resources of those Federal agencies, including the intelligence agencies, that have statutory authority and expertise that will contribute to a comprehensive and in-depth review of these vital concerns.

Finally, this legislation makes the fraudulent use of "Made in America" labels a ground for suspension or debarment from any Federal contract award. On Sunday, October 4, the CBS News program, "60 Minutes," reported that Mazak, a Japanese-owned manufacturing company in Cincinnati, imported machines tools made in Japan, re-labeled them as "Made in the USA," and then sold them to the U.S. Government. In the process, Mazak is alleged to have repeatedly and knowingly violated the Buy America Act. Violations of the Buy America Act, such as those alleged on "60 Minutes," occur because the economic rewards are high and the penalties are low. Penalties must be increased so that violations of the Buy America Act become expensive and thus deter potential law breakers. This legislation does just that. It allows the U.S. Government to suspend those who fraudulently use "Made in the U.S.A." labels from performing any contract awarded by the Federal government or performing a subcontract under such contract. This tough penalty will, I hope, stop willful violations of the Buy America Act.

I regret that the Conference Agreement does not include Title IV of the original bill passed by the Senate. That Title contained the Fair Trade in Financial Services Act. The purpose of the Fair Trade in Financial Services Act was to encourage foreign countries to offer U.S. banks and bank holding companies, U.S. securities brokers and dealers, and U.S. investment advisers de facto national treatment; that is, the same competitive opportunities, including effective market access, as they offer their domestic counterparts, not just in legal theory but in actual practice. It established a framework of negotiations, reports, and discretionary sanctions designed to help end discrimination against U.S. banks and bank holding companies, U.S. securities brokers and dealers, and U.S. investment advisers that operate or seek to operate abroad.

One reason we failed to get the banking provisions of the fair trade title enacted into law is because the State De-

partment opposed and lobbied against them. It did this despite the fact that the Treasury Department, our chief financial services negotiator, had no opposition to their enactment. Some officials in the State Department are so wed to a free trade ideology that they fail to see that negotiating from strength can actually help open markets now closed to our financial firms. It is my hope that a new Administration will see the wisdom of the Fair Trade provisions and help us get them enacted into law.

Mr. President, I want to thank Congressmen CARPER and SCHUMER for their cooperation in putting together this conference report. I also want to salute and thank in a special way Senator DIXON, who played a major role in fashioning this legislation.

I urge prompt passage of this conference report.

Mr. GARN. Mr. President, I rise in support of the conference report on the Defense Production Act Amendments of 1992. This is a long overdue extension of the authorities of the DPA for a period of 3 years. The conference report that is the basis for this bill failed to achieve enactment in the closing moments of the 101st Congress because of administration objections. Several executive branch agencies had concerns with that bill, especially proposed changes in Defense Department procurement policies, that were sufficient to produce a veto threat against the bill.

In this Congress, the Senate passed the same bill that failed in 1990. The House held a series of hearings and did extensive redrafting of key provisions in light of the testimony taken from administration and industry witnesses. As a result of that process, the House produced legislation that eliminated the principal objections of the administration. In conference on the bill, the Senate worked out compromise language on the problem provisions that resulted in a conference report that is now broadly acceptable to the administration. The executive branch agencies indicate that they will recommend that the President sign the bill and it has faced no objection in the Congress.

While it is gratifying to get the DPA back on the books, we were unable to reach agreement with the House on the fair trade in financial services title of the Senate bill. That title would have established a framework of negotiations, reports, and discretionary sanctions designed to help end discrimination against U.S. banks, securities firms and investment advisers operating in foreign markets. This is a provision with which I have been associated for the last 8 years.

Despite months of negotiations with the Treasury and other executive agencies and various committees of the House, we were unable to find a formulation of the fair trade title that could

gain the support of majority of House conferees and the approval of the administration. The reason for that failure is a very fundamental difference of opinion among Executive Branch agencies and congressional committees about the respective roles of the Treasury and USTR in negotiating on financial market access and imposing trade sanctions where market access is denied.

The Senate position was that the Secretary of the Treasury, in his role as chief financial officer of the United States, should direct the entire process. The House proposal would have permitted Treasury to exercise its traditional leading role in negotiations but would have specified that any sanctions in the financial services area would have to be applied within the framework of title III of the Trade Act of 1974, under the authority of the Trade Representative. Aside from the question of agency prerogatives, the different formulations have important implications for the opening up of the financial sector to cross-sectoral retaliation and, in extreme circumstances, compromising safety and soundness of the financial system.

While considerable effort was expended to identify a compromise, the disagreement proved too fundamental and the issues too thorny. Both sides thought it better to enact nothing rather than prejudice the course of this debate for the future.

This issue of the respective roles of finance and trade officials in negotiating financial services agreements has also been a live issue in the international trade arena. United States-Canada, NAFTA and Uruguay round negotiations have established the precedent for the leading role of finance ministry officials and financial experts in negotiating financial services agreements and resolving disputes. Prudential considerations have been accorded priority in these agreements and, in the two agreements now completed, cross-sectoral retaliation has been prohibited. At the same time, such financial services agreements have been part of broader trade negotiations under the direction of trade ministry officials.

How these financial services agreements will actually operate is unknown territory. We have as yet seen no examples of disputes being resolved or relief granted. The exact balance of power and the dividing line of responsibilities between trade and finance officials has not been clearly established either domestically or internationally. This is a debate that is likely to continue for some time, and authorities like those in the fair trade title will be difficult to enact until that resolution takes place.

No matter how this legislative puzzle is finally solved, what is important is that the United States rededicate itself

to our longstanding principles of right of establishment and national treatment as embodied in the International Banking Act and use whatever negotiating tools and trade leverage is available to demand that same treatment for U.S. financial services companies abroad. While Treasury has made progress in opening foreign markets over the last decade, we still have much to do.

For now, it is important that the authorities of the DPA be reenacted, and I urge my colleagues to support this conference report.

Mr. FORD. Mr. President, I ask unanimous consent that the conference report be agreed to, the motion to reconsider be laid upon the table, and any statements thereon appear in the RECORD at the appropriate place.

The PRESIDING OFFICER. Is there objection?

The Chair hears none, and it is so ordered.

So the conference report was agreed to.

#### EXPORT-IMPORT BANK REAUTHORIZATION—CONFERENCE REPORT

Mr. FORD. Mr. President, I submit a report of the committee of conference on H.R. 5739 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 5739) to reauthorize the Export-Import Bank of the United States, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by all of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of October 6, 1992.)

Mr. SARBANES. Mr. President, I rise in support of the conference report to accompany H.R. 5739, the Export Enhancement Act of 1992. This important legislation would reauthorize the charter of the Export-Import Bank of the United States, which expires this year, as well as the export promotion programs of the Commerce Department.

This legislation was originally introduced in the Senate by myself, Senator RIEGLE, Senator GARN, and Senator MACK. I am pleased to say that the conference report reflects all of the provisions contained in the original Senate bill. I would like to thank Senator RIEGLE, Senator GARN, and Senator MACK, who were all conferees on this bill, for their vigorous efforts on its behalf. I would also like to thank the Banking

Committee staff—Martin Gruenberg, Patrick Mulloy, and John Walsh—for the excellent work that they did on this legislation.

Title I of the legislation would reauthorize the charter of the Eximbank for 5 years, through September 30, 1997. In addition, it would reauthorize the tied aid credit war chest of the Eximbank for 3 years at an authorization level of \$500 million a year.

A key change made by the legislation in the operation of tied aid credit war chest is to authorize the bank to match tied aid credits offered by another country not only in cases in which a foreign country violates the OECD [Organization for Economic Cooperation and Development] agreement restricting the use of tied aid credits, but also in cases in which "the Bank determines that United States trade or economic interests justify the matching of tied aid credits extended in compliance with the Arrangement, including grandfathered cases."

Pursuant to the conclusion of the new OECD agreement on tied aid credits this year, the administration announced a policy of using its tied aid credit war chest only to enforce compliance with the agreement. In other words, if foreign governments are making extensive use of tied aid credits, but within the terms of the OECD agreement, then the Eximbank would not utilize its war chest under the administration policy. Such an approach, which was adopted by the administration in 1988 and 1989, resulted in the war chest being virtually unutilized. The provision contained in the conference report is intended to change this announced policy, particularly in regard to cases grandfathered under the new OECD agreement.

In addition, the conference report provides that the loan guarantee program of the Eximbank, which has had an important influence on keeping private commercial banks in the business of trade finance, will not be negatively affected by credit reform. The budget agreement reached in 1990 contained a new method of accounting for Federal credit programs that has resulted in a higher subsidy cost for an Eximbank loan guarantee than for an Eximbank direct loan. As a result, exporters and commercial banks have expressed concerns that the lower subsidy costs of direct loans might lead the Eximbank to reduce or eliminate its loan guarantee program. The conference report requires the Eximbank to consider the need to involve private capital in support of United States exports as well as the cost of the transaction as calculated in accordance with the requirements of the Federal Credit Reform Act of 1990, in deciding whether to provide support for a transaction under its loan, guarantee, or insurance program.

The Eximbank is currently prohibited from financing sales of defense ar-

ticles and services to developing countries. The conference report would prohibit Eximbank from financing the export of any defense articles or services to developed as well as or developing countries, except under the exception in current law for Eximbank financing of defense articles or services to be used for antinarcotics purposes. The conference report would also require the Eximbank to submit a quarterly report to the Congress on all items it finances which are on the State Department's Munitions List but which the Eximbank determines will not be put to a military use. This provision of the conference report was taken from the House bill.

The conference report also contains a provision authorizing the Eximbank to compensate not more than 35 employees of the Bank independently of the Federal civil service guidelines. The provision was included in response to a problem experienced by the Eximbank in retaining key professional personnel because of the changes made by the 1988 savings and loan bill permitting the Federal bank regulatory agencies to pay their employees independently of the Federal civil service guidelines. As a result these agencies have been able to compensate their professional and management employees at rates significantly above those available to Eximbank employees. This provision is intended to give the Bank authority to provide compensation to its employees comparable to that provided by other agencies so that the Bank may retain and recruit key personnel necessary for its highly specialized operations.

Title I of the conference report would also provide a statutory basis for review of the environmental impact of projects financed by the Eximbank, require the Eximbank to seek to ensure that U.S. insurance companies are accorded a fair and open competitive opportunity to provide insurance against risk of loss in connection with any long-term loan or guarantee of at least \$10 million provided by the Eximbank, and authorize the President to sell, reduce, or cancel Eximbank loans as part of the enterprise for the Americas initiative.

Title II of the legislation, which I consider to be of great importance, reauthorizes the export promotion programs of the Commerce Department and addresses the broader issue of U.S. export promotion policy. The Banking Committee's Subcommittee on International Finance and Monetary Policy, which I chair, held a hearing on May 20 to review the range of export promotion programs sponsored by the Federal Government. Invited to testify at the hearing were representatives of the Commerce Department, Eximbank, the Small Business Administration, Agriculture Department, Agency for International Development, and the Trade and Development Program.

The number of agencies represented at the hearing is an indication of a key problem confronting U.S. export promotion policy: the lack of coordination and an overall national strategy. This lack of coordination and overall strategy was commented upon by representatives of the General Accounting Office, the National Association of Manufacturers, and the National Governors Association, who also testified at the hearing.

In response to this problem, the legislation would provide a statutory base for the interagency Trade Promotion Coordinating Committee [TPCC], which until now has operated pursuant to executive order. While the TPCC has, according to a GAO report, achieved some success, it lacks permanent status and its "long-term effectiveness is yet to be demonstrated."

The TPCC would be chaired by the Secretary of Commerce. Its purpose would be to coordinate the export promotion and financing activities of the United States Government and develop a governmentwide strategic plan for carrying out Federal export promotion and financing programs. Members of the TPCC would include representatives of the Departments of Commerce, State, Treasury, Agriculture, Energy and Transportation, as well as the U.S. Trade Representative, Small Business Administration, Agency for International Development, Trade and Development Program, Overseas Private Investment Corporation, and the Eximbank. The TPCC would be required to submit an annual report to Congress describing its strategic plan, the implementation of the plan, and any revisions made to the plan.

In order to improve the accessibility of U.S. export promotion programs to small and medium-sized exporters around the country who are not able to come to Washington, the conference report directs the United States Foreign and Commercial Service to utilize its 69 domestic offices and its 130 foreign posts as "one stop shops" for U.S. exporters. The offices would be required to provide exporters with information on all export promotion activities of the Federal Government, and assist exporters in identifying which Federal programs may be of greatest assistance and making contact with the Federal programs identified.

In addition, the conference report would specifically require the US&FCS to provide U.S. exporters with information on all financing and insurance programs of the Eximbank, the Overseas Private Development Corporation, the Trade and Development Program, and the Small Business Administration, including providing assistance in completing applications for such programs, and working with exporters to address any deficiencies in such applications. The agencies, in turn, would be required to provide full and current in-

formation on all of their programs and financing practices to the US&FCS and undertake a training program for US&FCS officers in the programs and practices of the agencies. Senator ROCKEFELLER has been a leading proponent of increasing cooperation between the US&FCS and the Eximbank and other agencies of the Federal Government involved in export finance.

The conference report also addresses the important issue of promoting the export of environmentally beneficial goods and services. The conference report would provide a statutory basis for the Environmental Trade Promotion Working Group of the Trade Promotion Coordinating Committee and direct it to assess the effectiveness of U.S. Government programs to promote environmental exports, recommend improvements in such programs, and ensure coordination of programs among members of the Working Group. This provision was originally sponsored by Senators WIRTH, GORE, and BIDEN in the Senate.

The conference report would also require the Secretary of Commerce to submit to Congress an annual report on the international economic position of the United States, and appear before the Senate Banking and House Foreign Affairs Committees annually to testify on the report. Senator RIEGLE has been the leading proponent of institutionalizing such an annual reporting requirement by the Commerce Secretary on the competitive position of the United States in the international marketplace. This report and annual hearings on it will enable Congress to strengthen oversight of this increasingly important issue.

Finally, title II of the legislation would increase the number of foreign commercial service officers with the rank of Minister-Counselor from 8 to 16, and provide a 2-year authorization for the export promotion programs of the Commerce Department—\$190 million for fiscal year 1993, and \$200 million for fiscal year 1994.

Title III of the conference report includes a provision sponsored by Senator GARN to establish the "John Heinz Competitive Excellence Award." This provision is intended to honor the memory of Senator JOHN HEINZ for his efforts to promote the industrial competitiveness of the United States during his 14 years of service on the Senate Banking Committee. The provision would authorize two awards each year for excellence in promoting U.S. industrial competitiveness.

Mr. President, I believe this to be an excellent piece of legislation and I enthusiastically urge its adoption by my colleagues.

Mr. RIEGLE. Mr. President, I rise today to urge the passage of the conference report on H.R. 5739, the Export Enhancement Act of 1992. This legislation renews and amends the charter of

the Export-Import Bank of the United States and also strengthens our country's overall export financing and promotion programs.

In this age of global economic competitiveness, exports are crucial to our Nation's economic well-being. Export financing plays a critical role in export competitiveness. Through the reauthorization of the Eximbank and the amendments it makes to Eximbank's charter, this legislation strengthens the export financing programs of the United States. It also reauthorizes the export promotion programs of the Commerce Department.

This legislation, however, goes beyond simply reauthorizing existing export financing and promotion programs. In contrast to our principal competitors, the United States does not have a comprehensive, integrated export enhancement strategy. There are 10 executive agencies involved in either export promotion or financing activities. Yet, we have no strategic plan for coordinating these activities and ensuring the efficiency of these many Federal programs. We have no overall rationale for determining whether our export promotion resources are being channeled into areas with the greatest potential return.

Mr. President, this legislation should improve the coherence of our export programs by establishing permanently in statute the Presidential interagency committee known as the Trade Promotion Coordinating Committee [TPCC]. It puts the Secretary of Commerce in charge of that committee. The legislation also directs the TPCC to develop a governmentwide strategic plan for promoting and financing exports. Proper development and implementation of such a plan will ensure our export promotion and financing activities are being coordinated and priorities are being set that will enable our Nation to get the maximum return for the money we spend on such activities.

Further, this legislation highlights the key responsibility of the Department of Commerce for strengthening our overall international trade and investment position. It requires the Secretary of Commerce to submit to the Congress an annual report on the international economic position of the United States and to appear annually before the Senate Banking Committee and the House Foreign Affairs Committee to testify on the report. Among other things, the Secretary of Commerce is required to report on the Department's efforts to promote the development of technologies and products critical to our industrial leadership and to increase exports using such technologies. The Secretary is also to report on how the TPCC's strategic export plan is being implemented.

This legislation also establishes the John Heinz Competitive Excellence

Award for excellence in promoting U.S. industrial competitiveness. This award is a most fitting tribute to the strong commitment of Senator Heinz to strengthening America's industrial base and export competitiveness.

I want to thank Congresswoman OAKAR and Congressmen FASCELL and GEJDENSON for their cooperation in putting together this conference report. I also want to thank Senator GARN, the ranking member of the Senate Banking Committee, for his help on this bill and his many years of cooperative effort on the committee. Finally, let me pay a particular thank you to my good friend and colleague, Senator PAUL SARBANES, the chairman of the Banking Committee's International Finance Subcommittee, for the personal attention he has paid to formulating this legislation and getting it enacted.

Mr. President, this legislation provides vital and timely support to U.S. firms in their efforts to compete in the global economic arena. I urge passage of the conference report on the Export Enhancement Act of 1992.

Mr. GARN. Mr. President, I join my colleagues in supporting adoption of the conference report for the Export Enhancement Act of 1992. This legislation will extend the charter of the Export-Import Bank for 5 years and its tied aid credit fund for 3 years. It will clean up outdated material in the Bank charter and make a number of improvements in the Bank's operations. The Bank has been a strong ally of U.S. exporters during the Bush administration, and this charter renewal is an endorsement of its efforts.

The bill also begins to make some sense of U.S. export promotion efforts by placing the Trade Promotion Coordinating Committee in statute and giving it a mandate to develop a government-wide strategic plan and to recommend the management and budget changes necessary to make it a reality. The U.S. Government spent \$2.7 billion on these programs in 1991 and financed \$21 billion in exports through a confusion of programs in 10 executive branch agencies. It is incumbent upon Government to make the best possible use of these resources.

The third title of this bill creates a congressional competitive excellence medal in honor of Senator John Heinz, who died so tragically last year. John devoted tremendous energy during his 20 years, in Congress to promoting U.S. industrial competitiveness. I am pleased that we have been able to enact this memorial in the bill.

My only regret with this legislation is that we were unable to enact my proposal that would have placed a time limit on use of the authority of the International Emergency Economic Powers Act to maintain the authority of expired legislation. The Export Administration Act has been expired for 2 years, in part due to a veto but prin-

cipally through inaction and delay in the House of Representatives. Just as the House has been unable to agree on export control legislation that could be enacted into law, the House was unable or unwilling to agree on rules that would force legislative action in the future. As a result, I am certain that we will see future ersatz emergencies where the Congress cannot move a bill and simply punts its legislative responsibilities to the President. This failure is especially telling in a Congress that so consistently wants to administer U.S. trade and foreign policy.

Given our inability to enact legislation in these other critical areas, I am especially pleased to report the Export Enhancement Act to the Senate and urge its adoption.

Mr. ROCKEFELLER. Mr. President, with the vote on the conference report on the Export Enhancement Act of 1992, we have an important opportunity to begin to bring order to the chaos that has infected Government export promotion programs for many years.

I compliment and thank the conferees, especially Senator RIEGLE, Senator SARBANES, Senator GARN, and Senator MACK, for their hard work and tremendous contributions to this effort. It was my pleasure throughout this year to have the opportunity to work with them, with the other members of the Banking Committee, and with the members of my Subcommittee on Foreign Commerce and Tourism, to make sure that American exporters are provided with the most efficient and effective assistance in the world. The Senate bill took a number of important steps in that direction, and I am pleased to see that the conference report contains virtually all of these important provisions. The Senate conferees are to be commended for their success in convincing the House conferees of the importance of what we did on this bill.

I would also note, Mr. President, that this bill is an important part of the national economic leadership strategy that the majority leader announced on July 1. That strategy explicitly recognized the importance of an effective export promotion policy to any long-term growth program and endorsed the provisions of the Export Enhancement Act of 1992.

Enhancing exports is a popular topic in the Congress, which is no surprise given the huge trade deficits of the past decade. Despite some improvement in the past few years, the trend in our trade deficit since February has been bad—each month but one was worse than the previous—and the most recently reported monthly trade deficit was the worst we have seen in a year and a half. With this trend, there is no doubt that the 1992 deficit will be worse than that of last year. More ominous still, the data show declining exports. As world growth slows, we will have to

work much harder simply to maintain our exports, much less expand them.

Given this situation, Mr. President, I believe we need to develop an aggressive and coordinated export promotion policy for the United States. To that end, my Subcommittee on Foreign Commerce and Tourism held extensive hearings in 1990 and 1991 on our export promotion programs. We consulted widely with Government officials, with exporting businesses, and companies which are not as active exporters as they should be.

As a result of those hearings, last year I introduced legislation, S. 1721, that would have combined the two important export functions of marketing and finance and would have taken several other steps to end the patchwork of export promotion agencies that creates so much confusion. That bill would have created a Bureau of Trade Development and Trade Finance within the Department of Commerce in order to join the marketing functions of the U.S. and Foreign Commercial Service with the Commerce Department's Office of Trade Development and the export finance functions of the Eximbank.

Such an organization is, unfortunately, not incorporated in the legislation we are voting on today, but there are provisions that move us in that direction. These changes will enable USFCS offices in the United States to act effectively as branch offices for Eximbank and other export finance agencies, spreading the word about marketing and finance to new exporters, assisting in the preparation of applications for export finance programs, and keeping in touch with the customers while the applications are processed in Washington.

These are important provisions, but the unification of the Federal Government's trade promotion programs is still a concept that a new administration next year will want to consider as it reviews the functioning of the Government. A unified structure would be a powerful agency that would provide exporters with efficient "one stop shopping" for U.S. Government export promotion and finance services.

Mr. President, I am convinced that the Federal Government must establish a unified export promotion and finance organization, if we are to provide American exporters with a sophisticated and coordinated export enhancement program. The belief was again strengthened when I read the recent GAO report that compares our splintered export promotion and finance efforts with the more effective structures used by other major industrial countries.

I sincerely hope that the new administration will take a serious look at that GAO report and consider the advantages of consolidating the disparate activities and organizations now en-

gaged in this effort. I am disappointed that we are not taking that important step today, but it is said that politics is the art of the possible. I am pleased that it was possible for several of the provisions I proposed in S. 1721, and for the amendments I proposed during the Senate's deliberations on the Export Enhancement Act of 1992, to be included in the bill reported by the Senate-House conference. They are:

Reauthorization of Eximbank war chest for 3 years;

Providing for 100 percent cover on Bank export credit guarantees;

Making the Trade Promotion Coordinating Committee [TPCC] a permanent, statutory body;

Giving the TPCC specific responsibilities for coordinating the development of trade promotion policies of the U.S. Government and eliminating duplication among them;

Introducing the "one-stop shop" concept in the Commerce Department, whereby the USFCS field offices will provide exporters with information on all export promotions programs of the U.S. Government;

Requiring the USFCS to do outreach for the Eximbank and, in turn, requiring the Bank to make the necessary information and training available to accomplish that. I am pleased that the conference added other agencies to this outreach effort;

Requiring that the members of the TPCC be at sufficiently high policy levels in their agencies to ensure that TPCC decisions and recommendations will be fully implemented within the agencies;

Requiring the TPCC to propose an annual unified export promotion budget to the President. This budget will give the TPCC a real opportunity to address both the redundancy and priority problems that have plagued our export promotion programs;

Requiring USFCS officers to provide export finance institutions, as well as exporters, with information on the Eximbank and export finance. The amendment is helpful since many inquiries and financing applications come from local banks, as well as directly from exporters.

In addition, the conference committee included a suggestion I made, along with the United States Chamber of Commerce—which was not included in my original bill—that the TPCC, in addition to its coordinating duties, would assess budget allocations for the various export promotion programs in the Government and make recommendations based on this assessment.

