There are many reasons why ETBE should become a mainstream player in the oxygenated fuels business. First, its chemical properties overcome the principal objections that are often heard about splash-blended ethanol. Specifically, ETBE has a remarkably low vapor pressure—4 lbs. per square inch—and will help refiners meet Federal volatility standards. Second, ETBE, either straight or preblended, is fully pipeline fungible, whereas ethanol and ethanol blends usually need to be shipped in segregated storage.

ETBE will also give refiners a choice of feedstocks when making ethers. The choice will be made based on the relative availability, price, and/or performance of ethanol and methanol as a feedstock. This competition will be good for consumers.

In summary, I look forward to working with either President Bush or President Clinton to implement the commitments President Bush made last week. From a tax standpoint, this bill is what we need to do, and I intend to re-introduce it as soon as the 103d Congress convenes.

I ask unanimous consent that the full text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3379

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

**SECTION 1. ALCOHOL FUELS CREDIT MAY OFFSET MINIMUM TAX.**

(a) IN GENERAL.—Subsection (c) of section 38 of the Internal Revenue Code of 1986 (relating to limitation based on amount of tax) is amended by adding at the end the following new paragraph:

“(3) ALCOHOL FUELS CREDIT MAY OFFSET MINIMUM TAX.—

“(A) IN GENERAL.—The amount determined under paragraph (1)(A) shall be reduced by the lesser of—

“(i) the portion of the alcohol fuels credit determined under section 40(a) not used against the normal limitation, or

“(ii) 50 percent of the taxpayer's tentative minimum tax for the taxable year.

“(B) PORTION OF THE ALCOHOL FUELS CREDIT NOT USED AGAINST NORMAL LIMITATION.—For purposes of subparagraph (A), the portion of the alcohol fuels credit determined under section 40(a) not used against the normal limitation is the excess (if any) of—

“(i) the portion of the credit under subsection (a) which is attributable to such alcohol fuels credit, over

“(ii) the limitation of paragraph (1) (without regard to this paragraph), reduced by the

portion of the credit under subsection (a) which is not so attributable.”

(b) EFFECTIVE DATE.—

(1) IN GENERAL.—The amendment made by this section shall apply to taxable years beginning after September 30, 1992.

(2) EXCEPTION.—The amendment made by this section shall not apply to—

(A) any credit which was determined in a taxable year, or

(B) the portion of any credit which is carried back to a taxable year,

beginning on or before September 30, 1992.

**SEC. 2. TAX CREDIT FOR BIODIESEL FUELS.**

(a) IN GENERAL.—Section 40 of the Internal Revenue Code of 1986 (relating to credit for alcohol used as a fuel) is amended by adding at the end the following new subsection:

“(1) SPECIAL RULES FOR BIODIESEL.—

“(1) IN GENERAL.—In the case of a bio-additive used to produce diesel fuel (as defined in section 4092(a))—

“(A) the bio-additive shall be treated in the same manner as alcohol for purposes of this section, and

“(B) subsection (h) shall apply in computing the amount of any credit under this section with respect to the bio-additive.

“(2) BIO-ADDITIVE.—For purposes of this subsection, the term ‘bio-additive’ mean any liquid which is derived from biological sources, including vegetable oils and animal fats (or their esters, fatty acids, or other derivatives).”

(b) EFFECTIVE DATE.—The amendment made by this section shall apply to bio-additives produced, and sold or used, in taxable years beginning after December 31, 1992.

**SEC. 3. REPEAL OF ALCOHOL FUEL CREDIT INCOME INCLUSION FOR BIO-ADDITIVES AND CERTAIN ETHANOLS.**

(a) IN GENERAL.—Section 87 of the Internal Revenue Code of 1986 (relating to inclusion in income of the alcohol fuels credit) is amended by adding at the end the following new subsection:

“(b) EXCEPTION FOR BIO-ADDITIVES AND CERTAIN ETHANOL-BASED ETHERS.—Subsection (a) shall not apply to any portion of the alcohol fuel credit determined for the taxable year under section 40(a) which is attributable to—

“(1) a bio-additive (as defined in section 40(i)(2)), or

“(2) ethanol which is used to produce ethyl tertiary butyl ether or any other ether derived from ethanol in a chemical reaction in which there is no significant loss in the energy content of the ethanol.”

(b) CONFORMING AMENDMENT.—Section 87 of such Code is amended by striking “Gross” and inserting:

“(a) IN GENERAL.—Gross”.

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1992.●

By Mr. DASCHLE:

S. 3380. A bill to amend title 10, United States Code, to remove a restriction on the requirement for the Secretary of the Air Force to dispose of real property at deactivated intercontinental ballistic missile facilities to adjacent landowners; to the Committee on Armed Services.

**DISPOSITION OF REAL PROPERTY AT MISSILE SITES**

● Mr. DASCHLE. Mr. President, the Air Force is in the process of deactivating the Minuteman II [MMII] missile system at Ellsworth Air Force Base in

South Dakota to meet the requirements of the Strategic Arms Reduction Treaty recently ratified by the Senate. The MMII missile system at Ellsworth includes 150 launch facilities [LF's] and 15 launch control facilities [LCF's] located in western South Dakota. The deactivation period is expected to take approximately 3½ to 4½ years, and Air Force officials anticipate that property at the LF's and LCF's will be available for disposal in the next 3 to 5 years.

Although some of the deactivated LF's and LCF's may be retained by the Air Force for follow-on requirements, it is expected that the Air Force will dispose of most of the property at the sites through sales to surrounding landowners. Many of these landowners are the previous landowners or descendants of previous landowners who were forced to sell their land to the Air Force nearly 30 years ago.

Surrounding landowners will have the first option to reacquire the property at LF's and LCF's if the sites meet the criteria of title 10, United States Code, section 9781. Section 9781 gives surrounding landowners the first option to reacquire the property at the missile sites if, first, the surrounding landowners pay fair market value as established by Government appraisal; second, the surrounding landowners pay the cost of a land survey, if required; and finally, the land was acquired from one ownership and the fee land surrounding the site is still held in one ownership.

Most of the LF's and LCF's at Ellsworth meet this criteria, and Air Force officials have assured me that surrounding landowners will indeed have the first option to reacquire the property at these sites. However, it has been brought to my attention that several sites are surrounded by more than one landowner. As a result, these sites currently do not meet the criteria of section 9781, and the property would be subject to disposal by the General Services Administration [GSA], which would offer the property to other government agencies. If no government agency were interested in the property, it would be sold through a competitive bidding process.

Mr. President, I strongly believe that surrounding landowners should have the first option to reacquire property at all LF's and LCF's. Thirty years ago, the landowners of western South Dakota were forced to sell their land to the Air Force, and they did so for the defense of our country. They have sacrificed more than land during that time, and these surrounding landowners deserve the option of buying that land back before GSA offers it to other government agencies.

The bill I am introducing today would require the Air Force to dispose of all LF's and LCF's it does not retain for follow-on requirements and to give surrounding landowners the option to

acquire property at these sites before it is routed through GSA. I look forward to working during the next session of Congress with my colleagues on this and other related efforts to protect the rights of the landowners in western South Dakota affected by the Minuteman II missile system.●

By Mr. PACKWOOD (for himself and Mr. DOLE):

S. 3881. A bill to amend the Internal Revenue Code of 1986 to provide that certain disabled taxpayers may compute their medical expense deduction without regard to income from the forced sale of assets to pay medical bills; to the Committee on Finance.

MEDICAL DEDUCTION FOR CERTAIN DISABLED TAXPAYERS

Mr. PACKWOOD. Mr. President, today I am introducing legislation, along with Senator DOLE, to prevent individuals who are permanently and totally disabled from being unfairly penalized when they sell real estate to pay for devastating medical expenses.

Unfortunately, when the real estate is sold, the gain from the sale reduces the amount of medical expenses that can be deducted. That is because the Tax Code only allows a deduction for medical expenses in excess of 7.5 percent of someone's adjusted gross income [AGI], and real estate gains are included in AGI.

Permanently and totally disabled individuals often have large medical expenses each year, which drain their savings and eventually force them sell off assets that they own. Many times, someone's life savings is invested in one or two assets, usually a home or another parcel of real estate.

This problem was raised with me during the recent House-Senate conference on the urban aid tax bill (H.R. 11), and Senator DOLE and I sought to provide relief for disabled individuals with large medical bills. I regret that our proposal did not get included in the bill because it was a "late starter." Thus, we are introducing this legislation today so that the proposal may be considered in the future.

Our bill gives a permanently and totally disabled individual relief from the 7.5 percent limitation on medical expenses for up to \$250,000 of real estate gains. The person's medical expenses must be more than 25 percent of his or her income, without regard to the real estate gain, and this relief will only apply once every 5 years.

Once again, I hope we can consider this issue quickly next year and provide much needed relief to disabled individuals, effective for tax year 1992.

By Mr. HOLLINGS:

S. 3382. A bill to amend the Stevenson-Wylder Technology Innovation Act of 1980 in order to provide expanded assistance to industry efforts to develop critical civilian technologies and to

improve the economic competitiveness of the United States, and for other purposes; to the Committee on Commerce, Science, and Transportation.

CIVILIAN TECHNOLOGY ACT

Mr. HOLLINGS. Mr. President, I am pleased today to introduce the Civilian Technology Act of 1992, a bill to establish an independent government Civilian Technology Corporation [CTC] to support the efforts of American industry in the development of key technologies of the future. The idea for a CTC comes from a distinguished bipartisan panel of experts from the National Academies of Engineering and Sciences, chaired by Dr. Harold Brown, the former president of the California Institute of Technology and former Secretary of Defense. The creation of a CTC is a concept worth pursuing as another step in our efforts to enhance U.S. technology competitiveness.

THE NEED FOR A STRONGER NATIONAL TECHNOLOGY POLICY

Mr. President, my colleagues know that I have long supported a stronger national civilian technology policy. The Nation's economic future and standard of living depend on whether we can develop, commercialize, and manufacture new technologies and products.

However, we are not doing as well as we should, despite the good efforts of our companies. A 1990 report by the Department of Commerce [DOC] found that, by the year 2000, worldwide sales of products based on 12 key emerging technologies may reach \$1 trillion per year. However, in the same report, DOC found that the United States is losing, or losing badly, relative to Japan and Europe in many of these 12 technologies. The United States is not benefiting from the economic well-being and jobs that can result from these new technologies. At a time when other governments help their companies develop risky but potentially very valuable new technologies, the U.S. Government continues to neglect investment in civilian research and development [R&D] and new civilian technologies.

Just last month the National Science Board [NSB], the official board of directors for the National Science Foundation, issued a major report supporting this conclusion. Entitled "The Competitive Strength of U.S. Industrial Science and Technology: Strategic Issues," the NSB report concludes:

Many observers have commented that the competitive strength of U.S. industrial science and technology is declining. U.S. industry already has lost its leadership in several technologies that are critical to industrial performance, and it is weak or losing competitive strength in others. During the mid-1980s, U.S. investment in R&D increased at a sluggish pace, and the Nation's non-defense R&D expenditures did not increase as rapidly as those of many major foreign competitors. The Nation also has experienced relatively slow-paced product development

and commercialization, since the results of U.S. R&D are not brought to market as effectively as those of foreign competitors. Compared to other countries, a high fraction of U.S. government expenditures go to defense, rather than commercial R&D \* \* \*.

[Our] findings lead to significant apprehension about the present trajectory of U.S. industrial R&D and to the conclusion that stronger Federal leadership is needed in setting the course of U.S. technological competitiveness. Implementation of a national technology policy, including establishment of a rationale and guidelines for Federal action, should receive the highest priority.

Clearly more must be done to direct Federal efforts toward strengthening U.S. technology competitiveness.

REPORT OF THE PANEL ON THE GOVERNMENT ROLE IN CIVILIAN TECHNOLOGY

Mr. President, as part of the 1988 Omnibus Trade and Competitiveness Act, I authored a provision establishing a true civilian technology agency, DOC's National Institute of Standards and Technology [NIST]. Knowing that debate should and would continue over U.S. civilian technology policy, I also authored a provision in the 1988 law asking the National Academies of Engineering and Sciences for a review of industry-government cooperation in civilian research and technology transfer. I wanted to know why U.S. industry-government cooperation in areas such as agriculture and aeronautics had worked so well, while other efforts had been less successful. In particular, I wanted to know what lessons could be drawn from the history of U.S. technology programs, as well as to have the benefit of the National Academies' recommendations regarding ways to improve the effectiveness and efficiency of cooperative arrangements.

In response to this provision, Dr. Robert White, president of the National Academy of Engineering, and others at the National Academies formed the Brown committee, formally called the Panel on the Government Role in Civilian Technology. The panel included distinguished experts, both Republicans and Democrats, from industry, academia, and labor. Several on the panel had served previously in senior government positions. I believe that Dr. Brown and his colleagues have done an excellent job in answering the questions that we asked, and I thank them for their valuable March 1992 report, "The Government Role in Civilian Technology: Building a New Alliance."

In that report, the panel first reviewed existing Federal research and technology policies. Dr. Brown and his colleagues reached this conclusion:

Although the nation's technological performance, relative to its past, is strong, this does not mean that U.S. policy should continue unaltered. The technological competence of our trading partners continues to increase. We need a better balance in technology policy, one that includes support not only for basic research but also for pre-commercial R&D. Moreover, the ability of U.S.

companies to adopt new technologies, an important part of economic growth, is weak. As in pre-commercial R&D, market failure is evident in this stage of the technology development process. The federal government should act to address this deficiency.

The most important reason for a new technology policy, one that builds on our comparative strength in research and innovation, centers on productivity. Long-term productivity growth rates remain lower for this country than for our foreign competitors. The United States needs to improve its performance in all areas that promote productivity growth. Investment in civilian technology to achieve higher rates of technology commercialization and adoption is one part of the solution. We should move quickly to achieve this goal.

The report clearly concludes that pre-commercial R&D must be increased and that investment in civilian technology must be enhanced to ensure that U.S. technology competitiveness is promoted.

Second, the panel listed the guidelines that it believed make industry-government research ventures effective. The report listed six such guidelines: First, include cost-sharing provisions, so that industry helps to pay for research projects; second, have the private companies initiate and design the research ventures; third, insulate the ventures as much as possible from political concerns; fourth include a diversified set of R&D objectives; fifth, ensure that proposed projects undergo rigorous project evaluation and review; and sixth be open to foreign firms which substantially contribute to the U.S. economy.

Finally, the panel recommended two steps to strengthen government technology programs. "The first step in building a new alliance between government and industry in civilian technology is action to strengthen federal programs that facilitate private sector research and development, and the transfer or adoption of technology." The panel specifically recommended the following: First, reaffirming the role of the Defense Advanced Research Projects Agency [DARPA] in dual-use technology development; second, selecting a small number of the 700 Federal laboratories to work with private firms; third, expanding the scope of selected mission agency R&D programs to include pre-commercial projects; fourth, increasing funding for the Small Business Innovation Research Program; fifth, evaluating NIST's promising new Advanced Technology Program; and sixth, creating a new DOC Industrial Extension Service to speed technology adoption by U.S. industry.

The panel next recommended the creation of a new government entity, the CTC.

A new technology strategy for the post-Cold War era must include more than revisions in current federal programs . . . The most appropriate way to promote any substantial federal investment in pre-commercial

R&D is through creation of a Civilian Technology Corporation (CTC). The goal of a CTC would be to increase the rate at which products and processes are commercialized in the United States. This objective can be met by stimulating investment in the pre-commercial stage of technology development with high social rates of return, where firms cannot appropriate sufficient benefits of R&D work. Higher levels of investment at this stage of the innovation process will, over the long term, translate into stronger U.S. performance in technology commercialization.

The CTC would be a quasi-governmental organization, funded through a one-time, \$5 billion congressional appropriation. A board of directors, appointed by the President and subject to Senate confirmation, would manage the Corporation. The performance and operation of the CTC would undergo an independent, thorough review after the fourth and tenth years of operation.

Based on the panel's report, and in close consultation with Dr. Brown, I have drafted the Civilian Technology Act of 1992—a bill to create the CTC.

#### THE CIVILIAN TECHNOLOGY ACT

The bill I am introducing today would create the CTC as a government corporation, under a board of directors appointed by the President and subject to Senate confirmation. The CTC would be able to assist industry in four main ways.

Matching grants to industry. These funds would help companies to develop promising new technologies.

Loans, loan guarantees, and equity investments. This section includes provisions to ensure that the government is protected against losses while funding efforts to promote new technologies.

A Critical Technology Investment Company Program, based on a proven, existing model, the Small Business Administration's [SBA] Small Business Investment Company [SBIC] Programs. Under this approach, the CTC would support private venture capital firms that in turn would invest in companies. The CTC effort would complement the SBA program, for, while SBICs support many different kinds of businesses, the CTC program would invest only in technology companies.

Matching grants to State organizations. These funds would help them to support technology development.

The panel has recommended a one-time appropriation of \$5 billion to fund the CTC. By introducing this bill, I hope to spur discussion as to what amount of funding is appropriate for Government support of industry-led technology. Clearly, we cannot afford to add \$5 billion to the Nation's already oversized Federal deficit. Instead, we must shift funds within the Government's existing \$70 billion annual R&D budget, which includes the \$40 billion per year we now spend on defense R&D. I look forward to continued discussion on this important issue of resource allocation.

#### NEXT STEPS

Mr. President, I remain a strong supporter of NIST and its programs, and I

continue to believe that, with expanded resources, NIST and its parent organization, DOC's technology administration, can serve as a full-fledged civilian technology agency. I also believe that the panel's report focuses on other initiatives that can be pursued to promote the development of U.S. civilian technology. The report deserves careful consideration, both for its recommendation of an independent corporation and for its views on the larger question of how the Government can best support industry's technology efforts.

Given the importance of this report and its recommendations on the future of U.S. technology competitiveness, I am introducing this CTC bill today. I will seek comments on the bill from a wide range of parties, and I will continue the dialog next Congress on this legislation, and other technology policy and financing proposals worthy of consideration.

Mr. President, Americans must strengthen the role of Government in supporting industrial technology and must build a broad consensus on policies and programs; our economic future depends on these efforts. Dr. Brown and his colleagues have performed a major service by presenting their report and recommendations, and I look forward to continuing to work with them, Dr. White, and our colleagues to make our national economy stronger and more prosperous.

I ask unanimous consent that both a list of the panel's members and the text of the bill be printed in the RECORD at the conclusion of my statement.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 3382

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

#### SECTION 1. SHORT TITLE.

This Act may be cited as the "Civilian Technology Act of 1992".

#### SEC. 2. FINDINGS AND PURPOSE.

(a) FINDINGS. Congress finds and declares the following:

(1) The rapid development and commercialization of advanced civilian technologies, including both product and process technologies, are vital to the Nation's long-term standard of living, quality of jobs, economic competitiveness, and well-being.

(2) The United States excels in scientific research and new inventions, but often lags behind foreign competitors in its ability to turn research results and inventions rapidly into successful commercial products and to reap the jobs and national wealth that such commercialization brings.

(3) The reasons for this lag include—  
(A) the natural tendency of firms to underinvest in the development of promising but initially risky new technologies, on the grounds that an individual firm may not be able to capture all of the benefits of its investment in such technologies;

(B) the frequent unavailability in the United States of long-term capital to help inno-

vative firms fund the development and commercialization of complex new technologies; and

(C) the direct and indirect support companies in other industrialized countries receive when their governments target and support the development of key technologies and industries.

(4) While tax incentives aid those established firms which generate revenues, these incentives give less help to innovative new firms which create new products and jobs but often lack initial revenues. Tax incentives also lack an ability to focus on the technologies which the National Critical Technologies Panel identifies as most important to the Nation's future.

(5) The Federal Government spends over \$70 billion annually on research and development, but to date less than 1 percent of that funding is used with the primary purpose of assisting general industry to improve its technology and competitiveness.

(6) The Nation would benefit from expanded Federal support for industry-led efforts to speed the development and commercialization of critical civilian technologies.

(7) Any such expanded Federal support should follow guidelines which have ensured successful industry-government research collaboration in the past. Such guidelines include responding to industry's proposals rather than having government choose specific projects; requiring industry to share costs; supporting a wide portfolio of projects and avoiding too much focus on one or two areas; and taking steps to ensure that projects which receive government assistance are selected on the basis of technical and business merit and through rigorous project evaluations and review.

(b) PURPOSE.—In order to promote the rapid development and commercialization of new technologies vital to the Nation's long-term standard of living, economic competitiveness, and well-being, it is the purpose of Congress in this Act to establish an independent Civilian Technology Corporation, associated with the Department of Commerce, to assist industry-led technology projects.

### SEC. 3. AMENDMENT TO THE STEVENSON-WYDLER TECHNOLOGY INNOVATION ACT.

The Stevenson-Wylder Technology Innovation Act of 1980 (15 U.S.C. 3701 et seq.) is amended by adding at the end the following new title:

#### "TITLE III—ASSISTANCE TO INDUSTRY-LED CIVILIAN TECHNOLOGY DEVELOPMENT ACTIVITIES

##### "SEC. 301. STATEMENT OF POLICY AND PURPOSE.

"(a) STATEMENT OF POLICY.—Just as the Federal Government has a responsibility to support basic research in science and engineering that will greatly benefit the Nation over the long term, the Federal Government also has a responsibility to participate with the private sector in the development and commercialization of critical civilian technologies which have the potential to contribute to a broad range of commercial and government applications. In many cases these technologies have evolved from Government-funded basic research, but technical uncertainties are not sufficiently overcome to permit full development and commercialization.

"(b) PURPOSE.—It is the purpose of this title to establish an independent corporation, with appropriate support from the Department of Commerce, in order to provide financial and other assistance to industry-led projects to accelerate the development and commercialization of critical civilian technologies.

##### "SEC. 302. DEFINITIONS.

"As used in this title, the term—

"(1) 'Articles' means—

"(A) articles of incorporation for an incorporated company; and

"(B) the functional equivalent of such articles of incorporation, or similar documents specified by the Corporation, for a company that is not incorporated.

"(2) 'Board' means the Board of Directors of the Corporation.

"(3) 'Chairman' means the Chairman of the Board.

"(4) 'Conditional interest-free loan' means an interest-free loan which the Corporation makes to a joint venture or individual firm for the purpose of technology development or commercialization and which need not be repaid if, in the judgment of the Corporation, the project for which the loan is made does not generate revenues which equal or exceed the amount of the loan.

"(5) 'Corporation' means the Civilian Technology Corporation established by section 303.

"(6) 'Critical civilian technology' means a technology which has potential civilian commercial applications and which is either—

"(A) identified as a national critical technology pursuant to section 603 of the National Science and Technology Policy, Organization, and Priorities Act of 1976 (42 U.S.C. 6683); or

"(B) eligible for assistance under section 28 of the National Institute of Standards and Technology Act (15 U.S.C. 278n).

"(7) 'Critical technology investment company' means a venture capital company which—

"(A) provides financial assistance to qualified joint ventures and qualified individual firms for the purpose of assisting the development or commercialization of critical civilian technologies; and

"(B) is eligible to be licensed by the Corporation under section 308.

"(8) 'Joint venture' has the meaning given that term in section 28(j)(1) of the National Institute of Standards and Technology Act (15 U.S.C. 278n(j)(1)).

"(9) 'Licensee' means a critical technology investment company licensed under section 308.

"(10) 'Preferred securities' means preferred stock in a licensee, or a preferred limited partnership interest or other similar security (as defined by the Corporation by regulation) in a licensee, that is senior in priority for all purposes to all other non-Federal equity interests in a licensee.

"(11) 'Private equity capital' means the paid-in capital and paid-in surplus of a licensee organized as a corporation, or the partnership capital of a licensee organized as an unincorporated partnership, that is derived from non-Federal sources.

"(12) 'Qualified', as used with respect to a joint venture or individual firm, means a joint venture or individual firm whose principal business is research on, or the development or manufacture of, products that the Corporation after consultation with appropriate Federal agencies determines are a critical civilian technology.

"(13) 'University sponsored licensee' means a licensee in which a single university or consortium of universities has a majority ownership interest.

"(14) 'Venture capital' means consideration for such common stock, preferred stock, or other financing with subordination or non-amortization characteristics as the Corporation determines to be substantially similar to equity financing.

##### "SEC. 303. ESTABLISHMENT AND MISSION.

"(a) ESTABLISHMENT.—(1) There is established on the date of enactment of this title, as an independent instrumentality of the United States, the Civilian Technology Corporation. The office of the Corporation shall be located in the District of Columbia.

"(2) Upon the Corporation's request, the Secretary may provide office space, administrative and other services, technical assistance, and detailees to the Corporation.

"(b) MISSION.—(1) The Corporation shall, in accordance with this title, assist industry to develop and commercialize within the United States the new critical civilian technologies necessary for the Nation's long-term standard of living, economic competitiveness, and well-being. The Corporation shall encourage and assist industry-led technology development proposals, and shall ensure that costs in any project it assists are shared between industry and the Corporation.

"(2) When dealing with manufacturing technologies and other process technologies, the Corporation shall, to the maximum extent practicable, encourage and support the development, commercialization, and domestic production of technologies which—

"(A) will bring United States firms to world-class levels of productivity and quality; and

"(B) are skill-enhancing and safe.

"(c) TYPES OF ASSISTANCE.—Assistance from the Corporation under this title shall include—

"(1) critical civilian technology development awards to qualified joint ventures and qualified individual firms;

"(2) loan guarantees and loans (including conditional interest-free loans) made directly by the Corporation to qualified joint ventures and qualified individual firms, and equity investments, for the development or commercialization of critical civilian technologies;

"(3) financial support to critical technology investment companies for the purpose of helping those investment companies make venture capital investments in qualified joint ventures and qualified individual firms for the development or commercialization of critical civilian technologies; and

"(4) financial and other assistance to State governments and organizations chartered by State governments which assist qualified joint ventures and qualified individual firms in the States to accelerate the development and commercialization of new critical civilian technologies.

"(d) OTHER ASSISTANCE.—In addition to the types of assistance listed in subsection (c), the Corporation also may provide business information and advice to joint ventures and individual firms, including information on—

"(1) opportunities for firms to form mutually beneficial cooperative arrangements and business alliances; and

"(2) sources of financial assistance other than the Corporation.

"(e) CRITICAL CIVILIAN TECHNOLOGIES.—In making awards, loans, and loan guarantees, and specifying the activities of critical technology investment companies which receive assistance from the Corporation, the Corporation shall, as appropriate, support industry-led projects to develop and commercialize critical civilian technologies. The Corporation shall not support efforts unrelated to the development and commercialization of critical civilian technologies.

"(f) FUNDING DECISIONS.—The Corporation shall make its funding decisions by reviewing proposals through competitive, merit-based processes and the rigorous review and evaluation of those proposals.

**"SEC. 304. BOARD OF DIRECTORS.**

"(a) Composition of the Board.—The powers of the Corporation shall be vested in a Board of Directors consisting of five members, of whom—

"(1) three full-time members shall be appointed by the President, by and with the advice and consent of the Senate; and

"(2) two members, who shall serve as non-voting ex-officio members, shall be the Secretary (or in Secretary's absence, the Deputy Secretary of Commerce) and the Director of the Office of Science and Technology Policy.

"(b) BOARD MEMBERS APPOINTED BY THE PRESIDENT.—Of the three Board members appointed by the President, one shall be a representative of business, one shall be a representative of labor, and one shall be a representative of the general public. Each such member shall serve for a term of 7 years, but may continue in office after the expiration of his or her term until a successor has been appointed and confirmed. If an individual is appointed to fill a vacancy occurring prior to the expiration of the term of his or her predecessor, that individual shall serve only for the unexpired portion of the term of the predecessor. No more than two of the voting members appointed by the President shall be members of the same political party. Each member so appointed shall receive a salary at the rate provided for under section 5315 of title 5, United States Code, for level IV of the Executive Schedule.

"(c) APPOINTMENT OF CHAIRMAN.—The President shall appoint the Chairman of the Board from among the three voting members appointed by the President.

"(d) REMOVAL FROM OFFICE.—A member of the Board may be removed from office by the President only for neglect of duty or malfeasance in office.

"(e) MEETINGS; QUORUM; VOTING; BYLAWS.—The Board shall meet at any time pursuant to the call of the Chairman and as may be provided by the bylaws of the Corporation, but not less than quarterly. A majority of the Board shall constitute a quorum, and any action by the Board shall be effective by majority vote of all members of the Board. The Board shall adopt, and may from time to time amend, such bylaws as are necessary for the proper management and functioning of the Corporation.

"(f) OFFICERS AND EMPLOYEES.—(1) The Chairman shall be the chief executive officer of the Corporation, and shall be responsible for the management and direction of the Corporation.

"(2) The Board shall establish the offices of the Corporation and shall appoint and define the duties of the offices of the Corporation (including a General Counsel and a Chief Financial Officer).

"(3) The Chairman shall, without regard to the provisions of Civil Service laws applicable to officers and employees of the United States, appoint such employees as are necessary for the transaction of the Corporation's business, fix their compensation, define their duties, and provide a system of organization. The Chairman may discharge officers and employees. No officer or employee shall be appointed or dismissed by reason of his or her political affiliation.

"(g) CONFLICTS OF INTEREST.—No member of the Board, officer, attorney, agent, or employee of the Corporation shall participate, directly or indirectly, in the deliberation upon or in the determination of any question affecting his or her personal interests, or the interests of any corporation, partnership, or other business entity in which he or she is directly or indirectly interested.

**"SEC. 305. GENERAL POWERS OF THE CORPORATION.**

"The Corporation shall have the power—

"(1) to adopt, alter, and use a corporate seal;

"(2) to make contracts;

"(3) to sue and be sued, to complain and defend, in any court of competent jurisdiction, State or Federal;

"(4) to prescribe, amend, and repeal, by its Board, bylaws, rules, and regulations governing the manner in which its general business may be conducted and the powers granted to it by law may be exercised;

"(5) to make use of the United States mails in the same manner and upon the same conditions as the executive departments of the Federal Government;

"(6) to acquire and dispose of property;

"(7) to accept donations of services or property;

"(8) to determine the character and necessity of obligations and expenditures;

"(9) to retain and invest funds without fiscal year limitation;

"(10) to use the services of other Federal agencies on a reimbursable basis; and

"(11) to do all other acts and things which are necessary to the conduct of its business and the exercise of all the rights and powers granted to it.

**"SEC. 306. TECHNOLOGY DEVELOPMENT AWARDS.**

"(a) IN GENERAL.—The Corporation may, subject to the availability of appropriations, provide direct financial awards to qualified joint ventures and qualified individual firms within the United States for the purpose of supporting industry-led projects to develop critical civilian technologies. Such awards may be in the form of grants, cooperative agreements, or contracts.

"(b) REQUIREMENT. In making technology development awards under this section, the Corporation shall follow the statutory requirements which apply to the Department of Commerce's Advanced Technology Program, as set forth in section 28 of the National Institute of Standards and Technology Act (15 U.S.C. 278n).

"(c) COMMERCE DEPARTMENT.—The Corporation may, if it so wishes, contract with the Department of Commerce's Advanced Technology Program to manage, in whole or in part, the Corporation's technology development awards program.

**"SEC. 307. LOAN GUARANTEES, LOANS, AND EQUITY INVESTMENTS.**

"(a) IN GENERAL.—The Corporation is authorized, subject to the terms and conditions described in this section, to assist qualified joint ventures and qualified individual firms to develop and commercialize critical civilian technologies by—

"(1) providing loan guarantees;

"(2) providing direct loans (including conditional interest-free loans);

"(3) taking warrants and voting and non-voting equity in qualified joint ventures and qualified individual firms; and

"(4) providing combinations of the types of assistance listed in paragraphs (1), (2), and (3).

"(b) FINANCING.—(1) Amounts appropriated to the Corporation for the purpose of carrying out this section shall be placed in a Corporation revolving fund, and money for direct loans and equity investments shall come from that revolving fund. The Corporation shall ensure that the revolving fund, or Corporation investments made under section 312(c), maintain financial reserves adequate to cover the costs associated with direct loans and loan guarantees (as the term 'costs' is defined in section 502 of the Federal Credit Reform Act of 1990 (2 U.S.C. 661a)).

"(2) In addition to terms and conditions set under subsection (e), the Corporation may set such terms and conditions for loan guarantees, direct loans, and equity investments as it deems appropriate, including terms regarding interest rates, origination fees, collateral, royalties, and warrants. Repaid loans, as well as any interest, royalties, capital gains, warrant income, or proceeds from collateral received by the Corporation, shall be placed in the revolving fund.

"(3) Loan guarantees made by the Corporation shall be guaranteed both as to interest and to principal.

"(4) After the Corporation receives appropriations for the purpose of carrying out this section, the Board shall ensure that the Corporation's financial activities under this section are, over the long term, self-sustaining.

"(c) ELIGIBILITY.—A qualified joint venture or qualified individual firm may receive a loan guarantee, direct loan (including a conditional interest-free loan), or equity investment under this section only if, in the judgment of the Corporation, the joint venture or individual firm—

"(1) meets the requirements set forth in section 28(d)(9) of the National Institute of Standards and Technology Act (15 U.S.C. 278n(d)(9));

"(2) will use the loan or loan guarantee to speed the development and commercialization of one or more critical civilian technologies which offer substantial economic promise; and

"(3) presents a sound business plan for the development and commercialization of the technology or technologies.

"(d) LIMITS ON THE AMOUNT OF ASSISTANCE.—(1) The amount of assistance provided by the Corporation to a qualified joint venture or qualified individual firm under this section shall be based on an independent determination by the Corporation of the need of the joint venture or firm.

"(2) The aggregate amount of assistance given under this section to, or in connection with, any one joint venture or individual firm and its subsidiary and affiliated joint ventures or firms shall not exceed 50 percent of the cost of the technology project in question.

"(e) TERMS AND CONDITIONS FOR LOANS AND LOAN GUARANTEES.—(1) Each loan or loan guarantee made under this section may be made for a period not exceeding 10 years.

"(2)(A) Each direct loan shall be made at an interest rate equal to the Government borrowing rate plus an insurance surcharge of up to 2 percent.

"(B) Each loan to be guaranteed shall bear interest at a rate determined by the Corporation to be reasonable, taking into account the current average yield on outstanding obligations of the United States whose remaining periods to maturity are comparable to the maturity of such loan.

"(3) The Corporation may not guarantee a loan unless it determines that the terms, conditions, and security (if any), and the schedule and amount of repayments with respect to the loan, are sufficient to protect the financial interests of the Corporation and are otherwise reasonable.

"(4) The Corporation shall be entitled to recover from a joint venture or individual firm for a loan guarantee under this section the amount of any payment made by the Corporation pursuant to such guarantee upon the failure of the joint venture or firm to pay when due the principal of and interest on the loan with respect to which the guarantee was made, unless the Corporation for good cause waives the right of recovery. The

Corporation shall be subrogated to all of the rights under such loan of the person who received such guarantee payment.

"(5) Any loan guarantee by the Corporation under this title shall be incontestable—  
 "(A) in the hands of a joint venture or individual firm on whose behalf such guarantee is made unless the joint venture or firm engaged in fraud or misrepresentation in securing such guarantee; and

"(B) as to any person (or that person's successor in interest) who engaged in fraud or misrepresentation in making or contracting to make such loan.

"(6) The Corporation may guarantee short-term obligations incurred for the purpose of obtaining temporary funds with a view to refinancing from time to time so long as the entire term does not exceed that specified under paragraph (1) and the borrower continues to be eligible for assistance.

"(f) EXAMINATION OF APPLICANTS.—Every applicant for a loan or loan guarantee by the Corporation under this section shall, as a condition precedent thereto, consent to such examinations as the Corporation may require for the purposes of this section and agree that upon request, reports of examinations by constituted authorities may be furnished by such authorities to the Corporation.

**"SEC. 308. ASSISTANCE TO CRITICAL TECHNOLOGY INVESTMENT COMPANIES.**

"(a) IN GENERAL.—(1) The Corporation is authorized to provide financial assistance to critical technology investment companies licensed under this section, for the purpose of stimulating and expanding the flow of private capital to qualified joint ventures and qualified individual firms in order to help them finance the development and commercialization of critical civilian technologies.

"(2) Each critical technology investment company licensed under this section may provide venture capital to qualified joint ventures and qualified individual firms, in such manner and under such terms as the licensee may fix in accordance with the regulations of the Corporation. Venture capital provided to incorporated qualified joint ventures and individual firms may be provided directly or in cooperation with other investors, incorporated or unincorporated, through agreements to participate on an immediate basis.

"(3) Each licensee may make loans, directly or in cooperation with other lenders, incorporated or unincorporated, through agreements to participate on an immediate or deferred basis, to qualified joint ventures and qualified individual firms to provide such ventures and firms with funds needed for sound financing related to development or utilization of critical civilian technologies.

"(4) This section shall be carried out in a manner that will ensure the maximum participation of private financial sources and ensure prudent diversification and sound management of operations.

"(b) REQUIREMENTS AND AUTHORITIES.—Except as provided in subsections (c) and (d) of this section, the Corporation shall, in providing financial assistance to licensees under the provisions of this section, follow the statutory requirements and use the statutory authorities which apply to the Small Business Administration's Small Business Investment Program, as set forth in subchapter 14B of title 15, United States Code (15 U.S.C. 681 et seq.). Any amendments to subchapter 14B enacted after the date of enactment of this title shall not apply to this section unless explicitly provided for in statute.

"(c) ADDITIONAL AUTHORITIES.—In addition to the authorities provided to the Corporation under subsection (b) of this section, the Corporation is authorized to—

"(1) purchase nonparticipating preferred securities from licensed critical technology investment companies as one way to provide financial assistance to those companies;

"(2) issue trust certificates representing ownership of all or a fractional part of preferred securities issued by licensees and guaranteed by the Corporation under this section, with such trust certificates based on and backed by a trust or pool approved by the Corporation and composed of preferred securities and such other contractual obligations as the Corporation may undertake to facilitate the sale of such trust certificates;

"(3) guarantee, upon such terms and conditions as are deemed appropriate, the timely payment of the principal of and interest on trust certificates issued by the Corporation or his agent for purposes of this section, provided that such guarantee shall be limited to the extent of the redemption price of and dividends on the preferred securities, plus any related contractual obligations, which compose the trust or pool; and

"(4) issue its own rules and regulations concerning how it will carry out this section under the applicable requirements and authorities.

"(d) OTHER PROVISIONS.—(1) Amounts received by the Corporation from the payment of dividends and the redemption of preferred securities pursuant to this section, and fees paid to the United States by a licensee pursuant to this section, shall be deposited in an account established by the Corporation and shall be available solely for carrying out this section, to the extent provided in advance in appropriations Acts.

"(2) Nothing in this section or in any other provision of law imposes any liability on the United States or the Corporation with respect to any obligations entered into, or stocks issued, or commitments made by any licensee operating under this section.

**"SEC. 309. ASSISTANCE TO STATE TECHNOLOGY DEVELOPMENT PROGRAMS.**

"(a) IN GENERAL.—The corporation may provide financial, technical, and business assistance to programs run by or chartered by State governments for the purpose of accelerating the development and commercialization of critical civilian technologies, including technologies developed by universities and colleges within the States. Such State technology development programs may—

"(1) directly fund critical civilian technology development projects at qualified joint ventures and qualified individual firms; and

"(2) when appropriate, assist intermediary organizations, including universities, to develop new critical civilian technologies to the point where qualified joint ventures and qualified individual firms will invest in their further development and commercialization.

"(b) FINANCIAL ASSISTANCE.—(1) The Corporation may make awards for up to 3 years to any State technology development program which meets the eligibility requirements of paragraph (2). State programs which win awards may reapply if they still meet eligibility requirements. Any financial assistance from the Corporation to State technology development programs shall be made only through a competitive, merit-reviewed process.

"(2) A State technology development program must meet the following requirements before it shall be eligible to apply for and receive financial assistance under this section:

"(A) at least one-third of the cost of the proposal to which such assistance applies must be provided by such State program; and

"(B) the State program must demonstrate that any technology or intellectual property developed under the program shall be made available only to joint ventures and individual firms which legally commit to manufacture substantially in the United States any products resulting from any project funded in whole or in part by Federal funds provided under this section.

**"SEC. 310. CRIMINAL PROVISIONS.**

"(a) WILLFUL MISREPRESENTATIONS TO THE CORPORATION.—Whoever makes any statement knowing it to be false, or whoever willfully overvalues any security, for the purpose of obtaining for any person any loan, or extension thereof by renewal, deferment of action, or otherwise, or the acceptance, release, or substitution of security therefor, or for the purpose of influencing in any way the action of the Corporation, or for the purpose of obtaining money, property, or anything of value, under this title, shall be punished by a fine under title 18, United States Code, or by imprisonment of not more than 5 years, or both.

"(b) COUNTERFEITING AND OTHER MISHANDLING OF OBLIGATIONS.—Whoever—

"(1) falsely makes, forges, or counterfeits any obligation or coupon in limitation of or purporting to be an obligation or coupon issued by the Corporation;

"(2) passes, utters, or publishes, or attempts to pass, utter, or publish, any false, forged, or counterfeited obligation or coupon purporting to have been issued by the Corporation, knowing the same to be false, forged, or counterfeited;

"(3) falsely alters any obligation or coupon issued or purporting to have been issued by the Corporation;

"(4) passes, utters, or publishes, or attempts to pass, utter, or publish, as true any falsely altered or spurious obligation or coupon issued or purporting to have been issued by the Corporation, knowing the same to be falsely altered or spurious; or

"(5) willfully violates any other provision of this title, shall be punished by a fine under title 18, United States Code, or by imprisonment for not more than 5 years, or both.

"(c) DEFAUDING THE CORPORATION, ITS AUDITORS, OR THE PUBLIC.—Whoever, being connected in any capacity with the Corporation—

"(1) embezzles, abstracts, purloins, or willfully misapplies any moneys, funds, securities, or other things of value, whether belonging to the Corporation or pledged or otherwise entrusted to it;

"(2) with intent to defraud the Corporation or any other body politic or corporate, or any individual, or to deceive any officer, auditor, or examiner of the Corporation, makes any false entry in any book, report, or statement of or to the Corporation, or, without being duly authorized, draws any order or issues, puts forth, or assigns any obligation, or draft, bill of exchange, mortgage, judgment, or decree thereof;

"(3) with intent to defraud, participates, shares, or receives directly or indirectly any money, profit, property, or benefit through any transaction, loan, commission, contract, or any other act of the Corporation; or

"(4) gives any unauthorized information concerning any future action or plan of the Corporation which might affect the value of securities, or, having such knowledge, invests or speculates, directly or indirectly, in the securities or property of any joint ven-

ture or individual firm receiving loans or other assistance from the Corporation, shall be punished by a fine under title 18, United States Code, or by imprisonment of not more than 5 years, or both.

"(d) USE OF WORDS 'CIVILIAN TECHNOLOGY CORPORATION' BY OTHERS.—No individual, association, partnership, corporation, or other person shall use the words 'Civilian Technology Corporation' or a combination of those three words, as the name or a part thereof under which such individual, association, partnership, corporation, or other person does business. Every individual, association, partnership, corporation, and other person violating this prohibition shall be guilty of a misdemeanor and shall be punished by a fine under title 18, United States Code, imprisonment of not more than 1 year, or both.

"(e) INVESTIGATIONS.—The Corporation may make such investigations as the Corporation deems necessary to determine whether a technology development award recipient, a loan guarantee recipient, a licensee, or any other person has engaged or is about to engage in any acts or practices which constitute or will constitute a violation of this title, or of any regulation under this title or any order issued under this title.

**"SEC. 311. ADMINISTRATIVE PROVISIONS.**

"(a) REGULATIONS.—The Corporation may issue such regulations as it deems necessary or appropriate to carry out the purposes and provisions of this title.

"(b) INTERACTIONS WITH INDUSTRY, LABOR, AND OTHERS.—The Federal Advisory Committee Act (5 App. U.S.C.) shall not apply to the Corporation or its operations or its interactions with industry, labor, and others.

"(c) RELATIONS WITH DEPARTMENT OF COMMERCE.—The Corporation may request such advice, information, and assistance from the Department of Commerce as the Corporation deems appropriate, and the Secretary is authorized to provide such advice, information, and assistance.

"(d) ANTITRUST SAVINGS CLAUSE.—This title shall not be construed to modify, impair, or supersede the operation of the antitrust laws. For purposes of this section, the term 'antitrust laws' has the meaning given the term 'antitrust Acts' in section 4 of the Federal Trade Commission Act (15 U.S.C. 44).

"(e) CONFLICTS OF INTEREST.—The Corporation shall be an agency for purposes of title 18, United States Code, and its officers and employees shall be subject to the requirements of title 18. Any individual who, pursuant to a contract or any other arrangement, performs functions or activities for the Corporation under the direct supervision of an officer or employee of the Corporation, shall be deemed to be an employee for the purposes of title 18, and this title.

"(f) ANNUAL AUDIT AND REPORT.—(1) The Corporation shall prepare and submit annually a report to Congress containing a full and detailed account of operations under this title. Such report shall include an audit setting forth the amount and type of disbursements, receipts, and losses sustained by the Federal Government as a result of such operations during the preceding fiscal year, together with an estimate of the total disbursements, receipts, and losses which the Federal Government can reasonably expect to incur as a result of such operations during the then current fiscal year.

"(2) In the annual report submitted under paragraph (1), the Corporation shall also include full and detailed accounts relative to the following matters:

"(A) The Corporation's plans to support a broad range of critical civilian technologies and to provide assistance, directly or indirectly, to qualified joint ventures and qualified individual firms in all regions of the Nation, including steps taken to accomplish that goal.

"(B) Steps taken by the Corporation to maximize repayment and recoupment of Corporation funds incident to the inauguration and administration of the loan, loan guarantee, and licensee programs, and to ensure compliance with statutory and regulatory standards relating thereto.

"(C) An accounting by the Treasury Department with respect to tax revenues accruing to the Federal Government from joint ventures and individual firms receiving assistance under this title.

"(D) An accounting by the Treasury Department with respect to both tax losses and increased tax revenues related to licensee financing of both individual and corporate business taxpayers.

"(E) Recommendations with respect to program changes, statutory changes, and other matters, including tax incentives to improve and facilitate the operations of Corporation programs as well as licensees and to encourage the use of licensees' financing facilities by qualified joint ventures and qualified individual firms."

"(g) INDEPENDENT REVIEWS.—After the fourth year of the Corporation's operation, and again after its tenth year of operation, the Secretary shall contract with one or more appropriate organizations for independent, thorough reviews of the Corporation's operations, activities, and effectiveness. The Secretary shall transmit these independent reviews to the President and Congress.

**"SEC. 312. AUTHORIZATION OF APPROPRIATIONS AND FINANCIAL MANAGEMENT.**

"(a) AUTHORIZATIONS OF APPROPRIATIONS.—Effective October 1, 1992, there are authorized to be appropriated to the Corporation—

"(1) \$2,000,000,000 for the purpose of carrying out sections 306 and 309 and for supporting the Corporation's administrative costs (except those administrative costs associated with the programs established under sections 307 and 308);

"(2) \$2,500,000,000 for the purpose of carrying out section 307, in accordance with the provisions of section 504(b) of the Credit Reform Act of 1990; and

"(3) \$500,000,000 for the purpose of carrying out section 308, in accordance with the provisions of section 504(b) of the Credit Reform Act of 1990.

"(b) ADMINISTRATIVE COSTS.—Of the amount authorized to be appropriated under subsection (a)(2) and (3), not more than \$5,000,000 for each fiscal year shall be available for administrative expenses to carry out the programs established under sections 307 and 308.

"(c) FUNDS ON DEPOSIT.—All moneys of the Corporation not otherwise employed may be deposited with the Treasurer of the United States, subject to check by authority of the Corporation, or in any Federal Reserve bank. The Corporation may reimburse such Federal Reserve banks for their services in such manner as may be agreed upon.

"(d) EXEMPTION FROM TAXATION.—The Corporation, its capital, reserves, and surplus, and its income, shall be exempt from all taxation now or hereafter imposed by the United States, by any territory, commonwealth, or possession of the United States, or by any State, county, municipality, or local taxing authority; except that any real property of the Corporation shall be subject to State,

territorial, county, municipal, or local taxation to the same extent according to its value that any other real property is taxed."

**SEC. 4. CONFORMING AMENDMENTS.**

(a) DEFINITIONS.—Section 4 of the Stevenson-Wylder Technology Innovation Act of 1980 (15 U.S.C. 3703) is amended by adding at the end the following new paragraphs:

"(14) 'Director' means the Director of the National Institute of Standards and Technology.

"(15) 'Institute' means the National Institute of Standards and Technology.

"(16) 'Assistant Secretary' means the Assistant Secretary of Commerce for Technology Policy."

(b) REDESIGNATIONS.—The Stevenson-Wylder Technology Innovation Act of 1980 (15 U.S.C. 3701 et seq.) is amended—

(1) by inserting immediately after section 4 the following new title heading:

**"TITLE I—DEPARTMENT OF COMMERCE AND RELATED PROGRAMS";**

(2) by redesignating sections 5 through 10 as sections 101 through 106, respectively;

(3) by redesignating sections 11 through 15 as sections 201 through 205, respectively;

(4) by redesignating sections 16 through 18 as sections 107 through 109, respectively;

(5) by striking section 19;

(6) by redesignating section 20 as section 110;

(7) by redesignating section 21 as section 206;

(8) by inserting immediately after section 110 (as redesignated by paragraph (6) of this subsection) the following new title heading:

**"TITLE II—FEDERAL TECHNOLOGY TRANSFER";**

(9) in section 4—  
(A) by striking "section 5" each place it appears and inserting in lieu thereof "section 101";

(B) in paragraphs (4) and (6), by striking "section 6" and "section 8" each place they appear and inserting in lieu thereof "section 103" and "section 105", respectively; and

(C) in paragraph (13), by striking "section 6" and inserting in lieu thereof "section 102";

(10) in section 206 (as redesignated by paragraph (7) of this subsection)—

(A) by striking "section 11(b)" and inserting in lieu thereof "section 201(b)"; and

(B) by striking "section 6(d)" and inserting in lieu thereof "section 102(d)"; and

(11) by adding at the end of section 201 (as redesignated by paragraph (3) of this subsection) the following new subsection:

"(h) ADDITIONAL TECHNOLOGY TRANSFER MECHANISMS.—In addition to the technology transfer mechanisms set forth in this section and section 202, the heads of Federal departments and agencies also may transfer technologies through the technology transfer, extension, and deployment programs of the Department of Commerce and the Department of Defense."

**PANEL ON THE GOVERNMENT ROLE IN CIVILIAN TECHNOLOGY**

Harold Brown (*Chairman*), Chairman, Foreign Policy Institute, The Johns Hopkins University School of Advanced International Studies (former Secretary of Defense [1977–1981]; former President of the California Institute of Technology [1969–1977])

John A. Armstrong, Vice President for Science and Technology, IBM Corporation; member of the National Advisory Committee on Semi-conductors (former Chairman of the Advisory Committee for Physics of the National Science Foundation [1981–1983])

Harvey J. Berger, M.D., Chairman and Chief Executive Officer, ARIAD Pharmaceuticals, Inc. and Adjunct Professor at the University of Pennsylvania (former President, Research and Development Division, Centocor, Inc. [1986-1991])

C. Fred Bergsten, Director, Institute for International Economics (former Assistant Secretary of the Treasury for International Affairs [1977-1981]; Chairman, Competitiveness Policy Council [1991-])

William F. Brinkman, Executive Director, Research, Physics Division, AT&T Bell Laboratories (former Vice President of Research at Sandia National Laboratories [1984-1987])

Dennis Chamot, Executive Assistant to the President, Department for Professional Employees, AFL-CIO; member of the National Research Council's Commission on Engineering and Technical Systems.

Richard N. Cooper, Maurits Boas Professor of Intentional Economics Center for International Affairs, Harvard University; Chairman of Board of Directors of the Federal Reserve Bank of Boston (former Under Secretary for Economic Affairs at the State Department [1977-1981])

John M. Deutch, Institute Professor, Massachusetts Institute of Technology; member of the Defense Science Board (former Provost of Massachusetts Institute of Technology [1985-1991]; former Under Secretary of Energy [1979-1980])

Kenneth Flamm, Senior Fellow, Foreign Policy Studies Program, The Brookings Institution

Edward A. Frieman, Director, Scripps Institution of Oceanography (former Director of Energy Research in the Department of Energy [1979-1981])

Paul W. MacAvoy, Williams Brothers Professor, School of Organization and Management, Yale University (former member of the President's Council of Economic Advisors [1975-1976])

David C. Mowery, Associate Professor, Walter A. Haas School of Business, University of California at Berkeley

William J. Perry, Chairman and Chief Executive Officer, Technology Strategies and Alliances; member of the Defense Science Board (former Under Secretary of Defense for Research and Engineering [1977-1981])

Henry B. Schacht, Chairman and Chief Executive Officer, Cummins Engine Company; Trustee of the Committee for Economic Development and the Ford Foundation (former member of the President's Commission for a National Agenda for the Eighties [1979-1980])

Hubert J.P. Schoemaker, Chairman and Chief Executive Officer, Centocor, Inc.

Vincent J. Ruddy, Summer Associate (1990)

By Mr. MACK (for himself and Mr. GRAHAM):

S. 3383. A bill to provide for enhanced Federal hazard mitigation assistance; to the Committee on Banking, Housing, and Urban Affairs.

#### FEDERAL HAZARD MITIGATION ASSISTANCE

• Mr. MACK. Mr. President, I rise today to introduce legislation to help ease the bureaucratic tragedy for Saga Bay home owners that has been compounding the tragedy of Hurricane Andrew.

Once again, confusing Government regulation has trampled on people's

lives, dashing their dreams as home owners and decreasing the value of their private property. Many home owners in south Florida that have had their houses destroyed are now being told that they need to raise their houses to a level above the flood plain in order to rebuild. This will cost the average home owner around \$20,000 to raise their house about 5 to 7 feet. This is \$20,000 that is not covered by insurance and is a tremendous burden on many people who are currently without homes, some of whom have lost their source of income to the storm. Home owners in Saga Bay and surrounding areas worked hard to save for their homes. They've invested hard earned money, purchased insurance, and worked to improve their neighborhood under certain rules. What has happened to them is wrong. They deserve a solution to their problem so they can begin rebuilding their lives, their homes, and their neighborhood.

This legislation allows the President more flexibility in dealing with hazard mitigation under the provisions in the Stafford Act. The hazard mitigation section of the Stafford Act has been interpreted as only allowing for public mitigation actions, for example levies or dams. The Stafford Act hazard mitigation provision has not been used to help raise individual houses above the flood plain after they have been destroyed by more than 50 percent.

This language would allow the President the flexibility to contribute up to 75 percent of the cost of hazard mitigation for individual homes—where cost effective—and when it would substantially reduce the risk of future damage, hardship, loss or suffering in any area affected by a major disaster. This authority is critical when dealing with a large number of homes that were destroyed by more than 50 percent and therefore have to meet new flood plain elevation standards.

This language provides the additional flexibility necessary to deal with rebuilding a community after a major disaster. I urge my colleagues to support passage of this bill. •

By Mr. WIRTH (for himself and Mr. SIMPSON):

S. 3384. A bill to establish more effective policies and programs for the early stabilization of world population through the worldwide expansion of reproductive choice; to the Committee on Foreign Relations.

#### INTERNATIONAL POPULATION STABILIZATION AND REPRODUCTIVE CHOICE ACT OF 1992

Mr. WIRTH. Mr. President, it is my pleasure to join with my distinguished colleague from Wyoming, Senator SIMPSON, in introducing the International Population Stabilization and Reproductive Choice Act of 1992. A similar bill was introduced last year, but working with the Senator from Wyoming, we have developed new legis-

lation to lay the groundwork for progressive and much-needed policy changes in international population stabilization.

In many cases, petty politics has kept us from looking at and seriously addressing the No. 1 problem facing the globe—and that is uncontrolled population growth. An enormous amount of resources were used to bring an end of the cold war—and thankfully that has happened. But now we must realize that our national security is not defined by our relationship with the Soviet Union; 5, 10 and 20 years ago we were concerned that we were going to blow ourselves off the face of the globe—now we must handle the problem of population inflation so we do not grow beyond its capacity.

Of all the challenges facing us in this country and around the world, none compares to that of rapid population growth. All of our efforts to promote national and international security, to protect the environment, to promote economic development around the world—all of these efforts are compromised by the staggering rate of growth in human numbers.

Every minute of every hour of every day, 170 people are added to the planet. That's 235,000 people joining us here on Earth each day; 235,000 people—and the United States keeps falling further and further behind in its commitments to international population programs and is no longer the leader it used to be in putting forward progressive and sensible population programs.

Recent events have thrust before us the horrific face of poverty, starvation, and suffering. Even the immediate needs of the Somalians and the Sudanese seem immense—even before we address the long-term needs. Coupled with the high rate of global population growth, the task of providing even hope—let alone food and economic opportunity—seems overwhelming.

On the environmental front, population is a major, if not the dominant force for global ecological decline. From decertification to deforestation, the linkage is clear. We know what to do, too—but we need to do it.

The triad of population growth, environmental degradation, and pervasive poverty threaten us and our planet as never before. That is why we are introducing the International Population Stabilization and Reproductive Choice Act of 1992. This is a first step in the international effort for population stabilization at or below 10 billion people.

What we have learned in the two decades since population was given a separate line item in the budget—which occurred after intense work by Congressman George Bush—is that some family planning programs work very well. The expanded delivery of community-based family planning services, child mortality programs, education programs—particularly for young girls—the ex-

pansion of economic, social and political opportunity for women all around the globe are all a part of the equation to slow population growth.

Our bill helps to bridge the gap and fulfill some of the unmet needs for family planning services. This bill lays the groundwork for comprehensive population and foreign assistance policies.

First, our bill calls for the provision of a variety of voluntary family planning programs by U.S. population experts. For too long, population programs have been tied up with terrible stories of coercive practices in other nations. This legislation makes it clear that the United States will not support any program that is not entirely voluntary.

The expansion of access to a diverse set of family planning programs is critical in meeting a variety of needs in different countries. In addition, the bill gives special emphasis for reaching out to young adults approaching the childbearing age.

U.S. foreign policy should include an explicit aim to reduce the rate of infant mortality in all countries by one-third by the year 2000. One of the reasons fertility rates are so high in less developed nations is due to the fact that parents assume that some of their offspring will die. This is a terrible reality—we must reduce infant and child mortality rates to give parents confidence that their children will survive.

This is a very brief summary of this forward-looking legislation. It is a little unusual to introduce legislation not only this late in a Congress, but when I have chosen to not return to the Senate next year. The gentleman from Wyoming and I believe it is important to lay out this blueprint to be used to build on for the next Congress. His commitment to population stabilization is deep, and our joint effort exemplifies the need to cross the political spectrum and move forward with effective public policy.

Mr. SIMPSON. Mr. President, today I join with my friend and colleague from Colorado in introducing this legislation. Senator WIRTH and I have been able—after some months of serious negotiations, to identify areas of common interest and concern. We have crafted a bill that we hope will serve as a legislative starting point and a policy focal point for U.S. assistance to foreign governments and private organizations working to improve the quality of human life and halt the degradation of the environment created by overpopulation of this planet.

I approach this issue, Mr. President, primarily from the perspective of environmental protection. It may possibly surprise some governmental groups to hear that! But this is serious business. I serve on the Environment and Public Works Committee, and we have done some marvelous work in the past few years to address a number of domestic

environmental problems—the Clean Air Act, on which I worked closely with the Senator from Colorado, the Clean Water Act, now RCRA—all of this with an eye toward doing something about maintaining the livability of planet Earth.

But the fact is, Mr. President, the largest environmental problems we face are not in this country but in the Third World where a burgeoning population is causing natural resource damage at an unprecedented rate. Deforestation caused by the simple and basic search for firewood and raw materials for charcoal have denuded millions of acres of land in the Southern Hemisphere. Slash and burn agriculture practiced by hordes of desperate people is removing the world's largest carbon dioxide sink, depleting soil nutrients, releasing more carbon dioxide into the atmosphere along with other pollutants and causing erosion that is scarring the land and polluting rivers and streams. One of the most credible ways to begin to address these critical environmental problems is through responsible population control worldwide.

There are currently 5.4 billion people on the Earth. In 1950, there were only 2.5 billion. If current birth and death rates continue, the world's population will double again in just 40 years. Despite some progress in reducing fertility rates, birthrates in developing countries are declining too slowly to prevent a cataclysmic near tripling of the human race before stabilization can occur. It does indeed seem frivolous to me that we worry so much about bovine explosions of methane gas and fertilizer contents, when we have not even begun to consider the far more urgent and fundamental problem of how many footprints can this Earth accommodate. Every year over 95 million people—about the population of Mexico—are added to the world's population. Every month the equivalent of another Los Angeles is added.

There many pressing reasons beyond a concern for the environment for the United States to take a renewed interest in global population issues. Unchecked population growth has and will continue to have direct consequences for the global economy and for international standards of living. Rapid population growth impedes worldwide economic progress by keeping people in many countries too poor to buy more than basic necessities. Growth in the number of people is overrunning the creation of schools to educate them and the jobs to employ them. In Mexico, 1 million new workers enter the labor force each year but only 200,000 new jobs are created. And Mr. President, this translates directly into ever greater pressure for increased immigration into the United States.

Furthermore, Mr. President, population pressures undermine the future prospects of many countries so impor-

tant to the United States. Key United States allies such as Egypt, Pakistan, and the Philippines have population doubling times of 30 years or less.

Some 95 percent of the world population growth is taking place in the less developed countries of Africa, Asia and Latin America where it aggravates widespread poverty as well as rapid environmental degradation.

Fortunately, the urgency is catching on. Today 130 governments support organized family planning services, up from just 21 governments in 1965. And the United Nations recognizes family planning as a basic human right. Thanks in large measure to international bilateral and multilateral population assistance programs, over 50 percent of the world's childbearing-aged couples now use modern contraception.

But that is not enough to significantly arrest the pace at which humanity is consuming or destroying our natural resources through sheer force of numbers. That is why I join today with my colleague from Colorado, Senator WIRTH, in introducing this legislation. It is our aim to call attention to this singular issue, to give it focus, to make it a vital part of U.S. foreign aid and development assistance programs. This legislation calls upon the United States to resume its position of moral leadership in global efforts to achieve responsible and sustainable population growth levels, and to back that leadership up with specific commitments to core population planning activities. No other environmental issue can even match the need to act in this area.

Next year, when we will be without the presence of Senator WIRTH in this sphere, and I do hope my colleagues will share with me their ideas and concerns, and assist me in molding this bill into something that can achieve the support of a majority of Senators in this body.

By Mr. BINGAMAN:

S. 3385. A bill to improve the performance of the Departments of Defense and Energy in assisting American industry, especially small businesses, with the commercialization in the global marketplace of products derived from federally funded research and development; to the Committee on Commerce, Science, and Transportation.

SMALL BUSINESS TECHNOLOGY TRANSFER ACT

• Mr. BINGAMAN. Mr. President, I have come to the conclusion that we need to improve the performance of the Departments of Defense and Energy in assisting American industry, especially small businesses, with the commercialization in the global marketplace of products derived from federally funded research and development. The vision behind the National Competitiveness Technology Transfer Act of 1989 has not yet been realized, and I believe that additional statutory provi-

sions are required to significantly hasten the day when that vision is fully implemented.

I therefore introduce today the Small Business Technology Transfer Act of 1992.

The Small Business Technology Transfer Act of 1992 amends the Stevenson-Wydler Act to provide that small businesses who propose cooperative research and development agreements with government-owned, contractor-operated laboratories [GOCO's] will have streamlined technology transfer procedures similar to those available to small businesses who enter into such agreements with government-owned, government-operated laboratories. Like them, CRADA's between GOCO's and small business would have to be approved or disapproved within 30 days of submission.

The Small Business Technology Transfer Act of 1992 further recognizes that to implement the small business preference provisions of the Stevenson-Wydler Act with respect to GOCO's, small businesses simply cannot afford the advance payments, the product liability burdens, and the up-front costs which can justifiably be imposed on larger, richer industrial partners.

The Small Business Technology Transfer Act of 1992 also furthers the implementation of Section 3136 of the National Defense Authorization Act for fiscal years 1993 and 1994. Although section 3136 makes clear that all atomic energy research and development activities program funds are available for, shall be used for, cooperative research and development agreements and the like, the Department of Energy refuses to use those funds for technology transfer. Despite the language of section 3136, the Department's apparent position is that all such agreements should be funded from a line item set aside for centrally managed technology partnerships.

But the Small Business Technology Transfer Act of 1992 envisages both the centrally managed partnerships and lab-managed partnerships, which would be funded out of any appropriate programmatic funds available to the labs. Essentially, I am seeking to change the culture of self-sufficiency within the labs and push them in the direction of cooperating with industry whenever DOE's mission needs overlap with industry's efforts to remain competitive; environmental clean-up technology is just one example of this overlap. The Small Business Technology Transfer Act of 1992 therefore encourages DOE to do both the centrally managed partnerships and the lab managed partnerships. In order to implement the clear mandate of section 3136, the bill asserts that the Secretary of Energy should require a minimum of 10 percent of such funds to be used for dual-use technology partnerships over the next 2 years.

Section 4 of the bill responds to testimony received by the Senate Armed Services Committee by several experts, including the President's Science & Technology Advisor, to the effect that national laboratory directors should be encouraged to use laboratory-directed research and development [LDRD] funds for collaborative arrangements with industry. Dr. Bromley made the point that many of the key R&D programs eventually pursued by our laboratories are first developed during the LDRD stage. If our labs are to be relevant to the needs of American industry, he argued persuasively that industry needs to be involved in the development of laboratory R&D at the LDRD stage. Section 4 authorizes and encourages laboratory directors to use LDRD for such partnerships with industry.●

By Mr. LIEBERMAN (for himself and Mr. KASTEN):

S. 3386. A bill to amend the Small Business Act to provide increased opportunities for private firms by requiring Federal agencies to enter into contracts with qualified private sector firms for goods and services, and for other purposes; to the Committee on Small Business.

SMALL BUSINESS OPPORTUNITY AND FAIR COMPETITION ACT

● Mr. LIEBERMAN. Mr. President, when the last White House Conference on Small Business convened in 1986, America's leading small business owners adopted a platform on major issues facing their commercial enterprises. Of the hundreds of issues considered and the 60 which made the final list, near the top of the list was a call for an end to unfair competition by Government agencies.

Unfortunately, that recommendation has not received adequate attention. Despite a lot of talk, there has been little action to stem the tide of Government competition with the U.S. business community, particularly small businesses. The bill I am introducing today, along with Senator KASTEN of Wisconsin, tries to address one part of this issue.

The "Small Business Opportunity and Fair Competition Act" amends the Small Business Act by making the chief counsel of advocacy in the Small Business Administration a focal point for identifying instances where the Federal Government can increase its reliance on the private sector, particularly small businesses. Moreover, it adds oversight of Government competition to the responsibilities of the procurement center representatives. The PCR's will be a watchdog to make certain small business has an opportunity to be contractors on work that would otherwise be conducted in-house. This will be done by evaluating proposed acquisition of equipment and capabilities in Government agencies that can be obtained through service contracts from

the private sector. The PCR's can also respond to complaints about unfair Government competition. This approach of emphasizing the use of small business should also save the Government money.

Finally, this legislation creates a demonstration program to create more contracting opportunities in one area that deserves attention, the field of surveying and mapping. This is an activity within the Government in which there is a significant opportunity for increased contracting. Under this demonstration program the SBA Administrator is to publish an inventory of activities in each agency and develop a plan for increasing the contract opportunities for private firms.

Mr. President, the Federal Government's current policy and procedure for contracting out—OMB Circular A-76—has not been effective. Our bill provides the small business community a better opportunity to have its views and capabilities known, through the Small Business Administration.

I would welcome the support of my colleagues for this effort to demonstrate the ability of small businesses, first in surveying and mapping and ultimately in other businesses and professions.●

By Mr. HATCH (for himself, Mr. DOLE, Mr. CHAFEE, and Mr. DANFORTH):

S. 3387. A bill to improve the health care delivery system and ensure access to affordable quality health care through reduced liability costs and improved quality of care, and for other purposes; to the Committee on the Judiciary.

HEALTH CARE LIABILITY REFORM AND QUALITY OF CARE IMPROVEMENT ACT OF 1992

Mr. HATCH. Mr. President, I am pleased to introduce today, along with my colleagues Senators DOLE, CHAFEE, and DANFORTH, the administration's Health Care Liability Reform and Quality of Care Improvement Act of 1992. I commend the President for sending forward this important health care legislation. The President recognizes that medical liability has been a tremendous barrier to access to health care for the American people and has greatly contributed to health care cost growth.

From 1984 to 1989, doctor's medical insurance premiums more than doubled from \$2.7 billion to \$5.6 billion due in large part to awards given in malpractice suits. As a result, physicians today order many tests and procedures not because they are essential for good medical diagnosis or evaluation, but simply as protection against lawsuits. These costs are, in turn, passed onto the American consumer. Moreover, the specter of litigation has weakened the doctor-patient relationship, which should be built on trust.

This tremendous increase in medical insurance premiums has also reduced

Americans' access to health care. Many physicians wanting to pay lower premiums have decided to no longer practice in high risk specialty areas. Also, we find that the higher premiums have caused a severe shortage of doctors in rural parts of this country. It is no wonder that we find that women who live in rural areas have a tough time finding obstetrical care.

This legislation will help rein in runaway medical costs and ensure access to affordable quality health care. It will eliminate the wide variation among States' product liability laws by providing the States incentives to adopt the following reforms:

This bill would enact a system of nonbinding arbitration for all suits that arise out of federally-funded or regulated health care and treatment. This would include Medicare, Medicaid, the Federal Employees Benefits Program, military retiree insurance and all private plans covered by the Employee Retirement Income Security Act. Providing such an alternative to litigation holds much promise in the way of lowering costs and providing fair compensation quickly. Also, it may prove to be an effective method for screening out frivolous lawsuits.

In the area of tort reform, the bill would put a \$250,000 cap on non-economic damages while allowing full recovery on economic damages. It would also prevent double recoveries by reducing awards by the amounts paid from other sources to compensate for the injury. Furthermore, it would provide for the elimination of joint and several liability for damages and permit judgments to be paid off in periodic payments rather than in a lump sum.

In the area of quality reform, it would improve the performance in oversight of physicians by State Medical Boards, require continuing medical education when sanctioned by the Medical Board and provide for cooperation with Federal efforts to learn the effectiveness of different medical treatments.

This proposal provides considerable latitude for States to pursue their own approaches to quality improvement and the elimination of negligence in health care. It would also require the Attorney General to implement many of these reforms to cases brought against the Federal Government.

Mr. President, I believe it is essential that this legislation be considered carefully over the recess period and enacted early next year. I invite the comments and support of all interested parties.

I ask unanimous consent that the transmittal letter, dated July 2, 1992, be placed in the RECORD along with the text of the bill and a section-by-section summary.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 3387

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

## SHORT TITLE

This Act may be cited as the "Health Care Liability Reform and Quality of Care Improvement Act of 1992."

## TITLE I—FINDINGS AND PURPOSE

SEC. 101. FINDINGS.—The Congress finds that:

(a) The Federal Government is a direct provider of health care to many Americans; a source of payment for the health care of a much larger number of Americans through Medicare, Medicaid and other programs; and a promoter of quality assurance efforts. As a result, the Federal Government has a major interest in health care issues, including the availability, cost, and quality of health care.

(b) The rising costs of malpractice insurance, litigation, and liability are contributing significantly to increases in the cost of health care. These and other health care liability problems have adversely affected health care consumers and created tensions among the medical and legal professions, the insurance industry and consumers.

(c) The fear of medical malpractice liability has caused some health care providers to practice unnecessary defensive medicine, adding to health care costs.

(d) This fear of liability and the increased costs adversely impact the ability of health care professionals to continue to practice in high risk specialty areas and certain geographic areas of the country.

(e) More effective quality assurance activities would reduce the incidence of health care injuries, reduce the incidence of medical malpractice, and consequently reduce medical liability.

(f) Improving the effectiveness of the civil judicial system would not only deter frivolous actions that increase health care costs but would result in fair and expeditious compensation for meritorious claims of health care malpractice.

SEC. 102. PURPOSE.—It is the purpose of this Act to:

(a) Provide incentives to States to enact health care liability tort reforms and establish alternative dispute resolution mechanisms to achieve efficient, cost effective and expeditious disposition of health care disputes;

(b) Provide incentives to States to adopt quality assurance reforms to reduce the incidence of malpractice;

(c) Incorporate these reforms on the Federal level through amendments to the Federal Tort Claims Act; and

(d) Authorize and require non-binding arbitration of health care liability claims between patients and providers who are Federal employees, receive Federal funds or participate in an employee benefit plan or health insurance network for the provision of health care, notwithstanding conflicting State law, and thereby encourage the fair, cost effective and expeditious resolution of claim against health care providers.

## TITLE II—HEALTH CARE LIABILITY REFORMS

SEC. 201. DEFINITIONS.—For purposes of Titles II, III and IV:

(a) The term "economic damages" means health care treatment and medical expenses, lost wages and income, lost employment, burial expenses, and other pecuniary losses incurred by an individual as a result of negligence in the provision of health care services as determined by State law;

(b) The term "non-economic damages" means physical and emotional pain, suffering, physical impairment, emotional distress, mental anguish, disfigurement, loss of enjoyment, and loss of companionship, services, consortium and other non-pecuniary losses incurred by an individual as a result of negligence in the provision of health care services as determined by State law;

(c) The term "health care provider" means any individual and any organization or institution that is engaged in the provision of medical care and treatment, and is required by State or Federal law or regulation to be licensed or certified to engage in the delivery of such health care services;

(d) The term "health care liability action" means a civil action or proceeding in any judicial tribunal or any arbitration proceeding, brought pursuant to State law against a health care provider, alleging that injury was suffered by the plaintiff as the result of any act or omission by a health care provider without regard to the theory of liability asserted in the action. This term excludes civil penalty actions by any State or State agency or officer or by the United States or by any Federal agency or officer;

(e) The term "injury" means an injury, illness, disease, or other harm suffered by an individual as a result of the provision of medical care and treatment by a health care provider;

(f) The term "State" means any State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, the Virgin Island, American Samoa, the Northern Mariana Islands, the Trust Territories of the Pacific Islands, and any other territory or possession of the United States;

(g) The term "Secretary" means the Secretary of Health and Human Services;

(h) The term "person" means any individual, corporation, company, association, firm, partnership, society, joint stock company, or any other entity, including any governmental entity; and

(i) The term "court" mean a court of competent jurisdiction or an arbitration panel.

SEC. 202. IN GENERAL.—To receive a Notification of compliance with this Title pursuant to Section 209, the States shall enact, adopt, or otherwise have in effect no later than three years from the date of enactment of this Act the health care liability reforms set forth in Sections 203 through 208.

SEC. 203 JOINT AND SEVERAL LIABILITY.—

(a) In any health care liability action, the liability of each defendant for non-economic damages shall be several only and shall not be joint. Each defendant shall be liable only for the amount of non-economic damages allocated to that defendant in direct proportion to that defendant's percentage of fault, and a separate judgment shall be rendered against that defendant for that amount.

(b) Subsection (a) shall not apply with respect to those persons participating in joint conduct in a common scheme by two or more persons who consciously and deliberately agreed to jointly participate in such conduct with actual knowledge of the wrongfulness of the conduct resulting in a tortious act and where such acts proximately caused the injury complained of by the plaintiff and for which one or more of such persons is found liable for damages.

SEC. 204. LIMITATION ON NON-ECONOMIC DAMAGES.—(a) Non-economic damages may not be awarded in an amount in excess of \$250,000 in any health care liability action. The Secretary, for good cause, may waive the requirement of this Section in Determining a State's compliance with this Act pursuant to Section 209.

(b) For purposes of this Section, in addition to the parties within the purview of Section 201(d), "any health care liability action" includes all actions (including multiple actions) for damages, and includes all plaintiffs and all defendants in such actions, which arise out of or were caused by the same personal injury or death, whether or not each defendant is a health care provider.

(c) Cost-of-living. The amount described in subsection (a) shall be adjusted every three years to reflect changes in the cost-of-living index utilized by the Secretary in determination of adjustment in old age, survivors, and disability insurance benefits. The first such adjustment shall be made three years after the date of the enactment of this Act.

SEC. 205. COLATERAL SOURCE BENEFITS.—(a) Except as provided in subsection (c), the total amount of damages received by a plaintiff shall be reduced, in accordance with subsection (b), by any other payment which has been made or which will be made to such plaintiff to compensate such plaintiff for an injury, including payments under—

(1) Federal or State disability or sickness programs;

(2) Federal, State, or private health insurance programs;

(3) private disability insurance programs; and

(4) employer wage continuation programs; and

(5) any other source of payment intended to compensate such plaintiff for such injury.

(b) The amount by which an award of damages to a plaintiff for an injury shall be reduced under subsection (a) shall be—

(1) the total amount of any payments (other than such award) which have been made or which will be made to such plaintiff to compensate such plaintiff for such injury, less

(2) the cost incurred by such plaintiff (or by the spouse, parent, or legal guardian of such plaintiff) to secure the payments described in clause (1).

(c) Subsection (a) shall not apply to any payment which the individual is required by law or contract to repay out of any damages recovered from a negligent health care provider.

SEC. 206. PERIODIC PAYMENT OF JUDGMENTS.—(a) In any health care liability action subject to this Act in which damages for future economic damages are awarded, no health care provider shall be required to pay for such future damages in a single, lump-sum payment but shall be permitted to make periodic payments based on when the damages are found by the court to be likely to occur or at the time such damages accrue.

(b) The court may require such health care provider to purchase an annuity or fund a reversionary trust to make such periodic payments, if the court finds a reasonable basis for concluding that the health care provider may be unable to or will not make the periodic payments.

(c) The judgment of the court awarding such periodic payments may not be reopened at any time to contest, amend, or modify the schedule or amount of the payments in the absence of fraud or any ground permitting relief to be granted after entry of a final judgment.

(d) This subsection shall not be construed to preclude a settlement providing for a single, lump-sum payment.

SEC. 207. ALTERNATIVE DISPUTE RESOLUTION MECHANISMS.

(a) In General. It is declared to be the policy of the United States to encourage—

(1) the creation, adoption, and use of alternative dispute resolution mechanisms to

achieve the fair, cost effective and expeditious disposition of civil disputes;

(2) the modification of procedural and evidentiary rules to the extent feasible to accommodate such alternative dispute resolution techniques; and

(3) acceptance of non-binding arbitration of health care liability claims as specified in Title III of this Act.

(b) Alternative Dispute Resolution Mechanisms.

(1) The State shall establish at least one alternative dispute resolution mechanism. The Secretary, for the purpose of determining compliance under Section 209, shall deem a State to be in compliance with the requirements of this Section if the State has in effect at least one mediation or pretrial screening panel alternative dispute resolution mechanism specified in regulations issued by the Secretary in consultation with the Attorney General, or if the State has in effect another alternative dispute resolution mechanism which the Secretary, in consultation with the Attorney General, finds to be equally effective in deterring frivolous actions and resulting in fair and expeditious compensation for meritorious claims. The Secretary, in consultation with the Administrative Conference of the United States and the Attorney General, shall promulgate regulations that specify the Secretary's criteria for evaluating the effectiveness of these mechanisms.

(2) The time period during which a proceeding pursuant to this Section is pending prior to institution of a civil action shall not be included or counted in determining whether any statute of limitations bars a health care liability action.

SEC. 208. QUALITY ASSURANCE REFORM.

(a) Promote State Cooperation with Federal Effectiveness Research Efforts.

The State, through the appropriate health authority, shall cooperate with Federal research efforts with respect to patient outcomes, clinical effectiveness and clinical practice guidelines.

(b) Improve the Performance of State Medical Boards.

(1) Each State, through the appropriate health authority, shall collect, analyze and supply the Secretary with information and data, as specified in regulations to be promulgated by the Secretary, on staffing, revenue, disciplinary actions, expenditures, case-loads of the State Medical Board, and use of continuing medical education programs in order to demonstrate that the State medical boards meet performance criteria established by the Secretary in regulations.

(2) Each State, through the appropriate health authority, shall impose a requirement on the State Medical Board to require a physician disciplined by the State Medical Board to take a certain number of continuing education courses as the board requires, with educational outcome measures required, in the subject areas in which the board determines that the physician's knowledge is deficient.

(c) Alternative Programs.

The Secretary, for purposes of determining compliance under Section 209 of the Act, shall deem a State in compliance with the requirements of this Section if the State has in effect, instead of the programs described in subsection (b), a program to reduce the incidence of negligence which the Secretary finds to be at least as effective in reducing the incidence of negligence as compliance with the Secretary's standards promulgated under Section 208(b). The Secretary shall promulgate regulations that specify the Sec-

retary's criteria for evaluating the effectiveness of alternatives to Section 208(b), including, for example:

(1) Requirements for risk management systems to be carried out by institutions providing health care in the State;

(2) Quality assurance systems, administered by the State or professional bodies, that review the quality of care rendered by the physicians of the State; or

(3) State programs for the promulgation of standards of care in areas of medical practice in which the risk of negligence is greatest, and assurance of satisfactory levels of compliance with such standards.

SEC. 209. STATE IMPLEMENTATION OF HEALTH CARE LIABILITY REFORMS.—(A) IMPLEMENTATION.

(1) The States shall have three years from the effective date of this Act in which to enact, adopt, or otherwise comply with the provisions as set forth in Sections 202 through 208 of this Act.

(2) DEMONSTRATION PROJECT. The Secretary shall deem a State to be in compliance with the requirements of Sections 203, 204, 205, 206 and 207 if a State enacts and places into effect within three years after the effective date of this Act a system, approved by the Secretary, for prompt payment of those economic damages not payable by State, Federal or private health or disability insurance; wage continuation; or any other source of payment intended to compensate an injured person. The system shall provide for agreements to be reached for payment of those economic damages without any determination of fault and in lieu of any health care liability action between the persons making and receiving these payments related to the provision of the health care at issue. The Secretary shall approve no more than three States' applications under this Section. Applications for approval shall be considered in accordance with regulations to be issued by the Secretary in consultation with the Attorney General. Approval under this subsection will not relieve a State from the duty to comply with Section 208.

(b) Notification.

(1) Notification by the State shall be submitted to the Secretary, with a Certification by the Chief Executive Officer of the State that, on the date the Notification is submitted, the State has enacted, adopted, or otherwise has in effect the health care liability reforms set forth in this Act.

(2) The Notification shall be accompanied by documentation to support the Certification required by this subsection, including copies of relevant State statutes, rules, procedures, regulations, judicial decisions, State constitutional provisions, and opinions of the State Attorney General.

(3) The Notification shall contain such other information, be in such form, and be submitted in such manner, as the Secretary may require.

(c) Review of Notification.

(1) Within 90 days after receiving a Notification under subsection (b), the Secretary shall review the Notification and determine whether the Notification demonstrates that the State has enacted, adopted, or otherwise has in effect the health care liability reforms set forth in this Act.

(2) If the Secretary determines that the Notification makes such a demonstration, the Secretary shall approve the Notification.

(3) If, after reviewing a Notification under this subsection, the Secretary determines that the Notification does not make the demonstration required under such subsection, the Secretary shall, within 15 days

after making such determination, provide the State that submitted such Notification with a written notice specifying such determination and containing recommendations for revisions that would cause the Notification of the State to be approved.

(4) Within 30 days after receiving a revised Notification, the Secretary shall review the revised Notification and determine whether the Notification demonstrates that the State had enacted, adopted, or otherwise has in effect the health care liability reforms set forth in this Act. If the Secretary determines that the revised Notification makes such a demonstration, the Secretary shall approve the revised Notification and determine the State to be in compliance with the provisions of this Title.

(d) Non-Compliance.

(1) If a State fails to submit to the Secretary a Notification or revised Notification pursuant to this Section, the Secretary shall, within 15 days after the time period under Section (b)(1) expires, send the State written notice of determination of non-compliance.

(2) If, during the time period determined by the Secretary under subsection (c), the Secretary determines that a revised Notification does not demonstrate that the State has enacted, adopted, or otherwise implemented the health care liability reforms set forth in this Act, and that the State's revised Notification is not approved, or if a determination of non-compliance is made pursuant to this Section, the Secretary shall, within 15 days after making such determination, provide the State with written notice of non-compliance. Such notice shall specify the determination of the Secretary and the reasons therefor.

(3) If, during any time period after a Notification is approved under subsection (c) the Secretary determines that the State does not currently have in effect the health care liability reforms upon which the Notification was approved, the Secretary shall within 30 days of making such determination provide the State with written notice of such determination and withdraw the approval of the Notification. Such notice shall specify the determination of the Secretary and the reasons therefor.

(e) Consultation With the Attorney General.

In making determinations of compliance or non-compliance pursuant to this Act, the Secretary shall consult with the Attorney General with respect to any issues or tort law or policy.

(f) Effect of Non-compliance.

If a State has been determined to be in non-compliance in accordance with the provisions of this Section, the Secretary shall cause publication of a notice of non-compliance in the Federal Register. Sixty days after publication of the notice, the provisions of Sections 203, 204, 205, and 206 shall apply to all health care liability actions upon claims accruing more than three years after the effective date of this Act and which arise, in whole or in part, out of an injury caused by a health care provider who is entitled to any payment for the health care out of which the claim arose pursuant to the provisions of 5 U.S.C. Chapter 89, 10 U.S.C. §§1079 or 1086, 38 U.S.C. §1728, or Title XVIII, or XIX of the Social Security Act (42 U.S.C. §1395 et seq. or 42 U.S.C. §1396 et seq.).

(g) Incentive Program

(1) Withholding of Funds for Non-Compliance.

If a notice of non-compliance for a State has been published pursuant to subsection

(f), there shall be withheld, beginning on the first fiscal year following the notice of non-compliance and continuing each fiscal year thereafter until the notice of non-compliance has been rescinded, the amount that would otherwise be allocated to such State for each account in the domestic discretionary appropriations category as defined in Section 250(c)(4)(A) of the Balanced Budget and Emergency Deficit Control Act of 1985, as amended, provides that this subsection does not apply to accounts authorized by the following provisions: §301 of the Public Health Service Act (42 U.S.C. §241); §317 of the Public Health Service Act (42 U.S.C. §247b); §329 of the Public Health Service Act (42 U.S.C. §254b); §330 of the Public Health Service Act (42 U.S.C. §254c); §340 of the Public Health Service Act (42 U.S.C. §256); §2 of the Employment Security Administrative Financing Act of 1954 (42 U.S.C. §1101); or §17 of the Child Nutrition Act of 1966 (42 U.S.C. §1786).

(2) Funds to be Allocated After Compliance.

If before such withheld funds would otherwise expire the notice of non-compliance is rescinded, such funds may be obligated by the responsible Federal agency for allocation to such State.

SEC. 210. WAIVER.—In the case of any experimental, pilot, or demonstration project, as defined by regulations promulgated by the Secretary in coordination with the Attorney General, which, in the judgment of the Secretary, is likely to assist in promoting the objectives of this Act, in a State or States, the Secretary may waive compliance with any of the requirements in this Title to the extent and for the period the Secretary finds necessary to enable such State or States to carry out such project.

SEC. 301.—PURPOSE.—The purpose of this title is to ensure that recipients and providers of health care obtain the benefits of a system for submission to non-binding arbitration of health care liability claims and to establish a fair, efficient, and inexpensive mechanism for resolution through arbitration of health care liability claims.

SEC. 302. APPLICABILITY.—The provisions of this Title shall apply to all health care liability claims that accrue more than one year after the effective date of this Act and which arise in whole, or in part, out of health care either—

(a) Provided by a health care provider who is entitled to any payment for the health care out of which the claim arose pursuant to the provisions of—

(i) 5 U.S.C. Chapter 89, 10 U.S.C. §§1079 or 1086, 38 U.S.C. §1728, Title XVIII or XIX of the Social Security Act (42 U.S.C. §1395 et seq. or 42 U.S.C. §1396 et seq.); or

(ii) any "employee benefit plan" as defined by 29 U.S.C. §1002(3), any "multiple employer welfare arrangement" as defined by 29 U.S.C. §1002(40) or under any law providing for "health insurance networks," if such plan, arrangement or network is established by a person or entity engaged in, or an organization representing employees engaged in, interstate commerce or in any industry or activity affecting commerce; or

(b) for which a remedy is provided pursuant to the provisions of the Federal Tort Claims Act.

SEC. 303. PREEMPTION.

(a) To the extent set forth in this Title, this Title governs any civil action brought against a health care provider, on any theory, for alleged injuries arising out of medical care and treatment, regardless of whether the theory is a theory predicated upon

lack of due care, intentional conduct, strict liability or any other theory.

(b)(1) To the extent set forth in this Title, this Title supersedes any State or Federal law, including any State law enacted pursuant to Section 207, regarding recovery of economic and non-economic damages. Any issue arising under this Title that is not governed by any such rule of law shall be governed by applicable State or Federal law.

(2) To the extent set forth in this Title, the provisions of this Title govern any proceeding seeking recovery of economic and non-economic damages which is within the purview of the Federal Tort Claims Act.

(3) This Act shall not preempt or otherwise govern any civil action arising out of health care provided by a health care provider, regardless of whether said provider receives Federal funding pursuant to any Federal act or is federally regulated, if the liability for the injury would not be determined pursuant to the Federal Tort Claims Act or if the health care was not provided by a person entitled to payment therefor, in whole or in part pursuant to the provisions of—

(i) 5 U.S.C. Chapter 89, 10 U.S.C. §§1079 or 1086, 38 U.S.C. §1728, Title XVIII or XIX of the Social Security Act (42 U.S.C. §1395 et seq. or 42 U.S.C. §1396 et seq.); or

(ii) any "employee benefit plan" as defined by 29 U.S.C. §1002(3), any "multiple employer welfare arrangement" as defined by 29 U.S.C. §1002(40) or under any law providing for "health insurance networks," if such plan, arrangement or network is established by a person or entity engaged in, or an organization representing employees engaged in, interstate commerce or in any industry or activity affecting commerce.

SEC. 304. REQUIREMENT FOR NON-BINDING ARBITRATION.—Health care providers and all other persons shall submit any claims of health care liability to non-binding arbitration. Failure of a plaintiff to submit a health care liability claim to non-binding arbitration shall be a complete defense to a health care liability action.

SEC. 305. ARBITRATION PROCEDURES.—(a) Establishment of Arbitration Process.

(1) Each State is encouraged to establish a non-binding arbitration process, including an arbitration panel consisting of one or more non-judicial arbitrators. The arbitration panel may include at least one health care professional. If a State does not have in effect a non-binding arbitration process, the arbitration shall be conducted in accordance with regulations to be issued by the Secretary. Each State which does not have an arbitration process meeting or exceeding the minimum requirements set forth in this Title shall be specified in such regulation.

(2) The Attorney General shall by regulation establish an arbitration process that shall apply to claims within the purview of the Federal Tort Claims Act. The regulations shall provide for an arbitration process to commence upon completion of the administrative claim process specified pursuant to 28 U.S.C. §§2672, 2675.

(3) State non-binding arbitration processes and regulations issued by the Secretary and the Attorney General shall provide that when a determination is reached by the arbitration panel—

(A) any party may give notice that it intends to accept that determination, while the other parties remain free to reject the determination and to commence a civil action. If all parties reject the determination, no costs or attorney's fees shall be assessed against any party;

(B) A plaintiff who rejects the determination and fails to obtain a final judgment that

is at least ten percent greater than the determination shall pay the defendant's reasonable costs and reasonable attorney's fees incurred after the rejection of the determination; and

(C) A defendant who rejects the determination and fails to obtain a final judgment that is at least ten percent less than the determination shall pay the plaintiff's reasonable costs and reasonable attorney's fees incurred after rejection of the determination.

(b) Panel Chairperson. If the panel consists of more than one member, a member of the panel shall be selected to be chairperson; the chairperson shall decide all prehearing procedures.

(c) Time. Unless extended by the panel and by agreement of the parties, the arbitration panel shall issue a final determination as to liability, and damages if applicable, within six months from the date upon which all defendants have been served with the notice of claim.

(d) Assessment of costs. The award shall include an assessment of costs, including the arbitrators' fees, and shall specify which party or parties shall pay those costs.

SEC. 306. AMOUNT OF AWARDS.—In making a determination to award damages, if any, in any arbitration proceeding pursuant to this Title, the arbitrators shall ascertain damages as provided by applicable State and Federal law. If the plaintiff fails to pay the costs of the arbitration proceeding in accordance with an award requiring the plaintiff to pay such an award, the defendant shall pay all such costs. Upon payment of such costs by a defendant, the defendant shall be subrogated to the right to be reimbursed for the award of costs and shall have all rights to the award to the same extent that the arbitration panel would be entitled to obtain payment of an award for costs pursuant to this Title.

SEC. 307. IMMUNITY OF ARBITRATORS.—An arbitrator shall have absolute and complete immunity from any suit directly or indirectly arising from any arbitral activity.

SEC. 308. LIMITATIONS.—The time for commencement of an arbitration proceeding shall be the period specified by applicable State or Federal law for commencement of a suit for damages predicated upon a claim of medical negligence.

SEC. 309. APPLICABILITY TO THE UNITED STATES.—

(a) APPLICABILITY.—The provisions of 28 U.S.C. §§ 2671 through 2680 shall apply to a health care liability action predicated upon an act or omission of any officer or employee of any Federal agency acting within the scope of his or her office or employment.

(b) ATTORNEY'S FEES.—Title 28 of the United States Code is amended by adding a new Section 2412a following 28 U.S.C. § 2412 as follows:

"Award of Attorney's Fees in Health Care Proceedings Involving the United States.

"(a) Except as otherwise specifically provided by statute, attorney's fees may be awarded against the United States in accordance with subsection (b) in a health care liability action brought pursuant to the Federal Tort Claims Act where an arbitration proceeding has resulted in a determination that at least one party has accepted.

"(b) The following standards shall apply to the award of any attorney's fees pursuant to this Section:

"(1) Attorney's fees may be awarded only to a prevailing party in the litigation, subject to paragraphs (2) and (3). The prevailing party shall be entitled to attorney's fees

from the non-prevailing party with respect to and only to the extent that such party prevails on any claim advanced during the litigation, except that the sum of entitled attorney's fees shall not exceed the attorney's fees of the non-prevailing party with regard to such claim.

"(2) In determining the amount of attorney's fees for a private party, the court shall take into account the degree of success obtained by that party relative to its original claim or claims, the prevailing market rates in the area for the kind and quality of the legal services furnished, and any other factors relevant to whether an award of attorney's fees would be reasonable and, if so, what a reasonable amount of attorney's fees would be.

"(3) In determining the amount of attorney's fees of the United States, the court shall determine the number of hours spent by the attorneys employed by the United States on the litigation multiplied by the salaries and benefits paid those attorneys, and an amount for overhead, computed as an hourly rate.

"(c) A party seeking an award of attorney's fees under this Section shall file an application for fees within thirty days of final judgment in the action. The application shall show that the party is eligible to receive an award under this Section and the amount sought, including an itemized statement from any attorney appearing on behalf of the party which sets forth the actual time expended and the rate at which fees are computed. Within thirty days after service of the fee application upon the party against whom the fees are sought to be awarded, that party may file a response setting forth its reasons why an award of fees would not be reasonable or why the amount of fees should be reduced. Where an award of attorney's fees is sought against any party, the attorney for that party shall submit a statement of the total amount of attorney's fees incurred in the litigation in order that the court may determine that the fees sought in the application do not exceed the amount of fees incurred by that party.

"(d) As provided in appropriation acts, awards of attorney's fees received by an agency on behalf of the United States pursuant to this Section shall be credited to an appropriate account of that agency. To the extent provided in advance in appropriation acts, such amounts shall be available only to pay awards of attorney's fees against that agency on behalf of the United States made pursuant to this Section. Each such agency is authorized to pay any shortfall caused if amounts credited to such account are insufficient to pay amounts awarded against such agency on behalf of the United States from funds currently available in such account.

"(e) For the purposes of this Section:

"(1) 'final judgment' means a judgment that is final and not appealable; and

"(2) 'prevailing party' means a party to an action who obtains a favorable final judgment other than by settlement, exclusive of interest, on all or a portion of the claims asserted during the litigation."

#### TITLE IV—FEDERAL IMPLEMENTATION OF HEALTH CARE LIABILITY REFORMS

SEC. 401. LIMITATION ON LIABILITY.—(a) Section 2674 of Title 28, United States Code, is amended by inserting "(a)" at the beginning of the Section, and by adding at the end of the Section the following new subsections:

"(b)(1) Except as provided in paragraph (2) of this subsection, in any health care liability action the United States shall not be found jointly and severally liable for non-

economic damages, but shall be liable, if at all, only for those non-economic damages directly attributable to its pro-rata share of fault or responsibility for the injury, and not for non-economic damages attributable to the pro-rata share of fault or responsibility of any other person (without regard to whether that person is a party to the action) for the injury, including any person bringing the action.

"(2) This subsection shall not apply as between the United States and any person with which it is acting in concert where the concerted action proximately caused the injury for which either the United States or that person is found liable.

"(3) For the purposes of this subsection "concerted action" and "acting in concert" mean the conscious acting together in a common scheme of two or more persons who consciously and deliberately agreed to jointly participate in such conduct with actual knowledge of the wrongfulness of the conduct resulting in a tortious act and where such acts proximately caused the injury complained of by the plaintiff and for which one or more of such persons is found liable for damages.

"(c)(1) Except as provided in subsection (3), the total amount of damages received by an individual shall be reduced, in accordance with subparagraph (2), by any other payment which has been made or which will be made to such individual to compensate such individual for an injury, including payments under—

(i) Federal or State disability or sickness programs;

(ii) Federal, State, or private health insurance programs;

(iii) private disability insurance programs;

(iv) employer wage continuation programs; and

(v) any other source of payment intended to compensate such individual for such injury.

"(2) The amount by which an award of damages to an individual for an injury shall be reduced under subparagraph (1) shall be—

(i) the total amount of any payments (other than such award) which have been made or which will be made to such individual to compensate such individual for such injury, less

(ii) the amount paid by such individual (or by the spouse, parent, or legal guardian of such individual) to secure the payments described in clause (i).

"(3) Subsection (1) shall not apply to any payment which the individual is required by contract or law to repay out of any damages recovered from a negligent health care provider.

"(d)(1) No damages, other than damages for economic loss, shall be awarded in excess of \$250,000 in any health care liability action against the United States.

(b) For purposes of this Section, in addition to the parties within the purview of Section 201(d) of the Health Care Liability Reform and Quality of Care Improvement Act of 1992, any "health care liability action" includes all actions (including multiple actions) for damages, and includes all plaintiffs and all defendants in such actions, which arise out of or were caused by the same personal injury or death, whether or not each defendant is a health care provider.

(c) Cost-of-Living. The amount described in subsection (a), adding 28 U.S.C. § 2674(d)(1), shall be adjusted every three years to reflect changes in the cost-of-living index. The first such adjustment shall be made three years after the date of the enactment of this Act.

For purposes of this subsection, the "cost-of-living index" means the cost of living index utilized by the Secretary in determination of adjustment in Old Age, Survivors, and Disability Insurance benefits."

SEC. 402. PERIODIC PAYMENTS OF JUDGMENTS.—(a) Chapter 171 of title 28, United States Code, is amended by adding the following new Section 2681:

"§2681. Periodic payment of judgments.

In any health care liability action subject to this chapter in which the damages for future economic loss exceed \$100,000, the court shall, at the request of the United States, enter an order providing that damages for future economic loss be paid in whole or in part by periodic payments based on when the damages are found likely to occur rather than by a single lump-sum payment. The court shall make findings of fact as to the dollar amount, frequency and duration of the periodic payments. The United States at its discretion may pay the judgment periodically or purchase an annuity or fund a reversionary trust for the same purpose. The judgment of the court shall be final, and shall not be reopened at any time to contest, amend, or modify the schedule or amount of such payments in the absence of fraud or any ground permitting relief to be granted after entry of a final judgment."

(b) The table of Sections of chapter 171 of title 28, United States Code, is amended by adding at the end thereof the following new item:

§2681. Periodic payments of judgments."

SEC. 403. APPLICABILITY OF AMENDMENTS.

(a) State alternative dispute resolution procedures shall not be applicable to the United States.

(b) For the purposes of Title IV, the term "plaintiff" means any person who has allegedly suffered injury from professional services provided by a health care provider and who brings a health care liability action or who brings such an action on behalf of any person who has allegedly suffered injury from such professional services or who brings such an action because a person allegedly suffered injury from such services.

(c) The amendments made by this Title shall apply to all actions filed on or after, and all administrative claims pending on or presented on or after, the date of enactment of this Act.

#### TITLE V—CONSTRUCTION OF PROVISIONS

SEC. 501. IN GENERAL.—Nothing in this Act shall be construed—

(a) To waive or affect any defense of sovereign immunity asserted by any State under any law or by the United States;

(b) To preempt State choice-of-rules with respect to claims brought by a foreign nation or a citizen of a foreign nation;

(c) To affect the right of any court to transfer venue, to apply the law of a foreign nation, or to dismiss a claim of a foreign nation or of a citizen of a foreign nation on the ground of inconvenient forum;

(d) To create or vest jurisdiction in the district courts of the United States over any health care liability action subject to this Act (which is not otherwise properly in Federal district court); or

(e) To prevent the States from enacting, adopting, or otherwise having in effect more comprehensive or additional health care liability reforms than those set forth in this Act.

SEC. 502. SEVERABILITY.—If any provision of this Act or the amendments made by this Act or the application of the provision to

any person or circumstance is held invalid, the remainder of this Act and such amendments and the application of the provision to any other person or circumstance shall not be affected by that invalidation.

SEC. 503. EFFECTIVE DATE.—This Act shall become effective on its date of enactment.

#### RELEASE FROM THE WHITE HOUSE

To the Congress of the United States:

I am pleased to transmit today for your immediate consideration and enactment the "Health Care Liability Reform and Quality of Care Improvement Act of 1992." Also transmitted is a section-by-section analysis.

This legislative proposal would assist in stemming the rising costs of health care caused by medical professional liability. During recent years, the costs of defensive medical practice and of litigation related to health care disputes have had a substantial impact on the affordability and availability of quality medical care. The bill attacks these very serious problems.

The bill would establish incentives for States to adopt within 3 years quality assurance measures and tort reforms. In addition, the health care reforms would apply to medical care and treatment funded through specific Federal programs pertaining to health care and employee benefits and to claims under the Federal Tort Claims Act. The tort reforms include: (1) a reasonable cap on non-economic damages; (2) the elimination of joint and several liability for those damages; (3) prohibiting double recoveries by plaintiffs; and (4) permitting health care providers to pay damages for future costs periodically rather than in a lump sum.

Last year I recommended enactment of the "Health Care Liability Reform and Quality of Care Improvement Act of 1991." The enclosed bill includes the core provisions of that bill and expands its scope to ensure that treatment under federally funded health care and Federal employee benefit programs is subject to key reforms regardless of State action. Claims arising from such health care would first be considered through a fair system of nonbinding arbitration, in an effort to resolve the claims without litigation.

I urge the prompt and favorable consideration of this proposal, which would complement the other initiatives the Administration is undertaking regarding malpractice and quality of care.

GEORGE BUSH.

THE WHITE HOUSE, July 2, 1992.

#### HEALTH CARE LIABILITY REFORM AND QUALITY OF CARE IMPROVEMENT ACT OF 1992

##### SECTION-BY-SECTION ANALYSIS

###### Analysis of Titles

- I. Findings and Purpose.
- II. Health Care Liability Reforms.
- III. Non-Binding Arbitration.
- IV. Federal Implementation of Health Care Liability Reforms.
- V. Construction of Provisions.

##### INTRODUCTION

This bill, the "Health Care Liability Reform and Quality of Care Improvement Act of 1992," sets forth health care liability reforms, provides incentives to the States to implement these reforms, implements mandatory non-binding arbitration of claims, and enacts health care liability reform at the Federal level. The analysis below summarizes and explains the provisions of the Act.

###### Title 1—Findings and Purpose

Sections 101 and 102 set out the findings and purposes of the Act.

#### Title II—Health Care Liability Reforms

Section 201 sets out definitions of certain terms used in the Act. A key term tied to the application of many provisions of the Act is "health care provider." The definition is intended to broadly include within its sweep all professionals, regardless of their role, engaged in health care activities of any kind.

The term "health care liability action" is intended to cover all judicial proceedings of any kind that may relate to the remedial purposes of the Act. The term is broadly defined to exclude circumvention by artful pleading. It includes health care liability civil actions or proceedings of any kind regardless of the theory of liability (negligence, strict liability, statutory, constitutional or otherwise) pursued.

States must enact health care liability reforms meeting the criteria of Title II to be in compliance with the provisions of this Title.

Section 203 eliminates the application of joint and several liability to non-economic damages in all health care liability actions subject to the Act, except for persons jointly engaged in conscious and deliberate conduct with actual knowledge of its wrongfulness. Subsection (a) requires that the trier of fact determine the percentage of each person's responsibility for the harm for which the action was brought. States may desire to consider whether the limitation on joint and several liability should be applied to economic as well as non-economic damages.

Section 204 imposes a \$250,000 cap on all non-economic damages, including pain and suffering, emotional distress, mental anguish, disfigurement, loss of enjoyment, companionship and services, with a cost of living adjustment as provided in subsection (c). The Secretary of Health and Human Services is empowered to waive the cap requirement "for good cause." The waiver authority is intended to be used sparingly to ensure that non-economic damages are limited within reasonable bounds. The decision of a State Supreme Court declaring a State statute implementing the provision to violate a State constitution may constitute "good cause."

The cap applies to all health care liability actions that arise out of or were caused by the same personal injury or death. For purposes of Section 204, health care liability action is defined (Section 204(b)) to include all medical negligence/malpractice actions for damage and to apply to all plaintiffs and defendants in such actions.

Section 205 prevents double recoveries. The Section reduces awards by the amounts paid (or payable in the future) from other sources to compensate for the injury.

Section 206 provides that no health care provider shall be required to pay damages awarded for future economic loss in a single, lump-sum payment. Instead, payments may be made periodically over the time that the loss is found to be likely to occur. If the court has a reasonable basis for believing that the defendant may not make the periodic payments, subsection (b) authorizes the court to require the purchase of an annuity or the funding of a reversionary trust to make such periodic payments.

Subsection (c) provides that the court order making such periodic payments is final and may be reopened only upon a showing of fraud (the term "fraud" is intended to adopt the term "fraud" as it is applied in the courts) or any ground permitting relief to be granted after entry of a final judgment, pursuant to the standard set forth in Rule 60 of the Federal Rules of Civil Procedures. Therefore, a structured judgment may be reopened

only if a party establishes actual and material dishonesty, i.e., intentional perversion of truth for the purpose of inducing the surrender of a legal right. The Section also provides that it shall not be construed to preclude settlements providing for a single, lump-sum payment in order to avoid limiting the parties' power to reach accommodations to encourage out-of-court settlements.

Section 207 encourages utilization of Alternative Dispute Resolution ("ADR") mechanisms. Subsection (b) provides that the States must have in effect within three years after the enactment of the Act an ADR mechanism, at least as effective in deterring frivolous actions and resulting in fair and expeditious compensation as mediation or pre-trial screening panel mechanisms to be specified in regulations. This Section is applicable to proceedings that are not within the ambit of the mandatory nonbinding arbitration proceedings which Title III establishes.

Sample specifications of an ADR pre-trial screening mechanism are set forth in the Appendix.

Section 208 specifies that to comply with the Act, the States must cooperate with certain Federal research efforts and improve the performance of State medical boards. The process of improving performance would begin with the collection of data on the activity of the boards. This would allow States to know where their performance stands relative to the Secretary's standards. However, States could also achieve compliance by taking actions that the Secretary finds are at least as effective as compliance with standards promulgated for State medical boards. In order to reduce the burden on States pursuing alternative approaches to meeting the quality assurance requirements, subsection (c) requires the Secretary to issue regulations specifying criteria for evaluating the effectiveness of risk management systems for institutions; quality assurance systems; and State programs for promulgation of standards of care in selected areas of medical practice as alternatives to compliance with subsection (b). Activity is already underway in these areas.

Section 209 provides that the States shall establish plans for State implementation to comply with the provisions as set forth in Sections 202 through 208 of the Act.

Section 209(a)(2) authorizes demonstration projects in three States, in lieu of enactment of provisions in keeping with Sections 203 through 207. The demonstration projects would provide for prompt payment of economic damages (not otherwise payable) by agreement, without any determination of fault and in lieu of any health care liability action.

Subsection (b) specifies the Notification procedure by which the State shall certify and document that it has health care liability reforms meeting the Act's criteria in effect.

Subsection (c) provides that the Secretary shall review each Notification and if the Notification demonstrates that the State has in effect such health care liability reforms, the Secretary shall approve the Notification. If the Notification is not approved, the Subsection provides for the submission of a revised Notification and approval process.

Careful review of Notifications is key to ensuring that the Act is implemented according to its terms. Accordingly, the Secretary is vested with discretion to require information to be supplemented in addition to the information required to be submitted with a certification.

Subsection (d) provides that upon a determination of noncompliance, the Secretary

shall provide written notice of such determination and the reasons therefor. If the Secretary determines that, after approval, the State does not have currently in effect the health care liability reforms upon which the Notification approval was based, the Secretary shall give notice of such determination and withdraw approval of the Notification.

Subsection (e) is included to ensure coordination by the Secretary with the Attorney General on questions of tort law and/or policy arising in the course of resolution by the Secretary of whether a determination of compliance or noncompliance shall be made.

Subsection (f) sets out the effects of non-compliance. The health care reforms of Sections 203 through 206 (joint and several liability limitation on non-economic damages, reform of the collateral source rule, and periodic payment of judgments) will apply to all health care liability actions arising more than three years after the effective date of the Act and that arise, in whole or in part, from an injury caused by a health care provider who is entitled to any payment for the health care pursuant to specified Federal health care enactments or the Federal Employee Health Benefits program.

The Incentive Program is set forth in subsection (g). Under this subsection, all Federal domestic discretionary appropriations, except funding for seven specified accounts, will be withheld from States which do not implement the health care liability reforms. Those excepted accounts are the Women, Infant and Children program; the Healthy Start program; the Immunizations program; the Community Health Centers program; the Homeless Health Centers program; the Migrant Health Centers program; and the Unemployment Compensation Administrative Expenses program. The monies will be withheld beginning the fiscal year following the publication of the notice of non-compliance. Whenever the Secretary rescinds a notice of noncompliance, the Federal agencies may obligate the funds for that entire fiscal year to the extent that the funds have not otherwise expired. If a notice of non-compliance is not rescinded before the funds expire, those funds will revert to the general fund of the Treasury.

Section 210 provides that the Secretary may waive this Act's requirements if the State has in place an experimental, pilot, or demonstration project, as defined by regulations promulgated by the Secretary, that, in the judgment of the Secretary, promotes the objectives of the Act.

#### *Title III—Non-Binding Arbitration*

Title III enacts a system of mandatory non-binding arbitration between providers and recipients of health care services. Under this system, non-binding arbitration for alleged injuries arising out of health care and treatment will be utilized notwithstanding any contrary provisions of State law.

Under Section 302, the non-binding arbitration system will apply to (1) health care funded, in whole or in part, under the CHAMPUS program (10 U.S.C. §§ 1079 or 1086), CHAMPVA (38 U.S.C. § 1728), Medicare, Medicaid; and (2) health care provided to persons eligible for payment for the health care (a) pursuant to the Federal Employees Health Benefits program, (b) as a result of participation in an "employee benefit plan," or (c) as a result of participation in a multiple employer welfare arrangement as defined in the Employee Retirement Income Security Act (ERISA). The bill also provides for non-binding arbitration for disputes related to health care where the health care costs are reim-

bursable pursuant to any law providing for health insurance networks.

Section 303 preempts and supersedes any State law to the extent set forth in this Title.

Section 304 requires resort by the parties to non-binding arbitration. Failure to submit a claim to non-binding arbitration shall be a complete defense to a subsequent health care liability action.

Section 305 provides for the establishment of an arbitration process. States are encouraged to establish arbitration processes consistent with the provisions of the Section. If a State does not have an arbitration process in effect, the Secretary is authorized to provide for an arbitration procedure by regulation. The Attorney General is to establish an arbitration system for claims within the purview of the Federal Tort Claims Act. Any system established pursuant to this Section shall require that if a party rejects an award that another party accepts and falls to obtain an outcome in subsequent proceedings that is at least ten percent more favorable, the party that rejected the award shall pay the opposing parties' reasonable costs and attorney's fees incurred subsequent to the rejection.

Section 306 provides that the arbitration award shall be made in accordance with applicable State and Federal law. "State and Federal law" includes the reforms that Title II enacts. In addition, Section 306 provides for payment of arbitration fees.

Section 307 assures that arbitrators shall have absolute and complete immunity from suit.

State or Federal statutes of limitations are preserved pursuant to Section 308.

Section 309 applies the non-binding arbitration system to claims within the purview of the Federal Tort Claims Act.

#### *Title IV—Federal Implementation of Health Care Liability Reforms*

Federal health care liability reforms will be implemented pursuant to Title IV. These reforms amend the Federal Tort Claims Act.

Under Section 401, joint and several liability is limited similarly as in Section 203. The Section also limits the collateral source rule in a manner similar to Section 205. Section 401 places a cap of \$250,000 on the amount of non-economic damages that can be awarded against the United States. This Section is the analogue of Section 204.

Section 402 amends the Federal Tort Claims Act by authorizing periodic payment of judgments. This Section is similar to Section 206.

The court would make the determination as to the amount, frequency and duration of the payments, and the United States could then make the payments periodically, either by periodic payments directly out of the Judgment Fund or by purchasing an annuity or funding a reversionary trust to make the payments.

Section 403 provides that Title IV is intended to apply to all actions filed on or after, and all administrative claims pending on or after, the enactment of the Act.

Title II's Alternative Dispute Resolution procedures are not to be applied to the United States. The Federal Tort Claims Act already has in place a well functioning system of low-cost alternative dispute resolution, which will be supplemented by title III.

#### *Title V—Construction of Provisions*

Section 501 provides that the Act does not waive or affect sovereign immunity defenses, preempt State choice-of-law rules regarding claims by foreign nationals, and create or vest jurisdiction in Federal courts.

Section 501 also makes it clear that the Act sets forth the acceptable level of compliance with respect to health care liability reforms. However, the States may, if they determine to do so, implement additional or supplemental health care liability reforms that limit liability or otherwise supplement the requirements that the Act imposes.

Section 502 is a severability clause that would preserve the balance of the Act if any portion of it is held to be invalid.

Section 503 provides that the Act shall become effective on the date of enactment.

#### APPENDIX

##### *Sample Specifications Establishing An Effective State Pre-trial Screening Panel*

(1) A Panel shall have at least three members and may sit as a single body or in smaller units of at least three members. Each Panel shall include at least one licensed or certified health care professional representative to be agreed upon by the parties, one person admitted to practice law in the State in which the Panel sits, and may include such other members as the Attorney General of such State may provide. Wherever practicable, a representative from each health care specialty involved in a dispute under this section shall be appointed to the Panel hearing such case, except that not more than three health care professionals shall serve on any Panel.

(2) Claims alleging professional negligence shall be decided according to the law of the State in which a Panel sits. The Panel shall, whenever practicable, decide a claim within 6 months after the date on which the claim is filed with the Panel. One continuance, not to exceed 90 days, may be granted to any party upon a showing that extraordinary circumstances and the interests of justice warrant the continuance. A Panel may dismiss any claim or defense it determines to be frivolous and impose administrative costs (not to exceed \$10,000) upon a party whose claim or defense is so dismissed.

(3) After hearing all the evidence presented by the parties, a Panel shall decide whether or not the person alleging injury established professional negligence and, if so, whether that injury resulted from such negligence. Not later than 30 days after the conclusion of the hearing of the evidence (unless a delay is necessary due to extraordinary circumstances), a Panel shall transmit a written decision to the parties. The decision shall include a statement of the findings of fact and conclusions of law on which the Panel based its decision. A party to a claim decided by a Panel shall be entitled to file an action in the court of appropriate jurisdiction. The entire written record of the Panel proceedings, including the determination made, shall be admissible in a trial of such an action.

#### ADDITIONAL COSPONSORS

S. 39

At the request of Mr. REID, his name was added as a cosponsor of S. 39, a bill to amend the National Wildlife Refuge Administration Act.

S. 492

At the request of Mr. SIMON, the name of the Senator from North Dakota [Mrs. BURDICK] was added as a cosponsor of S. 492, a bill to amend the National Labor Relations Act to give employers and performers in the live performing arts, rights given by sec-

tion 8(e) of such Act to employers and employees in similarly situated industries, to give to such employers and performers the same rights given by section 8(f) of such Act to employers and employees in the construction industry, and for other purposes.

S. 1159

At the request of Mr. REID, his name was added as a cosponsor of S. 1159, a bill to provide for the labeling or marking of tropical wood and tropical wood products sold in the United States.

S. 1931

At the request of Mr. KERRY, the name of the Senator from Iowa [Mr. HARKIN] was added as a cosponsor of S. 1931, a bill to authorize the Air Force Association to establish a memorial in the District of Columbia or its environs.

At the request of Mr. GORE, the name of the Senator from Vermont [Mr. JEFFORDS] was added as a cosponsor of S. 1931, supra.

S. 2667

At the request of Mr. HEFLIN, the names of the Senator from Kansas [Mrs. KASSEBAUM], the Senator from Tennessee [Mr. SASSER], and the Senator from Mississippi [Mr. LOTT] were added as cosponsors of S. 2667, a bill to amend the Federal Food, Drug, and Cosmetic Act to clarify the application of the Act with respect to alternate uses of new animal drugs and new drugs intended for human use.

S. 2810

At the request of Mr. GRASSLEY, the names of the Senator from California [Mr. SEYMOUR], the Senator from Vermont [Mr. JEFFORDS], the Senator from Idaho [Mr. SYMMS], the Senator from Michigan [Mr. RIEGLE], and the Senator from Georgia [Mr. FOWLER] were added as cosponsors of S. 2810, a bill to recognize the unique status of local exchange carriers in providing the public switched network infrastructure and to ensure the broad availability of advanced public switched network infrastructure.

At the request of Mr. GORE, the name of the Senator from Montana [Mr. BAUCUS] was added as a cosponsor of S. 2810, supra.

S. 2835

At the request of Mr. HATCH, the name of the Senator from Wyoming [Mr. SIMPSON] was added as a cosponsor of S. 2835, a bill to amend the Federal Food, Drug, and Cosmetic Act to establish provisions regarding the composition and labeling of dietary supplements.

S. 2949

At the request of Mr. KENNEDY, the name of the Senator from Iowa [Mr. GRASSLEY] was added as a cosponsor of S. 2949, a bill to amend the Public Health Service Act to provide for the conduct of expanded research and the establishment of innovative programs

and policies with respect to traumatic brain injury, and for other purposes.

S. 3241

At the request of Mr. HOLLINGS, the name of the Senator from California [Mr. CRANSTON] was added as a cosponsor of S. 3241, a bill to award a congressional gold medal to John Birks "Dizzy" Gillespie.

#### SENATE JOINT RESOLUTION 293

At the request of Mr. SASSER, the names of the Senator from Maine [Mr. COHEN], and the Senator from Florida [Mr. GRAHAM] were added as cosponsors of Senate Joint Resolution 293, a joint resolution designating the week beginning November 1, 1992, as "National Medical Staff Services Awareness Week."

#### SENATE JOINT RESOLUTION 342

At the request of Mr. SPECTER, the name of the Senator from Missouri [Mr. BOND] was added as a cosponsor of Senate Joint Resolution 342, a joint resolution designating May 2, 1993, through May 8, 1993, as "National Walking Week."

#### SENATE JOINT RESOLUTION 344

At the request of Mr. WELLSTONE, the name of the Senator from Maryland [Ms. MIKULSKI] was added as a cosponsor of Senate Joint Resolution 344, a joint resolution to prohibit the proposed sale to Saudi Arabia of F-15 aircraft.

#### SENATE CONCURRENT RESOLUTION 137

At the request of Mr. WELLSTONE, the name of the Senator from Iowa [Mr. HARKIN] was added as a cosponsor of Senate Concurrent Resolution 137, a concurrent resolution to express the sense of Congress that the Comptroller General of the United States should conduct a study of the economic impacts of Order No. 636 of the Federal Energy Regulatory Commission on residential, commercial, and other end-users of natural gas, and that the Federal Energy Regulatory Commission should refrain from processing restructuring proceedings pursuant to the order during the 60-day period after the submittal to Congress of the results of the study.

#### SENATE RESOLUTION 109

At the request of Mr. REID, his name was added as a cosponsor of Senate Resolution 109, a resolution exercising the right of the Senate to change the rules of the Senate with respect to the "fast track" procedures for trade implementation bills.

#### SENATE CONCURRENT RESOLUTION 142—DIRECTING THE CLERK OF THE HOUSE TO MAKE CORRECTIONS IN THE ENROLLMENT OF H.R. 429

Mr. FORD (for Mr. JOHNSTON) submitted the following concurrent resolution; which was considered and agreed to:

## S. CON. RES. 142

Resolved by the House of Representatives (the Senate Concurring), That in the enrollment of the bill (H.R. 429) to amend certain Federal reclamation laws to improve enforcement of acreage limitations, and for other purposes, the Clerk of the House of Representatives shall make the following additional corrections:

In section 3004(b), delete "eighteen" and insert in lieu thereof "twenty-two".

Amend section 212 to read as follows:

**SEC. 212. CROPS FOR WHICH AN ACREAGE REDUCTION PROGRAM IS IN EFFECT.**

Notwithstanding any other provision of law relating to a charge for irrigation water supplied to crops for which an acreage reduction program is in effect, until the construction costs of the facilities authorized by this title are repaid, the Secretary is directed to charge an acreage reduction program crop production charge equal to 10 percent of full cost for all water delivered by the Central Utah Water Project, as defined in section 202 of the Reclamation Reform Act of 1982 (43 U.S.C. 390bb), for the delivery of project water used in the production of any crop of an agricultural commodity for which an acreage reduction program is in effect under the provision of the Agricultural Act of 1949, as amended, if the total supply of such commodity for the marketing years in which the bulk of the crop would normally be marketed is in excess of the normal supply as determined by the Secretary of Agriculture. The Secretary of the Interior shall announce the amount of the acreage reduction program crop production charge for the succeeding year on or before July 1 of each year.

**SENATE RESOLUTION 357—REQUIRING FINANCIAL IMPACT STATEMENT IN THE REPORT ON A BILL**

Mr. HEFLIN submitted the following resolution; which was referred to the Committee on Rules and Administration:

## S. RES. 357

Resolved, That paragraph 11 of rule XXVI of the Standing Rules of the Senate is amended—

(1) in subparagraph (c) by striking "(a) and (b)" and inserting "(a), (b), and (c)";

(2) by redesignating subparagraph (c) as subparagraph (d); and

(3) by inserting after subparagraph (b) the following:

"(c) Each such report (except those by the Committee on Appropriations) shall also contain—

"(1) an evaluation, made by such committee, of the financial impact that any Federal mandates in the bill or joint resolution would have on State and local governments; or

"(2) in lieu of such evaluation, a statement of the reasons why compliance by the committee with the requirements of clause (1) is impracticable."

Mr. HEFLIN. Mr. President, I rise today to submit a resolution which I hope my colleagues will study over the next few months because I plan to reintroduce it and push for its enactment when the 103d Congress convenes in January. This resolution would amend the Standing Rules of the Senate to require that a financial impact statement be included in the report accom-

panying each bill reported by a Senate committee, showing the financial impact which any Federal mandates in the bill would have on State and local governments. I know that my colleagues are all acutely aware of the very serious budget problems facing many of our 50 States and local governments therein and that they share my belief that Congress must not take lightly legislative decisions which impact their budgets.

As we all know, Federal funds to State and local governments have declined precipitously since the early 1980's. Funding from the Environmental Protection Agency for water and sewer projects declined from \$365 million to \$230 million. Job training funds declined from \$6.5 billion to \$2.5 billion. The Community Development Block Grant Program which provided \$3.7 billion to communities in 1981 was whittled away at for years and has only now caught up with its 1981 level of funding. Of course, that does not include an adjustment for inflation. Meanwhile, the Urban Development Action Grant Program has been totally eliminated. Also abandoned is the Revenue Sharing Program which in 1981 provided \$4.5 billion to State and local governments in flexible funding to meet the types of Federal Government mandates which have other levels of governments in a State of near-rebellion today.

Currently, the Senate requires that any committee reporting out a bill or resolution provide an estimate of the cost of Federal money incurred in carrying out that bill or resolution. I think we would all agree that this information has become indispensable in conducting the business of the Senate and has become an important tool in trying to encourage responsible and informed policymaking. Likewise, the resolution I submit today will provide information necessary to more fully assess the ramifications of proposals pending in the Congress and serve to remind us all that nothing is free. Increased information, accountability and responsibility will be encouraged by a proposal of this type and I hope my colleagues will share my belief that such a proposal would be in the best interests of the various levels of government in our country and a step toward sounder economic ground for the people of the United States.

**SENATE RESOLUTION 358—ESTABLISHING THE SENATE GATT NEGOTIATIONS OBSERVER GROUP**

Mr. DOLE (for himself and Mr. PRESSLER) submitted the following resolution; which was referred to the Committee on Rules and Administration:

## S. RES. 358

Resolved,

## SHORT TITLE

SECTION 1. This resolution may be referred to as the "Senate GATT Negotiations Observer Group Resolution".

## ESTABLISHMENT

SEC. 2. (a) There is established a bipartisan group of Senators to be known as the Senate GATT Negotiations Observer Group (hereafter in this resolution referred to as the "Observer Group"), which shall consist of ten Senators as follows:

(1) the Majority Leader and Minority Leader of the Senate, each serving ex officio; and

(2) eight Senators appointed as follows:

(A) Four Senators appointed by the Majority Leader from among Members of the majority party.

(B) Four Senators appointed by the Minority Leader from among the Members of the minority party.

(b)(1) The Chairman of the Observer Group shall be designated by the Majority Leader from among the individuals recommended for appointment under subsection (a)(2)(A).

(2) The Co-Chairman of the Observer Group shall be designated by the Minority Leader from among the individuals recommended for appointment under subsection (a)(2)(B).

(c) Any vacancy occurring in the membership of the Observer Group shall be filled in the same manner in which the original appointment was made.

## DUTIES

SEC. 3. The duties of the Observer Group shall be to monitor the conclusion of the Uruguay round of GATT negotiations.

## STAFF; TRAVEL

SEC. 4. (a) The Observer Group is authorized, from funds made available under section 6, to employ such staff (including consultants at a daily rate of pay) in the manner and at a rate not to exceed that allowed for employees of a standing committee of the Senate under paragraph (3) of section 105(e) of the Legislative Branch Appropriation Act, 1968 (2 U.S.C. 61-1(e)), and to incur such expenses as may be necessary or appropriate to carry out its duties and functions.

(b)(1) The Chairman and Co-Chairman shall jointly appoint and fix the compensation of appropriate staff personnel to serve the Observer Group, including clerical staff as deemed necessary. The staff appointments shall be made in writing to the Secretary of the Senate.

(2) In addition to the staff personnel described in paragraph (1), the Chairman and Co-Chairman each are authorized to designate one professional staff member who shall serve all of the members of the Observer Group and shall carry out such other functions as their respective Chairman or Co-Chairman may specify.

(c) The Majority Leader and the Minority Leader may each designate one staff member as liaison to serve the Observer Group, and such personnel may be referred to as leadership staff. Funds necessary to compensate leadership staff shall be transferred from the funds made available under section 6(b) of this resolution to the respective account from which such designated staff member is paid.

(d) All foreign travel of the Observer Group shall be authorized jointly by the Majority and Minority Leaders, upon the recommendation of both the Chairman and Co-Chairman. Participation by staff members in authorized foreign travel by the Observer Group, access to all official activities and functions by the Observer Group during such travel, and access to all classified briefings and information made available to the Ob-

server Group during such travel, shall be limited exclusively to delegation members with appropriate clearances.

No travel or other funding shall be authorized by any committee of the Senate for the use of staff, other than delegation staff, in regard to the activities described in this subsection, without the written authorization of the Majority and the Minority Leader to the chairman of such committee.

(e)(1) Except as provided in paragraph (2), of the Members of the Senate, only Senators appointed as members of the Observer Group may participate in official travel and activities of the Observer Group.

(2) In the event that either the Majority Leader or Minority Leader of the Senate does not travel on an official trip of the Observer Group, then that Leader may designate one other Senator of his party who is not a member of the Observer Group to travel and participate in the activities of the Observer Group in his stead, except that the Leader shall not designate a Senator under this paragraph if more than four other members of the Observer Group from that Leader's party will participate in that trip.

#### ACCESS TO AND STORAGE OF DOCUMENTS

SEC. 5. (a) The Observer Group should make arrangements with the Executive Branch to provide, on a confidential basis, access to the record of any dialogue or negotiations that may take place relating to the conclusion of the Uruguay round.

#### FUNDS

SEC. 6. (a) The expenses of the Observer Group shall be paid from the contingent fund of the Senate, out of the account of Miscellaneous Items, upon vouchers approved jointly by the Chairman and Co-Chairman (except that vouchers shall not be required for the disbursement of salaries of employees who are paid at an annual rate). For any fiscal year, not more than \$200,000 shall be expended for staff (including consultants) and for expenses (excepting expenses incurred for foreign travel).

(b) In addition to the amount referred to in section 6(a), for any fiscal year, not more than \$80,000 shall be expended from the contingent fund of the Senate, out of the account of Miscellaneous Items, for leadership staff as designated in section 4(c) for salaries and expenses (excepting expenses incurred for foreign travel).

(c)(1) of the amount authorized in section 6(a), an amount not to exceed \$27,500 may be spent by the Observer Group, with the prior approval of the Committee on Rules and Administration, to procure the temporary services (not in excess of one year) or intermittent services, including related and necessary expenses, of individual consultants, or organizations thereof, to make studies or advise the Observer Group.

(2) Such services in the cases of individuals or organizations may be procured by contract as independent contractors or, in the case of individuals, by employment at daily rates of compensation not in excess of the per diem equivalent to the highest gross rate of compensation which may be paid to a regular employee of a standing committee of the Senate. Such contracts shall not be subject to the provisions of section 3709 of the Revised Statutes (41 U.S.C. 5) or any other provisions of law requiring advertising.

(3) The Observer Group shall submit to the Committee on Rules and Administration information bearing on the qualifications of each consultant whose services are procured pursuant to this subsection, including organizations, and such information shall be re-

tained by the Observer Group and shall be made available for public inspection upon request.

#### TERMINATION DATE

SEC. 7. The provisions of this resolution shall terminate upon the adjournment sine die of the One Hundred Third Congress.

Mr. DOLE. Mr. President, I send to the desk a resolution to establish the GATT Negotiations Observer Group.

Mr. President, our Nation faces new challenges and new opportunities in the global marketplace. The opportunities for Americans are obvious—the expansion of markets for American products and the creation of new industries, new technologies, and new jobs for all Americans.

But, the challenges that our Nation faces from international competitors are many. To meet them and ensure that our Nation remains the largest exporter in the world, the ongoing GATT negotiations will take on an ever-growing importance.

The Uruguay round of the GATT negotiations have been ongoing for over 4 years and are at a critical juncture. The key to resolving the impasse lies with completion of an agricultural sector agreement.

In fact, agriculture will be the primary topic of discussion during the weekend GATT meetings of Ambassador Hills with the chief negotiators of some of the European Community.

My colleague from South Dakota, Senator PRESSLER, suggested this resolution and I think it is a good idea.

We need to establish a bipartisan group of Senators with the expertise to monitor future negotiations and review the process. This will not be an easy task; it will demand a comprehensive knowledge of international law and treaties and a thorough understanding of international trade.

I believe that the best way to monitor these difficult and complex negotiations will be to establish a GATT Observer Group consisting of Senators with the necessary expertise in international law and trade.

When the Senate was faced with reviewing the arms control agreements, we established the Arms Control Observer Group. This group monitored the arms control process with all the knowledge and diligence that its national security implications warranted.

The Senate will ultimately vote on the agreement. The knowledge that the Observer Group will obtain through their review of the negotiations will ensure that the agreement represents the best interest of the United States. I am sure that the GATT Negotiations Observer Group will protect our position in the international marketplace with the same dedication.

#### SENATE OBSERVER GROUP FOR THE GATT NEGOTIATIONS

Mr. PRESSLER. Mr. President, I want to thank the minority leader for introducing a Senate resolution on my

behalf calling for the establishment of a Senate observer group to attend the GATT negotiations. As I said on the floor earlier this week, the establishment of such a group would send a meaningful message to the other GATT countries that the United States is intent on achieving fair revision of the GATT.

On September 30, I wrote to the majority and minority leaders suggesting the establishment of a Senate observer group for the Uruguay round GATT negotiations. I know it is late in the session and that it may not be possible to establish the group this year. However, if we are unable to do so, I do hope the establishment of an observer group will be one of the first items of business for the Senate when the 103d Congress convenes next January.

I want to thank the minority leader for following up on my request so quickly. I think he would agree with me that a new GATT agreement that ensures freer and fairer trade could bring tremendous benefits to American agriculture by opening more world markets to U.S. farmers and ranchers.

#### SENATE RESOLUTION 359—TENDERING THE THANKS OF THE SENATE TO THE VICE PRESIDENT

Mr. DOLE (for himself and Mr. MITCHELL) submitted the following resolution; which was considered and agreed to:

#### S. RES. 359

*Resolved*, That the thanks of the Senate are hereby tendered to the Honorable Dan Quayle, Vice President of the United States and President of the Senate, for the courteous, dignified, and impartial manner in which he has presided over its deliberations during the second session of the One Hundred Second Congress.

#### SENATE RESOLUTION 360—TENDERING THE THANKS OF THE SENATE TO THE PRESIDENT PRO TEMPORE

Mr. MITCHELL (for himself and Mr. DOLE) submitted the following resolution; which was considered and agreed to:

#### S. RES. 360

*Resolved*, That the thanks of the Senate are hereby tendered to the Honorable Robert C. Byrd, President pro tempore of the Senate, for the courteous, dignified, and impartial manner in which he has presided over its deliberations during the second session of the One Hundred Second Congress.

#### SENATE RESOLUTION 361—COMMENDING THE LEADERSHIP OF THE MAJORITY LEADER

Mr. DOLE submitted the following resolution; which was considered and agreed to:

#### S. RES. 361

*Resolved*, That the thanks of the Senate are hereby tendered to the distinguished Major-

ity Leader, the Senator from Maine, the Honorable George J. Mitchell, for his exemplary leadership and the cooperative and dedicated manner in which he has performed his leadership responsibilities in the conduct of Senate business during the second session of the 102d Congress.

**SENATE RESOLUTION 362—COMMENDING THE LEADERSHIP OF THE REPUBLICAN LEADER**

Mr. MITCHELL submitted the following resolution; which was considered and agreed to:

S. Res. 362

*Resolved*, That the thanks of the Senate are hereby tendered to the distinguished Majority Leader, the Senator from Kansas, the Honorable Robert Dole, for his exemplary leadership and the cooperative and dedicated manner in which he has performed his leadership responsibilities in the conduct of Senate business during the second session of the 102d Congress.

**SENATE RESOLUTION 363—TO AMEND THE STANDING RULES OF THE SENATE**

Mr. MITCHELL (for himself and Mr. DOLE) submitted the following bill; which was considered and agreed to:

S. RES. 363

Whereas, it is the fundamental policy of the Senate to favor openness and public access to information;

Whereas, notwithstanding the Senate's policy of openness, committees, subcommittees, and offices of the Senate at times properly treat their business and proceedings as confidential in order to effectively perform their functions, and to protect the privacy and other interests of individuals and organizations who provide information or are the subject of inquiry;

Whereas, when it is determined that a committee, subcommittee, or office of the Senate should treat a proceeding or matter as confidential, a breach of that confidentiality is destructive of mutual trust and respect, reflects poorly on the institution, and may seriously harm the privacy and other interests of individuals and organizations;

Whereas, the Standing Rules of the Senate should explicitly prohibit the unauthorized disclosure of the confidential business and proceedings of the committees, subcommittee, and offices of the Senate: Now therefore be it

*Resolved*, That paragraph 5 of Rule XXIX of the Standing Rules of the Senate is amended by—

(1) Striking "or officer" and inserting", officer, or employee";

(2) inserting ", including the business and proceedings of the committees, subcommittees and offices of the Senate," after "proceedings of the Senate"; and

(3) inserting "or employee" after "if an officer".

**SENATE RESOLUTION 365—EXTENDING THE PROVISIONS OF SENATE RESOLUTION 105 OF THE 101ST CONGRESS, THE SENATE ARMS CONTROL OBSERVER GROUP RESOLUTION**

Mr. FORD (for Mr. MITCHELL, for himself and Mr. DOLE) submitted the

following resolution; which was considered and agreed to.

S. RES. 365

*Resolved*, That the provisions of Senate Resolution 105 of the One Hundred First Congress (agreed to April 13, 1989) (as extended by Senate Resolution 358 of the One Hundred First Congress (agreed to October 28, 1990)) shall remain in effect until March 31, 1993.

**SENATE RESOLUTION 366—EXTENDING THE PROVISIONS OF SENATE RESOLUTION 106 OF THE 101ST CONGRESS (AGREED TO APRIL 13, 1989)**

Mr. FORD (for Mr. MITCHELL, for himself and Mr. DOLE) submitted the following resolution; which was considered and agreed to.

S. RES. 366

*Resolved*, That section 9 of Senate Resolution 106 of the One Hundred First Congress (agreed to April 13, 1989) (as amended by Senate Resolution 351 of the One Hundred First Congress (agreed to October 27, 1990)) is amended by striking "upon" through "Congress" and inserting in lieu thereof "on March 31, 1993".

**AMENDMENTS SUBMITTED**

**EXCHANGE OF CERTAIN LANDS IN COLORADO**

**BROWN AMENDMENT NO. 3434**

Mr. SIMPSON (for Mr. BROWN) proposed an amendment to the bill (H.R. 1182) to authorize and direct the exchange of lands in Colorado, as follows:

On page 13, line 18, strike "of" and insert in lieu thereof, "after".

On page 14, beginning on line 2, strike, "No such provision of water to the United States shall in any way be construed to constitute an abandonment of such water by the Counties".

**SENSE OF THE SENATE WITH RESPECT TO REGULATIONS OF THE OCCUPATIONAL SAFETY AND HEALTH ADMINISTRATION**

**HATCH AMENDMENT NO. 3435**

Mr. SIMPSON (for Mr. HATCH) proposed an amendment to the concurrent resolution (S. Con. Res. 17) expressing the sense of the Congress with respect to certain regulations of the Occupational Safety and Health Administration, as follows:

On page 2, beginning on line 3, strike out "before the expiration of the One Hundred Second Congress" and insert in lieu thereof "within one year of passage of this resolution".

**EXTENSION OF OLESTRA PATENTS**

**GLENN (AND OTHERS) AMENDMENT NO. 3436**

Mr. FORD (for Mr. GLENN, for himself Mr. RIEGLE, Mr. LEVIN, Mr. DECONCINI,

Mr. HATCH, and Mr. ADAMS) proposed an amendment to the bill (S. 1506) to extend the terms of the olestra patents, and for other purposes, as follows:

Strike out all after the enacting clause and insert in lieu thereof the following:

**SECTION 1. PATENT EXTENSION.**

That the Secretary of Commerce, acting through the Commissioner of Patents shall, when United States Patent Number 3,892,824 (relating to the drugs S-2-(3-aminopropylamino) ethyl dihydrogen phosphorothioate (Ethiofos) and S-3-(3-methylaminopropylamino) propyl dihydrogen phosphorothioate, including hydrates and alkali metal salts thereof) expires, or as soon thereafter as possible, extend such patent for three years, with all the rights pertaining thereto.

**SEC. 2. STATUTORY EXTENSION OF PATENT TERMS.**

(a) IN GENERAL.—The Congress finds that, in the future, any bill providing for the extension of the term of a patent should not be approved by the Congress unless the requirements set forth in subsection (b) or (c) are met.

(b) REQUESTS BASED ON DELAY IN PREMARKET APPROVAL.—When the basis for a bill providing for a patent extension is delay in premarket regulatory approval of a patented invention, the following requirements should be met before the bill is approved by the Congress:

(1) GOVERNMENTAL MISCONDUCT.—(A) Delay in the approval process must have been beyond the control of the patent holder and directly caused by governmental misconduct.

(B) For purposes of this paragraph, governmental misconduct is established by presentation of adequate proof of—

- (i) dishonest or deceitful conduct,
- (ii) vindictive or retaliatory action, or
- (iii) serious failure to perform governmental duties or comply with governmental standards,

by the Federal Government.

(C) Unusual or unexpected delay alone does not constitute governmental misconduct for purposes of this paragraph.

(2) UNJUSTIFIED INJURY TO THE PATENT HOLDER.—The governmental misconduct under paragraph (1) must have caused a substantial inequity to the patent holder who, without the extension of the patent term, will suffer material harm directly attributable to the delay in the approval process. The unjustified harm to the patent holder if relief is not granted must outweigh any harm to the public (such as through higher prices) or to competitors that will result from extension of the patent.

(3) EXPIRED PATENTS.—Expired patents shall not be revived and extended, except under the most extraordinary and compelling circumstances. In no such case shall an extension be granted unless the patent holder exercised due diligence to prevent the invention from entering the public domain.

(4) INTERVENING RIGHTS.—In the event extraordinary circumstances justify the revival and extension of an expired patent, intervening rights shall be extended to persons using the subject matter of the patent after its expiration. Such rights shall not be provided in the case of statutory extension of unexpired patents, except that, in a case in which extreme injustice would result from the failure to provide such rights, they may be extended to persons who have, in good faith expectation of the expiration of the patent, made substantial preparation for use of the subject matter of the patent after its expiration.

(c) OTHER REQUESTS.—When the basis for a bill providing for a patent term extension is other than delay in premarket regulatory approval, the following requirements should be met before the bill is approved by the Congress:

(1)(A) Either governmental misconduct (as described in subsection (b)(1)), or action or inaction by the United States Government, contributed substantially to significant injury to the patent rights of the person requesting extension of the patent.

(B) For purposes of subparagraph (A), the action or inaction by the Government need not constitute governmental misconduct (as described in subsection (b)(1)), but must be of such a nature as to create a moral or ethical obligation on the part of the Government to provide relief to a person whose patent rights have been substantially injured by the action or inaction by the Government. Such action or inaction may include altering, by statute or rule, the regulatory approval procedures, standards, or requirements in a case in which there has been material reliance by an applicant on the prior procedures, standards, or requirements.

(2) The requirements set forth in paragraphs (2) through (4) of subsection (b) are met, except that—

(A) the reference in subsection (b)(2) to "governmental misconduct" shall be deemed to include, as applicable, the action or inaction by the Government described in paragraph (1) of this subsection; and

(B) the reference in subsection (b)(2) to "delay in the approval process" shall be deemed to refer to "governmental misconduct", which shall be deemed to include, as applicable, the action or inaction by the Government described in paragraph (1) of this subsection.

(d) LACK OF DUE DILIGENCE.—Notwithstanding the preceding provisions of this section, in no case should the Congress approve a bill providing for the extension of the term of a patent in the case of delay attributable to a lack of due diligence by the patent holder.

#### SEC. 3. PATENT EXTENSION FOR NONSTEROIDAL ANTI-INFLAMMATORY DRUGS.

(a) IN GENERAL.—The term of United States patent numbered 3,793,457 shall be extended for a period of 2 years beginning on the date of its expiration.

(b) LIMITATION ON RIGHTS.—The rights derived from any patent which is extended by this section shall be limited during the period of such extension to any use for which the subject matter of the patent was approved by the Food and Drug Administration before the date of the enactment of this Act.

#### SEC. 4. PATENT TERM EXTENSION FOR OLESTRA.

(a) IN GENERAL.—The terms of United States patents numbered 4,005,195, 4,005,196, and 4,034,083 (and any reissues of such patents) shall each be extended for a period beginning on the date of its expiration through December 31, 1997.

(b) POST-MARKET SURVEILLANCE.—At the time that the owner of record of the patent requests that the Commissioner of Patents and Trademarks certify its patent extension, it shall submit with such request a statement from the Commissioner of the Food and Drug Administration indicating that the Food and Drug Administration and the proposed marketing entity for olestra have agreed upon a post-market surveillance program which shall provide data regarding the influence of olestra-containing products upon the overall dietary intake of fats. Such data shall be subject to the usual standards of professional peer review. At the end of the

study period, such data shall be submitted to the Food and Drug Administration for review. Such study data shall be in a format which shall be made available to Congress for public review. The requirements of this section shall not in any manner preempt the authority of the Food and Drug Administration to request and to receive any other information it deems necessary in the course of its ongoing regulatory activities.

#### SEC. 5. EXTENSION OF PATENT FOR INSIGNIA.

A certain design patent numbered 29,611, which was issued by the United States Patent Office on November 8, 1898, which is the insignia of the United Daughters of the Confederacy, and which was renewed and extended for a period of 14 years by the Act entitled "An Act granting an extension of patent to the United Daughters of the Confederacy", approved November 11, 1977 (Public Law 95-168; 91 Stat. 1349), is renewed and extended for an additional period of 14 years beginning on the date of the enactment of this Act, with all the rights and privileges pertaining to such patent.

#### SEC. 6. PATENT TERM EXTENSIONS FOR AMERICAN LEGION.

(a) BADGE OF AMERICAN LEGION.—The term of a certain design patent numbered 54,296 (for the badge of the American Legion) is renewed and extended for a period of 14 years beginning on the date of the enactment of this Act, with all the rights and privileges pertaining to such patent.

(b) BADGE OF AMERICAN LEGION WOMEN'S AUXILIARY.—The term of a certain design patent numbered 55,398 (for the badge of the American Legion Women's Auxiliary) is renewed and extended for a period of 14 years beginning on the date of the enactment of this Act, with all the rights and privileges pertaining to such patent.

(c) BADGE OF SONS OF THE AMERICAN LEGION.—The term of a certain design patent numbered 92,187 (for the badge of the Sons of the American Legion) is renewed and extended for a period of 14 years beginning on the date of the enactment of this Act, with all the rights and privileges pertaining to such patent.

#### SEC. 7. INTERVENING RIGHTS.

The renewals and extensions of the patents under sections 5 and 6 shall not result in infringement of any such patent on account of any use of the subject matter of the patent, or substantial preparation for such use, which began after the patent expired but before the enactment of this Act.

#### CACHE LA POUVRE RIVER NATIONAL WATER HERITAGE AREA

#### BROWN AMENDMENT NO. 3437

Mr. FORD (for Mr. BROWN) proposed an amendment to the bill (S. 1174) to establish the Cache La Poudre River National Water Heritage Area in the State of Colorado, as follows:

In section 3(a), strike paragraph (6) in its entirety and insert in lieu thereof the following:

"(6) an evaluation of the demonstration project undertaken by the Secretary pursuant to subsection (d), including recommendations for the disposition of any lands acquired pursuant to such project."

At the end of section 3, insert the following new subsection:

(d) DEMONSTRATION PROJECT.—(1) In furtherance of the purposes of this Act, the Sec-

retary, in consultation with the Cache La Poudre River Heritage Commission established by section 4, is authorized to undertake a demonstration project to evaluate the potential of using voluntary land exchanges within the Cache La Poudre River floodplain (hereinafter referred to as the "floodplain") as a means to provide for the long-term preservation and management of the lands within the floodplain.

(2) During the period of the study, the Secretary or the head of a Federal agency is authorized to acquire lands within the floodplain in Larimer and Weld Counties in the State of Colorado only through voluntary land exchanges: *Provided*, That such land exchanges shall be on an equal value basis, and shall be conducted in accordance with applicable law.

(3) Lands acquired pursuant to this subsection shall be managed in a manner that does not preclude the implementation of any management alternative identified in the study of alternatives or the Greenway Plan referred to in subsection (a).

(3) Where appropriate, the Secretary shall seek to enter into memoranda of agreement with other Federal agencies to manage land administered by such agencies within the floodplain, consistent with the purposes of this Act.

#### CODIFICATION OF TRANSPORTATION STATUTES

#### KENNEDY AMENDMENT NO. 3438

Mr. FORD, (for Mr. KENNEDY) proposed an amendment to the bill (H.R. 1537) to revise, codify, and enact without substantive change certain general and permanent laws, related to transportation, as subtitles II, III, and V-X of title 49, United States Code, "Transportation", and to make other technical improvements in the Code, as follows:

On page 872, beginning with "(1)(A)" in line 37, strike through line 12 on page 873 and substitute the following: "(1) Amtrak or a rail carrier (including a terminal company) shall provide fair and equitable arrangements to protect the interests of its employees affected by a discontinuance of intercity rail passenger service, including a discontinuance of service provided by a rail carrier under a facility or service agreement under section 24308(a) of this title under a modification or ending of the agreement or because Amtrak begins providing that service. Arrange."

On page 873, between lines 22 and 23, insert the following:

"(2) With respect to Amtrak's obligations under this subsection and in an agreement to carry out this subsection involving only Amtrak and its employees, a discontinuance of intercity rail passenger service does not include an adjustment in frequency, or seasonal suspension of intercity rail passenger trains that causes a temporary suspension of transportation, unless the adjustment or suspension reduces passenger train operations on a particular route to fewer than 3 round trips a week at any time during a calendar year."

#### HOLLINGS (AND DANFORTH) AMENDMENT NO. 3439

Mr. FORD (for Mr. HOLLINGS, for himself and Mr. DANFORTH) proposed an

amendment to the bill H.R. 1537, supra, as follows:

Amend the committee amendment in the nature of a substitute as follows:

(1) On page 895, line 27, strike "maintain" and substitute "cause to be maintained".

(2) On page 895, line 30, strike "maintain" and substitute "cause to be maintained".

(3) On page 895, line 34, immediately before the period, insert the following: "in obtaining the information required by this subsection".

(4) On page 896, line 13, strike "in paragraph (2)" and substitute "under paragraph (2)".

(5) On page 897, line 6, immediately after "initial decision", insert the following: "(through testing, inspection, investigation, or research carried out under this chapter, examining communications under section 30166(f) of this title, or otherwise)".

(6) On page 897, line 21, immediately after "subsection", insert "that".

(7) On page 900, strike lines 31 and 32 and substitute the following: "the tire for remedy during a subsequent 60-day period that begins only after the owner or purchaser receives notification that a replacement will be available during the subsequent period. If tires are available".

(8) On page 900, line 36, immediately before "motor", insert "defective or noncomplying".

(9) On page 904, line 34, strike "except" and substitute "other than".

(10) On page 907, lines 12 and 15, immediately before "production", insert "annual".

(11) On page 908, line 24, immediately after "event", insert "not under the control of the manufacturer".

(12) On page 909, line 8, immediately before the period, insert a comma and the following: "including the amendment of March 26, 1991 (56 Fed. Reg. 12472), to Standard 208, extending the requirements for automatic crash protection, with incentives for more innovative automatic crash protection, to trucks, buses, and multipurpose passenger vehicles".

(13) On page 909, line 35, strike "department" and substitute "departments".

(14) On page 909, line 38, immediately before "appropriations", insert "available".

(15) On page 911, line 19, immediately before the comma, insert "under this subsection".

(16) On page 912, strike lines 33-35 and substitute the following:

"(2) the vehicle is imported after January 31, 1990; and"

(17) On page 913, line 34, strike "(2)".

(18) On page 913, line 36, strike "the" and substitute "that".

(19) On page 914, line 1, strike "the" and substitute "that".

(20) On page 915, strike lines 38-41 and substitute the following: "inspection, an importer may release the vehicle only after—

"(A) an inspection showing the motor vehicle complies with applicable vehicle safety standards prescribed under this chapter for which the inspection was made; and

"(B) release of the vehicle by the Secretary."

(21) On page 923, line 5, immediately after "(C)", interest "selling or otherwise".

(22) On page 996, line 25, immediately after "require", insert "passenger motor vehicle".

(23) On page 1011, line 15, strike "involved in" and substitute "that is an object of".

(24) On page 1011, line 19, strike "involved in" and substitute "an object of".

(25) On page 1016, line 32, immediately before "gasoline", insert "on".

(26) On page 1017, line 14, immediately after "meets", insert "or exceeds".

(27) On page 1018, lines 3 and 4, strike "as decided by the Administrator, including" and substitute a comma and the following: "as decided by the Administrator, that includes".

(28) On page 1018, line 16, immediately after "meets", insert "or exceeds".

(29) On page 1024, lines 39 and 40, strike "dates when the actions will be taken, that will ensure that the automobile type or types" and substitute "deadlines for taking the actions, that will ensure that the model or models".

(30) On page 1025, line 12, strike "type or types" and substitute "or models".

(31) On page 1025, line 20, strike "automobile model type or types" and substitute "model or models".

(32) On page 1029, line 38, strike "that" and substitute "about whether".

(33) On page 1031, line 13, strike "those".

(34) On page 1033, line 41, immediately after "552(b)(4)", insert "of title 5".

(35) On page 1052, strike lines 14 and 15 and substitute the following:

"(3) preventing deterioration in established safety procedures, recognizing the clear intent, encouragement, and dedication of Congress to further the highest degree of safety in air transportation and air commerce, and to maintain the safety vigilance that has evolved in air transportation and air commerce and has come to be expected by the traveling and shipping public."

(36) On page 1052, line 25, immediately after "considering", insert "any".

(37) On page 1053, line 20, strike "may" and substitute "would tend to".

(38) On page 1053, line 30, strike "establish the variety and quality of, and" and substitute "decide on the variety and quality of, and determine".

(39) On page 1053, lines 38 and 39, strike "giving air carriers the opportunity" and substitute "the attainment of the opportunity for air carriers".

(40) On page 1055, lines 7, and 8, strike "giving air carriers the opportunity" and substitute "the attainment of the opportunity for air carriers".

(41) On page 1110, line 22, strike "law or regulation" and substitute "law, regulation, or other provision having the force and effect of law".

(42) On page 1123, line 7, strike "entirely in one State".

(43) On page 1127, line 18, strike "whose compensation is reduced" and substitute "who is adversely affected related to compensation".

(44) On page 1127, lines 26 and 27, strike "holding a certificate under section 41102 of this title" and substitute "that held a certificate under section 401 of the Federal Aviation Act of 1958".

(45) On page 1128, line 6, strike "a 12-month period" and substitute "the 12-month period in which the first reduction occurs".

**EXCLUSION OF DEBTOR INTEREST IN LIQUID AND GASEOUS HYDROCARBONS**

**LEAHY (AND OTHERS) AMENDMENT NO. 3440**

Mr. FORD (for Mr. LEAHY, for himself, Mr. THURMOND, and Mr. BROWN) proposed an amendment to the bill (H.R. 4363) to amend title 11 of

the United States Code to exclude from the estate of the debtor certain interests in liquid and gaseous hydrocarbons; as follows:

At the appropriate place in the bill, insert the following:

**SEC. \_\_\_\_ NATIONAL COOPERATIVE RESEARCH EXTENSION ACT OF 1992.**

(a) SHORT TITLE.—This section be cited as the "National Cooperative Research Act Extension of 1992".

(b) JOINT VENTURES.—The National Cooperative Research Act of 1984 (15 U.S.C. 4301 et seq.) is amended—

(1) by inserting after section 1 the following:

**"SEC. 1A. FINDINGS AND PURPOSE.**

"(a) The Congress finds that—  
 "(1) technological innovation and its profitable commercialization are critical components of the United States ability to raise the living standards of Americans and to compete in world markets;

"(2) cooperative arrangements among non-affiliated firms in the private sector are often essential for successful technological innovation and commercialization; and

"(3) the antitrust laws may inhibit cooperative innovation arrangements because of uncertain legal standards and the threat of private treble damage litigation.

"(b) It is the purpose of this Act to promote innovation, facilitate trade, and strengthen the competitiveness of the United States in world markets by clarifying the applicability of the rule of reason standard and establishing a procedure under which firms may notify the Department of Justice and Federal Trade Commission of their cooperative ventures and thereby qualify for a single-damage limitation on civil antitrust liability."

(2) in section 2(a)(6) by—

(A) striking "and development" and inserting ", development, or production";

(B) redesignating subparagraphs (D) and (E) as subparagraphs (E) and (G), respectively;

(C) inserting after subparagraph (C) the following new subparagraph:

"(D) the production or testing of any product, process, or service,";

(D) striking "or" after the comma in subparagraph (E), as redesignated;

(E) inserting after subparagraph (E), as redesignated, the following:

"(F) the collection, exchange, and analysis of production information related to activity of the joint production venture, or";

(F) striking "and (D)" and inserting "(D), (E), and (F)" in subparagraph (G), as redesignated; and

(G) by amending the matter following subparagraph (G) to read as follows:

"and may include the establishment and operation of facilities for the conducting of research, development or production; the integration of existing facilities where those facilities are used for the production or processing of a new product or technology pursuant to the joint venture; and the prosecuting of applications for the patents and the granting of licenses for the results of such venture, but does not include any activity described in subsection (b).";

(3) in section 2(b)—

(A) in the matter before paragraph (1) by striking "and development" and inserting ", development, or production";

(B) in paragraph (1) by striking "conduct the research and development that is the" and inserting "carry out the";

(C) in paragraph (2)—

(i) by striking "production or" each place it appears; and

(ii) by striking "other than the marketing of proprietary information developed through such venture, such as patents and trade secrets, and" and inserting the following: "other than—

"(A) the marketing of proprietary information, such as patents and trade secrets, developed through such venture formed before enactment of the National Cooperative Research Act Extension of 1992, or

"(B) the licensing, conveying, or transferring of intellectual property, such as patents and trade secrets, developed through such venture formed after enactment of the National Cooperative Research Act Extension of 1992, and"; and

(D) in paragraph (3)(B) by striking "and development" and inserting ", development, or production";

(4) in section 3 by—

(A) striking "and development" the first place it appears and inserting ", development, or production"; and

(B) striking "and development" the second place it appears and inserting ", development, product, process, or service";

(5) in section 4 by striking "and development" and inserting ", development, or production" each place it appears in subsections (a)(1), (b)(1), (c)(1), and (e);

(6) in section 4(e), by—

(A) inserting a dash after "if";

(B) designating the matter after such dash as paragraph (1);

(C) striking the period at the end of paragraph (1) as designated by subparagraph (B) and inserting "; and"; and

(D) adding at the end thereof the following:

"(2) in the case of a claim against a joint venture for production, the joint venture satisfies the requirements of section 7.";

(7) in section 5(a) by striking "and development" and inserting ", development, or production";

(8) in section 6 in the section heading by striking "and development" and inserting ", development, or production";

(9) in section 6—

(A) in subsection (a) by inserting "and, after enactment of the National Cooperative Research Act Extension of 1992, any party to a joint production venture, acting on such venture's behalf, may, not later than 90 days after entering into a written agreement to form such venture," after "whichever is later";

(B) in subsection (a)(1) by striking "identities of the parties to such venture, and" and inserting "identity of each party to such venture, including, in the case of a corporation, the nation in which it is incorporated and the location of its principal executive offices, and the nation of incorporation and the location of the principal executive offices of any corporation that directly or indirectly owns or controls a majority of the shares of such corporation, and"; and

(C) in subsections (d)(2) and (e) by striking "and development" and inserting ", development, or production" each place it appears; and

(10) by adding at the end thereof the following new section:

**"APPLICABILITY TO JOINT VENTURES FOR PRODUCTION**

**"SEC. 7. (a) IN GENERAL.**—Section 4 of this Act applies to a joint venture for production only if the joint venture—

"(1) provides substantial benefits to the United States economy including, but not limited to, increased skilled job opportunities in the United States, investments in

long-term production facilities in the United States, participation of United States entities in the joint venture, or the ability of the United States entities to access and commercialize technological innovations or to realize production efficiencies; and

"(2)(A) whose principal facilities for the production of a product, process, or service are located within the United States or its territories; or

"(B) whose principal facilities for the production of a product, process, or service are located within a country whose antitrust law accords national treatment to United States entities that are parties to joint ventures for production.

"(b) MEANING OF NATIONAL TREATMENT.—For the purposes of this section, a foreign country accords national treatment to United States entities that are parties to joint ventures for production if it accords treatment no less favorable with respect to the application of its antitrust laws to United States participants in joint ventures for production than would be accorded to its domestic participants in joint ventures for production in like circumstances.

**"REPORTS ON JOINT VENTURES AND UNITED STATES COMPETITIVENESS**

**"SEC. 8. (a) PURPOSE.**—The purpose of the reports required by this section is to inform Congress and the American people of the effect of this Act on the competitiveness of the United States in key technologies and areas of production.

"(b) ANNUAL REPORT BY THE FEDERAL TRADE COMMISSION.—Within 1 year after the date of enactment of this subsection, and by that date in each succeeding year, the Commission shall submit to Congress a report including—

"(1) a list of joint ventures filing under this Act during the preceding 12-month period, including the purpose of each joint venture and the identity of each party to the joint venture as described in accordance with section 6(a)(1); and

"(2) a list of enforcement actions, if any, brought against joint ventures filing under the Act by the Department of Justice and the Federal Trade Commission during the preceding 12-month period for violations of the antitrust laws.