Let me also, Mr. President, commend the conferees of both Chambers for including in the bill the John Heinz Competitiveness Award legislation that so many Senators, including myself, co-sponsored when the Senator from Alaska, Mr. STEVENS, introduced it last April. Senator HEINZ cared tremen-

dously about our country's competitiveness and its manufacturing base. He viewed it as a bipartisan issue and worked hard with many of us on both sides of the aisle to move the country forward, often over the objections of the current administration. This award is a fitting memorial to him, and I am delighted the conference has maintained it in the bill. Making it an award of the Congress, rather than only the Senate, will further enhance its importance.

The Export Enhancement Act of 1992 will enhance our efforts to develop a comprehensive, coordinated export promotion policy. The Senate Banking Committee deserves our praise for its commitment to that goal, for its willingness to work with those of us who do not serve on the committee, but who are also interested in export promotion, and for prevailing upon their counterparts in the House to accept the provisions the Senate approved last month. With the adoption of this conference report, we are taking an important step in the implementation of the national economic leadership strategy and in the creation of a world class export policy that will once again make America an effective competitor in the global marketplace.

Mr. President, I believe this bill will make a real difference. In my experience in West Virginia, the outreach programs of the U.S. and Foreign Commercial Service, which our legislation will beef up, can be especially important to firms either not aware of Federal export promotion and finance activities, or not involved in exporting at all. These are usually small and medium-size businesses in West Virginia and in other states, exactly the type of companies that create the bulk of new jobs in the United States. Often they are new companies which do not appreciate fully their own export potential because they are working so hard to develop the U.S. market. The U.S. Government export promotion and finance programs, which this bill strengthens, will help them to learn what their export potential is and to achieve that potential.

My friend, Roger Fortner, runs the Charleston office of the U.S. and Foreign Commercial Service. He does a remarkable job putting West Virginia exporters in touch with the various Government agencies that can help them, and maintaining a network of contacts that enables West Virginians to expand their markets and increase their sales. This bill calls on Roger, his agency, and the other Federal agencies responsible for implementing the bill to do more. By requiring greater coordination among these agencies, especially through an annual unified Federal trade promotion budget, the bill also provides them with the means for doing more. Roger Fortner and his counterparts will also be able to do a

lot more because of the bill's requirement that the several agencies which provide export financing supply information and training on their programs to Roger and his counterparts. With this more unified U.S. Government export promotion and finance service, American exporters will not be at as great of a competitive disadvantage in their fight to capture foreign markets as they have been.

Finally, I want to thank the Senate staff who assisted me in examining our Federal Government's export promotion efforts and in devising ways to be more effective in helping our industries sell their products and create jobs for Americans: Ivan Schlager, of the Senate Commerce Committee, who did superb work in this area; Bill Reinsch and Tom Forbord, of my staff, whose diligence and dedication in the support of American workers and American exporters I greatly appreciate; and Pat Mulloy, Marty Gruenberg, and John Walsh of the Banking Committee staff, who put all the pieces of this complicated package together and are responsible for its success.

Mr. BIDEN. Mr. President, last month, I was joined by six of my colleagues in introducing the Environmental Aid and Trade Act. The purpose of our legislation is to establish programs and make organizational changes in the Federal Government that would help the export of environmental goods and services. I am pleased that many of those provisions will be sent to the President for his signature as part of this bill.

Title II of the Exim bank bill includes many of the organizational changes we called for in our bill. Among those are provisions to create an environmental working group within the Trade Promotion Coordinating Council and the designation of individuals within Federal agencies to be in charge of developing policies to assist the export of environmental goods and services.

Title II also includes provisions that allow the Secretary of Commerce to designate environmental export assistance officers in foreign countries that are viewed as either attractive markets or major competitors for our environmental technologies. For those countries that are promising markets, the officer will assist companies trying to figure out the hows and whys of that particular country.

For those countries that are our competitors, the officer should also stay abreast of export assistance provided by those countries to their own manufacturers. This will help us respond more quickly to those cases where our companies are losing out to unfair trading practices that may be attempted.

Finally, title II calls for a study by the Trade Promotion Coordinating Council of the need for a program to in-

sure our companies against the risk from market loss through reduced environmental standards. The study recognizes the Government standards are an important factor in the market for many products. A company's manufacturing process or product may depend on effective enforcement of those environmental standards. If a country fails to enforce those standards or outright reduces them, that company can suffer. The study will assess the extent of the risk posed by lowered environmental standards and the feasibility of a program to insure against that risk.

Other provisions of the Environmental Aid and Trade Act are included in the Freedom Act and the reauthorization of the overseas private investment corporation bill. In combination with the provisions in this bill, Congress is acting to establish broad-based support for one of our Nation's fastest-growing industries.

The changes we have called for in this bill are to help American companies in one of the fastest growing global markets. And it is a market we are particularly well positioned to sell to. Despite all the high-blown rhetoric of "jobs versus the environment" that has come from the administration in the past few months, it is undeniable that environmental protection laws of the last two decades have created a huge array of new technologies and thousands of jobs.

In fact, a study released in June by the Organization of Economic Cooperation and Development [OECD] estimated that more than 800,000 jobs in our country were directly related to the production of environmental goods and services. Exports of environmental products added \$4 billion to our trade balance sheet. And the future global market for environmental goods and services is projected to exceed \$300 billion in annual sales.

But the rhetoric of Rio and the campaign trail obscure the opportunities that lay before us, and risk the loss of another market we helped pioneer and in which we are technological leaders. That is why we introduced the Environmental Aid and Trade Act and why we worked to include its provisions in the bill before us.

The initiatives in this bill are not the end of efforts we should undertake in this area. The fact of the matter is that our competitors have recognized that environmental goods and services are good for their economy as well as the global environment.

An environmental consciousness has swept the globe, a change that our Nation's foreign policy must reflect. Global environmental concerns—in particular global climate change—are promoting revolutionary transformations in the foundations of relations between countries. These are not changes that the United States has to fear; we have a long record of success

in addressing threats to our own environment and natural resources. Environmental concerns should not be held out as hobgoblins that we should use our global influence and leadership to quell. They should be recognized as fundamental building blocks of future global relations.

Our bill represents the progressive attitude that we must adopt, for the good of our economy and future generations. I would like to commend the efforts of Senator WIRTH, a cosponsor of the Environmental Aid and Trade Act, for his efforts to include the provisions in this bill. I would also like to thank the Senator from Maryland [Mr. SARBANES] for his assistance in this matter.

I ask unanimous consent that an "Op Ed" authored by Senator WIRTH on the issue of environmental protection and jobs that appeared in Sunday's Washington Post be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Oct. 4, 1992]

EASY BEING GREEN

(By Timothy E. Wirth)

The tactic of pitting spotted owls against timber workers in Oregon and fuel-efficiency standards against auto workers in Detroit is both a cynical retreat from past promise and a false choice for the future.

The facts show that in a stagnant economy, environmental action has actually both supported a remarkable growth industry in the United States itself and created an enormous potential market abroad. Now is the time to debate how to maintain and accelerate that growth, how to expand exports of environmental technology and how to retrain workers now employed in low-skill, economically imperiled jobs that squander energy and non-renewable natural resources. Those are the challenges that a Competitiveness Council worthy of its name should be tackling.

Among the welcome byproducts of two decades of cleaning up dirty air, unsafe water and toxic wastes is an American environmental services industry counting nearly 70,000 businesses, well over a million workers and a 1991 income of \$130 billion. Using a standard multiplier effect to gauge the full impact of the sector in our economy, economists suggest that 3.5 million jobs flow from the \$270 billion in sales as well as \$22 billion in corporate profits and \$76 billion in Federal, State and local revenues.

Less easily measured in dollars but just as significant an index of progress and promise are the new devices and processes researchers have developed and business has employed to stem pollution. Those innovations, like the breakthroughs in electronic miniaturization, metallurgy and other fields that resulted from the U.S. space program, are key elements of the hefty green dividend that environmental protection is already paying.

The global market for environmental goods and services fits that description perfectly. Estimates of its current size range from \$200 to \$370 billion a year, of which \$50 billion is in international trade. U.S. export earnings—\$6 billion in 1991 by Commerce Department reckoning, \$8 billion according to OECD statistics—are impressive.

Germany, with sales worth \$11 billion last year, has already pulled ahead, and, Japan is mounting a major effort to capture the field. It is a tempting and rapidly growing target. Developing nations alone are likely to purchase hundreds of billions of dollars worth of energy products in the next decade; winners in this global trade will be those who market clean, efficient energy products.

As pioneers in solar energy, for example, Americans ought to be strong competitors for that booming business. We are not. We have allowed our early lead to evaporate to the point that Japan and Germany now divide 70 percent of the solar-energy market. So too with air-pollution control equipment. The United States is now importing 70 percent of its clean-air technology—technology that Americans pioneered. Gary, Ind., is home to the first utility in the United States to meet the new Clean Air Act standards for sulfur dioxide emissions—thanks to Mitsubishi.

With the right signals from our political leaders, U.S. firms could do better, but this administration has been anything but activist in the environmental arena. No high-level officials in the Bush administration encouraged American business to attend the environmental trade fair that was held at the Earth Summit in Rio. Only 25 U.S. companies—out of 4,000 invited—bothered to show their wares in the huge hall. China sent 71 exhibitors; Japan sent 130.

More significantly, the Japanese government used the Rio meeting to announce a 10-year, \$8 billion pledge, twice the level of current American commitments of environmental aid to developing nations. That investment in building future markets is just one part of a massive push—a 35-year-long strategy that Tokyo's Ministry of International Trade and Industry calls "New Earth 21"—to position Japan to dominate environmental trade in the next century.

Germany is also vying for that advantage. Having shown that its tough pollution-control and recycling laws actually enhance productivity and competitive strength, it—along with Italy and the Netherlands—is allocating about 10 percent of its research and development budget to the search for new environmental technologies. The German commitment to reduce carbon dioxide output by 25 percent by 2005 is not just a feel-good policy. It will actually spur innovation and export promotion.

For a change, American firms could be on the winning side of the coming competition. We have a tremendous record of leadership and achievement in environmental protection, the most comprehensive set of standards and practices of any nation on earth, a huge capital fund of technological innovation to draw on and an experienced domestic industry already at work. What we lack, however, is the political leadership to exploit these assets and, on the technical side, the commitment to energy efficiency that we need to implement clean technology as strenuously as our competitors are. Our economy could be saving \$200 billion a year—vastly more than the president claims his proposed capital gains tax cut would generate—if it used energy as sparingly as Japan does.

Once we are done with the political hyperbole of a campaign year, Americans will be ready to hear and act on the reality that environmental action has promoted growth, can generate more and may well determine our competitive advantage (or disadvantage) in the short and long term. We have a dynamic environmental sector at home and a

rapidly widening market abroad. We need to build on both—doing good for the environment and creating American jobs at the same time.

The PRESIDING OFFICER. Without objection the conference report is agreed to.

Mr. FORD. Mr. President, I move to reconsider the vote.

Mr. SIMPSON. I move to lay that motion on the table.

OMNIBUS EXPORT AMENDMENTS ACT OF 1992—CONFERENCE REPORT

Mr. FORD. Mr. President, I submit a report of the committee of conference on H.R. 3489 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 3489) to reauthorize the Export Administration Act of 1979, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of October 5, 1992.)

Mr. SARBANES. Mr. President, I rise in support of the conference report to accompany H.R. 3489, the Omnibus Export Amendments Act of 1991. This legislation would reauthorize the Export Administration Act, impose sanctions on companies and countries which facilitate the proliferation of nuclear weapons, establish a set of principles to guide the conduct of United States companies doing business in the People's Republic of China and Tibet, and reauthorize the export promotion programs of the Commerce Department.

This important legislation has had a long and difficult history. Two years ago the Congress passed a reauthorization of the Export Administration Act [EAA], the statute which provides the President authority to control exports for purposes of national security and foreign policy. Included in the legislation was a number of reforms to improve the operation of the U.S. export control system and respond to the rapidly changing circumstances in Eastern Europe. Unfortunately that legislation was pocket vetoed by the President because of a provision requiring the imposition of sanctions on foreign companies and countries which assist in the proliferation of chemical and biological weapons.

During the past 2 years, the President has imposed controls on U.S. exports pursuant to the International

Emergency Economic Powers Act [IEEPA]. IEEPA provides the President authority to take action during an economic emergency, but was never envisioned to be used as authority for the routine implementation of controls on exports. It was thus imperative for the Congress to reauthorize the Export Administration Act and reestablish a statutory framework for the enforcement of U.S. export controls.

After much determined effort, I am very pleased that agreement has been reached to reauthorize the EAA. The conference report would modify United States export controls to take into account the historic changes that have taken place in Eastern Europe and the former Soviet Union. This legislation would provide a statutory base for the agreements reached in Cocom—the Coordinating Committee for Multilateral Export Controls made up of the NATO countries, Japan and Australia—in June 1990, May 1991, and June 1992 to reduce controls on exports to Eastern Europe and the Independent Republics of the former Soviet Union. It also establishes a policy that licensing treatment for the countries of Eastern Europe and the Independent Republics of the former Soviet Union should be revised if a country implements an effective export control system, establishes adequate technology security arrangements, and terminates governmental policies and intelligence cooperation with other controlled countries relating to illegal acquisition and diversion of controlled technology.

In addition, the legislation provides for the creation of a license free zone among the member countries of Cocom. It would end controls on U.S. exports to Cocom member countries, although authority would remain for the Commerce Secretary to impose controls on exports to unreliable end users and to countries which the Secretary determines are engaging in a pattern and practice of noncompliance with Cocom.

The conference report also deals with the difficult issue of commodity jurisdiction—whether a good should be controlled under the Commodity Control List of dual use goods of the Commerce Department or the Munitions Control List of defense articles of the State Department. The conference report provides a procedure for the Secretary of each department to challenge the judgment of the other, and to refer cases to the President which cannot be resolved between the Secretaries.

In addition, the conference report would impose an embargo on the export of goods or technology subject to national security controls under EAA to countries which the Secretary of State has determined have repeatedly provided support for acts of international terrorism. The conference report would also increase criminal and civil penalties for violations of export controls imposed pursuant to the EAA.

Comparable in importance to the reauthorization of the Export Administration Act is the provision in the conference report which responds to the proliferation of nuclear weapons. Several proposals have been put forward in the Congress over the past 2 years to respond to this critically important problem. Some would wish that more could have been done on this issue in this conference report. Nevertheless, title III of the conference report, the Nuclear Proliferation Prevention Act of 1992, is an important step forward and I am pleased that we have been able to achieve its enactment in this bill.

The provision would require the President to impose sanctions on a U.S. or foreign company, or a foreign country that contributes to the efforts by any individual, group, or nonnuclear weapon state to acquire unsafeguarded special nuclear material or to use, develop, produce, stockpile, or otherwise acquire any nuclear explosive device.

The conference report also establishes a set of principles to guide conduct of United States companies doing business in the People's Republic of China and Tibet. The principles seek to establish certain standards of conduct such as nondiscrimination on the basis of sex, religion, ethnic or national background, or political belief; methods of production which do not pose an unnecessary physical danger to workers; the avoidance of convict or forced labor by a U.S. company, or goods that are produced by such labor. The State Department is required to submit an annual report to Congress on the level of adherence to the principles by United States companies, and the practices and policies of the People's Republic of China that interfere with adherence to the principles.

Finally, a provision which I consider to be of great importance would reauthorize the export promotion programs of the Commerce Department and address the broader issue of U.S. export promotion policy. The Banking Committee's Subcommittee on International Finance and Monetary Policy, which I chair, held a hearing on May 20 to review the range of export promotion programs sponsored by the Federal Government. Invited to testify at the hearing were representatives of the Commerce Department, Eximbank, the Small Business Administration, Agriculture Department, Agency for International Development, and the Trade and Development Program.

The number of agencies represented at the hearing is an indication of a key problem confronting U.S. export promotion policy: the lack of coordination and an overall national strategy. In response to this problem, the conference report would provide a statutory base for the interagency Trade Promotion Coordinating Committee [TPCC], which until now has operated pursuant

to Executive order, chaired by the Secretary of Commerce. Its purpose would be to coordinate the export promotion and export financing activities of the Federal Government and develop a governmentwide strategic plan for carrying out Federal export promotion and financing programs. The TPCC would be required to submit an annual report to Congress describing its strategic plan, the implementation of the plan, and any revisions made to the plan.

I would like to thank my fellow Senate conferees—Senator RIEGLE, Senator CRANSTON, Senator GARN, and Senator MACK—for efforts in support of this important legislation. I would also like to make mention of the Banking Committee staff who made great efforts to bring this legislation to enactment—Martin Gruenberg, Patrick Mulloy, and John Walsh.

Mr. President, I strongly urge my colleagues to support this conference report.

Mr. RIEGLE. Mr. President, I rise in support of H.R. 3489, the conference agreement on the Omnibus Export Amendments Act of 1992. This legislation makes major changes to the Export Administration Act [EAA]. It updates our export control regime to take account of current international realities. It also enhances our Nation's export promotion and financing activities.

The EAA provides the statutory basis for the national security export control regime we have had in place since the beginning of the cold war in the 1940's. We used such controls to deny the Soviet Union and its allies those critical dual use machines and technologies they could have used to strengthen themselves militarily. Because the implementation of effective export controls depended on cooperation from our allies, the Coordinating Committee for Multilateral Export Controls, or Cocom, was formed in 1949 to harmonize allied export control policies.

Since we last renewed the EAA in 1988, dramatic changes have taken place in eastern Europe and the Soviet Union. During the past two Congresses, we have worked to fashion a national security export control regime that makes sense in a new era of East-West relations as well as a new era of global economic competition. This legislation does just that. It streamlines U.S. export controls governing sales of dual-use items to the newly emerging democracies in eastern Europe and the former Soviet Union. It eliminates overburdensome export controls, that harm rather than help our national security, by restricting American companies from competing for sales in this new era of global economic competition. Moreover, by incorporating in statute the decontrol agreements recently reached within Cocom, it ensures U.S. export controls are effectively coordinated with the policies

and procedures of other Cocom members.

Mr. President, while this legislation relaxes controls on the export of dual use goods and technology to the countries of the former Soviet Bloc, it tightens controls on the sale of those items to terrorist countries. No export of dual use items to terrorist countries, that will help them develop chemical or biological weapons, or the means to deliver them, is permitted unless the President determines that the transaction is essential to the national security interests of the United States. He must report any such determination to Congress at least 15 days prior to the proposed transaction. The legislation recognizes that although the strategic threat of the cold war is waning, the United States must act to stop a new threat to world and regional peace and security—countries that sponsor or support international terrorism. We must work with other responsible countries to ensure we have an effective multilateral regime in place to control exports of military critical items to terrorist countries.

The conference agreement also requires the President to focus increased attention on restricting nuclear-related exports. It also provides authority to put extensive sanctions on foreign countries or companies that assist irresponsible countries develop or manufacture nuclear weapons. Senators PELL and GLENN deserve great credit for authoring these important provisions.

Mr. President, this legislation also expresses the sense of the Congress that no exports should be made to any independent state of the former Soviet Union if such state restricts emigration of Jews or does not agree to expeditiously withdraw its troops from Latvia, Lithuania, and Estonia. The Baltic nations need our continued support to ensure their complete sovereignty in this matter.

In addition to reforming our export control system, this legislation also strengthens our export promotion programs. In contrast to our principal competitors, the United States does not have a comprehensive, integrated export enhancement strategy. There are 10 executive agencies involved in either export promotion or financing activities. Yet, we have not strategic plan for coordinating these activities and ensuring the efficiency of these many Federal programs. We have no overall rationale for determining whether our export promotion resources are being channeled into areas with the greatest potential return.

Mr. President, this legislation should improve the coherence of our export programs by establishing permanently in statute the Presidential interagency committee known as the Trade Promotion Coordinating Committee [TPCC]. It puts the Secretary of Com-

merce in charge of that Committee. The legislation also directs the TPCC to develop a governmentwide strategic plan for promoting and financing exports. Proper development and implementation of such a plan will ensure our export promotion and financing activities are being coordinated and priorities are being set that will enable our nation to get the maximum return for the money we spend on such activities.

Further, this legislation highlights the key responsibility of the Department of Commerce for strengthening our overall international trade and investment position. It requires the Secretary of Commerce to submit to the Congress an annual report on the international economic position of the United States and to appear annually before the Senate Banking Committee and the House Foreign Affairs Committee to testify on the report. Among other things, the Secretary of Commerce is required to report on the Department's efforts to promote the development of technologies and products critical to our industrial leadership and to increase exports using such technologies. The Secretary is also to report on how the TPCC's strategic export plan is being implemented.

Mr. President, I want to thank Chairman FASCELL and Congressman GEJDENSON for their cooperation in putting together this conference report. I also want to salute Senator GARN who played a major role in fashioning the legislation now before us. Let me also pay a particular thank you to my good friend and colleague, Senator PAUL SARBANES, the chairman of the Banking Committee's International Finance Subcommittee. He played a major role in drafting the Senate's bill and worked tirelessly in conference to make sure we produced a bill that reformed our present export control system.

H.R. 3489 goes far in meeting the needs of our exporters in this new age of global economic competition and does so in a way that does not jeopardize our national security. It gives us much-needed and long-overdue reform in our export control system. It also tightens controls on exports to countries that sponsor international terrorism. It ensures that our export promotion activities will be based upon a comprehensive, coordinated strategy. This legislation is important to my home State of Michigan which is a major exporter of manufactured goods. It is also good for our entire country. I urge its prompt passage.

Mr. GLENN. Mr. President, I rise to say just a few words about the nuclear sanctions provisions title III of the Omnibus Export Amendments Act of 1992. This title incorporates the amended texts of two of my bills—S. 1128 and Senate Joint Resolution 216—dealing with nuclear nonproliferation.

I am pleased that Congress has finally approved S. 1128—a bill to tighten significantly penalties against companies and countries that promote the global spread of nuclear weapons—and that the conferees also accepted the Sense of the Congress on IAEA safeguards, introduced last year by myself and Congressman PETE STARK (S.J. Res. 216 and H.J. Res. 351). Furthermore, I want to express my deep appreciation to my colleague, Senator Pell, to the Foreign Relations Committee, and indeed, to the Senate as a whole, which twice this year voted unanimously in support of this sanctions legislation.

Because of the significance of the sanctions in this bill, I would like to offer a summary of the key provisions along with a statement of my intentions in introducing them.

#### Subtitle B—Sanctions for Nuclear Proliferation

##### Section 321: Imposition of Sanctions.

###### Purpose:

To broaden presidential authority to impose sanctions against foreign and domestic persons that the President determines have contributed to the global proliferation of nuclear weapons. Specifically, the sanctions seek to deter illicit exports from the United States or a foreign nation of goods or technology that would assist any individual, group, or non-nuclear-weapon state to acquire a nuclear explosive device or unsafeguarded special nuclear material.

The section establishes explicit presidential authority to ban US government procurements from foreign or domestic firms that have "materially and with requisite knowledge" contributed to the proliferation of nuclear explosive devices or access to unsafeguarded bomb materials. The term "with requisite knowledge" derives from the use of the term "knowing," as defined in the Foreign Corrupt Practices Act of 1977.

###### Rationale:

Nuclear nonproliferation has been a key goal of US national security since 1945—a goal that has been strongly reaffirmed after the recent Gulf War. All Americans recognize that the acquisition by additional nations or groups of nuclear explosives or bomb material would jeopardize vital US interests and world peace. Yet with respect to US government purchases and US imports of good produced by firms that engage in proliferation-related exports, US statutory sanctions are currently more punitive for missile and CBW proliferation than for illicit activities promoting the global spread of fission or hydrogen bombs.

P.L. 101-510, for example, authorizes the President (inter alia) to ban US government contracts with, and US imports of goods produced by, foreign firms that engage in illicit sales of sensitive missile technology; similar sanctions are now found in legislation (P.L. 102-138 and P.L. 102-182) concerning the proliferation of chemical and biological weapons. Current nuclear sanctions, by contrast, provide for penalties relating to denials of foreign aid and nuclear cooperation—but provide no equivalent statutory penalties for foreign firms that traffic in illicit nuclear weapon-related goods.

The sanctions, triggering procedures, scope of persons affected, foreign government consultations, report, exceptions, waivers, and terms for terminating sanctions used in this section were modeled after the sanctions

provisions in previous legislation addressing missile, chemical and biological weapons proliferation.

Specifically, the sanctions in this section are consistent with the sanctions on missile proliferation in Title XVII of the National Defense Authorization Act for Fiscal Year 1991 (P.L. 101-510) and (for sanctions on chemical and biological weapon proliferation) in the Foreign Relations Authorization Act for Fiscal Years 1992 and 1993 (P.L. 102-138).

The case for the government procurement sanctions rests on cumulative revelations of the extent that foreign firms have been suppliers of secret nuclear weapons programs around the world. On March 22, 1989, for example, the Washington Post cited a raid by the West German government that discovered 70 German firms that had been active suppliers of Pakistan's nuclear program. In 1991, UN inspectors of Iraq's destroyed nuclear facilities discovered extensive reliance on foreign equipment and technology. Moreover, press accounts have identified a number of foreign commercial enterprises that do business with the US government.

The denial of foreign aid and nuclear cooperation—once a powerful sanction—may well (with low levels of foreign aid and the continuing stagnation of the nuclear power industry) decline in value as a disincentive for proliferation in the 1990's. The sanctions in this section therefore grants the President specific authority to deploy an additional powerful deterrent—the procurement ban—against illicit sales by firms that do extensive business with the federal government. Although import sanctions were originally intended to be included in this bill, they were withdrawn to permit the House to originate this particular sanction in accordance with House rules. The House may introduce such legislation in the next Congress.

The House added language providing for the issuance upon request by any person of an advisory opinion from the Secretary of State, in consultation with the Secretary of Defense, as to whether a specific proposed activity would subject that person to sanctions under this section. The provision states that no person relying in good faith upon such an advisory opinion shall be subject to the designated sanctions. I do not intend this provision to exclude consultation with other appropriate agencies.

#### Section 322. Eligibility for Assistance.

##### Purpose:

(a) To amend the Arms Export Control Act to ensure that foreign recipients of US arms exports are not in material breach of their nuclear nonproliferation treaty commitments; and (b) to amend the Foreign Assistance Act to authorize the President to waive for one year the prohibitions of Section 670(a)(1) concerning illicit transfers of nuclear reprocessing technology and illicit nuclear procurements in the United States, and to require Pakistan to satisfy the same nuclear standards in the Glenn/Symington amendments (sections 669 and 670 of the Foreign Assistance Act) that are required of all other non-nuclear-weapon states that receive US foreign aid.

##### Rationale:

(a) This section creates a strong disincentive for recipients of US arms exports to promote nuclear proliferation, and a strong incentive for such recipients to live up to their nuclear nonproliferation treaty commitments. The section is prospective: it is not intended to punish activities that occurred before enactment of this section.

(b) Current law (Section 670a-2 of the Foreign Assistance Act) authorizes the Presi-

dent to waive of any penalties for illicit transfers of nuclear reprocessing technology and for illicit nuclear procurement attempts in the United States. There is no time limitation in the current law constraining how long such a waiver may be issued. The new language would authorize the President to issue a waiver in any specific fiscal year, upon making the certifications that are currently required under that section.

Two of America's most important nuclear sanctions are found in sections 669 and 670 of the Foreign Assistance Act; 669 cuts off aid if a nation traffics in unsafeguarded uranium enrichment technology, while section 670 cuts off aid if a nation transfers or receives nuclear reprocessing technology or (among other activities) illicitly seeks nuclear technology in the U.S.

As originally enacted, sanctions under both sections can be waived by the President under specific circumstances identified in those sections. In 1981, however, President Reagan sought new waiver authority for Pakistan in order to facilitate US assistance to the Afghan rebels; this new authority was needed because Pakistan could not satisfy the requirements for the existing waiver authority in the Foreign Assistance Act. In short, although Pakistan was indeed engaging in illicit imports of unsafeguarded uranium enrichment technology, and given that Pakistan would not provide "reliable assurances" that it would not acquire the bomb, America nevertheless wanted to continue aid in order to achieve the goal of expelling the Soviets from Afghanistan.

In 1981, Congress agreed to extend a temporary (6 year) waiver of the uranium enrichment sanctions called for in sec. 669. After this waiver authority expired in 1987, it was renewed for shorter periods of time; this waiver authority officially expired on April 1, 1992. In early 1982, President Reagan issued P.D. 82-7, which waived the nuclear reprocessing sanctions required in sec. 670. In early 1988, President Reagan issued P.D. 88-5 to waive sanctions against a recent attempt by Pakistan to acquire material that "was to be used by Pakistan in the manufacture of a nuclear explosive device."

Thus, Congress has on 4 occasions granted special waiver authority for Pakistan under sec. 669; the President has issued 1 indefinite waiver of the reprocessing provision in sec. 670, and 1 waiver for penalties associated with an illicit effort by Pakistan to violate US nuclear export control laws. Yet despite these special waivers and large-scale US economic and military assistance throughout the 1980's, Pakistan's bomb program continues to move forward. On February 7, 1992, the Washington Post reported that the Pakistani foreign secretary, Sharyar Khan, had stated in an interview that Pakistan now possesses "elements which, if put together, would become a device."

The Soviet withdrawal from Afghanistan, coupled with alarming new developments in Pakistan's nuclear program in recent years (including continuing cooperation with China), calls for an end to Pakistan's special waivers of nuclear sanctions under the Glenn/Symington amendments. The price of continuing these waivers is greater than any conceivable gain to US nonproliferation objectives.

A new waiver of 669, for example, would permit (assuming Pakistan could meet other nonproliferation conditions under sec. 620E-e) continuation of economic or military aid to Pakistan even if Pakistan later provides Libya or Iran with the complete plans for a uranium enrichment plant. If a waiver were

in force for sec. 670, Pakistan could transfer the plans for a plutonium separation plant to Syria or any other country and incur no foreign aid penalty under US law. To reduce such risks, the new section would simply return Pakistan to treatment accorded to every other non-nuclear-weapon nation under the Glenn/Symington amendments.

Section 323. Role of International Financial Institutions.

##### Purpose:

To require US directors in international financial institutions to oppose "any direct or indirect use" of institution funds that would assist non-nuclear-weapon nations to acquire nuclear explosive devices or safeguarded special nuclear material. The section would also require US directors "to consider" the nuclear nonproliferation credentials of the nation that would benefit from funding offered by such agencies.

##### Rationale:

Multilateral funding agencies (World Bank, International Development Agency, International Finance Corporation, regional development banks, etc.) each year provide billions of dollars for legitimate development projects throughout the world. The purposes of US "development" assistance do not now include—and must never be permitted to include—aid in developing the bomb. By ensuring that no US funds that have been provided to multilateral development agencies will be used either directly or indirectly to promote nuclear proliferation, this section would serve both US national security and foreign policy interests.

This section follows several non-nuclear statutory precedents with respect to the "voice and vote" of U.S. executive directors in such institutions. For example: (1) 22 USC 262d requires that U.S. directors, in connection with their voice and vote in such institutions, "shall advance the cause of human rights"; (2) in accordance with 22 USC 262g, US representatives in such institutions "shall oppose any loan or other financial assistance" to promote any foreign exports of palm oil, sugar, or citrus crops if such exports would cause injury to US producers; (3) in 22 USC 262h, the Secretary of Treasury is required to instruct the US directors "to use the voice and vote of the United States to oppose" any assistance that would promote the foreign production of any commodity or mineral whose export would cause substantial injury to US producers; and (4) as required by 22 USC 262n-2, the Secretary of Treasury shall instruct the US directors to use the "voice and vote" to oppose financing of projects that will produce exports in violation of the General Agreement on Tariffs and Trade.

Section 324. Amendments to FDIC Improvement Act.

##### Purpose:

To expand the President's authority to apply sanctions against banks and financial institutions that knowingly promote nuclear proliferation.

##### Rationale:

This section builds on evidence (e.g., testimony before the Foreign Relations Committee on October 17, 1991 by David Kay of the International Atomic Energy Agency) that banks played significant roles in assisting Iraq to acquire illicit nuclear technologies. This section amends the Federal Deposit Insurance Corporation Improvement Act of 1991 to mandate a ban on dealings by banks and other financial institutions in US government finance and other restrictions on the operation of such institutions in the United States, if the President determines

that they have materially and with requisite knowledge assisted non-nuclear-weapon states to acquire unsafeguarded special nuclear material or nuclear explosive devices. The sanctions under this section contain waiver authority in the event any such sanction would "have a serious adverse effect on the safety and soundness of the domestic or international financial system or on domestic or international payments systems."

#### Section 325. Ex-Im Bank.

##### Purpose:

To require the Secretary of State to report to Congress and to the Board of Directors of the Ex-Im Bank if the Secretary determines that any country "has willfully aided or abetted" a non-nuclear-weapon state to acquire a nuclear explosive device or unsafeguarded special nuclear material. Ex-Im Bank credits would then be suspended, unless the President determines it is in the national interest to continue such credit.

##### Rationale:

The Export-Import Bank Act already contains a report requirement along these lines, but the existing law only addressed circumstances in which nations violate IAEA safeguards or a US agreement for nuclear cooperation. The new language expands the scope of the report to a wider range of activities relating to illicit nuclear assistance to other nations.

Section 326. Additional Amendments to the Foreign Assistance Act of 1961.

##### Purpose:

To expand sanctions against nations that transfer a nuclear explosive device, design information of such a device, or any important component of a nuclear explosive device to a non-nuclear-weapon state.

##### Rationale:

Under Section 670(b)(1) of the Foreign Assistance Act as currently worded, no foreign assistance may be given to any non-nuclear-weapon state that either receives or detonates a nuclear explosive device. The new language would extend this penalty to include receipt of bomb parts or bomb design information. Current law would only impose a penalty if a complete bomb were physically transferred to a non-nuclear-weapon state—yet if a recipient of U.S. aid gave Syria or Iraq a bomb design, for example, or fabricated components of a bomb or bombs, there would be no explicit penalty under U.S. law. This section would strengthen sanctions to address just such situations.

As a result of an amendment agreed unanimously by the Foreign Relations Committee, the bill includes additional sanctions against countries that the President has determined have violated the prohibitions of Section 670(b)(1). The new sanctions include at a minimum: termination of foreign assistance, arms sales, U.S. government credits, arms sales financing, multilateral development bank assistance, bank loans, and U.S. exports (excluding agricultural commodities and food). The amendment exempts from sanctions certain activities undertaken pursuant to title V of the National Security Act (relating to congressional oversight of intelligence activities).

The intent of this section is to strengthen sanctions against, and thereby to deter, the proliferation of nuclear explosive devices and the most critical design information and components of such devices. Transfers to a non-nuclear-weapon state of design information of nuclear explosive devices or of any components determined by the President to be both known by the transferring country to be intended by the recipient state for use in any such a device, would be treated under

US law as though a device itself had been transferred.

The transfer of an entire disassembled device would clearly require the immediate imposition of sanctions under this provision. The willful transfer of any nuclear weapons design information or component that would be required to be classified under the Atomic Energy Act as "Restricted Data" would similarly require the sanctions to be applied.

The provision provides three tests for the imposition of sanctions in less clear-cut cases: (a) Did the transferring nation provide the part or design with the knowledge that it would be used in a nuclear explosive device?; (b) Did the recipient nation import the item or design with the intent of using it in a nuclear explosive device?; and (c) Was the specific part of design information of such importance that its absence would prevent the device from satisfying the definition of a "nuclear explosive device" as used in this Act?

It is my intent that the President must impose the requisite sanctions if a preponderance of evidence, from any and all credible sources, establishes that the answers to each of these three tests are in the affirmative.

#### Section 327. Reward.

##### Purpose:

To authorize the Secretary of State to pay rewards for information relating to acts substantially contributing to the risk of illicit foreign acquisition of unsafeguarded nuclear material or a nuclear explosive device.

##### Rationale:

Under Section 36 of the State Department Basic Authorities Act (P.L. 84-885), the Secretary of State already has authority to pay rewards for information relating to terrorist activities. On July 15, 1991, the State Department's Acting Coordinator for Counterterrorism testified before the Senate Committee on Governmental Affairs that the Department had found this reward authority to be "... unequivocally a successful program." As devastating as contemporary terrorism can be, a nuclear explosive can produce terror on a far greater scale—yet under current law, the Secretary of State is not statutorily authorized to pay rewards for information useful in halting nuclear proliferation. The new section would require no payments, it would only authorize the Secretary of State to issue such payments should they advance the goals of nuclear nonproliferation.

#### Section 328. Reports.

##### Purpose:

To require (a) that the ACDA annual report to Congress include a section on instances when other nations have failed to comply with their commitments to the United States with respect to nuclear nonproliferation; and (b) that Congress be kept fully and currently informed, in accordance with Executive reporting responsibilities under Section 602(c) of the Nuclear Non-Proliferation Act of 1978, about the status of diplomatic demarches issued on behalf of nuclear nonproliferation objectives.

##### Rationale:

(a) Over the last decade, the United States received numerous high-level official commitments from nations around the world concerning their intentions with respect to the nonproliferation of nuclear weapons. Many of these commitments have been registered in treaty form (e.g., there are now over 150 full parties to the Nuclear Non-Proliferation Treaty); but others have been provided in official but less formal arenas. Russia is already required to comply with its

arms control commitments to the United States, by means of a reporting requirement created in the Defense Authorization Act of 1986 (Sec. 1002). Modeled on that reporting requirement, the new section seeks to underscore the expectation of the United States that nuclear commitments—especially those commitments deemed by the President to constitute a national obligation—must also be kept. The information required in this report concerns noncompliance—there is also no stipulated sanction for noncompliance, apart from a statement by the President in this report as to which steps are being taken to restore compliance.

(b) Diplomatic demarches (defined in the bill) are one of the principal means by which the day-to-day business of nonproliferation is conducted. Yet despite repeated public references to the frequency that the US has issued such demarches, there has never been a systematic assessment of their effectiveness in advancing US nuclear nonproliferation goals. There is some evidence that these demarches have often not proven to be terribly effective: one former US defense official once termed these demarches, "demarche-mallows," while another former German export control official has been widely quoted in the press as saying that these demarches landed in his "waste-paper basket." The bill states that it is the sense of Congress that developments relating to diplomatic demarches should be included in Executive briefings given to the Committees on Foreign Relations and Governmental Affairs in the Senate, and the Committee on Foreign Affairs in the House, in accordance with the reporting responsibilities of sec. 602(c) of the Nuclear Non-Proliferation Act of 1978.

#### Sec. 329. Technical Correction.

To bring current law up to date with existing US nuclear regulatory and legal standards for ensuring the physical protection of highly enriched uranium (HEU). Under international guidelines to which the US subscribes (INFCIRC/225 and the Convention on Physical Protection of Nuclear Material) the control standard for HEU is 5 kilograms. The amendment is a minor technical change.

#### Sec. 330. Definitions.

In this section, the term "nuclear explosive device" is defined explicitly for the first time in US law. As long as the term remains undefined, the fundamental goal of all US nuclear nonproliferation laws will remain ambiguous. Nations can design nuclear weapons by means of extremely small explosive tests using minute quantities of bomb material. Since there are no credible peaceful reasons to conduct such so-called "zero-yield" test detonations, the definition must cover such devices. The section adopts a standard that was originally created during the Eisenhower Administration to distinguish a nuclear from a non-nuclear explosion.

The phrase "unsafeguarded special nuclear material" is defined to include plutonium and special nuclear material that is held either in violation of or otherwise outside of IAEA safeguards; the definition excludes non-sensitive quantities that would qualify for export from the United States under general licensing authority.

Mr. GARN. Mr. President, I join my colleagues in support of the conference report on H.R. 3489, the Omnibus Export Amendments Act of 1992. This bill restores vital national security authority that has been lapsed for more than 2 years. Its basic elements have passed both Houses several times before; four times in the Senate over 3 years. While

the Senate has had to endure a frustrating 2 year wait for the House to come to the conference table, this conference agreement is, in a number of areas, a stronger bill than the one we last approved in the Senate.

Title III of the conference report enacts S. 1128, the Senate-passed nuclear sanctions bill, that mandates sanctions against companies and countries that assist nuclear proliferation. That title also provides for expanded congressional oversight of the licensing of nuclear goods and technology and urges the President to negotiate to improve the functioning of the International Atomic Energy Agency.

The bill imposes an effective embargo on the export of goods and technology controlled under the EAA to terrorist countries including Iran and Syria. This includes an embargo on goods controlled for proliferation purposes unless the President determines an export to be essential to U.S. national security interests, and a ban on all other goods controlled for national security purposes unless the Secretary of State determines the export would make no contribution to the military potential of the country or its ability to support acts of international terrorism. This embargo replaces a requirement for interagency consultation in the case of licenses to terrorist countries that was contained in the Senate-passed bill.

Title IV of the conference report establishes a set of principles to guide the operation of United States economic projects in China. These are principles that all Americans support and the U.S. business community has indicted its intention to apply them to their economic activities in China. The conference report urges companies to make the State Department aware of their application of the principles and any interference by the Chinese Government in that effort. The title also requires an annual report by the State Department on implementation of the principles by United States companies and the extent to which the Government of China has acted to contravene them.

The conference report strengthens enforcement of the EAA by substantially increasing penalties and, in title II, updates and expands proposals for improving the export promotion activities of the U.S. Government.

What is most important, however, is that the conference report ends the state of emergency under the International Emergency Economic Powers Act which has been used to keep the expired EAA in force. Critical national security authorities of the expired EAA are being weakly sustained under IEEPA and are increasingly being challenged in the courts. It is critical to our national security that the legal underpinning of the EAA is restored.

Unfortunately, the apparent unwillingness of the House to consider any

additional measures sent over from the Senate dooms this conference report. However, it has been clear since Tuesday morning when action on the conference report was blocked by procedural delays that the EAA would remain out of force. In a demonstration of all that is wrong with the legislative process, a reasonable conference report, loaded with strong national security provisions, will die because someone's preferred wording is not included.

The failure of the 102d Congress to enact a reauthorization of the Export Administration Act is amazing because it is a dispute over two alternative policy formulations that have both passed the House easily, that will both produce the same policy result, and that are both acceptable to the President. It is also amazing because the bill has overcome huge obstacles only to trip over a pebble.

The major obstacle confronting the bill was the addition of three veto items to the Senate bill in the House. All three addressed important issues: Licensing of software with encryption capabilities as munitions, liberalization of telecommunications trade with the former Soviet Union, and stricter licensing of nuclear trade. But all three involved extremely sensitive national security issues and all three are unworkable as legislation.

The first two could have compromised U.S. intelligence capabilities. The nuclear provision would have greatly complicated or prohibited peaceful nuclear cooperation including assistance on nuclear safety for the states of the former Soviet Union. Based on my long experience with these issues, I was convinced that sensitive licensing decisions requiring careful case-by-case evaluation could never be resolved through enactment of a cookbook of licensing rules.

Fortunately, I was able to help resolve the encryption issue through an agreement between the software industry and the National Security Agency. The telecom issue was resolved by an agreement in Cocom earlier this year. But until a few weeks ago, there was not even an effort made to reach an acceptable compromise on the nuclear provision. Finally a few days ago, with the possibility of no legislation in prospect, proponents of the nuclear licensing provisions finally agreed to drop them and adopt the Senate's nuclear sanctions bill, S. 1128, in its place.

With the last minute resolution of the veto problems, the road to enactment appeared clear. However, the EAA has now fallen victim to a conflict between the House Armed Services Committee and the Foreign Affairs Committee over definition of the division of responsibility between the Arms Export Control Act and EAA and between the Secretaries of Commerce and Defense. The exact wording on these points had been debated on the

House floor and in conference. Despite an accommodation made in conference on the role of DOD, some members of the Armed Services Committee remained unhappy. They were not accommodated, blocked House consideration of the conference report on Tuesday, and the bill is now doomed.

If the EAA remains lapsed, the President and the agencies can exercise control authorities in any fashion they like. The sad truth is that if the conference report were adopted, or the language preferred by the bill's House opponents, the President and the agencies would do whatever they want anyway. This is the reality of the export control process.

Unfortunately, the House committees have been operating under the misconception that adding or deleting words on the role of the Cabinet agencies in the EAA will actually change the operation of the system. They are both wrong. In committee, Foreign Affairs added pages of instructions on control list review that emphasized the role of Commerce. Armed Services succeeded on the House floor in removing some of those words in an attempt to shore up the role of DOD. The language in the conference report represents the House-Senate compromise on these issues.

If I had the right to choose the words, my inclination would be to side with Armed Services and eliminate the words that trouble them. But I am frankly indifferent about the additional direction added by Foreign Affairs because I have learned, during 18 years watching Congress try to legislate their way through the bureaucratic maze, that the interagency process is immune to our efforts. Unless the law is completely rewritten and power granted to a single player, the balance of power among Commerce, Defense, and State will not change.

Furthermore, there is now a structural reason why no single agency is in control of list review or control policy. Almost all U.S. controls are multilateral so any proposals to change controls require a consensus among the three agencies on a U.S. negotiating proposal and can only occur if other governments agree. No amount of instruction by the Foreign Affairs to Commerce can alter those facts.

While I think that both sides of the House debate were wrong on this fundamental issue, I fear that the House opponents of the conference report are operating under other serious misconceptions about the report's contents. A fact sheet on the report argued that the section of the bill setting new rules for commodity jurisdiction decisions would result in total decontrol of critical technologies like satellites or jet engine technology. This is simply wrong. The issue is whether certain goods and technology that the United States has agreed in CoCOM are indus-

trial rather than military goods should be controlled by State under munitions control rules or by Commerce under dual-use rules.

Both the conference report and the alternative House language require the same reevaluation of the munitions list controls. Both give discretion to the President to keep items on the munitions list, notwithstanding their industrial character. The difference between them is the standard for the Presidential waiver, higher in the bill, lower in the proposed alternative. The words are different, the outcome would not be.

A second complaint is that the provision calling for a total reevaluation of the dual-use control list every two years would give Commerce a free hand to decontrol technology. As I indicated earlier, lists cannot be changed without interagency consensus on a U.S. negotiating position and agreement in CoCOM and other multilateral arrangements. Furthermore, current law already mandates the sunset of the entire foreign policy and proliferation control lists every year. Even though a number of foreign policy controls are unilateral, the Administration response is a form letter reinstating all of them. There is even less reason to believe the outcome would be any different in this case.

The third concern is that a mandate to reevaluate controls on any country in Eastern Europe and the former Soviet Union that assumes a less threatening strategic posture would give Commerce total control over the process. In fact, the provision calls for evaluation of these countries on a consultative basis by Commerce, State and Defense. The determination that would trigger a U.S. decontrol proposal to CoCOM is not assigned to Commerce but, like the development of any U.S. negotiating proposal, would be a group effort. No change could come unless State were to propose it and CoCOM were to agree. Additional complaints about indexing procedures and exports to CoCOM reflect a similar misunderstanding of the process. They are equally misplaced.

Unfortunately, the two sides in this dispute have become so intent on winning the war of words that they can apparently agree on only one thing. Better no bill than a bill without their words. This is a sad end to this legislation and a sad reflection on the legislative process.

This is the last time I will take part in a debate on the Export Administration Act. I have engaged in other difficult debates on this subject over the years with the House of Representatives. I will not miss them. But I do not regret the time I have spent on these issues because I believe they have been important to U.S. national security. While I have often criticized the flaws in our export control system, I

would go so far as to argue that CoCOM controls played an important role in the collapse of Communism.

The export control system needs a legal underpinning. I believe that the only responsible course is for Congress to provide it, if needs be, by getting right to work on a reauthorization in the next Congress. House Foreign Affairs has indicated its intention of doing just that but the performance of the 102d Congress in this regard is not hopeful.

Even if that effort succeeds, current law is becoming increasingly outdated. Our law and policy are out of step with the incredible changes in the former Soviet Union and the rising challenge of proliferation of weapons of mass destruction. We need a new law that reflects those realities. We need a decisionmaking process that minimizes interagency rivalry and encourages greater cooperation between the Executive and Congress. I have long favored a single Office of Strategic Trade. Perhaps its time is coming.