"(c) TRIENNIAL REPORT BY THE SECRETARY OF COMMERCE.—The Secretary of Commerce shall submit to Congress a triennial report, the first report to be submitted within 3 years after the date of enactment of this subsection, that includes—

"(1) a description of the industrial technologies most commonly pursued by joint ventures for research and development for which filings were made under this Act during the preceding 3-year period, and an analysis of the trends in the competitiveness of United States industry in those technologies;

"(2) a description of the areas of production most commonly engaged in by joint ventures for production for which filings were made under this Act during the preceding 3-year period, and an analysis of the trends in the competitiveness of United States industry in those production areas; and

"(3) an update of the report submitted by the Secretary under subsection (d) to reflect changes in foreign laws or practices.

"(d) REVIEW OF FOREIGN LAWS.—Within 1 year after the date of enactment of this subsection, the Secretary of Commerce shall submit to Congress a report on the treatment of United States corporations or other business entities under the laws relating to

joint research and development and joint production ventures, or similar arrangements, of each foreign nation or community of nations whose corporations or other business entities have filed under this Act.

"(e) INTERAGENCY COOPERATION.—The Federal Trade Commission, the Office of the United States Trade Representative, and the Office of Science and Technology Policy, as well as other Federal departments and agencies, shall provide such information and assistance in the preparation of the reports under subsections (c) and (d) as the Secretary of Commerce may request."

**COLORADO WILDERNESS ACT**

**WIRTH AMENDMENT NO. 3441**

Mr. FORD (for Mr. WIRTH) proposed an amendment to the amendment of the House to the bill (S. 1029) to designate certain lands in the State of Colorado as components of the National Wilderness Preservation System, and for other purposes as follows:

Strike all after the enacting clause and insert the following:

Title 1: The Colorado Wilderness Act of 1992

**SECTION 1. SHORT TITLE.**

This Act may be cited as the "Colorado Wilderness Act of 1992".

**SEC. 2. ADDITIONS TO THE WILDERNESS PRESERVATION SYSTEM.**

(a) ADDITIONS.—The following lands in the State of Colorado are hereby designated as wilderness and, therefore, as components of the National Wilderness Preservation System:

(1) Certain lands in the Gunnison Basis Resource Area administered by the Bureau of Land Management which comprise approximately 3,600 acres, as generally depicted on a map entitled "American Flats Additions to the Big Blue Wilderness—Proposal", dated October 1992, and which are hereby incorporated in and shall be deemed to be a part of the wilderness area designated by Public Law 96-560 and renamed "Uncompahgre Wilderness" by section 3(f) of this Act.

(2) Certain lands in the Gunnison Resource Area administered by the Bureau of Land Management which comprise approximately 600 acres, as generally depicted on a map entitled "Bill Hare Gulch and Larson Creek Addition to the Big Blue Wilderness—Proposal", dated October 1992, and which are hereby incorporated in and shall be deemed to be a part of the wilderness area designated by Public Law 96-560 and renamed "Uncompahgre Wilderness" by section 3(f) of this Act.

(3) Certain lands in the Pike and San Isabel National Forest which comprise approximately 40,300 acres, as generally depicted on a map entitled "Buffalo Peaks Wilderness—Proposal", dated October 1992, and which shall be known as the Buffalo Peaks Wilderness.

(4) Certain lands in the Gunnison National Forest and in the Bureau of Land Management Powderhorn Primitive Area which comprise approximately 60,100 acres as generally depicted on a map entitled "Powderhorn Wilderness—Proposal", dated October 1992, and which shall be known as the Powderhorn Wilderness.

(5) Certain lands in the Routt National Forest which comprise approximately 19,750 acres, as generally depicted on a map entitled "Davis Peak Additions to the Mount

Zirkel Wilderness Proposal", dated October 1992, and which are hereby incorporated in and shall be deemed to be a part of the Mount Zirkel Wilderness designated by Public Law 98-555.

(6) Certain lands in the Grand Mesa, Uncompahgre, and Gunnison National Forests which comprise approximately 32,000 acres as generally depicted on a map entitled "Fossil Ridge Wilderness Proposal", dated October 1992, and which shall be known as the When and Tim Wirth Wilderness Area.

(7) Certain lands in the San Isabel National Forest which comprise approximately 22,040 acres as generally depicted on a map entitled "Greenhorn Mountain Wilderness—Proposal", dated October 1992, and which shall be known as the Greenhorn Mountain Wilderness.

(8) Certain lands within the Pike and San Isabel National Forest which comprise approximately 13,830 acres, as generally depicted on a map entitled "Lost Creek Wilderness Proposal", dated October 1992, which are hereby incorporated in and shall be deemed to be a part of the Lost Creek Wilderness designated by Public Law 96-560: *Provided*, That the Secretary of Agriculture (hereinafter in this Act referred to as the "Secretary") is authorized to acquire, only by donation or exchange, various mineral reservations held by the State of Colorado within the boundaries of the Lost Creek Wilderness additions designated by this Act.

(9) Certain lands in the Grand Mesa, Uncompahgre, and Gunnison National Forests which comprise approximately 5,500 acres, as generally depicted on a map entitled "Oh-Be-Joyful Addition to the Raggeds Wilderness—Proposal", dated October 1992, and which are hereby incorporated in and shall be deemed to be a part of the Raggeds Wilderness designated by Public Law 96-560.

(10) Certain lands in the Rio Grande National Forest which comprise approximately 209,580 acres, as generally depicted on a map entitled "Sangre de Cristo Wilderness—Proposal", dated October 1992, and which shall be known as the Sangre de Cristo Wilderness.

(11) Certain lands in the Routt National Forest which comprise approximately 44,500 acres, as generally depicted on a map entitled "Service Creek Wilderness Proposal", dated October 1992, which shall be known as the Sarvis Creek Wilderness. *Provided*, that the Secretary is authorized to acquire by purchase, donation, or exchange, lands or interests therein within the boundaries of the Sarvis Creek Wilderness only with the consent of the owner thereof.

(12) Certain lands in the San Juan National Forest which comprise approximately 39,700 acres as generally depicted on a map entitled "South San Juan Expansion Wilderness—Proposal", (V-Rock Trail and Montezuma Peak), dated October 1992, and which are hereby incorporated in and shall be deemed to be a part of the South San Juan Wilderness designated by Public Law 96-560.

(13) Certain lands in the White River National Forest which comprise approximately 8,330 acres, as generally depicted on a map entitled "Spruce Creek Additions to the Hunter-Fryingpan Wilderness—Proposal", dated October 1992, and which are hereby incorporated in and shall be deemed to be a part of the Hunter-Fryingpan Wilderness designated by Public Law 95-327: *Provided*, That no right, or claim of right, to the diversion and use of the waters of Hunter Creek, the Fryingpan or Roaring Fork Rivers, or any tributaries of said creeks or rivers, by the Fryingpan-Arkansas Project, Public Law 87-590, and the reauthorization thereof by Pub-

lic Law 93-193, as modified as proposed in the September 1959 report of the Bureau of Reclamation entitled "Ruedi Dam and Reservoir, Colorado", and as further modified and described in the description of the proposal contained in the final environmental statement for said project, dated April 16, 1975, under the laws of the State of Colorado, shall be prejudiced, expanded, diminished, altered, or affected by this Act. Nothing in this Act shall be construed to expand, abate, impair, impede, or interfere with the construction, maintenance, or repair of said Fryingpan-Arkansas Project facilities, nor the operation thereof, pursuant to the Operating Principles. House Document 187, Eighty-third Congress, and pursuant to the water laws of the State of Colorado: *Provided further*, That nothing in this Act shall be construed to impede, limit, or prevent the use of the Fryingpan-Arkansas Project of its diversion systems to their full extent.

(14) Certain lands in the Arapaho National Forest which comprise approximately 7,630 acres, as generally depicted on a map entitled "Byers Peak Wilderness—Proposal", dated October 1992, and which shall be known as Byers Peak Wilderness.

(15) Certain lands in the Arapaho National Forest which comprise approximately 12,300 acres, as generally depicted on a map entitled "Vasquez Peak Wilderness—Proposal", dated October 1992, and which shall be known as the Vasquez Peak Wilderness;

(16) Certain lands in the San Juan National Forest which comprise approximately 28,740 acres, as generally depicted on a map entitled "Weminuche Wilderness Additions—Proposed", dated October 1992, and which are hereby incorporated in and shall be deemed to be a part of the Weminuche Wilderness designated by Public Law 93-632.

(17) Certain lands in the Rio Grande National Forest which comprise approximately 23,800 acres, as generally depicted on a map entitled "Wheeler Additions to the La Garita Wilderness—Proposal", dated October 1992, and which shall be incorporated into and shall be deemed to be a part of the La Garita Wilderness.

(18) Certain lands in the Arapaho National Forest which comprise approximately 12,100 acres, as generally depicted on a map entitled "Williams Fork Wilderness—Proposal", dated and which shall be known as the Farr Wilderness.

(19) Certain lands in the Arapaho National Forest which comprise approximately 6,700 acres, as generally depicted on a map entitled "Bowen Gulch Additions to Never Summer Wilderness—Proposal", dated October 1992, which are hereby incorporated into and shall be deemed to be a part of the Never Summer Wilderness.

(b) MAPS AND DESCRIPTIONS.—As soon as practicable after the date of enactment of this Act, the appropriate Secretary shall file a map and a legal description of each area designated as wilderness by this Act with the Committee on Energy and Natural Resources of the United States Senate and the Committee on Interior and Insular Affairs of the United States House of Representatives. Each map and description shall have the same force and effect as if included in this Act, except that the Secretary is authorized to correct clerical and typographical errors in such legal descriptions and maps. Such maps and legal descriptions shall be on file and available for public inspection in the Office of the Chief of the Forest Service, Department of Agriculture and the Office of the Director of the Bureau of Land Management, Department of the Interior, as appropriate.

### SEC. 3. ADMINISTRATIVE PROVISIONS.

(a) IN GENERAL.—(1) Subject to valid existing rights, lands designated as wilderness by this Act shall be managed by the Secretary of Agriculture or the Secretary of the Interior (in the case of the portion of Powderhorn Wilderness managed by the Bureau of Land Management) in accordance with the Wilderness Act (16 U.S.C. 1131 et seq.) and this Act, except that, with respect to any wilderness areas designated by this Act, any reference in the Wilderness Act to the effective date of the Wilderness Act shall be deemed to be a reference to the date of enactment of this Act.

(2) Administrative jurisdiction over those lands designated as wilderness pursuant to paragraph (2) of section 2(a) of this Act, and which, as of the date of enactment of this Act, are administered by the Bureau of Land Management, is hereby transferred to the Forest Service.

(b) GRAZING.—Grazing of livestock in wilderness areas designated by this Act shall be administered in accordance with the provisions of section 4(d)(4) of the Wilderness Act (16 U.S.C. 1133(d)(4)), as further interpreted by section 108 of Public Law 96-560, and, as regards wilderness managed by the Bureau of Land Management, the guidelines set forth in Appendix A of House Report 101-405 of the 101st Congress.

(c) STATE JURISDICTION.—As provided in section 4(d)(7) of the Wilderness Act (16 U.S.C. 1133(d)(7)), nothing in this Act shall be construed as affecting the jurisdiction or responsibilities of the State of Colorado with respect to wildlife and fish in Colorado.

(d) CONFORMING AMENDMENT.—Section 2(e) of the Endangered American Wilderness Act of 1978 (92 Stat. 41) is amended by striking "Subject to" and all that follows through "System."

(e) BUFFER ZONES.—Congress does not intend that the designation by this Act of wilderness areas in the State of Colorado creates or implies the creation of protective perimeters or buffer zones around any wilderness area. The fact that non-wilderness activities or uses can be seen or heard from within a wilderness areas shall not, of itself, preclude such activities or uses up to the boundary of the wilderness area.

(f) WILDERNESS NAME CHANGE.—The wilderness area designated as "Big Blue Wilderness" by section 102(a)(1) of Public Law 96-560, and the additions thereto made by paragraphs (1) and (2) of section 2(a) of this Act, shall hereafter be known as the Uncompahgre Wilderness. Any reference to the Big Blue Wilderness in any law, regulation, map, document, record, or other paper of the United States shall be considered to be a reference to the Uncompahgre Wilderness.

(g)(1) For the purposes of section 7 of the Land and Water Conservation Fund Act of 1965 (16 U.S.C. 4601-9), the boundaries of affected National Forests, as modified by this subsection, shall be considered to be the boundaries of such National Forests as of January 1, 1965.

(2) Nothing in this subsection shall affect valid existing rights of any person under any authority of law.

(3) Authorizations to use lands transferred by this subsection which were issued prior to the date of enactment of this Act, shall remain subject to the laws and regulations under which they were issued, to the extent consistent with this Act. Such authorizations shall be administered by the Secretary of Agriculture. Any renewal or extension of such authorizations shall be subject to the laws and regulations pertaining to the For-

est Service, Department of Agriculture, and applicable law, including this Act. The change of administrative jurisdiction resulting from the enactment of this subsection shall not in itself constitute a basis for denying or approving the renewal or reissuance of any such authorization.

#### SEC. 4. WILDERNESS RELEASE.

(a) **REPEAL OF WILDERNESS STUDY PROVISIONS.**—Sections 105 and 106 of the Act of December 22, 1980 (P.L. 96-560), are hereby repealed.

(b) **INITIAL PLANS.**—Section 107(b)(2) of the Act of December 22, 1980 (P.L. 96-560) is amended by striking out “, except those lands remaining in further planning upon enactment of this Act, areas listed in sections 105 and 106 of this Act, or previously congressional designated wilderness study areas.”

#### SEC. 5. FOSSIL RIDGE RECREATION MANAGEMENT AREA.

(a) **ESTABLISHMENT.**—(1) In order to conserve, protect, and enhance the scenic, wildlife, recreational, and other natural resource values of the Fossil Ridge area, there is hereby established the Fossil Ridge Recreation Management Area (hereinafter referred to as the “recreation management area”).

(2) The recreation management area shall consist of certain lands in the Grand Mesa, Uncompahgre, and Gunnison National Forests, Colorado, which comprise approximately 43,900 acres as generally depicted as “Area A” on a map entitled “Fossil Ridge Wilderness Proposal”, dated June 1992.

(b) **ADMINISTRATION.**—The Secretary of Agriculture shall administer the recreation management area in accordance with this section and the laws and regulations generally applicable to the National Forest System.

(c) **WITHDRAWAL.**—Subject to valid existing rights, all lands within the recreation management area are hereby withdrawn from all forms of entry, appropriation, or disposal under the public land laws, from location, entry, and patent under the mining laws, and from disposition under the mineral and geothermal leasing laws, including all amendments thereto.

(d) **TIMBER HARVESTING.**—No timber harvesting shall be allowed within the recreation management area except for any minimum necessary to protect the forest from insects and disease, and for public safety.

(e) **LIVESTOCK GRAZING.**—The designation of the recreation management area shall not be construed to prohibit, or change the administration of, the grazing of livestock within the recreation management area.

(f) **DEVELOPMENT.**—No developed campgrounds shall be constructed within the recreation management area. After the date of enactment of this Act, no new roads or trails may be constructed within the recreation management area.

(g) **OFF-ROAD RECREATION.**—Motorized travel shall be permitted within the recreation management area only on those designated trails and routes existing as of July 1, 1991.

#### SEC. 6. BOWEN GULCH PROTECTION AREA.

(a) **ESTABLISHMENT.**—(1) There is hereby established in the Arapaho National Forest, Colorado, the Bowen Gulch Protection Area (hereinafter in this Act referred to as the “protection area”).

(2) The protection area shall consist of certain lands in the Arapaho National Forest, Colorado, which comprise approximately 11,600 acres as generally depicted as “Area A” and “Area B” on a map entitled “Bowen Gulch Additions to Never Summer Wilderness Proposal”, dated June 1992.

(b) **ADMINISTRATION.**—The Secretary shall administer the protection area in accordance with this section and the laws and regulations generally applicable to the National Forest System.

(c) **WITHDRAWAL.**—Subject to valid existing rights, all lands within the protection area are hereby withdrawn from all forms of entry, appropriation, or disposal under the public land laws, from location, entry, and patent under the mining laws, and from disposition under the mineral and geothermal leasing laws, including all amendments thereto.

(d) **DEVELOPMENT.**—No developed campgrounds shall be constructed within the protection area. After the date of enactment of this Act, no new roads or trails may be constructed within the protection area.

(e) **TIMBER HARVESTING.**—No timber harvesting shall be allowed within the protection area except for any minimum necessary to protect the forest from insects and disease, and for public safety.

(f) **MOTORIZED TRAVEL.**—Motorized travel shall be permitted within the protection area only on those designated trails and routes existing as of July 1, 1991, and only during periods of adequate snow cover. At all other times, mechanized, non-motorized travel shall be permitted within the protection area.

(g) **MANAGEMENT PLAN.**—During the preparation of the revision of the Land and Resource Management Plan for the Arapaho National Forest, the Forest Service shall develop a management plan for the protection area, after providing for public consultation.

#### SEC. 7. OTHER LANDS.

Nothing in this Act shall affect ownership or use of lands or interests therein not owned by the United States or access to such lands available under other applicable law.

#### SEC. 8 WATER.

(a) **FINDINGS, PURPOSE, AND DEFINITIONS.**—

(1) Congress finds that—

(A) the lands designated as wilderness by this Act are located at the headwaters of the streams and rivers on those lands, with few, if any, actual or proposed water resource facilities located upstream from such lands and few, if any, opportunities for diversion, storage, or other uses of water occurring outside such lands that would adversely affect the wilderness values of such lands; and

(B) the lands designated as wilderness by this Act are not suitable for use for development of new water resource facilities, or for the expansion of existing facilities; and

(C) therefore, it is possible to provide for proper management and protection of the wilderness values of such lands in ways different from those utilized in other legislation designating as wilderness lands not sharing the attributes of the lands designated as wilderness by this Act.

(2) the purpose of this section is to protect the wilderness values of the lands designated as wilderness by this Act by means other than those based on a federal reserved water right.

(3) As used in this section, the term “water resource facility” means irrigation and pumping facilities, reservoirs, water conservation works, aqueducts, canals, ditches, pipelines, wells, hydropower projects, and transmission and other ancillary facilities, and other water diversion, storage, and carriage structures.

(b) **RESTRICTION ON RIGHTS AND DISCLAIMER OF EFFECT.**—(1) Neither the Secretary, nor any other officer, employee, representative, or agent of the United States, nor any other person, shall assert in any court or agency,

nor shall any court or agency consider any claim to or for water or water rights in the State of Colorado, which is based on any construction of any portion of this Act, or the designation of any lands as wilderness by this Act, as constituting an express or implied reservation of water or water rights.

(2) (A) Nothing in this Act shall constitute or be construed to constitute either an express or implied reservation of any water or water rights with respect to the Piedra, Roubideau, and Tabeguache areas identified in section 9 of this Act, or the Bowen Gulch Protection Area or the Fossil Ridge Recreation Management Area identified in sections 5 and 6 of this Act.

(B) Nothing in this Act shall be construed as a creation, recognition, disclaimer, relinquishment, or reduction of any water rights of the United States in the State of Colorado existing before the date of enactment of this Act, except as provided in subsection (g)(2) of this section.

(C) Except as provided in subsection (g) of this section, nothing in this Act shall be construed as constituting an interpretation of any other Act or any designation made by or pursuant thereto.

(D) Nothing in this section shall be construed as establishing a precedent with regard to any future wilderness designations.

(c) **NEW OR EXPANDED PROJECTS.**—Notwithstanding any other provision of law, on and after the date of enactment of this Act neither the President nor any other officer, employee, or agent of the United States shall fund, assist, authorize, or issue a license or permit for the development of any new water resource facility within the areas described in sections 2, 5, 6 and 9 of this Act or the enlargement of any water resource facility within the areas described in sections 2, 5, 6 and 9 of this Act.

(d) **ACCESS AND OPERATION.**—(1) Subject to the provisions of this subsection (d), the Secretary shall allow reasonable access to water resource facilities in existence on the date of enactment of this Act within the areas described in sections 2, 5, 6 and 9 of this Act, including motorized access where necessary and customarily employed on routes existing as of the date of enactment of this Act.

(2) Existing access routes within such areas customarily employed as of the date of enactment of this Act may be used, maintained, repaired, and replaced to the extent necessary to maintain their present function, design, and serviceable operation, so long as such activities have no increased adverse impacts on the resources and values of the areas described in sections 2, 5, 6 and 9 of this Act than existed as of the date of enactment of this Act.

(3) Subject to the provisions of subsections (c) and (d), the Secretary shall allow water resource facilities existing on the date of enactment of this Act within areas described in sections 2, 5, 6 and 9 of this Act to be used, operated, maintained, repaired, and replaced to the extent necessary for the continued exercise, in accordance with Colorado state law, of vested water rights adjudicated for use in connection with such facilities by a court of competent jurisdiction prior to the date of enactment of this Act; Provided that the impact of an existing facility on the water resources and values of the area shall not be increased as a result of changes in the adjudicated type of use of such facility as of the date of enactment of this Act.

(4) Water resource facilities, and access routes serving such facilities, existing within the areas described in sections 2, 5, 6, and 9 of this Act on the date of enactment of this

Act shall be maintained and repaired when and to the extent necessary to prevent increased adverse impacts on the resources and values of the areas described in sections 2, 5, 6, and 9 of this Act.

(e) Except as provided in subsections (c) and (d) of this section, the provisions of this Act related to the areas described in sections 2, 5, 6, and 9 of this Act, and the inclusion in the National Wilderness Preservation System of the areas described in section 2 of this Act, shall not be construed to affect or limit the use, operation, maintenance, repair, modification, or replacement of water resource facilities in existence on the date of enactment of this Act within the boundaries of the areas described in sections 2, 5, 6, and 9 of this Act.

(f) **MONITORING AND IMPLEMENTATION.**—The Secretaries of Agriculture and the Interior shall monitor the operation of and access to water resource facilities within the areas described in sections 2, 5, 6, and 9 of this Act and take all steps necessary to implement the provisions of this section.

(g) **INTERSTATE COMPACTS AND NORTH PLATTE RIVER.**—(1) Nothing in this Act, and nothing in any previous Act designating any lands as wilderness, shall be construed as limiting, altering, modifying, or amending any of the interstate compacts or equitable apportionment decrees that apportion water among and between the State of Colorado and other States. Except as expressly provided in this section, nothing in this Act shall affect or limit the development or use by existing and future holders of vested water rights of Colorado's full apportionment of such waters.

(2) Notwithstanding any other provision of law, neither the Secretary nor any other officer, employee, or agent of the United States, or any other person, shall assert in any court or agency of the United States or any other jurisdiction any rights, and no court or agency of the United States shall consider any claim or defense asserted by any person based upon such rights, which may be determined to have been established for waters of the North Platte River for purposes of the Platte River Wilderness Area established by Public Law 98-550, located on the Colorado-Wyoming state boundary, to the extent such rights would limit the use or development of water within Colorado by present and future holders of vested water rights in the North Platte River and its tributaries, to the full extent allowed under interstate compact or United States Supreme Court equitable decree. Any such rights shall be exercised as if junior to, in a manner so as not to prevent, the use or development of Colorado's full entitlement to interstate waters of the North Platte River and its tributaries within Colorado allowed under interstate compact or United States Supreme Court equitable decree.

**SEC. 9. PIEDRA, ROUBIDEAU, AND TABEGUACHE AREAS.**

(a) **AREAS.**—The provisions of this section shall apply to the following areas:

(1) Certain lands in the San Juan National Forest, comprising approximately 50,100 acres as generally depicted on the map entitled "Piedra Area" dated October, 1992; and

(2) Certain lands in the Grand Mesa, Uncompahgre, and Gunnison National Forests, comprising approximately 18,000 acres, as generally depicted on the map entitled "Roubideau Area" dated October, 1992; and

(3) Certain lands in the Grand Mesa, Uncompahgre, and Gunnison National Forests and in the Montrose District of the Bureau of Land Management, comprising ap-

proximately 20,480 acres, as generally depicted on the map entitled "Tabeguache Area" dated October, 1992.

(b) **MANAGEMENT.**—(1) Subject to valid existing rights, the areas described in subsection (a) are withdrawn from all forms of location, leasing, patent, disposition, or disposal under the public land, mining, and mineral and geothermal leasing laws of the United States.

(2) The areas described in subsection (a) shall not be subject to any obligation to further study such lands for wilderness designation.

(3) Until Congress determines otherwise, and subject to the provisions of section 8 of this Act, activities within such areas shall be managed by the Secretary of Agriculture and Secretary of the Interior so as to maintain the areas' presently existing wilderness character and potential for inclusion in the National Wilderness Preservation System.

(4) Livestock grazing in such areas shall be permitted and managed to the same extent and in the same manner as of the date of enactment of this Act. Except as provided by this Act, mechanized or motorized travel shall not be permitted in such areas; Provided, That the Secretary may permit motorized travel on trail number 535 in the San Juan National Forest during periods of adequate snow cover.

(c) **DATA COLLECTION.**—The Secretary of Agriculture and the Secretary of the Interior, in consultation with the Colorado Water Conservation Board, shall compile data concerning the water resources of the areas described in subsection (a), and existing and proposed water resources facilities affecting such values.

**SEC. 10. SPANISH PEAKS FURTHER PLANNING AREA STUDY.**

(a) **REPORT.**—Not later than three years from the date of enactment of this Act, the Secretary shall report to the Committee on Interior and Insular Affairs of the United States House of Representatives and the Committee on Energy and Natural Resources of the United States Senate on the status of private property interests located within the Spanish Peaks further planning area of the Pike-San Isabel National Forest in Colorado.

(b) **CONTENTS OF REPORT.**—The report required by this section shall identify the location of all private property situated within the exterior boundaries of the Spanish Peaks area; the nature of such property interests; the acreage of such private property interests; and the Secretary's views on whether the owners of said properties would be willing to enter into either a sale or exchange of these properties at fair market value if such a transaction became available in the near future.

(c) **NO AUTHORIZATION OF EMINENT DOMAIN.**—Nothing contained in this Act authorizes, and nothing in this Act shall be construed to authorize, the acquisition of real property by eminent domain.

(d) For a period of three years from the date of enactment of this Act, the Secretary shall manage the Spanish Peaks Further Planning Area, as provided by the Colorado Wilderness Act of 1980.

**CHILDREN'S BICYCLE HELMET SAFETY ACT**

**DANFORTH AMENDMENT NO. 3442**

Mr. SIMPSON (for Mr. DANFORTH) proposed an amendment to the bill (S.

2952) to establish a grant program under the National Highway Traffic Safety Administration for the purpose of promoting the use of bicycle helmets by individuals under the age of 16, as follows:

Strike all after the enacting clause and insert in lieu thereof the following:

**SECTION 1. SHORT TITLE.**

This Act may be cited as the "Children's Bicycle Helmet Safety Act of 1992".

**SEC. 2. FINDINGS.**

The Congress finds that—

(1) 90 million Americans ride bicycles and 20 million ride a bicycle more than once a week;

(2) between 1984 and 1988, 2,985 bicyclists in the United States died from head injuries and 905,752 suffered head injuries that were treated in hospital emergency rooms;

(3) 41 percent of bicycle-related head injury deaths and 76 percent of bicycle-related head injuries occurred among American children under age 15;

(4) deaths and injuries from bicycle accidents cost society \$7.6 billion annually; and a child suffering from a head injury, on average, will cost society \$4.5 million over the child's lifetime;

(5) universal use of bicycle helmets in the United States would have prevented 2,600 deaths from head injuries and 757,000 injuries; and

(6) only 5 percent of children in the Nation who ride bicycles wear helmets.

**SEC. 3. ESTABLISHMENT OF PROGRAM.**

The Administrator of the National Highway Traffic Safety Administration may, in accordance with section 4, make grants to States and State political subdivisions for programs that require or encourage individuals under the age of 16 to wear approved bicycle helmets. In making those grants, the Administrator shall allow grantees to use wide discretion in designing programs that effectively promote increased bicycle helmet use.

**SEC. 4. PURPOSES FOR GRANTS.**

A grant made under section 3 may be used by a grantee to—

(1) enforce a law that requires individuals under the age of 16 to wear approved bicycle helmets on their heads while riding on bicycles;

(2) assist individuals under the age of 16 to acquire approved bicycle helmets;

(3) develop and administer a program to educate individuals under the age of 16 and their families on the importance of wearing such helmets in order to improve bicycle safety; or

(4) carry out any combination of the activities described in paragraphs (1), (2), and (3).

**SEC. 5. STANDARDS.**

(a) **IN GENERAL.**—Bicycle helmets manufactured 9 months or more after the date of the enactment of this Act shall conform to—

(1) any interim standard described under subsection (b), pending the establishment of a final standard pursuant to subsection (c); and

(2) the final standard, once it has been established under subsection (c).

(b) **INTERIM STANDARDS.**—The interim standards are as follows:

(1) The American National Standards Institute standard designated as "Z90.4-1984".

(2) The Snell Memorial Foundation standard designated as "B-90".

(3) Any other standard that the Consumer Product Safety Commission determines is appropriate.

(c) FINAL STANDARD.—Not later than 60 days after the date of the enactment of this Act, the Consumer Product Safety Commission shall begin a proceeding under section 553 of title 5, United States Code, to—

(1) review the requirements of the interim standards set forth in subsection (a) and establish a final standard based on such requirements;

(2) include in the final standard a provision to protect against the risk of helmets coming off the heads of bicycle riders;

(3) include in the final standard provisions that address the risk of injury to children; and

(4) include additional provisions as appropriate. Sections 7 and 9 of the Consumer Product Safety Act (15 U.S.C. 2056 and 2058) shall not apply to the proceeding under this subsection and section 11 of such Act (15 U.S.C. 2060) shall not apply with respect to any standard issued under such proceeding. The final standard shall take effect 1 year from the date it is issued.

(d) FAILURE TO MEET STANDARDS.—

(1) FAILURE TO MEET INTERIM STANDARD.—Until the final standard takes effect, a bicycle helmet that does not conform to an interim standard as required under subsection (a)(1) shall be considered in violation of a consumer product safety standard promulgated under the Consumer Product Safety Act.

(2) STATUS OF FINAL STANDARD.—The final standard developed under subsection (c) shall be considered a consumer product safety standard promulgated under the Consumer Product Safety Act.

#### SEC. 6. AUTHORIZATION OF APPROPRIATIONS.

For the National Highway Traffic Safety Administration to carry out the grant program authorized by this Act, there are authorized to be appropriated \$2,000,000 for fiscal year 1993, \$3,000,000 for fiscal year 1994, and \$4,000,000 for fiscal year 1995.

#### SEC. 7. DEFINITION.

In this Act, the term "approved bicycle helmet" means a bicycle helmet that meets—

(1) any interim standard described in section 5(b), pending establishment of a final standard under section 5(c); and

(2) the final standard, once it is established under section 5(c).

#### SEC. 8. FASTENER QUALITY ACT AMENDMENTS.

(a) REFERENCES.—Whenever in this section an amendment is expressed in terms of an amendment to a section or other provision, the reference shall be considered to be made to a section or other provision of the Fastener Quality Act (15 U.S.C. 5401 et seq.).

(b) TECHNICAL AMENDMENTS.—

(1) DEFINITIONS.—Section 3(8) (15 U.S.C. 5402(8)) is amended by striking "Standard" and inserting "Standards".

(2) INSPECTION AND TESTING.—Section 5(b)(1) (15 U.S.C. 5404(b)(1)) is amended by striking "section 6; unless" and inserting "section 6, unless".

(c) IMPORTERS AND PRIVATE LABEL DISTRIBUTORS.—Section 7(c)(2) (15 U.S.C. 5406(c)(2)) is amended by inserting "to the same" before "extent".

(d) CLARIFYING AMENDMENTS.—

(1) Section 5(a)(1)(B) (15 U.S.C. 5404(a)(1)(B)) is amended by striking "subsections (b) and (c)" and inserting "subsections (b), (c), and (d)".

(2) Section 5(a)(2)(A)(i) (15 U.S.C. 5404(a)(2)(A)(i)) is amended by striking "subsections (b) and (c)" and inserting "subsections (b), (c), and (d)".

(3) Section 5(c)(4) (15 U.S.C. 5404(c)(4)) is amended by inserting "except as provided in subsection (d)," before "state".

(4) Section 5 (15 U.S.C. 5404) is amended by inserting at the end the following new subsection:

"(d) ALTERNATIVE PROCEDURE FOR CHEMICAL CHARACTERISTICS.—Notwithstanding the requirements of subsections (b) and (c), a manufacturer shall be deemed to have demonstrated, for purposes of subsection (a)(1), that the chemical characteristics of a lot conform to the standards and specifications to which the manufacturer represents such lot has been manufactured if the following requirements are met:

"(1) The coil or heat number of metal from which such lot was fabricated has been inspected and tested with respect to its chemical characteristics by a laboratory accredited in accordance with the procedures and conditions specified by the Secretary under section 6.

"(2) Such laboratory has provided to the manufacturer, either directly or through the metal manufacturer, a written inspection and testing report, which shall be in a form prescribed by the Secretary by regulation, listing the chemical characteristics of such coil or heat number.

"(3) The report described in paragraph (2) indicates that the chemical characteristics of such coil or heat number conform to those required by the standards and specifications to which the manufacturer represents such lot has been manufactured.

"(4) The manufacturer demonstrates that such lot has been fabricated from the coil or heat number of metal to which the report described in paragraphs (2) and (3) relates.

In prescribing the form of report required by subsection (c), the Secretary shall provide for an alternative to the statement required by subsection (c)(4), insofar as such statement pertains to chemical characteristics, for cases in which a manufacturer elects to use the procedure permitted by this subsection."

### NOTICES OF HEARINGS

#### SELECT COMMITTEE ON POW/MIA AFFAIRS

Mr. KERRY. Mr. President, the Select Committee on POW/MIA Affairs, pursuant to discussions in previous organizational meetings, has scheduled hearings on October 15 and 16 to examine the satellite imagery and covert operations in regard to the investigation of POW/MIA's. The hearings will begin at 9:30 a.m., and will take place in room 216 of the Hart Senate Office Building. For additional information, please call 224-2306.

### ADDITIONAL STATEMENTS

#### LONG-TERM CARE INSURANCE

• Mr. PRYOR. Mr. President, I rise today to express my disappointment that the Congress did not enact legislation this year to provide protections for consumers who purchase long-term care insurance. It is truly unfortunate that we did not take action on this no-cost initiative that would strengthen the long-term care insurance market and go far to help older Americans.

During this session of Congress, we have seen an ongoing debate on health care reform, including insurance market reform. Long-term care, including reform of the long-term care insurance market, should not be left out in this debate.

Over the past few years, we have seen numerous reports citing problems in the private long-term care insurance market. A number of hearings addressing the problem have been held in both the Senate and the House. Bills which would go far to solve these market problems have been introduced and debated. Unfortunately, once again, the 102d Congress has spent too much time addressing problems and too little time solving problems. As a result, we have not even taken modest steps toward meeting the overwhelming long-term care needs of our Nation.

In 1991, a bipartisan coalition of 21 Senators joined me in sponsoring legislation that would require basic consumer protections for long-term care insurance. Soon afterward, Chairman BENTSEN introduced legislation that would clarify the tax treatment and provide consumer protections for this type of insurance. I was pleased to be a cosponsor of Chairman BENTSEN's bill. In 1992, Senators KENNEDY and HATCH, along with the members of the Labor and Human Resources Committee, worked together to have their Committee pass their own version of a long-term care consumer protections bill. I believe they, in particular, should be recognized for their hard and constructive work in this area.

Mr. President, despite the work of all these members, we were unsuccessful in passing and enacting a long-term care insurance reform measure. We have been told that one of the primary reasons why we were unable to move this through the Congress was that our measure did not include tax clarifications. I supported the inclusion of these clarifications in a consumer protections bill. Unfortunately, although proposals to clarify the tax treatment of these policies have been before the Congress for over three years, we still have no estimate of the cost of any of these tax proposals. Although we do need a cost estimate to move forward on the tax proposals, I do not believe the consumer protection provisions of this legislation should be held hostage by the lack of a cost estimate.

As Chairman of the Aging Committee, I want to ensure that abuses that have plagued the Medigap market are not repeated in the long-term care market. None of us want to see those horrors repeated. Unfortunately, an opportunity to prevent this has passed us by in this Congress.

Our legislative efforts this year represent a commitment to ensuring that consumers can have confidence in the private long-term care insurance market. Mr. President, I look forward to

working with my colleagues next year to enact legislation that makes progress toward our ultimate goal of protecting the chronically ill of all generations from the catastrophic costs of long-term care. Actions speak louder than words, and it is my hope and belief that the words of this year will be replaced by action next year. ●

#### KEEPING IT SAFE FOR SERBIA

● Mr. SYMMS. Mr. President, in light of the situation in what was Yugoslavia, I insert an important article relating to events in that area in the RECORD. The article is written by Charles Brown, of the well-respected human rights group Freedom House. It appeared in the September-October, 1992 issue of Freedom Review.

Before the Serbia-Slovenia war, before the Serbia-Croatia war, and before the Serbia-Bosnia-Herzegovina war, there was the Serbian campaign to "Serbianize" the autonomous province of Kosova. Kosova is 90 percent Albanian, 10 percent Serb.

In May of this year, Charles Brown visited Kosova as part of a delegation sponsored by the Congressional Human Rights Foundation. His article details the "Serbianization" of Kosova, and the peaceful struggle of its inhabitants to resist this Serb campaign.

In May, the underground Kosova Government held elections. Over 90 percent of the population voted. Luckily for Kosova, the world media was there and abuse by Serbian secret police and military units was limited. However, when the newly elected officials tried to convene parliament for the first time since Serbia abolished the Kosovan Parliament in 1989, its officials were arrested or told to leave town.

I believe this article has great symbolic value over the future of the region. If the West ignores Kosova and other potential hot-spots, the war will spread. If we do not take a stand against aggression, and instead waffle as we have done over other parts of former Yugoslavia, the murder and repression may continue.

The article follows:

#### THE CASE OF KOSOVO: KEEPING IT SAFE FOR SERBIA

(By Charles J. Brown)

(As the international community struggles to find a way to end the Yugoslav civil war, there is growing concern that the conflict could spread beyond Bosnia and Croatia to Kosova, an overwhelmingly Albanian ethnic enclave in southern Serbia, thus starting a much broader Balkan War. From Kosova, a report on the Albanians' effort to escape Serbian oppression and obtain self-rule.)

Like most hotels, the Grand Hotel in Prishtina (capital of the formerly autonomous Kosova region forcibly incorporated by Serbia in 1989) publishes a brochure touting its ideal location, banquet facilities, and many amenities. Missing from the brochure,

however, are the hotel's newest guests—the Serbian military officers, secret police, and irregular militia who spend much of their time lounging around its large and spartan lobby, smoking Western cigarettes and drinking Turkish coffee while waiting for the latest directive from Belgrade. Serbian-owned and -operated, the Grand Hotel Prishtina has become home for those sent to convert Kosova from an overwhelmingly Albanian ethnic enclave (Albanians make up 90 percent of the population) into a stronghold of Serbian nationalism.

I was in Kosova in late May, part of an eight-person delegation sponsored by the Congressional Human Rights Foundation. We came to observe the clandestine presidential and parliamentary elections called by the Albanian opposition and, if necessary, to witness any attempt by the residents of the Grand Hotel to stop the elections from taking place. In light of Serbian-sponsored violence in Croatia and Bosnia-Herzegovina, we feared the elections could provoke further violence in the ongoing Yugoslav civil war.

#### INTRANSIGENT ON KOSOVO

What makes Serbs so intransigent on Kosova—and thus so dangerous—is the region's role in the development of Serbian nationalist ideology. In 1389, on a large plain west of modern Prishtina known as Kosovo Polje, a Serbian army under Tsar Lazar was routed by Ottoman forces, thus ending the medieval Serbian Empire. The defeat became a defining moment in the development of modern Serbian nationalism, producing extensive poetry and song cycles about the heroism of its participants. On at least three occasions in the late nineteenth and early twentieth centuries, Serbia fought to regain Kosova, finally succeeding in the Second Balkan War of 1913.

Although Kosova remained part of Serbia after the founding of Yugoslavia in 1918, its ethnic make-up grew increasingly Albanian. When Josip Broz Tito and his Communist Partisans emerged victorious at the end of World War II, they acknowledged this demographic shift by creating the Autonomous Region of Kosova. Although cosmetic changes in 1963 and 1968 gave Albania Communists some authority over internal affairs, the region remained under Serbia's control.

The rules changed in 1974, when Tito proposed a new constitution that he hoped would alleviate the growth of nationalism throughout Yugoslavia. In an effort to weaken Serbian chauvinism and placate growing Albanian nationalism, Kosova was given status and power virtually equivalent to that of the existent six Yugoslav republics (but maintained its position as part of Serbia). For the first time, Albanians—albeit Communists—controlled the region.

To Serbian nationalists, Albanian predominance over the cradle of Serbian civilization was intolerable, Kosova became a focal point of Serbian irredentism, fueled in part by the sporadic attempts of Albanian nationalists to make Kosova a full republic (and thus an equal to Serbia within the Yugoslav federation). The Serbs found their champion in Serbian President Slobodan Milosevic, who in early 1989 abolished most of the privileges granted to Kosova in 1974 and reestablished direct Serbian control over the region.

When Kosova's parliament refused to ratify these changes, it was abolished and its leaders arrested. Parliamentarians who managed to avoid arrest fled the country to form a government-in-exile. In Prishtina, public

protests intensified, often culminating in violent clashes between rock-throwing Albanians and Serbian police units. In February 1989 Serbian authorities declared a state of emergency. In March, riot police opened fire on crowds in Prishtina, killing at least twenty-four civilians.

On 28 June 1989, over one million Serbs gathered at Kosovo Polje to hear Milosevic commemorate the 600th anniversary of "the tragedy whose spirit has permeated the entire Serbian culture." In an apparent reference to the recent annexation of Kosova, Milosevic noted that the anniversary came "at a time when Serbia after many decades has regained its state, national and spiritual integrity," and pledged that never again would anyone "beat the Serbs." Back in Belgrade, radical nationalists began to organize paramilitary units (similar to those now fighting in Croatia and Bosnia) to "defend" Kosova.

#### THE ALBANIAN OPPOSITION

Despite the establishment of a police state and an exponential growth in extrajudicial violence, the Albanian opposition continues to advocate non-violence in its pursuit of independence. Gazmend Pula is a good example. Gazmend holds a Master's degree in electrical engineering from George Washington University. Under normal circumstances, he probably would have been content teaching at the University of Prishtina. Instead, he risks repeated arrests and beatings to head the Kosovo Helsinki Committee (or Kosovo Watch), gathering concrete evidence of human rights violations. In the process, he has lost his privacy, his job, and the ability to support his family.

Soon after arriving in Kosova, I met Gazmend in an office well-concealed amidst the labyrinth of streets and alleys that make up the Albanian ghetto of Prishtina. As the evening call to prayer rang out from a nearby mosque, Gazmend and several other Watch members talked about Milosevic's campaign to "Serbianize" their homeland.

In a region where annual per capita income is below \$400.00 and many Kosovars struggle to find jobs in even the best of circumstances, tens of thousands of Albanians have lost their jobs on the grounds of "disloyalty." Gazmend thinks that the Serbian authorities hope to use these jobs—many of which are managerial or technical—to lure Serbs back to Kosova, slowly but surely tilting the ethnic mix until it favors the Serbs. "They may be abolishing apartheid in South Africa, but it's making a comeback here in Kosova," Gazmend said.

Serbianization also has affected education. At the University of Prishtina (once the center of Albanian culture in Yugoslavia and an evident source of pride for Gazmend and the other professors with whom we met), enrollment has been cut from 7,000 to 3,000, with half of the remaining slots reserved for Serbs. Over eight hundred Albanian professors have been fired, and classes now are conducted in Serbo-Croatian. According to Eshref Ademaj, a Professor of Mathematics and Chairman of the Association of University Professors, "each year only 1,000 Serbs in all of Kosova apply to the university. Why do Serbs need 500 extra slots? Meanwhile, 14,000 Albanians must fight for 1,500 positions. We are denied access to all university buildings, including the library and the experimental facilities."

Kosovo Watch also keeps tabs on the residents of the Grand Hotel. Interrogations, beating, and arrest continue unabated. Using Serbian government statistics, Gazmend estimates that since 1981, 600,000 Albanians

have been questioned, harassed, or jailed by Serbian authorities. If his figures are correct, almost one out of three Kosovar Albanians has been suspected of opposing Serbian power.

Although Kosovo Watch plays an important role in publicizing the plight of Kosovar Albanians, its efforts are secondary to the Albanian struggle to make Kosovo an independent state. Central to this effort is the Democratic League of Kosovo (LDK). Founded in 1990 by Ibrahim Rugova, a professor at the University of Prishtina and President of the Kosovo Writers Association, the LDK is a coalition of pro-democratic activists.

Everywhere we went, long lines of Albanians, Turks, Muslim Slavs, Croats, Gypsies, and even a few Serbs patiently waited to vote. In every precinct save one, over ninety percent of those eligible voted. In Istok, a small village at the foot of the mountains between Kosovo and Montenegro, 667 of the 672 residents registered had voted by 3:30 P.M. When asked about the remaining five, one of the local electoral commissioners said that "they had things to do this morning, but we're expecting them any minute now."

Although the presence of the international media helped stunt Serbian efforts to stop the election, the army and police managed to harass voters and interfere with the electoral process in a number of locations. Dozens of polling places were closed or surrounded, blank ballots and campaign literature were seized, and poll workers were arrested. Two members of our delegation were held for several hours when they tried to investigate conditions in the town of Prizren.

For the most part, however, the electoral commissions were prepared for everything the Serbs threw at them. In those precincts where polling places had been shut down, secondary sites—usually private homes—were used. Additional ballots were made available to those precincts that needed them. Volunteers stepped in to take the places of those arrested. Observers were posted on the routes to each polling place in order to warn against police raids. While it may seem odd to label as "clandestine" an election where over 750,000 people voted, it best describes the manner in which the Kosovars were able to stage the election without provoking large-scale Serbian military intervention.

The LDK is now ready for phase three: the formation of a parliament inside Kosovo under the leadership of the new President, Ibrahim Rugova. Although the races for parliament were hotly contested (490 candidates ran for one hundred seats), Rugova was the sole candidate for President. I caught up to him on election day at LDK headquarters, a building located only a few hundred meters from the back door of the central police station in Prishtina. He was elated at the overwhelming response he had received that morning when he had gone to vote, and optimistic that elections would proceed peacefully. "I am sure there will be problems," he told the delegation, "but democracy is a concrete step. The elections can only help us realize the independence of Kosovo. Now we will work here in Kosovo as a government."

In late June, Rugova attempted to convene parliament in Prishtina. Serbian police and military forces surrounded the city and used a copy of the LDK'S published list of parliamentarians to arrest or turn away those who tried to attend, thus preventing the parliament from obtaining a quorum. Rugova and the LDK have not yet decided when or where to make a second attempt.

Rugova's determination to form a government undoubtedly will be viewed as a provocation by Serbian authorities—perhaps enough of one to provoke military intervention. While such a move would not be surprising in light of Serbia's reaction to similar steps toward independence by Slovenia, Croatia, and Bosnia-Herzegovina, it will present the international community with a new dilemma.

#### DEMOGRAPHICS AND BOUNDARIES

Until now, victims of Serbian aggression have benefited (at least in theory) from a pledge by Lord Carrington, the European Community mediator, that any solution of the Yugoslav crisis must conform to existing borders. In Croatia and Bosnia, the international community has refused to acknowledge Serbian arguments that demographics—the presence of Serb populations in certain regions of both republics—should be more important than historical boundaries.

But in Kosovo, the tables are turned. If Carrington's formula is used, the region will stay under Serbian control, its 2 million-strong Albanian majority condemned to live in a police state that employs the tactics of apartheid.

The solution—and even it may not avoid bloodshed—lies in Tito's 1974 effort to grant Kosovo a modicum of autonomy. The international community should recognize that Kosovo's de facto existence as an independent unit within the old Yugoslavia is a sufficient basis upon which to recognize its right to independence.

Such an act may further anger the Serbs, but short of military intervention, it is the only way to offer protection to the fledgling democracy now being built in Kosovo. If the West instead chooses to continue ignoring the crisis, the residents of the Grant Hotel Prishtina will not hesitate to act in their stead.

#### RESOLUTION TO DELAY THE PROPOSED F-15 SALE TO SAUDI ARABIA

• Mr. WELLSTONE. Mr. President, last Thursday, I introduced a joint resolution to delay the proposed sale of 72 sophisticated F-15 aircraft by the Bush administration to the Kingdom of Saudi Arabia.

Mr. President, 2 years ago President Bush told this Congress that "it would be tragic if the nations of the Middle East and the Persian Gulf were now, in the wake of the war, to embark on a new arms race." But since making that statement, the administration has sold, or allowed the sale, of record-setting levels of arms to the region. At a time when the rest of the world's weapons sales have declined sharply, the administration has dramatically increased arms sales to the Middle East—at a rate three times higher than that of its nearest competitor, the former Soviet Union.

The Saudi F-15 sale is the most troubling recent example of these accelerated efforts. If it goes forward, the sale will have serious negative con-

sequences for arms control in the Middle East, particularly the negotiations on arms transfers among the region's five major arms suppliers, who make between 85-90 percent of all sales to the region. After announcements by the administration of this sale and the F-16 sale to Taiwan, the fourth round of these talks, scheduled for this fall, were postponed and will probably not go forward until sometime next year.

In discussions with my colleagues on both sides of the aisle over the last few days, I have been struck by how many have serious concerns about this sale, particularly in the absence of any legislative effort or vehicle in the Senate—such as a resolution of disapproval—that might serve to focus that opposition. But despite these concerns, this \$9 billion sale to Saudi Arabia looks like it will not be blocked or delayed by the Congress in the waning days of the session because, as the administration had hoped, most members are engaged in other urgent matters and have not had time to focus on the sale.

As I stated to the Senate Foreign Relations Committee in the only open Senate hearing on the sale at the end of last week, I believe that the administration's failure to provide sufficient notice, or to consult in a timely manner with the Senate Foreign Relations or House Foreign Affairs Committees, contrary to both tradition and legal requirements, should prompt a serious effort by the Congress to postpone the sale under the timetable proposed by the administration. By my calculation, if the administration had provided the typical 50-day consultation period, that period, ironically, would have ended on election day, November 3, 1992. Instead, the administration has chosen to try to slip the sale through despite numerous expressions of concern and opposition from members in both Houses, with very little advance notice. As Chairman PELL pointed out during the hearing last week, President Bush did not formally notify this sale to Congress until September 14. Thus, the statutory 30-day notification period will expire after we adjourn.

I had hoped that in the closing days of this session, the committee might act upon this or other legislation which would at least delay final action on the sale until we return early next year and until we have been given an opportunity to thoughtfully consider the important foreign policy and national security implications of the sale. The administration has bypassed both the traditional 20-day "pre-notification" period, and the legal 30-day notification period. I do not believe this action should be allowed to stand without some sort of congressional response. These weapons, the most sophisticated aircraft ever transferred by the U.S. Government, are a major advance over the current F-15 Cs and Ds

in the current Saudi arsenal. For example, they will carry fuel tanks that give them a much greater range than current Saudi Aircraft. They will reportedly carry larger weapons payloads, have better radar capabilities, will be better able to target enemy planes operating at night, and will carry sophisticated laser or electro-optically guided Maverick air-to-ground missiles for improved performance. Though the administration has emphasized the technical differences between the U.S. and export versions of the ground-attack F-15, they are significant and should not be dismissed too quickly. Even if one concedes certain similarities, we must keep in mind that the two are built on the same airframe, and many of the "bells and whistles" could easily be attached later—as they were to earlier versions of the F-15 we sold to Saudi Arabia. There kinds of routine "upgrades" occur all the time up here, are notified to the appropriate committees, and are usually approved with little fanfare.

Let me be clear. As I have said before, I oppose this sale because I believe it would represent a major escalation of the arms race in the Middle East. Contrary to the assertions of the administration, I do not believe the sale would advance the national security interests of the United States, nor would it do anything to protect the long-term job security of American aerospace workers.

I am astounded that the administration has decided to move forward on this sale in the wake of its arms control pronouncements during the Persian Gulf War. At the height of the war, then Secretary of State Baker told the House Foreign Affairs Committee, "The time has come to try to change the destructive pattern of military competition and proliferation in the Middle East, and to reduce the arms flow into an area that is already over-militarized."

Instead, since the Gulf War, the United States has sold billions of new weapons to buyers in the region—most estimates suggest it is about \$20 billion. Instead of pursuing a non-proliferation policy in this region, we have become a major contributor to the Middle East arms race.

I believe the sale will only provide an added impetus to other Middle Eastern nations to acquire more weapons to counter what they would view as a new Saudi threat. Unless we slow and then stop this arms race, United States troops could soon face the troops of Libya, Iran, Iraq, Syria, or another Middle East nation armed with the deadliest and most destructive high-technology weaponry available in international arms markets, bent on achieving their own territorial ambitions by force.

How can we argue with a straight face to other countries that they ought

to limit their dangerous arms transfers while we are a leader in arms sales? How can we tell the cash-strapped nations of Russia and China to restrain their sales under such conditions? And how can we expect our close allies, including Britain and France, to work with us in developing a responsible arms control regime if we proceed with unrestrained sales? Obviously, we cannot. Those who argue that if we don't sell these weapons, others will, overlook the fact that the administration has resisted using these talks as a forum to discuss regional limits on the F-15 or other similar offensive aircraft. With such supplier-imposed limits, that issue of competitive advantage would be rendered moot.

I had expected a full and vigorous debate on this issue in the Senate, and have been deeply disappointed that this debate has not happened. Last November, nearly two-thirds of the members of the Senate expressed concern about the sale, and noted their profound anxiety that such a sale was being contemplated while the Middle East peace talks continued.

In fact, after waiting to see if members of the committee who might be concerned about the sale would act, I considered introducing a resolution of disapproval myself on the sale. But I recognize that with the time constraints imposed upon us by the administration, and considering the situation in the House, there is now no chance that such a resolution would be acted upon by the committee or by the full Senate—much less of its being enacted into law.

Since we were moving rapidly toward adjournment, I believed that the only responsible alternative available to us was to delay the sale until the appropriate committees of the Congress were able to consider it fully in the next Congress. Since I understand the first planes are not scheduled to be placed into service until after 1995, there is absolutely no reason not to delay the sale until at least March 1, 1993 while the appropriate Senate and House committees are given an opportunity to consider it.

I know that the Foreign Relations Committee will not act this session to delay this ill-conceived arms sale until a more thorough analysis can be made of its destructive implications for future Middle East conventional arms control efforts. I believe that is a serious mistake, and I urge the President to reconsider the sale, or at least hold it in abeyance, in light of his numerous commitments to pursue arms control, not massive arms sales, to the Middle East. I intend to work with interested colleagues early next year on legislation to tighten arms export control and notification requirements, so that we do not have a repeat of this episode on future arms sales.●

#### CONGRESSIONAL CALL TO CONSCIENCE

● Mr. GRASSLEY. Mr. President, I am proud to rise today as a cochair of the Congressional Call to Conscience. For the past 16 years, the Call to Conscience has worked to bring attention to Soviet refusenik cases and urge the Soviet Union to grant them freedom.

For decades, those identified as Jews in the former Soviet Union were denied emigration, and risked imprisonment, torture, or loss of employment. Today, largely due to the tenacity of Congress and the Bush and Reagan administrations, the Jewish people are allowed to worship openly in accordance with their faith, and most are free to emigrate. Since the fall of the Berlin Wall, more than 400,000 have moved to Israel.

Despite this progress, our work is far from over. Hundreds of thousands of others are still waiting to leave the former Soviet Union. Jews and other minorities have begun to find themselves endangered by a surge in extreme nationalism, and anti-Semitic and pro-Fascist groups and newspapers have begun to appear across Russia. Also, those remaining are still being prosecuted by the laws of the Soviet Union, even though these laws should no longer be valid.

One of the realities facing the countries that used to make up the Soviet Union is that legal reform has failed to keep pace with market reform. These new countries have failed to implement new legal safeguards to protect their citizens from being convicted of Soviet crimes which should have no applicability in ex-Soviet countries.

Just last week, Mark Glizer, a 37-year-old engineer who was convicted in June of speculation under a 1990 Soviet law, was finally released from prison following the reduction of his sentence on August 31 by a Moscow city court decision on appeal. Speculation is the economic crime of selling something for a profit in a Communist country. Glizer had been sentenced to 5 years in a strict regime labor camp for allegedly introducing a potential buyer of a car to a friend found guilty of selling the car for a profit. However, the Moscow-based Soviet American Bureau on Human Rights, after investigating the case, determined that Mr. Glizer was arrested because he located not a buyer, but merely a leaser for his friend's car.

Mr. Glizer had no previous criminal record. He had been employed for over 20 years at the Lenin Komsomol Automobile Factory where he started as an apprentice and eventually was promoted to head the quality control department of the factory. Mr. Glizer was the sole supporter of his wife and son, his ailing 82-year-old father, and his 41-year-old handicapped brother. During his 11 months in confinement, Mr. Glizer was not allowed to meet with his wife or son.

Although everyone who has followed this case is relieved to learn of Mr. Glizer's release, the fact that the court reduced Mr. Glizer's sentence rather than overturning his sentence sets a dangerous precedent by upholding this outdated criminal law. At the time of the trial of May 1992, the Russian speculation statute, article 154 of RSFSR Criminal Code, had been repealed and the Soviet law of October 31, 1990, had expired on its terms. Furthermore, the CIS agreement signed on December 8, 1991, expressly prohibits the enforcement of Soviet law in the territory of Russia.

Glizer's attorneys, A.P. Fokov of Moscow and William M. Cohen of the Center for Human Rights Advocacy in Boulder, CO, argued that speculation is no longer a crime in Russia; therefore, under article 6 of the RSFSR criminal code, pending charges of speculation against Glizer should have been dismissed. However, in reducing Glizer's sentence to less than the 1 year he was incarcerated from his arrest in July 1991 until his release this week, the Moscow city court affirmed the validity of convicting Russian citizens of speculation for engaging in profit-making activity. The court expressly stated that the Soviet law on speculation is still in effect.

This decision sets a dangerous precedent by upholding the conviction of a crime which is no longer in effect. The threat of continued prosecution of such Soviet-era, anti-free-market crimes is likely to further deter Western investment in Russia at a time when Russia is seeking massive aid from the United States and other countries. Although the past few years have been a triumphant time for Soviet Jewry, it is imperative that we in the Senate work to tie economic aid to progress in creating democratic institutions and to reform of the Russian criminal justice system to protect human rights under the rule of law.●

#### COLLEGE OF PHYSICIANS

● Mr. WOFFORD. Mr. President, I too rise saluting the American College of Physicians for joining the fight for comprehensive reform of our health care system. This group of 77,000 physicians has proposed a detailed and well-conceived plan for universal coverage, high quality care, and serious cost control.

This is the second important group of physicians to endorse the idea of a national health care budget to control skyrocketing health care costs. Earlier this year, the American College of Family Physicians made a similar proposal.

Recently, one Pennsylvania doctor spoke to me about the misimpression that physicians and other medical professionals are opposed to comprehensive health care reform. The truth is

that physicians see clearly the inadequacies in our current system. They are burdened with paperwork and bureaucracy that forces them to spend less and less time providing care to their patients.

That is why the American College of Physicians has also proposed to simplify the administrative nightmare that is so frustrating for physicians and patients alike. This can yield us significant savings—some have estimated up to \$100 billion per year—that we can recapture and use towards the delivery of medical services.

Physicians know all too well that the complex maze of public and private health insurance does not adequately serve the health care needs of Americans. In addition to proposing a national budget to bring costs down, the college advocates the extension of health insurance to all Americans, making available a comprehensive set of benefits, and the development of practice guidelines to improve medical effectiveness.

Their plan also addresses the need to achieve a balance between generalists and specialists and to expand the availability of primary and preventive medical services.

This comprehensive reform proposal crafted after much study by the American College of Physicians is more evidence of the growing consensus for fundamental change in our health care system—especially on the need for serious cost controls.

Doctors are the core of our health care system and I am delighted that the American College of Physicians has added their suggestions to the health care debate.

I look forward to expanding on these ideas with members of the college and other physicians as we continue to hammer out a unique American plan that will turn the right to affordable health care into a reality for all Americans. I urge my colleagues to consider the recommendations set forth in this important new proposal.●

(At the request of Mr. DOLE, the following statement was ordered to be printed in the RECORD.)

#### IRRESPONSIBLE CONGRESS? HERE'S TODAY'S BOXSCORE

● Mr. HELMS. Mr. President, the Federal debt run up by the U.S. Congress stood at \$4,060,002,182,483.19 as of the close of business on October 6, 1992.

Anybody familiar with the U.S. Constitution knows that no President can spend a dime that has not first been authorized and appropriated by the Congress of the United States.

During fiscal year 1991, it cost the American taxpayers \$286,022,000,000 just to pay the interest on Federal spending approved by Congress—spending over and above what the Federal Government collected in taxes and other in-

come. Averaged out, this amounts to \$5.5 billion every week, or \$785 million every day, just to pay the interest on the existing Federal debt.

On a per capita basis, every man, woman and child owes \$15,806.35—thanks to the big spenders in Congress for the past half century. Paying the interest on this massive debt, averaged out, amounts to \$1,127.85 per year for each man, woman and child in America—or, to look at it another way, for each family of four, the tab—to pay the interest alone—comes to \$4,511.40 per year.

What would America be like today if there had been a Congress that had the courage and the integrity to operate on a balanced budget?●

#### THE FREEDOM SUPPORT ACT

● Mr. LEAHY. Mr. President, last week, Congress passed the Freedom for Russia and Emerging Eurasian Democracies and Open Markets Support Act, to provide additional assistance to aid the people of the independent States of the former Soviet Union. The fiscal 1993 Foreign Operations Appropriations Act appropriates the funds to carry out programs authorized in the Freedom Support Act.

The Freedom Support Act conference report provides the administration with new flexibility to deal with the constantly changing situation in the former Soviet Union, and it establishes a number of new requirements. I would like to highlight several of these provisions.

First, the conference report strengthens the direct credit program operated by the Commodity Credit Corporation to continue its support of exports of U.S. agricultural commodities. The report requires that the Secretary undertake the same evaluation of credit worthiness for participation in the direct credit program as is current law in the credit guarantee program. This amendment prohibits the Department of Agriculture from making credits available to any country that the Secretary of Agriculture determines can not adequately repay the debt. This standard is a prudent safeguard to ensure that the U.S. taxpayer is not left holding the bag for loans that cannot be repaid.

In considering this legislation, Congress rejected attempts by the administration to weaken credit worthiness provisions. Mr. President, the direct credit and credit guarantee programs are to be commercial programs, not foreign aid.

Second, the conference report modifies the Senate provision which amends the Food for Progress program in order to encourage private voluntary organizations and cooperatives to become more directly involved in the development of private sector agriculture and agribusiness in the independent States of the former Soviet Union. I strongly

urge the administration to actively seek out projects with these organizations to assist in the transportation and distribution of food, and to support agricultural development projects that will strengthen private sector agriculture in the former Soviet Union.

Third, the conference report largely adopts the Senate provisions to add new priorities to the emerging democracies export credit guarantee program. I expect that the Department will use this program for eligible projects that encourage the privatization of the agricultural sector in emerging democracies, including the former Soviet Union.

Fourth, the conference report sets threshold levels for processed and high-value agricultural products in the export enhancement program and export credit guarantee program. I expect the Department to take steps to encourage the foreign countries that benefit from these programs to include dairy products in their allocations under these programs. Aggressive use of these programs to promote dairy product exports could send a strong signal to the European Community and to United States markets overseas that the United States is a serious player in the world dairy market.

In addition, I am encouraged that the Agency for International Development has entered into an agreement with CARE to send \$14 million of whole and skim milk powder to the independent States of the former Soviet Union in order to meet urgent humanitarian needs, particularly feeding programs for lactating mothers and infants, as well as the poor generally. There is virtually no social safety net in Russia, and this program will help the weakest and most defenseless. I urge the U.S. Department of Agriculture to make these purchases as soon as possible. This commodity import program was initiated as part of the fiscal year 1992 Foreign Operations Appropriations Act. Section 592 of the fiscal year 1993 Foreign Operations Appropriations Act funds this program at \$50 million. I expect that the administration will make purchases under this program in the first half of the fiscal year in order to meet food needs through the winter.

Finally, the conference report includes a general authority for agribusiness centers in the former Soviet Union. The fiscal 1993 foreign operations appropriations also provides funding for these agribusiness centers in the new independent republics. The purposes of this program include, among others, the enhancement of the ability of farmers and agribusiness practitioners to meet the needs of the people of the independent States, and assistance in their transition to a free market system. I believe that these centers should include projects to improve private and cooperative dairy farms and dairy processing facilities in

the independent States of the former Soviet Union. Currently, Geonomics Institute, a Vermont organization, is conducting a similar project in Estonia to privatize and commercialize that country's dairy industry, using a grant from the Agency for International Development.●

(At the request of Mr. DOLE, the following statement was ordered to be printed in the RECORD.)

#### VIOLATION OF HUMAN RIGHTS IN KASHMIR

● Mr. HELMS. Mr. President, all of us are, or should be, greatly concerned about the blatant violation of basic human rights in Kashmir. While the situation in that region of the subcontinent is complicated, and while there have been serious abuses on all sides of this tragic ethnic conflict, it is increasingly clear that not nearly enough is being done by the Government of India to solve this decades-long dispute.

The state of affairs in Kashmir has deteriorated to the point that in this year's Foreign Operations appropriations bill the House of Representatives voted to cut \$24 million from India's funding, but that provision was subsequently dropped on the Senate side. New Delhi has a tendency to dismiss any action by this body that does not directly impact its pocketbook.

This time India has gotten off nearly scot free, and I believe it's time to put New Delhi on notice: Momentum is building; you have a chance to clean up your act and end your abuse of human rights. Those who sponsor antigovernment terrorists in India must do likewise. Next year the U.S. Senate will not be so restrained.●

(At the request of Mr. MITCHELL, the following statement was ordered to be printed in the RECORD.)

#### NEED TO BETTER PROTECT OUR PENSIONS

● Mr. SANFORD. Mr. President, in late July 1991, I held a hearing in Kannapolis, NC, to investigate the impact of life insurance company failures on the pensions of working Americans. At the hearing, business executives, pension fund experts, and the president of the National Association of Insurance Commissioners testified to the outrageous conduct and greed that led to the plundering and loss of hard-earned employee pensions while the Government agencies responsible for overseeing pension reversions claimed to lack the necessary authority to act.

Tragically, the consequences of the thoughtless actions of corporate raiders and ineffective Government supervision came to impact the pensions of the retired workers of Cannon Mills living in Kannapolis, NC, and across

the United States. During the hearing, these retired workers spoke with pride of their 30, 40, even 50, years of service to Cannon Mills. These hardworking men and women had possessed the foresight in the late 1940's and early 1950's to provide for their retirement needs by enrolling in the company's pension plan. Regrettably in the 1980's, unbeknownst to the Cannon employees and retirees, the barbarians were at the gates of Kannapolis threatening these workers' years of hard work and planning.

In a scenario too often seen in the 1980's, a corporate raider targeted an overfunded pension fund in order to line his pockets and to provide capital for yet another LBO. In the Cannon Mills case, the excess funds were pocketed and the pension fund liabilities were placed into annuities purchased from the Executive Life Insurance Co. of California. The workers understood and depended upon the annuity certificates to pay at the same level as outlined by the former pension plan. In April 1991, Executive Life Insurance of California was placed into conservatorship. 60 percent of its portfolio had been invested in high-risk junk bonds. Benefit payments to pensioners were cut by 30 percent. David Murdock, the corporate raider, claimed to have fulfilled the ERISA mandated fiduciary duty to safeguard the employee pension fund at the time the pension funds were invested in the Executive Life annuities. The Pension Benefit Guaranty Corporation [PBGC] maintained it had no responsibility for pension plans converted into annuities and refused to exercise its lawful authority to reinstitute the plan. Both Murdock and the PBGC asserted the reduced benefit payments due to the insurance company failure were State government problems.

Meanwhile, retired workers that relied upon pension checks to provide a needed supplement to their social security checks went without food and fuel as the bankruptcy court and State governments haggled over whom would get paid first. The delay in disbursing the benefits created hardships and burdens for these men and women—burdens they had carefully and thoughtfully planned to avoid.

Many of the legal loopholes that permitted the unfortunate events in Kannapolis and other American communities still exist. The need to prevent future loss of worker pension funds remains due to the absence of clearly defined rules governing pension asset reversions, lax enforcement of present laws, and the potential crisis facing PBGC and State guaranty funds as these funds attempt to cope with the growing number of bankrupt businesses with underfunded pension plans.

In general, much tighter rules are necessary before pension fund reversions are permitted. Presently, the reg-

ulations governing a sponsor's fiduciary responsibility to the pension plan's participants do not require the appointment of an alternate fiduciary should the sponsor have a substantial interest in a proposed pension fund reversion. The rules also fail to mandate adequate notice to the pension participants and certainly do not provide the participants with a forum to express their opinions over a proposed reversion.

In addition to mandating the pension plan participants be provided with information explaining the proposed reversion, the Senate must consider extending other protections to the pension fund and its participants. Placing a moratorium on pension reversions for 5 years following a corporate takeover would eliminate the temptation to raid pension funds for short term financial gain. By extending the statute of limitations on actions arising under ERISA and allowing for punitive damages and attorney's fees in cases brought for breaches of fiduciary duties, the Senate would enable workers to enforce the obligations the plan sponsors owe to them.

Senate action needs to impress upon the agencies in charge of pension supervision the seriousness of their responsibilities. During the go-go 1980's, both the PBGC and the Department of Labor were remiss in their obligations to oversee the Cannon Mill pension reversion and others. Unfortunately, the PBGC and pensioners are already under stress due to the failure to prevent the investment of pension assets in high-risk businesses like Executive Life.

The failure to enforce the law combined with the present state of the economy has created a greater threat to pensions. The PBGC's guaranty fund is already overextended and some believe another thrift-like crisis looms in the future. The PBGC's guaranty fund is used to make up shortfalls in a stressed or underfunded pension fund. In bankruptcies involving underfunded pension plans the PBGC is treated as an unsecured creditor to the debtor. Unsecured creditors are rarely paid the full amount owed them. With the increased number and size of bankruptcies over the last decade, the PBGC may not have the funds to meet its obligations. The solution may be to give the PBGC and pensioners a higher priority in bankruptcy. In any event, an incentive needs to be created so that employers do not keep pension plans underfunded. Any incentive needs to be carefully applied by scrupulous and fair agency action.

I invite my distinguished colleagues in the Senate to work with me on the issue of pension protection. I have been working on legislation to address a number of these issues. I believe this is and will increasingly become a critical issue for working people throughout America. I hope that next year a com-

prehensive pension protection bill can be enacted. Our efforts in the Senate must focus on preventing the excesses of the 1980's from occurring again by making clear to the pension plan sponsors their obligations to American workers. The Congress needs to mandate and broaden the authority of the Federal agencies charged with supervising pension fund reversions. As we enter into a period of invigorated leadership, on the threshold of the 21st century, let us once again renew our commitment to the working men and women of this country by recognizing their contributions to America's 20th century prominence by protecting all they have earned for their futures. •

#### WOODROW WILSON BRIDGE OPENINGS—H.R. 5617

• Mr. SARBANES. Mr. President, I rise to express my support for H.R. 5617, providing for congressional approval of a Governing International Fishery Agreement. This legislation contains an amended version of a measure I introduced earlier in this session of Congress, along with my colleagues, Senators ROBB, WARNER, and MIKULSKI, to help address the serious traffic problems at the Woodrow Wilson Bridge associated with the drawbridge opening schedule.

As anyone who commutes to work in the Washington metropolitan area or who travels on Interstate 95 knows, the Woodrow Wilson Bridge is one of the most heavily traveled bridges and one of the worst bottlenecks on the Interstate Highway System. Originally designed some 30 years ago to carry 75,000 vehicles a day, it now averages over 160,000 vehicles daily—far exceeding the bridge's capacity—and this burden is expected to grow in the next 20 years to nearly 250,000. There is no reasonable alternative route for motorists and the bridge is the site of severe congestion, long traffic backups, and frequent accidents.

Drawbridge openings on this vital link in our transportation network—particularly those which occur during peak traffic hours—exacerbate this traffic problem. Traffic can backup for miles—not only on the beltway, but on adjacent roads as well—and it often takes 20 to 30 minutes or even more before the queue dissipates. Each time the bridge opens, lives and commerce are disrupted and the safety of motorists is placed at risk. One has to balance the impact of those few boats desiring to sail up the Potomac, against the more than 160,000 vehicles each day on the eastern seaboard's main north-south route. I want to underscore that the bridge clearance currently allows passage of almost all of the pleasure boats which are docked on the Potomac upstream from the structure. Only boats with mast or stack heights greater than 50 feet require an opening of the draw span.

In the past few years, commuters, State transportation directors, members of the Maryland and Virginia congressional delegations, and others have repeatedly appealed to the U.S. Coast Guard, which is responsible for regulating the drawbridge opening schedule, to restrict openings to hours when vehicle traffic is at its lowest volume. The Coast Guard's response was to issue a series of temporary regulations which experimented with different opening schedules, but in fact represented very little change from the status quo. Despite overwhelming support for a more restrictive opening schedule on the bridge, the Coast Guard's regulations still provide a broad window for passage of recreational and commercial vessels during daytime and evening hours.

In an effort to seek a more acceptable solution to the drawbridge problem, I have worked for many months with members of our area congressional delegation, State highway officials, representatives of the motoring and boating community, and others to develop an alternative drawbridge opening schedule which is included in this legislation. While this alternative schedule is perhaps not as restrictive in openings as some of us would have liked, it strikes a more reasonable balance between the needs of the motoring and boating public than any schedule the Coast Guard has tested to date and, as such, represents a major step forward in addressing the drawbridge's operation.

What does this provision do? First, it specifically prohibits any bridge openings during the peak commuting hours of 5 a.m. to 10 a.m. and 2 p.m. to 8 p.m. On weekends, openings would be prohibited during the busy traffic hours of 2 p.m. to 7 p.m. Second, the total number of openings during the high traffic volume daylight hours would be significantly curtailed because those large recreational sailboats which require openings, and which comprise the vast majority of the openings, would be allowed to pass only when accompanied by a commercial vessel or in the early morning hours on weekends, when traffic is lighter. Third, it requires that vessel operators provide significant advance notice of potential openings so that the public can adjust their schedules and travel plans accordingly. The motoring public will also have the benefit of advance warning signs now in place along the Capital Beltway made available through funding from the Intermodal Surface Transportation Efficiency Act of 1991. In addition, the Washington Post has agreed to make up-to-date bridge opening information available through its Post-Haste service.

The alternative schedule has been endorsed by the transportation planning board of the Metropolitan Washington Council of Governments, the Greater

Washington Board of Trade, AAA-Potomac, Robinson Marine Terminals, State and local transportation departments, and others. In the State of Maryland, the entire Maryland congressional delegation, Governor Schaefer, the county commissioners of Charles County, Prince Georges County Executive Parris Glendening, local chambers of commerce have joined together in supporting the curtailed openings of the drawspan. I ask unanimous consent that letters from a number of these individuals and organizations be included in the RECORD immediately following my statement.

This schedule, along with the new notice program, should be a significant help in alleviating the disruptions and traffic problems associated with the bridge openings. I am pleased that it has been included in this measure and I want to particularly commend my colleagues Senator ROBB and Congressman HOYER who were instrumental in helping to craft the legislative provisions establishing the schedule.

The letters follows:

STATE OF MARYLAND  
EXECUTIVE DEPARTMENT,

Washington, DC, September 25, 1992.

Hon. Paul S. Sarbanes,  
U.S. Senate, Hart Senate Office Building,  
Washington, DC.

DEAR SENATOR SARBANES: Thank you for your effort to restrict openings of the Woodrow Wilson Bridge to hours when vehicle traffic is at its lowest volume.

I support your efforts, and was also pleased to learn your amendment requires advance notification for all bridge openings.

Advance notification is very important to the Maryland Department of Transportation's statewide commuter alert program. As you know, there have been fatal accidents on the bridge when the drawbridge has been raised. If the State Highway Administration can alert all motorists, we should see increased safety at the drawbridge.

The State has long sought to reduce the number of openings and limit them to the hours when auto travel is the lightest. Your personal interest in this issue is greatly appreciated. Through your efforts, the traveling public will see some relief from this problem.

If I can be of further assistance to you, please do not hesitate to contact me.

Sincerely,

WILLIAM DONALD SCHAEFER,  
Governor.

Alexandria, VA., September 24, 1992.

Re Woodrow Wilson Bridge.

Hon. STENY H. HOYER,  
House of Representatives,  
Washington, DC.

Hon. CHARLES S. ROBB,  
U.S. Senate,  
Washington, DC.

Hon. Paul S. Sarbanes,  
U.S. Senate,  
Washington, DC.

GENTLEMEN: We very much appreciate the diligent efforts of you and your most capable staff to arrive at compromise language regarding the opening of the Woodrow Wilson bridge drawspan. We understand that the attached language is acceptable to all concerned Members of Congress and that the

language will be included in the Coast Guard Reauthorization Bill going to the Senate floor in lieu of the language in section (a)(3) of the Senate staff draft dated September 17, 1992. We are pleased with the compromise language and will support the bill.

In addition, we wish to inform you that in order to improve the flow of information to the public on the status of the bridge, The Washington Post will include bridge information in its Post-Haste service. Post-Haste is a free telephone information service of The Washington Post which includes listings for subjects such as sports scores, weather, stock market quotes, etc. This recorded information can be continually updated.

The Post-Haste message will contain the basic schedule for when the bridge can open and any information available concerning specific scheduled openings. On the latter point, we will continue to work with Virginia, Maryland and District of Columbia officials to improve the availability of information concerning openings necessitated by the passage of vessels not arriving or departing from Robinson Terminal.

Inclusion of bridge information in the Post-Haste service will begin in a few days. Thank you again for your time and concern on this issue.

Sincerely,

JAMES G. BOATNER,  
President.

RESOLUTION SUPPORTING A COMPROMISE AGREEMENT ON THE OPENING SCHEDULE FOR THE WOODROW WILSON BRIDGE

Whereas, the National Capital Region Transportation Planning Board, hereinafter called "Board", has responsibilities under the provisions of the Federal Aid Highway Act of 1962, and the Urban Mass Transportation Act of 1964, as amended, for developing and carrying out a comprehensive, continuing, and coordinated transportation planning process for the metropolitan area; and

Whereas, the Woodrow Wilson Bridge represents a critical link in the region's transportation system, and the bridge experiences severe congestion problems today and must accommodate additional traffic in the future; and

Whereas, the current opening schedule for the bridge has been the subject of extensive discussion and negotiation aimed at reducing the traffic disruption caused by openings of the bridge; and

Whereas, Senator Paul Sarbanes' office has asked the Board to support the attached compromise agreement on the opening schedule; and

Whereas, the compromise agreement appears to achieve a reasonable balance between the requirements of highway and river traffic: Now, therefore, be it

Resolved, That the Transportation Planning Board supports the attached compromise agreement and urges the U.S. Coast Guard to give it full consideration in the regulatory process leading to the adoption of a permanent schedule.

THE GREATER WASHINGTON  
BOARD OF TRADE,  
Washington, DC, April 24, 1992.

Rear Adm. W.T. LELAND,  
Commander, Fifth Coast Guard District,  
Portsmouth, VA.

DEAR ADMIRAL LELAND: The Greater Washington Board of Trade is the regional chamber of commerce for the National Capital area, and our organization represents two-thirds of the region's private sector work

force. I am writing to express our concerns regarding the Coast Guard's proposed rule-making governing the openings of the Woodrow Wilson Bridge drawspan, including the most recent temporary final rule which was published in the Federal Register on March 18, 1992.

As you know, for some time, we have been urging the Coast Guard to restrict openings of the Woodrow Wilson Bridge in order to help alleviate the severe traffic congestion and frequent accidents on the bridge. Since it was first constructed some 30 years ago, highway traffic across the bridge has grown significantly. Originally designed to carry 75,000 cars, trucks and buses daily, it now averages over 160,000 vehicles a day. That is nearly 60 million vehicles a year!

The area Congressional Delegation recently sent a letter to you in support of a permanent solution to the drawspan problem. We strongly support the Delegation's compromise and believe this to be a major step in the right direction in addressing the drawbridge's operation. (A copy of the compromise is attached). Limiting the openings of the bridge during the peak rush hours (5-10 a.m. and 2-8 p.m.) will help alleviate the disruptions and highway traffic problems associated with bridge openings.

It is worthy to note that the Wilson Bridge is a major link in the region's transportation system and it is vital to the region's commerce. Not only do the region's workers use this major link to travel to and from work, but the region's firms conduct business over this facility throughout the day—business representatives traveling to appointments, and trucks delivering goods. Delays of this commerce through bridge openings means lost dollars to our businesses, and therefore bridge openings should be minimized.

The compromise schedule has the endorsement of a wide range of organizations and we believe the proposed schedule strikes a more reasonable balance between the needs of the motoring public and those of marine modes of transportation than any schedule tested to date. We urge you, prior to adopting final regulations, to test this proposed schedule and notification process. We appreciate your attention to this matter and look forward to working with you to achieve a solution to the Woodrow Wilson Bridge problem and other transportation issues confronting our region.

Sincerely,

JOHN R. TYDINGS. ●

FROM HERE TO ETERNITY

● Mr. SYMMS. Mr. President, my friend, Owen Frisby, recently sent me the transcript of a speech Paul Harvey delivered at the Radio Television New Directors Association Meeting in San Antonio, TX, on September 26, 1992. Owen pointed out that the last half of the speech, entitled "Shop Talk," is a poignant message about the evolution of journalistic freedom and responsibility. I insert the transcript of Mr. Harvey's speech at this point in the RECORD:

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

SPEECH BY PAUL HARVEY

This is a message from here to eternity. It is addressed to the late Mr. William Paley.

Dear Sir: You know most all there is of the history of broadcasting: you wrote much of

it. Now, for the first time, you are going to learn the rest of the story. The year was 1942.

From Kalamazoo, Michigan you received an acetate recording. It said: "Mr. Paley, sir, you are listening to the radio voice of tomorrow." The even-then stentorian voice of that wet-eared kid from Kalamazoo went on to say Elmer Davis was leaving for the OWI.

In another office on another floor of the cavernous building somebody called a production something-or-other presented a mimeographed five-minute undated newscast and suggested it be rehearsed aloud. Then, polished, it would be recorded for management to hear.

"First let me hear a run-through," he said. The eager-to-please lad, reading the copy cold, did well—he thought. But the round-faced somebody-from production said "That was very good \* \* \* except \* \* \*"

Then followed several corrections in pronunciation.

"The network preferred cosmopolitan pronunciations of such words as 'eye-ther' and 'neye-ther'" he explained. "And when you mention the concert at Carnegie Hall, it is 'car-nay-gee' and the violinist's name is 'yee-hoo-dee-main-wine.'" "But," the lad dared to interrupt, "I've heard it 'Yehudi Menuin.'" "A frequent mistake," the solicitous coach explained.

"But he is well known to us at CBS and he prefers 'yee-hoo-dee main wine.'"

Well, Mr. Paley, sir \* \* \*

You never knew until this moment how your junior executives in those days purposed to sabotage any outsider. Even, and perhaps especially, when the referral came from you.

It was much later that this particular lad learned, to his dark disillusion, that the program people—after recording such an audition—would laugh uproariously as the hustled hopeful utterly innocently made a fool of himself.

You later wrote a kind letter to Kalamazoo, Mr. Paley. You said your people had determined that the young man was "not ready for New York." Mr. Paley. Sir, he is not yet ready.

He is a softball pitcher, Sir. He never would have the right stuff for hardball.

Today, half a hundred years later, the kid from Kalamazoo has long since outdistanced any bitterness. Time flows in only one direction.

And today—at this ceremonial occasion—he closes the book on yesterday as he accepts with very special significance an award from his peers in the name of The Legend—Paul White.

And now, Mr. Paley, Sir, now you know The rest of the story.

#### SHOP TALK

Newswomen and newsmen since I last addressed your RINDA you have moved mountains.

Your graphic coverage of Tiananmen Square brought a dynasty to penitence. Penetrating the world's curtains of bamboo and iron and its walls of stone and its dark ignorance you made it possible to overthrow communism; you made it harder to overthrow Yeltsin. You've "done good."

Your coverage of the war in the Persian Gulf—particularly CNN's two-way window on Baghdad—elevated electronic media to a new level of maturity. Uncovering scandals in Washington you, more than any other factor, inspired the now inevitable housecleaning in Congress. You've "done good!"

However \* \* \*

Before I return in another ten years I charge you with some new responsibilities:

Georgie Anne Geyer says, "Much of the American media has become a coliseum where ambitious journalists decide who is to be thrown to the lions today. And most of the journalists involved love it. If we can't bring someone down, destroy his or her reputation and leave blood all over the floor, then journalism is no fun anymore."

Gigi and I get no pleasure from criticizing colleagues but when the watchdog becomes an attack dog one way or another he is going to be de-fanged.

There is a lot of self-righteousness in our business as we condemn lawmakers for vested interests and ignore the similar vulnerability of opinion makers.

I once dared to propose publicly that journalists publish their stock portfolios and report any other investments or affiliations which might relate to subjects on which they write.

From the editor of one powerful publication, I received a scathing denunciation. How dare I suggest that any of us might be corruptible!

It was not much later that a Wall Street Journal writer was caught profiting from stocks he promoted and journalist Izzy Stone was exposed as a paid agent of the KGB. •

#### HANDGUNS

• Mr. SIMON. Mr. President, everywhere you turn recently, there is another news story about the increasing number of gun owners in America. The reason given for the rising sales is always the same: The new owners need the guns to arm themselves in the war against crime. Mr. President, the problem is that America is armed. And as a recent Chicago Tribune editorial noted, "the more weapons that get into circulation, the more this war escalates."

The facts speak for themselves: The increasing numbers of murders in the United States is accounted for by the rise in deaths caused by handguns. Furthermore, guns bought for self-protection and kept in the home are 43 times more likely to kill a family member or friend than to kill an intruder—New England Journal of Medicine, June 1986. Additionally, in 1990, there were only 209 justifiable homicides out of a total of 10,567 handgun murders in the United States—FBI Uniform Crime Reports.

If these guns are not used to kill an intruder, who is at risk? More often than not, it is the very family members the gun owner wants to protect: the children. According to the Centers for Disease Control, more than 1.2 million elementary school children who are latch-key kids have access to guns in their homes. A study of 266 accidental shootings of children under the age of 17 revealed that 50 percent of the accidents occurred in the victims' homes, and 38 percent occurred in the home of a friend or relative. The handguns used in the shootings were most often found in the bedroom, 45 percent—Center to Control Handgun Violence. Furthermore, the odds that a suicidal teenager will commit suicide increase 75 times when a gun is kept in the home. The

bottom line is that in 1989 alone, 1,380 children and teenagers committed suicide with guns; 2,367 children and teenagers were murdered with guns; and 567 died in unintentional shootings—National Center for Health Statistics.

Without a doubt, handguns are a major component of the increasing crime and violence in our Nation. The control of these handguns, not the proliferation, is a necessary part of any solution. As Baltimore County Police Chief Neil Behan notes: "If guns were the answer to the threat of violent crime, we'd sell them at police headquarters."

Mr. President, I ask that the Chicago Tribune editorial be printed in its entirety at this point in the record.

The editorial follows:

[From the Chicago Tribune, Sept. 14, 1992]

#### HANDGUNS KILL MORE THAN THEY PROTECT

There's a sad fallacy in the argument being pushed by gun merchants and their allies that Americans need to arm themselves in the war on crime. The problem is, the nation is armed. And the more weapons that get into circulation, the more this war escalates.

Handguns are protection. This notion is demolished by the fact that the entire increase in murders, whether measured nationally or locally in recent years, is accounted for by the rise in handgun deaths. It's crushed by the fact that handgun owners are 43 times more likely to kill themselves or a family member than to shoot a criminal. And by the fact that the U.S., with extraordinary access to guns, has by far the highest murder rate among developed nations. By the fact that shootings have only soared with the surge in handgun possession. By the fact that suicide is five times more common in homes with guns. By the fact that handguns and other concealable weapons have no real purpose except to kill people.

Firearms were used last year to murder more than 16,000 Americans, a record number. At least 80 percent were killed with handguns. There's every indication that the toll will grow again this year.

In Chicago, murders are running ahead of 1991's unprecedented rate. Over the Labor Day weekend, 28 people died and dozens more were wounded by gunfire in one of the bloodiest holidays in city history.

While police attribute much of the shooting surge to street-gang battles over narcotics and turf, they point out these fights wouldn't be nearly so deadly if it weren't for the rapid proliferation of handguns and concealable assault weapons.

The crossfire is becoming increasingly indiscriminate. From just last weekend's shootings: A 10-year-old picnicker sipping water from a drinking fountain; an 8-year-old boy sitting on his own from porch; the unborn infant of a pregnant girl.

Across the nation, handgun homicides have risen 45 percent over the past five years. Meanwhile, Congress and the Bush administration still dither over the rather meek gun-control measure known as the Brady Bill, which would apply a national waiting period and background checks to handgun purchases.

Sure, stricter handgun control won't by itself stop the spiral of crime and violence. It has to be done in tandem with a concerted assault on the social problems that breed violence—a comprehensive effort that includes interventions like the city-state experiment

in counseling for gang members and troubled families that has just been announced in Chicago.

But handguns are a major part of the problem. Their control has to be part of any solution.

As one police officer noted recently, we've yet to see a drive-by stabbing.♦

#### TRIBUTE TO CONGRESSMAN STEVE SOLARZ

♦ Mr. D'AMATO. Mr. President, as we pay tribute to our colleagues who are leaving the Congress at the close of this session, I want to make special mention of a friend who has served the people of New York with distinction, and has worked to improve the lives of millions of people around the world. I'm speaking of Congressman STEVE SOLARZ.

STEVE was elected to the House in 1974, after serving in the New York State Assembly. He quickly became one of the hardest working Members of the other body, and its foremost expert on foreign affairs. In fact, just before STEVE spoke on the floor this weekend, in what was to be perhaps the last floor speech of his career, the ranking Democrat on the Foreign Affairs Committee, LEE HAMILTON, said of STEVE: "His knowledge of foreign policy is second to no one in this entire city and in this entire country."

STEVE has left an almost immeasurable mark on foreign affairs, especially when it comes to democracy and human rights.

If South Africa has made great strides in throwing off the evil cloak of Apartheid, it is due in part to the fact that STEVE sponsored the first sanctions legislation in the Congress.

If the people of the Philippines and Poland live under democracy rather than tyranny, it is due in part to STEVE SOLARZ's tireless efforts to oust dictatorships and fan the winds of freedom in these countries.

If Israel enjoys relative safety and security, it is due in part to the many years that STEVE SOLARZ has spent spearheading American efforts to provide the Jewish State with critical military and economic assistance.

And if the world is a safer place today because Saddam Hussein is not armed with nuclear weapons, it is due in large part to STEVE SOLARZ's courageous and passionate sponsorship of last year's resolution authorizing the President to use force in the Persian Gulf.

STEVE's accomplishments in the arena of foreign affairs are well known, even legendary. But I don't want to leave the impression that he ignored the needs of his constituents in Brooklyn—for he did not.

STEVE and I worked closely on a number of projects of enormous importance to Brooklyn's neighborhoods. From preserving the historic Coney Island and Brighton Beaches, to marshal-

ling Federal resources to aid emerging small businesses in Boro Park, to bringing hundreds of ship repair jobs to Brooklyn's working waterfront, STEVE SOLARZ has always been there when the people of his district needed him the most.

As many of you know, the New York State redistricting process was very unkind to STEVE SOLARZ. With his district sliced up into six pieces, STEVE decide to not run in a bitter race against any of his incumbent colleagues, and instead chose the newly created 12th District, which was created so that the Latino community could elect someone of their choice. I don't think this is the time or place to discuss the Voting Rights Act and its application to New York City, but suffice it to say that I was saddened by the outcome of STEVE's race. The people of the 12th District would have been well served by STEVEN, and all of us from New York will suffer in his absence.

I know I speak for my colleagues in the Senate, on both sides of the aisle, when I tell STEVE SOLARZ that his contributions to the Congress and the country will not soon be forgotten, and when I wish him all the best in his future endeavors.♦

#### INDIAN AGRICULTURAL RESOURCES MANAGEMENT ACT

♦ Mr. INOUE. Mr. President, I rise today in reference to S. 2977, a bill to establish a program within the Bureau of Indian Affairs, to improve the management of rangelands and farmlands and the production of agricultural resources on Indian lands, as passed by the Senate on the evening of October 2, 1992.

Mr. President, the Senate Select Committee on Indian Affairs has worked with various Indian interest groups over the past 3 years and have continued to work with these groups until the final hour of the passage of this bill by the Senate Friday evening, October 2, 1992. Recognition is especially deserved for the intertribal Agriculture Council [IAC], a nationally based Indian organization whose membership includes over 55 tribes with significant agricultural interests. Throughout the development of this legislation, the Intertribal Agriculture Council kept its membership, and indeed all of Indian country, informed of the legislation through open forums, direct mail-outs, newsletters, and presentations scheduled during meetings of the National Congress of American Indians and other national Indian organization meetings.

Mr. President, S. 2977 is a necessary means to an end for Indian people in terms of providing grass-roots economic development on Indian reservations—food on the table and money in the pocket. History tells us that with-

out the Indians' knowledge of the land and agriculture, the early settlers never would have made it through those first winters, whether they were in Massachusetts or Virginia. It was Indian agriculture that fed General Washington's soldiers at Valley Forge. It was the bounty of the New World that provided and continues to provide the peoples of the Earth with a vast array of produce not known until European contact was established with the American Indian some 500 years ago.

The results of this contact have not been kind to the American Indian. It has been estimated that through communicable diseases alone the Indian population in the New World was diminished by 90 percent. In the early 19th century, this Nation adopted a policy of uprooting the Indians from their homelands and removing them westward—west of the Mississippi River—where they would remain unmolested by the influx of European immigrants. But the lands they occupied were too tempting—too necessary for the westward expansion of this Nation—and a policy of establishment of reservations quickly followed.

The ceding of Indian lands for the use and development of the non-Indian immigrants was carried out by the Government of the United States through the negotiation of treaties. Nearly 400 treaties with Indian nations were formally ratified by the U.S. Senate. Nearly 400 more such treaties were negotiated by the Executive Branch of the Government, but were never submitted to the Senate for ratification.

Mr. President, out of this treaty process, the Indians reserved to themselves the lands we know of today as Indian reservations. Statutes and legal opinions have been written describing this process as setting aside the public lands of the United States for the benefit of the Indians. While the origin of title is a fine legal distinction, no matter which view of the issue is taken, it is out of this treaty process that the trust responsibility for Indian lands and resources arises. No matter which view is ascribed to, no one would question that the reservations were established for the purpose of establishing Indian homelands—lands upon which the Indian people could reside, develop and maintain a viable economy to enable them to be self-sustaining. Our failure in meeting this purpose is well known in the Congress and by the public at large.

This is what the trust responsibility is all about. And this is what S. 2977, the Indian Agricultural Resources Management Act of 1992 is all about. It is an effort to provide the resources, training and wherewithal necessary to vitalize the Indian agricultural economy so that the 33,000 Indian families now attempting to support themselves through agricultural endeavors can be self-sustaining; so that countless thou-

sands of individual Indian land owners can derive a reasonable return from their lands; and so the governments of the Indian tribes which derive a substantial portion of their income from tribal lands can obtain reasonable returns from leases to aid in their operations.

MR. PRESIDENT, on Monday morning, October 5, 1992, 3 days after the Senate passed S. 2977 by unanimous consent, I received a letter from The Hon. W. Lee Rawls, Assistant Attorney General of the United States, expressing the strong opposition of the Department of Justice to this bill. The definition of the trust responsibility of the United States to the American Indians as described in this letter is shocking.

These standards can briefly be summarized as follows:

First, The Federal Government has no general trust obligation to use its funds to make improvements upon or develop Indian lands or resources—Cases cited.

Second, There is no general fiduciary duty to make Indian reservation lands productive of income—Case cited.

Third, Little weight is to be given to comparison of resources or efforts devoted to management or development of comparable programs for management or development of Federally owned lands. One reason for this, as apparently given by one court, is because Indians are a people of varying culture—Case cited.

Fourth, the Federal Government is held to an arbitrary, capricious, abuse of discretion standard of care in the management of Indian lands—Case cited.

Mr. President, this last statement is, very simply, a misrepresentation of the court decision in the *Mitchell* case. The full phrase from which the Justice Department quote was taken is described in a Library of Congress report on the Federal trust responsibility as follows:

The Court applied what it termed to be the normal standard of fiduciary obligations for government trustees, "were their actions in good faith and within the realm of their acceptable discretion, or were they arbitrary, capricious, an abuse of discretion, or contrary to law." (CRS Report 89-379 A at page 14, citing *U.S. v. Mitchell*, 664 F.2d 265, 274.)

I have not taken the time to look up each of the cases cited in the Justice Department letter. But I must advise the Congress that the standard asserted with apparent approval in the fourth paragraph does an injustice to the court, the Congress and the Executive Branch.

It is within this correspondence and its interpretation of the trust responsibility, that we, as members of the Congress, must take issue. We cannot allow ourselves to be persuaded by an obvious and patent misrepresentation of the law. We cannot allow standards such as these to dictate our legislative efforts on behalf of the American Indians.

Mr. President, we need to continue to educate ourselves within the Federal Government. This fact will hit home, as it did me, once you review the statements duly signed within the correspondence received from the Department of Justice. It reflects the paternalism of the past that supported keeping American Indians as dependent wards of the Government.

The Justice Department's comments lead one to believe that the Government has no responsibility to assist our First Americans in regaining any place within American society. Perhaps the Justice Department should visit with American Indians on reservations and learn from first-hand experience rather than through history books.

Mr. President, the Select Committee on Indian Affairs will revisit this legislation to establish the Indian Agricultural Resources Management Act in the 103d Congress. In order for this bill to receive wide circulation, I am requesting consent to include in the RECORD, a copy of the letter of October 5, 1992, from Assistant Attorney General Rawls to me expressing the intent of the Department of Justice to recommend a veto of S. 2977, and a copy of a letter from Vice Chairman McCain and myself to Assistant Attorney General Rawls expressing our views.

I ask that this correspondence be printed at the conclusion of these remarks. I also ask that a copy of S. 2977, as it was passed by the Senate on October 2, 1992, also be printed in full immediately following this correspondence.

The material follows:

U.S. DEPARTMENT OF JUSTICE,  
OFFICE OF LEGISLATIVE AFFAIRS,  
Washington, DC, October 5, 1992.

Hon. DANIEL K. INOUE  
Chairman, Select Committee on Indian Affairs,  
U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: This provides the views of the Department of Justice on S. 2977, the "Indian Agricultural Resources Management Act of 1992." In addition to the concerns raised in the Department of the Interior's report, we have concerns about the bill's potential to cause litigation, especially as it relates to the United States' trust responsibility. The Department of Justice joins the Department of the Interior in strongly opposing this bill.

Notwithstanding the disclaimer in section 503 to the effect that S. 2977 shall not be construed to diminish or expand the trust responsibility of the United States, the thrust of S. 2977 is to expand the Secretary of the Interior's trust management responsibilities with respect to Indian rangelands and farmlands. Indeed, section 101(a)(4) of S. 2977 states: "Existing Federal laws do not sufficiently assure the adequate and necessary trust management of Indian rangelands and farmlands." In our opinion, S. 2977, if enacted, will serve to generate a substantial amount of breach of trust litigation.

Perhaps the most significant finding is contained in section 101(a)(5) which states:

"The Federal investment in, and the management of Indian rangelands and farmlands is significantly below the level of investment in, and management of, rangelands and farm-

lands under the administration of the Bureau of Lands Management, Bureau of Reclamation, the National Forest Service, and private landowners."

This finding must be read together with section 102(5), which states that one purpose of S. 2977 is to:

"Provide for the development and management of Indian rangelands and farmlands at a level commensurate with the level of development and management afforded to federally owned or controlled lands."

This latter provision is significant for two reasons. First, the federal government has no general trust obligation to use its funds to make improvements upon or develop Indian lands or resources. *Gila River Pima-Mari-copa Indian Community v. United States*, 231 Ct. Cl. 193, 212-213, 684 F.2d 852, 863-864 (1982); *White Mountain Apache Tribe of Arizona v. United States*, 11 Cl. Ct. 614, 650 (1987). Second, section 102(5) imposes a different standard of care upon the United States as trustee than that developed by case law. In the context of timber resource management, for example, it has been held that the defendant is obligated to manage Indian timber resources " \* \* \* prudently in a manner consistent with the economic, social and technological constraints of the times and circumstances". *Navajo Tribe v. United States*, 9 Cl. Ct. 336, 367 (1986), appeal dismissed (Fed. Cir. Jan. 13, 1987).<sup>1</sup> In *Navajo*, the Claims Court ruled that in assessing the adequacy of defendant's management of the Navajo forest, "little weight" was to be given to the Navajo Tribe's comparison of the National Forest Service's contemporaneous management of Southwest National Forests with the Bureau of Indian Affairs' management of the Navajo commercial forest (9 Cl. Ct.) at 372, n. 23. In large part, this was because the Forest Service was not required to deal with "peoples of varying cultures" in the implementation of its forest management plans. In sum, such a novel standard of care probably will serve to generate litigation addressing the issue of whether such a standard should be applied by the courts to the government's management of other types of Indian natural resources.

We also note that the definition of "agricultural resource" in section 103(1) encompasses "all the benefits derived from agricultural land and enterprises \* \* \*". This definition is very sweeping. Similarly, the term "agricultural product" is very broadly defined. Such broad definitions not only complicate the Secretary's management burdens, but potentially may conflict with, or even be diametrically opposed to, the standard of care imposed by the bill. Again, this is because a comparative analysis with management of comparable lands owned or managed by the federal government (see section 203(b)(2)) does not take into account the need for Interior to manage Indian farmlands and rangelands in such a way as to preserve uses tied to cultural or religious values (see section 103(2)(B) and 3(D)). Thus, these broad definitions will undoubtedly give rise to breach of trust litigation.

Section 103(4) defines the term "land management activity" very sweepingly. This section imposes very significant management burdens on the Secretary, including the provision of educational and technical assistance. Again, such burdens will inevitably breed litigation.

Section 202 represents a radical departure from existing law by requiring the Secretary

<sup>1</sup> We also note that the Court of Claims has stated that the federal government is held to an "arbitrary, capricious, abuse of discretion" standard of care. *Mitchell v. United States*, 229 Ct. Cl. 1, 16, 664 F.2d 265, 275 (1981), aff'd, 463 U.S. 206 (1983).

to comply with " \* \* \* tribal laws pertaining to Indian agricultural lands, including laws regulating the environment or historic or cultural preservation", and requires the Secretary to " \* \* \* cooperate with the enforcement of such laws on Indian agricultural lands \* \* \*." Cooperation includes "appearance in tribal forums." In general, in the absence of specific congressional sanction, federal officials are not subject to the jurisdiction of tribal courts. E.g., *United States v. White Mountain Apache Tribe*, 784 F.2d 917, 921 (9th Cir. 1984); *United States v. Yakima Tribal Court of Yakima Indian Nation*, 794 F.2d 1402, 1407-1408 (9th Cir. 1986; but see *United States v. Plainbull*, 957 F.2d 724 (9th Cir. 1992). Section 202 may well be construed as effecting a waiver of the federal government's sovereign immunity. In addition, it may be construed as authorizing tribal courts to review actions of the Secretary. These concerns would be dealt with by adding a new subsection (c) to section 202 which would read as follows:

"(c) This section does not constitute a waiver of the sovereign immunity of the United States. Moreover, this section does not authorize tribal courts to review actions of the Secretary.

Section 204 relates to leasing of Indian rangelands and farmlands. We note that section 204(1) does not require that the Secretary obtain (or even attempt to obtain) the consent of any or all of the heirs who own a given tract of land before the Secretary leases or permits it. This provision may give rise to potential Fifth Amendment takings claims. Moreover, under section 204(3) a tribal government may determine how long the renewal period of a lease or permit can be. Such authorized tribal control over the management of lands belonging to individual Indians may also generate claims of constitutional takings. Cf. *United Nuclear Corporation v. 17 Cl. Ct. 768 (1989)*, rev'd and remanded, 912 F.2d 1432 (Fed. Cir. 1990) (Secretary of Interior's refusal to approve mining plan submitted by lessee mining company without approval of Navajo Tribe held to constitute Fifth Amendment taking of mining company's leasehold interest).

It would seem that in developing regulations to implement the act (section 501), the Secretary of the Interior should, to the maximum extent possible, incorporate the provisions of 25 C.F.R. Parts 162 and 166 (relating to leasing, permitting and grazing on Indian lands) so that management of the leasing of Indian lands is not subject to two sets of potentially conflicting regulations.

The Office of Management and Budget has advised this Department that there is no objection to the submission of this report from the standpoint of the Administration's program.

Sincerely,

W. LEE RAWLS,  
Assistant Attorney General.

U.S. SENATE,  
SELECT COMMITTEE ON INDIAN AFFAIRS,  
Washington, DC, October 6, 1992.

Hon. W. LEE RAWLS,  
Assistant Attorney General, Office of Legislative  
Affairs—DOJ 1601

U.S. Department of Justice, Washington, DC.

DEAR GENERAL RAWLS: Thank you for your letter of Monday, October 5, 1992, advising us of the concerns of the Department of Justice with respect to S. 2977, the "Indian Agricultural Resources Management Act of 1992". Unfortunately, your letter was received too late in the legislative process for the Committee to respond. The bill, with the amendment offered by Senator McCain, passed the

Senate late Friday evening, October 2, 1992. With the veto threat hanging over the bill, it was not possible to obtain floor time in the House before adjournment.

Your letter first cites as an issue of concern the language in Section 101(a)(4) of the Findings that: "Existing Federal laws do not sufficiently assure the adequate and necessary trust management of Indian rangelands and farmlands." No attempt is made to refute or deny this finding. There is simply an assertion that this language "will serve to generate a substantial amount of breach of trust litigation." We must say that the analysis of the trust responsibility that is set forth in the Department's letter would appear to conclusively prove the accuracy of this finding. But, in addition, this is simply a "finding". The provision in Section 503 would appear to address the fear of the Department with respect to litigation flowing from this Act based on the trust responsibility. That Section provides in full as follows:

"SEC. 503. Nothing in this Act shall be construed to diminish or expand the trust responsibility of the United States toward Indian trust lands or natural resources, or any legal obligation or remedy resulting therefrom."

Most important, however, is the fact that the concern of the Department on this issue was never brought to the Committee's attention. The Department never corresponded with the Committee on this point, and it was not addressed in the statement of the Department of the Interior which was cleared by the OMB for presentation. While we do not believe it would have been necessary, had the issue been brought to our attention, it might easily have been resolved.

The second concern could not so easily have been resolved. This concern also addresses the Findings provisions. This involves the Finding in Section 101(a)(5) that:

"The Federal investment in, and the management of Indian rangelands and farmlands is significantly below the level of investment in, and management of, rangelands and farmlands under the administration of the Bureau of Lands Management, Bureau of Reclamation, the National Forest Service, and private landowners."

The Justice Department reads this finding together with Section 102(5), which states that one of the purposes of S. 2977 is to:

"Provide for the development and management of Indian rangelands and farmlands at a level commensurate with the level of development and management afforded to federally owned or controlled lands."

One of the purposes of the bill is indeed to increase the resources available to the Indian rangeland and farmland programs. Reference to the level of resources made available to the development and management of comparable Federally owned and managed resources seems to be a reasonable goal and provides an objective criteria for guidance in the formulation of policies regarding Indian agricultural lands.

But again, most importantly, this concern was never brought to the attention of the Committee or the Congress. There was no reference to this concern in the testimony of the Department of the Interior.

Of greatest concern is the analysis of the "trust responsibility" that immediately follows. Presumably these standards are cited because the Justice Department finds them to be an acceptable definition of the trust. These "standards" can briefly be summarized as follows:

1. The Federal government has no general trust obligation to use its funds to make im-

provements upon or develop Indian lands or resources—Cases cited.

2. There is no general fiduciary duty to make Indian reservation lands productive of income.—Case cited.

3. "Little weight" is to be given to comparison of resources or efforts devoted to management or development of comparable programs for management or development of Federally owned lands. One reason for this, as apparently given by the court, is because Indians are a "people of varying culture"—Case cited.

4. The Federal government is held to an "arbitrary, capricious, abuse of discretion" standard of care or management of Indian lands—Case cited.

The only positive note in this litany of case law recital is the reference to *Navajo Tribe v. U.S.*—citation omitted—which, in reference to tribal timber resources, found the Government to be obligated to manage Indian timber resources " \* \* \* prudently in a manner consistent with the economic, social and technological constraints of the times and circumstances." We frankly are at somewhat of a loss to understand just what this means. We would think that if we had included such language in S. 2977, the Department would have had concerns about the vagueness and uncertainty of the meaning of the terms. As a standard to be achieved by the legislation it most certainly leaves much to be desired, and very frankly would be unacceptable.

The next area of concern involves Section 202(b) which describes certain authorities of tribal governments that shall be recognized. Two elements of concern are expressed. The Department describes as a "radical departure from existing law" the notion that the Secretary of the Interior, in his administration of rangeland and farmland programs, should comply with or adhere to " \* \* \* tribal laws pertaining to agricultural land, including laws regulating the environment or historic or cultural preservation". First we would note that the President has signed into law a number of recent Acts of the Congress which clearly establish the rights of tribal governments to regulate various environmental matters within their respective reservations. Second, even in a case that is generally condemned by the Indian people, *Brendale v. Confederated Tribes of the Yakima Nation*—citation omitted—the Supreme Court recognized the inherent right of Indian tribal governments to adopt and enact zoning and land use laws over lands within their jurisdiction.

If there is any "radical departure" that is relevant to this section, it is the notion that the Secretary of the Interior, in his management of Indian trust lands, is not bound by tribal zoning or land use laws. It would indeed be a strained construction of the law to accept the proposition that within the limits of their jurisdiction, the tribal governments can regulate the use of lands owned by non-Indians and/or held in fee patent status, but they cannot regulate the use or development or individual Indian trust lands. If the Secretary has not previously recognized such tribal authority, then certainly the provisions of this section are much needed.

The second area of concern expressed with respect to Section 202(b) is that the bill directs the Secretary to cooperate in the enforcement of such laws, including upon request "appearance in tribal forums". In our view, this is an extremely reasonable provision. Certainly one would not argue that a Bureau of Indian Affairs police officer could witness an offense and cite a person into

court on a criminal charge, but could then refuse with impunity to appear in court to provide testimony or assist in the enforcement of the law. In this case the bill would require Departmental employees to appear in tribal court to provide testimony or otherwise assist in the enforcement of laws regarding trespass actions, violations of lease requirements, non-compliance with conservation requirements, and other matters.

The Department argues that this provision might be construed as effecting a waiver of the Federal Government's sovereign immunity. To the extent this issue raises a concern, the amendment proposed by the Department would have been acceptable if it had been received on time. However, we frankly do not believe this is a problem, since waivers of immunity must usually be expressly stated and nothing in this section even remotely suggests such a waiver.

The final area of concern identified by the Department of Justice involves Section 204 of the bill. This section relates to the leasing of lands that are held by individual Indians in trust allotted or restricted fee patent status. Numerous concerns are raised with respect to this section of the amended bill.

First, the letter cites Section 204(b)(3), as passed by the Senate, and asserts:

"\* \* \* that the new version of Section 204 does not require that either an Indian tribe or the Secretary obtain (or even attempt to obtain) the consent of any or all of the heirs who own a given tract of land before the Secretary leases or permits it."

This assertion is simply incorrect. First, Section 204(b) does not vest any authority in an Indian tribe to lease individually-owned land. The authority to enter into leases remains with the Secretary. It does vest in the tribes the authority to adopt a resolution that would modify or waive the "notice" requirements of the existing Code of Federal Regulations—but this authority applies only to highly fractionated heirship lands (one such allotment is known to have over 550 individual ownership interests), and additionally applies only if the tribal resolution provides an alternative means of notification. Such alternative means, such as posting of property or publication of notice in newspapers of local circulation, are commonly recognized in the laws of the United States and the states, and have generally been found to meet the test of "due process".

It is also stated that Section 204(b) authorizes tribal control over the management of lands belonging to individual Indians. This statement, too, is simply incorrect. The responsibility for leasing or permitting continues to be vested in the Secretary. The section does, however, authorize tribes to adopt resolutions that would provide a "preference" for Indian farmers or ranchers in the leasing or permitting of Indian allotments. But the section also provides that the owners of a 50 percent interest in an allotment may opt to exempt their allotment from the application of such a preference. In addition, there is a requirement that the land owner or owners receive "fair market value" for their lands. This eliminates any question of a Fifth Amendment taking.

Finally, it is stated that subsection (c)(2) of Section 204 authorizes the owners of a majority interest in any trust or restricted land to enter into an agricultural lease which is binding on the owners of the minority interest in such land without the consent of the latter, and that this too raises a Fifth Amendment taking issue. This section was added to address the contention of the Bureau of Indian Affairs that Section 204 of the

bill, as it was introduced, would deprive individual owners of their right to negotiate their own leases. While we did not agree with that interpretation, we added the new subsection (c)(2) to make clear that nothing in the Section was intended to deprive individual owners of their existing right to negotiate their own leases.

It does not appear that there are any specific provisions in existing law that define the degree of ownership interest that is necessary to effectuate a binding lease on a parcel of trust land. The Bureau of Indian Affairs, as a matter of administrative practice, has for many years granted leases when the owners of 60 percent of the ownership interest have executed a lease. Section 204(c) would recognize such authority in the individual owners, but decreases the ownership interest that must consent to 51 percent.

In order to assure protection to the owners of a minority interest in the property, the authority vested in the majority owners to lease their property under Section 204(c) requires that the owners of the minority interest receive fair market value for their interest. This requirement should avoid any Fifth Amendment taking issue.

Finally, we would note that the provisions of Section 204 are designed to facilitate the leasing of Indian trust lands and obtain a fair market value return for the individual owners. Some modification of current BIA practices and procedures appears to be necessary to bring a reasonable return on their land holdings to many Indian allottees.

Recently, in Oklahoma, the BIA adopted the position that it will not grant a lease of allotted or restricted land without the consent of 100 percent of the ownership interests. As a consequence, some 60,000 acres of trust or restricted land in the State lie idle, earning nothing for their owners. Nationwide, some 1.1 million acres of trust lands lie idle. It is difficult to argue that some streamlining of this process that would enable lands to be leased would constitute a Fifth Amendment taking, but when the land lies idle the United States somehow or other is deemed to be meeting its trust responsibility.

With this response and analysis to guide you, we would hope the Department would reconsider its position on this legislation in the next Congress.

Sincerely,

JOHN MCCAIN,  
Vice Chairman.  
DANIEL K. INOUE,  
Chairman.

S. 2977

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

#### SECTION 1. SHORT TITLE AND TABLE OF CONTENTS.

(a) SHORT TITLE.—This Act may be cited as the "Indian Agricultural Resources Management Act of 1992".

(b) TABLE OF CONTENTS.—

#### TITLE I—GENERAL PROVISIONS

Sec. 101. Findings.

Sec. 102. Purposes.

Sec. 103. Definitions.

#### TITLE II—RANGELAND AND FARMLAND ENHANCEMENT

Sec. 201. Management of Indian rangelands and farmlands.

Sec. 202. Indian participation in land management activities.

Sec. 203. Comparative analysis of Indian rangeland and farmland management programs.

Sec. 204. Leasing of Indian rangelands and farmlands.

#### TITLE III—EDUCATION IN AGRICULTURE AND NATURAL RESOURCE MANAGEMENT

Sec. 301. Establishment of Indian and Alaska Native agriculture and natural resources management education assistance program.

Sec. 302. Postgraduation recruitment, education and training programs.

Sec. 303. Cooperative agreement between the Department of the Interior and Indian tribes.

Sec. 304. Obligated service; breach of contract.

#### TITLE IV—AUTHORIZATION OF APPROPRIATIONS

Sec. 401. Authorizations.

#### TITLE V—MISCELLANEOUS

Sec. 501. Regulations.

Sec. 502. Severability.

Sec. 503. Trust responsibility.

Sec. 504. Miscellaneous.

#### TITLE I—GENERAL PROVISIONS

##### SEC. 101. FINDINGS.

(a) FINDINGS.—The Congress finds and declares that—

(1) Indian rangelands and farmlands are renewable and manageable natural resources that are among the most valuable Indian assets and are vital to the economic and social welfare of individual Indians and Indian tribes.

(2) Increased development and intensive management of Indian rangelands and farmlands will produce increased economic returns, enhance Indian self-determination, promote employment opportunities, and improve the social and economic well-being of Indian and surrounding communities.

(3) The United States has a trust responsibility to protect, conserve and enhance Indian rangelands and farmlands consistent with its fiduciary obligation and its unique relationship with Indian tribes and extends to all Federal agencies.

(4) Existing Federal laws do not sufficiently assure the adequate and necessary trust management of Indian rangelands and farmlands.

(5) The Federal investment in, and the management of Indian rangelands and farmlands is significantly below the level of investment in, and management of, rangelands and farmlands under the administration of the Bureau of Lands Management, Bureau of Reclamation, the National Forest Service, and private landowners.

(6) The beneficial use of Indian rangelands and farmlands by Indians is in serious decline throughout Indian country.

(7) Despite the Federal policy of Indian self-determination, Federal laws and policies have limited the authority and ability of tribal governments and Indian communities to develop land-based programs on the basis of local priorities.

##### SEC. 102. PURPOSES.

The purposes of this Act are to:

(1) Promote and increase and enable the opportunities for Indian use of their own resources so as to use Indian natural and human resources to achieve tribal goals, to decrease idle or underutilized land, reverse the damaging long-term losses in productivity and land values, and increase local employment opportunities, community income, and social stability.

(2) Safeguard the investments made in Indian rangelands and farmlands and agricultural enterprises and provide adequate, sta-

ble, and secure authority for the protection, conservation, utilization, and enhancement of Indian rangeland and farmland resources.

(3) Support and improve tribal self-determination by authorizing and facilitating the active tribal participation in the management decisionmaking processes on the allocation and use of local natural resources.

(4) Improve Indian access to Federal agriculture, rural development and related programs which are available to the American society at large through the various departments of the Federal Government.

(5) Provide for the development and management of Indian rangelands and farmlands at a level at least commensurate with the level of development and management afforded to federally owned or controlled lands.

(6) Meet the trust responsibility of the United States and promote self-determination of Indian tribes by managing Indian rangelands and farmlands and related renewable resources in a manner consistent with identified tribal goals and priorities, and nationally adopted multiple use and sustained yield principles.

(7) Increase the educational and training opportunities available to Indian people and communities in the practical, technical and professional aspects of agriculture, natural resources, and land management to improve local expertise and technical abilities and create a cadre of professional Indian agriculture resource managers who can provide leadership to the tribal, Federal and private sectors on Indian land and resource management issues.

**SEC. 103. DEFINITIONS.**

For the purposes of this Act:

(1) The term "agricultural land" means Indian land, excluding Indian forest land, that is used for the production of agricultural products, and lands occupied by industries that support the agricultural community, regardless of whether a formal inspection and land classification has been taken.

(2) The term "agricultural resource" means—

(A) all the primary means of production, including the land, soil, water, air, plant communities, watersheds, climate, human resources, natural physical attributes and man-made developments which together comprise the agricultural community; and

(B) all the benefits derived from agricultural land and enterprises, including cultivated and gathered food products, fibers, horticultural products, dyes, cultural or religious condiments, medicines, water, cultivated fisheries, wildlife, recreation, aesthetic and other traditional values of agriculture and rangelands.

(3) The term "agricultural product" means—

(A) crops grown under cultivated conditions whether used for personal consumption, subsistence, or sold for commercial benefit;

(B) domestic livestock including cattle, sheep, goats, horses, buffalo, swine, Alaska reindeer, fowl, cultivated fish, or other animals specifically raised and utilized for food, fiber, or as a beast of burden;

(C) forage, hay, fodder, feed grains, crop residues and other items grown or harvested for the feeding and care of livestock, sold for commercial profit, or used for other purposes;

(D) naturally occurring noncultivated plants and animals gathered for commercial sale, personal use, cultural or religious activities or for other purposes such as use in

teas, medicines, as herbs or spices, for decoration, or for traditional purposes; and

(E) other marketable or traditionally used materials authorized for removal from agricultural lands.

(4) The term "land management activity" means all activities, accomplished in support of the management of Indian agricultural land, including but not limited to—

(A) preparation of inventories and management plans;

(B) agricultural land and infrastructure development, and the application of accepted soil or range management techniques to improve or restore the productive capacity of the land;

(C) protection against agricultural pests, including development, implementation, and evaluation of integrated pest management programs to control noxious weeds, undesirable vegetation, vertebrate or invertebrate agricultural pests;

(D) administration and supervision of agricultural leasing and permitting activities, including determination of proper land use and proper stocking rates of livestock, appraisal, advertisement, negotiation, contract preparation, collecting, recording, and distributing lease rental receipts;

(E) technical assistance to individuals and tribes engaged in agricultural production or agribusiness; and

(F) educational assistance in agriculture, natural resources, land management and related fields of study including direct assistance to community, tribal and land grant colleges in developing and implementing curriculum for vocational, technical and professional course work.

(5) The term "farmland" means Indian land, excluding Indian forest land, that is used for production of food, feed, fiber, forage and oil seed crops, or other agricultural products, and may be either dryland or irrigated.

(6) The term "rangeland" means Indian land, excluding Indian forest land, on which the native vegetation is predominantly grasses, grass-like plants, forbs or shrubs suitable for grazing or browsing use, and includes lands revegetated naturally or artificially to provide a forage cover that is managed like native vegetation. Rangelands include natural grasslands, savannahs, shrublands, moist deserts, tundra, alpine communities, coastal marshes and wet meadows.

(7) The term "forest land" means Indian forest land as defined in section 304(3) of Public Law 101-630.

(8) The term "Indian" means a Native American or Alaska Native who is a member of an Indian tribe, as defined in section 4 of the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450b).

(9) The term "Indian tribe" means any Indian tribe, band, nation, rancheria, pueblo, or other organized dependent Indian group or community, including any Alaska Native village or regional or village corporation as defined in section 4 of the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450b).

(10) The term "Indian land" means land that is—

(A) held in trust by the United States for an Indian or Indian tribe;

(B) owned by an Indian or Indian tribe and is subject to restrictions against alienation; or

(C) dependent Indian communities.

(11) The term "landowner" means the Indian or Indian tribe that—

(A) owns such land, or

(B) is the beneficiary of the trust under which such land is held by the United States.

(12) The term "Secretary" means the Secretary of the Interior, except where otherwise specifically designated.

(13) The term "Indian enterprise" means an enterprise—

(A) which—

(i) is engaged in construction (within the meaning of the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450 et seq.)), and is entirely owned by Indians, or Indian tribes, that receive 100 percent of the profits of the enterprise; and

(ii) is engaged in any business other than construction and at least 51 percent of the enterprise is owned by Indians, or Indian tribes, that receive not less than 51 percent of the profits of the enterprise; or

(B) which—

(i) is entirely owned by an Indian tribe; or

(ii) has an Indian owner who—

(I) acts as the chief executive officer of the enterprise; and

(II) has the experience and training to manage, and does in fact manage, day-to-day activities of the enterprise.

**TITLE II—RANGELAND AND FARMLAND ENHANCEMENT**

**SEC. 201. MANAGEMENT OF INDIAN RANGELANDS AND FARMLANDS.**

(a) **MANAGEMENT ACTIVITIES.**—The Secretary shall manage or administer the Indian rangeland and farmland programs authorized under existing law, either directly or through cooperative agreements, self-determination contracts, compacts and grants under the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450b et seq.), or such other legal mechanisms as are appropriate.

(b) **MANAGEMENT OBJECTIVES.**—Indian rangeland and farmland management activities shall be designed to achieve the following objectives—

(1) to protect, conserve, utilize, and enhance rangelands and farmlands in a perpetually productive state through the application of sound agronomic and economic principles to the planning, development, inventorying, classification, and management of agricultural resources;

(2) to increase production and expand the diversity and availability of agricultural products for subsistence, income, and employment of Indians and Alaska Natives, through the development of agricultural resources;

(3) to manage agricultural resources to protect and enhance other values such as wildlife, fisheries, cultural resources, recreation, and regulate water runoff and minimize soil erosion;

(4) to enable farmers and ranchers to maximize the potential benefits available to them through their land by providing technical assistance, training and education in conservation practices, management and economics of agribusiness, sources and use of credit, marketing of agricultural products, and other applicable subject areas;

(5) to develop Indian rangelands and farmlands and associated value-added industries of Indians and Indian tribes to promote self-sustaining communities, and so that Indians may receive from their trust lands not only lease value, but also the benefit of the labor and profit that such land is capable of producing; and

(6) to assist trust and restricted landowners in leasing their farmland and rangeland for a reasonable annual return, consistent with prudent management and conservation practices, and community goals as ex-

pressed in the tribal management plans and appropriate tribal ordinances.

(c) **MANAGEMENT PLANS.**—To achieve the objectives set forth in subsections (a) and (b), the Secretary, with full and active consultation with, and policy direction from, the tribe or tribes to be served and consistent with his trust responsibility, shall immediately embark on a reservation-by-reservation agricultural land resource management planning program encompassing or reflecting the following:

(1) A closed-term three-year effort conducted at the local tribe and agency level working through the governments of the tribes and in public meetings to determine and document the specific agriculture and land resource goals and desires of the local tribe and community.

(2) The defined goals as the basis in creating a ten-year agriculture program and land management plans to attain the goals defined for community lands and reservations by using public meetings, existing surveys, reports, local knowledge of the land and resources available from Federal agencies, tribal community colleges, and land grant institutions.

(3) A mechanism for assuring that the result of this three-year program will be specific, documented agriculture and land management programs, created and approved by the effected tribe or tribes, which address specific community concerns for land use and development. The individual reservation or tribal agricultural management planning documents will provide the direction to the Bureau of Indian Affairs and the tribes in the management and administration of the Indian owned agricultural trust resources. These program documents will also provide the basis for the application of Indian self-determination contracting of Agriculture and Natural Resource Programs under the Indian Self-Determination and Education Assistance Act.

(4) The contract and grant provisions of the Indian Self-Determination and Education Assistance Act shall be applicable to the development of these management plans.

**SEC. 202. INDIAN PARTICIPATION IN LAND MANAGEMENT ACTIVITIES.**

(a) **TRIBAL RECOGNITION.**—The Secretary shall recognize tribal governments as the governmental entities with the authority to enact and enforce, for lands under their jurisdiction, land use planning, zoning, and other land use ordinances and shall conduct all land management activities in accordance with tribal goals and objectives as set forth in the land management plans and tribal laws and ordinances.

(b) **TRIBAL LAWS.**—Unless otherwise prohibited by Federal law, the Secretary shall comply with tribal laws pertaining to Indian agricultural lands, including zoning and land use laws, and laws regulating the environment or historic or cultural preservation, and shall cooperate with the enforcement of such laws on Indian agricultural lands. Such cooperation shall include—

(1) assistance in the enforcement of such laws;

(2) provision of notice of such laws to persons or entities undertaking activities on Indian agricultural lands; and

(3) upon request of an Indian tribe, an appearance in tribal forums.

(c) **WAIVER OF REGULATIONS.**—In any case in which a regulation or administrative policy of the Department of the Interior conflicts with or impedes—

(1) meeting the objectives of the management plan provided for in section 201; or

(2) conflicts with a tribal law,

the Secretary shall waive the application of such regulation or administrative policy unless such waiver would constitute a violation of a Federal statute or judicial decision, or would conflict with his general trust responsibility under Federal law.

**SEC. 203. COMPARATIVE ANALYSIS OF INDIAN RANGELAND AND FARMLAND MANAGEMENT PROGRAMS.**

(a) **COMPARATIVE ANALYSIS.**—Within 90 days after the date of enactment of this Act, the Secretary shall assemble a Task Force consisting of appropriate officials of Indian tribal governments, the Bureau of Indian Affairs, the Bureau of Land Management, the United States Park Service, the Inter-Tribal Agriculture Council, the Southwest Inter-Tribal Agriculture Council, and such other nongovernmental persons or entities as the Secretary may deem appropriate to develop a comparative analysis of Federal investment and management efforts for Indian agricultural trust lands as compared to federally owned lands managed by other Federal agencies or instrumentalities. The Secretary shall request the Secretary of Agriculture to make available on a nonreimbursable basis appropriate personnel from the Department of Agriculture to assist in the development of such analysis.

(b) **PURPOSES.**—The purposes of the comparative analysis and the Survey Instrument shall be—

(1) to establish a comprehensive assessment of the needs for management improvement, funding, and development needs for each reservation with Indian rangeland and farmland;

(2) to establish a comparison of management and funding provided to comparable lands owned or managed by the Federal Government through Federal agencies other than the Bureau of Indian Affairs;

(3) to identify and to recommend mitigation measures for any obstacles to Indian access to Federal or private programs relating to agriculture or related rural development programs available to the American public at large; and

(4) to provide guidance in the development of the management plans required under the provisions of section 201 of this Act.

(c) **IMPLEMENTATION.**—Within six months from the date of enactment of this Act, the Secretary shall provide the Committee on Interior and Insular Affairs of the House of Representatives and the Select Committee on Indian Affairs of the Senate with a status report on the development of the comparative analysis required by this section, and shall file a final report with the Congress not more than nine months from the date of enactment of this Act.

**SEC. 204. LEASING OF INDIAN RANGELANDS AND FARMLANDS.**

(a) **AUTHORITY OF THE SECRETARY.**—The Secretary—

(1) is authorized to approve any agricultural lease or permit with a tenure up to ten years, or a tenure longer than ten years but not to exceed 25 years unless authorized by other Federal law, when, in the opinion of the Secretary, such lease or permit requires substantial investment in development of the lands and/or crops by the lessee and such longer tenure is determined by the Secretary to be in the best interest of the landowners;

(2) is authorized to lease or permit agricultural lands at rates less than the Federal appraisal when such action would be in the best interest of the landowner, and in such instances, when such land has been satisfactorily advertised for lease, the highest responsible bid shall be accepted; and

(3) is authorized to waive or modify the requirement that a lessee post a surety or performance bond on agricultural leases and permits issued by the Secretary.

(b) **AUTHORITY OF THE TRIBE.**—When authorized by an appropriate tribal resolution establishing a general policy for leasing of Indian agricultural lands, the Secretary—

(1) shall provide a preference to Indian operators in the issuance and renewal of agricultural leases and permits, so long as the lessor receives fair market value for his property;

(2) shall waive or modify the requirement that a lessee post a surety or performance bond on agricultural leases and permits issued by the Secretary, provided that nothing in this paragraph shall be construed to restrict the discretion currently vested in the Secretary to waive or modify the bond requirements in the absence of a tribal resolution to the contrary; and

(3) when such tribal resolution sets forth a tribal definition of what constitutes "highly fractionated undivided heirship lands" and adopts an alternative plan for providing notice to owners, the Secretary is authorized to waive or modify the general notice provisions and negotiate and lease or permit such highly fractionated undivided interest heirship lands in order to prevent waste, reduce idle land acreage and ensure income.

(c) **RIGHTS OF INDIVIDUAL LAND OWNERS.**—

(1) Nothing in this section shall be construed as limiting or altering the authority or right of an individual allottee in the use of his or her own land or to enter into an agricultural lease of the surface interest of his or her allotment under any other provision of law.

(2) The owners of a majority interest in any trust or restricted land (meaning an interest greater than 50 percent of the legal or beneficial title) are authorized to enter into an agricultural lease of the surface interest of a trust or restricted allotment, and such lease shall be binding upon the owners of the minority interests in such land, provided that the terms of the lease provide such minority interests with not less than fair market value for such land.

(3) The provisions of subsection (b) shall not be applicable to any parcel of trust or restricted land if the owners of 50 percent of the legal or beneficial interest in such land file with the Secretary a written objection to the application of all or any part of such tribal rules to the leasing of such parcel of land.

**TITLE III—EDUCATION IN AGRICULTURE AND NATURAL RESOURCE MANAGEMENT**

**SEC. 301. ESTABLISHMENT OF INDIAN AND ALASKA NATIVE AGRICULTURE AND NATURAL RESOURCES MANAGEMENT EDUCATION ASSISTANCE PROGRAM.**

(a) **NATURAL RESOURCES INTERN PROGRAM.**—(1) Notwithstanding the provisions of title 5 of the United States Code governing appointments in the competitive service, the Secretary shall establish and maintain in the Bureau of Indian Affairs or other appropriate office or bureau within the Department of the Interior at least 20 natural resources intern positions in addition to the forestry intern positions authorized in section 314(a) of Public Law 101-630 for Indian and Alaska Native students enrolled in an agriculture or natural resources study program.

(2) For purposes of this subsection, the term—

(A) "natural resources intern" means an Indian or Alaska Native who—

(i) is attending an approved postsecondary school in a full-time agriculture or natural resource related field; and

(ii) is appointed to one of the natural resources intern positions established under paragraph (1);

(B) "natural resources intern program" means positions established pursuant to paragraph (1) for natural resources interns; and

(C) "agriculture or natural resources study program" includes, but is not limited to, agricultural engineering, agricultural economics, animal husbandry, animal science, biological sciences, fishery management, geographic information systems, horticulture, range management, soil science, veterinary science, and wildlife biology.

(3) The Secretary shall pay, by reimbursement or otherwise, all costs for tuition, books, fees and living expenses incurred by a natural resources intern while attending an approved postsecondary or graduate school in a full-time natural resources study program.

(4) A natural resources intern shall be required to enter into an obligated service agreement to serve as an employee in a professional natural resources position with the Department of the Interior or other Federal agency, an Indian tribe, or a tribal natural resource related enterprise for one year for each year of education for which the Secretary pays the intern's educational costs under paragraph (3) of this subsection.

(5) A natural resources intern shall be required to report for service with the Bureau of Indian Affairs or other bureau or agency sponsoring his internship, or to a designated work site, during any break in attendance at school of more than three weeks duration. Time spent in such service shall be counted toward satisfaction of the intern's obligated service agreement under paragraph (4).

(b) COOPERATIVE EDUCATION PROGRAM.—(1) The Secretary shall maintain, through the Bureau of Indian Affairs, a cooperative education program for the purpose, among other things, of recruiting Indian and Alaska Native students who are enrolled in secondary schools, tribally controlled community colleges, and other postsecondary or graduate schools, for employment in professional natural resource related positions with the Bureau of Indian Affairs or other Federal agency providing Indian natural resource related services, Indian tribal governments, or tribal natural resource related enterprises.

(2) The cooperative educational program under paragraph (1) shall be modeled after, and shall have essentially the same features as, the program in effect on the date of enactment of this Act pursuant to chapter 308 of the Federal Personnel Manual of the Office of Personnel Management.

(3) The cooperative educational program shall include, among others, the following:

(A) The Secretary shall continue the established specific programs in agriculture and natural resources education at Southwestern Indian Polytechnic Institute (SIPI) and at Haskell Indian Junior College.

(B) The Secretary shall develop and maintain a cooperative program with the tribally controlled community colleges to coordinate course requirements, texts, and provide direct technical assistance so that a significant portion of the college credits in both the Haskell and SIPI programs can be met through local program work at participating community colleges.

(C) Working through tribally controlled community colleges and in cooperation with land grant institutions, the Secretary shall implement an informational and educational program to provide practical training and assistance in creating or maintaining a suc-

cessful agricultural enterprise, assessing sources of commercial credit, developing markets and other subjects of interest to the rural community.

(D) Working through tribally controlled community colleges and in cooperation with land grant institutions, the Secretary shall implement research activities to improve the basis for determining appropriate management measures to apply to Indian resource management.

(4) Under the cooperative agreement program under paragraph (1), the Secretary shall pay all costs for tuition, books, and fees of an Indian or Alaska Native student who—

(A) is enrolled in a course of study at an education institution with which the Secretary has entered into a cooperative agreement; and

(B) is interested in a career with the Bureau of Indian Affairs, an Indian tribe or a tribal enterprise in the management of Indian rangelands, farmlands, or other natural resource assets.

(5) Financial need shall not be a requirement to receive assistance under the cooperative agreement program that is to be maintained under this subsection.

(6) A recipient of assistance under the cooperative education program under this subsection shall be required to enter into an obligated service agreement with the Secretary to serve as a professional in a natural resource related activity with the Bureau of Indian Affairs, or other Federal agency providing natural resource related services to Indians or Indian tribes, an Indian tribe, or a tribal natural resource related enterprise, for one year for each year for which the Secretary pays the recipients educational costs pursuant to paragraph (3).

(c) SCHOLARSHIP PROGRAM.—(1) The Secretary is authorized to grant scholarships to Indians and Alaska Natives enrolled in accredited natural resource related programs for postsecondary and graduate programs of study as full-time students.

(2) A recipient of a scholarship under paragraph (1) shall be required to enter into an obligated service agreement with the Secretary in which the recipient agrees to accept employment for one year for each year the recipient received a scholarship, following completion of the recipient's course of study, with—

(A) the Bureau of Indian Affairs or other agency of the Federal Government providing natural resource related services to Indians or Indian tribes;

(B) a natural resource program conducted under a contract, grant, or cooperative agreement entered into under the Indian Self-Determination and Education Assistance Act;

(C) an Indian enterprise engaged in a natural resource related business; or

(D) an Indian tribe's natural resource related program.

(3) The Secretary shall not deny scholarship assistance under this subsection solely on the basis of an applicant's scholastic achievement if the applicant has been admitted to and remains in good standing in an accredited postsecondary or graduate institution.

(d) EDUCATIONAL OUTREACH.—The Secretary shall conduct, through the Bureau of Indian Affairs, and in consultation with other appropriate local, State and Federal agencies, and in consultation and coordination with Indian tribes, a natural resource education outreach program for Indian and Alaska Native youth to explain and stimu-

late interest in all aspects of management and careers in Indian natural resources.

(e) ADEQUACY OF PROGRAMS.—The Secretary shall administer the programs described in this section until a sufficient number of Indians and Alaska Natives are trained to ensure that there is an adequate number of qualified, professional Indian natural resource managers to manage the Bureau of Indian Affairs natural resource programs and programs maintained by or for Indian tribes.

#### SEC. 302. POSTGRADUATION RECRUITMENT, EDUCATION AND TRAINING PROGRAMS.

(a) ASSUMPTION OF LOANS.—The Secretary shall establish and maintain a program to attract Indian and Alaska Native professional natural resource technicians who are graduates of a course of postsecondary or graduate education for employment in either the Bureau of Indian Affairs natural resource programs or, subject to the approval of the tribe, in tribal natural resource programs. According to such regulations as the Secretary may prescribe, such program shall provide for the employment of Indian and Alaska Native professional natural resource technicians in exchange for the Secretary's assumption of the employee's outstanding student loans. The period of employment shall be determined by the amount of the loan that is assumed.

(b) POSTGRADUATE INTERGOVERNMENTAL INTERNSHIPS.—For the purposes of training, skill development and orientation of Indian, Alaska Native, and Federal natural resource management personnel, and the enhancement of tribal and Bureau of Indian Affairs natural resource programs, the Secretary shall establish and actively conduct a program for the cooperative internship of Federal, Indian and Alaska Native natural resource personnel. Such program shall—

(1) for agencies within the Department of the Interior—

(A) provide for the internship of Bureau of Indian Affairs, Alaska Native, and Indian natural resource employees in the natural resource related programs of other agencies of the Department of the Interior; and

(B) provide for the internship of natural resource personnel from the other Department of the Interior agencies within the Bureau of Indian Affairs, and, with the consent of the tribe, within tribal natural resource programs;

(2) for agencies not within the Department of the Interior, provide, pursuant to an inter-agency agreement, internships within the Bureau of Indian Affairs and, with the consent of the tribe, within a tribal natural resource program of other natural resource personnel of such agencies who are above their sixth year of Federal service;

(3) provide for the continuation of salary and benefits for participating Federal employees by their originating agency;

(4) provide for salaries and benefits of participating Indian and Alaska Native natural resource employees by the host agency; and

(5) provide for a bonus pay incentive at the conclusion of the internship for any participant.

(c) CONTINUING EDUCATION AND TRAINING.—The Secretary shall maintain a program within the Trust Services Division of the Bureau of Indian Affairs for the ongoing education and training of Bureau of Indian Affairs, Alaska Native, and Indian natural resource personnel. Such program shall provide for—

(1) orientation training for Bureau of Indian Affairs natural resource personnel in tribal-Federal relations and responsibilities;

(2) continuing technical natural resource education for Bureau of Indian Affairs, Alaska Native, and Indian natural resource personnel; and

(3) development training of Indian and Alaska Native personnel in natural resource based enterprises and marketing.

**SEC. 303. COOPERATIVE AGREEMENT BETWEEN THE DEPARTMENT OF THE INTERIOR AND INDIAN TRIBES.**

**(a) COOPERATIVE AGREEMENTS.—**

(1) To facilitate the administration of the programs and activities of the Department of the Interior, the Secretary is authorized to negotiate and enter into cooperative agreements with Indian tribes to—

(A) engage in cooperative manpower and job training;

(B) develop and publish cooperative environmental education and natural resource planning materials; and

(C) perform land and facility improvements, and other activities related to land and natural resource management and development.

The Secretary may enter into such agreements when the Secretary determines the interest of Indians and Indian tribes will be benefited.

(2) In such cooperative agreements, the Secretary is authorized to advance or reimburse funds to contractors from any appropriated funds available for similar kinds of work or by furnishing or sharing materials, supplies, facilities or equipment without regard to the provisions of section 3324, title 31, United States Code, relating to the advance of public moneys.

(b) SUPERVISION.—In any agreement authorized by this section, Indian tribes and their employees may perform cooperative work under the supervision of the Department of the Interior in emergencies or otherwise as mutually agreed to, but shall not be deemed to be Federal employees other than for the purposes of section 2671 through 2680 of title 28, United States Code, and section 8101 through 8193 of title 5, United States Code.

(c) SAVINGS CLAUSE.—Nothing in this Act shall be construed to limit the authority of the Secretary to enter into cooperative agreements otherwise authorized by law.

**SEC. 304. OBLIGATED SERVICE; BREACH OF CONTRACT.**

(a) OBLIGATED SERVICE.—Where an individual enters into an agreement for obligated service in return for financial assistance under any provision of this title, the Secretary shall adopt such regulations as are necessary to provide for the offer of employment to the recipient of such assistance as required by such provision. Where an offer of employment is not reasonably made, the regulations shall provide that such service shall no longer be required.

(b) BREACH OF CONTRACT; REPAYMENT.—Where an individual fails to accept a reasonable offer of employment in fulfillment of such obligated service or unreasonably terminates or fails to perform the duties of such employment, the Secretary shall require a repayment of the financial assistance provided, pro rated for the amount of time of obligated service that was performed, together with interest on such amount which would be payable if at the time the amounts were paid they were loans bearing interest at the maximum legal prevailing rate, as determined by the Treasurer of the United States.

**TITLE IV—AUTHORIZATION OF APPROPRIATIONS**

**SEC. 401. AUTHORIZATIONS.**

There are authorized to be appropriated such sums as may be necessary to carry out the purposes of this Act.

**TITLE V—MISCELLANEOUS**

**SEC. 501. REGULATIONS.**

Except as otherwise provided by this Act, the Secretary is directed to promulgate final regulations for the implementation of this Act within eighteen months from the date of enactment of this Act. All regulations promulgated pursuant to this Act shall be developed by the Secretary with the participation of the affected Indian tribes.

**SEC. 502. SEVERABILITY.**

If any provision of this Act, or the application of any provision of this Act to any person or circumstance, is held invalid, the application of such provision or circumstance and the remainder of this Act shall not be affected thereby.

**SEC. 503. TRUST RESPONSIBILITY.**

Nothing in this Act shall be construed to diminish or expand the trust responsibility of the United States toward Indian trust lands or natural resources, or any legal obligation or remedy resulting therefrom.

**SEC. 504. MISCELLANEOUS.**

(a) DISCLAIMER.—Nothing in this Act shall be construed to supersede or limit the authority of other Federal, State or local agencies otherwise authorized by law to provide services to Indian landowners.

(b) DISCLAIMER.—Nothing in this Act shall be construed as vesting the governing body of an Indian tribe with any authority which is not authorized by the constitution and by-laws or other organizational document of such tribe.●

**CURTIS HAND CENTER**

● Mr. SARBANES. Mr. President, I want to thank the distinguished chairman, Senator INOUE, and the other conferees on the fiscal 1993 Defense appropriations for including language on the Curtis Hand Center at Union Memorial Hospital.

Following World War II, Union Memorial Hospital in Baltimore began developing a hand surgery division under the guidance of Dr. Raymond Curtis, a major in the Army Medical Corps. In 1975 the hospital formally established the Raymond M. Curtis Hand Center which includes a surgical unit, a microsurgical laboratory, and a rehabilitation unit.

Mr. President, the center's relationship with the Army Medical Corps has continued through the years. I understand that Union Memorial has trained every Army hand surgeon since World War II without any cost to the Department of Defense. The commitment to providing this important service has continued under the current leadership of the center.

While the programs and reputation of the Curtis Center have continued to grow, the available space has not. Mr. President, I am hopeful that, based on this report language, the Department of Defense will review its longstanding relationship with the Curtis Hand Cen-

ter to determine if it is appropriate to provide Federal funding for its expansion efforts.●

**NOTICE OF DETERMINATION BY THE SELECT COMMITTEE ON ETHICS UNDER RULE 35, PARAGRAPH 4, PERMITTING ACCEPTANCE OF A GIFT OF EDUCATIONAL TRAVEL FROM A FOREIGN ORGANIZATION**

● Mr. SANFORD. Mr. President, it is required by paragraph 4 of rule 35 that I place in the CONGRESSIONAL RECORD notices of Senate employees who participate in programs, the principal objective of which is educational, sponsored by a foreign government or a foreign educational or charitable organization involving travel to a foreign country paid for by that foreign government or organization.

The select committee received a request for a determination under rule 35 for Paul Donovan, a member of the staff of Senator KENNEDY, to participate in the European Community Visitors Program in Belgium, France, and Ireland, sponsored by the European Parliament—Commission of the European Communities, from November 14-28, 1992.

The committee has determined that participation by Mr. Donovan in this program, at the expense of the European Parliament—Commission, is in the interest of the Senate and the United States.

The select committee received a request for a determination under rule 35 for Andrew S. Morton, a member of the staff of Senator LUGAR, to participate in a program in Germany, sponsored by Haus Rissen, International Institute for Politics and Economics, from August 11-19, 1992.

The committee determined that participation by Mr. Morton in this program, at the expense of Haus Rissen, was in the interest of the Senate and the United States.

The select committee received a request for a determination under rule 35 for Mark Ashby, a member of the staff of Senator BREAUX, to participate in a program in Chile, sponsored by the Chilean American Chamber of Commerce, from August 30-September 3, 1992.

The committee has determined that participation by Mr. Ashby in this program, at the expense of the Chilean American Chamber of Commerce, is in the interest of the Senate and the United States.●

**HONORING LUBAVITCHER REBBE MENACHEM MENDEL SCHNEERSON**

● Mr. D'AMATO. Mr. President, as we celebrate the holiday of Yom Kippur and its hopeful symbolism for renewal, I am reminded that a recent evening in Washington celebrated the birthday

and National Education Day honoring Lubavitcher Rebbe Menachem Mendel Schneerson of Brooklyn, NY.

I was honored by the invitation to represent the Senate by offering remarks on that occasion; first, because the Grande Rebbe resides in New York and second, because a world-wide confederation of Lubavitcher had convened for that dinner.

The principle address that night was given by Elie Wiesel, in a modulated and humble tone which bespoke the reverence and regard he has for the zeal and mission which the Grande Rebbe has exemplified for so many decades in so many lands.

Mr. President, I want to share those remarks with our colleagues and, through the pages of our RECORD, with the audience of the world.

The remarks follow:

ELIE WIESEL

My good friend and associate, Ron Perelman, distinguished members of the Senate including Senator D'Amato and Senator Moynihan, and members of the House, all the Shluchim of Chabad, friends of Lubavitch: It is for me a very special moment to be with you and together celebrate the Rebbe.

Why is it so special? First of all because it is the Rebbe, second because it is of you. If I were to be able to collect all the passions, all the affection and admiration that are in this room for the Rebbe, I think I would be lifted to the 7th Heaven and be able to bring the prayer of Tfilo L'Moishé that you just recited, to Hakodesh Boruch Hu Himself. The fact that you are so close to a man who has done so much speaks well of him and speaks well of you.

Some of you know of my admiration, not only for the Rebbe, but also for his work in the field of education. The fact that he knew whom to send where, to G-d forsaken places, simply to bring a word of faith and the word of the Law to youngsters who otherwise would have been lost, is to me probably one of the elements that give hope to a generation.

I imagine, Rabbi Avramel Shemtov, you asked me to give the toast to the Rebbe because you know how fond I am of him. You know that I am not a Hassid of Lubavitch, I still am a Hassid of Wiznitz, but you also know how I feel about the Rebbe.

Second, you know I am a Hassid, and being a Hassid, I cannot not tell you a Hassidic story tonight, since we are coming closer to Shabbat HaGodol, the sabbath before Passover.

The story is about a Hassidic master call Reb Naftoli of Ropshitz; he was a great speaker with a great sense of humor. One Shabbat HaGodol, the great Shabbos before Passover, he came home from the synagogue. Customarily, the Rabbi of the town must make a speech of that Sabbath about the mitzvah of charity to help poor people who did not have money to celebrate the Seder, to prepare the Passover meal.

So he spoke and spoke: when he came home and his wife asked him: "Nu, how was it?"—which means that the Rebbetzin did not go to Shul that week. He answered it was okay. "Well, did you do anything?" "Did you accomplish anything, she asked?" He said "Only half." She said "What do you mean?" He said, "I managed to convince the poor to receive".

The Rebbe manages to convince the rich to give and the teachers to teach, and the students to study. The Rebbe manages to do things that normal human beings wouldn't even dare to dream of undertaking.

But what is it about this extraordinary teacher, extraordinary master, that makes his greatness so special, so unique? Was he elected? Again, we may surprise you, my friends, who are not from Lubavitch, and are not from the Jewish faith. In the Jewish tradition, greatness is not acquired by election. Moses wasn't elected. Had Moses had to have run for election, he would have failed. Moses was a poor speaker, and he was always angry. No, not a good candidate.

All the other leaders that we had, no one was really elected. The election came from above. A kind of democracy, a new age democracy. Someone who feels on his or her shoulders the weight of centuries, the weight of a tradition of morality: that person is a leader and that person is great. And the Rebbe, who is a scion, going back to the Old Rebbe, the Alter Rebbe, Reb Schneur Zalman of Liadi, going back the Besht, going back to King David; that greatness, therefore, has a very special dimension.

How does one measure greatness? I mean, what criteria does one use in evaluating human greatness? In the case of the Lubavitcher Rebbe Shlita, the answer is easily obtained. All one has to do is to see the impact he has already left and will continue to leave for many, many years, on the surface of the soul of the people who had the privilege of meeting him, of listening to his words and receiving the Blessing of his prayers and his teachings. I know of no one who has left Rebbe, even for a moment, without being deeply affected, if not changed, by their encounter. I hope I will always be able to remember what I felt when I was first introduced into this study, some thirty years ago, and what we said to one another.

It lasted a very long time, and I came back again and again. But I know that moment, the first moment, was a privilege, a very privileged one, and it remains as such in my memory. I recall every question and every answer on both sides. Time in his presence began running at a different pace. In his presence you feel inspired, you feel self-examined, you are made to wonder about the quest for meaning which ought to be yours. In his presence you come closer in touch with your inner center of gravity.

But what is great about the Rebbe is that not only those who met him are affected, but even those who didn't. Somehow the presence of the man in our midst sends out an emanation, an emanation of mystical quality that touches people who have never heard of him, and this, probably more than anything else, is what makes the Rebbe so unique.

Simple stories are sometimes related but ours have common roots in and therefore a common link to the Rebbe and his teachings. What is true of the individual also applies to the community.

It is due to his influence, to his presence, that Jewish awareness and Jewish education have reached unprecedented heights on almost every continent. Is there a place under the sun that the Chabad emissaries have not carried his work of tolerance rooted in Ahavas Yisroel, in the love for Israel, which really, by extension, means love for humanity? From Australia to Morocco, from Persia to Nepal to Nebraska; from Triblisi to Utal to Tokyo to Alaska to Connecticut. Wherever Jews dwell and work, they somehow become exposed to the Lubavitcher Rebbe.

Thanks to him, a Jew, anywhere and everywhere, cannot but feel that he or she belongs to an ancient people whose tradition emphasizes the greatness of its task more than the prerogatives of its condition. Thanks to the Rebbe, a Jew becomes a better Jew, thus a better human being, thus making fellow human beings more human, more hospitable, open to a greater sense of generosity. So this is where the Rebbe's greatness also lies.

Tolerance as a way leading to authenticity. I can be a good Jew if I do so wish, and if I wish to be a better Jew, it's the human being in me who is Jewish, who wants to be a better human being. And if I am a good Jew, a Christian will be a better Christian. It is my responsibility, therefore, not only for myself, but for our surroundings. It is that lesson of humility which carries its own weight of responsibility that we receive from the Rebbe.

Now some of us were lucky and we were at his farbrengen, we have heard his lessons, we have joined him in study, in song. We have seen him with his disciples, we have witnessed his accomplishments. And therefore, Ron and I feel, with a deep sense of devotion, affection and admiration, that we should lift our glasses to say 'Le Chaim' to this generation's Admor, whose life and work have been a Blessing to so many of us, indeed to all of Israel and the world.

So, to the Rebbe in Brooklyn, what could we say except, we are your disciples, we are your followers because like you, and with you, we believe in study, we believe in prayer. We believe in prayer as a link between one human being and the other. We believe in study as a link between one generation and the other. And we believe in an added measure of solidarity that should always be present in whatever we do for ourselves, for our people, and for each other.

When we are with the Rebbe we lift a small cup and we say: LeChaim, and the Rebbe answers: LeChaim. Let us imagine, therefore that we are tonight at 770 Eastern Parkway, and we see the Rebbe, and as you heard tonight he needs us. And therefore we say with more vigor and with more fervor: LeChaim Rebbe!•

#### A TESTIMONIAL TO MARTY RUSSO

• Mr. SIMON. Mr. President. I am glad to join my friends of Local Lodge 2600 of the International Association of Machinist and Aerospace Workers in honoring my colleague, Representative MARTY RUSSO, for his many years of public service. I am certain that he is greatly appreciative of the plaque that was given to him that reads:

Presented to Congressman Marty Russo for 18 years of dedication to public service, his inspiring leadership, his unwavering humanity, and his ever present voice of social conscience and justice. For fighting the formidable fight against: politics without principle; pleasure without conscience; wealth without work; knowledge without character; business without morality; science without humanity; and worship without sacrifice; presented on behalf of the members of Local Lodge 2600 of the International Association of Machinist and Aerospace Workers in heartfelt appreciation of your leadership that this country so desperately needs.

It has been a pleasure and I consider it an honor to have worked with MARTY for the past years. He and I

came into the House of Representatives in 1975 and have served together for the past 18 years. We have worked on a number of initiatives together for Illinois and the Nation. We in Congress will miss his commitment, his leadership, and his humor. ●

#### A TIME TO HEAL: ANGOLA AFTER THE ELECTIONS

● Mr. DeCONCINI. Mr. President, last week I spoke on this floor—on the occasion of its first democratic elections—about the significant changes occurring in Angola. In that statement, I chronicled the three goals of United States policy toward Angola—ceasefire, free and fair elections, and national reconciliation—and promised to more fully explore the final goal in a later statement. It is for that reason that I rise to speak today.

By most accounts of international observers, the elections which were held on September 29 and 30 for President and the national assembly appear to have been remarkably free and fair. Understandably, some problems occurred with the balloting, but these were problems associated with the difficult logistics, not because of fraud or intimidation on the part of any of the parties.

With achievement of the ceasefire of May 31, 1991, the groundwork was laid for the next stage in Angola's evolution toward democracy. A multiparty system, featuring systematic free and fair elections, has been established and tested. However, it is still too early to determine whether the people of Angola have initiated a true democratic system that will continue to expand and prosper. What is certain, is that the country has begun to take the necessary steps forward, and I applaud the Angolan people for their patience and diligence in this effort.

The final step for the Angolan people now is to ensure there is a recommitment—on behalf of all parties—to national reconciliation. All Angolans need to put the past behind them and enter into a new era characterized by a commitment to cooperation. There has been too much bloodshed; too many lives have been lost; and too much progress has been made to allow partisan political divisions within Angola to inhibit the democratization process.

Jonas Savimbi's comments over the weekend, combined with the UNITA military's decision to suspend its participation in the newly formed national army, are unhelpful at best, and potentially destabilizing at worst. Even the most veiled threats of returning to the military option can be explosive and counterproductive at this sensitive time. Dr. Savimbi has strongly protested the early election returns in both a public forum and to the National Electoral Council [NEC]. Any charges of electoral irregularities,

however, should be brought to the attention of the U.N. observers and the NEC—along with the evidence to substantiate the allegations—as provided for in the electoral law.

Reports coming out of Angola suggest that, on balance, the elections have been free and fair. No major violations have been recorded by the 800 international observers present in-country over the past several weeks. In particular, the Washington-based International Foundation for Electoral Systems [IFESS] sent 39 delegates to 8 provinces to observe the election process. Not one person has publicly reported a major violation of Angolan electoral law. Of course, this is not to say that there were no improprieties. However, to quote one of the delegates, "It would have been very difficult, almost impossible, for there to have been any massive fraud [in the Angolan elections]."

It is troubling to this Senator to imagine that Angola might again be plunged into war after coming so far down the road to peace. That is not what was envisioned as national reconciliation. True national reconciliation means the binding of wounds and working together to rebuild a war-torn nation. It also means accepting the will of the people. If the people have spoken and voted in favor of one party or person over another, it is the responsibility of the other parties to the contest to gracefully accede to the decision of the electorate, strengthen their own party, and plan to fight—at the polling place—another day.

Mr. President, I will reiterate what I stated last week, and remind Dr. Savimbi and others who would question the outcome elections, that the United States and other countries are as tired of the conflict within Angola as the people of Angola themselves. The international community will not tolerate any actions that might threaten democracy in Angola. In our rapidly changing world, we can no longer afford to promote movements that seek governmental change through military means. We will certainly not support the activities of any group that is stalling a country's progress toward democratization after the people have spoken in a free, democratic election.

I urge those at the highest levels of the Angolan parties—especially the MPLA and UNITA—to consider the opportunity which has been placed before them. The final step in Angola's democratic evolution is within reach. If Angola is to obtain development, trade, and investment assistance from the rest of the world, as well as embark on a path to prosperity and growth, it must abandon the hostility of the past and embrace the concept of national reconciliation.

The final results of the elections have yet to be announced. Perhaps there will have to be a runoff between

the two highest vote getters. Regardless of the outcome, however, the winners and losers must remember that they are all Angolans and that they share a common destiny.

Mr. President, in conclusion I applaud the leadership of the Senator from Kansas, Mrs. KASSEBAUM, for introducing the resolution on the Angolan elections. I would bring to the attention of my colleagues the final clause which urges the leadership of a new, free, peaceful Angola to embrace the concept of national reconciliation so that Angola can continue on its path toward prosperity. ●

#### SCHOOL HEALTH SERVICES

● Mr. DURENBERGER. Mr. President, I rise today to express my support for comprehensive health care services in schools. One vehicle for supporting these programs is the Maternal and Child Health Block Grant, which is the only Federal program targeted specifically at mothers and children. This program is especially helpful to uninsured, underinsured, and Medicaid-insured families in rural and inner-city areas. The grant program provides funds to States to develop programs to improve the health of children, using a variety of approaches that allow for differences within and between each State.

Since the 1930's, this program has provided resources to support basic school health programs in most States, including health education, access to health services in schools, and to ensure a safe and healthy environment. Reaching children in school is critical to their ability to learn and to provide access to health education and primary and preventive health services. There is growing evidence that communities are enthusiastic about making health and social services available in schools.

Mr. BENTSEN. Mr. President, I share the Senator's concern about providing access to health care services to our children in schools. The distinguished Senator from Minnesota and I were instrumental in establishing the current Maternal and Child Health Block Grant in the early 1980's, providing important flexibility to States to design effective programs targeted to women and children.