The new challenges of stopping the flow of technology to countries engaged in proliferation or terrorism are, in many ways, harder than controlling technology to the Soviets. Many of the technologies are less sophisticated and more widely available and the sources of diversion are many. We have to avoid the danger of creating a patchwork of poorly focused proliferation control regimes and embargoes on the enemy of the moment. This is the path of least resistance but it will make a poor framework for U.S. trade.

However, those are debates for another day and another Senator. I urge my colleagues to support adoption of the conference report on the Export Administration Act and send it to the House. If they are true to their word and kill the legislation, I urge my colleagues to return to the fray in the 103d Congress and reenact the EAA.

#### NUCLEAR SANCTIONS PROVISIONS

If the Chairman of the Committee on Governmental Affairs and author of S. 1128 will allow it, I would like to engage him in a colloquy.

I would like to clarify the provisions of Title III of the Omnibus Export Amendments Act of 1992 (formerly S. 1128, the Omnibus Nuclear Proliferation Control Act of 1992), that provide for sanctions on companies and individuals determined by the President to have contributed materially and with requisite knowledge to nuclear weapons proliferation.

I strongly endorse this effort to sanction companies involved in the proliferation of nuclear weapons. I rise to clarify one point concerning the presidential determinations called for in these provisions. It has come to my attention that, in very rare circumstances, the President may temporarily need to delay the full imposition of sanctions when it is necessary to

protect intelligence sources and methods that are being used to acquire further information on weapons proliferation.

Is it the Senator's understanding that the protection of intelligence sources or methods for the purpose I have described may, in very rare circumstances, warrant a temporary delay in the imposition of sanctions under this provision?

Mr. GLENN. Mr. President, it is the intention of this legislation that the President must impose the requisite sanctions if a preponderance of evidence, drawn from any and all credible sources, establishes that a violation has occurred of this provision. I agree that the President may, in rare circumstances, need to delay temporarily the imposition of sanctions against a company or individual which has materially and with requisite knowledge contributed to nuclear weapons proliferation, if such delay is necessary to protect intelligence sources or methods essential to the acquisition of further intelligence about proliferation. Such a delay should be short-term in nature and must not result in a significant risk of additional transfers of sanctionable goods or technology under this legislation, or be used to further any other policy than nonproliferation.

Mr. GARN. Mr. President, I thank my colleague for this clarification.

The PRESIDING OFFICER. Without objection the conference report is agreed to.

So, the conference report was agreed to.

Mr. FORD. Mr. President, I move to reconsider the vote.

Mr. SIMPSON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

#### TEMPORARY USE OF CERTAIN LANDS

Mr. FORD. Mr. President, I ask unanimous consent the Senate Energy Committee be discharged from further consideration of H.R. 5291, relating to South Gate Elementary; that the Senate proceed to its immediate consideration; the bill be deemed read a third time, passed; that the motion to reconsider be laid upon the table; and any statements relative to the passage of this item appear at the appropriate place in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill (H.R. 5291) was deemed to have been read three times and passed.

#### ACCESS TO BUSINESS OPPORTUNITIES

Mr. FORD. Mr. President, I ask unanimous consent the Senate proceed to the immediate consideration of S. 3388, a bill to provide graduates of Small

Business Administration's Minority Small Business and Capital Ownership Development Program with opportunities to compete for certain contracts under limited circumstances introduced earlier today by Senator SHELBY; that the bill be deemed read three times, passed, and motion to reconsider be laid upon the table.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill (S. 3388) was deemed to have been read three times and passed.

#### AUTHORIZATION FOR DOCUMENT PRODUCTION

Mr. FORD. Mr. President, on behalf of the majority leader and the distinguished Republican leader, Mr. DOLE, I call up Senate Resolution 364, authorization for document production by, and representation of, a committee, a Member, and employees of the Senate, and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

A bill (S. Res. 364) to authorize document production by, and representation of, a committee Member, and employees of the Senate and United States v. John M. Kent, Sr., et al.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

Mr. MITCHELL. Mr. President, the defendant in a criminal case pending in the Western District of Louisiana has caused subpoenas for records of the Committee on the Judiciary to be served upon the chairman and staff. The U.S. Attorney is alleging in United States versus John M. Kent, Sr., et al., that the defendant conspired with others to give a bribe to a Federal district judge, Richard Haik, in return for his ruling favorably in a civil lawsuit in which the firm owned by the defendant was a party. Judge Haik reported the alleged bribe offer to the Government and is expected to testify at trial. The defense is seeking from the Judiciary Committee records from Judge Haik's confirmation that it believes may be relevant to the defense of these charges.

This resolution authorizes the chairman and ranking minority member, acting jointly, to produce committee records, except when a privilege is asserted. The resolution also authorizes representation by the Senate Legal Counsel in connection with these subpoenas.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution was agreed to.

The preamble was agreed to.

The resolution (S. Res. 364), with its preamble, is as follows:

#### S. RES. 364

Whereas, in United States v. John M. Kent, Sr., et al., Cr. No. 92-60038, pending in the United States District Court for the Western District of Louisiana, counsel for the defendant has caused subpoenas for the production of documents of the Committee on the Judiciary to be served on the Chairman of the Committee, Senator Biden, and an authorized staff representative of the Committee;

Whereas, pursuant to sections 703(a) and 704(a)(2) of the Ethics in Government Act of 1978, 2 U.S.C. §§288b(a) and 288c(a)(2), the Senate may direct its counsel to represent committees, Members, and employees of the Senate with respect to any subpoena, order, or request for testimony relating to their official responsibilities;

Whereas, by the privileges of the Senate of the United States and Rule XI of the Standing Rules of the Senate, no evidence under the control or in the possession of the Senate can, by administrative or judicial process, be taken from such control or possession but by permission of the Senate;

Whereas, when it appears that evidence under the control or in the possession of the Senate is needed for the promotion of justice, the Senate will take such action as will promote the ends of justice consistent with the privileges of the Senate: Now, therefore, be it

*Resolved*, That the Committee on the Judiciary, acting through its Chairman or authorized staff representative, upon the joint approval of the Chairman and Ranking Minority Member, is authorized to produce documents in United States v. John M. Kent, Sr., et al., except concerning matters for which a privilege is asserted.

SEC. 2. That the Senate Legal Counsel is authorized to represent the Committee on the Judiciary, Senator Biden, and any employee of the Committee in connection with the subpoenas in United States v. John M. Kent, Sr., et al.

#### RESOLUTION CORRECTION

Mr. FORD. I ask unanimous consent the Senate proceed to the immediate consideration of Senate Concurrent Resolution 143, a correcting resolution submitted earlier today by Senator JOHNSTON, the resolution be agreed to, and the motion to reconsider be laid upon the table.

The PRESIDING OFFICER. Without objection, it is so ordered.

The concurrent resolution (S. Con. Res. 143,) which was deemed to have been agreed to, is as follows:

#### S. CON. RES. 143

*Resolved by the Senate (the House of Representatives concurring)*, That, in the enrollment of the bill (S. 1671) to withdraw certain public lands and to otherwise provide for the operation of the Waste Isolation Pilot Plant in Eddy County, New Mexico, and for other purposes, the Secretary of the Senate shall make a correction in the bill as follows:

After section 23 of the bill insert the following flush paragraph:

Nothing herein affects the authority of the Administrator of the Environmental Protection Agency under applicable law to establish radiation protection standards with respect to Yucca Mountain. Those standards may be determined by the Administrator without regard to any standard referenced herein. Nothing herein affects the Adminis-

trator's authority to establish standards that are more or less restrictive with respect to Yucca Mountain.

#### WASTE ISOLATION PILOT PLANT LAND WITHDRAWAL ACT OF 1992—CONFERENCE REPORT

Mr. FORD. Mr. President, I submit a report of the committee of conference on S. 1671 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the the bill (S. 1671) to withdraw certain public lands and to otherwise provide for the operation of the Waste Isolation Pilot Plant in Eddy County, New Mexico, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of October 6, 1992.)

Mr. JOHNSTON. Mr. President, today the Senate is considering the conference report to accompany S. 1671, the Waste Isolation Pilot Plant Land Withdrawal Act. This legislation would permanently withdrawn the public land surrounding the WIPP facility in Carlsbad, NM, and would establish certain conditions and limitations on the operation of WIPP. This legislation is an important milestone in the Department of Energy's efforts to open the WIPP facility for initiation of the test phase.

The Waste Isolation Pilot Plant is a research and development facility of the Department of Energy that was authorized by Public Law 96-164 for the purpose of demonstrating the safe disposal of radioactive waste generated by DOE's nuclear weapons production activities. The WIPP facility, built 2,150 feet below the surface in the Delaware salt basin in New Mexico; has been under construction since 1981. The facility is now ready to open to begin the test phase. During the test phase, DOE will conduct a series of experiments to evaluate the facility's ability to comply with the environmental laws governing the safe storage and disposal of nuclear waste.

The WIPP site consists of 10,240 acres in Eddy County, NM, all of which is public land administered by the Bureau of Land Management. Under the terms of this legislation, that land will be permanently withdrawn from the public domain and transferred to the Secretary of Energy for his use in carrying out the test phase at WIPP and ultimately, if the facility is found suitable,

for permanent disposal of transuranic waste.

The transuranic waste that will be emplaced at WIPP results primarily from plutonium reprocessing and fabrication, as well as from research and development activities at various DOE facilities. Transuranic waste exists in a variety of physical forms ranging from unprocessed laboratory trash (such as absorbent papers, tools, glassware, protective clothing, and gloves) to solidified sludges from waste water treatment. About 60 percent of this transuranic waste is mixed with hazardous waste components. The major chemical component in this mixed waste is metallic lead, which exists primarily in the form of glovebox parts and lead-lined gloves and aprons. Some mixed waste also contains traces of organic cleaning solvents such as methylene chloride and carbon tetrachloride.

During the test phase at WIPP, experiments will be conducted with this waste to reduce uncertainties associated with the prediction of natural processes that might affect the long-term performance of WIPP. Results of these experiments will be used to determine whether transuranic waste can be permanently disposed of in WIPP in compliance with the EPA disposal regulations. Under the provisions of S. 1617, if EPA certifies that WIPP can comply with the disposal regulations, DOE can then begin operation of WIPP as a permanent disposal facility.

The Committee on Energy and Natural Resources has been monitoring the progress of the WIPP facility for several years now. I am pleased that we have now reached the point that this important facility is ready to open. This is a major milestone in the Department's efforts to demonstrate that we have the technology necessary to store and dispose safely the byproducts of our nation's nuclear weapons.

The conference report before the Senate today is a compromise in the truest sense of the word. I cannot say that I am pleased with every provision of the bill. In my opinion, the final bill includes more prerequisites to the opening of the facility than are truly necessary for the safe operation of the facility. The Department of Energy is ready now to begin the test phase, and I would have preferred that the legislation allow that. Instead, it will be close to a year before the first shipments of waste will be sent to the WIPP facility.

Over \$1 billion has been spent to date on construction of the Waste Isolation Pilot Plant, and the Department spends \$14 million a month just to keep the facility open and ready to begin testing. This is a hefty price for the taxpayers of this country to pay simply to keep a facility up and running in a standby mode. It is of the utmost importance, therefore, that the statutory deadlines contained in this legislation are met.

The conference report contains a significant new regulatory role for the Environmental Protection Agency in the Department of Energy's test phase activities at WIPP. Under the provisions of the legislation, the EPA must approve the Department's test plan and retrieval plan by rulemaking prior to initiation of the test phase and must approve any modifications to those plans by rulemaking. While the Senate bill would have required EPA review and concurrence over test phase activities, the process set out in the Senate bill would have been an informal and iterative process rather than a formal rulemaking process. I would have preferred to retain the review and concurrence process of the Senate bill because I believe it would have been better suited to the review of a scientific program and it could have been completed in a more timely fashion.

Therefore, it was with some reluctance that the Senate conferees agreed to accept the House approach of requiring the Department's test plan to be approved by the EPA through rulemaking. The Senate conferees agreed to this approach with the understanding that it would be completed in an expedited fashion, consistent with the provisions of section 553(c) of the Administrative Procedures Act. Under these provisions, there will not be a formal adjudicatory hearing, and informal public hearings will be held only if it is possible to do so within the time schedules laid out in the bill. The provisions of the conference report require the EPA Administrator to complete the rulemaking on the test plan within 10 months of enactment of this act. Maintenance of this time schedule is extremely important.

Maintenance of the schedule is important because the facility is ready now, the test plan is ready now, and the waste is ready to move now. We simply cannot afford to delay this and keep spending \$14 million a month ad infinitum.

There are a number of other rulemakings that will be required by the Environmental Protection Agency during the course of the test phase. It is the intention of the conferees that these rulemakings also be completed in an expedited fashion, consistent with the provisions of section 553(c) of the Administrative Procedures Act, with no adjudicatory hearing.

One other aspect of EPA's regulatory role at WIPP requires some explanation. Section 8 of the conference report addresses publication of final disposal standards for WIPP, compliance with those standards, and the process for certification of compliance by the Administrator of the Environmental Protection Agency.

The conference report would reinstate what are known as the Subpart B disposal standards, which were promulgated by the Environmental Protection

Agency in 1985 as part of 40 C.F.R. 191. These standards were subsequently remanded to the Environmental Protection Agency in 1987 by the U.S. Court of Appeals for the First Circuit. While the court remanded the Subpart B standards in total, the basis for the remand was three points that were largely procedural in nature.

The conference report would reinstate the Subpart B standards, except for those items that were the basis for the remand, as they relate to the Waste Isolation Pilot Plant. The conference report also directs the Administrator of the Environmental Protection Agency to promulgate final disposal standards, resolving the parts of the regulations that were remanded, not later than 6 months after the date of enactment. It is important to emphasize that the conferees are making no judgment in this legislation on whether any substantive revisions to these standards are required. As the basis for the 1987 remand was procedural, it is quite likely that repromulgation of the standards will result in the same standards as those promulgated in 1985. There is nothing in this legislation that should be interpreted to require EPA to change any of the substantive provisions of the 1985 standards as they relate to the WIPP facility. Similarly, it should be clear that additional public comment will not be required if the standards are not changed. Furthermore, no public comment will be required for those parts of Subpart B that are reinstated by this legislation.

The purpose in reinstating the 1985 standards and requiring repromulgation of the remaining parts of the regulations within 6 months is to have these regulations in place in total prior to the initiation of the test phase at the WIPP facility. By reinstating the 1985 standards, the conferees are seeking to narrow the issues that must be revisited by the Environmental Protection Agency so that the agency will be able to meet the 6-month deadline for repromulgation of the remaining portions of the final standards. Reinstatement of the 1985 standards should not be interpreted, however, as the Congress putting a stamp of approval on the substantive provisions of the 1985 standards. The conferees are making no such judgment by this legislation.

It is important to emphasize also that it is the subpart A standards for management and storage—not the subpart B standards—that will govern activities at the WIPP facility during the test phase and until a decision is made to close the facility. Those standards have been in effect since 1985. In fact, the subpart B standards will not even be required for the WIPP facility until many years into the future since these standards really apply to the facility when it is finally closed up permanently with intention of removing the

waste. It was important to the House, however, that these standards be in place for WIPP prior to the opening of the WIPP facility. Therefore, we agreed to reinstate the regulations within 6 months.

Again, maintenance of time schedules is important. The conference report requires that EPA publish the final disposal regulations under section 8(b) within 6 months of enactment. It was only with great reluctance that the Senate conferees agreed to require publication of the final standards as a prerequisite to the test phase, and that was only with assurances from the EPA that a 6 month schedule could be met.

I cannot emphasize enough the importance of meeting all of the schedules laid out in the conference report. The Senate conferees agreed to many more procedural prerequisites to the opening of the WIPP facility than we believe are necessary to protect the public health and safety. These provisions were agreed to one the understanding that the schedules would be met.

It is critical that the Department of Energy be allowed to open the WIPP facility for the test phase without necessary delay. Passage of this conference report today is an important first step towards that.

Mr. BINGAMAN. Mr. President, I rise today to encourage my colleagues to support the Conference Report on S. 1671, the Waste Isolation Pilot Plant Land Withdrawal Act.

The legislation we consider today calls for the permanent withdrawal of lands in Eddy County, NM, for use by the Department of Energy to operate the Waste Isolation Pilot Plant [WIPP]. WIPP was authorized under section 213 of the Nuclear Energy Authorization Act of 1980 as a defense activity of the Department of Energy for the purpose of providing a research and development facility to demonstrate the safe disposal of radioactive waste resulting from defense activities. This legislation reasserts that the primary mission of WIPP is to provide for the receipt, handling and permanent disposal of defense transuranic waste.

Mr. President, it is imperative that this conference report be passed. Failure to approve legislation that can be signed into law places our state of New Mexico in a position that may result in shipment of waste to WIPP without the statutory guarantees that we believe are necessary to protect the environment, public health and safety.

The key provisions of this legislation:

Require the Environmental Protection Agency [EPA] to promulgate final disposal standards within 6 months of enactment before any waste may be transported to WIPP;

Require the EPA to approve the test plan and retrieval plan prior to any waste going to WIPP;

Establish a 0.5 percent waste limit during the test phase;

Require Department of Energy [DOE] to remove the waste outside of New Mexico within 1 year if WIPP fails to meet disposal standards;

Terminate all permits if DOE fails to remove the waste after a determination of noncompliance is made;

Require all shipments to be made in containers certified by Nuclear Regulatory Commission [NRC] and an NRC-approved quality assurance program;

Require the Secretary of Labor to certify that the Department of Labor has reviewed DOE's emergency response training program and has concurred that the program complies with Federal requirements set forth by the Occupational Health and Safety Administration [OSHA];

Require the Secretary of Labor through the Mine Safety Health Administration to concur that the mined rooms at WIPP will remain stable and safe during the test phase;

Provide training and equipment to State public safety officials to deal with any possible WIPP related emergencies;

Reaffirm the right of New Mexico to invoke conflict resolution in matters relating to the test phase, retrieval plan and the decommissioning plan;

Ban any high-level waste;

Require all waste to be retrievable during the test phase, as documented in a retrieval plan and demonstrated annually by DOE.

Require payments to New Mexico of \$20 million per year for a period of 15 years. The payments are indexed to inflation.

#### NEED FOR LEGISLATIVE WITHDRAWAL

A legislative withdrawal is the only way to ensure that the health and safety of New Mexicans are protected when WIPP opens. If WIPP is to open for the disposal of radioactive waste, we must ensure that WIPP is safe, and its operations present no threat to the health of our citizens. Although the conference report is a compromise which resolves differences between the House and Senate, it in no way compromises the important health and safety protections I have fought for to benefit the people of New Mexico and the Nation as a whole.

I would like to thank my colleagues, Senators BRYAN and REID, for their willingness to let this legislation move forward. The Nevada Senators are concerned that the provisions for a high level waste facility at Yucca Mountain are not adequate to protect the health and safety of Nevadans. I understand their concerns. As attorney general of New Mexico and as a U.S. Senator, I have fought for similar protections. I pledge to work with my colleagues in my capacity as a member of the Senate Energy and Natural Resources Committee to ensure that the environment and public health and safety will not be sacrificed at Yucca Mountain.

Mr. President, I urge my colleagues to support the conference report to S. 1671.

Mr. DOMENICI. I wonder if my friend, the chairman of the Energy and Natural Resources Committee, would respond to a question regarding the conference report on S. 1671, the Waste Isolation Pilot Plant Land Withdrawal Act.

Mr. JOHNSTON. I would be happy to respond.

Mr. DOMENICI. The conference report dropped some specific authorizations that were in the Senate bill for appropriations for the Carlsbad Environmental Monitoring Center, payment equivalent to taxes, and an economic impact assessment group. Some of these items have been funded in the past without authorizations. Does the lack of these authorizations prohibit funding for these programs?

Mr. JOHNSTON. Nothing in this bill would prohibit funding for the programs authorized in the Senate bill.

Mr. DOMENICI. Mr. President, few issues are as controversial as the management and disposal of nuclear waste. Today, we consider a conference report on S. 1671, the Waste Isolation Pilot Plant [WIPP] Land Withdrawal Act, a bill that I introduced, along with Senator BINGAMAN, a little over a year ago. Passage of this bill is also supported by Governor King of New Mexico and the entire New Mexico Congressional delegation.

I cannot overstate the importance of this bill to New Mexico. If Congress failed to enact a WIPP land withdrawal bill with necessary environmental and public health safeguards, it would have left my home State in limbo. On the one hand, the people who live in and around Carlsbad would fear the project would be ramped down, putting a lot of people out of work, just because of Congressional inaction. Others in the State would fear DOE would proceed unilaterally without the necessary statutory guarantees of oversight and regulation.

With enactment of this bill we address both fears. The project will be allowed to proceed, but with assurances that environmental protection and safety standards are met. The bill also significantly enhances New Mexico's role in the oversight and regulation of the project and makes a statutory commitment for financial compensation to the State.

#### EPA REGULATIONS

One of the most controversial issues facing the conferees was the relationship of EPA's final disposal regulations to the initiation of the WIPP test phase. While EPA's final disposal regulations do not apply to the WIPP test phase, the House insisted that these regulations be issued prior to initiation of test activities. The House also wanted EPA to develop standards and approve DOE's test plan through a full-blown rulemaking process.

EPA estimated that it would take at least 2 years to meet just the procedural requirements of the House bill for approval of the test plan. We have spent over \$1 billion of taxpayer money to build WIPP and DOE is currently spending \$14 million a month just to keep the facility in a state of readiness to begin the tests. If faced with a 2-year delay or more, DOE probably would significantly ramp down the WIPP Program.

The conference report attempts to address this dilemma by requiring the issuance of EPA's disposal regulations within 6 months of enactment and EPA's approval of the test and retrieval plans within 10 months of enactment. The bill establishes an expedited rulemaking process to assure that EPA meets its deadlines but still preserves the public's right to comment. In addition, both of these rulemakings would be judicially reviewable by the Tenth Circuit or D.C. Circuit Court of Appeals.

#### TEST PROGRAM

The bill authorizes a very limited test phase for WIPP. I have been assured by scientists that a test phase will help determine whether WIPP can safely serve as a permanent repository for low level defense nuclear waste. Many question the need for a test phase, but I do not think that the decision to put up to 6.2 million cubic feet of transuranic waste in WIPP for permanent disposal should be based on test tube experiments in laboratories and computer simulations.

No more than 0.5 percent of WIPP's total capacity can be brought to WIPP during the test phase and it cannot begin until the following stipulations are met:

EPA issuance of final disposal regulations;

EPA approval of both the test and retrieval plans;

EPA determination that hazardous waste regulatory requirements have been met;

OSHA certification of emergency response training for compliance with Federal standards;

MSHA certification of the stability of WIPP mined rooms; and,

DOE certification that the test phase activities are safe.

The bill limits the test phase to 10 years. If WIPP cannot be certified to comply with the final disposal regulations by the end of the test phase, all wastes must be removed from the State.

#### REGULATORY APPROVALS AND OVERSIGHT

The bill establishes oversight by 13 separate agencies and requires more than 40 separate approvals. I do not want to take the Senate's time tonight to spell out each and every one of these approvals. In some instances, we narrowed the nature of these approvals. Additional layers of regulatory processes and red tape do not necessarily make a project safer.

Increasingly on environmental issues, we stress process over substance. Frequently the result is extensive litigation over technical procedural issues rather than substantive problems.

We have structured this bill to demand a great deal of oversight and regulation. But, in designing these requirements, we have demanded environmental protection and safety without building in unnecessary and extensive delays.

#### FINANCIAL COMPENSATION

The House bill provided no funding for the State of New Mexico. The senate prevailed on the \$20 million annual payment to the State. The conference agreement authorizes this payment for 15 years, indexed for inflation. In addition, the legislation makes a commitment that Congress will consider extending financial compensation to the State beyond the 15-year time period.

The bill also provides that a portion of the payment to New Mexico could be used for environmental monitoring and economic studies. While the conference report drops the authorization for payments equivalent to taxes [PETT] and specific additional authorizations for the Calsbad Environmental Monitoring Center and for an economic impact assessment group, nothing in this bill precludes funding for these important projects in addition to the payments to the State.

The administration has requested and Congress has appropriated funding for these items in the absence of an authorization in the past and should continue to do so in the future. Moreover, Congress has been generous in both authorization and appropriations legislation with respect to legislation affecting another proposed waste repository in Nevada.

I hope the lack of these specific authorizations in this conference report does not bring opposition to their funding. It is simply unfair to ask the State of New Mexico to absorb the costs associated with this project. It would be ironic indeed that New Mexico's reward for cooperating with the Federal government on WIPP is less financial assistance.

Mr. President, I want to thank the chairman, Senator JOHNSTON, and the ranking member of the committee, Senator WALLOP, for all their assistance in bringing this legislation to fruition. A also want to extend special thanks to Representative JOHN DINGELL. If not for him, I am not sure we would have a bill today.

I urge my colleagues to support the conference report.

Mr. FORD. Mr. President, I ask unanimous consent that the conference report be agreed to; that the motion to reconsider be laid upon the table; that any statements relative to the passage of these items appear at the appropriate place in the RECORD as though read.

The PRESIDING OFFICER. Without objection, it is so ordered.

So the conference report was agreed to.

#### CACHE LA POUFRE RIVER BASIN HERITAGE STUDY ACT

Mr. FORD. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of Calendar No. 775, S. 1174, relating to the Cache La Poudre River; that the amendment at the desk by Senator BROWN be agreed to; that the committee substitute amendment as amended be agreed to; that the bill be deemed read a third time, passed; that the motion to reconsider be laid upon the table; that any statements relative to the passage of this item appear at the appropriate place in the RECORD.

The PRESIDING OFFICER. Is there objection? The Chair hears none and it is so ordered. The bill (S. 1174), as amended, was deemed to have been read a third time and passed, as follows:

S. 1174

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

#### SECTION 1. SHORT TITLE.

This Act may be cited as the "Cache La Poudre River Basin Heritage Study Act".

#### SEC. 2. FINDINGS AND PURPOSES.

(a) FINDINGS.—The Congress finds that—

(1) the Cache La Poudre River Basin contains significant historical, recreational, scenic, cultural, natural, economic, and scientific resources; and

(2) sites and structures within the Cache La Poudre River Basin represent—

(A) the development and management of water resources critical to the westward expansion of the nation; and

(B) the sociocultural evolution of a working river, from aboriginal tribes through early exploration, 19th century settlement, development of a water dependent agricultural economy, through the ongoing transition to present day urban development.

(b) The purposes of this Act are—

(1) to identify and assess the management alternatives encompassing the resources and themes of western water development in the United States; and

(2) to evaluate strategies for multi-objective uses and protection of the Cache La Poudre floodplain through development of a River Greenway Plan.

#### SEC. 3. CACHE LA POUFRE RIVER BASIN HERITAGE STUDY.

(a) IN GENERAL.—The Secretary of the Interior (hereinafter referred to as the "Secretary") shall prepare a study of alternatives for the Cache La Poudre River Basin in the State of Colorado. The study shall include, but not be limited to—

(1) an inventory and assessment of significant cultural, natural, recreational, and scenic resources throughout the Cache La Poudre River Basin, using existing information where available;

(2) an evaluation of properties to determine potential eligibility for inclusion on the National Register of Historic Places;

(3) the suitability and feasibility of designating the Cache La Poudre River Basin as a National Heritage Area;

(4) the identification of themes, resources, and events which illustrate how settlement of the West was dependent upon and dictated by the development and management of water;

(5) the development of a Greenway Plan for the floodplain of the Cache La Poudre River that addresses—

(A) appropriate and compatible recreational opportunities;

(B) protection of fish and wildlife habitat;

(C) maintenance or improvement of water quality;

(D) protection of wetlands;

(E) maintenance of natural hydrological processes;

(F) maintenance of riparian vegetation; and

(G) flood protection through resource protection and development;

(6) an evaluation of the demonstration project undertaken by the Secretary pursuant to subsection (d), including recommendations for the disposition of any lands acquired pursuant to such project;

(7) the identification of interpretive opportunities and methods;

(8) the identification of preservation strategies for resources located with the Cache La Poudre River Basin; and

(9) management alternatives and funding options for the implementation of such preservation strategies.

(b) CONSULTATION.—The study referred to in subsection (a) shall be prepared in consultation with the Cache La Poudre River Basin Heritage Advisory Commission established pursuant to section 4, affected units of local governments, and other interested public and private entities.

(c) REPORT TO CONGRESS.—The study shall be completed no later than 2 years after the date funds are made available for the purposes of this section. Upon completion, the Secretary shall transmit such report to the Committee on Energy and Natural Resources of the United States Senate and the Committee on Interior and Insular Affairs of the United States House of Representatives.

(d) DEMONSTRATION PROJECT.—(1) In furtherance of the purposes of this Act, the Secretary, in consultation with the Cache La Poudre River Heritage Commission established by section 4, is authorized to undertake a demonstration project to evaluate the potential of using voluntary land exchanges within the Cache La Poudre River floodplain (hereinafter referred to as the "floodplain") as a means to provide for the long-term preservation and management of the lands within the floodplain.

(2) During the period of the study, the Secretary or the head of a Federal agency is authorized to acquire lands within the floodplain in Larimer and Weld Counties in the State of Colorado only through voluntary land exchanges: *Provided*, That such land exchanges shall be on an equal value basis, and shall be conducted in accordance with applicable law.

(3) Lands acquired pursuant to this subsection shall be managed in a manner that does not preclude the implementation of any management alternative identified in the study of alternatives or the Greenway Plan referred to in subsection (a).

(4) Where appropriate, the Secretary shall seek to enter into memoranda of agreement with other Federal agencies to manage land administered by such agencies within the floodplain, consistent with the purposes of this Act.

#### SEC. 4. CACHE LA POUDE RIVER BASIN HERITAGE ADVISORY COMMISSION.

(a) ESTABLISHMENT.—There is established the Cache La Poudre River Basin Heritage

Advisory Commission (hereinafter referred to as the "Commission"), to advise the Secretary on the preparation of the study referred to in section 3(a).

(b) MEMBERSHIP.—The Commission shall be composed of 15 members appointed by the Secretary as follows—

(1) the Director of the National Park Service, or the Director's designee, ex officio;

(2) the Secretary of Agriculture, acting through the Chief of the Forest Service, or the Chief's designee, ex officio;

(3) 9 members from recommendations submitted by the Governor of the State of Colorado, including one member each to represent—

(A) the State;

(B) Colorado State University;

(C) the Northern Colorado Water Conservancy District;

(D) the city of Fort Collins;

(E) Larimer County;

(F) the city of Greeley; and

(G) Weld County;

and 2 members to represent the general public, who reside in the study area.

(c) CHAIRPERSON.—The members of the Commission shall elect a chairperson from among its members.

(d) VACANCIES.—Vacancies on the Commission shall be filled in the same manner in which the original appointment was made.

(e) MEETINGS.—The Commission shall meet at the call of the Chairperson.

(f) COMPENSATION.—Members of the Commission shall receive no compensation on account of their service on the Commission. While away from their homes or regular places of business in the performance of services for the Commission, members shall be allowed travel expenses, including per diem in lieu of subsistence, in the same manner as persons employed intermittently in the Government service are allowed expenses under section 5703 of title 5, United States Code.

(g) WAIVER.—The provisions of section 14(b) of the Act of October 6, 1972 (86 Stat. 776) are hereby waived with respect to this Commission.

(h) ANNUAL REPORTS.—The Commission shall publish and submit to the Secretary and the Governor of the State of Colorado an annual report concerning the Commission's activities.

(i) TERMINATION.—The Commission shall terminate upon the completion of the study referred to in section 3.

#### SEC. 5. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated such sums as are necessary to carry out this Act.

Passed the Senate October 8 (legislative day, September 30), 1992.

Attest:

Secretary.

#### PENALTIES FOR VIOLATIONS OF SOFTWARE COPYRIGHT

Mr. FORD. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 893.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

*Resolved*, That the bill from the Senate (S. 893) entitled "An Act to amend title 18, United States Code, to impose criminal sanctions for violation of software copyright," do pass with the following amendments:

Strike out all after the enacting clause and insert:

#### SECTION 1. CRIMINAL PENALTIES FOR COPYRIGHT INFRINGEMENT.

Section 2319(b) of title 18, United States Code, is amended to read as follows:

"(b) Any person who commits an offense under subsection (a) of this section—

"(1) shall be imprisoned not more than 5 years, or fined in the amount set forth in this title, or both, if the offense consists of the reproduction or distribution, during any 180-day period, of at least 10 copies or phonorecords, of 1 or more copyrighted works, with a retail value of more than \$2,500;

"(2) shall be imprisoned not more than 10 years, or fined in the amount set forth in this title, or both, if the offense is a second or subsequent offense under paragraph (1); and

"(3) shall be imprisoned not more than 1 year, or fined in the amount set forth in this title, or both, in any other case."

#### SEC. 2. CONFORMING AMENDMENTS.

Section 2319(c) of title 18, United States Code, is amended—

(1) in paragraph (1) by striking 'sound recording', 'motion picture', 'audiovisual work', 'phonorecord', and inserting "'phonorecord'"; and

(2) in paragraph (2) by striking "'118'" and inserting "'120'".

Amend the title so as to read: "An Act to amend title 18, United States Code, with respect to the criminal penalties for copyright infringement."

Mr. HATCH. Mr. President, I was pleased last summer when the Senate unanimously passed S. 893, as originally proposed. I introduced S. 893 earlier this year, with my good friend from Arizona, Senator DECONCINI as an original cosponsor. The bill was designed to help the computer software industry combat the growing problem of large-scale commercial piracy of its products, by making such conduct a felony under Federal law punishable by fine and imprisonment. In so doing, S. 893 simply treated software piracy in the same manner that Congress had earlier decided to treat motion picture and sound recording piracy.

For several years, Federal law has provided strong criminal penalties for persons involved in the unauthorized production or distribution of multiple copies of phono records, sound recordings, and motion pictures. In a similar manner, this legislation was intended to provide the same enhanced criminal sanctions for the violation of copyright in computer programs. S. 893 as passed by the Senate on June 4 protected only computer software. We chose this approach because computer software differs in many ways, such as design, use, and distribution methods, from those forms of intellectual property presently afforded protection in the criminal law.

The amended version of S. 893 that has now come back to us from the House contains all of the teeth of our computer software bill but it has al-

tered and refined the way in which the criminal code addresses the entire question of criminal penalties for large-scale copyright infringement. Instead of the previous scheme of separate statutes setting different penalties for piracy of different types of copyrighted material, the new House-passed law sets a uniform standard of liability for piracy of copyrighted works, whether they be motion pictures, records, books, or computer software. This is a welcome and logical development in clarifying the point at which the copyright law intersects with the criminal code, and I would like to sincerely compliment Representative BILL HUGHES, the author of this amendment, for his foresight in seeing how my bill could be improved without losing any of its substance.

The House approach to the problem of criminal copyright infringement necessitated several amendments to current law. Because the amended bill predicates liability on the proof that the copied material exceeds a certain "retail value," questions will no doubt arise as to what constitutes "retail value." I note with approval the extended discussion of this issue in the House report, particularly the view that in the amended bill the term "retail value" means the suggested retail price of the legitimate copyrighted work at the initial time of its release, and not the market price of the pirate copy. In the case of a copyrighted work that is not sold at retail, the "retail value" for the purpose of the statute should reflect the harm to the copyright holder and not the infringer's profits; for example the unauthorized release of videocassettes or audiocassettes embodying as yet unreleased material will necessarily harm copyright owners, distributors and retailers far in excess of the retail value of the infringing material. For example, a film print or audio studio master which is not to be sold on the open market obviously has substantial asset value.

The important point to keep in mind, is that retail value should be determined by looking to the value of the copyrighted works in the legitimate retail market, not the thieves' criminal market. For the purpose of the criminal law, we should determine the harm from the point of view of the copyright holder, not by the value of the gain to the criminal. So I agree that the term "retail value" should generally mean the suggested retail price of the legitimate copyrighted work at the initial time of release and not the value of the pirate copies. In the event the copyrighted work is not sold in the form copied or distributed, the term "retail value" should mean the greater of the replacement cost or the true cost of production of the copyrighted work, including, but not limited to, the purchase cost of the components of the

copyrighted work, design costs, and labor and overhead expenses required to create and manufacture the work.

Another potential question relating to the new standard of criminal liability for copyright infringement is an issue that arose during House consideration of this legislation. 17 U.S.C. 506(a) currently prohibits any person from infringing a copyright "willfully and for purposes of commercial advantage or private financial gain." The term "willfully," although used in copyright statutes since 1897 for criminal violations, has never been defined. Instead, copyright owners and prosecutors have relied on standards developed by the courts. It is my view that it is proper for the courts to continue to develop this concept in appropriate cases, and that the version of S. 893 we adopt today by specifically failing to define further the concept of "willful" conduct acknowledges that fact.

I note that the House considered defining the term "willfully" in this legislation. In fact, the House Judiciary Committee's Intellectual Property Subcommittee included a definition of "willfully" in the version of the bill it referred to the full committee, but the full committee-approved bill did not contain that language. The version of S. 893 that has passed the House and is before us now does not define "willfully." Therefore, S. 893 does not directly or by implication signal any disapproval with the manner in which the courts have previously interpreted this element of the offense.

At no point during our proceedings in the Senate Judiciary Committee or in the Subcommittee on Patents, Copyrights and Trademarks did we consider the question of defining by statute the term "willfully", but I am certain that we would be willing to do so in the future if presented with reasons to do so. It is my opinion that at this point the courts do seem to be interpreting the term "willfully" in a workable manner, that the existing statute is meeting the objectives that Congress set out when the law was enacted, and that the text of S. 893 is sufficient as adopted. As the House report indicates, and as I would like to emphatically state, this criminal statute is not designed to reach instances of permissible, private home copying, nor does it represent any infringement on traditional concepts permitting the fair use of copyrighted materials for purposes of research, criticism, scholarship, parody, and other long-recognized uses. Similarly, this bill is not designed to interfere with evolving notions of fair use, as that concept is applied with respect to new communications networks and computer technologies. Once again, I would point out that the mens rea requirement is strict with respect to this crime: unless done for the express purposes of obtaining commercial advantage or private financial gain, copying

of copyrighted material is not a crime under S. 893. Simply put, the copying must be undertaken to make money, and even incidental financial benefits that might accrue as a result of the copying should not contravene the law where the achievement of those benefits were not the motivation behind the copying.

Mr. President, the willful infringement of copyright in computer software programs is a widespread practice that is threatening the United States software industry. The easy accessibility of computer programs distributed in magnetic media format, together with the distribution of popular applications programs, has led to persistent large-scale copying of these programs. Studies indicate that for every authorized copy of software programs in circulation, there is an illegal copy also in circulation. Losses to the personal computer software industry from all illegal copying were estimated to be \$1.6 billion in 1989. If we do not address the piracy of these programs, we may soon see a decline in this vibrant and important sector of our economy.

Not only is the software industry seriously damaged, but the public is also victimized by these acts of piracy. The purchaser of pirated often pays full price for a product which he or she believes is legitimate. However, not only may there be imperfections in the actual reproduction, but the quality of the product is also often lower as a result of cheap duplication equipment. Furthermore, the consumer of pirated works is ineligible for the important support and backup services typically offered by the software publisher.

As was noted during the hearings on increasing the penalties for illegal copying of records, sound recordings, and motion pictures, stiffer penalties toward piracy do act as a deterrent to these types of crimes. Enhanced penalties for large-scale violation of software copyright is more in line with the seriousness of the crime.

I believe that the version of S. 893 that we consider today will provide a strong tool for prosecutors and others who are interested in deterring the growing problem of computer software piracy. As I have mentioned, it maintains as well the strict protections that the motion picture and sound recording industries have enjoyed for nearly a decade, and it nips in the bud the potential for large-scale book piracy that might otherwise be exploited through emerging technologies.

Under the language of S. 893, a person involved in software piracy—or for that matter any crime copyright infringement—would be subject to a fine and imprisonment of up to 10 years if the offense is a second or subsequent act of reproducing or distributing at least 10 copies of the copyrighted work. For a first offense, the penalty cannot exceed a term of 5 years imprisonment and/or

the fine prescribed by title 18, for first offenses. In addition, the criminal liability attaches if fewer than 10 works are copied if the retail value of the copied works exceeds \$2,500. In this instance, the prescribed imprisonment cannot exceed 1 year.

Mr. President, I am very pleased that both Houses of Congress have reached an agreement on this important issue. It is my belief that enactment of S. 893 will end the unacceptable current situation where this significant area of criminal activity is insufficiently proscribed and ineffectively punished.

Before concluding, I would be remiss if I did not note again the significant help we have received in drafting this legislation from Representative BILL HUGHES, the chairman of the House Subcommittee on Intellectual Property and the Administration of Justice, as well as the customary strong support we are used to receiving from Representative CARLOS MOORHEAD, the ranking Republican on that subcommittee. Nor could this successful conclusion have been achieved without the excellent staff work of Bill Patry, Hayden Gregory, Joe Wolfe, and Tom Mooney from the House Subcommittee on Intellectual Property; Karen Robb, chief counsel of the Senate Subcommittee on Patents, Copyrights, and Trademarks; and Darrell Panethiere of my Judiciary Committee staff. To all of them, I express my gratitude.

Mr. FORD. Mr. President, I move the Senate concur in the amendments of the House.

The PRESIDING OFFICER. The question is on agreeing to the motion. The motion was agreed to.

Mr. FORD. Mr. President, I move to reconsider the vote.

Mr. SIMPSON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DECONCINI. Mr. President, I rise in support of the carjacking provisions in H.R. 4542, the Anti-Car Theft Act of 1992, introduced by the chairman of the House Judiciary Committee on Crime, CHARLES SCHUMER. I introduced similar legislation in the Senate earlier this year, S. 3239. I believe it is vitally important that we take strong action to address this crime of frightening frequency that presents a vicious new breed of criminal.

My only reservation with the carjacking section in H.R. 4542 goes to the provision that makes the use of a firearm an essential element of the crime. First, this element is unnecessarily restrictive because it does not cover carjacking committed with the use of other types of weapons nor would simple brute force be covered. Second, it creates a new firearm crime outside the context of the existing gun laws. Firearm crimes have been and should be the primary responsibility of the experts in this area, the Bureau of

Alcohol, Tobacco and Firearms [ATF]. The brave men and women of ATF have established an outstanding record over the past few years in enforcing the Federal firearms laws against the most violent criminals among us.

It is for that reason that we have discussed with the office of Chairman SCHUMER that we all intend for ATF to continue to play a leading role in combatting this and other firearm related crimes. We plan to discuss this issue with the Agencies involved with enforcing this provision to ensure that they work together to curb this menacing crime.

#### PREVENTION OF AUTO THEFT

Mr. FORD. Mr. President, I ask unanimous consent the Senate proceed to the immediate consideration of H.R. 4542, a bill to prevent and deter auto theft just received from the House; that the bill be deemed read three times, passed, and the motion to reconsider laid upon the table, and that any statement respective to this bill be inserted at the appropriate place in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

So the bill (H.R. 4542) was deemed read a third time and passed.

Mr. PRESSLER. Mr. President, vehicle theft is a serious problem in the United States. But it would be wrong to conclude that this problem is limited only to the loss of property. Increasingly, death and serious bodily injuries are resulting from vehicle theft. This relatively new and violent form of auto theft has been dubbed "carjacking." It is defined as the taking of a motor vehicle from a person or in the presence of another by force, violence or intimidation.

Last week, I sponsored an amendment to the tax bill, H.R. 11. This amendment passed the Senate. It represented a giant step forward in slowing down auto theft by subjecting carjackers who use firearms to severe Federal criminal penalties. Law enforcement officials have theorized vehicle thieves find it easier to use force than to deal with anti-theft devices installed in newer model cars. Additionally, carjackers can obtain the keys and registration papers for the cars they steal. The amendment would have sent a signal to would-be carjackers that auto theft is no longer just a joyride.

President Bush recently endorsed stronger penalties for carjackers. The President said:

We cannot put up with this animal behavior. These people have no place in a decent society \* \* \* they can go to jail and they can stay in jail and they can rot in jail for crimes like that. We need tough laws that don't bend over backwards protecting the criminal.

Sadly, the conference report to the tax bill does not include my amend-

ment. Title I of H.R. 4542, the bill before us now, includes a provision similar to my amendment to the tax bill. Title I subjects carjackers who use firearms to serve criminal penalties. I would have preferred that this bill be broadened to subject to the same penalties not only armed carjackers, but also any carjacker who uses any kind of force, violence, or intimidation. However, Title I still will send a strong signal to would-be carjackers.

H.R. 4542 also has other auto theft prevention provisions. While I will not object to these at this late date, the record should note that I have strong reservations in supporting these provisions.

I introduced the Senate version of H.R. 4542 last April. However, after discussions with several South Dakota auto dealers, as well as parts manufacturers and parts recyclers, I came to the conclusion that the original bill should be revised. In fact, provisions within that bill actually would harm legitimate, law-abiding auto dealers and parts salvagers.

The House-passed compromise version of H.R. 4542 is based on good intentions. Potentially, though, it still could impose serious economic burdens on small auto salvage businesses. The bill also includes a task force which is tasked with studying the effectiveness of auto parts certification. That provision is aimed at developing solutions to this serious problem that will not harm auto dealers, parts manufacturers, parts salvagers, and other legitimate industries. This provision is an integral aspect of this bill. If the task force discovers that the legislation is detrimental to auto dismantlers and parts recyclers, we can take further action at a later date.

Mr. President, I would like the record to indicate my understanding of section 608 of title III of H.R. 4542. In my interpretation, the original seller of a major part marked with an identification number is required by this legislation to determine, through a procedure established by the Attorney General, that such major part has not been reported as stolen. This person or business is also required to provide any subsequent purchaser or transferee with verification identifying the vehicle identification number of that part and a further verification that such part has not been reported as stolen. It is my understanding that a purchaser or transferee of such part can rely on this original verification and is not required to verify again that a part has not been reported as stolen.

Mr. President, during the upcoming recess, I plan to work closely with automotive industry groups in South Dakota to ensure that this legislation does not impose unwarranted burdens on their businesses. Additionally, I plan to develop further anti-car-theft legislation to deter auto theft.

Mr. LAUTENBERG. Mr. President, I rise in support of this legislation to address the national epidemic of motor vehicle theft.

The Anti-Car Theft Act would establish new criminal sanctions for carjacking, strengthen the existing system of vehicle parts marking, improve the ability of governmental authorities to identify fraudulent care titles, increase existing penalties for auto thieves, and tighten controls on the export of stolen vehicles.

Mr. President, the problem of auto theft has increased substantially in recent years. According to the Uniform Crime Report, between 1984 and 1991 motor vehicle theft increased by 61 percent, to almost 1.7 million offenses per year. Around the country, there is an average of one motor vehicle theft every 19 seconds. The total value of stolen vehicles now exceeds \$8 billion annually.

The vehicle theft problem is particularly serious in my State of New Jersey. According to recent figures, Newark, NJ, has the highest rate of auto theft in the nation. Several New Jersey cities also share the dubious distinction of being in the top ten. In addition, a large number of stolen cars are being exported from New Jersey's ports.

There are many dimensions to the vehicle theft problem, Mr. President. Perhaps the most disturbing is the emerging problem of violent carjackings. Increasingly, thieves are using violence and intimidation to force drivers to give up their cars. Many innocent people are losing their lives in the process. For others, an evening drive with an open window is an experience now best avoided.

Random carejacking may be the most horrifying form of auto theft, Mr. President, but it is just the tip of the iceberg. Stealing cars has developed into a full-fledged industry, run by professionals. Many criminals routinely solicit orders for a particular part, and then go out and steal a car to get it. Others run chop shops, breaking down stolen cars and selling their parts on the black market.

The National Highway Traffic Safety Administration has reported estimates that between 10 and 16 percent of all thefts occur in order to sell the parts for profit. Others put that figure as high as 40 percent. In any case, it's a major problem. And one reason is that the market for stolen parts is enormous. Repair shops can save substantial sums by purchasing parts on the black market, and thieves often can deliver parts more quickly than legitimate manufacturers.

According to a report in U.S. News & World Report, for example, "undercover cops in California's San Fernando Valley offered stolen parts to some 20 body shops; 12 agreed to buy them. An honest body shop owner may

be unaware he's dealing in stolen parts, because many are sold through regional networks that resemble a Turkish bazaar."