Mr. DURENBERGER. Mr. President, I hope that the distinguished chairman of the Finance Committee will work with me next year to design an effective program that meets the needs of States and communities attempting to establish comprehensive school health programs. My goal is to encourage communities to design school health programs that can become self-sufficient through collection of third-party payments, including Medicaid. In addition, I would like to encourage the development of managed-care programs that can serve children in schools.

Mr. BENTSEN. Mr. President, I applaud the intentions of my distinguished colleague from Minnesota to help communities ensure greater access to health care through their schools. I look forward to hearing his ideas about how to do so and hope that we can work together to meet this important objective.●

#### CONDUCT OF PROCEEDINGS FOR THE SELECTION OF OFFICERS FOR PROMOTION IN THE U.S. AIR FORCE

● Mr. NUNN. Mr. President, I have filed a report by the Armed Services Committee on the conduct of proceedings for the selection of officers for promotion in the U.S. Air Force. The report documents serious systemic deficiencies in the procedures used in the past by the Air Force to select officers for promotion. These failures included:

First, failure to issue implementing regulations required by applicable statutes and Department of Defense directives to ensure the fair operation of the selection board process;

Second, use of a preselection process that improperly excluded 90 percent or more of eligible officers from consideration by statutory selection boards;

Third, improper communication to selection boards of priority lists prepared by senior officers; and

Fourth, improper communications between the Air Force leadership and selection board members.

Mr. President, as a result of the committee's oversight in this area, Congress enacted legislation reforming the promotion selection process in section 504 of the National Defense Authorization Act for Fiscal Years 1992 and 1993 (Public Law 102-190). On February 4, 1992, the Department of Defense revised DOD Directive 1320.12, "Defense Officer Promotion Program," to incorporate the changes required by law.

Every military officer should know that the committee will continue to oversee the integrity of the central feature of the officer promotion system—the impartial use of selection boards to recommend officers for promotion—to ensure this is preserved. I insert a copy of the report in the RECORD at the conclusion of my remarks.

Mr. President, I want to also include a joint statement by myself and Senator WARNER on the action taken by the Armed Services Committee on the nomination of Maj. Gen. Thomas J. Hickey, U.S. Air Force, retired, be included in the RECORD following the report.

The material follows:

#### REPORT ON THE CONDUCT OF PROCEEDINGS FOR THE SELECTION OF OFFICERS FOR PROMOTION IN THE U.S. AIR FORCE

(Mr. Nunn, from the Committee on Armed Services, submitted the following report:)

The selection of officers for promotion in the armed forces through the grade of major

general and rear admiral is governed by statutory procedures. The central feature of these procedures is the use of impartial boards of officers, known as selection boards, to recommend officers for promotion. The composition and conduct of these boards is carefully guided by laws and regulations designed to ensure the fairness and impartiality of board proceedings. The range of actions that may be taken by the senior leadership before, during, and after the board proceedings is likewise circumscribed to preclude improper interference with the integrity of the selection process.

The fair and impartial conduct of the selection process is a matter of great concern to the Committee. The integrity of the selection process is essential to the integrity of the officer corps. Adherence to established laws and regulations is necessary to ensure that the best qualified officers are selected for promotion, and that the officer corps has confidence in the integrity of the selection process.

During the Committee's review of certain Air Force nominations during the 101st Congress, the Committee received information which indicated the possibility of serious and systemic deficiencies in the procedures used by the Air Force to recommend officers for selection to general officer positions. The Committee brought these matters to the attention of the Department of Defense. The Deputy Secretary of Defense ordered an examination of officer selection procedures throughout the Department of Defense. The results of that review were provided to the Committee, and considered during Committee proceedings in 1991 on November 19, 20, 21, 25, and 26. A staff report (Sen. Print 102-54) was issued on November 26, 1991. The Committee considered the issues raised by the DoD report and staff report on October 6, 1992, and adopted this report.

The reviews by the Department of Defense and the Committee identified the following systemic deficiencies in the Air Force officer selection process:

(1) Failure to issue implementing regulations required by applicable statutes and Department of Defense Directives to ensure the fair operation of the selection board process.

(2) Use of a preselection process that improperly excluded ninety percent or more of the eligible officers from consideration by statutory selection boards.

(3) Improper communication to selection boards of "priority lists" prepared by senior officers.

(4) Improper communications between the Air Force leadership and selection board members.

In addition, these reviews identified deficiencies in specific cases that are described in this report.

Part I of this report sets forth the statutory and regulatory background of the current promotion selection process. Part II describes the events resulting in the Committee's inquiries and a review by the Department of Defense. Part III analyzes the deficiencies in Air Force procedures disclosed a review by the Department of Defense. Part II analyzes the deficiencies in Air Force procedures disclosed as a result of the Committee's inquiries and the Department's review.

#### I. STATUTORY AND REGULATORY BACKGROUND

##### *The promotion selection process*

The promotion of military officers through the grade of major general and rear admiral relies on a merit-based system, the centerpiece of which is the selection board process. The sole exception involves officers nominated under the President's power under Ar-

title II of the Constitution to make non-statutory nominations, an authority that is rarely invoked.

Under current law, 10 U.S.C. 612, each selection board must consist of at least five officers, all of whom must be serving in a grade higher than the officers under consideration by the board. To ensure that the selection process is not dominated by a small group of officers, the law provides that "[n]o officer may be a member of two successive selection boards \* \* \* for the consideration of officers of the same competitive category and grade." 10 U.S.C. 612(b). To emphasize the solemnity of the board's responsibilities, a statute requires that each member "swear that he will perform his duties as member of the board without prejudice or partiality and having in view both the special fitness of officers and the efficiency of his armed force." 10 U.S.C. 613.

To encourage candid discussions free from outside interference, the law prohibits disclosure of a board's deliberations "to any person not a member of the board," subject only to very limited exceptions. 10 U.S.C. 618(f).

The board must submit a written report, signed by each member, certifying that the board has "carefully considered the record of each officer" under consideration, and that those recommended by the board "are best qualified for promotion." 10 U.S.C. 617.

Prior to submission of the board's report to the President, it is reviewed by the Secretary of the Military Department concerned, the Chairman of the Joint Chiefs of Staff, and the Secretary of Defense. These individuals are not authorized to interfere with the legitimate exercise of discretion by the selection board or to make any changes in the recommendations of the board. The Service Secretary may return the report to the board for further consideration only if there has been a violation of law, regulations, or guidelines. Neither the Service Secretary, nor any other official who reviews the board's report, may add a name to, or delete a name from, the list recommended by the board. Only the President may remove a name from a list recommended by the board. 10 U.S.C. 618.

##### *1987 investigation into improper communications with selection boards*

In 1987, the Armed Services Committee conducted an inquiry into irregularities associated with the 1987 Marine Corps major general promotion list. One of the key problems arising out of the 1987 inquiry involved verbal communications by the Secretary of the Navy and the Commandant of the Marine Corps to the President of the selection board. The verbal communications resulted in two additional names being added to the board's original eight selections.

The Committee's report of the Marine Corps major general board (S. Exec. Rept. No. 3, 100th Cong., 1st Sess. (1987)) commented specifically on the relationship between oral communications and fairness of the selection process:

The Committee observes that if an officer's selection is influenced by actions or oral communications of senior officials occurring outside the authorized selection board process, then other officers under consideration, who must rely on the authorized board process, may be denied a fair and equitable opportunity to be selected.

The report outlined the proper procedure for communicating information to a selection board:

Opinions, in writing, by a Service Secretary or a Service Chief, with respect to

personnel under their authority, can be made part of an officer's military records jacket at any time prior to a board convening and then can be given such consideration and accorded such weight as individual board members desire. That procedure maintains the spirit of fairness and objectivity which is so essential to the promotion selection process.

The Committee emphasized the importance of following such established procedures when dealing with the views of senior officials:

The exceptional weight that can be attributed to a Secretary's (or Chief's) views requires equally exceptional care in the manner those views are conveyed to board members.

*Corrective action directed by the Secretary of Defense in response to the 1987 investigation*

In a letter to the Committee dated July 7, 1987, Secretary of Defense Weinberger assured the Committee that he had taken vigorous action to prevent recurrence of the problems associated with the Marine Corps major general board:

As regards the Service Secretaries and other senior officials, we have \*\*\* acted to prevent the problems in this case recurring in the future. After receiving the General Counsel's report of inquiry, I directed prompt issuance of guidance for the military departments to prevent a recurrence of the unfortunate confluence of events which necessitated review of the board proceedings in this case. \*\*\*

This guidance \*\*\* fully and systematically addresses the confusion which complicated these board proceedings, by providing that, in the future:

Service Secretaries may not add authorizations to a promotion board after it convenes without my approval;

Service Secretaries and other persons must communicate their views regarding individual officers to a promotion board, if at all, in writing through means which will assure that their views are neither misrepresented nor misunderstood; and

Each board member has a right to relief from board service if he or she believes that any person has acted to limit the board's discretion, and a duty to report that matter to appropriate Service or DOD officials.

These provisions provide clear guidance for the future to prevent any circumstance in which the independence or integrity of a board proceeding could be questioned. \*\*\*

As a result of the Secretary's action, an amendment to DOD Directive 1320.12 was issued on June 3, 1987 to ensure the integrity of the promotion process by regulating the flow of information to a selection board. A key feature of the amended directive was the requirement that: "[a]ll communications intended to express the views of the Service Secretary, the senior uniformed member of the Service concerned, or other superior authority to the members of a selection board shall be put in writing, furnished to each member, and made a part of the board record." (emphasis added).

The Committee's report on the Marine Corps major general board took special note of the Secretary's action:

[T]he Secretary of Defense [has] directed that guidance, uniformly applicable to all three military departments, be promulgated by the Department of Defense to ensure that in the future all communications between a Service Secretary or senior uniformed officers and a selection board be in writing, be furnished to all members of the board, and be made a part of the official record. . . . (emphasis added).

On June 3, 1987, the Deputy Secretary of Defense issued revised guidance to the military departments concerning the officer selection process, which embodied the directions of the Secretary of Defense and incorporated additional safeguards against attempts to manipulate or interfere with promotion selection board procedures. \*\*\*

The June 3, 1987 amendments to DOD Directive 1320.12 included the following changes to ensure the integrity of the promotion process by regulating the flow of information to a selection board.

—A requirement that the Service Secretary provide "written instructions to promotion selection boards."

—A limitation requiring that "[a]ll communications intended to express the views of the Service Secretary, the senior uniformed member of the Service concerned, or other superior authority to the members of a selection board shall be put in writing, furnished to each member, and made a part of the board record."

—A prohibition against providing favorable information or opinion regarding officers to be considered by the board except by means of a letter filed in the officer's official military records or a written communication provided to each member and made a part of the board record.

—A prohibition against furnishing unfavorable information "except as expressly authorized under regulations prescribed by the Secretary concerned."

The Directive was further amended on November 29, 1989 to include:

—Rules governing modification or withdrawal of instructions to a board.

—A restriction providing that "[c]ommunications regarding particular officers are expressly forbidden, unless unusual circumstances exist that would preclude an officer's performance from being documented in the official record (i.e., sensitive classified mission, etc.)."

—Procedures for receiving unsolicited favorable opinions.

—A requirement for guidelines relating to the needs of the service for particular skills.

These amendments did not relax any of the restrictions imposed in June 1987.

Both the 1987 and 1989 amendments to DOD Directive 1320.12 required the Military Departments to provide the Office of the Secretary of Defense with implementing instructions within 120 days.

**II. BACKGROUND TO COMMITTEE'S REVIEW OF AIR FORCE PROMOTION SELECTION PRACTICES**  
*Development of information indicating irregularities in Air Force selection board procedures*

In 1990, during the Committee's review of certain Air Force nominations for promotion to brigadier general, the Committee received indications that adverse information concerning certain nominees, which was not part of the nominees' military records, had been provided to one member of the selection board. However, this adverse information had not been communicated in writing to all members of the selection board as required by the amendments to DOD Directive 1320.12 that had been directed by the Secretary of Defense in response to the 1987 investigation of the Marine Corps major general board.

On June 28, 1990, the Committee asked the Department of Defense to determine the manner in which the information was handled with respect to the 1990 Air Force brigadier general selection board in light of the requirements of DOD Directive 1320.12.

The Secretary of the Air Force responded for the Department of Defense on August 3,

1990. In response to the Committee's questions, the Secretary noted that certain adverse information relating to two nominees was provided to the President of the board but not to the other members of the board.

The Air Force response, and the Committee's review of applicable Air Force regulations, indicated that the Air Force had failed to implement both the 1987 and 1989 amendments to DOD Directive 1320.12. On September 28, 1990, the Committee asked the Secretary of Defense to review pending Air Force nominations to determine whether the nominees were selected in accordance with applicable DOD Directives, and to advise the Committee of the actions taken by the Air Force to implement DOD Directive 1320.12.

While the Committee's request was under consideration by the Department of Defense, the Committee discussed the Air Force promotion system with General Merrill P. McPeak during review of his nomination to be Air Force Chief of Staff. In testimony before the Committee on October 24, 1990, General McPeak provided a candid, forthright assessment of deficiencies in the system. In addition to describing the failure to implement applicable rules restricting provision of information to selection boards, General McPeak noted the following additional deficiencies in Air Force procedures:

(1) A preselection process not authorized by Air Force regulations which reduced the number of candidates that would be considered by a general officer selection board through the elimination of about 90 percent of the eligible officers prior to convening of the centralized selection board.

(2) Improper briefings of the Secretary and the Chief of Staff of the preliminary decisions of selection boards prior to final action by the boards.

On October 25, 1990, the Committee brought these matters to the attention of the Secretary of Defense.

*Review of the officer promotion process by the Assistant Secretary of Defense (Force Management and Personnel)*

Deputy Secretary of Defense Atwood, by memorandum dated November 7, 1990, directed Christopher Jehn, the Assistant Secretary of Defense (Force Management and Personnel), "to review the officer promotion programs and promotion board procedures in each of the Military Departments." The Atwood memorandum stated that the purpose of the review was to determine whether existing regulations and procedures—

(1) are in compliance with statutory requirements,

(2) foster a climate of fair and equitable consideration of officers eligible for promotion, and

(3) ensure the independence and integrity of promotion boards.

The OSD review covered the 1987-90 time period, and focused on the fiscal year 1990 cycle of promotion boards. The review consisted of an examination of regulations and related documents, formal presentations by the Services, and interviews with randomly selected board members and support personnel. The review of the Air Force process, for example, included interviews of 10 officers. The purpose of the review was to identify systemic problems, and it was not designed to specifically address the validity of each board conducted within that period. Therefore, the deficiencies in Air Force procedures described in Part III of this report should be regarded as examples, and not as a comprehensive listing of all irregularities that may have occurred during that period.

On March 15, 1991, Deputy Secretary Atwood forwarded the results of the OSD re-

view to the Committee. Additional material was provided to the Committee on April 25 by Assistant Secretary of Defense Jehn. The Committee submitted follow-up questions on May 20, and material was submitted to the Committee on June 19 by Assistant Secretary of Defense Jehn and on July 10 by Air Force Secretary Rice. References in this report to the "OSD Review" pertain to material contained in the March 15 letter from Deputy Secretary Atwood and the letters from Assistant Secretary Jehn dated April 25 and June 19, 1991.

### III. ANALYSIS

#### *Irregularities identified as a result of the Committee's inquiries concerning Air Force promotion practices*

The information provided by the Department of Defense in response to the Committee's inquiries established that there were serious, significant deficiencies in Air Force promotion practices.

#### *1. Failure to issue required implementing regulations*

According to Deputy Secretary Atwood, the OSD review "revealed, in the case of general officer promotions, a failure on the part of the Air Force to ensure strict adherence to required procedures." The OSD review noted that "the lack of a governing Air Force regulation may account for an insufficient awareness of the various provisions of DOD [Directive] 1320.12 which contributed to irregularities, both real and perceived, in general officer promotions."

The failure of the Air Force to implement the regulation was not the result of an administrative oversight with respect to a routine matter. The Air Force actively participated in the development of the 1987 changes to the DOD Directive, and specifically objected to coverage by the regulation of general officer selection boards. The Air Force also proposed striking out the language which included "the senior uniformed member of the service concerned [and] other superior military authority[ies]" in the requirement that all communications from the leadership in writing. The Air Force comments were not accepted by the Deputy Secretary of Defense when the 1987 changes were issued. After the amended Directive was issued, the Air Force: (1) failed to issue a regulation governing the conduct of general officer selection boards; (2) failed to incorporate the changes into the existing regulation governing field grade officer selection boards; and (3) failed to incorporate the limitations on communications into the Letters of Instructions provided to selection boards.

The failure of the Air Force to fully implement the DOD Directive persisted for years—even after the Committee brought the Directive to the attention of the Air Force on June 28, 1990.

As the Committee noted in its report on the National Defense Authorization Act of Fiscal Years 1992 and 1993 (S. Rept. 102-113):

The failure of a Military Department to implement a DOD Directive on a timely basis is inexcusable in any case. When it involves a directive that the Secretary has issued to address problems of abuse in the promotion selection process, the failure is intolerable.

The failure to implement the Directive meant that the Air Force provided no guidance to the officer corps in general, or selection boards in particular, as to the strict prohibitions set forth in the amended DOD Directive.

#### *2. Use of a preselection process to improperly exclude eligible officers from consideration by selection boards*

When a selection board is convened, the board must consider each officer in and above the promotion zone for the grade and competitive category under consideration (10 U.S.C. 619(c)). There are a number of very limited exceptions, including authorization for the Service Secretary "by regulation" to "prescribe procedures to limit the officers to be considered \*\*\* for promotion to the grade of brigadier general or rear admiral (lower half) \*\*\* to those officers who are determined to be exceptionally well qualified for promotion \*\*\*."

According to the OSD review, the Air Force employed a preselection process without issuing the statutorily required regulations. The Air Force routinely used such unauthorized preselection boards to exclude eligible officers from consideration without prescribing the required procedures.

The OSD review determined that "[t]hese screening boards normally eliminated from consideration by the statutory board approximately 90 percent of those officers who would otherwise have been eligible for consideration by the statutory board."

The OSD review noted that "[n]o formal means were to advise eligibles of the brigadier general pre-screening process." The effect was that thousands of officers who reasonably could have believed that their non-selection for promotion resulted from the decision of a statutory selection board had, in fact, been eliminated from consideration through unauthorized procedures before the statutory board ever met.

According to the OSD review, the Air Force used a three-tier pre-selection process to screen out candidates prior to convening statutory brigadier general selection boards. The first tier consisted of Initial Screening Boards established primarily at major command levels, which eliminated 90 percent of the eligible officers from further consideration. The second tier involved a Central Screening Board, which eliminated about 50 percent of those recommended by the Initial Screening Boards. The final tier was the statutory selection board, which considered the remaining eligible officers.

The Initial Screening Boards were established at each of the major commands and at Headquarters, Air Force. As a result, eligible officers did not compete against their peers throughout the Air Force, as contemplated by the statutory centralized selection process. Instead, they were screened out through a procedure in which they unknowingly competed only against officers within their own command.

The Initial Screening Board at a major command consisted of general officers appointed by the major command commander. Thus, officers eligible for promotion who reasonably expected that they would be considered by a selection board convened by the Service Secretary, as required by law, were instead eliminated from consideration by screening boards appointed by commanders in the field.

An Initial Selection Board convened at a major command was allowed to forward no more than 15 percent of the eligible officers for centralized screening. The Headquarters Initial Selection Board was allowed to forward no more than 10 percent of the eligible officers for centralized screening.

The effect of the Initial Screening Board process was that at least 85 percent of the colonels assigned to the major commands, and at least 90 percent of the colonels as-

signed to Headquarters, Air Force, were improperly precluded from competing against their peers elsewhere in the Air Force before a central promotion board.

The balkanization of the Initial Screening Board process into separate boards for each major command, and a separate board for the headquarters organizations, meant that an officer could be eliminated even though the officer was better qualified than an officer in another command who was selected. The potential for unfair treatment was magnified with respect to smaller commands, in which the 15 percent limitation meant that in absolute numbers, fewer officers in the smaller commands, as compared to larger commands, were eligible for selection. Thus, an officer at a smaller command who might rank well within the top 15 percent of Air Force colonels on a Service-wide basis, could be excluded from further consideration because of the limited number of selections available to that officer's command. In addition, officers in headquarters, commands, which were subject to a 10 percent limitation, were at a disadvantage compared to their counterparts in major commands, which could forward 15 percent of their eligibles.

The second tier—the Central Screening Board—considered all eligible officers forwarded by the Initial Screening Boards. The Central Screening Board not only considered the military records of eligible officers, it also had access to a "closed" evaluation form—an evaluation that was not made available to the officer being evaluated. Although the closed form was authorized by regulation, the Central Screening Boards were not so authorized.

The Central Screening Board was composed of general officers from the major commands, the Air Force Secretariat, the Air Staff, and Joint Agencies. The president was appointed by the Secretary of the Air Force, and the members were appointed by the Chief of Staff of the Air Force. The Central Screening Board was permitted to forward up to half of the eligibles it considered to the Final (statutory) Selection Board.

The third tier, the Final (statutory) Selection Board, had access to the officer's military records, the "priority lists" submitted by major commanders and other selected officials, and the closed form evaluations.

According to the OSD review, the statutory selection board "considered all eligibles forwarded by the CSB [Central Selection Board], plus a small number of other eligibles identified by the commanders who did not score through the CSB." The "other eligibles" consisted of officers who were not forwarded by the Central Selection Board but who were identified on "priority lists" submitted by the commanders of major commands and other selected officials after they were notified of the results of the Central Selection Board. The priority list system served as a supplement to the screening process, and enabled those permitted to submit priority lists to ensure that favored candidates were not eliminated from consideration by the screening process. These "priority lists" are discussed in more detail in section 3, below.

Statutory screening boards, which are authorized to narrow the field, have a less stringent selection standard than regular (i.e., final) selection boards. Regular selection boards may recommend only those "best qualified" for promotion. The statutory standard for screening boards—"exceptionally well qualified"—permits the final

board to select the "best qualified" from a wider field—those found by a screening board to be "exceptionally well qualified." The Air Force, which did not have a regulation governing its screening boards, did not use the "exceptionally well qualified" standard. This was improper, because officers who might have been forwarded under an "exceptionally well qualified" standard were eliminated under the percentage quotas assigned to the screening boards.

The problems caused by failure to use the statutory criteria were compounded because the screening boards operated with virtually no written guidance, other than the limitations on the percentage that could be forwarded. As a result, the Initial Screening Boards could operate without regulations requiring the safeguards applicable to statutory selection boards, such as: (1) the requirement that no officer may be a member of two successive boards for the consideration of officers of the same competitive category and grade; (2) the requirement that eligible officers be provided with at least 30 days notice of the convening of a board and provided an opportunity to send a written communication to the board; (3) the requirement for Secretarial guidance, including guidance to ensure appropriate consideration of joint duty assignments; (4) the prohibitions against reviewing authorities adding to or deleting from the recommendations of selection boards; and (5) limitations on communications to selection boards. As a result, officers who reasonably believed that their records were considered in accordance with such safeguards were eliminated by screening boards in which such safeguards were not required to be observed.

In summary, instead of an authorized screening process with centralized selection using a statutory standard, the Air Force used an unauthorized process in which 90 percent or more of the eligible officers were eliminated by decentralized boards using an improper standard without regulations requiring the statutory safeguards applicable to regular selection boards.

### 3. Improper communication of "priority lists" to selection boards

The OSD review found that since the 1960's, the Air Force "allowed certain senior officers and civilian officials to provide to general officer promotion boards a list of eligible officers recommended for promotion. \* \* \* These \* \* \* Priority Lists \* \* \* were the personal choices for promotion of the officials who prepared the lists, and proposed for promotion a small subset of the eligible officers."

The OSD review observed that the "use of these lists was not addressed in regulation and was not common knowledge outside the general officer management community." According to the OSD review, "[e]ligible officers were not made aware of the priority list system."

Officials permitted to submit a priority list were allowed to designate no more than 4 percent of the eligible officers in their command. Priority lists consisted of a rank ordering of certain candidates by the commander. There was no narrative information. Thus, the list did not provide selection boards with any information about the military record of an officer. The information communicated by the list—the presence or absence of a name, and the relative order of names on the list—was significant, however, because the list communicated the views of the major commanders and other senior officials as to who should be selected.

As noted in the OSD review, use of such lists violated the 1989 amendments to DOD

Directive 1320.12, which generally prohibited "communications regarding particular officers" (subject to very limited exceptions). A March 6, 1991 Air Force memorandum, included as an enclosure to the OSD review, explained that the Deputy Chief of Staff for Personnel briefed the Secretary of the Air Force on the use of priority lists after the 1987 amendments to DOD Directive 1320.12. He did not brief the Secretary after the 1989 changes, which expressly prohibited communication of information such as priority lists to selection boards.

In addition to violating the 1989 changes to the DOD Directive, the use of priority lists compounded the problems noted in section 2, above, concerning the use of unauthorized screening procedures. The priority lists were prepared by the major commanders and other selected officials after they were notified of the results of the Central Screening Board. As a result, an officer who had not been selected by the Central Screening Board could nonetheless be considered by the final, statutory board if fortunate enough to be placed on a commander's priority list. Thus, even if the preselection process had been properly structured under 10 U.S.C. 619(c)(2) "to limit the officers to be considered by a selection board \* \* \* to those officers who are determined to be exceptionally well qualified for promotion," the statutory process would have been undermined by the use of priority lists to circumvent the statutory standard.

In summary, the use of priority lists improperly communicated the views of the senior leadership about particular officers to selection boards. In addition, the priority lists enabled the leadership to circumvent the preselection process. None of this was made known to eligible officers, who could reasonably believe that they were being considered for promotion on the basis of their official military records.

### 4. Improper communications between the Air Force leadership and selection board members

The OSD review noted that a board president had specific conversations with the Service Secretary and Chief of Staff during the 1989 brigadier general promotion board. According to the OSD review, these communications "did not comport with paragraph G.2. of DODD 1320.12 in that these communications were not in writing, were not provided to each board member, and were not made part of the board record."

The review also noted that, as a general practice, "prior to the signing of the board report by promotion board members, the results of general officer promotion boards were routinely provided to both the Chief of Staff and the Service Secretary." These oral reports not only created the opportunity for improper verbal communications of the views of the Air Force leadership in violation of DOD Directive 1320.12, but also were contrary to 10 U.S.C. 617(a), which requires the board to provide the Secretary with a "written report, signed by each member of the board."

In response to a follow-up question by the Committee, the Air Force described the following incident, which illustrates the problems created by improper communications during a board's proceedings. A board was convened to select 32 officers for promotion to major general out of 102 eligibles. The board conducted a trial run, followed by a discussion, and "an initial review and scoring of the candidates." The board then adjourned for the evening.

When the board president reviewed the results, he found that Brigadier General

"XYZ" was not among the top 32 in the order of merit, despite the fact that he had scored well in the trial run. According to the Air Force report, "[t]here had been some discussion of this officer's performance among some of the members after the trial run."

That evening, the board president had a "courtesy visit" with the Chief of Staff, during which he asked whether the Chief of Staff was satisfied with the performance of Brigadier General "XYZ" and whether the Chief of Staff agreed with the Vice chief's decision to place Brigadier General "XYZ" on the "priority list" that the Vice Chief had submitted to the selection board. The Chief of Staff noted his satisfaction with Brigadier General "XYZ's" performance and his agreement with the placement of Brigadier General "XYZ" on the Vice Chief's priority list.

The next day, the board president advised the board of his concern that there was an "anomaly or disconnect" in the scoring. He also advised the board that "the Chief agreed with the Vice Chief's placement of BG XYZ on the priority list."

The OSD review provides further details: "The Air Force informs us that prior to the convening of a promotion board, neither the CSAF [Chief of Staff of the Air Force] nor other senior officials conveyed their views about individual officers to [the Deputy Chief of Staff for Personnel]. In the course of working general officer assignments and related personnel matters with the senior staff, [the Deputy Chief of Staff for Personnel] became aware of how the senior staff regarded some officers. If asked for comment, [the Deputy Chief of Staff for Personnel] provided his assessment of how the officer was viewed by the CSAF or another senior officer. If he did not know enough to form an opinion, he declined to offer one." (emphasis added).

The March 6 Air Force memorandum observes that on one occasion, the Deputy Chief of Staff for Personnel "spoke to a full board from his own personal knowledge about an officer he believed had an integrity problem. He believed he had a personal responsibility to inform the board that the officer under consideration had lied to him and therefore lacked integrity." The OSD review notes that although the Deputy Chief of Staff for Personnel had advised the officer's supervisor of his concern, he had taken no action before or after the selection board to document this concern in an official record that would be properly before a selection board. The DOD letter also notes that the particular officer was not selected for promotion. The officer was not aware of, nor did he have an opportunity to rebut, this adverse information.

An additional difficulty is presented by the role of the Deputy Chief of Staff for Personnel in the "scoring" process. A statutory selection board determines which officers are selected through the assignment by board members of numerical scores to each eligible officer. Those who score highest, up to the number of eligibles the board is authorized to recommend, are selected. In the Air Force, the Deputy Chief of Staff for Personnel assisted the board in the conduct of "trial scores". The purpose was to promote discussion about the attributes that would make an officer worthy of selection. The "trial" scoring involved use of selected records of eligible officers, not hypothetical candidates. The discussion that followed involved consideration of the merits of an officer's records. The participation of the Deputy Chief of Staff for Personnel in these discussions constituted improper communication of the views of a senior officer about a

particular eligible candidate in violation of DOD Directive 1320.12.

According to the March 6, 1991 Air Force memorandum, the Deputy Chief of Staff for Personnel "had full access to all boards, and considered it part of his role as DCS/Personnel to be there." The memorandum notes that earlier in his career, as a board member, he had observed previous Deputy Chiefs of Staff for Personnel "in the [selection] board room" and believed that "this was expected of the DCS/Personnel as part of his job, and indeed, that it would have been noted and questioned by board members if he were not present for a board."

The OSD review did not address the issue of whether it was appropriate for the Deputy Chief of Staff for Personnel to personally provide administrative support to selection boards. Because he was viewed by other members of the board as a representative of the senior leadership, he should not have been placed in that position. Even if it had been proper for him to provide administrative support to the boards, it was essential that he perform such tasks in a manner consistent with applicable law and regulations. In communicating unfavorable information to the board about a specific officer, he acted contrary to the position of trust which had provided him with access to the board's deliberations.

#### 5. Improper communications by board members during board proceedings

The March 6, 1991 Air Force memorandum, summarizing information provided by the Deputy Chief of Staff for Personnel, noted that "[b]oard presidents from time to time have contacted officials outside the board structure concerning an eligible officer." In one case, "a board president called a CINC to clarify the ranking of an eligible officer on the CINC's PL [priority list]." In another instance, "contact was made with a commander to ascertain the meaning of remarks on a closed form" (i.e., the evaluation form that was not provided to the eligible officer).

The OSD review notes:

[T]he Air Force conducted general officer boards in a manner that afforded the board members—who were all general officers—a significant degree of autonomy. Although the board recorders and support personnel limited access to the boardroom area and attempted to monitor the use of the telephones in the board room area, the board members had the opportunity to initiate and receive communications about any subject including eligible officers.

In the absence of a regulation limiting communications, there was no express limitation on the manner in which board members, exercising their "autonomy," could communicate with outside officials during board deliberations. This created the opportunity for violations of the prohibitions against such communications.

#### 6. Improper increase in the number of officers authorized to be selected for promotion

DOD Directive 1320.12 provides that after a board is convened, the Service Secretary may not increase the number of officers authorized to be selected without the written approval of the Secretary of Defense. The purpose of this provision is to prevent a recurrence of the action taken with respect to the 1987 Marine Corps major general board, when the number of authorized selections was increased, after the board had made its initial decisions, to facilitate the selection of a candidate who was not initially selected by the board.

The OSD review determined that in 1988, after a board convened, the Secretary of the

Air Force authorized an increase in the number of selections without the approval of the Secretary of Defense. According to the March 6, 1991 Air Force memorandum, this occurred when the Secretary and Chief of Staff were briefed on the results of a board, before the board adjourned, by the President of the board and the Deputy Chief of Staff for Personnel. The briefing took place before the board itself was informed of the order of merit that resulted from the scores they gave the candidates. During the briefing, the leadership was informed that a particular officer was placed below the cutoff point during rescoring procedures used to break a tie for the last remaining position to be selected. The "cutoff point" is the position on the order of merit list that separates those officers selected for promotion (above the cutoff point) from those officers who are not selected (below the cutoff point).

After hearing the briefing, the Chief of Staff suggested, and the Secretary agreed, to increase the number of eligible selections in order to include the officer who otherwise would not have been selected. According to the Air Force memorandum, the Deputy Chief of Staff for Personnel was not aware that such an action was impermissible without approval by the Secretary of Defense, and no one on his staff raised an objection. Although this was in clear violation of the changes in DOD Directive 1320.12 issued in 1987 to prevent manipulation of selection board results by the leadership, the change was approved by the Air Force leadership and the officer was selected and promoted.

#### 7. Manipulation of the scoring process

The Air Force general officer promotion process used a scoring system to rank in order the candidates under consideration. When there was not a clear break point at the selection cut off line (i.e., between those who would be selected and those who would not be selected), the Air Force used a procedure involving repetitive rescoring of those in the group just above and below the cut off line. The OSD review documented the manner in which this process could be manipulated to favor a particular officer. As noted above in the context of improper discussions between the leadership and board members, there was one incident in which a particular officer was scored below the group eligible for additional scoring. In that instance, the board President "expanded" the size of the group eligible for additional scoring, which resulted in an additional opportunity for that officer to be considered. That officer, who would not have been selected had the normal scoring process been followed, received a score upon rescoring that improved his position relative to other eligible officers, resulting in his selection.

The improvement in that officer's relative position upon rescoring necessarily resulted in a lowering of another officer's relative position. Since the board was given a fixed number of selections, manipulation of the scoring process not only resulted in the selection of an officer who would not have been selected under normal procedures, it also resulted in the nonselection of an officer who would have been selected had regular procedures been followed.

Such manipulated rescoring undermines the integrity of the promotion process because it provides discretion for the board's results to be altered to the advantage of a particular officer not initially selected and to the disadvantage of an officer initially selected. The Air Force has subsequently eliminated any rescoring that is not needed to break a tie at the cutoff point.

#### 8. Selection of field grade officers

The OSD review did not find similar systemic problems with respect to selection for grades O-6 and below:

The review determined that the existence of governing regulations, the training and use of full-time recorders, and control of access to board areas made the field grade process less vulnerable to "ad hoc" action and inappropriate influences than was the case in general officer promotion boards.

The Committee notes that none of the information provided by OSD or the Air Force documents any incidents of inappropriate communications to a field grade selection board. The Committee also notes, however, that the OSD review was designed to identify systemic problems and involved the interview of only a handful of board members and support personnel. As a result, it did not serve as a comprehensive review of selection boards that have met since the 1987 amendments were issued to DOD Directive 1320.12. The continuing failure of the Air Force to implement the prohibitions on communications in its field grade regulation means that the Air Force continues to be unnecessarily vulnerable to violations in individual cases.

#### 9. Failure of the Air Force to undertake timely review and corrective action

In response to the Committee's questions in the summer of 1990 about a specific selection board, the Air Force noted on August 3, 1990 that adverse information concerning two officers was provided to the President of the board but not to the other members of the board. The response, however, did not reflect that this procedure was in violation of the requirement in DOD Directive 1320.12 to provide such information to all board members. Instead, the response implied that the Secretary acted under statutory authority:

Under Section 615(a) of Title 10 [of] the United States Code[,] the Secretaries of the Military Departments are responsible for determining the information to be provided to promotion selection boards and for establishing the procedures by which the boards are provided the information. This would include policies concerning information on providing potentially adverse information to selection boards about individuals considered for promotion.

This response fails to take into account the Air Force's own 1987 review of DOD Directive 1320.12, which concluded that the amended Directive established mandatory procedural requirements for the conduct of selection boards.

In response to the Committee's specific question as to the regulatory basis for providing a document to the board President that was not made available to each member of the board, the Air Force letter asserted that the Secretary had statutory authority for his action:

In performing his statutory responsibilities under Section 615(a) of Title 10 the Secretary decided to show the material to the President of the Board and allow the President an input as to whether the information should or should not be provided to the members of the board.

This response fails to note that while the Secretary has general statutory authority to provide information to selection boards, he has no authority to disregard limitations established by his superior, the Secretary of Defense. Moreover, it is inconsistent with the Air Force's own 1987 review of the DOD Directive, which noted that it would be improper for the board President to screen adverse information for purposes of deciding what information should be provided to the board.

On February 7, 1990, the Air Force provided a report to the Secretary of Defense on matters related to the Air Force's selection board problems. The Air Force acknowledged that the Service had used a variety of unauthorized practices, such as nonregulatory preselection boards, briefings for the senior leadership before boards adjourned, improper access to the selection board by the Deputy Chief of Staff for Personnel while the board was in session, and submission to boards of priority lists from certain commanders. The Air Force acknowledged that these practices were inconsistent with the Defense Officer Personnel Management Act and the 1987 and 1989 amendments to DOD Directive 1320.12, but attempted to deflect criticism from the Air Force by stating:

The Air Force, like the other Services, gave insufficient recognition to these changes and did not issue the implementing regulations required by DOD Directive 1320.12; until recently DOD took no steps to ensure that such regulations were issued. (emphasis added).

Subsequently, the Committee asked the Department of Defense whether the systemic deficiencies in the Air Force selection board system were present in the systems managed by any other Military Departments. DOD advised the Committee on June 19, 1991 that the OSD review had not encountered the problems exhibited by the Air Force in any of the other Services, and that the review "did not find systemic deficiencies in the implementation of DODD 1320.12 by other Services."

An additional problem with the Air Force response is the implication that the Air Force problems were somehow excused because "DOD took no steps to ensure that such regulations were issued." The Department of Defense necessarily and properly operates on the premise that orders will be obeyed. While OSD always retains ultimate responsibility for the performance of the mission, and should institute appropriate oversight procedures to monitor the performance of subordinate organizations, it is inappropriate for a Military Department to imply that OSD is responsible for the Military Department's failings when the Military Department has been given clear instructions to implement an important administrative matter.

In material provided to the Secretary of Defense on March 6, 1991, the Air Force provided the following description of the Air Force's reaction to the changes proposed in the 1987 amendments to DOD Directive 1320.12:

[The Deputy Chief of Staff for Personnel] recalls that when DOD Directive 1320.12 was changed in 1987, he believed it was intended to correct problems that the Navy had experienced with its promotion boards, and he did not believe that any of those problems existed with Air Force boards. He did not believe that any Air Force Secretary or Chief of Staff had ever interfered with the selection process or that they ever would. He and his staff disagreed with the general officer provisions of DODD 1320.12 circulated in May 1987 on the basis that there was no need for them. In the Air Force's view, the system had worked effectively and fairly for over twenty years.

This explanation, however, is incomplete. As noted in Part II of this report, the Air Force actively participated in the development of DOD Directive 1320.12, opposed inclusion of general officers, reviewed the Directive in detail after it was issued, and nonetheless failed to issue appropriate implementing regulations.

After the OSD review documented the numerous deficiencies in Air Force practice, the Air Force provided additional views to the Committee. In a letter dated April 9, 1991, the Air Force acknowledged the failure to issue implementing regulations, but provided the following explanation:

The Air Force did not issue the required implementing regulations, relying in part on the erroneous assumption that an expanded 1987 Secretarial Memorandum of Instruction to the Board would be sufficient. The sensitive 'close-hold' aura that had traditionally surrounded general officer matters seems to have allowed the incorrect view to develop that regulations spelling out procedures were unnecessary.

The implication is that the Air Force was in technical noncompliance by not issuing a regulation, but that there was coverage in the "expanded" Secretarial Memorandum of Instruction. This response was incomplete. The Secretarial Memorandum of Instruction referred to the provisions of the DOD Directive concerning the duties of the board President, the general requirement for board members to act without prejudice, and the responsibility to report misconduct; but it made no reference whatsoever to the central provisions of the 1987 amendments—the restrictions on communications to the board concerning particular officers.

As noted above, the Air Force—for more than three years—failed to implement the 1987 amendments to the DOD Directive designed to address the potential for abuses in the promotion selection process. It has still not issued an implementing instruction for field grade promotions. These failures were harmful to the Air Force in general and to the officers eligible for promotion in particular. Thousands of officers were improperly excluded from consideration by statutory selection boards through use of an unauthorized selection process. Other officers were unfairly disadvantaged because they were not included on unauthorized "priority lists" used to communicate the preferences of selected leaders to promotion boards. The process was particularly unfair to those officers who—unbeknownst to them—were the object of particular communications or victims of manipulation of the scoring process.

In a large organization, such as the Air Force, there will be occasional failures to properly implement laws and regulations. The test of an organization's effectiveness is its willingness to promptly recognize such failures, take corrective action, and ensure that there is a thorough assessment of accountability and responsibility for the failures. In this case, the Air Force compounded the deficiencies in the promotion process by the failure to take timely action when the problems were brought to the attention of the civilian leadership.

#### IV. SUMMARY OF FINDINGS

The DOD review identified systemic deficiencies in the Air Force selection process. These deficiencies included the following:

(1) Failure to issue implementing regulations required by applicable statutes and Department of Defense Directives to ensure the fair operation of the selection board process.

(2) Use of a preselection process that improperly excluded 90 percent or more of the eligible officers from consideration by statutory selection boards.

(3) Improper communication to selection boards of "priority lists" prepared by senior officers.

(4) Improper communications between the Air Force leadership and selection board members.

In addition, the DOD review identified specific instances in which the following deficiencies occurred:

(1) Improper communications by board members with outside personnel during board proceedings.

(2) Improper increase in the number of officers authorized to be selected for promotion.

(3) Manipulation of the scoring process used by selection boards to determine which officers would be recommended for promotion.

#### V. OBSERVATIONS

##### *The integrity of the selection board process*

The integrity and fairness of the selection board process traditionally have been major concerns of the Committee on Armed Services. The Committee has acted through legislation, review of nominations, and oversight to ensure that the procedures used for selection boards are fair to the officer corps and are designed and conducted to select the best qualified officers for promotion.

The relationship between the integrity of the selection process and the integrity of the officer corps was underscored during recent Committee hearings. General Gordon R. Sullivan, Chief of Staff of the Army, noted that:

There is a direct link between the integrity of the selection board process and the integrity of our officer corps. The link lies in the confidence our officer corps has in the objectivity and professional ethic of the board. Our selections must be fair, impartial, and based upon demonstrated potential instead of subjective criteria, and they must be seen as such by our officer corps.

General Carl E. Mundy, Jr., Commandant of the Marine Corps, similarly observed that:

Integrity is the basis for the special trust and confidence reposed in the officer corps. \*\*\* Any breach of integrity in the selection process jeopardizes this special trust and confidence.

##### *The Air Force process for selection of general officers*

The Air Force used a promotion selection system that did not properly implement the statutory and regulatory standards and procedures established to ensure the integrity of the promotion selection process.

The starting point was an unauthorized preselection process in which 90 percent or more of the eligible officers were improperly excluded from consideration by the statutory selection boards. The preselection process employed an improper standard, precluded officers from competing against their counterparts on a Service-wide basis, failed to provide regulatory guidance incorporating the safeguards applicable to statutory boards, provided major commanders and other senior officials with the means to circumvent the process through use of priority lists, and operated without the knowledge of the officers under consideration.

The 10 percent who were considered by statutory boards were considered under procedures involving unauthorized use of "priority lists" to improperly communicate the choices of selected leaders to the statutory boards. The procedures were further tainted by incidents involving improper communications to the boards by the Air Force leadership, unauthorized increase in the number of officers selected for promotion, and manipulation of the scoring process.

The process provided the commanders of major commands and other selected officers with multiple opportunities to directly communicate their preferences about specific individuals to selection boards. Rather than relying on the official records and evalua-

tions of eligible officers, the Air Force used a system in which a commander of a major command could convene an Initial Screening Board at the command level, circumvent the screening board process through submission of a priority list, and signal specific preferences to the statutory board by the relative placement of officers on a priority list. Within the board, preferences could be further communicated through discussion with the Deputy Chief of Staff for Personnel about the views of the senior leadership, direct communications from board members to persons outside the board, and personal discussion between the board President and the Air Force leadership. The system was further subject to compromise through the addition of names after the board had made its initial selection and through the use of "rescoring" to include officers who otherwise would not have been selected and to exclude officers who had been selected.

These problems were compounded by the failure of the Air Force to make these procedures known to eligible officers. Thus, officers who reasonably believed they were reviewed under a statutory process were, instead, reviewed by a separate process known only to insiders.

#### Legislative action

In response to the problem identified as a result of the Committee's inquiries and the OSD review, the Committee initiated legislation to better ensure the integrity of the promotion selection process, which is set forth in section 504 of the National Defense Authorization Act for Fiscal Years 1992 and 1993 (Public Law 102-190). The legislation: (1) requires the Secretary of Defense to prescribe uniform regulations governing information furnished to selection boards; (2) provides that any communication to a selection board, including any member of the board, must be in writing, furnished to all board members, and made a part of the selection board's record; (3) ensures that the information provides to boards about an officer consists only of material from the officer's official military personnel file, information provided to the board by the officer concerned, or other substantiated, relevant information, identified and forwarded under uniform procedures established by the Secretary of Defense that could reasonably and materially affect the deliberations of the selection board; (4) ensures that eligible officers receive notice of and an opportunity to respond to the information about them that will be considered by the board; (5) restricts disclosure of the board's results to anyone outside the board until the members have completed and signed their final report; (6) prohibits improper influence on the board; (7) precludes use of a preselection process except under carefully limited procedures; and (8) provides eligible officers with notice of and an opportunity to respond to any information that is transmitted by a Service Secretary as part of a recommendation that an officer be removed from a selection board list.

#### Administrative action

As a result of the review initiated by the committee, the Air Force has issued a regulation governing general officer selection boards. The Air Force no longer uses a preselection process for promotion to brigadier, general, and has eliminated the use of priority lists. It has also eliminated the "closed form" evaluation process, thereby ensuring that eligible officers have an opportunity to review and comment on information about them that will be provided to selection boards.

In addition, the Department of Defense has revised DOD Directive 1320.12 "Defense Officer Personnel Program" to implement the reforms mandated by section 504 of the National Defense Authorization Act of Fiscal Years 1992 and 1993.

#### JOINT STATEMENT BY SENATORS SAM NUNN AND JOHN WARNER ON THE CONDUCT OF PROCEEDINGS FOR THE SELECTION OF OFFICERS FOR PROMOTION IN THE U.S. AIR FORCE

The fair and impartial conduct of the selection process for promotion of officers in the armed forces has been a matter of great concern to the Armed Services Committee. In 1987, the committee conducted a detailed review of problems associated with the 1987 Marine Corps Major General Selection Board, and received assurances from Secretary Weinberger that regulatory guidance had been issued to preclude a recurrence of the actions that undermined the fairness of that board.

Subsequently, during the Committee's review of certain Air Force nominations during the 101st Congress, the Committee received information which indicated that the Air Force had not implemented the regulatory guidance directed by Secretary Weinberger. Detailed reviews of this information by the Department of Defense and the Committee revealed systemic deficiencies in the Air Force selection process. These deficiencies are described in a Report which the Committee has filed with the Senate.

During the period in which the Committee considered the deficiencies in the Air Force promotion process reported by the Department of Defense, the Committee also considered the nomination of then Lieutenant General Thomas J. Hickey, U.S. Air Force, to be retired in the grade of lieutenant general. General Hickey had a distinguished record in combat and in a variety of positions in the Air Force. He served as Deputy Chief of Staff for Personnel at a time when the Air Force failed to implement a number of key directives of vital importance to the fairness and integrity of the promotion selection process.

In considering General Hickey's nomination, the Committee took into account not only his record of service, but also the fact that he did not alone bear responsibility for the defects in the promotion selection process. Other military and civilian officials also failed to ensure that the process was in compliance with laws and regulations. However, the Committee determined that the Deputy Chief of Staff for Personnel—as a three-star officer serving in a position of importance and responsibility—had a vital responsibility to ensure that the promotion process was conducted in accordance with applicable laws and regulations. The serious deficiencies described in the committee's report show that this vital responsibility was not adequately executed. Therefore, the Committee voted not to approve his retirement in the grade of lieutenant general.

We know that General Hickey, his family, and his friends will be extremely disappointed with the outcome of the committee's action. We wish the committee could have acted otherwise and approved General Hickey for confirmation as a lieutenant general on the retired list. However, the Armed Services Committee and the Senate have a responsibility to require that officials we confirm to positions of importance and responsibility are accountable for the high trust we place in them. We owe such responsibility to our men and women in uniform whose careers and lives are affected by the actions of such individuals.●

#### TRIBUTE TO CONGRESSMAN RAY MCGRATH

● Mr. D'AMATO. Mr. President, As we draw close to the completion of this session, I would like to take a few moments to express my gratitude to a New York colleague from the other body, who is retiring this year. Over nearly three decades, Congressman RAY MCGRATH and I have shared a commitment to public service from our humble beginnings as summer employees of the town of Hempstead to our respective careers in Washington.

At the town level, we spent thousands of hours trying to improve essential government services. In Albany, we fought for a fair share of State revenue for schools, highways, and social services. In Congress, we continue to this day in our efforts to protect New York from inequitable Federal tax policies and unfair competition from foreign manufacturers. As fellow Republicans, we have also weathered countless political storms.

My colleagues, I think that you all recognize the special friendships that boost our spirits when we suffer a personal loss, political cheap shot, or legislative defeat. RAY MCGRATH has been like a brother to me at those times. He has never backed off in a struggle. On a personal level, RAY's oldest son and I share the same birthday, and we share many happy memories of family occasions.

I know that I can speak for my constituents on Long Island and throughout our State when I thank RAY for his service as a member of the House Ways and Means Committee. Whether he was fighting for preservation of the State and local tax deduction or for a single taxpayer, RAY jumped into the fray with both feet. The people of New York's 5th District have lost a tireless and caring advocate.

Again I deeply value RAY's friendship and support over the years. I wish RAY, his lovely wife Sheri, and his fine sons, Tim, Tony, and Peter well in the years ahead.●

#### OXAPROZIN

● Mr. SIMON. Mr. President, I would like to extend my appreciation to my esteemed colleague and friend from Arizona for assurances regarding legislation, likely to be introduced next year, that would reinstate a patent on Oxaprozin, an antiarthritic drug manufactured by Searle in Illinois. Specifically, my colleague has agreed to hold a hearing on this issue during the 103d session.

As my colleague knows, the House and Senate have spent much time considering a patent extension bill for a similar drug, called Ansaid. The House also examined another drug from the same class, called Lodine. The rationale for these two extensions has focused on particular circumstances that

occurred at FDA delaying the market approval for the drugs. Since Oxaprozin falls within the same category of anti-arthritis drugs as Ansaad and Lodine, and since it has been subject to similar—if not longer—delays, I believe Searle's product should receive the same treatment that they do.

I fully understand that my colleague from Arizona has made no commitment about whether a bill reinstating and extending a patent on Oxaprozin would pass, or even whether he would support such a bill. Rather, he has agreed to hold a hearing on the merits of the legislation.

Mr. DECONCINI. That is correct. While I offer no opinion at the present time on the merits of a private patent extension for Oxaprozin, I understand the Senator's concerns and would be happy to honor his request to conduct a hearing on Oxaprozin, should legislation be introduced.

Mr. SIMON. Thank you, I appreciate my colleague's cooperation and look forward to discussing this with him next year.●

#### S. 1696, THE MONTANA NATIONAL FOREST MANAGEMENT ACT OF 1992

● Mr. CRAIG. Mr. President, I have raised an objection to having the Montana wilderness bill brought up for consideration today because I have some serious concerns about certain provisions contained in the bill. It is not my intent to meddle in the affairs of other Senators in matters related to their State. However, the Montana wilderness bill contains provisions which will have a very direct impact on my State of Idaho.

I have always believed the congressional delegation from a State should decide the areas and number of acres to be designated as wilderness in that State. I strongly hold this belief because I do not want other Members of Congress telling Idaho how to resolve any wilderness allocation for our State.

There are only two States remaining that have not passed statewide wilderness bills to resolve RARE II recommendations. These States are Idaho and Montana. As a result my legislative decisions that are made for Montana, there will be a direct and lasting impact on Idaho. It is for this reason that I am concerned with this bill, and specifically with four of its provisions.

The Senate approved updated release language for the roadless areas not being designated as wilderness in this bill. The other body substantially weakened the Senate language. Now the senior Senator from Montana is proposing a substitute bill with language that differs from the previously passed language. This substitute bill has never been evaluated through a hearing by the appropriate committee.

On first blush, it appears this language is similar to the House language, but it is impossible to know if the House will accept or act on this amendment. It appears that the Baucus proposal is entirely different from the compromise bill that was worked out between the two Montana Senators and passed by this body last March. This release language is completely unacceptable to me, and cannot be allowed to become the precedent that would face Idaho in the future.

My second area of concern is the water rights language. The Senate has taken the position in previous wilderness bills that the particular water rights language for a State is the decision of the Senators from that State. In recent years, this body had allowed the Senators from Arizona, Nevada, Colorado and Montana to decide the water language that is acceptable to them. When this language happened to be what the other body wanted they approved it. When the language was not acceptable to the House, as is the case Montana and Colorado, the House either killed the bill or amended it so it was unrecognizable. Now at this late hour the Senior Senator from Montana is proposing completely new language. As is the case with the release language, this all important water language has not had a hearing in the Senate. Neither has it been reviewed by the western water user interests that would be affected.

Third, I am very concerned what effect the proposed Montana Ecosystem and Economics Study would have on Idaho and other Western States. Although the study being proposed by Senator BAUCUS apparently is to stop at the Montana border, I do not believe that is possible, given the type of study that is contemplated. As proponents of ecosystem management often point out, ecosystems are not defined by political boundaries. For instance, neither bears nor caribou confine their roaming within a given State's boundaries. Water flows freely from Montana to Idaho. Thus by its very nature, this study would include Idaho. I do not believe a study with such potential scope is proper in a state wilderness bill. Again, this issue has had no hearing in the Senate, nor have Idahoans had an opportunity to consider its effect on them.

It is my hope that such a study is not a thinly veiled attempt to rewrite the National Forest Management Act, nor to launch on a new round of nationwide wilderness designations. Existing land and resource management plans that were completed by the Forest Service must have an opportunity to work. The time has come to manage our Federal lands, not launch into an endless round of new studies. The Senate need to give any new proposals to allocate land uses careful consideration. This has not happened to this proposal.

My final concern is the designation given to one of areas. The proposal of the senior Senator from Montana would designate components of "The Great Divide Wilderness." I do not believe there is currently any wilderness with this name. However, it appears this may be an effort to create new wilderness areas along the continental divide that could stretch from Canada to Mexico. Although I would not object to Montana designating wilderness areas within their State, I do have a tremendous concern when areas are designated that may have a direct effect on areas in Idaho.

These are matters that simply cannot be raised and adequately addressed on the last day of a session. I have no choice but object.●

#### THE JUSTICE IMPROVEMENTS ACT OF 1992

● Mr. BIDEN. Mr. President, I am pleased that last night the Senate took action and passed the Justice Improvements Act of 1992, which I sponsored along with my distinguished colleague, Senator THURMOND of South Carolina. Each of its provisions will assist our criminal justice system. Here, I will comment briefly on just three of them.

First, the act includes the National Child Protection Act of 1991.

In our modern society, parents who work must have access to quality child care for their young children in facilities that are managed and staffed by individuals who have the best interests of children uppermost in their minds. Fortunately, the vast majority of caregivers in child care facilities throughout the country do genuinely care for the children in their charge.

Regrettably, however, abuses of children by employees of child care providers do occur. Some such incidents of child abuse by the operators of child care facilities have been widely publicized, and have created great anxiety in the minds of many parents.

What is more, the United States has as yet established no national mechanisms for background checks for prospective employees, to ensure that those hired in child care facilities do not have criminal records of child abuse or other serious crimes before they are hired.

The National Child Protection Act of 1991 authorizes the Attorney General to establish a national criminal background check system, so that child care managers will be able to access State and Federal information on whether or not prospective employees have criminal records of child abuse or other serious crimes. It provides the means to deal with both the reality of abuse and, by providing some assurances to parents, with the anxiety parents face when trying to locate quality child care for their children.

This legislation could not have seen its way to enactment without the dedi-

cation, commitment, and perseverance of Oprah Winfrey, who has made the reduction of child abuse in our society one of her highest priorities. She conceived the idea for the legislation, assisted in its drafting, testified on its behalf, and publicized the issue so that the Nation's attention might be trained on the problem.

The children and the parents of America owe a debt of gratitude to Ms. Winfrey for her commitment to this issue, and for her giving of her time, talent, and resources to it. It has been my personal pleasure to work with her on this legislation, and I look forward to working with her again in the future, as we search for other appropriate means to reduce the incidence of child abuse in our society.

Second, the Justice Improvements Act also includes important new help to stop credit card fraud. The Consumer Protection Against Credit Card Fraud Act of 1991 is the first law aimed at punishing laundering of credit card slips.

The losses from credit card fraud are enormous. According to an estimate of the Federal Trade Commission, telemarketing fraud—much of which involves credit cards—produced losses in 1989 in excess of \$1 billion.

Today, we are facing a new generation of credit card fraud. The phony solicitation of credit cards over the phone and the laundering of credit card receipts have replaced the counterfeiting and alteration outlawed in the first credit card fraud law enacted in 1984. By clarifying and expanding existing law so that it covers telemarketing fraud and the laundering of credit card receipts, we can assist prosecutors in shutting down these new scams.

Specifically, this bill amends existing law to cover three new offenses not covered by current law. First, it outlaws solicitations for the purchase of a credit card without the authorization of the credit card company. Second, it prohibits the fraudulent taking of payment via credit card for goods or services that are either never delivered or far inferior to those that were promised. Third, it criminalizes the laundering of credit card receipts.

Thousands of consumers are victimized by credit card fraud every year. Frequently, the perpetrators of credit card fraud prey on the elderly and their fears of insufficient savings. Sometimes, the individuals are already struggling with a poor credit history or no credit history at all.

The Consumer Protection Against Credit Card Fraud Act of 1991 is a victory for everyone who loses by credit card fraud—the banks, the credit card companies, and, most importantly, the consumer. By updating current law, we ensure that prosecutors have the tools that they need to help the victims of these fraudulent schemes.

Third, the Justice Improvements Act includes an important provision requir-

ing that notice be given when violent criminals are released from prison.

Increasingly, State and local law enforcement officers are faced with challenges that they are ill-equipped to address, simply because they lack the right information. Recently, for example, Mr. James Allen Red Dog was paroled to my home State of Delaware, after serving a dozen years in prison for armed robbery. Local authorities were never informed, however, that Mr. Red Dog was under Federal supervision. Not long after, Mr. Red Dog was arrested in Delaware for murder, rape, and kidnapping.

This bill would ensure that State and local law enforcement officials will be informed should a violent criminal be paroled to their State by Federal authorities. The bill requires the U.S. Bureau of Prisons to notify the chief law enforcement officer of the State and local jurisdiction that a prisoner on parole, probation, or supervised release will be moving to their area. This new requirement will provide local law enforcement with important information to help them combat crime: When a convicted Federal felon is released onto the streets, the State and local police will now know about it.●

#### RETIREMENT OF THE HONORABLE FRANK HORTON

● Mr. D'AMATO. Mr. President, I rise to salute a good friend of mine and a great Congressman who has decided to end his 30-year career in the House of Representatives with the adjournment of the 102d Congress. FRANK HORTON, chairman of the Bipartisan New York Congressional Delegation, ranking minority member of the House Government Operations Committee, has ably served the citizens of upstate New York and this country for three decades.

For 30 years FRANK HORTON cared. He cared about issues of Government management especially, and that has been the focus of his legislative work in the House. The Inspectors General Act, the Paperwork Reduction Act, the Office of Federal Procurement Policy Act, the Competition in Contracting Act, and the Chief Financial Officers Act all bear his mark.

He cared about the State of New York. I know. I worked with him on many things. Together, we created New York's only national forest—the Finger Lakes National Forest. We pushed through Congress legislation to create a national park dedicated to women's rights in Seneca Falls, which is the birthplace of women's rights. We worked on important navigational projects on Lake Ontario. His skill as a legislator in the House I know well.

Our delegation in Congress, disagreeing from time to time on diverse issues, was united on one thing—its unanimous admiration for FRANK HOR-

TON and his selection as chairman of the bipartisan delegation, though a Republican in a Democratic controlled delegation. He cared about the individual, the older American who ran up against an unresponsive Federal bureaucracy when a Social Security check was late or did not arrive. He cared about the small businessman, the farmer, the teacher. In fact, it was for the people, his people—the citizens of New York's 29th Congressional District—that he cared most deeply.

And he represented them as he represented all of the interests involved with his work—professionally and with the highest degree of integrity and character. FRANK HORTON, I salute you and the people of New York salute you. Congratulations on a job well done and best wishes to you and your wife Nancy in your pursuit of new endeavors.●

#### HIGH-SPEED RAIL SHOULD PLAY A GREATER ROLE IN OUR NATIONAL TRANSPORTATION POLICY

● Mr. LAUTENBERG. Mr. President, as we move to adjourn, I would like to lay out some ideas for consideration by my colleagues for the next Congress, focusing on a key, but often neglected, area of transportation: High-speed rail. In doing so, my premise is simple. We need to do more to develop and promote high-speed rail in this country.

There are a host of compelling reasons to invest more in our transportation infrastructure. Infrastructure serves as a base for economic growth, with every dollar invested resulting in about two dollars in growth in gross domestic product. It is a major factor in our economic competitiveness. Compared to our major economic competitors, we are falling far behind, ranking 55th among developed countries in per capita infrastructure spending. Japan is investing about 23 times what we are, and Germany 15 times as much. That spending is an investment in their economic future. Our relative disinvestment shortchanges ours.

To revitalize our economy, we need to invest in our physical and human resources to a much greater extent than has been true for the past decade. Transportation is one of these areas. Within the field of transportation, we also need to reevaluate priorities, and act on a plan to make more efficient use of existing and future resources. Clearly, greater development and use of high-speed rail can play a major role in such a plan of action.

With a growing consensus on the economic importance of increased investment in our transportation infrastructure, I want to focus attention on the need for an improved high-speed rail network in this country.

As chairman of the Senate Transportation Appropriations Subcommittee, I spend considerable time and effort

looking at the country's transportation needs. I hear from citizens, State and local officials, chambers of commerce, and colleagues from just about every State. I've worked to provide a balance in the Federal transportation budget. Under the Reagan and Bush administrations, infrastructure investment has been totally inadequate. This partly explains our declining productivity.

Recently, we have taken some steps forward, including recent funding initiatives in high-speed rail. The fiscal year 1993 transportation appropriations bill, which has now been signed by the President, contains significant funding for passenger rail service. The conference report rejected the drastic cuts proposed by both the administration and the House, and retained the amounts that I worked to secure in the Senate.

The 1993 bill provides \$496 million for Amtrak operating and capital expenses, as opposed to the \$405 million proposed by the House, and the meager \$197 million requested by President Bush. Importantly, the bill that we sent to the President contains \$204.1 million for the Northeast corridor improvement project, to continue ongoing safety and communications upgrades throughout the corridor, as well as to advance the electrification of the New York to Boston corridor that I first secured funding for 3 years ago. Unfortunately, neither the House nor the administration would have provided one dime for this important project.

I am proud of the balance reflected in the funding for passenger rail. But, the question before us, as we look ahead to the 103d Congress and perhaps a new administration, is, what more can and should we be doing to promote and develop high speed rail in this country?

Few can dispute that our national rail system is inferior in scope and priority to those of other nations. The French TGV carries passengers at speeds approaching 200 miles per hour, and has become a model for the world. Throughout Europe and in Japan, passenger rail service is recognized as an integral part of a balanced transportation network, and receives funding accordingly.

France has invested about \$10 billion in its TGV system, and will invest an estimated \$35 billion in its expansion. Germany recently put \$5 billion into rehabilitating its existing rail lines, and will be spending \$20 billion to develop and implement high-speed intercity express service connecting major cities throughout the country. Overall, it is estimated that the European Community will spend approximately \$120 billion for the various high-speed rail systems under development. Excluding rail car acquisition, Japan has spent more than \$45 billion on its "Shinkansen" high-speed system.

Meanwhile, the Congress has had to fight each year just to hold off Reagan

and Bush administration attempts to eliminate Amtrak. There's been no receptivity at the White House for efforts to move ahead to modernize rail service or introduce new technology to increase our efficiency.

In a comparison with other major national rail systems in the country, it's clear that Amtrak is doing more with less, at least as far as money is concerned. In 1990, Amtrak had a system-wide revenue-to-cost ratio of 0.77. VIA, Canada's rail system, had a ratio of only 0.27; the French SNCF, 0.73; and DB in Germany, 0.62.

While Amtrak can be justifiably proud of its cost efficiency, it is a system that is far less than what it should be. It is a system that is far less than what the people and the businesses in our country deserve. At a time when we are working to improve air quality problems; when our roads are clogged; when delays at airports are unacceptably long; when the capacity of our air traffic control system is being taxed to its limits, and our economy is stagnant, we should move aggressively to make high-speed rail part of the solution to these problems.

However, Federal policy has been terribly skewed, away from rail and toward other modes, particularly the automobile and aviation. While those means of transportation are indispensable to our overall network, investment in new rail systems should be a priority as well.

The Reagan and Bush administrations have consistently proposed budgets that would have ended intercity passenger service in the United States. Since fiscal year 1980, congressional appropriations for Amtrak have exceeded administration requests by more than \$3.8 billion while staying within transportation budget limits. Clearly, if the Reagan and Bush administrations had had their way, Amtrak—the Nation's only intercity passenger rail network—would long ago have ceased to exist. That's wrongheaded. But, that's been the administration's plan. In testimony before my Transportation Appropriations Subcommittee, the Federal Railroad Administrator, the administration's top railroad official, said so.

In an April 19, 1990 hearing, I asked FRA Administrator Gilbert E. Carmichael about President Bush's consistent recommendation to eliminate support for rail passenger service. I asked him, "How would you run Amtrak without Federal support, beginning October 1? What would you do?"

His response was, "On zero budget? I would shut her down."

Mr. President, no bones about it. That was President Reagan's policy. And that's been President Bush's policy. They not only dug their heads in the sand about the importance of new, high technology rail systems to enhance our competitiveness. They would have shut down our national passenger

rail system completely. In stark contrast to President Bush's policies, Bill Clinton has put forward a plan for investing in our future that prominently includes enhanced rail service and technology. He knows the importance of investing in our transportation system if we are to regain our footing in the global economy. It's critical to our future.

The impact of eliminating passenger rail service would not only be felt in urban areas, but could bring our country to a halt. There are dozens of towns in rural areas whose only intercity public transportation is provided by Amtrak. Without it, they would be cut off from opportunities outside of their small communities. I remember my predecessor as chairman of the Transportation Appropriations Subcommittee, Mark Andrews of North Dakota, saying that, when the snow's blowing sideways, the trains are the only things that run. The importance of rail service to rural America is evident. So we are not just dealing with an urban problem. We are dealing with a national problem central to our future economic growth.

We need to maintain that service, and make progress in bringing high-speed rail to this country. The closest that we come to having a true high-speed rail system is in the Northeast corridor. Since 1976, we've invested about \$2.5 billion in the Northeast corridor improvement project, or NECIP. Critics in the administration may not consider that to have been a worthwhile expenditure, but let's look at what we've gotten from that investment. Clearly, the northeast corridor, even with an inadequate budget, plays a vital role in the regional and national transportation network. It shows that, given even moderate—that is to say, not truly high-speed—rail service, people will take the train, easing the burden on roads and airways and improving productivity.

Each year, about 11 million intercity passengers use the Corridor. Sixty-five million commuters depend on the Corridor to get to work every day. Over 40 percent of those traveling between New York and Washington on business use Amtrak. If there were no Amtrak service connecting New York and Washington, about 40 more shuttle flights, mostly in peak periods, would be required. There simply is not the capacity, either in the air or on the ground at the region's airports, to handle that sort of increase. If anything, the aviation system would benefit from a greater shift of passengers to the rails.

For years, growing concerns about congestion at Boston's Logan Airport have led to discussion of building another airport in the Boston area. Given environmental, noise, and financial concerns, it's very questionable that such an airport could be built. But, the real question is, should one be built?

Today, unlike New York and Washington, intercity rail service between New York and Boston is not really competitive with air shuttles. It now takes 4-5 hours by train. However, that scenario is changing.

Three years ago, in putting together the Senate transportation appropriations bill, I worked to come up with funding to begin the job of electrifying the Northeast corridor between New Haven, CT and Boston. This effort includes not just electrification, but also other track and station modifications, all of which will result in a trip of 3 hours or less by the end of the decade. With that service, rail will become a real, even a preferred, option for Boston-New York travelers. This improvement, which will cost less than \$1 billion in total, will help ease the burden on the region's aviation system, and help eliminate the need for another airport in Boston—an airport that would easily cost several billion dollars, if it proved feasible at all.

Mr. President, a truly balanced national transportation system must include high speed rail. To accomplish this goal, we need to revise national policy and funding priorities.

A basic premise of a national transportation policy should be efficiency. A sound policy should promote more efficient use of fuel, of existing infrastructure, and of time, all of which can make us more productive and competitive.

High-speed rail is a basic ingredient of an efficient, productive and competitive transportation policy. To identify and realize the benefits of high speed rail, we need to develop a national high-speed rail transportation plan—and implement that plan as quickly as possible. This should be a plan with the vision of the Interstate Highway System of the 1950's, and we should marshal our resources to develop it, just as we did with our highway system. This should be a plan that utilizes the latest technologies to achieve our national goals.

The contents of this plan should include, at a minimum:

A designation of priority corridors for which high speed rail could provide an efficient and effective transportation alternative;

An identification and commitment for the financing needed to acquire or preserve the necessary rights-of-way and to construct the rail, power and related facilities;

The financial incentives to challenge American business, in collaboration with others, to produce the most technologically advanced, high quality, durable rolling stock and infrastructure; and

A realistic, detailed plan for the long-term financing of operating deficits.

There is no mode of transportation that is unsubsidized. We have invested

billions of general taxpayer dollars into the air traffic control system that allows airlines to fly throughout the country. Study after study has shown that highway users don't pay the full costs that they impose on the Nation's roads. But, for some reasons, the Reagan and Bush administrations have continually focused on the relatively small subsidy that Amtrak receives. The reality is, like other modes, rail service in the United States, as is true internationally, requires operating assistance. In fact, Amtrak's rate of subsidy is considerably less than for major systems in Europe and Japan. As we have done for other modes, we should put into place a continuing, stable source of funding to ensure that high-speed rail service plays a part in a balanced national transportation system.

With regard to Federal investment, through the enactment of the Intermodal Surface Transportation Efficiency Act of 1991, or ISTEA, we took important steps in the direction of a balanced system. Transportation planners now have unprecedented flexibility in the use of traditionally highway-only moneys, and can now use them for either highways or transit. At my request, the Senate version of ISTEA included intercity passenger rail as an eligible use of funds. I will be working in the next Congress to expand on the advances made in ISTEA.

We clearly have to also look at expanded Federal funding. In this Congress, I joined efforts to break down the budgetary firewalls that have prevented us from making necessary investments in our future. Unfortunately, in spite of the pressing needs facing us at home, President Bush could not see his way clear to put America first. With the elimination of these barriers next year, there will be a tremendous opportunity to shift funds away from the bloated defense budget and to make investments in our future, which are so critically needed for a strong economy. We've shortchanged critical infrastructure needs, including transportation. As we review national priorities next year, I will be working hard to see that transportation is viewed as a priority and that we direct more funds to the maintenance and expansion of our passenger rail network.

Additionally, I believe that we should take a comprehensive look at other steps, such as the availability of tax-exempt bonds or incentives for capital investment, that the Federal Government could use to encourage the development of high-speed rail. Earlier this year, I voted against an amendment to raise the State tax exempt bond cap for a project in Texas which the State had not included in its bond plans. I did so not because I wanted to preclude such an option for financing, but because I believed that the measure provided a tax subsidy for one project in the absence of a national policy. I argued

then and now that we should look comprehensively at our policies for promoting high-speed rail, rather than deal piecemeal with specific projects. With a comprehensive review, we could better determine how to help not only needs in Texas, but other efforts to develop high-speed rail in our country. I look forward to this discussion in the next Congress and with the next President, whomever that may be.

How do we provide a balance between modes of transportation? To do that, we have to recognize the roles the various modes best play. The advent of commercial aviation linked distant locations in a way never before imagined, and opened up whole new areas of economic opportunity. Our aviation system allows people to get from the East Coast to the West Coast in a matter of hours. A businessperson can have a morning meeting in Chicago, and be in New York for a late lunch. That role—the closing of great distances—has made an enormous contribution to our economy.

Today, aircraft manufacturers are moving away from the old mainstays of the aircraft industry—small planes such as the Boeing 707 and 727 that carried passengers a relatively short distance, and toward the construction of larger, more efficient planes, to take people long distances. Our policies in airport and air traffic control investment should mirror those efforts. In fact, a chief executive of a major U.S. airline has told Congress that, given the condition of the airline industry, he'd just as soon get out of the short haul business.

For city pairs within 200-300 miles, high-speed rail would often provide the most efficient means of travel. Currently, Amtrak's metroliners travel at top speeds of 125 miles per hour. With new equipment to be tested early next year, Amtrak expects to show that speeds of about 150 miles per hour can be safely achieved. At speeds like that, we are talking about getting from downtown Washington to midtown Manhattan in 2½ hours or less. With that type of service, studies project a major shift in passengers from the air to the ground. That would free up congested airways and airports to more efficiently provide long-haul service.

We cannot and should not preclude choice in mode of transportation. I do not believe that even an aggressive policy of high-speed rail between close city pairs would eliminate the need for air shuttle service between such cities. Nor does a proaviation policy with regard to long-haul service eliminate the need for some sort of companion rail service. Today, Amtrak's cross-country trains are booked well in advance, even though one could fly in far less time. And, major investments in rail and aviation would not eliminate the critical need to maintain our system of interstate highways, which plays such

a vital role not only in the movement of people, but of commerce.

But, I believe that we should adopt a policy that actively promotes greater balance and more efficient use of resources. When the 103d Congress convenes next year, I will work to put this subject on the agenda, and to develop a national transportation policy that can move us forward.

#### DISTURBING NEWS FROM HUNGARY

• Mr. SIMON. Mr. President, many of us are acquainted with the charitable work done by George Soros, a New York businessman and philanthropist. He has established foundations in several East European countries, contributed greatly to the establishment of a new university in Czechoslovakia, and generally been an active and skillful advocate of economic and political reform in Eastern Europe.

Much of his effort has been focused on his native Hungary. Yet for all his efforts, some in the Hungarian Parliament have taken to attacking his foundation and Mr. Soros personally. The ugliness of anti-Semitism, sadly, is being used by those who seek to discredit George Soros. It is incredible after all these years, after the Holocaust, after centuries of intolerance, hate and scapegoating in Europe, that anti-Semitism and ethnic intolerance is still with us.

I commend the letter written by Mr. Soros—printed as an op-ed in the New York Times of October 5—to the Prime Minister of Hungary to my colleagues. It is sober reading. Our relations with the new democracies in Eastern Europe are very important, but it is clear to me that good relations will be based on internal tolerance and domestic civility inside each of the now-free nations of Eastern Europe.

I ask that the article from the New York Times by Mr. Soros be printed in the RECORD in full.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New York Times Oct. 5, 1992]

#### TERMITES ARE DEVOURING HUNGARY (By George Soros)

*Disturbed by recent events in Hungary, I recently wrote the following letter to Prime Minister Jozsef Antall:*

In recent months, a series of articles, published in several Hungarian newspapers, attacked me as well as the foundation I established in Hungary. Most of these articles appeared in a newspaper edited by the vice president of the ruling party, Hungarian Democratic Forum (H.D.F.). The authors are not private individuals, they are members of Parliament, and one of them is a vice president of the party. If these attacks were limited to personal insults and slander, I would not feel compelled to turn to you. My intentions and my actions have always been open to scrutiny. It is not the Government's role

to defend me. However, what we are dealing with here is more than mere insult.

Leading members of your party have accused me of nothing less than taking part in an international anti-Hungarian conspiracy whose origins can be traced to Israel and whose goal is to extinguish the Hungarian people's national spirit, making them susceptible to foreign domination. Other participants in this conspiracy are, according to them, Jews throughout the world, Hungarian Jews, capitalists, liberals and Communists, as well as "cosmopolitans" and Freemasons. To prove that these astonishing allegations were actually made, please allow me to cite from some of them.

In the July 9 edition of Hungarian Forum, the party weekly, Istvan Csurka [vice president of the Hungarian Democratic Forum and a well-known playwright] writes: "George Soros is toying with the idea of leaving [Hungary], but no one should be fooled by this—if Soros does in fact leave, it won't be because he was insulted by the anti-Semitic extreme right, but because official policy in Jerusalem has—perhaps—changed."

"Termites Are Devouring Our Nation—Reflections on the Soros Regime, the Soros Empire" is the title of an article by Gyula Zaccsek, an H.D.F. member of Parliament (Hungarian Forum, Sept. 3, 1992). Mr. Zaccsek's premise is that "the bouquet of terms—Communism, liberalism, cosmopolitan and anti-Semitism—is inescapable." He claims, moreover, that "in Hungary, the role played jointly by Communists and Jews in their pursuit of power is unquestionable."

Following this article, Mr. Zaccsek addressed an open letter to me, which clearly states that he considers Jews foreign elements in Hungary: "I understand and respect your pride in acknowledging your Jewishness," he writes, "though I do not understand what it means to be a 'Hungarian Jew,' just as I wouldn't understand what it would mean if someone claimed to be a Hungarian-German or a Hungarian-Vietnamese or a German-Spaniard. Unless, of course, he was referring to a bilingual dictionary!"

According to Mr. Zaccsek, "the change in political system [the demise of the Communist regime in 1989] began as a consciously planned, well-thought-out course of action—a self-engineered coup by cosmopolitans." In other words, the Communist leadership was cosmopolitan, the dissidents were cosmopolitans, and these cosmopolitan elements conspired to preserve each other's power. "The Soros Foundation was a vital tool and resource in laying the groundwork for this transition," Mr. Zaccsek asserts elsewhere.

The motivating force behind the Central European University that I established is explained by Mr. Zaccsek in the following manner: "Once again the time has come for all the people in the region to subscribe to uniform ideas. The Communist ideologues told us exactly the same thing." And "if this can not be implemented with two-week study courses, let's try it with a one-year program, and if even that doesn't work, let the tanks roll again."

Toward the end of his article, Gyula Zaccsek writes this about me: "Naturally, after all of this, it's not at all surprising that [Soros] is being expelled from Romania and Slovakia; perhaps he won't wait until the same happens to him in Hungary." His information is incorrect: I have been expelled from neither Romania nor Slovakia; there would be no legal basis for such action. It is true, however, that the nationalist press in both these countries has savagely attacked me as a Hungarian agent.

I can only regret that Mr. Zaccsek enthusiastically supports the Slovak and Romanian nationalists attacks against me and, through me, the attacks aimed at all Hungarians. But it is no accident that rabid nationalists and narrow-minded populists in all three countries consider me their enemy. My foundations seek to promote open societies while they, under the guise of nationalism, are interested in creating closed societies. In order for them to succeed, they need first and foremost an enemy against which they can then mobilize an entire nation, and if there isn't an enemy about, they must invent one.

This is an extremely dangerous process whose ultimate consequences we have already experienced in the Nazi era, and can once again witness in the former Yugoslavia. That is why I take these accusations very seriously, despite the fact that their manner and content are beneath contempt.

In Romania and Slovakia they revile me as a Hungarian agent, in Hungary as a cosmopolitan and a Jew. I accept all three labels—Hungarian, cosmopolitan, Jew—with pride, but I reject with every fiber of my being the ideology which attacks me for it.

I am aware that a representation of the Ministry of Culture and Education has, on one occasion, dissociated himself from these views. However, it seems that this was not sufficient, since the attacks have not ceased. I should like to know the official position of the ruling party, the Hungarian Democratic Forum, and that of the Hungarian Government. I need this clarification because my foundations have frequent contacts with Government agencies and officials. I would greatly appreciate it if you could give me reassuring answers to the following questions:

1. Do you find acceptable the statement that the expression "Hungarian Jewish" can be considered meaningful only when referring to a "bilingual dictionary," that is to say that if one is Jewish, one is alien to Hungarian nationality?

2. Do you find acceptable the statement by Istvan Csurka, the vice president of the Hungarian Democratic Forum, that Hungarian Jews and the Jews of the world participate in an international conspiracy against Hungary?

3. Do you find acceptable the statement that the Soros Foundation is participant in this conspiracy and its activities have been designed to preserve and promote the power of Communists and Jews in Hungary?

4. Do you find it acceptable that a member of your party and a member of Parliament suggests that I leave the country voluntarily rather than wait to be asked to leave?

I have never sought recognition for my philanthropic activities and I am not seeking such recognition now. I am prompted to write to you by my deep concern for the future of democracy and open society in Hungary. I regret having to burden you with my letter. As I consider these questions to be matters of public concern, I intend to make public both my letter and your reply.

New York, Sept. 14, 1992.

*In his reply, which I received on Sept. 30, the Prime Minister did not substantively address my questions but referred to previous public statements in which he had distanced himself from statements by Mr. Csurka.*

#### NATIONAL PRAYER BREAKFAST

• Mr. STEVENS. Mr. President, as this Congress draws to a close and I reflect back on the year, I have to say one of

the great highlights for me personally has been the fellowship I have enjoyed each Wednesday at the Senate's weekly prayer breakfast. I had the honor with Senator HOWELL HEFLIN of leading the group and of hosting the 40th annual National Prayer Breakfast here in Washington. With the help of Senator HEFLIN and the chairman of the House Prayer Breakfast, Congressman CHARLIE STENHOLM, we hosted 4,000 people from every walk of life, from every State in the Union, and from over 140 countries at that annual event.

We were honored to have with us President and Mrs. Bush, Vice President and Mrs. Quayle, Ratu Sir Kamisese Mara of Fiji, members of the Cabinet and Diplomatic Corps, as well as many of our friends and colleagues from both the House and the Senate. My good friends, Senator LARRY CRAIG and Congressman SONNY MONTGOMERY offered remarks from the Senate and House prayer groups, and Senator AL GORE read a passage from the New Testament.

We gave special recognition to representatives that came from prayer groups in our State legislatures from across the country. Senator JOSEPH PITTS from Pennsylvania was the most senior legislator who was able to join us for this special occasion, and he blessed us with a reading from the Old Testament.

From a prebreakfast prayer delivered by Ms. Shoshana Cardin to the reflections of my good friend, Maestro Mstislav Rostropovich, we were blessed with messages that gave us hope and inspired our faith. The music was downright heavenly from the touching performance of the Savoogna Eskimo Singers from my home State to the stunning performance of Ms. Cissy Houston to the beautiful voices of the West Point Choir.

Mr. President, as the request of the National Prayer Breakfast Committee, I request that the transcript of the proceedings from this year's National Prayer Breakfast be printed in the RECORD at the conclusion of my remarks. I would also like to express my deepest appreciation for the efforts of the Senate chaplain, Rev. Halverson, and Doug Coe in organizing the National Prayer Breakfast and in serving as the Senate's spiritual leaders as we seek God's guidance and pray for His wisdom. May the good Lord grant them both good health and long lives, so they can continue to guide the Senate as it seeks to do what is best for this great Nation.

The transcript follows:

PROCEEDINGS

SENATOR TED STEVENS: Let me welcome you to the 40th Annual National Prayer Breakfast. I am Ted Stevens, one of Alaska's Senators and Chairman of the Senate Prayer Breakfast.

Ms. Shoshana Cardin, Chairman of the National Conference on Soviet Jewry and the Conference of Presidents of Major Jewish Or-

ganizations, will offer our pre-breakfast prayer. Following Ms. Cardin, the West Point Choir will sing for us as you enjoy your breakfast. Again, I welcome you all.

MS. CARDIN: Thank you, Senator. Good morning. Oh, God and God of our ancestors, we thank You for this privilege of free assembly in this great democracy of ours, for the freedom to practice our faith and express our appreciation for Your bountiful goodness and wonders, not only today but all our days.

We pray, oh Lord, that you bless our leadership, President and Mrs. Bush, Vice President and Mrs. Quayle and their families with health and strength, that You endow our President with the vision and courage so necessary in addressing today's complex challenges, encouraging democracy and ensuring the new world order.

In our bible we read the days of creation concluded with, "Bay ar adenoi ky tov"—and the Lord saw that it was good, not very good, not perfect, but good, a recognition that we, oh Lord, Your children, have the responsibility to help perfect this very imperfect world.

As we commit ourselves to this continuing task, we pray, oh Lord, shamor tze anu, o vo anu, l'achiem vo sholom, ma ato va adolom. Safeguard our going and our coming, for life and for peace, for now and for eternity. Amen.

SENATOR STEVENS: Thank you very much. (West Point chorus song.)

CADET JERRY SIVES: Thank you, ladies and gentlemen. We are Six Pack, six guys who like to do a little singing and a lot of hanging out together.

We're very grateful to be here this morning to be able to share in Christ with you and to share some of our music with you.

We have a tradition in Six Pack that before we do each rehearsal and before we do each performance, we like to have a short prayer. Last night, Don had a short verse that he shared with the rest of us that we'd like to share with you now.

CADET DON WILLIAMS: Thank you. I used to have this memorized, but I'm so nervous because there's a million people out there.

The Ephesians 5:18 and 19 says, "Speak to one another with psalms, hymns and spiritual songs. Sing and make music in your hearts to the Lord, always giving thanks to God the Father for everything, in the name of our Lord, Jesus Christ."

This next song we'd like to sing for you is a common prayer at the end of any prayer. It's called "Amen" by Glad.

(Song.)

CADET SIVES: Thank you very much, ladies and gentlemen. We are so honored to be with so many people this morning who love and worship the Lord. You know that by keeping the commandments we are able to find true happiness in our lives. We would like to sing a song for you now as our closing number that speaks about this happiness. It's by a group called the Cathedral Quartet, entitled "Feel'n' Mighty Fine".

(Song.)

SENATOR STEVENS: The Vice President of the United States and Mrs. Quayle.

(Applause.)

SENATOR STEVENS: Ladies and gentlemen, the President of the United States and Mrs. Bush.

(Applause.)

SENATOR STEVENS: Please be seated. Thank you for welcoming our honored guests.

We have some singers for you but before they sing, Congressman Sonny Montgomery of Mississippi will present an opening prayer. Our singers have traveled thousands of miles from a small island in the Bering Sea, off the

coast of Russia. They're 70 miles from Russia and they're 160 miles from the coast of my state of Alaska. These singers come from the Alaskan native village of Savoonga to sing for us. Their village has approximately 500 people, no automobiles, no running water. Their men hunt for subsistence and their ladies keep busy making beautiful Alaskan native crafts. These singers will sing "How Great Thou Art" in Alaska-Siberian Ubic and then in English. We ask that you remain seated for the prayer and enjoy the songs.

REPRESENTATIVE MONTGOMERY: Good morning and let us pray. Good Lord, thank you for this new day and for giving us the opportunity to gather this morning to express our love for you and for our neighbor. To our friends from overseas, welcome to our country. We are proud that you are part of this great National Prayer Breakfast.

In 1991, the world changed so much for the better. Many people in our lands can now worship without fear. Please give them the strength and courage to keep these new freedoms.

Bless our President and Barbara Bush, and thank you for helping our President work through the many problems he faces each day.

Bless Vice President and Marilyn Quayle plus the Congress and all the officials in our great government. Lord, Bless this food to the nourishment of our bodies, and let us remember that every good and perfect gift comes from You.

Amen, amen.

(Savoonga Singers.)

(Applause.)

SENATOR STEVENS: Thank you all very much. That was very lovely.

Mr. President, Mrs. Bush, Mr. Vice President, Mrs. Quayle, distinguished heads of state, honored guests and friends, coming from all walks of life, every political persuasion in every corner of our globe, we have gathered together today to pray and to thank our God. The book of Matthew tells us that where two or three are gathered in God's name, He is among them. And where two or three agree in prayer, our Father in heaven will answer those prayers.

We have much for which to be thankful: a world earnestly seeking peace, the end of walls separating mankind, the rebirth of democratic freedoms, and most of all, our United Nations forces have returned after liberating Kuwait.

Our prayers offered here in this room a year ago have been answered. But while we may differ on issues of policy and politics, foreign affairs and business and commerce, our faith in our God unites us. As we come closer together and our world is at peace, God will listen. Ask and it will be given you, seek and you shall find. Knock and it will be opened to you.

Now I would like to introduce to you those seated at the head table whose names do not appear on your program. First on my right, a lady who needs no introduction. To me, I believe that when our good Lord thought of the words "wife, mother and family", he thought of our nation's First Lady, Barbara Bush.

(Applause.)

Thank you very much. Those of us in the Senate truly love Barbara Bush. She has been involved with our wives now for many years. She is totally one of us.

On my left, the lovely and gracious wife of our Vice President, Marilyn Quayle.

(Applause.)

Now I ask that you hold your applause until I finish introducing the remainder of

those at the head table who are not listed in your program. Beginning at my far left, Mrs. Tipper Gore, wife of Senator Al Gore.

Mrs. Mike Heflin, wife of Senator Howell Heflin.

And Mrs. Cindy Stenholm, wife of Congressman Charlie Stenholm.

And Mrs. Galina Vyezinskaya, wife of Maestro Rostropovich.

Mrs. Suzanne Craig, wife of Senator Larry Craig.

Mrs. Alma Powell, the wife of General Colin Powell.

My wife, Catherine Stevens. Now join me in welcoming the true powers of Washington. (Applause.)

Next I'm honored to introduce A Head of state, a friend of all. He has traveled thousands of miles to be with us this morning, Prime Minister Sir Ratu Kamise Mara of Fiji. Mr. Prime Minister.

(Applause.)

I ask this morning that we give special recognition to the state legislators who have come to be with us, despite the fact that our State Legislatures are in session. They represent prayer groups from almost all of our state governments. Will those legislators who represent state prayer groups, please stand?

(Applause.)

The House and Senate Prayer Group sponsor this breakfast. I ask now that you welcome my good friend, the Honorable Larry Craig of Idaho, who will speak for the Senator Prayer Group.

SENATOR CRAIG: Mr. President, Mr. Vice President, Chairman Ted, good morning to everyone and especially to our international friends. I'm deeply honored to have been asked to speak on behalf of the United States Senate and its members who participate in the Senate Prayer Breakfast.

This morning's gathering is one of the largest assemblies of love, fellowship and prayer I believe the world has seen. Let me tell you, my wife, Suzanne, and I are deeply honored, humbled and pleased to be among all of you.

In the early 1940's, members of the U.S. Senate gathered to consider the spiritual problems they were experiencing with warfare and to pray together about it. The Senate Prayer Breakfast was born.

Later, Senator Frank Carlson of Kansas met with President Eisenhower and found the common denominator that brought this nation's leaders together in fellowship through prayer. The National Prayer Breakfast movement, which today spans the globe, has resulted from that effort.

Thousands of people here this morning, from over 150 countries, should serve as testimony to the never-ending power of love and values of fellowship spoken clearly to us by our Lord Jesus Christ.

Well, I'm a veteran of both the House and the Senate Prayer Breakfasts. Every morning, while the Senate is in session, Senator Ted Stevens and Senator Howell Heflin, our current leaders, bring us together in fellowship. This fellowship results in stronger bonds between people of different political opinions and religious beliefs. Our isms are checked outside the door as we meet to share what oftentimes comes to be an expression of very personal beliefs and ideas. We open with prayer and we close with prayer.

The Prayer Breakfast has helped me personally to disagree without being disagreeable and to remember that what unites mankind is much stronger than that which pulls us apart or divides us. That unifying force is the power of love of our fellow man.

It is my pleasure to bring greetings from this unique body of men and women who are responsible for the genesis of thousands of similar groups throughout the world.

Let me close with Romans 14:13, which speaks of love and consideration for your brother. "Let us not therefore judge one another anymore, but judge rather that no man put a stumbling block or have occasion to fall in front of his brother."

Now it is my pleasure to introduce the Chairman of the U.S. House of Representatives Prayer Breakfast. For 10 years I had the privilege of attending this Prayer Breakfast and sharing with this gentleman. He is a Democrat and I'm a Republican. Our states are divided by a thousand miles and many different opinions. But we are united in friendship. We believe in our Lord and we believe in the love that He has asked us to extend.

Ladies and gentlemen, from the 17th Congressional District of Texas, the president of the House Prayer Breakfast, Congressman Charlie Stenholm.

REPRESENTATIVE STENHOLM: Thank you, Larry, Mr. President, Mr. Vice President, distinguished guests, one and all. In the words of St. Paul, "Grace and peace to you from God our Father and the Lord, Jesus Christ."

I thank God for you because of His grace given you in Jesus Christ. I appeal to you, brothers and sisters, in the name of our Lord, Jesus Christ, that all of you agree with one another so that there may be no divisions among you and that you may be perfectly united in mind and in thought.

From the reports you hear on the news, it may be difficult for you to believe that Members of the Congress of the United States ever agree with one another on anything, or find it possible ever to be perfectly united in mind and thought, as St. Paul admonished us to do. But it is my pleasure and privilege to bring you greetings this morning from the House of Representatives Prayer Breakfast Group, where we try to take those instructions seriously. Like St. Paul, I greet you in the name of Christ with thanksgiving for everyone gathered here from all across the world and from many different walks of life.

I want to share with you the good news of God's work in our House Prayer Group. Looking out across this impressive crowd this morning, I am reminded of the Prophet Isaiah's words when he said, "My house will be called a house of prayer for all nations." This room may normally be a ballroom, but this morning it is definitely a house of prayer for all nations, and it is a wonderful sight.

Normally on Thursday mornings at this hour I am seated in a little room in the Capitol Building with about 40 or 50 colleagues. We meet without fanfare, simply to find fellowship with each other and to share each other's burdens and joys and to pray.

I have to tell you that prayer is something I don't totally understand, even though I am convinced of its power. The Holy Spirit, as the Bible says, guides us in our prayers. It is a lot like the wind that sweeps across the rolling plains of west Texas. The wind itself is invisible, but its effects are undeniable.

The hostages, for whose release we praised God this year, have all told us about the power which sustained them through their long lonely years. Those who were able to link hands in prayer while in their cells, which they called the Church of the Locked Door, have testified that the strength that they gained from each other and from the Holy Comforter was what kept them alive.

In the House Prayer Breakfast Group, we have seen the power of prayer in the Holy

Spirit at work as well. Through the report which we affectionately call, the "Sick and Wounded Report", given every week by General Sonny Montgomery, we share our daily concerns with and for our fellowman. Through Jake Pickle's colorful explanations of the background of the hymns we sing, we lift our voices in praise and gain a sense of how God has worked through the lives and experiences of past believers. Through the message brought by a different Member of Congress each week, alternating between Democrat and Republican, we learn something of our colleagues' own spiritual journeys.

I personally have felt the impact that fellowship and prayer can have on those of us who meet together. As a conservative farmer from the rural southwest, it's not always obvious to me how I might relate to a liberal New Yorker. When we sit together on Thursdays, however, all the other labels are left at the door and we are transformed into simply being two men seeking fellowship and God's guidance. Even when we leave the room and we reattach our labels, something of that connection through fellowship remains with us.

Just as we Representatives meet every Thursday morning, asking God to direct us while we debate the laws of our land, I ask that you pray for us, as we make those decisions so that our words and deeds may always be pleasing to Him.

It is now my privilege to introduce to you Ms. Sissy Houston, who will bring us her rendition of "Sweet Hour of Prayer". While many people may be tempted to boast of a successful recording career, Grammy Award nominations or numerous other awards, I suspect that the one which may be most special to Sissy was being named Mother of the Year in 1991. While we don't know about her other children, we do know that Sissy did a marvelous job of raising and training her daughter, Whitney.

May I now introduce Ms. Sissy Houston? (Ms. Houston's song.) (Applause.)

SENATOR STEVENS: Thank you very much, Sissy. My grandmother used to say, when you hear a good song, your heart sings. Our hearts were singing with you.

Next, we are honored by a former Senator. As a matter of fact, he is the President of the Senate, a friend and a true believer, the Vice President of the United States, the Honorable Dan Quayle.

VICE PRESIDENT QUAYLE: Thank you, Ted, Mr. President. Thank you very much, Senator Stevens, Mr. President, Barbara, Marilyn, Maestro Rostropovich, ladies and gentlemen.

As we welcome our international friends and guests to the National Prayer Breakfast, let us just stop for a moment and think what has happened in the world this past year. We welcome this day of prayer to once again give thanks to our Lord for the wonderful blessings that he has bestowed upon us. In the words of the 77th Psalm, Verse 14, "You are the God who does marvelous deeds, the Lord who brings nations to acknowledge your power."

Indeed he does. For the most dramatic events of our lifetime, the rebirth of nations long covered by darkness, the reunion of East and West upon their shared heritage, this was not done by the force of arms. This was brought by the force of faith. It began when a group of Polish workers insisted upon erecting a cross at their shipyard. It drew strength from those who fell, martyrs, like Father Populiusco, who, even in death, could not be silenced.

Last summer, Marilyn and I and two of our children, prayed at his grave and now we witness his victory. Like many before him, he taught the most profound lesson of our time, that faith, family and freedom are intertwined. Destroy any one and the others are threatened as well. Strengthen anyone and the others revive along with it.

That's why the bogus messiahs of this century tried to shackle religion and ruin family life, because they knew their monster states could never enslave believing families. Now, bells ring out again from the ancient churches in the Kremlin, voicing to the heavens their prayers of thanksgiving.

Yet even at this season of rejoicing, there is still danger. People of faith should not ignore it. For the totalitarianisms of this century, evil as they were, were only symptoms of a deeper malady in the western world. It was an emptiness of the spirit that, by denying humanity's creator, denied human limits and human dignity as well. That denial built the extermination camps and the Gulag. That denial remains amid the rubble of empires. It persists in our own institutions and distorts the face of our culture. My friends, it challenges all of us. For the spiritual vacuum at the heart of what Paul Johnson called modern times will be filled one way or another, filled either by a revival of faith or by some new fanaticism, promising heaven on earth.

Now, after all we have seen, after all we have been given, after so much has been done for us, surely we should now be the people with hope, with confidence in the Lord's governance of world affairs.

Thank you and God bless you.

SENATOR STEVENS: Representative Joseph Pitts of Pennsylvania has the most seniority of all state legislators who answered our invitation to join this breakfast. We've asked him to share a passage of the Old Testament with us at this time.

REPRESENTATIVE PITTS: Mr. President, Mrs. Bush, Mr. Vice President, Mrs. Quayle, distinguished guests and friends. When I asked my colleagues in the State House Fellowship Group in Pennsylvania what I should read this morning, we concluded that as state legislators, grappling with issues and ethical concerns in matters of public policy, we often find values, meaning and guidance in reading the Old Testament. The Scriptures are a place we can go, not only in our personal lives, but in our corporate lives, to rediscover God as individuals, as communities and as a nation.

We selected these verses from the Book of Psalms, chapters 33 and 145, some selected verses, beginning at verse 8.

"Let all the earth fear the Lord. Let all the people of the world revere Him, for He spoke and it came to be.

He commanded and it stood firm.

The Lord foils the plans of the nations. He thwarts the purposes of the peoples. But the plans of the Lord stand firm forever. The purposes of His heart through all generations.

Blessed is the nation whose God is the Lord, the people He has chosen for His inheritance.

From Heaven, the Lord looks down and sees all mankind. From His dwelling place, He watches all who live on earth. He who forms the hearts of all, who considers everything they do.

No king is saved by the size of His army, no warrior escapes by His great strength.

But the eyes of the Lord are on those who fear Him, on those whose hope is in His un-failing love."

And from 145:

"The Lord is gracious and compassionate, slow to anger and rich in love. The Lord is good to all. He has compassion on all He has made.

The Lord is faithful to all His promises and loving toward all He has made. He upholds all those who fall and lifts up all who are bowed down.

The Lord is near to all who call on Him, to all who call on Him in truth.

He fulfills the desires of those who fear Him. He hears their cry and saves them."

SENATOR STEVENS: Thank you, Representative Pitts. Let me now present to you another friend and member of the Prayer Group, the Honorable Al Gore of Tennessee, who will read to us from the New Testament.

SENATOR GORE: Mr. President and Mrs. Bush and Mr. Vice President and Mrs. Quayle, distinguished guests and ladies and gentlemen. In three of the four Gospels of the New Testament, there is a simple story about an unfaithful servant. The master of the house leaves on a journey and puts his servant in charge of the house with instructions. He says "If while I'm gone vandals come and ransack my house or thieves come and steal by belongings, it will not be a good enough excuse for you to say, I was sleeping."

We are gathered here from nations all over the face of God's Earth. The Earth is the Lord's and the fullness thereof. The vandalism of God's Earth on a global scale calls us out to watch, to bear witness and to respond. In Matthew, chapter 24, verse 43, Christ says, "If the good man of the house had known in what watch the thief would come, he would have watched and would not have suffered his house to be broken up. Therefore, be ye also ready."

In Luke, chapter 12, verses 54 through 57, "When you see a cloud rise out of the west, straightway ye say there cometh a shower, and so it is. And when you see the south wind blow, yea say, there will be heat, and it cometh to pass. Ye hypocrites, ye can discern the face of the sky and of the Earth, but how is it that ye do not discern this time. Yea, and why even of yourselves judge ye not what is right?"

And in Mark, chapter, 13, verses 34 through 37, "For the son of man is as a man taking a far journey, who left his house, and gave authority to his servants, and to every man his work, and commanded the porter to watch. Watch ye therefore: for ye know not when the master of the house cometh, at even, or at midnight, or at the cockcrowing or in the morning, lest coming suddenly he find you sleeping. And what I say unto you, I say unto all: Watch."

SENATOR STEVENS: Thank you very much, Senator Gore.

On August 19th of last year, dark clouds literally hung over Red Square in Moscow. It was the first day of the feast of the Transfiguration for Russian Orthodox true believers, and one of the first days for open religious freedom in the capital of the Soviet Union. A coup, a military coup was underway. As the Patriarch of the Orthodox Church, Alexi II was addressing his religious bloc in the square, Soviet tanks rolled into that square, threatening the protectors of the Russian White House in which Boris Yeltsin, the first elected leader of Russia, and the Russian Parliament, were meeting.

That night, cellist was in Paris. He went to the airfield, bought a ticket for Tokyo on a flight he knew stopped in Moscow. Upon arrival in Moscow, he went right to the Russian White House and joined Mr. Yeltsin.

And he joined Father Burkov. And together they gave out 2,000 bibles to young soldiers in tanks. Only one of those soldiers refused to accept a Bible. That, to me, was a trip of faith, taken by Mstislav—we call him Slava—Rostropovich. He returned to the country of his birth to defend freedom. And we have asked Maestro Rostropovich—Slava—the music director of our National Symphony Orchestra now and for the past 15 years, as a true believer—to be our speaker, to give you our message today.

Ladies and gentlemen, I present to you a great patriot and a good friend, Slava Rostropovich.

MAESTRO ROSTROPOVICH: Mr. President, Mrs. Bush, Mr. Vice President and Mrs. Quayle, Chairman and Mrs. Stevens, Honorable Members of Congress, Honorable ladies and gentlemen, my good friends. The more I immerse myself in my music, the more certain I am that sound is a bridge between our real world and the world into which we all will eventually pass, a Godly world, a spiritual world.

Perhaps an oblique proof of this is the existence of sound in all of the different religious temples and churches. I have heard the choirs in the Greek and Russian Orthodox, the organs in Catholic and Protestant, the cantors in the Jewish and the drums in the Buddhist. Sometimes, in some rare cases in my imagination, together with the music rising out of the silence, I would experience an emotional communique with my departed friends.

This is what happened on the evening of August 19th of last year. I had learned of the putsch in Moscow and was waiting in my Paris apartment for the broadcast of the press conference of the junta leading the coup. Watching and listening, I was horrified. I understood that the cursed terror that had reigned in my country for over 70 years was returning. I closed my eyes, then felt in my inner being the sounds of the music of the 8th Symphony of Dimitry Shostakovich. The music was quiet, devastating, evocative of the inhuman suffering of its composer.

What I feared was a return of the time when that music was written: the time of lies, of deceit, of trampled human dignity. I understood in that mystic moment that I was being summoned by a power it was useless to resist.

The next morning I flew to Moscow and went to the Parliament building, the Russian White House, where I spent the following three days. During those three days, like never before in my life, I felt in me the spirit of Christ.

During that first night, while waiting for the imminent attack, we were sure of the inevitability of death. There were over 30,000 unarmed people defending those of us who had voluntarily locked ourselves in the Parliament Building. But what were those numbers to the combined forces of the KGB, the Army and the Militia united as they were by the presence of their Ministers in the junta?

It poured rain all night and fog shrouded the roof-tops. As we learned later, the attack had been planned by helicopters, depositing their forces on the roof of the White House. But the fog and the gusting wind aborted that plan. The junta could not know that they had planned the overthrow for the Holy Feast of the Transfiguration. I am SO certain that we had been saved only through the intervention of God. God did not loose yet greater suffering on a people tortured by their merciless history.

When I left the White House at 3 o'clock in the morning, amid the constant expectation

of attack, to walk among the volunteer defenders surrounding the building, I saw many, many, many with symbols of their faith, using them as defense and salvation. In the silence of the night, broken by the sound of moving tank treads, the aura of faith was almost palpable. That moment and the salvation of all of us and of the future of the country, came only from God.

There are not words enough to cover the spectrum of emotion I felt during those three days, these happiest days: as they were days of closeness with God, an almost physical awareness of His power. Days of a unity of Faith with my people.

Thank you very much.

SENATOR STEVENS: Thank you, Slava. When I first heard that story of the beginning of the Feast of the Transfiguration and the power of those true believers standing in the square to stop the tank, I thought it was a story that should be shared with all of you.

Now let me ask you to welcome a true warrior, a man who led our military forces as we won the Cold War, and led them through a shooting war in the Persian Gulf, working with the United Nations. A man who has helped make our world a more peaceful place to live, the Chairman of our Joint Chiefs of Staff, General Colin Powell, will offer for us a prayer for the Armed Services.

GENERAL POWELL: Thank you, Senator Stevens. President and Mrs. Bush, Vice President and Mrs. Quayle, distinguished international visitors, ladies and gentlemen. Last year at this time, America was at war. Dr. Antonia Novella, the Surgeon General, opened last year's breakfast by asking for God's blessing on the men and women of our Armed Forces as they went in harm's way. Last year, 8,000 miles from here half a million G.I.s and their colleagues from many, many other countries carried the heavy burden of war. They also sought God's blessings. In their own individual way, in groups around tanks and airplanes, in foxholes and on board ships, these men and women steeled themselves with faith for the coming battles. And now, thank God, the war is over. We are at peace.

And with the end of that other war, the Cold War, we stand at the threshold of what promises to be an exciting future, a future where freedom, democracy and peace will reign. Yet as we move toward that brighter future, we must not forget that still today at 1,000 campfires around the world, the men and women of our Armed Forces stand guard. On the cold snow covered DMZ in Korea, in Guantanamo Bay, in southern Turkey, afloat in the Mediterranean, in the Persian Gulf, all across the world, soldiers and sailors and airmen and marines and coast guardsmen silently keep their watch.

Please join me in a prayer for their service, their sacrifice and for their safety.

Heavenly Father, we are grateful beyond all bounds for your mercy and your loving kindness in caring for and protecting the men and women of our Armed Forces. In Operation Desert Storm our men and women went to war, as Abraham Lincoln went to war with their faith as their might. And in that faith, they dared to do their duty as they understood it. But Father, without your sure presence among them, we know that victory would never have come.

We pray again for those who did not live to see that victory and are now with you. We know that the battle for peace is never without cost, but we are human and we hurt as only humans can hurt when we lose loved ones. We pray that you will be with all the families and friends who have suffered loss.

Comfort them and give them strength as they go on with their lives. And let them always remember with pride the selfless sacrifice of their fallen comrades and loved ones.

Above all, Heavenly Father, we now pray for peace. As the aircraft we built to carry our troops to war instead now carry food and medicine to our former enemies, we pray for that day when no American shall ever again have to go into war. We long for peace and for the time when every man and every woman in the world shall love his brother and his sister as Your precepts command. But we know that the road to peace is a hard road and a dangerous road. We have walked many a mile upon that road and we know that many miles may yet be ahead.

So Father, we ask your strong presence with our men and women who travel that road all around the world. Be with them, sustain them, give them the strength to do their duty despite the intensity of the trial. As we have seen from Operation Desert Storm, your presence among them surpasses the strength of 10,000 battalions.

Accept our eternal gratitude for Your love and kindness and for Your watching, caring presence in our midst today. Guide us today and tomorrow.

And Father, thank you for giving us this beloved country, which You have blessed and which we are proud to call America. Thank you.

SENATOR STEVENS: And now I call upon the Co-Chairman of the Senate Prayer Group, Senator Howell Heflin.

SENATOR HEFLIN: Last April I had the privilege of representing the Senate Prayer Breakfast at the dedication of the Camp David chapel, which serves as a house of worship for the presidential party and over 200 permanent residents, most of whom are Naval and Marine security personnel and their families. In the worship service our nation's highest leaders were co-mingled with average people like foresters, sailors and marines. The forester's wife might be seated next to the First Lady, and a Marine gunnery sergeant might stare at the President as he passes the collection plate.

When the President rose to give his remarks at the dedication service, a young mother took her crying baby out of the chapel. The President remarked that the first crying baby to be removed from the chapel just happened to be his grandson.

In 1789, George Washington in his inaugural address, said "It would be peculiarly improper to omit in this first official act my fervent supplications to that Almighty Being who rules over the universe. It is my hope that His benediction may consecrate to the liberties and happiness of the people of the United States, a government instituted by themselves."

Some 200 years later, in 1989, the second George to occupy the office, made his first act as president a prayer. "Heavenly Father, we bow our heads and thank you for your love. Accept our thanks for the peace that yields this day. Make us strong to do your will and write on our hearts these words: Use power to help people. There is but one use of power and it is to serve the people. Help us to remember it, Lord."

This National Prayer Breakfast has a meaningful international attendance. Let me mention another George, King George VI of Great Britain. During a World War II broadcast he encouraged his countrymen by invoking words from Louise Haskin's poem, "The Gate of the Year":

I said to the man who stood at the gate of the year

"Give me light that I may tread safely into the unknown."

And he replied "Go out into the darkness And put your hand in the hand of God. That to you shall be better than light, And safer than a known way."

Throughout our history, we have been fortunate to have leaders who have sought God's guidance. How comforting it is to know that so many of our great leaders, including our President, George Bush, have placed their full confidence in His power. It is my high privilege and distinct honor to present such a leader, the President of the United States.

PRESIDENT BUSH: Thank you all very, very much. Please be seated. Slava, thank you. Thank you, Senator Heflin for such a lovely introduction. Dan and Marilyn, the Vice President and Mrs. Quayle; members of my Cabinet; Members of Congress, all so many here today; General Powell; our host, Ted Stevens, to our dear friend, Billy Graham, and all gathered, let me first just say a special greeting to Prime Minister Kamisese Mara of Fiji. This is not his first time here, and I am sure it won't be his last. He is an inspiration to all of us who know him and consider him a friend, as I do.

And May I salute our other friends from overseas? and those who serve in the state legislatures. We are glad you all are here.

Four principles, four ideals, really inspire America and I think they are all here this morning, reflected in one way or another—freedom, family, and faith that Dan Quayle talked about and to that I would add fellowship. So many people, brought together by a shared spirit, the simple joy of praying to God.

Slava, that was a tremendously moving story and one of the most dramatic moments in recent history. And if sound has anything to do with entry into heaven, I believe you can choose the fluffiest, most generous cloud in the firmament when you get there. Thank you for your inspiring message. You reminded us all of the powerful role that prayer has played in the unprecedented events of the past year.

When I last stood here, as Colin reminded us, we were at war. Compelled by a deep need for God's wisdom, we began to pray. And we prayed for God's protection in what we undertook, for God's love to fill hearts and for God's peace to be the moral north star that guided us.

Abraham Lincoln said "I've been driven many times to my knees by the overwhelming conviction that I have nowhere else to go." And in his example, we came together for a special national day of prayer. Americans of every credit turned to our greatest power to bring us peace, "peace which passeth all understanding". At the end of the war, we prayed as one during our national days of thanksgiving.

Let us pray today that as a people we will continue to bring the power of prayer to bear on all the challenges we confront. Let us pray that we will strengthen the values that this great land was founded on, that we will reverse any threat of moral decline, and that we will dedicate ourselves to the ethic of service, of being what I call a point of light to someone else, someone in need.

In this work, we are not without inspiration. We need look no further than the handful of men who became heroes by their courage their strength and, above all, their faith—the last of whom returned in December. I'm talking about our hostages. In brutalizing conditions, as we've heard this morning, they prayed together daily in what

they called the Church of the Locked Door. They unweave floor mats in order to make rosaries. And these men who every day lived the story of Job treasured their first book, the Bible. And when Terry Anderson was released, one of the first things he did was to thank strangers across the world who had prayed that he be set free. Your prayers made a big difference, said this man, who imprisoned had rediscovered the faith that sets and keeps men free.

There's another story from last year's news that tells of the transformation of faith. While it's a story familiar to all of you, it's intensely personal to Barbara and me and to others in this room. We lost a dear friend last March, Lee Atwater, a restless, fiercely-driven, fun-loving good old boy from South Carolina, who rode life as hard and fast as he could. But he also lived a kind of miracle because his illness reintroduced him to something he had put aside, his own faith. And in his last months, he worked intensely to come to grips with his faith. Through reading the Bible and through prayer, he learned that, as he put it, "what was missing in society was what was missing in me, a little heart and a lot of brotherhood."

He was so right. Prayer has a place, not only in the life of every American, but also in the life of our nation. For we are truly one nation, under God.

May God bless this very special gathering. For those of you who have come from overseas, for those of you from across our land, for those of you right here in the nation's capitol, thank you for participating in this celebration of faith. Thank you very much.

(Applause.)

SENATOR STEVENS: Thank you very much, Mr. President.

Now we have asked West Point Cadet Doug McInvail to lead us in song, "Amazing Grace". He wants to sing the first verse alone, and then asks us to join with him and the choir for the second and third verses. I ask that you please stand for this song.

(Song—"Amazing Grace")

SENATOR STEVENS. Amen. Thank you very much. This is the first year in the history of the Prayer Breakfast that the United States Military Academy Choir from West Point has been with us. We want to thank the Commandant of the United States Military Academy, General Howard Graves, for allowing them to join us and thank them all.

Immediately following this closing song, one of the participants in the first Prayer Breakfast, which was conducted during the administration of President Dwight D. Eisenhower, Dr. Billy Graham, will lead us in a closing prayer. We hope that you will remain standing for the song and the prayer.

(Song—"America the Beautiful".)

REVEREND GRAHAM: President and Mrs. Bush, Vice President and Mrs. Quayle, Senator Stevens. This has been a marvelous and wonderful Prayer Breakfast, in which all of our hearts have been stirred.

The theme seems to have been peace. And the greatest peace was bought for us 2,000 years ago at the cross, where Jesus Christ reached out with one hand and took the hand of man, and the other hand of the Father, and brought us together—if we put faith and our confidence in Him.

And so we do have the possibility of peace. We sang that song a moment ago, "Amazing Grace". Did you know that the man who wrote it was a very wicked man? He was a slave trader. And one night coming back from Africa there was a storm on board that almost overwhelmed his ship. He thought he was going to die. He fell down on his knees.

He received Christ into his heart. He felt the peace of God "that passeth understanding". And he went back to England and helped lead the cause to free the slaves. He became a great Anglican clergyman and wrote many songs. That's what Christ can do for us today.

Our Father and our God, once again, you have brought us together to look to You and to praise You for the freedoms we have in this great nation. We thank Thee for those people that gave their lives this past year to help keep us free and to bring peace to the world, especially that part of the world that has seen so much war, that part of the world where the Bible was born, where it was written, where Christ lived and died.

And today we would like to pray especially for President and Mrs. Bush, Vice President and Mrs. Quayle and their families.

We also commit to you the leaders of Congress as they deliberate the matters of State of this year. We pray for the leaders of our Armed Forces. We thank You that we, as a Nation, are once again at Peace. And, we pray that our own hearts may also be at peace because of our faith in You.

Thank you for promising peace to those who put their trust and confidence in You. We pray that as we repent our sins and put our faith in Jesus Christ, You will prepare us for that eternity that lies ahead of us all.

Now the grace of our Lord Jesus Christ, the love of God the fellowship of Holy Ghost be with us all forevermore. Amen.

SENATOR STEVENS: Thank you, Dr. Graham. Vaya con Dios. God go with you all.●

#### TRIBUTE TO HON. JAMES H. SCHEUER

● Mr. D'AMATO. Mr. President, I rise to pay tribute to a departing Member of the other body, the dean of the New York City congressional delegation, Representative JIM SCHEUER of New York. Representative SCHEUER has served New York City for 20 years in the House, and he has distinguished himself again and again as a fighter for New York's people and their best interests.

Mr. President, JIM SCHEUER is a legislator who has consistently placed principle above politics. He is perhaps best known for his work on behalf of the environment. As chairman of the House Subcommittee on the Environment, and the founder of extraparliamentary environmental organizations, Representative SCHEUER has been a pioneer in this field. He called public attention to issues such as biodiversity, energy efficiency, global warming, the protection of our forests—long before it was fashionable to do so.

JIM SCHEUER has always brought a global vision to the job of public service. He has led a crusade against overpopulation in the developing world. He has fought for human rights abroad, and championed the cause of Soviet Jews who wished to emigrate to the West. Because of his efforts, and the efforts of others, Russian Jews have emigrated to Israel in record numbers.

He will be sorely missed by the Nation, by the House and the Senate, and by the people of New York.●

#### TRIBUTE TO MORTON H. HALPERIN

● Mr. BIDEN. Mr. President, at the end of this month the American Civil Liberties Union will be saying goodbye to an outstanding American with a distinguished record of service to this country's great tradition of protecting civil rights and civil liberties of all individuals. At that time, Morton H. Halperin will leave the ACLU to accept a position with the Carnegie Endowment for International Peace, as well as a position as Baker professor in the Elliot School of International Affairs at George Washington University.

I am sure that we have not seen the last of Mort Halperin here in the Congress—he will remain as dedicated and as passionate in his championing of the causes of civil rights and individual liberties in his new position as he has been in the past—but this transition makes a highly suitable time to note his tremendous contributions to those causes.

Mort Halperin has made an indelible impression on the lives of many, including myself. He is that truly rare creature—especially rare in Washington, perhaps, but certainly not only here—for whom there is never any conflict between principle and practice.

This is not because he is ever prepared to sacrifice his principles, but because he is never prepared to hold his principles aloof from the hurly-burly that so often surrounds civil rights. He is never content with principles as a pose, but only content with a principled and practical conclusion to any negotiation in which he participates.

Fortunately, for him and for us, he has a reflexive, instinctive ability to reach that kind of conclusion, time after time, to some of the knottiest controversies any of us ever encountered. And he does it without falling into the habits that too often snare those who take up civil liberties as moral trophy-hunters—

He is never content to be simply a cheerleader working the crowd from the sidelines without taking any risks himself;

He is never satisfied to simply bloody the other side with a blunt instrument without gaining any ground;

And he always wants something more than to leave the other guy guilt-ridden but still in possession of the field.

When the chips are down, what works is what Mort does—as long, of course, as what works is right. And how he gets things done is as unusual in this town as what he gets done. In a place where shouts often substitute for arguments, Mort never raises his voice, and while it is obvious he has an absolute passion for civil liberties, when he speaks it is always with the voice of reason.

He would rather persuade you than overwhelm you—not least, of course, because he understands very well that

when you have come round to his point of view, you will be mightily impressed with the originality of your own thinking, and you will defend that idea as vigorously as you would defend anything else that belongs to you.

Given his abilities and his achievements among us, I used to wonder why Mort has not become a lawyer.

But I realized, finally, that he is a bit like the famous Professor Kittridge of Harvard. When a student asked Kittridge why he had never taken a Ph.D. in his field of English literature, the professor simply smiled and said, "But who would have examined me?"

None of us, certainly, would relish trying to examine the Halperin intellect or its command of civil-rights law. But there's nothing pointy-headed about the way Mort pursues his work. There's nobody in Washington smarter than he is, but there is equally nobody more down to earth in pursuing a goal, and he has all the tools for that kind of work.

He is, very simply, a man of good judgment, about both principles and people, and he has a first-rate command of the political process that aims at blending those two elements into results that are both desirable and workable.

He knows all the angles, and he plays them all, but he plays them straight. None of us has ever known a more honest man—but neither has any of us ever known a man more clearly focused on his goals or more clever at achieving them.

For Mort is, above all, a master tactician of the moral realm, and his preeminent skill is winning the big battles, outflanking and outmaneuvering the apparently unbeatable foe at the head of small, ragtag, apparently hopeless armies—for, as we have all learned, that "apparently" can be a formidable weapon in the highly-skilled hands of a Mort Halperin.

I have no doubt there are people all over this town who are still trying to figure out how they lost a fight against such "apparently" insignificant opposition.

It is simply beyond imagination that anyone could have done more than Mort for civil liberties. It has been our good fortune, as well as the great good luck of the American people, to have had Mort Halperin as our "Horatio at the Bridge" for civil liberties.

It has been our good fortune to have found in Mort Halperin the Humanitarian, but supremely practical, man once described by the writer Aldous Huxley—

"A man may have strong humanitarian and democratic principles," Huxley said, "But if he happens to have been brought up as a bath-taking, shirt-changing lover of fresh air, he will have to overcome certain physical repugnances before he can bring himself to put these principles into practice."

I have no doubt that Mort has had to wrinkle his nose more than once as he has made his way through the political stockyards here in Washington, but he never avoided the occasion, no matter how aromatic he may have found it; he never hesitated to get his hands dirty, even as he never sacrificed his principles; and he has left the political air forever fresher everywhere he has passed.

He has been my friend, and he has been the best friend to civil liberties in our time,

And so, I am sure, he will remain. ●

#### NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION

● Mr. CHAFEE. Mr. President, yesterday the Senate approved H.R. 2130, a bill authorizing appropriations for the National Oceanic and Atmospheric Administration. This morning I received a letter from William K. Reilly, the Administrator of the Environmental Protection Agency, in which he comments on this legislation, referring specifically to title V.

I would ask that this letter be included in the RECORD, and that the Environmental Protection Agency consider this letter, as well as a colloquy among Senators HOLLINGS, MOYNIHAN, and myself, as it implements this legislation.

The letter follows:

U.S. ENVIRONMENTAL PROTECTION AGENCY,  
Washington, DC, October 8, 1992.

Hon. JOHN H. CHAFEE,  
U.S. Senate,  
Washington, DC.

DEAR JOHN: Thank you for requesting my views on legislation recently approved by the House of Representatives, H.R. 2130, a bill to authorize appropriations for the National Oceanic and Atmospheric Administration. Title V of this bill establishes a comprehensive national program for monitoring of the nation's coastal ecosystems, which is to be jointly implemented by the Under Secretary of Commerce for Oceans and Atmosphere and the Administrator of the Environmental Protection Agency.

The bill specifies that "primary leadership for the monitoring program activities conducted by the Environmental Protection Agency, pursuant to this section, shall be located at the Environmental Research Laboratory in Narragansett, Rhode Island."

I interpret this language to mean that headquarters for the monitoring program, which will be established pursuant to this legislation, will be located at the EPA laboratory currently located in Narragansett. The personnel primarily responsible for implementing the program, of course, would be located at the laboratory. Such implementation would ordinarily include:

Developing and implementing intensive coastal water quality monitoring programs in accordance with the legislation;

Identifying and analyzing the status of environmental quality in the Nation's coastal ecosystems;

Assessing ambient water quality, benthic environmental quality, and the health and quality of living organisms; and

Identifying sources of environmental degradation affecting the Nation's coastal ecosystems.

Personnel located at the program headquarters in Narragansett would also have a role in providing the scientific basis for the development of coastal water quality monitoring guidelines. Such guidelines, which will be developed by EPA, should provide for uniformity, establish scientifically valid monitoring methods, and identify appropriate indicators of the health and quality of coastal ecosystems.

Please let me know if I can be of any further assistance.

Sincerely yours,

WILLIAM K. REILLY. ●

#### HUMAN RIGHTS VIOLATIONS IN KASHMIR

● Mr. SYMMS. Mr. President, in its report, the Subcommittee on Foreign Operations has issued strong language deploring the Indian Government's massive human rights violations in Kashmir. This is an important step forward in the fight to protect human rights in Kashmir. I stand today to commend my colleagues for making this important statement.

The statement calls on India to cease its abuse of human rights and dignity in Kashmir. This is an important message of our resolve that these state-sponsored abuses end—a message which must be heard loud and clear in New Delhi.

The committee report states concern for "The persistent reports of widespread human rights abuses" in Kashmir. Indeed, credible reports of human rights atrocities in Kashmir are increasing and the evidence of this abuse by Indian forces is undeniable.

During the past 2 years, many of the most respected human rights organizations in the world—including Amnesty International, Asia Watch, and Freedom House—have all issued incredible reports detailing the abuse of Kashmiri civilians by Indian military forces. Indigenous Indian human rights groups have issued reports which have reached the same conclusions.

Mr. President, the details of their reports are both gruesome and saddening. For example, Amnesty International reported that gang-rapes by Indian soldiers of Kashmiri women are widespread. These rapes are perpetrated against both young girls and older women—often in front of their children. They are acts of pure hatred and violence which cannot be justified by the Indian Government as having a military purpose. There is no military purpose for rape.

Amnesty and others have documented how Indian forces have committed summary executions of Kashmiri civilians with total impunity. They shoot into unarmed crowds of demonstrators and fire on funeral processions. They use scorched Earth tactics to terrorize entire villages into submission—Indian soldiers actually

lock Kashmiri civilians in their homes, and then set the buildings on fire, cremating the inhabitants alive.

The atrocities are intolerable, and the committee rightly calls on India to "Investigate reports of human rights violations and to prosecute individuals responsible. . ." This statement is particularly appropriate in light of the fact that in the 3 years that India has waged its campaign of genocide—despite the widespread evidence described by the committee of state-sponsored atrocities in Kashmir—Indian soldiers are not brought to the bar for justice.

The reason for this is that Indian soldiers are exempted from prosecution by special laws designed to facilitate and encourage their abuses. Laws such as the "Jammu and Kashmir Armed Forces Special Powers Act", and the ironically titled "Jammu and Kashmir Public Safety Act" give Indian soldiers: shoot-to-kill powers; the right to detain civilians without warrant or charge; the right to extract confessions through brutal torture. And the laws guarantee Indian soldiers complete immunity from prosecution for these crimes. The committee rightly calls for an end to this practice, and for India to begin investigating and punishing the perpetrators of these atrocities. The call for an independent investigation is especially significant, and I know many in this body hope it is adopted by the Indian authorities.

The committee also justly states that "The government of India should ensure that the rights of detainees are fully protected \* \* \*" This is indeed a top priority, because India's record of protecting prisoner rights has been atrociously inadequate.

I draw your attention, Mr. President, to the Amnesty International report of March 1992. In that report, Amnesty International states:

Torture is routine (in Kashmir). Every day in police cells and military barracks throughout the land, pain and indignity are deliberately inflicted by paid agents of the state. On men, women and even children. They are beaten senseless, given electric shocks or have their limbs crushed by heavy rollers. Sexual torture, including rape, is common.

Mr. President, in Kashmir the rights of detainees are not protected. Each day, India violates the dignity and human rights of Kashmiri civilians through brutal acts of torture and abuse. India has institutionalized the use of torture in its campaign to suppress the people of Kashmir.

The committee's report is a strong call for an end to this abuse. And to ensure that this abuse ceases, and that the victims of India's atrocities get proper care and treatment, the committee rightly calls on India to grant "the International Red Cross \* \* \* prompt access to all detainees."

Unfortunately, Mr. President, India has consistently blocked access of human rights and humanitarian orga-

nizations such as the International Committee of the Red Cross to Kashmir. India has consistently denied humanitarian aid and medical attention to the victims of its atrocities. Incidents have been documented in which Indian soldiers have attacked ambulances carrying victims of government abuses in which Indian patrols have burst into hospitals and clinics, molesting and killing patients, doctors and medical staff. Indian soldiers have also harassed doctors and their families for providing medical care to the victims of their abuse.

India has tried its best to hide these facts from the outside world. Perhaps that is why they deny access to the Red Cross, and human rights observers—they fear that by allowing the Red Cross and other groups access to Kashmir those groups will bring to light the extent of their abuses.

Mr. President, the committee report makes a strong statement that these abuses must end. It calls on India to take immediate steps to curtail the abuses; it calls on India to investigate, prosecute, and punish its officials and agents who encourage and commit these crimes; it calls on India to cease the rampant use of torture of political detainees; calls on India to cease its efforts to interfere with the provision of humanitarian aid to the victims of its atrocities.

In sum, it is a strong statement—a statement that sends New Delhi an indisputable message: that the U.S. Senate takes India's abuses in Kashmir very seriously; that the U.S. Government will not stand by in silence while India massacres the Kashmiri people; that we expect immediate action to bring these abuses to an end. In view of this, I believe that it is appropriate for the Subcommittee on Near Eastern and South Asian Affairs to hold hearings on these issues in the upcoming year.

Mr. President, I commend the committee for its important statement, and register my support for it. •

#### CHILDHOOD IMMUNIZATION

• Mr. SIMON. Mr. President, in an era in which safe and effective vaccines against childhood diseases are readily available, it is unconscionable that these diseases continue to cut a wide swath through our society. In 1963, fewer than 1,600 cases of measles were reported. According to the Centers for Disease Control, almost 27,000 children contact measles in 1990, and 90 of these children died as a result.

In 1989, there were 4,157 reported cases of whooping cough, a dramatic increase from the 1,730 cases reported in 1980. CDC says that because so many cases of whooping cough go unreported, the actual number of cases may be far greater than these numbers indicate.

Mr. President, I could recite similar figures for mumps, rubella, hemophilus

influenza type b, and the other diseases of childhood. But the point is that all of these diseases are easily preventable. We have the vaccines. We need the will and the resources to deliver them.

The fact that delivering appropriate vaccines to all children would prevent disease and death should be quite compelling enough to cause it to happen. But if we need more incentive, we should remind ourselves that childhood immunization is among the most cost-effective of preventive health measures. For every dollar spent on immunization, we save \$10 to \$14 in health care costs.

Mr. President, today's issue of the Washington Post contains an article by columnist Michael Kinsley that captures precisely the urgency of this matter and the steps that should be taken now to reduce the toll of disease and death that childhood disease can bring. Mr. President, I ask unanimous consent that Mr. Kinsley's article be printed in its entirety in the CONGRESSIONAL RECORD, and I commend it to my colleagues.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Oct. 8, 1992]

CHEAP SHOTS: HOW CAN BUSH SCRIMP ON SOMETHING LIKE CHILD VACCINATIONS?

(By Michael Kinsley)

A vaccine against measles has been available since 1963. By the early 1980s, the disease was practically wiped out in the United States. But since 1989 we've suffered a measles epidemic: more than 70,000 cases and 100 deaths. Half the deaths were of young children, and the cause was their failure to be vaccinated.

Less than half of all inner-city children get the vaccinations recommended for them by their second birthday. In polio vaccinations of 1-year-olds, the United States ranks 17th in the world, behind places like Albania, China, Pakistan, Mexico and Poland.

George Bush mocks Bill Clinton's notion of government spending as an investment. But childhood vaccination clearly is a social investment—not just in the goody-goody sense that nobody wants children to die, or even in the sense that shots are a health care bargain compared with the price of treating the disease. Immunization of individuals protects all of us from catching the disease. And yet, like so many other social investments, our vaccination infrastructure has been crumbling.

There are various causes. The price of vaccines has skyrocketed—part of the larger health care cost explosion. A dose of measles-mumps-rubella vaccine that cost \$2.71 in 1980 is more than \$15 today. Meanwhile, fewer families have health insurance and fewer insurance plans cover vaccinations. Along with the growth of childhood poverty, this has put increased pressure on community health centers and public health clinics, whose budgets have not kept up.

So children dying needlessly of preventable diseases is another aspect of the general decline of national well-being that snuck up on us while we were partying in the 1980s. And the vaccination scandal is characteristic of the Reagan-Bush years in a second way: We

have been led by people with no faith in the power of government to do good. They believe their own rhetoric about government not being the answer. They don't believe it enough to prune entitlements for the middle class. But that's cynicism, not faith. They do believe their rhetoric enough to sit on their hands when a new social problem cries out for action.

The Bush response to the childhood vaccination crisis will be familiar to students of Bush's approach to other problems. As with the S&Ls, as with the deficit, as with Saddam Hussein, there were people who issued warnings early on and were ignored. As with health care reform and parental leave, Bush's own proposals have only come in response to goading from the Democrats. As with drugs, Bush's approach has featured occasional public relations frenzies alternating with periods of calm.

In his first budget (fiscal 1990), Bush actually proposed a small cut in child immunization funds, from \$142 million to \$138 million. After Congress got through, the figure was \$158 million. The next year, Bush tried for another cut to \$152 million but Congress insisted on an increase to \$217 million. The next year Bush saw the light and proposed \$257 million; Congress appropriated \$297 million. For fiscal '93, with the election approaching, Bush bid \$349 million and Congress actually sliced that by a few million (because Bush wanted to take the money from other programs, such as low-income heating assistance).

In June 1991, the President invited an audience of children into the Rose Garden to hear him declare that he was sending "SWAT teams" to six cities to study the vaccination problem. This was odd, since his own Department of Health and Human Services had just sent him a report analyzing the problem and proposing a \$90 million emergency solution. Bush decided against that. In fact, at the time of the ceremony Bush was proposing to spend less on vaccinations than both Houses of Congress had already cleared.

Eleven months later, last May, Bush was back in the Rose Garden announcing a new nationwide campaign for immunizing 2-year-olds. This is more than three years into his term and about as long into the measles epidemic (which is already waning).

I don't begin to know what is the "right" amount our government should be spending on child vaccinations. (The American Academy of Pediatrics says it's \$487 million.) And I don't pretend to suppose that throwing money at the problem is the entire answer. But I do feel, as a citizen of the richest country in the world, that this is a problem I shouldn't have to worry about. And I wish we had a President who would take whatever action, and spend whatever money, is necessary to solve it. Quickly, not after years of prodding. Perhaps that makes me a Democrat.

Is there anyone who thinks that poor kids shouldn't get vaccinated? Is there anyone sick and tired of seeing his tax dollars going to wasteful, overpaid bureaucrats who fritter away their days inoculating children against disease? Is there anyone who believes this is a matter best left to the private sector? That tax cuts can take care of it? That "a thousand points of light" will shine it away? That giving shots to 2-year-olds only encourages welfare dependency? That preventing the spread of measles and polio is European-style "social engineering"?

Let those people vote for George Bush. ●

#### THE ROADRUNNER LITTLE LEAGUE JUNIOR ALL STARS

● Mr. DOMENICI. Mr. President, with the World Series just around the corner, I want to take a moment to talk baseball on the floor of the Senate. You have not seen a team from New Mexico in the World Series for one very good reason: We do not have a major league baseball team in New Mexico. However, I want to assure you that we take baseball very seriously in my State.

Because we have no major league team in New Mexico, we therefore follow our local teams very closely and with the same passion that larger cities devote to the major leagues. We follow the farm team for the Dodgers, the Albuquerque Dukes—a team I pitched for many years ago—and we follow our college, high school, and, yes, little league teams with pride.

With that in mind, I would like to take a moment to bring to the attention of the Senate an outstanding little league team from my hometown of Albuquerque, NM. The Roadrunner Little League's Junior All Star Team has just won the title of State champions in the 13-year age group. This team went undefeated in district and State tournament play, and became New Mexico's representative to the regional championships in Green Valley, AZ.

Although they were eliminated in the tournament by the Arizona team which eventually became the national champions, I wanted to take this opportunity to congratulate them for their outstanding play. The team's final All Star record was 10 wins and 2 losses.

The members of the 1992 team are: Ambrose Alday, Brad Beitler, Matt Byers, Kyle Evans, John Gabaldon, Kyle Halle, Chris Jackson, Chad Montouri, Steve Otero, Jason Padilla, Tod Piskorski, Tim Sturdy, Bret Winfield, and Chris Wilken. The team was coached by John Cronican, Bryce Gilbert, and Darryl Cox.

I salute the players and coaches of the Roadrunner Junior All Stars, and I am pleased to bring their accomplishments to the attention of the Senate. ●

#### PERU

● Mr. DURENBERGER. Mr. President, I rise to reflect on recent events in Peru and United States policy responses to them. The suspension of democracy in Peru last April raised many concerns here and abroad about the future of democracy not only in Peru but also throughout Latin America.

The United States and the international community denounced the "auto-golpe" or "self-coup". The people of Peru, on the other hand, seem to have overwhelmingly supported it.

Notwithstanding our condemnation of President Fujimori's actions, we nevertheless expressed some appreciation of the difficult circumstances presented President Fujimori by Peru's

exceptionally violent terrorist insurgency as well as an essentially non-functioning state system.

Mr. President, I believe it is imperative that in considering the post-coup options, we develop a more thorough understanding of Peruvian reality.

Recent testimony before a subcommittee of the House Foreign Affairs Committee provides some insight into Peru's lack of a functioning, modern state and democracy as we generally understand it. I would like to quote at some length the testimony of Lt. Gen. William Odom, who has some expertise on the matter.

"The weak and corrupt character of the Peruvian state is so great that we should be surprised that the Sendero Luminoso did not overthrow it some time ago. There is virtually no Peruvian state. Rather, cliques of oligarchic elites manipulates the shell of a state to their private advantages.

"A modern state, as most Americans conceive it, has the administrative capacity to provide a modicum of law and order countrywide, a strong capacity to tax, a reasonably responsive system of courts, and various other such structures so common in North American and European states.

"The state in Peru hardly deserves the name. It cannot effectively collect taxes, deliver law and order, provide legal services, roads, schools, public health service, sanitation, etc. At the same time, the state owns more than 200 major businesses, such a large part of the industrial and commercial sectors that free enterprise can hardly be said to exist.

"The Peruvian economy is only slightly less statist than the old Communist systems in East Europe. In the agrarian sector, the state owns virtually all the land, and the peasants' use and holding are not based on a solid legal footing \* \* \*"

I would suggest to my colleagues that it would be useful for us to consider that Fujimori's actions in suspending democracy, while objectionable on the face of it, may have been necessary in order to save the country, not only from Sendero, but from itself.

I hasten to add, however, that the jury is still out on that question. Much will depend on where Fujimori takes the country next.

The recent capture of Sendero leader Abimael Guzman gives the government and people of Peru an enormous boost in their efforts to contain and hopefully defeat Sendero Luminoso. Fujimori understandably points to Guzman's capture as a vindication of his suspension of democracy.

If he now takes the country on the road to building a better democracy, he will capitalize on a great opportunity. If, however, he moves to consolidate his authoritarian rule, he risks losing all he might otherwise have gained.

The elections that have been scheduled for November 22 will be an impor-

tant test. It is important that Peru build a new democracy better than its predecessor.

On the economic front, Mr. President, Peru is making good progress on implementing significant economic liberalization policies, including slashing import tariffs, reducing the deficit, and attempting to cut the size of government. During his recent visit to the United States for meetings with the IMF, Peruvian Finance Minister Carlos Bolona emphasized that Peru continues to successfully pay down its international debt, despite its external economic problems. Indeed, Peru remains on schedule to repay its arrears to multilateral lending institutions.

During his visit, Mr. Bolona also stressed Peru's ongoing efforts to privatize the heavily statist economy. I would also remind my colleagues of the vote of confidence in Minister Bolona's efforts from the Inter-American Development Bank, which recently approved a \$220 million loan. Peru faces an uphill economic battle, and they are making some sound decisions under very difficult circumstances.

Regarding the Sendero insurgency, Mr. President, there can be no doubt whatsoever of the overriding imperative of defeating these Maoist terrorists. Assistant Secretary of State Bernie Aronson has referred to Sendero's potential for destruction as the third holocaust, after the Nazis and the Khmer Rouge. Failing to win the battle against Sendero would deprive Peru of any hope for the future.

There are many paths to this objective. It is not my intention here to discuss at any length what road Peru should take. I would, however, call to my colleagues' attention the September 23, 1992 hearing of the Western Hemisphere Subcommittee of the House Foreign Affairs Committee, during which this very question was among the main issues discussed.

In conclusion, Mr. President, let me note that Peru confronts myriad challenges—defeating the Sendero Luminoso; eliminating the causes that gave rise to that movement; establishing a fully functioning democracy; building effective institutions of state; eradicating drug trafficking; and many others. It is in our interest to help the people of Peru meet these challenges.

We should be willing to work together with President Fujimori, even more so if the Peruvian people rally around a course of action under his leadership. It is folly for us to completely write off Peru because it does not meet some standards or criteria set out in foreign aid legislation—criteria, I might add, that Peru probably couldn't have met prior to the coup.

Mr. President, we should work with Peru to help that country build a better, more stable and prosperous future. We must be creative and flexible in our approach, and not bound by unrealistic

expectations. Combating Sendero Luminoso and creating a real democracy and a market economy are not easy jobs. It will require time, resources, and creativity in order to meet these challenges.●

#### CLARIFYING INTENT OF SECTION 6 OF S. 1392

● Mr. MCCAIN. Mr. President, as a principal sponsor of S. 1392, I wish to clarify the intent of section 6(b), regarding criminal contempt actions. As a result of this section, the FTC would have only two manners in which to obtain authority to bring criminal contempt actions: First, to the extent that current law allows a court to appoint an FTC lawyer as an attorney for the United States under rule 42(b) of the Federal Rules of Criminal Procedure, and second, to the extent that an FTC lawyer is appointed as a special assistant U.S. attorney pursuant to this section.●

#### FAIR USE AND MUSICAL PARODIES

● Mr. LEAHY. Mr. President, the Senate yesterday approved a bill originally introduced by Senator SIMON and me to amend the fair use section of the Copyright Act with respect to the use of unpublished materials.

It has come to my attention that another fair use issue—concerning parody and, in particular, musical political satire—may warrant attention in the next Congress. From Mark Russell to the Capitol Steps to the countless Gridiron-type parody shows in communities across our Nation, musical political satire is part of a grand American heritage.

The issue is raised by a recent court decision that could chill musical political satire. That case, *Acuff-Rose Music versus Campbell* (6th Cir., Aug. 17, 1992), appears to take such a narrow view of fair use in the context of musical parody that political satirists could start to find themselves in court more than on stage.

Political speech—including political satire—is at the core of our right to freedom of expression. The first amendment prohibits the Government from restricting speech, particularly when the speech is offensive. It protects the rights of all Americans to speak their views and to voice their displeasure with the Government. Parody is one of the most effective means for communicating that displeasure and restrictions on the art form should be carefully scrutinized.

Of course, I am and always have been a committed defender of the rights of copyright holders and am keenly aware that we cannot afford to open the fair use door too wide. But an inquiry into the issue of fair use and parody may well be appropriate in light of the

*Acuff-Rose* case. I look forward to exploring this issue in the next Congress.●

#### MENTAL ILLNESS AWARENESS WEEK

● Mr. SIMON. Mr. President, October 4-10, 1992, has been designated by the Congress as Mental Illness Awareness Week. For the last several years, I have introduced a resolution in the Senate each year to set aside a week to increase our understanding of the heavy burden mental illness places on society and to sensitize all Americans to the crucial need to combat the stigma that those with mental illness and their families must endure.

Mr. President, mental illness is truly an epidemic in the United States. At least 1 of every 5 Americans will suffer a period of mental illness during their lifetimes. The National Institute of Mental Health estimates that approximately 50 million Americans have diagnosable mental disorders.

Youth is no protection against mental illness. At least 1 out of 8 children will suffer an episode of mental illness during adolescence. Among the elderly, mental illness is even more prevalent. An estimated one-third of older Americans have significant symptoms of mental disorders.

Mr. President, if mental illness is the primary epidemic, the stigma that comes with it is the secondary epidemic. It is a more insidious epidemic, with both overt and subtle negative effects. It is true that the law of the land prevents discrimination against persons with mental illness, but few of us would deny that the powerful stigma associated with mental disorders often interferes with the delivery of services and therapy that are essential to allow persons with mental illness to recover and lead productive lives. Scientific and medical advances help us understand and treat the first epidemic. Any ground we win in the battle against the second is hard fought.

Mr. President, I was honored to participate in a hearing chaired by the distinguished senior Senator from Massachusetts last month at which several witnesses courageously told of their struggles against mental illness. One of them was Rod Steiger, one of the finest actors of our time.

Mr. Steiger spoke eloquently of his 10-year battle against serious depression and especially of his early reluctance to seek help. He knew that the minute he asked for help his relationships with friends, professional colleagues, and the public would be jeopardized because of the stigma associated with mental illness.

The most revealing moment of Mr. Steiger's testimony came, I believe, in his response to my question about whether he would recommend that others who suffer from mental illness "go

public." His answer was predictably honest and direct. He said, in effect, that he thought others should do so only if they have the security—financial and otherwise—to face down the misconceptions and prejudices of others and to cope with the difficulties the stigma inevitably will create.

Mr. President, I know it is a small step for the Congress to set aside this week as Mental Illness Awareness Week. But I regard it as more than a mere gesture. I hope it will help bring to all Americans a new awareness and empathy that will help lead to real advances in both our understanding of mental illness and our efforts to erase the misconceptions and prejudices that lead to the stigmatization of those who suffer from mental disorders and their families.●

#### THE ANTIDUMPING STATUTE

● Mr. SASSER. Mr. President, earlier this week, my colleague from New York spoke extensively about our antidumping statute and the need to amend it. The Senator has deep convictions and is serious about his strongly held beliefs. Nevertheless, I feel compelled to set the record straight for myself, the people of Tennessee, and the people of America.

First and foremost, the Senator's amendments to the energy bill and the tax bill are private relief measures. The beneficiary, Smith Corona Corp., announced, in July, its planned shut-down of its New York assembly operation, the lay-off of 875 workers, and its relocation to Mexico. This was reaffirmed most recently in Smith Corona's September 28, 1992 Form 10-K.

No matter what happen to my distinguished colleague's measure, it will not bring back or save those 875 jobs. But, enactment of his proposal will threaten 800 high paying highly skilled Tennessee jobs. The paradox is that the Senator says the issue is jobs but is willing to sacrifice Tennessee jobs without a guarantee of saving even one New York job.

My colleague has called Smith Corona's shut-down, in New York a tragedy. I agree. But it was not unexpected because Smith Corona transferred its production base to Singapore in the late 1980's. Consequently, the Cortland, NY factory became an industrial dinosaur with too much capacity and too little production.

Despite its claims, Smith Corona is not the last American factory of the last American manufacturer of consumer typewriters. Brother Industries has manufactured portable electric typewriters in Bartlett, TN, for more than 6 years. The Commerce Department has intensively and exhaustively investigated this factory and concluded that it is not a screwdriver or snap together operation. The Court of International Trade recently ruled

that the Bartlett factory was a manufacturing facility.

The tragedy is that Brother, with 650 manufacturing workers in Tennessee, receives absolutely no credit or recognition for the large and substantial risks taken to establish a U.S. manufacturing presence and to compete head-to-head in the United States with Smith Corona. What is most ironic is that, as Brother moved its production base to the United States, Smith Corona started moving out. As a result, Brother's United States-manufactured typewriters must now compete against an imported product from Smith Corona's Singapore factory.

While relocating its manufacturing base to Singapore, Smith Corona has increasingly sought to restrain competition by expanding the antidumping duty order restrictions on Brother and other manufacturers. At every turn, Smith Corona has misused the administrative and legal process—including this Congress.

It has tied up the Commerce Department with endless charges and petitions, most of which stem from nothing more than Smith Corona's unfounded belief that they are somehow entitled to special treatment. All of this has been in total disregard for U.S. trade laws, and Commerce Department regulations and policies. Moreover, Smith Corona's charges have been regularly found without any basis. Smith Corona's machinations are nothing but a crass attempt to gain a competitive advantage by using the Commerce Department and the courts.

To camouflage this dismal record, Smith Corona claims that it has won with an affirmative decision eight different times. No facts or specifics are provided. Despite this claim, the facts show that Brother has won a series of affirmative Commerce Department decisions showing no or de minimis dumping margins.

The problem is that when Brother wins, Smith Corona cries foul and tries to change the law. Why cannot Smith Corona play under the same set of rules as Brother and live with the Commerce Department and Court of International Trade decisions?

One frequently heard allegation is that Brother is guilty of predatory pricing. As we all know, predatory pricing is selling at a low price—perhaps even below production cost—to increase market share. A trip to a local retail store will demonstrate this charge is totally specious. Smith Corona's Singapore-manufactured portable electric typewriters are regularly sold below \$100, often below \$95, and sometimes even below \$90. In contrast, the competing Brother model is retail priced at approximately \$110. If anything, the low-ball prices are those of Smith Corona. But that is to be expected because, as the Commerce Department has found, Smith Corona is

dumping typewriters from its Singapore factory.

Further evidence that Smith Corona's predatory pricing charges a fiction can be seen from a comparison of market share. For the past 4 years, Smith Corona has consistently claimed 50 percent or more of the portable electric typewriter and personal word processor market, compared to Brother's 25 to 30-percent market share. If Brother was engaged in predatory pricing, presumably Smith Corona would have lost market share.

Another curious charge is that Brother is selling below cost. There is no evidence to support this allegation. In fact, when Smith Corona formally raised such a charge several years ago, Commerce rejected it outright after reviewing Brother's cost data. Moreover, the below cost sales charge does not make much sense. A company, whether it is Brother or Smith Corona, cannot remain in business long if it is regularly selling below its own costs.

Smith Corona counters these facts by claiming that Brother's U.S. sales are subsidized by sales in a protected home market. Attempts to tie the below cost sales charge to the protected home market theory cannot be squared with the facts. The profits on sales of a few thousand Brother home market typewriters each year cannot conceivably subsidize losses on Brother sales in the United States. The money is simply not there.

Another commonly made charge is that Brother has been a continuous dumper and has never been forced to comply with the dumping orders. This charge is not only false but is also an insult to the Commerce Department, which has regularly conducted administrative reviews of Brother.

For 4 years running, from May 1981–April 1985, Brother was found to have a zero or de minimis dumping margin. In the following year, May 1985–April 1986—the most recent year for which results have been scrutinized by the Court of International Trade for accuracy—Brother's dumping margin was 2.33 percent, almost all of which resulted from the rapid appreciation of the yen following the September 1985 Plaza Accords.

One year later, beginning in June 1987, Brother began manufacturing portable electric typewriters in the United States and stopped importing. The facts show that Brother has been carefully investigated by Commerce with few, if any, less than fair value sales being found. These results hardly justify the statement that the dumpers have never been forced to comply with the dumping orders.

Apart from dumping, many of the charges by Smith Corona have centered on Brother's alleged circumvention of the *Portable Electric Typewriters From Japan* antidumping duty order. To start with, there is no cause and effect

relationship, as Smith Corona has alleged, between passage of the anticircumvention provision in the Omnibus Trade and Competitiveness Act of 1988 and the establishment of the Brother Tennessee factory. In fact, the factory had already been producing portable electric typewriters for fourteen months when the provision was enacted.

While acknowledging Brother's U.S. presence, Smith Corona degrades the Bartlett factory by labeling it a phantom factory. Presumably, this means that the 650 Americans who work there are phantom workers. If anything, Brother's Bartlett factory is a good example of a modern, well-designed facility, occupying 185,000 square feet. Both the Court of International Trade and the Commerce Department have made glowing comments about the factory. For example, Commerce has written:

Brother has invested significantly in its U.S. production facilities, both in terms of capital and labor. Brother has made investment in plant and equipment indicative of the magnitude of its U.S. operations. We also note that Brother has a U.S. production work force that is significant in size which, in conjunction with its substantial capital investments, is a further indication of sufficient production activity.

For those still in doubt, Brother will provide a plant tour. Seeing is believing. The screwdriver factory charges trumpeted by Smith Corona are solely designed to distract the listener from the facts and to create undeserved sympathy for Smith Corona.

Another of Smith Corona's false contentions is that Brother's Tennessee factory consists of only temporary assembly jobs. This is an insult to the hard working Tennesseans who have built their lives around the Brother plant. It is utter nonsense to call these people—as well as those working for the various parts suppliers in neighboring States—temporary workers.

Further evidence of Brother's strong commitment to Tennessee is the steady growth, over the past 6 years, in manufacturing jobs. As production has expanded and new products have been introduced, Brother has gradually added jobs reaching the level of 650 manufacturing workers. My colleague from New York justifiably feels concerned about the workers in his own State. But it is insulting to the good people of Tennessee to degrade their positions and jobs. If this private interest legislation had been enacted, their jobs would have been in jeopardy. Yet, there is no guarantee that even one New York job would be saved by his amendments.

We have also heard the bogus charge that Brother simply transplanted its assembly line from Japan to Tennessee. The facts are to the contrary. The \$21 million investment and employment of 650 workers should dispel all doubts about the Bartlett factory. And, if that is not persuasive enough,

the Commerce Department, which has visited the factory and exhaustively investigated it, has written:

Brother makes considerable component purchases from U.S. and third country suppliers, and adds value through the fabrication and assembly process. In addition to the purchase of raw material, Brother adds value through assembly, engineering, labor and quality control. For example, the purchase of a circuit board from a U.S. supplier represents more than a purchase of a plastic board, it also represents Brother's fabrication of that plastic into a component assigned to function in a completed PET.

As we all recognize, the real issue should be people and jobs, not special interest profits. Smith Corona has made this a personal battle, specifically targeting Brother. None of us would deny that the anticircumvention provision should be scrutinized. And, if it needs changing, we should change it.

However, this is not the way to legislate. The proposal of my colleague from New York amounts to disparaging hard-working Tennesseans who produce well respected products which are sold at competitive prices.●

#### TRIBUTE TO CARLTON LARSON

● Mr. CONRAD. Mr. President, I rise today to share with my colleagues a significant accomplishment of one of my young constituents. Carlton Larson of Dickinson High School in Dickinson, ND, is the winner of the seventh annual national Citizen Bee competition conducted by the Close Up Foundation.

The Citizen Bee is an intense competition involving written and oral exams on current world events, American history, geography, government, and economics. This year more than 130,000 students from 3,700 high schools throughout 50 States, the District of Columbia, Guam, the Virgin Islands, and the Department of Defense Dependent Schools took part in the competition. In the 2-day national final competition in Washington, DC, Carlton was joined by 123 other national finalists. These students answered questions that I am certain would be difficult for most adults and probably most Members of Congress. To all of those who competed and particularly the finalists, I extend my heartiest congratulations for all of their hard work and effort. I ask unanimous consent that a list of all the finalists be printed at the end of my statement.

With so much attention focused on the ills of American education, it is a pleasure for me to bring to my colleagues' attention Carlton Larson and his accomplishment, as well as the other talented students who took part in the Close Up Foundation's Citizen Bee. The students are not the only hard working participants in the Citizen Bee, their parents and teachers and the staff of the Close Up Foundation also have dedicated many hours to the various levels of competition. In particu-

lar, I want to express my gratitude to the parents of these students. The support and the active role they have taken in their children's education shows and undoubtedly has made a difference in their children's success.

There are many others who should be thanked as well; however, I want to recognize the commitment of the local, State and national sponsors who helped to make this educational opportunity possible, particularly American Honda Foundation, KPMG Peat Markwick, and Kraft General Foods. I also proudly mention the North Dakota sponsors—the North Dakota Department of Public Instruction, American Legion Lloyd Spetz Post No. 1, Community Access TV, Inc., North Dakota Bar Foundation, Inc., North Dakota Heritage Center, Alex Stern Family Foundation, Super Valu Stores, Inc., Bismarck, TMI Systems Design Corp., Dickinson, United Printing, and U.S. WEST.

To conclude, Mr. President, I know all of my colleagues join me in expressing congratulations to Carlton. He and his parents should be very proud of his outstanding accomplishment. I know my colleagues join me in wishing him and the other Citizen Bee finalists continued success in their educational and civic pursuits.

#### CITIZEN BEE NATIONAL FINALISTS

Alabama: Nathan Good, Madison; Mary Mitchem, Montgomery; Anthony Rickey, Huntsville.

Alaska: Matthew Wright, Anchorage; Anna Lee Hewko, Eagle River.

Arizona: Sumit Daftuar, Mesa; Lance Jolley, Mesa.

Arkansas: Rocky Tsai, Fayetteville; Robert Frazier, Malvern.

Northern California: Jonathan D. Matthews, Kentfield.

Southern California: John T. O'Rourke, La Canada; Mark A. Palomera, El Monte; Jason Barkham, Los Angeles.

Colorado: Brad Q. Boyd, Delta; Kristen S. Malinowski, Heritage.

Connecticut: Derek Mello, Bristol; Christopher Borowski, Shelton.

Delaware: Eric Pusey, Dover; Frank Yoon, Wilmington.

Department of Defense Dependent Schools—Europe: Fay Yarbrough, Osterholtz, Germany.

District of Columbia: David Reich.

Florida: Marcos Cornillot, Miami; David Sutton, Fort Lauderdale; Thomas Pindur, Candler.

Georgia: Justin Label, Alpharetta; James E. Aquirre, Columbus.

Guam: Billyscott Bernardo, Mangilao; Rayesh Sharma, Agana.

Hawaii: William Cobb, Kailua; James Nakayama, Hilo.

Idaho: Christine Bettis, Boise; Stephen Jenkins, Boise.

Illinois: Michael P. Ryan, Oak Park; Bryan P. Duray, Northlake.

Indiana: David Ralston, Newburgh; Christopher Wachs, Mishawaka.

Iowa: Nathan Smith, Mt. Ayr; Shane Bodrero, Davenport; Anne Pitts, West Des Moines.

Kansas: Cyrus C. Mody, Lawrence; Casey Markee, Towanda.

Kentucky: Joe Wong, Winchester; Mike Walker, Winchester.

Louisiana: Micheal C. Aguilard, Lafayette; John Ranken, Baton Rouge.

Maine: Chesley Horman, Augusta; Sean Kearns, Kennebunk.

Maryland: Kieu Luu, Greenbelt; Vishnumohan Jejjala, Frederick.

Massachusetts: Michael H. Shannon, Reading; Johnny G. Su, Northborough.

Michigan: Maya Kobersy, Sterling Heights; Christopher Barkan, Redford; Bill Craighead, Birmingham; Enrico Sobong, East Grand Rapids.

Minnesota: B.J. Priester, St. Paul; Daniel Heider, St. Paul; Jared J. Abbot, Bemidji.

Mississippi: Stephen Commiskey, Jackson; Stephen Gent, Gulfport.

Missouri: Andrew Tellez, Florissant; Aaron Whitmer, Piedmont.

Montana: Marcus Bartlette, Chinook; Brian Popiel, Bozeman.

Nebraska: Beth Kirschbaum, Omaha; Jonathan Rehm, Lincoln.

Nevada: Dean Armstrong, Las Vegas; Jordan Siegel, Reno.

New Hampshire: Mark Laliberte, Manchester; Rob Pelkey, Concord.

New Jersey: Ryan B. Caveney, Millburn; Matthew S. Purdue, Tuckerton.

New Mexico: Shelly Lee, Deming; Brian Haines, Las Cruces.

New York: Joshua Kamens, Queens; Michael R. Vaas, Adams; Jason A. Randa, Houghton; Giancarlo DiPerro, Lake Ronkonkoma.

North Carolina: George Roussios, Asheville; James Newlin, Graham; Amy Coulter, Canton.

North Dakota: Carlton F.W. Larson, Dickinson; Max M. Schanzenbach, Jamestown.

Ohio: Joshua Huck, Broadview Heights; Brent Marinelli, The Plains; Matthew W. Shepherd, Tiffin; Matthew P. Gillingham, Wyoming; Kimberly J. Paulus, Carroll; Zachary T. Talarek, Elyria.

Oklahoma: De Vu, Oklahoma City; Michael Cress, Choctaw; Willis Jones, Stigler.

Oregon: Morgan Allen, Albany; David Owen, Chiloquin.

Pennsylvania: David Shannon, Portage; Melissa Nibert, Clymer; Brian Dougherty, Shippensburg.

Rhode Island: Travis Glasson, Providence; Allan Shaw, Woonsocket.

South Carolina: John C. Phillips, Jr., Spartanburg; Dennis W. Jowers, Anderson.

South Dakota: Jason Stverak, Rapid City; Chad Pekron, De Smet.

Tennessee: Brad Endicott, Clarksville; John Henderson, Clarksville.

Texas: Chris Kratovil, Irving; Massoud Javadi, Houston; Pete Ferrier, Houston; Naresh Desireddi, Austin.

U.S. Virgin Islands: Marcotte Anderson, St. Thomas.

Utah: James Melton, Jr., South Jordan; Michael Hoggan, Salt Lake City.

Vermont: Tim Richmond, Jericho Center; Ben Gutman, Burlington.

Virginia: Zachary Devore, Harrisonburg; Frances Dabney, Lynchburg.

Washington: Joshua Greene, Kennewick; Matthew Buffaloe, Kennewick.

West Virginia: Matthew Minney, Glenville.

Wisconsin: Bryan Lauer, Wauwatosa; Joshua Radl, Oshkosh.

Wyoming: Marie Kopack, Rock Springs; Zeke Paxton, Gillette. ●

Awareness Week, and I would like to take this opportunity to express my support for the activities planned during this week as well as my gratitude for the year-round efforts of many individuals and organizations that provide advocacy services to Americans with mental illness.

We know that mental illness is actually a spectrum of diseases that affects more than 31 million Americans, including 3 million children. It costs American businesses over \$130 billion a year. Yet, four out of five people who need treatment for mental illnesses don't get it.

What's worse, Mr. President, is the human toll: People turned down for jobs, turned away from housing, turned out from insurance companies, and denied the opportunity to rebuild their lives in the community. All because of fear, ignorance, stigmas, and patronizing attitudes about what mental illness is. Just because a person suffers from a disability does not mean he or she should suffer a loss of dignity.

We've begun to change those patronizing attitudes, particularly with the enactment of the Americans With Disabilities Act. I've said many times that the day Congress passed the ADA was the proudest day of my public life. The ADA says no to fear, no to exclusion, no to stigmas, and yes to inclusion, yes to empowerment, and yes to opportunity. It tears down the barriers and opens the doors of opportunity for all people with disabilities, including hidden disabilities. There are those who tried to exclude mental illnesses from the ADA, but the whole disability community came together and said no. Now it's the law. Attitudinal barriers have begun to fall in the marketplace and in the workplace.

We know that we can't just pass a law and expect attitudes to change overnight. It's going to take time, but the principles underlying the ADA have laid the groundwork for a national disability policy based on inclusion, not exclusion.

Mr. President, this national disability policy is already coming together. Here are a few examples where we can see this new attitude.

The newly adopted Rehabilitation Act Amendments of 1992 were drafted recognizing that families and natural supports can play an important role in the success of vocational rehabilitation, if the individual with a disability requests, desires, or needs such supports. The Rehab Act also more clearly adopts the philosophy of the ADA and increases vocational training eligibility for people with mental illnesses. Too often under the old law, people with severe mental illnesses were presumed to be too disabled for training, and they were excluded from treatment. The new law presumes that people with mental illnesses can learn the job skills and training they need, just like everybody else.

With regard to health care, most insurance plans do not sufficiently cover mental health services. In addition, preexisting condition clauses turn jobs into prisons, by requiring that an individual with a mental illness stay in their present job to ensure continued coverage of their mental health care needs.

That too has begun to change. Health care reform will be a long, uphill fight, but we've already seen legislation that not only outlaws preexisting conditions, but ensures that any reform will cover treatment for mental illness just like any other illness.

The spirit of the ADA is reaching out to medical research, as well. Starting next year, the National Institute of Mental Health [NIMH] will no longer be treated as the poor cousin of the National Institutes of Health [NIH]. The transfer of NIMH to NIH will help us to better use science to address individual, family, and national needs.

Mr. President, the future of our Nation's disability policy depends on individuals and organizations, as well as the Government, working together to bring the principles of the Americans with Disabilities Act into every aspect of society. During Mental Illness Awareness Week, I hope we can keep in mind the hopes and dreams of those persons possessing the "hidden disability," mental illness. ●

#### U.N. CONFERENCE ON ENVIRONMENT AND DEVELOPMENT

● Mr. GORE. Mr. President, I rise today to introduce into the RECORD a report compiled by my distinguished colleague from Rhode Island, Senator JOHN CHAFFEE and the U.N. Conference on Environment and Development, the Earth summit, held in Rio de Janeiro in June of this year. I would like to express my sincere gratitude to the members of the delegation. All members dedicated themselves to understanding the many and complicated issues that were on the agenda at the Rio Conference and in the negotiations preceding the Conference. And I would particularly like to recognize the leadership of my good friend Senator CLAIRBORNE PELL. As a member of the United States' delegation to the Stockholm Conference on the Human Environment 20 years ago, his guidance, understanding and vision were unparalleled.

The Earth summit was truly a watershed event. Never before had so many world leaders come together—compelled by common concerns and determined to bind together in a common commitment to action. The concerns? Around the globe the manifestations of our failure to meet pressing human needs are evident. Every day, some 40,000 children under the age of 5 die from preventable disease; every year, workers around the world fall ill and die because of unhealthy working con-

#### MENTAL ILLNESS AWARENESS WEEK

● Mr. HARKIN. Mr. President, we are approaching the end of Mental Illness

ditions while many others—unable to find employment—suffer another kind of death. At the same time, the natural resources upon which any effort to address these problems depends are in grave jeopardy—soils have become salinized and unable to bear crops; forests are disappearing at an unprecedented rate; species are being driven to extinction 1,000 times faster than at any time since the age of the dinosaurs; the air is laden with noxious chemicals and fresh and ocean water resources have been poisoned.

To most of the leaders gathered in Rio, the imperative was clear: We need to find ways of promoting economic growth and development that are not destructive of the environment. Unfortunately, however, this message was lost on George Bush. Alone among the industrialized nations of the world, the United States took the position that no commitment to action was necessary. On climate change—we alone refused to agree to binding action to reduce greenhouse gas emissions. On biodiversity—we virtually ignored the negotiations and then stonewalled the world because the final text contained provisions that were not to our liking. On forests—we claimed that implementing sustainable management practices was a priority for us, but then insisted that only tropical forests were in trouble so the burden should fall on developing countries.

In obstructing progress on these issues, the President not only failed to appreciate the magnitude of the environment and development problems we face, but also was blind to the magnitude of the economic opportunity that taking these problems on will afford. The fact of the matter is that stemming greenhouse gas emissions can be done most effectively by improving efficiency in every sector of the economy and improved efficiency means less waste, enhanced productivity, and improved competitiveness. And, the continued growth of one of our most promising industries—the biotechnology industry—is dependent upon preservation of biodiversity around the world. Contrary to the administration's rhetoric, the agreements that were being negotiated as part of the UNCED process were critical to, not antithetical to, our economic interests.

Our trading partners were well aware of this. They are gearing up to capture the huge markets that are opening for products and processes that promote environmentally sound economic development. The market for those technologies is at \$200 billion per year and growing. If the United States remains on the sidelines on international environmental issues, we risk having these markets closed to U.S. firms.

Perhaps even more disturbing than the President's failure to promote our economic interests in Rio, was his

utter failure to represent the real concerns and aspirations of the American people. Citizens around the world travelled to Rio to express their own commitment to action. U.S. citizens were there by the thousands also. They were parents concerned about their children's future; they were children committed to cleaning up the environment and to preventing further destruction. They had hoped that their President would amplify their voices. Instead he stifled them.

Largely because of the President's intransigence, many of the agreements concluded in Rio are only nonbinding statements of policy and intention. However, the seeds of hope were sown in Rio. The world will move forward. It is my most sincere hope that the United States will again lead the community of nations as it struggles to address these pressing problems. Our children's future, our ability to live in peace and to prosper with our neighbors, and the health and vitality of our planet depend on it.

The report follows:

UNITED NATIONS CONFERENCE ON ENVIRONMENT AND DEVELOPMENT—RIO DE JANEIRO, JUNE 3-14

(A report by Senators Al Gore, Chairman and John Chafee, Vice Chairman of the Official Senate Delegation, September 18, 1992.

(Members of Official Senate Delegation: Senators Gore, Chafee, Baucus, Graham, Kerry, Lautenberg, Pell, Pressler, Symms, Wellstone, and Wirth)

I. BACKGROUND

A. *United Nations Conference on Environment and Development*

In December of 1989, the United Nations General Assembly adopted Resolution 44/228, calling for a major, comprehensive international conference on the global environment and development, to be held in Rio De Janeiro, Brazil, in June, 1992. The United Nations Conference on Environment and Development (UNCED) was established by the resolution to build upon and commemorate the 20th anniversary of the United Nations Conference on the Human Environment, held in Stockholm in 1972. The Stockholm conference led to a Declaration of Principles (the Stockholm Declaration) to preserve and enhance the human environment.

The central purpose of the UNCED was to identify how to address increasingly severe global environment and development problems. The conference would confront the pollution and degradation of land, water and air resources threatening to intensify as world population increases—eventually more than doubling—into the next century. And, the conference would recognize that at the same time, current development patterns are widening the gulf between rich and poor and that anticipated population growth would be most pronounced in those regions of the world with the fewest economic opportunities. The goal of UNCED therefore was to bring together heads of state to begin to chart a course for development that would better meet the needs of people around the world while preserving the natural resource base on which sustained development depends. UNCED was and continues to be referred to as the "Earth Summit".

Maurice Strong, a Canadian businessman who had served as Secretary General of the

Stockholm Conference in 1972, was selected to serve as Secretary General of the UNCED. Headquartered in Geneva, the Secretariat played a key role in managing and moving forward the UNCED's ambitious agenda. As outlined in the Resolution establishing the UNCED, the primary issues to be addressed included:

Improving the environment of the poor in urban and rural areas;

Protecting human health and improving quality of life;

Protection of the atmosphere by combating climate change, depletion of the ozone layer and transboundary air pollution;

Protection of the quality and supply of freshwater resources;

Protection of the oceans and other seas;

Protection and management of land resources, including combating desertification, deforestation, and drought;

Conservation of biological diversity and environmentally sound management of biotechnology;

Environmentally sound waste management.

To undertake the task of crafting agreements and charting an international strategy to deal with these issues, a "preparatory committee", or Prepcom, was engaged and made open to all members of the United Nations. Most nations did take part. The Prepcom held four meetings, each lasting approximately one month, with the first in Nairobi, Kenya, in August 1990. Two subsequent meetings were held in Geneva during 1991 and a final session in New York, March 2-April 4, 1992. Tommy Koh, a former Ambassador from Singapore to the United States, chaired the Prepcom and deftly guided the negotiators from some 178 nations to agreement on action plans.

Three key documents resulted from the UNCED process:

"Agenda 21"—comprising some 40 chapters—is a comprehensive but non-legally binding action program designed to reconcile the goals of continued economic development and environmental preservation to ensure that human needs are met in a sustainable fashion.

The "Rio Declaration on Environment and Development" sets out 27 Principles that identify rights and obligations to guide world leaders in "Working towards international agreements with respect to the interests of all and [to] protect the integrity of the global environmental and developmental system."

The "Statement of Principles for a Global Consensus on the Management, Conservation and Sustainable Development of All Types of Forests" is a non-legally binding statement addressing the multiple uses and functions of forest resources.

Negotiations were also carried out on simultaneous but separate tracks on two major international conventions, which were presented for signature at UNCED: a global climate change convention and a biological diversity convention.

B. *Climate change convention*

The negotiating process aimed at producing a draft convention on climate change in time to be presented for signature at the Earth Summit was initiated pursuant to UN General Assembly resolution 45/212, which was adopted on December 21, 1990. The Intergovernmental Negotiating Committee (INC) created by the resolution held five negotiating sessions: in Chantilly, Virginia, February 4-14, 1991; Geneva, Switzerland, June 19-29, 1991; Nairobi, Kenya, September 9-20, 1991; Geneva, December 9-20, 1991; and New York

City during the last two weeks of February, 1992. Some 130 nations participated in the sessions, in addition to more than a dozen affected United Nations agencies and non-governmental organizations (NGOs).

The INC negotiations were supported by the findings of the Intergovernmental Panel on Climate Change (IPCC) which was established in November 1988 by the United Nations Environment Programme (UNEP) and the World Meteorological Organization (WMO) "to carry out internationally coordinated scientific assessments of the magnitude, timing and potential impact of climate change." The role of the IPCC was reinforced by UN General Assembly Resolution 43/53, adopted in December, 1988, which further clarified the IPCC's objectives, and called upon all relevant organizations and programmes of the United Nations system to support the IPCC's work. The IPCC divided its work among three working groups:

Working Group I, dealing with the science of climate change, chaired by the United Kingdom;

Working Group II, dealing with the environmental and socio-economic impacts of climate change, chaired by the (former) Soviet Union;

Working Group III, the Response Strategies Working Group chaired by the United States;

and submitted its findings to the U.N. General Assembly in the fall of 1990. The major conclusions reported by the IPCC included the following:

There is a natural greenhouse effect that keeps the planet warmer than it otherwise would be;

Anthropogenic emissions of greenhouse gases as substantially increasing and will enhance the greenhouse effect, resulting on average in an additional warming of the Earth's surface;

An effective doubling of carbon dioxide in the atmosphere will produce a global mean temperature increase in the range of 1.5 degrees C to 4.5 degrees C, however, the precise timing, magnitude and regional impact of this increase cannot be predicted with certainty;

Global mean surface air temperature has increased by 0.3 to 0.6 degrees C over the last 100 years. This magnitude of warming is consistent with predictions from global climate general circulation models of anthropogenically induced changes, but is also within the range of natural variability.

The goal of the INC was to produce a framework convention on climate change, "containing appropriate commitments, and any related instruments as might be agreed upon." The Framework Convention was adopted at the conclusion of the fifth negotiating session in February, 1992, and by June 14, the convention had been signed by 153 nations including the U.S. Although specific commitments to targeted reductions in greenhouse gas emissions were sought by many parties to the negotiations, the United States and some other countries successfully resisted inclusion of these throughout the negotiating process.

### C. Biological Diversity Convention

The Biologically Diversity Convention, completed on May 22, 1992, and presented for signature at the Rio conference, was the result of four years of negotiations under the auspices of the United Nations Environment Programme. This process began on May 25, 1989, with the adoption of Resolution 15/34 by the Governing Council of UNEP, which called for the development of a legal instrument to protect the diverse biological resources of

the planet. Dr. Mostafa Tolba, the Executive Director of UNEP convened an ad hoc working group of legal and technical experts, "with a mandate to negotiate an international legal instrument for the conservation of the biological diversity of the planet." In May, 1991, the UNEP Governing Council changed the name of the negotiating body to the Intergovernmental Negotiating Committee on Biological Diversity, in part, to create a structure resembling the climate change negotiations.

Two working groups were established within the Intergovernmental Negotiating Committee to facilitate the negotiating process:

Working Group I, to examine issues such as habitat preservation, global lists of key biological diversity areas, general obligations, principles, and in situ and ex situ preservation of species; and

Working Group II, to take up such issues as financial resources, information and data, access to genetic resources, and technology transfer.

A special group to formulate and agree upon definitions was formed directly under the chairman.

Five formal negotiating sessions were held: in Nairobi, Kenya, February 1991; Madrid, Spain, June 1991; Geneva, Switzerland, November 25-December 4, 1991; Nairobi, February 6-14, 1992; and again in Nairobi, May 1992. Negotiations on the Convention on Biological Diversity were concluded on May 22, 1992 and by June 14 the Convention had been signed by 153 States.

## II. SUBSTANTIVE ANALYSIS OF THE RIO AGREEMENTS

### A. Agenda 21

A full listing of the issues addressed in Agenda 21 is provided as an addendum to this report. This analysis will highlight those issues that were particularly prominent in the UNCED discussions. By way of a general comment, it should be noted that Agenda 21 puts forth several themes and action items that, if fully implemented, could prove to be quite significant for domestic and international policy. For example, governments are called on to devise national sustainable development strategies. This undertaking could involve a review of—and highlight necessary changes in—a wide range of social, environmental and economic policies. In addition, a greater role for women at the national, regional and international levels in the design and implementation of development strategies is called for, while governments are urged to decentralize decision-making processes and afford rural, local and indigenous groups a greater opportunity for input in decisions that affect them. Governments are also called on to undertake environmental impact assessments of their own activities that may have significant environmental consequences and to facilitate community access to information important to human health or the environment.

1. Chapter 33. Financial Resources and Mechanisms:

Noting that a "substantially increased effort" is required of both developed and developing countries to finance the implementation of Agenda 21, it was agreed that:

In general, financing will "come from a country's own public and private sectors";

However, developed countries reaffirmed their previously undertaken "commitments to reach the accepted United Nations target of 0.7 percent of GNP [gross national product] for ODA [overseas development assistance]". It should be noted that the US \* \* \* not previously undertaken this UN commitment. Therefore, use of the word "reaffirm"

appears to exclude the US from the terms of this provision;

Developed countries agree to "make their best efforts to increase their level of ODA."

In addition to calling for increased funding, this chapter of Agenda 21 also identified mechanisms that could be used to provide the necessary financial and technical support. The mechanisms identified included:

The multilateral development banks, in particular, the World Bank's International Development Association (IDA); the regional and subregional development banks; and the Global Environment Facility. With regard to IDA, the document states that, among various issues and options that nations will consider in the forthcoming replenishment talks, "special consideration should be given to the statement made by the President of the International Bank for Reconstruction and Development at the Conference in plenary meeting." This statement is intended to lend support for—without expressly accepting at this time—Lewis Preston's suggestion in his address in Rio that, in addition to maintaining funding for IDA in real terms, countries should provide an additional "Earth Increment" to help the poorest countries meet the objectives of Agenda 21. With regard to the GEF, a restructuring is called for that will "ensure a governance that is transparent and democratic in nature," as well as leave open the possibility that scope of the GEF could be expanded to include global environmental problems in addition to the four that are currently within the GEF's purview.

The relevant specialized agencies, other United Nations bodies and other international organizations;

Multilateral institutions for capacity-building and technical cooperation;

Bilateral assistance programs;

Debt relief;

Private funding;

Investment;

Various forms of new and innovative financing.

Several specific pledges of assistance to fund Agenda 21 were made in Rio. The Japanese, for example, announced an increase in environmentally-related aid from \$3.1 billion during the last three years to more than \$7 billion during the next five years. The European Community as a whole pledged \$4 billion as an "initial commitment" while member states such as Germany and the United Kingdom pledged to support an increase in GEF funds from the current \$1.5 billion to \$2 to \$3 billion. Chapter 33 calls on other developed countries also to make financial commitments and to report on plans to meet those commitments at the UN General Assembly this fall.

To ensure that funds will be used in the most efficient and effective manner toward the objectives of Agenda 21, developing nations are called upon to "begin to draw up national plans for sustainable development". These plans will be reviewed and figure significantly into the decisions of potential multilateral lenders in their Consultative meetings with individual developing countries. And, these plans will help ensure that proposed development projects will be carried out in an environmentally and economically sound manner.

2. Chapter 38. International Institutional Arrangements:

This Chapter suggests means by which the activities of various intergovernmental and United Nations agencies with competence in the areas of environment and development may be better coordinated in order to fur-

ther the objectives of Agenda 21. It was generally agreed by all parties that the focus here should be on better coordination among existing bodies rather than the creation of wholly new institutions. In this regard, a strengthened role for UNEP and UNDP in such areas as environmental monitoring and assessment; information exchange; and the building of technical and institutional capacity in the developing countries was called for.

The Chapter does, however, call for a new organization that will be a part of a pre-existing United Nations' body. This new organization—the Sustainable Development Commission—is proposed to be established within the UN Economic and Social Council. The structure and function of the Sustainable Development Commission has not yet been fully detailed. Rather, final decisions are to be taken at the General Assembly in the fall of this year. It is anticipated, however, that the Commission will be the primary body for monitoring and assessing progress in the implementation of Agenda 21, the Rio Declaration, and the Statement of Principles on Forests. To this end, it will call for reports from governments and undertake its own studies and assessments.

### 3. Chapter 34. Access to Environmentally Sound Technology:

The activities proposed in this Chapter aim at "improving conditions and processes on information, access to and transfer of technology," particularly to developing countries, in order to promote sustainable development. Issues relating to the protection of intellectual property rights and to the terms of technology transfer, in particular, whether transfer would be on "preferential and concessional" terms, proved particularly contentious. The final document recognizes the importance of protecting intellectual property rights while calling on governments to identify and reduce barriers to access to technology. In addition, transfer on preferential and concessional terms is recognized as at least one option that may be pursued by parties to a transfer agreement.

In furtherance of the objectives of this Chapter, governments undertake to:

Develop international information networks which link national, subregional, regional and international systems;

Formulate policies and programs for the effective transfer of technologies that are in the public domain;

Encourage public and private sector creation of and enhance access to environmentally sound technologies;

Establish a collaborative network of research centers;

Build technology assessment capacity for the management of environmentally sound technology, including by conducting environmental impact and risk assessments;

Promote long-term collaborative arrangements, including joint ventures, between enterprises of developed and developing countries for the development of environmentally sound technologies.

### B. Rio Declaration

This document was originally intended to be an "Earth Charter"—a more hopeful and less contentious document, with the moral power of the Universal Declaration on Human Rights—to mark the beginning of a global partnership among nations to work toward sustainable patterns of development. Opposition to a document of this import by some countries, including the US, however, combined with persistent calls by the developing nations for a recognition by the developed countries of: their disproportionate

contribution to global environmental problems; a need to change consumption patterns in the North to stem further environmental destruction; and a need for developed countries to provide increased technical and financial assistance to the developing world, resulted in an impasse in the negotiations to produce an "Earth Charter". It is hoped, however, that the international community will continue talks aimed at producing an Earth Charter. In his Plenary address at the Earth Summit, Canadian Prime Minister Brian Mulroney suggested that the Rio Declaration be embraced pending the negotiation of an Earth Charter, which he called for by 1995, the fiftieth anniversary of the United Nations. This suggestion was positively received by many heads of state, although the US is expected to resist further discussion of the matter.

It should be noted that the Rio Declaration was drafted by Chairman Tommy Koh as an attempt to reconcile contentious issues. Many countries, however, expressed concern with regard to various provisions of the draft. The US, for example, opposed recognition in Principle 3 of a "right to development" on the grounds that, unless it were expressed in a more qualified fashion, this right could be used by countries to justify infractions of human rights or other rights and obligations. In addition, Israel objected to Principle 23 which calls on governments to protect the environment and natural resources "of people under oppression, domination and occupation". In the end it was decided that all countries would refrain from insisting on changes and that the document would be agreed to in the form presented by Chairman Koh. Several countries, including the US, issued interpretative statements expressing their respective understandings of the document's import.

### C. Statement of Principles on Forests

It was originally anticipated that a legally binding convention on the preservation of forests would be negotiated and agreed to in Rio. Discussions toward that end proved highly contentious, however, as the US initially insisted that the treaty should only apply to tropical forests, and as several developing countries resisted binding commitments on the grounds that they pose a threat to sovereignty and would unduly impede necessary development. Efforts to incorporate language calling for the negotiation of a legal instrument in the non-legally binding Statement that was ultimately agreed to also failed.

The Statement of Principles does recognize that forests should be "sustainably managed to meet the social, economic, ecological, cultural and spiritual human needs of present and future generations." The statement also calls on all countries to take action "towards reforestation, afforestation and forest conservation," and to carry out environmental impact assessments where government actions are likely to have significant adverse impacts on important forest resources. Failure to agree on what is entailed in "sustainable management" and to call for future talks aimed at producing a legal instrument that would define such key terms has raised concerns among many negotiators that the Statement will not prove effective in preserving forest ecosystems.

### D. Framework Convention on Climate Change

The objective of the Convention as specified in Article 2 is to achieve "stabilization of greenhouse gas concentrations in the atmosphere at a level that would prevent dangerous anthropogenic interference with the

climate system." Article 2 further specifies that such stabilization "should be achieved within a time frame sufficient to allow ecosystems to adapt naturally to climate change, to ensure that food production is not threatened and to enable economic development to proceed in a sustainable manner." Toward this end, the Parties to the Convention undertake the commitments described below. Because developed, industrialized countries are responsible for the greatest share of anthropogenic greenhouse gas emissions and are best able, financially and technically, to stem those emissions, the undertakings called for in the Convention differ for developed and developing country Parties.

Undertakings pertaining to both developed and developing country Parties:

Publish national inventories of anthropogenic emissions of greenhouse gas emissions as well as programs to mitigate and facilitate adaptation to climate change. Note that, pursuant to Article 12 of the Convention, the report required of developed country Parties is expected to be detailed in nature while only a general description is required of developing country Parties. In addition, an initial report is required of developed country Parties within six months of the entry into force of the Convention while the timetable for developing country reports is three years from entry into force;

Promote and cooperate in the development and transfer of technologies that control or reduce emissions of greenhouse gases;

Promote and cooperate in research, educational initiatives, and exchange of information relevant to climate change.

Undertakings pertaining only to developed country Parties:

Adopt national policies on the mitigation of climate change, "by limiting its anthropogenic emissions of greenhouse gases and protecting and enhancing its greenhouse gas sinks and reservoirs;"

Communicate to the Conference of Parties detailed information on policies and measures relevant to the mitigation of climate change as well as on "resulting projected anthropogenic emissions by sources and removal by sinks of greenhouse gases . . . with the aim of returning individually or jointly to their 1990 levels of these anthropogenic emissions";

Provide new and additional financial resources and facilitate the transfer of technology to developing country Parties to support their compliance with their obligations under the treaty. Pursuant to Articles 11 and 21, the Global Environment Facility will function as the mechanism for the provision of such resources and technology.

Throughout the negotiations on the Convention, the United States, alone among industrialized countries, opposed the incorporation of binding commitments to reduce greenhouse gas emissions. All other industrialized countries had either individually or jointly made commitments to reduce emissions and argued for the inclusion in the Convention of a commitment by developed countries to stabilize emissions of carbon dioxide, the primary greenhouse gas, at 1990 levels by the year 2000. In the face of persistent US opposition, these countries expressed a willingness during the course of the negotiations to accept more flexible language that would call for a stabilization of a combination of greenhouse gases and that would allow emissions to be offset by greenhouse sinks such as forests. But, the United States maintained its opposition. As a result, other industrialized countries—eager to ensure

that the US, the largest single source of greenhouse gas emissions, would become a Party to the Convention—ultimately accepted language that was devoid of binding commitments to reduce emissions. Some of these countries, however, later reaffirmed their commitments to reducing emissions by signing at the Earth Summit not only the Climate Convention but also a separate resolution which included the targets and timetables the U.S. opposed.

Because of the lack of binding commitments by developed countries to reduce emissions, Malaysia did not sign the Convention.

It should be noted, however, that the treaty does provide for a review of the adequacy of the undertakings in addressing climate change. Based on the review, the Parties are bound to take "appropriate action." Presumably, such action would include a binding commitment to reduce emissions. In addition, the White House has likened the Convention to the Vienna Convention on the Protection of the Stratospheric Ozone Layer. It is therefore fair to expect that follow-on Protocols, that will add binding commitments to the Convention, will be pursued—just as the Montreal Protocol and London Amendments added binding measures to the original framework outlined in the Vienna Convention.

Action to begin to implement the provisions of the treaty is expected to be undertaken before it actually takes full force and effect (upon ratification by 50 Parties). In particular, President Bush, in his Plenary address at the UNCED, called for the preparation of national plans by January 1, 1993, and the European Community has similarly expressed a commitment to proceed rapidly to ratification and to the preparation of national plans.

#### *E. Convention on Biological Diversity*

As outlined in Article 1, the objectives of the Convention are: "the conservation of biological diversity, the sustainable use of its components and the fair and equitable sharing of the benefits arising out of the utilization of genetic resources." Toward these ends, the Convention specifies actions aimed at conserving plant and animal biodiversity and at facilitating access to and transfer of relevant technology.

#### *Conservation Provisions:*

Parties to the Convention undertake the following measures to conserve or ensure the sustainable use of biological diversity. Note that while the commitments are legally binding, they are qualified, and Parties are bound to fulfill them only "as far as possible and as appropriate:"

Develop national strategies for conservation and sustainable use of biological diversity, including the establishment of a system of protected areas as well as the establishment of ex-situ conservation facilities, and incorporate biodiversity considerations into national decision-making;

Identify and monitor particularly important components of biological diversity and any activities that are likely to have significant adverse impacts on biodiversity;

Promote research, training and educational programs supporting conservation and sustainable use of biodiversity;

Adopt means to regulate, manage or control risks to biological diversity and human health associated with the use and release of living modified organisms;

Respect and preserve knowledge, innovations and practices of indigenous and local communities embodying traditional lifestyles relevant for the conservation and sustainable use of biodiversity;

Introduce procedures requiring environmental impact assessments of proposed projects that are likely to have significant adverse effects on biodiversity;

Promote exchange of information and notification of activities under the Contracting Party's jurisdiction or control which are likely to significantly affect adversely the biodiversity of other States or areas such as the high seas that are beyond the limits of national jurisdiction;

Promote emergency response procedures for activities or events which present a grave or imminent danger to biodiversity.

*Provisions Regarding Access to Technology:*

Facilitate access to technologies, including biotechnology, through legislative, administrative or other policy measures as appropriate, particularly to Contracting Parties that are developing countries and that provide genetic resources that are used in those technologies;

Cooperate with other contracting parties, subject to national legislation and international law, in order to ensure that intellectual property rights are supportive of and do not run counter to the objectives of the Convention;

In conjunction with other Contracting Parties, determine how to establish a clearing-house mechanism to promote and facilitate technical and scientific cooperation;

Promote the establishment of joint research programs and joint ventures for the development of relevant technologies, including biotechnology.

The Convention also calls on Contracting Parties to provide financial support and incentives necessary for achievement of the Convention objectives. In this regard, developed country Parties undertake to provide new and additional financial resources to support the participation of developing country Parties. While the Convention notes that such funds may be made available on a bilateral basis, it is anticipated that the primary financial mechanism will be the Global Environment Facility, as indicated in Articles 21 and 39. Language in Article 39 that calls for a full restructuring of the GEF, however, raised a concern among some industrialized countries, including the United States, that the Convention could be construed as contemplating some other financial mechanism, or a modification to the GEF that was not in accord with the modifications that were otherwise under way. Most countries that expressed this concern noted in separate statements upon signing the Convention in Rio that they understood the language to call for the use of the GEF as the primary financial mechanism.

The United States was alone among industrialized countries in declining to sign the Convention. In addition to our concern with regard to the GEF, we also took issue with provisions of the treaty dealing with intellectual property protections and with the treatment of modified living organisms. With regard to intellectual property protection, the White House believed the treaty could be read as calling for the subversion of such protections in order to facilitate the objective of transferring relevant technologies. Other countries did not share this concern, noting that, for example, Article 16 specifies that "In the case of technology subject to patents and other intellectual property rights, such access and transfer shall be provided on terms which recognize and are consistent with the adequate and effective protection of intellectual property rights."

On the issue of the treatment of modified living organisms, the United States dis-

agreed with other countries that "means to regulate, manage or control the risks associated with the use and release of living modified organisms resulting from biotechnology which are likely to have adverse environmental impacts", as called for in Article 8 of the Convention, were necessary.

While in Rio, William Reilly, Administrator of the Environmental Protection Agency and Head of the United States Delegation, worked with other parties through the intercession of the Brazilian government to "fix" the provisions of the Convention that were of concern to the White House. Reilly's memo to Domestic Policy Advisor Clayton Yeutter on this subject and Yeutter's immediate rejection of the overture were leaked to the media, however. These events, together with a memo that had earlier leaked from Vice President Quayle's office that was highly critical of the biodiversity negotiations, as well as lingering resentment over the US insistence in the climate negotiations that binding commitments to reduce emissions of greenhouse gas emissions be deleted, led to a collapse of the effort to modify the treaty talks and to the generation of significant, adverse publicity concerning the role of the United States at the Rio Summit.●

#### TELEMARKETING AND CONSUMER FRAUD

● Mr. COHEN. Mr. President, I rise today to speak about the issue of consumer fraud and the elderly, including scams that are perpetrated through telemarketing.

Yesterday, the Senate passed S. 1392, the Telemarketing and Consumer Fraud and Abuse Prevention Act. The legislation is now before the House of Representatives for consideration, and I hope it will approve this legislation and send it to the President for his signature.

I am pleased that the Congress is addressing the issue of consumer fraud, which is of critical importance to thousands of citizens nationwide who are being victimized by scam artists. On September 24, the Senate Special Committee on Aging, of which I am ranking member, held a hearing to highlight several types of scams being perpetrated against elderly citizens across the country.

The Committee heard compelling testimony from victims of this fraud, as well as attorneys general, consumer groups, and the U.S. Postal Service.

One of the most disturbing types of fraudulent activity that we heard about are so-called guaranteed prize giveaways. These schemes often include boiler room telemarketing operations that sell merchandise or request an advance fee in order to receive a major award. Using sucker lists with the names, addresses and telephone numbers of senior citizens, these scam artists trap seniors in their web of deception with promises of huge case awards or other prizes. After the customers send their money in, the prize never materializes or is just junk, and the customer's money is long gone.

Many States are prosecuting these operators for unfair and deceptive trade practices, but as we heard at the hearing, much more needs to be done, for as soon as they shut down in one State, they soon appear in another.

Telemarketing is just the tip of the iceberg in the scam business. These snake-oil salesmen have devised numerous ways to defraud the American public and, in particular, our older population. The Aging Committee has investigated other areas of growing concern—living trusts, home repair fraud, and mail order fraud.

The living trust scam involves the tactics of groups like the American Association for Senior Citizens, which has been charged with unfair and deceptive trade practices in a number of States, including my own State of Maine. While living trusts, if established properly, are a legitimate device used in estate-planning, the AASC and other organizations have been charged with misrepresenting the costs of probate and pressuring seniors into paying thousands of dollars for living trusts that sometimes are drafted improperly, making them worthless.

The Committee found a growing incidence of home repair scams run by unscrupulous contractors who lure senior citizens into taking out second mortgages to pay for inferior services and products. Some senior citizens signed repair contracts, secured by the second mortgages, that required interest payments as high as 25 to 30 percent. Tragically, this practice has led to home foreclosures against many senior citizens.

Finally, the committee found that mail order fraud occurred on a large scale when the Hill Brothers shoe company of Lynchburg, VA, took in hundreds of thousands of dollars in shoe orders but never delivered the shoes nor provided refunds. Over 10,000 people have lost their hard-earned money as a result. Despite Federal laws already in place to protect against mail order fraud, thousands of needy senior citizens are out of luck and will probably never get their money back.

Senator PRYOR and I will continue to hold hearings aimed at highlighting various kinds of scams that prey on the elderly. One of our main goals is to bring attention to existing and emerging fraudulent activities targeting our senior citizens in order to alert them to the dangers inherent in many of these offers, which often sound so legitimate and at times even too good to be true.

Further, we hope to assess and evaluate what the States are doing to combat these types of fraud and what role the Federal Government should play to prevent and shut down these scams. Testimony provided at the hearing pointed out the need for greater education, increased enforcement and enhanced statutory authority. As the

Florida attorney general stated in congressional testimony last spring, these unscrupulous operators will be stopped only through cooperation and coordination by State and Federal administrative and law enforcement agencies.

The legislation approved by the Senate is designed to deal with the problem of a \$40 billion a year industry—the fraudulent telemarketing operators.

Now we need to take this issue a step further and address the consumer fraud problem on all fronts, so that unscrupulous operators who defraud the American people can finally be stopped from continuing their heinous activities.●

#### THE SITUATION IN BURMA

● Ms. MIKULSKI. Mr. President, I would like to take this opportunity to remind the U.S. Senate of a deplorable situation in a small country in Southeast Asia that is being virtually ignored by the rest of the world. I am speaking about Burma, now known as Myanmar.

Myanmar's military government announced recently that it would lift the state of martial law, which has robbed the Burmese people of the most basic of human freedoms. Normally, that would be seen as good news. Unfortunately, however, the government's credibility is not the best—we remember all too well that the army promised free elections in 1990 and then promptly ignored the results.

Over the past few years, the military regime which has ruled Burma for over 3 decades has continued its abhorrent and unrelenting abuse of the basic human rights of the country's citizens. It has continued to ignore the pleas of the United Nations and the rest of the world for the restoration of democracy. And it has blatantly continued to participate in the manufacture and distribution of opium and heroin, exporting the majority of these narcotics to the United States and using the profits to buy weapons from China.

In 1990, there was a momentary glimmer of hope as democratic elections were held and the overwhelming majority of Burmese people voted for representatives of the National League for Democracy. This hope, however, quickly turned to disappointment as the State Law and Order Restoration Council [SLORC] moved violently to suppress the democratic uprising. To this day, the regime continues to hold under house arrest the freely elected leader of Burma, Aung San Suu Kyi, one of the most courageous and remarkable women in the world. In 1991, she was awarded the Nobel Peace Prize but was not permitted to attend the ceremony, forced to remain in custody as a political prisoner of the SLORC.

The human rights abuses in Burma are so atrocious and pervasive that

hundreds of thousands of Burmese have fled to Bangladesh, far and away the poorest country in Asia, just to escape the constant threat of torture, rape, murder, and slave labor. And although all those who oppose the SLORC are subject to these abuses, the Burmese Muslims have been a frequent target as the SLORC has undertaken an ethnic cleansing of the country. Muslims have lived in this region of Southeast Asia since the 12th century. They are as much a part of the culture and heritage of modern-day Burma as any other ethnic class. It is time once and for all to put an end to the practice of ethnic cleansing, whether it be in Burma, Bosnia, or any other country around the world.

Mr. President, we must not just sit back and let the situation in Burma continue. We must aggressively push for the release of Aung San Suu Kyi and all other political prisoners. The United States will soon be sending a new Ambassador to Burma. I urge my colleagues to join me in strongly encouraging him to use that position to push for the return of democracy and an end to the human rights abuses in Burma.●

#### THE YEAR OF THE INDIAN

● Mr. HARKIN. Mr. President, we are all aware of the impact that native Americans have had throughout the history of our Nation. We also recognize that now is the time to express our appreciation for their contributions to our way of life.

When the first Europeans came to the new world, they encountered native Americans with a long history of living with what nature provided. Now we should look to that model as we try to deal with the environmental issues facing us.

The contributions native Americans have made to our Nation can be easily noted. The name Iowa, as well as many other State and city names, can be traced back to native Americans. Their heritage is a fundamental part of our history. I am grateful that their culture has been preserved through the many trials of the past two centuries.

In Iowa, we honor our relationship with native Americans, and we recognize their contribution to our society. That is why I am proud to announce that Iowa has declared 1992, the Year of the Indian. I ask that all Iowans, and all Americans, salute native Americans, help celebrate their culture, and express appreciation for their many contributions to America's history.

I ask that a copy of this proclamation be printed in the RECORD.

The proclamation follows:

#### PROCLAMATION

Whereas, when Europeans arrived in the New World, they found Native Americans with a rich heritage living in harmony with their environment; and

Whereas, the name "Iowa" comes from the native people of our state and Iowa's Indian heritage is a fundamental part of our history; and

Whereas, we are grateful that Iowa's Indian people have preserved their culture, heritage and tribal traditions through the tumultuous change of the past two centuries; and

Whereas, in Iowa, we respect and honor our relationship with Native Americans and Indian tribes in our state and recognize their contribution to our society as well as their right to exist as sovereign entities; and

Whereas, a year-long celebration is an appropriate tribute to the Indian people of Iowa and to all Native Americans throughout our nation;

Now, therefore, I, Terry E. Branstad, Governor of the State of Iowa, do hereby proclaim 1992 as the "Year of the Indian" in Iowa, and call upon all Iowans to salute the Indian people of Iowa, express appreciation for their contributions to our way of life and celebrate their cultural heritage. ●

#### RETIREMENT OF THE HONORABLE DAVID MARTIN

Mr. D'AMATO. Mr. President, as the 102d Congress comes to an end, I want to pause to pay tribute to one of my dearest friends, DAVID O'B. MARTIN, who is leaving the House of Representatives after distinguishing himself for the past 12 years as a Representative from that portion of the Empire State which we refer to as the "North Country."

Tribute has already been paid to DAVE MARTIN by his House colleagues from both parties. Those tributes reflect the widespread respect in which he is held by men and women from across the political spectrum.

DAVE MARTIN came to the House in 1981 as the North Country Congressman. He brought with him the strong values of a family with a long record of public service in New York.

Those of us who know DAVE MARTIN know that he is a man of his word, a man of the highest integrity, and a man who has contributed much to the House of Representatives and to his constituency. He has distinguished himself as a member of the House Armed Services Committee and the Permanent Select Committee on Intelligence. He has set a standard for excellence and for responsible representation. His service in the Congress is marked by his commitment to doing what is right, not what is necessarily politically popular at the moment. He is the kind of man our forefathers had hoped would be drawn into our representative democracy.

I have had the honor and privilege of working with DAVE MARTIN on hundreds of projects from Watertown to Malone to Plattsburgh, from Lowville to Gouverneur to Rouses Point during the past 12 years. He is not only a colleague, but a friend where judgment and guidance has been reliable and "good as gold." Likewise, our staffs have a long history of working to-

gether on projects that would benefit our mutual constituencies. His staff led by "the Dear", Cary Brick, represents the same high level of professionalism and public service so ably demonstrated by DAVE MARTIN himself.

It is with considerable sadness that I see DAVE MARTIN leave the Congress, but I have nothing but the highest regard and respect for him as he reached the decision that he has met the goals that he established for himself in 1981. Clearly, DAVE MARTIN could have stayed in the House of Representatives as long as he wanted, and while the institution would be a better one had he decided to stay a bit longer, it is a better one for his having served here at all.

I shall miss his advice and counsel as a Representative, but I shall always treasure him as a fellow New Yorker and a friend.

#### CONGRESSIONAL ACTION ON COMPETITIVENESS

● Mr. BAUCUS. Mr. President, I rise today to speak about one of the most important issues facing the U.S. Government today—our long-term economic performance and our position in the international economy.

We have been over this ground numerous times in recent years. U.S. productivity growth is lagging. We need policies to raise the national savings rate and rate of investment. Government policies should be crafted to support a strong system for technology development and application. Recent performance in education and worker training has left much to be desired. In trade policy, we need to work for free trade while ensuring that foreign markets are open to U.S. exports.

#### LEGISLATIVE ACCOMPLISHMENTS IN THE SENATE'S SECOND SESSION

This session, the Senate has taken some action intended to address these issues.

The highway bill of 1991 is an important step in the rebuilding of America's transportation infrastructure. The bill authorized \$155.3 billion over 6 years, to be spent on the Nation's highways, mass transit systems, and other transportation projects. This public investment augments private sector productivity, and thus contributes to our economic growth and international competitiveness.

This session has also seen legislation relating to the funding of research and development. The High Performance Computing Act doubles funding for Federal R&D into computer and networking technologies, including national data networks. The American Technology Preeminence Act allocates funds for R&D into the precompetitive technologies that support industry's efforts to develop new products and markets.

The end of the cold war and the rise of international economic competition

has significant implications for our national system for R&D. In this session, the Senate has begun to address this problem. The defense appropriations bill focuses R&D funding on those technologies which will be critical for conversion of defense industries to the civilian sector.

In further support of high-technology ventures, the Senate has made it easier for companies to cooperate in exceptionally risky production ventures. The National Cooperative Research Act Extension extends the relaxation of antitrust regulations created through cooperative research and development agreements. This initiative reduces companies' potential liability in antitrust litigation, and this makes them more willing to undertake the kind of cooperation that has helped so many Japanese firms.

The Senate has continued to fund the Defense Advanced Research Projects Agency [DARPA], which contributes to U.S. technological preeminence in a variety of ways. Perhaps most notably, DARPA funds the Sematech consortium, which has helped the American semiconductor industry to stabilize its competitive position in the face of severe pressure from abroad. Sematech provides a good example of what industry and Government, working together, can accomplish for the good of the Nation.

I think it is fair to say that this body understands the importance of technology to the Nation's future. I support all the efforts we have worked on in this session, and expect that our technology policy will receive comprehensive attention soon.

The higher education bill addresses some of our concerns about education. By making Government-guaranteed, low-interest loans to needy students, the bill will help young Americans make the most of their potential.

The Senate has been fairly active on international issues. Extending fast-track negotiating authority for GATT and the North American Free Trade Agreement helps us work toward free trade worldwide. Likewise, approving most-favored-nation status for China and Russia expands our trading network, fosters world growth, and ultimately expands the markets available to American companies.

To ensure that American companies can take advantage of the markets the above agreements are meant to open, I have sponsored the Trade Agreements Compliance Act. The act makes it easier and quicker for companies to initiate a review of allegations that other nations are reneging on trade agreements. Countries which do not fulfill the terms of agreements reached with the United States thus face a more credible and effective threat of retaliation.

We have also passed legislation to reauthorize the Export-Import Bank. The

financing it provides helps American firms win export orders and penetrate the global marketplace. The Jobs Through Exports Act ensures that the foreign aid we distribute to our allies boosts the U.S. economy as well. The Senate has ratified a number of bilateral economic treaties, with countries such as Russia and Czechoslovakia. These treaties make provision for mutual investment; such investment is an essential motor for U.S. exports.

The tax bill contains provisions which will improve the performance of U.S. companies. One of my provisions attempts to simplify the tax regulations applying to small businesses. I have also inserted a provision to simplify the treatment of exchange rates in translating foreign taxes, and one that seeks to allow American mutual funds to compete abroad more effectively.

I think this list of bills and provisions makes it clear that we recognize many of the elements of the competitiveness problem. And despite continual accusations of gridlock, we have managed to pass some legislation intended to make a difference on this front. However, much remains to be done. Early next session I plan to resume efforts to pass critical tax, trade, and other legislation.

The Senate, the Government and indeed the Nation as a whole need to move beyond talk about international competition, and come up with a wide-ranging and coherent plan to attack our problems. I firmly believe that we can solve our problems, but we need to think carefully and prepare to make the sacrifices that will be necessary to set the country on the right track again.●

#### PUBLIC INVESTMENT FOR ECONOMIC RECOVERY

● Mr. BIDEN. Mr. President, on the front page of today's New York Times is a report that the financial experts on Wall Street increasingly agree that a public investment infrastructure program is necessary to revive economic growth.

Last spring, I introduced a plan for increased investment in our neglected infrastructure to put people back to work and strengthen the struggling recovery from recession. I took my proposal to my home State of Delaware. The Chamber of Commerce, labor unions, and local public officials all gave this plan their endorsement, showing the seriousness of the economic problems we are facing.

Still, I knew that many experts continued to argue that increased public spending in this era of deficits would raise fears of inflation in the financial community. Interest rates would rise in response, they said, and instead of aiding recovery we would harm prospects for future growth. This is a serious concern.

However, the effect of interest rate cuts by the Federal Reserve was blunted by the accumulated debt of the 1980's. Restructuring of American businesses, adjusting to international competition, arrested the job creation we used to expect in periods of recovery. And accumulating problems overseas would weaken the demand for our exports.

Without help in the form of public investment—investment that everyone agrees is long overdue—we may see only prolonged stagnation.

Mr. President, this article shows that even the most conservative financial experts are persuaded that business-as-usual is not an adequate response to our economic problems. When Congress returns next year, one of the first items of business will be the development of an economic stimulus program, including a job creation program like I have proposed. As this article shows, the need for this type of stimulus is increasingly clear.

I ask that the article from today's New York Times be printed at the conclusion of my remarks.

The article follows:

[From the New York Times, Oct. 8, 1992]

#### OLD IDEA GAINS NEW RESPECT: SPENDING WAY OUT OF SLUMP

Slowly, with many misgivings, Federal spending on public works is gaining a new respectability among economists, Wall Street traders and some corporate executives as a last-resort formula for generating jobs and ending the nation's economic stagnation.

In their view, other prescriptions have failed, and now with unemployment remaining stubbornly at 7.5 percent or more, they are concerned that the recovery may not take place without special help from the Government.

The new adherents are, in effect, putting aside years of opposition to increased public spending as unaffordable because it would add to the already huge Federal budget deficit and drive up the inflation rate, hurting the economy rather than helping it.

The position seems closer to that of the Democratic candidate for President, Bill Clinton, who has said some Government investment is needed to help the economy, than it is to that of President Bush, who is counting on the economy to pick up without extra Government spending.

The link between at least a temporary shot of more spending—on highways, transit systems, education and the like—and adding to the deficits has not changed. But an extensive range of interviews in recent days reveals a developing new attitude that says a rising deficit is a lesser evil until the weak economy can be revived—though those who have adopted it insist that the deficit be tackled later.

"The basic view that is emerging is, 'don't just stand there, do something,'" said Richard B. Hoey, chief economist at Dreyfus Inc. He said he had opposed extra Government spending because of the deficit but now believes, like many other recent converts, that because the economy is so weak the deficit can rise without pushing up the inflation rate.

Mr. Hoey said he was not certain that more public spending would produce the desired recovery. But particularly in view of the per-

sistent unemployment, he said he came to the conclusion that it was worth a try.

Some, like Robert Giordano, chief economist at Goldman, Sachs, said they came painfully and reluctantly over the last few months to the position that the economy would not begin to grow again without Government spending.

"People are missing the boat," Mr. Giordano said. "If I were a policy maker, I would definitely have short-term fiscal stimulus, but I would couple this with a program that assured that the deficit expansion would be reversed later on, when the economy was stronger."

Some economists continue to believe that even a temporary spending increase is harmful, among them Alan Greenspan, chairman of the Federal Reserve, and Charles L. Schultze, a senior fellow at the Brookings Institution and a top economist in the Carter Administration.

But the unmistakable trend is toward greater tolerance. Henry Kaufman, an economist and Wall Street money manager, said he believed the economy was so weak that even bond-market traders, who are hurt by inflation, were finally willing to tolerate some deficit spending. The threat of inflation eating away at the value of investments has been a principal objection to budget deficits.

#### ADJUSTING TO CLINTON

Others, like Lawrence A. Kudlow, chief economist at Bear, Stearns, said they were adjusting to the possibility that Bill Clinton might be elected President, as the public opinion polls now suggest, and will be under pressure to engage in public-works spending because job and wage stagnation are so widespread.

Mr. Kudlow, a conservative Republican and a Reagan Administration official, had made television appearances as recently as the Republican convention in August in which he called for rapid deficit reduction as a cure for the economy. Now he said that while he would still prefer to stimulate the economy through tax incentives like an investment tax credit or a lower capital gains tax, he was bowing to circumstances and supports deficit public spending as an acceptable policy for the moment.

"The public pressure for economic growth will lead Clinton to activist risk taking," Mr. Kudlow said. "I don't think the Government money is going to be well spent. I would prefer targeted tax credits. But I am a realist and I see that Clinton will be elected, and I am coming to grips with it. I am taking off my economist hat, and my ideological hat, and putting myself in the shoes of the frustrated American voter who wants change."

The Clinton camp, however, generally avoids the subject of deficit spending as an economic pump-priming device, fearful of the Republican charge that Democrats are chronic spenders. President Bush has been campaigning for deficit reduction through tax and spending cuts. Mr. Bush also publicly endorses the view of the Federal Reserve, and others, that the economy will recover on its own in 1993, once individuals and companies reduce their debts and spend again. Mr. Clinton neither attacks nor endorses this proposition.

#### BALANCING ACT SEEN

"Governor Clinton is going to have to balance the need for action to get the economy moving against the need to also send strong signals of fiscal responsibility and commitment to reduce the deficit," said Gene

Sperling, the campaign's economic coordinator.

Ross Perot, the third Presidential candidate, favored rapid deficit reduction originally but has since hedged this view. John P. White, a Kodak executive who wrote Mr. Perot's deficit reduction plan, in a television appearance Sunday endorsed temporary deficit spending to accelerate the economy. Mr. White also endorsed Mr. Clinton this week.

Some economists, like Robert Gordon of Northwestern University, who until last spring opposed added spending, are now developing theories and strategies to justify it. "It is hard now to find many economists who would not say that to kick-start the economy you need spending," Mr. Gordon said. He argued that without greater demand for products—a demand supplied temporarily by Government spending—investment and production would remain weak among manufacturers.

Virtually all economists, whether they favor or oppose public spending, agree on one point: When such spending or tax cuts fail to drive up the deficit, they are not much of a stimulant for the economy. The problem is that shifting spending from one area to another to avoid deficits generally fails to provide many new jobs.

If Federal funds are taken from weapons making, for example, and spent on highway construction, the net number of new jobs is often marginal at best, economists say. Similarly, if money is taken from one family's pockets through higher taxes and given to another as unemployment pay, the net increase in consumer spending is thought to be negligible.

Only through deficit spending—the creation, in effect, of new money—is fresh economic activity created without canceling what already exists, economists say. That trade-off to achieve economic growth was considered acceptable in the post-World War II period. But a huge increase in the deficit from \$74 billion in 1980 to more than \$380 billion now has made the problem especially difficult.

The great concern was that injecting new money into the economy—even for such much-needed items as waste disposal or to fix deteriorating bridges—would raise the risk of higher inflation and a weaker dollar, and also of saddling coming generations with an intolerable debt to repay.

For these reasons, Mr. Kaufman, who through most of the 1980's was the much-admired chief economist at Salomon Brothers, was an outspoken opponent of deficit spending. But more than three years of recession or weak economic growth altered his view in late summer. The nation's bond markets "might be willing to tolerate a modest public-spending program, with strict sunset provisions, to encourage a somewhat faster recovery," he said in a recent speech.

Others on Wall Street are also changing their views, largely because the Federal Reserve's repeated reductions in interest rates have failed to reawaken the economy. "There is a shift in Wall Street that says we must give the economy a boost before we worry again about cutting the deficit," said David Jones, chief economist at Aubrey G. Lanston, a bond trading house. Mr. Jones lists himself among the recent converts.

In general, corporate America remains more cautious. Jerry Jasinowski, president of the National Association of Manufacturers, says his members are not ready for deficit spending yet. "Business continues to be scared to death about a big fiscal package that would worsen the deficit," Mr.

Jasinowski said, adding, however, that executives were debating the issue.

But some have, in effect, joined the Government spenders. Allen Henry, president of the Harris Corporation's electronics systems sector, for example, endorses the spending indirectly.

He and other military contractors argue that a transition to the production of civilian products is difficult to make in a weak economy unless the Federal Government is the main customer. The Government, in effect, must finance the transition while also maintaining a high level of military purchases.

"You cannot diversify that quickly on your own and be profitable," Mr. Henry said. His company simultaneously makes electronic equipment for warplanes and a \$1.7 billion air traffic control system for the Federal Aviation Administration.

The impetus for the attitude change on the deficit came in March, when two Nobel laureates in economics, Robert Solow and James Tobin, collected more than 90 signatures of prominent economists on a petition that called for \$50 billion a year in Federal assistance to state and local governments, the money to be used primarily for public works. Later, the petition said, when economic recovery was under way, the deficit could be cut through military spending cutbacks and higher taxes.●

#### NORTHWESTERN UNIVERSITY'S MARCHING WILDCATS: THE NATION'S BEST

● Mr. SIMON. Mr. President, the Northwestern University Wildcat Marching Band, under the direction of Stephen Peterson, has been selected as the country's premier college marching band. Northwestern University has been awarded the ninth annual Louis Sudler Trophy, an award determined by directors from over 600 bands with teams in the National Collegiate Athletic Association and by 100 prominent sportswriters.

This Louis Sudler commendation, named after the founder of the award and the executive chairperson of the John Philip Sousa Foundation and a long-time Chicagoan, honors a band each year for its superior marching program. On behalf of the 11.5 million residents in the State of Illinois, I am pleased to take this opportunity to recognize these tremendously talented and gifted musicians and directors for their sterling accomplishments and dedication. Louis Sudler set a standard of excellence that Director Peterson's troops have met with distinction.

In Louis Sudler's words, this award goes each year to the collegiate band that best exemplifies the high standards he described in this way:

Demonstrate the highest marching standards, innovative marching routines and ideas and make important contributions to the advancement of the performance standards of college marching bands over several years.

Since the 1880's, the band has been a cherished part of Northwestern and its community. Evanston, and the Marching Wildcats have now obtained the global recognition that few university marching bands will ever achieve.

We salute the Northwestern University Marching Wildcats. Their perseverance and creativity will always be a source of pride for the Land of Lincoln.●

#### BANKRUPTCY AMENDMENTS OF 1992

● Mr. SIMON. Mr. President, last night the Senate passed S. 1985, the Bankruptcy Amendments of 1992. Section 310 of S. 1985 would remedy a serious problem affecting a number of airports around the country which serve airlines which are undergoing bankruptcy proceedings. Often, these airlines have leased scarce airport gates, terminal areas, and other airport facilities. The Bankruptcy Code now provides that a bankrupt party must assume or reject existing leases within 60 days, or within such additional time as the court, for cause, sets within the initial 60-day period. These time limits in the code have been routinely ignored, and courts have granted numerous extensions of time to bankruptcy trustees beyond that contemplated in the code. Debtors frequently improperly attempt to delay the assumption or rejection until a plan of confirmation is assured.

Section 310 of S. 1985 would permit a bankruptcy court to grant an extension beyond 270 days of the date of the order of relief only if it finds that the extension does not cause substantial harm to the airport operator or airline passengers. In making the finding, the court must consider the level of use of the airport facilities, the existence of competing demand for such facilities, the size and complexity of the case, and air carrier competition at the airport.

The 270-day time limit should not be interpreted as a blanket authorization to bankruptcy trustees to delay a decision on the assumption or rejection of leases for airport property until 270 days have elapsed. Only in an unusually complicated case could a trustee justify delaying a decision for the full 270-day period.

Although section 310 of S. 1985 would authorize a bankruptcy court to grant an extension to a trustee beyond the 270-day limit, the court should carefully consider the public interest factors set forth in section 310 before granting an extension. The 270-day limit in section 310 should provide ample time for trustees to make a determination to accept or reject an unexpired lease or executory contract, and courts should be conservative in granting extensions beyond the initial 270-day period.

The reference in section 310 of the bill to related facility is intended to encompass facilities such as airline maintenance bases, hangars, cargo handling facilities, and fueling facilities leased to airlines. These installations facilitate the operation of an airline at the airport.●

**FAILURE OF THE 102D CONGRESS  
TO PASS FLOOD INSURANCE  
REFORM LEGISLATION**

• Mr. KERRY. Mr. President, it is with deep regret that today I inform my colleagues that the 102d Congress will adjourn sine die without passage of flood insurance reform legislation. The tremendous need for flood insurance reform is plainly evident. Yet we have failed to act and, in our inaction, have acted contrary to common sense and incontrovertible evidence. We have lost a significant opportunity to act positively, thoughtfully, and in the best interests of public policy and the American taxpayer.

I want to offer my perspective on this failure. Before I do so, I want to serve notice to my colleagues that flood insurance reform will be one of my highest priorities when the 103d Congress convenes in January.

I also would like to extend my sincere thanks to the distinguished Housing and Urban Affairs Subcommittee chairman and original co-sponsor of the flood insurance reform legislation I introduced, Senator CRANSTON, for his support and assistance in trying to find an accord, with special thanks extended to his superb staff for their continued assistance and cooperation in this endeavor.

For some time, I have been concerned about the National Flood Insurance Program, on fiscal grounds, and in terms of loss of human life and property. The House of Representatives shared this concern, and passed a sweeping reform bill by a 388 to 18 vote—a resounding mandate for flood insurance reform. Yet in the Senate we have experienced discord throughout the debate regarding this legislation. Several of my distinguished colleagues have said that we have rushed blindly through the process, that we haven't given due consideration to all potential outcomes—whether economic, social or environmental—and that additional study is needed.

These assertions simply are not accurate. The provisions contained within the House bill, H.R. 1236, and in the two bills I introduced, S. 1650 and S. 2907, were based upon several objective studies conducted over the past 3 years by the General Accounting Office [GAO], the Federal Interagency Floodplain Management Task Force, the National Academy of Sciences, and internal reports prepared by the Federal Emergency Management Agency [FEMA].

In addition, over the past 4 years Congress has convened 12 separate hearings on flood insurance, touching on virtually every aspect of this important program. Furthermore, discussions have contained on the staff level among congressional staff and individuals and groups affected by the flood insurance program. I do not believe anyone has been "left out of the loop." Let me reassure my colleagues that no

one will be excluded in future flood insurance deliberations.

I find this impasse hard to accept. I think it is particularly unfortunate, and very hard to explain, why—at a time of serious public discontent with Government because it seems to be mired in gridlock on so many important issues—an argument is being made that Congress should not act when it is clear that Congress has done its homework and knows what it needs to know to pass responsible reform legislation. Continued avoidance and inactivity only will fester public disillusionment with this institution.

Mr. President, I also am profoundly discouraged that we have let slip by an opportune moment to reestablish the fundamental quid pro quo premise of the flood insurance program.

The National Flood Insurance Program was created to alleviate the Federal taxpayer burden of paying for ever-increasing disaster relief expenditures in areas damaged, often repeatedly, by floods. In exchange for affordable flood insurance, communities were required to plan and develop regulations and building standards in order to reduce future losses. Unfortunately, this quid pro quo has never been carried out adequately. Communities have been allowed to develop in flood and erosion-prone areas, almost as if hurricanes, floods, or property destroying erosion won't occur. But as we have painfully been reminded these past months, these activities of nature do occur.

In 1968, Congress clearly declared its intent when it passed the National Flood Insurance Act. The original congressional declaration of purpose stated, and I quote:

\*\*\* flood insurance can promote the public interest by providing appropriate protection against the perils of flood losses and encouraging sound land use by minimizing exposure of property to flood losses.

Elsewhere, it added:

\*\*\* It is the further purpose \*\*\* to encourage State and local governments to make appropriate land use adjustments to constrict the development of land which is exposed to flood damages and minimize damage caused by flood losses.

Interestingly, and at times in some amusement, I have listened to arguments quite contradictory to this stated intent which claim that flood insurance has no relationship—either implicit or explicit—to land management. Mr. President, in light of the original congressional intent these claims are clearly baseless. Flood insurance is not, nor has it ever been, an entitlement program. It was never seen and should not now be seen as only a benefit provided by Government. A public benefit was to be derived by the creation of this subsidized benefit to individuals. This should remain—this must remain—the program's premise.

As a result of this missed opportunity to reestablish this quid pro quo,

we also have passed on an opportunity to assure and enhance one of the most important attributes of the flood insurance program: Namely, its ability to reduce Federal expenditures on disaster relief.

Over the past 2 months, we have witnessed with frightening clarity the return of hurricane season. No longer can the National Hurricane Center's predictions of increased catastrophic storms—storms that will result in "frequent multibillion dollar losses having a national impact on the economy—be dismissed as mere fabrications. No, hurricanes are real and devastating in their consequences. While prospects for recovery in Florida, Louisiana, Kauai, and Guam are guardedly optimistic, the costs will be staggering, especially for the Federal Government. Yet we still are allowing people to rebuild in the same locations with the same risk.

Valuable lessons have been learned from this wrenching series of disasters. We have learned that although we now can predict catastrophic storms more accurately, the ability of the Federal Government to respond after disasters is limited, disjointed and in dire need of reorganization. We also have learned, through the vivid images of entire communities reduced to ruin, that construction standards and building codes devised to withstand hurricanes—often considered appropriate minimal substitutes for sensible land use and hazard management—demand reevaluation, and certainly require more vigilant enforcement.

With genuine interest, I am awaiting the upcoming release of a GAO report requested by my distinguished colleague from Maryland, Senator MIKULSKI, detailing FEMA's response to the crisis in south Florida, and will read it closely to see how overall FEMA reforms may augment flood insurance reform.

The tremendous growth in development in the Nation's coastal zone since 1970—growth which now puts over 44 million people and trillions of dollars of property at risk—has created an unprecedented financial liability for the Federal Government. On September 18, Congress passed an emergency supplemental appropriation bill that totaled \$11 billion; the largest single expenditure on disaster assistance in U.S. history. Unquestionably, considering the magnitude of these disasters, this response was compassionate. The fact that all of this money will be deficit financed, adding to our \$4 trillion national debt, was seldom mentioned.

Ill-advised coastal and floodplain development imposes attendant financial burdens in excess of flood-related losses. The scale of these costs is now apparent. Repairs to public infrastructure—roads, bridges, sewer, and water utilities, schools, hospitals—are expensive and slow to occur. Additional costs for vital public services such as mili-

tary and national guard assistance, and fire, police, and other emergency services quickly consume hundreds of millions of dollars.

Of course, our coastal environment also suffers from loss of fish and wildlife habitat, reduced water quality, and lost recreational opportunities. The disruption of the Biscayne Bay ecosystem in Florida and losses in fishery resources in Louisiana and the Gulf of Mexico illustrate these losses. What will it cost to restore them? We probably will never know.

Congress cannot afford to ignore this reality. If experience is an indicator of the future, and our future is the one forecast by the National Hurricane Center, Congress should act responsibly now to develop appropriate alternatives to offset or control expenditures for disaster relief; costs that are sure to grow. But this year we have chosen not to act. Rather, the Senate has chosen by inaction—by default—to allow the floor insurance program to function contrary to its intended purpose: By acting as a financial safety net for unwise development in hazardous coastal and flood plain areas. In so doing we have once again set the stage for repeated disasters.

The last thing this country needs at this juncture is for a program that was purposely designed to lessen federal expenditures for disaster assistance to end up contributing—perhaps significantly—to greater expenditure for that purpose. But that is exactly where we are headed with this program. This course must be redirected.

I also find it unfortunate that, despite strong evidence of widespread noncompliance by federally-regulated lending institutions with the mandatory purchase requirement for flood insurance, some Senators have chosen to ignore this noncompliance and not to act to assure compliance with the law. Noncompliance with this requirement—which has been law since 1973—is rampant, severely undercutting the financial integrity of the flood insurance fund. Of the 11 million properties that are located in special flood hazard areas, only 1.9 million—or roughly 17 percent—actually carry flood insurance in force. In some communities, the percentage of those properties required to carry flood insurance which actually do carry insurance is as low as eight percent.

The arguments posited by lenders for this terribly low compliance rate are without support. Charges were made that compliance provisions in S. 2907 would be onerous, costly, and misdirected. Lenders would have us believe that the problem will clear itself up through the normal course of business when that is demonstrably not the case. They claim that they simply haven't the administrative capacity to comply with the law although lenders routinely enforce requirements of their own for other types of insurance.

This recalcitrant attitude must change or be changed. Studies indicate that properties insured for flood risks are four times more likely to experience damage by floods than by any other insured risk. Noncompliance cripples the financial stability of the flood insurance fund, expands the exposed risk to the Federal Government, and ultimately results in Federal, State, and local governments spending more on disaster relief than would be necessary if flood insurance were in place. As the events of the past 4 weeks dramatically illustrate, these costs can be enormous.

Lenders should recognize, as they willingly do for other types of insurance, that flood insurance will help to protect their collateral. Now that Congress has failed to act, it has been disconcerting to hear lenders recant recent efforts to comply with the mandatory purchase requirement. To dispel any doubt, let me state clearly that obtaining compliance with the mandatory purchase requirement will be a primary concern when this subject is taken up in the next Congress. I would suggest to lenders the wisdom, in the meantime, of acting expeditiously to bring their portfolios into compliance with the law.

The overextension or undercapitalization of the flood insurance fund concerns me very greatly. The Federal Emergency Management Agency [FEMA] indicates the flood insurance fund carries approximately \$220 billion worth of policies, but has only \$390 million in reserves. Furthermore, under the present premium structure, total average premium revenues amount to roughly \$650 million. FEMA testified during a hearing held on July 27, 1992, that if the program were to be actuarially sound it would need at least \$3.5 billion in reserves. FEMA also estimates that just one catastrophic storm could produce flood-related losses as high as \$3 billion. Considering these alarming facts, I do not see how anyone plausibly can contend that the flood insurance fund is not at risk.

Several factors contribute to the underfunding in addition to the low purchase requirement compliance rate previously referenced. Subsidized premiums for structures built prior to establishment of FEMA construction standards—nearly half of all insured properties—still exist today. Premium computations only account for average loss years and do not account for catastrophic loss scenarios. And the flood insurance fund is plagued by adverse selection whereby the normal "pooled risk" of the policy base is undermined by the predominance of high-risk properties (which, not surprisingly, file the majority of damage claims).

Importantly, risks due to coastal erosion still are not included in the premium structure, despite the fact that the 1968 Flood Insurance Act called for

FEMA to identify both flood and erosion risks and to promulgate regulations to constrict development in hazardous erosion areas. I know of no other insurance program that dismisses a known risk of this magnitude. A private sector insurance program that did this would soon bankrupt the insurance company or would be dropped altogether by the industry.

Can we afford to continue to gamble when the odds are against us? Flood damages from these recent hurricanes are estimated to be relatively small—approximately \$150 million. However, these estimates are less a vindication of the stability of the flood insurance fund, and more illustrative of the abnormal characteristics of these storms. Compared to other hurricanes on record, these storms were relatively "dry" with the majority of damage wind-related. In addition, accompanying storm surges were unusually low, especially for Hurricane Andrew. Also, massive flood losses were avoided when these storms stayed clear of densely populated urban centers including Miami, New Orleans and Honolulu.

Fortunately, the flood insurance fund should be able to cover anticipated insurance claims from these storms, but this will not always be the case. The fund remains vulnerable to a catastrophic storm; a storm such as Hurricane Camille, which hit the Gulf coast in 1969 packing winds over two hundred miles per hour with a storm surge of 30 feet. And who will make up the difference if the flood insurance fund runs short and FEMA's \$1 billion in borrowing authority is insufficient? The answer, of course, is your constituents and mine—the taxpayers.

The safety and soundness of the fund cannot be left to dumb luck. The Federal Government no longer can afford to ignore the fact that we are at the edge of the cliff. This burgeoning liability must be addressed, and it will be addressed next year.

From the time flood insurance legislation was first introduced, my intention was to provide a balanced comprehensive reform package, but to do so in a manner sensitive to the social and economic impacts on those who are most affected by the flood insurance program. Throughout, I continued to reexamine this legislation and its subsequent revisions with my colleagues in order to try to resolve their differences.

I believe firmly this legislation contained the essential elements needed for substantive flood insurance reform including increased compliance provisions, new opportunities for risk reduction and cost containment through mitigation activities such as elevation and relocation, and increased incentives to improve community participation in the flood insurance program. A strong consensus for comprehensive flood insurance reform did emerge as

our conversations and work continued, and is a positive note as we look to the future.

As other Senators are aware, sections of this legislation pertaining to identification and management of coastal erosion hazards were controversial. I understand the controversy, but I also know that erosion is a real, evident, and destructive natural occurrence and one which must be addressed if we are to have a sound, effective flood insurance program. To better inform my colleagues that erosion is not some distant or remote hazard, I ask unanimous consent that the article entitled, "Slowly sinking into sea" that appeared in the August 11, 1992, edition of the Washington Times be included in its entirety in the RECORD following the conclusion of my remarks.

To resolve concerns expressed by coastal communities, property advocates and other groups, tremendous efforts were made to refine significantly the erosion management provisions. Stringent requirements in the House bill were replaced by a voluntary community erosion management program. Under the erosion program outlined in S. 2907, communities that choose to establish and enforce programs to regulate construction in identified erosion hazard areas—a process not unlike the current floodplain management process—would be eligible for reduced premium rates and Upton/Jones assistance to relocate or demolish buildings threatened by erosion. Also of importance, existing State erosion management programs would be left intact and an appeals process for erosion hazard area determinations would be added.

Significantly, the most controversial issues regarding erosion management were removed. S. 2907 did not include mandatory erosion setbacks, federal construction standards, or prohibitions on new construction. There would have been no cancellation of existing flood insurance policies or "taking" of private property. Admittedly, flood insurance would not have been available for new construction in the greatest erosion hazard areas, but why should the Federal Government offer subsidized insurance for construction in an area that would otherwise be uninsurable in the private market? To perpetuate this practice simply would be illogical and counter to the conservative fiscal principles reflected in S. 2907.

This legislation would have restored common sense to the flood insurance program. It would have recaptured the original quid pro quo of the program and rewarded communities for actively managing for coastal and floodplain hazards. Frankly, for coastal communities dependent on seasonal tourism, fisheries, or retirees, it is in their own best interest to protect and manage the very resources—the beaches, dunes, and wetlands—that support their local economies.

Stated in its simple essence, this reform effort would have restored personal responsibility and public accountability to the process of deciding where we build, and what we insure. It would have reaffirmed the fundamental role of government to protect the health, safety and financial welfare of all of its citizens.

However, here we are at the end of the 102d Congress and it is evident that there will be no flood insurance reform in this Congress. Despite the efforts at compromise, despite good faith negotiations with my colleagues, despite compelling evidence supporting reform, we could not reach an agreement, and I am sincerely disappointed by this outcome. Yet valuable insights were gained concerning the flood insurance program and how it may best be reformed. The resolve to carry this debate forward has not ebbed and I urge my colleagues to join me next year to carry on this effort.

I hope Senators will be able next year to put aside the concerns of narrow special interests and consider the paramount national interest in controlling disaster relief deficit spending. If we approach this important issue in this manner, I have every reason to hope our efforts can succeed next year. It is a mission I accept with the greatest seriousness and commitment, and I solicit and welcome the assistance of all members and staff who contributed so much this year to our efforts.

#### SLOWLY SINKING INTO SEA (By Lisa Yungmann)

HOLLAND ISLAND, MD.—Thirty years ago, there were 60 houses, 1,000 people and three graveyards on the Chesapeake Bay island. Today it is uninhabited, with barely enough land left to hold one abandoned house and half a graveyard.

Holland Island is now a place where residents of nearby islands go to take wood from abandoned houses and shops.

The shrinking of the Chesapeake Bay's islands is not a new phenomenon. From 1850 to 1950, four once-populated islands disappeared from the Bay and five others were abandoned.

But the pace has dangerously quickened in recent years because of a rising sea and shoreline erosion aggravated by pollution. Most Holland Island is underwater, and scientists fear the Bay's remaining islands may be next.

While the Bay's shore is eroding by about 8 feet a year in some areas, the water level is rising 3 millimeters a year, one of the highest rates on the Atlantic Coast, say University of Maryland professors Michael Kearney and Cort Stevenson. They say pollutants in the Bay have weakened the composition of its shores, chipping away at and sinking the land.

Mr. Kearney, a geography professor at the College Park campus, says that although the sea-level rise seems too small to have any dramatic effect, "the coast is so flat and low, any rise in sea level moves the shoreline a big distance inland."

Areas that are eroding most quickly have the fastest-growing populations, so most

people either don't care about or ignore the rapidly fading shorelines, Mr. Kearney says. He says Queen Anne's County, which includes Kent Island, is expected to double in population by 2020, but erosion in that county is "high to severe," claiming as much as 15 feet per year in some places.

Both professors say more people near the Bay need to be aware of what is happening. Residents of neighboring states and the District need to know that when they dump things in gutters or spray their lawns with pesticides, they are adding to the pollution in the Bay and the erosion of its islands, says Mr. Stevenson, a marine scientist at the university's Horn Point Lab in Cambridge.

But on Smith Island, one of the Eastern Shore's oldest seafood areas, people are all too aware of the problem. Some say that the battle to save their island is overwhelming and that they are close to giving up.

Janice Marshall, 30, a lifelong resident of the Smith Island town of Tylerton, has seen the shoreline creep at least 60 feet closer since she was a child.

Battered bicycles, rusty washing machines and tattered mufflers are piled on what was once a rock-lined bank. The junk was put there by locals hoping to shelter the island's western shore from the Chesapeake's waters.

As the shoreline inches into town, young people move to the mainland, schools close and the last grocery store goes out of business, the fight to save her home is coming to an end, she says.

"I'm so sick of going in front of boards," Mrs. Marshall says. "What does it matter? We're going to be gone in a few years anyway."\*

#### RACHEL GILBERT—FIGHTING FOR REAL REPRESENTATION

\* Mr. SYMMS. Mr. President, this year Idaho is proud to have a tough, creative conservative as a candidate for Representative in Idaho's first district, which I represented for 8 years before I came to the Senate.

That candidate is Rachel Gilbert, a savvy, experienced former State senator who loves the State of Idaho so much that she has promised she won't move to Washington if she is elected to the House.

Mr. President, Rachel Gilbert has a great idea, and I think it will prove to be very popular with the 103d Congress. Ms. Gilbert believes that Members of Congress should be able to keep their families at home, instead of uprooting them from their neighborhoods, schools, churches, and friends to move inside the beltway. She also proposes to allow Representatives to vote from their home district offices, just the way they do now in the well of the House chamber—by means of an electronic device.

Mr. President, Rachel Gilbert's proposal could bring a whole new breed of American to the Congress—men and women of the finest quality, many of whom wouldn't dream of running for Congress now because they would have to move their families to Washington. And, Mr. President, I must remind my colleagues that not everybody in this country is dying to live in the Nation's Capital.

Mr. President, I commend Rachel Gilbert's plan to my colleagues—and to their challengers—for their consideration. It is about time the folks back home really got some power in this country, and Rachel Gilbert's plan would guarantee that Washington would have less power, and the home folks would get a break from the monopoly beltway mentality of Washington.

Mr. President, I ask that two articles be inserted in the RECORD at the end of my remarks. The first is an article by Ralph Smeed, my friend and valued adviser who writes a regular column for the Idaho Press-Tribune. The second is the op-ed piece from the Wall Street Journal of July 14, 1992 to which Ralph Smeed's article refers. It was written by Dr. Christopher Manion, a political scientist who joined my staff this past summer.

Mr. President, I encourage all my friends and colleagues to consider seriously Rachel Gilbert's plan for Congress to come home. It would be a shot in the arm for a more representative Congress and revitalized America.

I thank the Chair.

The articles follow:

[From the Idaho Press-Tribune, Sept. 27, 1992]

GILBERT'S "LESS GOVERNMENT" PLAN  
(By Ralph Smeed)

Idaho just may be coming of age. That is to say, conservatives in particular. Time was when the media liberals could, and still do by the way, say: "You conservatives know what you are against, but you don't know what you are for." Of course that is not so, but there is at least a little truth in it.

Comes now Rachel Gilbert, the Republican conservative candidate for Idaho's 1st Congressional District. She has a brand new idea for the people back home to regain proper influence on Big Brother Federal Government. But first a little background.

Most incumbent members of Congress seem to think "reform" means using every phony scheme to perpetuate themselves using taxpayer money, to plan their retirements with sweetheart pension deals and to keep their campaign fund for personal use.

According to the *Wall Street Journal* they cultivate contacts and cast votes designed "... to create post-Congress jobs as million-dollar lobbyists. With funding and encouragement from special interest groups they ... keep the party going. As one outsider put it, they knew when they came here that Washington was a sewer; the trouble is they wind up treating it like a hot-tub."

Gilbert is one of Idaho's most courageous political leaders and is well-known as being "for" the small homeowner, taxpayer and small businessman. She has a decades-long and health history of distrust of big government. Her leadership and support for the 1 Percent Tax Limit Initiative, for example, is not the only thing she is "for," but it's a good one. That is, for people who want less government.

Last week she announced yet another plan to rein-in big government. Time alone will tell if the liberal media will give it the rather obvious publicity it deserves, but here it is in part:

"The plan is simple," explained Gilbert. Today congressmen vote "... by inserting a

card into an electronic device on the house floor. A simple rule change would allow members to cast their votes, not only from Washington, DC., but from their home (state) district offices. The votes would be monitored day after day, by constituents and the local media. . . .

"The incumbents and special interest groups would no longer be insulated from the (voters) back home."

Gilbert went on: "Congressmen who make a living spending taxpayers' money spend most of their time with special-interest groups getting briefed, wined, and dined, and taken to the ever-present fund-raisers. Their staffs enjoy a similar, pampered treatment" (with employee salaries of \$118,500 and down).

She added that Rep. Larry LaRocco is already a pro as an "insider" and a member of the overwhelmingly Democrat majority.

"People who would run for these offices, but are unwilling to move their families, leave their friends and communities to live in a city with the highest murder rate in the Nation, would be able to hold office and live at home and go about the business of cleaning house.

"Just think," said Gilbert, "about the many other (advantages). The local media, not the national media, would be the first in line with the news. (Voter) could drive to their representatives' home offices and not have to take time off from work, fly to Washington, pay expensive hotel rates, and hire high-priced lobbyists.

"The real debate would be held in the (home) districts, not in the back rooms of the Capitol or on an empty House floor."

"So far LaRocco has adamantly refused to debate his challenger, except for one lone shot at it, while Dirk Kempthorne, GOP candidate for U.S. Senate, has eight debates scheduled with Democrat Congressman Dick Stallings. And so far, sad to say, the liberal media is happy to leave that advantage to the benefit of the very liberal LaRocco.

"Larry is not a fool," said Gilbert, "... the (big labor unions), Joseph Seagrams & Sons, American Banker's Association, Trial Lawyers, ... and other PACs have already given him \$254,468 in special-interest money."

"Reform is needed and needed now to stop (politicians) from milking the system for their own benefit," Gilbert said. She credited an opinion article in the *Wall Street Journal* for the innovative idea entitled "Congress Come Home."

Given this clown's fantastically left-liberal record and wild monetary mismanagement—Gilbert's and the *WSJ*'s conservative play should get a big play in the press. But if past is prologue, it won't

[From the Wall Street Journal, July 14, 1992]

CONGRESS, COME HOME

(By Christopher Manion)

The next time you see your congressman, ask him where he and his family live. Most likely he'll say "Washington," and that answer explains the dismal condition of Congress as it lurches, panic-stricken, toward elections this fall.

To most representatives, "reform" has meant using every dodge to perpetuate themselves using taxpayer money, and to plan retirements designed to maximize sweetheart pension deals and to keep their "campaign" funds for personal use. They cultivate contacts (and cast votes) designed to create post-Congress jobs as million-dollar lobbyists. With encouragement and funding from the special-interest groups, they do ev-

erything they can to keep the party going. As one insider put it, they knew when they came here that Washington was a sewer; the trouble is, they wind up treating it like a hot tub.

If Congress can't put its own house in order, the American people will have to. They can do it under a Choice in Representation plan that allows them to elect representatives who, instead of moving to Washington, would live in their districts. There, they would do the people's business—and much of their congressional voting. It's easy. It's legal. It would break the back of the Washington power lobby. And it's the only way that the folks back home can rein in a Congress totally out of control.

The plan is simple: The member now votes by inserting a card into a voting machine on the floor. A simple rules change would let representatives vote that way not only in Washington, but from their home district offices. There they could explain each vote to constituents and the local media; there, day after day, the local folks could see how much time the member makes for them vs. how much he spends with donors and lobbyists.

Widespread support for term limits reflects the electorate's desire to rein Congress in, but too many good people are unwilling to serve even for those few years. They do not want to uproot their families, leave their friends, churches, schools and neighborhoods behind, and move to the nation's capital, where police and firefighter unions run ads trumpeting "the highest murder rate in America," where there are more lawyers than people, where housing prices are astronomical, and where the public schools are among the worst in the country. In fact, the only people who move to Washington willingly seem to be the fortune-hunters, professional politicians, bureaucrats, foreign diplomats, lobbyists and special-interest groups that make their living spending other people's money.

They're the ones your representative spends most of his time with; day after day they brief him, lobby him, take him and his staff to lunches, dinners and the ever-present fund-raisers. If you want to exercise your constitutional right to petition your government, you'll have to take time off from work, pay round-trip air fare and sky-high hotel rates, and try to get onto your congressman's schedule. Most likely, if you can't spend thousands of dollars on a lobbyist (usually a former member or staffer), you won't be able to see the member personally. He'll be too busy "doing the nation's business."

Most voters don't realize how little time the average member spends on the floor of the House. Most of the time he watches the proceedings on his office TV set like any C-SPAN junkie. At night he goes to a home that is as insulated from the real world as his office is. His family lives among neighbors who make their living spending taxes, not paying them; his children usually go to private schools (and in Washington these can cost as much as an Ivy League education). When the representative loses or retires, he will most likely stay in Washington and lobby. "Home" for him has become a campaign state of mind.

The average member today spends about three weeks in Washington for every week at home. With the adoption of the Choice in Representation initiative, that ratio could easily be reversed. Mothers of families who have balanced budgets for years would be able to serve in Congress without leaving their friends, neighbors and even their chil-

dren behind. Such no-nonsense representatives should know all about putting the House in order.

Apart from voting, the average member's presence is most "required" in Washington for committee and subcommittee hearings. There were more than 5,300 such meetings in the 101st Congress (1989-90), most orchestrated dog-and-pony shows with professional witnesses and pre-ordained outcomes. A new Congress could easily organize the few necessary hearings with the same efficiency that businesses in every congressional district use to organize their affairs.

In such a regimen, the average representative could easily accomplish his Washington work in one week per month. A modest dormitory for members would eliminate the need for buying a house in Washington (they wouldn't even need a pay raise). Members who had acquired a disdain for their district and the interests of their constituents, or who were reluctant to move "home," would have to change or, more likely, retire (or lose). In the meantime, a new breed of representatives could go to work on the nation's agenda.

For them, cleaning up the mess in Washington would be hard enough. They shouldn't be forced to live in it too.

(Mr. Manion recently joined the staff of Sen. Steve Symms (R., Idaho).

#### CONGRATULATIONS TO HELEN MACK CHANG

● Mr. JEFFORDS. Mr. President, most Americans have not heard of Helen Mack Chang, or her sister Myrna. And many are not even aware that Guatemala is struggling to dig out from under a legacy of repression and abuse of human rights. But yesterday, the international community learned the name of Helen Mack. It was announced in Stockholm, Sweden that she has been awarded the 1992 Right Livelihood Award, also known as the Alternative Nobel Prize, "for outstanding courage and persistence in seeking to bring to justice the high-level murderers of her sister, which have inspired the whole Central American region, and ignited a national campaign in Guatemala against the current impunity of political killings." On December 9, the Swedish Parliament will present the award to Helen Mack and the three other 1992 recipients.

Mr. President, I have the honor of knowing Helen Mack. In June 1991, when I was in Guatemala to observe the political and human rights situation in the country, I had dinner with Helen and her parents. Mr. and Mrs. Mack are very soft-spoken people who have worked hard to build a business in their adopted country, staying far away from politics. Helen is a business administrator, working in housing and education projects. Their warmth and strength impressed me greatly and I resolved to help them in any way I could.

Myrna's family was generally aware of Myrna's work at AVANCSO, a social research organization which she co-founded. But they had no idea that her study of the displaced population in

Guatemala's hinterlands might be dangerous work.

When Myrna was brutally murdered on September 11, 1990, it came as a terrible shock. But instead of submitting to the terror by keeping their heads down to avoid further attacks, the Mack family, including Myrna's teenage daughter, Lucky, spoke out. They insisted that this was not a common crime and that it be properly investigated. It quickly became apparent that there would be no real attempt made to identify Myrna's murderers. The explanations of the murder and excuses for the shoddy investigation that were given by the police, the military and even by President Cerezo were infuriating. But Helen and her family quickly realized that Myrna's fate had been shared by many Guatemalans, and that their loved ones urged the Macks not to give up the fight. So they resolved to continue their up-hill struggle and to fight against impunity, to poke the lion, as Helen calls it. They hope to bring Myrna's killers to justice, for her sake and for those of so many other Guatemalans.

I would like to congratulate the Swedish parliament for this selection. Helen represents the courage that we all hope that we have—the courage to face injustice, even when it comes at great risk to us and our loved ones. Helen insists that this award is not for her, but "for the thousands of mothers, sisters, wives and children of people who have suffered the pain of death without receiving justice." And truly, Myrna's case has taken on a symbolic meaning beyond anything the Macks ever envisioned. But it is only thanks to Helen's courage and perseverance that the fight goes on. And one day, justice will be done, maybe too late for Myrna, but when it does come, it will be due in part to Helen's efforts.

Mr. President, I join many others in sending Helen heartfelt congratulations, and I urge my colleagues to take note of the example she sets for us all.●

#### PLEDGE OF ALLEGIANCE COMMEMORATIVE COIN

● Mr. HARKIN. Mr. President, I am disappointed that the Congress has not passed the Pledge of Allegiance to the Flag Commemorative Coin Act. Profits from those coins would have been gone to the Capitol Historical Society, a congressionally chartered, nonprofit organization under the able guidance of our former colleague, Fred Schwengel.

The Pledge of Allegiance to the Flag, 100 years after its creation, still has tremendous meaning to our democracy. Each morning, the 33-word pledge is said in almost every classroom in our Nation. Those 33 words are fundamental to our definition as a nation.

I believe that we need to do more not only to take the Pledge, but work to

better understand the full meaning of the Pledge of Allegiance.

I also believe that we need to increase our efforts to increase our understanding of the Congress. This institution is unique. For over 200 years, the Congress has served the Nation. Almost everyone has objected to some measure or other passed by the Congress. The parliamentary processes of the House and the Senate can be very complex. The parliamentary procedures may not be helpful towards reaching a quick result. There are many inefficiencies. But, there is a need to look at and appreciate the protections that are built into the process. For 200 years, the Congress has been crucial to our nation's democracy. Those who work in the Capitol often cease to fully appreciate the tremendous wealth of history that is represented in the Capitol Building. As we approach the millennium, I hope that it will stand proud long into the future.

I would like to work with my colleagues to work to increase our efforts to help the American people learn about the meaning of the Pledge of Allegiance and the history of the Congress.●

#### S. 776, THE NATIONAL ENERGY POLICY ACT ENERGY CONSERVATION REBATES

● Mr. BRADLEY. Mr. President, one element of the national energy strategy concerns rebates made by gas and electric utilities to consumers for energy efficient equipment. This legislation makes these rebates tax exempt again, as they were prior to an IRS ruling in 1989.

In granting this preferred tax status to rebates for conservation equipment, it is the intent of Congress to promote the efficient use of energy. In considering rebate programs, it is necessary to analyze the impact of the program on the ultimate consumption on primary energy. Since rebates can significantly affect the fuel choice decisions of consumers, local regulatory authorities should attempt to distinguish between true energy conservation measures and promotional programs that might actually increase energy consumption and consumer energy bills.

Mr. President, the goal is energy conservation, pure and simple. This is not some loophole or taxpayer giveaway. If we are to give tax-free assistance, it must meet a clear test of public interest and public good.●

#### RETIREMENT OF DR. JANELLE KRUEGER

● Mr. MCCAIN. Mr. President, the State of Arizona and the American nursing community recently lost one of the finest leaders in nursing education, when Dr. Janelle Krueger retired. On June 30, 1992, Dr. Krueger,

who had become a friend and adviser to me on nursing issues, retired from her position as dean of the Arizona State University College of Nursing.

Throughout her distinguished career, she played an integral part in encouraging research in nursing as well as strengthening the development of educational programs to further the education of professional nurses. In addition, she worked diligently to make professional nursing education programs available to those residing and practicing in the rural parts of Arizona. During her tenure at Arizona State University, the college of nursing's recruitment and retention efforts resulted in nearly doubling the enrollment of minority nursing candidates.

Dr. Krueger completed a 3-year nursing diploma program in 1948 at St. Luke's Hospital in Cleveland, OH. Her first nursing position was as a public health nurse in Washington, DC.'s Department of Public Health. From Washington, she traveled west to Colorado, where she became Director of Nursing for the Boulder City County Health Department. During this time, she received her B.S. and M.S. degrees, and a doctorate in sociology. Then, she traveled to the State of Arizona, where she was a faculty member at the University of Arizona from 1969 to 1977 and then went on to become director of the Western Interstate Commission for Higher Education, where she assisted nurses in designing and conducting research and using their findings to improve nursing practice in the clinical setting. Following a 6 year stint at the University of Colorado, she came back to Arizona to become dean of the College of Nursing at Arizona State University.

While officially retired, I know that Dr. Krueger will continue to influence the lives of Arizona's and America's nurses—both through the research and publications she produced, as well as through the path she forged during her career. She has been a strong advocate for nursing research, practice, and education. I have no doubt that she will continue to contribute to the advancement of professional nursing in her retirement, just as she did during her career. I, for one, look forward to continuing to learn about nursing and its needs from my friend, as she enters a new phase of her life. •

#### THE CONTINUING TRAGEDY IN BURMA

• Mr. MOYNIHAN. Mr. President, as the Senate prepares to adjourn, I would like to take just a few moments to remind my colleagues of the continuing human rights crisis in Burma.

Burma has suffered three decades of darkness—and never worse than now. Since 1988, the Senate has strongly supported efforts to isolate the regime

in Rangoon, and has sought greater pressure on the junta by the administration.

As we close this Congress, we can proudly acknowledge the bipartisan support in the Congress for the democratic forces fighting for change in Burma, and our great respect for Aung San Suu Kyi, the truly elected leader of Burma. She has suffered house arrest now for more than 3 years. And her victory in the elections in 1990 has been quashed by the ruling military junta. But her victory of spirit and her support by the people of Burma and of the world continue as strong as ever. She and the enslaved people of Burma are in our thoughts always.

We can proudly point to the determination of the U.S. Senate not to allow a policy of business as usual with the regime. When the administration found itself unable to take the actions that the Foreign Relations Committee unanimously agreed necessary to avoid any misunderstanding in our resolute condemnation of the regime—we prevented the sending of any new Ambassador to Rangoon. And none ought go until ever firmer actions are taken against this odious regime in Rangoon. A U.N. arms embargo ought to be imposed. No foreign aid ought to be sent—it only serves to support the regime. And it is long past time that we downgraded our diplomatic relations with Rangoon. There is nothing to discuss with these thugs.

We can hope that Japan, the European Community, and Australia will stand resolute in their efforts to bring democratic change to Burma. And we can likewise hope that the nations of ASEAN and China will stop the efforts at accommodation and profit, and will think of the people of Burma, all the people of Burma, no matter their ethnicity.

Arms sales must stop. Whether from China or Poland. Can it really be that President Bush approved the sales by Poland to Burma of helicopters as reported by the Polish Foreign Ministry? If it was so, we can only hope that it was a misunderstanding. The world must shut off the flow of arms to Burma. That means China. The world must isolate the regime. Again, that means China and ASEAN. The world must prevent the continuation of the type of hell in Burma that has only rarely been seen in the history of mankind. The people of Burma will not forgive us, nor will we be able to forgive ourselves. •

#### MARINE MAMMAL HEALTH AND STRANDING RESPONSE

• Mr. LAUTENBERG. Mr. President, I rise today to support title III to H.R. 5617. Title III contains the text of S. 1898, the Marine Mammal Health and Stranding Response Act, which I introduced last year. Title III would amend

the Marine Mammal Protection Act of 1972, to establish a program for responding to unusual marine mammal mortality events and to provide guidance and quality control for marine mammal tissue banking and analysis. The effective coordination of stranding responses will help save marine mammals and standardized tissue sampling and analysis will help determine the cause of marine mammal strandings and possibly prevent them.

Title III responds to the serious incidences of marine mammal strandings. In 1987 and 1988 we witnessed a die-off of Bottlenose dolphin and strandings of these animals on the shores of my State of New Jersey and other east coast States. The sight of dead and sick marine mammals on our shores was heartwrenching. It made many wonder why these beautiful creatures died and if this mysterious affliction would threaten other marine life and even beachgoers. Studies of the marine mammal tissue from these stranded marine mammals showed high levels of toxic contaminants. These contaminants may have played a role in weakening the immune systems of these marine mammals and made them susceptible to illness which led to their stranding. No conclusions could be drawn from these studies because we did not have an adequate baseline to compare contaminant levels found in the tissues of these stranded marine mammals.

Title III will address this problem by establishing a marine mammal tissue bank. While always tragic, strandings and unusual mortality events can be used as learning tools to diagnose the health of the marine mammal populations. If the marine mammal is still alive or recently dead, tissues can be collected for analysis. Tissue analysis may lead to a diagnosis of the problems which lead to the marine mammal strandings. It is not enough, however, to just ensure tissues are collected. Since the start of the stranding networks, tissues have been collected. Individual participants, however, have used various methods of collection, preparation, storage and examination of these tissues. Title III will require NOAA to issue recommended guidelines for collection, preparation and tissue analysis techniques. Thus data from one stranding event can be compared to data from another event, and all these can be referenced to standard samples taken from healthy marine mammals.

The 1987-88 Atlantic Bottlenose dolphin die-off and the Exxon Valdez oil spill of 1989 showed that responses to unexpected events affecting marine mammals that cause at least partial die-offs of marine mammal populations have been uncoordinated. Title III calls for a more effective response to unusual mortality events. It will accomplish this by having NOAA establish a

scientific working group that will: first, determine when an unusual mortality event is occurring; second, determine the point at which an unusual mortality event is concluded; third, develop a contingency plan which allows for a coordinated response to an event; and fourth, identify individuals or organizations that can assist NOAA in a coordinated and effective response. Contingency plans will permit the coordination of efforts so as to most effectively use scarce resources, maximize the chances for identifying causes of unusual mortality events, and improve efforts to save the marine mammals once stranded.

I want to thank Senator HOLLINGS and the Commerce Committee for their efforts to see that the Marine Mammal Stranding Act is enacted.

Mr. President, Title III will strengthen efforts to protect the health of this Nation's magnificent marine mammals. Title III has received the support of the administration and the environmental community. I urge my colleagues to support this legislation. ●

#### COAL RETIREES' HEALTH CARE

● Mr. GLENN. Mr. President, the Senate has grappled with many difficult issues during this session of Congress. But the coal industry retiree health benefits package before us today has been among the most contentious matters facing legislators this year.

The goal of this package is fundamental: To ensure health care coverage to tens of thousands of retired coal miners and their families—not just because it's a good idea, but because it's a promise that we must keep—a promise to workers who lived up to their commitment to supply our Nation's energy needs. As the so-called Dole Commission said, the commitment to provide them with health care benefits should now be honored.

There are more than 8,000 retired miners, spouses, and dependents in Ohio who are relying on this commitment. Ensuring the solvency of the benefit trust funds is critical to these Ohioans. We cannot turn our backs on them.

The difficult part is determining how to pay for it. The legislation before us today has changed significantly in this respect over the past year. The key difference is in how the bill will pay for so-called "orphan miners," meaning those whose companies are out of business. Originally, the legislation included a broad industrywide fee in order to keep up with the ongoing health costs of these retirees. But this has been changed at the urging of the administration so that premium payments will be made only by those for whom the retirees worked.

This applies to companies that may no longer be in mining, such as LTV. The liability of these companies

reaches back to their subsidiaries such as Pittston's subsidiary, Burlington Air Express.

Because we are only talking about a small number of companies here, the impact on some of them will be severe. I have actively worked with my colleagues in the Senate to assess the best means of cushioning the impact on these companies. While no provision has been included in the legislation before us, I look forward to continuing to work with my colleagues in the coming Congress to address this concern. Since the true liability of many companies will not be clear until October 1993, we will be in a better position in the coming Congress to determine what type of legislative solution may be necessary.

Finally, Mr. President, on behalf of the 8,000 retirees and their families in Ohio, I want to commend my distinguished friend from West Virginia, Mr. ROCKEFELLER, for all of his fine work and dedication on this difficult issue. ●

#### SUPPLEMENTAL COMPACT BETWEEN NEW JERSEY AND PENNSYLVANIA CONCERNING THE DELAWARE RIVER PORT AUTHORITY

● Mr. LAUTENBERG. Mr. President, I am pleased that the Senate yesterday approved H.R. 5452, important legislation to help promote economic development in New Jersey and Pennsylvania. In July, I joined my colleagues from New Jersey and Pennsylvania in sponsoring the Senate companion to this bill.

The legislation approves a change in an existing compact between New Jersey and Pennsylvania to allow the Delaware River Port Authority, or DRPA, which owns and operates four bridges between the two States, in addition to the PATCO high-speed line, to allocate some of its financial resources for needed economic development efforts in the region. The types of projects that will be eligible for funding would include investments in manufacturing, port-oriented development, foreign trade zone site development and research, and other commercial, industrial, and recreational activities.

Currently, the DRPA serves communities in southern New Jersey and the Philadelphia area of Pennsylvania. In New Jersey, its jurisdiction includes Atlantic, Burlington, Camden, Cape May, Cumberland, Gloucester, Ocean, and Salem counties.

The DRPA's primary responsibility will continue to be the operation and maintenance of its bridges and high-speed line. However, with approval of this compact modification, the authority could, after meeting those responsibilities, make important investments to help stimulate the regional economy.

The New Jersey Legislature approved the legislation to amend the existing

compact in January 1992. Pennsylvania followed suit in April 1992.

I point out, Mr. President, that this legislation does not call for any increase in the fees paid on the DRPA's bridges or high-speed line. It retains the existing Federal requirement that tolls be just and reasonable.

With approval of this legislation, Congress signed off on the changes to the existing compact, and will now allow the Delaware River Port Authority to expand its role, to the benefit of citizens throughout southern New Jersey and adjacent communities in Pennsylvania.

#### LESSONS OF THE AMERICAN EXPERIENCE

● Mr. LIEBERMAN. Mr. President, since the close of the Second World War, the great debate between the virtues of democracy and the alleged benefits of Soviet-style totalitarianism has engaged the hearts and minds of Europeans, east and west. It was, at times, a contentious and deadly struggle. As we all are aware, in some parts of Eastern and Central Europe that struggle continues. Within Western Europe, however, the great debate took another form: whether to form a federal structure and European Union. Throughout these remarkable changes, what remained constant was the power and influence of the American experience as a unique, hard fought, now more than 200-year-old effort to craft a federal system on the principles of individual rights and democratic institutions.

This broad issue was addressed recently at the Wilton Park Conference on "Federalism, Integration and Disintegration in Europe," hosted in the United Kingdom by the British Foreign and Commonwealth Office. Neil Proto, a member of the Connecticut bar, a partner in the Washington, DC, law firm of Verner, Liipfert, Bernhard, McPherson & Hand and an adjunct professor of public policy at Georgetown's graduate school, presented a thoughtful and intellectually engaging paper on the "Lessons of the American Experience" with federalism. It makes clear, in a compelling manner, that preservation of the idea upon which America was founded, individual rights and liberty and its protection by the Supreme Court has been fundamental to the proper functioning of federalism. It also makes clear how difficult a task this has been and the troublesome effects on federalism when the Court has failed to preserve this idea. Mr. President, I commend Mr. Proto's paper to my colleagues as an important, carefully crafted explication of how we have come to where we are today and why the Supreme Court continues to be essential to the proper functioning of federalism. There are lessons here for us, too, to ponder and to heed.

Mr. President, I ask that the text of Mr. Proto's paper be printed in the RECORD immediately following my remarks.

The text follows:

#### LESSONS OF THE AMERICAN EXPERIENCE

(By Neil Thomas Proto<sup>1</sup>)

##### I. INTRODUCTION

It is with the seemingly uncharacteristic humility of an American that I approach this assigned task.

The notion of federalism, and the federal-state relationship—what you refer to as "subsidiarity"—is an integral part of America's tradition and, in important ways, an essential and contentiously debated aspect of our current Presidential election. In many respects, it always has been. It is as much on our mind as it is on yours.

The humility that I sense comes in part from the fact that, as individual nations, European thought and experience tempered the early formation of the United States. Notions about the rule of law found their origins in Anglo-Saxon traditions and practice; John Locke and Sir William Blackstone's Commentaries were the primary source for the legal training of America's first lawyers and jurists and political leaders.

As you all also know, the American Revolution, including those years when it was translated into the written documents that formed our government and principles of law, found considerable support from the military acumen of the Marquis de LaFayette and from the political thought of Rousseau and Montesquieu. To this day, the insights and eloquence of deTocqueville's description of American democracy, written in the 1830's, retain their power in American political and cultural literature.

There is much, too, in the special traditions of your individual nations, in their support for human rights and individual liberty, in the fierce independence and commitment to national cultures and territorial integrity that have been examples and inspirations to the world, including to those within the United States. The effort you are now engaged in—to unite Europe, to forge—in unprecedented ways—common notions of civility and practical means of governance, to seek unity and a workable form of federalism, calls strongly on those special traditions. It is a commendable, if not vital effort, and I want to make clear at the outset, that any form of governance that is based on those special traditions—many of which we derive from and share with you—should be encouraged and welcomed.

The humility I bring to this assigned task, however, also is constrained by other factors:

The effort of America to forge a Union; to take 13 originally independent colonies and now 50 united states and to craft a system of federalism and democracy and liberty has been a unique and formidable accomplishment. It has been tempered by dark, and unenviable moments—some of which, too, are part of the lessons from our experience that I will discuss—but we are now more than 200 years old; and those seeking liberty and opportunity still enter our doorstep,

often at great physical and political peril. We, too, have much to offer by way of example and inspiration.

I am also constrained by a second factor: namely, the other characteristics in the European experience; those characteristics that have spawned radical ideologies and the harsh and systematic oppression of liberty and human dignity. For hundreds of years, the nations of Europe have been engaged in warfare; sometimes localized and twice global. The ominous figures of Franco and Salazar, Mussolini and Hitler; and the ideologies of Marx, Lenin and Engles still find poignant reverberations in contemporary society. We, in America, have felt those characteristics and their reverberations.

When our first President, George Washington, spoke in his Farewell Address to the nation in 1796, he spoke about the history of Europe and the caution America should exercise in becoming entangled in European affairs. The passage of time and the evolution of circumstances has severely dimmed America's caution but not the legitimacy of Washington's underlying view of Europe's history.

The challenge to Europe in going forward is substantial. Unity of the grand geographical and functional nature you now seek is not in your collective tradition, except as part of monarchies or dictatorship. The means you chose for meeting such a grand challenge are among the most difficult forms of governance, as both our experiences have demonstrated.

It is with this perspective in mind that I offer some thoughts on the lessons of the American Experience.

##### II. THE LESSONS

###### 1. The Value of the Idea

America was founded on an idea: the idea of individual liberty and equality. It was an idea deeply reflective of the 18th Century Enlightenment; and embodied, first and foremost, in our Declaration of Independence, when we said:

"We hold these truths to be self-evident, that all men are created equal, that they are endowed by their Creator with certain inalienable Rights, that among these are life, liberty and the pursuit of happiness."

It was this Idea—the Idea of individual equality and liberty—that moved men to unite in common venture. It was a transcendent idea, not empirical. There had been no comparable experience from which we could take comfort. Human history could not justify the Declaration of Independence.

Upon this Idea, however, we founded a Republic that, in geographic terms, was more than 1,000 miles in length—twice the distance between London and the eastern most perimeter of Germany. We did it in 1787.

What we did not do was merely to unify 13 colonies. The common value that we shared—what moved men—was not to declare the existence of a "United" States but to declare the principles upon which it was founded and must strive to attain.

I cannot emphasize strongly enough the importance of the timing and nature of this idea. We would be a different nation, and I believe our practice of federalism would be dramatically different, if we sought to forge a common venture in politics and government today. The power of the Reagan-Thatcher-Kohl notion of the free-enterprise system and the so-called virtues of the "market forces" have elevated a set of values that appeals to the baser, more self-centered motives of mankind. These are not the values of the Enlightenment or, to me, the values upon which nations endure or men are moved to do good.

The Idea—the existence of the Idea and the means for assuring its attainment—is fundamental to understanding the practice of federalism in America. In order to do so, we must return to our Constitution; to the Amendments we enacted to protect individual rights—what we refer to as the Bill of Rights—and to the most important institution we created to preserve the Idea and to give meaning to federalism: the Supreme Court of the United States.

###### 2. The Protection of Individual Rights Against the Action of Government

Throughout the debate over the ratification of our Constitution there existed a deeply-rooted, strongly held belief in the need to add to the Constitution a Bill of Rights: an enunciation of the restrictions imposed on government in order to protect and enhance individual rights, liberty, life and property. Such an effort sought, in large measure to further transform the principles and rights reflected in the Declaration of Independence into the daily governance of America.

Within a few years twelve such Amendments were added to our Constitution. There are now 27. These Amendments include individual, federally recognized rights directly applicable to the people.

Two of the founders of our nation took the lead in proposing these original Amendments—this Bill of Rights—James Madison and Thomas Jefferson. But it was Jefferson, then serving as Ambassador to France, who understood which institution would now emerge as the guarantor of those federal rights in the context of the federal-state relationship.

The "legal check," on the power of government, Jefferson said, has been "put into the hands of the judiciary."

It was among our First President's most important tasks. In 1789, President George Washington wrote "that the due administration of justice is the firmest pillar of good government \* \* \* [T]he judicial department is essential to the happiness of our country and the stability of its political system."

The remaining, central question confronting the framers of our Constitution was how to enforce and compel obedience to the Bill of Rights set forth in our Constitution. We chose to do so through the federal judiciary by declaring it to be paramount over *all* the individuals within the nation, and *all* the state legislature and governors that compose it.

In Article VI, Section 2 of the United States Constitution, it is provided that:

"This Constitution and the laws of the United States, which shall be made in pursuance thereof \* \* \* shall be the Supreme Law of the land; and the judges in every state shall be bound thereby; anything in the \* \* \* laws of any state to the contrary notwithstanding."

What this means, simply put, is that federal law, as declared and enforced by federal courts, is the supreme law of the United States and that, as a legal and binding matter, the Supreme Court and the federal judicial system can—as it has on many occasions—protect the rights of individuals against the actions of state legislatures and state governors. And, any final decision of the highest court in any state can be reviewed by the Supreme Court of the United States.

With important exceptions—reflected in our history—this principle has endured and become settled to the proper functioning federalism.

Oliver Wendell Holmes, who was a member of the Supreme Court from 1902 through 1932,

<sup>1</sup>Neil Proto is President of the American Friends of Wilton Park. He is a partner in the Washington, D.C. law firm of Verner, Lipfert, Bernhard, McPheron and Hand and an Adjunct Professor in Public Policy at Georgetown University's Graduate School. This paper was presented to the Wilton Park Conference on Federalism, Integration and Disintegration in Europe.

and one of our most highly respected jurists makes the following observation:

"I do not think the United States would come to an end if we lost our power to declare an Act of [the federal] Congress void. I do think the Union would be imperiled if we could not make that declaration as to the laws of the several states."

At stake for Holmes was, in large measure, the need to preserve the idea of freedom and liberty and individual rights upon which the nation was founded and federalism defined.

### 3. *The Practice: The Enduring Fight to Preserve the Idea*

As a practical matter, how has this worked? How has the Idea of individual rights and the American commitment to preserve it provided a lesson of enduring consequence concerning federalism?

As part of the answer to that question, I would like to state a proposition that has resonance in the American experience. Prejudice and discrimination, based on nationality, race, religion or gender, or the deliberate repression or denigration of political views that are not shared by the majority are more frequently and intensely felt on the state and local level. I believe it is fair to say that also is European experience.

There have been exceptions to this proposition, as we both are aware. But those exceptions often have evolved from the failure of national governments and courts of law to intercede promptly and to declare forcefully that individual rights and unpopular political views are legitimately held against the will of the majority, even when that will is expressed through state government.

As America grew geographically, and in population and diversity, this proposition was severely challenged. The challenge has centered on matters of race, nationality and gender.

As you all are aware, the history of the United States—including during its time as colonies—has been tempered by war and organized violence within its own boundaries. From its earliest days, America was prepared to engage those who challenged its territorial integrity, particularly when that challenge was on the geographic periphery of its boundaries.

Prior to the American Revolution, we organized militia to confront the French and hostile native American tribes in the northwestern most part of the colonies. Shortly after the Revolution, we were prepared to fight the French and Spanish in the southeastern United States; what is today Louisiana, Mississippi, Alabama and Florida. We fought the Mexican and French governments on the Western periphery of the nation; what is today Texas, Arizona, New Mexico and California.

Throughout America's entire movement westward in the 19th Century—well beyond the confines of its original colonial boundaries—it was frequently engaged in military conflict on its periphery, mostly against native Americans. We did it with an arrogance and a certain conceit about who we were and what was important to us.

But we learned early on—and supported it with force—that the geographic periphery of the nation, including areas clearly not within our formal authority—were as vital to our integrity and purpose as those geographic areas at the heart of the nation. We did so largely because we believed in the Idea upon which we were founded.

But the greatest challenge to America—reflective of both its darkest and most humiliating characteristics and, in some ways, its brightest, shining moments—was our Civil War.

There were many, complex reasons for the Civil War but in the end, it was really an intense, bloody conflict over the intellectual soul of the nation's reason for being; that is,

"What did the Declaration of Independence mean? When it spoke to the Idea—that all men are created equal and endowed by their Creator with certain inalienable rights—did it include Negro slaves?"

As you all may be aware, for decades prior to 1861—when the Civil War began—our political institutions—Congress and the President—sought, through compromise and accommodation, to avoid confronting the meaning of the Idea embodied in the Declaration of Independence. They were unable to do so. The states of the south asserted their own independence. They spoke of state's rights. In some respects these efforts at accommodation, and their failure, may be instructive to your own efforts in the former Yugoslavia—which sits squarely within the heart of the European Union.

An opportunity existed within the United States—in 1857, before the Civil War began—for the Supreme Court of the United States to reaffirm the Idea embodied in the Declaration of Independence. Its role in defining the federal-state relationship and in exercising the power granted to it to do so was undisputed. To its discredit, the Court failed to understand and seize upon the opportunity.

In what we in America refer to as the *Dred Scott Decision*, our Supreme Court was confronted with a fugitive slave whose owner wanted him returned. The slave's defense was that he was a free man; the owner's position was that the slave was mere property.

The Supreme Court concluded that *Dred Scott* was property. In doing so the Court failed—as did our political institutions—to declare as the law of the land the Idea upon which the nation was founded. It was a dark moment in American history. The preservation of the state's rights were more important than the individual rights upon which federalism was based.

But it was not a cause lost to those who continued to believe in the Idea.

In November 1863, toward the close of our Civil War, President Abraham Lincoln stood amidst the solemnity and death of the battlefield at Gettysburg. He was there to dedicate this site of War as a cemetery. And, as he had throughout his life as a public servant, he sought to reawaken the Idea that was the basis for America's founding.

"Fourscore and seven years ago," Lincoln began, "our fathers brought forth upon this continent a new nation, conceived in liberty, and dedicated to the proposition that all men are created equal."

He then ended his speech with a call for a renewed dedication to the Idea. He said:

"It is . . . for us to be here dedicated to the great task remaining before us . . . that we here highly resolve that the dead shall not have died in vain, that the nation shall, under God, have a new birth of freedom, and that the government of the people, by the people, and for the people, shall not perish from the earth."

Within less than a decade after President Lincoln's speech, the nation approved three new Amendments to our Constitution—to that section we originally called our Bill of Rights.

Those three Amendments not only made slavery a violation of our Constitution; they also made clear that the fundamental basis for the federal-state relationship was the dignity and equality and protection of the

individual; his life, liberty and property and without regard to his race, religion or national origin. We had fought a War to preserve the Idea.

It has been more than 100 years since this reaffirmation of the Idea and its relationship to federalism was made. It has not been a settled path.

In the early years of this century, as millions of Europeans sought to enter the United States, ethnic and political prejudice against those immigrants emerged with great power. This was particularly so among state legislatures, state governors and state courts. Much of this prejudice emerged in the infamous and shameful prosecution of two men, Bartolomeo Sacco and Nicola Vanzetti, accused of bank robbery and murder in the State of Massachusetts. Their real crime, as described by one of our former Supreme Court Justices, was that "both were of alien blood, [with an] imperfect knowledge of English, . . . unpopular social views, and . . . opposition to the [first world] War." They were unjustly convicted and sentenced to death; their individual rights under our federal Constitution deliberately ignored by state officials in order to satisfy local bigotry.

On five occasions, Justices of our Supreme Court were asked to stop the execution of Sacco and Vanzetti because of the prejudicial conduct of the state governor and the state courts. They refused. The primary reason given was the need to protect the state's right to conduct its own affairs. It was a sad moment; an enduring stain on the Courts history. It failed to vindicate the fundamental Idea for federalism: the protection of individual rights and unpopular political views.

More recently, when our political institutions—federal and state—were unable to agree on the preservation of the Idea, the Supreme Court was the institution that provided definition to the federal-state relationship.

We experienced this in the 1950's and 1960's, when the nation was confronted with massive resistance—some very violent—to the integration of public schools by African-Americans over the objection of state legislatures, local Boards of Education and state governors. It was the Supreme Court that ruled, and has consistently sought to enforce since that time, that state legislatures and governors must affirmatively guarantee the individual, federal right of all Americans to the equal protection of the law.

The lesson is clear: in the United States, when the federal judiciary, particularly the Supreme Court, has declined to protect individual or minority rights against the actions of state legislatures and governors or the popular will, the effect has been to move the nation away from the fundamental Idea upon which it was founded.

### III. CONCLUSION

I have two closing thoughts:

Following the drafting of our Constitution in 1787, it was submitted to each of the 13 states for individual ratification. That debate, within the various states, was strongly affected by publication and dissemination of a pamphlet and series of writings entitled "The Federalist Papers". They were written by three individuals who were members of the Constitutional Convention and later prominent members of America's first government: James Madison, as a member of Congress; Alexander Hamilton, as Secretary of the Treasury; and John Jay, as the First Chief Justice of the Supreme Court.

The Federalist Papers reflected an effort by those national figures who believed in

Federalism to engage with opponents of ratification in a spirited, intellectual and political debate within the various states.

These Papers—and the manner of their use—made the debate over the fate of the Constitution and the principles that tempered Federalism truly a national debate. It meant, too, that those with confidence in the practical virtue of a federal system could, in turn, be engaged and challenged about the merits of these principles.

The Federalist Papers have retained their intellectual power. They continue to be cited by our Supreme Court as an authoritative source for interpreting the meaning of the Constitution and the hopes of those who wrote and approved it.

I cannot urge you strongly enough to assure that those among you that believe in the virtues of federalism, and the values and special tradition that it reflects, not leave the fate of the European Union to those who seek comfort in the parochialism of states' rights, or, as you refer to it, "subsidiarity." Your grand vision needs forceful and clear advocates.

Finally, I would like to end where I began. Some time ago, the British philosopher Alfred North Whitehead, spoke with admiration about the meaning of the American experience. He said:

"The men who founded your republic had an uncommonly clear grasp of the general ideas that they wanted to put in here, then left the working out of the details to later interpreters, which has been, on the whole, remarkably successful. I know of only three times in the Western world when statesmen consciously took control of historic destinies: Periclean Athens, Rome under Augustus, and the founding of your American republic."

I believe that today Europe is on the verge of a similar historic destiny. I hope that, in the end, the philosophic successor to Lord Whitehead will speak not of three but of four times in the Western world when statesmen consciously took control of historic destinies; and that when it is so proclaimed, we can all truly celebrate the founding and the success of the European Union.●

#### H.R. 5716, REAUTHORIZATION OF THE OFFICE OF JUSTICE PROGRAMS

● Mr. BIDEN. Mr. President, yesterday the Senate passed H.R. 5716, a bill to reauthorize the Office of Justice Programs [OJP]. This Program forms the sole link between the Federal Government and the State and local law enforcement agencies that fight the scourge of crime everyday.

This bill reauthorizes these offices for 2 years.

While this bill has only the necessary interim effect to keep these valuable programs going for the next 2 years, it is clear to me that the office is in need of many improvements. This office should be beholden only to the needs of the front lines and not subject to inside the beltway political bickering. Earlier this year I held hearings on the reauthorization of the Office of Justice Programs which were helpful and insightful; yet they yielded one undeniable fact—the Office needs to be more responsive to the needs of law enforcement.

During this Congress, I had intended to introduce a reauthorization package for the Office of Justice Programs. But the gridlock over the crime bill hindered any attempt to restructure this office and better aid law enforcement throughout the country.

During the 103d Congress I plan to introduce a reauthorization bill—based on the hearings held by the Judiciary Committee—that will ensure that the Office of Justice Programs rises above politics and helps the Nation's crime fighters in the most efficient manner possible.●

#### CAREFUL USE OF NATURAL RESOURCES

● Mr. CRAIG. Mr. President, I was recently reminded of a letter from one of my constituents, James Collard, Sr., of Cascade, ID. In his letter, James focused on one of Idaho's—and the Nation's—most important industries; mining. As he says, "new wealth has come from the ground as a natural resource. These resources were placed there for our careful use, and locking them up helps nobody." James makes two very valid points.

I am delighted that after the dust settled and the House and Senate passed the conference report to H.R. 5503, I can tell James that the 1872 mining law is still intact—with one exception. That exception is the \$100 holding fee. Frankly, this provision should not have passed, either. A successful effort was made to modify this provision to allow a miner with 10 or fewer producing claims—generating gross receipts between \$1,500 and \$800,000—or with claims being actively explored to choose between paying the \$100 fee per claim directly to the U.S. Treasury or spending the same amount on assessment work for each claim. Unfortunately, to my constituents, this is a long way of saying that the small or recreational miner still has to pay the \$100 holding fee. What this means is that many small miners will go out of business, and recreational miners will find a new hobby/pastime. It means that those individuals willing to take a chance on exploration and development will not take that risk any more. They cannot afford to.

But, things could have been worse, much worse. Overall, I am pleased that the conference committee, in its wisdom, knows what James Collard knows: That our natural resources are here for our careful use, and locking them up helps nobody.●

#### H.R. 5826, PUBLIC SAFETY OFFICERS' BENEFITS

● Mr. BIDEN. Mr. President, the Senate has acted to pass H.R. 5862, a bill that is, unfortunately, vitally necessary to some of our Nation's law enforcement officers.

I say "unfortunately" because every year too many police officers are killed in the line of duty. Survivors of these officers are paid a one-time benefit to help cover costs—and while this may help somewhat, there is not enough money in the Treasury to cover the cost of losing a loved one.

Mr. President, each year too many of our police officers are permanently disabled in the line of duty, and can never work again. H.R. 5826 would increase the one-time benefit paid to these public safety officers who have been permanently and totally disabled so that it is equal to the benefits paid to survivors.

Permanent and total disability brings with it an immeasurable amount of costs—chief among them, medical bills. By increasing the benefit paid to these officers, the Federal Government can help to defray the burden of multiple bills.

As a Nation, we call on these courageous men and women to place their lives in the line of fire every day, to protect us and our children from the scourge of crime and drugs. And now, as a nation, we can help to repay these brave souls by increasing their disability benefits.●

#### TRIBUTE TO THE SENATE STAFF IN THE 102D CONGRESS

Mr. MITCHELL. Mr. President, as the 102d Congress prepares to adjourn, I want to mention and to thank members of the Senate staff for the assistance they have given me and my colleagues throughout the year.

Staff play an invaluable, albeit often invisible role in the operations of the Senate. From the basic operation of the service department to the daily assistance on legislative matters, staff often work long and unpredictable hours. Their family lives suffer and their social lives must often be put on hold.

All of us depend on staff for information, for assistance with constituents, for the smooth running of our offices here and in our home States. We all depend on the officers and staff of the Senate for the smooth operations of the institution in which we have the honor to serve.

I begin by expressing my gratitude for the invaluable services of the Secretary of the Senate, Walter "Joe" Stewart. His effectiveness and his efficiency are so well known and so well appreciated that they are almost legend. When Democrats regained control of the Senate in 1987, majority leader ROBERT BYRD appointed Joe Stewart to this position. I am glad he did. I am equally appreciative that Joe Stewart agreed to stay as Secretary when I became leader. He is ably assisted by Assistant Secretary Jeri Thomson, and by Michelle Haynes, Dot Svendsen, Muriel Anderson, Barbara Muller, and Ray Strong.

With great pleasure I thank the Sergeant at Arms, Martha Pope. She has been with me many years as a legislative assistant, legislative director, administrative assistant, chief of staff to the majority leader, and now in the office she currently holds and I depend on her counsel a great deal. She is the first woman in the history of the Senate to serve as Sergeant at Arms, and she's doing an excellent job. I am sure that Ms. Pope would be the first to acknowledge that much credit for the effectiveness of her office goes to her deputy, Robert Bean. Mr. Bean is the glue that holds the office together, and Ms. Pope and I commend him for it. We also commend their able and energetic assistants, Patty McNally, Loretta Fuller, Christina Krasow, Phil Potenziano, Whitney Williams, Andrew Phillips, Patrick Hynes, Alvin Spriggs, Pete Beatty, and Betty Bunch.

I and my Democratic colleagues are fortunate to have Abby Saffold serving as secretary for the majority. Her competence and her professionalism are exceeded only by her pleasantness. To know her is to like her, and to work with her is a delight. Likewise, she is fortunate to have the assistance of such capable people as Jerri Davis, Maura Farley, and Sue Spatz.

The assistant secretary for the majority, Martin Paone, works closely with the Democratic floor staff and performs his important duties with an enthusiasm and a sense of loyalty that may be equaled, but never surpassed. I thank him for his outstanding work.

Charles Kinney is a top-notch professional whose superior knowledge of Senate floor procedure has been a great help to me and every other member of this Chamber. Working with him on the Democratic floor staff are Lula David and Art Cameron whose dedicated work is fundamental to the effectiveness of the Senate. Nancy Iacomini and Brad Austin lend their valuable support to the floor operation.

Every Democratic Senator is well aware and appreciative of the staff of the Democratic Cloakroom: Lenny Oursler, Kathy Drummond, Gary Myrick, and Paul Cloutier. They make the life and work of Senate Democrats much easier and more productive. They have important jobs, tough jobs, filled with demands and pressures of many sorts and varieties. They are equal to these challenges, and I am grateful.

Mr. President, the U.S. Senate is well known for its complex rules and procedures. A person with extensive knowledge of those rules and the ability to interpret them is vital for the functioning of this Chamber. We are fortunate that we have such a person serving as Senate Parliamentarian, Alan Frumin. We are fortunate that he is assisted by Kevin Kayes, Jim Weber, Beth Smerko, and his executive assistant Sally Goffinet.

The Senate doorkeepers, directed by Arthur Curran and Don Larson, are

with us each hour we are in session. Their long hours are always noted, while their work is deeply appreciated.

I also want to recognize the important work performed by the Official Reporters of Debates: chief reporter Chick Reynolds, the assistant chief reporter Scott Sanborn, morning business editor Mark Lacovara and his assistant Ken Dean, and the official reporters of debates, Frank Smonskey, Ron Kavulick, Jerry Linnell, Raleigh Milton, Joel Breitner, Mary Jane McCarthy, and Paul Nelson. All have my deep gratitude for jobs well done.

Americans listening to the Senate hear the voices of legislative clerk William Farmer and his assistant, Scott Bates when calling the roll and performing other essential duties. Bill clerk Kathie Alvarez and her assistant Mary Anne Moore; journal clerks William Lackey, Dave Tinsley and Patrick Keating; enrolling clerk Brian Hallen and his assistant, Tom Lundregan; executive clerk Gerry Hackett and his assistant, Dave Marcos; and Daily Digest editor Tom Pellickaan and his assistants Linda Sebald and Kimberly Longworth, all have my thanks for their dedication to and competence in performing some of the most exacting but crucial day-to-day tasks in the Senate.

I want to give special attention to Katie-Jane Teel and her staff of expert captioners, who are completing their first year of providing closed captions of Senate proceedings. They are the very best in their field and the high praise they have received from the hearing impaired community is the best recognition of their contribution to making the Senate accessible to all Americans.

The work of Barry Wolk and his printing services staff, Tom McGlenn, John Steen and Kurt Stelter; the superintendent of the document room, Jeanie Bowles, and her staff; Mike DiSilvestro and his staff, are all fundamental to the effective workings of the Senate, and I commend them for it.

I want to give special attention to and to give a special thanks to those young Americans who are also vital to the effective workings of the U.S. Senate—the Senate pages. While performing important services for the Senate, these young men and women are learning how their Federal Government operates. I thank them for their energy, their zeal, and their hard work. I wish each and every one of them the very best in what I know will be very rewarding futures.

The staff director of the Democratic Policy Committee is the able and talented Monica Healy. She became staff director just a year and a half ago, and has already made the committee into an important instrument for developing and promoting the Senate Democratic message. Monica brings a tireless devotion to her position.

The Democratic Policy Committee, with Senator DASCHLE's able leadership, has become an important vehicle for bringing Democrats together on key issues such as the economy, health care, education and the environment. Greg Billings, the Deputy Director, is very conscientious about making sure that Senate Democrats are kept informed on the Senate's business. Garth Neuffer, DPC's senior media advisor, has been a major force behind our efforts to get the word out about the Senate Democratic agenda through press events, issue documents, and other promotional efforts.

Kris Balderston, with his strong people and organization skills, has been very effective in implementing our outreach efforts and helping promote the Democratic agenda. Michael Werner has been especially diligent and effective in helping to organize Senate Democrats around a consensus health care bill. Dave Corbin has done a great job in developing creative, user friendly reports on the economy and other issues of importance to working Americans and their families. Tony Morgan has recently become the economist for DPC and I look forward to working with him.

Mary Ann Hill, Paul Carliner, Amy Pressman, Leah Titerence, and Chris Moseley are diligent in keeping Senators and Senate offices informed about key Democratic initiatives and legislative activity on the floor of the Senate. Mary Ann also worked tirelessly to get the Senate Office of Fair Employment Practices up and running and Paul Carliner ably assisted me as we moved the energy legislation through the Congress. Kelly Paisly, Von Brown, Julie Cote, Tricia Moreis, and Russ Dunn have all lent important support to the DPC operations.

DPC has a good team that works hard to ensure that we get our DPC publications out in a timely manner. Marian Betram, Marguerite Beck Rex, and Doug Connolly help oversee the effort. Lynn Terpstra, Clare Amoruso, Colleen Brady Stephenson, Lauren Burke, Victoria Thomas, and Michael Mozdan are all instrumental to this effort. Lisa Plante and Jeff Pray are two new additions to the DPC staff who run the DPC-TV station.

Mr. President, I also want to take this opportunity to call attention to and to express my appreciation of the Republican counterparts to the Democratic staff. I especially commend Shelia Burke, chief of staff to the Republican leader, and James Whittinghill; they are worthy counterparts, but more importantly, they are professionals. The work and the cooperation of the secretary for the minority, Howard O. Greene, and his assistant, John Doney, Elizabeth Greene of the Republican floor staff, and the staff of the Republican Cloakroom also constitute formidable parts of the loyal

opposition, and their efforts are also recognized. All of them are always courteous and helpful. I thank them and all the other staff on the other side of the aisle. At times, such as during close votes and intense debates, I wish that they were not quite as good as they are in their work, but I do want them to know that we, on this side, are aware of and appreciate their dedication and cooperation.

Mr. President, the Senate could not function without the support and services of many other offices. I wish now to recognize and thank them for the important work they do.

One of the most difficult and complicated jobs around here is ensuring the safety of this great, historic building and the people who work in it, while protecting the democratic rights of the American people. The American people not only have the right to see their government in action, they have the right to petition it, and to protest against it. Placed in the middle of this most difficult position in the U.S. Capitol police force headed by Chief Gary Abrecht and his assistant Chief Robert Langley. I thank them for the professional way in which they perform their important and sometimes dangerous duties.

I commend the staff of the Service Department under the able and dedicated leadership of Russell Jackson. These dedicated men and women are here early in the morning and late at night, when the Senate is in session and when it is not, making sure that Senate publications are ready the next day. I call special attention to their tireless efforts in ensuring that the publications of my Democratic Policy Committee are always prompt and timely. I happen to know that the Policy Committee has placed some extraordinary demands on them—and they always come through.

Officers and staff who are not always visible, but whose daily work is essential to the institution's operations are the acting director of the computer center, Mike Bartell, postmaster Gayle Cory, director of telecommunications Robert McCormick, the director of the photo studio Alan Porter, and director of the cabinet shop Don Gardner, and all of their staffs. The acknowledgement also goes to the financial management team of Chris Dey, Ray Payne, Richard Zelkowitz, Amy Blanchard, and Alan Block. They may not always get the recognition they deserve for their outstanding work in their very demanding jobs, but all of them are appreciated more than they will ever know.

Also, I would like to commend those who keep this building so clean and well maintained under the leadership of Karen Ellis, Phyllis Timms, and Ross Thomas.

Mr. President, 2 years ago, when I gave a similar talk, I pointed out that

former Senate Majority Leader Lyndon Johnson was fond of saying, "information is power." I also explained that while I always understood what he meant by the phrase, it is as majority leader that I have come to truly and fully appreciate what he meant. Two more years as Senate majority leader have not diminished, but enhanced this perspective as I am even more grateful for the Senate's information support systems. There is the Congressional Research Service—whose reports, issue briefs and other publications are well known and heavily utilized by every Member of this Chamber and their staffs. The ability of CRS to retrieve information, find the smallest fact, research the most important questions, and provide prompt, timely analysis on difficult issues makes them essential to the effective workings of the U.S. Senate.

I thank the Congressional Budget Office for its important and timely work. In this era of budget deficits and budget restraints, CBO's prompt, but thorough analysis of the costs of pending legislation and its analysis of historical and programmatic trends have become a vital part of the legislative process.

The Senate Library staff are remarkable for the effectiveness, the resourcefulness, and the speed with which they fulfill the research demands of the Senate. Senate Librarian Roger Haley, assistants Ann Womeldorf, Greg Harness, Donnee Gray, and all the others on his talented, hard-working staff are commended.

Mr. President, it is said that the "past is prolog." If that is the case, the Members of this Chamber could not have better resources to call upon for knowledge of the future as well as the past than Senate historian Dr. Richard Baker and his talented staff. I thank them for their work in carefully, tenaciously, and meticulously documenting the history of this Chamber.

The Reverend Dr. Richard Halverson, the Senate Chaplain, is truly appreciated. The 60th Chaplain of the Senate is a spiritual leader whose kindness and thoughtful words inspire us all. While the Members of this Chamber are not always able to perform the miracles for which he often prays, I thank him for at least making the request. He provides kind and guiding words every morning the Senate is in session, comfort when it is needed, and inspiration in good times and bad.

Attending to our physical needs and problems is Dr. Robert Krasner and his fine, competent, and ever pleasant medical staff.

Also attending to our physical needs, albeit in different ways, are the outstanding staffs of the Senate restaurants. I thank them for the food they prepare and their service.

I express my utmost and personal gratitude to Shirley Herath, "Irish"

McLain, and Ruby Paone who manage the Senate reception room. Their friendliness and cooperation is well known and needs no elaboration, but it does deserve a thank you.

Those who work in the Senate press galleries, including Bob Peterson, Jim Talbert, Maurice Johnson, Larry Janeczich, and their deputies perform a valuable service in assisting the media in following the activities in this Chamber, and I thank them for it.

The staff of the recording studio's broadcast control perform the important chore of helping to bring the workings of the U.S. Government into the homes of the American people. Their coverage of the deliberations of the Chamber enables the American people to follow the workings of their Government, and I thank them for it.

Finally, Mr. President, I express my deep appreciation for my own staff who have served me so splendidly and so tirelessly for the past 2 years. I begin by recognizing and commending my Senate leadership staff headed by my chief of staff, John Hilley. His calm demeanor under extraordinary demands, his ability to make the complex seem so simple, and his political sagacity make him an excellent chief of staff.

Also making my life and work as Senate majority leader much easier and more comfortable are the other dedicated professionals in the majority leader's office. These include Lisa Nolan, whose disciplined, orderly thinking and behavior are not only needed and utilized, they are blessings in an office where chaos constantly beckons.

My executive assistant, Pat Sarcone, is always there when I need her—indeed, she is the miracle worker that every office needs. She handles every demand and every task, no matter how difficult, with a professional style and with an infectious positive attitude. I know of no person who has not found it a pleasure to work with her.

I also commend the work and loyalty of special assistant Alice Aughtry and staff assistant Ross LaJeunesse for performing many of the needed tasks in the leader's office.

My communications office is under the direction of the very capable and talented Diane Dewhirst. Ms. Dewhirst works tirelessly to promote the Senate Democratic agenda, and she works splendidly with the press so that the public may be better informed on the workings of the Senate. Her capable assistants, Mary Helen Fuller, Jim Manley, Kevin McNanus, Chris Deckel, Clare Flood, Kevin Kelleher, and Mark Marchione work hard as well to make sure the communications office serves its important purpose—which it does.

I am deeply indebted to and grateful for the staffers in my personal office. Without them, I would not be where I am, and I applaud them. They are a talented, loyal group of men and

women who do an excellent job in serving both the State of Maine and the United States.

I begin by commending the work of my administrative assistant, Mary McAleney. An organizer, a troubleshooter, a counselor, and much more, Ms. McAleney is everything a Senator wants in an AA. I thank her for all her work and dedication.

My legislative staff is superior. I thank each and every one of them for the excellent work they do. Bobby Rozen's knowledge of tax and banking issues cannot be matched; I depend on him a lot and he never lets me down. Anita Jensen has been with me since the beginning. She brings an institutional knowledge and grasp of issues that is rare in the Senate. She does an excellent job as my staff person on the Judiciary Committee, as well as being the in-house expert on many social issues of the day. Grace Reef is truly "amazing Grace" as she handles issues as diverse as roads and bridges to housing and welfare—and does it all superbly. Chris Williams has been a major force behind my effort to ensure that every American has access to affordable, quality health care. Kim Wallace deals with appropriations, budget, education and many other important issues, and is a joy to know—if Will Rogers never met a person he did not like, I never met a person who did not like Kim. Rich Arenberg has worked for me for a long time in several different positions; he is currently doing an excellent job as my Special Assistant for National Security Affairs. I rely on Bob Carolla for many and various issues, defense conversion and economic development issues for the State of Maine. Steve Hart works on veterans, agriculture, forestry preservation issues—issues that are very important to Maine; this year he has worked on veterans' health care issues obtaining some funds for Vietnam veterans. Sandy Brown handles Maine and appropriations and is a very important liaison with my field staff on economic development projects as well as handling national arts issues. Seth Brewster and Peggy Dorothy, who work on trade and labor issues respectively, are completing their first year with me, and have already proven themselves to be very capable Senate staffers. Barry Valentine does important and excellent work by staffing me on the MIA/POW issue. Research assistant Kelly Riordian and speech writer Lee Lockwood work with the legislative staff to provide them with the background and reference they need on various issues and policies.

I am grateful for my capable foreign policy staff; their expert knowledge of defense issues and international affairs has been crucial to me during this session of Congress. I have relied on them constantly, and I have never been disappointed. Sarah Sewell, who covers

Europe and the Middle East, has been with me for a long time, and I have always appreciated her work. Much of what she works on, such as Russian Aid and START Treaty are important, not only for the United States, but for much of the world. Ed King covers Asia and Central America. I valued his crucial work on the two votes on China-MFN status—although we were not successful, we fought the good fight for the right reasons. Brett O'Brien handles defense issues. His knowledge of the defense industry is especially needed and is being heavily utilized as we seek to balance the needs of our national defense and our domestic priorities in a changing world.

Kate Kimball, who deals with clean air and solid waste issues was a major force behind the passage of the Clean Air Act. This session she assisted with passage of key legislation, the Federal facilities bill and legislation to speed up transfer of contaminated Federal property. Also working for me on environmental issues—an area that I'm deeply concerned about—are two outstanding members of the Environment and Public Works staff, Jeff Peterson and Bob Davison. Jeff handles clean water issues; no one could be more concerned with protecting the quality and safety of our waters, and his work reflects it. No one could be more concerned with protecting our precious environment than Bob who handles wetlands and fisheries; to him belongs the delicate task of balancing environmental concerns against developmental ones.

I also express my deep appreciation for all those who perform the essential day-to-day tasks that keep the office functioning. Office manager Donna Beck takes care of those important office financial matters and responds to constituent requests. Donna's assistant, Sally Ehrenfried, trains and supervises the interns, and fills in wherever my office staff needs her. They not only provide the tools, they are the people who make an office function.

Performing the important tasks of answering constituent phone calls and letters so that I can stay in contact with the people of my State are Alice Steward, who I'm glad returned to my staff to oversee my legislative correspondents, Heidi Heal Bonner, Deb Cotter, Claude Berube, Chris Mann, Jim St. John, and Trey Kelleter. Staff assistants include Jill Ward, Amelia Johnson, Ashley Abbot, and Alexia Pappas. They are the eyes and ears and the voices to the many hundreds of people who, in one way or another, contact me each day.

Janie O'Connor is my liaison with visitors, especially tour and student groups, from my State who stop by to say hello. Her nearly 12 years experience has made her the best tour guide on the Hill. Diane Smith is responsible for my Maine schedule. She has the dif-

ficult job of balancing the many requests placed upon the majority leader against the time I am able to be in the State; she can schedule 12 hours of work into a 10 hour day and still leave time for a quick lunch. Jeff Hecker works long and hard to make sure that our new computer system is up and running. Faye Johnson ably runs the CMS system.

My Maine press Secretary David Bragdon, and his assistant, John Dougherty make sure the people of Maine are fully aware of our legislative efforts.

And a special thanks to my driver, Willie Allen, who cheerfully and ably ensures that I meet the hectic schedule demands of majority leader.

My office could not function without the splendid assistance of all those interns who come and pass through its doors. I assure each one of them that I and the rest of my staff truly appreciated their assistance throughout the year, and I wish each one of them future success and happiness.

Ensuring that the citizens of Maine have access to their Federal Government are my field staff. Under the superb supervision of Larry Beniot, this dedicated group of men and women includes Jeff Porter, Sharon Sudbay, Margaret Kneeland, Judy Cadorette, Ann Marie Paquette, Jan Welch, Joan Pederson, Sue Gurney, Tom Bertocci, Clyde MacDonald, Margaret Samways, Jeannie Hollingsworth, Elaine Huber-Neville, Mary Leblanc, and Marcia Gartley. Whether it be finding a lost Social Security check, making a little league keep its tax exempt status, working with leaders of a community to develop a grant proposal, or representing me at meetings and functions, they are my eyes and ears and representatives to the people in Maine. I thank them for the important work they do each and every day.

Mr. President, there are many other people who contribute to the productive workings of the U.S. Senate. While time does not permit me to thank everyone by name, each has my most profound and sincere appreciation for the work they do for this body. As a former Senate staffer myself, I know the tendency to feel underappreciated for all those long, hard hours of work that they put in. But I assure them that they are not under-appreciated. It has been together, working as a team, that we have made a difference—that together we made the 102d Congress a most successful Congress.

#### THANKING DEPARTING SENATORS

Mr. FORD. Mr. President, we are about to close. Many fine words have been said today about those colleagues who will not be returning in the next session of the Congress: Senator ADAMS, Senator CRANSTON, Senator DIXON, Senator GARN, Senator RUDMAN, Senator SYMMS, and Senator WIRTH.

I cannot equal those words of my colleagues in praise of those who will not be with us in the 103d Congress. I found each of them to be my friend. I found each of them to make a special contribution to the Senate. I think each is unique in their own way. They brought a variety of thought, a variety of positions, and gave us an opportunity to look at the issues that we face in this country squarely and to make what I feel are better determinations as we came to the compromise from their thoughts.

So I will miss them, the Senate will miss them, and the country will miss them. Let us hope that those who will replace them will be as dedicated and as diligent and as thoughtful as those Senators I just mentioned.

I could not let this moment pass, Mr. President, without thanking them for their major contributions.

And before I quit, and we are about to close, I think maybe I will make one or two more statements.

The PRESIDING OFFICER. The Chair, in his capacity as the Senator from California, thanks the Senator from Kentucky for his joint work on behalf of myself and the other Senators.

Mr. FORD. I thank the Chair. I have been doing little work here, kind of reading some papers. You find that a Senator comes in and says, "Can I get an agreement to build such-and-such?" And, lo and behold, it appears. If it does not, we fuss and fume a little bit and people go back and scramble, and that is the staff.

This is a well-oiled operation. And it is only that way because we have some of the most tremendous people that work for us here in the Senate, from the pages to the doorkeepers, to those that make the computers work—and they spit out the information that we need. I cannot thank them enough.

I just want to say to each and every one of them it has been a pleasure. I hope the Lord is willing for us all to meet here again on January 5, and that we have another opportunity to work together to do those things that we feel that are in the best interests.

I have never had one of these individuals fuss, complain, or say anything about the long hours and the drudgery which they go through. They are a special kind, and in a special place.

So I am pleased that I can say a few kind words. I wish I could paint a word picture as to how I really feel about these individuals, but I hope they understand that I do appreciate their efforts, and the Senate is much better off because of them, and hopefully in the future we will be able to make improvement on the foundations that we have laid this year.

Mr. SIMPSON. Mr. President, I want to echo what my friend from Kentucky says. You do not realize it until you become part of the leadership—and Sen-

ator FORD and I have been privileged to be that—what we owe to this fine staff.

I wonder if they ever run down. And yet I know they do, because we pressed them throughout the entire night the other evening, through the entire night, while the rest of us were resting, except one, and the person in the chair, in shifts. This entire staff was up the entire night at a time when it is so stressful. In any event, it is extraordinary to me that we make demands and they respond with patience and grace.

They are very skilled. And they are so attuned, so dedicated to this institution, and I marvel at their acumen, and careful and meticulous attention to detail that they force upon us to make this institution work as it does. And it works beautifully as an institution, and the mechanics and the rest of it is politics and government. That is tough to work sometimes. It has been going like that for over 200 years. They make this remarkable body function, and I really truly do salute them.

I say again what the Senator from Kentucky has said; we have just completed in the last few hours a tremendous amount of work, which this staff will be working on for days to come, and it was more than usual, because of the delays that occurred in these last hours, but what we did tonight, what we call wrap up, occurs every day. It just does not happen. It is a result of negotiations, and phone calls, and directions, and complaints, and scripts, and an incredible amount of floor duties that these people do and how they assist. They are really the unsung heroes.

I particularly want to thank the Republican and Democratic floor staff, Charles Kinney, Marty Paone, Lula Davis, and Elizabeth Greene, and Bobbie Holsclaw, and the majority secretary's office, Abby Saffold, and on our side, Howard Greene. And I want to recommend and commend our Cloakroom staffs on both sides, John Doney, Dave Schiappa, Brad Holsclaw, Laura Dove, special thanks to Martha Pope, who I knew in my first months in this remarkable body and have watched her succeed in every aspect of her life, and I am very proud to see what she does.

Loretta Symms, another splendid woman, who is of great help. These people are very courteous and kind and very wonderful to us. I want to commend the rest of the staff of the Sergeant at Arms, the Reading Clerks, the Journal Clerks, the Bill Clerk, Parliamentarians, the Reporters of Debates. I thank those who watch the doors in this very special place that you give us in which to do our work. You do not get the official credit, but we know that you indeed make this place operate.

And finally, the Republican leader's office, I mention Sheila Burke, who all of you know as a special person and the

way she handles her duties. Jim Whittinghill, and his complete accessibility; Bob Dove, Al Lehn, who is working, leaving to work with Senator SYMMS and the people who assist there, Pam and Clarkson, Walt Riker, and Pat Wade, and Jon Lynn Kerchner, and Jim McMillan, and Marilyn, Vicki Stack, Joyce, Pat, Ellie, Nina Olivieda, Kerry Timchuk, Kathy Ormiston, and the rest of the excellent staff.

That sounds trite when we do that. You think, well, what does it all mean? It means that we thank you, and I have not the words to quite say it either as my colleague from Kentucky has said. I have enjoyed working with him as always, and we do, I think, both dedicate ourselves to trying to see that this operation works properly. And I have been very privileged to work with the Senator from Kentucky for several years now in that capacity. I enjoy it very much. And I trust him when we work together, and enjoy that. Even though we do get a little rambunctious from time to time, it passes. That is part of our personality. Of course, I am looking forward with bated breath to next year.

To our colleague in the chair, good luck, and Godspeed.

#### ADJOURNMENT SINE DIE

Mr. FORD. Mr. President, if there is no further business, and no Senator is seeking recognition, I now ask unanimous consent that the Senate stand adjourned sine die in accordance with the provisions of House Concurrent Resolution 384.

There being no objection, the Senate, at 9:46 p.m., adjourned sine die in accordance with the provisions of House Concurrent Resolution 384, until 12 noon, January 5, 1993.

#### NOMINATIONS

Executive nominations received by the Senate October 8, 1992:

##### ENVIRONMENTAL PROTECTION AGENCY

RAY E. WITTER, OF MISSOURI, TO BE A MEMBER OF THE CHEMICAL SAFETY AND HAZARD INVESTIGATION BOARD FOR A TERM OF 5 YEARS. (NEW POSITION)

#### CONFIRMATIONS

Executive Nominations Confirmed by the Senate October 8, 1992:

##### FEDERAL RETIREMENT THRIFT INVESTMENT BOARD

SHIRLEY CHILTON O'DELL, OF CALIFORNIA, TO BE A MEMBER OF THE FEDERAL RETIREMENT THRIFT INVESTMENT BOARD FOR A TERM EXPIRING SEPTEMBER 25, 1994.

STEPHEN NORRIS, OF VIRGINIA, TO BE A MEMBER OF THE FEDERAL RETIREMENT THRIFT INVESTMENT BOARD FOR A TERM EXPIRING OCTOBER 11, 1994.

##### FEDERAL LABOR RELATIONS AUTHORITY

TONY ARMENDARIZ, OF TEXAS, TO BE A MEMBER OF THE FEDERAL LABOR RELATIONS AUTHORITY FOR A TERM OF 5 YEARS EXPIRING JULY 29, 1997.

##### SUPERIOR COURT OF THE DISTRICT OF COLUMBIA

BROOK HEDGE, OF THE DISTRICT OF COLUMBIA, TO BE AN ASSOCIATE JUDGE OF THE SUPERIOR COURT OF THE DISTRICT OF COLUMBIA FOR THE TERM OF 15 YEARS.

LEE F. SATTERFIELD, OF THE DISTRICT OF COLUMBIA, TO BE AN ASSOCIATE JUDGE OF THE SUPERIOR COURT OF THE DISTRICT OF COLUMBIA FOR THE TERM OF 15 YEARS.

DEPARTMENT OF STATE

EDWARD S. WALKER, JR., OF MARYLAND, A CAREER MEMBER OF THE SENIOR FOREIGN SERVICE, CLASS OF MINISTER-COUNSELOR, TO BE THE DEPUTY REPRESENTATIVE OF THE UNITED STATES OF AMERICA TO THE UNITED NATIONS, WITH THE RANK AND STATUS OF AMBASSADOR EXTRAORDINARY AND PLENIPOTENTIARY.

PAUL S. SARBANES, OF MARYLAND, TO BE A REPRESENTATIVE OF THE UNITED STATES OF AMERICA TO THE 47TH SESSION OF THE GENERAL ASSEMBLY OF THE UNITED NATIONS.

THE FOLLOWING NAMED PERSONS TO BE REPRESENTATIVES AND ALTERNATE REPRESENTATIVES OF THE UNITED STATES OF AMERICA TO THE 47TH SESSION OF THE GENERAL ASSEMBLY OF THE UNITED NATIONS:

REPRESENTATIVES:

- EDWARD JOSEPH PERKINS, OF OREGON.
- ALEXANDER FLETCHER WATSON, OF MASSACHUSETTS.

CAREER MINISTER, TO BE AMBASSADOR EXTRAORDINARY AND PLENIPOTENTIARY OF THE UNITED STATES OF AMERICA TO THE UNITED ARAB EMIRATES.

JOHN CAMERON MONRO, OF MARYLAND, A CAREER MEMBER OF THE SENIOR FOREIGN SERVICE, CLASS OF CAREER MINISTER, TO BE AMBASSADOR EXTRAORDINARY AND PLENIPOTENTIARY OF THE UNITED STATES OF AMERICA TO THE ISLAMIC REPUBLIC OF PAKISTAN.

IN THE AIR FORCE

THE FOLLOWING NAMED OFFICER FOR APPOINTMENT TO THE TRADE OF LIEUTENANT GENERAL WHILE ASSIGNED TO A POSITION OF IMPORTANCE AND RESPONSIBILITY UNDER TITLE 10, UNITED STATES CODE, SECTION 601:

To be lieutenant general

MAJ. GEN. STEPHEN B. CROKER, U.S. AIR FORCE.

MESSAGES RECEIVED FROM THE HOUSE SUBSEQUENT TO SINE DIE ADJOURNMENT

ENROLLED BILLS AND JOINT RESOLUTION SIGNED

Under the authority of the order of January 3, 1991, the Secretary of the Senate, on November 9, 1992, subsequent to sine die adjournment, received a message from the House of Representatives announcing that the Speaker has signed the following enrolled bills and joint resolution:

H.R. 2321. An act to establish the Dayton Aviation Heritage National Historical Park in the State of Ohio, and for other purposes;

H.R. 2324. An act to amend title 28, United States Code, with respect to witness fees;

H.R. 2448. An act to provide for the minting of medals in commemoration of Benjamin Franklin and to enact a fire service bill of rights;

H.R. 3665. An act to establish the Little River Canyon National Preserve in the State of Alabama;

H.R. 4016. An act to amend the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 to require the Federal Government, before termination of Federal activities on any real property owned by the Government, to identify real property where no hazardous substance was stored, released, or disposed of;

H.R. 5258. An act to provide for the withdrawal of most-favored-nation status from Serbia and Montenegro and to provide for the restoration of such status if certain conditions are fulfilled;

H.R. 5337. An act to amend the Rural Electrification Act of 1936 to improve the provision of electric and telephone service in rural areas, and for other purposes;

H.R. 5483. An act to modify the provisions of the Education of the Deaf Act of 1986, and for other purposes; and

H.J. Res. 542. Joint resolution designating the week beginning November 8, 1992, as "Hire a Veteran Week".

Under the authority of the order of January 3, 1991, the enrolled bill, H.R. 2448, was signed on November 9, 1992, subsequent to the sine die adjournment of the Congress by the Vice President.

Under the authority of the order of January 3, 1991, the remaining enrolled bills and joint resolution were signed on November 9, 1992, subsequent to the sine die adjournment of the Congress, by the President pro tempore [Mr. BYRD].

ENROLLED BILLS AND JOINT RESOLUTIONS SIGNED

Under the authority of the order of the Senate of January 3, 1991, the Sec-

retary of the Senate, on October 14, 1992, subsequent to the sine die adjournment of the Congress, received a message from the House of Representatives announcing that the Speaker has signed the following enrolled bills and joint resolutions:

S. 1145. An act to amend the Ethics in Government Act of 1978 to remove the limitation on the authorization of appropriations for the Office of Government Ethics;

S. 1146. An act to establish a national advanced technician training program, utilizing the resources of the Nation's 2-year associate-granting colleges to expand the pool of skilled technicians on strategic advanced-technology fields, to increase the productivity of the Nation's industries, and to improve the competitiveness of the United States in international trade, and for other purposes;

S. 1181. An act for the relief of Christy Carl Hallien of Arlington, TX;

S. 1530. An act to authorize the integration of employment, training, and related services provided by Indian tribal governments;

S. 1583. An act to increase the safety to humans and the environment from the transportation by pipeline of natural gas and hazardous liquids, and for other purposes;

S. 2044. An act to assist Native Americans in assuring the survival and continuing vitality of their language;

S. 2201. An act to authorize the admission to the United States of certain scientists of the Commonwealth of Independent States and the Baltic States as employment-based immigrants under the Immigration and Nationality Act, and for other purposes;

Under the authority of the order of the Senate of January 3, 1991, the enrolled bills and joint resolutions were signed on October 23, 1992, subsequent to the sine die adjournment of the Congress by the President pro tempore [Mr. BYRD].

#### ENROLLED BILLS AND JOINT RESOLUTIONS PRESENTED

The Secretary of the Senate reported that he had presented to the President of the United States the following enrolled bills and joint resolutions:

On October 9, 1992:

S. 1880. An act to amend the District of Columbia Spouse Equity Act of 1988.

S. 3007. An act to authorize financial assistance for the construction and maintenance of the Mary McLeod Bethune Memorial Arts Center.

S. 3095. An act to restore and clarify the Federal relationship with the Jena Band of Choctaws of Louisiana.

S.J. Res. 287. Joint resolution to designate the week of October 4, 1992, through October 10, 1992, as "Mental Illness Awareness Week."

On October 15, 1992:

S. 1145. An act to amend the Ethics in Government Act of 1978 to remove the limitation on the authorization of appropriations for the Office of Government Ethics.

S. 1146. An act to establish a national advanced technician training program, utiliz-

ing the resources of the Nation's 2-year associate-granting colleges to expand the pool of skilled technicians in strategic advanced-technology fields, to increase the productivity of the Nation's industries, and to improve the competitiveness of the United States in international trade, and for other purposes.

S. 1181. An act for the relief of Christy Carl Hallien of Arlington, Texas.

S. 1530. An act to authorize the integration of employment, training, and related services by Indian tribal governments.

S. 1583. An act to increase the safety to humans and the environment from the transportation by pipeline of natural gas and hazardous liquids, and for other purposes.

S. 2044. An act to assist native Americans in assuring the survival and continuing vitality of their languages.

S. 2201. An act to authorize the admission to the United States of certain scientists of the Commonwealth of Independent States and the Baltic States as employment-based immigrants under the Immigration and Nationality Act, and for other purposes.

S. 2322. An act to amend title 38, United States Code, to increase, effective as of December 1, 1992, the rates of disability compensation for veterans with service-connected disabilities and the rates of dependency and indemnity compensation for survivors of such veterans.

S. 2625. An act to designate the United States courthouse being constructed at 400 Cooper Street in Camden, New Jersey, as the "Mitchell H. Cohen United States Courthouse."

S. 2661. An act to authorize the striking of a medal commemorating the 250th anniversary of the founding of the American Philosophical Society and the birth of Thomas Jefferson.

S. 2834. An act to designate the United States Post Office building located at 100 Main Street, Millsboro, Delaware, as the "John J. Williams Post Office Building."

S. 2875. An act to amend the National School Lunch Act and the Child Nutrition Act of 1966 to better assist children in homeless shelters, to enhance competition among infant formula manufacturers and to reduce the per unit costs of infant formula for the special supplemental food program for women, infants, and children [WIC], and for other purposes.

S. 3006. An act to provide for the expeditious disclosure of records relevant to the assassination of President John F. Kennedy.

S.J. Res. 218. Joint resolution designating the calendar year, 1993, as the "Year of American Craft: A Celebration of the Creative Work of the Hand."

S.J. Res. 252. Joint resolution designating the week of April 18 through 25, 1993, as "National Credit Education Week."

S.J. Res. 305. Joint resolution to designate October 1992 as "Polish-American Heritage Month."

S.J. Res. 319. Joint resolution to designate the second Sunday in October of 1992 as "National Children's Day."

S. 225. An act to expand the boundaries of the Fredericksburg and Spotsylvania County Battlefields Memorial National Military Park, Virginia.

On October 16, 1992:

S. 2532. An act to support freedom and open markets in the independent states of the former Soviet Union, and for other purposes.

On October 19, 1992:

S. 758. An act to clarify that States, instrumentalities of States, and officers and employees of States acting in their official ca-

capacity, are subject to suit in Federal court by any person for infringement of patents and plant variety protections, and that all the remedies can be obtained in such suit that can be obtained in a suit against a private entity.

On October 20, 1992:

S. 347. An act to amend the Defense Production Act of 1950 to revitalize the defense industrial base of the United States, and for other purposes.

S. 474. An act to prohibit sports gambling under State law.

S. 759. An act to amend certain trademark laws to clarify that States, instrumentalities of States, and officers and employees of States acting in their official capacity, are subject to suit in Federal court by any person for infringement of trademarks, and that all the remedies can be obtained in such suit that can be obtained in a suit against a private entity.

S. 775. An act to improve the compensation of certain veterans for exposure to ionizing radiation, to improve the administration of veterans benefits programs, and for other purposes.

S. 893. An act to amend title 18, United States Code, to impose criminal sanctions for violation of software copyright.

S. 1002. An act to impose a criminal penalty for flight to avoid payments of arrearages in child support.

S. 1439. An act to authorize and direct the Secretary of the Interior to convey certain lands in Livingston Parish, Louisiana.

S. 1569. An act to implement the recommendations of the Federal Courts Study Committee, and for other purposes.

S. 1577. An act to amend the Alzheimer's Disease and Related Dementias Services Research Act of 1986 to reauthorize the act, and for other purposes.

S. 1623. An act to amend title 17, United States Code, to implement a royalty payment system and a serial copy management system for digital audio recording, to prohibit certain copyright infringement actions, and for other purposes.

S. 1664. An act to establish the Keweenaw National Historical Park, and for other purposes.

S. 1671. An act to withdraw certain public lands and to otherwise provide for the operation of the Waste Isolation Pilot Plant in Eddy County, New Mexico, and for other purposes.

S. 2418. An act to amend the Indian Health Care Improvement Act to authorize appropriations for Indian health programs, and for other purposes.

S. 2679. An act to promote the recovery of Hawaii tropical forests, and for other purposes.

S. 2890. An act to provide for the establishment of the Brown v. Board of Education National Historic Site in the State of Kansas, and for other purposes.

S. 2941. An act to provide the Administrator of the Small Business Administration continued authority to administer the Small Business Innovation Research Program, and for other purposes.

S. 3134. An act to expand the production and distribution of educational and instructional video programming and supporting educational materials for preschool and elementary school children as a tool to improve school readiness, to develop and distribute educational and instructional video programming and support materials for parents, child care providers, and educators of young children, to expand services provided by Head Start programs, and for other purposes.

S. 3144. An act to amend title 10, United States Code, to improve the health care system provided for members and former members of the Armed Forces and their dependents, and for other purposes.

S. 3224. An act to designate the United States Courthouse to be constructed in Fargo, North Dakota, as the "Quentin N. Burdick United States Courthouse."

S. 3279. An act to extend the authorization of use of official mail in the location and recovery of missing children, and for other purposes.

S. 3309. An act to amend the Peace Corps Act to authorize appropriations for the Peace Corps for fiscal year 1993 and to establish a Peace Corps foreign exchange fluctuations account, and for other purposes.