Beyond operating an extensive black market in stolen parts, professional car thieves also are in the exporting business. Again, the motivation is largely economic. Vehicles are in great demand overseas, where they may be worth three times more than in the United States.

Mr. President, another aspect of the auto theft problem is the rash of theft by juveniles. Children, some not even teenagers, are stealing cars at an appalling rate. They start young—sometimes they're barely tall enough to see over the steering wheel. Unfortunately, it doesn't take long for them to become experts, able to enter and steal a car in seconds.

These young auto thieves pose a substantial threat to public safety. In Newark, for example, juvenile thieves routinely drive wildly around the streets at night, wreaking havoc with other drivers and pedestrians. The results are often tragic, involving destruction of homes and property, serious injuries, and death.

Mr. President, this legislation would attack the auto theft problem in several ways. First, new penalties for carjacking, and enhanced penalties for importing or exporting stolen cars, should help deter thieves. I proposed very similar measures in a bill I introduced, S. 3276. They're important. Carjacking threatens to spread rapidly around the Nation, as criminals engage in copycat crimes. To prevent such a plague, we need to bring Federal resources to bear.

Second, by expanding the current system of vehicle parts marking, the bill promises to help auto theft investigators track down thieves, close down chop shops, and eliminate organized car theft rings.

Third, the bill will crack down on exporters of stolen cars, by directing the Customs Service to conduct spot checks of cars and containers leaving the country.

Mr. President, one of the reasons why the auto theft epidemic has hit New Jersey so hard is that organized rings of car thieves are stealing vehicles for export to foreign countries, through New Jersey's ports. A similar problem is occurring in many areas near port facilities.

Exporting is motivated largely by a great demand for vehicles in a wide variety of overseas locations. These include Central and South America, the Caribbean, Western Europe, the Middle East, and Africa.

The scope of the international trade in stolen vehicles is astonishing; 200,000 stolen cars a year may be shipped abroad, some experts believe. According to the FBI, one in five vehicles on the docks waiting for Customs clear-

ance in some Caribbean countries show clear signs of having been stolen and shipped from the United States. For vehicles worth over \$15,000, the rate is nearly four out of five. It is an outrageous situation and must not be tolerated. This bill should help.

The next major component of the bill would establish a new program to provide support to State and local anti-auto theft efforts.

Mr. President, I commissioned a report on auto theft by the National Highway Traffic Safety Administration that was completed early this year. This report indicates that State and local authorities can adopt a variety of approaches to deal with auto theft. Teams of policy officers from several jurisdictions can work together to identify and apprehend thieves. Teams of prosecutors can be established to ensure that these thieves are brought to justice. Public awareness campaigns can educate residents about preventive measures, and encourage citizens to provide law enforcement officials with valuable tips to help in the crackdown.

These kind of initiatives can make a real difference. In New Jersey, local law enforcement officials in Essex and Union Counties have banded together to mount a coordinated assault on the problem, and preliminary results are impressive. Arrests for auto theft have increased substantially. And while auto theft remains a problem there has been real progress.

Unfortunately, State and local efforts like these can be costly. Even where auto theft is rampant, many municipalities simply are unable to devote the resources needed. In fact, many of the areas hit hardest by auto theft are those with the fewest resources to fight back.

This bill will help, by providing much needed resources for State and local anti-auto theft initiatives. I had proposed a somewhat different approach in S. 3276, but the program in this bill should be very helpful.

Mr. President, I want to commend Congressman CHARLES SCHUMER for his work on this bill, and for his leadership in this area.

Mr. President, this bill is focused largely on law enforcement approaches in the battle against auto theft. Next year I hope we will take the next step: prevention.

Included in legislation I introduced on September 25, S. 3276, are two measures that are designed to prevent auto theft from occurring in the first place. The first would establish minimum theft resistance standards, to ensure that cars are not manufactured with unreinforced steering columns or other components that physically facilitate theft, and create an unreasonable risk of such theft. That's essential to address the many vehicle models that have proven made-to-order for car thieves.

My second proposal for auto theft prevention would authorize a voluntary vehicle theft prevention program based on programs operating in various jurisdictions around the country, typically called "Combat Auto Theft [CAT]" or "Help End Auto Thief [HEAT]."

Under these programs, a vehicle owner may voluntarily sign a form stating that his or her vehicle is not normally operated during certain hours, typically between 1 a.m. and 5 a.m. Highly adhesive decals are then affixed to the vehicle. If a law enforcement officer later sees the vehicle being driven during the specified hours, the decals provide grounds for establishing the reasonable suspicion necessary under the Constitution to stop the vehicle and make appropriate inquiries.

Mr. President, I hope the Congress will enact these additional theft prevention proposals in the next Congress.

Again, Mr. President, I congratulate Congressman SCHUMER for his excellent work on the important legislation before us today. And I urge my colleagues to support the bill.

Mr. PRESSLER. Mr. President, last April, I sponsored S. 2613, the Senate version of H.R. 4542, the Anti-Car Theft Act. The original version of H.R. 4542 contained four titles—one dealing with carjacking and three dealing with the marking, labeling, and titling of auto parts. After discussions with national and South Dakota auto interest groups, I found that the three provisions regarding parts marking would be economically burdensome to small auto salvagers and parts dealers.

I came to the conclusion that the bill did not accomplish its aims. I feared that the parts-marking provisions within that bill would actually harm legitimate auto dealers and parts salvagers. On September 26, in an effort to keep the carjacking provision of the bill alive, I offered, as an amendment to the tax bill, just title I of S. 2613. Unfortunately, during the conference report process, my carjacking amendment was stricken from the tax bill.

Since then, Representatives SCHUMER and DINGELL have reached a compromise on the marking and labeling titles in H.R. 4542. The new version of H.R. 4542 is a far better piece of legislation. However, I still had reservations when the bill came to the Senate a few days ago. I discussed my concerns with the various auto industry interest groups who had opposed the bill earlier. They all assured me that this compromise is the best version of the auto theft legislation that has been drafted. They are now endorsing the bill.

Mr. President, I wonder if my good friends, the distinguished Senators HATCH and RIEGLE, would engage with me in a discussion about the Anti-Car Theft bill?

Mr. HATCH. I would be happy to discuss this legislation with the Senator from South Dakota. I appreciate his interest in the auto theft problem as well as his concern for the legitimate small business dealers affected by this legislation. Could the Senator from South Dakota specify the protections that the small auto businesses will be afforded through this compromise bill?

Mr. PRESSLER. I thank my colleague from Utah for his question. I share his concerns for the small businesses affected by the marking and titling provisions of this bill. I would not support this bill if it did not have the endorsement of the national organizations representing these small businesses. Fortunately, there are certain protections in the compromise measure designed to protect legitimate auto operations.

The car theft bill before us creates a task force to study the effectiveness of auto parts certification. This task force will be charged with determining and developing solutions to the serious auto theft problem that will not harm auto dealers, parts manufacturers, parts salvagers, and other auto industries. The inclusion of this task force is an integral aspect of the bill. Persons representing various auto interest groups, along with the Secretary of Transportation and the Attorney General of the United States, will participate as members of the task force.

Additionally, title III, section 301 (b) of the bill clearly distinguishes criminal "chop shop" operations from the operations of legitimate automotive recycling businesses. The vital role played by the legitimate automotive recycling industry in the American economy and environment should not be confused with chop shops. The bill properly defines and targets the criminals who operate illegal chop shops, not the small, primarily family-owned businesses which comprise the legitimate recycling industry.

Title II, section 204(a)(2)(A) of the bill addresses the burden double reporting of junk and salvage titles would place on automotive recycling businesses. This section is not intended to release State governments from the responsibility for reporting junk and salvage titles to the National Motor Vehicle Title Information System established in title II. Those States which elect not to participate in the system, and yet require such reporting, should not expect the small businesses which comprise the automotive recycling industry to do the States' work by contributing those States' titling information to a national clearinghouse of junk and salvage titles. This provision should not be construed to require double reporting of these businesses in order to compensate for deficient information from nonparticipating States.

Mr. RIEGLE. I would like to note that in addition to the involvement of

individual States in the marking of parts, junkyards are not responsible for marking if they have received certification from an insurance company.

Mr. PRESSLER. I thank my colleague from Michigan for making that important point. I would like to make one last point with regard to the small businesses that will be affected directly by this bill. The increased likelihood that a single vehicle may contain numerous parts with different identification numbers will require that great care be taken to ensure those parts are properly identified and indicated on the transfer document upon sale of the vehicle. A lack of thorough investigation could allow a few stolen parts to enter an otherwise secure system. Selling thousands of vehicles with multiple identification numbers salvaged by insurance companies at salvage auctions without proper verification procedures could compromise the stolen part information system this legislation seeks to establish.

Mr. HATCH. This bill includes new requirements for the Attorney General. Would my colleague from South Dakota address the new role of the Attorney General in this legislation?

Mr. PRESSLER. I would be happy to address the issue raised by my distinguished colleague. Title III of the bill expands the current motor vehicle parts marking requirements to combat chop shops. In doing so, it provides new direction and authority for the Attorney General. First, the Attorney General, after public notice, must make a "finding" that additional parts marking is working before the Secretary of Transportation can initiate the second rulemaking. Second, the Attorney General, by December 31, 1999, must make a determination, after notice and public hearing, whether one or both of the rules expanding the parts marking requirements have been effective in substantially inhibiting chop shop operations.

In order to perform these tasks effectively, the Attorney General must thoroughly analyze the data collected under section 615, "Insurance Reports and Information." I am concerned that under existing law this information has been less than adequate. I would like assurances that this information will be forthcoming. I also want to make sure the Attorney General's analysis of this information is fair and the findings unbiased. There has been a great deal of controversy over this section of the bill. This controversy should be put to rest. If the parts marking works, we should continue to require it. If parts marking doesn't substantially reduce chop shop operations and motor vehicle theft, we ought to eliminate the requirement.

Mr. RIEGLE. Is the Senator from South Dakota saying that it would not be the intention of the Attorney General to mark every car and its parts?

And isn't it true that the Attorney General would consult with the Secretary of Transportation who also participates in matters pertaining to parts marking of vehicles and the use of anti-theft devices installed on vehicles?

Mr. PRESSLER. The Senator from Michigan is correct in his interpretation of my remarks. I thank my distinguished colleagues for participating in this informative discussion.

#### RELIEF OF WILLIAM A. PROFFITT

Mr. FORD. Mr. President, I ask unanimous consent that H.R. 2156, an act for the relief of William A. Proffitt be discharged from the Senate Armed Services Committee and be referred to the Judiciary Committee.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. FORD. Mr. President, I now ask unanimous consent that the Judiciary Committee be discharged from further consideration of H.R. 2156; the Senate proceed to its immediate consideration; the bill be deemed read for the third time, passed, and the motion to reconsider be laid upon the table.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

So the bill (H.R. 2156) was deemed to have been read three times and passed.

#### RELIEF OF CRAIG AND NITA SORENSON

#### RELIEF OF WILKINSON COUNTY SCHOOL DISTRICT

Mr. FORD. Mr. President, I ask unanimous consent the Judiciary Committee be discharged from further consideration of H.R. 5164, and that the Senate proceed to the immediate consideration in bloc of the following bills: H.R. 5164 and H.R. 5998; that both bills be deemed read three times, passed, and the motion to reconsider be laid upon the table.

The PRESIDING OFFICER. Without objection, it is so ordered.

So the bills (H.R. 5164 and H.R. 5998) were deemed to have been read three times and passed.

#### SECURITIES EXCHANGE ACT OF 1934 AMENDMENTS

Mr. FORD. Mr. President, I ask unanimous consent the Senate proceed to the immediate consideration of S. 3389, a bill to amend the Securities Exchange Act of 1934, to prohibit certain transactions with respect to management accounts introduced earlier by Senator KERRY of Massachusetts; that the bill be deemed read three times, passed, and the motion to reconsider be laid upon the table.

The PRESIDING OFFICER. Without objection, it is so ordered.

So the bill (S. 3389) was deemed to have been read three times and passed.

S. 3389

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

#### SECTION 1. PROHIBITED TRANSACTIONS FOR MANAGED ACCOUNTS.

Section 11(a)(1) of the Securities Exchange Act of 1934 (15 U.S.C. 78k(a)(1)) is amended—

(1) in subparagraph (E), by striking "(other than an investment company)";

(2) by striking "and" at the end of subparagraph (G);

(3) by redesignating subparagraph (H) as subparagraph (I); and

(4) by inserting after subparagraph (G) the following new subparagraph:

"(H) any transaction for an account with respect to which such member or an associated person thereof exercises investment discretion if such member—

"(i) has obtained, from the person or persons authorized to transact business for the account, express authorization for such member or associated person to effect such transactions prior to engaging in the practice of effecting such transactions;

"(ii) furnishes the person or persons authorized to transact business for the account with a statement at least annually disclosing the aggregate compensation received by the exchange member in effecting such transactions; and

"(iii) complies with any rules the Commission has prescribed with respect to the requirements of clauses (i) and (ii); and"

Passed the Senate October 8 (legislative day, September 30), 1992.

Attest:

Secretary.

Mr. DODD. Mr. President, the Senate, during this Congress, passed three securities measures designed to protect investors and ensure the integrity and stability of our Capital markets. These were measures developed by the Securities Subcommittee. They were strongly supported by a broad cross section of industry and consumer groups. All were supported by State regulators, and two of the three measures received the strong support of the administration. These measures also received the overwhelming support of members of this body.

However, I come to the floor today to report that, despite all of this support and all of our good work, we will not achieve enactment of the Government Securities Acts amendments, the Investment Adviser Oversight Act, and the Limited Partnership Rollup Reform Act.

The Senate passed the Government Securities Legislation, S. 1247, on July 30th of last year. The bill, which I introduced and which was cosponsored by the ranking minority member of the subcommittee, Senator GRAMM, in large part reflected the recommendations of a comprehensive joint study by

the treasury, the Federal Reserve Board and the Securities and Exchange Commission, as well as additional studies by the General Accounting Office. The bill contained new sales practice rulemaking authority to address abuses by Government securities dealers. The need for this authority, in particular, was brought to the attention of Congress by State and local officials. The bill also contained an extension of treasury's rulemaking authority for Government securities dealers, which, by law, was set to expire on October 1 of last year. However, we determined not to authorize new rulemaking to mandate the type of price and volume information to be made available for Government securities transactions. With the explosion of information providers in this market—not only "GOVPX" but a growing number of other systems as well—we made a specific decision not to intervene in the development of this market but, instead, to monitor its progress. We made it clear we would not be hesitant to intervene if the private systems did not evolve quickly or broadly enough, or if price and volume information were not made available on a non-discriminatory basis.

So, the Senate did its work with the hope that we could meet the House in conference in September of last year, in time to work out any differences between the two Houses and send a reauthorization bill to the President before the October 1, 1991, expiration date for treasury's rulemaking authority.

However, the scandal at Salomon Brothers, Inc., came to light last August, shortly after the bill passed the Senate, and committees in both the Senate and House began additional hearings to focus on abuses in the treasury auction market. When it became clear that the House would not be able to report a bill prior to the October 1, 1991, expiration date for treasury's rulemaking authority, the Senate passed a second bill, S. 1699, which would have extended treasury's authority until October 1st of this year, and which also contained a provision making it a specific violation of the Federal securities laws to make a false bid in an offering of treasury or other Government securities.

The House did not act on that measure until just two weeks ago. Unfortunately, the bill fell victim to a jurisdictional battle involving the House Banking Committee and House Energy and Commerce Committee over the extent to which the SEC should be granted new rulemaking authority over practices in the Government securities market. A measure developed by the Energy and Commerce Committee was defeated on the House floor, and it became clear that the House would not be able to move a bill on this subject before the end of the Congress.

Nonetheless, over the past two weeks we tried to revive the measure—offer-

ing to move through the Senate portions of the Senate and House bills upon which it appeared there could be broad agreement. For example, the House Energy and Commerce Committee and House Banking Committee bills had identical provisions on sales practice rulemaking authority, and the Senate provision in this area was very similar—an easily reconcilable measure, in our view. The large position reporting provisions of the House Energy and Commerce Committee bill and the House Banking Committee bill were identical—and we suggested that the Senate might be willing to accept the House amendment in this area. There also was broad support for the anti-fraud measures in the Senate and House committee measures—which were very similar to the Senate-passed S. 1699.

Most important, everyone agreed that treasury's existing rulemaking authority over financial responsibility and other rules should be extended—the only differences between the House and Senate were on the length of time. Although I believe we should permanently reauthorize treasury's authority—our experience of the last year makes a very good case for why we should not have yet another sunset date—I, personally, was willing to accept an extension of treasury's authority for any reasonable length of time, in order to avoid a situation where Congress would adjourn leaving treasury with no rulemaking authority in this area. Unfortunately, the House could not agree, even on a scaled-down bill, and these important issues must wait to be resolved until next year.

On August 12th of this year, the Senate passed, without opposition, S. 2266, the Investment Adviser Oversight Act. This bill was based upon a legislative proposal by the SEC, and its primary purpose was to establish a funding mechanism to provide for increased inspections of investment advisers. The SEC and the Congress worked closely with the industry in developing a formula for annual fees to be paid by investment advisers, based upon the amount of assets under their management. These fees would be used as offsetting collections to fund increased appropriations to the SEC, specifically designated for investment adviser inspections.

It was estimated that, as a result of the increase in the SEC's inspection staff that would be made possible by this legislation, the SEC could reduce significantly its current inspection cycle so that investment advisers, who currently are inspected, on average, once every 25-30 years, would receive heightened scrutiny by the SEC under an inspection cycle of once every 3 to 5 years. This would be a five fold increase in investor protection—completely funded by the industry and not by the taxpayer.

The House passed its bill 2 weeks ago, and negotiations were begun to resolve the differences. The House bill contained many additional regulatory measures for investment advisers—measures that were well-intended but which senators on our side believed were too costly, especially given the fee increases contained in the bill. This past weekend, Senate negotiators offered the House a scaled-down bill, and, as part of the offer, asked the House to consider including additional amendments relating to those provisions in the Government securities bills upon which the House and Senate could agree. Senator GARN also requested that the negotiations include some resolution of his lender liability legislation, which the House had yet to consider. House negotiators rejected the offer.

Earlier this week, we attempted to get Senate approval of the investment adviser funding mechanism only. It was clear that there was no agreement between the House and Senate on the broader regulatory issues contained in the House bill, but I believed that we should not adjourn without taking the steps necessary to put more cops in the beat—to increase inspections of investment advisers. Passage of this measure should have been *pro forma*—after all, both houses already had passed appropriations bills containing the requisite fees and appropriations, subject to our passage of authorizing legislation. Unfortunately, our efforts were caught up in election year politics. We were advised that the subcommittee's ranking republican member, Senator GRAMM, objected to the measure on the basis that it might be considered a tax, and contrary to President Bush's political stance. We were unable to move the measure through the Senate.

Finally, S. 1423, the Limited Partnership Rollup Reform Act, was adopted by the Senate on June 24th of this year, as part of a larger measure to reform the regulation of government sponsored enterprises. The bill has 74 cosponsors, and the Senate defeated a motion to table the measure by a vote of 87-10—an overwhelming show of support for this legislation. This bill provided a number of protections for investors involved in abusive rollups—enhanced disclosure, assurances that security holders wishing to vote against a rollup could communicate with others, and protections for dissenting limited partners. The opposition to this measure by the securities subcommittee's ranking minority member, Senator GRAMM, is well known. He raised numerous procedural hurdles to the measure and made known his intention to raise them again when the Senate next considered a conference report or other measure containing the rollup amendment—despite the fact that it was approved by such an overwhelming vote on the Senate. So, we have been

stymied in our efforts to see this measure enacted.

If there is any good news coming out of our efforts on rollups it is this. As a result of the threat of legislation, the SEC has adopted major changes in disclosure requirements for rollups. It has proposed and may soon adopt major changes in its rules relating to shareholder communications. And, the NASD is moving closer to adopting changes in its rules which would provide for the protection of dissenting limited partners. I will do everything I can to see that the NASD completes its work on this front, during the time Congress is adjourned.

Mr. President, I wish I had a better report. These measures, as I mentioned before, received strong public support, broad industry support, and the support of the overwhelming majority of my colleagues as well. But, especially at this late date in the Congress, any one Senator can hold up a measure supported by the vast majority of his colleagues. That happened on two of these measures; the other was lost in a turf fight on the House floor. In my view, the investing public is the loser, and we must work even harder next year to ensure that these important measures become law.

Mr. KERRY. Mr. President, this bill amends the managed account restrictions currently imposed by section 11(a) of the Securities Exchange Act of 1934. Section 11(a), which was adopted in 1975, limits the ability of affiliates of investment companies and other institutional investors to execute trades for these institutional investors on the floor of an exchange. In practice, an independent floor broker must be used to execute these trades, resulting in additional costs.

This bill amends section 11(a) of the Securities Exchange Act of 1934 by redesignating the existing subparagraph (H) as subparagraph (I) and adding a new subparagraph (H). This subparagraph exempts from the operation of section 11(a)(1) any transaction effected by an exchange member or associated person for an account managed by such member or associated person, if such member (i) has obtained express authorization from the person or persons authorized to transact business for the account prior to engaging in the practice of effecting such transactions; (ii) furnishes the persons or persons authorized to transact business for the account with a statement at least annually disclosing the aggregate compensation received by the exchange member in effecting such transactions; and (iii) complies with any rules the Commission has prescribed with respect to these requirements.

This bill permits exchange members to execute on the floor of the exchange trades for accounts that they manage, without the involvement of an independent floor broker. To do so, they

must obtain prior authorization from the managed account. Members and associated persons will be considered to have obtained express authorization as required by this section if they previously have obtained the authorization from the account required by rule 11a2-2(T) under the Securities Exchange Act of 1934, or they otherwise obtain express authorization from the person or persons authorized to transact business for the account prior to effecting transactions for the managed account, subject to any rules the Commission may adopt under this section.

This section authorizes the Commission to prescribe rules governing the authorization and compensation disclosure requirements of the section. The Commission may prescribe rules specifying, for example, the form of authorization required by the section, the persons that may give the authorization, the manner and frequency of disclosure of compensation received by the exchange member, and similar matters. This rulemaking authority is in addition to, and in no way limits, the Commission's existing authority under section 11(a)(2)(A) to regulate or prohibit exchange transactions effected by members and their associated persons for managed accounts.

**REVISION OF TRANSPORTATION SECTION OF THE UNITED STATES CODE**

Mr. FORD. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of Calendar 683, H.R. 1537, a bill to make certain technical changes in title 49, U.S.C.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

A bill (H.R. 1537) to revise, codify, and enact without substantive change certain general and permanent laws, related to transportation, as subtitles II, III, and V-X of title 49, United States Code, "Transportation", and to make other technical improvements in the Code.

The Senate proceeded to consider the bill, which had been reported from the Committee on the Judiciary, with an amendment to strike all after the enacting clause and inserting in lieu thereof the following:

**SUBTITLES II, III, AND V-X OF TITLE 49, UNITED STATES CODE**

**SECTION 1.** (a) Certain general and permanent laws of the United States, related to transportation, are revised, codified, and enacted by subsections (c)-(e) of this section without substantive change as subtitles II, III, and V-X of title 49, United States Code, "Transportation". Those laws may be cited as "49 U.S.C. \_\_\_\_\_".

(b) Title 49, United States Code, is amended by striking the table of subtitles at the beginning of the title and substituting the following new table of subtitles:

"SUBTITLE	SEC.
"I. DEPARTMENT OF TRANSPORTATION .....	101

"II. OTHER GOVERNMENT AGENCIES	1101
"III. GENERAL AND INTERMODAL PROGRAMS .....	5101
"IV. INTERSTATE COMMERCE .....	10101
"V. RAIL PROGRAMS .....	20101
"VI. MOTOR VEHICLE AND DRIVER PROGRAMS .....	30101
"VII. AVIATION PROGRAMS .....	40101
"VIII. PIPELINES .....	60101
"IX. COMMERCIAL SPACE TRANSPORTATION .....	70101
"X. MISCELLANEOUS .....	80101"

(c) Title 49, United States Code, is amended by striking subtitle II, except that chapter 31 (comprising sections 3101-3104) of subtitle II is redesignated and restated as chapter 315 (comprising sections 31501-31504) of subtitle VI of title 49, as enacted by subsection (e) of this section.