S. 3312. An act entitled the "Cancer Registries Amendment Act."

S. 3327. An act to amend the Agricultural Adjustment Act of 1938 to permit the acre-for-acre transfer of an acreage allotment or quota for certain commodities, and for other purposes.

S.J. Res. 166. Joint resolution designating the week of October 4 through 10, 1992, as "National Customer Service Week."

S.J. Res. 304. Joint resolution designating January 3, 1993, through January 9, 1993, as "National Law Enforcement Training Week."

S.J. Res. 309. Joint resolution designating the week beginning November 8, 1992, as "National Women Veterans Recognition Week."

S.J. Res. 318. Joint resolution designating November 13, 1992, as "Vietnam Veterans Memorial 10th Anniversary Day."

On October 26, 1992:

S. 2572. An act to authorize an exchange of lands in the State of Arkansas and Idaho.

S. 2964. An act granting the consent of the Congress to a supplemental compact or agreement between the Commonwealth of Pennsylvania and the State of New Jersey concerning the Delaware River Port Authority.

#### EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-4012. A communication from the Comptroller of the Department of Defense, transmitting, pursuant to law, notice of violations of the Antideficiency Act; to the Committee on Appropriations.

EC-4013. A communication from the Assistant Secretary of Defense, transmitting, pursuant to law, the annual report on research, development, test and evaluation activities conducted under the Biological Defense Research Program for fiscal year 1991; to the Committee on Armed Services.

EC-4014. A communication from the Secretary of the Air Force, transmitting, pursuant to law, notice of increased cost of a major defense acquisition program over the Program Acquisition Unit Cost as reflected in the baseline Selected Acquisition Report; to the Committee on Armed Services.

EC-4015. A communication from the Executive Office of the President, Director of the Office of Management and Budget, transmitting, pursuant to law, a report on the enactment of appropriations legislation; to the Committee on Budget.

EC-4016. A communication from the Under Secretary for Oceans and Atmosphere, De-

partment of Commerce, transmitting, pursuant to law, the "Biennial Report to the Congress on Coastal Zone Management, Volume I: Executive Summary: September 1992"; to the Committee on Commerce, Science, and Transportation.

EC-4017. A communication from the Deputy Associate Director for Collection and Disbursement, Department of the Interior, transmitting, pursuant to law, notice of intent to make refunds of offshore lease revenues where a refund or recoupment is appropriate; to the Committee on Energy and Natural Resources.

EC-4018. A communication from the Secretary of Energy, transmitting, pursuant to law, the Report of the Demonstration Project on Mandatory Interim Energy Conservation Performance Standards for Federal Residential Buildings; to the Committee on Energy and Natural Resources.

EC-4019. A communication from the Acting Assistant General Counsel, Department of Energy, transmitting, pursuant to law, notice of a meeting related to the International Energy Program; to the Committee on Energy and Natural Resources.

EC-4020. A communication from the Acting Assistant Secretary of the Army (Civil Works), transmitting, pursuant to law, notice of a deletion concerning the White River Basin Study; to the Committee on Environment and Public Works.

EC-4021. A communication from the Secretary of Health and Human Services, transmitting, pursuant to law, a report entitled "The AHCPR's Program of Patient Outcomes Research and Related Activities"; to the Committee on Finance.

EC-4022. A communication from the Secretary of Labor, transmitting, pursuant to law, the eighth annual report prepared in accordance with Section 216 of the Caribbean Basin Economic Recovery Act; to the Committee on Finance.

EC-4023. A communication from the Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting, pursuant to law, a report on international agreements other than treaties entered into by the United States in the 60-day period prior to October 8, 1992; to the Committee on Foreign Relations.

EC-4024. A communication from the Acting Assistant Secretary (Legislative Affairs), transmitting, a draft of proposed legislation to provide for the adjudication of certain claims against Iraq and for other purposes; to the Committee on Foreign Relations.

EC-4025. A communication from the President of the United States, transmitting, pursuant to law, the final report of the White House Conference on Indian Education, recommendations, and an executive summary; to the Select Committee on Indian Affairs.

EC-4026. A communication from the National Commander of American Ex-Prisoners of War, transmitting, pursuant to law, the 1992 audit report of the American Ex-Prisoners of War as of August 31, 1992; to the Committee on Judiciary.

EC-4027. A communication from the Commissioner of the Office of Special Education and Rehabilitative Services, Rehabilitation Services Administration, Department of Education, transmitting, pursuant to law, the annual report of Supported Employment Activities for fiscal year 1991; to the Committee on Labor and Human Resources.

EC-4028. A communication from the Secretary of Health and Human Services, transmitting, pursuant to law, a report entitled "Head Start Research and Evaluation: A Blueprint for the Future"; to the Committee on Labor and Human Resources.

EC-4029. A communication from the Secretary of Education, transmitting, pursuant to law, notice of final priorities—Early Education Program for Children with Disabilities; to the Committee on Labor and Human Resources.

EC-4030. A communication from the Secretary of Education, transmitting, pursuant to law, a report entitled "Vocational Education in the United States: 1969-1990"; to the Committee on Labor and Human Resources.

EC-4031. A communication from the Director of the Congressional Budget Office, transmitting, pursuant to law, the Final Sequestration Report for fiscal year 1993; pursuant to the order of January 30, 1975, as modified by the order of April 11, 1986, referred jointly to the Committee on Appropriations, the Committee on Budget, the Committee on Agriculture, Nutrition and Forestry, the Committee on Armed Services, the Committee on Banking, Housing and Urban Affairs, the Committee on Commerce, Science and Transportation, the Committee on Energy and Natural Resources, the Committee on Environment and Public Works, the Committee on Finance, the Committee on Foreign Relations, the Committee on Governmental Affairs, the Committee on the Judiciary, the Committee on Labor and Human Resources, the Committee on Rules and Administration, the Committee on Small Business, the Committee on Veterans Affairs, and the Select Committee on Intelligence.

EC-4032. A communication from the Director, Office of Management and Budget, Executive Office of the President, transmitting, pursuant to law, the cumulative report on budget rescissions and deferrals dated October 1, 1992; pursuant to the order of January 30, 1992, as modified by the order of April 11, 1986, referred jointly to the Committee on Appropriations, the Committee on Budget, the Committee on Agriculture, Nutrition and Forestry, the Committee on Environment and Public Works, the Committee on Foreign Relations, and the Committee on Labor and Human Resources.

EC-4033. A communication from the Chairman of the Federal Election Commission, transmitting, pursuant to law, notice of a violation of the Antideficiency Act; to the Committee on Appropriations.

EC-4034. A communication from the Assistant Secretary of Energy (Environmental Restoration and Waste Management), transmitting, pursuant to law, notice of delay of submission of a report to the Congress on the management of environmental restoration and waste management activities at Department of Energy facilities; to the Committee on Armed Services.

EC-4035. A communication from the Director, Office of Management and Budget, Executive Office of the President, transmitting, pursuant to law, the 20th report on United States costs in the Persian Gulf conflict and foreign contributions to offset such costs; to the Committee on Armed Services.

EC-4036. A communication from the Chief of the Programs and Legislation Division (Office of Legislative Liaison), Department of the Air Force, transmitting, pursuant to law, notice of an extension of an F-15 Full Scale Development contract; to the Committee on Armed Services.

EC-4037. A communication from the Director, Office of Management and Budget, Executive Office of the President, transmitting, pursuant to law, a report to Congress on direct spending or receipts legislation; to the Committee on the Budget.

EC-4038. A communication from the Director, Office of Management and Budget, Executive Office of the President, transmitting, pursuant to law, a report to Congress on direct spending or receipts legislation; to the Committee on the Budget.

EC-4039. A communication from the Director, Office of Management and Budget, Executive Office of the President, transmitting, pursuant to law, a report on appropriations legislation within 5 days of enactment; to the Committee on Budget.

EC-4040. A communication from the Director, Office of Management and Budget, Executive Office of the President, a report to Congress on direct spending or receipts legislation; to the committee on the Budget.

EC-4041. A communication from the Secretary of Transportation, transmitting, pursuant to law, notice of action on the Murtala Muhammed International Airport [LOS], Lagos, Nigeria; to the Committee on Commerce, Science and Transportation.

EC-4042. A communication from the Secretary of Transportation, transmitting pursuant to law, a report entitled "Driving Under the Influence: A Report to Congress on Alcohol Limits"; to the Committee on Commerce, Science, and Transportation.

EC-4043. A communication from the Assistant Secretary of Energy (Conservation and Renewable Energy), transmitting, pursuant to law, notice of delay of submission of a report on the Renewable Energy and Energy Efficiency Technology Competitiveness Act of 1989; to the Committee on Energy and Natural Resources.

EC-4044. A communication from the Deputy Associate Director (Collection and Disbursement), Minerals Management Service, Department of the Interior, transmitting, pursuant to law, notice of intent to make refunds of offshore lease revenues where a refund or recoupment is appropriate; to the Committee on Energy and Natural Resources.

EC-4045. A communication from the Chairman of the United States Nuclear Regulatory Commission, transmitting, pursuant to law, a report to Congress on Abnormal Occurrences at licensed nuclear facilities for the period April through June 1992; to the Committee on Environment and Public Works.

EC-4046. A communication from the Deputy Inspector General, Inspector General, Department of Defense, transmitting, pursuant to law, the Army Audit Agency report on the review of the Superfund Financial Transaction for fiscal year 1991; to the Committee on Environment and Public Works.

EC-4047. A communication from the Acting Assistant Secretary of State (Legislative Affairs), transmitting, pursuant to law, notice of a Presidential determination authorizing the use of \$1,500,000 from the United States Emergency Refugee and Migration Assistance Fund; to the Committee on Foreign Relations.

EC-4048. A communication from the Under Secretary of State (Political Affairs), transmitting, pursuant to law, notice of a determination concerning the transfer of Foreign Assistance Funds under the Fishermen's Protective Act; to the Committee on Foreign Relations.

EC-4049. A communication from the Acting Assistant Secretary of State (Legislative Affairs), transmitting, pursuant to law, notice of a Presidential determination concerning peacekeeping operations in Nagorno-Karabakh; to the Committee on Foreign Relations.

EC-4050. A communication from the Director of the Federal Domestic Volunteer Agen-

cy, transmitting, pursuant to law, a final regulation to exempt a system of records from certain provisions of the Privacy Act of 1974; to the Committee on Governmental Affairs.

EC-4051. A communication from the Manager, Employee Benefits, Air Force Morale, Welfare, Recreation and Services Agency (Retirement Plan Administrator), Department of the Air Force, transmitting, pursuant to law, the annual report on the Air Force Nonappropriated Fund Retirement Plan for Civilian Employees; to the Committee on Governmental Affairs.

EC-4052. A communication from the Secretary of Education, transmitting, pursuant to law, notice of final regulations—Institutional Eligibility under the Higher Education Act of 1965; to the Committee on Labor and Human Resources.

EC-4053. A communication from the President of the United States, transmitting, pursuant to law, notice of suspension of certain provisions of the Davis-Bacon Act within a limited geographic area; to the Committee on Labor and Human Resources.

EC-4054. A communication from the Secretary of Labor, transmitting, pursuant to law, a report entitled "Homeless Veterans Reintegration Project Evaluation Study"; to the Committee on Veterans Affairs.

EC-4055. A communication from the Acting Director, Office of Personnel Management, transmitting, pursuant to law, the annual report to Congress on Veterans' Employment in the Federal Government dated October 1, 1990 through September 30, 1991; to the Committee on Veterans' Affairs.

EC-4056. A communication from the Secretary of Defense, transmitting, pursuant to law, the 1992 Joint Military Net Assessment; to the Committee on Armed Services.

EC-4057. A communication from the Assistant Secretary of Treasury (Legislative Affairs), transmitting, pursuant to law, a copy of an amendment to the Iraqi Sanctions Regulations; to the Committee on Banking, Housing, and Urban Affairs.

EC-4058. A communication from the First Vice President and Vice Chairman of the Export-Import Bank of the United States, transmitting, pursuant to law, a report with respect to a transaction involving United States exports to Australia; to the Committee on Banking, Housing, and Urban Affairs.

#### PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate, and referred or ordered to lie on the table as indicated:

POM-491. A joint resolution adopted by the Legislature of the State of California; to the Committee on Agriculture, Nutrition, and Forestry:

##### "SENATE JOINT RESOLUTION No. 30

"Whereas, By the enactment of Resolution Chapter 128 of the Statutes of 1987 (Assembly Concurrent Resolution 25) and other measures, the Legislature has long recognized the importance of providing to highway travelers information on points of interest and the availability of facilities and services; and

"Whereas, Tourists traveling California's rural highways would benefit from information regarding nearby small businesses and attractions which do not have their own outdoor advertising facilities on the highways; and

"Whereas, The Federal Highway Administration, in its Manual on Uniform Traffic Control Devices, authorizes the states to es-

tablish a tourist-oriented directional sign program to provide business identification and directional information for small businesses, including those offering seasonal agricultural products, and to guide travelers on rural highways to these services and activities; and

"Whereas, a tourist-oriented directional sign program is required to be adopted by the Legislature prior to implementation; and

"Whereas, The information provided by a tourist-oriented directional sign program to the traveling public in rural areas would be a great assistance to travelers and significantly benefit rural economic development; and

"Whereas, There is presently no program in California for providing this kind of information to the traveling public; and

"Whereas, A study has been conducted under a Phase I grant through the Small Business Innovative Research Program of the United States Department of Agriculture which demonstrated the benefits, to small businesses in Oregon and Washington, of a tourist-oriented directional sign program; and

"Whereas, That program also makes available Phase II grants for purposes of administering the development of a tourist-oriented directional sign program plan in a state such as California; now, therefore, be it

*Resolved by the Senate and Assembly of the State of California, jointly*, That the Legislature of the State of California respectfully memorializes the President and Congress of the United States to direct the United States Department of Agriculture to award a Phase II grant for the purpose of developing a tourist-oriented directional sign program plan for rural highways in California; and be it further

*Resolved*, That the development of a tourist-oriented directional sign program plan in California under a Phase II grant be accomplished in consultation with the Department of Transportation of the State of California; and be it further

*Resolved*, That the Secretary of the Senate transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, to each Senator and Representative from California in the Congress of the United States, and to the United States Secretary of Agriculture."

POM-492. A joint resolution adopted by the Legislature of the State of California; to the Committee on Agriculture, Nutrition, and Forestry.

##### "SENATE JOINT RESOLUTION No. 51

"Whereas, The nation's forests face an emergency situation due to the volume of dead fuel, which threatens green timber, wildlife habitat, water quality, and residential structures; and

"Whereas, Congress is considering legislation concerning stewardship of national forests and or funding for pest prevention; and

"Whereas, Short- and long-term solutions must be found in order to effectively foster healthy conditions in all forests; and

"Whereas, A need exists to develop a method built on the foundation of a forest health management model; and

"Whereas, A model would assist the United States Forest Service in examining the utility of stewardship contracts in improving the management of forests on particularly sensitive forest lands; and

"Whereas, Lake Tahoe is an outstanding national resource that is experiencing continued degradation of its water quality, to

the detriment of the residents of the Lake Tahoe Basin, the States of California and Nevada, and the nation as a whole; and

"Whereas, The use, beauty, and enjoyment of Lake Tahoe is being imperiled by the degradation of forest health in the Lake Tahoe Basin due to the extremely high mortality of trees caused by drought and insect infestation; and

"Whereas, The Task Force on Bark Beetle Remediation of the California Senate has recommended that the Tahoe Basin be used as a scale model for the development of forest health management improvement objectives for particularly sensitive, previously damaged lands by the United States Forest Service, which would impact favorably on forest land management in California and in the rest of the United States; now, therefore, be it

*"Resolved by the Senate and Assembly of the State of California, jointly, That the Legislature of the State of California respectfully memorializes the Congress of the United States to enact legislation to designate the Lake Tahoe Basin Management Unit as a working model for other forests, as a means to develop a forest health management plan which provides for the following:*

"(a) Designation of the Lake Tahoe Basin Management Unit as a model for forest health management and forest land stewardship, and provision of funds for this purpose from appropriate federal programs.

"(b) Initiation and administration by the Forest Service of a model program for purposes of developing a national forest health maintenance plan.

"(c) Development by the Forest Service of short-term and long-term management plans for thinning and sanitation of dead and diseased trees on national forest lands for the purposes of fire hazard reduction and pest management, including the use of prescribed burning and the restocking of a diversity of native species consistent with environmental and watershed protections.

"(d) Consultation by the Forest Service with the Tahoe Regional Planning Agency, the California State Water Resources Control Board, and other appropriate agencies in California and Nevada, to assure that all Forest Service activities are consistent with the highest degree of water quality and other environmental protections, and to assure that those activities assist the Tahoe Regional Planning Agency in achieving and maintaining the environmental threshold carrying capacities adopted by the agency pursuant to the Tahoe Regional Planning Compact.

"(e) Assistance by the Forest Service in the development of noncommercial forest land management plans within the stewardship plan areas.

"(f) Provision for individuals or other private landowners to enter into a stewardship agreement with the Forest Service for the maintenance of healthy forest lands.

"(g) Stewardship contracting authority for the Pacific Southwest Region (Region 5) of the Forest Service; and be in further

*"Resolved, That the Secretary of the Senate transmit copies of this resolution to the President and Vice President of the United States, to the Secretary of Agriculture, to the Chief of the United States Forest Service, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."*

POM-493. A joint resolution adopted by the Legislature of the State of California; to the

Committee on Agriculture, Nutrition, and Forestry.

"SENATE JOINT RESOLUTION NO. 57

"Whereas, The Special Supplemental Food Program for Women, Infants, and Children (WIC Program) is an extremely cost-effective, preventive program which provides important supplemental food assistance, nutrition education, health information and referral for low-income women and children; and

"Whereas, Federal and private studies have shown that the WIC Program saves, for each dollar spent, up to \$4.21 in health care costs in the first 60 days of a child's life, plus another \$3.50 over a child's first 18 years; and

"Whereas, Federal funding is not allocated in proportion to need, resulting in the average state serving 55 percent of its WIC target population, but in California serving only 35 percent of its target population; and

"Whereas, Nearly half of all states serve 50 percent or more of the eligible children in their WIC target population, seven states serve less than 40 percent of eligible children, including California, which at 23 percent, has the lowest service rate of any state in the nation; and

"Whereas, California received 14.7 percent of all births in the nation in 1990, but only 10 percent of allocated federal WIC funds; and

"Whereas, The current federal funding formula for WIC used by the United States Department of Agriculture contains 1980, rather than 1990, census data; and

"Whereas, Less than 2 percent of the \$2.6 billion appropriated for WIC is set aside to address caseload imbalances, preventing California and other states from adequately addressing the inequities noted above, now, therefore, be it

*"Resolved by the Senate and Assembly of the State of California, jointly, That the Legislature of the State of California respectfully memorializes the Congress of the United States to amend the federal funding formula for the WIC Program to ensure that it: (1) either allocates newly appropriated growth funds to the most underfunded states or bases allocations on the estimated number of eligible women, infants, and children; (2) addresses the serious underallocation of funds to states, like California, that are serving far below the national average of individuals eligible for WIC funding; and (3) permits states to use WIC grants for two years or carry forward up to 5 percent of the food funds from one fiscal year to the next, allowing more prudent expenditure of those funds; and be it further*

*"Resolved, That the Secretary of the Senate transmit copies of this resolution to the President and Vice President of the United States, to the Secretary of Agriculture, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."*

POM-494. A joint resolution adopted by the Legislature of the State of California; to the Committee on Armed Services:

"SENATE JOINT RESOLUTION NO. 48

"Whereas, Proposed military budget reductions have targeted the 143rd Evacuation Hospital of the California Army National Guard at the Los Alamitos Armed Forces Reserve Center in southern California; and

"Whereas, Loss of the 143rd Evacuation Hospital will directly impact the citizens of California, and will not achieve the cost savings that are expected by Congress; and

"Whereas, The 143rd Evacuation Hospital is a 400-bed field hospital capable of treating

all classes of patients, and has recently been equipped with state-of-the-art deployable medical systems equipment. The entire unit is transportable, and is located on an airfield to permit rapid deployment; and

"Whereas, The 143rd Evacuation Hospital is California's most important medical asset in response to disasters. In 1989, the unit was mobilized for the Loma Prieta Earthquake at 8:00 p.m. on a weeknight. Before dawn the next morning the hospital was mobilized, equipped, and transported to the scene; and

"Whereas, More recently, the 143rd Evacuation Hospital designed and built a permanent field hospital site on the Armed Forces Reserve Center airfield. This deployable medical systems facility will provide support to all southern California residents in the event of a major disaster. Casualties would be flown from affected areas by military helicopters, stabilized by the evacuation hospital, then loaded on fixed-wing military aircraft for long-range evacuation to hospitals unaffected by the disaster; and

"Whereas, This disaster support area concept is the basis for many community, county, and state disaster plans; and

"Whereas, Humanitarian support has been provided for wildlife operations, Diablo Canyon, floods, prison strikes, and Mediterranean fruit fly missions. Other unit activities include community support to Red Cross health fairs, city athletic events, and community disaster planning assistance; and

"Whereas, The 143rd Evacuation Hospital is the only California Army Reserve National Guard asset trained and equipped with deployable medical systems equipment. The entire Armed Forces Reserve Center Disaster Support Area plan is predicated on the 143rd Evacuation Hospital's existence, the unit's location on the airfield permits its rapid deployment anywhere in the state. Without the 143rd Evacuation Hospital, the Governor has lost his most important military asset to the health and welfare of the people of the state; and

"Whereas, The proposed military budget reductions are intended to reduce costs to the taxpayer, but the loss of the 143rd Evacuation Hospital will be counterproductive to this effort. Most of the services provided to other National Guard units, including, but not limited to, aviation physicals, periodic physicals, and medical evaluations and consults will have to be obtained by contract with civilian health care providers. These contract expenses and the associated administrative burden will not be cost-effective. In 1990, the 143rd Evacuation Hospital provided in excess of 2,000 physical examinations and medical evaluations. When combined with other medical support provided for both the military and humanitarian missions, the cost savings to the taxpayer is substantial; and

"Whereas, The 143rd Evacuation Hospital is unique in that it has a positive budget impact, and no other California National Guard unit possesses the features and capabilities of the 143rd Evacuation Hospital, nor is as vitally important to the needs of the residents of California; now, therefore, be it

*"Resolved by the Senate and Assembly of the State of California, jointly, That the Legislature and citizens of the State of California strongly urge the President of the United States, the Secretary of Defense, and the Congress of the United States to take action to prevent the elimination of the 143rd Evacuation Hospital; and be it further*

*"Resolved, That the Secretary of the Senate transmit copies of this resolution to the President and Vice President of the United*

States, to the Speaker of the House of Representatives, to each Senator and Representative from California in the Congress of the United States, to the Secretary of Defense of the United States and to the Governor and the Adjutant General of the State of California."

POM-495. A joint resolution adopted by the Legislature of the State of California; to the Committee on Armed Services:

"SENATE JOINT RESOLUTION No. 47

"Whereas, The State of California has implemented a statewide, mandatory job training and education program known as the Greater Avenues for Independence (GAIN) program, for all recipients of assistance under the Aid to Families with Dependent Children (AFDC) program; and

"Whereas, GAIN is a program designed to end long-term dependency, and over 90,000 AFDC recipients have obtained employment through the GAIN program in just three years; and

"Whereas, Almost two-thirds of those eligible for GAIN services do not have a high school education, and require basic education skills to establish basic literacy and enter the job market; and

"Whereas, Eighty-five percent of persons eligible for GAIN services have received AFDC previously, indicating the need for fundamental intervention to break the cycle of dependency and create economic competitiveness; and

"Whereas, Current funding restrictions have resulted in six counties closing intake and 34 counties restricting intake; and

"Whereas, According to the Legislative Analyst's office, due to continued funding shortages, GAIN has been able to serve less than 50 percent of eligible recipients; and

"Whereas, Lengthy waiting lists for GAIN services now exist throughout the state; and

"Whereas, An educated and employed citizenry is a benefit to the State of California, and contributes to economic prosperity; and

"Whereas, The federal government has available over one billion dollars for the federal Job Opportunity and Basic Skills (JOBS) program that funds programs like GAIN, but states will not be able to fully access these moneys due to existing federal-state matching requirements; and

"Whereas, Due to state fiscal constraints, states will continue to be unable to utilize all the federal job training funds set aside for AFDC recipients; and

"Whereas, California has the existing programmatic framework to serve eligible AFDC recipients if funds are made available; and

"Whereas, Legislation is under consideration by Congress which would provide full funding for state programs such as GAIN; now, therefore, be it

*Resolved by the Senate and the Assembly of the State of California, jointly, That the Legislature of the State of California respectfully memorializes the Congress of the United States to immediately pass legislation that provides full funding for the Job Opportunity and Basic Skills program without additional state matching requirements; and be it further*

*Resolved, That the Legislature of the State of California encourages the Congress of the United States to act quickly on this issue to allow states to budget these additional training funds in the next fiscal year; and be it further*

*Resolved, That the Secretary of the Senate transmit copies of this resolution to the President and Vice President of the United*

States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

POM-496. A concurrent resolution adopted by the Legislature of the State of Louisiana; to the Committee on Appropriations:

"SENATE CONCURRENT RESOLUTION No. 6

"Whereas, Louisiana has often been the target of powerful hurricanes that move out of the Gulf of Mexico and inflict tremendous damage on the southern part of our state; and

"Whereas, the threat and power of Hurricane Andrew required the rapid evacuation of a large number of citizens in Louisiana's southern parishes; and

"Whereas, the evacuation of these citizens created traffic problems on most of the highways leading north out of South Louisiana; and

"Whereas, the vast majority of these evacuation routes are two-lane highways; and

"Whereas, the winds associated with Hurricane Andrew inflicted tremendous damage to the property of the citizens of South Louisiana; and

"Whereas, various fishing industries in South Louisiana were devastated by Hurricane Andrew: Now therefore, be it

*Resolved, That the Constitutional Convention of Louisiana of 1992 memorializes Congress and the President of the United States to provide federal aid for the following:*

"(1) Shrimpers, oyster fishermen, crab fishermen, livestock farmers, commercial fishermen, crawfishermen, shrimp processors, oyster processors, crab processors, crawfish processors, and shrimp dealers in those South Louisiana parishes that have been declared federal disaster areas.

"(2) Hurricane protection levees, floodgates, locks, dams, and weirs in Terrebonne Parish for the South Terrebonne Tidewater Conservation and Management District.

"(3) Feasibility studies for evacuation routes from Lafourche Parish, Terrebonne Parish, St. Mary Parish, Iberia Parish, Jefferson Parish, St. Bernard Parish, Plaquemines Parish, Lafayette Parish, Vermilion Parish, Acadia Parish, Allen Parish, Ascension Parish, Avoyelles Parish, Beaufort Parish, Bienville Parish, Bossier Parish, Caddo Parish, Calcasieu Parish, Caldwell Parish, Cameron Parish, Catahoula Parish, Claiborne Parish, Concordia Parish, DeSoto Parish, East Baton Rouge Parish, East Carroll Parish, East Feliciana Parish, Evangeline Parish, Franklin Parish, Grant Parish, Iberville Parish, Jackson Parish, Jefferson Davis Parish, LaSalle Parish, Lincoln Parish, Livingston Parish, Madison Parish, Morehouse Parish, Natchitoches Parish, Orleans Parish, Ouachita Parish, Pointe Coupee Parish, Rapides Parish, Red River Parish, Richland Parish, Sabine Parish, St. Helena Parish, St. James Parish, St. Landry Parish, St. Martin Parish, St. Tammany Parish, Tangipahoa Parish, Tensas Parish, Union Parish, Vernon Parish, Washington Parish, Webster Parish, West Baton Rouge Parish, West Carroll Parish, West Feliciana Parish, Winn Parish, Louisiana Highways 27 and 82 in Cameron Parish, St. John the Baptist Parish, St. Charles Parish, and Assumption Parish.

"(4) Four-laning Louisiana Highway 1 from Grande Isle to Golden Meadow.

"(5) Four-laning or relocation of Louisiana Highways 1 and 308 from Larose to Raceland at U.S. Highway 90.

"(6) Any other evacuation route projects deemed feasible.

"(7) Hurricane protection levees and an evacuation route from Lafitte to Larose.

"Be it further resolved, That a copy of this Resolution shall be transmitted to the President of the United States, the Secretary of the United States Senate and the Clerk of the United States House of Representatives, and to each member of the Louisiana congressional delegation."

POM-497. Joint resolution adopted by the Legislature of the State of California; to the Committee on Banking, Housing and Urban Affairs:

"SENATE JOINT RESOLUTION No. 45

"Whereas, It is extremely important that the State of California and the federal government continue to demand a safe and sound banking system in this country; and

"Whereas, The Legislature of the State of California reaffirms and restates its strong support for a safe and sound banking system in California; and

"Whereas, California's financial institutions must meet certain safety and soundness standards enforced by federal and state regulators, and know that they must either strengthen or maintain their financial condition; and

"Whereas, Many California businesses, agricultural concerns, and private citizens are experiencing difficulties obtaining nonresidential loans today; and

"Whereas, Credit worthy borrowers, especially those credit worthy businesses that employ thousands of Californians, should not be prevented from obtaining loans; and

"Whereas, In late 1991 the Congress found that:

"(1) During the past year and half a credit crunch of crisis proportions has taken hold of the economy and grown increasingly severe, particularly for real estate;

"(2) To date the credit crisis has shown no sign of improvement with its effects being felt broadly throughout the nation as business failures soar, financial institutions weaken, real estate values decline, and state and local property tax bases further erode;

"(3) Approximately two hundred billion dollars (\$200,000,000,000) of the nearly four hundred billion dollars (\$400,000,000,000) in commercial real estate loans now held by commercial banks are coming due within the next two years;

"(4) Banks for a variety of reasons, are reluctant to renew these maturing real estate loans; and

"(5) Many regulatory practices encourage banks to reduce their real estate lending without regard to long-term historical risk; now, therefore, be it

*Resolved by the Senate and Assembly of the State of California, jointly, That the Legislature of the State of California respectfully memorializes the President, the Congress, and the Treasury Department to find and implement immediate solutions to resolving what is popularly known as the "credit crunch," while at the same time maintaining reasonable and consistently enforced safety and soundness laws and regulations.*

"These solutions should center around, but not be limited to, such things as: (1) regulatory agencies judging individual financial institutions on their financial strength and ability to make a profit, rather than viewing all of them as potential problem institutions similar to bankrupt savings and loans; (2) having federal regulators work with, not against, those financial institutions that are financially sound and have a history of making prudent loans; (3) encouraging pension funds to do more investing in real estate

while at the same time maintaining the prudent expert standard; and (4) "credit crises" related solutions that are listed in Subtitle J, Sense of the Congress Regarding the Credit Crisis, Sec. 456. (b)(2)(A-D), of the Comprehensive Deposit Insurance Reform and Taxpayer Protection Act of 1991 which do the following:

"(A) Strengthen the secondary market for commercial real estate debt and equity by removing arbitrary obstacles to private forms of credit enhancement.

"(B) Restore balance to the regulatory environment by considering the impact of risk-based capital standards on commercial multifamily and single-family real estate; ending market-to-market, liquidation-based, appraisals; encouraging loan renewals; and, fully communicating the supervisory policy to bank examiners in the field.

"(C) Rationalize the tax system for real estate owners and operators by modifying the passive loss rules and encouraging loan restructures; and be it further

"Resolved, That the Secretary of the Senate transmit copies of this resolution to the President and Vice President of the United States, to the Secretary of the Treasury, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

POM-498. Joint resolution adopted by the Legislature of the State of California; to the Committee on Commerce, Science, and Transportation:

"SENATE JOINT RESOLUTION NO. 38

"Whereas, Six million dolphins are known to exist in the eastern tropical Pacific Ocean, and similar dolphin populations exist in all other oceans of the world; and

"Whereas, In recent years purse seine nets in the eastern tropical Pacific Ocean and large-scale pelagic drift nets in other oceans have drowned thousands of dolphins and other marine mammals annually in the pursuit of tuna; and

"Whereas, The United States supports the United Nations General Assembly Resolution 44/225, which recommends, worldwide, a 50-percent reduction of all large-scale pelagic drift net fishing on the high seas by June 30, 1992, and a moratorium on all pelagic drift net fishing by December 31, 1992, because of the high rate of marine mammal mortality associated with this method of fishing; and

"Whereas, The United States has been instrumental in reducing dolphin mortality associated with the international tuna purse seine fleet in the eastern tropical Pacific Ocean from 400,000 in 1972 to 25,000 in 1991, in part by encouraging bilateral agreements requiring 100 percent observer coverage on all vessels capable of setting purse seine nets in the eastern tropical Pacific Ocean; and

"Whereas, All United States tuna processors in 1990 voluntarily stopped purchasing any tuna or tuna products caught in association with dolphins in the eastern tropical Pacific Ocean or by drift nets anywhere in the world, and this action has led the federal government to set forth labeling standards for "dolphin safe" tuna products; and

"Whereas, A multinational agreement, based on the United States Marine Mammal Protection Act, is the optimum method to ensure worldwide dolphin protection; now, therefore, be it

"Resolved by the Senate and Assembly of the State of California, jointly, That the Legislature respectfully memorializes the Congress and the President of the United States to amend the Marine Mammal Protection Act

to prohibit the importation of tuna caught by nations which do not have 100-percent Inter-America Tropical Tuna Committee (ITTC) certified observer coverage on vessels capable of using large-scale purse seines; and be it further

"Resolved, That the California Legislature memorializes the Congress and the President of the United States to enact legislation to immediately require the Secretary of State to enter into negotiations with all foreign nations fishing in, and importing fish caught in, the eastern tropical Pacific Ocean in order to reach a multinational agreement coordinated by the ITTC, or similar international entity, to supersede the General Agreement on Trades and Tariffs, and to govern the worldwide fishing of tuna and which will do all of the following:

"(a) Require a worldwide ban on the use of large-scale drift nets.

"(b) Require 100-percent Inter-America Tropical Tuna Commission certified observer coverage on all vessels capable of using large-scale purse seine nets for the taking of tuna in the eastern tropical Pacific Ocean and all other oceans in association with dolphins in which tuna fishing occurs.

"(c) Prohibit the use of explosives to separate tuna from dolphins.

"(d) Prohibit the use of purse seine sets at night to harvest tuna.

"(e) Limit the incidental take of marine mammals per vessel in an amount not to exceed the 1991 average incidental take of marine mammal per United States vessel.

"(f) Require a financial commitment from all tuna fishing nations for funding research and development of alternative fishing technologies which reduce, with the goal of zero, dolphin mortality associated with the harvesting of tuna; and be it further

"Resolved, That the California Legislature respectfully memorializes the Congress and the President of the United States to authorize the appropriation of funds in the 1992-93 fiscal year in the amount of five million dollars (\$5,000,000) for the research and development of alternative fishing technologies which electronically or otherwise locate tuna not associating with dolphins and make the practice of setting nets on dolphins obsolete; and be it further

"Resolved, That the Secretary of the Senate transmit copies of this resolution to the President and the Vice President of the United States, to the Speaker of the House of Representatives, to each Senator and Representative from California in the Congress of the United States, to the Secretary of Commerce, to the Chairperson of the National Marine Fisheries Service, to the Chairpersons of the Senate Committees on Commerce and State, to the Chairperson of the House of Representatives Committee on Merchant Marine and Fisheries, and to the Chairperson of the House of Representatives Committee on Energy and Commerce."

POM-499. Joint resolution adopted by the Legislature of the State of California; to the Committee on Commerce, Science, and Transportation:

"SENATE JOINT RESOLUTION NO. 39

"Whereas, The United States Clean Air Act of 1990, the United States Intermodal Surface Transportation Efficiency Act of 1991, the California Transportation Blueprint for the 21st century, and other state and federal policies, individually and collectively, emphasize the importance of public transportation as an alternative to growing numbers of single-occupant private vehicles and their adverse effect on air quality; and

"Whereas, The United States Department of Transportation requires the state to enforce a maximum vehicle axle weight limit established by the Federal-Aid Highway Act of 1956, and any failure by a state to adequately enforce vehicle axle weight limits may result in a reduction of federal funds authorized for allocation to the state; and

"Whereas, The State of California has enacted statutes which establish a maximum vehicle axle weight for trucks and passenger buses to comply with federal law and to prevent premature deterioration of highway pavement and structures; and

"Whereas, The Federal Transit Administration approves the design of public transit buses that are purchased with federal financial assistance, including safety ratings for vehicle axles and for gross weight of the vehicle and passengers; and

"Whereas, There are two applicable federal standards, one pertaining to the maximum weight for vehicle axles and the other pertaining to the design and safety weight limits for federally funded transit vehicles; and

"Whereas, Public transit buses currently offered by domestic manufacturers and approved by the Federal Transit Administration, when laden with required operational and safety equipment and a full load of passengers, will be in violation of both the federal and California statutes limiting the weight on rear axles; and

"Whereas, It is a common practice for public transit operators in California and throughout the nation to carry on busy routes full loads of seated and standing passengers within design and safety weight limits; and

"Whereas, The California Highway Patrol has commenced enforcement of the maximum vehicle axle weight limits for public transit buses carrying full passenger loads and has, in some cases, required passengers to get off crowded and heavily loaded buses, necessitating those passengers to wait for another bus; and

"Whereas, Achieving efficiency in transit service means that buses must operate at the highest possible passenger load, and California law penalizes, by loss of state transit assistance funds and Transportation Development Act funds, any operator that does not meet operating efficiency standards based upon the total operating cost per revenue vehicle hour and minimum recovery of operating costs through the farebox; and

"Whereas, In order to comply with maximum vehicle axle weight limits, public transit operators in California and throughout the nation would be required to operate additional buses and incur higher costs without carrying any additional passengers; and

"Whereas, Public transit operators in California are currently unable to comply with maximum axle weight limit laws without incurring substantial additional operating costs and violating state efficiency and farebox recovery standards; and

"Whereas, The protection of passengers, the preservation of highway pavement, and the safeguard of public funds through efficient transit operation are each of important public concern; now, therefore, be it

"Resolved by the Senate and Assembly of the State of California, jointly, That state and federal standards and policies should encourage the available and operation of safe and efficient public transportation to meet mobility and air quality goals; and be it further

"Resolved, That the Legislature of the State of California respectfully requests the Congress of the United States and the United States Department of Transportation to ad-

dress the disparity between vehicle axle weight limit standards and the design and safety weight limits for federally funded transit vehicles, and to resolve the weight limit issues for passenger buses so public transit operators can continue to serve the maximum number of passengers, in an economically efficient manner, without jeopardizing passenger safety or the integrity of road highway systems; and be it further

"Resolved, That the Secretary of the Senate transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, to each Senator and Representative from California in the Congress of the United States, and to the United States Secretary of Transportation."

POM-500. Joint resolution adopted by the Legislature of the State of California; to the Committee on Commerce, Science, and Transportation:

"SENATE JOINT RESOLUTION NO. 44

"Whereas, A 1978 study by the Department of Transportation, as required by Chapter 954 of the Statutes of 1976, determined that unmarked utility power lines constitute a hazard to aircraft, especially helicopters, resulting in accidents that are commonly known as wirestrikes; and

"Whereas, According to the National Transportation Safety Board, between 1985 and 1990, there were 71 helicopter accidents due to wirestrikes, and these accidents resulted in 35 deaths and 27 serious injuries; and

"Whereas, Five people were killed while investigating an oil spill in a January 11, 1992, wirestrike accident over the Carquinez Strait in the San Francisco Bay Area in the same location where two persons were killed in a 1974 wirestrike accident; and

"Whereas, Public safety dictates the need for helicopters to operate at low altitudes in areas with many aerial wires for investigations, emergency rescues, fire fighting, law enforcement, and other activities; and

"Whereas, The successful performance of these public safety missions is dependent on a safe environment for the helicopter, and a safe environment requires the distinct marking of wires; and

"Whereas, Much of this essential helicopter work is done over terrain and in visibility conditions that tend to mask wires; and

"Whereas, The location of a wire, not just its height or length of span, should also be considered in determining a hazard; and

"Whereas, The Federal Aviation Administration (FAA) is responsible for operation of the air traffic and airways service system, regulation of aviation safety and security, provision of technological assistance to airports, and formulation and coordination of national and international aviation-related policy; and

"Whereas, The FAA developed guidelines on obstruction marking and lighting, entitled "Objects Affecting Navigable Airspace," in Part 77 of the Federal Aviation Regulations in 1965, and these guidelines have not been revised since 1972; and

"Whereas, New technology, such as microwave towers, has been introduced since 1972, and the regulations regarding obstruction marking and lighting are seriously outdated; now, therefore, be it

"Resolved, by the Senate and Assembly of the State of California, jointly, That the Legislature of the State of California hereby memorializes the Federal Aviation Administration to update Part 77 of the Federal Aviation

Regulations, relating to objects affecting navigable airspace, especially with regard to the prevention of wirestrike accidents; and be it further

"Resolved, That the FAA use the knowledge and expertise of the helicopter pilot community and utilities to immediately identify and mark specific locations that pose a danger to pilots; and be it further

"Resolved, That the FAA conduct research, and make recommendations, on new safety technologies that could be used to avert wirestrike accidents; and be it further

"Resolved, That the FAA distribute and explain these guidelines and findings to the helicopter pilot community, to state and local governments, and to utility companies that construct or alter power lines; and be it further

"Resolved, That the Secretary of the Senate transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the United States House of Representatives, to the Secretary of the United States Department of Transportation, to the Administrator of the Federal Aviation Administration, and to each Senator and Representative from California in the Congress of the United States."

POM-501. Joint resolution adopted by the Legislature of the State of California; to the Committee on Commerce, Science, and Transportation:

SENATE JOINT RESOLUTION NO. 53

"Whereas, United States products and technology are facing strong competition in the global marketplace thereby increasing the importance of innovation in maintaining and enhancing the competitiveness of American businesses worldwide; and

"Whereas, One of the most important aspects of product and technology development and advancement is testing; and

"Whereas, A well-structured testing program produces high quality, reliable, and competitive products and technology in areas including aeropropulsion, energy, environmental and waste management, natural hazards, and building safety construction; and

"Whereas, There is currently no large scale multipurpose multiagency testing facility in the United States committed to product development and demonstration; and

"Whereas, There has been relatively little comprehensive testing in the United States of the capacity of buildings and infrastructures to withstand severe environmental challenges including earthquakes; and

"Whereas, To best achieve cost savings, there should be a large scale centralized testing center with the equipment and facilities to test products and technology in a wide range of industries and product lines; and

"Whereas, The siting of a National Testing Center will require a suitable location with adequate infrastructure and support services, proximity to industry, business, transportation, and universities, a large accessible labor pool, a cadre of experienced personnel with demonstrated capabilities in product testing, and a commitment of resources from the national, state and local governments; and

"Whereas, The State of California would particularly benefit from the location of a National Testing Center within its boundaries because of its unique natural hazards, its acute environmental issues, the burden placed on its transportation system, its singular energy needs, its limited water resources, its highly advanced and specialized industries, and its need to transform its defense industrial base; and

"Whereas, A number of locations in the State of California amply satisfy all of the foregoing requirements; now, therefore, be it

Resolved by the Senate and Assembly of the State of California, jointly, That the Legislature respectfully memorializes the Congress of the United States to establish a National Testing Center located in the State of California; and be it further

"Resolved, That the Secretary of the Senate transmit a copy of this resolution to the President and Vice President of the United States, the Director of the National Institute of Standards and Technology, the Secretary of Transportation, the Secretary of Energy, the Administrator of the National Aeronautics and Space Administration, the Director of the Federal Emergency Management Agency, the Director of the National Science Foundation, the Director of the United States Geological Survey, the Administrator of the Environmental Protection Agency, the Director of the Office of Technology Assessment, the Speaker of the House of Representatives, to each Senator and Representative from California in the Congress of the United States, and to the Governor of the State of California."

POM-502. Joint resolution adopted by the Legislature of the State of California; to the Committee on Environment and Public Works:

"SENATE JOINT RESOLUTION NO. 43

"Whereas, Airports and highways in California, which are in part supported by federal tax money, are experiencing severe and increasing traffic congestion; and

"Whereas, The southern California association of Governments has predicted an increase in air traffic of 50 percent over the next 20 years in the southern California area; and

"Whereas, The San Francisco Airports Commission anticipates an increase in air travel passengers of 71 percent by 2006, which would result in an additional 329 flights per day, together with the additional noise from those 329 aircraft, over the San Francisco Bay area; and

"Whereas, Nearly 40 percent of commercial air carrier flights from the San Francisco International Airport go directly to the Los Angeles area; and

"Whereas, The Department of Transportation of the State of California has predicted that vehicle miles traveled on state highways will increase by 52 percent over the next 20 years; and

"Whereas, Numerous studies have indicated that the development of high speed train systems could relieve both air and highway traffic congestion; and

"Whereas, The National Research Council recently released a report concluding that the benefits of high speed train systems may justify financial support from federal highway and airport trust funds; and

"Whereas, The Commission on California State Government Organization and Economy, commonly known as the Little Hoover Commission, has recommended that the California Legislature support the use of federal highway trust funds for the development of a high speed passenger train system in California; now, therefore, be it

Resolved by the Senate and Assembly of the State of California, jointly, That the Legislature of the State of California respectfully memorializes the President and Congress of the United States to support and enact legislation to authorize federal highway trust funds to be used for the development of a high speed passenger train system in California; and be it further

"Resolved, That the Secretary of the Senate transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, to each Senator and Representative from California in the Congress of the United States, and to the United States Secretary of Transportation."

POM-503. Resolution adopted by the General Assembly of the State of New Jersey; to the Committee on Finance:

"ASSEMBLY RESOLUTION NO. 83

"Whereas, The Omnibus Budget Reconciliation Act of 1990 requires state and local employees who are earning in excess of \$100 per year, and who are neither covered by a state and local retirement system nor a voluntary agreement, to pay Social Security withholding taxes; and

"Whereas, The Omnibus Budget Reconciliation Act of 1990 makes election workers who earn in excess of \$100 per year liable for Social Security withholding taxes; and

"Whereas, A majority of election workers in New Jersey are retired senior citizens who participate in the operation of general elections more out of civic duty than as a result of the remuneration provided; and

"Whereas, The effect of deducting Social Security taxes from the already low pay of election workers has further depleted the critically deficient number of election workers, as well as created a time consuming and expensive burden on local boards of election; and

"Whereas, Given the effect of Social Security tax extension has had and will continue to have on the recruitment and retention of election workers, and considering the small amount of revenue this tax extension derives, it is incumbent on the Congress to take steps to ensure election workers' continued participation in the democratic process by increasing the Social Security tax exemption for election workers; now, therefore, be it

"Resolved by the General Assembly of the State of New Jersey:

"1. The Congress of the United States is respectfully memorialized to increase the Social Security tax exemption for election workers from the current \$100 per year to \$1,000 per year, as contained in the Older Americans Act Amendments presently before the Congress.

"2. Duly authenticated copies of this resolution shall be transmitted to the presiding officers of the United States Senate and House of Representatives and to every member of Congress from the State of New Jersey."

POM-504. Joint resolution adopted by the Legislature of the State of California; to the Committee on Finance:

"SENATE JOINT RESOLUTION NO. 37

"Whereas, The limits on resources for the purposes of determining eligibility for benefits under the federal Supplemental Security Income program, two thousand dollars (\$2,000) for an individual recipient, and three thousand dollars (\$3,000) for a married couple, do not reflect adequate consideration of typical and sudden expenses, including, but not limited to, home maintenance and taxes, automotive insurance, maintenance, or replacement, and appliance maintenance or replacement; and

"Whereas, A senior citizen with income exceeding allowable resources must spend down or bury savings; and

"Whereas, Noncompliance notices based on computations of minor monthly or intermit-

tent fluctuations in income create unnecessary administrative costs to government agencies, and hardship to recipients of federal Supplemental Security Income program benefit; now, therefore, be it

"Resolved by the Senate and Assembly of the State of California, jointly, That the Legislature of the State of California respectfully memorializes the President and the Congress of the United States to enact legislation to adjust the Supplemental Security Income program resource limits to five thousand dollars (\$5,000) for individual recipients and to seven thousand five hundred dollars (\$7,500) for married couples, and which would require the computations used to determine compliance with those limits shall be based on the average amount of funds in a recipient's applicable accounts over a significant period of time, such as one year; and be it further

"Resolved, That the Secretary of the Senate transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

POM-505. Joint resolution adopted by the Legislature of the State of Alaska; to the Committee on Finance:

"JOINT RESOLUTION

"Whereas the past year's fluctuations in prices and supply patterns for oil once again demonstrate that the access of the United States to this vital strategic resource is vulnerable to concerted political action by governments in the Middle East; and

"Whereas, in 1990, the reliance of the United States on imported oil increased to 47 percent, the highest percentage in nine years, and with the demand in the United States for oil increasing at an average rate of three percent each year for the past five years, this reliance on imported oil will increase because the domestic oil exploration and production capability of the United States has seriously eroded; and

"Whereas, until 1986, the United States had successfully increased its import of petroleum products from its neighbors in the Western Hemisphere and decreased its imports from the volatile Middle East, but this positive trend has been reversed, and Middle East imports of crude oil to the United States continue to increase; and

"Whereas the energy crisis of the 1970's taught the United States that manipulation of the world oil market by sovereign governments can run counter to the interests of the geographical neighbors that, like Mexico and Canada, share similar forms of democratic government; and

"Whereas, since the United States will need to rely on foreign sources of oil for the foreseeable future and the oil situations and long-term energy interests of Venezuela and the United States are complementary, the United States and Venezuela should continue to be important commercial partners for many years under fair conditions of trade; and

"Whereas Canada, Mexico, Venezuela, and the United States are long-standing energy trading partners who share a history of working together in successful oil and gas exploration and development and who share the fluctuations of a rapidly changing energy environment; and

"Whereas Canada, Mexico, Venezuela, and the United States share a common vision of the future in which a sound energy industry in each of the countries is able to provide the

energy security needed to ensure the health and vitality of the entire economy of the American nations; and

"Whereas the governments of the United States, Canada, Mexico, and Venezuela are striving to improve the overall well-being of all of their citizens while providing rich opportunities for individual freedom and growth, and it is natural for their representatives to explore options that will increase the energy security of the Western Hemisphere; and

"Whereas the Energy Council, of which Alaska is a member, actively supports and promotes the concept of an energy alliance among the nations of the Western Hemisphere;

"Be it resolved, that in recognition of the long-standing trading history with Canada, Mexico, and Venezuela and, in order to plan for increased security of the people and economies of the United States, Canada, Mexico, and Venezuela, the Alaska State Legislature urges the President of the United States and the United States Congress to engage in formal talks with the governments of Canada, Mexico, and Venezuela, as well as with other interested American countries, to develop a Pan-American energy alliance to provide reciprocal energy security measures for the nations of the Western Hemisphere; and be it

"Further resolved, that the Alaska State Legislature supports the efforts and work of the Energy Council to promote a Pan-American energy alliance and urges Governor Hickel and the current administration of the state to participate in these efforts.

"Copies of this resolution shall be sent to the Honorable George Bush, President of the United States; the Honorable Dan Quayle, Vice-President of the United States and President of the U.S. Senate; the Honorable Robert C. Byrd, President Pro Tempore of the U.S. Senate; the Honorable George J. Mitchell, Majority Leader of the U.S. Senate; the Honorable Thomas S. Foley, Speaker of the U.S. House of Representatives; to the Honorable Ted Stevens and the Honorable Frank Murkowski, U.S. Senators, and the Honorable Don Young, U.S. Representative, members of the Alaska delegation in Congress; and to Lori Cameron, Executive Director of the Energy Council."

POM-506. Joint resolution adopted by the Legislature of the State of California; to the Committee on Foreign Relations:

ASSEMBLY JOINT RESOLUTION NO. 58

"Whereas, The United States and Mexico have long-held close economic ties that serve to strengthen their economic positions within an ever-more competitive international system; and

"Whereas, Canada, the United States, and Mexico have entered into historic discussions to negotiate a North American Free Trade Agreement (NAFTA); and

"Whereas, The California-Mexico border region is in severe need of infrastructure development, including affordable housing, roads, sewage treatment plants, water reclamation facilities, telecommunications facilities, and deep water ports; and

"Whereas, Economic recession in the United States and 10 years of economic stagnation in Mexico has caused a lack of funds to pay for these infrastructure projects; and

"Whereas, The United States, particularly California and the states of the Southwest, would be benefited by infrastructure development in the border region; and

"Whereas, The proposed NAFTA is expected to increase the need for infrastruc-

ture because of increased trade opportunities; and

"Whereas, The California-Mexico relationship is expected to expand whether or not a free trade agreement is ratified; and

"Whereas, The creation of a North American Development Bank and Adjustment Fund would facilitate increased investment in targeted sectors of the Mexican economy and structural adjustment in Canada, the United States, and Mexico; and

"Whereas, This institution would serve two functions: (1) as a regional investment bank, it would lend funds to finance long-term development projects; and (2) as an adjustment fund, it would provide short- to medium-term assistance to facilitate the reallocation of resources required to generate productivity increases in the region; now, therefore, be it

*Resolved by the Assembly and Senate of the State of California, jointly.* That the Legislature of the State of California hereby respectfully memorializes the President and the Congress of the United States to enter into an agreement for the creation of a North American Development Bank and Adjustment Fund; and be it further

*Resolved,* That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, each Senator and Representative in the Congress of the United States, the President of Mexico, the members of the Mexican Congress, the United States Trade Representative, and the Governors of California, Nevada, Arizona, New Mexico, and Texas."

POM-507. Joint resolution adopted by the Legislature of the State of California; to the Committee on Foreign Relations:

"SENATE JOINT RESOLUTION NO. 58

"Whereas, The Republic of Bosnia-Herzegovina is internationally recognized as an independent state and is a member of the United Nations, and a participant in the Conference on Security and Cooperation in Europe; and

"Whereas, Attempts to bring about a permanent cessation of hostilities precipitated by the warring factions in the former Yugoslavia states in Bosnia-Herzegovina through negotiations have repeatedly failed; and

"Whereas, Horrible atrocities are being committed by various forces involved in this conflict against the civilian population, including the practice of "ethnic-cleansing"; and

"Whereas, The United States and other Contracting Parties to the International Convention of the Prevention and Punishment of the Crime of Genocide may, under Article VIII, "call upon the competent organs of the United Nations to take such action under the Charter of the United Nations as they consider appropriate for the prevention and suppression of acts of genocide" or any of the other "Acts Constituting Genocide" enumerated in Article III; and

"Whereas, Officials of the International Committee of the Red Cross have been denied access to prison camps and internment camps throughout Bosnia-Herzegovina and throughout other republics of the former Yugoslavia even though these officials are entitled access to these camps under Article 143 of the 1949 Geneva Convention; and

"Whereas, United Nations and Red Cross relief convoys carrying much needed supplies of food and medicine are being repeatedly blocked and in some cases have been attacked; and

"Whereas, The Security Council of the United Nations voted unanimously to dis-

patch additional forces to reopen Sarajevo's airport, and the delivery of supplies of humanitarian assistance to the city's beleaguered population is taking place under the protection of these forces but with great difficulty; and

"Whereas, The Security Council of the United Nations also endorsed the cease-fire plan negotiated by the European Community Envoy that would place all heavy weapons in the possession of factions in Bosnia-Herzegovina under international supervision; and

"Whereas, The Government of Bosnia-Herzegovina has issued urgent appeals for immediate assistance from the international community; and

"Whereas, The situation in Sarajevo and elsewhere in Bosnia-Herzegovina has reached a critical point requiring immediate and decisive action by the international community; now, therefore, be it

*Resolved by the Senate and Assembly of the State of California, jointly.* That the Legislature of the State of California respectfully memorialize the President and the Congress of the United States to immediately call for an emergency meeting of the United Nations Security Council in order to authorize, under Article 42 of the Charter of the United Nations, all necessary means, including the use of multilateral military force under a Security Council mandate, giving particular consideration to the possibility of demonstrations of force, to give effect to Security Council decisions to ensure the provision of humanitarian relief in Bosnia-Herzegovina and to gain access for United Nations and International Red Cross personnel to refugee and prisoner-of-war camps in the former Yugoslavia; and be it further

*Resolved,* That, during the meeting, the Security Council of the United Nations should do all of the following:

"(a) Develop the means by which to implement the July 17, 1992, cease fire plan sponsored by the United Nations, which includes placing heavy weapons belonging to all factions in Bosnia-Herzegovina under United Nations supervision; and

"(b) Review the effects on Bosnia-Herzegovina of the arms embargo imposed on all states in the former Yugoslavia pursuant to United Nations Security Council Resolution 713 and determine whether the termination or suspension of the application of that resolution to Bosnia-Herzegovina could result in increased security for the civilian population of that country; and

"(c) Convene a tribunal to investigate allegations of war crimes and crimes against humanity committed within the territory of the former Yugoslavia and to accumulate evidence, charge, and prepare the basis for trying individuals believed to have committed such crimes; and be it further

*Resolved,* That the California Legislature resolves all of the following:

"(a) The California Legislature strongly supports the measures announced by the President on August 6, 1992; and

"(b) No United States military personnel shall be introduced into combat or potential combat situations without clearly defined objectives and sufficient resources to achieve those objectives; and

"(c) The California Legislature supports the use of American funds as may be necessary for United States participation in humanitarian relief and multilateral military force activities, pursuant to any mandates as may be adopted by the United Nations Security Council, consistent with the terms of this resolution; and be it further

*Resolved,* That the Congress of the United States, when requested to do so by the President, should promptly consider authorization for any use of United States military forces pursuant to, and only pursuant to, the United Nations authorization described above; and be it further

*Resolved,* That the Secretary of the Senate transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

POM-508. Joint resolution adopted by the Legislature of the State of California; to the Committee on the Judiciary:

"SENATE JOINT RESOLUTION NO. 1

"Whereas, The First Congress of the United States of America at its First Session, in both houses by a constitutional majority of two-thirds thereof, adopted the following proposition to amend the Constitution of the United States of America in the following words, to wit:

"The Conventions of a number of the States, having at the time of their adopting the Constitution, expressed a desire, in order to prevent misconstruction or abuse of its powers, that further declaratory and restrictive clauses should be added: And as extending the ground of public confidence in the Government, will best ensure the beneficent ends of its institution

*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, two thirds of both Houses concurring,* that the following Articles be proposed to the Legislatures of the several States, as amendments to the Constitution of the United States, all or any of which Articles, when ratified by three fourths of the said Legislatures, to be valid to all intents and purposes, as part of the said Constitution, viz.:

"Articles in addition to, and Amendment of the Constitution of the United States of America, proposed by Congress, and ratified by the Legislatures of the several States, pursuant to the fifth Article of the original Constitution.

"Article the second—No law, varying the compensation for the services of the Senators and Representatives, shall take effect, until an election of Representatives shall have intervened."; and

Whereas, This proposed amendment will be valid as part of the Constitution of the United States when ratified by the legislatures of three-fourths of the several states; and

Whereas, This proposed amendment has already been ratified by the legislatures of the following states: Alabama, Alaska, Arizona, Arkansas, Colorado, Connecticut, Delaware, Florida, Georgia, Idaho, Indiana, Iowa, Kansas, Louisiana, Maine, Maryland, Michigan, Minnesota, Missouri, Montana, Nevada, New Hampshire, New Jersey, New Mexico, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, West Virginia, Wisconsin, and Wyoming; now, therefore, be it

*Resolved by the Senate and Assembly of the State of California, jointly.* That this proposed amendment to the Constitution of the United States of America be and the same is hereby ratified by the Legislature of the State of California; and be it further

*Resolved,* That the Secretary of the Senate transmit certified copies of this resolution to the Archivist of the United States, Washington, D.C., the President of the United

States Senate, and the Speaker of the House of Representatives of the United States, with the request that it be printed in full in the CONGRESSIONAL RECORD."

POM-509. Joint resolution adopted by the Legislature of the State of California; to the Committee on the Judiciary:

"SENATE JOINT RESOLUTION No. 56

"Whereas, The State of California has had a significant increase in crimes of violence and drug trafficking offenses committed with firearms; and

"Whereas, The State of California has significantly increased criminal penalties for the possession or use of firearms in crimes of violence and drug trafficking; and

"Whereas, The State of California is experiencing unparalleled fiscal problems which preclude even greater state efforts to prosecute and incarcerate crimes of violence and drug trafficking; and

"Whereas, At least 70 percent of the individuals who are in the state prison system could be prosecuted under federal law for their crimes; and

"Whereas, Since 1968, the federal Gun Control Act has provided a jurisdictional basis to prosecute individuals in federal court for crimes of violence and drug trafficking offenses committed with firearms; and

"Whereas, Notwithstanding the enactment of federal statutes since the enactment of the Gun Control Act of 1968, that impose heavy criminal penalties for persons who supply weapons knowing the weapons will be used in crimes of violence or drug trafficking, or individuals with serious criminal records who possess firearms, there has been a lack of federal prosecutorial effort to incarcerate dangerous criminals who are subject to the foregoing criminal penalties; and

"Whereas, The federal government has cut back on criminal justice assistance to cover state incarceration costs; now, therefore, be it

*"Resolved by the Senate and Assembly of the State of California, jointly,* That the Legislature of the State of California respectfully memorializes the President of the United States to direct the United States Department of Justice to prosecute under federal law all individuals who violate the Gun Control Act of 1968, as amended (P.L. 90-618), prohibiting, among other things:

"(a) The use of a firearm during, or in relation to, any crime of violence or drug trafficking crime.

"(b) Violations of the Armed Career Criminal Act of 1984.

"(c) Traveling with a firearm in interstate commerce with intent to commit a felony.

"(d) Supplying firearms to others knowing that they will be used in drug trafficking or crimes of violence.

"(e) Knowingly supplying firearms to prohibited persons.

"(f) Trafficking in stolen or obliterated firearms; and be it further

*"Resolved,* That the Secretary of the Senate transmit copies of this resolution to the President and the Vice President of the United States, to the United States Attorney General, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

POM-510. Joint resolution adopted by the Legislature of the State of California; to the Committee on Labor and Human Resources:

"SENATE JOINT RESOLUTION No. 55

"Whereas, Manufacturing firms in the United States need to maintain and enhance

the quality of their products, the rate of their productivity, and the intensity of their competitiveness in order to face the tremendous economic challenges of the 1990's; and

"Whereas, California's 48,500 small and mid-sized firms, comprising more than 13 percent of those in the United States, need to upgrade their manufacturing capabilities, implement quality control methods, and improve workforce training in order to maintain and enhance their performance as intermediate suppliers to larger firms and to continue to provide jobs; and

"Whereas, Today, there are more than 25 industrial extension programs in other states whose primary function is to help small and mid-sized businesses, particularly manufacturers, adopt new technologies; and

"Whereas, There is a critical need for California to develop initiatives and programs to advance its critical growth sectors in technology and to revitalize its basic manufacturing sectors, especially through assistance to small- and medium-sized companies; and

"Whereas, The Agricultural Experiment Station and Cooperative Extension Program administered by the University of California have long provided the link for individuals, families, and communities to benefit directly from university agricultural research in the application of new knowledge and research-based technologies to improve practice and productivity; and

"Whereas, The University of California has (1) unique resources in the fields of engineering, business, and management with programs and centers of expertise that aim to expand research frontiers and transfer technology to the private sector, (2) extension programs in business, engineering, and manufacturing, and (3) access to the advanced technologies and facilities of national laboratories; and

"Whereas, The California Community Colleges and the California State University campuses offer geographically accessible resources and opportunities for developing industrial engineering technology to the state's manufacturing community; and

"Whereas, A vehicle is needed to provide access by the manufacturing community to the expertise and resources of the University of California and other public institutions of higher education of the state in a uniform manner; and

"Whereas, Federal support for manufacturing and industrial expansion will increase as funds historically expended on defense programs are redirected to industrial development programs which will, in turn, lead to a national competition for state leveraged programs in manufacturing expansion; and

"Whereas, The University of California is proposing to establish a Manufacturing Extension Program by forming an active statewide network of outreach specialists to work closely with manufacturing firms to solve production problems, enhance quality and productivity, introduce new technology, and improve employee training; and

"Whereas, The University of California proposes to seek federal support for the Manufacturing Extension Program from funds reallocated from defense programs and other programs; Now, therefore, be it

*"Resolved by the Senate and Assembly of the State of California, jointly,* That, in order to restore and maintain California's economic progress, to maintain and enhance the quality, productivity, and competitiveness of California's small and mid-sized manufacturing companies, and to permit those companies to compete effectively for federal support, the Legislature of the State of Califor-

nia endorses efforts to establish the Manufacturing Extension Program of the University of California; and be it further

*"Resolved,* That the Legislature of the State of California respectfully requests the President and Congress of the United States to support the effort of the University of California to establish a manufacturing extension program for purposes of restoring and maintaining California's economic progress, maintaining and enhancing the quality, productivity, and competitiveness of small and mid-sized manufacturing companies, enabling the manufacturing extension program to compete effectively for federal support, and permitting those companies to benefit accordingly; and be it further

*"Resolved,* That the Secretary of the Senate transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives of the United States, and to each Senator and Representative from California in the Congress of the United States."

POM-511. Joint resolution adopted by the Legislature of the State of California; to the Committee on Labor and Human Resources:

"SENATE JOINT RESOLUTION No. 50

"Whereas, The preservation of human lives and the extinction of fires are two of the primary roles of the professional firefighter, and the ability to save human lives and fight fires has been made more difficult by the construction of highrise buildings which require firefighters to rely on fire service aerial devices to perform their jobs; and

"Whereas, The failure of fire service aerial devices used to fight fires has caused numerous fatalities and serious injuries to firefighters and the general public; and

"Whereas, Fire service aerial device failures are caused by poor engineering, manufacturing defects, loss of integrity because of use, poor maintenance, and operator error; and

"Whereas, The testing, inspection, and certification of all fire service aerial devices is urgently needed to protect the safety of firefighters and the general public from injuries and fatalities caused by the failure of fire service aerial devices; and

"Whereas, Federal occupational safety and health regulations governing safety factors for fire departments have not been significantly revised since 1980; now, therefore, be it

*"Resolved by the Senate and the Assembly of the State of California, jointly,* That the Legislature of the State of California respectfully memorializes the President and the Congress of the United States to enact legislation that would require the Department of Labor to promulgate occupational safety and health regulations requiring the testing, inspection, and certification of fire service aerial devices on an annual basis; and be it further

*"Resolved,* That the Secretary of the Senate transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the United States House of Representatives, to the Secretary of Labor, and to each Senator and Representative from California in the Congress of the United States."

POM-512. A joint resolution adopted by the Legislature of the State of California; to the Committee on Labor and Human Resources:

"SENATE JOINT RESOLUTION No. 46

"Whereas, After the longest peacetime economic expansion in the U.S. history, the United States has fallen on economic hard

times with the recession extending from months into years and Corporate America continuing to lay off thousands of workers; and

"Whereas, Defense spending soared in the 80's to record high levels; however, with the end of the Cold War, defense spending is now being reduced by billions in the 90's; and

"Whereas, The private sector cannot make a sufficient impact on unemployment because the demand for products and services is reduced during a recession; and

"Whereas, Congress authorized an Emergency Employment Act Program in 1971 that employed about 400,000 people until its termination in 1973; and

"Whereas, In 1977, Congress drastically expanded the existing modest Public Service Employment Program during a high unemployment period to fund 725,000 jobs and thousands of unemployed persons filled jobs that provided pay checks in an amount higher than their unemployment insurance benefit checks; and

"Whereas, In 1992 with persistently high unemployment, Congress could reinstate the Public Employment Program as authorized by the federal Emergency Employment Act of 1971 which could put thousands of people to work within a few weeks of its inception; and

"Whereas, Reinstatement of the jobs program could assist cities and counties, provide essential services by generating taxes, offsetting public assistance costs, and reducing the rapidly rising number of homeless people, and lend self-esteem and dignity to those jobless individuals; now, therefore, be it

*Resolved by the Senate and Assembly of the State of California, jointly, That the Legislature of the State of California petition the President and the Congress of the United States to reinstate the Public Employment Program, as authorized by the federal Emergency Employment Act of 1971; and be it further*

*Resolved, That the Secretary of the Senate transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."*

POM-513. A joint resolution adopted by the Legislature of the State of California; to the Committee on Labor and Human Resources:

"SENATE JOINT RESOLUTION No. 32

"Whereas, Every 12 minutes a woman dies of breast cancer in the United States; and

"Whereas, One in nine American women can expect to develop breast cancer in her lifetime, and it is estimated that breast cancer will take the lives of over 46,000 American women in 1992; and

"Whereas, In California, one in 10 women can expect to develop breast cancer in her lifetime, and it is estimated that breast cancer will take the lives of 4,695 women in California in 1992; and

"Whereas, The incidence rate in California is lower than the national average of 110 per 100,000, while, in some regions of this state, the incidence rate is as high as 124 per 100,000; and

"Whereas, Unless we take steps to reverse the trend, one in seven women could expect to develop breast cancer in her lifetime by the end of the decade; and

"Whereas, Despite advancements in detection and treatment methods, the incidence of breast cancer is on the rise; and

"Whereas, Breast cancer is increasingly being diagnosed among younger women for

whom mammography screening is not an effective diagnostic tool; and

"Whereas, Despite 20 years of research, experts still do not understand the cause of breast cancer, nor do they know how to prevent breast cancer; and

"Whereas, According to the National Cancer Institute, the United States lost ground during the 1980's in federal cancer research funding, experiencing an overall reduction of 6 percent in constant dollars, with cuts as high as 34 percent in some cancer research programs; and

"Whereas, Although the incidence rate of breast cancer is lower among African-American women as compared to Anglo-American women, the death rate among African-American women is higher; and

"Whereas, Latino, Asian, and Pacific Islander women face significant cultural barriers to adequate breast care and cancer prevention efforts; and

"Whereas, The survival rate in the first five years for women diagnosed in the earliest stages of breast cancer is over 90 percent, but, the rate of survival drops sharply every five years thereafter; and

"Whereas, Without adequate health care, the 2.7 million uninsured women in California face the harsh risk of discovering breast cancer only in the more advanced and deadly stages of development; and

"Whereas, While mammography screening plays a vital role in early diagnosis, it by no means displaces or in any way mitigates the vital need for research into the prevention and cure of breast cancer; and

"Whereas, In 1990, only 5 percent of all federal cancer research dollars were earmarked for breast cancer research; and

"Whereas, Increased federal and state commitments to breast cancer prevention and cure will, in the long run, not only save millions of women's lives but also reduce the economic costs associated with the disease; and

"Whereas, The recent tide of public activism focusing attention on breast cancer and the need to accelerate the investigation into the cause, cure, and prevention of disease must be matched by state and federal commitments to these ends; and

"Whereas, The Legislature of the State of California pledges to enact state legislation in response to this epidemic that will advance the cause of finding a cure and developing cost-effective prevention methods; and

"Whereas, The Legislature of the State of California urges the executive branch of the State of California to also recognize breast cancer as an epidemic and to take all appropriate steps and administrative actions to advance the causes of finding a cure and effective prevention measures; and

"Whereas, The Legislature of the State of California supports congressional intent that the initiatives undertaken in response to this national health emergency not replace current expenditures for breast cancer research activities; now, therefore, be it

*Resolved by the Senate and Assembly of the State of California, jointly, That the Legislature of the State of California, in order to give breast cancer prevention and cure the research priority they deserve, a priority that will save millions of lives and reduce health care costs, declares breast cancer a disease of epidemic proportions in both California and the United States and urges that state and federal governments recognize it as a public health emergency; and be it further*

*Resolved, That the Legislature of the State of California strongly urges the United States Congress to enact legislation rec-*

ommending that the Secretary of Health and Human Services declare breast cancer a public health emergency for the purpose of accelerating investigation into the cause, treatment, and prevention of the cause of the emergency, and urge the President of the United States to sign the legislation into law; and be it further

*Resolved, That the Secretary of the Senate transmit copies of this resolution to each Member of the California Senate and the California Assembly, to the Governor of the State of California, to the President and Vice President of the United States, to the Speaker of the House of Representatives, to the President pro Tempore of the United States Senate, to each Senator and Representative from California in the Congress of the United States, to the Chief Clerk of the United States House of Representatives, to the Secretary of the United States Senate, and to the presiding officer of each of the other states in the Union."*

POM-514. A joint resolution adopted by the Legislature of the State of California; to the Committee on Labor and Human Resources:

"ASSEMBLY JOINT RESOLUTION No. 43

"Whereas, Mergers, takeovers, and buyouts in the business community are current and ongoing; and

"Whereas, Those mergers, takeovers, and buyouts have created severe disturbances in the lives and welfare of those who receive retirement pensions and health benefits from the involved companies; and

"Whereas, The capture of pension fund assets, including health benefit funds, by those business entities has caused erosion of pension plan members' incomes and the diminution or outright loss of medical coverage; and

"Whereas, Both pensions and medical coverage have been honorably earned by years of loyal service; now, therefore, be it

*Resolved by the Assembly and Senate of the State of California, jointly, That the Legislature of the State of California hereby respectfully memorializes the President and the Congress of the United States to enact appropriate legislation to provide guidelines, rules, and restrictions to govern and protect pension fund assets, including health benefit funds, against inappropriate capture and use, other than for the benefit and well-being of beneficiaries and survivors, and to protect the pension plan incomes and medical coverage of retirees, beneficiaries, and survivors, which have been bargained for in good faith during working years, from erosion or abbreviation; and be it further*

*Resolved, That the Chief Clerk of the Assembly transmit copies of this measure to the President and Vice President of the United States, the Speaker of the House of Representatives, the Chairpersons of the House and Senate Committees on Aging, and to each Senator and Representative from California in the Congress of the United States."*

POM-515. A joint resolution adopted by the Legislature of the State of California; to the Committee on Veterans' Affairs:

"SENATE JOINT RESOLUTION No. 31

"Whereas, California is home to over 2.8 million men and women who unselfishly served in the American Armed Services during times of conflict and war; and

"Whereas, Over 400,000 California veterans depend on the Martinez Veterans' Hospital for their general medical services, surgical, psychiatric, and ambulatory care; and

"Whereas, The Martinez Veterans' Hospital serves California veterans from as far

north as the Oregon border, and as far east as the Nevada state line; and

"Whereas, The current travel time for veterans living in the far northern Sacramento Valley is over three hours to the Martinez Veterans' Hospital; and

"Whereas, On August 9, 1991, the federal Department of Veterans Affairs announced plans to close the Martinez Veterans' Hospital within 180 days; and

"Whereas, Following the hospital's closure, the nearest facility available to northern California veterans will be located in the City of Palo Alto, well over four hours from the far reaching portions of the Sacramento Valley; now, therefore, be it

*Resolved by the Senate and Assembly of the State of California, jointly,* That the Legislature of the State of California proclaims that closure of the Martinez Veterans' Hospital seriously threatens the delivery of needed health care services to thousands of California veterans; and be it further

*Resolved,* That the Legislature of the State of California respectively memorializes the President and the Congress of the United States of America to take emergency action to secure adequate funding to ensure that California veterans will not suffer a loss in quantitative or qualitative medical care as a result of the Martinez closure; and be it further

*Resolved,* That the Legislature of the State of California respectively memorializes the President of the United States of America to implement procedures through the federal Department of Veterans Affairs to permit veterans currently receiving medical care at the Martinez facility to receive the needed medical care at local health facilities within their own communities, until a time in which a replacement facility is completed; and be it further

*Resolved,* That the Legislature of the State of California respectively memorializes the President and the Congress of the United States of America to enact and execute a development schedule for the construction and completion of a replacement facility of sufficient size and capability to provide the highest quality medical care for the increasing population of northern California veterans in need of such care; and be it further

*Resolved,* That the Secretary of the Senate transmit copies of this resolution to the President and Vice President of the United States, and each Senator and Representative from California in the Congress of the United States."

POM-516. A resolution adopted by the City Council of the City of Seattle expressing the city's deep concern about the need for a national policy of preserving ancient forests in the Pacific Northwest, including the forests of eastern and western Washington and Oregon, northwestern California, and the Sierra Nevada of California; to the Committee on Energy and Natural Resources.

#### ADDITIONAL STATEMENTS

##### MORTON HALPERIN—ABLE DEFENDER OF THE CONSTITUTION

• Mr. KENNEDY. Mr. President, earlier this year, Dr. Morton K. Halperin announced that he was stepping down as director of the Washington office of the American Civil Liberties Union to accept an appointment as a senior as-

sociate at the Carnegie Endowment for International Peace. On September 30, Senators and Representatives joined many of his friends at a reception to pay tribute to his outstanding work for more than a decade in preserving and protecting the Constitution and the rights and liberties of the American people.

Mort Halperin's wise counsel has been enormously helpful on a broad variety of legislative initiatives to make America a land of justice for all. He played an indispensable role in the enactment of the Grove City College Act in 1988 and the Civil Rights Act of 1991. On every civil liberties issue in the past decade, Mort has been there. Millions of Americans are better off today because of his work at the ACLU.

Mort knows how to write good laws—and how to stop bad laws. Some of his most impressive contributions have come in making a strong case against unwise and unfair proposals, and persuading Congress to reject them. In so many ways, he has been the 101st Senator on civil liberties.

When the Supreme Court first struck down the Texas flagburning law, only a handful of elected officials defended the Court's action at first. But through Mort's tireless work and the outstanding effort of the ACLU, the misguided attempt to amend the first amendment was defeated.

Under the guise of fighting crime, the Reagan and Bush administrations have waged a 12-year battle to subvert civil liberties, repeal the exclusionary rule, and deny habeas corpus. But Congress has held those efforts at bay, and the leadership of Mort Halperin and the ACLU was a significant factor in that result.

Prior to his appointment at the ACLU, Mort had a distinguished career in national security. After receiving his doctorate from Yale at the age of 23, he taught at Harvard, before serving in the Defense Department and on the National Security Council from 1966 through 1969. He is the author of more than a dozen books.

Now, as Mort moves from the ACLU to the Carnegie Endowment, I expect that we will be seeing a little less of him at the Senate Judiciary Committee, but a lot more of him at the Senate Foreign Relations Committee. I wish him every success, and I am proud to take this opportunity to commend him for all he has done to make America a better and fairer land.●

##### RURAL HEALTH CARE CONCERNS

• Mr. GORTON. Mr. President, as we face the health care crisis in America, it is essential that we include the medical and health care concerns of our rural areas. In Washington State alone, over 33 percent of the population resides in rural areas. These people deserve access to the best possible health

care. One step I have taken to address this need is to cosponsor S. 1125, the Rural Primary Care Act, a bill that provides incentives to attract more health care professionals to rural America.

Recently, I contacted people in Washington's rural communities to ask for their opinion on S. 1125 and to solicit their advice on different ways to attract and encourage health care professionals to practice in their areas. Most respondents supported the efforts and incentives offered by S. 1125. However, they voiced their concern that health care professionals, in spite of the incentives, may choose to practice in urban areas where they would be virtually assured that their practice will thrive.

I have listened to these concerns and recognize that while S. 1125 is a positive step in the right direction, it is only one of many that need to be taken in order to assure the best possible health care at reasonable prices to everyone in America, including rural areas. In the upcoming session I will work diligently to address the health care crisis in America. I am committed to building on the strong points of existing plans, such as S. 1125, and to introducing or supporting legislation that creates a comprehensive health care package for the American people.

To achieve real solutions we must work together. And, with the help of constituent input, I look forward to representing Washington State's particular needs as we address this issue.●

##### THE YEAR OF THE WOMAN

• Mr. SARBANES. Mr. President, it is indeed fitting that 1992 has been called the Year of the Woman. Women now constitute 52 percent, or a clear majority, of our Nation's citizens who are eligible to vote. While, regrettably, voter turnout rates have declined for both women and men since the 1960's, since 1980, women have voted at a higher rate than men, reversing a pattern which had existed for much of the time since women were extended the vote in 1920.

I am very pleased to note that this year a record number of women are running for congressional seats, with 11 women candidates for the U.S. Senate and 106 women candidates for the House of Representatives. As you know, only 3 percent of current Senate seats are held by women and only 7 percent of House seats. This is in stark contrast to not only many of the industrial countries of the West, but also to nations of the Third World. For example, the percentage of women in the national parliament of Norway is 34.4 percent, in Sweden 38.1 percent, Finland 31.5 percent, Italy 12.9 percent, The Netherlands 20 percent, Tanzania 10.7 percent, and Mexico 14.7 percent. Nations as diverse as India, Pakistan, Ice-

land, England, the Philippines, Sri Lanka, and Norway have had women as heads of state. The increased political activity of women in our country is long overdue and is a reflection of the transformation of women in the electorate. My own State of Maryland serves as a good example of this transformation, and we take great pride in having Senator BARBARA MIKULSKI as one of only three women currently serving in the U.S. Senate.

Mr. President, the need for more women in elected office at all levels is especially apparent when you consider the enormous obstacles encountered by those of us who have attempted during the 102d Congress to enact legislation of vital importance to women. Recently, I joined with a number of my colleagues in efforts to increase funding for breast cancer research during Senate floor consideration of the fiscal year 1993 appropriations bill for the Department of Labor, Health and Human Services, and Education. The breast cancer rate in this country has increased dramatically, with 1 in 9 women today expected to develop breast cancer in her lifetime, as opposed to 1 in 20 in 1961. Despite this, we were unable to pass several measures which would have increased funding for breast cancer research. I am, however, pleased that related legislation that I joined in sponsoring, the Mammography Quality Standards Act, passed the Senate on October 9, 1992.

I am deeply concerned that several other measures of vital importance to women have been prevented from moving forward in the 102d Congress because of opposition from the White House and its allies in the Congress. These measures include the Violence Against Women Act, which I joined in cosponsoring, and the reauthorization of the National Institutes of Health—legislation to reauthorize and strengthen research programs on breast cancer, cancers of the reproductive system, osteoporosis, and other diseases. This measure also includes provisions to ensure that women and minorities are included in appropriate clinical research conducted by NIH.

It is especially disappointing that President Bush chose once again to veto the Family and Medical Leave Act. This legislation, which would provide for 12 weeks of unpaid leave for employees to care for a seriously ill child, spouse, or parent, or in the event of the birth or adoption of a child, is long overdue—our Nation is the only industrialized country without a national family leave policy. In fact, almost every country in the world has a national parental leave requirement, including our most successful economic competitors in Western Europe and Asia, and these nations typically have requirements which go beyond those of the legislation we have considered this Congress with respect to

leave duration and income replacement. For example, in Europe, 5 to 6 months of paid leave is the norm for new mothers, and even Japan, which is often behind European nations in terms of labor standards, provides 12 to 14 weeks of partially paid leave with full job guarantees. I strongly supported the Senate's successful effort to override the veto of the Family and Medical Leave Act and deeply regret that the House of Representatives subsequently failed to override the veto on September 30, 1992.

The Congress has been blocked repeatedly from moving forward on legislation to ensure women of their reproductive rights. I joined with many of my colleagues in efforts to overturn regulations issued in 1988 by the Department of Health and Human Services which prohibit workers at family planning clinics from counseling women facing unintended pregnancies, on abortion. The legislation I joined in introducing would require family planning grantees to provide pregnant women, on request, information and counseling on all legal and medical options. Exemptions from these provisions are included for providers who object to providing such information on the grounds of religious beliefs or moral convictions and family planning clinics are required to comply with applicable parental notification laws within the State in which the clinic is located. Nevertheless, the administration opposed this legislation and it was subsequently vetoed by President Bush. While the Senate voted, 73-26, to override this veto on September 25, 1992, the House later failed on October 2 in its attempt to override. Opposition from the White House also blocked both the House and the Senate from moving forward on the Freedom of Choice Act, which I have cosponsored, and in the end, prevented either body of Congress from even bringing this legislation to the floor for consideration.

Finally, I note that legislation to establish the equal rights amendment has once again languished in the Congress. As a longtime supporter of the ERA, I was privileged to serve during the 92d Congress on the subcommittee of the House Committee on the Judiciary which set the equal rights amendment on the path toward congressional approval and near-adoption nearly 21 years ago. Again, my own State of Maryland was at the forefront of these efforts, and was one of the first to ratify the ERA following its approval by Congress in 1972, and 1 of only 16 States to have included an equal rights provision in its own constitution.

Mr. President, women of today are becoming more fully engaged in the political process in an effort to overcome inadequacies in our society that have denied them fair and equal opportunities in all aspects of their lives. Not

surprisingly, the evolution of legislation affecting the rights and interests of women has tended to parallel the advancement in the status of women. While we have been unable in the 102d Congress to enact several very important initiatives which would further the status of women in our society, I am committed to a continuing effort to promote legislation to remedy inequities in public policy, eliminate economic disparities that handicap women, and update existing programs to reflect the changes in women's lifestyles and needs. As we look toward the 103d Congress, I urge all of my colleagues to join me in this very important task. ●

NOTICE OF DETERMINATION BY THE SELECT COMMITTEE ON ETHICS UNDER RULE 35, PARAGRAPH 4, PERMITTING ACCEPTANCE OF A GIFT OF EDUCATIONAL TRAVEL FROM A FOREIGN ORGANIZATION

● Mr. SANFORD. Mr. President, it is required by paragraph 4 of rule 35 that I place in the CONGRESSIONAL RECORD notices of Senate employees who participate in programs, the principal objective of which is educational, sponsored by a foreign government or a foreign educational or charitable organization involving travel to a foreign country paid for by that foreign government or organization.

The select committee received a request for a determination under rule 35 for Faye Drummond, a member of the staff of Senator MOYNIHAN, to participate in a program in Czechoslovakia, sponsored by the University of Bratislava, from October 16 to 18, 1992.

The committee has determined that participation by Ms. Drummond in this program, at the expense of the University of Bratislava, is in the interest of the Senate and the United States.

The select committee received a request for a determination under rule 35 for T. Scott Bunton, a member of the staff of Senator KERRY, to participate in a program in Japan, sponsored by the Japan Center for International Exchange [JCIE], from December 6 to 12, 1992.

The committee has determined that participation by Mr. Bunton in this program, at the expense of the JCIE, is in the interest of the Senate and the United States.

The select committee received a request for a determination under rule 35 for Anthony H. Cordesman, a member of the staff of Senator MCCAIN, to participate in a program in China, sponsored by the Chinese People's Institute of Foreign Affairs, from November 28 to December 12, 1992.

The committee has determined that participation by Mr. Cordesman in this program, at the expense of the Chinese People's Institute of Foreign Affairs, is

in the interest of the Senate and the United States.

The select committee received a request for a determination under rule 35 for Lisa Stocklan, a member of the staff of Senator SMITH, to participate in a program in Taiwan, sponsored by the Chung Yuan Christian University, from October 12 to 18, 1992.

The committee determined that participation by Ms. Stocklan in this program, at the expense of Chung Yuan Christian University, was in the interest of the Senate and the United States.

The select committee received a request for a determination under rule 35 for Drew Bolin, a member of the staff of Senator BROWN, to participate in a program in Taiwan, sponsored by the Chung Yuan Christian University, from October 11 to 18, 1992.

The committee determined that participation by Mr. Bolin in this program, at the expense of the Chung Yuan Christian University, was in the interest of the Senate and the United States.

The select committee received a request for a determination under rule 35 for Katherine Brunett, a member of the staff of Senator SIMPSON, to participate in a program in Taiwan, sponsored by the Chung Yuan Christian University, from October 12 to 18, 1992.

The committee determined that participation by Ms. Brunett in this program, at the expense of the Chung Yuan Christian University, was in the interest of the Senate and the United States.

The select committee received a request for a determination under rule 35 for Sam Spina, a member of the staff of Senator GORTON, to participate in a program in Taiwan, sponsored by the Chung Yuan Christian University, from October 13 to 18, 1992.

The committee has determined that participation by Mr. Spina in this program, at the expense of the Chung Yuan Christian University, is in the interest of the Senate and the United States.●

#### THE HOLE IN THE WALL GANG CAMP

● Mr. KENNEDY. Mr. President, I want to take this opportunity to praise a unique and inspiring camp for young people with cancer, leukemia, and other serious diseases.

The camp, called the Hole in the Wall Gang Camp, was founded by Paul Newman in 1988 and is located in Ashford, CT. It is designed as a wild West hideout, and is named for the legendary hideout in Mr. Newman's famous movie, "Butch Cassidy and the Sundance Kid."

The camp is designed to meet the medical, physical, and emotional needs of these young victims of serious diseases. In keeping with the generous vi-

sion that conceived the camp, there is no cost to the campers.

The camp is fully equipped with state-of-the-art medical facilities. In many cases, it is the only opportunity for these youngsters to be away from their hospitals. In creating the camp, Mr. Newman recognized that the intensive continuing medical care that the patients need is depriving them of their childhood. The Hole in the Wall Gang Camp is an impressive means to fill that gap.

I commend Mr. Newman for his innovative leadership and for the extraordinary difference that the Hole in the Wall Gang Camp is making in the lives of these deserving children and their families. I ask unanimous consent that articles from the New York Times magazine and the Reader's Digest on the camp may be printed in the RECORD.

[From the New York Times Magazine, Sept. 6, 1992]

#### HUGGING LIFE

(By Calvin Trillin, staff writer for The New Yorker)

On my first morning at the Hole in the Wall Gang Camp, Joe Frustaci, the wood-working director, stepped up to the dining-hall microphone after breakfast to read a poem that had been written on the back of a wooden heart by Shawn Valdez, a 9-year-old camper who has spent about half his life under treatment for leukemia. The poem was for a counselor named Wendy Whitehill—Shawn's favorite person at the camp, unless you count Tadger, who lives in the woods rather than in the camp itself and may well be a bear.

Shawn—a dark, frail-looking little boy with large brown eyes—wasn't facing the microphone. He was sitting on Wendy's lap, with his arms around her neck. What Shawn had written on the heart was:

Wendy  
I love your golden hair  
Gold as a sunrise  
I love the way your blood  
warms me up like two eskimoes  
snuggling.  
I love your smile from  
ear to ear  
I love every  
thing about you.

SHAWN.

I met Wendy a few minutes later. Actually, her hair didn't look quite as gold as a sunrise to me, but that may have been because of the light we were in. I said, "Shawn seems to find you an acceptable person."

She smiled and nodded. One of the things that had most struck her about the camp, she said, was the widespread presence of "unconditional love." Partly because all of the campers have been treated for diseases frightening enough to make schoolmates hesitant or even hostile, unconditional love is more or less camp policy. Children hug counselors. Counselors hug children. When Huggy Bear—a bear suit inhabited by an adult, often Robert (Woody) Wilkins, the camp director—delivers the mail from Tadger every morning at breakfast, he hugs everybody in sight. When a counselor is sitting down he is likely to have a camper in his lap.

The Hole in the Wall Gang Camp, which was founded and continues to be energized by

the actor Paul Newman, is an unconditional sort of place. It looks like the camp that summer-camp kids have always dreamed of when they were not dreaming of being back home in their own beds, just down the hall from their parents—a shrewdly designed, dazzlingly equipped Wild West hideout in eastern Connecticut. The theater resembles the sort of place where dancing girls are about to appear on the stage to be hooted at by rowdies who have just come off a cattle drive. The lake is so well stocked that fish that really want to get caught may have to take a number.

Visitors nearly always remark that the children enjoying these facilities—who range in age from 7 to 15—look sort of, well, normal. The camp is specifically for children with cancer or serious blood disorders; what's wrong with them is on the inside. You might notice a child who is temporarily bald from the effects of chemotherapy or one whose growth has been stunted by the side effects of radiation or one who looks particularly thin; there might be a hemophilic boy (virtually all hemophiliacs are boys) who is in a wheelchair because he had a bleed into his spinal cord that couldn't be stopped. Some of the campers tire easily and some were in the hospital when other children their age were developing the hand-eye coordination it takes to look good on the tennis court.

But a dance I went to at the camp seemed at first glance to vary from a dance at an ordinary camp mainly in that campers and counselors and staff members were dancing without regard to age or size or gender, the way people sometimes do in the later stages of a particularly joyous wedding reception—including a boy in a wheelchair whose derring-do must by now have inspired some medical center to post a sign saying "No Wheelie-Popping in Blood Lab Area." After the dance, a swarm of children, still excited, burst into the infirmary to take care of whatever medical procedure—an infusion of clotting factor a fistful of pills, a battery-driven pump designed to rid the body of excess iron—it takes to get them through the night.

By necessity, the Hole in the Wall Gang Camp is run largely through the infirmary. The closest thing to an admissions director is Sue Johnson, the head nurse, whose pool of applicants is gathered mainly through tertiary-care medical centers. She figures out, for instance, how many hemophiliacs can come to camp in any one session, since the constant need for factor makes them labor-intensive campers. (The diseases themselves impose a certain amount of racial and ethnic balance. Sickie-cell anemia afflicts mainly black people, and sicklers, as they're often called, tend to make up about a tenth of the children at the camp. One of the blood diseases, thalassemia, is so strongly associated with families of Italian and Greek origin that it is sometimes called Mediterranean anemia.) But the infirmary, a rough-wood building in the Western style, is not labeled "The Infirmary"; a sign outside says "The O.K. Corral." Nobody working there wears a white coat. At the camp, medical treatment is supposed to be the engine that doesn't call attention to itself—like the legendary assembly of pipes and cables and computers under Disney World.

Paul Newman thought of the camp as a place where children would be able to escape doctors and hospitals for a while and just be campers. It savors the sort of traditions found in conventional camps. If someone is caught leaving the dining hall through the

In door rather than the Out door, for instance, he has to stand in the middle of the dining hall and pantomime the words to the bushy-tail song. When Newman visits the camp—he has built a cabin across the lake, and he's normally around for at least a day or two each 10-day session—he always seems to stroll out through the In door, and he is caught by a pack of alert campers every time. Then he has to stand in the middle of the room, doing the appropriate motions, while everyone sings:

Paul, Paul.  
Shake your bushy tail  
Shake your bushy tail  
Wrinkle up your little nose.  
Stick your head between your toes  
Shake your bushy tail.

As far as I could tell, the only reminder of medicine in the regular camp program is a form of action painting that children in arts and craft like to do with syringes. Dahlia Lithwick, one of two former counselors who have put together a book of writings by Shawn Valdez and other campers called "I Will Sing Life: Voices From the Hole in the Wall Gang Camp," told me that the older girls in her cabin always spent the conventional amount of time discussing who might be going to the dance with whom. On the other hand, she thinks that campers tend to see their counselors as grown-ups who, unlike parents, don't have to be protected—campers are likely to have spent a lot of time seeing parents with what Shawn's mother calls in the book "tear eyes"—so the question asked a counselor after the dance could be, "I don't want to freak you out, but why do you think God picked me to die?"

The counselor asked such a question will more than likely be freaked out. Although a few of the counselors have had childhood cancer themselves, the camp, which had its first summer in 1988, hasn't been in operation long enough to produce a supply of counselors from former campers. Most of the counselors are college students who have led relatively protected lives, and most of them arrive, in the words of a letter quoted in Newman's introduction for "I Will Sing Life," with "a natural terror of disease, and a couple of books about coping with grief bought in a panic the previous week."

For them, the experience of being at the camp tends to be intense, partly because of the constant juxtaposition of the constant juxtaposition life-threatening illness and problems like who is going to the dance with whom. When Huggy Bear comes through the dining hall, the counselors who jump up to get hugged are partly just joining in, the way they join in the bushy-tail song and the dancing, but some of them may well feel the need of some hugging.

The Hole in the Wall Gang Camp is not, in fact, a camp for dying children. The overwhelming majority of campers, Sue Johnson says, "have a lot to put up with, but they're not terminal." According to Carroll W. Brewster, a former college president who is the executive director of the Hole in the Wall Gang Fund, "the theory is that every child here is going to be an adult and needs a good childhood to become one"—meaning that the camp sees its business as returning to the campers some of the childhood they've lost to illness and treatment.

On the theory that the proper work of childhood is learning and having fun, the camp concentrates on the equivalent of putting the children back to work—teaching horseback riding even if the hemophiliacs have to be given a shot of factor before getting on the horse, for instance, or letting ev-

eryone go swimming even if the tendency of sicklers to be thrown into a pain crisis by a chill means that the pool has to be particularly warm and a gazebo next to it is outfitted with heat lamps in the ceiling.

The heated gazebo is known locally as the Pearson French-Fryer Warmer, after Howard A. Pearson, the Yale pediatrician who molded Newman's vision into what became the Hole in the Wall Game Camp. When Newman was casting around for advice on how to establish a camp in Connecticut for children with cancer, Pearson was the chairman of pediatrics at Yale Medical School and the Yale-New Haven Hospital. His advice seemed to extend naturally into participation. Pearson has been the medical director at the camp from the beginning. He also served for a couple of years as executive director of the Hole in the Wall Gang Fund, which annually raises the \$2 million it takes to run a camp that has dazzling equipment but not fees. He's a low-key, grandfatherly man—not the sort of person who finds being a camp doctor beneath the station of an eminent professor who this year is also the president-elect of the American Academy of Pediatrics.

It was Pearson who recommended that children with blood disorders as well as children with cancer be part of the camp mix. Partly because so much of childhood cancer is leukemia, there has always been a strong overlap in pediatrics between oncology and hematology. Pearson's own research interest is genetic blood disorders. Although the camp now has a couple of special sessions for campers with a single ailment—one for sickle-cell, one for immunological, disorders, including HIV infection—Pearson says that a mix is salutary for the general sessions, partly because there is something about any serious disease or its treatment that can make someone with another serious disease count his blessings.

In fact, the camp is one place where a child who has had cancer may have reason to feel in an enviable position, although I suspect that would be a hard proposition to sell to a 10-year-old who's in the middle of an intense course of chemotherapy. The campers who have had a diagnosis of cancer—normally about two-thirds of the 120 children in a regular session—have almost all been through chemotherapy, and some of them have also had surgery and radiation. But the ones who have completed their treatment are likely to lead lives that are not dominated or shortened by disease: the cure rate for the most common type of childhood leukemia is now approaching 80 percent.

That's not true of the sicklers, who are never through with the pain crises and whose bodies tend to give out in their 40's or 50's. Because of considerable progress in recent years in the treatment of hemophilia—mainly the invention of a process to manufacture clotting factor, making constant blood transfusions unnecessary—it appeared for a while that many hemophiliacs would have to face futures of only inconvenience and enormous expense rather than inevitable crippling and early death. But until 1985, the factor supply was not screened for HIV, so about half of the hemophiliacs at the Hole in the Wall Gang Camp are HIV positive.

Although Tadger has never been seen—he is said to be extremely shy—he can be counted on to answer a letter overnight. The campers rarely trouble Tadger with mentions of disease or doctors or hospitals. They tend to tell him that he shouldn't be so shy, or reassure him that they love him, or thank him for the little gifts he sometimes sends. During my stay at the camp, one boy wrote,

"I have to tell you that your friend the white bear went out the wrong door, and he had to shake his bushy tail." Hole in the Wall Gang campers aren't embarrassed about mentioning their illness, given the company. "All the kids there have learned to live through things," one of the authors of "I Will Sing Life" wrote about the camp. "We know we're normal people." Apparently, though, the younger children tend not to dwell on the subject—not even in what's called Cabin Chat, a quiet time before bed, when the counselors and the campers talk by the light of a single candle.

I sat in on Cabin Chat one night in a cabin of older boys. Everyone was asked to write down on a piece of paper something, important or trivial, that he would have changed if he'd had the power to change it—the loaded assignment was from a robust-looking counselor who had himself had childhood cancer—and then to toss the paper into a hat. The one piece of paper pulled out said, "Cancer was both the best thing and the worst thing that ever happened to me."

Everyone seemed to agree that the worst thing about having cancer was a drug called prednisone, a steroid that makes some people terribly angry and some people depressed and everybody enormously hungry. A lot of the campers found something good to say about having had cancer, although a certain amount of that had the sound of bravura or rationalization. There was talk about the interesting people they met; a couple of boys mentioned that cancer enabled them to come to the Hole in the Wall Gang Camp.

A boy who was still undergoing treatment seemed less certain about the good things, but finally he said, "I believe I'm tougher than any other kid in my school, at least mentally."

That led to a discussion about who could make it through cancer treatment and who couldn't. There was considerable feeling that the school bullies, who thought they were so tough, could never make it through.

"No, they'd make it," the toughest boy in his school said. "What choice would they have? Die? We didn't have any choice."

[From the New York Times Magazine, Oct. 4, 1992]

#### LETTER TO THE EDITOR

(By Joan Kasper, New York, NY)

#### HUGGING LIFE

I read with a very personal interest Calvin Trillin's article "Hugging Life" (Sept. 6).

My niece, Anique, contracted AIDS through a contaminated blood transfusion she received two days after her birth, in 1980. Naturally, her life centered around doctors, drugs, treatment, etc. It wasn't until her first stay at the Hole in the Wall Gang Camp, in the summer of 1990, that she found a window of escape, albeit temporary, from her illness.

I took Anique to camp last year, and from the moment we drove into the grounds I was caught up in the atmosphere of laughter and gaiety. And yes, there are unlimited amounts of unconditional love. Paul Newman has created an extraordinary environment for these children.

My niece attended the camp for the past three summers. We were told last February that she had only weeks to live, yet the prospect of going this year loomed ahead. The session began on June 20, and even though she had to travel three days cross-country by motor home and was in a wheelchair, Anique was there. Her week at the camp was her last one, though, and she died on her way home,

just one day after leaving camp. Our family is somewhat consoled and will forever be grateful that her last days were spent as she wanted them to be—with the Hole in the Wall Gang.

[From Reader's Digest, March 1990]

THE HOLE IN THE WALL GANG SUMMER CAMP  
(By Per Ola and Emily d'Aulaire)

Soon after Matthew Calone complained of intense groin pain in February 1988, physicians determined that the eight-year-old's abdominal cavity was riddled with fast-growing lymphoma tumors. Chemotherapy and surgery eliminated the growths, but Matt came down with a critical infection and spent three months in the hospital.

By the time Matt returned to school, chemotherapy had left him pale and bald. He gamely tried to explain to the other kids what had happened. But when Matt came down with hepatitis, a severe inflammation of the liver, it seemed that the spirit had been kicked out of him.

Then in June 1989, Matt had the opportunity to spend almost two weeks at a very special summer camp in the Connecticut woods. Just like a lot of sick kids who have been protected and coddled by worried parents, Matt was physically cautious at first. Carefully his counselors pushed him to be more adventurous. Soon he was camping overnight in a tent by a roaring river, even wading in the chilly water. He and his tent mates dried off around a campfire, roasted marshmallows and sang songs. Back at camp, Matt played baseball and basketball, and went horseback riding and fishing.

Today Matt's old self-confidence is back. "You wouldn't know he was once so sick," says his father. "The camp helped him get back on his feet, square off and face the world."

What is this magic place? It's the Hole in the Wall Gang Camp located on the border of Ashford and Eastford, Conn., where youngsters with life-threatening illnesses don't have to sit on the sidelines. Here, children with hemophilia and sickle-cell anemia romp with those suffering from leukemia, lymphoma and bone cancer. Some have had legs and arms amputated. Others are bound to wheelchairs and intravenous feeding pumps. But at Hole in the Wall, there's no need for a kid to explain why a tube is sticking out of his chest, why his limb is missing or his head is bald. No apologies are required if a child has to stop for a quick nap. And if it's necessary to swallow six different pills with dinner each day, no big deal. Half the other kids do it too.

INSPIRED VISION

There are many cancer camps for children, but most "borrow" existing facilities for a few weeks during or after the regular camp sessions. Hole in the Wall is the only one built expressly for these kids and their special needs.

Oddly, the saga of the camp began with salad dressing. In 1982, Paul Newman and a friend, author A. E. Hotchner, established Newman's Own Foods to market the actor's personal recipe, the profits to be earmarked for charity. The salad dressing was such a hit that the company branched into spaghetti sauce, popcorn and lemonade. Soon the profits to be given away reached millions.

Newman's Own received scores of letters asking for help from parents of kids with cancer, but tax rules prohibit the firm from making donations to individuals. Newman began pondering other ways to help these children. Then, in 1986, he had an inspira-

tion: why not build a place for kids too sick to go to ordinary camps? He'd name it for the ragtag bandits known as the Hole in the Wall Gang from his film "Butch Cassidy and the Sundance Kid."

With characteristic verve, Newman kicked the plan into action. Dr. Howard Pearson, professor of pediatrics at Yale University's School of Medicine and an authority on children's cancer and blood diseases, agreed to act as medical adviser. The Newman group purchased a 300-acre farm, complete with 47-acre pond, in the northeastern corner of the state. Thomas Beeby, dean of Yale's School of Architecture, designed the camp.

Paul Newman gave over \$8 million of the \$17 million the camp cost to build and fund. The balance came from private contributors, large and small. Barbers staged benefit "cut-a-thons." School children held car washes. Developer Simon Konover, donating the construction-management services, put up the buildings. A consortium of swimming-pool contractors installed, for free, a \$250,000 heated Olympic-sized pool. Thirty-five volunteer Seabees from the U.S. Naval Submarine Base in Groton built a footbridge, a floating dock and trails.

When the first children arrived in June 1988, they found a camp that looked like a frontier town straight out of the Old West. They hardly noticed that the walkways ended in access ramps, that forest trails were smooth enough for wheelchairs and motorized golf carts, that washrooms contained emergency buttons that could summon instant aid.

Fifteen log cabins, each designed to house eight campers and three counselors, circled a wide field where a helicopter could land in an emergency. The infirmary, in a row of false-front wooden buildings, looked more like a rural post office than a sophisticated medical facility.

THE OTHER SIDE

Some campers were timid when they arrived, more accustomed to doctors' offices than the woods. But they soon got over it.

One young girl, on crutches and wearing a baseball hat, clung to her father as he started to leave on opening day last summer. "You'll make friends here," he assured her. "These kids know what you're going through." Aquatics director Joanne Prague asked if she'd like to swim. The girl looked to her father for approval. He nodded and gave her a farewell kiss. At the pool, the girl took off the cap—to reveal a bald head—and with Prague's help was soon floating in the water. "The good thing about not having any hair," she told another swimmer as they chatted later, "is that your head dries very quickly."

Last summer 456 children, ages seven to 17, came to Hole in the Wall. This summer the hope is to handle almost 600 campers. The camp is free. Parents are only expected to pay for transportation.

Although those with active cancer or blood disease get preference, there are also campers who have been in remission long enough to be considered cured. Explains Pearson, who lives at the camp in the summer: "It's encouraging to the others to be with campers who have been through it and come out on the other side."

Some of the campers have afflictions so unusual that doctors generally encounter them only in medical textbooks—like the nine-year-old girl with a genetic blood disease who will never grow bigger than a three-year-old. Though she had to report to the infirmary for a weekly dose of intravenous gamma globulin, she was very much

a part of camp, joining in raucous song in the mess hall, being zipped around in a golf cart or riding happily on a counselor's shoulders.

"These kids never complain," marvels a camp worker. "They're always smiling. They really live when they're here. It's magic and you feel it."

STUDIES IN COURAGE

The 60 staff members at Hole in the Wall are a unique breed too. Many are medical students; some are teachers on summer break. All develop close bonds with these remarkable kids.

In 1988 after Hertz Nazaire, who had sickle-cell anemia, returned home from camp, he lost his mother in an automobile accident. Hospitalized for depression, he did not respond to treatment—until counselor Shellye Jones visited him.

"I sang camp songs," says Jones. "Pretty soon he was smiling. The doctor said it was the first time since he'd been admitted." In 1989 the boy was back at camp, cheerful and full of energy.

Wherever possible, independence is encouraged, and campers often try things at Hole in the Wall that they wouldn't at home. Billy Disney, 13, from Trumbull, Conn., has thalassemia, a severe anemia, and needs medications infused all night through a needle and a battery-driven pump. At camp he learned how to insert the needle himself, an accomplishment that gave him new freedom. "I can stay overnight at friends' houses now," he says.

"They push themselves harder here," explains Pearson. "As a result, they may respond better to treatment. I have a gut feeling that camping does more for these kids than simply let them have a wonderful time."

Eric Druten, from Prairie Village, Kan., had suffered a malignant brain tumor and was not expected to live. Surgery and radiation saved his life but left him depressed and withdrawn. Then the teenager attended Hole in the Wall. "This is a place where you forget to feel sorry for yourself," he says. "You see others in worse condition than you are. I suddenly realized just how lucky I was."

When Eric returned to Kansas City, his parents held a fund-raiser that brought in enough to fly eight kids, including Eric, from the Kansas City area to camp last summer. Eric's father, an executive, was so grateful for his son's turnaround that he spent a week at the camp as a volunteer, mowing lawns and doing odd jobs.

Stephanie Bloom is one of eight counselors who are ex-cancer patients. Now a nursing-school student, Bloom has been in remission for four years and looks the picture of health. Campers are surprised to discover that she once battled the deadly disease. One camper told her, "You don't know how I feel." Bloom shot back, "Oh, yes I do. When I had chemo—" "You had chemo?" Immediately the youngster opened up and began chattering about her experiences.

The children also support each other. One camper with a brain tumor had tremendous difficulty speaking, taking minutes to utter the simplest sentence. At mealtime, when campers stood up to make announcements, a hundred other kids sat absolutely still as they waited for him to have his say. "The special fraternity these kids develop moves me," says Pearson. "These are studies in courage."

Inevitably, there are times when disease is stronger than attitude or technology. Philip Gildersleeve, 14, had neuroblastoma, a cancer

of the adrenal gland. An outgoing boy, he played the piano, was expert at cribbage; he even conned Shellye Jones into teaching him to drive the golf carts. The last night of camp, Philip talked to counselor Beth Ryan about how rare it was to find friends like those he had made at Hole in the Wall. He then drew her a picture of a sailboat setting out to sea.

"It was as if he knew he wasn't going to make it," says Bloom. Three weeks later Philip died.

#### GREAT HUGS

Newman continues to support Hole in the Wall, but the program depends heavily on contributors and volunteers. Meanwhile, the staff is gearing up to use the facility year-round. More sessions are planned, for children with other severe diseases, and for brothers and sisters of campers.

Yet summer camp will continue to be what Pearson calls "the jewel in the crown." And what a jewel it is, providing memories that will sustain these children for a lifetime, however brief that lifetime.

These memories culminate in the award ceremony on the final night of each camp session. There campers receive prizes for such accomplishments as the most fish caught in a single day, top attendance at the 7 a.m. polar-bear swims, best ghost stories.

Last year ten-year-old Pam Pease, who has leukemia, arrived at camp from Jacksonville, Fla., in a wheelchair after having spent much of the previous winter with her legs and feet in casts. Normally reluctant to walk on her own, on awards night she left her wheelchair outside.

She applauded vigorously when her friends' names were called and they hurried up to the stage. Then the master of ceremonies called out Pam's name. A counselor leaned forward to give her a hand, but Pam waved her aside. With a quick tug to tighten the strap of her leg braces, she pulled herself out of her seat and walked haltingly toward the stage steps. Grabbing onto the railing, she slowly pulled herself up, one step at a time, while the audience held its breath. Then she made her way, unaided, across the stage to receive her prize—a certificate commending her for "great hugs."

The crowd went wild with applause. No one seemed to notice that by the end of the evening every camper had received an award.●

#### TRIBUTE TO DAVID BEN-RAFAEL

● Mr. LAUTENBERG. Mr. President, as the Jewish people begin a new year in the Jewish Calendar, they approach it with a degree of optimism rarely seen in Jewish history. For too many years the Jewish people looked ahead with significant trepidation as the next year or a new decade or a new century approached. They face the questions of simple survival or freedom or when there might be a Jewish homeland so people can pray in Jerusalem or when peace will come.

Many of those questions have been answered but one that still remains is peace. The people of Israel yearn to have the assurance that their children can live their lives to the fullness of their years without fear of violence or assault.

Even though the State of Israel was established as a sovereign nation, the

Jewish homeland is still not at peace. Its citizens remain subject to attack by terrorists whether on their own soil or while in other parts of the world. What the Israeli people wish for in this new year is the day when peace will come to the land of Israel and her citizens.

The peace negotiations, though far from conclusive, are supporting that wish. And while the path to peace may be arduous and tortuous, we are constantly reminded of the necessity to pursue peace. The price for instability and hostility is so dear. We need only remember the terrorist attack on the Israeli Embassy in Buenos Aires a mere 6 months ago when, in a moment of terrorist horror, many innocent lives were lost. On March 17, a car carrying a bomb was driven into the entrance of the Buenos Aires Israel Embassy Building where it exploded. The explosion caused two-thirds of the embassy to collapse. The bombing killed more than 30 people and injured more than 200 individuals who happened to be near the embassy at the time of the explosion.

One of those innocent victims was a member of a family with whom I have had a close and warm relationship with for more than 20 years. Helen and Ralph Goldman's son, David Ben-Rafael was one of those individuals who was tragically killed in the bombing.

David Ben-Rafael was chief deputy and second in command of the Israeli Embassy. Mr. Ben-Rafael was a vibrant, intelligent man. Born David Goldman and raised in New York and graduated with a bachelor's degree in international relations at George Washington University in Washington, DC, his love for Israel led him to emigrate to Israel in 1971 and adopt a Hebrew name. Mr. Ben-Rafael secured a law degree at Hebrew University in Jerusalem in 1975.

In 1979, Mr. Ben-Rafael joined the Foreign Ministry and then served as secretary of information at the London Embassy. Later he held the position of Israel's consul in Chicago. In October, he was named to the Buenos Aires Israeli Embassy position.

Mr. President, this shocking incident and others like it must galvanize the United States and the international community to continue our resolve to combat and eradicate terrorism. Much of the world condemned this intolerable terrorist act and all should join in seeking an end to crimes of hate which only leave despair, devastation, and death in their wake.

I extend my heartfelt condolences to Mr. Ben-Rafael's wife Alisa, their children Noa and Jonathan and his father and mother. David Ben-Rafael was a special man who left a lasting mark on the people whom he touched throughout his life.

All of us wish Israel and her people a peaceful new year in which we will all

see a resolution of the centuries old disputes that have plagued that region of the world.●

#### THE JAPAN-AMERICA STUDENT CONFERENCE

● Mr. PELL. Mr. President, this past summer marked the 58th anniversary of an exceptional cross-cultural program, the Japan-America Student Conference. Over the more than half century since its founding, the conference has proved to be an extraordinary instrument for the promotion of cultural understanding, and today I salute its founders, participants and sponsors, who have insured its survival notwithstanding the vicissitudes of history.

The conference was conceived in 1934 by a small group of Japanese students who were distressed at the deteriorating relations between the United States and Japan. An initial mission of four student emissaries visited American college campuses early in the year. They encountered similar interest on the part of American students, 77 of whom returned to Japan to begin the first conference.

Although their first efforts at peace-making ultimately failed, they had begun a process that was to continue through 1940, and resume on an intermittent basis in 1947 after the hiatus of the Pacific War. Since 1964, the conference has convened annually.

In July of this year, 40 American students were joined by an equal number of Japanese for the 44th conference here in Washington. After 2 weeks of meetings and discussions, some of which took place on Capitol Hill, the group moved to Tennessee for a week and then spent their final week in Colorado Springs.

The participants receive an intensive introduction to the values and cultures of the two countries. Topics cover a broad range of critical and controversial issues, including bilateral trade problems, the challenge of race relations and environmental policies.

Discussions encompass ethical questions, as perceived from contrasting cultural viewpoints, in such areas as the public responsibility of the media and of the medical and legal professions.

The conference is a self-perpetuating institution. The students themselves are responsible for planning and staging the sessions. Each year, 10 American and 10 Japanese students are elected at the end of the session to plan and organize the next year's meeting. Already, the nucleus group elected at Colorado Springs is at work planning for the 45th conference which will be held in Tokyo next year.

The Japan-America Student Conference has proven over its long history to be an effective force for developing tomorrow's leaders. The roster of those who have gone on to make significant

contributions in fields of international relations, academic and business is impressive.

One of the alumni is the current Prime Minister of Japan, Kiichi Kiyazawa, who recently said:

As one whose first involvement in Japan-United States relations was under the auspices of the Japan-America Student Conference in 1939, I can tell you honestly that it was one of the formative events of my lifetime.

The Japan-America Student Conference has indeed achieved venerable standing as an institution committed to molding future generations to a tradition of peace and understanding across the Pacific. I salute the conference and commend those who are responsible for its continuing good work.●

#### JUSTICE FOR PERMANENTLY DISPLACED STRIKING WORKERS ACT

● Mr. DURENBERGER. Mr. President, on October 8, 1992, I introduced the Justice for Permanently Displaced Striking Workers Act of 1992, S. 3375. This important piece of legislation provides for expedited adjudication of unfair labor practice charges under the National Labor Relations Act when striking workers are permanently replaced.

When I introduced the bill, I neglected to ask that the entire bill be printed in the CONGRESSIONAL RECORD. Accordingly, in order to more provide my colleagues with an opportunity to study this proposal during the adjournment period, I now ask that the entire text of S. 3375 be printed in the RECORD.

The text is as follows:

S. 3375

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

#### SECTION 1. SHORT TITLE.

This Act may be cited as the "Justice for Permanently Displaced Striking Workers Act of 1992".

#### SEC. 2. FINDING.

Congress finds that the lack of timely adjudication of unfair labor practice charges in connection with labor disputes where permanent replacements have been utilized poses an obstacle to continued stable labor relations in this country.

#### SEC. 3. FACILITATE ADJUDICATION OF UNFAIR LABOR PRACTICE CHARGES.

(a) PRIORITY OF CASES.—Section 10(m) of the National Labor Relations Act (29 U.S.C. 160(m)) is amended—

(1) by striking out "(a)(3) or (b)(2)" and inserting in lieu thereof "(a)(3), (a)(5), (b)(2), or (b)(3)"; and

(2) by adding at the end thereof the following new sentence: "In cases where a collective bargaining agreement has expired and a person alleges that a party to a collective bargaining agreement has failed to negotiate in good faith as required by the Act, and where permanent replacements have been hired, an expedited investigation and adjudication procedure shall be available as described in subsection (n).

(b) TIMETABLE FOR ADJUDICATION.—Section 10 of such Act (29 U.S.C. 160) is amended by adding at the end thereof the following new subsection:

"(n)(1) In cases described in the last sentence of subsection (m), administrative law judges shall have 60 days in which to hold a hearing after a complaint has been filed under this section. After such hearing has occurred and the parties have filed their briefs with respect to such, the administrative law judge involved shall have not more than 60 days to issue a decision with respect to such case.

"(2) A party in a case described in paragraph (1) shall have 30 days in which to file a brief with the Board containing exceptions to the decision of an administrative law judge under such paragraph. Other parties shall have 15 days in which to file their briefs in response to such exceptions.

"(3) The Board shall have 90 days after the date on which a brief has been filed under paragraph (1), to issue a decision in the case. Such period may be extended for an additional 30 days if an oral argument is scheduled.

"(4) By mutual agreement of the parties, the timetables contained in paragraphs (1) through (3) may be extended as agreed upon.

"(5) If the administrative law judge fails to meet any deadline contained in this subsection, the administrative law judge shall notify the parties, the National Labor Relations Board, and the Committee on Labor and Human Resources of the Senate and explain the reasons for the delay. The notification and reasons for the delay shall be submitted by the administrative law judge for publication in the Federal Register.

"(6) If the National Labor Relations Board fails to meet any deadline in this subsection, the Chairman of the National Labor Relations Board shall notify the Committee on Labor and Human Resources of the Senate and explain the reasons for the delay. The notification and reasons for the delay shall be submitted by the National Labor Relations Board for publication in the Federal register."●

#### A TRIBUTE TO THE SAFE STREETS CAMPAIGN OF TACOMA

● Mr. ADAMS. Mr. President, I rise today to recognize the outstanding efforts of the Tacoma-Pierce County Safe Streets Campaign. I also want to congratulate the program on being named a winner in the 1992 Innovations in State and Local Government Awards Program.

Mr. President, 4 years ago, the streets of Tacoma were overrun by the plague of drugs and gang-related violence. The citizens of Tacoma sat by while drug dealers conducted sales in open-air markets, crack houses invaded their neighborhoods and the general condition and morale of the city began to erode.

During the fall of 1988, leaders of the Tacoma community gathered together and decided that they had had enough, and the safe streets campaign was born. The response from the community to the program was remarkable, as over 2,000 residents of Pierce County packed into Henry Foss High School for the first gathering of the program.

What became immediately evident was that the citizens of Tacoma clearly had the willpower and the strength to take back their streets.

Mr. President, the safe streets campaign is not just another bureaucratic response to a pressing problem within our society. This program has been fueled from the start by the energy and initiative of the citizens of Tacoma who are fed up with the violence and drugs that plague the communities of our great Nation. The people of Tacoma have sent the message that they will not tolerate this type of crime and disintegration, but rather will fight it and defeat it through unity and collective action.

The foundation of safe streets is the 75,000 persons who have joined the campaign through block-by-block organizing. The war is waged on a block-by-block basis—through the establishment of phone trees, neighborhood watches, graffiti removal teams, and community development programs. The campaign organizes the people to take a common responsibility for their neighborhoods and encourages individuals to contribute to the fight against the drugs and violence on their blocks.

The program also organizes outreach activities for at-risk youth, affording them better alternatives to the temptations of the street. Midnight basketball leagues, art classes, and outdoor excursions to the Olympic Mountains offer constructive opportunities to which the children can devote their energies. In addition, the substance abuse prevention partnership educates children about the dead end life of gangs and drugs.

The accomplishments of the safe streets campaign are extraordinary. Emergency calls to 911 dropped by over 25,000 in the first year following the creation of the program. The drug house elimination effort has eradicated 250 crack houses in the past 2 years. In addition, the number of drive-by shootings has been nearly halved, while gang-related graffiti has been virtually eliminated. Most importantly, safe streets has mobilized over 100,000 Pierce County residents to participate in the effort.

One Tacoma resident states:

We are learning to be neighbors again. A lot of people sleep better. We feel free to come and go. We had a "don't get involved, mind your own business" attitude; we thought that that would keep us out of trouble. We were wrong. If people work together, they can do anything.

Mr. President, I hope that cities throughout our Nation can benefit from the successes of the safe streets campaign. Already, communities within Baltimore, Cincinnati, Birmingham, and Oakland have sought out the assistance of the program. The war against crime can succeed only if urban communities like Tacoma stand up for themselves and take their neighbor-

hoods back from the control of drug pushers and gang members.

I extend my congratulations to the safe streets campaign, and my thanks to Lyle Quasim and Mayor Karen Vialle, whose inexhaustible energy and dedication have fueled the program from its beginning. I ask that an article on Safe Streets from Parkland magazine be entered into the RECORD.

The article follows:

**STOP! DON'T TURN YOUR BACK ON PARKLAND!**

(By Alice Gordon)

Lawlessness prowls the streets, seeking the next victim. Vandalism and robbery is happening in your block. The graffiti down the street is announcing a "gang war" . . . is it a joke? Guns are easy to get at the local high school. A steady stream of "customers" visit a rented home to deal for illegal drugs that were produced there, using costly, sophisticated equipment. Vacant property is cultivated for growing marijuana, and there is more inside the house next door. We're talking about New York or Los Angeles, right? Wrong! It is happening here—today—in Parkland. Sometimes with fatal results.

#### DRUGS, CRIME, VIOLENCE IN PARKLAND

Can you recall your reaction when you read about such things in the papers a few years ago? You probably threw your hands in the air and said, "I told ya so! The youth of this world have gone to pot. I'm sure glad I'm not a part of it." Then, satisfied you had done everything you should, you turned your back and went about your own business.

That's what we used to say, and do, but we can no longer turn our backs and walk away. Now we must pay attention to the criminal activity and violent behavior which have come into our neighborhoods. If we don't, even those of us who have not yet been affected by it, will someday be directly threatened in a public place, on the street, or even in our own home.

Although crime and other problems tend to grow as population increases, another factor is lack of concern. If a community tolerates lawlessness, it draws in others who thrive in a lawless environment. Compare today's surroundings with those of a few years ago. The people knew one another. They were aware of what was happening, who was away from home, who needed help. The neighbors were much more likely to become aware if there was a problem. Today, with a much more mobile society, there is less opportunity to get to know your neighbors; to develop a caring attitude toward the community as a whole. It is easier to ignore the problem or figure you can, as an individual, do nothing to solve the problems. And, as an individual, you might be right. These are big, difficult problems to solve.

Fortunately, there is a program designed to bring peace and responsibility back to our neighborhoods. It is called Safe Streets.

If you want to be part of the solution to the crime problem, call the Safe Streets office at 272-6824. You will be put in touch with a group of volunteers who are organizing the Safe Streets program for Parkland.

The system works on a block-by-block saturation method. Currently, there are several blocks in the Parkland area which are in the Safe Streets program. Ideally, the blocks are adjoining so each block can support the other in driving criminal activity out. As more and more blocks are added, this interaction builds a spirit of community—the strongest force in keeping crime out of the neighborhood.

Too often we think the law enforcement agencies should take care of crime prevention. However, they cannot prevent crime. And, they do not have enough staff or resources to deal quickly with every problem. They need our help.

Some problems are actually found more often in semi-rural areas, such as ours, than in the cities. Parkland has a large number of low-rent properties, some in secluded locations. These make ideal "crack houses" where drug sales can be made with less fear of observation. These locations may also be used for the manufacture of illegal drugs, since the renter can use the location for a short time and then move on. Rental properties also make good locations for both indoor and outdoor growing of marijuana. Vacant lots can be inconspicuously cultivated.

It is only when neighbors and landlords are concerned enough to observe and report suspicious activity that the police can go into action. The people in a neighborhood are the only ones familiar enough with the routine to quickly pick up on changes like increased traffic to a particular location, newly planted areas and greatly increased electrical utilization (a sign indoor growing equipment may be in use).

How do you know what to look for? Who do you talk to about suspicious activities in your area? That's where the Safe Streets program can help, but you have to be willing to get involved.

New members come to Safe Streets with a variety of problems. Some have a crack house next door. For others, someone has persuaded their child to become a grade-school pusher, a seven-year-old selling drugs to his school chums. Some are residents whose homes have been robbed.

"Unfortunately," says Cheryl Byers, Safe Streets coordinator for Parkland/Spanaway, "if you go out and invite residents to an organizational meeting, the people just won't come out. It seems it must come down to not only a tragedy, but a personal tragedy, before people decide they had better do something. The victim of crime is usually ready to join up."

At their first meeting, interested residents are shown a video tape that explains the program and gives several ideas on how they can make their own neighborhood streets safer. Safe Streets has several systems of operation, depending on the neighborhood and insight from the Pierce County Sheriffs' Department. The sheriff and police work together with Safe Streets to get the neighborhood "cleaned up."

Generally, the first step is to observe activities that take place in the neighborhood. Members of Safe Streets keep a record of suspicious events. This standard form will be helpful should police be called to enter in on a situation. The form calls for information like date and time of the observation; style, make, color, year and license number of any car involved; whether or not the suspicious-looking person is a repeat visitor; a description of the person observed; if any weapons are observed; and a description and pattern of the activity of the suspicious-looking person.

The plan is to observe and record events, especially those that are repeated and suspicious. Since the program is developed on a block-by-block basis, most of the time more than one neighbor can observe what is taking place. Just to be sure, the first observer may call others living nearby to also record what is happening. This is important, as multiple observation of the same behavior builds a much stronger case for deputies who

are investigating the problem. The forms will be used to present a written record of events. As you can see, there would be several observers turning in reports, and as much as you may think "one person doesn't count," this is the time where individuals, acting together, make the system work!

After several such observations, the sheriff can seek a search warrant and advance an investigation toward closing down a crack house and eliminating other unlawful activities. "The people of Parkland can become an extension of the Pierce County Sheriffs' Department," says an officer on the video tape that introduces Safe Streets. "The best protection against crime is a good neighbor. Law enforcement officers cannot prevent crime. They can only act after crime has been committed." That is where the average citizen comes in. He or she witnesses the crime.

What else does the Safe Streets organization do? For one thing, their members assist one another, and the community as a whole, by cleaning up vacant lots and run-down buildings. This not only gives the area a better look, but also eliminates structures which would be attractive for criminal use. They paint over graffiti that gang members use to deface buildings and bridges, and that serve as the gang's "bulletin board" to make announcements of upcoming fights and threats.

Another part of the Safe Streets program is to present Rental Industry Seminars. These presentations cover such subjects as tenant screening, techniques, landlord/tenants rights and responsibilities, and proper evictions. Many people in our area rent their homes out without any training on how to be a good landlord, and learn the hard way about problems which can develop. PL&W Co. urges landlords to attend one of these seminars. Call 272-6824 for information on future Rental Industry Seminars.

Some people here in Parkland have basically become prisoners in their own homes. They are surrounded by criminal activities and fear for their lives with every move they make. Their block, as a whole, did not suddenly go "sour." It probably started with one home, an outbuilding, perhaps a vacant lot, where drug users and gangs could somehow proceed with their activities in relative comfort. Once the comfort is destroyed—police cruising the area after neighbors have reported suspicious activities—the gang will seek another place for their activities. As one drug dealer put it, "When it gets too hot, we're out of there!"

The job of Safe Streets members is to make it Hot!!!

Don't turn you back on Parkland.

#### PRECONTRIBUTION GAIN ON PARTNERSHIP DISTRIBUTIONS

● Mr. REID. Mr. President, it has been brought to my attention that the conference agreement on H.R. 776, the Energy Policy Act of 1992, includes a revenue-raising provision on the taxation of partnership distributions that was included at the last minute without due consideration of the retroactive impact on the current law rules.

The claim was made by some that this provision was necessary to close a so-called loophole, but the committee reports on this provision are devoid of any indication that this is anything other than a plain revenue raiser. In

fact, the provision simply substitutes a per se rule for a more than adequate regulatory rule that was confirmed under final Treasury regulations just last week—preliminary regulations having been issued nearly a year and half ago. Taxpayers would normally be entitled to transition relief where they have acted in reliance on existing tax rules, and this oversight should be corrected at the earliest opportunity next year.●

PAUL TULLY—AMERICAN POLITICS AT ITS BEST

● Mr. KENNEDY. Mr. President, with the untimely death of Paul Tully at 48 last month, American politics lost one of its greatest practitioners and American democracy lost one of its most tireless and committed advocates.

Paul Tully believed deeply in this country, and he dedicated his life to progress toward the great ideals that make America America. All of us who admired him and worked with him will miss him in the years ahead and the battles still to come.

His life is an inspiration to all who knew him, and America is a better land for millions of our fellow citizens because of all that Paul Tully was able to accomplish in the brief time he had on Earth.

A memorial service was held for Paul at Washington National Cathedral on September 30. I ask that the texts of the tributes at the service and other articles about his life and career may be printed in the RECORD.

The material follows: [Memorial Service for Paul R. Tully, Washington National Cathedral, Sept. 30, 1992] FROM "THE WISDOM OF SOLOMON," CHAPTER 3 (1-3); CHAPTER 4 (7-8; 13-15) (Read by Carl Wagner)

But the souls of the righteous are in the hand of God, and no torment shall touch them. In the eyes of the foolish they seem to have died, and their departure was thought to be a disaster; And their going from us to be their destruction; but they are at peace.

\* \* \* \* \* The righteous though they have died early, will be at rest. For old age is not honored for length of time or measured by number of years, but understanding is gray hair for anyone.

\* \* \* \* \* Being perfected in a short time, they fulfilled long years, For their souls were pleasing to the Lord. Therefore He took them quickly from the midst of wickedness. Yet the people saw and did not understand or take such a thing to heart,

That God's Grace and Mercy are with His elect, and He watches over His Holy Ones.

PSALM 46—RESPONSIVE READING LED BY JIMMY TULLY

God is our refuge and our strength, a very present help in trouble.

Therefore we will not fear though the earth be moved, and though the mountains be toppled into the depths of the sea.

Though its waters rage and foam, and though the mountains tremble at its tumult.

The Lord of Hosts is with us; the God of Jacob is our stronghold.

There is a river whose streams make glad the City of God, the holy habitation of the Most High.

God is in the midst of her; she shall not be overthrown; God shall help her at the break of day.

The nations make much ado, and the kingdoms are shaken; God has spoken, and the earth shall melt away.

The Lord of hosts is with us; the God of Jacob is our stronghold.

Come now and look upon the words of the Lord, what awesome things he has done on earth.

It is He who makes war to cease in all the world; He breaks the bow, and shatters the spear, and burns the shields with fire.

\* \* \* \* \* I'd just like to take a moment to say goodbye to Paul. I spent forty-five years with him, and his whole family is here. Not his political family—his family. He protected me my entire life and I will miss him. But I think the right way to hold a memorial to this guy is, come November, to win this thing.

REMARKS OF GINA GLANZ

Each of us, in our own way, will mourn the death of Paul and celebrate the life of Paul. For me, I will always remember that Paul was buried on Rosh Hashanah, the Jewish New Year. Reflections of the past year will be filled with him and of the year to come will have a certain emptiness.

I have always believed that part of Paul's large Irish heart was Jewish. In the Jewish faith, the most important person in the community is the teacher. In fact, rabbi means "my teacher." To thousands and thousands of organizers, and to all those organizers who are here today, he indeed was their rabbi.

He would go anywhere, any time, for any number of people, to share his wisdom. He would excite them; he would educate them; he would entertain them. He unselfishly shared his enormous talent with others, because he had an abiding faith that every new generation of organizers created new opportunities for progressive politics and policies.

I will read a Meditation which is part of the Rosh Hashanah Service, and I will always remember him by it.

We pause in reverence before the gift of self: The vessel shatters, the divine spark shines through,

And our solitary self becomes a link in Israel's golden chain.

For what we are, we are by sharing. And as we share

We move toward the light.

We pause in reverence before the mystery of presence:

The near and far reality of God. Not union, but communion is our aim.

And we approach the mystery With Deeds. Words lead us to the edge of action.

But it is deeds that bring us closer to the God of light.

May we find our life so precious That we cannot but share it with the other. That light may shine brighter than a thousand suns,

With the presence among us of the God of light.

As we enter the Jewish New Year, if each of us will find time to share our knowledge of politics, of organizing, of message with others—we can carry Paul's legacy on. We can help ensure that future generations of dedicated organizers will make the world the better place Paul so wanted it to be.

REMARKS OF SENATOR EDWARD M. KENNEDY

Jessica and Miranda, members of the Tully family, friends of Paul Tully—and Fellow Lettuce-Boycotters:

Who can ever forget that night—3 a.m., Convention Hall, Miami Beach, 1972—Paul was there for George McGovern. I had met Paul briefly in 1968, but I first got to know him then.

We had a lot of 3 a.m.s in 1980 as well. Paul always had one more telephone call for me to make, to one more prospective delegate, in one more time zone.

As Supreme Court Justice Oliver Wendell Holmes once said of his generation's experience in the Civil War, "Through our great good fortune in our youth, our hearts were touched with fire."

So it was with Paul Tully. From the time he was touched with fire by Robert Kennedy until that sad night last week in Little Rock, Paul Tully lit up this world with an intensity and purpose that few have ever matched or exceeded.

It seems so unjust that once again, someone so full of talent and commitment should be taken so suddenly, so young, so in the prime of life. Perhaps a furious primary election campaign is taking place in heaven at this very moment, and Robert Kennedy sent out an urgent call last week: "I need Paul Tully."

I also know that up there, Paul Tully's Steamfitter grandfather and his Plumber father and George Meany are glad to see him too, for now they can organize all the celestial workers.

Those of us who are left to do Paul's work here on earth carry many warm and loving memories with us.

When I first began to plan for 1980, Steve Smith told me that he had checked around, and that Paul was everybody's choice to be part of my Presidential campaign.

After the first meeting, some said they had listened hard, but wondered if Paul was speaking a foreign language. Actually, as his friends knew, it was just Tully-talk. You had to watch him and listen to him at the same time to comprehend his full meaning.

The truth is—I always understood him. But then again—people say I speak that way too.

Paul had a unique personality that all of us came to love. My Senate colleagues thought Damon Runyon was organizing my campaign.

And what a job he did. He had played tackle at Yale, and he kept on playing tackle all his life.

He said that he always worked for the most progressive candidate in a race, and that he always started looking around for a Presidential candidate about the time of the mid-term convention. I'm just glad he came to Memphis in 1978.

I was ready to sail against the wind—and so was Paul.

He did outstanding work in that campaign. No one ever did it better—or against greater odds—from Iowa to Pennsylvania, to Ohio and on to the Convention.

My father always taught us, "When the going gets tough, the tough get going." I must say, in 1980, I made the going plenty tough for Paul. And it was Paul who kept us going.

If the rest of my campaign had been as good as Paul, we would have had eight years in the White House. I wish I could have seen it—Paul Tully meets Rose Garden.

But, of course, it never would have happened. As Paul liked to say, "I work for change. That's my life. I organize. I don't do governments."

But in a very special sense, he did do America—because his fight was not just for a victory of party, but for ideals of compassion and decency that he held fiercely, despite the tides and fashions of the moment.

He did far more for great endeavors ranging from economic justice to civil rights than most Senators ever do. He kept the Democratic faith, when so many around him were doubting it.

And in his politics, he always practiced what he sought for his country.

He was years ahead of others on the role of women in campaigns and public life. If 1992 is the Year of the Woman because of Anita Hill, it is also because of Paul Tully.

Everything he touched he left better than he found it. Fritz Mondale treasured him too, the way all of us did. Paul had a reservoir of enthusiasm that overflowed any project, and brought everyone else along.

He called countless younger people to his side and to his cause. So many of you are here today—a last assembly of Tully's Legion—ready to go forth again and do the work he loved. You are his legacy, his gift to the future. Because of you, his influence will be felt across years and decades of this nation's public life—this nation, which is a very real sense, was brilliantly mapped in Paul Tully's very singular mind.

He knew America in detail and in breath—almost precinct by precinct. And yet he also had the view from the mountaintop. He knew America the way Einstein knew the cosmos.

He had an encyclopedic understanding, wise counsel, unique insight, and a rare genius.

If they gave out a Most Valuable Player Award in the Democratic Party, he would win it every four years.

Most of all, we remember the utter unselfishness of the man. He was never in anything for himself, but always for the good of others—his family, his friends, his party, his country, his planet.

As I said in the most difficult days of 1980, our work together had become a campaign of the heart. Paul Tully had a heart as big as all of politics, and now his loss has broken our hearts as well.

What grace there was in this rumpled man, what gentleness there was just beneath the toughness.

He was the loyalist of individuals—to the truth and to his friends.

Before he left us, he knew that at long last, 1992 was the year when we were going to do it right. And we are. We are going to win this battle, and now we have a new reason—we are going to win this one for Paul Tully and the newer world he sought.

And next January, when President Bill Clinton takes the oath of office, the spirit of Paul Tully will be at his side, applauding but restless, and already beginning to plan the re-election campaign.

So let me recall some words that my brothers loved, that I quoted in 1980, and that inspired Paul Tully all his life:

"I am a part of all that I have met . . .  
 "Though much is taken, much abides;  
 "That which we are, we are;  
 "One equal temper of heroic hearts,  
 "Made weak by time and fate, but strong in will

"To strive, to seek, to find, and not to yield."

Perhaps Paul Tully lived with such depth of feeling that he could not also have length of years.

"Some men see things as they are and say why. I dream things that never were and say why not."

That was Robert Kennedy, but it was Paul Tully too. And we miss them both all the more.

#### REMARKS OF TERESA VILMAIN

When Jessica and Miranda asked me to say a few words today I found it a rather difficult task. For me to say just a few words, Paul would have been shocked.

I worked with Paul in the 1980 presidential campaign when he took one of his many trips down Grand Avenue. And we made him an honorary Iowan.

He was a complicated man. I had the unique opportunity to witness, not just his product, as he called it, but when he allowed himself that one hour of down time each week. It was remarkable.

I would like to share a conversation I had with Paul a couple of years ago. And wherever he is I think he'd approve. Most of us thought that his true passions in life were politics, general elections and the Democratic Party. Let me let you in on a little secret. It was really watching China Beach with Dana Delaney.

I asked him one week at the beginning of the show, when you leave this earth how would you like to be remembered? In typical Paul fashion it took him at least two and a half hours to answer the question. I forgot I even asked it. "How would I like to be remembered?" he said. "Two simple ways. That I did moral work and that I was loved." Jessica and Miranda, your father's two hopes have certainly been fulfilled. You were always his two favorite pizza pies. I miss you Paul.

#### REMARKS OF RONALD H. BROWN

This is the first time in almost four years when I have had something important to do, that I haven't been able to call Paul Tully ahead of time and ask him what he thought I should say. So I sat yesterday and wondered, what would he have suggested for today? And then it came to me, I almost heard his voice, imagined him waving his hand and turning back to his work, muttering "Say whatever you want, they're all Democrats; there aren't any persuadables in that crowd. Make sure they all vote—and tell them to get back to work, it is day 35."

Now mourning always involves telling stories and reminiscing. And with Paul there is no shortage of material. I've known Paul Tully for more than a decade, and worked very closely with him for the past four years. The decision to hire him as Political Director was probably the most important, and surely the best, that I made. Much of what we are now doing is straight out of the Tully playbook; and this election is unfolding much the way Mr. Tully said it would.

Like most of you I have been collecting and exchanging Tully stories since the day I met him. We all have our favorites.

Once, I was headed late for a formal dinner and found I had left the studs for my shirt at home. I asked Patty McHugh to go down to the political division to see if someone might have an extra set. When Paul stopped laughing at the request, he responded by rummaging through his desk until he found what he was looking for. He thrust a handful of paper clips at Patty, saying: "tell him to use those—they work for me."

I read about how the RNC had these 7:30 a.m. meetings—that idea didn't last long at the DNC. The first day was easy—Paul was still up from the night before. The next day he arrived right on schedule for his idea of an early morning meeting—1 p.m.

A great game was to watch when Paul juggled two passions. During a dinner when he was arguing politics and eating Chinese food, a well-intentioned waiter came by and started to clear away the unfinished dishes. Paul stopped his monologue just long enough to say this to the waiter: "Touch the plate, lose the arm."

Now Paul Tully was not the easiest person to get along with. Some things mattered hugely to him; other things didn't—like what he called "glue politics." And when something didn't matter to Paul, it was not easy to get his attention on it. It was as if he thought what we called stubbornness was a virtue—he called it focus.

And Paul was not always the easiest person to understand. As Carl Wagner said the other day, it was as if Paul had written a great book, but hadn't gotten around to numbering the pages yet—the ideas were all there, but sometimes it took a little reordering.

And yet, we gather today shaken to our cores by the loss of this man. What are we feeling? What is it?

First, Paul was life—he breathed, saw, laughed, growled, paced, waved, drove every moment home. Watching Paul enter an office was like watching a thunderstorm arrive. I once sat in a meeting with Pamela Harriman where, while other people were pulling up extra chairs, Paul pulled up an extra table.

It is almost impossible to think of Paul without seeing him—it was certainly impossible to talk to him on the phone without having a clear vision of what he was doing—you'd hear him waving, using his own sign language . . . always in motion.

Indeed, the word animated could have been invented for Paul Tully.

Paul understood, appreciated and loved to experience many things the way most of us learn to relish one thing. He loved movies, art, flowers, architecture, football, music, cooking, cities, civil war histories, spreadsheets, memories of Jones Beach days as a child—a public beach he liked to point out—and his daughters, his daughters.

And he loved politics. More interesting to him than fiction, more important to him than science, more beautiful to him than nature—he strove to make America live up to its promise by making democracy work better. That meant listening to the gentle conversation of voters' aspirations, mastering the technology of contemporary politics, building coalitions. That meant patiently organizing people and ideas. That meant reminding this Party that our roots are grounded in the struggles of working families, the principles of equality and justice, and the possibilities of progress for all of our people.

These past few days, so remarkable in their sadness, as we have gathered our strength and ordered our emotions and feelings, we have stood together as a family in a broken circle. What we have shared, and what has passed between us, contains enormous inspiration, reassurance and strength. But let us also be wiser as well as stronger. Let us remember that as important as elections are, we must all learn to take better care of ourselves—especially those among us who spend so much time, and so many nights, away from home. Your contributions

are precious to our country; your lives are precious to us. Take care of them. Please.

Paul Tully is gone. But, look in a hundred campaigns today, look in a thousand faces around this country—look at each other—and you will see the men and women Paul Tully trained and Paul Tully inspired. Paul often described himself as an organizer. The definition of a good organizer is someone who can leave a place and have left others to carry on the work. Paul Tully was just such an organizer, and we are the people to carry on his work. That's why, heartbroken though we are, we must go back to work. After all, it's day 35, there's message to make and a base to turn out. And we must march on.

#### REMARKS OF JESSICA AND MIRANDA TULLY

Friends. Our father approached parenthood like he approached a lot of things. Uniquely. We all know he was wholly and passionately dedicated to making the country a little more tolerable for the working class men and women of this country. Miranda and I cut our teeth on the journey for social justice. And I know that is the connection that binds all of us here today.

However, this has meant that we have waited, Miranda and I, have waited endlessly for him in offices, on birthdays, after school, on Father's Day, on Christmas, on New Year's, and until 2 in the morning sometimes. But we are different and stronger people because of this. He loved us as he came home from the DNC and after that, from NCEC, and cooked dinner for us, at 11:30 at night sometimes.

He loved us as he pointed out the historical significance of this building and the beauty of those flowers and that music. He loved us as he proclaimed himself Mister Wonderful. And made that fish kiss. And now he leaves us. Waiting. The order has been erupted.

Indeed, a portion of his life's work will be realized in November. But it is up to us to decide what to do with it afterwards. Or, will we know what to do with it? Our family buried our dad, a New Yorker, here in the nation's capital for a reason. Let his memory guide us toward making this country work again. And toward all of us laying down our political swords once in a while to venture out into the sunshine or the starry sky and to fully enjoy each moment we have on this great mother earth.

We love you Dad.

#### STATEMENT OF GOVERNOR BILL CLINTON, SEPTEMBER 24, 1992

Hillary and I are deeply saddened by the loss of Paul Tully. He was a dear friend and trusted advisor.

Paul had one of the nation's greatest political minds—and one of its biggest hearts. He dedicated his life to improving the lives of others.

Our prayers are with him, his family and all of those who loved him. We're really going to miss him.

#### REMARKS OF CONGRESSMAN RICHARD A. GEPHARDT, HOUSE OF REPRESENTATIVES, SEPTEMBER 25, 1992

##### FOR TULLY

Mr. Speaker, I rise with great sadness to inform my colleagues that a good friend of mine, and a good friend of the Democratic Party, Paul Tully, passed away yesterday.

Paul Tully was in politics for all the right reasons. Not for money, and not for power, but because he believed that politics was the vehicle for changing and lifting the lives of every American.

Nobody worked harder in the last four years to elect a Democratic President than Paul Tully. And I think this year, his work was about to pay off.

But even if it doesn't, it's hard to accept the fact that Paul won't be staying up all night on November Third, following the computers, listening for targeted precincts, shouting at the television, and waiting to see whether the voters—people Paul Tully admired and studied so well—did what he expected them to do behind the drawn curtain of democracy.

Paul leaves behind two daughters. He leaves behind a generation of Democratic activists, friends and colleagues at the Democratic National Committee, allies in Governor Clinton's campaign, partners from the civil rights and women's movements, respectful adversaries, and countless people who just enjoyed being around him.

There are a lot of people who say today, "I do politics because of Paul Tully." And now, for them—for all of us—there is a hole in our hearts. And as sorry we are to know Paul is gone, we are grateful that he passed our way.

#### REMARKS OF CONGRESSMAN BILL RICHARDSON, HOUSE OF REPRESENTATIVES, SEPTEMBER 28, 1992

##### TRIBUTE TO A MAN OF POLITICS

Mr. Speaker, at this very moment in Little Rock, Arkansas, and in Washington, DC, practitioners of politics toil away on behalf of their Presidential candidates, Bill Clinton and George Bush. The giant on the Republican side was Lee Atwater. The giant on the Democratic side was Paul Tully. Both have passed away.

Although their tactics were different, both men were campaign strategists of the utmost degree. Paul Tully cared deeply about government. He cared about people. He worked in every President campaign since 1968.

Charts, maps, demographics, polling, statistics, fundraising—every day these words emanated from Paul's lips. He was a good, decent man that cared about people, about education, about health care.

It is ironic, Mr. Speaker, that Paul Tully toiled in four losing Presidential campaigns, but regrettably, one of the greatest tragedies of his death will be that Paul Tully needed 40 more days to see his candidate, Governor Bill Clinton, win in November.

Sometimes many downgrade the practitioners of politics, those young men and women toiling away in President Bush's headquarters and in Governor Clinton's headquarters, as unimportant, but they are not. Politics is a noble art, and one of the most noble practitioners, Paul Tully, left us most regrettably last week.

#### STATEMENT BY DEMOCRATIC PARTY CHAIRMAN RONALD H. BROWN, SEPTEMBER 24, 1992

It is with the deepest sadness that we announce the passing of Democratic National Committee (DNC) Political Director Paul Tully last night in Little Rock, Arkansas.

It is difficult for me to express my personal loss of a dear friend and colleague of over twelve years. My first act as Party Chairman was to recruit Paul whom I consider a political genius. His work over the last four years has only reinforced that assessment.

Those of us who have had the honor, privilege and unique joy of working with Paul mourn the passing of a man whose heart and soul reflected the ideals, values and aspirations of this great country and the Democratic Party.

There will only be one Paul Tully. Pacing, driven, and full of joy, Paul's commitment to

our Party and more importantly, to making this great nation even greater was a fire that burned bright and long. Amidst all of our sadness, we can take some solace in knowing that Tully's fire—the Tully spirit—will live on in the hundreds upon thousands of people whom he has touched.

The bitter irony of his passing—so close to the realization of his life's work—is perhaps the hardest thing to swallow. Each day, we renew our commitment to his mission.

Our thoughts and prayers go out to his family. Paul, we know you will be watching and cheering with us come November. Thank you and God bless you.

#### BIOGRAPHY OF PAUL TULLY

Paul Tully was the Director of Political Operations for the Democratic National Committee (DNC) since the beginning of Chairman Brown's term in 1989. He coordinated Democratic general election strategy at the local, state and national levels, and supervised DNC political programs. In 1988, Mr. Tully served as Political Director in Senator Gary Hart's and Governor Michael Dukakis' primary campaigns.

In addition to the numerous senate and gubernatorial campaigns he managed, Mr. Tully worked on every Presidential election since 1968 as political director or part of the political staff. He was the Executive Director of Senator Kennedy's PAC, the Fund for the Democratic Majority. Mr. Tully also had served as a creative consultant with MTM television productions in Hollywood.

He was a graduate of Yale College and the University of Pennsylvania Law School.

While at the DNC, Mr. Tully led the party's presidential campaign preparation effort, and oversaw the integration of the DNC's political program with the Clinton campaign.

He was born in New York City in 1944 and grew up in Long Island. He is survived by two daughters Jessica, and Miranda Tully, one brother Jim Tully and one sister Patricia McDermott.

#### STATEMENT BY DEMOCRATIC PARTY VICE CHAIR CARMEN O. PEREZ

I cannot express what a grave loss this has been for the Democratic Party and the national political community. Paul Tully's political savvy and his commitment to Democratic Party politics was unmatched. His leadership was instrumental in revitalizing the Party, and in focusing our strategy back to the grass roots level.

Paul Tully practiced the politics of inclusion and empowerment. He sincerely believed in the diversity of the Democratic Party and in bringing people into the political process. His commitment and outreach to the Hispanic community has helped Latinos become politically involved at all levels, and has brought the issue of Hispanic political participation to the forefront of the national political debate.

I sincerely extend my deepest condolences to his family.

[From Hotline, Sept. 25, 1992]

#### PAUL TULLY: VETERAN DEM STRATEGIST DIES IN LITTLE ROCK

DNC political dir. Paul Tully, who worked in every pres. election since 1968, died in his hotel room in Little Rock yesterday. He was 48 years old. Boston Globe's Chris Black: "The unexpected death of the heavysset chain smoking strategist, who brought passionate commitment and depth of knowledge to national politics, shocked and saddened the po-

litical community. . . . Politics was his love, and he devoted his life to the cause of electing liberal Democrats to public office . . . with an unparalleled Rolodex of contacts throughout the nation and encyclopedic knowledge of Democratic constituencies" (9/25).

N.Y. Times' Robin Toner: "One of his party's pre-eminent strategists . . . among the most impassioned and intense of a generation of Democratic political professionals who devoted much of their lives to regaining the White House. . . . He was known in political circles for his blunt assessments, his fierce partisanship and his love of the game" (9/25).

W. Post's J.Y. Smith: "A rotund, curly-haired, coffee-drinking chain-smoker who could be brilliant and inarticulate at the same time. . . . One of Washington's most respected political operatives . . . He cut his teeth on the old politics of coalition. But colleagues credited him with an equal mastery of the new politics of communication: polls, issues, focus groups, regional differences in the electorate, what it takes to get people interested, how to engage them in the process" (9/25).

W. Times' Moss: "a chain-smoking former collegiate defensive tackle with a disheveled appearance who had an intense approach to modern politics" (9/25).

ABC's Schneider: "A key aide to Bill Clinton and the whole Democratic party has died—Paul Tully. He was the political director of the Democratic National Party. He was just 48 years old" ("GMA," ABC, 9/25).

DNC Chair Ron Brown: "My first act as Party Chairman was to recruit Paul whom I considered a political genius. His work over the last four years has only reinforced that assessment. . . . There will only be one Paul Tully. Pacing, driven, and full of joy . . . The bitter irony of his passing—so close to the realization of his life's work—is perhaps the hardest thing to swallow" (DNC release, 9/24).

Bill Clinton: "Paul had one of the nation's greatest political minds, and one of its biggest hearts."

Clinton Strategist James Carville: "This guy's whole life was Democratic presidential politics. He had worked for four years on this—he had every map, every target, he probably knew the name of every swing voter in the country" (N.Y. Times, 9/25).

Sen. Ted Kennedy (D-MA): "Paul Tully was a great friend of the Kennedy family and one of the Democratic Party's most valuable resources. He had an encyclopedic understanding of American politics and his wise counsel, unique insights and remarkable personality will be deeply missed."

Dem Strategist John Sasso: "All he wanted was to elect a Democratic president. He gave up everything in his life to help the Democratic Party" (Boston Globe, 9/25).

Bush-Quayle Political Dir. Mary Matalin: "Paul Tully was an outstanding professional who cared passionately about his party. He was in this business for all the right reasons. He had a soul" (W. Post, 9/25).

[From "Hotline," Sept. 29, 1992]

#### PAUL TULLY: MORE REMEMBRANCES

Boston Globe's Tom Oliphant writes of Tully's first presidential campaign, working as a "grunt" for RFK. After '68, "While his party appeared to go astray, Tully never did as he matured from a world-class tactician and organizer into one of political liberalism's most creative thinkers. . . . When Tully died, people wept in board rooms, newsrooms, on Capitol Hill, at a candlelight

vigil on the banks of the Arkansas River and on the meaner streets of politics" (9/27).

W. Post's Dan Balz recounts his dinner with Tully the night before he died: "As always, he was provocative, enlightening—and exhausting." Tully once told Balz, "I don't do government, I do politics." It wasn't meant to denigrate the business of governing, but only to suggest that to him there was something equally ennobling about the art of fighting and winning elections. . . . Gruff, ebullient, bearish, upbeat, insightful, partisan" (9/26).

Mark Shields: "Since 1968, Paul Tully had practiced politics working almost non-stop to put a Democrat in the White House. But he was not really a political pro. Paul Tully was a committed, smart, tough, insightful, and passionate amateur. . . . As Peter Hart put it so well, 'In a world full of mercenaries, Paul Tully was a missionary.' In the words of his friend Mike Ford, 'Paul Tully truly did a noble politics'" ("Capital Gang," CNN, 9/26).

Newsweek's Joe Klein: "He left the way his peers fear most—alone, in a hotel room, too young. . . . He loved the game so he sometimes couldn't find words fast enough, antic scenarios dissolved into unintelligence gasps—but his friends understood, and will miss him fiercely" (10/5 issue).

L.A. Times: "In his more than 20 years as a political strategist, Paul Tully . . . repeatedly saw Democratic presidential candidates go down to defeat. The experience did not dishearten him; rather it fostered an understanding of political realities that he sought to impart to the Clinton campaign" (9/29).

Boston Herald's Helen Kennedy: "Tully once explained that his strategy was to work for the most progressive candidate who had a chance of winning. He had little choice: liberal politics ran in his blood" (9/25).

N.Y. Newsday's Myron Waldman: "One of the brightest and most popular political operatives in the business" (9/25).

House Maj. Leader Richard Gephardt: "It's hard to accept the fact that Paul won't be staying up all night on November 3rd, following the computers, listening for targeted precincts, shouting at the television . . . There are a lot of people who say today, 'I do politics because of Paul Tully.' And now, for them—for all of us—there is a hole in our hearts. And as sorry as we are to know Paul is gone, we are grateful that he passed our way" (Spoken on House floor, 9/25).

The memorial service will be held tomorrow, 9/30, at 1:00pm at the National Cathedral in DC.

[From the Associated Press, Sept. 25, 1992]

#### DEMOCRATIC POLITICAL OPERATIVE DIES

LITTLE ROCK, AR.—Paul Tully, political director of the Democratic National Committee, was found dead Thursday in his hotel room, authorities said. He was 48.

Pulaski County Coroner Steve Nawojczyk said Tully appeared to have died of natural causes, probably a heart attack or stroke.

Tully, who had been directing state-by-state targeting for the Clinton campaign, was a beefy, intense, chain-smoking political operative who had moved in and out of top Democratic campaigns for more than a decade.

Bill Clinton called Tully "a dear friend and trusted adviser."

In 1980, Tully was a key aide for the presidential bid of Sen. Edward M. Kennedy, D-Mass., and was political director for Walter F. Mondale's 1984 presidential campaign.

In 1988, Tully was political director for Gary Hart's presidential bid and assumed the same post in the Dukakis campaign after Hart's effort collapsed.

Tully was one of two aides who resigned from the Dukakis campaign in the controversy over the disclosure of a videotape that showed Delaware Sen. Joseph Biden and British politician Neil Kinnock making the same speech.

Biden, who drew heavily from Kinnock's text without attribution, ultimately withdrew from the presidential race.

John Sasso, Dukakis' campaign manager, admitted passing the tape to a New York Times reporter. Tully admitted falsely telling Time magazine that the Dukakis campaign had not helped spread information about Biden's use of Kinnock's speech.

Tully moved to the Democratic National Committee after Ron Brown became chairman in 1989.

Tully was apparently stricken while getting ready for bed Wednesday night, Nawojczyk said. His body was found by a maid in his hotel room late Thursday afternoon, the coroner said.

[From the Boston Globe, Sept. 25, 1992]

#### PAUL TULLY, AT 48; KEY STRATEGIST FOR CLINTON, THE DEMOCRATIC PARTY

(By Chris Black)

LITTLE ROCK, AR.—Paul Tully, one of the nation's top Democratic political operatives and a major figure in the Clinton-Gore presidential campaign, died yesterday of natural causes, officials said, possibly a heart attack. He was 48.

Mr. Tully was found in his hotel room in downtown Little Rock, two blocks from the Clinton-Gore national campaign headquarters, late yesterday afternoon. The unexpected death of the heavyset, chain-smoking strategist, who brought passionate commitment and depth of knowledge of national politics, shocked and saddened the political community.

He was a lawyer who displayed little interest in practicing law. Politics was his love, and he devoted his life to the cause of electing liberal Democrats to public office.

"Our ideals would make us social workers except we like to score," he once said of his predilection for electoral politics.

In a statement, Sen Edward M. Kennedy said, "Paul Tully was a great friend of the Kennedy family and one of the Democratic Party's most valuable resources. He had an encyclopedic understanding of American politics and his wise counsel, unique insights and remarkable personality will be deeply missed." Mr. Tully was a highly regarded operative in national campaigns with an unparalleled Rolodex of contacts throughout the nation and encyclopedic knowledge of Democratic constituencies.

He most recently worked as the political director of the Democratic National Committee. He moved to Little Rock after the party's national convention to work full time on the Clinton campaign. He insisted that he be given no title but was a powerful presence as a kind of political guru with a depth of knowledge of politics that few could approach.

He spent the last four years piecing together the organizational structure that would enable the 1992 Democratic presidential nominee to reap the benefits of a coordinated Democratic campaign in each state.

He operated from what had been the editor-in-chief's plush office at the Clinton-Gore national campaign headquarters in the former Arkansas Gazette building, supervising the Democratic campaign effort and drawing on decades of experiences to help make decisions on targeting resources.

Mr. Tully was born in the Bronx, the grandson of a Russian immigrant. His family was among the first to move from the city to Levittown, N.Y., the massive postwar suburban community on Long Island, in 1948.

His father was a union plumber and his mother was active in school district politics on Long Island. He went to Yale University and the University of Pennsylvania Law School.

Like many in his generation, he became active in politics during the civil rights movement. During the summer of 1964, he went to Mississippi with other college volunteers to help blacks register to vote. He soon turned to electoral politics for his life's work.

In 1968, he went to work on the presidential campaign of Robert F. Kennedy. Four years later, he worked for George McGovern, in 1976 for Morris Udall, in 1980 for Edward M. Kennedy and in 1984 for Walter F. Mondale.

He began the 1988 campaign season as a top operative for Gary Hart, but when Hart withdrew from the race, longtime friend John Sasso recruited him to be the political director of the Dukakis campaign. Mr. Tully resigned from the campaign in the fall of 1987, the same day as Sasso, the Dukakis' campaign manager, after he admitted he lied to Time Magazine about the fact that Sasso was the source of a videotape that showed rival candidate Joe Biden using the speech of a British Labor Party leader without attribution.

In retrospect, analysts viewed his resignation as significant to Dukakis' eventual defeat as the loss of Sasso, Dukakis' most trusted aide.

Sasso spoke yesterday about the irony of Mr. Tully dying just 40 days before the day when he may have realized his dream to see a Democrat back in the White House.

"It's a very, very sad day," said Sasso. "All he wanted was to elect a Democratic president. He gave up everything in his life to help the Democratic Party."

[From The Boston Globe, Sept. 27, 1992]

#### A RIGHTER OF WRONGS

(By Thomas Oliphant)

WASHINGTON.—Like the American government, American politics has largely lost its way for the past quarter-century.

The government and politics have often forgotten their most important customers—the people who try to live off their paychecks and pensions and the people to whom life has been haphazardly cruel.

Since the late 1960s, government has been too much about deals, about marking time, about accommodating big shots, and politics has been too much about the same things, as well as about lowest-common-denominator marketing, fear and hate.

In this rough, however, there have been diamonds, and one of the most lustrous died unexpectedly in Little Rock on Thursday, just as the dream to which he literally gave his life looked as if it might finally come true.

Paul Tully—just 48 when he died—was one of the few people who, in the middle of the Reagan era, figured out that a Democratic majority nonetheless lurked. Bill Clinton's plan for this fall's general election is a direct offspring of Tully's earlier thinking. When his huge heart gave out in his hotel room, Tully was the guy in Little Rock who had done the all-important targeting strategy for the general election—the aiming of the campaign's resources at the states most likely to constitute a majority in the Electoral College.

The plumber's son from New York embodied the purpose of politics: helping ordinary people and righting wrongs. To those whose curse it is to follow this game, it was no surprise that one of the classiest expressions of sadness at his death came from Mary Mattalin of the Bush campaign, who also came up the hard way. "He was in this business for all the right reasons," she said. "He had a soul."

Did he ever. Tully was the political director of the Democratic National Committee. His first presidential campaign as a young man was in 1968, as a grunt for Robert Kennedy. What Kennedy produced in that thrilling spring was what Tully fought for in every spring and fall thereafter: a politics that tried to build a bridge of economic and social justice across the country's racial divide, that offered hope and solid opportunity to white plumbers, black schoolteachers, Hispanic farm-workers and lonely grandmothers.

While his party appeared to go astray, Tully never did as he matured from a world-class tactician and organizer into one of political liberalism's most creative thinkers.

Like many of his pals, he could have made zillions peddling influence; one of the best-kept Tully secrets was that he had degrees from Yale and the University of Pennsylvania's law school. Unlike most of his pals, his idea of off-season work was training community organizers and helping in labor union struggles. I never saw him smile more wickedly than after he had politically busted Eastern Airlines boss Frank Lorenzo in his union-busting chops.

He was in the middle of every presidential fight after 1968; his candidates are a roster of what might have been in the era of conservative ascendancy: McGovern, Udall, Kennedy, Mondale, Hart, Dukakis.

Tully was no Clinton guy originally (Mario Cuomo was more to his taste), but when Clinton came to the party for help in his dark days after the primaries ended, Tully was ready. He'd been selling his plan for more than three years to anyone who would listen. On the two coasts and in the upper Midwest, Tully saw a Democratic majority for a campaign that reached out to the economic concerns of ordinary worried Americans.

As it turned out, Clinton has been the right vehicle, but Tully personified the revived Democratic Party in a position to help him. He was never happier in his life than he was the last few weeks.

When Tully died, people wept in board rooms, newsrooms, on Capitol Hill, at a candlelight vigil on the banks of the Arkansas River and on the meaner streets of politics.

Paul Tully's life embodied that haunting challenge from Robert Kennedy in 1968: that all of us can make a difference and that each of us should try.

[From the Boston Herald, Sept. 25, 1992]

PAUL TULLY, AT 48, DNC POLITICAL DIRECTOR

(By Helen Kennedy)

Paul Tully of Washington, DC, the political director of the Democratic National Committee and a key party strategist who was working on his seventh presidential campaign, was found dead yesterday in his hotel room in Little Rock, Ark.

Mr. Tully, 48, a former aide to Sen. Edward Kennedy and Gov. Michael Dukakis, apparently died of natural causes, probably a heart attack or a stroke, officials said.

Mr. Tully, who made headlines in 1988 when he was forced to resign from Dukakis' presidential campaign because of his involve-

ment in the infamous "attack video" that drove a rival candidate from the race, was apparently stricken while getting ready for bed Wednesday night, said Pulaski County Coroner Steve Nawojczyk.

In a statement, Bill Clinton called Tully "a dear friend and trusted adviser. Paul had one of the nation's greatest political minds and one of its biggest hearts."

Over the years, the chain-smoking ex-line-backer worked on countless campaigns for liberal candidates, including Eugene McCarthy, Robert Kennedy, Allard Lowenstein, Morris Udall, George McGovern and Edward M. Kennedy.

"Paul Tully was a great friend of the Kennedy family and one of the Democratic Party's most valuable resources," Kennedy said last night.

Mr. Tully once explained that his strategy was to work for the most progressive candidate who had a chance of winning. He had little choice: liberal politics ran in his blood.

The great-grandson of a charter member of the Steamfitters Union and the son of a union plumber, Mr. Tully was born in the Bronx. After World War II, his family was among the first to move to Levittown, a sprawling Long Island suburban community.

Mr. Tully won a scholarship to Yale University, where he played tackle on the football team quarterbacked by Brian Dowling, who was later immortalized as "B.D." in classmate Garry Trudeau's comic strip "Doonesbury."

Even before he graduated in 1968, Mr. Tully became involved in the anti-war movement, working first for McCarthy and then for Robert Kennedy. After Kennedy's assassination, Mr. Tully went to the University of Pennsylvania, where he earned a law degree and got married.

In 1980, Mr. Tully was a key aide to Sen. Edward M. Kennedy during his presidential bid and later was a top adviser to former Sen. Gary Hart before he dropped from the race.

In 1988, Mr. Tully was national political director for Dukakis' campaign, but was forced to resign after it was revealed that campaign manager John Sasso distributed the notorious "attack video" that showed Delaware Sen. Joseph Biden had plagiarized an English politician's speech.

Mr. Tully had told Time magazine that the Dukakis campaign had not helped spread the information that forced Biden from the race.

Mr. Tully is survived by two daughters, Jessica and Miranda; a brother, Jim; and one sister, Patricia McDermott.

PAUL TULLY, AIDE TO CLINTON, DNC

OFFICIAL, DIES AT 48

(By J.Y. Smith)

Paul Tully, 48, director of political operations for the Democratic National Committee and a key aide in the presidential campaign of Gov. Bill Clinton, died yesterday at a hotel in Little Rock, Ark.

Pulaski County Coroner Steve Nawojczyk said the cause of death appeared to be a heart attack or a stroke.

One of Washington's most respected political operatives, Mr. Tully worked in every presidential campaign since 1968. His roots were in the liberal wing of the Democratic Party, and candidates with whom he has been closely associated included some of its most prominent spokesmen: Sen. Edward M. Kennedy of Massachusetts, former senators Gary Hart of Colorado, Walter F. Mondale of Minnesota and George McGovern of South Dakota, and former governor Michael S. Dukakis of Massachusetts.

He cut his teeth on the old politics of coalition. But colleagues credited him with an equal mastery of the new politics of communication: polls, issues, focus groups, regional differences in the electorate, what it takes to get people interested, how to engage them in the process.

Both traditions were evident in Mr. Tully's work since 1989, when he became political director at the DNC. With Ron Brown, the party chairman, he was credited with putting the Democratic Party in its best position in years to fight a national election. Part of the job concerned such things as focus groups, and part of it was easing the strains among coalitions that had pulled the party apart in the past.

In the Clinton campaign, Mr. Tully was responsible for coordinating strategy at the local, state and national levels. Clinton described him yesterday as "a dear friend and trusted adviser."

A resident of Washington at the time of his death, Mr. Tully was born in New York City. He graduated from Yale and received a law degree at the University of Pennsylvania.

A rotund, curly-haired, coffee-drinking chain-smoker who could be brilliant and inarticulate at the same time, he cut a traditional figure in politics. Although he seemed to know everything about the United States, he was a big-city easterner at heart.

In 1988, when he went to work for Hart and moved to Denver for a brief period, friends reminded him that he had previously described Colorado as being "so far west it's not even on the map." Mr. Tully replied with a call to action that captured the essence of his career.

"This isn't about where you live," he said. "This is about change—about taking power away from the other guy. If that's what matters to you, it doesn't matter what town you live in."

In 1988, Mr. Tully was one of two people who resigned from the Dukakis campaign in a dispute in the primary about the release of a videotape showing Sen. Joseph R. Biden Jr. (D-Del.) giving a speech, part of which was taken from Neil Kinnock, then the leader of the British Labor Party.

John Sasso, the Dukakis campaign manager, admitted giving the tape to a New York Times reporter. Mr. Tully had told Time magazine that the Dukakis campaign had nothing to do with spreading the story.

Mr. Tully's marriage ended in divorce.

On hearing of his death, Mary Matalin, deputy campaign manager for President Bush, offered this tribute across the divide of political rivalry: "Paul Tully was an outstanding professional who cared passionately about his party. He was in this business for all the right reasons. He had a soul."

Survivors include two children, Jessica and Miranda Tully, both of New York City.

#### THE VORACIOUS DEMOCRAT: PAUL TULLY'S HUNGER FOR POLITICS

(By Dan Balz)

LITTLE ROCK, AR.—On the night before he died, Paul Tully was in exceptional form: a vodka and tonic, a cranberry juice, a succession of cigarettes, a platter of Mexican food, an array of maps and statistics, and two hours of nonstop analysis of the presidential campaign he was trying to win for the Democrats. As always, he was provocative, enlightening—and exhausting.

We hooked up late Wednesday after he had spent another long day in Bill Clinton's headquarters. As we settled into the restaurant booth, he announced to our waitress

in typical fashion: "I have an enormous thirst and an enormous appetite."

Tully was a man of prodigious appetites, but none larger than his passion for politics. His death of a probable heart attack on Thursday cost the Democrats what party Chairman Ronald H. Brown called "the smartest political strategist I have ever known." No one in the party had worked longer or harder to give the Democrats a chance of recapturing the White House this November.

Yet even in Washington, he was hardly a household name. In this era of political operatives as public personalities, he was an insider's insider. The public never knew him. Hardly anyone in Democratic politics didn't. At the relatively young age of 48, he was a veteran of 24 years in presidential campaigns, the political director of the Democratic National Committee and a key architect of the Democrats' 1992 campaign strategy.

Friends called him an original. Tully once said, "I don't do government, I do politics." It wasn't meant to denigrate the business of governing, but only to suggest that to him there was something equally ennobling about the art of fighting and winning elections. He was serious about that business and didn't like people who weren't.

"There was no ulterior motive for him," Brown said. "It wasn't about personal glory. . . . It wasn't about a job down the line. It was about making a difference in the country."

"He didn't define his ego in terms of his notoriety," said Carl Wagner, his closest friend and a fellow political consultant. "He didn't come to politics with his wallet out. Believe it or not, he was driven by his heart."

Gruff, ebullient, bearish, upbeat, insightful, partisan, sometimes unintelligible, he was loved and remembered by those who worked with him for his belief in the cause. "In a business of mercenaries, he was a missionary," said Peter Hart, the Democratic pollster.

Tully was obsessed with politics—to the exclusion of almost everything else. He carried too much weight on his large frame, smoked too many cigarettes, slept too little, pushed himself too hard. He was a man of late nights, slow mornings and no weekends.

"He'd walk into a 7-Eleven at 11 o'clock at night and get the first edition of the morning paper and six cups of coffee to go," Wagner said.

Wagner recalls a night Tully came for dinner, late as usual. Wagner and his wife had already eaten, but Tully said not to worry. He called a pizza parlor. "The biggest," he said, "without anchovies." He called for coffee. He laid out his latest spreadsheets of political data on Wagner's table.

"Pretty soon it was 2 a.m.," Wagner said. "The pizza was gone. The coffee was gone. The spreadsheets were still there."

Tully devoured data. He could read a poll for weeks, sifting and thinking and analyzing the entrails. He would argue about it, he would order more details when something looked odd. His office walls were papered with computer-generated maps showing county-by-county voting patterns, media markets by "persuadable voters," ad buys by candidates, electoral scenarios.

He knew precincts in Pittsburgh and how the vote had changed from one election to another. He knew where Democrats lived in the Detroit suburbs and what they looked like and where they worked and how much they made and how the party could get them back.

Tully knew the players from state to state, their histories and their battles and their weaknesses. When old wounds threatened to upset the progress of Clinton's campaign this fall, others with less experience would ask him to broker a tribal dispute. A few phone calls and an hour or so later, Tully would announce with a grunt, "Done."

He was Brown's first pick in 1989 when he began to build a staff at the Democratic National Committee. The two constructed a strategy for winning in 1992; Tully was one of the most persistent voices in forcing Democrats to keep their focus on economics and the middle class and not on issues that had divided the party in other elections.

A week after the Persian Gulf War ended and President Bush was at 90 percent in the polls, Tully passed my house one Sunday afternoon heading to his office. At the time, there was hardly a political analyst in the country who gave the Democrats a shot at defeating Bush—except Tully.

"Remember Churchill," he said to me that day, recalling that the British voters had turned out their prime minister in 1945 after World War II. Then he got that impish look on his face. "Now all we've got to do is find our Clement Attlee."

In the summer of 1991, when the Democrats were having trouble finding not only their Attlee but anyone to run for president, Tully was plotting victory. "The only question is, is there an audience out there to listen to an alternative?" he asked rhetorically. Based on his own analysis of polling and economic data, he was convinced there was, and like a circuit-riding preacher, he took his spreadsheets and his maps to any party gathering that would have him to convince the doubters.

He was sent to Little Rock to help integrate the operations of the DNC with the Clinton campaign and died in the hotel room that had become his temporary home. On the night before his heart attack, for the first time in the campaign, he sounded cautiously confident the Democrats could win. But he died 40 days short of knowing whether it would happen. For that as much as anything, his Democratic friends were grieving today.

"It's not like politics was good to him," Wagner said. "He was on the downside of the curve in this town. It's not like these were the salad days for a liberal Democrat."

[From the Washington Times, Sept. 25, 1992]  
DEMOCRATIC STRATEGIST PAUL TULLY DIES AT 48 IN LITTLE ROCK HOTEL ROOM

(By J. Jennings Moss)

Paul Tully, Democratic National Committee political director and architect of a strategy to make the party competitive again in presidential elections, died Wednesday.

Mr. Tully, 48, was found dead in his Little Rock, Ark., hotel room late yesterday afternoon. Authorities said Mr. Tully probably died of either a heart attack or a stroke.

The longtime political operative had been heading up the state-by-state targeting effort for Bill Clinton's presidential campaign, which is headquartered in the Arkansas capital.

DNC Chairman Ron Brown, in a statement, called Mr. Tully "a political genius . . . whose heart and soul reflected the ideals, values and aspirations of this great country and the Democratic Party."

Around Washington, Mr. Tully was an imposing figure—a chain-smoking former collegiate defensive tackle with a disheveled appearance who had an intense approach to modern politics.

"I come out of that urban, union, ethnic environment. That's what's inside me," he said in a 1984 interview with *The Washington Post*. "And growing up in Levittown [Long Island, N.Y.] in the McCarthy days with a bunch of conservatives running things, I was raised with a much different attitude toward authority figures than most American kids are taught."

An unabashed liberal, Mr. Tully became politically active in the anti-Vietnam War movement before his 1968 graduation from Yale University and has worked on every presidential campaign since. He later received a law degree from the University of Pennsylvania.

He rose in stature with each election and was political director for both Walter Mondale in 1984 and Michael Dukakis in 1988.

But the post with the Dukakis campaign ended in scandal. He and campaign manager John Sasso resigned after admitting to leaking a videotape that showed Delaware Sen. Joseph R. Biden, Jr., a Dukakis rival, giving a speech strikingly similar to the one from British politician Neil Kinnock without attribution. The incident helped push Mr. Biden from the Democratic race.

After Mr. Dukakis' defeat, Mr. Brown became party chairman and appointed Mr. Tully as one of his top deputies.

In the 1984 *Post* interview, Mr. Tully described himself as a "constituency-oriented economic Democrat" who worked for the "most progressive candidate who has a chance of winning."

When he took the job at the DNC, his goal was different—laying the groundwork so that any Democrat the party nominated would have a good chance of being elected.

Mr. Tully devised a strategy of targeting states based on their value in the Electoral College, using resources carefully, getting a nominee quickly and coordinating the presidential campaign with state and congressional races. Analysts credit such an approach to helping the Democrats this year.

[From *The New York Times*, Sept. 25, 1992]

PAUL TULLY IS DEAD AT 48; TOP DEMOCRATIC STRATEGIST

(By Robin Toner)

WASHINGTON.—Paul Tully, the political director of the Democratic National Committee and one of his party's pre-eminent strategists, was found dead in Little Rock Ark., today. He was 48 years old.

Coroner Steve Nawojczyk of Pulaski County said Mr. Tully's body was found about 3 P.M. today by a maid at the hotel where he was living in Little Rock. Pending results of an autopsy, the coroner said Mr. Tully appeared to have died of natural causes.

Mr. Tully was among the most impassioned and intense of a generation of Democratic political professionals who devoted much of their lives to regaining the White House. He worked in every Presidential election since 1968.

He had moved to Little Rock this fall to aid in Gov. Bill Clinton's drive for the White House. Ronald H. Brown, the chairman of the Democratic National Committee, said in a statement tonight: "There will be only one Paul Tully. Pacing, driven, and full of joy, Paul's commitment to our party and, more importantly, to making this great nation even greater was a fire that burned bright and long."

In a statement, Mr. Clinton said, "Paul had one of the nation's greatest political minds, and one of its biggest hearts."

Mr. Tully was a fixture in Democratic Presidential politics, working for Senator

Edward M. Kennedy in 1980, for Walter F. Mondale in 1984, for former Senator Gary Hart's first Presidential campaign in 1987, and, briefly, as a top aide to Michael S. Dukakis. Mr. Tully resigned from that campaign along with John Sasso, the campaign manager, after Mr. Sasso acknowledged giving reporters a videotape that showed Senator Joseph R. Biden Jr. using parts of another politician's speech. The disclosure helped set off the collapse of Mr. Biden's Presidential campaign.

Mr. Tully was convinced that 1988 was a winnable election for the Democrats, and he spent much of the next four years arguing that a new Democratic majority was emerging in the country; at the Democratic National Committee, he led the party's efforts to prepare for this campaign, and oversaw the integration of those efforts with the Clinton campaign.

#### ECONOMY AS ISSUE

Even at the height of Mr. Bush's popularity after the Persian Gulf war in 1991, when many Democrats considered this election an almost certain defeat, Mr. Tully made the rounds of party gatherings with his slide shows and his charts, arguing that Mr. Bush had serious vulnerabilities. He was known in political circles for his blunt assessments, his fierce partisanship and his love of the game. At a time when many analysts still believed that the 1992 election would be heavily influenced by foreign policy and the ability to serve as Commander in Chief, Mr. Tully declared, "This is about money in my pocket, prices for the essentials of life, the level of fear on the block."

James Carville, the senior strategist for the Clinton campaign, said: "This guy's whole life was Democratic Presidential politics. He had worked for four years on this—he had every map, every target, he probably knew the name of every swing voter in the country."

Mr. Tully was born in New York City, grew up on Long Island, and was a graduate of Yale College and the University of Pennsylvania Law School.

He is survived by two daughters, Jessica and Miranda Tully; a brother, Jim Tully, and a sister, Patricia McDermott.

[From *Newsday*, Sept. 25, 1992]

PAUL TULLY, 48, CLINTON ADVISER

(By Myron S. Waldman)

WASHINGTON.—Paul Tully, who had taken a leave of absence as political director of the Democratic National Committee to work in Bill Clinton's campaign, died in Little Rock, Ark., yesterday.

Mr. Tully, a burly Long Island native who had been involved in Democratic presidential campaigns since 1968 and who was one of the brightest and most popular political operatives in the business, apparently died while he was getting ready for bed. He was 48.

The Pulaski County, Ark., coroner's office said there was no evidence of foul play.

Dee Dee Myers, a spokeswoman for the Clinton campaign, said that Mr. Tully was found yesterday afternoon in his hotel room by a maid. He had not been missed at campaign headquarters because he had been scheduled to fly back home to Washington yesterday.

Clinton issued this statement yesterday on Mr. Tully's death: "Hillary and I are deeply saddened by the loss of Paul Tully. He was a dear friend and trusted adviser. Paul had one of the nation's greatest political minds—and one of its biggest hearts. He dedicated his

life to improving the lives of others. Our prayers are with him, his family and all of those who loved him."

Mr. Tully, a native of Levittown, was a Democrat who prided himself on fighting for the downtrodden and battling for liberal causes. He worked for Eugene McCarthy, the late Allard Lowenstein, former Rep. Morris Udall, Sen. Edward Kennedy, Walter Mondale, former Sen. Gary Hart and Michael Dukakis.

He worked all hours and all days, chain-smoked, drank coffee constantly and ignored all theories of nutrition.

Mr. Tully's ability to plot presidential campaign strategy, to interpret polling data and at the Democratic National Committee to fashion a strategy for victory in 1992 was widely admired.

"Paul did targeting [of individual states]," Myers said. "That was his genius. He knew more about it than any person in this country."

Mr. Tully went to Yale University, where he played defensive tackle on the football team.

Later, Mr. Tully received a law degree, married and moved to Philadelphia. He never left politics.

His marriage ended in divorce. He is survived by two grown daughters, Jessica and Miranda.

"He died 40 days before he was about to achieve what he worked so hard for, of what he was such a large part of," Myers said—what she believes will be a Democratic presidential victory. Funeral plans were incomplete.

[From the Baltimore Sun, Sept. 26, 1992]

THE LATE PAUL TULLY PLAYED BIG-LEAGUE POLITICS

(By Jack Germond and Juks Witcover)

WASHINGTON.—Mothers don't raise their sons to be political operatives. Running campaigns is considered sort of a grubby business.

But it doesn't have to be, as Paul Tully, who died in Little Rock the other night, demonstrated with such zest and gusto in campaign after campaign.

Mr. Tully was indeed one of a kind, a big man with large appetites for food and drink and conversation into the wee hours, usually but not always about politics.

He would swap stories by the hour, gesturing expansively, using extravagant language, punctuating his conversation by asking repeatedly and rhetorically, "Awright," to be certain his listeners were still with him. His syntax, or lack of same, was notorious and could be baffling to those who met him for the first time and hadn't learned to decipher the waves of the arms.

But he was capable of making insightful points in clear terms. This, for example, is Mr. Tully talking after the 1988 campaign about the growing role of the press as a moral arbiter in American politics:

"Quantity change quality. There are now so many outlets, so much coverage and so much inquiry . . . you are doing your work around the beast. The problem used to be how to feed it and feed it in a way that's conveying information that you want—your message, right?"

"It's a delivery mechanism, got a big mouth and power, but how to feed it? . . . Well, now it's developed taste and standards and spits stuff back at you."

"It's not just the size of the thing. It's a new layer that's got a very specific kind of appetite. It's got even more demands. And it's got its new, evolved self-defined role."

'We've got standards and [if] that little [bleep] Quayle don't make the standards, we're going to rip his head off.'

For more than 20 years, he steadfastly pursued the same goal: He wanted to elect a Democratic president who could do the things he thought needed to be done to establish some equity in our society.

His preference was for the most liberal Democrat in the field—a predilection that meant he worked at various times for Robert F. Kennedy, Eugene McCarthy, George McGovern, Morris Udall, Edward M. Kennedy, Walter F. Mondale, Gary Hart and Michael S. Dukakis.

In a sense, Bill Clinton, for whom Mr. Tully was working when he died at 48, was an odd fit because the Arkansas governor was so determined not to be seen as the most liberal candidate in the field.

At the outset, he was wary about the governor. But he can remember standing in the back of the room in Chicago late in 1991 listening to Mr. Clinton deliver the speech to Democratic state party chairmen that made him the early favorite of the insiders.

When Mr. Clinton finished and the audience erupted into applause, Mr. Tully turned to a reporter friend, grinning broadly and said: "Now that was a general election message. That was big-league politics."

If he had any personal agenda, it was a secret well-kept from his friends. Mr. Tully, the son of working-class parents who went to Yale and University of Pennsylvania law school, then chose politics over the law, was not a man you could see taking some cushy spot in a Democratic administration. It was the business of getting a Democrat there that obsessed him.

Mr. Tully was intrigued by the process and how it could be refined. Over the past four years, as political director for the Democratic National Committee, he had focused on building "the coordinated campaign"—one in which presidential and state candidates performed many functions jointly—in as many states as possible to make the DNC a serious player in electing a Democratic president.

He had also become fascinated by computers. Returning to Washington late one night this spring after seeing his favorite Red Sox defeat the Orioles, he headed for the office to "run some numbers"—meaning to test his theories on where the votes might be in this campaign, depending on how it played out.

Mr. Tully was not a one-dimensional political fanatic. He made a point of getting the Tuesday editions of the *New York Times* so he could read the science section.

He listened to classical music while cooking for himself at his apartment on Capitol Hill. He loved to talk about sports and movies. But mostly Paul Tully played big league politics.

[From The Los Angeles Times, Sept. 29, 1992]

#### TULLY'S LEGACY

In his more than 20 years as a political strategist, Paul Tully, the Democratic Party national political director who died last week at age 48, repeatedly saw Democratic presidential candidates go down to defeat. The experience did not dishearten him; rather it fostered an understanding of political realities that he sought to impart to the Clinton campaign. . . . As the national party's chief liaison to Clinton's Little Rock operation, Tully stressed that the Arkansas governor's big lead in the polls should not be taken for granted. "Remember, it was not so long ago that [Clinton had] high negatives and low support levels," he noted in an inter-

view shortly before his death from a probable heart attack. . . . Tully, whom Democratic National Committee Chairman Ronald H. Brown called "the smartest political strategist I have ever known," saw Clinton's main challenge as providing recent converts to his banner with "confirming evidence" to support him. Only such efforts, he believed, could turn "newer and weaker Clinton voters into firm Clinton voters" and assure the Democratic victory Tully had long awaited.

[From the National Journal, Oct. 3, 1992]

#### A DEMOCRAT WHO NEVER SAID NEVER

(By James A. Barnes)

Only a few weeks after he had settled into the political director's office at the Democratic National Committee (DNC) in April 1989, Paul R. Tully was already focused on winning back the White House. Although he didn't underestimate the difficulty of that task, he steadfastly insisted that the goal was attainable.

"The metaphor for all this is getting the rock up the hill," Tully said in an interview at the time. "There were 4.3 million new Democratic voters in 1988 from 1984. That was for real—real voters!" Tully always liked to punctuate his thoughts, leaving little room for doubt about his convictions.

When he died of a heart attack on Sept. 24, Tully, 48, as much as any Democrat, had devoted the past three and a half years to getting that rock up to the top of the hill in 1992. He has left behind a sophisticated analysis of how and where swing voters could be won over by a Democratic candidate, a network of skilled state campaign operatives to harvest those votes in the closing stages of the 1992 campaign and a deep sense of loss within his party and the Washington political community.

A Brooklyn native and son of working-class Irish parents, Tully was a fixture on the Democratic presidential campaign circuit ever since he volunteered for Robert F. Kennedy in 1968. In George McGovern's 1972 campaign, Tully was an advance man, a good fit for a former offensive lineman on Yale University's football team who also had a law degree from the University of Pennsylvania.

"He didn't work in politics indiscriminately," said Carl R. Wagner, a Democratic strategist (and veteran of the McGovern effort) who was one of Tully's closest friends. "Politics was a means to pursue a set of values—it wasn't a business to Paul. His interest was seizing control of government and bringing it to bear on the needs of people who were otherwise unspoken for."

Tully's résumé of presidential candidates reflected his liberal sensitivities: Robert Kennedy, McGovern, Eugene J. McCarthy, Morris K. Udall, Edward M. Kennedy, Walter F. Mondale, Gary Hart and Michael S. Dukakis. At the time of his death, Tully was in Little Rock, Ark., advising Bill Clinton's campaign and helping to integrate its functions with those of the DNC.

By the latter stage of his career, Tully had earned a reputation as a first-rate political operative. "I remember conversations of how pleased people were," recalled Washington lawyer Jonathan Sallet, a former adviser to Hart, of the reaction when Tully joined the Coloradoan's brief 1987 campaign. "People said, 'This is for real—we have Paul Tully.'"

Perhaps Tully's most difficult campaign was the one he waged against a tidal wave of skepticism in Washington among reporters, and more than a few Democrats, to persuade them—in the wake of America's success in the Persian Gulf war—that President Bush

could still be defeated. Undeterred, Tully would dissect Bush's potential vulnerabilities from the entrails of public opinion polls and precinct returns for anyone who cared to listen. At the time, it seemed as though Tully was operating on little more than blind faith and the coffee and cigarettes that were his constant companions.

"In the beginning of 1991, I stopped in to see him," recalled Ted Devine, a Democratic strategist who worked with Tully in the Mondale and Dukakis campaigns and managed Nebraska Sen. Robert Kerrey's presidential campaign this year. "He spent an hour on the charts from 1988, about what had happened, the polls. . . . Listening to him talk, all I can think of to describe it is evangelical."

There was no higher calling, as far as Tully was concerned. Even though his contacts and skills could have afforded him a much more comfortable life as a professional political consultant, he chose to deal with the headaches of a party apparatus that had lost three consecutive presidential races.

"In a profession filled with many mercenaries, Paul Tully was a true missionary," said Democratic pollster Peter D. Hart, who worked with Tully in the Ted Kennedy and Mondale campaigns. "We earn money for what we do; he didn't. He did the hard work, the inside work for which you get less glory and less pay."

One enduring and selfless aspect of Tully's career was his willingness to travel anywhere to run training sessions for would-be Democratic political organizers. No group was too small.

"I would get phone calls—'Well, don't you want to go to Bozeman?'" recalled Gina Glantz, who worked with Tully on the Ted Kennedy and Mondale campaigns and in between elections often accompanied him to his hands-on political seminars.

"He was always someone who reminded us that we had a moral responsibility to train others," added Glantz, who's a partner in Martin & Glantz, a public affairs firm in Mill Valley, Calif. "It was important to him because it is the lifeblood of progressive politics—people who want to be involved because they care about something."

"There is probably not a state in this country that you could go to and not find somebody who was trained by Paul Tully or who called Paul on a regular basis," Wendy R. Sherman, a partner in the Democratic political consulting firm of Doak, Shrum, Harris, Sherman & Donilon, said.

Reporters also depended on Tully's insights and encyclopedic recall of recent election statistics. Political reporter Jack W. Germond, for example, learned of Tully's death from Pennsylvania, where he was working on a story about the presidential campaign. He had telephoned Tully for information about the 1988 returns from Philadelphia's black wards. "I'll bet there were a lot of reporters who were planning to talk to Tully in the next few days to get their facts straight," Germond said.

Despite Tully's gruff exterior, his friends recalled a complex and private man with cultivated tastes in classical music and literature. And though his most striking characteristic may have been a pol's cynical sense of humor, that's not what Stephen Robbins, his boss in the McGovern campaign and a lawyer in the Sacramento (Calif.) firm of Robbins & Livingston, remembers most. "He had a very, very vulnerable commitment to a better society," Robbins said. "In fact, his heart was made of mush."

His heart, maybe, but not his will. That was indomitable.

[From Time, Oct. 5, 1992]

#### MILESTONES

Died. Paul Tully, 48, director of political operations for the Democratic National Committee; in Little Rock, Arkansas. A top party strategist, Tully was working with the Clinton campaign. He previously served on the primary election bids of Gary Hart and Michael Dukakis, D.N.C. chairman Ron Brown called Tully a "political genius."

[From Newsweek, Oct. 5, 1992]

(By Joe Klein)

Died: Paul Tully was a lovely pol. He ate too much, smoked too much, barreled about like a madman in a lather. He left the way his peers fear most—alone, in a hotel room, too young. It was in Little Rock, where Tully—who had done this with vast enthusiasm but no luck since 1968—was giving Bill Clinton his almost phrenological sense of the electorate. "He probably knew the name of every swing voter in the country," said James Carville. In Iowa once, legend has it, Tully denied an activist a lawn sign, "because his neighbors think he's a jerk." He loved the game so he sometimes couldn't find words fast enough, antic scenarios dissolving into unintelligible gasps—but his friends understood, and will miss him fiercely. He was 48.

[From the Washington Post, June 21, 1984]

#### PRINCE OF PLANKS; PAUL TULLY, MONDALE'S PLATFORM BUILDER

(By T.R. Reid)

The drafting of the Democratic Party's 1984 platform is essentially a function of Paul Tully's thumb.

Tully, 40, a rotund, curly-haired, chain-smoking, coffee-swilling political veteran—a Central Casting archetype of the harried campaign operative—is Walter F. Mondale's main man this week as the Democrats put together their platform.

Hour after hour, the 15-member drafting committee wades through amendments and amended amendments from Gary Hart's five delegates and Jesse Jackson's two delegates. With each new proposal, the delegates debate perfunctorily while Tully and his staff, sitting on the sidelines, figure out what's up. Then Tully gives the signal—thumbs up, thumbs down, or sometimes just a discreet nod of the head.

The eight Mondale delegates cast their votes, and the issue is settled.

It's June and it's a leap year, after all, and under those circumstances a Democratic Platform Committee is Tully's natural habitat. He worked the platform for the antiwar campaign in 1968, for Morris Udall in 1976, for Edward M. Kennedy in 1980.

But this year things are different, which accounts for the leprechaun smile gracing Tully's large face. "It's nice like this when you have the votes," he says happily.

Those eight delegates include members of Congress and other important party poobahs; but this week, their votes are all firmly in Tully's hand.

Just once has a Mondalite tried to ignore the signal. When Hart's people proposed language endorsing a particular tax bill, Sen. Daniel Patrick Moynihan (D-N.Y.), a Mondale delegate, noted that he was a cosponsor of that bill. Moynihan voted for Hart's proposal.

Tully, who once was—and is still built like—a defensive tackle, came blitzing up

from the staff table for an earnest chat with the senator. After a moment, Moynihan sheepishly looked down his glasses and asked permission to reverse his vote. Mondale won again.

Over the years Tully has worked on countless campaigns for liberal causes and candidates, including Gene McCarthy, Robert Kennedy, Allard Lowenstein, Udall, George McGovern and Edward Kennedy.

"The way it works is, about the time of the midterm election, I start looking around for the candidate I'm going to work for for the president," Tully explained yesterday, casually flicking the ashes from his Marlboro into the nearest styrofoam cup.

"Literally, the way it works, I will always work for the most progressive candidate who has a chance of winning. . . . Like in '76 I worked for Udall and not Fred Harris because that was a choice between some small shot at winning and no shot at all."

The notion of not working in a liberal's campaign has never occurred to Tully. Liberal politics, trade unions, organizing the downtrodden—they are all in his blood.

Born in 1944 in Long Island's Levittown, Tully was the grandson of a charter member of the Steamfitters Union and the son of a plumber. "My father was an officer in George Meany's own local of the Plumbers Union," he says with pride.

"I come out of that urban, union, ethnic environment. That's what's inside me," he said. "And growing up in Levittown in the McCarthy days with a bunch of conservatives running things, I was raised with a much different attitude toward authority figures than most American kids are taught."

The drafting of a platform may sound like an excursion into deepest ennui, but in fact, like all Washington dramas, the platform committee is rich with intriguing scenes and characters.

There is Rep. Claude Pepper (D-Fla.), a Mondale man, who first served on a platform committee 44 years ago and is still at it today at the age of 83.

During a debate on foreign policy, Pepper politely pointed out that one of Gary Hart's vaunted "new ideas" sounded exactly like a proposal set forth by Secretary of State Cordell Hull in 1936.

The platform committee is also the only place in town where one can hear the "Rainbow Coalition" rhetoric of Jesse Jackson delivered in an easy, lilting Irish brogue—by Paul O'Dwyer, the New York liberal who is one of Jackson's two delegates on the drafting unit.

But Tully—as the Mondale campaign's political director—has been the leading player. He is a perfect specimen of a classic Washington genus: the dedicated political pro.

As an undergraduate at Yale, Tully played tackle on the football team quarterbacked by "B.D.," Brian Dowling, and rendered immortal by classmate Garry Trudeau in his comic strip "Doonesbury."

Even before he had graduated in 1968, Tully was at work in the antiwar movement. Unlike some others of his generation, he directed his considerable energies through the established political process, trying to make first McCarthy and then Robert Kennedy the Democratic presidential nominee.

After that fateful year, Tully took a law degree at Penn and settled down, sort of, in Philadelphia, where he lives with his wife and 3-year-old daughter in the respites between campaigns.

The respites have been growing shorter as presidential campaigns get longer and as

more and more people come around pleading for the kind of polished professional campaign direction that Tully and his ilk can provide.

When the 1984 campaign was starting to take shape two years ago, most Democrats, figured, correctly, that Tully would be a Kennedy man again. When Kennedy withdrew, a half-dozen other Democrats stopped in Philadelphia—where Tully was running political training programs for citizen action coalitions from around the country—to recruit him.

"Basically, my problem with Hart was that I figured out he's not my kind of Democrat," Tully says.

"The process guys, they're worried about whether the system is fair, whether everybody had the right to be involved, all that stuff.

"I'm much more a constituency-oriented economic Democrat. Who benefits from the policies? Who loses? That's always my test. And that's what Mondale is."

By February 1983, Mondale's people had corralled Tully into part-time work. Within a month, he was the full time political director of the campaign, and he's been there ever since, winning broad respect from reporters and his fellow politicians for telling the truth whether Mondale was winning or losing.

But now, for the first time since the McGovern drive in 1972, Tully has (apparently) won a Democratic nomination. And there is on the horizon the prospect of snagging the White House in November.

The Mondale people are already making lists of which campaign aide will get what government job. But Tully is having none of that.

"I work for change. That's my life," he says. "I organize. I don't do governments." ♦

#### MSUSA'S 25TH ANNIVERSARY

• Mr. DURENBERGER, Mr. President, on November 6, 1992, the Minnesota State University Student Association [MSUSA] will celebrate its 25th anniversary of representing Minnesota State university students.

MSUSA is an advocate organization which was formed in 1967 as an informal coalition of student leaders. Today, it represents more than 66,000 students at Minnesota's State universities in Bemidji, Mankato, Minneapolis/St. Paul, Moorhead, St. Cloud, Marshall, and Winona.

MSUSA is an independent, nonprofit corporation funded and operated by students. In order to fulfill its main objectives—affordable, quality, and accessible State university education—students have taken an activist approach to establish affordable tuition, child care facilities, increase the minimum and student work study wages, simplify transfer between institutions, improve cultural diversity, advocate fair State and Federal financial aid programs including the Higher Education Reauthorization Act.

In assisting State university students achieve their goals and voicing their concerns, MSUSA provides liaisons to the Governor's office, the legislature, the State University Board, the Minnesota Higher Education Board, the Minnesota Higher Education Co-

ordinating Board, the Inter-Faculty Organization, Congress, and the Federal Department of Education.

But perhaps one of MSUSA's most outstanding accomplishments, among many, is the Penny fellowship, which encourages students take a leadership role in serving their communities. Other noteworthy programs include the MSUSA newspaper, the Monitor, which has the largest circulation of any State system student organization; the MSUSA cultural diversity project; and the MSUSA Federal Credit Union, which is the only systemwide student credit union in the country.

Finally, Mr. President, I would like to recognize and congratulate the current officers of MSUSA, who are: Steven B. Carswell, State chair from Winona State University; Leroy L. McClelland, State vice chair from Mankato State University; Jill F. Peterson, State treasurer from St. Cloud State University; and Frank X. Viggiano, executive director from Metropolitan State University. Their hard work on behalf of Minnesota students has led them to many successes, and I am sure their continuing effort will mean a better-educated and a more productive Minnesota.●

#### REPORT ON THE IMPLEMENTATION OF THE HUMANITARIAN AND TECHNICAL ASSISTANCE PROGRAM TO THE NEW INDEPENDENT STATES OF THE FORMER SOVIET UNION

● Mr. LEAHY. Mr. President, last April, when the Senate passed House Joint Resolution 456—Public Law 102-266—the continuing resolution for the Foreign Aid Program for fiscal 1992, I requested a report from the administration which summarized the U.S. Government efforts to provide humanitarian and technical assistance to the new Independent States of the former Soviet Union. I have received that report from the Department of State, and I feel that the information contained in the report would be very helpful to all Senators, their staffs, businesses, non-governmental organizations, academic institutions, and other interested parties.

This report can serve as an information resource to help us work with the executive branch to meet the challenges presented by the breakup of the Soviet Union. The report was compiled from written documentation provided to the State Department by the various agencies involved in the assistance program.

The report consists of three parts. Part I outlines progress to date in providing humanitarian assistance during operation provide hope phases I and II. Part II describes the sources of funding for the aid program through fiscal 1992. Part III identifies the specific activities of each Government agency in-

cluded in the assistance program including AID, USDA, Commerce Department, DOD, EPA, Exim Bank, OPIC, Peace Corps, TDP, Transportation Department, and USIA. This section identifies contact points in each agency for programs in the NIS.

It is my hope that Members and others interested in this program will use this report as a tool to review our assistance program as it was implemented through fiscal 1992. Also, it is useful for examining the structure that is in place to implement the program which we funded with \$417 million for fiscal 1993.

Mr. President, I ask that the report be printed in the CONGRESSIONAL RECORD in its entirety.

The material follows:

#### SUMMARY OF EFFORTS IN THE ASSISTANCE PROGRAM FOR THE NEW INDEPENDENT STATES (NIS)

Information available as of September 24 was used in this report.

##### I. HUMANITARIAN ASSISTANCE EFFORTS

###### Overview

The United States government's humanitarian assistance program links the efforts of the Departments of State, Defense, and Agriculture and the Agency for International Development, with various national and international private voluntary organizations, to meet the emergency needs of the people of the New Independent States. The U.S. humanitarian assistance program, run by the State Department's Deputy Coordinator, Commonwealth of Independent States Assistance (D/CISA), accomplishes two goals: it provides needed help to millions of people (our childhood inoculation program in Central Asia alone is reaching 520,000 people); and it confirms for the peoples of the NIS the fact that Americans are not their enemy. Throughout 1992, the humanitarian assistance program has provided both privately collected and excess U.S. government food and medical supplies to all 12 states of the NIS. Efforts are already underway to organize the next big push for provision of assistance during the upcoming winter of 1992-93.

###### Specific humanitarian efforts

In addition to transportation assistance provided to the United States Department of Agriculture (USDA) to support its \$165 million grant food aid program, D/CISA has worked with U.S. private voluntary organizations and utilized excess defense stocks in order to leverage an additional \$165 million in emergency assistance. USDA has delivered, or is in the final stages of delivering, approximately 138,910 tons of humanitarian food assistance via private voluntary organizations and agencies of the Russian and Belarus governments. Independent of the USDA program, D/CISA has delivered some 53,000 metric tons of food valued conservatively at \$40 million. D/CISA has also delivered some 2,400 tons of medicines and medical consumables worth about \$125 million, and has another 500 tons in the pipeline.

Operation Provide Hope began with the winter 1992 airlift of emergency food and medical supplies to cities in 11 of the 12 NIS (the exception was Georgia). Operation Provide Hope II involved the surface delivery of excess DoD medical and food stocks from Western Europe to all 12 NIS. This operation is virtually complete. Provide Hope II began

in June with the airlift of 100 metric tons of high-value medicines and medical supplies to four very needy locations: Yerevan, Baku, Tbilisi, and Minsk. Having delivered these items by air, Provide Hope II then shifted to surface deliveries. Over 19,000 tons of bulk rations (valued at about \$34 million) were moved from military depots in Western Europe to 21 locations in the NIS, as well as 1,600 tons of medicines and medical consumables valued at \$30.6 million. These supplies have gone into institutions (i.e., orphanages, hospitals, etc.) and storage facilities for subsequent distribution. Officers and enlisted personnel from the On-Site Inspection Agency, assisted by CARE representatives, handled distribution and monitoring.

Specific USDA contributions to food assistance for the NIS include:

Agreements for Food for Progress donations of \$20 million to Georgia, \$15 million to Armenia, and \$10 million to Kyrgyzstan. After freight costs have been deducted, these expenditures will provide 90,000 tons of wheat for Armenia and 56,000 tons of wheat for Kyrgyzstan.

Under Public Law 480 Title I, USDA has also negotiated concessional sales of feed grains and oilseed meal worth \$24 million to Belarus and feed grains worth \$10 million to Moldova. Belarus will receive 90,000 tons of feed grains and 50,000 tons of oilseed meal; Moldova will receive 70,000 tons of feed grains.

In fiscal 1992, under Section 416(b) USDA donated 21,000 tons of butter to the Government of Russia, and 5,000 tons of butter oil to the Government of Belarus.

Commercial agricultural commodity registrations to the NIS facilitated by the Export Credit Guarantee Program (GSM-102) in fiscal 1992 had, as of mid-September, totaled \$2.46 billion, including \$1.82 billion under the allocation to the USSR made prior to its collapse in December 1991. An additional \$100 million out of fiscal 1992 authority was extended to Russia on September 14. In addition, a direct sale of 35,000 tons of CCC-owned butter was negotiated with Russia.

Because of civil unrest in Georgia during Operation Provide Hope I, U.S. military transport planes were unable to land in Georgia's capital, Tbilisi. Because of improvements in the situation there, the U.S. has been able to provide the following types of humanitarian assistance to Georgia:

500 tons of DoD bulk rations during Provide Hope II;

20 tons (valued at over \$5.8 million) of medicines, medical supplies, and insulin by air;

133 tons of medical consumables were sent by rail during Provide Hope II;

Medical equipment for two Georgian hospitals, drawn from a deactivated U.S. Army hospital in Europe.

The U.S. also is sending Georgia 100,000 tons of wheat through a transfer of funds from the PL-480 program to the Food for Progress program. DoD transportation funds are being used to ship the grain.

Planning has begun for Operation Provide HOPE III, and participants are in the process of identifying additional DoD bulk rations which are being declared excess. The plan is to move the material this fall before the onset of winter, and a team is in Moscow working jointly with the Russian government, the European Community, the Japanese Government, and CARE to create a rational targeting plan.

In September 1992, USDA announced its specific programs for FY 1993 humanitarian assistance programs for Russia. These in-

clude \$800 million in the Export Credit Guarantee Program—of which \$500 million will be operational October 1 with the remainder available on January 1, 1993. Russia will also receive \$250 million in humanitarian food assistance.

## II. SOURCES OF TECHNICAL ASSISTANCE FUNDING

In addition to its multilateral assistance efforts with the World Bank and the International Monetary Fund, the U.S. government is financing bilateral technical assistance through a variety of funding mechanisms. These include:

**\$85 million in Economic Support Funds.**—Currently several U.S. government agencies are in the process of implementing this first funding allocation for NIS assistance with Economic Support Funds (ESF) reprogrammed from other countries. AID serves as the principal implementing agency for this funding—with policy and program guidance from the Coordinator's office. These funds are being used primarily to develop and administer programs to provide business assistance; training for managers; energy, housing, financial, and conversion advisors; and improvements in the healthcare and food industries. AID has transferred funding to agencies such as Commerce, Agriculture, Treasury, and USIA to finance their NIS assistance programs.

**\$150 million in Reprogrammed Economic Support Funds.**—In its FY 1992 Foreign Operation Appropriations, the Congress provided certain authorities for technical assistance for the NIS but did not appropriate new money. D/CISA has worked with the Coordinator for NIS Assistance, Acting Secretary Lawrence Eagleburger and the Deputy Coordinators to identify sources for funding and to identify programs to be implemented with \$150 million FY92 reprogrammed economic support funds.

**Nunn-Lugar Funding.**—Legislation passed during 1992 authorized the use of \$400 million of DoD monies to facilitate weapons destruction in the NIS and to prevent weapons proliferation. The first approved program plan for this funding obligates \$170 million to provide fissile material storage containers, nuclear weapons accident response equipment, assistance in improving material control and accountability systems for fissile materials and to assist with destruction of chemical weapons and to finance the international science centers in Russia and Ukraine. In addition, \$100 million has been authorized to finance transportation costs of humanitarian assistance to the NIS, and approximately 50 percent of this funding has already been used to finance food and medical assistance.

**Other Agency Funding.**—Various government agencies are providing assistance to the NIS from their own departmental budgets. For example, the Departments of Agriculture, Labor, Commerce, and Energy, and the Environmental Protection Agency have implemented projects using funds from their own budgets.

**Credit and Credit Guarantee Programs.**—U.S. government credit and credit guarantee programs aim to promote involvement of private U.S. companies in trade and investment with the emerging market economies of the NIS. The Export-Import Bank offers short and medium-term trade credit insurance and working capital guarantees. The Overseas Private Investment Corporation (OPIC) has three programs to encourage US private investment in the NIS—these include financing investment projects through loans and/or loan guarantees; investment insurance; the investor services. In addition, U.S. credit guarantee programs can be used to help

maintain commercial sales previously financed by cash transactions, as has been done with the USDA's Commodity Credit Guarantee Program (GSM-102).

## III. SPECIFIC USG AGENCY ACTIVITIES

### *The Agency for International Development (AID)*

AID serves as the primary implementing agency for the initial \$85 million in assistance to the NIS. Working with policy and program guidance from the State Department and in coordination with other government agencies, AID is using these funds to develop and implement programs to promote democratic institution building, market economic reform, provide business assistance; training for managers and scientists; energy, housing, defense conversion, and financial advisors; and improvements in the healthcare and food industries. In some of the cases listed below, AID's role has been to transfer funds to other agencies for project implementation. The following programs are being implemented with the first \$85 million in FY92 Economic Support Funds:

**Democratic Initiatives (\$14.9m).**—includes training for scientists, managers, and government officials; business assistance from retired U.S. executives; support for networking between private U.S. companies and volunteer organizations with NIS groups.

**Participants:** Participating organizations include the Department of Commerce, the United States Information Agency (USIA), the International Executive Service Corps (a private AID contractor), the Citizens Democracy Corps, and selected private volunteer organizations and non-governmental organizations.

**Status:** Primary components of this program are the Special American Business Internship Training Program (SABIT), the USIA Public Administration Program, the Citizens Democracy Corps, and the Private Volunteer Organization (PVO) Development Program. The SABIT program—which aims to link NIS business managers and scientists with private U.S. firms—has completed two selection rounds for managers and one for scientists. The first 300 interns, financed with AID-transferred funds, are due in the U.S. in September. USIA is sponsoring a number of programs to assist both high level and local NIS governmental officials in establishing executive organizations and understanding executive operations. USIA is also subsidizing publication of books and pamphlets on democratic governments, market economies, and public policy analysis on the reform process. IESC and the Citizens Democracy Corps have established offices in the NIS and are advising on economic reforms, democratic institution building, and defense conversion. The Experiment in International Living (EIL) has been designated the lead institution for coordinating all U.S.-based PVO activities in the NIS. To date, we have received grant proposals from 62 US PVOs. Funding for this program also supported an Emergency Immunization Program begun in selected states of the NIS in summer 1992.

**Energy Efficiency and Market Reform (\$15.6m).**—includes programs for energy efficiency; nuclear power safety; coal, oil, and gas production and delivery systems; energy pricing policy; and energy related environmental problems.

**Status:** Regional surveys/assessments have been completed for energy heating systems in Russia, Ukraine, Armenia, Kazakhstan, Belarus, and Kyrgyzstan. Pilot projects with U.S. technical advisors are underway in

these six states; these advisors have identified and are installing low-cost equipment and instrumentation to improve energy efficiency this winter. Senior energy officials from Kazakhstan and Kyrgyzstan came to the U.S. during June and July to visit energy facilities and meet with private US energy companies. Partners in Economic Reform (PIER) has received a grant for coal mining management/safety and sent a team to Ukraine and Russia this summer. DOE and the Nuclear Regulatory Commission will receive money from AID to support the nuclear reactor safety initiative that was announced at the May 1992 Lisbon Conference.

**Health Care Improvements (\$15m).**—includes programs to promote trade and investment in the health sector and alternative health care financing systems, establish partnerships between U.S. hospitals and NIS groups to improve hospital administration, and improvements in pharmaceutical production.

**Status:** The first hospital partnership is underway between Norfolk, VA and the Moscow Children's Hospital with a grant of \$1.5 million. The American International Health Alliance has been selected to manage the remainder of the program, and ten other partnerships have been or are being initiated this fall. After completing an initial audit, U.S. pharmaceutical manufacturers will be working with plants in Russia to improve pharmaceutical production. The Department of Commerce, the Trade and Development Program (TDP) and the Overseas Private Investment Corporation (OPIC) have received AID funds to support increased trade and investment in the NIS pharmaceutical and medical industries. Commerce is sponsoring the first medical equipment, supplies, and pharmaceutical trade mission to the NIS during October 11-19, 1992, and TDP and OPIC have completed their initial visits.

**Private Sector/Defense Conversion (\$12.5m)**—provides support for privatization efforts, creation of an NIS Business Information Center in the U.S. Department of Commerce, placement of defense conversion advisors, and funding for OPIC investment missions and TDP feasibility studies.

**Status:** This project supports general privatization efforts such as providing funds to equip the Russian Ministry of Privatization with computers and other office equipment, and to expand the International Finance Corporation's demonstration auctions of state-controlled shops in three cities in Russia and Ukraine. Advisors are also helping to facilitate development of privatization laws, to support business investment and to develop investment support facilities in selected cities. Two teams of defense conversion advisors are currently assisting defense firms in Nizhny Novgorod, Russia and Kharkov, Ukraine. To develop private sector programs, AID has transferred funds to the Department of Commerce to support the Business Information Service for the NIS (BISNIS) and a program to assist consortia of U.S. businesses to establish offices in the NIS and to encourage US exports. TDP is using AID funding to support feasibility studies in infrastructure industrial sectors such as energy and transportation. OPIC is organizing trade and investment missions and providing funding for feasibility studies.

**Food System Restructuring (\$6m)**—finances USDA programs for improving food storage and distribution and developing food policies.

**Status:** We are designing a completed project that will break down the initial \$6 million as follows: \$1.25 million transferred to USDA to fund the Armenian Extension

Service Activity; \$3 million to fund unsolicited proposals in the area of storage; \$1 million for an additional unsolicited proposal; and approximately \$650,000 for two storage teams that visited Russia and Ukraine in July and August.

**Democratic Pluralism (\$8m)**—This project focuses on four areas—political and social processes, development of an independent media, rule of law activities, and public administration assistance. The key participants in the project are the International Republican Institute, the National Democratic Institute, the American Bar Association (ABA), the AFL-CIO, and the International Foundation for Electoral Systems. The ABA is responding to requests from Armenian, Belarus, and Uzbekistan for technical assistance on constitutional reform and drafting new legislation. The National Democratic Institute has provided advisors for political party development and civil education in Russia and is sending field staff to Ukraine and Central Asia this fall. An election monitoring team organized by the International Republican Institute provided assistance to the Azerbaijan elections in May. In addition, grants are pending for media development, labor union development, and election reform.

**Housing Sector Reform (\$5m)**—funds long- and short-term advisors for housing and land ownership policies.

Status: Survey teams have completed assessments of housing and urban development conditions in Russia, Ukraine, Armenia, and Kazakhstan as well as in the seven cities targeted in this program. Short-term consultant assignments addressing housing law, private management of public housing, land registration and taxation, housing privatization, and general housing and land development have been completed. Temporary housing advisors are working in three republics, and seven of twelve long term resident advisors for housing issues were in place by the end of August.

**Economic Restructuring/Financial Sector (\$4m)**—provides funding for the Department of the Treasury for financial sector resident advisors in central banks and Ministries of Finance in four former Soviet republics. The next tranche of funds under this project will be used for assistance in bank training, financial sector reform, and additional advisory and restructuring projects.

Status: Short-term Treasury advisors have provided assistance to the Russian Ministry of Finance and the National Bank of Ukraine and the Ukrainian Ministry of Finance. Treasury is recruiting long term advisors for Russia, Ukraine, Kazakhstan, and Belarus. Additional assistance will be designed in areas mentioned above.

**Eurasia Foundation (\$4m)**—provides assistance for private sector development. The Foundation is intended to be an independent, grant-giving foundation which will use public and private resources to foster the process of economic and political reform in the NIS.

Status: The project to establish the foundation—which is dedicated to providing technical assistance to private organizations in the areas of management training, private sector development, and democratization—is on hold by the Congress pending naming of the Board of Directors for the Foundation.

Other AID programs that do not involve ESF money include:

**The Farmer-to-Farmer Program:** This three year, \$30 million program is administered with money from PL 460. It engages US farmers and agricultural experts as volun-

teers who can transfer their technologies, knowledge, and skills to farmers and agribusinesses in the NIS. It focuses on meat, dairy, vegetable oil, wheat, feed grains, and fruit and vegetable sectors with emphasis on distribution, processing, marketing and the general promotion of agribusiness development. Under the first phase, AID committed \$4 million to Volunteers in Overseas Cooperative Assistance (VOCA) for a two year program focusing on Russia, Ukraine, Kazakhstan, and Armenia. VOCA intends to place 238 advisors in these republics by end of 1993. The remaining \$26 million, the second phase, was dedicated to grants to be awarded on a competitive basis. The selected grantees are Agricultural Cooperative Development International, VOCA, Land O' Lakes, Tri-Valley Growers, Citizens Network, and Winrock International. This second phase will place approximately 1500 volunteers in agribusiness, credit, and processing areas at sites in all 12 states of the NIS.

**Disaster Assistance:** \$19.7 million in funding is being used to provide medical supplies, an emergency immunization program, and to finance Project HOPE's child immunization and pharmaceutical project. This program is referred to in the President's Medical Initiative. Vaccines and supplies from U.S. manufacturers will be obtained to immunize 225,000 children in the NIS. The project targets Russia and Ukraine, but Armenia is also expected to participate. (AID also is working to assure that 520,000 children in Kyrgyzstan, Tajikistan, Turkmenistan, and Uzbekistan receive immunization against measles, polio, DPT, and tuberculosis by the end of calendar year 1992.)

**CAST:** AID has also committed \$2 million in development assistance funds to the Co-operation in Applied Science and Technology (CAST) program. This project—administered by the National Research Council of the National Academy of Sciences—aims to link defense-related scientists with U.S. firms to conduct joint research in the US, and the emphasis is on helping NIS scientists apply their skills to activities benefiting the civil sector.

**POC—Malcolm Butler,** chief AID/NIS Task Force, (202) 647-0269.

#### *The Department of Agriculture (USDA)*

USDA is involved in several technical assistance programs—all with a private sector focus—designed to address the range of problems affecting food supply in the NIS. For the distribution and marketing of food aid deliveries to the NIS, it has relied primarily on private voluntary organizations. USDA is providing the following programs:

USDA's Agricultural Marketing Service is working to promote the development and expansion of modern wholesale markets in the NIS, particularly in Moscow and Kiev.

USDA is planning to set a "model farm" community near St. Petersburg pursuant to a personal request to Secretary Madigan from Mayor Sobchak and then-President Gorbachev. This will link American farming families with Russian farmers to teach farm management and farmgate marketing techniques.

USDA has placed a senior expansion advisor and a public policy specialist in Yerevan, Armenia for three years to assist in creating a legal framework for Armenia's agricultural policy reforms. AID is providing funding for this program.

Executives from American agribusiness firms will work with counterpart organizations in the former Soviet Union under the Loaned Executive Program. Site selection teams have visited Novosibirsk, Russia;

Minsk, Belarus; and Alma Ata, Kazakhstan to identify potential NIS agribusiness firms, and selection of US executive participants is underway.

So far in 1992, USDA has selected candidates for the Cochran Fellowship Program in the states of Russia, Ukraine, Kazakhstan, and Belarus. The Fellowship provides short-term training in areas such as agricultural development, trade, agribusiness, management, and marketing. Agriculturalists and administrators from the public and private sectors will visit the U.S. to participate in field observations and industry visits and to receive on-the-job training and attend university courses. This program is open to all twelve of the NIS and will be implemented in Kyrgyzstan and Armenia in 1992 with the others to follow in calendar 1993 at the latest.

On August 3, USDA published a formal announcement soliciting proposals for the Russian Far East Assessment project, which will evaluate the agribusiness potential in that region. Contracts will be awarded by September 30, and assessment teams should go out in November.

USDA is providing short-term credit for purchases of agricultural commodities through its Commodity Credit Guarantee Program. In the future, USDA plans to provide credit guarantees for agricultural facilities. In fiscal years 1991 and 1992, \$4.85 billion has been announced to purchase agricultural commodities, and an additional \$800 million has already been announced for fiscal 1993.

USDA is implementing a pilot Credit Guarantees for Facilities Program (GSM-104) as authorized under Section 1542 of the Farm Bill.

USDA, pursuant to requests from the Ministries of Agriculture in Russia and Kazakhstan, is recruiting agricultural policy specialists to be detailed to Moscow and Alma Ata as advisors to the respective Ministers of Agriculture.

USDA has been unable to meet requests for assistance in establishing agricultural extension services from Kazakhstan, Uzbekistan, and Russia because of unavailability of funding. The requests from Kazakhstan and Uzbekistan date back to September 1991, and the U.S. Government announced its intention to meet those requests at the January 1992 Washington Conference on Aid to the NIS.

USDA has expanded its Moscow embassy staff from three to four agricultural officers and has received approval to place agricultural officers in Alma Ata and Kiev. Constraints in the Foreign Agricultural Service's budget for field operations has delayed placement of the two officers in Alma Ata and Kiev indefinitely.

**POC—Thomas Pomeroy,** Coordinator of Eastern Europe and Former Soviet Secretariat, (202) 720-0368.

#### *The Department of Commerce*

Commerce is engaged in a number of programs designed to foster development of private sector trade and investment in the NIS and to educate NIS business managers on how to operate in a market-oriented economy.

Commerce established the Business Development Committee with Russia to promote U.S. exports and investment in the NIS and to facilitate contacts between U.S. and Russian business organizations. The Committee has several working groups and, after the U.S.-Russia Summit in June 1992, established a defense conversion sub-group to assist in conversion efforts.

Commerce organized the U.S.-Russian Business Summit during June 1992, which co-

incided with Russian President Boris Yeltsin's state visit to Washington.

The Consortia of American Business in the NIS (CABNIS) has been established to provide financial assistance to American companies interested in opening offices in the NIS. Commerce is also working to develop small business centers in the NIS.

On June 16, 1992 Commerce opened the Business Information Service for the NIS (BISNIS). BISNIS serves as an information center for U.S. and NIS firms looking for new business relationships.

At the request of the Secretary of State, Commerce published the Study of Barriers to Trade and Investment in the NIS. Based on discussions with the U.S. business community, the study is used to devise policies to facilitate U.S. private investment in the NIS.

Commerce is trying to organize business and investment missions to the NIS by emphasizing missions targeting specific industrial sectors.

Commerce's International Trade Administration is administering the Special American Business Internship Training Program (SABIT). SABIT is directed at NIS business managers and scientific workers: to date, over 300 internships have been awarded, and less than 10 percent of the program's original \$2 million in funding for FY92 remains. The first interns, who will work with their host firms in the U.S. for three to six months, began arriving in late August with the bulk arriving during September and October.

Commerce is expanding its foreign commercial service staffs and offices in the NIS. A full service post is available in Moscow with two other posts in Kiev and St. Petersburg.

POC—Franklin Vargo, Deputy Assistant Secretary for Europe, (202) 377-5638.

#### *The Department of Defense (DoD)*

DoD has participated in programs aimed at reducing the large military-industrial complex in the NIS and at providing humanitarian assistance. Legislation passed during 1992 authorized the use of \$400 million in DoD funding to facilitate weapons destruction in the NIS and to prevent weapons proliferation. To date, \$170 million has been obligated to provide storage containers for nuclear weapons materials, nuclear weapons accident response equipment, assistance in improving material control and accountability systems for fissile materials and to assist with the destruction of chemical weapons and to finance the international science centers in Moscow and Ukraine. In addition \$100 million has been authorized to provide transportation for humanitarian assistance to the NIS. To date, approximately half of that funding has been used to finance transportation for Operations Provide HOPE I and II, which provided excess DoD food and medicine, USDA grant commodities, and privately donated humanitarian assistance.

DoD is also engaged in the following initiatives:

*International Military Education and Training:* During FY 92, funding levels for Russia and Ukraine are \$160,000 and \$75,000 respectively.

*Submarine Dismantlement/Port Modernization:* DoD officers have met with CIS naval officials and US and Russian businessmen who want US support in dismantling formerly Soviet nuclear submarines. OSD and the US Navy are trying to determine if the US could help in this effort.

*Civil-Military Relations:* In its exchanges with NIS military officials, DoD has emphasized the importance of civilian control over

the military. The Defense Policy Board Task Force is developing a book on the military in a democracy.

*Bilateral and Multilateral (through NATO) military-to-military contacts:* Through bilateral and multilateral defense and direct military-to-military meetings, U.S. officers are discussing the role of the military in democratic societies, military justice, military budgeting, disaster assistance, and military medicine.

POC—Eric Edelman, Assistant Deputy Under Secretary of Defense for Russian, Eurasian and East European Affairs, (703) 697-7202.

#### *The Department of Energy (DoE)*

DoE is engaged in projects with the NIS on nuclear weapons destruction, environmental restoration and waste management, nuclear reactor safety, fusion research, and energy efficiency. DoE also participates in the international review of the Soviet RBMK nuclear reactor. It is involved in the creation of the international science and technology centers in Russia and Ukraine. Victor Alessi, Director of DoE's Office of Arms Control and Nonproliferation, will serve on the Board of Directors of the Moscow Center. DoE's Lawrence Livermore Laboratories currently is working on a project examining the potential for commercialization of dual use technologies: Livermore teams have visited 16 research organizations doing optical and laser research and DoE has provided grants to 10 of these organizations to do technical evaluation projects.

DoE's intra-agency coordinating group is considering several future projects such as studies on energy use in the NIS, establishment of a center in Moscow to find superior technologies of interest to the U.S., development of investment and trade regimes with the West, cooperative fusion research, and training programs in conventional fuels for scientists.

POC—John J. Easton, Assistant Secretary, Office of Domestic and International Energy Policy, (202) 586-5800.

#### *The Environmental Protection Agency (EPA)*

EPA has no separate technical assistance program but is carrying out the following programs in the NIS, which are covered under 30 EPA cooperative programs developed under the auspices of existing environmental agreements with the states of the former USSR:

*Environmental Education and Information Center:* EPA and the Ukrainian Ministry of Environmental Protection (MEP) are establishing an environmental education and information center in Kiev in the Ivan Mohyla Academy, a new private university. The Center will be open to the public free of charge, and the MEP will provide office premises, staff, and other resources. EPA will assist the Center with advice on provision of expertise and training, toxic release inventory and community right-to-know programs, technology information clearinghouses, computer-based teaching programs and other educational software, and publications and library materials.

*Methane Recovery:* Recovery of methane gas from leaking gas pipelines and coal mines with potential for U.S. private investment.

*The Moscow Energy Efficiency Center:* This office will provide policy analysis and recommendations and identify investment opportunities in the energy sector;

*Integrated Resources Planning (IRP) for electric utilities:* This project would bring Russian officials to the U.S. to discuss development

of an IRP for Moscow and create IRP teaching capabilities in a Moscow university.

*Air emissions control technology:* EPA is conducting demonstrations in Russia and Ukraine of low-cost retrofit technology for power plants that would reduce nitrogen oxide and sulfur dioxide emissions by 50-90 percent.

POC—Sandy Vogelgesang, Principal Deputy Asst Administrator for the Office of International Activities, (202) 260-4870.

#### *Export-Import Bank of the United States (Eximbank)*

Eximbank currently is able to provide varying forms of financing for U.S. exports to Russia, Ukraine, Kazakhstan, Uzbekistan, and Belarus. In Russia, Eximbank now offers short- and medium-term insurance, loans, and guarantee support when the Russian Bank of Foreign Trade commits the full faith and credit of the Russian government. Eximbank offers short-term insurance for projects with Belarus, Kazakhstan, Uzbekistan, and Ukraine, when backed up by the full faith and credit of the respective national governments. Particular areas of interest for project financial support include the automotive, energy, and housing industries. For FY 1992, Eximbank support for U.S. export projects totals over \$197 million.

POC: Thomas Moran, Vice President for Europe and Canada Division, (202) 566-8813.

#### *The Department of the Interior*

Several of the Department's subordinate agencies currently are engaged in NIS assistance/research projects totaling over \$1 million. The Department has financed these projects from its own funding, but hopes to obtain AID or other outside funding to expand its projects for FY 1993. The Department of Interior's current programs with the NIS include:

*U.S. Geological Survey:* USGS is engaged in several joint research projects with various states NIS, some of which date back to projects initiated with the government of the Former Soviet Union. These projects include mineral resource studies, energy resource studies, scientific cooperation in geodesy and cartography, water resources research, and earthquake studies were carried.

*U.S. Fish and Wildlife Service:* USFWS is conducting joint research in the NIS on animal and bird populations and is providing training to NIS specialists and veterinarians in environmental education and wildlife disease diagnosis and treatment.

*Bureau of Land Management:* BLM is conducting a Paired Ecosystem Project with five Russian laboratories to measure global climate change at five paired monitoring sites in different climate zones in Eurasia and North America.

*Minerals Management Service:* MMS is engaged in two studies with the Far East Division of the Russian Academy of Sciences. The first is an exchange of Arctic scientific information and is being led in the US by MMS offices in the State of Alaska. MMS and the State of Hawaii are jointly funding the second project, which involves undersea investigations offshore of Johnson Island and the Northern Mariana Islands.

*National Park Service:* NPS is working with Russian officials in technical exchanges which deal with shared cultural themes in US and Russian history and in developing the Beringia International Heritage Park.

*Bureau of Mines:* USBM has expanded its Minerals Availability System database to include those of the Former Soviet Union. The Department hopes to use this information to stimulate interest in mineral trade with the NIS.

POC—Suzanne Rooney, Special Assistant to the Secretary, (202) 208-3181.

#### The Department of Labor

Labor is funding a project with Comprehensive Personnel Services of Sacramento, California to conduct human resource surveys at two or three defense-industrial facilities in St. Petersburg. These surveys will subsequently be used to promote business opportunities to potential US investors who may be interested in the St. Petersburg region.

In late 1992 or early 1993, the Bureau of Labor Statistics and Eurostat will co-sponsor a seminar for statistical agencies from the NIS on the development and use of statistics to measure economic performance. Resources for this project will be provided to BLS under the Foreign Assistance Act for Statistics Training in Czechoslovakia and the former Soviet Union.

Labor is also developing plans for a possible exchange of information between its Veterans Employment and Training Service (VETS) and Russian counterpart agencies on transition of military officers to civilian occupations.

POC—Shellyn Gae McCaffrey, Deputy Undersecretary for International Labor Affairs, (202) 523-6043.

#### The Overseas Private Investment Corporation (OPIC)

OPIC has signed bilateral agreements—required to facilitate insurance and financing—with ten of the NIS, and the remaining republics, Azerbaijan and Uzbekistan, are expected to sign agreements shortly. Specific OPIC programs include:

**Loans and Loan Guarantees:** During FY93, OPIC expects to provide loan financing to 3-5 projects sponsored by US firms.

**Investor Financing:** OPIC currently is evaluating proposals for 55 projects valued at over \$2 billion.

**Investment Insurance:** For FY92, OPIC is considering political risk coverage for 9 private investment projects with potential total investment substantially higher.

**Insurance Registrations:** More than 325 private investment projects have registered for OPIC insurance.

**Feasibility Studies:** OPIC is involved in feasibility studies, project profiles, and investment missions in health and private sector development programs.

**Mission to Russia:** In June 1992, OPIC sponsored a visit to Russia by 53 US business leaders to discuss potential joint venture partners.

POC—Howard L. Hills, General Counsel, (202) 457-7200.

#### The Peace Corps

The Peace Corps is meeting the needs of the NIS for technical assistance and plans to place 250 Volunteers in the NIS by the end of 1992. Peace Corps has established two posts in Russia (in Saratov and Vladivostok), and posts in Ukraine, Uzbekistan, and Armenia have staff on site and programming underway in anticipation of the arrival of Volunteers in mid-November and December. Assessment visits are planned for Kyrgyzstan and Kazakhstan in October, Byelarus in November, and Turkmenistan and Tajikistan in December. Volunteers will work primarily in Small Enterprise Development (SED) to assist in the transition to a market economy. There also may be English language programs. Specific Peace Corps activities in the NIS include:

**Russia:** 100 SED volunteers will be placed in Russia, about evenly divided between the Volga River region (Saratov) and the Far

East (Vladivostok). The Volunteers will create small business centers (SBCs) which will support Volunteer advisors assigned to communities within each region. Each SBC will be located in an oblast capital or economic center and will have up to four volunteers. Volunteers are scheduled to arrive November 20. A central support office to coordinate field programs will be located in Moscow.

**Ukraine:** 60 SED volunteers will be placed in Ukraine. Thirty volunteers will be divided into three man teams which will be assigned to municipal governments in ten oblast capitals, while 28 volunteers will be assigned individually to other towns. Two volunteers will be assigned to Ukraine's State Committee for the Promotion of Small Business Entrepreneurship. The Volunteers are scheduled to arrive in early December.

**Armenia:** Armenia's program will have both SED (15) and Teachers of English as a Foreign Language (TEFL) (25) Volunteers. Volunteers are expected to begin arriving in early December.

**Uzbekistan:** Staff in Uzbekistan currently is developing both SED and TEFL projects. Programming specifics should be completed by October 15. Fifty Volunteers are scheduled to arrive in late December.

The Peace Corps will place an initial 175 Volunteers in five more former Soviet republics during 1993: Kyrgyzstan, Kazakhstan, Belarus, Turkmenistan, and Tajikistan. A second cycle of 250 Volunteers will be placed in the first five posts in the latter part of 1993.

POC—Jerry W. Leach, Eurasia Regional Director, (202) 606-3862.

#### Trade and Development Program (TDP)

TDP has committed approximately \$6 million to finance projects in the NIS during FY92. To date, approximately \$3 million have been obligated to finance studies in energy, aviation (air traffic control and cargo management), and housing. TDP is also providing partial funding for the establishment of agribusiness centers in Russia and Ukraine to provide training on US agricultural equipment and technologies.

Proposals for future NIS programs, valued at over \$10 million, that are currently under review include studies on pharmaceutical plant modernization, defense conversion, information processing systems, energy and customs operations modernization.

POC—Daniel Stein, Regional Director for the NIS, (703) 875-4357.

#### The Department of Transportation (DoT)

DoT is developing strategies to address specific needs in transportation management, creating a regulatory framework and training to build infrastructure within the transportation sector. It is also maintaining close contact with US transport industry representatives, AID, the World Bank, and the European Bank for Reconstruction and Development (EBRD). DoT's various components are working on the following areas:

**Civil Aviation:** FAA is cooperating with Russia to implement the Global Navigation System, which will use the US Global Positioning System and the Russian military system. Implementation of this program will provide safety and efficiency benefits for all users. The FAA is working to expand air routes to the Russian Far East and open better routes throughout Russia. The FAA is also helping to integrate air traffic control procedures for civil and military aviation and to modernize the air traffic management system. FAA is negotiating a bilateral airworthiness agreement for aircraft certification to allow for import/export of aircraft

and aviation products. FAA is also developing a security training program for international participation and has discussed potential involvement with NIS representatives.

**Highways and Roads:** The Federal Highway Administration (FHWA) is cooperating with the IBRD and the EBRD on transportation policies for the NIS. FHWA is also participating in a World Bank road rehabilitation and maintenance project in Russia. This project will tap into resources and assistance from federal and state transportation agencies and departments, trade associations, and academic and professional institutions.

**Maritime Projects:** The Coast Guard is continuing various cooperative arrangements with NIS organizations regarding search and rescue (SAR), pollution control, and radio-navigation efforts in the Bering Sea. The Coast Guard is helping providing assistance to Russia to help it become an active participant in the automated mutual assistance vessel rescue system. In addition, the Coast Guard has offered slots at the Coast Guard Academy to NIS candidates.

**Railroads:** The Administrator of the Federal Railroad Administration (FRA) and his Russian counterpart have agreed on eight areas for S&T cooperation. FRA has also submitted proposals for training programs for senior railway managers emphasizing privatization, free market concepts, and railroad management.

**Institution Building:** DoT proposes to establish a Transportation Planning Unit (TPU) within the Russian Ministry of Transportation to improve transportation policy-making. DoT's Federal Transit Administration will provide technical assistance to NIS cities to measure the environmental impacts of various transportation projects. DoT aims to identify NIS transportation sector officials who plan to visit the US and offer them the opportunity to observe the US transportation sector at the federal, state, and private sector levels.

POC—Jeffrey N. Shane, Assistant Secretary for Policy and International Affairs, (202) 366-4450

#### The Department of the Treasury

Treasury has led U.S. participation in the G-7 effort to fashion a \$24 billion bilateral and multilateral assistance program for the NIS states and has been the lead agency in developing approaches to restructure the external debt of the former Soviet Union. Treasury has urged early and effective action in the International Monetary Fund, the World Bank, and the European Bank for Reconstruction and Development to assure an effective assistance effort from the international financial institutions.

Treasury has financed discussions with NIS officials to identify specific assistance requirements and sent a short-term advisor to Moscow to discuss tax policies. It is also planning to send longer term financial advisors to Russia, Ukraine, Kazakhstan, and Belarus. These advisors would be located in the respective capitals and would advise government officials on budgeting, tax, and banking policies.

POC—John R. Hauge, Deputy Assistant Secretary for Eastern Europe and the Former Soviet Union Policy, (202) 622-0153

#### The United States Information Agency (USIA)

USIA is emphasizing democracy building and economic reform, financing its programs from its own budget and through monies transferred from AID. Its FY92 budget for activities to the NIS was \$39 million, and USIA plans to increase that figure during FY93.

USIA currently has 27 employees serving at three posts (Moscow, St. Petersburg, and Kiev) and hopes to open posts in Yerevan, Armenia; Minsk, Belarus; Alma Ata, Kazakhstan; and Tashkent, Uzbekistan by the end of the fiscal year. Its major activities include visitor exchanges; American professionals in residence; Voice of America broadcasts in Russian, Ukrainian, Azerbaijani, Armenian, Georgian, and Uzbek; media programs; book translations in history, economics, literature, and law; and student/faculty exchanges between American and NIS universities. USIA is also commissioning several pamphlets to discuss the nature of democracies and market economies. To date, USIA's Sister Cities Program has linked 51 Russian cities and 93 cities throughout the NIS with American cities.

POC—Peter J. Antico, Coordinator for USIA Assistance for EE and NIS, (202) 619-6096

#### Organizations Engaged in Discussions With NIS Officials

Several agencies have engaged in informal discussions with visiting NIS delegations or have participated in formal conferences that have led to information exchanges or proposals for potential assistance programs. These include:

Small Business Administration.—has briefed on its activities to visit officials who make such requests and provides referrals to other government organizations such as Commerce and OPIC.

POC—Mary Brennan Lukens, (202) 205-6657  
Securities and Exchange Commission (SEC).—has participated in discussions with the European Bank for Reconstruction and Development on technical assistance issues. Officials from the Russian government and representatives from St. Petersburg's stock exchange have attended SEC's International Institute for Securities Market Development.

POC—James R. Doty, (202) 272-3171  
Federal Reserve.—Several Federal Reserve officials, including Chairman Alan Greenspan, have visited the NIS to identify potential areas for technical assistance programs. The Federal Reserve also has participated in IMF missions to discuss monetary policy, money markets, debt management, banking supervision, and payment clearing systems.

POC—Charles J. Siegman, (202) 452-3308.  
Federal Communications Commission.—expects to participate in US government-sponsored seminars on telecommunications, broadcasting, and spectrum management.

POC—Waldia W. Roseman, (202) 632-0935  
Office of Personnel Management.—is discussing a project with USIA to finance a number of senior NIS officials' attendance at the Federal Executive Institute in Virginia.

POC—Dinah Lin Cheng, (202) 606-0961  
Congressional Research Service (CRS).—The Joint Committee on the Library approved a program for Russia in January 1992 which would involve an exchange of legislative documents and cooperation between the staffs of CRS and the Russian Supreme Soviet. The program, which resulted from a request by current First Deputy Chairman of the Russian Supreme Soviet Sergey Filatov back in September 1991, will be financed by private funds from the Ford Foundation and the John D. and Catherine T. MacArthur Foundation.

Since the initial request by Filatov, CRS and the Russian Supreme Soviet have exchanged delegations twice. A CRS-Russian Federation Conference on the Separation of Powers occurred in Moscow in June 1992. Most recently, the CRS and the Parliamen-

tary Center of the Russian Supreme Soviet signed a cooperation agreement in June 1992: the agreement currently is awaiting approval by the Joint Committee of the Library and the Russian Supreme Soviet.

POC—William H. Robinson, Deputy Director of the Congressional Research Service, (202) 707-5776.●

#### BASHING AMERICA'S LAWYERS

● Mr. HOLLINGS. Mr. President, in recent days it has become somewhat fashionable to bash America's lawyers and our legal system. For example, President Bush stated that he was prepared to "get in the ring" with the trial lawyers. In the Senate's recent debate on whether to consider Federal product liability legislation, many allegations were made about how greedy lawyers were running around clogging up the courts.

I have come across two articles by Howard Nations which appeared recently in the Trial and Trial Lawyers Forum magazines. In these articles, Mr. Nations cites a long string of distinguished service to America by the legal profession, and the benefits we now enjoy because America's lawyers have been willing to step forward and fight for individual rights and liberties, for equal justice under the law, for health and safety, for those catastrophically injured, and the like. As he points out, George Washington and Abraham Lincoln were lawyers, as were those great defenders of our individual rights and liberties, Thomas Jefferson and James Madison. Franklin D. Roosevelt and Patrick Henry were lawyers, and so is Barbara Jordan. The list of lawyers and their contributions to our American society goes on and on, and continues to this day.

In addition, Mr. Nations discusses a number of the recent claims made in the current effort to federalize our tort law. For the information of the Senate, I ask Mr. Nations' articles be printed in the RECORD. I urge my colleagues to take a moment to review these thoughts, for they surely help to bring some context to the current onslaught on our legal profession.

The articles follow:

TRIBUTE TO LAWYERS—"THE FIRST THING WE DO, LET'S KILL ALL THE LAWYERS."

(By Howard Nations)

The great trial lawyer Daniel Webster said, "Justice is the greatest concern of man on earth." There is no greater professional calling than to stand as a lawyer at the bar of justice and define and defend the rights of citizens. Lawyers play many vital roles in the world, but none is more important than preserving and protecting citizens' rights. Since lawyers play such a critical role in our democracy, why is lawyer bashing so prevalent, and how should we respond to it?

The nature of the judicial system and our adversarial role in it explain why we will never be loved by the public. If enduring lawyer bashing is the price we must pay for protecting individual freedoms, so be it. But we must not allow the demeaning of lawyers to

interfere with our professional obligations by reducing our zeal in representing clients.

One danger of lawyer bashing is the effect it can have on us as individual lawyers and on the profession as a whole. If we lose our professional self-respect, the entire country loses because our effectiveness in the democratic process is damaged.

For us to maintain our self-respect, it is critical that we understand the role our lawyer ancestors played in establishing and defending democracy. As lawyers, we are the beneficiaries of a rich and unceasing heritage of championing citizens' rights. Reducing that effectiveness is a major goal of our detractors since the power of the people has always been tied inextricably to the influence of lawyers. As Alexis de Tocqueville said in *Democracy in America* in 1835, "I cannot believe that a republic could subsist at the present time if the influence of lawyers in public business did not increase in proportion to the power of the people."

Today we are engaged in a major struggle over whether power in America will remain with the people or continue to shift to corporations and the government. Individual freedoms can be taken from the people only by reducing the power of lawyers.

As part of this struggle, we are confronting in America today a well-orchestrated campaign of lawyer bashing designed to silence us and limit our ability to stand between the abuses of government power and corporate power inflicted upon ordinary citizens. The effects of this corrosive campaign resound in the legislative halls, the voting booth, and the jury box.

Since, as Shakespeare said, "What's past is prologue," every trial lawyer should understand our past and present roles in society to better meet our obligations to the citizens of tomorrow. When we think of those who preceded us in this noble profession, we become imbued with the spirit, the virtues, and the values we are called upon to preserve.

As to our predecessors' accomplishments, greatness was their hallmark. The mantle we have inherited from them should be passed to our successors draped in greater dignity than when we received it. Even a cursory review of America's history reveals a common thread: Our legal predecessors have steadfastly refused to stand silent when individual liberties were imperiled, regardless of the source or the enormity of the threat.

Who are some of these exemplary lawyers? We see them occupying the presidency. They are leading America through the formative years of our Republic: nearly all of our first 16 presidents—from Washington through Lincoln—were lawyers. Thomas Jefferson and James Madison were lawyers. So too John Adams, James Monroe, John Quincy Adams, Andrew Jackson, and Martin Van Buren. As George Bush, the 41st president, occupies the White House today, 26 of his predecessors were lawyers.

We see him addressing the delegates of the Second Virginia Convention, with the battle cry, "Is life so dear or peace so sweet as to be purchased at the price of chains and slavery? Forbid it, Almighty God. I know not what course others may take, but as for me, give me liberty or give me death!" His name is Patrick Henry and he is a lawyer.

We see him with quill in hand at Monticello and in Philadelphia and Washington as he painstakingly crafts the rights of America's citizens in the Declaration of Independence. His name is Thomas Jefferson and he is a lawyer.

We see him at his desk drafting "The Federalist Papers" to guide the land he loves to-

ward constitutional law. We also see him helping to frame the Bill of Rights—the credo of American freedom. His name is James Madison and he is a lawyer.

We see him leading the country in its moment of gravest internal peril and despair. And we see him signing the Emancipation Proclamation, moving America closer to giving real meaning to the Jeffersonian ideal of "equal justice for all." His name is Abraham Lincoln and he is a lawyer.

We see him shepherding the country through the Great Depression, impervious to his own physical disability. Boldly he lifts our spirits and girds our strength, all the while reminding us that "the only thing we have to fear is fear itself." His name is Franklin Delano Roosevelt and he is a lawyer.

We see her mesmerizing the 1976 Democratic National Convention as its keynote speaker. She captures the hearts and minds of those who hear her extolling the virtues of democracy and individual freedom in the corridors of Congress. Her name is Barbara Jordan and she is a lawyer.

We see him both as advocate and distinguished jurist passionately reminding us all that justice is color-blind and that all citizens, regardless of race, creed, or color, are equal under the law. His name is Thurgood Marshall and he is a lawyer.

We see him, the son of tenant farmers, as he emerges from rural Alabama to become one of the country's great and courageous civil rights lawyers. Undaunted by death threats to himself and his family, he persists in bringing the Ku Klux Klan, skinheads, and other hate groups to the bar of justice. His name is Morris Dees and he is a lawyer.

We see him testifying on Capitol Hill, demanding that the safety and health of U.S. citizens not be jeopardized in the name of corporate profit and greed, or political expediency. Committed to making government officials and institutions truly serve the people, and railing against actions and decisions arrived at in secret, he is the consummate consumer advocate. His name is Ralph Nader and he is a lawyer.

We see them representing the widow and the orphan and the catastrophically injured, whose future quality of life rests on their lawyers' unstinting dedication to justice. We listen as these lawyers teach us how justice can best be achieved in the face of overwhelming odds, doing battle with corporate America. We watch in awe as they show us how a modern-day David, armed only with a stone of justice, can bring down today's Goliaths, manufacturers of defective and dangerous products. Their names are Scott Baldwin; Robert Cartwright, Sr.; Roxanne Barton Conlin; Bob Gibbins; Joe Jamail; Ted Koskoff; Joe Tonahill—among others across the nation. Their names are legion and they are lawyers.

Where would America be today if these lawyers had been successfully silenced?

They are our inspiration, our leaders, and role models \* \* \* and our friends. By their actions and their deeds, by the example of their lifelong mission and accomplishments, they remind us of the mantle of responsibility we ourselves carry as lawyers.

Lawyers are the linchpin of the democratic process and the front-line defenders of democracy. The question inevitably arises, then, Why has lawyer bashing become something of a national pastime? Try "politics."

The centerpiece of the power struggle to subjugate individual freedoms is the Bush administration's "Agenda for Civil Justice in America." It is a thinly disguised effort to

continue the shift of power from individual citizens to government and corporations. The stakes are huge.

To win this power struggle, President Bush and Vice President Quayle must squelch the power of lawyers to defend individual rights. They proceed by discrediting, defaming, and demeaning lawyers. Easy access to the mass media certainly helps.

A year ago, Bush's official spokesman, Marlin Fitzwater, at a White House press conference pointed the way. "We should blast lawyers at every opportunity," he bluntly stated. Quayle chairs Bush's Council on Competitiveness, whose very purpose is to blame lawyers for the alleged inability of U.S. companies to successfully compete with foreign firms. Over the next few months, we will hear Bush and Quayle continue to blame lawyers for most of society's ills. Their reelection strategy makes lawyers the Willie Hortons of the 1992 presidential campaign.

#### DEMAGOGUES AND TYRANTS

In the face of this onslaught, it has never been more important for us to maintain our self-esteem—both individually and as a profession. We must remember that our predecessors essentially fought the same battles. The discrediting, defaming, and demeaning of lawyers has been the method of choice for charlatans and demagogues and tyrants over the years.

In 17th-century England, Oliver Cromwell, set on thwarting individual freedoms, decreed that no more than three barristers could congregate outside of court. Cromwell recognized that the greatest threat to his autocratic rule was the collective commitment of the London Society of Barristers to the universal principles of freedom established in 1215 with the signing of the Magna Charta.

In 20th-century Europe, Adolf Hitler, probably the most heinous and destructive dictator in all of world history, let his views on lawyers be known. "I shall not rest until every German sees that it is a shameful thing to be a lawyer," he proclaimed. Hitler saw the need to destroy lawyers as a predicate to destroying the rights of other individuals.

Silencing lawyers to subjugate human freedom has been attempted for centuries, but it has been successfully resisted in America by strong-willed citizens aided by lawyers who sought to protect them through the Constitution and Bill of Rights. With each attack, our predecessors at law emerged—like the phoenix from the ashes—to redefine individual rights and freedoms.

Today, we need to be wary of mass-media campaigns that threaten lawyers and therefore the rights of citizens. We must prevail like those who prevailed before us because we are right, because our mission is just, and because the freedom that we protect is synonymous with individual rights for every citizen.

As a society, what alternatives do we face if lawyers can no longer protect citizens' rights?

What a travesty if those who would undo our civil justice system were to prevail now at the very moment when many nations of the world are consciously choosing to emulate the United States and its democratic institutions! In the name of a distorted view of "international business competitiveness," Americans would lose the very protections and symbols that make our great nation the exemplar of freedom for the world. This must not occur, and it will not occur as long as the legal profession vigilantly stands guard at the gates of democracy to uphold the rights of our citizens.

Apart from remembering our predecessors at law, we must do more. We must bring our individual and concerted talents to bear to defend freedom with pro bono efforts on behalf of the disadvantaged. We must fight with indignant advocacy for those harmed by defective products as with renewed commitment for every citizen and every tort victim whose civil rights or civil liberties are threatened.

In the name of "reform," today's demagogues seek to defile our civil justice system by deforming established tort law and attacking lawyers, judges, and jurors. Their ultimate goal is to abrogate individual rights and liberties of ordinary citizens, consumers, and tort victims. The rights they seek to abolish through such attacks are the bedrock of our democracy. As Newsweek magazine stated, "The war against the lawyers is at bottom a camouflaged aggression against the [American] jury system."

#### ACCEPT THE CHALLENGE

The detractors of our distinguished profession quote with glee Shakespeare's famous phrase from Henry VI, "The first thing we do, let's kill all the lawyers." As has often been demonstrated over the centuries, Shakespeare was right. If tyranny is to prevail, tyrants must first kill all the lawyers. Equally relevant today, if demagoguery is to prevail, those who would abolish the rights of citizens through attacks on the justice system must discredit, defame, and demean lawyers.

Our detractors who attempt to use Shakespeare's quote pejoratively against our profession either don't understand the context or deliberately distort it. The famous quote is spoken by Dick the Butcher, a follower of anarchist Jack Cade—"the head of an army of rabble and demagogues, pandering to the ignorant"—seeking to overthrow the government. The admonition that the first thing any demagogue must do to despoil individual freedom is to "kill all the lawyers" is nothing less than a supreme compliment to our profession.

Accept the compliment as a challenge. Let us conduct ourselves to ensure that, as long as juries and the bench and trial bar continue to breathe life into the common law and Constitution, the principles upon which our democracy is based will be safely preserved. They will continue to carry the indelible imprimatur of a legal system proven to be open and just and fair, and will be guarded by the true sentinels of freedom, our nation's trial lawyers.

#### TRIAL LAWYERS FORUM

The President of the United States is the world's most important decision maker. Since it is not possible for him to be an expert on every topic for which he makes crucial decisions, it is incumbent upon those who advise the President to do so wisely and with accurate information. This is an obligation that the advisers owe both to the President and to the American public whose lives are greatly influenced by the President's decisions.

In that regard, the President and Vice President of the United States owe an obligation to the American public to be certain that the information they disseminate, particularly through speeches and press releases, accurately reflects the truth. This is especially important when speeches are given by the President and Vice President to mold public opinion and affect the passage of legislation. Considering this premise, it is relevant to review the information being disseminated by the White House in an effort to

pass federal preemptive legislation and to reform the civil justice system in America.

The President is currently placing the power of the Executive Office behind the implementation of the Agenda for Civil Justice Reform in America, which is predicated on A Report from the President's Council on Competitiveness. This report, upon which the President bases his call for federal reform of America's product liability laws, deserves careful scrutiny by those of us who represent the victims of defective products.

Additionally, the report is the frequently cited cornerstone of the Bush/Quayle policy of lawyer bashing. Bush's proposed federal tort reform legislation will combine with the Agenda for Civil Justice Reform in America to further shift power away from individual citizens and toward America's corporations and their insurance companies. As the 1992 presidential campaign heats up, we will witness the further implementation of a well-devised scheme designed to undermine the lawyers who represent individuals against the power establishment by destroying the image of lawyers with the public, the press, and legislators. The success of this diabolical scheme requires us to examine closely the data that underlie the premises of the Council's report and the Bush/Quayle policy of lawyer bashing.

The report is replete with gross misinformation based on totally fallacious data. Not surprisingly, the Council that issued the report is chaired by Dan Quayle, the point man of the Bush/Quayle attack on the rights of individual citizens under the guise of salvaging America's competitive business position in the world. Perusal of the data demonstrates the incompetence of their research, the malicious nature of their campaign against lawyers, or both.

Quayle Fiction No. 1: A Report from the President's Council on Competitiveness states:

Businesses and governments spend more than 80 billion dollars a year on direct litigation costs.<sup>1</sup>

In the accompanying "Memorandum for the President," Quayle advises the President of the United States that:

Each year the United States spends an estimated 300 billion dollars as an indirect cost of the civil justice system.<sup>1</sup>

Fact: The most authoritative scientific study, by the RAND Institute for Civil Justice, estimates the cost of the entire civil justice system to be between 29 and 36 billion dollars a year, with total tort compensation estimated at 14 to 16 billion.<sup>2</sup>

Of all the Quayle rhetoric and misinformation, this point is the most egregious and unsupported but also the most enlightening about the extent to which the Council will go to fallaciously support their preordained agenda.

The first inquiry is: How was the 80-billion-dollar-a-year direct cost of litigation determined? The best available research indicates that empirical data supporting this figure is without terrestrial origin. In fact, the article in Forbes magazine, that great unbiased pinnacle of journalistic integrity, relies on data from Peter Huber, a hired gun for the manufacturing and insurance interests. Huber adopted the figure from an unsubstantiated statement by Robert Malott, a prominent Republican fundraiser and the Business Roundtable's point man on product liability.<sup>3</sup> Malott made his statement at a 1986 Business Roundtable discussion of product liability among business executives. He stated without source or citation; "It's estimated that insurance liability costs industry about

80 billion dollars a year, roughly the equivalent of the profitability of the top 200 corporations in the United States."<sup>4</sup>

It appears that Malott was addressing the cost of product liability, but when Huber adopted Malott's 80-billion-dollar figure, he applied it as an estimate of the direct cost of all tort litigation. When the Council on Competitiveness and the Vice President adopted these figures from Huber through Forbes magazine, they applied the 80 billion dollars as the cost to the United States of all civil litigation.

If this appears to be a slipshod method upon which to determine America's product liability laws and the rights of American citizens injured by defective products, consider how Huber made the astounding conversion from the malleable 80-billion-dollar direct cost figure to calculate the 300-billion-dollar indirect cost to the American economy of tort litigation.

Huber multiplies Malott's unsubstantiated 80-billion-dollar estimate by three and a half and rounds off to 300 billion to arrive at the indirect cost of the tort system.<sup>5</sup> Astonishingly, Huber arrives at the three-and-a-half multiplier from an editorial in the Journal of the American Medical Association that refers to the cost of defensive medicine expenditures by physicians surveyed in 1984. The study found that physicians who reported an average increase of \$1,300 in the cost of their malpractice insurance also reported changes in their medical practices that were worth an additional \$4,600 per physician per year. From this finding, the authors of the study calculated that each \$1.00 of malpractice risk, as gauged by insurance premiums, induces \$3.50 in defensive medicine expenditures.

In a quantum leap into the abyss of non-sequiturs, Huber uses this figure from a 1984 study of physicians' defensive medicine expenditures to justify multiplying Malott's fictional 80-billion-dollar figure by three and a half to arrive at the indirect cost of all tort litigation to America.<sup>6</sup> The fact that 3.5 times 80 billion is 280 billion does not deter Huber from rounding the number up to 300 billion. After all, what's an additional 20 billion dollars a year when every figure in the calculation is equally without relevant basis? Nowhere in the Report from the President's Council on Competitiveness is there a discussion of the accuracy of Malott's 80-billion-dollar guess, Huber's three-and-a-half multiplier, or any other aspect of the 300-billion-dollar sham estimate. Even Huber, when confronted with the fallacious nature of his 300-billion-dollar calculation, backed away, stating: "Nobody knows what the indirect cost is. What I said was that if the same multiplier operates in other areas, it's 300 billion. If they don't, it's not."<sup>7</sup>

Thus, despite the fact that both the 80-billion and the 300-billion-dollar calculations are totally unsubstantiated and wholly lacking in credibility, the Vice President of the United States and the President's Council on Competitiveness cite both figures as authoritative in the report as a basis upon which they plan to reform the civil justice system in America. The fact that these figures are much higher than the figures obtained in carefully conducted systematic studies does not appear to bother Huber, Quayle, or the Council.

Has the Council accepted these mythical figures because of an absence of a more accurate analysis of the cost of America's tort system? The fact is that accurate reports and studies are available but were willfully ignored by Quayle and the Council. In ana-

lyzing the intent and accuracy of the Report from the President's Council on Competitiveness, we must realize that rather than accepting the estimates of the RAND Institute for Civil Justice, which were determined in a careful, systematic, and scientific study, the Council chose to dignify Huber's absurd and disavowed 300-billion-dollar figure by publishing it in an executive branch document under the imprimatur of the Vice President of the United States. The RAND Institute, which conducted a survey that included court costs, legal fees, the value of lost work, insurance claims processing, and total tort compensation payments, has estimated the cost of the civil justice system to be between 29 and 36 billion dollars a year, with total tort compensation estimated at 14 to 16 billion.<sup>8</sup>

Quayle Fiction No. 2: Quayle and other lawyer bashers in government, industry, and the media frequently support their allegation that America has too many lawyers by stating that America has 70 percent of the world's lawyers.

Fact: America has 25-32 percent of the world's lawyers, a figure roughly proportional to America's percentage of the world's gross national product.<sup>9</sup>

Once again, the 70-percent figure that is bantered about so freely is without empirical origin. There is no study by any group anywhere that supplies data to support the claim that America has 70 percent of the world's lawyers. Two separate studies emerge from college campuses. The penultimate lawyer bashing report, emanating from the University of Texas and appearing in a book published by Cambridge University Press, contains a seriously flawed listing of lawyers in 34 countries as of 1983.<sup>10</sup> Even this heavily skewed anti-lawyer report shows America to have 45 percent of the total number of lawyers in the 34 countries surveyed.

A more recent study in 1992 by Professor Marc Galanter of the University of Wisconsin, which omits much of Latin America, Eastern Europe, the Middle East, South Asia, and Africa, where data are simply unavailable, shows 1,969,876 lawyers in the countries counted with 31.41 percent in the United States.<sup>11</sup> This figure is roughly proportional to America's percentage of the world's gross national product.

Quayle Fiction No. 3: Japan operates an efficient, business-oriented economy with only 5 percent as many lawyers per capita as America.

Fact: Approximately one million Japanese possess law degrees, but only 200,000 are actually involved in jobs that relate directly to the courts. This amounts to one legal practitioner for every 700 people, a ratio identical to that for the United States.<sup>12</sup>

Quayle and his loyal following of lawyer bashers, having the advantage of being unabused by the facts, use one of their most egregious distortions to arrive at this conclusion.

This blatant misrepresentation counts only those lawyers who are conducting trials, i.e., barristers in Japan, England, and Wales, while comparing them to the total number of persons admitted to practice law in the United States. As a result, the United States inaccurately appears to have far more lawyers per capita than the other countries. In reality, the per capita number of lawyers in Japan, England, Wales, and the United States is similar. The per capita number of legally educated Japanese, British, and Welsh who perform legal work is identical to the number for the United States: one per 700 population.<sup>13</sup>

An examination of the facts with respect to legal practitioners in Japan is one of the best indicators of the misinformation that Quayle is disseminating. There are 16,341 trial lawyers, public prosecutors, and judges in Japan. However, Japan also has 70,000 law graduates formally performing work that in America would be performed by lawyers, i.e., 50,000 tax attorneys who prepare tax returns, give legal advice and represent people in tax matters; 3,000 patent attorneys; and 15,800 judicial scriveners who take care of the registration and cash deposit matters before legal affairs bureaus as well as preparation of documents to be filed with courts and public prosecutors offices. In addition, several thousand Japanese law graduates work within corporations in the capacity of in-house counsel. The only lawyers counted in Quayle's calculation of "lawyers" in Japan are the 16,341 who actually participate in the trial of cases.<sup>14</sup>

Quayle Fiction No. 4: One of the most egregiously misleading of Quayle's statements before the American Bar Association was his claim regarding punitive damages:

Even a casual observer knows that in the last several decades punitive damages have grown dramatically in both frequency and size. What began as a sanction for the most reprehensible conduct has now become almost routine. In California, estimates are that one in every ten jury awards now includes punitive damages, in amounts averaging more than three million dollars. As these awards become more common, so do the instances of other arbitrary, even freakish, application.<sup>15</sup>

Fact: Blatantly absurd. Quayle's figures come from one California county where plaintiffs in business cases were awarded punitive damages on proof of intentional misconduct of the defendants. The median award in those cases was \$630,000. Quayle translates this into all of California and every California jury award.

Several recent nonpartisan studies flatly contradict these statements. In 1990, an American Bar Foundation study found that punitive damages were awarded in only 4.9 percent of more than 25,000 verdicts examined. A 1989 U.S. General Accounting Office report found only 23 such verdicts out of 305 product liability cases studied, and only five survived appeals intact.<sup>16</sup>

The 1991 Rustad/Koenig study, the most comprehensive study ever conducted on punitive damages in product liability cases, found only 355 punitive damages verdicts in the period 1965-1990. The researchers found that the number of nonasbestos cases that include these awards is actually decreasing. Significantly, following punitive damages litigation, 82 percent of the corporations that had punitive damages awarded against them later implemented such safety related improvements as product recalls or improved warnings and instructions.<sup>17</sup>

A 1987 study by the RAND Institute for Civil Justice found that the average punitive damage verdict in several California jurisdictions studies was \$743,000, but that figure was seriously skewed by larger awards that may or may not have actually been paid. The researchers found that the statewide median award (a far more representative number, with half the verdicts above it and half below it), was only \$78,000.<sup>18</sup> The three-million-dollar figure cited by Quayle was an average from one California county in business cases in which plaintiffs proved intentional misconduct. The median award in those cases was \$630,000.

Even a cursory examination indicates that Quayle has taken punitive damages awards

in business litigation out of one California county and concluded that: "In California, estimates are that one in every ten jury awards now include punitive damages, in amounts averaging more than three million dollars." The total absurdity that one in every ten California awards carries a three-million-dollar, punitive-damages verdict is so grossly misleading to be laughable, were it not being used as a tool to decimate the individual rights of American citizens to fair compensation from America's corporate tortfeasors.

Quayle Fiction No. 5: America's competitive position in international trade is hampered by the large number of tort claims filed against American manufacturers. To support this claim, Quayle states: "In 1989 nearly eighteen million new civil suits were filed in the state and federal courts."<sup>19</sup>

Fact: Tort cases, other than those filed in small claims, make up less than one-half of 1 percent of the total caseload in state courts and only 2.5 percent of the civil caseload.<sup>20</sup>

In 1989, 17,321,125 noncriminal cases were filed in the United States. This number includes every small claims complaint, divorce, debt collection, traffic violation case, contract suit, real estate case, juvenile case, and tort case. Of that number only 2.5 percent, or 447,374, represent tort cases filed in state courts, which handle 98 percent of tort litigation in America. In the same year there were 469,494 contract cases and 436,148 real estate cases. When combined with the hundreds of thousands of debt collection cases involved in the 18 million, it is obvious that litigation between businesses and litigation by businesses against individuals represent far more of the civil suits filed annually than do tort claims.<sup>21</sup>

Accurate records compiled by the National Center for State Courts indicate that traffic, criminal, and juvenile cases are responsible for 82 percent of the total state court caseload. Of the remaining 18 percent, the vast majority are small claims, domestic relations, estate, and contract matters. Tort cases, other than those filed in small claims, make up less than one-half of 1 percent of the total caseload in state courts and only 2.3 percent of the civil caseload.<sup>22</sup>

These records also reflect that business litigation is increasing at a far faster rate than Quayle's target: personal injury and wrongful death litigation. This increase obviously is a direct result of U.S. economic strife, which can be laid more accurately at the doorstep of the White House rather than on the plaintiff's bar.

Quayle Fiction No. 6: The federal courts are being overrun by product liability cases.

Fact: There were 217,879 civil suits filed in federal courts in 1990; product liability case filings accounted for less than 6 percent of the total—hardly an indication that these cases are overrunning the federal courts.<sup>23</sup>

Product liability filings in the federal courts, with the exception of asbestos cases, declined by more than 36 percent between 1985 and 1991. Even including asbestos cases, the total number of product liability cases filed in 1991 in federal court is the lowest annual total since 1986.<sup>24</sup> Tort filings in the federal courts, with the exception of asbestos, declined 13 percent between 1984 and 1991, and nearly 20 percent between 1985 and 1991. Even if asbestos cases are included, total tort filings decreased nearly 20 percent from their high in 1988 to the current low.<sup>25</sup>

While total civil filings increased from 15.7 million in 1986 to 17.3 million in 1989, only 34,577, or 2.16 percent of that increase, were tort cases.<sup>26</sup>

How serious is the effect of the distortions of the President's Council on Competitiveness in influencing legislative votes on the federal product liability bill? In May 1992 the United States Senate was called upon to vote on a procedural issue involving the President's product liability bill and the general aviation bill, both of which are designed to destroy rights of victims while protecting manufacturers of defective products from prosecution. The vote on the floor of the United States Senate was 53 to 45 to table the bills. However, since the rate was not on the merits of the bills, even some of the bills' proponents voted to table. Both U.S. senators from Texas voted with the White House position.

If we are to preserve the rights of our clients, tort victims, and consumers, we must attack these fallacious arguments that are being promulgated by the manufacturers of defective products and their liability insurance carriers and that are being afforded the dignity of the executive branch of the United States government through the office of the Vice President.

This column is offered as information to aid each of us in attempting to set the record straight while our clients' rights to seek redress in a court of law against manufacturers of defective products and other tortfeasors still exist. Both the product liability bill and the aviation bill will reach the floor of the Senate for a vote on the merits during the summer of 1992. Thirty-nine U.S. senators have signed on as sponsors of the product liability bill, thirty-one Republicans and eight Democrats. Thus, the White House needs to obtain the votes of only eleven non-sponsors in order to pass this preemptive legislation.

The professional prognosticator and seer, Jeanne Dixon, included in her predictions for 1992 that "anti-lawyer riots will shake the legal profession and force drastic changes in the way attorneys do business."<sup>27</sup> This may prove to be true if the legal profession continues to allow Bush, Quayle, Huber, and others funded by the insurance industry and manufacturers to distort the truth in an effort to pass legislation that would decimate the rights of tort victims and consumers who seek just compensation for the wrongs done to them by America's tortfeasors.

It is incumbent upon us to confront these distortions directly. We have research materials available at TILA headquarters for the use of anyone who wishes to participate actively in fighting this battle against misinformation emanating from the White House. Please contact TILA's communications director, Willie Chapman, at 512-476-3852 to discuss how you can help in this ongoing battle.

### VOICES ON THE MALL

• Mr. ADAMS. Mr. President, earlier this month the National Congress of American Indians [NCAI] sponsored an event called Voices on the Mall to call attention to the native-American perspective on the quincennial observance of the voyage of Christopher Columbus. One particularly noteworthy speech was delivered by J.T. Goombi, a member of the Kiowa Tribe, who also serves as first vice president of NCAI. I ask that the text of that speech be made part of the RECORD at this point.

The speech follows:

#### VOICES ON THE MALL

(By J.T. Goombi)

Your Spanish Sails and Old World Honor  
Led me on a Trail of Tears  
The Travail Continued with My Children  
Who Searched for Hope,  
Five Hundred Years

I hear the sound of the distant drums.  
They beat slow and steadily across this land.  
They speak to our people on reservations,  
to our people in native villages,  
to those who have been lost and to those seeking their way back home.

My name is J.T. Goombi, the First Vice President of the National Congress of American Indians, of the Kiowa Tribe, a Nation within the State of Oklahoma.

I hear the drum. It is the heartbeat of the creator. It speaks to hearts and to our souls. If you close your eyes, you can hear it. It is

our eternal pulse and it beats on and on. It beats the story of the American Indian—

It beats the story of an old land and an ancient people.

Of conquering Europeans with swords that rattle and horses that stomp on sacred ground,

Of missionaries speaking Spanish, French and Latin,

Of wagons rumbling across prairies,

Of train whistles and iron horses thundering through the great plain,

Of gun shots and screams at Sand Creek and Wounded Knee,

We are the National Congress of American Indians and we are a Congress of Nations. Each tribe is politically unique but we share a common history. We sometimes argue among ourselves, but our strength is in the diversity of the tribes, our common goals and our common heritage.

We are the people who survived. I am a small part of this Nation of Nations but I will speak as a representative of our history—

I am the first Indian to see a man with skin as pale as the sand and I stand and wonder if I should welcome or destroy,

I am the old woman who died on the Trail of Tears,

I am the Seminole who hid in the Everglades,

I am the Cherokee who learned to read and write,

I am the Nez Perce the army never caught,

I am the little girl killed at the Washita River,

I am the Marine at Iwo Jima,

I am the single Chippewa mother in Minneapolis,

I am the Lakota that defeated Custer,

I am the first Indian to go to college,

I am the Makah who lived his whole life before the white man came—with my fish camp in the summer and my deer camp in the winter with my family and my tribe—and it was a kind of paradise.

I hear the drum. We stand today, no longer the only governments on this continent, but certainly the oldest sovereignties. We have retained little from what we once had. But now our enemies seek to take away the only thing of value we have always had and never lost—our tribal sovereignty itself.

Our non-Indian friends don't fully understand tribal sovereignty but it is not a hard thing to know. Nothing is more endemic to a society. Only one sovereign has ever held true and pure in the history of this world—the sovereignty of the Creator, and it is to be obeyed. Our sovereignty, the sovereignty of our tribal governments, we only ask you to respect. My American friends, hear your own drums—

The sound of your own anthems and the roar of your crowds,

The quiet prayers of honest men seeking to preserve a way of life for their young,

The willingness of young men to fight a war or wage a peace,

The quest for democracy and good will,

The desire to reward acts of courage or kindness,

The search for truth and equal justice,

The civic pride of doing the right thing for your community,

The empowerment to the shadows of society that the franchise brings.

Hear the drum, America. This is what makes you great. Your noble goals, your tolerance of others and the diversity within your shores. You seek truth, self-governance, justice and democracy. Above all, you seek the right and ability to control your own destiny. And that is what sovereignty is.

We tribes endeavor to protect sovereignty as you do, not only because it is about the only thing we have left, but also because sovereignty enables us to preserve a way of life. We as Indian tribes define our sovereignty in many ways—there is no one definition of its limitations, nor its potential. But for the grace and protection of the Creator, our sovereignty is the definition of our shield—

To protect our religious and sacred sites,

To protect our burial grounds from grave-robbars,

To preserve our traditions and our culture,

To care for our elders and our young,

To provide jobs and opportunities for our people,

To make our own laws and regulate our lands,

To give pride back to our people,

And to preserve governments that pre-existed the United States by thousands of years.

Hear the drum, America. We are not so different in our goals. But you must see that the true glory of your nation lies in encouraging these magnificent differences that distinguish our people from your people. Let us determine what our sovereignty is, and respect it.

Hear the drum, America. It is our fondest wish that five hundred years from this day, we will stand on this place together, sovereign Indian nations and the United States of America.

I believe that we tribes have survived the darkest hour of our history. We have nothing to fear, for the worst has happened, we lost everything, but we survived. Our creator deemed that it be so.

And so the drum beats with a thunderous resonance, and we face the morning sunlight of the next millennium as sovereigns with strength, with unity, and with hope. We have survived the last 500 years, and we look today toward the future. As we, as Nations within the United States, define our sovereignty. We ask that you respect our definition, and support our right to control our own destinies.\*

### GSE LEGISLATION

• Mr. GARN. Mr. President, I want to compliment Senator RIEGLE on the development of important legislation on Government-sponsored enterprises. Under his guidance and leadership, the Banking Committee formulated a landmark bill that will ensure the safety and soundness of the housing Government-sponsored enterprises. Also, Mr. President, this legislation will serve as the catalyst for the financing of considerably more housing for those households with low- to moderate-income levels. For this the chairman should be congratulated.

I am pleased that this legislation requires a thorough investigative study into the role, structure, governance, and stockholder interests of the Federal Home Loan Banks. I am sorry, though, that we were unable to include in this bill substantive language that would address much needed reforms to the Federal Home Loan Bank System, such as those undertaken for Fannie Mae and Freddie Mac.

One set of studies of the FHLB System called for in this legislation by the

Federal Housing Finance Board, the Comptroller General of the United States, the Director of the Congressional Budget Office, and the Secretary of Housing and Urban Development will be most helpful in determining proper governance and capital standards. Also, the studies will focus on products and services, the proper relationship between the System and other government-sponsored enterprises, financial obligations, the impact that consolidation of the System would have on availability of housing credit, and the interests and investments of the System's stockholders. I am also pleased that provided in this bill is a study of the System by a study committee composed of individuals whose institutions own stock in the 12 Federal Home Loan Banks.

I would ask the Senator if I am correct in saying that it is the purpose of these studies to assist Congress in the development of legislation next year that will preserve and enhance the Federal Home Loan Bank's role as an important source of credit for housing, and to protect the financial investment of the System's member institutions?

Mr. RIEGLE. Yes, Senator GARN, if after reviewing the studies, it becomes apparent that legislation is appropriate, it would be my hope that the Congress would consider addressing these issues.●

#### ORANGE HAT POLITICS

● Mr. PRESSLER. Mr. President, the Metro Orange Coalition is an umbrella organization for citizen volunteers working in Washington, DC, area neighborhoods to eradicate crime and make their streets safe. The coalition organizes neighborhood residents into "Orange Hat Patrols," so-called because of the clothing they wear to make sure they are noticed while doing their work. The presence of these citizens out on the streets, observing who is there, jotting down license plate numbers, and video taping suspicious activity, effectively deters elements of the criminal drug trade from operating in patrolled neighborhoods.

According to information supplied by Mr. James Foreman, coordinator of the Metro Orange Coalition, approximately 100 patrols are operating in the Washington metropolitan area. They have not sought funding from any level of government. Instead, they have relied on the contributions of their own members and the goodwill of a few small businesses. The organizers felt it was important for neighborhood residents to provide the necessary investment to establish the patrols. It was felt, and rightly so I believe, that if neighborhood residents gave of their own resources, they would have more of a stake in the organization and a greater commitment to making sure it worked.

On Friday, October 2, 1992, I had the opportunity to go on patrol with the

Orange Hats. Accompanying me were my wife, Harriet, and two members of my staff. We met Mr. Foreman in the Anacostia neighborhood of the District at about 9 p.m.

It was heartening to me to go to Anacostia and meet with citizen-members of the Orange Hat patrols. Among those we met were Joe Kersene, Ed Johnson, and a man called Papa Smurf. Seeing these citizens and their neighbors out on the streets, trying to do something to stem the flow of violence and crime in their neighborhoods, was truly inspirational. It is a sad commentary when, in our society—in this modern age with all its technology—citizens of the District feel compelled to spend their evenings patrolling their neighborhoods to keep them safe.

At one very memorable moment at the end of our neighborhood walk, the assembled group joined hands and sought the guidance of Our Heavenly Creator in carrying out their work. This was truly an inspiring moment.

Now that the Orange Hat Patrols are established as extensively as they are, a need has developed for additional assistance. Funding is needed to supply the trademark orange clothing—caps, jackets, T-shirts—walkie talkies, binoculars, video cameras, and office equipment required to carry out the coalition's mission.

During the 102d Congress, I asked the Senate Appropriations Committee and its Subcommittees on the District of Columbia and Commerce, Justice, State, and Judiciary, the Department of Justice, and the Mayor of the District of Columbia to find \$25,000 that could be granted to the Metro Coalition. That small amount would go a long way toward obtaining the equipment they need to carry out their good work. This seemed to me to be a modest amount—indeed, by Washington budgetary standards, an insignificant amount—that would be routinely approved. But you would have thought I was asking for a king's ransom by the responses I received. To read them, you might conclude this meager amount was threatening the fiscal integrity of our great republic.

What we have is an example of politics at its worst. The "Iron Triangle" was at work again—a congressional committee, a District government concerned with protecting turf, and program constituents—all had an interest in seeing that no nongovernment entity got a single crumb of the District appropriation pie. At first I thought that was the problem—that I asked for only a crumb, when I should have demanded a great big slice. Maybe they concluded my request was not made seriously. Perhaps they did not think I would use my privileges under the Senate rules to threaten or actually tie up the business of the Senate over such an insignificant amount of money—and for a disenfranchised group of citizens at that.

But I do not believe that was the reason. The real reason may be that too many people in the political/governmental system refused to believe that a group of concerned citizens, who never sought nor received Government funding, and operate on a minuscule amount of money, could possibly be successful at reducing neighborhood crime—something that the District government has been incapable of doing in the last decade with millions of dollars at its disposal. Were the Orange Hats perceived as a threat to the Iron Triangle's established order?

Mr. President, I am not giving up. I will revisit this issue in the 103d Congress. I strongly believe in the work the Orange Hats are doing. My challenge will be to find the amount and type of support for the Orange Hats that will be sufficient to advance their mission throughout the District of Columbia yet not enable some jealous governmental bureaucracy to smother or co-opt them. We do not want to take a good, effective group and kill it with governmental kindness.

So, Orange Hats, until the convening of the 103d Congress, keep up the good work. Be strong and keep the faith. You are doing all of us a world of good.●

#### CONGRESSIONAL MEDAL OF HONOR RECIPIENTS

● Mr. COHEN. Mr. President, I would like to take this opportunity to express my support for S. 32, sponsored by Senator DOLE. Earlier this year, I requested that I be added as a cosponsor of this bill but due to a clerical error my name was never added.

S. 32 increases the rate of special pension for persons on the Congressional Medal of Honor roll, the Nation's highest military decoration awarded to Americans who have served with valiant distinction in the armed services. There are 210 living recipients of the Medal of Honor and some 60 of them are living below the poverty line.

Under title 38 of the United States Code, all living holders of the Medal of Honor receive a monthly pension. However, this pension is quite small and has not been adjusted in 12 years.

Increasing the monthly pension paid to medal recipients is a fitting gesture for those Americans who have so honorably served the United States. I believe that it is important that they should not be forgotten. These are difficult economic times for us all, but for recipients living in poverty, it must be even more difficult to feel as if their service is no longer appreciated. By increasing this pension, we say that our Nation will not let time erode the memory of true courage. We say that we understand times are tough and that the pension will go a little bit farther in helping recipients care for themselves.

We have the responsibility to make sure that those who have so valiantly served our country will not be forgotten. I believe that this is a small price to pay to see that medal recipients know service of the highest order will always be honored.●

**S. 492, THE LIVE PERFORMING ARTS LABOR RELATIONS AMENDMENTS OF 1991**

● Mr. LIEBERMAN. Mr. President, I am pleased that S. 492, the Live Performing Arts Labor Relations Amendments of 1991, was reported out of the Labor and Human Relations Committee this year. It is unfortunate that the actions of some Members made it difficult to bring the bill before the full Senate for debate this year. Since this bill has already cleared the Labor Committee, it is my hope that the Senate will be able to act on the bill in the 103d Congress.

S. 492 corrects several inequities in the application of Federal labor laws to performing artists. Currently, live performing artists do not have the right to organize and bargain collectively over their working conditions and wages, a right the National Labor Relations Act was designed to guarantee. Congress has already recognized that in the case of the construction and garment industries, which provide short-term, sporadic employment, additional legislation was necessary to ensure that workers received the full protection of Federal labor laws. Congress had, however, failed to act to provide live musicians and entertainers, who have similar employment patterns, with the right to choose their own representation and the right to bargain with their employers.

The Live Performing Arts Labor Relations Amendments of 1991 will enable live performers to exercise their rights to organize and participate in collective bargaining. It extends to them the same rights already provided to those in other industries characterized by short-term, transient employment, such as construction and the garment industry. I sincerely hope Congress will act on this legislation early next year.●

**SENATOR JOCELYN BURDICK**

● Mr. PRESSLER. Mr. President, in her short time in the Senate, JOCELYN BURDICK has inspired us all. She continued the traditions of her late husband, Senator Quentin Burdick, with honor and courage. I admire her dedication to North Dakota and all the Plains States. The determination she showed in representing North Dakota during the last few weeks of the 102d Congress reflected an uncommon ability and grace. I admire her and her late husband's work, and I wish her happiness in whatever paths she takes in the years to come.●

**FIFTY YEARS OF SERVICE, SOUTH DAKOTA RURAL ELECTRIC ASSOCIATION**

● Mr. PRESSLER. Mr. President, this year marks the 50th anniversary of the South Dakota Rural Electric Association. The South Dakota Rural Electric Association has made numerous contributions to South Dakota over that half century. It is difficult to commemorate the accomplishments of the SDREA in one speech, but I will try.

Without the SDREA, my family farm in Humboldt, SD, would not yet have electricity. I still remember when the rural areas of Minnehaha County where my family farm is located first got electricity. It was a remarkable occasion. Many people in urban areas take for granted amenities such as electricity and abundant, clean and safe drinking water, yet today there still are some rural Americans without these necessary services.

Mr. President, during the 1930's there was no electricity in most of rural South Dakota. Nearly 90 percent of rural South Dakotans had no access to the wonders of electricity. In 1934, only 3 percent of my State's farms were electrified. With the creation of the Rural Electrification Administration [REA], the mechanism to help provide electricity to all of South Dakota was created.

Over 50 years ago, the first rural electric cooperative in South Dakota was formed at a meeting in a general store in Burbank, SD. It was known as the Fairview Rural Electric System. Today, the cooperative is known as the Clay-Union Electric Corp., headquartered in Vermillion, SD.

In 1942, South Dakota's six existing electric cooperatives met to develop a strategy to provide electricity across rural South Dakota. At that meeting, representatives of these cooperatives decided that one unified voice was needed if they were going to achieve their goal. In December 1942, the State's electric cooperatives, then numbering eight, formed the South Dakota Rural Electric Association.

Within 3 years, the number of electric cooperatives in the State would reach 20. These cooperatives were in the process of building 26,300 miles of lines to serve 40,725 South Dakota farms. Today, 33 rural electric distribution systems serve over 250,000 people across 90 percent of South Dakota. Rural electric serve over 80,000 farms, homes, schools, churches, irrigation systems, businesses, and other establishments across the State. These cooperatives own and maintain about 90 percent of the State's power lines.

The story of the South Dakota Rural Electric Association is truly remarkable. One speech simply cannot reflect the organization's accomplishments over the last 50 years. Mr. President, I will ask that a factsheet on South Dakota rural electric facts and several ar-

ticles outlining the history of the South Dakota Rural Electric Association be printed in the RECORD at the conclusion of my remarks.

Mr. President, there is one other point I would like to reference. Last year, the television show "60 Minutes" ran a segment that was highly critical of the Rural Electrification Administration. The title of the segment—"REA—Welfare for the Wealthy"—clearly indicates the misleading tone of the segment. I was outraged by what I heard on the show and wrote to "60 Minutes" to respond to several issues raised in the segment. I will ask that my letter to "60 Minutes" also be printed in the RECORD following my remarks.

Mr. President, I raise this point, because as we celebrate 50 years of achievement by the SDREA, we must begin to focus on the next 50 years. Clearly, modern telecommunications service is vital to the future quality of rural life. We need strong rural electricians if rural Americans are to have access to the services urban Americans receive. The SDREA is committed to bringing quality telecommunications services to rural South Dakota in the same efficient, high quality manner in which it has delivered electricity over the past half century. I will continue working with the SDREA to help achieve this goal.

Mr. President, the South Dakota Rural Electric Association is committed to the goal of improving the quality of rural and small town life in South Dakota. I congratulate the South Dakota Rural Electric Association on its 50th anniversary. Their story is remarkable.

Mr. President, I ask that the documents previously referred to be printed in the RECORD.

The documents follow:

**SDREA: A UNIFIED RURAL ELECTRIC VOICE**

Fifty years ago, leaders of the rural electrification movement in South Dakota met to have a "Statewide Cooperative Meeting." As U.S. servicemen were fighting the Axis powers, the coops too realized they had to do their patriotic duty and sacrifice materials for building new line and developing their cooperatives. Those original six rural electric cooperatives also knew they had a war of their own to fight. Not a war of life and death, instead a war of light versus darkness. They knew that if the lights were to be turned on all across rural South Dakota, a new force would have to lead the fight.

Early in their development, South Dakota's rural electric cooperatives realized that they were going to have to work together and speak with one, unified voice if they hoped to accomplish their goals. The obvious first step for achieving this vision was to form a statewide association.

At a meeting on August 27, 1942, it was agreed that one member from each "project" (cooperative) would have one vote to represent his project. A motion was made not to incorporate at that time but five men were elected directors of the new statewide group. Those elected at the meeting were Alfred J. Pew (Whetstone), E.R. Pike (Union), K.C.

Strong (Clay-Union), R. Wennblom (Lincoln-Union), and L.W. Ellefson (Sioux Valley Empire Electric Association). At this meeting Ellefson was named the first president of SDREA. Also, the minutes of this meeting refer to the name V.T. Hanlon. He was, at the time, project manager for Lincoln-Union and active in the formation of SDREA.

In December those distribution cooperatives, now numbering eight, together formed the South Dakota Rural Electric Association (SDREA). Their hope was that by working together through their new statewide association, REC's would be able to exercise more political influence than they could muster individually.

The first statewide strategy session was held December 7, 1942. The directors were fearful that at the coming legislative session, there might be legislation that could adversely affect rural electrification in South Dakota and that a program of education should be sponsored for the members of the legislature. This was the beginning of the SDREA legislative program that continues today. The minutes of that meeting said the "legislature of South Dakota would open new problems in the form of adverse legislation to the interests of rural electrification in South Dakota and that a program of education should be sponsored for the members of the legislature."

At a meeting the next spring on March 1, 1943, a resolution was adopted, offering Governor M. Q. Sharp assistance and support in a program to develop the natural resources of the Missouri River.

By January 9, 1945, the first of many meetings was being held at the Marvin Hught Hotel in Huron. There were now 20 rural electric cooperatives that were members of SDREA.

These 20 co-ops were in the process of building 26,300 miles of line to serve 40,725 farms. At this meeting it was agreed and voted that each electric co-op contribute \$100 to the SDREA legislative program. Also, the first legislative committee was formed and delegated to go to Pierre and get the "Model R.E.A. Bill" introduced. They also adopted a resolution in favor of " \* \* \* the development of the Missouri River for electric power and other purposes and we direct that the delegate from this association to the next annual meeting of the NRECA request such association to go on record as favoring said project." The SDREA board knew that the Missouri River would have to play a significant role in power generation if South Dakota's electric cooperatives were to be successful in the future.

On January 10, 1946, Richard Haeder, Beadle Electric, was elected President of SDREA and in October of 1946, Richard Haeder was selected as South Dakota's first representative on the National Board.

In November of 1947, Al Hauffe, F.E.M. Electric, was elected President and served in that position until his retirement in 1970.

For nearly 10 years, SDREA was little more than a paper association without a headquarters or full-time staff. But, as the years passed and the number of member cooperatives increased the need for a more permanent organization became apparent.

#### SDREA BOARD OF DIRECTORS HIRED FIRST EMPLOYEES IN 1952

By 1951, SDREA had grown from a loose alliance of eight struggling, young rural electric cooperatives into a federation of 33 professionally operated electric distribution systems. In addition, the cooperatives in the eastern half of the state had formed their own generation and transmission coopera-

tive (East River) and a second was in the works west of the Missouri (Rushmore).

As the number of cooperatives grew and increased in sophistication, so did the technical and legal problems they faced. In order to deal more effectively with the ever increasing complexities of running an REC the SDREA Board of Directors decided, at the associations ninth annual meeting in 1951, it was time to establish a permanent headquarters and hire a manager.

On April 16, 1952, the Board's decision became a reality. Huron was selected as the site of the headquarters, and Walter L. Lassen was hired as the Association's first executive manager. Mr. Lassen hired Eunice Jones as his secretary. Lassen's salary was \$500 a month; Eunice's \$200, and with no fringe benefits.

Together Lassen and Jones began work to form an organization which would eventually grow to a staff of 11 full-time employees and offer a wide array of services to its member systems. Through the years, the Association's activities expanded from primarily handling legislation and government relations into communications, member education and employee job, training and safety.

The idea was to provide the state's REC's with services that could be done more efficiently and economically through the statewide association than if each cooperative attempted to do it on their own.

It wasn't until 1956 that the Articles of Incorporation were officially adopted and signed by A. C. Hauffe, Harry Anderson, Carl Weerts, William Raabe, Sam Ulrikson, John Lux and William Jeremiason.

"In 1962, SDREA went to the 'Big Board'. I recall, at that time, many felt that a board this size would never operate efficiently, that unity would be impossible. Having served on this board for a number of years, and now as President, I can assure you that this board does function efficiently. Yes, we have had arguments, we have had disagreements, but because of these arguments and disagreements we have had much discussion, and because of this discussion, we have reached sound decisions," said then President Maurice Bergh at the 40th annual meeting of SDREA.

For 17 years, SDREA remained headquartered in Huron. But as time passed it was noted that the executive manager was spending a considerable amount of time commuting to Pierre to work with the state legislature and government officials. It became clear to the SDREA board that the statewide association should be headquartered closer to the states seat of government.

#### SDREA HEADQUARTERS MOVED TO PIERRE IN 1969

Finally, in 1968, after much deliberation, the board decided it was time to move the SDREA headquarters to Pierre. A new headquarters building was constructed at the corner of West Pleasant and Central. In May, 1969, the move was completed.

Once in its new headquarters, the SDREA staff was able to continue working on new ways of improving service to its member systems. Through SDREA, South Dakota's REC's were able to provide themselves with many advantages previously enjoyed only by much larger, privately-owned utilities.

"It may sound like I'm bragging, but as we talk about SDREA and the rural electric program in South Dakota, I think we have the right to brag a little. Those of you who remember the 'gas house gang' of the St. Louis Cardinals will recall how 'Ol' Dizzy Dean' used to brag. Someone once accused him of bragging and he said 'it ain't braggin' if you can produce the goods,'" said Bergh.

"That's how I feel about the rural electric program in South Dakota, because we have 'produced the goods.' Tom Fennell told me a short time ago that there are seven statewide managers who got their start in South Dakota. We have South Dakota people in REA, NRECA, Basin Electric and so many other places. We also have managers, staff people and directors who have received national recognition for their work in the rural electric program. Our attorney, Mr. Flynn, is considered "Mr. REA" even in national circles," said Bergh at SDREA's 40th annual meeting.

#### FARMERS FOUGHT FOR CREATION OF REA

Saturday, May 11, 1935—Just another spring day to millions of Americans. The send-a-dime chain letter craze was at its height. Rear Admiral Richard E. Byrd returned from another trip to Antarctica. The Cleveland Indians and New York Giants led the major baseball leagues.

President Franklin D. Roosevelt, in a hurry to leave the White House, was headed for a weekend of fishing with political cronies at the Woodmont Rod and Gun Club near Hancock, MD. He rushed to complete some last-minute paperwork. One task was particularly pleasurable to the President. He signed Executive Order 7037, creating the Rural Electrification Administration (REA). By so doing, Roosevelt set about to right a wrong he had resented since the mid-1920s. He related a few years later that the electricity bill at his rural Warm Springs cottage in Georgia "was about four times what I paid at Hyde Park, New York."

That bill, he recalled, "started my long study of public utility charges for electric current and the whole subject of getting electricity into farm homes. So it can be said that a little cottage at Warm Springs, Georgia, was the birthplace of the Rural Electrification Administration.

"The REA"—as it affectionately became known in rural America—is now 57 years old and one of the most successful federal agencies in the federal government. And along the way it has been the catalyst for near-miraculous changes in the lifestyle and economic status of millions of Americans, changes which eventually benefited those even outside rural America. Roosevelt's hopes of bringing power to rural areas were fulfilled beyond his wildest dreams.

#### A DARK COUNTRYSIDE

When he created REA under authorities of the Emergency Relief Appropriations Act of 1935, only one out of every 10 farms had electric service and existing power suppliers showed little interest in providing such service, seeing it as an unprofitable venture.

Living and working conditions in most rural areas then were primitive. Farmers milked cows by hand in the dim light of lanterns. Kerosene lamps and their hated sooty chimneys provided the only light in most farm homes. Farm women were slaves to the wood range and the washboard. Children pumped water by hand and carried it by the bucketful into the house. "Bathrooms" consisted of outdoor privies—often a health hazard. All farm work had to be done by manpower, animal power and gasoline tractors. There were few industries in rural America, few occupations outside farming.

The coming of REA changed all that—gradually at first, but radically as the years went on.

#### CO-OPS TO THE FOREFRONT

In the early months of development of the fledgling REA, it became clear that power

companies were not interested in REA's plan to construct electric lines with loan funds that were to be used on an area-wide basis. REA field personnel and the agency's engineers and planners in Washington found instead that it was nonprofit cooperatives, a familiar form of rural business enterprise, which were coming to the forefront, many of them newly organized for the REA loans.

Morris Llewellyn Cooke, a progressive Philadelphia engineer, named by Roosevelt as REA's first administrator, gradually became convinced that rural people could be educated to plan and oversee construction of electric lines and then govern and manage the operations of these new cooperative enterprises.

Out on the land, meanwhile, REA field personnel met night and day with local people, outlining procedures and principles which would become a successful pattern. Leaders of local farm organizations and county agents also helped, as rural Americans organized to obtain the long-sought power.

Rural farmers and their wives went up and down country roads, petitioning for the needed signatures of new members and to get the hard-to-come-by \$5 "sign up" fee from their neighbors. Then came the long hours of mapping in the lines, acquiring needed right-of-way easements and, finally, preparing the loan application for REA.

Soon, all across the land, electric poles began to dot the landscape. Contractors' line crews, often aided by eager co-op members, cleared rights-of-way and dug holes, while others, following newly developed REA methods of streamlined construction, came behind, assembling and erecting the hardware, and stringing the lines.

How the rural people, in partnership with their government, electrified the rural areas is one of the greatest achievements of cooperative and economic democracy this nation has ever known. The patterns of this economic and social "miracle"—an intensely human story that was repeated in hundreds and hundreds of rural regions—always began with the yearnings to "get the REA." After those first hopes and stirrings, there was the cooperative commitment by these determined men and women to bring the power into their lives. The entire process, organizationally and technically, was a test of the ingenuity, resolve and skills of these rural citizens and their leaders. Most met these tests and more.

The coming of the light and power to rural areas, the first magic glow of the naked bulb in the farm home, was witnessed by farm families with awe. Even today, the recounting of that high and moving moment imparts a sense of wonder. Countless stories are still told of that night: of children, and parents too, running through their homes, turning lights on and off, of women quietly weeping to see new appliances—their electric servants—really working. Rural life and work, rural society itself, was transformed forever.

#### CONGRESS ASSURES PROGRESS

Bills to put REA on a more solid basis were introduced early in 1936 by Sen. George W. Norris (R-NE) and Rep. Sam Rayburn (D-TX). The Rural Electrification Act was signed into law May 21, 1936, by Roosevelt.

By 1938, hundreds of systems were under development. The typical rural electric system had built and was operating 250 miles of line with \$230,000 it had borrowed from REA and then had about 800 member-consumers who had elected directors to govern the affairs of the cooperative. Its staff consisted of a manager, a bookkeeper, a line foreman and crew.

By December, 1941, just before the bombing of Pearl Harbor and the outbreak of World War II, there were nearly 775 rural electric systems operating or building in the countryside. The war effort slowed the advance of rural electrification, but at its close, new legislation was enacted by Congress to complete the job. This legislation liberalized interest rates and payback periods for REA loans, making electrification possible for even the most remote rural regions. By 1947, there were still 2.5 million farm families without light and power, but the period of rural electrification's greatest advances was about to begin. As 1948 closed, more than 40,000 consumers a month were being connected to co-op lines, and in 1949, 184,000 miles of electric lines—more than 15,000 miles a month, or 700 miles a working day—were energized. The popular success of the rural electrification program also resulted that year in Congress passing legislation to extend REA loans for telephone service. Soon, rural isolation and the old "whoop-and-holler" telephone exchange would go the way of the kerosene lantern.

On rural electrification's 25th anniversary in May, 1960, electric light and power had come to virtually all of rural America; nearly 1.5 million miles of co-op electric lines were singing along America's rural roads and highways. During these early years, the REA and the rural electric systems' leaders had been preoccupied with feverish activity—building their systems, extending lines to America's most remote regions and keeping pace with new consumer "hook ups" and mounting kilowatt-hour growth for agriculture and rural industries.

#### NEW CHALLENGES

Throughout those first 25 years there had been a critical need for sources of wholesale power that were reliable on a long term basis for the rural electric cooperatives. Without the federal resources of hydroelectric power and the 1906 antimonopoly provision of "preference" to public bodies and nonprofit entities in the sale of this federal hydropower, rural electrification's progress would have been considerably less dramatic.

In the decades that followed, rural electric leaders brought into being generation and transmission cooperatives—power plants and networks of extra-high-voltage lines, which today reach over vast regions to meet the electric needs of the individual systems and their member-consumers, assuring a foundation for continued growth and vitality for rural America's farms, ranches, businesses and industries. America's rural electric systems continue to face challenging work—meeting the special needs of a rural America undergoing great change.

Today, these systems reach fewer than five consumers along a mile of line, all the while striving to overcome the difficult economics of vast distances and slim revenues, requiring, still, the old cooperative spirit, working in concert with REA.

As the early struggles of the rural electric co-ops stand many decades distant, the first organizing adversities and triumphs of rural electrification's pioneers are told and celebrated today against an aura of folk legend and lore.

But the old power and magic persists in present-day rural electrification—those first moving experiences enlivening and enriching an inspiring legacy which rural electric people seek to continue in meeting contemporary challenges of today and tomorrow.

#### RURAL ELECTRIC PROGRESS IN SOUTH DAKOTA

Over 50 years ago, the first rural electric cooperative in the state was formally orga-

nized at a meeting in this general store in Burbank, a small town near Vermillion. Known, as the Fairview Rural Electric System, first plans for this cooperative were later changed to include more farmers to make the loan from REA "feasible". This cooperative then became named Clay-Union Electric Corporation, the first in the state to get a loan from REA. Today, its headquarters are now in Vermillion.

From a humble beginning \* \* \*

For many years, South Dakota farmers tried to get electric service from commercial power companies. Except for a very few, they were unsuccessful in their attempts.

In 1935, President Franklin D. Roosevelt signed an executive order creating "REA"—The Rural Electrification Administration. The next year Congress passed the REA act which made a federal agency out of REA.

This was a wonderful thing for South Dakota farmers. It meant that they could do cooperatively what they could not get done by any other means.

Farmers in the southeastern corner of the state were the first to organize into cooperatives to take advantage of loans made by REA.

The first meeting to formally organize a rural electric cooperative was held in a small country general store in Burbank, near Vermillion, 50 years ago. The original charter was granted to a small group of farmers for the first rural electric system in the state on November 29, 1935.

This first attempt to electrify just a few of the farmers failed. REA would not grant a loan because too few signed for the service to make the loan possible. The predecessor of the first cooperative, Fairview Rural Electric System, was organized in 1935, but was not able to secure enough members to obtain a loan from the Rural Electrification Administration.

In 1936, this group of rural electric pioneers obtained a new corporate charter permitting a longer power line, and incorporated as the Clay-Union Electric Corporation.

Leaders of this cooperative did not give up. They recruited more members—they got a loan and lines were built.

After REA authorized a loan to Clay-Union Electric, construction of a 67 mile line began and was completed in 1937. The Clay-Union system was expanded to 136 miles by 1939, and consumers increased from 130 in 1937 to 280 in 1939.

Groups of farmers in other areas of the state did the same thing. Some, however, met more severe obstacles. Private power companies often tried to block the local cooperatives from starting and during World War II, shortages of materials often caused delays in construction.

Before the advent of REA (as afterward), South Dakota lagged behind most states in farm electrification. Long distances between farms retarded the extension of service by central station electric distribution systems. The usual situation in South Dakota before the advent of the Rural Electrification Administration in 1935 was that only a few farms surrounding a town would be electrified.

One of the things that held up rural electric cooperatives from being formed in South Dakota was the need for low-cost power to assure the banker, REA, that they could repay their loans.

During the late 1930s, slow progress in farm electrification was made in South Dakota compared with that in the United States. In fact, the number of South Dakota farms served from power lines decreased from 2939

in December, 1934, to 2500 in June, 1939. The percentage of state farms electrified, however, rose from 3 percent at the close of 1934 to 4 percent by 1936 and 5 percent at the close of 1939. This two percentage point gain in the state during the five year period contrasts with the 17 percentage point gain in the nation. The slow progress of REA projects in South Dakota during this period also contrasts with the situation in several adjacent states, and all of the state's projects were concentrated in the southeastern portion of the state. Since one of the purposes of REA was to increase quickly and greatly the number of the nation's farms receiving central station electricity, it would appear that REA was not achieving the desired results in South Dakota during the first few years of its operations. The pioneers of the rural electric cooperative movement knew they needed help to promote the cause of rural electrification in South Dakota.

In 1942, eight electric cooperatives banded together to form the South Dakota Rural Electric Association (SDREA). Those few pioneers thought they would have more political influence through their new statewide association than they would each have alone. And they were right.

Agricultural prosperity brought a burst of farm electrification in SD during the early 1940s and there was almost an explosion of electrification in the postwar era.

The 1944 Flood Control Act and authorization of Missouri River dams assured rural electric cooperatives a supply of low cost power, thereby making more rural electric cooperatives in the state possible.

From 1938-44 the following 10 cooperatives (listed in order of loan applications) were organized and received allotments from REA: Union County Electric Cooperative Lincoln Union Electric Co.; West River Electric Assn.; Sioux Valley Empire Electric Assn.; Black Hills Electric Assn., Inc.; Butte Electric Assn., Inc.; Whetstone Valley Electric Assn., Inc.; Hamlin Electric Assn., Inc. (later changed to H-D Electric Co-op); Codington Clark Electric Assn., Inc.; and James River Valley Electric Assn., (later changed to Northern Electric Cooperative, Inc.).

In addition, the Traverse Electric Cooperative of Wheaton, Minnesota, which serves South Dakota consumers was organized in this period.

From 1945-1948 the following 17 newly-organized cooperatives received their first allotments from REA: Turner-Hutchinson Electric Cooperative, Inc.; Lake Region Electric Assn., Inc.; Intercounty Electric Assn., Inc.; Tri-County Electric Assn., Inc.; Rosebud Electric Assn., Inc.; Bon Homme-Yankton Electric Assn., Inc.; McCook Electric Assn., Inc.; Ree Electric Assn., Inc.; Kingsbury Electric Cooperative, Inc.; Cam Wal Electric Cooperative, Inc.; Charles Mix Electric Assn., Inc.; Beadle Electric Assn.; Spink Electric Assn., Inc.; Lacreek Electric Assn., Inc.; FEM Electric Assn., Inc.; Moreau-Grand Electric Assn., Inc.; and Douglas Electric Assn., Inc.

From 1949-1952 the following four newly organized cooperatives received their first allotments from REA: Central Electric Cooperative Assn., Inc. (Oahe); Grand Electric Cooperative, Inc.; Cherry-Todd Electric Cooperative, Inc. and West Central Electric Cooperative.

This completes the group of cooperatives which had received allotments up to the close of 1960. It is apparent that the period of greatest farm electrification in South Dakota, the years 1945-52, was also the period during which most REA cooperatives were organized and received initial allotments.

Electrification of farms in South Dakota has necessarily conformed to the broad procedural principles laid down for the nation by the Rural Electrification Administration.

Farm electrification moved forward in the state roughly in step with electrification in the nation after 1935. The relatively great distances between farms in South Dakota slowed electrification in the state, however, and by 1960 only 88 percent of South Dakota farms were connected with power lines, whereas 96 percent of the U.S. farms were receiving central station power.

Today almost all of South Dakota's farms are receiving central station electricity from a rural electric cooperative.

#### GROWTH IN THE PROGRAM

A remarkable growth in the number of rural electric members has occurred over the last 50 years in South Dakota.

In 1940, there were only 2,933 members.

In 1944, 4,612.

In 1948, 21,207.

In 1952, 60,431.

In 1956, 68,304.

In 1960, 72,826.

Today, over 80,000 members are served by South Dakota's electric cooperatives.

The tremendous growth in the number of consumers between 1939 and 1963 caused large increases in the average size of the state's rural electric cooperatives. The three projects in 1939 served about 1,000 consumers, or slightly over 300 per cooperative. The 36 borrowers in 1992 serve 82,470 members or an average of 2,356 members per cooperative.

Measured by number of members served, rural electric cooperatives in South Dakota changed from small ones in 1939 to ones of substantial size over 50 years later.

Another measure of the size of an electric cooperative is its miles of line. Total cooperative is its miles of line. Total mileage increased tremendously between 1939 and 1992. In 1939, there were 617 miles of line energized on three cooperatives with 202 miles per cooperative. This figure rose to 30,734 miles energized on the 31 co-ops representing 990 miles per project in 1950. In 1959, the number of miles energized had risen to 49,429 on 34 co-ops representing 1,450 per cooperative. Today there are over 62,000 miles of line representing 1,767 per co-op.

The great increase in number of consumers served by rural electric systems in South Dakota for the period of 1944 to today has been accompanied by a great increase in electric energy sold by the cooperatives in the state.

Although South Dakota lagged in its rural electric program during the early years, the state's rate of growth in rural electric power consumption after 1944 it exceeded the rate of growth in the nation for most periods.

#### WHAT RURAL ELECTRIFICATION HAS MEANT TO THE ECONOMY OF SOUTH DAKOTA

It has been estimated that for every dollar spent by rural electric cooperatives, the South Dakota farmer has spent \$10 or more for wiring his farm and farm home and for electric appliances and devices.

Rural electric systems are proud to contribute to the general economy of the state by making new businesses possible by supplying them with an adequate supply of power at the lowest possible cost.

Rural electric cooperatives of the state employ 800 people. These employees live in the communities throughout the entire state.

Rural electric systems of the state are owned by those they serve. Each member-owner of a rural electric cooperative in South Dakota is therefore quite naturally a resident of the state.

The rural electric systems in South Dakota have invested more than \$390 million in plants and facilities in the state. The rural electric cooperative members have spent an estimated \$700 million on electric equipment and appliances since receiving electric service from their cooperative. Members are continuing to invest in more appliances and equipment each and every year—an annual shot in the arm for the state's economy.

Rural electrification represents one of the state's largest industries and supplies electricity to nearly one-third of the states residents and almost all of the state's farms and ranches.

#### SOUTH DAKOTA'S RURAL ELECTRIC COOPERATIVES PAY TAXES

By state law, rural electric cooperatives are required to pay two percent of their gross revenue to the state. This is allocated back to the school districts from which it was collected, thus benefiting these districts on the same basis on which the farmers in this area spent money for electricity.

This tax alone provides over \$5 million for schools in the state each year.

This two percent gross revenue tax is levied rather than a real estate tax on the line equipment. Regular real estate tax decreases as the equipment depreciates. The gross revenue tax will increase thus meaning more and more income for the state's schools.

This gross revenue tax should not be confused with the regular four percent sales tax paid by the members of the cooperatives when they pay their monthly bills. This, too, is a vast source of revenue for the state.

The cooperatives also pay regular sales tax on all their equipment just as any business would.

Besides these there are the regular real estate taxes on buildings, employer taxes and licenses and use taxes on transportation equipment. Yes, rural electric cooperatives pay taxes!

#### ELECTRIC COOPERATIVES REPAY LOANS

To build lines and the other facilities necessary to get electricity to rural South Dakota, REA, the federal agency, loans money to rural electric cooperatives.

This money is paid back, over a fixed period, with interest, similar to a home mortgage.

No South Dakota cooperative is delinquent on the payments to REA. Many are ahead of schedule on their payments.

The relationship of REA to rural electric cooperatives has sometimes been confused.

REA is simply a "banker" for the cooperatives. Money for these loans is requested by the agency, appropriated by the Congress.

None of the employees of rural electric cooperatives are federal employees.

Directors are elected by local cooperative members at their annual meetings.

A rural electric cooperative is as much a local business as the corner grocery store. The one and only difference is that it borrows money from the government as well as private sources such as the National Utilities Cooperative Finance Corporation and CoBank.

Financial data also reflects physical growth of rural electric properties in South Dakota. The pattern of growth in loans in South Dakota is similar to that of the nation. But the upsurge of the late 1940s was greater in the state and the stabilization after 1952 was also more rapid. After 1944, loan repayments by South Dakota's electric cooperatives increased as a faster pace than in the nation.

Present status of the program:

Total number of consumers—82,470.  
Miles of line—61,848.  
Loans outstanding—\$387,104,115.  
Loans repaid—\$161,658,726.  
Amount of interest paid—\$108,258,534.  
Advance Payments—\$1,862,502.

#### GOOD SERVICE IS OUR BUSINESS

Good electric service, 24 hours a day, 365 days a year—that's the job of rural electric cooperatives.

To provide this service, rural electric battlers against heavy odds in South Dakota, where severe winters and other weather hazards are commonplace.

To provide good service, a regular maintenance program for the lines of the cooperatives is carried out.

These lines are rebuilt when necessary, so that voltage and capacity of them is sufficient to meet the needs of the cooperatives' members. New lines are planned ahead of schedule to meet the increased needs.

Your local cooperative has a lot more invested than just the lines that bring the power. Adequate transmission lines are needed and rural electric leaders must plan years ahead to provide the lowest possible source of electricity.

When rural electrification began, there was no "book" to go by. How to get good service to the farmers had to be learned, every step of the way. Every state and district presented its own peculiar problem.

Rural electricians go one step further than just providing good electric service. They have a real interest in their members and work with them to make the most efficient and economical use of electricity.

To do this, they aid their members in installing new appliances and devices. They recommend uses of electricity that will increase production and lower labor costs on the farm and in the home.

#### LOOKING TO THE FUTURE

From a humble beginning in a small general store to member-owned electric cooperatives that serve 80,000 families and businesses, the story of progress of rural electric cooperatives in the state is one of accomplishment.

The proud and historic story of rural electrification in South Dakota is a testament to the members, directors and employees of rural electrification in our state.

These years of progress of rural electrification in the state—and the nation—is democracy in action.

It was started on faith. Faith of the federal government in the people—which phrased otherwise is simply faith of the people in themselves. This job was not only to get electricity on the farm. It was to get electricity at the lowest possible cost—and in abundant quantities.

The job included providing a system that would give good electric service—24 hours a day, 365 days a year.

The job was to assist in the growth and development of the areas these systems served and the entire state.

Even after 50 years of progress of rural electrification through SDREA and its 36 member-systems, the job is not done.

The rural electric cooperatives can be proud of their progress. They have upheld the trust given them by the people. The support given to them by their members has been justified.

The job of rural electrification will never be finished. The systems will have to be expanded again and again. No one has yet determined a limit of electricity that can be used efficiently on the farms.

The job ahead will not be without its obstacles. But these, too, will be overcome by the faith—and the support—of the people.

Rural electric cooperatives are of the people. They work for the people.

And therein lies all past—and future—success.

"\* \* \* And, in the last analysis, low-cost electric power, free from private monopoly control, is itself a symbol of the people's control of their destiny, which is democracy."—Leland Olds.

#### LOOKING AHEAD FROM A GOLDEN PAST—SOUTH DAKOTA RURAL ELECTRIC ASSOCIATION CELEBRATES 50 YEARS

A golden past indeed. The electrification of our state's rural areas is recognized as one of the major factors contributing to this state's social and economic progress.

This year marks the 50th anniversary of the South Dakota Rural Electric Association. SDREA has furthered the cause of rural electrification that was launched May 11, 1935, with the signing of Executive Order 7037 by President Franklin D. Roosevelt.

That order created the Rural Electrification Administration (REA) and set up a program of loans and assistance for local organizations to overcome the conditions of a rural America then only 10 percent electrified. South Dakota had only five percent of its farms electrified at the time.

It was the initiative and work of rural people themselves, in partnership with their government, that wrote this most remarkable success story. Because of the pioneering efforts of early SDREA directors and employees, organizing and building rural utility enterprises in South Dakota became a reality. Today almost no nook or cranny of the state is without power and can look forward to a bright future thanks to its local rural electric cooperative and the statewide association.

These organizations, 36 locally-owned, non-profit electric systems, serve more than 300,000 people and businesses in today's small towns and rural areas of South Dakota. They own and maintain about 90 percent of the state's power lines, reaching out over vast distances and difficult terrain to provide power to about one-third of the state's population.

Even with the growth and diversification of rural South Dakota, these rural electric systems still average fewer than two families along a mile of line.

While the population and business of rural South Dakota undergoes constant change, serving the countryside will always be one enormous job, requiring a reliable and adequate source of affordable financing for this capital intensive industry. REA remains the primary source, although its lending programs have changed through the years.

The revolving fund for distribution systems' loan needs has only a minimum impact on the federal budget—Congress makes up the difference between market interest rates and the rate loaned to co-ops; the other, a program of guaranteed loans for generation and transmission systems is self-sufficient.

As SDREA marks their half century of achievement this September, they are recognizing their "birthday" in many different ways. This month's South Dakota High Liner Magazine provides you with information and stories from the state perspective, including a special feature article which traces the history of rural electrification. Another lists basic statistical and historical data on South Dakota's rural electric systems.

During September, SDREA will celebrate its 50th year of service at its annual meeting to be held in Pierre. This golden celebration will relive our past and celebrate the future that's ahead for rural electrification in South Dakota.

Here at the statewide office, we're pleased to assist in the development and promotion of rural electrification in South Dakota over the last 50 years and for the next 50 years as well.

Any way we can further information about rural electrification, provide legislative services or just backup our local cooperatives when they need help—we're here to do it.

As SDREA looks to the future from its golden past, we look forward to working with our 36 member cooperatives and their 80,000 member-owners to continue to make rural electrification a source of pride for South Dakota.

"For the past 40 years, the rural electric people of South Dakota have accepted change; they have made change work for them; they have made the rural electric program strong."—Maurice Bergh, SDREA President at the 40th Annual Meeting, September 24, 1981.

#### SOUTH DAKOTA RURAL ELECTRIC FACTS

Thirty-three rural electric distribution systems serve over 250,000 people across 90 percent of the land in South Dakota. Stated another way, rural electricians serve over 80,000 farms, homes, schools, churches, irrigation systems, businesses and other establishments across the state.

Rural electric systems are member-owned utilities established to provide at-cost electric service. The member-owned cooperatives are incorporated under the laws of the state of South Dakota.

Most rural electric systems are distribution systems that deliver electricity. Some are G&Ts that both generate and transmit electricity to meet the power needs of distribution of co-ops. There are 3 G&Ts, owned by their member distribution systems in South Dakota.

Although rural electric lines span over 90 percent of South Dakota's land mass, they average only 1.79 consumers per mile of line and collect annual revenue of \$2,158 per mile of line. (Investor-owned utilities average 32 customers per mile of line and collect \$37,800 per mile of line, and publicly owned utilities, or municipals, average 55 consumers and collect \$41,400 per mile of line.)

The average investment in the distribution plant per customer for the rural electric cooperatives is \$2,893. (Investor-owned utilities average \$1,133 per customer and municipals, average \$1,189 of plant investment per customer.)

Insured loans are made by the Rural Electrification Administration (REA) to distribution systems at a 5 percent interest rate from the REA Revolving Fund. REA requires borrowers to supplement loans with privately obtained concurrent loans; the usual ratio is 70 percent REA, 30 percent private.

Generation and transmission systems obtain money from the private money market, channeled for the most part through the Federal Financing Bank (FFB) and guaranteed by the REA Revolving Fund. In addition to the Treasury's cost of borrowing, the FFB collects a handling fee of one-eighth of one percent on all loans to G&T systems.

In 1969, rural electric systems organized the National Rural Utilities Cooperative Finance Corporation (CFC) to provide supplemental financing from private, nongovernmental sources. The Bank for Cooperatives

(CoBank) also provides loans to rural electric systems.

In addition to providing electric service, many rural electricians are involved in community development and revitalization projects, e.g., small business development and jobs creation, improvement of water and sewer systems, and assistance in delivery of health care and educational services.

U.S. SENATE,  
COMMITTEE ON SMALL BUSINESS,  
Washington, DC, November 1, 1991.

"60 MINUTES"

Viewer Mail,

West 57th Street, New York, NY.

DEAR "60 MINUTES": Some of the issues raised in a recent program, "REA—Welfare for the Wealthy" need further clarification. You imply that "mom and pop" telephone companies have vanished. Yet there are over 1,000 small, independently-owned telephone companies and cooperatives serving communities all over the United States. Many of these companies have survived for generations and take great pride in the service they provide their customers.

Because of REA, the phones are ringing in rural America. However, the job is not done. Our society has embarked on an age of flowering technology in communications services. New services and new technologies arrive on the scene daily. Rural companies can provide the advanced services as long as REA remains strong. Keeping rural America on a par with urban America in the advancing information age will encourage rural development.

You say that the REA program is "welfare" for wealthy telephone companies. The fact of the matter is that REA telephone loans permit capital improvements to be made in telephone systems for the benefit of rural subscribers. They do not go to subsidize the revenues or profits of telephone companies. Actually, REA is one of the few government programs targeted for America's rural citizens.

You assert that REA loans go to resort areas and affluent suburban areas. Fewer than two percent of REA telephone borrowers serve suburban areas and fewer than one half of one percent serve resort areas. The fact that resorts have been built up around these small local exchange carriers points to the success of the REA telephone loan programs in encouraging rural economic development. Such growth translates into jobs and rural growth.

Modern telecommunications service is essential to the quality of rural life, and the REA's commitment to rural telecommunications has been central to the sustained vitality of rural life. The REA telephone loan program is effective, efficient, and economical. The REA telephone loan program builds America.

Sincerely,

LARRY PRESSLER,  
U.S. Senator.●

#### COMMITMENT AND DIRECTION OF FANNIE MAE

● Ms. MIKULSKI. Mr. President, throughout the year, the employees and management of Fannie Mae have been hard at work developing steps to broaden and diversify their work force. They are determined to make Fannie Mae second to none as a working example of maximum employee opportunity regardless of sex, race, or national origin.