(d) Title 49, United States Code, is amended by adding the following immediately after subtitle I:

**SUBTITLE II—OTHER GOVERNMENT AGENCIES**

CHAPTER	Sec.
II. NATIONAL TRANSPORTATION SAFETY BOARD .....	1101

**CHAPTER II—NATIONAL TRANSPORTATION SAFETY BOARD**  
**SUBCHAPTER I—GENERAL**

Sec.	
1101. Definitions.	
<b>SUBCHAPTER II—ORGANIZATION AND ADMINISTRATIVE</b>

**SUBCHAPTER I—GENERAL**

**§ 1101. Definitions**

Section 40102(a) of this title applies to this chapter.

**SUBCHAPTER II—ORGANIZATION AND ADMINISTRATIVE**

**§ 1111. General organization**

(a) ORGANIZATION.—The National Transportation Safety Board is an independent establishment of the United States Government.

(b) APPOINTMENT OF MEMBERS.—The Board is composed of 5 members appointed by the President, by and with the advice and consent of the Senate. Not more than 3 members may be appointed from the same political party. At least 3 members shall be appointed on the basis of technical qualification, professional standing, and demonstrated knowledge in accident reconstruction, safety engineering, human factors, transportation safety, or transportation regulation.

(c) TERMS OF OFFICE AND REMOVAL.—The term of office of each member is 5 years. An in-

dividual appointed to fill a vacancy occurring before the expiration of the term for which the predecessor of that individual was appointed, is appointed for the remainder of that term. When the term of office of a member ends, the member may continue to serve until a successor is appointed and qualified. The President may remove a member for inefficiency, neglect of duty, or malfeasance in office.

(d) CHAIRMAN AND VICE CHAIRMAN.—The President shall designate, by and with the advice and consent of the Senate, a Chairman of the Board. The President also shall designate a Vice Chairman of the Board. The terms of office of both the Chairman and Vice Chairman are 2 years. When the Chairman is absent or unable to serve or when the position of Chairman is vacant, the Vice Chairman acts as Chairman.

(e) DUTIES AND POWERS OF CHAIRMAN.—The Chairman is the chief executive and administrative officer of the Board. Subject to the general policies and decisions of the Board, the Chairman shall—

(1) appoint, supervise, and fix the pay of officers and employees necessary to carry out this chapter;

(2) distribute business among the officers, employees, and administrative units of the Board; and

(3) supervise the expenditures of the Board.

(f) QUORUM.—Three members of the Board are a quorum in carrying out duties and powers of the Board.

(g) OFFICES, BUREAUS, AND DIVISIONS.—The Board shall establish offices necessary to carry out this chapter, including an office to investigate and report on the safe transportation of hazardous material. The Board shall establish distinct and appropriately staffed bureaus, divisions, or offices to investigate and report on accidents involving each of the following modes of transportation:

- (1) aviation.
- (2) highway and motor vehicle.
- (3) rail and tracked vehicle.
- (4) pipeline.

(h) SEAL.—The Board shall have a seal that shall be judicially recognized.

**§ 1112. Special boards of inquiry on air transportation safety**

(a) ESTABLISHMENT.—If an accident involves a substantial question about public safety in air transportation, the National Transportation Safety Board may establish a special board of inquiry composed of—

- (1) one member of the Board acting as chairman; and
- (2) 2 members representing the public, appointed by the President on notification of the establishment of the special board of inquiry.

(b) QUALIFICATIONS AND CONFLICTS OF INTEREST.—The public members of a special board of inquiry must be qualified by training and experience to participate in the inquiry and may not have a pecuniary interest in an aviation enterprise involved in the accident to be investigated.

(c) AUTHORITY.—A special board of inquiry has the same authority that the Board has under this chapter.

**§ 1113. Administrative**

(a) GENERAL AUTHORITY.—(1) The National Transportation Safety Board, and when authorized by it, a member of the Board, an administrative law judge employed by or assigned to the Board, or an officer or employee designated by the Chairman of the Board, may conduct hearings to carry out this chapter, administer oaths, and require, by subpoena or otherwise, necessary witnesses and evidence.

(2) A witness or evidence in a hearing under paragraph (1) of this subsection may be summoned or required to be produced from any place in the United States to the designated

place of the hearing. A witness summoned under this subsection is entitled to the same fee and mileage the witness would have been paid in a court of the United States.

(3) A subpoena shall be issued under the signature of the Chairman or the Chairman's delegate but may be served by any person designated by the Chairman.

(4) If a person disobeys a subpoena, order, or inspection notice of the Board, the Board may bring a civil action in a district court of the United States to enforce the subpoena, order, or notice. An action under this paragraph may be brought in the judicial district in which the person against whom the action is brought resides, is found, or does business. The court may punish a failure to obey an order of the court to comply with the subpoena, order, or notice as a contempt of court.

(b) **ADDITIONAL POWERS.**—(1) The Board may—

(A) procure the temporary or intermittent services of experts or consultants under section 3109 of title 5;

(B) make agreements and other transactions necessary to carry out this chapter without regard to section 3709 of the Revised Statutes (41 U.S.C. 5);

(C) use, when appropriate, available services, equipment, personnel, and facilities of a department, agency, or instrumentality of the United States Government on a reimbursable or other basis;

(D) confer with employees and use services, records, and facilities of State and local governmental authorities;

(E) appoint advisory committees composed of qualified private citizens and officials of the Government and State and local governments as appropriate;

(F) accept voluntary and uncompensated services notwithstanding another law;

(G) accept gifts of money and other property;

(H) make contracts with nonprofit entities to carry out studies related to duties and powers of the Board; and

(I) require that the departments, agencies, and instrumentalities of the Government, State and local governments, and governments of foreign countries provide appropriate consideration for the reasonable costs of goods and services supplied by the Board.

(2) The Board shall deposit in the Treasury amounts received under paragraph (1)(I) of this subsection to be credited to the appropriation of the Board.

(c) **SUBMISSION OF CERTAIN COPIES TO CONGRESS.**—When the Board submits to the President or the Director of the Office of Management and Budget a budget estimate, budget request, supplemental budget estimate, other budget information, a legislative recommendation, prepared testimony for congressional hearings, or comments on legislation, the Board must submit a copy to Congress at the same time. An officer, department, agency, or instrumentality of the Government may not require the Board to submit the estimate, request, information, recommendation, testimony, or comments to another officer, department, agency, or instrumentality of the Government for approval, comment, or review before being submitted to Congress.

(d) **LIAISON COMMITTEES.**—The Chairman may determine the number of committees that are appropriate to maintain effective liaison with other departments, agencies, and instrumentalities of the Government, State and local governmental authorities, and independent standard-setting authorities that carry out programs and activities related to transportation safety. The Board may designate representatives to serve on or assist those committees.

(e) **INQUIRIES.**—The Board, or an officer or employee of the Board designated by the Chair-

man, may conduct an inquiry to obtain information related to transportation safety after publishing notice of the inquiry in the Federal Register. The Board or designated officer or employee may require by order a department, agency, or instrumentality of the Government, a State or local governmental authority, or a person transporting individuals or property in commerce to submit to the Board a written report and answers to requests and questions related to a duty or power of the Board. The Board may prescribe the time within which the report and answers must be given to the Board or to the designated officer or employee. Copies of the report and answers shall be made available for public inspection.

(f) **REGULATIONS.**—The Board may prescribe regulations to carry out this chapter.

#### §1114. Disclosure, availability, and use of information

(a) **GENERAL.**—Except as provided in subsections (b) and (c) of this section, a copy of a record, information, or investigation submitted or received by the National Transportation Safety Board, or a member or employee of the Board, shall be made available to the public on identifiable request and at reasonable cost. This subsection does not require the release of information described by section 552(b) of title 5 or protected from disclosure by another law of the United States.

(b) **TRADE SECRETS.**—(1) The Board may disclose information related to a trade secret referred to in section 1905 of title 18 only—

(A) to another department, agency, or instrumentality of the United States Government when requested for official use;

(B) to a committee of Congress having jurisdiction over the subject matter to which the information is related, when requested by that committee;

(C) in a judicial proceeding under a court order that preserves the confidentiality of the information without impairing the proceeding; and

(D) to the public to protect health and safety after giving notice to any interested person to whom the information is related and an opportunity for that person to comment in writing, or orally in closed session, on the proposed disclosure, if the delay resulting from notice and opportunity for comment would not be detrimental to health and safety.

(2) Information disclosed under paragraph (1) of this subsection may be disclosed only in a way designed to preserve its confidentiality.

(c) **COCKPIT VOICE RECORDINGS AND TRANSCRIPTS.**—(1) The Board may not disclose publicly any part of a cockpit voice recorder recording or transcript of oral communications by and between flight crew members and ground stations related to an accident or incident investigated by the Board. However, the Board shall make public any part of a transcript the Board decides is relevant to the accident or incident—

(A) if the Board holds a public hearing on the accident or incident, at the time of the hearing; or

(B) if the Board does not hold a public hearing, at the time a majority of the other factual reports on the accident or incident are placed in the public docket.

(2) This subsection does not prevent the Board from referring at any time to cockpit voice recorder information in making safety recommendations.

(d) **DRUG TESTS.**—(1) Notwithstanding section 503(e) of the Supplemental Appropriations Act, 1987 (Public Law 100-71, 101 Stat. 471), the Secretary of Transportation shall provide the following information to the Board when requested in writing by the Board:

(A) any report of a confirmed positive toxicological test, verified as positive by a medical

review officer, conducted on an officer or employee of the Department of Transportation under post-accident, unsafe practice, or reasonable suspicion toxicological testing requirements of the Department, when the officer or employee is reasonably associated with the circumstances of an accident or incident under the investigative jurisdiction of the Board.

(B) any laboratory record documenting that the test is confirmed positive.

(2) Except as provided by paragraph (3) of this subsection, the Board shall maintain the confidentiality of, and exempt from disclosure under section 552(b)(3) of title 5—

(A) a laboratory record provided the Board under paragraph (1) of this subsection that reveals medical use of a drug allowed under applicable regulations; and

(B) medical information provided by the tested officer or employee related to the test or a review of the test.

(3) The Board may use a laboratory record made available under paragraph (1) of this subsection to develop an evidentiary record in an investigation of an accident or incident if—

(A) the fitness of the tested officer or employee is at issue in the investigation; and

(B) the use of that record is necessary to develop the evidentiary record.

#### §1115. Training

(a) **DEFINITION.**—In this section, "Institute" means the Transportation Safety Institute of the Department of Transportation and any successor organization of the Institute.

(b) **USE OF INSTITUTE SERVICES.**—The National Transportation Safety Board may use, on a reimbursable basis, the services of the Institute. The Secretary of Transportation shall make the Institute available to—

(1) the Board for safety training of employees of the Board in carrying out their duties and powers; and

(2) other safety personnel of the United States Government, State and local governments, governments of foreign countries, interstate authorities, and private organizations the Board designates in consultation with the Secretary.

(c) **FEES.**—(1) Training at the Institute for safety personnel (except employees of the Government) shall be provided at a reasonable fee established periodically by the Board in consultation with the Secretary. The fee shall be paid directly to the Secretary, and the Secretary shall deposit the fee in the Treasury. The amount of the fee—

(A) shall be credited to the appropriate appropriation (subject to the requirements of any annual appropriation); and

(B) is an offset against any annual reimbursement agreement between the Board and the Secretary to cover all reasonable costs of providing training under this subsection that the Secretary incurs in operating the Institute.

(2) The Board shall maintain an annual record of offsets under paragraph (1)(B) of this subsection.

#### §1116. Reports and studies

(a) **PERIODIC REPORTS.**—The National Transportation Safety Board shall report periodically to Congress, departments, agencies, and instrumentalities of the United States Government and State and local governmental authorities concerned with transportation safety, and other interested persons. The report shall—

(1) advocate meaningful responses to reduce the likelihood of transportation accidents similar to those investigated by the Board; and

(2) propose corrective action to make the transportation of individuals as safe and free from risk of injury as possible, including action to minimize personal injuries that occur in transportation accidents.

(b) **STUDIES, INVESTIGATIONS, AND OTHER REPORTS.**—The Board also shall—

(1) carry out special studies and investigations about transportation safety, including avoiding personal injury;

(2) examine techniques and methods of accident investigation and periodically publish recommended procedures for accident investigations;

(3) prescribe requirements for persons reporting accidents and aviation incidents that—

(A) may be investigated by the Board under this chapter; or

(B) involve public aircraft (except aircraft of the armed forces and the intelligence agencies);

(4) evaluate, examine the effectiveness of, and publish the findings of the Board about the transportation safety consciousness of other departments, agencies, and instrumentalities of the Government and their effectiveness in preventing accidents; and

(5) evaluate the adequacy of safeguards and procedures for the transportation of hazardous material and the performance of other departments, agencies, and instrumentalities of the Government responsible for the safe transportation of that material.

#### §1117. Annual report

The National Transportation Safety Board shall submit a report to Congress on July 1 of each year. The report shall include—

(1) a statistical and analytical summary of the transportation accident investigations conducted and reviewed by the Board during the prior calendar year;

(2) a survey and summary of the recommendations made by the Board to reduce the likelihood of recurrence of those accidents together with the observed response to each recommendation;

(3) a detailed appraisal of the accident investigation and accident prevention activities of other departments, agencies, and instrumentalities of the United States Government and State and local governmental authorities having responsibility for those activities under a law of the United States or a State; and

(4) an evaluation conducted every 2 years of transportation safety and recommendations for legislative and administrative action and change.

#### §1118. Authorization of appropriations

(a) GENERAL.—Not more than the following amounts may be appropriated to the National Transportation Safety Board to carry out this chapter:

(1) \$38,600,000 for the fiscal year ending September 30, 1992.

(2) \$38,800,000 for the fiscal year ending September 30, 1993.

(b) EMERGENCY FUND.—The Board has an emergency fund of \$1,000,000 available for necessary expenses of the Board, not otherwise provided for, for accident investigations. The following amounts may be appropriated to the fund:

(1) \$1,000,000 to establish the fund.

(2) amounts equal to amounts expended annually out of the fund.

(c) AVAILABILITY OF AMOUNTS.—Amounts appropriated under this section remain available until expended.

#### SUBCHAPTER III—AUTHORITY

##### §1131. General authority

(a) GENERAL.—(1) The National Transportation Safety Board shall investigate or have investigated (in detail the Board prescribes) and establish the facts, circumstances, and cause or probable cause of—

(A) an aircraft accident the Board has authority to investigate under section 1132 of this title;

(B) a highway accident, including a railroad grade crossing accident, the Board selects in cooperation with a State;

(C) a railroad accident in which there is a fatality or substantial property damage, or that involves a passenger train;

(D) a pipeline accident in which there is a fatality or substantial property damage;

(E) a major marine casualty (except a casualty involving only public vessels) occurring on the navigable waters or territorial sea of the United States, or involving a vessel of the United States, under regulations prescribed jointly by the Board and the head of the department in which the Coast Guard is operating; and

(F) any other accident related to the transportation of individuals or property when the Board decides—

(i) the accident is catastrophic;

(ii) the accident involves problems of a recurring character; or

(iii) the investigation of the accident would carry out this chapter.

(2) An investigation by the Board under paragraph (1)(A)–(D) or (F) of this subsection has priority over any investigation by another department, agency, or instrumentality of the United States Government. The Board shall provide for appropriate participation by other departments, agencies, or instrumentalities in the investigation. However, those departments, agencies, or instrumentalities may not participate in the decision of the Board about the probable cause of the accident.

(3) This section and sections 1113, 1116(b), 1133, and 1134(a) and (c)–(e) of this title do not affect the authority of another department, agency, or instrumentality of the Government to investigate an accident under applicable law or to obtain information directly from the parties involved in, and witnesses to, the accident. The Board and other departments, agencies, and instrumentalities shall ensure that appropriate information developed about the accident is exchanged in a timely manner.

(b) ACCIDENTS INVOLVING PUBLIC VESSELS.—

(1) The Board or the head of the department in which the Coast Guard is operating shall investigate and establish the facts, circumstances, and cause or probable cause of a marine accident involving a public vessel and any other vessel. The results of the investigation shall be made available to the public.

(2) Paragraph (1) of this subsection and subsection (a)(1)(E) of this section do not affect the responsibility, under another law of the United States, of the head of the department in which the Coast Guard is operating.

(c) ACCIDENTS NOT INVOLVING GOVERNMENT MISFEASANCE OR NONFEASANCE.—(1) When asked by the Board, the Secretary of Transportation may—

(A) investigate an accident described under subsection (a) or (b) of this section in which misfeasance or nonfeasance by the Government has not been alleged; and

(B) report the facts and circumstances of the accident to the Board.

(2) The Board shall use the report in establishing cause or probable cause of an accident described under subsection (a) or (b) of this section.

(d) ACCIDENT REPORTS.—The Board shall report on the facts and circumstances of each accident investigated by it under subsection (a) or (b) of this section. The Board shall make each report available to the public at reasonable cost.

##### §1132. Civil aircraft accident investigations

(a) GENERAL AUTHORITY.—(1) The National Transportation Safety Board shall investigate—

(A) each accident involving civil aircraft; and

(B) with the participation of appropriate military authorities, each accident involving both military and civil aircraft.

(2) A person employed under section 1113(b)(1) of this title that is conducting an investigation or hearing about an aircraft accident has the same authority to conduct the investigation or hearing as the Board.

(b) NOTIFICATION AND REPORTING.—The Board shall prescribe regulations governing the

notification and reporting of accidents involving civil aircraft.

(c) PARTICIPATION OF SECRETARY.—The Board shall provide for the participation of the Secretary of Transportation in the investigation of an aircraft accident under this chapter when participation is necessary to carry out the duties and powers of the Secretary. However, the Secretary may not participate in establishing probable cause.

(d) ACCIDENTS INVOLVING ONLY MILITARY AIRCRAFT.—If an accident involves only military aircraft and a duty of the Secretary is or may be involved, the military authorities shall provide for the participation of the Secretary. In any other accident involving only military aircraft, the military authorities shall give the Board or Secretary information the military authorities decide would contribute to the promotion of air safety.

##### §1133. Review of other agency action

The National Transportation Safety Board shall review on appeal—

(1) the denial, amendment, modification, suspension, or revocation of a certificate issued by the Secretary of Transportation under section 44703, 44709, or 44710 of this title;

(2) the revocation of a certificate of registration under section 44106 of this title; and

(3) a decision of the head of the department in which the Coast Guard is operating on an appeal from the decision of an administrative law judge denying, revoking, or suspending a license, certificate, document, or register in a proceeding under section 6101, 6301, or 7503, chapter 77, or section 9303 of title 46.

##### §1134. Inspections and autopsies

(a) ENTRY AND INSPECTION.—An officer or employee designated by the National Transportation Safety Board—

(1) on display of appropriate credentials and written notice of inspection authority, may enter property where a transportation accident has occurred or wreckage from the accident is located and do anything necessary to conduct an investigation; and

(2) during reasonable hours, may inspect any record, process, control, or facility related to an accident investigation under this chapter.

(b) INSPECTION, TESTING, PRESERVATION, AND MOVING OF AIRCRAFT AND PARTS.—(1) In investigating an aircraft accident under this chapter, the Board may inspect and test, to the extent necessary, any civil aircraft, aircraft engine, propeller, appliance, or property on an aircraft involved in an accident in air commerce.

(2) Any civil aircraft, aircraft engine, propeller, appliance, or property on an aircraft involved in an accident in air commerce shall be preserved, and may be moved, only as provided by regulations of the Board.

(c) AVOIDING UNNECESSARY INTERFERENCE AND PRESERVING EVIDENCE.—In carrying out subsection (a)(1) of this section, an officer or employee may examine or test any vehicle, vessel, rolling stock, track, or pipeline component. The examination or test shall be conducted in a way that—

(1) does not interfere unnecessarily with transportation services provided by the owner or operator of the vehicle, vessel, rolling stock, track, or pipeline component; and

(2) to the maximum extent feasible, preserves evidence related to the accident, consistent with the needs of the investigation and with the cooperation of that owner or operator.

(d) EXCLUSIVE AUTHORITY OF BOARD.—Only the Board has the authority to decide on the way in which testing under this section will be conducted, including decisions on the person that will conduct the test, the type of test that will be conducted, and any individual who will witness the test. The Board shall make any of

those decisions based on the needs of the investigation being conducted and, when applicable, this subsection and subsections (a), (c), and (e) of this section.

(e) **PROMPTNESS OF TESTS AND AVAILABILITY OF RESULTS.**—An inspection, examination, or test under subsection (a) or (c) of this section shall be started and completed promptly, and the results shall be made available.

(f) **AUTOPSIES.**—(1) The Board may order an autopsy to be performed and have other tests made when necessary to investigate an accident under this chapter. However, local law protecting religious beliefs related to autopsies shall be observed to the extent consistent with the needs of the accident investigation.

(2) With or without reimbursement, the Board may obtain a copy of an autopsy report performed by a State or local official on an individual who died because of a transportation accident investigated by the Board under this chapter.

#### **§1135. Secretary of Transportation's responses to safety recommendations**

(a) **GENERAL.**—When the National Transportation Safety Board submits a recommendation about transportation safety to the Secretary of Transportation, the Secretary shall give a formal written response to each recommendation not later than 90 days after receiving the recommendation. The response shall indicate whether the Secretary intends—

(1) to carry out procedures to adopt the complete recommendation;

(2) to carry out procedures to adopt a part of the recommendation; or

(3) to refuse to carry out procedures to adopt the recommendation.

(b) **TIMETABLE FOR COMPLETING PROCEDURES AND REASONS FOR REFUSALS.**—A response under subsection (a)(1) or (2) of this section shall include a copy of a proposed timetable for completing the procedures. A response under subsection (a)(2) of this section shall detail the reasons for the refusal to carry out procedures on the remainder of the recommendation. A response under subsection (a)(3) of this section shall detail the reasons for the refusal to carry out procedures.

(c) **PUBLIC AVAILABILITY.**—The Board shall make a copy of each recommendation and response available to the public at reasonable cost.

(d) **REPORTS TO CONGRESS.**—The Secretary shall submit to Congress on January 1 of each year a report containing each recommendation on transportation safety made by the Board to the Secretary during the prior year and a copy of the Secretary's response to each recommendation.

#### **SUBCHAPTER IV—ENFORCEMENT AND PENALTIES**

##### **§1151. Aviation enforcement**

(a) **CIVIL ACTIONS BY BOARD.**—The National Transportation Safety Board may bring a civil action in a district court of the United States against a person to enforce section 1132, 1134(b) or (f)(1), or 1155(a) of this title or a regulation prescribed or order issued under any of those sections. An action under this subsection may be brought in the judicial district in which the person does business or the violation occurred.

(b) **CIVIL ACTIONS BY ATTORNEY GENERAL.**—On request of the Board, the Attorney General may bring a civil action—

(1) to enforce section 1132, 1134(b) or (f)(1), or 1155(a) of this title or a regulation prescribed or order issued under any of those sections; and

(2) to prosecute a person violating those sections or a regulation prescribed or order issued under any of those sections.

(c) **PARTICIPATION OF BOARD.**—On request of the Attorney General, the Board may partici-

pate in a civil action to enforce section 1132, 1134(b) or (f)(1), or 1155(a) of this title.

##### **§1152. Joinder and intervention in aviation proceedings**

A person interested in or affected by a matter under consideration in a proceeding or a civil action to enforce section 1132, 1134(b) or (f)(1), or 1155(a) of this title, or a regulation prescribed or order issued under any of those sections, may be joined as a party or permitted to intervene in the proceeding or civil action.

##### **§1153. Judicial review**

(a) **GENERAL.**—The appropriate court of appeals of the United States or the United States Court of Appeals for the District of Columbia Circuit may review a final order of the National Transportation Safety Board under this chapter. A person disclosing a substantial interest in the order may apply for review by filing a petition not later than 60 days after the order of the Board is issued.

(b) **AVIATION MATTERS.**—(1) A person disclosing a substantial interest in an order related to an aviation matter issued by the Board under this chapter may apply for review of the order by filing a petition for review in the United States Court of Appeals for the District of Columbia Circuit or in the court of appeals of the United States for the circuit in which the person resides or has its principal place of business. The petition must be filed not later than 60 days after the order is issued. The court may allow the petition to be filed after the 60 days only if there was a reasonable ground for not filing within that 60-day period.