Recently, James A. Johnson, Fannie Mae's chairman and chief executive officer addressed all the company's employees on this issue. His remarks reflect the commitment and direction of the company in its effort to grow better and grow stronger by making sure employees have every chance to do the same. I commend his remarks to my colleagues, and I ask that the full text of Mr. Johnson's remarks be printed at this point in the RECORD.

The remarks follow:

REMARKS OF JAMES A. JOHNSON, CHAIRMAN  
AND CEO, FANNIE MAE

Thank you for joining us this morning. We don't hold all-employee meetings casually. I've been Chairman for a little less than two years and this is just the second meeting that we've had during that time.

We only do this when we have something important to share with you. And we do today. The subject is diversity.

I define diversity at Fannie Mae as the value we place on the differences of people who work here and our mutual respect for those differences. By valuing our differences through mutual respect, we create an environment in which each one of us can enjoy maximum opportunity, maximum growth and maximum fulfillment. And that applies to everyone, regardless of your gender, your race, your sexual orientation, your religion, or your ethnic background.

As you know from the letters I've sent you, we have set as a corporate priority, the achievement of a work force that at all levels reflects the diversity of our society and a work environment that is not only free of discrimination, but also focused on the development of all employees to reach their full potential.

Today, I will focus on senior management's commitment to our diversity goals.

Let me say I'm extremely confident that we will be successful in meeting the challenge of diversity that lies ahead. You may remember when we all gathered here on March 14, 1991, I spoke to you about one of the most important initiatives Fannie Mae has ever undertaken—our \$10 billion program of "Opening Doors to Affordable Housing in the 1990s." I said then, "The challenge we face, each of us, is large and it's serious, but the goals are not beyond our reach. I know we will meet this challenge as we have met so many in the past with intelligence, commitment, a sense of fairness, and hard work \* \* \*."

Today, we are more than meeting the \$10 billion challenge. We are overwhelming it. We have more than two years left to meet our original goal and we are already more than half way there. To each of you, thank you very much.

In this magnificent performance, you have demonstrated once again, what I knew from the first day I walked through the doors of Fannie Mae. This is a company of very special people.

You are attracted to Fannie Mae and Fannie Mae is attracted to you because we share the common values of honesty, integrity, hard work, and mutual respect. Your commitment to Fannie Mae is a commitment to something larger than just your careers or material well-being. It is a commitment to having an impact on the lives of millions of people through our business of financing homes and apartments across the country. No matter how fast Fannie Mae grows, our value system will be the driving

force of our success. James Conant, a great President of Harvard University, once said, "Democracy is a small, hard core of common agreement, surrounded by a rich variety of individual differences." So is Fannie Mae.

Our company's future depends on our mutual and positive response to the demands of diversity because Fannie Mae's first asset is not the mortgages we purchase, but the people we employ. Fannie Mae's work force must become more diverse, not only because it's right, but because it's good business.

The Hudson Institute's highly respected report, "Workplace 2000," shows how the American work force will change in the years ahead. It will grow more slowly, become older and more diverse. The average age in 2000 will be 39, not today's 36. Three-fifths of all women over the age of 16 will be working in the Year 2000 and minorities will make up nearly 30 percent of all new entrants into the work force, twice the current rate.

Responding to this challenge is a responsibility of leadership. Fannie Mae is the leading institution in the nation's home mortgage finance industry. We have a responsibility to lead by example.

All of our offices are located in racial, ethnic, and economically diverse metropolitan communities. But for too many of us in America, the workplace is the only truly integrated experience we have in our day-to-day lives. So, it is the workplace that offers us the greatest opportunity to learn from and expand our horizons through contact with people different than ourselves.

We have made good progress at Fannie Mae, both as individuals and as a company, in recognizing the need to accommodate our differences and work together side by side. But the work we have started is unfinished and we must finish it to fulfill our potential as a world class company.

The challenge reminds me of the words of Senator Robert Kennedy in his famous speech at the University of Capetown in South Africa in 1966. He said:

"There is no basic inconsistency between ideals and realistic possibilities, no separation between the deepest desires of heart and mind, and the rational application of human effort to human problems."

We are a company of people who bring ideals and hard-headed realism together.

We do it in the way we carry out our mission in the service of people who need affordable housing and as a profit maker for our shareholders.

We do it in the way we are fighting against discrimination in housing.

We do it through the respect we show our customers and our commitment to excellence in all that we do.

We do it in our corporate and individual giving to communities, schools and the homeless.

We do it in developing programs to expand opportunities for minority and women-owned firms, programs such as our new ACCESS initiative to help minority- and women-owned securities firms expand their business in the \$1.7 trillion market for agency securities.

We also do it in reaching out to give more of our other business to minority and women-owned firms.

And we're doing it in our efforts to change what was once Fannie Mae's single-culture management to one that is truly multi-cultural.

For those of you who have been here for some time, you can recall that up until 1981, only two women had ever served on our

Board of Directors. The company, in 1981, had one woman officer and very few women in the management group. But a man of decency and vision vowed in 1981 to change that and he did. David Maxwell was not content to ignore the brainpower of half the population nor their training, experience and abilities. Today, we have three women on our board, 128 women in our 361-member management group, including 35 women officers. And Fannie Mae is stronger for it.

Before 1981, only three minority members had served on our Board of Directors and we had no minority officers or minority members of our management group. Today, we have six minority Board members and nine minority officers. Minorities represent 15 percent of our management group. And Fannie Mae is stronger for it.

I believe we have among the most diverse group of men and women of any corporate board in America. This diversity in our board room is one of the fundamental strengths of our company.

Last February, I formed our Diversity Task Force, headed by our President, Larry Small. I took that step because a number of Fannie Mae employees came to me and made the case that we were not doing all that should be done.

The ten-member Task Force and the Task Force Advisory Group worked long and hard. Their work and the recommendations they made have become the foundation upon which we are building our action program. Not only did they provide us with their clear thinking, but their representatives visited 20 companies that have the reputation of excelling in diversity. They took what they found to be the best among all those companies and incorporated it into the recommendations they made. I'm convinced as a result that we can be among the best in corporate America.

I'd like to thank very much the members of the Task Force and Advisory Group for the work they did. They did an outstanding job.

Through the work of the Task Force and Advisory Group, we have issued a statement of corporate philosophy of diversity, which each of you received in May. That philosophy is based on respect for one another and the recognition that each person brings his or her own unique attributes to the corporation. A draft of Fannie Mae's employee Code of Conduct was circulated with our statement of philosophy. That Code says:

"All employees must conduct themselves in a manner that shows the respect we have for each other and the value we place on civility in our work force and in our workplace."

A final Code will be circulated in early December for each employee to sign.

But issuing statements is one thing. Moving the spirit is another. It takes people to make real what is a goal on paper and we are extremely fortunate to have three people who are nurturing the spirit that moves us.

We're working with Dr. Price Cobbs, widely acknowledged as one of our country's foremost diversity management specialists. He is having a significant impact on the thinking of all of us who are working with him.

Many more of you know Leon Hollin, our new Vice President for Human Resources, and Maria Johnson, our new Vice President for Diversity. In the short time each has been with us, they have made significant contributions. Leon looks at diversity from a Human Resources and Career Development perspective. And he has a very strong and positive perspective developed during 22

years of dealing with human resources and operational issues at IBM.

Maria Johnson has been here for just three months, but I see and feel the progress she is making almost daily. Her success will be our success and it will come out of her fruitful career in employment law, employee relations, and in dealing with problems people face on their jobs. Maria's an extraordinary person and a valuable addition to Fannie Mae.

With Leon and Maria here, we are moving faster now toward our goals, but we still have a long road to travel.

I would like to share my vision of the future with you as we travel down that road together.

I see a company in which people from widely diverse backgrounds work together sharing a core of common values of honesty, integrity, hard work, and mutual respect.

The company I see is stronger and more effective and, yes, more profitable, because we are using all the human resources our society has to offer.

My vision is one in which every Fannie Mae employee will have a career plan with a path that can lead each to his or to her full potential.

Fannie Mae must be a company in which everyone is treated fairly—where if someone gains, someone else does not need to lose. We must be a company free of any form of discrimination where the only challenge a person has to face is good, hard competition.

I see a company that uses the richness of our individual differences as a positive force in our conduct with each other and those with whom we do business.

In my vision, Fannie Mae's work environment allows us to recruit the best talent and retain the best employees.

Finally, I see a company that leads by example and sets the standards for diversity in corporate America.

I think you share my vision. I certainly hope that you do. If you don't, please let me know. As a community, we will discuss our progress and we'll work out any differences that we have.

In closing, I'll make this commitment to you today. When we meet two years from now, every employee at Fannie Mae will have a career plan and a career path to follow. If we meet this diversity challenge as we've met all other challenges in the past, the only obstacles along the career path will be those self-imposed by each individual, not imposed by intolerance for our differences.

That is our challenge. Let's work together once again to overcome the obstacles. Let's work together to embrace a new standard of success at Fannie Mae.●

#### LIVE PERFORMING ARTS LABOR RELATIONS AMENDMENTS

● Mr. ADAMS. Mr. President, the end of a legislative session invariably results in several meritorious proposals failing to receive the consideration and debate they deserve. One such issue in the 102d Congress was S. 492, the live performing arts labor relations amendments, of which I was an original co-sponsor. This proposal was first considered in Congress 10 years ago, so it can hardly be considered a new idea. S. 492 was favorably reported out of the Senate Labor and Human Resources Committee, on which I serve, on September 16, 1992.

Unfortunately, the administration chose to deliberately confuse the issues addressed in S. 492, when Secretary of Labor Martin wrote to the Senate alleging that this bill would "create a special interest exception in the law for labor organizations in the live performing arts industry." In a minority report filed by six Republican members of the Labor and Human Resources Committee, it was alleged that to reopen the National Labor Relations Act would create an unprecedented exception to sound and longstanding principles of labor law.

I find it oddly ironic that some of the very Senators who spend much of their time around here fighting to undermine current standards protecting the American worker, whether under the Davis-Bacon law, minimum wage reform, the Jones Act, civil rights legislation, and a host of other standards, now present themselves as the unselfish guardians of sound principles of labor law. The representations made in Secretary Martin's letter make me wonder whether anyone from the Department of Labor even bothered to attend the hearings on S. 492.

The inferior bargaining position occupied by musicians is a historical reality. Very few of them ever achieve the level of fame that allows them to negotiate payment levels that provide them with a living wage. In the take it or leave it world of night clubs, dance halls, lounges and bars where many of these dedicated and talented artists toil, the deplorable conditions and substandard wages they face are a national disgrace. The testimony of recording star Lee Greenwood, whose fame has allowed him to rise above the slumlike conditions too many performing artists face every day, should be read by every Member of this body.

I regret that some Members chose to block an opportunity to have the full Senate openly debate and vote on S. 492. They operated within their rights under the Senate rules, but that did not make their actions right by any standard of fairness or equity. It is axiomatic in our democratic society that justice delayed is justice denied. Our live performing musicians deserve to have their day to tell their story to the American people, and to have the elected representatives of this Nation vote whether to address their grievance, or to continue relegating them to second-class status under American labor law. We should have addressed their concerns this year, for this injustice will not quietly fade away. I sincerely hope that the 103d Congress will, at long last, address this matter.●

#### TRIBUTE TO DR. TERENCE M. BROWN

● Mr. PRESSLER. Mr. President, I rise today to pay tribute to Dr. Terence M. Brown. When Dr. Brown died of cancer

on Sunday, October 4, 1992, my home State of South Dakota lost a very dynamic educational leader.

Dr. Brown served as the president of Northern State University [NSU] from 1982 until his death. He was committed to his goal of making NSU a high-quality school where students could get a great education. NSU is located in Aberdeen, serving nearly 3,000 students in the northeastern corner of South Dakota.

In addition, Dr. Brown was active with the South Dakota Board of Regents; served as director for the American Council of State Colleges and Universities committee on undergraduate education; and the American Council on Education Advisory Committee on self-regulation initiatives.

Many community groups also benefited from Dr. Brown's visionary leadership. These included the Chamber of Commerce, Aberdeen Regional Airport, Aberdeen Area Resource Center for Women, Brown County United Way, and the Aberdeen Area Arts Council. He will be greatly missed.

I ask that an article from the Aberdeen American News be included in the RECORD.

The article follows.

#### PROGRESSIVE S.D. EDUCATOR DIES AT 50

ABERDEEN.—Terence Brown, a university president who added graduate-level courses and helped change the name of his school to Northern State University, died Sunday of cancer. He was 50.

"He was a sound, traditional academician, but a real advocate of the newer technologies. He pushed this campus into the computer age," said Thomas Flickema, who has been Northern's executive vice president since Brown was granted a sabbatical in July.

Brown, who had been battling cancer for 2½ years, had been Northern's president since 1962.

Brown died about 8:30 p.m. Sunday at St. Luke's Midland Regional Medical Center in Aberdeen.

His funeral will be at 2 p.m. Wednesday at St. Mary's Catholic Church in Aberdeen. Burial will be at St. Mary's Cemetery.

Flickema said Brown was a dynamic leader.

"Tremendous changes took place under his leadership. The institution changed in terms of the nature of the faculty and of the types of programs we had," he said.

"Dramatic transformations took place on the campus. It was during his period that the Barnett (athletic) Center was built; the whole campus beautification effort was carried out."

Brown came to Northern from Arkansas State University, where he had been a vice president and an English professor.

During Brown's years, the number of NSU faculty with the highest possible advanced degree rose from less than half to nearly three-fourths. Brown recruited professors who were "consummate professionals," Flickema said, "excellent teachers who also conducted research and published the results in respected journals."

Northern's vice president for student affairs, Beth Wray, said Brown's promotion of Northern did meet with some resistance. "The changes he made weren't always popular, but he persevered."

During Brown's tenure, Northern added a master of arts in teaching and a master of business administration. The administration offering is in conjunction with the University of South Dakota.●

#### LIVE PERFORMING ARTS LABOR RELATIONS AMENDMENTS

● Mr. D'AMATO. Mr. President, we have now closed the final chapter on the 102d Congress. While many deserving bills passed in the Senate, many more were never acted upon. One bill that did not pass and that I supported would rectify a problem that currently impacts the collective bargaining abilities of performing artists.

As most of my colleagues know, those who perform live music generally do not spend more than a night or two at a single venue. Their employment can be sporadic and haphazard—in ways similar to how the construction and garment industries function. The only difference is that workers in these industries were granted and now enjoy certain labor protections. Live performers do not.

We have all heard the salary levels of performers like Michael Jackson, but, the overwhelming majority of performers cannot dictate their wages and working conditions and must struggle to be able to share their talents for a decent living. Without the ability to collectively bargain, these musicians can and sometimes do face a lifetime of financial instability.

To address this concern, Senator SIMON and I introduced legislation, S. 492, to grant employee status and the right to organize and bargain collectively to live performing artists. This legislation would have given performing artists a chance to seek and obtain representation to ultimately be able to improve their standard of living.

While this bill was not acted upon in the 102d Congress, there is hope for the 103d Congress. The spirit of fairness behind S. 492 is such that expectation is high on passage within the next Congress. I will continue to support this legislation and look forward to its passage.●

#### SENATOR STEVE SYMMS

● Mr. PRESSLER. Mr. President, the Senate certainly will miss the strong voice of Senator STEVE SYMMS. He is a dedicated spokesman for conservative principles. He speaks with conviction for the conservative viewpoint. He has been a serious legislator who has earned respect from both sides of the aisle.

Senator SYMMS' legislative accomplishments are impressive. He was a key legislator on numerous pieces of transportation legislation. He also has been active on a broad spectrum of environmental issues, working tirelessly to protect and advance the best inter-

ests of America. He expressed an exceptional common sense viewpoint on spending issues and is one of the most vigorous supporters of the second amendment to the U.S. Constitution.

STEVE SYMMS has never wavered in his conservative philosophy. This dedication was especially apparent in the area of arms control. He is one of the greatest defenders of our national security.

STEVE SYMMS is a man of courage, compassion, and ability. He is an energetic advocate for the people. He has taught us many things over the years and his presence in the Senate will be missed greatly in the years to come. I wish him all the best.●

#### LIVE PERFORMING ARTS LABOR RELATIONS AMENDMENTS

● Mr. AKAKA. Mr. President, on September 16, 1992, S. 492, the live performing arts labor relations amendments, was reported by the Committee on Labor and Human Resources. As an original cosponsor of this important legislation, introduced by my distinguished friend from Illinois, Senator SIMON, I was grateful for the committee's favorable consideration and hopeful that the Senate would have the opportunity to act on S. 492 before adjournment. Unfortunately, opposition from the administration and a small group of Senators has denied the Senate a chance to debate the merits of this bill.

S. 492 would simply give performing artists the right to negotiate the terms of their employment through the collective bargaining process. Currently, the vast majority of performing artists working limited engagements, either individuals or groups, have restricted bargaining power to secure fair wages and proper labor conditions. Artists in this category, working at limited engagements, constitute 85 percent of the entertainment industry. Most opportunities for aspiring entertainers and musicians are in the casual engagement field. They rarely work for one employer long enough to vote for union representation or bargain for decent wages and conditions.

At committee hearings this past May, witnesses told of the difficult conditions and substandard wages encountered by professional musicians working in the entertainment industry today. Often the fame and fortune achieved by very few performing artists obscure the fact that the overwhelming majority of professional musicians and entertainers are talented, hardworking, taxpaying, middle-class Americans who struggle to make ends meet and support their families. These individuals seek the same fair and equitable treatment extended to other Americans whose talents and labor are protected by law.

Mr. President, for over a decade we have tried to secure the right to bar-

gain for decent wages and conditions for performing artists. My former colleague, Senator Spark Matsunaga, introduced the original live performing arts amendments bill during the 98th Congress. It is unconscionable that any group of American workers should wait so long for justice and equality under our Nation's labor laws. It is my hope that the 103d Congress will address and resolve this issue early in the first session. •

#### CONGRATULATIONS TO MARY ANN MERTENS

• Mr. SEYMOUR. Mr. President, today I wish to pay tribute to Mary Ann Mertens of Claremont, CA, who will be installed as president of the Auxiliary to the American Dental Association [AADA] on October 20, 1992. Ms. Mertens' presidency caps a 29-year commitment to staunchly promoting dentistry and dental health awareness. It also exemplifies her belief that dentistry is a family business.

Like a majority of dental spouses, Ms. Mertens works with her husband, John, in their family dental office. In addition, they have raised two daughters. It was by combining her interests in these two areas Mrs. Mertens developed dental health education programs for school children. These programs featured puppet shows for youngsters and inservice training on dental hygiene for teachers. She has also held every leadership position including president of the auxiliary to the Tri-County Dental Association. Furthermore, she has served as president of her PTA and was named Mother of the Year in 1985 for her service and devotion.

On the national level, she has been involved in every aspect of the AADA from grassroots political activism to helping promote dental awareness in the general public. She has served as vice-president, recording secretary, and legislative committee chairman.

I congratulate Mary Ann Mertens on her presidency and for being a role model for dental spouses. •

#### TRIBUTE TO SENATOR WARREN RUDMAN

• Mr. PRESSLER. Mr. President, I rise to pay tribute to our colleague from New Hampshire, Senator WARREN RUDMAN, who will be retiring from the Senate at the end of this Congress. He deservedly has earned great respect in this Chamber.

Independence and steadfastness are the characteristics we readily recognize in WARREN RUDMAN. After graduating from Syracuse University in 1952, he volunteered for service in the Korean war, during which he was awarded a Bronze Star as an infantry company commander. After graduating from law school, he served 6 years as

New Hampshire's attorney general—experience that served him well in his activities and assignments in the Senate.

WARREN RUDMAN has never shirked from challenging tasks. He successfully fought to preserve the Legal Services Corp., which provides legal assistance in noncriminal proceedings to persons financially unable to afford legal services. He has persevered in getting funding for the Low-Income Home Energy Assistance Program, which is of great importance to low-income families in New Hampshire and elsewhere in the colder regions of the country.

On broader fronts, Senator RUDMAN has served as vice chairman of the Senate Iran-contra Committee and accepted the thankless task of serving on the Senate Select Committee on Ethics—one of the toughest jobs in the Senate. He did a masterful job in guiding his friend and associate David Souter through Senate confirmation on appointment to the U.S. Supreme Court. WARREN RUDMAN, of course, also is well known as cosponsor of the Gramm-Rudman-Hollings budget control measure of 1985.

It is ironic that the failure to control the budget and the stalemate in which we seem to find ourselves apparently led to Senator RUDMAN's decision to retire from the Senate. I understand that, and while he will be continuing his fight on this cause away from this Chamber, he can be assured there are those of us here who will continue striving to get our fiscal house in order. It is the most important problem this Nation faces. We will greatly miss our friend and colleague. I wish him well in his new endeavors. •

#### PASSAGE OF S. 1709 THE FARM CREDIT SYSTEM SAFETY AND SOUNDNESS ACT OF 1992

• Mr. LEAHY. Mr. President, tonight the Senate will pass the Farm Credit System Safety and Soundness Act, the Government sponsored enterprise [GSE] reform bill for the Farm Credit System which was required under the Omnibus Budget Reconciliation Act of 1990 [OBRA].

The large losses within the savings and loan industry and the near bankruptcy of the Federal deposit insurance have raised concerns about the Government's exposure should any of these enterprises fail. Fortunately, according to these Government agency reports, the current GSE's do not now pose any significant risks of losses to the U.S. Treasury.

A GSE is a privately owned, federally chartered, financial institution that has specialized lending powers and the benefit of an implicit Federal guarantee that enhances their ability to borrow capital. Like any private financial firm, these enterprises are subject to financial risks. These include losses arising from borrowers' default, ad-

verse changes in interest rates, poor management decisions and unfavorable business conditions. It is widely believed that a default by any GSE would reduce that market value of all GSE obligations, perhaps, significantly, and could endanger the stability of the entire financial system. This expectation demonstrates the need for Congress to act now, while there is little risk, to avoid the need to respond to a crisis at a later date.

The examinations of risk to the Government posed by the Farm Credit System revealed that the proper regulatory structure was already in place for the FCS and therefore this bill's primary focus was on repayment of the debt from the 1987 assistance. The bill ensures that the assistance provided to troubled Farm Credit System banks is repaid in full and the tab is not left to be picked by the taxpayers.

The Agricultural Credit Act of 1987 added provisions to the Farm Credit Act authorizing the Farm Credit System Financial Assistance Corporation [FAC] to issue bonds to finance assistance to financially-distressed FCS institutions, and obligating the FCS institutions to repay the principal and interest on those bonds.

The language in the bill we pass tonight clarifies and strengthens the FAC debt repayment provisions of the 1987 act. Overall, the intent of the bill is restate the FCS's obligation to repay all of FAC debt, including the Treasury-paid interest, and to permit these repayment obligations to be managed in a more businesslike manner. The managers believe this legislation satisfies the concerns and objectives that have been expressed by the Treasury and the Farm Credit Administration in the area of FAC debt repayment, and does it in a way that is less disruptive of the FCS operation and the development of the FCS financial strength, and more faithful to policy determination made by Congress in the 1987 act.

The bill requires the farm credit banks to set aside funds on a yearly basis to ensure that financial assistance is repaid to the U.S. Treasury when this debt is due. Under this framework, the FCS is required to begin immediately to build capital for the repayment of all special purpose bonds issued for financial assistance to FCS institutions and other obligations stemming from that assistance. The Farm Credit System Financial Assistance Corporation has issued approximately \$1.3 billion in bonds for assistance to the Farm Credit System—all of which will be repaid, with interest.

The managers wish to clarify that the original Senate bill included two provisions which were based on recommendations by the Department of the Treasury to improve the safety and soundness of the operation of the Farm Credit System beyond debt repayment. The GSE report to Congress by Treas-

ury, indicated that the FCS banks and associations lack consistent standards for managing the risks that they confront, and proposed a statutory mechanism to ensure that the FCS institutions establish uniform financial conditions and performance standards and require compliance with such standards by the FCS institutions. This effort would encourage greater self-discipline by FCS institutions and would reduce the risk of default in payment of FCS obligations, thereby reducing the risk to the Federal Government.

One provision in the original Senate-passed bill was structured to encourage the signing of a voluntary interbank agreement. The agreement was designed to carry out the intent of the Treasury proposal in terms of risk management, but rely on the expertise of the FCS for its precise design. Such an agreement would not undercut the mission and purpose of the Farm Credit System, but instead impose sound management practices into FCS lending objectives. These standards would be in addition to the Farm Credit Administration [FCA] minimum regulatory requirements and none of the provisions in the agreement were to interfere with the regulation of FCS by the FCA.

The managers are aware that the banks signed an agreement putting such a system of performance standards into effect as of January 1992. Recognizing that private agreements are likely to work better than Government mandates, the provision was not included in the House-passed bill nor in the bill we are passing for these reasons. However, the Senate Committee on Agriculture, Nutrition, and Forestry remains interested in the implementation of the voluntary performance standards agreement.

The second provision further attempted to protect taxpayer resources by requiring that association capital will be called upon to shore up financially weak FCS banks if the System's insurance fund has fallen below 80 percent of the secure base amount and other conditions are met.

The Treasury Department proposed a statutory change to require the associations that own a financially troubled bank which has received assistance from the Farm Credit Insurance Corporation, to subscribe additional capital in the bank. The Treasury report concludes that the associations directly benefit for the assistance provided by the Insurance Corporation, and therefore should be required to provide support to the bank in the form of additional capital. The Treasury proposal also intended to create more financial discipline on the associations themselves, as well as their bank.

In the original Senate bill, the provision on access to association capital was designed to reduce the potential of

a district bank failure while its related associations were holding substantial capital. The managers note that the Insurance Fund was established to protect the taxpayer and investor, and to be utilized as the primary source of funds before any further action would be taken by the Federal Government. This provision on association capital would have acted as a further cushion, or second layer of protection to the U.S. Treasury in the event of the financial collapse of a System bank.

However, it was noted that this proposal could establish a disincentive for the associations to build capital in excess of the amount needed to meet its own minimum capital standards. Another concern was that the required purchase of additional stock in a bank could result in further weakening of the financial condition of a troubled association. Because of these concerns the provision was not included in the bill today for passage. The bill does require that GAO report to Congress the implications of allowing the insurance fund the authority to assess associations directly to ensure all FCS capital is available to prevent losses to investors and taxpayers and I would expect that the Senate Agriculture Committee would revisit this issue if evidence is presented to warrant further action.

I would like to also commend those who have worked so hard to develop a compromise solution to the Federal Intermediate Credit Bank of Jackson [FICBJ]. They have endeavored to develop a compromise which is fair to all parties and which should result, finally, in a resolution to this issue. I would however, like to address one aspect of the FICBJ settlement. A provision in the compromise makes resources of the Farm Credit Insurance Fund available to facilitate a merger should FICBJ merge with the Farm Credit Bank of Texas.

Under the bill, the Farm Credit System Insurance Corporation is directed to "expend amounts from the Farm Credit Insurance Fund to the extent necessary to facilitate the merger prescribed in the plan." The intent of the language, Mr. President, is not to provide an open-ended call of the insurance fund assets.

The bill contains a limitation on the amount of assistance which can be provided from the fund. It states that the amount of assistance shall not exceed "that required to maintain book value per share of stockholders' equity at the same value reflected on the most recent audited financial statements of the Federal Intermediate Credit Bank of Jackson and the Farm Credit Bank of Texas prior to or effective with the date of the merger." While this subsection is headed "Maintenance of Book Value," the intent of the subsection is not to direct that a specific level of assistance be provided, nor that the book value of stock be main-

tained on an ongoing basis with assistance, but that the assistance not exceed what would be necessary to remedy any dilution of the book value on the date of the merger. Mr. President I hope this clarifies this provision. A specific limit is important for those institutions which pay assessments to capitalize the insurance fund, and it is important from a budgetary perspective since expenditures out of the fund count as outlays of the Federal Government.

The passage of this bill and its subsequent passage in the House will conclude over 4 years of effort by both the administration and Congress on GSE reform. I urge my colleagues to support the prompt passage of this legislation.●

#### LEONARD PELTIER

● Mr. ADAMS. Mr. President, last November, my friend Jackson Browne, the singer and songwriter, asked me to look into the case of Leonard Peltier, a native American currently serving a sentence of life imprisonment as a result of a shootout with Federal agents that occurred near Wounded Knee on the Pine Ridge Indian Reservation in South Dakota on June 26, 1975. My lengthy statement regarding this matter was printed in the RECORD of Friday, June 26, 1992, the 17th anniversary of the date on which two FBI agents and a young native American lost their lives in what the Honorable Gerald W. Heaney of the U.S. Court of Appeals for the Eighth Circuit describes as "a deadly firefight" for which "the U.S. Government must share responsibility with the native Americans."

Unfortunately, over the past 17 years, our Federal Government has made no effort to assume any responsibility for the tragic events that occurred at Wounded Knee. On the contrary, the Government's actions before, during, and after the conviction of Leonard Peltier continue to raise questions regarding the fairness of his conviction, the adequacy of the evidence presented against him, and the justice of his continued incarceration. For those reasons, I urged President Bush to meet with the Honorable DANIEL INOUE, chairman of the Senate Select Committee on Indian Affairs, to discuss the Peltier case. It is most regrettable that Senator INOUE's request went unanswered, and deeply troubling for me to learn that FBI agents later questioned private citizens regarding Senator INOUE's motives in supporting Presidential consideration of the matter.

I remain hopeful that the upcoming hearing on Leonard Peltier's request for a new trial will be granted, and the American people will at last have all the facts presented fairly before an unbiased judge and jury. The thousands of pages of documents the Federal Government, to this day, refuses to release might well contain the answers that

have eluded those who feel justice was not done in this case. What possible national security grounds can be honestly invoked to withhold documents regarding the Peltier case? After 17 years, it is time for the Justice Department to come clean, and turn over all documents regarding this case.

Mr. President, even the legal systems of democratic societies sometimes err. Consider the nearly two dozen Irish citizens who have been released by Great Britain in recent months, after being erroneously tried and convicted for alleged terrorist activities on behalf of the Irish Republican Army. I believe it to be a sign of strength for a free society to admit its mistakes and take steps to rectify them. Consider as well the State of Israel, now considering the conviction rendered, based on multiple eye witness testimony, against a man who now appears to have been misidentified. If Great Britain and Israel have the self confidence to reexamine judicial decisions that might be in error, surely this great Nation can do so as well.

I do not believe the questions regarding Government conduct in the case of Leonard Peltier should stand or fall based solely on the eight circuit's decision whether to grant a new trial. The U.S. Senate has a role to play as well, and that is why I wrote to Senator JOE BIDEN, chairman of the Senate Judiciary Committee, on August 14, 1992, suggesting that the Subcommittee on the Constitution hold hearing on these matters. I hope that the 103d Congress will prove receptive to that suggestion. I ask that my letter to Chairman BIDEN, together with an editorial on the Peltier case from the Boston Globe, be printed in the RECORD.

The material follows.

U.S. SENATE,

Washington, DC, August 14, 1992.

Hon. JOE BIDEN,  
Chairman, Senate Committee on the Judiciary,  
Dirksen Building, Washington, DC.

DEAR MR. CHAIRMAN: I am writing in further reference to my letter of July 1, 1992, in which I urged that the Senate Judiciary Committee consider undertaking an inquiry into activities of the Federal Bureau of Investigation in connection with the case of Leonard Peltier. As I indicated, the ongoing refusal of the federal government to release literary thousands of pages of documents pertaining to the prosecution and conviction of Mr. Peltier continues to undermine public confidence that justice was done in this case.

Yesterday's Washington Post carried the enclosed article containing allegations of very recent and deeply troubling actions by an FBI agent whose conduct has been a source of controversy since the time of Mr. Peltier's extradition from Canada. As Judge Gerald W. Heaney, United States Senior Circuit Judge for the Eighth Circuit stated in his letter to Senator Daniel Inouye, "... the FBI used improper tactics in securing Peltier's extradition from Canada and in otherwise investigating and trying the Peltier case. Although our court decided that these actions were not grounds for reversal, they are, in my view, factors that merit consider-

ation in any petition for leniency filed." It now appears that one consequence of Senator Inouye's decision to urge President Bush to consider reviewing the Peltier case has been to trigger an FBI field investigation into his motives. I hope you agree that any United States senator, and particularly the chairman of the Senate Select Committee on Indian Affairs, should be free to communicate with the President of the United States on a major public issue affecting Native Americans without having FBI agents questioning public citizens on the matter.

As one of several members of Congress who have appeared on various *amicus* briefs filed in connection with the Peltier case over the years, I would be most disappointed to learn that the exercise of our constitutional rights might be construed as legitimate grounds for FBI action. However, the conduct described in yesterday's *Washington Post* article appears consistent with the government conduct criticized in Judge Heaney's letter, and causes me to again urge that your committee undertake an investigation of this entire matter.

As a former United States Attorney for the Western District of Washington, I have personal knowledge of the outstanding work done by the Federal Bureau of Investigation in protecting the public safety and investigating criminal activity. However, I strongly believe that a free society must demand accountability and responsible behavior from all citizens, including FBI agents. The continuing refusal of the Federal Bureau of Investigation to release thousands of documents needed for a full and complete understanding of the tragic events that occurred on the Pine Ridge Indian Reservation over seventeen years ago is simply inexcusable.

I do not believe this nation can afford to allow the Russian KGB to set a standard for disclosure of archive materials and past activities that is more open and honest than the FBI's approach to the Peltier case. In addition, I strongly feel the allegations that a FBI agent interrogated a private citizen regarding the lawful and proper actions of a United States senator deserves the attention of the Senate Judiciary Committee. I would respectfully suggest that the Subcommittee on the Constitution would be a proper venue for such an inquiry.

Please feel free to contact me directly if you have any additional questions or comments regarding my interest in this matter.

Sincerely,

BROCK ADAMS,  
U.S. Senator.

#### UNDOING A MISCARRIAGE OF JUSTICE

Shortly before noon on June 26, 1975, two FBI agents were killed on the Pine Ridge Sioux Reservation in South Dakota. Two Native Americans, brought to trial a year later, were found not guilty of the murders. A third Native American, Leonard Peltier, was brought to trial almost a year after that and, while almost certainly as innocent as the first two men, was convicted of the murders.

Peltier, who is serving two consecutive life sentences at the federal penitentiary in Leavenworth, Kan., is now the subject of an intense effort to undo a serious miscarriage of justice—through a new trial or by a presidential commutation.

The case has attracted advocates who are passionately convinced of Peltier's innocence and, through the documentary "Incident at Oglala," have gained a national audience for their cause.

It is a case that deserves to be reopened and a cause that deserves support.

Suspicious about the government's case are immediately raised by the curious "transformation" of a red pickup truck, which agents reported chasing on the reservation, to a white-over-red van, which happened to be a vehicle used by Peltier.

Throughout the investigation, the ballistics evidence was handled in an incredibly slipshod manner. The only thing certain is that none of the shell casings found near the agents' bodies could definitely be matched to a weapon known to be used by Peltier.

It was Peltier's bad fortune that he was not tried—if he was to be tried at all—in 1976, with the two men who were found not guilty. Peltier had fled the reservation after the shooting and crossed into Canada. To win his extradition, US prosecutors relied heavily on a now-discredited affidavit from a Native American woman who placed Peltier at the scene of the shootings.

But the major issue that will be argued this fall at hearings on motions for new trial is that the prosecution has changed its theory of the case.

As Eric Seitz, a member of Peltier's defense team, explains it, the original conviction was obtained by convincing the jury that Peltier had himself shot the two agents. But as new evidence has been discovered—and some of the government's original evidence discredited—the prosecution now argues that Peltier was an aider and abettor.

Since those who aid and abet in the commission of a felony can be found equally guilty with the actual perpetrator, Peltier could still be found guilty. However, the two men with whom Peltier should have been tried in 1976 were acquitted because the jury believed they had been shooting at the agents in self-defense.

Leaving aside that an anonymous Native American has claimed to have been the actual murderer, had the judge at Peltier trial in 1977 not accepted the prosecution's argument that Peltier was the perpetrator, his attorneys could have pursued the self-defense argument that won not-guilty verdicts for the two men at the 1976 trial.

Among Peltier's strongest advocates is the author Peter Matthiessen. In an account of court hearings late last year, he described the case as "the most significant murder trial in this country since Sacco and Vanzetti."

New evidence in the case has cast doubt on the long-held belief that both Sacco and Vanzetti were wrongly convicted and wrongly executed. The newly discovered evidence in the Peltier case strongly argues that he was indeed, wrongly convicted and is being held. Justice requires a new trial or a presidential commutation of his sentence.●

#### SENATOR LARRY PRESSLER'S ACTIVITIES IN FOREIGN RELATIONS DURING THE 102D CONGRESS

● Mr. HELMS. Mr. President, as the 102d Congress draws to a close, I feel it essential, as ranking member of the Senate Foreign Relations Committee, that the CONGRESSIONAL RECORD reflect some of the accomplishments of the distinguished Senator from South Dakota [Mr. PRESSLER]. Senator PRESSLER has been active in the work of the Foreign Relations Committee.

For example, the Foreign Relations Committee is charged with the responsibility to consider the nominations of

numerous nominees to serve as ambassadors to foreign countries. One of Senator PRESSLER's goals, and one that is extremely important to his home State of South Dakota, is to seek additional markets for U.S. agricultural products.

Once confirmed, these ambassadors are in a unique position to help evaluate export opportunities for expanding markets as well as identifying export opportunities for new products. Senator PRESSLER can be counted upon to ask these nominees questions about their commitment to increasing the export of agricultural products to the countries in which they will represent the United States, as well as their willingness to help establish and promote agricultural trade missions between the United States and foreign nations.

Senator PRESSLER also has dedicated a great deal of energy to the situation in the former Yugoslavia and to the plight of the ethnic Albanians of Kosovo. He has pushed numerous legislative initiatives related to this issue and has spoken on the subject here on the Senate floor many times over the past several years. Senator PRESSLER introduced S. 2376, the Former Yugoslavia Act, on March 20, 1992. While this body did not take action on that bill, it represented the kind of thorough approach he brings to his work on the Foreign Relations Committee.

The rapidly changing face of the former Soviet Union represents another area of significant activity by Senator PRESSLER. After visiting 10 of the new countries emerging from what was the Soviet Empire in July of this year, Senator PRESSLER presented the Senate with a detailed report of his conclusions and impressions of the efforts in those countries to move away from their Communist past.

With regard to the former Soviet Union, Senator PRESSLER also took a number of legislative steps to ensure that U.S. assistance to the emerging countries is not wasted, or worse yet used to prop up the remnants of the old totalitarian regime. On July 24, 1991, during Senate consideration of S. 1435, the International Security and Economic Cooperation Act of 1991, Senator PRESSLER offered amendment No. 819, which passed the Senate. The amendment placed conditions on aid to the then Soviet Union designed to ensure United States taxpayer dollars promoted the transformation of the Soviet Union to a fully democratic nation based on the principles of government by the people, respect for individual rights, and free market economic opportunity.

This year, during Senate consideration of S. 2532, the Freedom Support Act, Senator PRESSLER continued his efforts to attach conditions to United States foreign aid to Russia. Together with Senator DECONCINI, he offered an amendment to condition aid to Russia on Presidential certification that Rus-

sia is making significant progress toward removing its troops from the Baltic States. A modified version of this amendment passed the Senate on July 1, 1992 and was retained as part of the final bill passed by Congress.

On July 2, 1992, Senator PRESSLER offered another amendment expressing the sense of Congress that the governments of the Russian Federation and Commonwealth of Independent States should immediately begin negotiations toward an orderly, timely and complete withdrawal of troops from the Baltic States and that they have no long-term territorial interests in the Baltic States; such negotiations should be a top priority of the United States and should be raised in international bodies, including the Conference on Security and Cooperation in Europe; and international supervision of the withdrawal process may be necessary. This amendment also passed the Senate.

A third Pressler amendment passed by the Senate to the Freedom Support Act expressed the sense of Congress that United States policy should urge the Russian Government to remove its troops from Moldova, urge parties to abide by a cease-fire and end the economic blockade of Moldova; and an international commission should be established to monitor the withdrawal of Russian troops.

Senator PRESSLER also offered a successful amendment to S. 2532 expressing the sense of Congress that the President urge the Secretary of Treasury to instruct the United States Executive Director to the International Monetary Fund to take concrete steps to support the right of other sovereign and independent states to issue currencies independent of the Russian ruble.

Finally, during the Foreign Relations Committee markup of the bill, Senator PRESSLER offered an amendment emphasizing the important role small and medium-sized businesses are to play in the technical and other assistance programs created by the legislation. This was a good example of the Senator's commitment to small businesses, which is also evidenced by his membership and activities on the Senate Small Business Committee.

The United Nations also is an area of great interest to Senator PRESSLER. This year, for the second time, he has been appointed by the President to serve as one of the congressional delegates to the U.N. General Assembly. On July 29, 1991, during Senate consideration of S. 1433, the Department of State authorization bill, Senator PRESSLER offered an amendment that was agreed to in the Senate regarding U.N. employment of U.S. citizens. The purpose of this amendment was to provide more value for American assessed contributions to a number of U.N. system agencies. A number of U.N. agencies use geographic formulas in their hiring

practices. The amendment encourages the State Department to aggressively motivate these U.N. agencies to increase the number of U.S. citizens working in them.

On another matter related to the United Nations, during the Foreign Relations Committee's mark-up of Senate Concurrent Resolution 89, on March 4, 1992, Senator PRESSLER offered an amendment to recognize June 5, 1992 as World Environment Day. This amendment passed the committee.

As the author of the Pressler amendment restricting U.S. assistance to Pakistan, Senator PRESSLER has been actively involved in efforts to stop proliferation of nuclear weapons. The Pressler amendment, which became law in 1985, states that if the President cannot certify to Congress on a yearly basis that Pakistan does not have a nuclear weapon, United States assistance to that nation will be cut off. For several years, the administration was able to make this certification. However, in 1990, the administration was unable to make the certification. Consequently, as provided in the Pressler amendment, all foreign assistance to that country has been terminated.

In February of this year, Senator PRESSLER discovered that, notwithstanding the language of the Pressler amendment, the State Department was continuing to allow the licensing of commercial sales of military parts and technology to Pakistan. Convinced the State Department had incorrectly interpreted the Pressler amendment, over the next several months, Senator PRESSLER attempted to gain a clear understanding of how the policy had developed.

Because he was not satisfied with the responses he received from the administration, on July 30, 1992, the Foreign Relations Committee held a hearing entitled "Interpreting the Pressler Amendment: Commercial Military Sales to Pakistan." During this hearing, the committee received testimony from Senator GLENN, State Department lawyers and policymakers, and legal scholars experienced in the area of statutory interpretation. I know that Senator PRESSLER remains committed to stopping the proliferation of nuclear weapons and am certain he will continue his good work in this area during the next Congress.

Senator PRESSLER also was actively involved in the ratification process for the Strategic Arms Reduction Treaty [START]. Under the terms of the START Treaty—ratified by the Senate on October 1, 1992—150 Minuteman II missile silo launchers in South Dakota and a similar number in Missouri must be eliminated. START requires the elimination to be carried out either through excavation or explosion. The Air Force has determined explosion would be the more cost effective means of destruction.

Ranchers in South Dakota, who have hosted these missiles since the 1960's, are concerned over the impact the destruction of the missile silos could have on their wells and the aquifers that supply their water. The Air Force prepared an environmental impact statement evaluating the potential environmental impacts associated with the deactivation of the Minuteman II's in South Dakota. In that study, the Air Force acknowledged there is some risk to the water supply in western South Dakota. After meetings with ranchers from his State and discussions with Air Force officials, Senator PRESSLER decided more needed to be done to protect the ranchers' water supplies.

When the Senate considered the START Treaty, Senator PRESSLER offered an amendment to the treaty's resolution of ratification. The amendment was designed to ensure that all possible risk associated with the deactivation of the missile silos is considered and mitigated. Senator PRESSLER's amendment declares the intention that the United States "upon the convening of a session of the Joint Compliance and Inspection Commission shall place on the agenda for discussion the elimination of ICBM silo launchers located in the United States of America in ways that would minimize the impact of such elimination on the environment, including the impact on water wells and aquifers." Senator PRESSLER's amendment passed the Senate and became part of the START Treaty's resolution of ratification.

Mr. President, these are just some examples of the way in which the senior Senator from South Dakota has contributed to the creation of America's foreign policy during the 102d Congress. He is an active member of the Foreign Relations Committee and I appreciate his efforts very much. Representing a small, rural State, he brings a unique and helpful perspective to foreign policy debates.

While he vigorously pursues global issues such as the removal of Russian troops from foreign soil, the proliferation of nuclear weapons, and the reform of the United Nations, he also can be counted on to represent actively the people of South Dakota—whether by questioning ambassadorial nominees on their understanding of and commitment to agricultural trade or through his efforts to ensure that implementation of the START Treaty does not cause unwarranted hardship for his State's ranchers. It is not always easy for our constituents to understand the importance of their Senator's service on the Foreign Relations Committee. However, by reviewing the record, it is quite clear that Senator PRESSLER not only serves the people of this country, but also the people of South Dakota in very important ways through his efforts on the committee. I commend him for his accomplishments during the 102d Congress. ●

#### TRIBUTE TO SENATOR JAKE GARN

● Mr. PRESSLER. Mr. President, I want to pay tribute to a truly outstanding Senator who will be leaving the Senate at the end of this Congress, JAKE GARN.

It has been a great privilege for me to have served nearly 15 years here in the Senate with JAKE GARN. We both were elected to Congress in 1974—he to the Senate and I to the "other body," as we say. Since 1979, I have had the pleasure of working with him in the Senate on goals that, far more often than not, we commonly share.

If we were to speak of only one attribute of Senator GARN it would be that he is a person of great courage. In 1960, during his service in the Navy, he piloted patrol missions along the Yellow Sea and the coasts of China and Korea. He later received the "Outstanding Unit Award" and other medals from the Air Force and National Guard. Everyone will recall his serving as a member of the crew on Discovery flight 51-D that orbited the Earth 109 times at 25 times the speed of sound. Later, Senator GARN was to undergo major surgery in donating a kidney to one of his daughters.

Senator GARN brought that courage with him to the Senate. He is also tenacious, a characteristic which served his State and our Nation well. He commenced working on the central Utah water project when he was water commissioner in Salt Lake City. During his tenure in the Senate, he led the fight to get authorization and funding legislation approved for this massive project that diverts water from the Colorado to the State of Utah.

No one in the Senate has fought more successfully for our Nation's space program or worked harder to strengthen our federally insured depository institutions. I was privileged to serve with him on the Banking, Housing, and Urban Affairs Committee, where he served as chairman during the 99th Congress.

Senator GARN also is a caring person. For example, he has created an annual benefit ski event to assist in funding the Primary Children's Medical Center in Salt Lake City. Primary Children's is the only tertiary care pediatric facility in the area and it serves the entire Intermountain region. I, along with other Members of the Senate, have been proud to join Senator GARN in furthering this important cause.

In this political season, we have heard much about family values. Much can be said about Senator GARN in this respect, but it can all be summed up by pointing to the reason he is retiring from the Senate. He is leaving in order to spend more time with his family—his lovely wife Kathleen and their children. He put it this way in announcing his retirement: "Senator JAKE GARN the Senator would still like to stay, JAKE GARN husband and father is anx-

ious that this day has finally come." Senator GARN will be greatly missed here in the Senate. I wish him all the best. ●

#### FEDERAL RESERVE BANK BRANCH BUILDINGS

● Mr. SASSER. Mr. President, I rise in support of what should be a non-controversial bill. The Federal Reserve System is nearing a statutory cumulative cap on bank branch building construction expenditures. This legislation raises the construction ceiling from \$140 to \$220 million.

The current ceiling was established in 1974. This bill would allow the Fed to meet its estimated construction needs through the year 2005. Throughout the Federal Reserve System, bank branch buildings are aging and outgrowing their space. New construction and branch building expansions are consistent with branch banks' needs to modernize and to grow with their customers.

Branch banks perform services including check collection, fund transfers, and currency and coin processing. These are called price services. The law requires that the branch banks recover that portion of the construction costs attributable to priced services through increased charges to customers. Moreover, the law requires that the branch banks charge market rates for priced services.

As a result, the Congressional Budget Office informs my staff that this bill will have no effect on the Federal deficit and will not cause a problem under the Budget Act.

Mr. President, I ask to include in the RECORD a statement by Wayne D. Angell and Edward W. Kelley, Jr., members of the Board of Governors of the Federal Reserve System, before a subcommittee of the House Banking Committee on May 27, 1992.

The statement follows:

STATEMENT OF WAYNE D. ANGELL AND EDWARD W. KELLEY, JR., BEFORE THE SUBCOMMITTEE ON DOMESTIC MONETARY POLICY OF THE COMMITTEE ON BANKING, FINANCE AND URBAN AFFAIRS

TESTIMONY ON H.R. 4398

Mr. Chairman, you have also asked for our assessment of H.R. 4398, the "Federal Reserve Bank Branch Modernization Act", a bill introduced by Mr. Erdreich on March 5, 1992. This is a much needed action which would remove outdated limitations on the acquisition or construction of branch buildings and should result in the least costly provision of space for Federal Reserve operations.

The construction, expansion, or modernization of Branch Federal Reserve Bank Buildings is authorized in Section 10 of the Federal Reserve Act. Statutory limitations included in the Act place an accumulative ceiling on branch construction. As most recently amended in 1974, the Act places an aggregate cumulative limitation of \$140 million on funds that may be expended on branch construction. Recently completed branch

buildings have exhausted the fund, and as a result, the Federal Reserve is unable to pursue needed branch construction projects.

A few of our Branch buildings need attention not just because they are in excess of thirty years old but more important they do not provide adequate types or amounts of space for check and cash or provide efficient building support systems. The Federal Reserve has experienced significant changes in facility requirements in recent years, primarily related to automation of check and cash, that have further exacerbated the situation. Because many of the affected areas do not lend themselves to renovation—vaults and delivery courts, for instance—efforts by Branch management to obtain needed space through leasing and renovating have only provided temporary relief. While the Federal Reserve does lease space, experience has indicated that the long term costs of leasing are higher than the costs of ownership. Prior to making any decisions related to the provision of space, I want to assure you that we thoroughly analyze the discounted life cycle costs of several alternatives.

The latest analysis of projected building needs from the Reserve Banks suggests that earlier renovations, additions, or new facilities may be required in Birmingham, Nashville, Houston, San Antonio, and El Paso in the next 5 to 10 years. The remaining balance in the Branch Fund prohibits us from addressing these needs. A brief description of each Branch's needs follows.

#### *Birmingham branch*

It is projected that the current facility, constructed in 1927 with an addition constructed in 1959, will soon be unable to accommodate the anticipated facility demands and occupancy levels. The most significant deficiencies are related to inadequate and inefficient operations facilities that include the vault, cash and check processing areas, and secure and general delivery areas. Also, in recent years the basement has been damaged from a continuous influx of subsurface ground water that necessitates continuous operation of a sump pump.

#### *Nashville branch*

The existing 1958 building will soon be inadequate to accommodate facility and occupancy demands. Specifically, the vaults and secure delivery court are either currently or will soon be inadequate to accommodate volume levels.

#### *Houston branch*

The existing 1958 building is presently considered inadequately sized for the long term requirements. Specifically, the vault, cash processing, and delivery court areas are not adequate to allow efficient operations. In addition, should the Houston economy rebound to near previous levels, the Branch's activities and subsequent facility demands will further increase the pressure on the building.

#### *San Antonio branch*

While the present building, constructed in 1956, has been well maintained, the facility does not provide adequate vault, cash processing, and delivery court areas. A significant upturn in the Texas economy will require that additional space be provided.

#### *El Paso*

The present 1957 building exhibits deficiencies similar to those identified in the other branch buildings. Those deficiencies are related to vault, operations areas, and delivery courts.

Branches, even more so than head offices, are primarily engaged in providing services

to financial institutions and the U.S. Treasury. These services include check collection, currency and coin processing and distribution, funds transfer services, processing of government payments, and other services. All costs to provide these services (including building costs) are recovered either as reimbursable expenses (in the case of U.S. Treasury services) or by pricing the services.

To continue providing quality financial services in the most efficient manner, it is important that our facilities remain efficient. The provisions in the proposed amendment to Section 10 would enable us to provide facilities for delivering services efficiently to the nation's financial institutions and the Treasury.

Therefore, we encourage passage of H.R. 4398 and will be glad to respond to questions you may have in this area.●

### INDIAN HEALTH CARE IMPROVEMENT ACT

● Mr. INOUE. Mr. President, as the second session of the 102d Congress drew to a close, the House and Senate passed S. 2481, a bill to amend the Indian Health Care Improvement Act. This bill is vitally important to the lives of American Indians and Alaska Natives. I am proud to have been a sponsor of the bill, and chairman of the committee having jurisdiction over the bill. I thank my colleagues for joining with me to pass S. 2481.

At the time S. 2481, as amended in conference, came before this body, I made a floor statement urging its swift passage, and described many of the bill's important provisions. I would like to take this opportunity to clarify and correct a portion of my earlier comments, regarding section 209 of the bill.

As I noted earlier, section 209 contains language to provide tribal self-determination contractors with the right of recovery for third party insurance purposes. The tribal right to recovery encompasses all expenses which arose under a program administered by the tribal health contractor, including those which arose prior to the effective date of the applicable self-determination contract. This provides an incentive for the collection of existing claims, and prevents insurance companies from receiving a windfall from past discrimination against Indian policyholders.

The effective date of this provision was incorrectly noted in my earlier statement. Section 209 of the Indian Health Care Improvement Act Amendments of 1992 takes effect November 23, 1988. November 23, 1988, is the effective date of section 206 of the act, which section 209 of the 1992 amendments clarifies, to further carry out the intent of the Congress. Although original section 206 has not raised problems for most third-party payors, in a few instances such payors have refused to meet their statutory obligation to pay, resulting in many accumulated claims. The section 209 clarifying amendment

will assure that these payors do not escape their obligations under the law.

Mr. President, I am thankful for this opportunity to clarify the intent of the Congress with regard to the rights of tribal self-determination contractors who exercise their rights of recovery for third-party insurance purposes.●

### SENATOR ALAN CRANSTON

● Mr. PRESSLER. Mr. President, the Senate is losing a respected and most able Senator in Senator ALAN CRANSTON. He has had a distinguished and influential career in the Senate. He provided dedicated service to the people of California and the Nation for 24 years. ALAN CRANSTON stands for causes as diverse as the large State he represents. Serving the needs and requirements of California requires a special talent, and he ably accomplished that task.

Senator CRANSTON's excellent leadership as the elected whip of his party earned my respect. He excelled at mustering the needed votes on issues important to his side. Although we fell on opposite sides of the issues on more than one occasion, I greatly admire his ability and his dedication to accomplishing his goals.

On a personal note, he joined me in January 1982 at Augustana College in Sioux Falls, SD for a hearing on the future of arms control when I was chairman and he was ranking member of the Arms Control Subcommittee. This was the first field hearing on that subject since Hubert Humphrey chaired such hearings 25 years earlier. Senator CRANSTON's personal concern for expressing his views on arms control to the people of South Dakota was greatly appreciated.

The list of Senator CRANSTON's legislative achievements is long. He was a tireless supporter of arms control. He worked hard to ensure the adoption of treaties between the United States and the Soviet Union. I worked with him on the Foreign Relations Committee and witnessed his dedicated efforts up close. We also served together on the Banking, Housing and Urban Development Committee, where he was effective in reforming the Nation's housing laws. His legislative work in that area will help to meet our future housing needs. As chairman of the Veteran Affairs Committee he has shown compassion and understanding for the education, health and housing of veterans. That is something I also greatly admire.

ALAN CRANSTON has an energy and vision that will be sorely missed in the Senate. I know he will continue to work for the causes he believes in, and I wish him all the best.●

### AVOCADO PRODUCTIONS

● Mr. ADAMS. Mr. President, serving as chairman of the Senate Appropria-

tions Subcommittee on the District of Columbia provided me with a special perspective on the difficulties that jurisdiction encounters as a result of the numerous rallies, marches, and other events that occur in the District of Columbia because this is also the seat of our National Government. My experience in reviewing the District's annual budget convinced me that in many respects, the local jurisdiction frequently serves as the involuntary host of major events that consume local resources, without providing any benefit to the city. I was, therefore, pleased to become familiar with the work of an organization that tries to leave a city better off for having hosted an event with which they are associated.

Avocado Productions of Hermosa Beach, CA, has been involved in major cultural, environmental, social change and service events for over 20 years. Those events have occurred throughout the United States, as well as in Canada, Japan, New Zealand, Mexico, and numerous other countries. The work of Avocado Productions has earned the respect of local officials in my hometown of Seattle, WA, and here in the District of Columbia.

During my tenure chairing the District of Columbia Appropriations Subcommittee, Avocado Productions played a lead role in the Earth Day 1990 rally and the candlelight vigil and rally for the UNICEF World Summit for Children in 1990. In 1991, they produced a reception for the National Organization on Fetal Alcohol Syndrome hosted by Bonnie Raitt at the Merriweather Post Pavillion. This year, Avocado Productions handled the Voters for Choice benefit concert at Constitution Hall, the National Organization for Women's March for Women's Lives and rally on the Ellipse and Mall, and the Save Our Cities, Save Our Children march and rally sponsored by the U.S. Conference of Mayors. Each of these events attracted thousands of participants, and the planning and coordination managed by Avocado Productions made each event a success.

Mr. President, the key to Avocado's success in producing major events in the District of Columbia is a direct result of the enthusiastic and inspired leadership of Mr. Tom Campbell, the founder of Avocado. Mr. Campbell earned the respect of numerous District officials for the manner in which these major events were handled. The hundreds of volunteers recruited from local colleges and organizations were responsible for crowd control during the event, and for cleaning up the grounds afterwards. These major volunteer efforts helped reduce the need for local government resources.

I want to extend my appreciation to Tom Campbell and Avocado Productions for their outstanding work here in Washington during my Senate term, and to mention several of the avocados

whose dedication and talent have been part of that effort, including Mary Ahern, Cheryl Barry, Carolyn Bode, Laurel de Leo, Kay Gallin, Ruth Gribin, Ruthann Holbert, Chris Holmes, Margaret Holmes, Abbe Kaufmann, Rich Leach, Susann McMahon, Bee Oliver and Mario Romero.●

#### URBAN DAY SCHOOL

● Mr. KASTEN. Mr. President, I rise today to honor the outstanding educational achievement of Urban Day School in Milwaukee, WI.

For 25 years, Urban Day School has provided a terrific education for young people—based on the solid principle of strong parental involvement.

Urban Day proves what HUD Secretary Jack Kemp, Alderwoman Polly Williams and I have been saying for many years—that in education, as in most areas of human endeavor, choice works. Urban Day participates in the State-funded CHOICE program—and is currently able to offer a quality education to 200 students under this program.

In education, it is results that count. Over 90 percent of the students at Urban Day go on to complete high school—and over one-third of them continue in higher education.

I urge my colleagues to learn from this wonderful example—and support policies that enable America's parents to exercise school choice. That is the way to spark competition and promote educational excellence for all of America's children.●

#### U.S. FIRE ADMINISTRATION REAUTHORIZATION

● Mr. BRYAN. Mr. President, I take this opportunity to discuss further H.R. 2042, the reauthorization legislation for the U.S. Fire Administration [USFA], which was recently signed into law by the President. As my colleagues know, I introduced S. 1690, the Senate companion bill reauthorizing the USFA, which was later unanimously reported by the Commerce Committee, as amended, with language representing an agreement between House and Senate sponsors of USFA reauthorization legislation. The language of S. 1690 as reported was later incorporated into H.R. 2042, which was passed by both the Senate and the House and is now public law.

This new law provides for certain technical corrections to another fire safety measure, the Hotel Motel Fire Safety Act of 1990—1990 act—which I supported. That act was passed to promote fire safety in places of public accommodations by encouraging the installation of sprinklers and smoke detectors in such entities. The technical corrections were made to prevent any possible conflicts between the 1990 act and State and local laws regarding the

fire safety guidelines to be followed by places of public accommodation, as called for in the 1990 act. I believe that these changes, which I discussed in my earlier statements on H.R. 2042, will help to ensure efficient and effective compliance with the 1990 act.

I commend the various interested parties for reaching agreement on these amendments and in working together in good faith to ensure the 1990 act's successful implementation. The National Association of State Fire Marshals, the National Fire Protection Association, and many others in the fire service community all deserve praise for their cooperative efforts and hard work in developing the necessary amendments to the 1990 act.

I also commend the American Hotel and Motel Association for their leadership in this vital area, and for demonstrating their industry's continuing commitment to the safety of their guests. In my own State of Nevada, I can cite successful cooperation with the lodging industry. As that State's former Governor, I oversaw implementation of one of the country's strictest sprinkler laws. Today, Nevada hotels and resorts are among the safest in the world as a result of that legislation. I only can hope that other industries will take their cue from the lodging industry's outstanding example in this regard.

H.R. 2042 represents an important step in fire safety, and I appreciate the efforts of all the interested groups and individuals in securing its passage.●

#### SENATOR ALAN DIXON

● Mr. PRESSLER. Mr. President, the Senate is losing an exceptional individual in Senator ALAN DIXON. A man of integrity, ability, and dedication, his long history of public service gives him a broad perspective on the Government's role in serving people. We can all learn from the wealth of knowledge he has acquired over the years.

ALAN DIXON is a man who can be approached at any time on any issue. He was appreciated on both sides of the political aisle. He is an excellent speaker and vigorous debater who articulately expressed the public worthiness of the causes he supports. His personable style makes him a truly enjoyable individual to be around.

As a Senator ALAN DIXON served his constituency well without conflicting with the best interests of the Nation. He stood by his convictions when it came to supporting or opposing legislation. Whether it was defense programs or environmental regulation, he took a stand and fought to the end for what he felt was right.

He applied common sense to the political process. His efforts on the Armed Services Committee proved indispensable during the post-cold war military scaling down of the military.

Concern for his home State of Illinois mingled with his desire to make sure correct decisions were made by the Pentagon when it came to changing priorities in our defense strategy.

ALAN DIXON will be missed. I am sorry to see him go and wish him well. His gentlemanly manner and warm sense of humor were highly regarded by all who worked with him here.●

#### SENATOR TIMOTHY WIRTH

● Mr. PRESSLER. Mr. President, the Senate is losing an exceptional individual in Senator TIM WIRTH. His dedication and ability to deal with the most complex and significant issues allowed him to stand out in the Senate after only a few years of service in this body. Standing for change, he made a significant difference in his time here in Congress.

Senator WIRTH's legislative agenda stressed the importance of looking to the future. He emphasized the development and application of new technologies, protecting the environment, and national investment to improve our international competitiveness. His concern for telecommunications issues is something I admire and share. His tenacity on this subject has helped to make our communications industry better.

TIM WIRTH is an asset to our Nation, and I am confident he will continue to play a valuable role in our Nation's leadership well into the future.●

#### CONGRESSIONAL PRIVATE PROPERTY VOTE INDEX

● Mr. SYMMS. Mr. President, I rise today to bring my colleagues' attention to the 1991-92 Congressional Private Property Vote Index.

First published in 1990, this index came about in response to increasing public concern over the Government's unwillingness to recognize the fifth amendment to the Constitution. Since Members of Congress are increasingly deluged with voting indexes from radical environmental groups—groups which see any vote in favor of economic development or the free market as a vote against the environment—they may forget the millions of property owners who are burdened with unnecessary Government regulation.

The Private Property Vote Index serves as a reminder to all Members of Congress that the tax-paying citizens of the United States will no longer be a silent majority. If candidates for any political office wish to get elected, they can no longer do so by pandering to extremists at the expense of the hard working Americans.

Throughout Eastern Europe and the former Soviet Union we have seen the effects of not protecting private property. These nations face environmental disasters from which recovery will be

incredibly difficult. Meanwhile, private property owners in America have helped create some of the most environmentally sound land in the world, while maintaining a healthy, growing economy. A strong economy is not detrimental to the environment, as some would have us believe. Instead, it is vital to allowing our children to enjoy the natural beauty of this Nation and to providing them the financial resources to maintain that beauty.

As the sponsor of the Private Property Rights Act, I am pleased to see the publication of the Private Property Vote Index and I commend the League of Private Property Voters for compiling this information. I urge my colleagues to review this index and keep it in mind the next time they are asked to vote on a matter which may impact private property owners.

Mr. President, I ask that the full text of the 1991-92 Private Property Vote Index be printed in the RECORD.

The index follows:

#### 1991-92 CONGRESSIONAL PRIVATE PROPERTY VOTE INDEX (INCLUDING MULTIPLE-USE VOTES) ABOUT THIS INDEX \* \* \*

Why a Private Property Voting Index? In a nutshell, this Index was developed because the Federal government has developed an "attitude" toward private property and private property owners that has become a serious national problem.

The U.S. government today owns more than one-third of the real estate in the U.S., and controls more than half the gross national product of the country through either direct ownership or regulation. And today, the U.S. government is perceived across much of the U.S. as an intrusive "800-lb. gorilla" with a sizable appetite for what property it doesn't own or control.

Egged on by noisy, moneyed anti-property interest groups in Washington, D.C., the U.S. government today actively condemns property to "preserve" it from private ownership, shuts down farms, businesses, and entire communities, dictates where—and often whether—ordinary Americans can graze cattle, prospect for minerals, hunt, fish, or even get into the woods, lakes, streams, or desert, paint, fix up, or even keep a summer cabin, and hauls its citizens off to prison for "environmental crimes" as diverse as filling a "wetland" hole with dirt or planting crops where they've been planted for years.

The 535 members of the U.S. Congress are the 800-lb. gorilla's keepers. They're the only ones the monster listens to—or has to. And they operate in a hothouse atmosphere of noisy, moneyed pressure groups in which only the loudest squeaking wheels get greased. Property owners have gotten short shrift from Congress because they haven't been a noisy, moneyed pressure group. For the most part, property owners aren't aware of what their Congressmen and Senators have been doing about (or to) their property and property rights, because no one's been keeping track.

It was with the idea that someone should be keeping track that the first Congressional Private Property Vote Index was developed two years ago by the National Inholders Association, a nationally-known property owner's organization.

This is the second Congressional Private Property Vote Index and the first to be pub-

lished by the League of Private Property Voters. (This year, the Inholders Assn. is a cosponsor of the Index, along with a number of other organizations.) Like the 1990 Index, this 1991-92 Index presents a snapshot, in 23 key votes (13 in the house and 10 in the Senate), of the attitude of Congress as a whole, and each individual Congressman and Senator in particular, toward private property and property rights.

We're sorry to report that the snapshot is, for the most part, not a flattering one. The Congressional regard for property rights ranges, for the most part, from indifference to downright hostility, based on their votes over the past two years. On repeated occasions, Congress voted by overwhelming margins to condemn private land for everything from new parks to new natural-gas pipelines. They also voted to confiscate or devalue a wide range of private property rights, from grazing rights to mining claims to hunting rights, in that growing Federal "domain" that now covers more than one third of the United States.

The latter items are what we call the "multiple-use" votes, where Congressional decisions officially about Federal land have an impact—often devastating—on private property. Forcing the owner of a mining claim to pay rent to the U.S. government not only devalues the claim, it may put it out of business—an "inverse condemnation" of private property. Similarly, an astronomical hike in "grazing fees" paid by ranchers who own grazing rights on Federal land not only devalues the grazing rights, it makes worthless the rancher's wholly-owned "base" property—another inverse condemnation.

And sharp reductions in national forest timber harvests devalue the rights, guaranteed by a 1908 Federal law, of counties and school districts to 25% of the income from the national forests "in lieu" of collecting a property tax. (They're also an inverse condemnation action against tens of thousands of property owners in timber-dependent communities.)

We've published the 1991-92 Index a bit early—Congress is still in session as we print this—in order to allow you, the voters, time to use the information. We strongly recommend you take the opportunity to "talk turkey" about property rights to your Congressional and Senators before the election, and let them know you know, and are concerned, about how they voted. (We recommend letting your friends and neighbors, and the press, know, too.) Many legislators are able to vote consistently against the interests of their constituents primarily because few of their constituents are aware of it, or are complaining about it. That's something we hope this Index—and your efforts—can change.

Think of this Index as a list of targets: it identifies who the "problem children" are in Congress, the ones who will either have to change their attitude toward property rights, or be replaced in office, if the attitude of Congress as a whole is to change. You have the power—collectively—to do that, with your votes. It's important to make sure Senators and Congressmen, your own and others', know that you intend to do that: not only to vote for your own property rights at the polls, but to encourage as many others as possible to do likewise. You'll stiffen the backbone of your friends (there are some) in Congress, and you'll be confronting the rest with the beginnings of a very large, very noisy "squeaky wheel" whose concerns they can ignore only at their peril.

#### U.S. Senate votes

One of the difficulties in preparing a voting index for the U.S. Senate is that there are

very few recorded votes on any subject. Most bills in the Senate are passed by voice vote, leaving the public unsure who (and how many) voted for or against.

Often, the only recorded votes are on arcane points of parliamentary procedure, such as whether to "table," or kill, some Senator's amendment (or sometimes an amendment to an amendment to an amendment) to a bill that will later be adopted by voice vote or even "unanimous consent." That's true of nearly all the property-rights and multiple-use votes in this *Index*.

Senators also have a habit of passing bills as "riders," or unrelated amendments to other bills; Sen. Steve Symms' landmark Private Property Rights Act got adopted as a "rider" to a big surface transportation bill, for instance, and numerous changes to Federal law affecting grazing rights, mining claims, and communities dependent on natural resources on Federal lands are enacted as "riders" to appropriations bills every year. We've tried in each case to give a "blow by blow" description of what happened, and who was trying to do what to whom.

#### House of Representatives votes

The House of Representatives, with its 435 often violently disagreeing members, decides a lot more issues by recorded vote than the "gentleman's club" of the Senate. The 13 key votes we've selected were fairly clear-cut expressions of Congressional intent on a wide range of property rights issues: whether to condemn private land, supersede private water rights, devalue private land with sharp increases in Federal grazing fees or sharp reductions in national forest timber sales, or eliminate hunting rights.

Many of those key votes occurred during debate on the so-called "California Desert Protection Act," a melange of two new National Parks, a new National Monument, and 8 million acres of new Wilderness Areas the House vote last fall to carve out of private and Federal lands in Southern California. The House voted on whether to reduce the amount of Wilderness (no), permit hunting in some areas (yes), condemn private land (yes), require an economic impact analysis (no), and supersede private water rights in ten states upstream on the Colorado River (yes).

The 1991-92 *Index* also includes a vote on wetlands—the only House of Representatives vote in the past two years on the controversial issue—in which the question was whether to turn the job of defining what a "wetland" was over to the Natl. Academy of Sciences, a private (and sometimes biased) organization, and to leave property owners in limbo for a year and a half waiting for the Academy's decision. The House (happily) rejected that idea—but then left property owners in limbo anyway by refusing to make any decision on its own on the controversial issue.

#### Needed: More recorded votes

The 23 property rights-related votes in this years' *Index* are more than were published in 1990, but still not a large number. And it wasn't for lack of looking; there simply weren't very many. Too many issues are decided by the Congress on the basis of "voice votes" in which no one knows for certain who—or how many—were for or against, or even how many were in the room. Congressmen and Senators are supposed to be accountable to their constituents—but there can be no accountability when there's no record.

When you talk to your legislators (and you will be talking to them, right?), ask them to demand recorded votes, so you are able to find

out who's responsible for what's happening to you and your property at the hands of the Federal government. If your legislators are serious about accountability, they should be interested in doing all they can to help.

#### U.S. SENATE VOTES

Senate Vote #1: Minimizing regulatory "takings" of private property by Federal agencies. This involved an attempt by Sen. Steve Symms (R-ID) to attach his precedent-setting Private Property Rights Act to another bill. Symms' Private Property Rights Act would prohibit new Federal regulations from taking effect until the Attorney General certified they complied with procedures to assess their impact on, and minimize the "taking" of, private property. Symms attempted to make his Private Property Rights Act a "rider," or unrelated amendment, to a highway bill was challenged by Senate Majority Leader George Mitchell (D-ME). The recorded vote was on Mitchell's proposal June 12, 1991 to "table," or kill Symms' rider, the Senate voted "no," 44 to 55—voting, in other words, to keep Symms' Private Property Rights Act as part of the transportation bill. Good guys voted No, too.

(The Senate subsequently passed the transportation bill, with Symms' "rider" attached, by voice vote, but the House deleted the "rider" when they passed the bill later in 1991. A Congressional conference committee dropped the Private Property Rights Act from the highway bill when they reconciled the Senate and House versions. The Private Property Rights Act is still active, however; it was also attached by the Senate (by voice vote) to a bill making the EPA a Cabinet department. That bill is still waiting for a House vote.)

Senate Vote #2: Patenting mining claims. Since 1872, the U.S. government has encouraged prospecting for minerals on Federal land by allowing miners to "patent," or obtain title to, land on which they've discovered and developed to a profitable level deposits of certain hard rock minerals—usually after many years (and thousands of dollars per acre) of work and investment. Sen. Dale Bumpers (D-AR) added a rider to last year's Interior Dept. appropriations bill to impose a one-year ban on using any Federal money to process mining-claim patent applications. The Senate, led by Sen. Harry Reid (D-NV), voted to "table," or kill, Bumpers' rider Sept. 13, 1991, by a narrow 47 to 46 vote. Good guys voted in favor of the miners—and in favor of killing Bumpers' rider.

Senate Vote #3: Increasing grazing fees on Federal land. Sen. James Jeffords (R-VT) added a rider to last year's Interior Dept. appropriations bill increasing fees paid by Western ranchers to graze cattle and sheep on Forest Service and Bureau of Land Management land. The higher fees stood to put many ranching families out of business—making their privately-owned land worthless, and allowing their water rights, which are private property rights, to be acquired for free by the Federal government. The Senate, led by Sen. Pete Domenici (R-NM), voted to "table," or kill Jeffords' rider Sept. 17, 1991, by a 60 to 38 vote. Good guys voted against the higher fees—and therefore in favor of tabling Jeffords' rider.

Senate Vote #4: Condemnation of private land. S. 2166, the *Natl. Energy Policy Act*, gave contractors building oil and gas pipelines blanket authority to condemn rights-of-way on private land, to expedite construction of pipelines. Sen. Larry Craig (R-ID) attempted to amend the bill to require the Federal Energy Regulatory Commission to find in a separate proceeding that a specific public need

was proven before any condemnation could occur. The Senate, led by Sen. J. Bennett Johnston (D-LA), voted to "table," or kill, Craig's amendment Feb. 18, 1992, by a 60 to 35 vote. On this issue, a surprising number of normally anti-private property Senators voted against condemnation (because they wanted to make it harder to build pipelines), and a number of normally pro-private property Senators voted in favor of condemnation (because they wanted to make it easier to build pipelines). The bottom line is, the vote was on whether or not to make it easier for pipeline companies to condemn private property. And the good guys were the ones who voted No.

Senate Vote #5: Increasing Federal fees for patenting mining claims. Sen. Dale Bumpers (D-AR) attempted a "rider," or unrelated amendment to the 1993 Interior Dept. appropriations bill, imposing a one-year moratorium on allowing miners to "patent," or obtain title to, lands on which they had discovered and developed profitable mineral deposits. Sen. Harry Reid (D-NV) tried to amend the rider, cancelling the moratorium on patenting, but substituting a proposal to hike recording fees for patent applications (presently \$2.50 to \$5 per acre) to a sum equal to "fair market value" of the land. Reid's amendment also required land no longer used for mining to be returned to the Federal government, and stiffened requirements for its reclamation. Bumpers tried to "table," or kill Reid's amendment on Aug. 6, 1992; the Senate voted "no," 45 to 50, leaving Reid's higher fees and other provisions in place. We've listed the good guys as the ones who voted No (For Reid's amendment and against Bumpers'), on the premise that Reid's proposal was the lesser of the two evils.

Senate Vote #6: Timber-dependent communities. A "rider" by Sen. Wyche Fowler (D-GA) to the 1993 Interior Dept. appropriations bill proposed to slash the national forest system budget by \$35 million—to reflect, Fowler said, a 25% reduction in below-cost timber sales. The measure stood to severely harm hundreds of "inholding" communities in the West where nearly all jobs, private and public, depend on Federal timber. The Senate, led by Sen. Larry Craig (R-ID), voted to "table," or kill, Fowler's rider Aug. 5, 1992, by a 50 to 44 vote. Good guys voted Yes.

Senate Votes #7 & #8: Appeals of Forest Service decisions. The Forest Service administrative appeals process affects a wide range of private property rights: mining claims, grazing rights, and summer cabins on leased Federal land, to name a few. A logjam of appeals of Forest Service decisions, most by park and wilderness pressure groups, prompted the Forest Service to begin revision of the appeals process last year. A "rider," or unrelated amendment by Sen. Wyche Fowler (D-GA) to the 1993 Interior Dept. appropriations bill proposed to dictate the form of the new appeals process, including a mandatory "stay," or halt to any action until an appeal was settled.

Vote #7 was on Sen. Larry Craig's (R-ID) attempt to "table," or kill Fowler's rider; the Senate voted Craig down, 38 to 57, on Aug. 6, 1992. Good guys voted yes—in favor of killing Fowler's proposal. Craig then sought to amend Fowler's rider to authorize the Chief of the Forest Service to override a "stay" on an emergency basis, and to limit "standing" to appeal only to those who file initial comments on a Forest Service decision—limiting last-minute interventions by park and wilderness pressure groups. Fowler then attempted to "table," or kill, Craig's amendment; that was Vote #8. In this vote,

the Senate sided with Craig, and voted "no," 45 to 50—in other words, voting to keep Craig's amendment. In this case, the good guys voted No—against killing Craig's amendment.

Senate Vote #9: Salvage logging in presumed spotted owl habitat. A rider by Sen. Slade Gorton (R-WA) to the 1993 Interior Dept. appropriations bill proposed to allow salvage timber sales in presumed owl "habitat" unless the Secretary of Agriculture decided the owl habitat would be "adversely affected." Gorton's rider sought to preserve a

few of the Pacific Northwest's fast-disappearing jobs, and end the challenges by park and wilderness pressure groups to clean-up of dead, downed, diseased, and burned timber in national forests. The Senate, led by Sen. Brock Adams (D-WA) voted Aug. 6, 1992 to "table," or kill, Gorton's rider, by a 60 to 35 vote. Good guys voted in favor of timber jobs and communities—and against killing Gorton's rider.

Senate Vote #10: Increasing grazing fees on BLM land. A rider by Sen. James Jeffords (R-VT) to the 1993 Interior Dept. appropria-

tions bill proposed to increase by 25% the fees paid by ranchers to graze cattle or sheep on Bureau of Land Management (BLM) land. This was almost a replay of Jeffords' proposal the previous year (Vote #3), but the vote was much narrower—just 50 to 44 in favor of "tabling," or killing Jeffords' rider. It was Sen. Robert Byrd (D-WV) who proposed the kill this time around, on Aug. 6, 1992. Good guys voted yes—in favor of killing the fee hike.

## U.S. HOUSE OF REPRESENTATIVES VOTES

House Vote #1: Niobrara Wild & Scenic River designation. The Niobrara flows through largely privately-owned farmland in Nebraska. The Senate had earlier passed S. 248 by voice vote, designating the Niobrara a Wild & Scenic River, primarily because both Nebraska Senators wanted it. Because most of the land was private, designation as Wild & Scenic would allow the Natl. Park Service to condemn 100 acres per mile within ¼-mile of either side of the river. Rep. Bill Barrett (R-NE), the Congressman representing the area, proposed a substitute bill that would study the river's "suitability" rather than instantly designating it a Wild & Scenic River. The House voted "no" on Barrett's substitute bill, 109 to 233, on May 14, 1991. Good guys voted in favor of the substitute bill.

House Vote #2: Condemnation of private land. Rep. Don Young (R-AK) offered his own amendment to the Niobrara Wild & Scenic River bill that would have prohibited condemnation of private land or "interests in land" (like easements) along the new Niobrara Wild & Scenic River unless the Secretary of Interior found that use of the land

had changed substantially. This means that ranchers would have been able to continue to ranch without fear of condemnation. The House rejected Young's amendment, 124 to 283, on May 14, 1991. Good guys voted to support Young and prohibit condemnation.

House Vote #3: Increasing Federal grazing fees. Increasing the fees paid by ranchers who own grazing rights on Forest Service and Bureau of Land Management (BLM) land in the West has become a perennial effort by a number of Eastern and Midwestern Congressmen. In the 1991 version, Rep. Mike Synar (D-OK) sought to amend last year's Interior Dept. appropriations bill to hike the government's fee over four years by more than 400%, from \$1.97 to \$8.70 per Animal Unit Month ("Federalese" for one cow and one calf grazing for one month), or to "market value," whichever might be larger four years hence. The fee hike is a property-rights issue because ranchers' grazing permits are based on their property rights in the grazing land. The fee hike stood to eliminate those rights by making it too expensive for ranchers to exercise them. The increase also stood to bankrupt thousands of ranching families and grazing-dependent commu-

nities. The House voted "yes," 232 to 192, on June 25, 1991. Good guys voted no. (The Senate subsequently cancelled the fee increase.)

House Vote #4: Increasing Federal grazing fees (again). When HR 1096, a "re-authorization" of the Bureau of Land Management, came up for a vote July 23, 1991, Synar offered his grazing fee increase amendment again. Rep. Ralph Regula (R-OH) proposed instead to hike the Animal Unit Month fee immediately to "market value" effective in 1992, but to limit fee increases or decreases to 33% in any given year. The House voted "yes," 254 to 165. Good guys voted No.

House Vote #5: Creation of the Flint Hills Prairie Natl. Monument. HR 2369 sought by Rep. Dan Glickman (D-KS) authorized the Natl. Park Service to acquire private land in Kansas to assemble the new park. The Flint Hills region of Kansas is one of two sites proposed off and on for a "tallgrass prairie preserve" by the Park Service since the 1950s (the other is in northeastern Oklahoma). The House voted in favor of acquiring the private land for the park, 284 to 110, Oct. 15, 1991. Good guys voted No.

House Vote #6: Wetlands. The only vote in the House of Representatives in the 102nd

Congress on the touchy subject of wetlands happened on Oct. 29, 1991. With support building for protection of private property rights, Rep. Wayne Gilchrest (R-MD) attempted to forestall any Congressional action. Gilchrest's amendment to HR 3543, a 1992 supplemental appropriations bill, proposed to have the Natl. Academy of Sciences, a private (and sometimes biased) organization, conduct (for \$500,000) a study of "the science and methodology of wetlands definition and delineation"—leaving landowners in limbo for 18 months while Congress waited for the results. The House voted "no," 181 to 241. Good guys voted No, too. (The House has taken no other action on the wetlands problem since, however.)

House Vote #7: Substitute California Desert Wilderness bill. This was the first—and key—vote during the debate Nov. 26, 1991, on the huge complex of two new National Parks, a new Natl. Monument, and 8 million acres of Wilderness Areas proposed to be carved out of private and public lands in Southern California by HR 2929, the "California Desert Protection Act." HR 2929 proposed, among other things, to double the size of the giant Death Valley and Joshua Tree Natl. Monuments, and convert them into largely-Wilderness National Parks, effectively closing off public use and access. The substitute bill offered by Rep. Jerry Lewis (R-CA), one of the Congressman representing the area, proposed to designate 2.3 million acres of BLM land as Wilderness (about what was being recommended by BLM) rather than 8 million, and to forget about the new parks. Lewis' substitute bill included (and impacted) far less private land. The House rejected Lewis' substitute bill, 150 to 241. Good guys voted in favor of the substitute bill.

House Vote #8: Permitting hunting. Rep. Ron Marlenee (R-MT) proposed to amend HR 2929, the "California Desert Protection Act," to allow hunting to continue on the lands that would be converted into the new Mojave Natl. Monument by HR 2929. Hunting is usually prohibited in National Monuments, but the Federal, state, and private lands pro-

posed for the new Mojave Natl. Monument had previously been open to hunting under Federal and state law. The House voted to allow hunting, 235 to 193, on Nov. 26, 1991. Good guys voted yes.

House Vote #9: Prohibiting condemnation. Rep. Tom DeLay (R-TX) tried to amend HR 2929, the "California Desert Protection Act," to allow the Secretary of Interior to acquire land for the proposed new Natl. Parks, Natl. Monument, and Wilderness Areas only from willing sellers—prohibiting, in other words, the use of condemnation to acquire land. The House rejected DeLay's proposal Nov. 26, 1991, 143 to 289—voting in favor of condemnation. Good guys voted to prohibit condemnation.

House Vote #10: Federal reserved water rights for Wilderness Areas. The idea of Federal "reserved water rights" for new Wilderness Areas is a touchy subject in the arid West, where there's often not enough water to go around and water rights—acquired under state law—are jealously guarded private property. A "reserved water right" for a Wilderness downstream can restrict, or even cut off, the water used by water-rights owners upstream—and worse still, Congress never specifies how much water the "reserved water rights" allow the Federal Wilderness managers to claim. HR 2929, the "California Desert Protection Act," claimed "reserved water rights" for all its 8 millions acres of new Wilderness. Rep. Wayne Allard (R-CO) tried to amend HR 2929 to disavow any claim to Federal "reserved water rights" on the Colorado River, which irrigates ten states and supplies drinking water to Los Angeles, Tucson, and other large cities, all upstream from the new Wilderness. The House rejected Allard's proposal 155 to 274, on Nov. 26, 1991—claiming "reserved water rights at any price" on the Colorado River. Good guys, however, voted Yes—against the water rights claim, in other words.

House Vote #11: Economic impact study of Federal control. Most far-reaching of the proposed amendments to HR 2929, the "California Desert Protection Act," was that offered by Rep. William Dannemeyer (R-CA),

Dannemeyer's amendment would have made designation of any land as a National Park, Monument or Wilderness Area contingent upon an economic impact analysis finding that the environmental benefits of each Federal designation outweighed the economic costs. His proposal also would have required the Secretary of Interior to pay any person who suffered an economic loss as a result of the bill the amount of the loss. The House, perhaps predictably, voted "no" by a big margin, 110 to 316, on Nov. 26, 1991. Good guys, on the other hand, voted Yes.

House Vote #12: Increasing grazing fees (again). Rep. Charles Stenholm (D-TX) proposed to "strike," or eliminate, the provisions in the 1993 Interior Dept. appropriations bills that raised—again—the fees paid by ranchers who own grazing rights on Forest Service and Bureau of Land Management lands. The House refused, 164 to 245, on July 22, 1992. Good guys voted Yes—against raising the fees, in other words.

House Vote #13: National Forest timber harvests for timber-dependent communities. This vote concerned an amendment by Rep. Jim Jontz (D-IN) to the 1993 Interior Dept. appropriations bill. Jontz, the sponsor of repeated bills to "preserve" Federal timber as "ancient forest preserves" regardless of the economic impact on communities, had proposed to slash \$16.8 million from the Forest Service's budget for preparing timber sales, on the presumption that the less money the agency had, the less timber they could sell. Rep. Norm Dicks (D-WA), offered a substitute amendment that "cut the cut" to "only" \$8 million, and took the money out of timber administration rather than timber sale preparation funds. The House voted by a narrow 212 to 206 to accept Dicks' amendment, July 23, 1992. (The "amended amendment" was then adopted by voice vote.) We listed the good guys as the ones who voted Yes, on the premise that the Dicks amendment was the lesser of two evils; it's still going to hurt anyone who makes a living, and stands to devalue any property, in any area dependent on national forest timber.

HOW THE HOUSE VOTED

[Legend: S—SUPPORTED private property position; O—OPPOSED private property position; ?—Did not vote; P—Voted "present"; C—Voted "present" to avoid conflict of interest; I—Ineligible to vote at the time; X—Speaker of the House; excused himself from voting]

TRIBUTE TO SENATOR TIM WIRTH

● Mr. KENNEDY. Mr. President, it is a privilege to join other Senators on both sides of the aisle in paying tribute to our good friend and outstanding colleague, TIM WIRTH.

In their first term, many Senators concentrate on meeting their constituents' needs, leaving the broader, national issues to others. But TIM WIRTH has done both—and done them brilliantly. He has been an outstanding U.S. Senator, and an outstanding Senator for Colorado. He has attended to his State's interests with extraordinary dedication, and he has also pursued broad concerns in the highest interests of the Nation as a whole.

He has been a special leader on environmental and energy issues. He was one of the first to draw the Nation's attention to the problems of acid rain, global deforestation, and the deterioration of the ozone layer. With the late Senator John Heinz, he pioneered the concept of using free market strategies to help business meet environmental goals. And he played a key role throughout the national energy policy debate, securing important provisions that will move the country forward in the areas of energy efficiency, conservation, and the development of renewable energy sources.

During all of TIM's 6 years in the Senate, I have had the honor of serving with him on the Armed Services Committee. He has been an effective and committed advocate for a stronger and saner national defense. Many of us have been particularly impressed with TIM's insights on the changes taking place in the post-cold war era, and the ways in which we must adjust our national security priorities. He was an early supporter of confidence-building measures to reduce the risk of unintentional conflict. We also worked well together to end the production of plutonium—and those efforts now appear to be on the verge of success.

TIM has also been the leader in the important effort to repeal the cruel regulations that deny military women the right to reproductive choice while serving our country overseas. In keeping with his environmental leadership, he has moved effectively to persuade the military to direct more attention

to environmental concerns, especially in urging the shut down and clean-up of the nuclear weapons plant at Rocky Flats. And he has also been a leader in developing initiatives for converting the defense industry to civilian goals, for retraining workers, and for assisting communities endangered by defense spending cutbacks.

TIM WIRTH will be missed in the Senate, and we send our best wishes to TIM and his family in the years ahead. We will miss his warmth and good humor. His constituents in Colorado will miss the strong advocacy and talent that he used so effectively on their behalf, and the Nation will miss his leadership on the many key issues that so vitally affect our future. We all hope that, although the country is losing a Senator, it will be gaining a Cabinet officer.●

HURRICANE ANDREW AND EMERGENCY SUPPLEMENTAL APPROPRIATIONS

● Mr. JOHNSTON. Mr. President, as you know, on September 18, the Congress passed emergency legislation to provide desperately needed assistance to those living in areas devastated by Hurricane Andrew. During Senate action on this aid package, my colleagues and I succeeded in including an additional \$165 million to help compensate Louisianians for damages that would not be covered under standard disaster assistance programs.

What you may not be aware of is that not all provisions of this legislation will go into effect automatically. A number of the largest and most important grants and payments are contingent upon a Presidential budget request. Over \$100 million provided by the Congress will not be transferred to those who badly need this aid unless President Bush so specifies.

Among these contingent provisions are: \$8.5 million, National Oceanic and Atmospheric Administration [NOAA] grant, to State of Louisiana for restoration of shellfish/finfish habitat—the President has released \$5.1 million; \$24.5 million, Fish and Wildlife Service grant for freshwater fish recovery; \$1.5 million, USL Wetlands Center; and \$1.9 million, U.S. Geological Survey, study of barrier islands.

Other grants, which will be distributed nationwide—and which Louisiana will share in include \$65 million from NOAA to commercial fishermen whose livelihoods suffered due to the hurricane. The Louisiana Department of Wildlife and Fisheries estimates direct losses to commercial fishermen and seafood harvesters at over \$265 million.

The Fish and Wildlife Service grant—\$24.5 million—for freshwater fish recovery will be used to prepare and execute restoration plans for game fish, alligators, pelicans, fur bearers and game and nongame wildlife resources. The plans will include the construction of

necessary hatchery and incubation facilities and land acquisition.

I hope the President will see fit to release total funding for these projects. With remarkable speed, the Congress passed legislation which provides comprehensive and timely assistance to the distressed people and industries of our State. Now it is up to President Bush to release the additional funding for disaster relief.

I have also attached, for the RECORD, a copy of a letter sent to the President, urging that these moneys be released.

I ask that it be printed.

The letter follows.

SEPTEMBER 21, 1992.

The PRESIDENT,  
 The White House,  
 Washington, DC.

DEAR MR. PRESIDENT: H.R. 5620, legislation providing emergency funds for those living in areas devastated by Hurricane Andrew and other natural disasters, was cleared by the Congress for your approval on Friday, September 18.

This legislation includes funding for a number of important recovery initiatives for Louisiana, some of which will only be available when you submit a budget request for them. We bring these items to your attention, and urge you to act quickly to submit requests so that these funds can be made available to facilitate our state's economic recovery.

Following is a list of these priority items, and a brief summary of their purpose.

*Department of Agriculture, U.S. Forest Service*—\$4,140,000 for grants to the affected states through the state and private forestry program, including \$2.9 million as noted on page 55 of S.Rpt. 102-395 for the State of Louisiana.

These funds will enable our state's Office of Forestry to develop a timber management recovery plan to control disease and halt further losses in the 21 parishes where over \$40 million in damage to commercial timber stocks occurred. The Forestry industry is Louisiana's second largest employer. Facilitating the recovery of this important sector is essential to Louisiana's economic future.

These funds will also provide assistance to the 53 communities in Louisiana where significant tree damage occurred to repair and replace damaged trees at some thirteen state owned facilities. We would note that these areas are not eligible for funds provided in this legislation under the Tree Assistance Program and that FEMA's disaster relief fund does not provide assistance to communities for maintenance or replanting damaged or destroyed tree stocks.

*Department of Commerce, National Oceanic and Atmospheric Administration*—\$8.5 million for a grant to the Louisiana Department of Wildlife and Fisheries to restore badly damaged shellfish habitat destroyed as Hurricane Andrew moved ashore.

Preliminary estimates indicate that over \$7.8 million in damages have occurred to Louisiana's saltwater fishery, excluding expected losses for shrimp which have not yet been estimated. Altogether, the total wholesale saltwater fishery losses (again excluding shrimp, which has an estimated wholesale annual value of \$175 million) are expected to exceed \$36 million.

It is critically important that work begin immediately to restore this valuable resource, which employs many thousands of Louisianians directly and in related indus-

tries throughout the southern region of our State. We would also note that in some cases, particularly oysters, it will take several years for a full recovery once the habitat is restored. No funds are available through the FEMA disaster relief fund for this purpose.

*Department of the Interior, Fish and Wildlife Service*—\$24.5 million as a grant to the Louisiana Department of Wildlife and Fisheries to restore freshwater fish habitat which was severely damaged by winds and tidal surge as Hurricane Andrew made landfall.

Louisiana's Department of Wildlife and Fisheries now estimates that as many as three to four hundred million fish have been killed in the Atchafalaya Basin and elsewhere throughout southern Louisiana, constituting what many biologists believe to be the largest fish kill ever as a result of a hurricane. Altogether the total wholesale freshwater commercial loss is expected to exceed \$26 million, and the total recreational loss will be more than \$72 million.

Losses of this magnitude will be devastating to the economy of this area, including the many businesses and restaurants which depend on the vitality of commercial and recreational fishing. Many in this area also depend on the health of this resource to put food on the table and these fishermen and their families will suffer. It is therefore critical that every effort be made to develop and execute a sound, aggressive plan to restore this habitat as quickly as possible. No funds are available through the FEMA disaster relief fund for this purpose.

*Department of the Interior, Fish and Wildlife Service*—\$1.5 million for the National Wetlands Center, Lafayette to assess the effects of Hurricane Andrew on Louisiana's coastal ecosystems.

Louisiana's coastal wetlands were hit hard as Hurricane Andrew moved ashore. These funds will allow important monitoring activities to begin this fall and assess the impact of the damage to these areas on migratory bird habitat as well as on forested wetlands and coastal marshes. These assessments will provide valuable baseline data for future coastal restoration projects as well as hurricane protection projects in these vulnerable areas. No FEMA assistance is available.

*Department of the Interior, Geological Survey*—\$1.8 million to undertake a comprehensive investigation including documentation of the amount of shoreline change along Louisiana which occurred as a result of Hurricane Andrew.

This investigation is a needed follow up to the original Louisiana barrier island study undertaken by the Geological Survey which has carefully developed sound data on the shoreline and barrier islands off Louisiana's coast. Preliminary reports indicate that there has been massive erosion and degradation of the Timbalier chain and Isle Derniere, which protect ecologically and economically important wetlands from the marine environment. Beaches on these and other barrier islands reportedly have eroded more than 120 feet in 2 days, and more than 15 major hurricane channels have dissected these islands. As a result of these and other damages, the baseline established by the Survey was destroyed.

The changes which have occurred will have important consequences for planning and implementation strategies for future projects under the Coastal Wetlands Planning, Protection and Restoration Act, and will help assure that Federal and State funds committed to coastal restoration projects are di-

rected to projects with demonstrated success. No FEMA assistance is available for this purpose.

*Department of the Interior, Minerals Management Service*—\$1.2 million to fund the additional oversight and workload necessary to review permits, plans, pipeline repairs and inspections necessary to resume fully oil and gas production offshore Louisiana.

Of the 3852 offshore facilities in the Gulf of Mexico, 2000 were in the path of Hurricane Andrew. Fortunately, there were no reports of death or injury because of the hurricane to persons working offshore. However, there was damage to offshore structures, particularly in the Ship Shoal and south Timbalier areas south of Morgan City. Altogether, preliminary estimates indicate that 166 facilities were damaged notably. Some 20 percent of these (34) were toppled, and an additional 17 percent (28) suffered severe structural damage. In addition, 83 segments of oil and gas pipeline were damaged.

In offshore western Louisiana, production will not be resumed until pipelines have been tested for pressure integrity. These funds will enable this testing to go forward quickly and will also enable MMS to undertake an evaluation with industry of representative platform and other structural designs including engineering assessments and testing of offshore structures. No FEMA assistance is available for this purpose.

*Department of the Interior, National Park Service*—\$300,000 to be made available as a grant to the National Trust for Historic Preservation as specified on page 55 of S. Rept. 102-395.

One of the important bases of Louisiana's economy is tourism, which in many small towns throughout South Louisiana has been attractive because of the existence of a variety of significant historic structures. According to a preliminary damage assessment report prepared by Louisiana's Office of Historic Preservation, Hurricane Andrew caused damage to national landmarks and historic districts in at least 11 parishes. In St. Martinville, 33 historic buildings sustained varying degrees of damage, including the Old Castillo Hotel which is one of the centerpieces of the historic area. Some 60 houses and 17 commercial buildings in the City of Franklin's historic district and ten landmarks were damaged, some such as the African Methodist Episcopal Church and the Old Knights of Columbus Hall severely. All 82 structures within the historic district of Morgan City suffered some degree of damage.

These funds will enable the National Trust to conduct a thorough damage assessment of historic properties harmed by Hurricane Andrew and to fund small emergency grants and technical assistance including design assistance needed to stabilize and save these important structures. If this assistance is not made available immediately, we will lose an opportunity to see that restoration of these structures is undertaken with the best technical advice to preserve their historical and architectural integrity. No funds are available for this need under the FEMA disaster relief fund.

#### DEPARTMENT OF LABOR, EMPLOYMENT AND TRAINING ADMINISTRATION

We also note that \$30 million was made available to the Department of Labor, Employment and Training Administration for the period July 1, 1992 through July 1, 1993 contingent upon the submission of an official budget request for programs to retrain those who have been thrown out of work as a result of recent natural disasters.

Louisiana's Department of Agriculture estimates that damage to our sugar crop alone

will result in the loss this year of 5000 jobs in the production, processing and servicing industries. Similarly, damage to oyster beds may result in the loss of as many as three or four thousand jobs in this labor intensive industry. We do not yet have estimates on jobs losses due to damage to our important shrimp fisheries, but as noted earlier, this sector alone has an estimated wholesale value of approximately \$175 million.

Even before the hurricane, some of the most severely impacted parishes faced difficult economic conditions. St. Mary Parish's unemployment rate has been over 12 percent since January of this year; Terrebonne's over 10 percent; Iberia's over 10%; Assumption's over 12%. In fact, only one of the eight most impacted parishes had an unemployment rate below the national average this year, and that parish (Lafourche) was only 0.3% below the national average before Hurricane Andrew hit.

Many workers employed in the industries damaged badly by Hurricane Andrew are unskilled and will require training and special assistance to find employment elsewhere until these sectors are revived. We urge you to release these funds as soon as possible with a set aside for Louisiana and to assist our state in every way possible in its efforts to develop and implement a retraining program.

Respectfully yours,

J. Bennett Johnston, John B. Breaux,  
U.S. Senate; Jerry Huckaby, Billy Tauzin,  
Jimmy Hayes, Jim McCreery, Bob Livingston,  
Richard Baker, Clyde Holloway, William Jefferson, Members  
of Congress.●

#### A RAY OF HOPE FOR NEWARK

● Mr. LAUTENBERG. Mr. President, I rise today to call my colleagues' attention to a distinguished individual who has helped bring growth, rebirth, and hope to the city of Newark: Raymond Chambers. Mr. Chambers has provided his energy and vision to create a variety of innovative projects to improve the life of Newark's citizens. The success of these projects has been felt throughout the city and created models for the Nation.

The Wall Street Journal recently published an article about Mr. Chambers which I would like to share with my colleagues. I ask that the article be printed in the RECORD at this time and hope that my colleagues will share in my pride in knowing this dedicated son of Newark.

The article follows:

[From the Wall Street Journal, Sept. 30, 1992]

RAYMOND CHAMBERS CREATES RIPPLE EFFECTS IN SCHOOLS, POLITICS AND CULTURAL LIFE—TUTORS AND MENTORS FOR KIDS

(By Ralph T. King, Jr.)

NEWARK, N.J.—Raymond Chambers once did a leveraged buy-out of Gibson Greetings Inc., earning more than \$100 million with a \$1 million investment. Today he is leveraging souls in this downtrodden city, also with impressive results.

Mr. Chambers was born and raised in Newark, the son of a blue-collar warehouse manager. He went on to become one of the nation's wealthiest men as a pioneer in leveraged buy-outs with William E. Simon, the former Treasury secretary.

Meanwhile, in the years following Newark's bloody 1967 riots, the social fabric of Mr. Chambers' hometown disintegrated. It lost one-third of its population. Of the remaining 275,000 residents—85% black and Hispanic—more than one in four lived below the poverty line. It became a place where kids stole cars every night simply for sport and where drug addicted parents sometimes abandoned newborns in hospitals for months.

Newark's educational, cultural and political institutions, with few exceptions, had decayed to a shocking degree.

So in 1986, Mr. Chambers left the business world and waded in. His solution was to enter all three areas with big projects that would generate ripple effects beyond the scope of his resources. Mr. Chambers's use of leverage—getting projects off the ground with seed money, making some programs profit-makers that can support others, financing an effort with a highly leveraged commodity fund—offers a lesson in how philanthropy and shrewd business tactics can work together.

Since 1986 Mr. Chambers has worked full time to try to rebuild Newark, spending more than \$50 million of his own money and committing another \$36 million in the form of guarantees to donate the cash if no one else will. Yet, through it all, he has tried to avoid publicity. At the ground-breaking for a movie theater being built largely because of his efforts, he stood at the back of the crowd, in dark glasses, while civic leaders made speeches and took bows on the stage. He has declined many requests for interviews. For this article, he did provide background information and issued a brief statement for the record, but only because this reporter, at Mr. Chambers's suggestion, once spent five months assisting in a weekend tutoring program he sponsored.

"Ray stands out as the American business entrepreneur of the Reagan era who has made an investment of a scale and an intensity that I don't think anyone else has matched," says Peter Goldmark Jr., president of the Rockefeller Foundation. While the Fords and Rockefellers in their day may have had a broader impact on the social welfare of places like New York City and Detroit, he says, "Ray is unique because nobody is doing that now. I don't think there is anybody from this era in his league."

#### DOWN AND OUT

Mr. Chambers, 50 years old, studied at Rutgers University in Newark and trained as a tax accountant at Price Waterhouse before pursuing investments, but in his statement, he says: "I had never seen people as down and out as the people of Newark. It had gotten so bad, I didn't think I had any alternative."

The movie theater, while one of his smaller projects, gives a good insight into Mr. Chambers's techniques. Newark no longer had a single cinema in its neighborhoods, let alone a bowling alley or a skating rink. Mr. Chambers couldn't get any bank to make an ordinary construction loan to build a theater in the most blighted neighborhood, the Central Ward. Finally, Newark-based First Fidelity Bank came through, after Mr. Chambers's foundation agreed to put up a comparatively small sum, \$800,000, and guarantee \$3.9 million more.

Then he went about trying to find a theater operator to run it at cost. A. Alan Friedberg, chairman of Loews Theater Management Corp., a unit of Sony Corp., finally agreed. "As I thought about it, I realized I didn't want to be just another CEO interested only in profits," Mr. Friedberg told the

crowd at the ceremony. Rather, profits will go to the city, which in effect donated the land, and to a fund sponsoring civic and cultural activities in the vicinity.

To Mr. Chambers, that creates a kind of social leverage that's much more important than just giving money away.

Mr. Chambers's first move in Newark gave him the credibility he needed to go further. He got involved with the Boys' and Girls' Clubs of Newark. Their new director, Barbara Wright Bell, was struggling to renovate four dilapidated facilities that were overrun by youth gangs. Mr. Chambers liked her take-charge approach and grasp of inner-city problems.

He attracted an influential board and quadrupled its budget to \$1.8 million with such new funding sources as an endowment with the stock from one of his leveraged buy-outs, Six Flags Corp., and a golf outing patronized by his business associates. Within 18 months, Ms. Bell had restored the clubs to mint condition and provided a haven for about 5,000 new members. Mr. Chambers now has about \$10 million invested in the clubs.

With this success, Mr. Chambers won the respect of Newark Mayor Sharpe James, who now calls the organization the "jewel" of the city. After some discussion, the two men found they shared a vision of what needed to be done. "I deal with thousands of people who have money and want to help the city. Ray is unique," says Mayor James. "He doesn't come in and say you must do this and that, and he never looks or asks for anything in return."

Mr. Chambers set to work, operating through an outfit called the Amelior Foundation, of which he is chairman. Ms. Bell, as president, oversees Amelior's projects. "A movement around one man or one organization is not healthy," says Ms. Bell, 42, who learned how to get things done in the inner city from her father, an Episcopal minister. "Newark wasn't visionless before Ray came in, but he brought the vision closer to reality, pushed it more quickly and gave it more energy."

Education was their greatest concern. Newark's school system didn't work. Despite a \$406 million budget, many of its 49,000 students were learning as much in the streets as in the overcrowded classrooms. Mr. Chambers was struck by an idea he had heard about on CBS's "60 Minutes." Eugene Lang, a New York businessman, had promised college scholarships to 61 Harlem sixth-graders. In the end, about half finished at least some college.

Mr. Chambers thought he could do better by starting sooner, as early as first grade; by being bigger, eventually to include 1,000 youngsters (650 are enrolled to date, from first grade through junior high); and by doing more, such as matching all the students with a mentor.

#### A SPEECH BY TUTU

Amelior endowed the program, called Ready (Rigorous Educational Assistance for Deserving Youth), with \$10 million, or \$10,000 per student. Part of that is reserved for college costs, but most pays for tutoring, horizon-widening activities (from visiting New York City museums to attending a speech by South African Bishop Desmond Tutu) and parental assistance. Mr. Chambers has donated about another \$10 million to various universities, partly to guarantee spaces for Ready students.

It's too early to tell now well the program will work; Ready was started in 1987, and its oldest participants are in the 11th grade. But it has done wonders for Deneane Jacobs. "I

like when people say to me, 'You ain't nothing,'" says the 17-year-old, whose 10 sisters all dropped out of high school. She plans to attend college and law school and hopes to become a judge. "When I get up there working in my fine office one day, I hope they're still around. I'm going to take them up there and show them," she says. Having cured a stutter and increased her reading speed, Deneane has markedly improved her grades.

Mr. Chambers wanted to find more immediate incentives than a college education to reduce Ready's current dropout rate of 35 percent (most of these move away or never attend a single Ready session). So Amelior paid the minority-owned City National Bank \$300,000 for a 20 percent stake, and set aside \$500 worth of shares for each kid to "inherit" upon graduation from high school. That not only helps the kids, but helped the bank survive to continue to make loans in inner-city Newark.

Many Ready parents are unemployed single mothers with lots to worry about besides making sure their kids stay in Ready. Mr. Chambers had heard about a skills training program for welfare mothers that was trying to expand. Amelior donated \$400,000 to move the Newark Business Training Institute into new facilities, including a day-care center. This year it will turn out 400 graduates, double the 1990 number, and find jobs for three-quarters of them. Two dozen Ready moms are enrolled in classes this fall.

#### UNIQUE FUND

Another project is the One-to-One Partnership. Mentors for Ready kids were hard to find, so, with Geoffrey Boisi, he founded One-to-One to coordinate existing mentoring groups and start new ones. Mr. Boisi, 45, a veteran of Goldman, Sachs & Co., left Goldman to run One-to-One, inspired, he says, by Mr. Chamber's example.

The two men conceived a Wall Street commodity partnership whose trading profits will mostly go to kids who satisfy One-to-One program requirements, but also cover program costs. Charity-minded investors in the One-to-One Charitable Fund L.P. will earn a modest return at best, with the rest going to One-to-One. They won't face the typically huge risks associated with commodities because of hedging and diversification.

The fund's managers are four top performers—Paul Tudor Jones's Tudor Investment Corp., Blenheim Investment Inc., J.W. Henry & Co. and Moore Capital Management Inc.—all of which have waived their fees, which generally are 3 percent of funds under management plus up to 20 percent of trading profits.

The fund started trading two months ago with the first \$20 million from investors. No results are available yet. Plans to raise \$100 million by June were delayed after an article on the fund in this newspaper brought an unexpected number of inquiries, raising certain legal issues. The fund was restructured into a limited partnership, and fund-raising efforts recently resumed. Meanwhile, One-to-One has set up operations in 15 cities. Its Newark affiliate has arranged 250 matches and plans 1,500 more within five years.

Next on the agenda was the city's cultural life. Newark's downtown does have a first-class museum, but little else of interest to suburban residents or office workers after hours. A New Jersey performing-arts center had been proposed by state officials for years, but the idea languished, in part because of a \$150 million price. In any case, other cities were more likely sites than Newark.

Then, in 1988, Mr. Chambers made state legislators an offer they couldn't refuse. He guaranteed that private donations would be raised to match a proposed \$33 million state grant. Amelior put up the first big chunk. Mr. Chambers recruited a high-powered board including Ray Vagelos of Merck & Co. and Robert Winters of Prudential Insurance Co. of America, both big corporate donors, and called on others throughout the region. Newark's big employers joined quickly, but so did ones farther afield like American Telephone & Telegraph Co. and Matsushita Electric Corp. of America. Mayor James has agreed to try to scrape together \$10 million of city money.

#### DOWNTOWN ANCHOR

Ground is not yet broken, but the arts center is scheduled to open in 1996. Nearly half of the immediate 12-acre site is set aside for future private development; leases are eventually expected to generate revenue for the center.

With Newark's downtown soon to have an anchor, business leaders across the state seem to be taking the city, and its problems, more seriously. Blue Cross and Blue Shield of New Jersey has just completed a new high-rise headquarters here, and will relocate 2,700 employees from the suburbs. City planners have drawn up a redevelopment scheme for the adjacent riverfront. Another ripple: The center will offer extra instruction in the arts and performance space for students in public schools. Ready kids are expected to participate.

The most recent splash is in the political arena. As Newark has decayed, squabbling over the shrinking pie has increasingly divided community groups. But a campaign called Newark Fighting Back marks a new approach. Its ostensible goal is to cut drug and alcohol abuse in the city's most depressed sections, fed by a five-year, \$3 million grant from the Robert Wood Johnson Foundation. But more important is the fact that nearly 100 community leaders cooperated to get the grant.

Once again, Mr. Chambers, via the Boys' and Girls' Clubs, was a key player. Several small agencies in the city wanted to go after the grant independently. The clubs' leaders, with the mayor's help, roped them in and donated staff to put the proposal together.

#### SOME ARE CRITICAL

There is a nascent sense among the groups that they now have sufficient mass to map out broad, long-term solutions to such complex problems as unemployment, homelessness and crime. One who signed up, Virginia Jones, representing tenants in the high-rise building where she lives, has been criticizing city officials and anti-poverty programs for years. Her beef is that the people the programs are designed to help never get consulted. Says Ms. Jones: "This Fighting Back is a start. They understand my frustration."

Some people feel the projects engineered by Mr. Chambers are misdirected. The theater ground-breaking in June was interrupted by protesters calling for long-promised repairs at a rundown city housing project. Says David Weiner of the Newark Coalition for Low-Income Housing: "This kind of project is fine as an adjunct. The problem is that it becomes the primary focus while the more serious issue, housing, becomes secondary."

Others object that the arts center is no remedy for Newark's 13% unemployment rate or growing homelessness. Says Edward Verner, who heads an association of 200 leaders of local black churches: "There are peo-

ple sleeping in parks a stone's throw from where the center will be. If you are going to renaissance Newark, then renaissance the poor first."

And, to be sure, life remains miserable for many Newark residents. Ronald Graham, a 25-year-old unemployed native of Newark, regards the .45-caliber pistol he owns as a basic necessity. "To me, this is hell," he says, gazing at a nearly empty parking lot in a shopping center with many vacant storefronts.

But, if nothing else, Mr. Chambers's leveraged approach is giving many people in Newark hope—a sense, for the first time in years, that something can be done to break their cycle of poverty. Says Rep. Donald Payne, who represents Newark: "This community is blessed to have a Ray Chambers."•

#### NATIONAL ENERGY POLICY ACT

• Mr. RIEGLE. Mr. President, I offer these remarks to supplement the statement I made on the day the energy bill passed the Congress. My remarks focus on the international amendment to PUHCA, contained in new section 33 of that act.

A holding company may wish to acquire or retain the securities of a foreign utility company or other interest in the business of a foreign utility company through the interposition of one or more subsidiaries. It is our intent that the definition of a foreign utility company and the provisions of subsections (b) and (c)(1) permit such acquisition and maintenance of an interest directly or indirectly such as through the interposition of one or more subsidiaries. Such subsidiaries would also be considered foreign utility companies, so long as such subsidiary satisfies all criteria established in subsection (c)(3) or is a nonoperating company that merely owns the securities of a foreign utility company. This is consistent with the longstanding interpretation by the Securities and Exchange Commission that the word "acquire" includes the direct and indirect acquisition.

A holding company may wish to make foreign investments in foreign utility operations in advance of the completion of a facility or make bids or proposals to build or acquire such facilities by creation of one or more intermediate subsidiaries organized for the purpose of becoming or owning a foreign utility company in the future. The formation, acquisition or ownership of such subsidiaries or their securities by a holding company falls within the meaning of subsections (b) and (c) and is to be considered the acquisition of a foreign utility company.

Senator JOHNSTON has previously stated that it is intended that an EWG may include ancillary facilities. Similarly, it is intended that the definition of a foreign utility company includes a company owning or operating such ancillary facility. •

#### TRIBUTE TO SENATOR ALLAN CRANSTON

• Mr. JOHNSTON. Mr. President, ALLAN CRANSTON will leave this Chamber following a long and distinguished tenure. ALLAN's dedication to issues concerning veterans, women, children, nuclear disarmament, campaign finance reform, and the environment has been exemplary. His devotion to the people of California and the Nation will be a standard that future Members of the Senate will strive to maintain.

ALLAN CRANSTON and I have worked together closely to conserve the precious natural resources in California and throughout the Nation. There has been no greater advocate than ALLAN to preserve public lands, create forestry preserves and wildlife refuges, and maintain the wild and scenic river systems of this Nation. His service will be remembered and sorely missed by conservationists and environmentalists.

But, most of all, I will miss ALLAN CRANSTON's personal attention to the causes most dear to him. I will miss receiving the notes typed on his old typewriter, and I will miss his counsel. My hope is that ALLAN will continue to share his insight with the Senate. I wish him success and satisfaction as he embarks on a new chapter of public service. •

#### TRIBUTE TO SENATOR BROCK ADAMS

• Mr. JOHNSTON. Mr. President, I rise today to pay tribute to my departing colleague, BROCK ADAMS. Prior to his service in the Senate, BROCK served as a Member of the House of Representatives and as Secretary of Transportation. The Senate will sorely miss BROCK's perspective in the future.

BROCK ADAMS has long been an advocate for the powerless and a visionary for the potential of every individual in this Nation. It was primarily through his diligence that the landmark Older Americans Act amendments were signed into law this year. BROCK's work as chairman of the Subcommittee on Aging must be continued if we are to confront the future challenges that our population will need to address to improve our quality of life.

BROCK ADAMS is also a champion of the issues and causes which affect his great State of Washington. We worked together during this session of Congress to pass the Elwha River Ecosystem and Fisheries Restoration Act. This legislation will balance the needs of his constituents of water and power with the need to restore salmon habitats in the Elwha River Valley. Through BROCK's persistence, future generations will continue to enjoy the treasure of salmon in the Great Northwest.

I wish BROCK the very best in all of his future endeavors. He can be proud of his contributions in this chamber. •

#### RETIREMENT OF SENATOR WARREN RUDMAN

• Mr. JOHNSTON. Mr. President, it is a well known fact that the Senators whom the voters of New Hampshire send to Washington are, from Norris Cotton and Styles Bridges to WARREN RUDMAN, smart, stubborn, honest, fiercely independent people who want to get the job done quickly and well because they cannot wait to get back home.

In all seriousness, what WARREN RUDMAN has accomplished in 12 years of diligent study and hard work is more than most legislators achieve in a lifetime. WARREN's service on the Ethics Committee and during the Iran-Contra hearings has deservedly won him the respect of the entire Nation, not just the citizens of New Hampshire, and I wish that everyone had been as prescient about the dangers of deficits.

I have enjoyed our long association on the Appropriations Committee; WARREN's expertise on procurement will be sorely missed as the Subcommittee on Defense attempts to responsibly downsize the defense budget.

The people of New Hampshire will have numerous opportunities to express their appreciation for what WARREN RUDMAN, has done for them. On behalf of all citizens of Louisiana, I should like to thank him for what he has done for us, and especially for saving the Legal Services Corporation. Fiat Justitia and enjoy the air and water.●

#### CAPE MAY COUNTY DEMOCRATIC "HUMANITARIAN AWARD OF THE YEAR" RECIPIENTS

• Mr. LAUTENBERG. Mr. President, I rise today to honor the two recipients of the Cape May County Democratic Organization's 1992 "Humanitarian Award of the Year." Mrs. Dorothy Mack and J. Franklin "Pop" Menz were presented their awards at the Fall County Democratic Dinner on October 25, 1992.

Dorothy Mack was born in Millwood, NY, on May 13, 1910 and spent her young adult life in New York. In 1949, Mrs. Mack moved to Cape May County where she immersed herself into community involvement.

She first joined the Macedonia Baptist Church in Cape May City and became a Sunday school teacher there. This led to her involvement with the Cape May and Cumberland County Church School Union. Mrs. Mack was elected assistant superintendent of the union and held this office for many years.

Mrs. Mack attended Glassboro State College and in 1974, she was selected as "outstanding secondary teacher." In 1975, the Holly Shores Girl Scout Council presented Mrs. Mack a "33 years of service" pin for her contributions as an organizer and leader while in New York and Cape May County.

Throughout her life, Mrs. Mack has proved to be an outstanding teacher as well as successful businesswoman and community leader. She owned and operated Mack's Upholstery and Slip cover and Drapery from 1955 to 1969. During that time, she taught night classes at the vocational school in Cape May. Later, she became a full-time sewing teacher.

Mrs. Mack made significant contributions to Cape May County through her strong leadership abilities. In 1974, she was appointed as the first woman to serve on the Cape May County Economic Development Commission. She was elected as trustee of the Cape May County Industrial Commission in 1976. In addition, Mrs. Mack served on the bicentennial planning committee, the Middle Township's Housing Authority as secretary-treasurer, and is a member and currently chairperson of the Cape May Human Resources Trustee Board.

Mrs. Mack has served as member and secretary of the Wildwood Independent Business Community Association. Despite her many responsibilities, she still has time to serve on the board of trustees of Atlantic Human Resources as a Cape May County Board of Chosen Freeholders Representative.

J. Franklin "Pop" Menz is also a distinguished recipient of the Humanitarian Award. Mr. Menz' outstanding charitable efforts, his commitment to working with disabled children, and above all his compassionate heart have earned him this award.

Mr. Menz turned a personal tragedy into a personal commitment to help others in need. In 1926, Mr. Menz lost his leg due to cancer. While in the hospital, Mr. Menz' grandfather gave him some land on Route 47 in Millville. Mr. Menz first used this land as a roadside stand selling hot dogs and hamburgers. The business grew substantially over the years and his roadside stand became a restaurant, he added gas pumps in 1930, bought a beer license in 1933, and offered full dinners for reasonable prices.

Mr. Menz' restaurant was not only a place of business but also a place of charity and goodwill. During the year, Mr. Menz collected unwanted toys, clothing, and food. Two weeks before the winter holidays, Mr. Menz would close his restaurant and pay his employees to sort clothing and to repair and paint toys. Needy families were invited to come and select clothing and toys appropriate to their needs. Before they left, each family was offered a bag of groceries and a ham and fruit which was supplied at Mr. Menz' own expense.

But Mr. Menz' contributions to the less fortunate do not end there. For example, an employee of Mr. Menz, who has worked for him for 29 years, recalls Mr. Menz taking \$350 out of his register one night and handing it to a couple to pay rent to help them avoid being

evicted. Another time he handed \$60 to a couple with five children for shoes.

Mr. Menz' efforts to raise money for various causes are well recognized in his community. Mr. Menz has helped provide funds for Deborah Hospital, the American Cancer Society, the March of Dimes, Fisherman's Memorial, St. Ann's Church, and St. Raymond's School. For his continuing commitment, he has received many awards and honors from the American Cancer Society, St. Raymonds School, VFW, Villas, NJ State Fireman's Association, Deborah Hospital, and Fisherman's Memorial.

Finally, through the Elks, Mr. Menz has donated much of his time for the past 30 years to work with disabled children. He was named "Elk of the Year" in 1964-65.

Mr. President, I commend these two well deserving awardees. They have made their community a better place to live and will leave a lasting mark on Cape May and the people whom they have touched through their involvement in the community.●

#### RETIREMENT OF SENATOR TIM WIRTH

• Mr. JOHNSTON. Mr. President, Senator WIRTH leaves this body at the end of a relatively short, yet very distinguished career.

I have enjoyed, in particular, our association on the Energy and Natural Resources Committee, where, as chairman of the Subcommittee on Energy Regulation and Conservation, TIM has gained a reputation as one of the foremost authorities on the Nation's environment, the greenhouse effect, and other global environmental issues.

We will miss the expertise TIM added to the conservation measures of the National Energy Security Act and it is my fervent wish that his tremendous contribution to energy conservation will not end with his retirement from the Senate.

Good luck, TIM, in your continued battle for our environment. Your contribution to this body and to our committee will be sorely missed.●

#### RETIREMENT OF SENATOR STEVE SYMMS

• Mr. JOHNSTON. Mr. President, STEVE SYMMS will long be remembered after his absence from this body as a fierce watchdog for fiscal restraint and protector of the consumer pocketbook.

STEVE has served this body with distinction, never failing to protect the interests of his native Idaho, while fighting for the kind of fiscal budgetary restraint that seeks to keep our economy strong. His battles for lower taxes and spending have earned him awards from groups such as the Watchdog of the Treasury, Independent Business and the Freedom's Foundation.

We will feel the loss of STEVE's voice in the Senate, but I am sure he will continue to fight for Idaho and for the U.S. taxpayer.

Good luck, STEVE.●

#### LIVE PERFORMING ARTS LABOR RELATIONS AMENDMENTS

● Mr. HARKIN. Mr. President, I rise to encourage my colleagues to consider and approve S. 492, the live performing arts labor relations amendments.

The live performing arts labor relations amendments, which I am proud to have cosponsored in this Congress, was reportedly favorably out of the Labor and Human Resources Committee on September 16 of this year and placed on the Senate calendar on September 29. S. 492 has not moved further because of opposition by minority members of this body, who joined with the Labor Department in claiming that this bill would "create a special interest exception in the labor for labor organizations in the live performing arts industry."

As one of the 30 Senate cosponsors of S. 492, I believe that the exception created by this bill is appropriate and in fact necessary. Do not take my word for it. Listen to Mark Massagli, president of the American Federation of Musicians, who stated in testimony before the Senate Labor Committee:

Most musicians, acting as individuals or as self-contained acts, have far, far less bargaining power (compared to the bargaining power of musicians who achieve enough fame to command high fees and good working conditions). \* \* \* If a particular venue pays only substandard conditions, it is nearly impossible for the musicians to do anything about it. Often, no stable group of them appears at a venue long enough to vote for union representation and bargain a contract that improves wages and working conditions.

This legislation is designed simply to ensure for performing artists equal rights under our labor laws. It deserves to be passed by the Congress and signed into law.

S. 492 made significant progress in the 102d Congress. It was approved by the Senate Labor Committee and placed on the Senate calendar. I hope that the 103d Congress can build on this progress and pass the live performing arts labor relations amendments. I encourage my colleagues to support this legislation.●

#### EXCHANGE VISITOR AU PAIR PROGRAMS

● Mr. JEFFORDS. Mr. President, I rise to make a few comments concerning USIA's Exchange Visitor Au Pair Program.

In 1986, at the request of USIA, World Learning, then known as the Experiment in International Living, I agreed to participate in a 2-year pilot au pair exchange visitor program. The purpose of this pilot program was twofold—

first, to experiment with programs designed to stem the declining participation of American host families in foreign exchange programs; and second, to develop an exchange visitor au pair program that met USIA's standards for quality exchange experiences.

In 1988, after a change in personnel in USIA's Office of General Counsel, the first question was raised regarding USIA's authority to administer an exchange visitor program containing a child care component of up to 45 hours a week. Senators LEAHY and STAFFORD among others in Congress, challenged this question and asked the American Law Division of the Congressional Research Service to analyze USIA's authority. CRS concluded that USIA was fully authorized to administer this program as formulated in the original pilot proposal.

I want to underline the fact that the hours of the child care component were not "discovered" or "found" by an oversight panel but were contained in the original proposal approved by USIA's Office of General Counsel. The purpose of the oversight panel was to evaluate the quality of the overall exchange program, including questions pertaining to the quality of the host family selection process, the orientation process for families and exchange students, the availability of support, cultural programs and program oversight. The panel's findings on these substantive matters were very positive.

In addition to the evidence provided by CRS, the U.S. Congress has now twice prohibited USIA from terminating the program. This highly unusual action reflects the view that this program meets a critical need for private exchange programs and that USIA is clearly within its authority to continue administration of this excellent program.●

#### RETIREMENT OF SENATOR ALAN DIXON

● Mr. JOHNSTON. Mr. President, Democrats know—and I think back to Paul Douglas and Adlai Stevenson when I say this—that being called a public servant is a compliment. Serving the people of your State, and doing your best for them legislatively is an honorable career, the highest and best use of an elected official's talents. In all the time we have served together in the Senate, AL DIXON has worked tirelessly for the good of the people of Illinois, and I am proud to have known him as a colleague.

But only the most gifted legislator can balance the needs of the Nation against the issues of concern to individual States and voters, and ensure that parochial interests do not drive the congressional engine. In 20 years of watching the Senate process first hand, I have seen few Senators who worked more diligently or painstakingly to

protect the economic and social well-being of their own States while, at the same time, advancing the best interests of the United States. ALAN's efforts to promote affordable housing and to ensure good management in military procurement and the banking industry have helped all citizens, those from Louisiana as well as those from Illinois.

All Americans are in your debt for the more than 40 years of hard work and devoted service you have given the Nation. The people of Illinois will have other occasions to express their admiration and gratitude, but on behalf of the citizens of Louisiana, I wish to say "Thanks. Good job."●

#### RETIREMENT OF SENATOR JAKE GARN

● Mr. JOHNSTON. Mr. President, I feel it safe to say that JAKE GARN has accomplished more in 18 years and crossed more frontiers in the Senate than any other Member in the history of this body. I am referring, of course, to his work as a payload specialist and flight aboard the space shuttle *Discovery* back in 1984.

I have enjoyed immensely our long association on the Appropriations and Energy and Natural Resources Committees and will particularly miss the expertise and support he demonstrated so aptly throughout our battle to pass the National Energy Security Act.

JAKE's passion and vision in support of aviation and space flight has been equaled only by tenacious efforts on behalf of Utah. His presence will be sorely missed—the Halls of Congress will ring a little more hollow—but undoubtedly Utah will be enriched by his return.●

#### PREVENTIVE DIPLOMACY AND THE UNITED NATIONS

● Mr. PELL. Mr. President, the distinguished editor of Foreign Policy magazine, Mr. Charles William Maynes, who served previously as Assistant Secretary of State for International Organization Affairs, has set forth important new proposals for effective preventive diplomacy by the United Nations.

Writing in the Washington Post, October 25, 1992, Mr. Maynes calls our attention to article 34 of the U.N. Charter, which provides that the Social Security Council may investigate any conflict or situation "which might lead to international friction or give rise to a dispute \* \* \*." He proposes that the major powers and the Social Security Council should authorize U.N. factfinding and mediation missions, and should "give the Secretary General the eyes and ears that would enhance the U.N.'s capability to intervene early and effectively in crises that threaten international peace and security."

One of Mr. Maynes' suggestions is that the Secretary General be author-

ized to use satellite surveillance techniques for information gathering for preventive diplomacy. He proposes that countries in a position to do so should share intelligence information with the United Nations to enable the organization to alert the world to impending military crises and humanitarian disasters.

Mr. Maynes calls our attention to the Second World Conference on Human Rights scheduled for June 1993, which offers a superb opportunity to invigorate international mechanisms for the protection of minority rights. The United Nations, like the League of Nations that preceded it, has done a good job of proclaiming human rights, but it has been ill equipped with the means to protect and strengthen those rights. The kind of monitoring and intelligence capability that Mr. Maynes suggests could help the United Nations to play this important role.

In recent statements I have noted that the time has come for a serious effort to strengthen the U.N. peacekeeping capability through measures to establish U.N. forces. President Bush and Governor Clinton have spoken in support of this concept. Mr. Maynes' article suggests some additional measures that would usefully serve the same goals.

I ask that the article by Charles William Maynes entitled "Between Inertia and the 82nd Airborne," from the October 25, 1992, Washington Post be printed in the RECORD.

The article follows:

[From the Washington Post, Oct. 25, 1992]

**BETWEEN INERTIA AND THE 82ND AIRBORNE—  
"PREVENTIVE DIPLOMACY" BY A STRONGER  
U.N. COULD SAVE ETHNIC MINORITIES**

(By Charles William Maynes)

The tragedies unfolding in Somalia and the former territories of Yugoslavia have revealed an uncomfortable truth about the post-Cold War world. When the international community's choices in dealing with ethnic conflicts are reduced to sending in the 101st Airborne or doing nothing, most of the time the world will do nothing. The world will continue to watch helplessly as minorities around the globe suffer persecution, unless the United Nations, led by the United States, takes action to improve the tools of preventive diplomacy.

Article 34 of the U.N. Charter provides the Security Council with an appropriate vehicle for such intervention. The article provides that the council may investigate any dispute, or any situation "which might lead to international friction or give rise to a dispute. . . ." Today the permanent members should act like the great powers they are and press the larger council to launch fact-finding and mediation missions in several parts of the world, e.g., from the Baltic states to Macedonia, where ethnic tensions are threatening to break out in open conflict.

The Security Council and the member states of the U.N. should also give the secretary general the eyes and ears that would enhance the U.N.'s ability to intervene early and effectively in crises that threaten international peace and security. As matters stand, the secretary general has no ambas-

sadors or embassies. Without Security Council approval, he has been discouraged from deploying a fact-finding presence on the ground to investigate crises. Nor has he been permitted to take advantage of new breakthroughs in satellite intelligence.

A simple measure that authorized the secretary general to buy time regularly on the French or Russian satellite surveillance service (now available commercial) would contribute immensely to preventive diplomacy. So would weekly briefings for senior U.N. officials by the intelligence agencies of the great powers, now searching for a new mission with the end of the Cold War. There is much criticism of the U.N. for not alerting the world in time to the disaster in Somalia. But where were the intelligence agencies of the major powers? Why did they not sound the alert?

Finally, to defuse ethnic conflict, the international community must begin redefining the human rights obligations of governments. In June 1993, the U.N. will sponsor the Second World Conference on Human Rights. There's no better occasion to promote the defense of minority rights and to build on some lessons from the past.

Historically, the nation state has regarded its principal responsibility as providing a home for the dominant nationality. The central authorities obliged others to assimilate themselves into the majority culture. The legal responsibilities of nation states toward national minorities has evolved throughout the 20th century. After World War I, the peace treaties of 1919 required Poland, Czechoslovakia, Romania and Greece—all states with minority populations—to assure full protection to all inhabitants without distinction of birth and nationality, language, race or religion. (Interestingly, Iraq assumed similar obligations towards its minorities in 1932.) The League of Nations worked out a procedure to be followed in the settlement of minority disputes.

These efforts were a major step forward because they codified in law the obligation to provide protection for minorities. But there were serious flaws. The treaty provisions were vague, and they lacked sanction. And the major states, including Germany, did not feel obliged to assume the same obligations with respect to their own minorities as the smaller states had assumed toward theirs. After World War II, the U.N. placed priority on the defense of individual rights but gave less weight to minority rights.

At the 1993 conference an effort could be made to codify strong obligations of all member states—including the major states—towards minorities. Also needed are procedures to monitor publicly the record of all states in this sensitive area as well as sanctions to be applied against states that violate their international obligations. Such sanctions might include denial of access to the World Bank and other international financial institutions or suspension of their membership in international organizations.

Realistically, the world community cannot compel, without war, a large state that is determined to mistreat its minorities. But outside powers can greatly increase the costs to an abusive government. Criticism, ostracism and sanction can affect the calculus of decision-making. And most states are not large enough to defy the world indefinitely.

Greater participation of key regional powers in the work of the Security Council could be part of an international effort to protect minority rights. Among the shortcomings of the current approach to the post-Cold War security order is the dominance of four ex-

colonial powers as permanent members of the Security Council. The admissions of Germany and Japan as permanent members, though deserved, will only compound the problem. If the international community is to become involved in sensitive ethnic disputes, it may make sense to approach the problem through the creation of a Security Council sub-organ that could involve key post-colonial regional powers such as Brazil and India with an ability to influence a crisis constructively.

Of course, the argument for a much greater effort at preventive diplomacy does not mean that, in confronting ethnic disorders, the world community should rule out the use of force in principle. Certainly in Bosnia-Herzegovina, the world can help even the odds by giving arms to the embattled Muslims. And in Somalia, where teenage thugs are terrorizing the population, there is a strong case for sending professional forces to restore order. But greater emphasis on preventive diplomacy can provide a needed middle ground between military involvement and inaction. It is time to recognize where our priorities should be.●

#### PROFESSIONAL AND AMATEUR SPORTS PROTECTION ACT

● Mr. DECONCINI. Mr. President, I am pleased to report that the President signed S. 474, the Professional and Amateur Sports Protection Act, which Congress passed prior to adjournment. During final consideration of the bill, I entered into colloquies with several of my colleagues who were concerned about the applicability of S. 474's prohibition to Wyoming's *calcutta* pools, and to pari-mutuel bicycle racing in New Mexico. At that time, we discussed whether it was the intent of the bill to cover such types of gambling operations. After having had a chance to further review these States' laws, it seems clear that New Mexico's pari-mutuel bicycle racing and Wyoming's *calcutta* wagering are exempt because they fall within S. 474's grandfather provision, section 3704. This clarification should resolve any questions regarding the applicability of the bill to the gambling activities in Wyoming and New Mexico described above.●

#### TRIBUTE TO SENATOR STEVE SYMMS

● Mr. KENNEDY. Mr. President, I want to pay tribute to the senior Senator from Idaho, STEVE SYMMS, who is retiring after 12 years of distinguished service in the Senate and 8 years before that in the House of Representatives.

While we found ourselves on opposite sides of many issues, I respect him for his hard work and determination on behalf of his constituents and the causes in which he believes. And I am particularly grateful to him for his skill and support in helping to guide the transportation bill so effectively and impartially through the Senate last year.

When controversy broke out on his side of the aisle over the very important interests of Massachusetts at

stake, our State had a friend in Idaho. STEVE SYMMS demonstrated his capacity to rise above partisan politics by defending the need for a safe and efficient Interstate Highway System that links all of our States, even those whose citizens are represented by Democrats in Congress. He made the case, articulately and powerfully, for honoring the Federal Government's commitment to finish the job begun years ago—to have a first class highway network spanning the United States.

For his grasp of the details and the history preceding the transportation legislation of 1991, and for his able defense of the Central Artery/Third Harbor Tunnel project that will bring much-needed improvements in Boston to the most congested and dangerous segment of the Interstate System, the people of Massachusetts will always be indebted to STEVE SYMMS for his fair and impressive leadership at a critical moment for our State.

I join my colleagues in commending Senator SYMMS for his public service, and I wish him and his family well in the years ahead.●

#### EL CENTRO DE LA RAZA

● Mr. ADAMS. Mr. President, for over 20 years a Chicano-Latino civil rights organization know as El Centro de la Raza has played an important role in the daily struggle for justice and community development in Seattle, WA. From its humble origins in a boarded up school building on Seattle's Beacon Hill, El Centro de la Raza has grown over these two decades to provide quality child development opportunities, senior citizen services, and a wide range of recreational and educational opportunities, for Seattle's constantly growing Chicano-Latino community. Earlier this year, El Centro's significant contributions to the community were recognized by President Bush's selection of it as a recipient of his Thousand Points of Light Award.

My wife Betty and I have had several opportunities to meet with the staff of El Centro de la Raza over the past few years, and we are proud to number them among our personal friends. We have visited with them at the El Centro facility in Seattle, and have enjoyed their company here in Washington, DC.

I am particularly pleased to learn of a recent poetry and art project undertaken by El Centro de la Raza with the publication of a book entitled "Word Up." This project was the outgrowth of a series of writing workshops conducted at El Centro as part of their Hope for Youth Program.

One particularly inspiring poem included in "Word Up" was written by a young African-American named Ellis Foster. His poem entitled "Humsey Koy Mung" explains, through the me-

dium of poetry, how a Laotian youth came to be his friend. In so doing, this art also helps us to understand the important work El Centro de la Raza has undertaken in bringing Seattle's African-American and Asian youth together in mutual respect and cooperation. I ask that Ellis Foster's poem be printed in the RECORD.

The poem follows:

HUMSEY KOY MUNG

On the first day of school  
I was playing kickball  
when this boy yelled "You're out!"  
I hollered "No!"  
For a couple of minutes  
he hooted "Out! Out! Out!"  
We argued until I yelled  
"Yo! Boy, shut up or be stupid!"

We stopped.

When we got on the bus  
he came to me and said  
"Humsey koy mung"

I want to be your friend in Lao.

That's how our friendship started.

Mr. President, those of us who call Seattle, WA, our hometown know how fortunate we are to live in a community with such cultural diversity, and such a rich cross-section of languages, traditions, and racial and ethnic heritages. The very fabric of American democracy is rich in its complexity, and made stronger for having brought together so many different cultures in pursuit of a common dream. And yet we also know that the fulfillment of that dream takes effort, not just for individuals, but for all of us working together.

During my nearly 30 years in public life, and particularly during these last 6 years as a U.S. Senator, I have never found an organization more worthy of respect and admiration than El Centro de la Raza. It has been my honor to be called their Senator.●

#### PAT CLARK, SR.

● Mr. REID. Mr. President, today I rise to honor one of the Silver State's finest citizens, Pat Clark, Sr., of Las Vegas.

For over half a century, Pat Clark has devoted himself to the charitable, political, and business needs of Nevada.

Since he moved to Nevada in 1938, Pat Clark has gone above and beyond in helping the disadvantaged citizens of the State. For example, when "Help Them Walk Again," a nonprofit organization committed to spinal injury research and care, was created in 1982, Pat Clark did not hesitate to offer the time and money needed to make the new organization a success. This is what Joanne Toadvine, the founder of Help Them Walk Again, had to say about Pat Clark:

In every crisis it has been Pat Clark who has always been there for us. Without him we would not be in existence and our 53 people walking now would still be prisoners in their wheelchairs and the others would still be sitting at home deteriorating.

Opportunity Village, a 34-year-old organization dedicated to helping the mentally retarded achieve social and economic self-sufficiency, launched a fundraising campaign for a desperately needed new campus. Pat Clark answered the call for help with a \$250,000 donation to start them on their way.

In 1957, Pat Clark was an original founder of the Nevada Safety Council, a group devoted to promoting and ensuring safe driving in Nevada. For this service, he received their "Man of the Year Award," an honor well-deserved.

In the political arena, Mr. Clark served his community as city commissioner of Las Vegas for 8 years beginning in 1941. He was also a State delegate for three Presidential elections.

Pat Clark's business acumen and dedication to customer service have placed his Las Vegas Pontiac dealership among the top 2 percent in the Nation. His dealership is renowned for its high quality service and customer satisfaction. Pontiac honored Pat Clark in 1989, for being the largest retail volume Pontiac dealer in the Western United States. Pontiac will be honoring Pat Clark for his 50 years of service achievements later this year.

Pat Clark and his wife, Bernice, have found time to raise a large family, including four children, and four grandchildren. When not serving the needs of our State, he enjoys the beauty of Nevada by fishing, hunting, and ranching.

Mr. President, we are paying tribute to Pat Clark today and I believe we owe him our highest respect and esteem. I thank him for his exemplary service to the Silver State and for the shining example that he has set for his fellow Nevadans. I congratulate Pat Clark for his philanthropic, business, and civic service to the State of Nevada.●

#### TRIBUTE TO THE MOUNT RUSHMORE MOUNTAIN CO.

● Mr. PRESSLER. Mr. President, during my 18 years in the U.S. Congress, I have often boasted about South Dakota's travel and tourism industry and our State's most renowned tourist attraction, Mount Rushmore National Memorial. Today, I wish to recognize three South Dakotans who have been instrumental in making the Shrine of Democracy a national landmark. As the Mount Rushmore concessionaire, Kay Riordan-Steuerwald, Charlie Steuerwald, and Jack Riordan, of the Mount Rushmore Mountain Co., have worked to promote Mount Rushmore and make it an inviting attraction.

For over 40 years, the Mountain Co. concessionaire team has hosted millions of visitors—including many celebrities and Government officials—in their dining room and gift shop. Harriet and I have visited Mount Rushmore many times over the years. We always have been impressed with the

hospitality, fine food, cleanliness, and quality of visitor services offered by Kay, Charlie, Jack and the entire Mountain Co. crew.

The Mountain Co. has a reputation for quality which is second to none among the national park concessionaires. They set the standards other concessionaires strive to attain. Their first-rate reputation did not just happen. It is a reflection of the many years of hard work and hands-on management by Kay, Charlie, and Jack.

Kay Riordan-Steuerwald has been the driving force behind the Mount Rushmore concessions since the 1950's. Her leadership of the Mountain Co. is unsurpassed in the business world. In fact, to many, Kay Riordan-Steuerwald and Mount Rushmore are synonymous.

Kay is one of South Dakota's outstanding civic leaders. Her philanthropic endeavors are numerous. Kay was a successful businesswoman long before the women's rights movement or enactment of affirmative action laws and other Government policies designed to assist women in the working world. Women today who aspire to succeed in the business world can draw valuable lessons from Kay's leadership of the Mountain Co.

In addition to their tireless efforts to ensure that visitors to Mount Rushmore have a pleasurable experience, Kay, Charlie, and Jack also are highly regarded for their dedication to community service. While I can't begin to mention all of their good works for South Dakota, I do want to remind my colleagues of the assistance they have provided to us in the U.S. Senate.

As a member of the Senate Commerce, Science, and Transportation Committee, I was privileged to appoint both Kay and Jack to serve on the U.S. Senate Travel and Tourism Industry Advisory Council. The purpose of this one-of-a-kind council is to advise the committee on legislative matters affecting the travel and tourism industry. Input from tourism leaders like Kay and Jack has been essential in the Senate's efforts to upgrade Federal tourism policy.

Mr. President, I am saddened to say that at the close of 1992, the Mountain Co. no longer will be running the concessions facility at Mount Rushmore. Their absence will leave a great void at the memorial. No one will ever forget their commitment to high quality service. For me, Mount Rushmore will never quite be the same. I am confident, however, that Kay, Charlie, and Jack will continue their active leadership in promoting South Dakota's tourism and business communities. ●

#### NEW BEGINNINGS

● Mr. ADAMS. Mr. President, earlier this month, the Senate approved the conference report on H.R. 5677, the Labor, Health and Human Services,

and Education and related agencies appropriations bill for 1993. The Senate report that accompanied that legislation contained on page 10, the following language I had requested:

The committee is encouraged by the results of the demonstration project entitled "New Beginnings" funded through the Women's Bureau of the Department of Labor. This \$10,000 pilot project in the timber-dependent community of Forks, WA, provided a 10-week program for women, assisting them in making future educational and employment choices. Testimony before the committee indicated that 23 of the 25 enrollees obtained employment or entered further vocational training after completing the program. In light of the program's demonstrated success, and evidence that other women in timber communities in the Pacific Northwest are eager to receive such assistance, the committee strongly recommends that the Department of Labor utilize the expertise of the Women's Bureau to continue and expand New Beginnings in Forks, WA, to add Grays Harbor, Skamania, and Pend Oreille Counties to the program, and to identify four similar timber communities in the State of Oregon for participation. The committee recommends that the Department of Labor dedicate up to \$200,000 in existing funds to this effort.

Mr. President, I take some small measure of pride in the success of the "New Beginnings" program, because I was the initial advocate for providing Federal assistance for women in timber communities, those who were to become the new second paycheck in their households. Due to circumstances beyond the control of Federal, State, or local governments, previous timber harvest levels throughout the Pacific Northwest, and the employment that depended on those harvest levels, began to recede over the last few years. A number of those communities, such as Forks, WA, are now in the uncomfortable and challenging position of looking forward to an uncertain future where diversification and change must be confronted and accepted. Those communities deserve and expect the Federal Government to play a lead role in assisting them as they face up to that uncertain future.

What the "New Beginnings" program has demonstrated is that the great untapped resource in those communities is the talent and abilities of their own citizens. The relatively modest investment that returned such spectacular results in Forks, WA, stands out as a beacon light for those communities in Washington and Oregon where talented, dedicated individuals are looking to the future with concern. They have reason to ask, "Does my Government care about me and my family?" With "New Beginnings" the Federal Government has the opportunity to respond, "Yes, we do care, and we are willing to help."

I am hopeful that the Secretary of Labor will consider utilizing the Displaced Homemaker's Network, as well as the Women's Bureau of the Department of Labor, to move quickly to ex-

pand this successful pilot program into timber communities throughout the Pacific Northwest. For too long, those families have been the recipients of self-serving political rhetoric rather than meaningful training and information. I am hopeful that in the 103d Congress, the congressional delegations from Washington and Oregon will move forward, on a bipartisan basis, to see that the "New Beginnings" program expansion called for in the fiscal year 1993 appropriations bill is implemented in a timely fashion. This small program was a personal priority over the past few years, and I hope its demonstrated success will be sufficient to attract the support it deserves. ●

#### FAILURE TO FUND THE RTC

● Mr. GARN. Mr. President, 18 days after taking office, President Bush put the thrift cleanup in motion by taking action that led Congress to pass the Financial Reform, Recovery, and Enforcement Act of 1989, FIRREA. After FIRREA became law, the President gave those responsible for running the cleanup four goals.

First, protect depositor accounts—the savings of ordinary working people who trusted the Government's insurance commitment and then had to rely on its promise for protection.

Second, to shut down failed thrifts at the least cost to the taxpayers. Since 1989, 725 institutions with \$378 billion in assets have been transferred to the RTC. This was not a bailout. The stakeholders in those institutions, the stock and bondholders, were wiped out. They didn't get a dime.

Third, the President said, make the wrongdoers pay the price. To date, 1,300 persons have been indicted nationwide and there have been nearly 1,500 civil actions against directors, officers, accountants, and lawyers.

Fourth, restore the industry to profitability. The thrift industry, which lost \$13 billion from 1988-91, has already reported \$2.8 billion in profits for the first 6 months of 1992.

All of these goals are being met except one. The depositors have been protected; the failed thrifts closed; and the wrongdoers are being made to pay for what they did. However, by not funding the RTC, we are falling short in achieving the second goal—to shut down these failed thrifts at the least cost to the taxpayer. To complete the cleanup and finish the job, Congress must resume funding the RTC.

Considering the monumental task, the RTC has done a truly heroic job, but on April 1, the House of Representatives halted the RTC's funding. The Senate approved funding, but a bipartisan gridlock in the House brought the process to a standstill.

The RTC has been without funds to complete the cleanup for 6 months. It will take at least another 6 months for

the 103d Congress to meet, organize and vote for RTC funding. The RTC estimates that this 1-year delay in funding, from April 1992 to April 1993, has escalated the cost of the cleanup by \$2 billion. Now you and I as taxpayers have to start paying all over again for the House's failure to act.

We should learn the lessons history teaches. The thrift regulators of the 1980's repeatedly asked Congress for the funding necessary to recapitalize the insurance fund. While Congress refused to act, thrift industry losses mushroomed and the exposure of the taxpayers grew exponentially. The RTC funding impasse risks the same disastrous financial consequences.●

#### HEALTH CARE COSTS

● Mr. REID. Mr. President, I would like to take this opportunity to present yet another glaring example of the runaway health care costs associated with our current health care system. On April 26, of this year, one of my constituents was shot in an attempted robbery of his car wheels. He was immediately taken to the University Medical Center emergency room where he died 1½ hours later.

The total bill for his treatment during that 1½ hours was \$25,515. I don't know anyone who makes \$25,000 for 1½ hours of work. Included in his bill was a charge of \$870 for a recovery room he did not utilize. This unfortunate man died in the emergency room and never made it to a recovery room. My constituent was insured by his employer who calculates that if the cost of this man's treatment was extended over a year, the emergency unit alone could generate \$149 million per year. If this calculation is applied to the 400 rooms in the hospital, the income to the hospital for 1 year would exceed \$59 billion.

Mr. President, we need to be realistic about what is happening in our country. We need to find a way to contain these high costs. We must remember that the things we talk about relating to health care, affect human beings, individuals, not just theories in medical schools across the country. I understand that this man was covered by his employer's insurance. However, had he been one of 35 million uninsured Americans, the taxpayers or his family would have been stuck with a \$25,515 bill. It is imperative that we act to expedite the legislative process to accomplish the important goals of fair costs and quality care for all Americans.

I ask that a letter dated August 31, 1992, be printed in the RECORD.

The letter follows.

LAS VEGAS, NV, August 31, 1992.

BOARD OF TRUSTEES,  
University Medical Center, Clark County Court-  
house, Las Vegas, NV.

DEAR BOARD MEMBERS: I have been listening with interest to your commercial on the

radio extolling the virtues of University Medical Center and ending up each statement with "that's a fact". So I would like to point out a few other "facts" about your hospital.

On April 26 of this year Mr. Francisco Dominguez one of our employees was shot in an attempted theft of his car wheels. He was taken to University Medical Center emergency room, that's a fact.

Mr. Dominguez lived for one and one half hours, his bill for treatment at your center was \$25,515.15. That's a fact.

Mr. Dominguez was of Hispanic descent and his parents do not speak English. He was insured through our company, that's a fact. (We trust these factors did not enter into the charge)

Included in this bill was \$870.00 for a recovery room although he died in the emergency room. That's a fact.

We contacted Ms. Patricia Jarmin from the state of Nevada who very coldly told us that even though he was our employee and we paid the insurance premiums which basically settled his bill it was none of our business as we were not family members. That's a fact.

We contacted Ms. Dusty McClendon who was very charming and very sympathetic although she gave us no satisfaction. That's a fact.

We have extended this cost for one and one half hours of medical treatment and have decided that the emergency unit alone can generate \$149 million per year. That's a fact.

If we can extrapolate this to the 400 rooms which you operate on an annual basis your income exceeds \$59 billion per year. That's a fact.

It is hard to understand that based on these hideous charges your hospital is in a constant state of financial chaos. Your bills are historically not paid on time, including your payment to the Nevada PERS board which has run one to six months late. That's a fact.

It is very apparent that the county should not be in the hospital business but should pay other hospitals for indigent services. That's a fact.

If it sounds like we are complaining "it was meant to".

Yours very truly,

CLAIR HAYCOCK.

#### STRENGTHENING THE PAPERWORK REDUCTION ACT OF 1980 AND S. 1139: AN OPPORTUNITY LOST

● Mr. NUNN. Mr. President, as the 102d Congress ends, I would call to the attention of my colleagues that we failed to act on S. 1139, the Paperwork Reduction Act of 1991, which I introduced on May 22, 1991, with bipartisan support. The chairman, Mr. BUMPERS and ranking minority member Mr. KASTEN of the Committee on Small Business are the principal Democratic and Republican cosponsors. We were joined by many current and former members of the Committee on Small Business, on both sides of the aisle, and by the ranking minority member of the Committee on Governmental Affairs, Mr. ROTH.

Mr. President, I believe that we have needlessly foregone an opportunity to demonstrate in a concrete way the Senate's commitment to restraining the growth of Government paperwork

burdens which assault, on almost a daily basis, virtually all segments of the public. Calls for congressional action to restrain the growth of Government-sponsored paperwork are something we hear all too frequently. We hear it from the business community, especially the small business community. We hear it from State and local government officials. We hear it from the educational community. We hear it from providers within the health care system, and, increasingly, from individual recipients of health care, especially senior citizens. S. 1139 was an opportunity to do something that would have made a difference.

We all know that Government paperwork burdens, and Government regulation, cannot be eliminated. They are inherent to Government. Government requires information to advance the public good. We are in an information age and Government, like other segments of society, must meet the challenge of effectively managing ever increasing amounts of information. Likewise, effective management of Government programs requires regulations. If left unchecked, however, Government's appetite for information and regulation is insatiable.

Government demands for information must be moderated and rationalized. That's the fundamental objective of the Paperwork Reduction Act of 1980.

Individual agencies can avoid duplication of information requests through coordination, but such coordination does not come naturally. The burden imposed by a necessary paperwork request can be reduced, sometimes through such simple things as modifying the format in which the information is to be furnished or making the information request more understandable from the prospective of the person required to fill out the form. The Paperwork Reduction Act is designed to force agencies to consider the need and practical utility of a proposed paperwork request and to minimize the burden imposed. The act also assures that the public will have an opportunity to make its views known through a public comment process.

In shaping our bill, Mr. President, we had the benefit of a decade of experience under the Paperwork Reduction Act of 1980, which was sponsored by our former colleague, Lawton Chiles, now Governor of Florida. S. 1139 builds upon and strengthens the 1980 act. It reaffirms the fundamental purpose of the 1980 act: to minimize the Federal paperwork burdens imposed on individuals, small businesses, State and local governments, and educational and nonprofit institutions.

S. 1139 offers a series of specific amendments that reemphasize the primary responsibility of each Federal agency to scrutinize proposed paperwork requirements and to provide maximum opportunity for public participa-

tion. S. 1139 would shift to the individual agencies primary responsibility for obtaining and analyzing public comments on proposed paperwork requirements. Today, that responsibility falls to the Office of Information and Regulatory Affairs [OIRA], the focal point for the act's overall implementation within OMB. This simple change would emphasize the primary responsibility of the individual agencies to realistically assess the impact on the public of their proposed paperwork burdens.

With the public comments in hand, the agency would have to make the initial determination regarding whether the proposed paperwork burden meets the act's standards. Only then, would the proposed paperwork burden be submitted to OIRA for review.

This change would make available an additional 30 days for public review. And, it would shorten by 30 days the overall review period, by making possible concurrent assessment of public comments by the agency and OIRA.

S. 1139 would have OIRA establish standards to be used by the various agencies in estimating the burden placed on the public by a proposed paperwork requirement. We hear many complaints that agency estimates of the paperwork burdens are unrealistic in practical terms.

Our bill would also improve the process by which previously approved paperwork requirements are considered for renewal. The 1980 act requires that paperwork burdens be periodically reviewed to determine if they continue to meet the act's basic review standards.

Mr. President, these are just some of the improvements made by S. 1139. I will ask to include in the RECORD following my remarks a summary of S. 1139.

In 1980, the Chiles bill that became the Paperwork Reduction Act also enjoyed strong bipartisan support. The senior Senator from Missouri, Senator DANFORTH, served as its principal cosponsor. I am proud to say that I was an original cosponsor. Many of the cosponsors of S. 1139, on both sides of the aisle, were also cosponsors of the Chiles bill. And, Mr. President, let me remind my colleagues that the Paperwork Reduction Act of 1980 was signed into law by President Carter.

Like the Paperwork Reduction Act of 1980, S. 1139 also enjoys enthusiastic support from all segments of the business community, especially the small business community. S. 1139 is supported by the National Federation of Independent Business [NFIB], the 100 small business trade and professional associations that comprise the Small Business Legislative Council [SBLC], and National Small Business United [NSBU]. If we had been able to get to a vote on S. 1139, a vote in favor of S. 1139 would have been designated a key vote by NFIB, the U.S. Chamber of Commerce, and the National Associa-

tion of Manufacturers [NAM]. S. 1139 enjoys strong support from groups, representing diverse segments of the Nation's economy: the Electronic Association [AEA], the Aerospace Industries Association [AIA], the Telecommunications Industry Association, the Independent Bankers Association, the National Association of Wholesalers and Distributors, the National Retail Council, the Associated General Contractors of America, and the American Subcontractors Association, to name but a few.

Mr. President, I will ask to include in the RECORD copies of just a sample of the many letters I have received from individual associations as well as from a letter from Paperwork Reduction Act coalition. The coalition is being co-chaired by the U.S. Chamber of Commerce and the Business Council on the Reduction of Paperwork [BCORP]. Established in 1942, BCORP will celebrate its 50th anniversary this November.

Finally, Mr. President, S. 1139 enjoys the support of the administration.

With all this support, my colleagues may reasonably speculate as to why we have been unable to get any action on S. 1139 before the Committee on Governmental Affairs. What provisions of the bill make it so objectionable?

Mr. President, I believe the answer can be found in the committee's focus on the process by which the Executive Office of the President reviews proposed regulations, before they are published for public comment under the Administrative Procedure Act. The chairman of the Governmental Affairs Committee, my friend from Ohio [Mr. GLENN], fervently believes that there must be greater disclosure of all contacts between those in Government who conduct these pre-publication reviews of proposed regulations and any person in the private sector. He is particularly concerned with the role being played by the staff of the Council on Competitiveness, which is chaired by Vice President QUAYLE. The committee has expended considerable energy trying to get a clear picture of the Council's operations and its interactions with various groups inside and outside of Government. Those efforts have not produced the results the chairman had sought.

Mr. President, concerns about the President's regulatory review process under Executive Order 12291 are for me separable from the valuable enhancements to the Paperwork Reduction Act and the authorization for appropriations for OIRA, which are contained in S. 1139. The Paperwork Reduction Act already includes disclosure provisions applicable to OIRA, added by Senator Chiles, often referred to as the Sunshine Senator from the Sunshine State because of his steadfast dedication to open Government.

These statutory public disclosure requirements were supplemented in 1986

by additional public disclosure requirements suggested by my friend from Michigan [Mr. LEVIN] and by the senior Senator from Minnesota [Mr. DURENBERGER]. These additional public disclosure requirements were imposed on all of OIRA's review activities, those conducted under the authority of the Paperwork Reduction Act as well as those conducted under Executive Order 12291, by a policy directive issued by then OIRA Administrator Wendy Gramm. Those procedures are being followed by OIRA.

The effort to have substantially broader public disclosure of contacts relating to regulatory review activities has prevented Senate action on any legislation to reauthorize appropriations for OIRA or to make any amendments to the Paperwork Reduction Act. It has delayed consideration of a Presidential nominee to be OIRA Administrator. It has diverted substantial amounts of energy to various efforts to eliminate funding for OIRA and the staff of the Council on Competitiveness.

Mr. President, the objectives of the Paperwork Reduction Act of 1980 have been obscured in the smoke of this controversy over what constitutes appropriate public disclosure requirements. With S. 1139, we sought to refocus the Senate's attention on the basics of the Paperwork Reduction Act. The effort was not as successful as I would have liked, but a strong start has been made thanks to the broad support offered by the business community, especially the small business community. I intend to renew the effort in the 103d Congress.

Mr. President, I ask that the documents to which I referred be printed in the RECORD.

The documents follow:

SUMMARY OF S. 1139, THE PAPERWORK REDUCTION ACT OF 1991

The "Paperwork Reduction Act of 1991" will—

Reaffirm the fundamental purpose of the Paperwork Reduction Act of 1980: to minimize the Federal paperwork burdens imposed on individuals, small businesses, State and local governments, educational and non-profit institutions, and Federal contractors.

Provide a five-year authorization for appropriations for the Office of Information and Regulatory Affairs (OIRA) within the White House Office of Management and Budget.

Clarify that the Act's public protections apply to all Government-sponsored paperwork, eliminating any confusion over so-called "third-party disclosures" caused by the U.S. Supreme Court's 1989 decision in *Dole v. United Steelworkers of America*.

Require goals for paperwork reduction on the public—a Government-wide goal of at least 5 percent and individual agency goals that aggregate to the Government-wide goal.