(2) When a petition is filed under paragraph (1) of this subsection, the clerk of the court immediately shall send a copy of the petition to the Board. The Board shall file with the court a record of the proceeding in which the order was issued.

(3) When the petition is sent to the Board, the court has exclusive jurisdiction to affirm, amend, modify, or set aside any part of the order and may order the Board to conduct further proceedings. After reasonable notice to the Board, the court may grant interim relief by staying the order or taking other appropriate action when cause for its action exists. Findings of fact by the Board, if supported by substantial evidence, are conclusive.

(4) In reviewing an order under this subsection, the court may consider an objection to an order of the Board only if the objection was made in the proceeding conducted by the Board or if there was a reasonable ground for not making the objection in the proceeding.

(5) A decision by a court under this subsection may be reviewed only by the Supreme Court under section 1254 of title 28.

##### **§1154. Discovery and use of cockpit voice and other material**

(a) **TRANSCRIPTS AND RECORDINGS.**—(1) Except as provided by this subsection, a party in a judicial proceeding may not use discovery to obtain—

(A) any part of a cockpit voice recorder transcript that the National Transportation Safety Board has not made available to the public under section 1114(c) of this title; and

(B) a cockpit voice recorder recording.

(2) (A) Except as provided in paragraph (4)(A) of this subsection, a court may allow discovery by a party of a cockpit voice recorder transcript if, after an in camera review of the transcript, the court decides that—

(i) the part of the transcript made available to the public under section 1114(c) of this title does not provide the party with sufficient information for the party to receive a fair trial; and

(ii) discovery of additional parts of the transcript is necessary to provide the party with sufficient information for the party to receive a fair trial.

(B) A court may allow discovery, or require production for an in camera review, of a cockpit voice recorder transcript that the Board has not made available under section 1114(c) of this title only if the cockpit voice recorder recording is not available.

(3) Except as provided in paragraph (4)(A) of this subsection, a court may allow discovery by a party of a cockpit voice recorder recording if, after an in camera review of the recording, the court decides that—

(A) the parts of the transcript made available to the public under section 1114(c) of this title and to the party through discovery under paragraph (2) of this subsection do not provide the party with sufficient information for the party to receive a fair trial; and

(B) discovery of the cockpit voice recorder recording is necessary to provide the party with sufficient information for the party to receive a fair trial.

(4)(A) When a court allows discovery in a judicial proceeding of a part of a cockpit voice recorder transcript not made available to the public under section 1114(c) of this title or a cockpit voice recorder recording, the court shall issue a protective order—

(i) to limit the use of the part of the transcript or the recording to the judicial proceeding; and

(ii) to prohibit dissemination of the part of the transcript or the recording to any person that does not need access to the part of the transcript or the recording for the proceeding.

(B) A court may allow a part of a cockpit voice recorder transcript not made available to the public under section 1114(c) of this title or a cockpit voice recorder recording to be admitted into evidence in a judicial proceeding, only if the court places the part of the transcript or the recording under seal to prevent the use of the part of the transcript or the recording for purposes other than for the proceeding.

(5) This subsection does not prevent the Board from referring at any time to cockpit voice recorder information in making safety recommendations.

(b) **REPORTS.**—No part of a report of the Board, related to an accident or an investigation of an accident, may be admitted into evidence or used in a civil action for damages resulting from a matter mentioned in the report.

##### **§1155. Aviation penalties**

(a) **CIVIL PENALTY.**—(1) A person violating section 1132 or 1134(b) or (f)(1) of this title or a regulation prescribed or order issued under either of those sections is liable to the United States Government for a civil penalty of not more than \$1,000. A separate violation occurs for each day a violation continues.

(2) This subsection does not apply to a member of the armed forces of the United States or an employee of the Department of Defense subject to the Uniform Code of Military Justice when the member or employee is performing official duties. The appropriate military authorities are responsible for taking necessary disciplinary action and submitting to the National Transportation Safety Board a timely report on action taken.

(3) The Board may compromise the amount of a civil penalty imposed under this subsection.

(4) The Government may deduct the amount of a civil penalty imposed or compromised under this subsection from amounts it owes the person liable for the penalty.

(5) A civil penalty under this subsection may be collected by bringing a civil action against the person liable for the penalty. The action shall conform as nearly as practicable to a civil action in admiralty.

(b) **CRIMINAL PENALTY.**—A person that knowingly and without authority removes, conceals, or withholds a part of a civil aircraft involved in an accident, or property on the aircraft at

the time of the accident, shall be fined under title 18, imprisoned for not more than 10 years, or both.

**§5101. Purpose**

The purpose of this chapter is to provide adequate protection against the risks to life and property inherent in the transportation of hazardous material in commerce by improving the regulatory and enforcement authority of the Secretary of Transportation.

**§5102. Definitions**

In this chapter—  
 (1) "commerce" means trade or transportation in the jurisdiction of the United States—  
 (A) between a place in a State and a place outside of the State; or  
 (B) that affects trade or transportation between a place in a State and a place outside of the State.  
 (2) "hazardous material" means a substance or material the Secretary of Transportation designates under section 5103(a) of this title.  
 (3) "hazmat employee"—  
 (A) means an individual—  
 (i) employed by a hazmat employer; and  
 (ii) who during the course of employment directly affects hazardous material transportation safety as the Secretary decides by regulation;  
 (B) includes an owner-operator of a motor vehicle transporting hazardous material in commerce; and  
 (C) includes an individual, employed by a hazmat employer, who during the course of employment—  
 (i) loads, unloads, or handles hazardous material;  
 (ii) reconditions or tests containers, drums, and packages represented for use in transporting hazardous material;  
 (iii) prepares hazardous material for transportation;

(iv) is responsible for the safety of transporting hazardous material; or  
 (v) operates a vehicle used to transport hazardous material.

(4) "hazmat employer"—  
 (A) means a person using at least one employee of that person in connection with—

(i) transporting hazardous material in commerce;  
 (ii) causing hazardous material to be transported in commerce; or  
 (iii) reconditioning or testing containers, drums, and packages represented for use in transporting hazardous material;

(B) includes an owner-operator of a motor vehicle transporting hazardous material in commerce; and  
 (C) includes a department, agency, or instrumentality of the United States Government, or an authority of a State, political subdivision of a State, or Indian tribe, carrying out an activity described in subclause (A)(i), (ii), or (iii) of this clause (4).

(5) "imminent hazard" means the existence of a condition that presents a substantial likelihood that death, serious illness, severe personal injury, or a substantial endangerment to health, property, or the environment may occur before the reasonably foreseeable completion date of a formal proceeding begun to lessen the risk of that death, illness, injury, or endangerment.

(6) "Indian tribe" has the same meaning given that term in section 4 of the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450b).

(7) "motor carrier" means a motor common carrier, motor contract carrier, motor private carrier, and freight forwarder as those terms are defined in section 10102 of this title.

(8) "national response team" means the national response team established under the national contingency plan established under section 105 of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (42 U.S.C. 9605).

(9) "person", in addition to its meaning under section 1 of title 1—  
 (A) includes a government, Indian tribe, or authority of a government or tribe offering hazardous material for transportation in commerce or transporting hazardous material to further a commercial enterprise; but  
 (B) does not include—

(i) the United States Postal Service; and  
 (ii) in sections 5123 and 5124 of this title, a department, agency, or instrumentality of the Government.

(10) "public sector employee"—  
 (A) means an individual employed by a State, political subdivision of a State, or Indian tribe and who during the course of employment has responsibilities related to responding to an accident or incident involving the transportation of hazardous material;

(B) includes an individual employed by a State, political subdivision of a State, or Indian tribe as a firefighter or law enforcement officer; and  
 (C) includes an individual who volunteers to serve as a firefighter for a State, political subdivision of a State, or Indian tribe.

(11) "State" means—  
 (A) except in section 5119 of this title, a State of the United States, the District of Columbia, Puerto Rico, the Northern Mariana Islands, the Virgin Islands, American Samoa, Guam, and any other territory or possession of the United States designated by the Secretary; and  
 (B) in section 5119 of this title, a State of the United States and the District of Columbia.

(12) "transports" or "transportation" means the movement of property and loading, unloading, or storage incidental to the movement.

(13) "United States" means all of the States.

**§5103. General regulatory authority**

(a) DESIGNATING MATERIAL AS HAZARDOUS.—The Secretary of Transportation shall designate material (including an explosive, radioactive material, etiologic agent, flammable or combustible liquid or solid, poison, oxidizing or corrosive material, and compressed gas) or a group or class of material as hazardous when the Secretary decides that transporting the material in commerce in a particular amount and form may pose an unreasonable risk to health and safety or property.

(b) REGULATIONS FOR SAFE TRANSPORTATION.—(1) The Secretary shall prescribe regulations for the safe transportation of hazardous material in intrastate, interstate, and foreign commerce. The regulations—  
 (A) apply to a person—  
 (i) transporting hazardous material in commerce;

(ii) causing hazardous material to be transported in commerce; or  
 (iii) manufacturing, fabricating, marking, maintaining, reconditioning, repairing, or testing a package or container that is represented, marked, certified, or sold by that person as qualified for use in transporting hazardous material in commerce; and  
 (B) shall govern safety aspects of the transportation of hazardous material the Secretary considers appropriate.

(2) A proceeding to prescribe the regulations must include an opportunity for informal oral presentations.

**§5104. Representation and tampering**  
 (a) REPRESENTATION.—A person may represent, by marking or otherwise, that—  
 (1) a container or package for transporting hazardous material is safe, certified, or complies with this chapter only if the container or package meets the requirements of each regulation prescribed under this chapter; or  
 (2) hazardous material is present in a package, container, motor vehicle, rail freight car, aircraft, or vessel only if the material is present.

(b) TAMPERING.—A person may not alter, remove, destroy, or otherwise tamper unlawfully with—  
 (1) a marking, label, placard, or description on a document required under this chapter or a regulation prescribed under this chapter; or  
 (2) a package, container, motor vehicle, rail freight car, aircraft, or vessel used to transport hazardous material.

**§5105. Transporting certain highly radioactive material**

(a) DEFINITION.—In this section, "high-level radioactive waste" and "spent nuclear fuel" have the same meanings given those terms in section 2 of the Nuclear Waste Policy Act of 1982 (42 U.S.C. 10101).

(b) TRANSPORTATION SAFETY STUDY.—In consultation with the Secretary of Energy, the Nuclear Regulatory Commission, potentially affected States and Indian tribes, representatives of the rail transportation industry, and shippers of high-level radioactive waste and spent nuclear fuel, the Secretary of Transportation shall conduct a study comparing the safety of using trains operated only to transport high-level radioactive waste and spent nuclear fuel with the safety of using other methods of rail transportation for transporting that waste and fuel. The Secretary of Transportation shall submit to Congress not later than November 16, 1991, a report on the results of the study.

(c) SAFE RAIL TRANSPORTATION REGULATIONS.—Not later than November 16, 1992, after considering the results of the study conducted under subsection (b) of this section, the Secretary of Transportation shall prescribe amendments to existing regulations that the Secretary considers appropriate to provide for the safe rail

transportation of high-level radioactive waste and spent nuclear fuel, including trains operated only for transporting high-level radioactive waste and spent nuclear fuel.

(d) **ROUTES AND MODES STUDY.**—Not later than November 16, 1991, the Secretary of Transportation shall conduct a study to decide which factors, if any, shippers and carriers should consider when selecting routes and modes that would enhance overall public safety related to the transportation of high-level radioactive waste and spent nuclear fuel. The study shall include—

(1) notice and opportunity for public comment; and

(2) an assessment of the degree to which at least the following affect the overall public safety of the transportation:

(A) population densities.  
(B) types and conditions of modal infrastructures (including highways, railbeds, and waterways).

(C) quantities of high-level radioactive waste and spent nuclear fuel.

(D) emergency response capabilities.

(E) exposure and other risk factors.

(F) terrain considerations.

(G) continuity of routes.

(H) available alternative routes.

(I) environmental impact factors.

(e) **INSPECTIONS OF MOTOR VEHICLES TRANSPORTING CERTAIN MATERIAL.**—(1) Not later than November 16, 1991, the Secretary of Transportation shall require by regulation that before each use of a motor vehicle to transport a highway-route-controlled quantity of radioactive material in commerce, the vehicle shall be inspected and certified as complying with this chapter and applicable United States motor carrier safety laws and regulations. The Secretary may require that the inspection be carried out by an authorized United States Government inspector or according to appropriate State procedures.

(2) The Secretary of Transportation may allow a person, transporting or causing to be transported a highway-route-controlled quantity of radioactive material, to inspect the motor vehicle used to transport the material and to certify that the vehicle complies with this chapter. The inspector qualification requirements the Secretary prescribes for an individual inspecting a motor vehicle apply to an individual conducting an inspection under this paragraph.

#### **§5106. Handling criteria**

The Secretary of Transportation may prescribe criteria for handling hazardous material, including—

(1) a minimum number of personnel;  
(2) minimum levels of training and qualifications for personnel;

(3) the kind and frequency of inspections;

(4) equipment for detecting, warning of, and controlling risks posed by the hazardous material;

(5) specifications for the use of equipment and facilities used in handling and transporting the hazardous material; and

(6) a system of monitoring safety procedures for transporting the hazardous material.

#### **§5107. Hazmat employee training requirements and grants**

(a) **TRAINING REQUIREMENTS.**—Not later than May 16, 1992, the Secretary of Transportation shall prescribe by regulation requirements for training that a hazmat employer must give hazmat employees of the employer on the safe loading, unloading, handling, storing, and transporting of hazardous material and emergency preparedness for responding to an accident or incident involving the transportation of hazardous material. The regulations—

(1) shall establish the date, as provided by subsection (b) of this section, by which the training shall be completed; and

(2) may provide for different training for different classes or categories of hazardous material and hazmat employees.

(b) **BEGINNING AND COMPLETING TRAINING.**—A hazmat employer shall begin the training of hazmat employees of the employer not later than 6 months after the Secretary of Transportation prescribes the regulations under subsection (a) of this section. The training shall be completed within a reasonable period of time after—

(1) 6 months after the regulations are prescribed; or

(2) the date on which an individual is to begin carrying out a duty or power of a hazmat employee if the individual is employed as a hazmat employee after the 6-month period.

(c) **CERTIFICATION OF TRAINING.**—After completing the training, each hazmat employer shall certify, with documentation the Secretary of Transportation may require by regulation, that the hazmat employees of the employer have received training and have been tested on appropriate transportation areas of responsibility, including at least one of the following:

(1) recognizing and understanding the Department of Transportation hazardous material classification system.

(2) the use and limitations of the Department hazardous material placarding, labeling, and marking systems.

(3) general handling procedures, loading and unloading techniques, and strategies to reduce the probability of release or damage during or incidental to transporting hazardous material.

(4) health, safety, and risk factors associated with hazardous material and the transportation of hazardous material.

(5) appropriate emergency response and communication procedures for dealing with an accident or incident involving hazardous material transportation.

(6) the use of the Department Emergency Response Guidebook and recognition of its limitations or the use of equivalent documents and recognition of the limitations of those documents.

(7) applicable hazardous material transportation regulations.

(8) personal protection techniques.

(9) preparing a shipping document for transporting hazardous material.

(d) **COORDINATION OF TRAINING REQUIREMENTS.**—In consultation with the Administrator of the Environmental Protection Agency and the Secretary of Labor, the Secretary of Transportation shall ensure that the training requirements prescribed under this section do not conflict with—

(1) the requirements of regulations the Secretary of Labor prescribes related to hazardous waste operations and emergency response that are contained in part 1910 of title 29, Code of Federal Regulations; and

(2) the regulations the Agency prescribes related to worker protection standards for hazardous waste operations that are contained in part 311 of title 40, Code of Federal Regulations.

(e) **TRAINING GRANTS.**—In consultation with the Secretaries of Transportation and Labor and the Administrator, the Director of the National Institute of Environmental Health Sciences may make grants to train hazmat employees under this section. A grant under this subsection shall be made to a nonprofit organization that demonstrates—

(1) expertise in conducting a training program for hazmat employees; and

(2) the ability to reach and involve in a training program a target population of hazmat employees.

(f) **RELATIONSHIP TO OTHER LAWS.**—(1) Chapter 35 of title 44 does not apply to an activity of the Secretary of Transportation under subsections (a)–(d) of this section.

(2) An action of the Secretary of Transportation under subsections (a)–(d) of this section and sections 5106, 5108(a)–(g)(1) and (h), and 5109 of this title is not an exercise, under section 4(b)(1) of the Occupational Safety and Health Act of 1970 (29 U.S.C. 653(b)(1)), of statutory authority to prescribe or enforce standards or regulations affecting occupational safety or health.

#### **§5108. Registration**

(a) **PERSONS REQUIRED TO FILE.**—(1) A person shall file a registration statement with the Secretary of Transportation under this subsection if the person is transporting or causing to be transported in commerce any of the following:

(A) a highway-route-controlled quantity of radioactive material.

(B) more than 25 kilograms of a class A or B explosive in a motor vehicle, rail car, or transport container.

(C) more than one liter in each package of a hazardous material the Secretary designates as extremely toxic by inhalation.

(D) hazardous material in a bulk package, container, or tank, as defined by the Secretary, if the package, container, or tank has a capacity of at least 3,500 gallons or more than 468 cubic feet.

(E) a shipment of at least 5,000 pounds of a class of hazardous material for which placarding of a vehicle, rail car, or freight container is required under regulations prescribed under this chapter.

(2) The Secretary of Transportation may require any of the following persons to file a registration statement with the Secretary under this subsection:

(A) a person transporting or causing to be transported hazardous material in commerce and not required to file a registration statement under paragraph (1) of this subsection.

(B) a person manufacturing, fabricating, marking, maintaining, reconditioning, repairing, or testing a package or container the person represents, marks, certifies, or sells for use in transporting in commerce hazardous material the Secretary designates.

(3) A person required to file a registration statement under this subsection may transport or cause to be transported, or manufacture, fabricate, mark, maintain, recondition, repair, or test a package or container for use in transporting, hazardous material, only if the person has a statement on file as required by this subsection.

(b) **FORM, CONTENTS, AND LIMITATION ON FILINGS.**—(1) A registration statement under subsection (a) of this section shall be in the form and contain information the Secretary of Transportation requires by regulation. The Secretary may use existing forms of the Department of Transportation and the Environmental Protection Agency to carry out this subsection. The statement shall include—

(A) the name and principal place of business of the registrant;

(B) a description of each activity the registrant carries out for which filing a statement under subsection (a) of this section is required; and

(C) each State in which the person carries out the activity.

(2) A person carrying out more than one activity for which filing is required only has to file one registration statement to comply with subsection (a) of this section.

(c) **FILING DEADLINES AND AMENDMENTS.**—(1) Each person required to file a registration statement under this subsection (a) of section must file the first statement not later than March 31, 1992. The Secretary of Transportation may extend that date to September 30, 1992, for activities referred to in subsection (a)(1) of this section. A person shall renew the statement periodically consistent with regulations the Sec-

retary prescribes, but not more than once each year and not less than once every 5 years.

(2) The Secretary of Transportation shall decide by regulation when and under what circumstances a registration statement must be amended and the procedures to follow in amending the statement.

(d) **SIMPLIFYING THE REGISTRATION PROCESS.**—The Secretary of Transportation may take necessary action to simplify the registration process under subsections (a)–(c) of this section and to minimize the number of applications, documents, and other information a person is required to file under this chapter and other laws of the United States.

(e) **COOPERATION WITH ADMINISTRATOR.**—The Administrator of the Environmental Protection Agency shall assist the Secretary of Transportation in carrying out subsections (a)–(g)(1) and (h) of this section by providing the Secretary with information the Secretary requests to carry out the objectives of subsections (a)–(g)(1) and (h).

(f) **AVAILABILITY OF STATEMENTS.**—The Secretary of Transportation shall make a registration statement filed under subsection (a) of this section available for inspection by any person for a fee the Secretary establishes. However, this subsection does not require the release of information described in section 552(f) of title 5 or otherwise protected by law from disclosure to the public.

(g) **FEEES.**—(1) The Secretary of Transportation may establish, impose, and collect from a person required to file a registration statement under subsection (a) of this section a fee necessary to pay for the costs of the Secretary in processing the statement.

(2)(A) In addition to a fee established under paragraph (1) of this subsection, not later than September 30, 1992, the Secretary of Transportation shall establish and impose by regulation and collect an annual fee. Subject to subparagraph (B) of this paragraph, the fee shall be at least \$250 but not more than \$5,000 from each person required to file a registration statement under this section. The Secretary shall determine the amount of the fee under this paragraph on at least one of the following:

(i) gross revenue from transporting hazardous material.

(ii) the type of hazardous material transported or caused to be transported.

(iii) the amount of hazardous material transported or caused to be transported.

(iv) the number of shipments of hazardous material.

(v) the number of activities that the person carries out for which filing a registration statement is required under this section.

(vi) the threat to property, individuals, and the environment from an accident or incident involving the hazardous material transported or caused to be transported.

(vii) the percentage of gross revenue derived from transporting hazardous material.

(viii) the amount to be made available to carry out sections 5107(e), 5108(g)(2), 5115, and 5116 of this title.

(ix) other factors the Secretary considers appropriate.

(B) The Secretary of Transportation shall adjust the amount being collected under this paragraph to reflect any unexpended balance in the account established under section 5116(i) of this title. However, the Secretary is not required to refund any fee collected under this paragraph.

(C) The Secretary of Transportation shall transfer to the Secretary of the Treasury amounts the Secretary of Transportation collects under this paragraph for deposit in the account the Secretary of the Treasury establishes under section 5116(i) of this title.

(h) **MAINTAINING PROOF OF FILING AND PAYMENT OF FEES.**—The Secretary of Transpor-

ation may prescribe regulations requiring a person required to file a registration statement under subsection (a) of this section to maintain proof of the filing and payment of fees imposed under subsection (g) of this section.

(i) **RELATIONSHIP TO OTHER LAWS.**—(1) Chapter 35 of title 44 does not apply to an activity of the Secretary of Transportation under subsections (a)–(g)(1) and (h) of this section.

(2)(A) This section does not apply to an employee of a hazmat employer.

(B) Subsections (a)–(h) of this section do not apply to a department, agency, or instrumentality of the United States Government, an authority of a State or political subdivision of a State, or an employee of a department, agency, instrumentality, or authority carrying out official duties.

#### **§5109. Motor carrier safety permits**

(a) **REQUIREMENT.**—A motor carrier may transport or cause to be transported by motor vehicle in commerce hazardous material only if the carrier holds a safety permit the Secretary of Transportation issues under this section authorizing the transportation and keeps a copy of the permit, or other proof of its existence, in the vehicle. The Secretary shall issue a permit if the Secretary finds the carrier is fit, willing, and able—

(1) to provide the transportation to be authorized by the permit;

(2) to comply with this chapter and regulations the Secretary prescribes to carry out this chapter; and

(3) to comply with applicable United States motor carrier safety laws and regulations and applicable minimum financial responsibility laws and regulations.

(b) **APPLICABLE TRANSPORTATION.**—The Secretary shall prescribe by regulation the hazardous material and amounts of hazardous material to which this section applies. However, this section shall apply to at least all transportation by a motor carrier of—

(1) a class A or B explosive;

(2) liquefied natural gas;

(3) hazardous material the Secretary designates as extremely toxic by inhalation; and

(4) a highway-route-controlled quantity of radioactive material, as defined by the Secretary.

(c) **APPLICATIONS.**—A motor carrier shall file an application with the Secretary for a safety permit to provide transportation under this section. The Secretary may approve any part of the application or deny the application. The application shall be under oath and contain information the Secretary requires by regulation.

(d) **AMENDMENTS, SUSPENSIONS, AND REVOCATIONS.**—(1) After notice and an opportunity for a hearing, the Secretary may amend, suspend, or revoke a safety permit, as provided by procedures prescribed under subsection (e) of this section, when the Secretary decides the motor carrier is not complying with a requirement of this chapter, a regulation prescribed under this chapter, or an applicable United States motor carrier safety law or regulation or minimum financial responsibility law or regulation.