Build upon the fundamental responsibilities of each Federal agency to manage paperwork reduction, by requiring—

The designation of a senior agency official in a separate office, with adequately trained staff;

A thorough review of each proposed information collection request for need and prac-

tical utility, standards whose purpose is to minimize the burden on the public while enabling an agency to collect only necessary information;

Agency planning to maximize the use of information collected by the public;

Better notice and opportunity for public participation with at least a 60-day comment period for each proposed paperwork requirement;

Agency certification of compliance with public participation requirements and the standards of need and practical utility for every paperwork proposal before its submission to OIRA for clearance; and

A certification process for the renewal of a currently approved paperwork requirement which includes public participation, thorough agency analysis of alternatives, an agency determination that the paperwork requirement meets the Act's standards, and OIRA's final clearance authority.

Reduce by 30 days the time a routine proposed agency paperwork requirement spends at OIRA, while improving the overall opportunity for public participation without impairing OIRA final clearance authority.

Strengthen OIRA's paperwork control responsibilities, by—

Establishing standards under which Federal agencies more accurately estimate the burden placed upon the public by a proposed information collection request;

Coordinating with the Office of Federal Procurement Policy (OFPP) to reduce the substantial paperwork burdens associated with Government contracting; and

Providing the authority for OIRA to initiate and conduct demonstration program to test innovative approaches to minimize paperwork burden, similar to the OFPP authority to test innovative procurement practices.

Empower the public with new tools to participate in paperwork reduction by—

Requiring future legislation be thoroughly assessed before enactment to identify anticipated paperwork requirements, and that these assessments be made available to the public; and

Enabling an individual to compel the OIRA Administrator to provide a written determination whether a Federally-sponsored information collection request complies with the Act's public protection requirements, in the same manner as the OFPP Administrator must determine if an agency procurement regulation is consistent with the Government-wide Federal Acquisition Regulation (FAR).

Strengthen OIRA's leadership role in Federal statistical policy.

THE PAPERWORK REDUCTION  
ACT COALITION,  
September 21, 1992.

Hon. SAM NUNN,  
U.S. Senate,  
Washington, DC.

DEAR SENATOR NUNN: We write to urge prompt passage of S. 1139, the Paperwork Reduction Act of 1991. Our Coalition of over 50 businesses, consumers groups, and associations is providing widespread support for this bill sponsored by Senators Nunn, Bumpers and Kasten.

The Paperwork Reduction Act of 1991, which has strong bipartisan sponsorship, builds positively upon existing laws. It increases the federal government's ability to reduce the burdens of regulatory paperwork, facilitates and enhances public participation in government decisions, and strengthens Congressional oversight by affirming the

"regulatory watchdog" functions of the Office of Information and Regulatory Affairs (OIRA). Taxpayers and consumers need these checks and balances to prevent waste in the government.

The Coalition endorses the five year reauthorization of appropriations to OIRA, with the Congressional clarification that the Act's protections against unnecessary paperwork extend to all government imposed paperwork demands. The business community has identified this legislation as the single most important step that the 102nd Congress could take to ensure balanced regulations; regulations that are necessary for competing in the global marketplace. The Paperwork Reduction Act of 1991 looks to the future by emphasizing that the Executive Branch systematically apply the advantages of new information technology to the development, operation, and review of government regulations.

Small businesses, in particular, are being overwhelmed by federal paperwork and regulatory burdens. At the same time, unnecessary paperwork drains state and local government's capabilities and resources to deliver services. We need to encourage reforms that will make improvements, not burdens, to the systems that are a part of our increasingly technical world.

Our Coalition strongly supports your efforts and those of your colleagues to move forward with this legislation. We stand ready to assist these efforts in any way we can.

Sincerely,

THE PAPERWORK REDUCTION  
ACT COALITION.

NATIONAL FEDERATION OF  
INDEPENDENT BUSINESS,  
Washington, DC, September 17, 1992.

Hon. SAM NUNN,  
U.S. Senate,  
Washington, DC.

DEAR SENATOR NUNN: The Senate may soon be considering S. 1139, The Paperwork Reduction Act of 1991, introduced by Senators Nunn, Bumpers and Kasten. On behalf of the 550,000 small business members of the National Federation of Independent Business (NFIB), I urge your strong support for this important bill.

To the nation's small business owners, excessive government regulation and the volumes of paperwork it produces have been a consistent and expensive problem. A recent NFIB Foundation survey of over 5,000 small business owners found that government regulations hit them harder than any other problem in the past five years, moving up the list of major concerns from the 19th to the eighth position. According to the Small Business Administration, a minimum of 1.2 billion hours and \$100 billion are expended by small businesses each year to comply with government paperwork.

S. 1139 will help alleviate this situation by strengthening the original Paperwork Reduction Act (PRA) and allowing for increased public participation in the regulatory process. Federal agencies will be more responsible for policing the regulatory burdens they place on the public.

In addition, a key component of this bill is its restoration of third party notifications under the paperwork reduction law. A recent Supreme Court decision, *Dole v. Steelworkers*, stated that the language of the original PRA did not specifically include so-called third party paperwork. Third party paperwork includes forms such as I-9 immigration forms and W-4 tax statements, which are not submitted directly to the government but are collected and retained by the employer or submitted to a third party. Inclusion of this type of paperwork, estimated to make up

about a third of all government imposed paperwork, was the undisputed intent of the original authors of the PRA in 1980.

Enacting S. 1139, and restoring this important category of paperwork to coverage under the PRA, is a high priority of the small business community. NFIB was a strong supporter of the original Paperwork Reduction Act over a decade ago. We believe this bill is a reasonable and effective response to problems with the original law and the recent Supreme Court decision that weakened the Act. The vote on S. 1139 will be considered a Key Small Business Vote for the 102nd Congress.

Thank you for your consideration of this matter. If I may answer any questions or be of any assistance, please do not hesitate to contact me.

Sincerely,

JOHN J. MOTLEY III,  
Vice President,  
Federal Governmental Relations.

SMALL BUSINESS  
LEGISLATIVE COUNCIL,

Washington, DC, September 16, 1992.

Hon. SAM NUNN,  
U.S. Senate,  
Washington, DC.

DEAR SENATOR NUNN: The Small Business Legislative Council (SBLC) strongly supports S. 1139, legislation to strengthen the Paperwork Reduction Act and reauthorize the Office of Information and Regulatory Affairs.

SBLC is an independent, permanent coalition of trade and professional associations that share a common concern for the future of small business. The purpose of SBLC is twofold: to maximize the influence and strength of small business on legislation and Federal policy issues of importance to the entire small business community and to disseminate information on the impact of public policy on small business. A list of SBLC members is enclosed.

Small businesses are increasingly being suffocated by excessive government paperwork. Unnecessary recordkeeping and reporting requirements directly increase their cost of doing business. All too frequently these superfluous paperwork requirements overwhelm the ability of such small businesses to identify, process, maintain, and pass on the cost to their customers.

S. 1139, the Paperwork Reduction Act of 1992, goes right to the heart of this problem. This bill reaffirms the fundamental purpose of the Paperwork Reduction Act of 1980 by establishing agency goals for paperwork reduction which aggregate to a government-wide goal of 5 percent. At the same time, the bill builds upon the responsibilities of each Federal agency to manage paperwork reduction by requiring a thorough review of each information collection request for need and practical utility, planning to maximize the use of information collected from the public, and improved opportunity for public participation. In addition, S. 1139 clarifies that the Paperwork Reduction Act's protections apply to all government-sponsored paperwork, eliminating any confusion over so-called "third-party disclosures."

Senator Bumpers, SBLC urges you to support Senator Nunn's efforts to enact the tenets of S. 1139, the Paperwork Reduction Act of 1992, before the end of the 102nd Congress.

Sincerely,

E. COLETTE NELSON,  
Chairman, Procurement Committee.

Enclosure.

CHAMBER OF COMMERCE OF THE  
UNITED STATES OF AMERICA,  
Washington, DC, September 18, 1992.

Hon. SAM NUNN,  
U.S. Senate,  
Washington, DC.

DEAR SENATOR NUNN: You may soon be asked to vote on S. 1139, the "Paperwork Reduction Act of 1991" (PRA), being offered by Senators Nunn (D-GA), Bumpers (D-AR), and Kasten (R-WI). The U.S. Chamber of Commerce Federation of local and state chambers of commerce, businesses, and associations strongly urges you to vote "YES."

Last year alone, the federal government imposed nearly five-and-a-half billion hours of paperwork on the American public. This is the equivalent of having the entire adult populations of Dallas and Houston do nothing but fill out federal forms all year. The Internal Revenue Service alone imposes more than four billion hours of paperwork per year on taxpayers. More than a billion hours of that is hoisted upon small business owners and operators—the backbone of our economy.

But it is not only business that is hampered by federal paperwork burdens. Anyone who receives Medicare or food stamps, or collects Social Security benefits, knows how true this is.

Fortunately, S. 1139 will alleviate these problems. If enacted, the PRA would:

Strengthen the public protections afforded by the original PRA and the role of the Office of Information and Regulatory Affairs (OIRA) to act as a restraint on the insatiable demands for paperwork by government agencies.

Reauthorize appropriations for OIRA for five years.

Extended the protections of the PRA to government-sponsored requirements mandating the disclosure of information by one private party to another private party (the so-called third-party disclosure requirements).

Require the establishment of a government-wide goal to reduce by at least five percent the aggregate paperwork burden existing in the prior fiscal year.

Emphasize the responsibility of agencies to solicit and carefully evaluate public comments in the formation of their information-collection requests.

Require agencies to substantiate their estimates of the paperwork burden on the public anticipated from a proposed information collection request.

Enhance the PRA's reporting requirements to distinguish between those agencies reducing unnecessary paperwork and those contributing to the mountain of paperwork being heaped upon the public, and to identify those paperwork burdens that flow directly from recently enacted congressional mandates.

Strengthen OIRA's ability to ensure an agency's compliance with the PRA.

Provide authority to test innovative approaches to government information collection activities.

Unless OIRA can continue its critical role in stemming unnecessary regulations and disclosure requirements, businesses and individuals will spend even more time and money buried in paperwork. Please vote "Yes" on S. 1139.

Sincerely,

WILLIAM T. ARCHEY,  
Senior Vice President, Policy  
and Congressional Affairs.

NATIONAL ASSOCIATION OF  
MANUFACTURERS,  
Washington, DC, September 8, 1992.

Hon. SAM NUNN,  
U.S. Senate,  
Washington, DC.

DEAR SENATOR NUNN: It is my understanding that S. 1139, the Paperwork Reduction Act of 1992, may come before the full Senate prior to the end of the 102nd Congress. The bill was offered by Senators Sam Nunn, Dale Bumpers and Bob Kasten. On behalf of the National Association of Manufacturers (NAM), I urge your strong support for their bipartisan efforts.

S. 1139 will reauthorize the Office of Information and Regulatory Affairs (OIRA) within the Office of Management and Budget for five years. OIRA is the primary agency statutorily charged with restraining the amount of unnecessary paperwork imposed by the federal government on the public and taxpayers.

The Nunn-Bumpers-Kasten bill will correct a Supreme Court decision that exempted more than one-third of federal paperwork from OIRA review and require agencies to substantiate their estimates of the time burden to comply with information collection requests and other paperwork. It will also establish a goal of reducing the amount of paperwork by five percent a year.

As the country is emerging from a recession, the government should be helping by reducing the amount of time it takes to comply with paperwork requirements in order to allow for more productive and efficient activities. To this end, OIRA's reauthorization is necessary since it is the government's designated watchdog in this area. The NAM

urges your support for the Paperwork Reduction Act of 1992 when it comes before the full Senate.

Sincerely,

MICHAEL E. BAROODY.

BUSINESS COUNCIL ON THE  
REDUCTION OF PAPERWORK,  
Washington, DC, September 28, 1992.

Hon. SAM NUNN,  
U.S. Senate,  
Washington, DC.

DEAR SENATOR NUNN: We write to enthusiastically support your efforts to pass S. 1139, the Paperwork Reduction Act of 1991.

The Business Council on the Reduction of Paperwork has been monitoring the Government's paperwork demands for 50 years. Our members are businesses of all sizes, trade and professional associations, and individuals. We believe your legislation is a significant step towards better government for our future. Our members, like the public, need relief from excessive and wasteful regulatory paperwork.

This is vitally important legislation which works positively to strengthen current law. We strongly endorse the 5-year authorization for appropriations for the Office of Information and Regulatory Affairs (OIRA) and Congressional clarification of the scope of the Act's public protections to apply to all Government-sponsored paperwork. We applaud this resolution of the confusion caused by the U.S. Supreme Court's 1989 decision in *Dole v. United Steelworkers of America*.

Business leaders have cited this legislation as the single most important step the 102nd Congress can take to ensure balanced regulations which will allow us to effectively compete in the global marketplace. Business, in particular small business, is being overwhelmed by the burden of federal paperwork. Unnecessary paperwork is hampering state and local governments' capabilities and resources to deliver services. The Paperwork Reduction Act of 1992 offers a basis for relief.

S. 1139 looks to the future by emphasizing the need for the Executive Branch to systematically take advantage of the information age and apply new and emerging information technology to the creation and review of regulations. The checks and balances found in this legislation are sorely needed by both taxpayers and consumers.

BCORP and its members appreciate your efforts and those of your colleagues on behalf of the Paperwork Reduction Act of 1991. We are prepared to assist you in these efforts in any way we can.

Sincerely,

JON V. VAN HORNE,  
Chairman.

C.T. HOWLETT,  
Chairman-Elect.

ROBERT E. COAKLEY,  
Executive Director.

INDEPENDENT BANKERS  
ASSOCIATION OF AMERICA,  
Washington, DC, September 17, 1992.

Hon. SAM NUNN,  
U.S. Senate,  
Washington, DC.

DEAR SENATOR NUNN: On behalf of the 6,000 members of the Independent Bankers Association of America (IBAA), I am writing to encourage you to support S. 1139, the Paperwork Reduction Act of 1991, sponsored by Senators Nunn, Bumpers and Kasten.

This bill strengthens the public protections afforded by the Paperwork Reduction Act of 1980 and reauthorizes appropriations for five years for the Office of Information

and Regulatory Affairs (OIRA), which falls under the Office of Management and Budget (OMB).

IBAA strongly supports this effort to minimize the Federal paperwork burdens imposed on individuals, small businesses, state and local governments, educational and non-profit organizations and Federal contractors.

Community banks are fighting against unnecessary regulatory paperwork burden on every possible front. S. 1139 takes positive steps in that direction. We urge your support for swift action on this bill before the end of the legislative session.

Sincerely,

GARY J. KOHN,  
Legislative Counsel.

THE ASSOCIATED GENERAL  
CONTRACTORS OF AMERICA,  
Washington, DC, September 16, 1992.

Hon. SAM NUNN,  
U.S. Senate,  
Washington, DC.

DEAR SENATOR NUNN: Members of the Associated General Contractors of America (AGC) strongly support and urge prompt passage of S. 1139, the Paperwork Reduction Act of 1991.

S. 1139 strengthens the public protections afforded by the Paperwork Reduction Act (PRA) and the role of the Office of Information and Regulatory Affairs (OIRA) to act as a restraint on exceeding demands for paperwork by federal government agencies. Last year alone, the federal government imposed 5.4 billion hours of paperwork on American individuals and businesses.

S. 1139 requires establishment of a government-wide goal to reduce by at least five percent the aggregate paperwork burden existing in the prior fiscal year. A summary of adding provisions of this legislation is attached for your information.

AGC contractor members agree that Congress should enact S. 1139 to reduce the federal paperwork for individuals and businesses and to minimize the government's cost of collecting, maintaining, using and disseminating information.

Thank you for the opportunity to present these views.

Sincerely,

STEPHEN E. SANDHERR,  
Executive Director,  
Congressional Relations.

AMERICAN SUBCONTRACTORS  
ASSOCIATION, INC.,  
Alexandria, VA, September 15, 1992.

Hon. SAM NUNN,  
U.S. Senate,  
Washington, DC.

DEAR SENATOR NUNN: The American Subcontractors Association commends you for your ongoing efforts to reduce unnecessary government paperwork. ASA strongly supports S. 1139, the Paperwork Reduction Act of 1992.

ASA is a national trade association with more than 7,000 firms representing all major construction trades. In addition to its individual member companies, ASA represents 20 other construction specialty trade associations with members of their own.

Reducing government paperwork burdens on our members has been a goal of ASA since it was founded more than 25 years ago. Several ASA members were among the delegates to the 1980 White House Conference on Small Business who worked to include paperwork reduction among the Congress' final recommendations. ASA was a strong proponent of the Paperwork Reduction Act of 1980. And,

of course, we strongly supported the reauthorization of the Office of Information and Regulatory Affairs in 1986.

ASA believes that, as a result of the Paperwork Reduction Act, the burden of government paperwork on the public is much less than might otherwise be. Nonetheless, ASA members report they are drowning in a sea of government information requests. We believe the Paperwork Reduction Act of 1992 is needed to strengthen the existing law and to assure that OIRA remains the focal point for government paperwork reduction.

ASA supports the new goals for paperwork reduction that would be established by S. 1139. We believe this provision provides both OIRA and the individual agencies with realistic objectives on which to focus their paperwork reduction efforts.

However, we believe it would be impossible to meet these goals if the Act is not clarified to apply to so-called third-party paperwork. As employers, ASA members are particularly susceptible to such government-imposed paperwork. Any government requirement that an employer collect information from its employees or provide information to its employees, falls into this category. This includes, for example, payroll tax information, employee benefit notifications, and job site health and safety information. ASA strongly supports the provision in S. 1139 that would assure that this type of government-required paperwork is subject to the same standards of need and usefulness as paperwork submitted directly to the government.

Finally, ASA supports the provisions in S. 1139 that would increase the opportunity for public participation in the paperwork process. Those that are required to keep records and complete forms know better than anyone the amount of time it takes, and whether there is a better method to achieve the purpose of the information collection requirement.

Senator Nunn, thank you for your continuing efforts on S. 1139, the Paperwork Reduction Act of 1992. We look forward to working with you to assure that this important legislation is enacted into law as quickly as possible.

Sincerely,

WAYNE T. RUTH,  
Chairman,  
Government Relations Committee.●

#### ACTION ON PAPERWORK REDUCTION—A PRIORITY FOR SMALL BUSINESS

● Mr. BUMPERS. Mr. President, I want to associate myself with the remarks just made by my good friend from Georgia, Senator NUNN. I am pleased to be the principal Democratic cosponsor of S. 1139, the Paperwork Reduction Act of 1991. It is indeed unfortunate that we have been unable to get action on the bill, despite its bipartisan support within the Senate and its broad support within the business community, especially the small business community.

If I am returned to this body by the will of the people of Arkansas, my friend from Georgia can certainly count on me to join him in a renewed effort to enact a Paperwork Reduction Act of 1993, during the next Congress. Important things often take longer than we would like, but this Senator is

willing to relentlessly pursue reforms which I believe to be important. For me, paperwork reduction is certainly such an important issue.

As chairman of the Committee on Small Business, I can attest to the importance the small business community attaches to restraining the growth of Government-sponsored paperwork and the regulations from which paperwork burdens often flow. Enactment of the Paperwork Reduction Act and a companion piece of legislation, the Regulatory Flexibility Act, were key recommendations of the 1980 White House Conference on Small Business. In the closing days of the Carter administration, the Congress and the President responded, enacting both pieces of legislation. Our former colleague from Florida, Lawton Chiles, led the way on the Paperwork Reduction Act. My friend the senior Senator from Vermont [Mr. LEAHY] led the way on the Regulatory Flexibility Act. Both of these small business initiatives enjoyed strong bipartisan support, because they reflected a commonsense approach.

The Regulatory Flexibility Act is founded on the simple principle that in fashioning regulations, Federal agencies must assess their impact on small business concerns. When the impact will be significant, a Federal agency is responsible for tailoring a generally applicable regulation to the needs of small firms or must issue separate regulatory coverage for use by small firms. The Regulatory Flexibility Act specifically gives to the Small Business Administration's Chief Counsel for Advocacy a major role in monitoring agency compliance. The Advocate's office reviews proposed regulations and the small business impact assessments relating to those regulations.

Like night follows day, regulations, even regulations honestly adjusted to minimize their adverse impact on small businesses, generally lead to increased paperwork burdens. Government not only wants to tell you what to do, but wants to hear back on how well you are complying with the regulation. Other times, agencies are just collecting information. What kills small firms, and annoys the public generally, is the cumulative effect of all these Government demands. Government regulation and Government paperwork cannot be eliminated, but there's got to be commonsense limits.

The Paperwork Reduction Act of 1990 [PRA] reflects that commonsense approach, and includes a straightforward public protection provision. If a Federal agency wants to impose a paperwork burden, it must submit its proposal for comment by the public and have it reviewed by the Office of Information and Regulatory Affairs [OIRA]. Under the PRA, OIRA can approve a paperwork requirement for up to 3 years, assigning a control number and

expiration date, which must appear on the form. If an agency form does not reflect an OIRA control number or if the approval has expired, the public is free to ignore the agency's information collection request without fear of penalty.

Having a single point of review within the executive branch contributes to a more consistent application of the basic review standards included in the Paperwork Reduction Act. If an agency is to get approval for a proposed paperwork requirement, the proposal must pass muster against some pretty fundamental standards: Is the paperwork burden necessary for the proper performance of the agency's programs? Does the proposed paperwork burden have practical utility in furthering a legitimate function of the agency? Would the proposed information collection duplicate information already being collected by the Government? Is the proposed paperwork burden the least burdensome alternative?

The Congress included an opportunity for public review of a proposed Government-sponsored paperwork burden in the firm belief that business people would be in a good position to make practical suggestions on how to minimize the burden to be imposed by an otherwise legitimate information collection request. They would also be in a position to suggest how a current paperwork burden might be adjusted to meet some new Government need. Getting double duty out of one form or report makes more sense than having two.

Mr. President, agencies do not come naturally to such an approach. Each agency tends to approach its responsibilities without reference to what other agencies are doing. The president of a small bank in Arkansas showed me the reports that he had to submit to various regulatory agencies. It stood almost 4 inches high. These were not just forms, but computer printouts. To him, the most absurd thing was that he was submitting essentially the same information to several different agencies. Some were literally within blocks of each other here in Washington. Unfortunately, in carrying out their responsibilities, agencies tend to act as if they are not even part of the same Government.

Mr. President, the Paperwork Reduction Act has made a difference in restraining the growth of Federal paperwork burdens. The problem is getting Federal agencies to comply with not just the letter of the act's requirements but the spirit as well.

Throughout the 1980's, the Small Business Committee has paid close attention to overseeing the implementation of both the Paperwork Reduction Act and the Regulatory Flexibility Act. The committee, and especially the Subcommittee on Government Contracting and Paperwork Reduction,

have held 10 hearings to review regulatory and paperwork burdens and the effectiveness of the implementation of the Paperwork Reduction Act and the Regulatory Flexibility Act. Over the last 4 years, the Small Business Committee and the Paperwork Reduction Subcommittee under the chairmanship of my friend, the senior Senator from Illinois, [Mr. DIXON], have been especially active in response to calls for relief from the small business community. Regulatory and paperwork burdens have clearly been on the rise, driven by a strong resurgence of regulatory activism within the agencies, under the cover of statutes which frequently must grant broad discretion concerning the details for their implementation. During the same period, the small business community has been alarmed that the principal statutory proposals to reauthorize appropriations for OIRA and to amend the Paperwork Reduction Act have strayed away from the fundamental objectives of the 1980 act and have become fixed on issues relating to disclosure of contacts between Government employees and private sector interests during regulatory reviews.

As noted in the remarks of my good friend, the senior Senator from Georgia [Mr. NUNN], the Paperwork Reduction Act already includes disclosure requirements that apply to OIRA when conducting paperwork reviews, disclosure requirements which are reasonable, practical, and working. As Senator NUNN noted, these disclosure requirements were included by Senator CHILES as part of the 1984 amendments to the Paperwork Reduction Act. Additional public disclosure procedures were adopted by OIRA in 1986, at the insistence of Senators LEVIN, RUDMAN, and DURENBURGER. They apply to OIRA's review of proposed agency regulations under the authority of Executive Order 12292. These expanded public disclosure procedures are also being voluntarily followed by OIRA when making reviews under the Paperwork Reduction Act.

Mr. President, the controversy over the adequacy of the public disclosure requirements that apply to the regulatory review process has spawned a whole host of serious problems. Reauthorization of appropriations for OIRA, which expired on September 30, 1989, has stalled. An effort was started by Members of the House to terminate funding for OIRA for fiscal year 1990. This effort was strongly opposed by the small business community and many other groups. It was strongly opposed in the Senate by many members of the Small Business Committee, including me.

OIRA has also been left without a Presidentially appointed and Senate-confirmed administrator for about 3 years, creating a serious power vacuum. Since neither nature nor politics

can long tolerate a vacuum, the Competitiveness Council, headed by Vice President QUAYLE, has filled the vacuum, taking an aggressive role in regulatory review. The Competitiveness Council has not volunteered to make itself subject to OIRA's or any other type of disclosure. Oversight efforts by a number of House and Senate committees have produced little but frustration for the Representatives and Senators involved. Recently, an effort to eliminate any funding for staff to support the Competitiveness Council failed.

This ongoing controversy over what are appropriate requirements for public disclosure of contacts between Government officials and persons outside of Government during the process of reviewing a regulation before it is released for public comment have cast a huge stormcloud over all legislative efforts to strengthen the Paperwork Reduction Act. During the last Congress, the small business community sought the Small Business Committee's assistance to urge the Governmental Affairs Committee to consider a package of essential amendments to S. 1742, a bill to reauthorize appropriations for OIRA, and included a series of amendments to the Paperwork Reduction Act of 1980. We responded to their call for assistance, forwarding their package of amendments with a letter signed by 13 members of the committee.

Mr. President, I will ask that a copy of our letter of April 3, 1990, be included in the RECORD following my remarks. Senator NUNN then did his best to have these suggestions incorporated. Despite much hard work, the final product was not something that the small business community could support, although they ceased to actively oppose the enactment of S. 1742, once the administration endorsed the Governmental Affairs Committee's revised bill and negotiated the issuance of an Executive order relating to public disclosure of contacts during the prepublication review process for regulations. In the end, Mr. President, action on S. 1742 was blocked in the final hours of the 101st Congress by a series of holds placed on the bill from the Republican side of the aisle.

Early in 1991, a number of business groups, including the principal small business groups, and others wrote the President and a number of Members of the Senate urging that the starting point for legislation in the 102d Congress should be a positive bill that built upon and strengthened the Paperwork Reduction Act of 1980. S. 1139 is that positive bill.

Mr. President, I will ask to include in the RECORD a copy of the letter sent to me.

On June 25, 1991, the Committee on Small Business held a hearing on the "Implementation of the Paperwork Reduction Act of 1980 and Recommenda-

tions to Make It More Effective." Many of the witnesses offered testimony regarding S. 1139. The testimony was universally positive. Unfortunately, that hearing was the last action on S. 1139 during the 102d Congress, for the reasons previously mentioned in my remarks and those of my good friend from Georgia, Senator NUNN.

Mr. President, without vigilant congressional oversight of the implementation of the Paperwork Reduction Act, the natural tendencies of the agencies regarding regulatory and paperwork burdens will flourish. I feel confident that the Committee on Small Business will do more than its fair share to maintain such oversight. But from my viewpoint, a reaffirmation and strengthening of the Paperwork Reduction Act of 1980 along the lines proposed in S. 1139 is absolutely essential if the act is to continue to be an effective deterrent to excessive paperwork burdens. The small business community and the public deserve no less.

Mr. President, I ask that the letters to which I referred be printed in the RECORD.

The letters follow:

U.S. SENATE,  
COMMITTEE ON SMALL BUSINESS,  
Washington, DC, April 3, 1990.

Hon. JOHN GLENN,

Chairman,

Hon. WILLIAM V. ROTH, Jr.,

Ranking Minority Member,

Committee on Governmental Affairs,

U.S. Senate, Washington, DC.

DEAR JOHN AND BILL: Your Committee is now considering S. 1742, the "Federal Information Resources Management Act". This bill, introduced by Senator Bingaman, makes a series of very significant amendments to the Paperwork Reduction Act of 1980 (PRA) and reauthorizes the Office of Information and Regulatory Affairs (OIRA), which serves as the focal point for the Act's implementation.

The paperwork burdens imposed by the Federal Government on individuals and businesses have consistently been a matter of substantial concern to the small business community. The enactment of the PRA and the establishment of OIRA were key recommendations of the 1980 White House Conference on Small Business. Since that time, all segments of the small business community have repeatedly called upon the Congress to preserve and strengthen the Act, and sought its vigorous implementation by the various agencies and OIRA.

As recently as last September, our Subcommittee on Government Contracting and Paperwork Reduction held a hearing to receive testimony from witnesses representing many segments of the small business community. They expressed their continued support for the Act's vigorous application to contain the Government's insatiable appetite for information and regulations. They furnished recent examples of how the act can effectively protect the public from unnecessary and unreasonable paperwork burdens by requiring agencies to seek out the least burdensome paperwork requirements when fulfilling their missions.

The small business community remains very concerned that some provisions of S.

1742 may severely curtail the protections afforded by the Act. The attached proposal, developed by the National Federation of Independent Business (NFIB) with technical assistance from our Committee staff, represents what the small business community believes are needed modifications to the text of the bill currently before your Committee. In addition NFIB, it is supported by the Small Business Legislative Council (SBLC), National Small Business United (NSBU), and many of other small business organizations that comprise their memberships. It is our understanding that major groups representing other segments of the business community also support this proposal. We believe that this proposal, which is being considered by your Committee staff in conjunction with NFIB, deserves very serious consideration by the Committee if the PRA's vitality is to be sustained.

Recently, the U.S. Supreme Court decided *Dole v. United Steelworkers of America*, interpreting the PRA. The Court held that neither the statute nor its legislative history supported a position that the PRA authorized the review of paperwork burdens required by the Government to be imposed by one private party on another private party. Many in the small business community assert that this decision puts substantial volumes of paperwork burden outside the Act's public protections. For example, information collection or other paperwork requirements imposed on many tiers of subcontractors by their prime contractor at the direction of a procuring agency would be totally free of any review under the Act. Our former colleague from Florida, Lawton Chiles, urged in his brief to the Court that such a limitation was not intended. Appropriate clarification of Congressional intent in this regard would seem to be warranted before final Senate action on the bill.

Further, S. 1742 establishes a set of detailed procedures for recording communications with other Government agencies and the private sector relating to OIRA's exercise of its review activities under the PRA or any other authority. It has been asserted that in their present form these requirements are so detailed that they could possibly become a real restraint on public participation in the review processes established by the Act.

Finally, we wish to commend you and Senator Bingaman for the substantial enhancements made by S. 1742 to improve the formulation and implementation of Government policies regarding overall information resources management and Federal statistical policy. If properly implemented, these enhancements will inure to the benefit of the small business community.

Sincerely,

Dale Bumpers, Chairman; Rudy Boschwitz, Ranking Minority Member; Trent Lott, Charles E. Grassley, Malcolm Wallop, Christopher S. Bond, Robert W. Kasten, Jr., Sam Nunn, Alan J. Dixon, Max Baucus, David L. Boren, John F. Kerry, Tom Harkin.

JANUARY 8, 1991.

Hon. DALE BUMPERS,  
Chairman, Committee on Small Business,  
U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: Soon after the 102nd Congress turns to legislative business, we believe it must promptly consider legislation that maintains the vitality and reestablishes the full potential of the Paperwork Reduction Act of 1980.

During the last Congress, the committees of jurisdiction in both houses reported legis-

lation which, in the view of the undersigned organizations, would have severely weakened the public protections afforded by the Act and diminished the role of the Office of Information and Regulatory Affairs (OIRA). These bills, S. 1742 and H.R. 3695, would have impaired the public's and Congress' ability to assure accountability for reasonable restraints on the growth of federal paperwork and regulatory burdens. In our view, they would have impaired any President's ability to review and coordinate the implementation of statutes and other public policy initiatives needed to minimize the public burdens of necessary paperwork and regulatory demands.

We are preparing a legislative proposal which will enhance rather than diminish the effectiveness of the Paperwork Reduction Act and OIRA. Left unrestrained, the government's historical and insatiable appetite for information and regulation leads to wasteful and unnecessary burdens upon the public. To counter that trend, we support a positive, constructive approach that builds upon current law.

Our proposal will emphasize the responsibility and accountability of each agency to achieve its mission in the least burdensome and the most economical way possible. We intend to address the present confusion over whether the public protections of the Act extend to government-sponsored requirements to disclose information to third parties. We believe they should. We believe any new legislation to amend the Act should clarify this issue. In addition, we propose to emphasize the opportunities for reducing unnecessary burdens on small businesses, universities and research institutions, and State and local governments.

Mr. Chairman, we urge you to review this proposal before you take a position on legislation to amend the Paperwork Reduction Act or reauthorize the Office of Information and Regulatory Affairs.

Sincerely yours,

BUSINESS COUNCIL ON THE REDUCTION OF PAPERWORK. CITIZENS FOR A SOUND ECONOMY. THE JOHNS HOPKINS UNIVERSITY. NATIONAL ASSOCIATION OF MANUFACTURERS. NATIONAL FEDERATION OF INDEPENDENT BUSINESS. NATIONAL SMALL BUSINESS UNITED. SMALL BUSINESS LEGISLATIVE COUNCIL. U.S. CHAMBER OF COMMERCE.\*

#### PAPERWORK REDUCTION ACT OF 1991

• Mr. KASTEN. Mr. President, I rise today to join my colleagues, the distinguished Senator from Georgia, Senator NUNN and my chairman, Senator DALE BUMPERS from Arkansas, in expressing disappointment that the 102d Congress will adjourn without having the opportunity to pass a very important piece of legislation—the Nunn-Bumpers-Kasten Paperwork Reduction Act of 1991.

Congress has spent a numerous amount of time over the past 2 years talking about reincentivizing the economy. And just as Congress has failed to enact a significant economic growth package, it has failed to act on legislation that will curb Government overregulation that is stifling growth and strangling our small businesses—the backbone of our Nation's economy.

In the last 3 years, the pages of the Federal Register have increased from 55,000 to nearly 70,000. Each extra page of regulations imposes new requirements on businesses—and especially on small businesses.

I was a small business owner before entering public life, so I know what this means. It means more time—more work—more expense. It means you have to hire extra workers for the sole purpose of filling out forms—as opposed to producing marketable products. In a recession, this added burden becomes a very serious threat to the survival of many businesses.

Over the past 10 months, I have traveled around my State of Wisconsin holding official Senate Small Business Committee field hearings. I heard time and time again, from the local small business men and women, that what they need is less burdensome Government regulation. Well they are right. To illustrate my point, I carried a stack of Government forms that every entrepreneur must fill out to start a dry cleaning business. This stack reaches nearly one foot high!

In 1980, we had 121,000 regulatory personnel. In the Reagan and Bush administrations, they got cut back to a level of 114,000 by 1990.

But this trend has stopped. Next year, we will see a higher level of bureaucrats than in 1980—a projected total of over 122,000.

President Bush himself says that this huge regulatory machine is costing the economy at least \$185 billion per year. I understand that new estimates being formulated have increased this figure from \$300 to \$400 billion annually.

Again, this is sending us in the wrong direction. The President has established a counterforce that is pushing us back in the right direction—the Council on Competitiveness chaired by Vice President DAN QUAYLE.

The Vice President's Council has reported that their efforts in regulatory reform have generated and saved jobs in Wisconsin and across the country. Economists estimate these regulatory savings will save or create nearly 200,000 jobs nationally and 4,000 jobs in Wisconsin—quite a report.

Yet, despite their efforts, the Competitiveness Council has been taking some heavy hits from liberal special-interest pressure groups—a sure sign of its effectiveness. It is taking on the sacred cows of the bureaucracy—and, in some cases, prevailing.

One of the Council's crucial initiatives has been in reviving the OMB's Office of Information and Regulatory Affairs—OIRA.

OIRA was created under the Carter administration to review Government regulation and paperwork burdens. As President Carter himself put it, OIRA was formed to “regulate the regulators.” It has a lot of work to do, and we in Congress ought to support that work.

Regrettably, we have not done this. Congress has left the top slot at OIRA vacant for almost 2 years—and refused to reauthorize the agency. Even the Government Affairs Committee has proposed a bill that will further weaken the President's ability to oversee and control the development of costly new regulations.

We want to reverse this. Senators NUNN and BUMPERS, and I have introduced the Paperwork Reduction Act of 1991. Our bill would move us to the opposite direction—away from the big-Government approach promoted by the Government Affairs Committee. This bill would strengthen OIRA's ability to block regulations instead of further weakening it. Senators DOLE, BENTSEN, WALLOP, BAUCUS, BOND, and DIXON have helped us build a truly bipartisan base for this legislation.

Since 1981, OIRA has been able to reduce the amount of time the public spends filling out Government paperwork by almost 600 million hours per year. Using a conservative estimate of \$10 per hour, this paperwork reduction has saved the economy some \$6 billion each year.

If we do not support OIRA, we will head in the opposite direction pretty fast. Without this kind of oversight, there will be no way to correct the innate tendency toward overregulation that exists in the Federal agencies. We all know about this tendency, and we all have our favorite horror stories about regulatory excess.

One of my own personal favorites is OSHA's hard hat proposal. OSHA wanted every single hard hat in America to be disinfected before use. This would have added some \$60 million per year to the cost of doing business—even though there is not a single documented case of any worker catching anything from wearing a hard hat.

Any single anecdote of this kind is relatively unimportant. What is important is what it demonstrates about the regulatory mentality. If there is no counterforce representing the interests of small business and national competitiveness, the result will be economic disaster.

Our Paperwork Reduction bill is a response to the 1990 Supreme Court ruling in *Dole versus United Steelworkers of America*. In that ruling, the Court decided that the initial Paperwork Reduction Act of 1980 did not give OMB the power to review regulations requiring the disclosure of information to an individual or employer.

The Court limited OMB's review to those regulations that require disclosure directly to the Government. In effect, this ruling removed one-third of all Federal paperwork from OMB's review.

This paperwork bill would reaffirm the purpose of the 1980 bill—to minimize the Federal paperwork burden. The bill would strengthen OIRA's

hand—and give the public an opportunity to object to unreasonable government paperwork demands.

Our objective is to reduce Government paperwork by 5-percent annually. This was the goal of the 1980 bill—and it remains necessary today.

American citizens are spending more than 5.3 billion hours per year filling out Government forms. This is enough to keep 2 million people doing nothing but filling out forms all year round. There is a clear connection between this misplaced emphasis—this bureaucratic excess at the Federal level—and today's struggling economy.

We cannot afford an overtaxed, overregulated economy. If we set bad economic policy at the Federal level, the result is the kind of stagnation and mass unemployment we are experiencing today.

Unless we change course and take a new direction, our workers and small business people will continue to get further and further behind.

There is a solution. That is why I will be back in the next 103d Congress to continue urging the enactment of valuable legislation like the Paperwork Reduction Act that will help steer our Nation toward economic prosperity and create jobs. I urge all my colleagues to join me in supporting this important piece of legislation.●

#### PAPERWORK REDUCTION

● Mr. ROTH. Mr. President, as a cosponsor of S. 1139, the Paperwork Reduction Act of 1991, I am a strong supporter of the need to minimize the paperwork burdens imposed by the Federal Government.

This legislation represents an important effort to deal with the issue in a reasonable and effective manner. It recognizes the legitimate information collection and documentation needs of government. At the same time, it addresses the natural tendency of Government bureaucracies to err on the side of excessive paperwork demands, even when agencies are expected to strike a balance between cost and benefit.

I had hoped that the Governmental Affairs Committee would have been able to consider and act on the bill during this past Congress. If it had, and if all of my colleagues in the Senate had been to consider the bill, I believe that a solid majority would have voted for it.

By failing to act on this much-needed legislation, the Senate has prolonged expensive and difficult paperwork burdens imposed on individuals, small businesses, educational and nonprofit institutions, State and local governments, and other persons. Also through its inaction, the Senate has perpetuated unnecessary costs on American businesses trying to compete in a global economy.

The United States is a very high-wage Nation, compared to the rest of the world. This is certainly good, because it means our workers can enjoy a high standard of living. But it does drive up the cost of our products and services in price-sensitive worldwide competition. This is a competitive disadvantage we can overcome, however, by increasing our productivity and minimizing any Government-imposed costs.

Paperwork is a major, Government-imposed cost—and one for which we should be constantly vigilant in our efforts to keep at an absolute minimum. This bill does that, by strengthening the ability of the Office of Information and Regulatory Affairs to be our paperwork watchdog. I look forward to working on this legislation when it is reintroduced next year.●

#### GENE BROOKS

● Mr. ADAMS. Mr. President, during my tenure as chairman of the Aging Subcommittee of the Senate Committee on Labor and Human Resources, I had the distinct honor of holding hearings on the reauthorization of the Older Americans Act, and several other legislative initiatives of interest to this Nation's senior citizens. I was most appreciative of the legislative expertise of the several advocacy groups located here in Washington, DC that focus on issues of interest to seniors. In addition, I was grateful for the opportunity to rely on the knowledge and practical advice from a number of advocates working in State and local seniors programs from around the country, and from my own State of Washington. Reflecting back on those many conversations, meetings, and hearings, I am most appreciative of the advice and counsel I received from my longtime friend, Gene Brooks.

Gene Brooks served with great distinction as Director of the Division of Aging for King County, WA. She was the founder of Senior Day at the Kingdome, an event that showcased the wide range of services available to senior citizens in the Puget Sound area. Gene's energy level was unsurpassed, and her boundless enthusiasm for her fellow citizen led her to leadership roles with the Federal Way Community Council, the Washington State Democratic Party, and with the Governor's Commission on Aging. Her popularity among county employees was recognized when Gene Brooks was selected to throw out the first pitch at a Seattle Mariner's game noting King County Employee Appreciation Day. She also served two terms as president of Senior Services of Washington.

Mr. President, my friend Gene Brooks passed away on June 30, 1992 in her hometown of Tacoma, WA. Up to the very end of her remarkable life, Gene continued to lead and inspire

those who knew her. Her dedication to senior citizens was more than just a vocation: she lived with her mother Maude Knoblauch, who is a legend in her own right among senior advocates. To Gene's children Robert, Timothy, and Marianne I have already expressed my deep personal sorrow at losing such a dear and trusted friend. To the senior advocates in Washington State, and to those who knew and loved her, I want to note that the passage of the Older Americans Act Amendments of 1992 will always remain, in the heart of the subcommittee chairman, dedicated to the memory of a great American, Gene F. Brooks.●

#### INTERSTATE BRANCHING BY FEDERAL SAVINGS ASSOCIATIONS

● Mr. GARN. Mr. President, yesterday the President signed into law the Housing and Community Development Act of 1992. In addition to authorizing housing programs, this legislation also establishes a new office within the Department of Housing and Urban Affairs to regulate and oversee the Federal Home Loan Mortgage Corporation, Freddie Mac, and the Federal National Mortgage Corporation, Fannie Mae. Also of great importance are provisions tightening our money laundering and counterfeiting laws, as well as several provisions that provide modest relief from certain laws that were imposing impractical burdens on our financial institutions.

During Senate consideration of S. 2733, the underlying bill dealing with the Government-sponsored enterprises, an amendment was adopted that would have imposed a 15-month moratorium on interstate branching by Federal savings associations. This amendment was in response to an Office of Thrift Supervision regulation that removed a previous agency-imposed limitation on such branching.

During consideration of the moratorium provision there appeared to be confusion among some of the sponsors of the amendment as to the existing statutory branching authority of Federal thrifts, and that of national banks. There was an apparent belief that the branching authority of Federal thrifts was tied to State law, and that the Office of Thrift Supervision had exceeded its statutory authority by permitting thrifts to branch interstate.

In fact, section 5(r) of the Home Owners' Loan Act clearly and unequivocally permits Federal thrifts to branch outside of their home State, subject to several statutory conditions. Unlike national banks, the branching authority of Federal thrifts under the Home Owners' Loan Act has never been tied to State law. Under plenary authority to regulate the activities of thrifts granted to the Federal Home Loan

Bank board in section 5 of the Home Owners' Loan Act, thrifts have been permitted to branch interstate since 1933. Such authority was upheld by the courts in 1982 in *Independent Bankers' Association of America v. Federal Home Loan Bank Board*, 557 F. Supp. 23 (D.D.C. 1982). That same year, Congress also affirmed this authority, subject to thrifts meeting a qualified thrift lender asset test under the Tax Code, as part of the Garn-St Germain Act. That provision was then re-enacted by Congress without substantive change in FIRREA in 1989 as section 5(r) of the Home Owners' Loan Act. Thus, the recent Office of Thrift Supervision rule simply permitted Federal thrifts to branch to the extent previously permitted by Congress, which was entirely consistent with that law.

Numerous studies on the effects of interstate branching indicate that it would enhance safety and soundness by facilitating geographical diversity in both the operations and loan portfolios of thrifts. These benefits promote financial stability and ultimately decrease risks to the Federal deposit insurance funds and exposure of the Nation's taxpayers.

Those who propose limiting interstate branching for Federal thrifts seek to maintain fences around their regulatory and competitive turf. The cost of this accommodation is greater risk to the insurance funds and ultimately the Nation's taxpayers. Congress rejected such a trade-off in FIRREA. We must not return to a pre-FIRREA approach where fundamental safety and soundness interests are compromised in favor of special interests.

Fortunately, the moratorium amendment was removed from the provisions of the Government-sponsored enterprise bill added to H.R. 5334. However, our work in this area is not yet finished.

The next step is to move forward to address interstate branching authority for banks. As in the case of thrifts, interstate branching would reduce operating cost, improve customer services and generally enhance the safety and soundness of the banking industry and decrease risks to the Federal Deposit Insurance Funds.●

#### TRIBUTE TO SENATOR BROCK ADAMS

● Mr. KENNEDY. Mr. President, with the retirement of our colleague, BROCK ADAMS, the Senate and the country are losing a dedicated leader who has served the Nation with great distinction.

My family's friendship and respect for BROCK ADAMS spans more than three decades and goes back to the earliest days of the new frontier. BROCK first met President Kennedy in the 1960

campaign. BROCK was a young lawyer managing my brother's Presidential campaign in western Washington. BROCK did an outstanding job, and my brother appointed him to the position of U.S. attorney for the Western District of Washington in 1961.

BROCK ADAMS won election to Congress in 1964, and went on to win seven consecutive terms in the House of Representatives. Among his major achievements were his leadership on transportation issues, his service as the first chairman of the newly created House Budget Committee, and the measure granting home rule to the District of Columbia—to make sure at last that the other Washington enjoys the blessings of American democracy too.

In 1977, in recognition of BROCK's leadership, President Carter chose him to be Secretary of Transportation. BROCK did his usual outstanding job, focusing national attention on a wide range of transportation issues, including airline and trucking deregulation and the need for greater fuel efficiency and greater automobile safety.

BROCK came to the Senate in 1986, and in recent years, I have had the privilege of serving with him on the Labor and Human Resources Committee. BROCK has done an exceptional job as chairman of the Subcommittee on Aging. In this Congress, for example, he oversaw the reauthorization of the Older Americans Act, and guided it skillfully through some difficult and unexpected legislative mine fields. The act has brought hope and help to senior citizens across the country, and BROCK deserves great credit for this achievement.

In addition, BROCK has made a significant difference for women's health. He has been effective in seeking higher standards for mammography facilities, increased access to health care for low-income women, and a wide range of other long overdue initiatives on health care. I also commend BROCK for his front-line role in the fight against AIDS—especially in our efforts to fund the Ryan White AIDS CARE Act.

BROCK ADAMS distinguished himself on many other issues as well. Few of us will forget his profile in courage at the beginning of this Congress, insisting that the Senate should vote on the Persian Gulf war resolution.

With BROCK's retirement, the State of Washington is losing a tireless and effective champion of the people and an outstanding Senator who established one of the most impressive records in the Nation's Capital.

I extend my best wishes to BROCK and his family in the years ahead. The people of Washington and the Nation have been well served by his leadership and statesmanship, and all of us in the Senate are grateful for his friendship.●

## EXTENSIONS OF REMARKS

CENTRAL AND EASTERN EUROPE  
ARE UNDERGOING DRAMATIC  
CHANGE

## HON. DOUG BEREUTER

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 8, 1992

Mr. BEREUTER. Mr. Speaker, the countries of Central and Eastern Europe are currently undergoing dramatic change. By dismantling the relics of their State-owned enterprises, the people of these countries are taking courageous and bold steps to transform their countries into newly emerging democracies with fast growing economies and private sector development.

As this development and transformation occurs, it is becoming increasingly clear that the rapid emergence of free-market economies in Central and Eastern Europe can create almost unprecedented opportunities for U.S. companies to explore promising new areas for investment and a growing consumer market for U.S. exports. But this potential opportunity requires the American private sector to act boldly, and our Government to be supportive of their endeavor.

Mr. Speaker, this dynamic change in Central and Eastern Europe creates a significant challenge for U.S. policymakers and private sector representatives. The situation also presents us with many questions, including the two following basic questions. How should the United States respond to this remarkable change in Central and Eastern Europe? What should the United States do to encourage and foster the transformation?

More than a year ago, this Member requested an analysis from the Congressional Research Service [CRS] of one possible strategy the United States could pursue to augment the development of these newly emerging democracies while ensuring that U.S. commercial interests are significant participants in their growth. Specifically, this Member asked CRS to study the possibility and benefits of negotiating free trade agreements with some or all of the nations of Bulgaria, Czechoslovakia, Hungary, Poland, an Independent Slovenia, and a then far different and more attractive Yugoslavia.

Although CRS stated—in its September 1991 report to this Member—that free-trade agreements would be difficult to negotiate, they concluded that a “free-trade agreement that reduces nontariff barriers and liberalizes investment restrictions could be beneficial to both the United States and the five countries in the long run.”

Importantly, that conclusion is similar to observations made by U.S. officials attending an West-East economic summit in May of this year. This important meeting was scheduled to discuss recent development in Eastern Europe and its implications for American business. In

commenting on that conference, the U.S. Secretary of Commerce, Barbara Franklin, stated that foreign investment in these countries was one of the most important keys to their success. She wrote:

Foreign investment contributes most to the certain of free market economies. It creates capital inflow. It helps introduce new and necessary technologies that spur economic growth. It provides needed jobs. And it helps to develop an export base vital to commercial success.

Mr. Speaker, this Member would repeat Secretary Franklin's last point because not many people understand that to promote U.S. exports to Central and Eastern Europe, we must first help those countries create a suitable environment for U.S. exports and investment in those regions. Let me explain the necessity of this investment through a specific example of a U.S. industry which stands to gain substantially with the privatization of Central and Eastern Europe.

Recently, the World Bank reported that Czechoslovakia faces a \$50 billion pollution problem and that it will have to spend that much money to bring its environmental standards up to acceptable levels. In order to solve this environmental problem which affects all of Europe, Czechoslovakia will require massive foreign investment.

Currently, Western European companies are spending a great deal of money investing in the environmental problems of their central and eastern neighbors, but they are not doing it because they are generous. They are investing in these countries because they are attempting to establish an export platform—a platform of investment that will purchase goods and services from their respective countries to solve the environmental problems of their continent. Because those European companies will buy European products, trade with their new partners should produce favorable balances and surpluses.

The United States has also greatly benefited from similar investment throughout the world. Today, the United States has about 40 percent, or \$78 billion, of the world's trade in environmental goods and services. From pollution control equipment to waste management consulting, the United States is the world's leader in green technology. Central and Eastern Europe provides fertile ground for U.S. environmental products and services. However, if we do not act soon and aggressively, European-based companies will devour this seemingly endless market, and U.S. companies and U.S. workers will lose a tremendous opportunity.

But Mr. Speaker, Central and Eastern Europe need more than environmental goods and services, the CRS report requested by this Member states that these countries are fertile ground for exports of U.S. manufactured computers and electronic equipment, telecommunications equipment, food processing

and packaging machinery, medical equipment, alternative energy equipment, and consumer goods.

Just to whet the appetite of our business leaders, workers, and exporters, I would add that the Congressional Research Service reports that the best prospects for U.S. exports of manufactured goods to the following countries are as follows:

Bulgaria: Computers and electronic equipment, alternative energy equipment, energy and pollution control equipment, medical, food processing, and packaging equipment.

Czechoslovakia: Computers and software, pollution control equipment, telecommunications equipment, food processing and packaging machinery and equipment, and medical equipment.

Hungary: Computers and peripherals, food processing and packaging equipment, telecommunications equipment, and consumer goods.

Poland: Aircraft, telecommunications equipment, food processing and packaging machinery, and pollution control equipment.

If the United States is to insure that we capture our share of these export markets and thus create more jobs here at home, we certainly need an aggressive strategy for promoting U.S. exports to these countries.

The idea of negotiating free trade agreements with Central and Eastern European countries is one of the many important strategies the United States should carefully but aggressively consider to foster privatization, growth, and democracy while increasing our exports of manufactured goods, services, and commodities to these nations.

Several weeks ago, the President formally announced his intention to sign the North American Free Trade Agreement between the United States, Canada, and Mexico. Mexico is the third country, following Israel and Canada, to have signed a free-trade agreement with the United States. However, on September 29, 1992, the distinguished gentleman from Iowa, Mr. JIM LEACH, asked Assistant Secretary of State, Thomas Niles, whether the administration was considering additional free trade agreements with several of the countries of Central Europe. Mr. Niles responded by saying that in the President's recent campaign speech in Detroit, he proposed considering free trade agreements with a number of countries including Poland, Hungary, and Czechoslovakia.

Mr. Speaker, perhaps some Central and Eastern European countries, like Czechoslovakia, Hungary, Poland, Bulgaria, and Slovenia should be strongly considered for such free trade agreements. In many ways, these countries with their higher wages and better educated labor force are in many ways more likely candidates for free trade agreements with the United States than Mexico.

Lester Thurow writes in his important new book, “Head to Head”:

• This “bullet” symbol identifies statements or insertions which are not spoken by a Member of the Senate on the floor.

Matter set in this typeface indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

Middle and Eastern Europe should be fast learners when it comes to acquiring modern industrial skills. The human capital exists to support very rapid growth.

Also, Mr. Thurow states that real wages in Middle and Eastern European countries are relatively high. Therefore he writes that—

They will not be in competition with the Third World for the very low-wage, low-skill jobs in industries such as textiles. They will be competing with mid-wage developing countries.

In fact, Mr. Speaker, Mr. Thurow ultimately states that the countries of Central and Eastern Europe possess the attributes which may propel the European Community to becoming the world's next economic superpower. He writes and I quote:

Building upon the economic muscle of Germany, Western Europe is patiently engineering an economic giant. If this bioengineering can continue with the eventual addition of Middle and Eastern Europe, the House of Europe could eventually create an economy more than twice as large as Japan and the United States combined.

Mr. Speaker, this Member suggests that perhaps the United States should meet the European Community head to head and pursue an aggressive investment strategy in these countries on the backs of negotiated free trade agreements. Why not at least carefully consider the desirability of reaching across the Atlantic—right over the European Community—to embrace free trade arrangements with some of these former nations of the Warsaw Pact?

Mr. Speaker, this Member urges his fellow Members, the administration, business leaders, and scholars to seriously and expeditiously consider this important proposal. In conclusion, I would like to insert a passage from Mr. Thurow's book which clearly reveals the primacy and importance of this issue:

#### BUILDING THE HOUSE OF EUROPE

Europe has a chance to become, but no guarantee that it will become, the world's most rapidly growing region in the 1990s. The Germans have lifted the speed limit on their economic autobahn and when there are no speed limits the Germans like to go very fast. If Europe can put a significant part of Middle and Eastern Europe together with Western Europe in an enlarged Common Market, it can build something that no one else can build—by far the world's biggest, most self-sufficient, market—850 to 900 million people, depending upon whether Turkey is considered a European country. Even if Europe gets only part way along their economic autobahn, they will still be by far the world's largest economy.

As the Europeans write the rules for their economic integration, they will essentially be in charge of writing the traffic rules for the world economy in the twenty-first century. They will be the ones who determine the nature of the vehicles on the economic autobahn and whether the traffic lights show green, red, or yellow for the expansion of world trade.

In the end to all of the ex-communist economies will succeed in getting to their destinations—moving to the market and rapidly raising the living standards of their citizens. The number that does succeed will depend a great deal upon the degree of outside help.

Japan and the United States may choose not to help. Japan may end up saving its re-

sources for that moment when the communist countries of Asia also cease to exist. The United States may convince itself that its economy is too poor to help, despite the fact that its real GNP is four times as large as it was when the Marshall Plan was offered to Europe. It may ignore a region that has never been one of its prime interests.

In the end Western Europe will have no choice but to help. Preventing westward migration, reducing border tensions, and lowering ethnic hatreds all demand economic success in Middle and Eastern Europe. A mixture of altruism and fear of the Russian military bear led to the original Marshall Plan. A mixture of altruism and a fear of chaos on immediate borders will lead to a similar plan for Middle and eastern Europe.

For the House of Europe, the advice given to Macbeth is sound: "If it were done when 'tis done, then 'twere well/It were done quickly."

#### CONSOLIDATE FEDERAL LANGUAGE STUDIES: IMPERATIVES OF THE NEW ERA

#### HON. LEON E. PANETTA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 8, 1992

Mr. PANETTA. Mr. Speaker, we are embarked upon a new year. It is the fifth day of the new fiscal year. It is probably the final day of the 102d Congress for this House. Three years ago, the Warsaw Pact began to crumble and 2 years ago Germany united. One year ago, the Soviet Union was dissolving. In 4 weeks we will hold national elections in which a President and a new Congress will be chosen, one to which many of us will not return.

Across the water, even as it stumbles, Europe continues to forge ahead in its struggle toward unity. Further East, Westerners and Easterners are pouring investments into ventures in Eastern Europe, Russia, and Central Asia. In the Far East, the Pacific rim nations continue to build upon their already strong trade links. We are considering joining Mexico and Canada in a new free-trade zone, and Latin America is consolidating its economic and communications links at a rapid clip. Democratization is sweeping Africa, South Africa is moving toward the free world, peace negotiations in the Middle East are proceeding with renewed hope, and the nations of South Asia are asserting their power as never before.

Hence, Mr. Speaker, today the new era is upon us. It is an era as yet undefined and unnamed. No, it will not be characterized by a new world order, but rather, as we have seen, by regional economic and military competition and ethnic disputes within and among neighboring states. It is an era in which military power will diminish as a tool of large powers, and it is an era in which economic contests will define nations' power and progress.

At the same time, the interdependence of nations grows inexorably. Our international commerce, monetary flows, trade ties, and multilateral activities with other nations are building layer upon layer of interconnecting relationships among nations. Yet, as citizens of a historically and geographically isolated giant, Americans remain far behind nearly every other nation's populace in their foreign lan-

guage abilities and in their knowledge of the world around them.

Our competitive edge among nations will hinge upon our productivity, the quality of our work force, our educational systems, and our ability to compete in every economic arena. And our competitiveness will depend in no small degree upon Americans' ability to communicate in foreign languages.

The new era demands innovative thinking about our Federal institutions and our national intelligence resources in particular. On this day, as we consider the Defense appropriations conference report for fiscal year 1993, it behooves us to focus our attention on outdated national intelligence resources with a view to modernizing and streamlining our education and training resources. I will argue here today that we must also strengthen the human resources of the intelligence community and other agencies and our foreign language instruction and translation capabilities in preparation for the fast-paced changes occurring in this, the first decade of the rapidly forming new era. Since World War II, the national security apparatus has maintained a well-funded program of instruction in languages for each of its component agencies. The logic of the preceding review leads us to the following conclusion: the Federal Government ought now to devote the same attention and resources to our language and area studies programs tailored not only to national security but also to our economic security.

Accordingly, my purpose today is to call for the transformation of the Defense Language Institute Foreign Language Center [DLI] into the national, Federal foreign language and area studies institute. I envision this institution serving as the single organization at which Federal personnel would learn foreign languages and related area issues, at which Federal Government would translate unclassified documents, and at which a wide variety of foreign language services would be performed for all Federal agencies.

The new era is typified by incredible budgetary constraints in the United States. Rightfully, American taxpayers are not only demanding of us that we cut unnecessary government costs but that we trim bureaucratic duplication as well. After careful study of DLI's capabilities and potential, and consultation with DLI administration and faculty and other public and private foreign language institutions, I have concluded that DLI's expansion and transformation into an institute serving the entire government would yield significant cost savings to the Federal Government, streamline our Federal foreign language instruction programs, and provide powerful new incentives and capabilities to our national foreign language instruction and translation apparatus.

This is the kind of bold and innovative approach required in the new era of competition. If we are to adopt fresh approaches and reforms to boost our competitiveness in all aspects of international commerce, we ought to begin by renovating and consolidating our foreign language instruction apparatus.

#### THE CURRENT PATCHWORK OF FEDERAL LANGUAGE PROGRAMS

I would like to turn, now, to the status of our Federal foreign language instruction programs. Their mission is to prepare Federal personnel

and other Americans for the kinds of competition and engagements I have already portrayed.

Simply put, the status quo is inadequate. I have found a patchwork of programs among our agencies and a disturbing lack of coherence in language instruction. There is little coordination, though the new Center for the Advancement of Language Learning [CALL] will seek to begin to coordinate the largest language programs next year. As it is, each agency fends for itself, and there seems to be no thought given to the possibilities for extending Federal programs to institutions beyond the Federal Government in order to maximize cooperation, lend assistance, and achieve the synergy we hope to realize in the years ahead.

Let us review the programs available. Pre-eminent is the Defense Language Institute Foreign Language Center [DLI] at the Presidio of Monterey in California, the largest language training center in the world. I will detail its programs further below, but I would like first to iterate other Federal programs offered.

In some complement and in great duplicity of purpose with DLI, the Federal Government maintains foreign language training programs in a variety of other agencies. The Foreign Service Institute [FSI] of the Department of State, the Central Intelligence Agency [CIA], the National Security Agency [NSA], the Defense Intelligence Agency [DIA], the Department of Health and Human Services, the Peace Corps, and the U.S. Department of Agriculture all have individual foreign language training programs and capabilities to meet their respective needs for intelligence or basic language training.

The Department of Agriculture Graduate School is open to both government employees and the public. Sixty percent of its 7,264 student enrollment are from Federal agencies.

The Department of Health and Human Services trains its personnel, about 70, for specific positions.

The Department of Justice's Immigration and Naturalization Service [INS] typically places about 500 personnel in training at the Federal Law Enforcement Training Center [FLETC].

The State Department Foreign Service Institute trains approximately 1,600 foreign service officers and employees of the Agency for International Development [AID] and the U.S. Information Agency [USIA]. The State Department also has four facilities abroad.

Additionally, the Central Intelligence Agency [CIA], the National Security Agency [NSA], and the Defense Intelligence Agency [DIA] all conduct their own large foreign language training programs, including classified jargon and materials.

The Customs Department also sends about 48 personnel to DLI annually.

The Federal Communications Commission contracts out foreign language instruction for a small number of personnel.

The Peace Corps conducts all of its training in the country of assignment for its roughly 3,000 personnel.

It should be noted that the Federal Bureau of Investigation [FBI] and the Drug Enforcement Agency both use DLI for some elements of their language training.

The deficiencies of American foreign language and international education programs have long been the subject of discussion in the international community. I recall debates on this inadequacy in my service on the President's Commission on Foreign Language and International Studies in 1978.

The Commission published a report which continues to point to the very issue I am trying to address with my current proposal for DLI, and that is to develop an adequate strategy to concentrate the national effort. To this end, the Commission encouraged coordination and oversight in the Federal Government, one of my refrains.

The Commission's report is entitled "Strength Through Wisdom: A Critique of U.S. Capability." Our future strength lies, in part, in our ability to address our national security and economic needs through our capacities to understand other peoples. Foreign language proficiency in the United States is an untapped resource.

#### THE LOGIC OF DLI AS THE NEW FEDERAL LANGUAGE INSTITUTE

The Department of Defense is shrinking in personnel, in funding, and in certain missions. To be sure, certain intelligence requirements have dropped as well. Yet, new intelligence requirements have arisen with the birth of new nations, the proliferation of weapons across international frontiers and regions, and the waxing traffic in narcotics around the world. The probability of new, regional conflicts is rising. In response, the DLI is anticipating greater demands on its faculty for instruction in languages required for communication in each of these fields, particularly in counternarcotics.

New technology continues to arrive at DLI. The Institute anticipates receiving advanced translation and communication equipment within the year, enabling it to offer translation and communications services to any Federal agency requiring them, around the world and around the clock. The Institute possesses six transmission and receiving devices capable of teleconferencing DLI personnel with other Federal personnel throughout the United States at 60 different sites, including the National Security Agency, whose personnel are learning Ukrainian from DLI instructors across the continent.

DLI has done an outstanding job of providing expertise in languages not commonly taught in American schools and colleges. Its intensive methods have served to augment existing programs at schools around the country in more common languages, and it has reacted quickly to changes in international relations as demands for language proficiency in different languages have fluctuated.

The Institute offers courses covering the entire range of language proficiency and tailored to specialized subject areas. Courses offered include: Arabic (including major dialects), Armenian, Chinese, Czech, Slovak, Dutch, French, German, Greek, Hebrew, Italian, Japanese, Korean, Persian Farsi, Polish, Portuguese, Spanish, Russian, Tagalog, Thai, Turkish, Ukrainian, and Vietnamese. It is considering adding other Eurasian languages in light of the rise in importance of new Republics in that region. Classes are taught 7 hours per day, and range in duration from 25 to 63 weeks. From 3 to 5 hours of homework are assigned each day.

In fiscal year 1991, DLI trained 4,025 students, of which 2,548 were in the Department of the Army, 411 came from the Navy, 188 from the Marine Corps, 784 from the Air Force, and 94 from other agencies.

DLI conducts important research on techniques for language instruction with the use of computer technology and administers other DOD language resources as well as foreign language training under contract with the Department of State's Foreign Service Institute [FSI] in Washington, DC.

The Institute features 650 classrooms and 36 language labs. On its grounds are modern, award-winning dormitories, dining facilities, recreation and physical fitness centers, an academic library, a personnel administrative center, and new classroom buildings. In Aiso Library, students can view one of the 5,000 foreign television programs and films in individual carrels. The library offers more than 80,000 volumes in over 40 languages. The library subscribes to several hundred foreign language periodicals.

Many of DLI's 755 expert faculty are native speakers of the languages they teach, and a good number are also specialists in various fields in military training and intelligence. Added to the faculty are 439 civilian staff and 315 military personnel from all services.

Without exaggeration, DLI can be said to possess the finest instruction facilities in the world, using the most advanced heuristic methods. Rounding out its students' linguistic skills, the Institute also offers courses in area studies, including the history, culture, and politics of the nations in which each language is spoken.

DLI's Foreign Language Center at the Presidio of Monterey is accredited by the Western Association of Schools and Colleges. Each of its 47-week courses is equivalent to 24 semester units of most colleges' credit.

Beyond its resident training, DLI offers courses to Federal personnel the world over, serving over 200,000 students annually in over 600 different programs for personnel and their families.

Coincidentally, the Senate is giving final approval today to legislation to establish the DLI in statute and to authorize the implementation of a new personnel system for DLI's faculty. The provision, contained in the fiscal year 1993 Defense authorization bill, will allow the DOD to provide tenure to DLI's faculty, to provide tenured faculty with salaries commensurate with their experience and competence and to provide a number of other very important benefits and protections for the faculty. With the advent of this new system next year, DLI's instructors will be able to enroll in courses on instruction and additional linguistic issues in order to enhance their own performance and credentials. I am confident that the new system will only heighten the quality of an already excellent faculty.

As chairman of the Fort Ord Community Task Force, I would add that any needs DLI might have for greater space in the future would be easily remedied through the acquisition of available space at Fort Ord, located just a few miles away. Fort Ord, comprising 28,000 acres, is scheduled to close in the fall of 1995.

I would note that the DOD is preparing DLI for the addition of the latest translation and in-

struction technologies in fiscal year 1993 or fiscal year 1994. One of these technologies would allow DLI to receive telecommunications in one language, translate them automatically, and transmit the communication to yet another receiver. This capability will have enormous positive implications for nearly every Federal agency.

DLI is also providing foreign language training to Federal personnel involved in counter narcotics efforts, and that initiative will also include the development of new language specialties in the field of counter narcotics.

Finally, DLI has the benefit of being a neighbor of the Monterey Institute of International Studies [MIIS], also located in Monterey, CA. DLI has maintained a very positive working relationship with MIIS over the years. MIIS is currently in the process of completing work on a trade center with the latest in satellite technology and communications. Information is shared between the two institutes to improve the quality of foreign language teaching and international education in both institutions. The resources at MIIS enhance the appeal and stature of the Institute as the foremost Federal language institute.

Included in the ongoing developments at MIIS and the new trade center are a 300-seat lecture hall, fully equipped with simultaneous interpretation equipment for 5 languages. This system can be expanded to handle up to 12 languages, the only such facility west of the Mississippi River. With both MIIS and DLI located within its borders, the city of Monterey is the language-learning capital of America. MIIS now has the only 2-year MA program in conference interpretation and translation for Chinese and Japanese in the Western Hemisphere.

#### A FEDERAL LANGUAGE INSTITUTE

I have set forth my vision of the requisites of the new era for our national and economic security, and I have delineated the capabilities we must enhance and the programs we must undertake if we are to engage the world at large on every economic, cultural, and political front. Whether one emphasizes the positive perspective on the world's increasing interdependence or the threatening aspect of heightened economic competition, the call for improved foreign language skills among Federal personnel and other Americans is indisputable. The intelligence community, in particular, ought to join with agencies involved in commerce and trade issues to devise a coherent foreign language instruction program for Federal personnel toward these ends. Apart from the national security community's needs, which have been clearly defined and well funded, I have argued that our economic security, our ability to engage other nations competitively in all areas of commerce, would be tremendously strengthened by a streamlined, consolidated Federal foreign language program.

I have also reviewed the present status of the patchwork of Federal foreign language programs throughout the agencies as well as the resources the Defense Language Institute has to offer. From this study I have concluded that the U.S. national and economic security interests would be best served by streamlining our Federal foreign language programs and consolidating them at what is now the Defense

Language Institute Foreign Language Center. While I have not yet reviewed the costs of each of the current foreign language programs for Federal agencies, the savings from such a consolidation are clear. In an era of increasing budgetary constraints, the impetus for this proposal is even stronger.

In this way, valuable resources may be concentrated in one substantial location rather than fragmented among agencies. A merged Federal foreign language program would also allow the creation of, and adherence to, coherent and efficient Federal foreign language goals.

Over the past 2 years, I have been a part of the effort to streamline the Federal Government. The Nation is facing a very fragile economy that is suffering not only the short-term effects of the current recession but also the long-term effects of the 1980's.

Our society is plagued by problems that not only reduce our economic vitality but also limit and will ultimately diminish the quality of life that our children can expect in the next century. We ought not to lose sight of our long-term goals. What we must have is leadership that has the foresight and ability to look beyond the next day's headlines. I have released a report entitled "Restoring America's Future: Preparing the Nation for the 21st Century" which attempts to address the long-term problems we will confront tomorrow while structuring an approach that will help those who are suffering today. The proposal consists of a three-pronged approach: streamlining the Government; making substantial reductions in the deficit; and making long-term investments in critical areas of our economy and society.

The country needs to consider substantial streamlining and structural reform of both the executive and legislative branches to improve the effectiveness and responsiveness of the Federal Government. Second, we must confront our budgetary problems in order to restore the Nation's saving base. The proposal would reduce the Federal debt by a trillion dollars.

Just as the imperative of foreign language proficiency will rise in the 21st century, streamlining Federal foreign language training programs fits perfectly into the preceding line of logic. Just as we are attacking problems elsewhere with imagination, we must approach this challenge in the most resourceful, responsible and effective way possible. Establishing DLI as a national center will accomplish these goals.

Mr. Speaker, the Defense Language Institute is the largest language school in the Federal Government. I have enumerated its resources above. DLI has already made arrangements with the Drug Enforcement Agency, the Customs Service, the U.S. Marshals Service, and local law enforcement agencies to provide training in Spanish for counternarcotics personnel. This is but one example of the kind of consolidation and outreach the Institute can provide.

DLI has the capability to transform the many small fragmented programs in the various Government agencies and translate them into a coherent, unified system to serve all national interests. The Institute has nearly half a century of experience in the communications field and the best-equipped language-teaching fa-

cilities in the world with the latest in audiovisual training aids. I would like now to propose the contours of the Federal language and area studies institute it ought to become.

First, the Institute should serve personnel from all Federal agencies. I recognize the need to continue to provide separate training in classified issues for personnel at the National Security Agency [NSA], the Central Intelligence Agency [CIA], the State Department, and Defense intelligence activities. Notwithstanding those small programs, however, there is no need for classified instruction for most Federal employees from all other agencies, and I would argue that most State Department, CIA, and NSA personnel do not require courses to be taught in secure environments on classified issues, particularly State Department, Peace Corps, and Agency for International Development personnel not placed in political or consular affairs positions.

I applaud the creation of the new Center for the Advancement of Language Learning [CALL], a product of the Congress' direction to the foreign language community and the recommendations of the foreign language committee. The committee itself has proposed a good many reforms in foreign language instruction and consolidation, chiefly in terms of coordinating training and testing. The Center functions primarily as a mechanism for coordination among the CIA, FSI, Defense Intelligence Agency [DIA], DLI, the NSA, and the FBI. The establishment of the Center points toward further consolidations along the lines of my proposal.

Nevertheless, while it will provide a coordination point for member agencies, CALL will not fulfill actual training and instruction requirements. There is no reason a new, single Federal language institute cannot serve each and every Federal employee requiring language studies. With its current and forthcoming technology, DLI is able to conduct courses through teleconferencing centers around the Nation and its capacity to reach every corner will only increase with each year's addition of teleconferencing centers.

Second, DLI has had its programs undercut by higher level DOD decisionmakers to the detriment of its students in every year since World War II. The United States has had a recurrent language preparedness problem during regional conflicts, including the Korean war, Vietnam war, the conflicts in Laos, Cambodia, the Middle East, Iran, Panama, and the Persian Gulf. On each occasion, the United States found that the number of instructors and students in place to teach and learn the critical languages involved was unsatisfactory.

This pattern of shortsighted program allocation must end. The Federal Language Institute ought to maintain a cadre of instructors in all languages already taught at the DLI and consider adding languages eliminated in the past several years. Two striking examples are Serbo-Croatian and Arabic. Serbo-Croatian was dropped from DLI's program by the Defense Department in 1989. Two years later, the conflict in Yugoslavia broke out. Similarly, DOD found that its supply of Arabic speakers was alarmingly short in 1990 when Iraq invaded Kuwait. Despite DLI's best efforts, the Institute was not able to bring on new instructors quickly enough for the Persian Gulf war.

These paucities of proficient speakers should be at the top of the Armed Forces' and intelligence community's concerns.

Moreover, the reductions in force [RIF's] and short-term hiring rounds practiced by DOD as it reduces, eliminates, and enlarges language programs make program and budgetary planning impossible, leave the Institute shorthanded in crises, and wreak havoc among the dedicated faculty who are either terminated or affected by the decimation of their departments. The Federal Language Institute ought not to operate in this manner. An inviolable base staff of instructors must be retained for all contingencies.

Third, while DOD will continue to provide the bulk of the personnel trained and the resources for the training, I would propose that other agencies contributing students to the Federal Institute provide matching funds in proportion to the number of personnel placed at the Institute. The Institute should also constitute a board of trustees to oversee its operations from among the DOD, the Department of State, the intelligence community, the public and private education communities, and other foreign language experts as desired.

Fourth, the Institute should and could provide training to contract and onsite teachers of foreign languages who are located elsewhere in the United States.

Fifth, the Institute could perform language needs assessments for all agencies.

Sixth, the Institute could provide assistance in training materials development, ranging from the establishment of objectives and course design to review of materials and course development. The Institute could provide computer-assisted learning techniques and course materials development to all agencies as well.

Seventh, I would expect the Institute to develop proficiency and diagnostic tests for all agencies.

Eighth, the Institute could administer proficiency tests for agency employees in person, via telephone, and via teleconferencing for all agencies.

Ninth, the Institute could provide translation services to all agencies.

Tenth, as a unique Federal institution with powerful resources, the Institute could build upon DLI's resources and outreach to act as a clearinghouse for technological developments, literature, and research. The DLI is already associated with the American Council on Teaching Foreign Languages [ACTFL], the Modern Language Association [MLA], the Computer Assisted Language Learning Consortium [CALLCO], the Defense Committee on Language Exchange [DECOLE], the Bureau of International Language Coordination of NATO [BILC], the National Advisory Council on Educational Research and Improvement [NACERI]—an American 2000 initiative, and the Federal Interagency Language Roundtable [FILR]. Through these associations, the DLI will be able to facilitate its transformation into the Federal Institute and capitalize on these associations to provide the latest information and techniques to foreign language teachers.

Eleventh, not only will the Federal Institute be capable of providing these services to other agencies, but I believe that we ought to authorize its cooperation with private ventures

to enable initiatives in commerce, trade, education, and other applications.

Twelfth, the Institute should be able to work with and within the Community Learning and Information Network [CLIN], which has received the notable and strong support of Vice Presidential nominee AL GORE as well as Senator BINGAMAN. CLIN is a cooperative venture of private sector and government organizations, including the U.S. Chamber of Commerce. It features the use of teleconferencing centers in a network across the United States. DLI has 6 transmission devices for teleconferencing communications and broadcasts to over 60 sites throughout the United States. I might add that the availability of this network would also enable the Federal Institute to provide instruction to foreign language teachers at schools in every government institution and State. The American Council on Teaching Foreign Languages [ACTFL] has recommended that DLI take this step.

Thirteenth, by 1995, the Federal Institute will be able to reach schools and agencies via satellite and fiber optic technology.

I will continue to study the cost savings and other benefits likely to accrue from the consolidation of Federal language instruction activities. In the 103d Congress, I hope to work with my colleagues and the new administration to realize this vision.

In conclusion, Mr. Speaker, it is long past the time to bring our Federal Language Instruction Program into the 1990's and into accordance with the demands of our budgetary constraints. I do not make this proposal lightly. Any innovative plan requires bold leadership, but I hold that we can accomplish greater efficiencies in these programs even as we boost their resources and their applicability. The transformation of the Defense Language Institute into a Federal Language Institute handling language and area studies instruction for the Federal Government would achieve a valuable synergy from which not only governmental but private sector organizations would benefit. A Federal Language Institute will fortify our national economic security and our intelligence community's preparedness for the new age. I urge my colleagues to reflect on the wisdom of this proposal and to join with me next year to make the Federal Language Institute a reality.

A COMMUNITY PEARL—ROSA LEE SHARPE

HON. DONALD M. PAYNE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 8, 1992

Mr. PAYNE of New Jersey. Mr. Speaker, as we conclude our business for the 102d Congress I would like to take this opportunity to recognize a dear woman for her unselfish deeds. That woman is Mrs. Rosa Lee Sharpe. Earlier this year, Mrs. Sharpe was recognized by the Epsilon Gamma Zeta chapter of the Zeta Phi Beta Sorority, Inc. Each year since 1975, the sorority has selected five women to honor during the National Finer Womanhood Week.

This honor is bestowed upon women of the community who have worked toward the ad-

vancement of their city, State, and Nation, but who have not been recognized for their efforts. These women are known as Community Pearls.

Mrs. Sharpe is the mother of 7 children, 16 grandchildren, and 13 great-grandchildren. In a tribute to their mother, her children remembered that while growing up life was difficult and hard, but their mother didn't give up. Mrs. Sharpe knows the value of an education and taught her children important values and concepts, including respect, determination, hard work, and discipline. Today, all of her children are successful, leading rich and productive lives.

Her daughter, Mary Blanche Hooper of Newark, NY, is a counselor for the Newark Board of Education and a former Newark school teacher. She is a graduate of Rutgers University with a B.A. degree and has received certification in public administration from Kean College and certification in life skills education from Columbia University. Carrie Priester of Newark, NJ, has a B.S. degree in business management from Bloomfield College. She is a procurement specialist for the U.S. Postal Service where she has been employed for 23½ years. Edna Bynum of Scotch Plains, NJ, has been a security officer for the Newark Board of Education for the past 20 years. Christine Overby of Rocky Mount, NC, is employed at Abbott Laboratories as an inspector in the manufacturing department. She has been employed with the company for over 22 years. Her son, Warren Gene Sharpe of Linden, NJ, is a mail handler with the U.S. Postal Service where he has worked for the past 24 years. Rosa V. Holmes of Hillside, NJ, is a graduate of North Carolina Central University with a B.S. degree in chemistry. She has been employed by Sandoz Pharmaceuticals Corp. for the past 23 years and was recently promoted to associate director of documentation and standards in the compliance department. William Earl Sharpe is a sergeant in the U.S. Army, specializing in the finance division. He was spent 17 years in the Army and has recently ended a tour of duty in Germany. He is now stationed in Massachusetts. Earl also attended North Carolina University where he majored in accounting.

Mr. Speaker, today when we hear of family values, we must turn to families like the Sharpe family to show America we've always had strong families and these families have strong values. I am sure my colleagues will want to join me as I extend my belated congratulations and best wishes to Mrs. Rosa Lee Sharpe, a Community Pearl.

ENTERPRISE ZONES

HON. BILL ALEXANDER

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 8, 1992

Mr. ALEXANDER. Mr. Speaker, during the 102d Congress there has been a lot of discussion about enterprise zones. The stated goal for these zones is the same as the goal I have pursued for First Congressional District of Arkansas throughout my service in the Congress, to generate jobs and a better quality of life for our people.

We have made progress.

Since I began my work here, Federal investments have been made in more than 790 community, economic development, education, flood control, health care, industrial park, recreation, and transportation improvement projects benefiting the district I serve. The value of these investments exceeds \$1.28 billion.

These projects have made it possible for tens of thousands of families to have access to improved education, health care, water, electricity, telephone, and sewer services.

Today thousands of workers and businesses have daily use of better highways, roads, and river ports than was the case when I first took the oath of office in 1969.

The capital investments we have made in flood control projects means that family homes, farms, businesses, and public facilities are more protected from flood damage than they have ever been.

Federally funded recreation facilities in communities, towns, and cities across the district provide more healthy and safe opportunities for children, youths, adults, and families.

Our activities in developing export opportunities and markets for Arkansas products have improved opportunities for farm and business owners, managers, and workers.

To illustrate three of the types of Federal investments which have been made in Arkansas' First Congressional District during my service, I would like to include some data tables in the RECORD at this point.

The first table summarizes some of the community and economic investments on a districtwide basis. The second table provides county-by-county totals on projects which were primarily located in a single county.

The third table compares total 1989 Federal expenditures and obligations with 1989 total personal income on a county-by-county basis.

Detailed information on the underlying data used in preparing all of these tables is available for review.

This table contains information for selected community and economic development oriented federal expenditures and obligations for First Congressional District. The "number of projects" column counts any project, regardless of how many investment increments it has received, only one time. To avoid double counting, neither the "dollar total" nor the "number of projects" columns for individual counties includes regional projects which serve more than one county:

FIRST CONGRESSIONAL DISTRICT, ARKANSAS—SUMMARY TABLE OF FEDERAL INVESTMENTS

Category	Amount	Projects
First Congressional District county-by-county summary grand total	\$372,156,913	707
Regional (multi-county projects, excluding U.S. Corp of Engineers water project)	105,060,782	26
U.S. Corps of Engineers (Fiscal Years 1980-1992) (water management projects including flood control, navigation, and harbors)	364,506,000	27
Federal highway and public transportation projects—July 1982—July 1992 (Excludes U.S. Highway 63 by-pass, Jonesboro, projects included in Craighead County totals)	338,893,537	
Eaker Air Force Base, Blytheville Arkansas, (military construction funding appropriated by the Congress for Fiscal Years 1981-91)	105,950,000	35
Grand total	1,286,667,232	795

COUNTY-BY-COUNTY SUMMARY TOTALS

County	Total	Number of projects
Arkansas County	5,721,123	17
Clay County	25,633,102	38
Cleburne County	10,903,707	17
Craighead County	51,740,554	57
Crittenden County	12,907,886	45
Cross County	31,579,975	30
Fulton County	5,568,407	23
Greene County	13,413,063	28
Independence County	24,025,155	35
Izard County	8,641,303	19
Jackson County	16,283,487	32
Lawrence County	14,972,446	44
Lee County	3,876,728	15
Mississippi County	30,021,638	70
Monroe County	8,168,061	12
Phillips County	17,164,800	32
Poinsett County	13,420,992	26
Prairie County	5,554,179	7
Randolph County	4,685,658	25
Sharp County	18,952,753	30
St. Francis	14,315,147	30
Stone County	8,486,314	18
Van Buren County	16,046,750	29
Woodruff County	10,073,685	28

Note.—Data does not include all funding for Corps of Engineers projects, activities specifically benefitting low-income persons or military expenditures for national defense, including Eaker Air Force Base. Does not include home and farm ownership assistance provided by federal programs.

Data sources: Executive Office of the President; U.S. Department of Commerce; Arkansas State Department of Highways and Transportation, and published documents of the U.S. House of Representatives.

FIRST CONGRESSIONAL DISTRICT PERSONAL INCOME COMPARED TO FEDERAL EXPENDITURES AND OBLIGATIONS (Fiscal year 1989—in thousands of dollars)

County name	Total Federal activity	Federal activity as percent of personal income	Total 1989 personal income
Arkansas	372,383	121	308,485
Clay	93,237	42	221,944
Cleburne	63,824	28	228,302

HONORING ST. MARY'S CHURCH

HON. ELIOT L. ENGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 8, 1992

Mr. ENGEL. Mr. Speaker, for the past year, the family at St. Mary's Church in Yonkers has been hard at work preparing for the 100th anniversary of the Church of the Immaculate Conception. After cleaning the outside stone, repairing stained glass windows and enhancing the church's facilities, the day to celebrate has finally arrived.

As a Representative of the people of Yonkers, I join in congratulating St. Mary's Church for a century of service to the community. When old and new parishioners meet to celebrate the 100th anniversary, the purpose of their efforts will become clear. Through the leadership of Rev. Hugh J. Corrigan and the

pastors who have served before him, St. Mary's has grown into a beacon of faith and community spirit. The people, working together, have built a strong tradition to pass on to their children and grandchildren.

That is the power of family from which our country has always drawn its strength. I thank and commend the people of St. Mary's for keeping that spirit alive in Yonkers for 100 years.

A TRIBUTE TO DANIEL L. WOODALL DURING THE FRIENDS OF LABOR CHARITY DINNER

HON. LUCIEN E. BLACKWELL

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 8, 1992

Mr. BLACKWELL. Mr. Speaker, on October 17, 1992, Friends of Labor will honor Mr. Daniel L. Woodall for his distinguished service as a labor leader and volunteer. His commitment, dedication, and sustained involvement in the Philadelphia community portrays an excellent role model for people in all walks of life.

Mr. Woodall began his leadership career in May of 1972 as an appointed shop steward and has served in numerous elected labor positions over the years. Some of those positions included that of a labor leader, a civil leader, and a union leader. Throughout his career, Mr. Woodall has carried forth a mission of unity for all people. Mr. Woodall's unwavering loyalty to fulfill his duties have been centered around helping those in need. Because of his many volunteer and community service efforts, Mr. Woodall has gained much respect from his family, friends, and peers.

Mr. Speaker, I invite my colleagues to join me in congratulating and extending best wishes for future success to Mr. Daniel L. Woodall for his years of dedicated service.

SALVAGING FREEDOM FOR YUGOSLAVIA

HON. MERVYN M. DYMALLY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 8, 1992

Mr. DYMALLY. Mr. Speaker, I wish to acknowledge the following remarks by my esteemed colleague, Senator RICHARD LUGAR of Indiana, in the Washington Times on October 5, 1992, which provide greater understanding of events in Yugoslavia.

[From the Washington Times, Oct. 5, 1992]

UNDERSTANDING EVENTS IN YUGOSLAVIA

Many commentators have cited the leadership of Prime Minister Milan Panic as a new force in Yugoslavia. Although his powers are circumscribed, he challenged Serbian President Slobodan Milosevic, fired obstructionist leaders in the Cabinet and survived parliamentary attempts by some Serbian nationalists to remove him from office.

His independence and influence is demonstrable and growing. He has helped shift the tide of public opinion away from the hardliners.

Mr. Panic predicts that the December elections will produce leaders committed to

peace. Mr. Panic or a likeminded individual could become the leader who will unify and convince the divided elements of Yugoslav society to actively oppose Mr. Milosevic and his allies.

For the reasons stated above, I would like to call attention to an insightful editorial in the Washington Post on September 28, 1992, entitled "Who Speaks for Yugoslavia?"

[From The Washington Post, Sept. 28, 1992]

#### WHO SPEAKS FOR YUGOSLAVIA?

Panic, as in Milan Panic (and pronounced "Pahnich"), is the hope of what remains of Yugoslavia. Or does he represent one more illusion? Recruited as prime minister of the rump Yugoslavia (Serbia and Montenegro), the Yugoslav-born millionaire American industrialist has launched a frontal political challenge to Serbian president Slobodan Milosevic, architect of Greater Serbia. At first dismissed as an irrelevant, outclassed amateur lacking in both intrigue and bloodiness, the gutsy, irrepressible Panic has been bringing to bear his two political assets. One is the aspirations and doubts of the growing number of Serbs who believe the Milosevic policy is folly. The other is his claim alone to be able to save Yugoslavs from the international isolation Mr. Milosevic has brought upon them.

The results after 70 days are mixed. Mr. Panic's good will and moderation are undeniable. For embracing the forward-looking peace program of the London Conference, he has won a pinch of respect from the international powers. He has provided an increasingly feasible rallying point for anti-regime Serbs, and this month he survived a no-confidence vote mustered by Milosevic nationalists in parliament. But he does not control the guns in the hands of Serbia's army or of the forces of Bosnia's Serbs. He must defend himself from charges of abandoning Serbs outside Serbia. Whether he could prevail in what may be a coming electoral showdown against Mr. Milosevic is uncertain. Suspicions linger that the Serbian president may find a way to use Mr. Panic to break the international embargo without ceding him power.

Many think the way to pick up after the Yugoslav crackup is to get rid of Slobodan Milosevic. But how is this job to be done? An invasion is out. A coup or conspiracy could yet materialize. The best solution would be a democratic choice. This is where Mr. Panic comes in with his program of, as he puts it, peace, democracy and business. He is a long shot, but he is on the move. Fearing that Mr. Panic can't handle the Milosevic juggernaut, Western countries hesitate to bet on him. As he shows himself able to demonstrate his independence and momentum, however, he deserves support. It is a gross libel on Serbs to say that Slobodan Milosevic is their true champion. The Serbia that Americans have traditionally respected and befriended—right up to this terrible current nightmare—is the one he projects.

#### ARE WE REALLY FINISHED?

### HON. PORTER J. GOSS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 8, 1992

Mr. GOSS. Mr. Speaker, the Congress is due to adjourn in a few short hours, officially bringing this year's legislative business to a

close. But are we really finished? Have we accomplished the job we were sent here to do? I don't think so, and I believe the American people would agree. Our No. 1 responsibility in this House is to properly manage the Nation's budget. By all accounts, we have failed—and failed miserably—at that task. We know that the Nation's health care system is sick and in desperate need of treatment, yet we have not even debated the issue, let alone acted on the many worthwhile programs that we have on the table. And every community in this Nation is being assaulted by the wave of violent crime, and yet this body has failed to produce legislation that will beef up our laws, bolster enforcement, and send an unmistakable message that crime will no longer pay.

Mr. Speaker, I know many of our colleagues have already headed home, filing the 102d Congress away as a done deal and looking ahead to the 103d. But there are likely to be serious repercussions for all Americans because this institution once again chose to put off until tomorrow what we should have done today.

#### SAMUEL J. CAIVANO: CONSTRUCTION MAN OF THE YEAR

### HON. FRANK PALLONE, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 8, 1992

Mr. PALLONE. Mr. Speaker, on Friday, October 16, 1992, the Building Contractors Association of New Jersey will hold its annual gala dinner dance in Whippany, NJ. On that occasion, the association will honor Mr. Samuel J. Caivano of Millburn, NJ, as the Construction Man of the Year.

Mr. Caivano is the vice president of the Laborers' International Union of North America and the New York/New Jersey regional manager. He has always believed in the dignity of the construction worker, a person who, through the efforts of the international union, has been able to achieve an honest day's wages for an honest day's work. For Mr. Caivano, this effort comes from the heart, as his own roots began in labor. After graduating from Millburn High School, Mr. Caivano entered the U.S. Marine Corps at the outbreak of World War II. After his years of service, he returned to Millburn, joining local 526 of the Laborers' International Union as a laborer. He had previously worked in the construction industry in New York City with two of his brothers.

After 6 years of service in local 526, Mr. Caivano was elected business manager. He was an extremely successful organizer and manager whose talents were soon recognized by the international union. In 1967, he was appointed as international representative and an organizer in the New York/New Jersey region. He served the union as representatives and international vice president and regional manager in New York and New Jersey. In 1991, he was elected to the vice presidency.

Over the years, Sam Caivano has been instrumental in developing State legislation for the benefit of all workers. In New Jersey, he

worked closely with former Governor Hughes in promoting a State prevailing wage law protecting workers on public construction projects. In New York, he led the successful efforts to raise the workers' compensation benefits for workers injured while at work.

Sam Caivano is well-known for his activities in support of organized labor. He has been active in developing programs within the Laborers International Union to benefit the membership in the field and their families. He serves on the boards of numerous funds at both the State and national levels, all dedicated to the welfare and concerns of the construction laborers. He also manages to give of his time to many philanthropic endeavors serving the community.

Sam Caivano, a lifelong resident of Millburn, has been married for 38 years to Anne Caivano. The Caivanos have two grown sons, David and Richard.

In recognition of the longstanding integrity, service, and leadership that Sam Caivano has shown in making a positive impact on the construction labor movement, the Building Contractors Association of New Jersey takes great pride in paying tribute to this fine man. I am proud to add my tribute, and to share some of his accomplishments with the Members of this House.

#### FAIRLEIGH DICKINSON UNIVERSITY

### HON. DEAN A. GALLO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 8, 1992

Mr. GALLO. Mr. Speaker, I would like to raise an issue of great importance to the Nation's competitiveness and the future of technology-driven industries. For years, the United States has been a leader in producing technologies that are on the leading edge, yet these technologies have been commercialized overseas. This phenomenon has effectively reduced the competitiveness of U.S. industry, and it is clear that there are problems that must be addressed if the United States is to maintain a preeminent position in world trade.

Because management skills are vital to be successful commercialization of creativity, I would like to bring my colleagues' attention to a project that was included in this year's House version of the water resources authorization bill, and should merit further consideration during the 103d Congress.

Fairleigh Dickinson University has developed a program focusing on the management of technology. This program is nationally significant in that it has successfully addressed competitiveness issues in bringing technology to the commercial market. Under the water resources authorization bill, the distinguished committee chairman included an authorization of \$8.5 million in funding for the construction of a center focusing on technology management as it relates to water quality. This project would allow the university to increase its focus in this area and would serve as a national demonstration for applying technology management approaches to all technology-driven industries. Additionally, by focusing on the

timely issues surrounding the management of water quality restoration technologies, FDU will be making a significant contribution in training and resources to industries dealing with water quality improvement.

Efforts to assist technology-driven industries to compete more effectively in the growing atmosphere of global competition will be extremely important to U.S. participation in the global economy. I strongly support Fairleigh Dickinson University's efforts in this area, and I plan to encourage the 103d Congress to give this project additional consideration next year.

GAO PARTISANSHIP  
UNACCEPTABLE

HON. C. CHRISTOPHER COX

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 8, 1992

Mr. COX. Mr. Speaker, during the past several years, the General Accounting Office has lost its reputation for balanced and unbiased reviews. Indeed, as the years have passed, the GAO has evolved into a partisan tool of the Democrat chairmen of the House. In 1969, 90 percent of GAO's reports were initiated by the GAO. But by 1991, more than 80 percent were undertaken directly at the request of Democrats in the House.

Unfortunately, GAO reports now seem to be timed to influence the upcoming Presidential election—in favor of Bill Clinton. The so-called watchdog has become the Democrat lapdog. A prime case in point is a forthcoming GAO report purportedly assessing the Justice Department's efforts in the investigation and prosecution of bank and thrift fraud.

The GAO has spent the past 2 years crisscrossing the country, racking up frequent flyer miles, and sampling scores of hotels as they reviewed the Justice Department's handling of bank and thrift fraud. During this period, GAO employees interviewed Department investigators, collected thousands of pages of Department documents, interviewed prosecutors, and reviewed the entire Justice Department prosecution strategy. Remarkably, after this exhaustive evaluation, after spending thousands of tax dollars, after promising a nonpartisan review, the GAO completely ignored every single piece of information gathered from the Justice Department, in a report they will release just prior to the election.

The report would have us believe it is the Justice Department—not the Congress—that is accountable for the decline of the thrift industry. Overlooking the myriad of causes of this complicated issue, the GAO report ignores the well-documented blame that Congress deserves. Maybe this is because the GAO feels reluctant to bite the hand that feeds it—the Democrat chairmen of Congress. In particular, the GAO report forgot to include:

The Democrat Speaker of the House, Jim Wright, who fought with regulators to keep open an S&L owned by his biggest contributor, resulting in the loss of \$1.3 billion in taxpayers' money. The owner of the thrift got 30 years in jail. And while Jim Wright got none, his role is painfully laid out in independent counsel Phelan's detailed report to the Congress.

The finance chairman of the Democratic Congressional Campaign Committee, who raised \$9 million from S&L's for Democrat candidates in the same year that Speaker Wright intervened with thrift regulators on behalf of these same institutions.

Tony Coelho, the Democrat whip, who allowed a Texas thrift to keep their yacht in DC, which was then illegally used 11 times for Democrat fundraisers—all in violation of FEC regulations.

The Democrat chairman of the House Banking Committee, Fernand St Germain, who singlehandedly raised the contingent liability of the FSLIC by billions in 1980 by raising the insured deposit limit to \$100,000. This created the business of brokered deposits, which permitted crooks to buy small institutions and create growth in paying above market interest rates.

The fact that St Germain took this action at the same time that he had unlimited free use of a U.S. Savings League lobbyist's credit card.

The Democrat Senate whip ALAN CRANSTON, who made good on the \$850,000 he received from Charles Keating by intervening with regulators seeking to prevent the collapse of Lincoln Savings & Loan.

What's more, the GAO makes numerous assertions without any empirical or statistical support. For instance, the GAO states that "large numbers of investigations and cases" have been declined by U.S. attorneys. Information provided to me by the Justice Department—which I'd like to include for the RECORD—makes it clear that this statement is false. Then, the GAO changed the legal definition of the word "fraud." By so doing, the GAO was able to improperly suggest that the Department did not fulfill its legal responsibility.

Had the GAO included the facts about the progress of the financial institution program, they would have discovered that: 3,500 defendants have been charged in major financial institution fraud cases since October 1988; almost 2,800 convictions have been secured—a 95-percent conviction rate; and prosecutors have won a 77-percent incarceration rate.

Mr. Speaker, I should also note that the FBI shares my concern that the GAO's conclusions are erroneous, and their use of data misleading. I ask unanimous consent that a portion of the Department's response to the GAO report be inserted in the RECORD following my remarks.

I could go on to illustrate how the GAO report makes a mockery of the work of career professional prosecutors. I could further outline how the GAO ignored many of the root causes of the thrift crisis. And I could cite dozens of other cases of the GAO playing partisan politics with the facts. The bottom line is that the GAO itself needs major reform. Mr. Speaker, it is high time we privatize this out of control partisan bureaucracy so that the taxpayer can count on independent audits of our Government—audits unswayed by powerful House committee chairmen and their hordes of politicized committee staff.

DEPARTMENT OF JUSTICE,  
OFFICE OF LEGISLATIVE AFFAIRS,  
Washington, DC, October 1, 1992.

Re Draft GAO Report on Justice Department's Financial Institution Fraud Program.

MR. RICHARD L. FOGEL,  
Assistant Comptroller General, General Government Division, General Accounting Office,  
Washington, DC.

DEAR MR. FOGEL: 3500 defendants charged in major financial institution fraud (FIF) cases between October 1, 1988 and August 31, 1992; almost 2800 convictions; a 95% conviction rate; a 77% incarceration rate; and more than 100% increases in productivity reported in each of FY 1991 and 1992 over FY 1989-90 combined. These objective facts, which stand as irrefutable evidence of the success of the Justice Department's anti-fraud effort, are largely ignored in your 140-page Report. The determination to criticize rather than analyze is evident throughout.

While the Report purports to focus on what Justice has done in the FIF program since the arrival of the Special Counsel, it ignores volumes of information supplied in our Reports on Attacking Financial Institution Fraud over the past two years and the extensive information supplied in response to various Congressional inquiries—all shared with GAO during the "audit" which allegedly took place as part of this Report.

We have successfully integrated and trained a record number of prosecutors in a training program completely overhauled under the supervision of the Special Counsel. Working relationships within the law enforcement community and with the regulators have never been better. Under the leadership of the Special Counsel, the Senior Interagency Group has passed the first multi-agency accord to enhance the monetary enforcement effort. Though constantly improving, the reporting mechanisms now in place for the FIF program are the most comprehensive in existence for a multi-agency enforcement program.

Yet, short shrift is given to the accomplishments of the program, and the Special Counsel. Rhetoric about unfunded budget allocations in FY 1991 abounds with nary a mention of proposed Congressional budget cuts in this program for FY 1993. Significantly, the Congressional slashing of forty-four million dollars in enhancements to combat white-collar crime (including FIF) from our FY 1992 appropriations is omitted.

By all accounts, the near-collapse of the thrift industry was the result of a series of complex factors. Yet no one has ever suggested that the work of federal prosecutors is in any way responsible for the thrift failures. Moreover, regardless of whose numbers one looks at, fraud has not yet been shown to be the "major" factor in the industry's failures. Nonetheless, the Report conveys the notion that the collapse is primarily a criminal law enforcement issue. It is not. Blaming all of the S&L losses on "criminals" may be politically convenient but it is not responsible law enforcement and it is not accurate.

While fraud and real estate related fraud in particular<sup>2</sup> were certainly factors in some failures, it cannot fairly be said that they were the major factors in all or even a majority of the failures. Economic factors in the real estate and other markets seem to have played a far larger role than fraud.<sup>3</sup> Notwithstanding the unsupported assertions of the Report, the extent of fraud as a factor in S&L failures is simply not known at this time, and indeed may never be known.<sup>4</sup> Moreover, it cannot be responsibly inferred

without empirical and anecdotal study of the reasons for all the failures.

Prosecutors are merely cleaning up a mess left by others—and they are doing a great job with the resources they have been given to convict the guilty and protect the rights of the innocent. Responsible officials within the agencies regulating the industry and those prosecuting the fallout of the collapse have resisted efforts to attribute "costs" to "fraudulent" activity until the cases are completed. Nonetheless, GAO purports to do just that at page one of the Report's Executive Summary, without the benefit of statistical or anecdotal case analysis. The "costs" of the thrift bailout have many causes, including Congressional delay in funding the RTC since April 1992.

Our "comment" on the Report is that it is simply wrong in fact and tone, the obvious product of biased reporting. Specifically:

The leadership<sup>5</sup> of the Department and the Special Counsel, universally praised by the professionals involved in the program, exceeds what Congress could reasonably expect given the number of overlapping but fully independent agencies that Congress legislated as part of this effort.<sup>6</sup>

There has been no "shift in strategy"<sup>7</sup> and any evolution of our efforts has been fully documented for Congress.

Ironically, having failed to identify a measurement which would support criticism of the program, GAO criticizes Justice for the absence of such a yardstick.<sup>8</sup> There are many measurements of our success—including the absence of any valid criticism of the program in the face of 22 months of GAO efforts to invent one.

Efforts to divert responsibility for the scarcity of IRS-CID<sup>9</sup> resources to Justice from Congress<sup>10</sup> is sophistry of the worst kind.

Recommended improvements in the program were instituted by the Special Counsel almost from the outset, without prompting or apparent interest by the GAO.

Despite the substantial time we have devoted to attempts to inform GAO in Washington, D.C. and in the field, the Report eliminates the positive in favor of the same predetermined but inaccurate criticisms the auditors brought to their work when your "audit" began in November of 1990.

In short, the Report is wrong in so many ways that it must be assumed that the inaccuracies are intentional. Release of this draft just five weeks before the Presidential election further demonstrates the absence of objectivity. Perhaps it is because of the number of times we have corrected misinformation some within GAO have supplied to Congress that you have taken this tack, but the Report simply fails to meaningfully analyze our program.

#### FOOTNOTES

<sup>1</sup>The use of the word "major" to suggest that fraud brought down the thrifts is simply not accurate based on known data. Report at page 26.

<sup>2</sup>At page 27 of the report, GAO provides only a partial list of the statutes applied to this area. At page 27, the description of a land flip and nominee loan transactions is both oversimplified and inaccurately limited to "conspiracy" cases.

<sup>3</sup>The Report at page 3 states "Criminal fraud, often involving real estate, has been a major factor in many financial institution failures."

<sup>4</sup>As described in our "1992 Second Quarter Report: Attacking Financial Institution Fraud," p. 31-32, the loss figure we report to Congress is not necessarily the amount of fraud charged in the particular case. GAO fails to note this potentially significant fact when it describes "loss associated with those cases" at page 24 of the GAO Report.

<sup>5</sup>Report at page 8.

<sup>6</sup>The Report omits the fact that the Brady Bank Bill, rejected by Congress, sought to streamline the

regulatory function and clarify the Attorney General's role as the nation's litigator.

<sup>7</sup>Report at page 13.

<sup>8</sup>Report at page 13.

<sup>9</sup>Criminal Investigations Division.

## A SALUTE TO THE BLACK AGENDA

HON. MERVYN M. DYMALLY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 8, 1992

Mr. DYMALLY. Mr. Speaker, this year marks the 13th Annual Christmas Kwanza Luncheon, which will take place at the Biltmore Hotel in Los Angeles on December 14, 1992.

I propose a special salute to this dynamic local organization which was established by Dr. Thomas Kilgore, Jr. for the spiritual economic and educational development of the African-American Community of Greater Los Angeles.

This year's luncheon will be highlighted with the presentation of 150 boys who have experienced the Rites of Passage Program of the Black Agenda.

These boys come from various churches in the community and have learned what it is to pass from childhood into manhood.

Some of the distinguished members of the Black Agenda are Reverend Dr. Roy S. Pettit, the current president, Dr. Maulana Karenga, who formulated the Rites of Passage Program and of course, Bishop Trevor D. Bentley, a founding member and parliamentarian.

Again, I wish the Black Agenda great success in this luncheon and hope that these boys will continue on their path to manhood and become proper and productive citizens of their community.

The general chairman of this year's luncheon is Mr. Larkin Teasley, president of Golden State Mutual, who we thank in advance for his hard work.

## SUCCESS: WITH HARD WORK, HOPE AND THE FHA

HON. CLARENCE E. MILLER

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 8, 1992

Mr. MILLER of Ohio. Mr. Speaker, I recently had the distinct pleasure to join a number of outstanding citizens from Morgan and Perry Counties in Ohio for ground breaking ceremonies to inaugurate a new water service and distribution system for hundreds of people residing in Appalachia, OH.

The system—the Portersville East Branch Water Co.—was formed in November, 1987 by a dedicated group of citizens and in direct response to a crisis which could only become more acute were it not fully addressed. I realize that for many in Congress it is nearly impossible to believe or accept the fact that homeowners, small businesses and even an elementary school in this Nation could be without adequate access to water. That was precisely the case for those residing in and

around Portersville, OH. Without the new system being constructed as I speak, the users of this region would have had to continue to rely upon unsafe well water, or hauling water, or even upon roof runoff water.

When I learned of this situation through Paul Hinkle—president of the company—and the near desperate circumstances facing York Elementary School in Deavertown, it became apparent that Federal assistance to bring water to the area was essential. The possibility of the school being closed altogether was likely. State and Federal officials were pressing forth with plans that would have forced nearly 200 children to be bussed elsewhere for school.

Fortunately, there is a silver lining to this story. In March, 1991, the Farmers Home Administration approved a grant for \$1,002,000 and a loan of \$629,000 to construct a major water distribution line linking the Burr Oak water supply system to the Portersville network, thus bringing water service to more than 400 new customers throughout a 6-township region. The new system will save York Elementary School and keep it open and available for local children.

I consider myself very fortunate to have been a part of this impressive project. All those involved—people who contributed time, energy and effort on a voluntary basis—deserve the universal thanks of all of us. Those affiliated with the project have done a wonderful job.

Officers of the Portersville East Branch Water Co. are: Paul Hinkle, president; Rodney Holcomb, vice president; Steve Altier, treasurer; Gayle Bolyard, secretary; Trustees: David Kangas, W.G. Addington, Richard Mingus.

## EXPLANATION OF AMENDMENT

HON. CONSTANCE A. MORELLA

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 8, 1992

Mrs. MORELLA. Mr. Speaker, I am pleased to have the opportunity to express my gratitude to the conferees of H.R. 5006, the Defense Authorization Act, for retaining my amendment regarding the conveyance of land from the Forest Glen Annex of Walter Reed Army Hospital to the Maryland National Park and Planning Commission.

My amendment provided for the transfer of approximately 10 acres of woodlands adjacent to Rock Creek Park in the Forest Glen area of Montgomery County, MD, to the Maryland—National Capital Park and Planning Commission. The woodlands are currently part of the Forest Glen Annex of the Walter Reed Army Hospital. This wooded area, which is adjacent to a bicycle path, is assumed by the public to be part of Rock Creek Park and is widely used by the surrounding communities.

The woodlands to be transferred were deemed to be excess to the needs of the Department of the Army. The transfer of property was discussed with the Office of the Secretary of the Army, and that Office indicated that it did not object to my amendment.

The approximately 10 acres of woodlands will serve as a buffer between the residents of

the Forest Glen community and any construction of facilities by Walter Reed in the Forest Glen Annex area. The Army's willingness to transfer the woodlands and thus guarantee that no further construction would occur in this 10-acre area is critical to the concerns of the surrounding community. Passage of this amendment will afford the residents peace of mind and assurance that the environmental impact of any construction on the Forest Glen Annex of the Walter Reed Army Hospital will be minimal.

#### ASBESTOS COMPENSATION LEGISLATION

### HON. PAT WILLIAMS

OF MONTANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 8, 1992

Mr. WILLIAMS. Mr. Speaker, asbestos litigation has overwhelmed the Nation's courts. Approximately, hundreds of thousands of cases arising out of asbestos-related injuries are pending nationwide. The impact of this enormous volume of litigation is devastating: Claimants must wait years for compensation if they receive it at all; companies have filed for bankruptcy and sought further legislative relief; and tens of thousands of employees are out of work. If unabated, the cost of resolving these and future claims will force other companies into bankruptcy, other employees out of work, and most importantly, future claimants may be denied the ability to recover compensation for their injuries.

Constructive attempts have been made by the courts to expedite the resolution of asbestos cases. These efforts, however, have not been effective. Injured asbestos workers and their families bear the brunt of this delay, even though they are the plaintiffs in these suits, they are the true victims of the current state of asbestos litigation. Many injured workers have died before their suits reach trial or are settled. Many leave widows and dependent children to suffer economic hardship before the extended process of disability or death claims are completed by verdict or settlement. There continues to be no effective and efficient mechanism to separate frivolous from legitimate claims.

Moreover, an unconscionable amount of fees are consuming huge chunks of any awards that plaintiffs receive. Most plaintiffs' attorneys in asbestos cases get one-third of their clients ultimate award. A Rand study indicates that as much as 65 percent of the total awards intended for asbestos victims goes to transaction costs, fees to plaintiffs' and defense lawyers, experts, and administrative personnel.

Injured asbestos workers who pursue their claims in the civil justice system face other obstacles as well. First, asbestos litigation is spread widely among a large number of Federal and State courts. Accordingly, an asbestos claim is truly a role of the dice—plaintiffs in different jurisdictions receive often vastly differing awards. Second, because of strict rules governing statute of limitations in most jurisdictions, many exposed workers have no choice but to file lawsuits simply to preserve

#### EXTENSIONS OF REMARKS

their claims, even though they have no manifest signs of disease or impairment. These suits, prematurely compelled by the perverse incentives of State limitations statutes, compound the crowding in the courts, thus delaying compensation to plaintiffs who are seriously ill.

The courts themselves have recognized that they cannot effectively resolve these problems. In March 1991, the judicial conference of the United States, acting on a report issued by the Ad Hoc Committee on Asbestos Litigation appointed by Supreme Court Chief Justice Rehnquist in September 1990, adopted the recommendation that:

Congress consider a national legislative scheme to come to grips with the impending disaster relating to resolution of asbestos personnel injury disputes, with the objectives of achieving timely, appropriate compensation of present and future asbestos victims and of maximizing the prospects for the economic survival and viability of defendants.

This series of factors lead to hearings this session in the Senate Judiciary Subcommittee on Courts and Administrative Practice, chaired by Senator HEFLIN, and in the House Judiciary Subcommittee on Intellectual Property and Judicial Administration, chaired by Representative HUGHES. Those hearings reinforced the ad hoc committee's recommendation that asbestos claims can only be resolved through Federal legislation.

In the 99th Congress, I introduced H.R. 3090 to provide for the compensation of individuals who are disabled as a result of occupational exposure to toxic substances and to regularize the fair, adequate, and equitable compensation of certain occupational disease victims. This legislation also recognized the equity of, and need for, a Federal contribution to the fund established within this legislation to compensate workers who also served our national security interests during World War II.

Since that time, I have been talking with both concerned labor unions and a number of asbestos companies to explore the possibility of developing legislation that will benefit workers suffering from diseases caused by their workplace. My goal is to maximize the money that goes directly to workers and not to have it frittered away by expensive litigation costs, and also to preserve worker access to the court system.

In the 103d Congress, it is my intention to explore the development of such legislation. At this point in time, I have not introduced any legislation and do not have a draft bill. At the beginning of the next Congress, I hope to continue working with the concerned parties. The essential point is that negotiations have gone on long enough; I'm hopeful of introducing compromise legislation very early in the coming Congress.

#### THE RESIGNATION OF FOREIGN SERVICE OFFICER GEORGE KENNEY IN PROTEST AGAINST UNITED STATES POLICY IN THE FORMER YUGOSLAVIA

### HON. TOM LANTOS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 8, 1992

Mr. LANTOS. Mr. Speaker, I have spoken out frequently about the lack of leadership on the part of the United States in dealing with the continuing crisis in Bosnia-Herzegovina and the other new Republics of the former Yugoslavia. I have introduced legislation and urged the administration to take stronger action—including economic, military, and political sanctions—against the military action of the former Yugoslav Army led by a Serbian officer corps, and now for all practical purposes the well-equipped army of the Republic of Serbia.

I have criticized the failure to deal strongly with so-called Serbian irregular forces in Croatia, Bosnia and other parts of former Yugoslavia because these forces are working hand-in-glove with the Serbian Government. This administration's policy has been too little, too late, too often, but in Yugoslavia, it has been disastrous. We are now looking at tens of thousands who have been killed, some 2 million who have been made refugees, and—with the advent of winter—the prospect that both of those tragic and preventable figures will increase significantly.

Last August, Mr. Speaker, a young foreign service officer, George Kenney, resigned from the Foreign Service in protest against United States policy in Bosnia-Herzegovina and the former Yugoslavia. His resignation received some attention at the time—it was reported in newspapers here in Washington and elsewhere around the country.

That resignation also was the subject of an exchange which I had last week during a hearing of the Subcommittee on Europe and the Middle East of the Foreign Affairs Committee. I discussed Mr. Kenney's resignation with Thomas Niles, the Assistant Secretary of State for European Affairs. Portions of my exchange with Mr. Niles and a response by Mr. Kenney to Mr. Niles' comments during our hearing were published in the Washington Times yesterday.

Mr. Speaker, I ask that the editorial in yesterday's Washington Times and the response of George Kenney be placed in the RECORD. I urge my colleagues to read it.

[From the Washington Times, Oct. 7, 1992]

GEORGE KENNEY, DOWN THE MEMORY HOLE

On Aug. 25, George Kenney, then the Yugoslav desk officer at the State Department, did something highly unusual in Washington: He quit on principle. He was frustrated and angry with what he has since described as the determined refusal of the United States to do anything of consequence about the slaughter in Bosnia-Herzegovina. He did not go quietly. He immediately gave an interview to The Washington Post, and he has since written op-ed articles for The Post, the New York Times and other publications, and spoken at universities, think tanks and elsewhere, in an effort to get the United States to take the war in the Balkans seri-

ously, not only as a matter of humanitarian concern but also as a matter of U.S. national interest.

Mr. Kenney pushed hard for broader U.S. involvement while he was at the State Department. By his own count, he says, he discusses the subject with no fewer than 26 colleagues who had a direct interest in the former Yugoslavia and many others in the department who were indirectly concerned. He describes numerous meetings and discussions, as well as buttonholing department officials in the hallways, in the effort to press his case.

So he was more than a little surprised to hear tell of this exchange between Rep. Tom Lantos and Thomas Niles, the assistant secretary of state for European affairs. Mr. Niles was testifying before the House Foreign Affairs Committee's Europe subcommittee.

Mr. Lantos: "Could you characterize your appraisal of Mr. Kenney?"

Mr. Niles: "Mr. Kenney was a talented younger officer: I worked—as I say, I worked with him for seven months. He was a good colleague, someone with whom we enjoyed working, all of us at the bureau, and we regretted his decision [to resign] but certainly understood it. And I can say that Mr. Kenney's sense of frustration with developments in Yugoslavia was widely shared, certainly one that I shared."

Mr. Lantos: "His frustration was not with developments in Yugoslavia. His frustration was, in his view, the failure of American policy in Yugoslavia. There's a great deal of difference between the two."

Mr. Niles: "Again, let me answer the question. You asked about Mr. Kenney. I would only say that I understand and sympathize with Mr. Kenney's decision. I would say, however, that at no time during the period when Mr. Kenney was working on Yugoslavia as the junior of two officers working in that section—there were two officers specifically working on Yugoslavia, and he was the junior of the two—at no time during that period did Mr. Kenney come to me or to his superior or anyone else in the chain or go to the acting—or to the secretary of state above us and express dissatisfaction with the policy. Now, he may very well have felt that dissatisfaction. I was at meetings with Mr. Kenney at which our policy options were discussed, and he did not say at any time, at least while I was present, nor did he say to anyone else in the bureau, to the best of my knowledge, 'Let me tell you, this policy is wrong. We're on the wrong track. Instead of doing (whatever we were doing), you should do something else, and here are your options.' So I don't say that in the way of criticism of the man. I'm just simply telling you that, although he very obviously felt strongly that we were on the wrong track, he never told me so."

Mr. Lantos: "This came as a complete surprise to you?"

Mr. Niles: "It certainly came as a complete surprise to me when we learned that morning, as we were going to the London conference, that Mr. Kenney had resigned. Now, again, there are ways in the Department of State in which you can express your views, either in a dissent channel if you don't agree, or in the policy formation process. To the best of my knowledge, he did not do so. He has done so subsequently, and has provoked, as is appropriate in our democracy, vigorous debate about whether we're on the right track or not. And I see nothing wrong with that at all. I wish him well."

Mr. Kenney's response to Mr. Niles' assertion that "at no time" during Mr. Kenney's

service did he ever "express dissatisfaction" with U.S. policy to "anyone . . . in the chain" appears on this page today, as well as Mr. Kenney's more general reflections on policy making in the State Department.

He describes wide agreement with his view among officials closest to the issue and opposition from higher-ups in the department, Mr. Niles included. The fact that Mr. Kenney's view of the Balkan war and what U.S. policy toward it should be is close to the view expressed in this space previously is not the issue. Nor, for that matter, is the fact of disagreement within the State Department. The issue is whether the public, the Congress and the debate over the former Yugoslavia are well served by the apparent effort of Mr. Niles to deny that that disagreement existed within the department and still exists.

#### TRUTH AS A POLICY CASUALTY

(By George Kenney)

Last Tuesday, a senior administration official lied to Congress. In testimony before the House Foreign Affairs European Subcommittee, the assistant secretary of state for European affairs, Tom Niles, said that I had never told him, or anyone at the department of state, of my objections to U.S. policy toward Yugoslavia before I resigned my commission as Foreign Service Officer on Aug. 25. Through his personal attack, Mr. Niles was trying to minimize the importance of public debate on the failure of U.S. policy.

True, I did not argue policy with Mr. Niles—he was five levels above mine in the State Department hierarchy—but I did argue policy, practically every day, with Mr. Niles' deputy assistant secretaries. I vociferously argued policy at the next level down—with my office director. I argued with senior staff in the secretary of state's Office of Policy Planning and with the senior staff to Acting Secretary Lawrence Eagleburger and Under Secretary for Political Affairs Arnold Kanter. I argued policy everywhere I found an audience. I assumed that Mr. Niles' senior staff and others talked to him about the opinions of U.S. policy found at the working level.

By my count, more than 20 State Department officials who deal with the Yugoslav crisis on nearly a full-time basis share my point of view. Through rational deliberation, all of us were drawn to the same conclusion: Only Western military intervention can solve this crisis. Against us, about half a dozen department officials supported the administration's non-interventionist approach. But Mr. Niles would rather not talk about dissent within the State Department. There he is in the distinct minority. There, his credibility is nil. I do not believe, nor does anyone who knows him, that Mr. Niles really expect current U.S. policies to produce any resolutions of the crisis. He is more intelligent than that.

Unfortunately, the State Department is highly politicized. Internal debate is stifled. There is, however, a remarkable generational division between older officers who believe that procedural protocols take priority over all else, and younger officers willing to explore policy differences in order to get to the best policy in the national interest. Younger officers tend to view their jobs in terms of long-term careers that include the possibility of other kinds of work; if the department does not satisfy professional goals, they leave, as I did. Older officers often feel, perhaps correctly, that they have no other options. They go along with the system.

Because of politicization, the State Department's professional standards—some say, and I agree, that diplomacy as a profession—have fallen. As an institution, the State Department may no longer be capable of coping with a crisis on the scale of Yugoslavia. The assistant secretary further wrecks the department's institutional legitimacy: Who will listen seriously to the State Department if it cannot tell the truth to Congress? And if it lies to Congress routinely, when will it ever distinguish between truth and falsehood? The national interest gets lost in crass political calculations. This administration's blind political arrogance is well on the way toward ruining America's ability to provide world leadership.

I do not hold Mr. Niles' lies against him. Rather, it is a reflection of the system, of the incentives and punishments that Mr. Niles faces. If Mr. Niles were removed, the same incentives and punishments would face his successor—even in a new regime of enlightened political leadership. The system should be reformed to protect internal deliberation, to provide elected officials with a broad range of policy options, and to ensure absolute transparency of information so that the public gets the truth.

The United States desperately needs a healthy debate on the Yugoslav crisis. We need to think carefully about what it means for us to deny Croatia and Bosnia, both members of the United Nations, the right of self-defense. This is unprecedented. It is a dangerous precedent. We need to ask whether, by not acting to stop genocide against Muslims in Bosnia, the West will ever stand up for its values whether we may poison our relations with the Islamic world. Americans need to ask profound questions about our responsibilities as a world power. But the administration treats these and all the issues raised by the Yugoslav crisis in the style of Groucho Marx: It asks, "Who are you going to believe, me or your own two eyes?"

#### THE FAMILY AND MEDICAL LEAVE ACT

HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 8, 1992

Mr. MAZZOLI. Mr. Speaker, the Family and Medical Leave Act was the subject of recent editorials in *Business Week*, September 28, 1992, the *Washington Post*, September 30, 1992, and *U.S. News & World Report*, September 28, 1992.

Important highlights of those editorials are: The bill's requirements apply only to employers with 50 or more employees; providing workers leave time to attend to family responsibilities is good business practice; and, pushing the measure to become law is a push for family values.

I have always voted for passage of the Family and Medical Leave Act, and I cast my vote to override the President's veto. Like many of my colleagues, I was deeply disappointed that the veto was sustained. Furthermore, I hope to join those same colleagues in January in resurrecting a bill that is for working families and finally enacting it into law.

The text of the editorials follow:

[From Business Week, Sept. 28, 1992]

#### FAMILY LEAVE TIME IS GOOD BUSINESS

Tremendous demographic changes are being felt in the U.S. workplace. In many families, both parents work—women account for 45% of the work force—and often the family must cope with ailing grandparents. All this has dramatically increased employees' need for help in caring for dependents young and old. A coalition led by IBM is already tackling one aspect of the problem, the dearth of adequate child and elder care. In early September, the group, composed of 137 companies and public entities, announced that it would put up \$25 million to fund child- and elder-care programs in 44 locations around the country. While this isn't a lot of money—IBM alone pledged \$9 million—it marks the largest effort so far in which companies and government have acted in unison on this problem.

An even more comprehensive approach is taken by the Family & Medical Leave Act, which requires employers to offer 12 weeks per year of unpaid leave to care for a new or sick child, a parent, or spouse. Congress first passed a family-leave bill in 1990, but President Bush vetoed it on the grounds that government shouldn't mandate corporate benefits. Congress has passed such a bill once more, and the President says he will veto it again. This would be a mistake. Last year, a nonprofit group called the Families & Work Institute released the most thorough study ever done of corporate-leave policies. The survey found that 83% of companies already offer an average of 11 weeks of maternity leave. It also found that 60% offer paternity leave. In any case, unpaid leaves represent a financial hardship, so the rate is unlikely to increase dramatically. Because it applies only to companies with more than 50 employees, the current bill exempts 95% of all companies and would impose a burden only on the minority of companies that don't feel the need to match their rivals' policies. The GOP's campaign emphasis on family values would be a lot more believable if President Bush ignored ideology and signed this modest family-leave legislation.

[From the Washington Post, Sept. 30, 1992]

#### THE FAMILY LEAVE VOTE

The House will have an opportunity today to break a record and enact a popular and much-needed law. The record is the president's: He has vetoed more than 30 bills during the last four years, and not one has been overridden. But his veto last week of the Family and Medical Leave Act has already been overturned by the Senate, and the final test will be in the House today. The bill is a good one; it is tied to the Republicans' theme of family values. The predictions are that there are not enough votes for an override. You would have thought that on this particular issue in this political season, a good family leave bill such as this one could draw the votes. It should.

No one, after all, can dispute the fact that as women have entered the work force in overwhelming numbers, problems that older generations did not face have arisen. The most difficult are those involving the need for some adults to stay home temporarily to care for a newborn or sick child, or a close family member who is ill. Many employers are both understanding and cooperative about granting unpaid leave in these situations, but some are inflexible and harsh. Workers are often faced with a choice between family responsibilities and keeping a job they may have had for years. The legislation at issue simply requires businesses with

more than 50 employees to grant up to 12 weeks of unpaid leave for these emergency situations. Health insurance coverage would have to be continued, but the law wouldn't apply to the highest paid 10 percent of the work force, who might be difficult to replace.

The bill is not without cost to a business, but in the long run it is estimated that money would be saved because permanent replacement workers wouldn't have to be hired. The goodwill and loyalty engendered by such a family-oriented approach should also provide benefits. The president proposes, as an alternative, that tax credits be provided to businesses that voluntarily grant unpaid family leave. But that is a last-minute offer, made only last week, that has no chance of enactment this year. The House should not be distracted by this gambit.

Notwithstanding party affiliation, members should have the confidence to override this veto. Working families need this law as other generations of workers needed minimum wage, health and safety regulations and Social Security. The president should not be allowed to get away with turning his back on them.

[From U.S. News & World Report, Sept. 28, 1992]

#### MAKING PARENTAL LEAVE A RIGHT

(By David Gergen)

For 19 years, Carmen Maya worked as a pharmacy technician in a Chicago hospital. During a third pregnancy, she suffered severe swelling in her legs; then her daughter was born with Down's syndrome. The hospital granted her temporary leave, but shortly before she was to begin working again, she was fired. "It has been a nightmare. I'm used to bringing home a paycheck. Now I have to stand in welfare lines to get food for my children," this proud woman testified before a recent Senate hearing.

How many more families must be crushed before this nation treats them with minimum decency and caring? Is "family values" just a pious phrase, or can we infuse it with real meaning? How much longer must the United States be the least enlightened country in the West in nurturing family life? President Bush and Congress will soon provide answers as they wrestle over proposals for parental leave.

The problem is plain: For most of our history, women have worked at home to care for the young and the sick, but economic necessity and changing cultural standards—as well as greater opportunity—have encouraged the vast majority to take paying jobs. When a child is born, most mothers would prefer to stay home for at least a year, the minimum time thought necessary for parental bonding. But 91 percent told a survey for *Working Mother* magazine that they feel compelled by economic circumstances to go back to work. If they don't return quickly, there may be no job left. New fathers face even more resistance from employers in staying home. And most workers are expected to give the shortest possible time to tending an illness in the family. Forced to make painful choices, some employees still elect to stay home temporarily—only to become another statistic in the unemployment charts.

The same social revolution has swept across other industrialized nations, of course, and it is striking how they have reacted. "Throughout continental Europe," author Sylvia Ann Hewlett reported in a paper this summer at the Aspen Institute, "governments provide a generous package of rights and benefits to working parents when

a child is born." Germany requires 14 to 19 weeks of fully paid leave. In Italy, a pregnant woman is entitled to five months' paid leave at 80 percent of her wage, followed by an additional six months at 30 percent. Sweden provides a parenting leave of 15 months that can be taken by either parent and replaces 90 percent of earnings up to a specified maximum. Those are nations that truly honor family life.

Standing alone, the United States relies instead upon a patchwork of a few state laws plus the good will of employers. Some of our biggest companies do indeed meet high standards in their leave policies, including Merck, Aetna, IBM, Johnson & Johnson and Corning. Like many other companies, Aetna has found that its program actually saves money by reducing turnover among its employees. But most companies are much less generous, especially for employees in low-wage jobs, the very people whose families need the greatest support. As many as 60 percent of American women, according to Hewlett, still have no leave benefits or job protection when they give birth.

A bipartisan majority in Congress has twice passed a parental and medical leave bill that would provide a minimum floor for American workers. A pale shadow of what most nations offer, this bill would provide a mere 12 weeks of unpaid leave and would be restricted to companies with 50 or more employees. Yet President Bush has already vetoed it once and threatens to do so again. He is right to see political motives in congressional Democrats' sending it to him again just before the election. But he is wrong to think that his own last-minute proposal—providing tax credits to companies that voluntarily provide leave—is enough. What the country needs, as Republican Rep. Marge Roukema of New Jersey says, is to enact both bills into law. The Bush idea is a good complement but a lame substitute.

The disintegration of families and the impoverishment of our children are now among the most urgent challenges facing us as a people. We won't fully solve them by enacting minimum standards for parental and medical leave, but we will make important progress. And we will become a more decent, humane society.

AMBASSADOR MAXWELL RABB  
INTERNATIONAL SCHOLARSHIP  
PROGRAM ESTABLISHED AT THE  
CATHOLIC UNIVERSITY OF  
AMERICA

HON. FRANK J. GUARINI

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 8, 1992

Mr. GUARINI. Mr. Speaker, on September 17, I had the distinct pleasure of participating in a dinner held in Washington to announce the establishment of the Maxwell D. Rabb International Scholarship Program at the Catholic University of America. The scholarship honors an extraordinary public servant who served with special distinction as the United States Ambassador to Italy from 1981-89—longer than any American Ambassador to Italy.

The Maxwell Rabb International Scholarship Program has been established through the Italian-American Center at the Catholic University of America. It seeks to foster appreciation

of Italian heritage and encourage cooperation between Italy and the United States through academic, cultural, and professional exchange. Scholarships and stipends will be offered to undergraduate and graduate students from Italy, and selected developing nations who wish to study in the United States at Catholic University. They will also be offered to Catholic University students who wish to study in Italy.

A number of prominent individuals from both Italy and the United States participated in the Rabb scholarship dinner. One of the cochairs of the dinner was former Italian Prime Minister Giulio Andreotti, who has been referred to as the most enduring political statesman from Italy in the 20th century. The other cochair was Ambassador Walter H. Annenberg, who served our Nation with special effectiveness as the Ambassador to the Court of St. James.

A number of my distinguished colleagues were in attendance. From the Senate: MAX BAUCUS, PATRICK LEAHY, ALFONSE D'AMATO, ALAN SIMPSON, JOSEPH LIEBERMAN, DENNIS DECONCINI and ROBERT PACKWOOD. From the House, I was joined by my colleague from New Jersey—MATTHEW RINALDO. The administration was represented by Energy Secretary Adm. James Watkins and the Director of the Federal Bureau of Investigation, Judge William Sessions.

Also in attendance was the former House majority whip Tony Coelho, Italy's Ambassador to the United States, Boris Biancheri, and the former United States Ambassador to the United Nations, John Scali. Catholic University was represented by Cardinal Bernard Law of Boston, the chairman of the board of trustees; Catholic University's new president, Brother Patrick Ellis, F.S.C.; executive vice president Sister Rosemary Donley; academic vice president Monsignor John Wippel; and secretary Vincent Walter. The Italian American Center was represented by the president of the board of directors, Mr. Alexander Giacco; the vice president, Rev. Stephen Almagno; and the secretary, Rev. Monsignor William Kerr. In addition, Mario Castellani, a member of the center's board of directors, came from Italy. Leadership from the Italian-American community was represented by the chairman and the vice chairman of the National Italian-American Foundation—Frank D. Stella and Arthur J. Gajarsa, respectively—and Peter Zuzolo, national president of the order Sons of Italy in America.

Former Prime Minister Andreotti called the Rabb Scholarship Program a true bridge between the United States and Italy. Mr. Andreotti said that politics and diplomacy aren't enough to solve the world's problems. "We also need culture and religion. And there's no better place to promote culture than universities."

Cardinal Law said the Rabb scholarship is intended to do what Ambassador Rabb did so well: "Overcoming boundaries and improving the world."

I am very pleased that the outstanding contributions of my good friend, Ambassador Max Rabb, were recognized in such a substantive fashion. During this extraordinary career, Max Rabb has held many governmental posts. In 1953, he was named by President Eisenhower to the newly created post of Secretary of the

Cabinet in the White House, a position he held until 1958. In 1959-60, he was chairman of the U.S. Delegation to UNESCO in Paris. He was a member of the conciliation panel at the World Bank's international center for the settlement of investment disputes, and was later a representative of the center. He was also appointed to the Presidential panel for relief assistance for India, Pakistan and Bangladesh.

Max Rabb was administrative assistant to U.S. Senator Henry Cabot Lodge from 1937 to 1943. He served in a similar post to Senator Sinclair Weeks in 1944. He also served in the Navy during World War II, and became legal and legislative counsel to the Secretary of the Navy, James Forrestal.

Ambassador Rabb has been awarded the Grand Cross of the Order of Merit of the Republic of Italy and the Grand Cross of the Order of Merit of the Knights of Malta in Rome. For his remarkable efforts in fostering Italian-American ties, he was awarded the Catholic University of America's President's Medal in 1988.

Max Rabb was honored on this night for his most distinguished tenure as our Ambassador to Italy. He was Ambassador during a very challenging period in American-Italian relations. As Ambassador, Max Rabb was an advocate for closer partnerships between Italy and the United States in business, education and culture. Because of his leadership, these relations were strengthened. Under this scholarship program, a Rabb scholar will now be able to make his or her contributions to the expansion of the partnership between our two nations.

I have watched with great interest the development of the Italian-American Center at Catholic University. It is a natural new complement to the university, both because of Catholic University's longstanding connection with Italian-Americans, and because of the university's rich research and faculty resources. Part of the university's impressive collection includes a rare books collection from Pope Clement IX's family library. Furthermore, faculty experts specialize in the studies of Dante, Galileo, Italian immigration, art, politics, architecture, and music.

The center, located in our Nation's Capital, will fill an important void with its dedication to the appreciation, study and advancement of Italian-American heritage and culture. The center will also ensure a more visible presence for the people of Italy.

The center's combination of academic, research, cultural and international programs will make it a focal point in future American-Italian relations.

I would also like to pay tribute to the center's executive director, Bob Blancato, who has worked diligently to move the center to the point where it is today.

There was great excitement that night for Ambassador Rabb, his wife Ruth, and their family. Max is a man of unusual distinction. The Rabb scholarship is a fitting way to honor him. For the scholars who will benefit from the program, the future shines brightly.

Finally, Mr. Speaker, this center's development and its importance to the Italian-American community and to Italy will be of special importance to me in the coming years. In my

new role as president of the National Italian-American Foundation, I look forward to the center's efforts to advance Italian-American heritage and culture. I also look forward to its efforts to bring about a deeper appreciation of the contributions of Italy to the United States. We are indeed fortunate to have the Italian-American Center at Catholic University.

I would like to submit for the RECORD a letter from Vice President QUAYLE, along with an article from the New York Times of September 17, 1992, that concern Ambassador Rabb and the wonderful evening that we spent together.

THE VICE PRESIDENT,

Washington, DC, September 17, 1992.

Brother PATRICK ELLIS, F.S.C.,  
President, The Catholic University of America,  
Washington, DC.

DEAR BROTHER PATRICK: I wish I could be with you this evening to honor Max Rabb, who has so richly honored his country in a lifetime of achievement and service. We can set aside all the titles and awards for the names that mean most to him: citizen and patriot.

It's no great secret that he's also a Republican, but we won't interject partisan matters here.

His name befits the University's new International Scholarship Program, for it represents both pride in our own country and respect for the cultures and traditions of others. Max has stood both for strong beliefs and for the humane tolerance that persuades others to his convictions.

I join him in thanking all those who have made possible the International Scholarship Program. In particular, I join other friends of the University in saluting President Giulio Andreotti and Ambassador Walter Annenberg for their support for the Italian-American Center at the University. Their generous vision will directly benefit young scholars from the United States and Italy and, through them, will advance the traditional friendship and understanding between our nations.

Finally, let me take this occasion to formally welcome you, Brother Patrick, to the Washington community of which the University is so vital a part. Its tradition of learning grounded in faith, of scholarship rooted in religious commitment, is needed more than ever at a time when we see the consequences of divorcing education from ethics and confusing information with wisdom. You can be proud that the University has stood apart from academic fads to assert, in the words of Robert Frost, the truths we keep coming back and back to.

Once again, my respectful compliments to Max, my thanks to those who have made possible this occasion, and my best wishes for your presidency and for the future of CUA.

Sincerely,

DAN QUAYLE.

[From the New York Times, Sept. 17, 1992]

Maxwell M. Rabb, the former United States Ambassador to Italy, ought to be bipartisan and international. Among those expected at the "Italy America Partnership Dinner" in the Four Seasons Hotel are the Speaker of the House, Thomas S. Foley, the Washington Democrat; Senator Larry Pressler, Republican of South Dakota; Secretary of Energy James D. Watkins; Giulio Andreotti, the former prime minister of Italy, and Bernard Cardinal Law, the Archbishop of Boston.

At the dinner, the establishment of the Maxwell Rabb International Scholarship

Program at the Catholic University of America in Washington will be announced. The scholarships will be part of the school's new Italian-American Center. Funds will be provided for students from Italy to attend Catholic University and for American students to attend school in Italy. Ambassador Rabb, who served in Italy from 1981 through 1989, was instrumental in the establishment of the center.

"This has great significance, not only for me but for the very special relationship that already exists today and we hope will continue between the United States, Italy and the Vatican," Ambassador Rabb said yesterday "I am a former president of Temple Emanu-El in New York, so this is an indication of good will along both religious and political lines."

HONORING RIVERDALE TEMPLE

HON. ELIOT L. ENGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 8, 1992

Mr. ENGEL. Mr. Speaker, it is with great pleasure that I acknowledge today the 45th anniversary of Riverdale Temple, the largest reform temple in the Bronx, with a membership of more than 700 families.

Since 1947, Riverdale Temple has been an active and vital force in the community. Through food drives and interfaith workshops, the temple has reached out to all the people and worked to improve the quality of life in its immediate neighborhood. The temple has also been a leader in the Jewish community, as the home of the largest reform religious-Hebrew school in the Bronx and through its charity events to aid Russian Jews.

Under the leadership of Rabbi Stephen D. Franklin and the board of trustees, headed by President Carolyn L. Baron, Riverdale Temple continues to carry on its rich tradition. I thank all the people who have carved out the history of Riverdale Temple and wish them "mazel tov" in the days and years ahead.

A TRIBUTE TO THE GERMANTOWN SETTLEMENT

HON. LUCIEN E. BLACKWELL

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 8, 1992

Mr. BLACKWELL. Mr. Speaker, I rise today to join the celebration of the Germantown Settlement, which has been a force for change in Philadelphia for the past 108 years. Since 1884, when 18 women joined together to build a nursery and kindergarten for the residents of Germantown, the Germantown Settlement has been committed to providing educational, medical, and housing services throughout the city.

In the first decades of the 20th century, the kindergarten and nursery expanded to provide emergency medical services to the Germantown community. Later, as the Great Depression left many homeless and without food, the settlement began to cater to the basic needs of the residents of the Germantown area,

making certain that poor families had places to stay, providing clothing to the impoverished, and feeding hungry children. By 1960, the settlement had developed into a full-fledged human services center, sponsoring programs ranging from community self-help economic initiatives to housing developments and educational endeavors.

Mr. Speaker, the Germantown Settlement is a not-for-profit organization whose members are motivated, not by greed, but by community pride, loyalty, and selfless concern for humanity. The organization has also been dedicated to the inclusion of all Philadelphians.

Since World War II, when many men were called away to serve their country, women have played a vital role in the Germantown Settlement, and for the past 45 years, the organization has sought staff and volunteers from diverse ethnic and racial backgrounds. Mr. Speaker, the city of Philadelphia owes a great debt of gratitude to the Germantown Settlement for its tireless efforts to develop its own community. It has become a model for similar programs that are spread around the Nation. I invite my colleagues to join me in honoring a group of people who have added significantly to our city, the Germantown Settlement.

NEW JERSEY ALLIANCE FOR ACTION'S 18TH ANNUAL EAGLE AWARDS

HON. FRANK PALLONE, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 8, 1992

Mr. PALLONE. Mr. Speaker, on Tuesday, October 20, 1992, the New Jersey Alliance for Action, Inc., will present its 18th Annual Eagle Awards dinner in a ceremony at the Hyatt Regency in New Brunswick, NJ.

Mr. Speaker, the coveted Eagle Awards are presented annually to recognize outstanding service to the people of the State of New Jersey in improving the quality of life and economic health.

This year's Commerce and Industry Award will go to the Thomas H. Kean State Aquarium in Camden, NJ, as an exciting and state-of-the-art new educational and recreational attraction for both New Jersey residents and visitors from out of state. The award will be accepted by Mr. Robert F. Mulcahy III, president and CEO of the New Jersey Sports and Exposition Authority, the agency which spearheaded construction.

The Government Award will be presented to the Honorable Sharpe James, mayor of the city of Newark, for his leadership in the revitalization of New Jersey's largest city.

The Alliance for Action Committee Award will be presented to Mr. Stephen Kukan, general manager for Area Development of Public Service Electric & Gas Co., for his service as chairman of the Alliance's annual Construction Forecast Seminars, which have become the most eagerly awaited and media-covered barometers of public and private activity in the construction industry.

Finally, the AFA Chairman's Award goes to a distinguished member of this body, the Hon-

orable ROBERT A. ROE, Representative from New Jersey and chairman of the Public Works and Transportation Committee. Chairman ROE, who is currently the dean of our New Jersey delegation, has decided to retire after more than two decades of exemplary service to his country and State.

Mr. Speaker, I join with the New Jersey Alliance for Action in saluting all of these outstanding individuals and institutions for their well-deserved awards, and take great pride in sharing their accomplishments with the Members of this House.

TRIBUTE TO MARTY GAUDIOSE AND GREG CVETKOVIC

HON. JAMES A. TRAFICANT, JR.

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 8, 1992

Mr. TRAFICANT. Mr. Speaker, I stand here today to honor two gentleman who have generously donated their time and effort so that others may enjoy life a little more. I am proud to be speaking of the 1992 YWCA Men of the Year: Marty Gaudiose and Greg Cvetkovic.

Messrs. Gaudiose and Cvetkovic are co-founders of the Children's Circle of Friends. The Circle, comprised of mental health facilities in Mahoning Valley, raises money for worthy programs involving mentally disabled children.

But the Circle is only the beginning of the gentlemen's involvement in their community. Their service, support and charity have been outstanding.

Mr. Gaudiose is the CEO of Mahoning County Chemical Dependency Programs, Inc., and has served as president of the Association of Ohio Substance Abuse Programs. He is a member of the Ohio Dependency Credentiality Board and has been selected to Oxford's Who's Who. Furthermore, Mr. Gaudiose has chosen to share the wisdom gleaned from his experiences. He is a part-time instructor at Youngstown State University.

Mr. Cvetkovic is the CEO of D&E Youth and Family Resource Center. In addition, he is a member of the family preservation council and the Youngtown Transitional School Board. He has served as president of the Mahoning County Administration Association as well as the county's chapter of the American Cancer Society.

Mr. Speaker, I salute these two fine gentleman for their selfless dedication to our community. Thank you for your tireless service, Marty and Greg, I am proud to call you my constituents.

CABLE TELEVISION

HON. WILLIS D. GRADISON, JR.

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 8, 1992

Mr. GRADISON. Mr. Speaker, the decision of Congress to enact legislation to reregulate the cable television industry, despite objections of the President, reflects the depth of

feeling on the issue among consumers across the country. Escalating rates and poor service from cable companies have been an obvious and consistent cry from subscribers. The legislation drafted to address these problems was complex, with broad implications. As is often the case, the legislation contained provisions which I strongly supported and others which I would have preferred to omit. It has been a tough issue on which to vote and, in fact, one on which my votes have changed as the legislation itself has evolved and changed.

Although I opposed the regulatory provisions of the bill contained in H.R. 4850 when it was first debated in the House, I voted for the bill on the floor because of the introduction of procompetitive provisions. S. 12, which was produced in conference with the Senate, contained a major new provision, retransmission consent. This provision would require local cable companies to negotiate with local broadcasters for the right to carry the broadcaster's signal, now carried without consent or compensation, for a fee or other consideration. At the time of the vote on the conference report, claims that such compensation could reach \$1 billion a year and would be passed on directly to consumers tipped my support away from S. 12 and was the major factor in my decision to vote against the conference agreement.

Since that vote, I have looked again at the provision in the light of meetings I have had with broadcasters, cable companies, and other people in my district. I now believe it isn't really clear how much money, if any, subscribers will have to pay for retransmission consent. Many broadcasters have not decided whether they will even opt for such negotiations. They may just demand that the cable companies carry their signal—which the bill allows them to do. And there are now strong indications that, despite the best negotiating skills of the broadcasters, they might not get much. Prominent cable company owners have vowed not to pay a cent for the signals. If the broadcasters decide to take their marbles and go home, they risk losing their exposure to the large viewer markets to which cable gives them access. Finally, any increase in rates for consumers would only come in an industry where, hopefully, competition will be flourishing and there would be pressure to maintain, if not lower, subscription costs. It is hard to imagine escalating rates at such a time.

In the end, I voted for the legislation, despite my concerns with its regulatory provisions which have been highlighted by the President. Like his administration, I believe the best way to ensure the development of a robust industry is through strong and fair competition which delivers the best value for money and service for its customers. In the absence of an alternative, however, I believe that this bill will provide valuable experience as this industry continues to evolve. In my view, this entire effort will prove, in time, to be a prelude to a far more complex and hard-fought debate which will focus on the provision of video programming and a host of other services brought to the home by emerging technologies in the cable, satellite, telephone, computer, and other industries.

#### LONG BEACH IAMA PAYS TRIBUTE TO BARRY KAMM

### HON. FRANK PALLONE, JR.

OF NEW JERSEY  
IN THE HOUSE OF REPRESENTATIVES

Thursday, October 8, 1992

Mr. PALLONE. Mr. Speaker, on Saturday, October 17, 1992, the Italian American Memorial Association [IAMA] Banquet Hall in Long Branch, NJ, will be the site for a tribute to Mr. R. Barry Kamm.

Mr. Speaker, Barry Kamm is a life-long resident of Long Branch who has devoted countless hours—indeed years—to the betterment of our city. After graduating from Long Branch High School, Mr. Kamm started in the newspaper business some 50 years ago with the Daily Record as a rewrite man, sports writer and editor, and photographer. He also worked for such papers as the New Brunswick, NJ, Home News, the Jersey Journal of Jersey City, and was a special correspondent for the New York Times. In the early 1960's, he accepted a job in Long Branch to promote the city with photos and writing, a position he has held for some 30 years.

For the past 10 years, Mr. Kamm has written his own column, "Kamm's Corner," in Long Branch's own weekly newspaper, The Atlanticville. The column is eagerly awaited by Long Branch readers each week. Mr. Kamm has called it "the most fun I've had in the newspaper business. I get to write about everybody, and the little things, the stuff the bigger papers" are not interested in.

Barry Kamm is a member of many organizations, including the Long Branch Masons, the Green and White Association, the Harpoon and Needle Club, B'nai B'rith of Long Branch, the Long Branch Volunteer Fire Department, the Long Branch and Elberon First Aid Squads, the New Jersey Sports Writers and Press Photo Associations, the New York and National Press Photo Associations, and the Association of Aerial Photographers. He is also a charter member of the Long Branch High School Hall of Fame Committee, and was appointed by former New Jersey Governor Minor to the State Committee on Subliminal Advertising. He was the Long Branch civil defense director during the atom bomb scare days, and was instrumental in raising money and organizing on behalf of the Long Branch High School football program.

Mr. Speaker, I can think of no one else in Long Branch, the city that I call home, who is more deserving of this special honor than Mr. Barry Kamm, a man whose loyalty, devotion, and enthusiasm for our town is second to none.

H.R. 5730

### HON. HENRY A. WAXMAN

OF CALIFORNIA  
IN THE HOUSE OF REPRESENTATIVES

Thursday, October 8, 1992

Mr. WAXMAN. Mr. Speaker, for the second time today, we have a chance to take an important step forward ending the most serious environmental problem facing children—childhood lead poisoning.

Earlier today, the House passed the housing bill, H.R. 5334, which contains vital provisions to reduce lead exposures in residential housing. Now we have before us a second bipartisan bill, H.R. 5730, which contains provisions to reduce lead exposure from other sources, including schools, drinking water, and food.

We can't take actions to eliminate lead threats in schools and day care facilities without first inspecting for lead hazards. The bill contains a program worked out between the Energy and Commerce and the Education and Labor Committees to promote and then require these inspections.

We can't get lead out of our drinking water without new programs to reduce lead in faucets, solder, and coolers. The bill requires these actions.

We can't lower lead in the food supply without addressing packaging and ceramic ware. The bill tackles these problems for the first time.

Finally, the legislation has an extremely important provision to address new uses of lead. This program was developed over many arduous months by Chairman SWIFT and his staff.

A question has arisen regarding regulation of food. The committee does not intend to impose regulation by EPA on those products, such as foodstuffs and alcoholic beverages, which are regulated by the Food and Drug Administration or the Bureau of Alcohol, Tobacco, and Firearms. These products are exempted from new title V of the Toxic Substances Control Act.

I want to commend the efforts of my colleagues. On the Democratic side, Chairman DINGELL, Mr. SWIFT, Mr. SIKORSKI, and Mr. TOWNS showed tremendous leadership throughout consideration of H.R. 5730. On the Republican side, Mr. LENT and Mr. RITTER worked cooperatively with us to develop legislation that reduces lead risks without excessive impacts on industry.

I also want to thank members of the Education and Labor Committee, with which the Energy and Commerce Committee shares jurisdiction over the day care and school provisions in the bill. I am particularly glad that the two committees could resolve their differences in time to permit floor consideration this year.

This is sound and needed legislation that has bipartisan support. I urge its adoption.

#### TRIBUTE TO CORDELL HULL MARTIN

### HON. CARROLL HUBBARD, JR.

OF KENTUCKY  
IN THE HOUSE OF REPRESENTATIVES

Thursday, October 8, 1992

Mr. HUBBARD. Mr. Speaker, I take this opportunity to pay tribute to my longtime friend, Cordell Hull Martin, a well-known and admired eastern Kentucky attorney, who died on April 8, 1992, at the University of Kentucky Medical Center in Lexington, KY.

Cordell Martin, of Hindman, KY, attended grammar school, high school, and college on the campus of Alice Lloyd College, Pippa Passes, KY. Upon completion of his undergraduate studies at Morehead State University, he became a teacher, coach, and principal in Hindman, KY, and Preston, GA.

He served his country during World War II in the U.S. Air Force and returned to his native Knott County, KY, to practice law after attending the University of Kentucky Law School.

Cordell Martin was a deacon of Ivis Bible Church in Hindman, KY, and a Gideon, as well as being actively involved on the boards of several Christian organizations such as Open Door Children's Home in Hazard, KY, Calvary College in Letcher, KY, and Cumberland Mountain Mission in Martin, KY.

I was among the 400 friends and admirers of Cordell Martin who attended his funeral on April 11 at Campbell Arts Center on the campus of Alice Lloyd College.

My wife Carol visited with the Martin family on April 10 at Ivis Bible Church.

Cordell Martin is survived by his lovely wife of almost 50 years, Mattie E. Martin; two daughters, Gwen Taylor, who is serving as a missionary in Brazil, District Judge Karen M. "Kay" Doyle of Hindman, and two sons, Graham Martin of Salyersville, KY, and Kerwyn Martin of Knoxville, TN. Survivors also include 10 grandchildren—Jeff, Karen, Karis, and Anita Taylor of Brazil; Meredith, Megan, Melinda, and Matthew Doyle of Hindman; and Erin and Todd Martin of New Albany, IN. Two brothers Champ Martin of Atlanta, GA, and Quenton Martin of Kite, KY, also survive.

My wife Carol and I extend to the family of Cordell Martin our sympathy.

HONORING THE ITALIAN CIVIC ASSOCIATION

HON. ELIOT L. ENGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 8, 1992

Mr. ENGEL. Mr. Speaker, during this 500th anniversary of the historic voyage of Christopher Columbus, it is fitting that the Italian Civic Association in Mount Vernon is celebrating its 75th anniversary. This organization embodies the American traditions of community and discovery that began five centuries ago and continues to this day.

The members of the Italian Civic Association keep alive the spirit of their forefathers while also contributing to today's society. It is this kind of involvement that keeps our communities viable, and I commend the members of the Italian Civic Association for 75 years of such activity.

I also extend my congratulations to President Ralph Tedesco and his entire members, and wish them many more years of success.

A TRIBUTE TO BISHOP TREVOR D. BENTLEY

HON. MERVYN M. DYMALLY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 8, 1992

Mr. DYMALLY. Mr. Speaker, I rise today in tribute to my good friend, Bishop Trevor D. Bentley, who was recently consecrated as missionary bishop of the Old Holy Catholic

Church, an ancient part of the Catholic Church, its origin in North Africa.

Bishop Bentley's title will be presiding prelate for the African-American community of the United States of America, all of the Caribbean Islands, and part of the continent of Africa. This joyful celebration took place on July 4, 1992, at the Cathedral Church of Santo Cristo in Murgeira, Portugal. Bishops from Germany, Portugal, Brazil, and Canada assisted, with Archbishop Rainer Laufess the chief consecrator. Thousands of the Portuguese faithful witnessed this consecration, it being televised nationally.

Bishop Bentley is the first African-American to be so consecrated, so it is appropriate at this time to highlight his many achievements and to extend special public recognition and commendations to him for his spiritual and civic leadership.

Educationally, Dr. Bentley graduated from Los Angeles City College with an associate of arts degree in business administration, from the University of Southern California with a bachelor of science degree in public administration, from New Brunswick Theological Seminary in New Jersey with a master of theological studies degree, and from International Seminary in Plymouth, FL, with a doctor of theology degree; he has continued his studies by completing additional courses at a variety of educational institutions.

Ordained into the Holy Orders of Deacon and Priest in the Episcopal Church of the Diocese of New York in 1967, he was also ordained to the gospel ministry at Second Baptist Church in Los Angeles in 1978.

Ecclesiastical experiences of Dr. Bentley include sub-dean and professor of theology and church history at the Providence Theological Seminary in Los Angeles, curate at St. Andrew's Episcopal Church in New York, curate at St. James Episcopal Church in Baltimore, MD, assistant to the pastor of Second Baptist Church in Los Angeles, and assistant pastor of St. Paul's Baptist Church in Montclair, NJ. He also has distinguished himself through his secular experiences as founder and president of Bentoe Enterprises Ltd., a public affairs firm, as an affiliate with the Mentem Elevas Foundation, a foundation to assist minority youth in higher education, as a teacher and adviser at Essex Community College in Newark, NJ, and as a counselor and program administrator at Compton Community College.

The many coveted awards and commendations which he has received throughout the years attest to Dr. Bentley's exemplary record of religious and community leadership. In addition, his civic commitment is attested by his affiliation with the Interdenominational Ministerial Alliance of Los Angeles, the Baptist Ministers Conference, the Baptist Ministers Fellowship, the Black-Jewish Coalition, the Clergy Mediation Council, and the National Association of Advancement for Colored People.

Mr. Speaker, for all the above achievements and others too numerous to mention, I ask my colleagues to join me in applauding Dr. Trevor Bentley.

TRIBUTE TO MARSHA FADER

HON. JAMES A. TRAFICANT, JR.

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 8, 1992

Mr. TRAFICANT. Mr. Speaker, I rise today to recognize a woman from my 17th Congressional District who has been teaching preschoolers for over 25 years. That woman is Marsha Fader.

Mr. Speaker, Marsha Fader has an interesting idea for teaching preschoolers. She actually treats them like people with respect using positive influence. I think that what Marsha does is simply wonderful. She has a great understanding of children and how they learn.

For 25 years, Marsh Fader has been teaching preschool classes at the Jewish Community Center in Youngstown, OH, where she is the director of early childhood activities including preschool classes, summer camp, enrichment, and day care programs. Marsha is also involved in the National Association for the Education of the Young Child, and among the 450 members of its local affiliate group. Through her programs, Marsha teaches using patience, understanding, and tolerance.

Mr. Speaker later this month at the Jewish Community Center in Youngstown, Marsha will be honored for her quarter century of being an early childhood advocate. Congratulations, Marsha Fader, keep up the good work.

SUPPORT AFFORDABLE HOUSING

HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 8, 1992

Mr. MAZZOLI. Mr. Speaker, I am pleased to lend my full support for the conference report on H.R. 5334, the Housing and Community Development Act of 1992.

The bill before us represents many hours of work by the gentleman from Texas, Mr. GONZALEZ, and his colleagues on the House Committee on Banking, Finance and Urban Affairs. H.R. 5334 demonstrates their strong commitment to addressing the very important issue of affordable housing.

The conference report reauthorizes several programs that are critical to the continued efforts on behalf of affordable housing, that are underway in my community in Louisville and Jefferson County, Ky. Those housing programs and the amounts authorized for fiscal year 1993 in H.R. 5334 include: \$2 billion for the HOME Investment Partnership Program; \$15 billion and \$2.2 billion respectively for subsidized housing and public housing; \$4 billion for the Community Development Block Grant Program; and, \$987 million for McKinney Homeless Assistance Act programs.

Mr. Speaker, a lack of affordable housing is a major economic problem facing the city of Louisville, Jefferson County, and all urban areas. The city of Louisville Department of Housing and Urban Development, the city's Department of Community Services, the Jefferson County Department of Community Development, the County's Department for

Human Services, the Housing Authority of Louisville, the Housing Authority of Jefferson County, and many social service and housing organizations in Louisville and Jefferson County are laboring tirelessly in this area.

The Housing and Community Development Act of 1992 supports these efforts, and I urge my colleagues to vote for the bill.

TRIBUTE TO REPRESENTATIVES  
ROE, DWYER, AND RINALDO

HON. FRANK J. GUARINI

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 8, 1992

Mr. GUARINI. Mr. Speaker, I rise to pay a special tribute to my good friends and distinguished colleagues from New Jersey—ROBERT ROE, BERNARD DWYER, and MATTHEW RINALDO. They have all served our State—and their districts—with great distinction, and I have been privileged to know them and work with them.

BOB ROE is the dean of our delegation, and has been a Member of the House since 1969. I consider him one of the most hard-working Members to serve in the House. Even before joining this distinguished body, he was already using his talents to help the people of our State. He served in the Governor's cabinet as commissioner of conservation and economic development—a department that later became New Jersey's Environmental Protection Agency. No doubt this role prepared BOB well for the chairmanship of the Public Works and Transportation Committee. BOB was elected to this important position in 1991, and used his authority to pass major pieces of legislation—such as the Intermodal Surface Transportation Efficiency Act of 1991.

Before taking the chairmanship of Public Works, BOB was chairman of the House Science, Space, and Technology Committee. His chairmanships were an indication of the trust and respect BOB has earned in his 24 years in Congress. While BOB's leadership will be greatly missed here in the House, it is the people of New Jersey who will miss his advocacy on their behalf. And I will miss his counsel and friendship. He is a great credit to our State.

BARNEY DWYER has always been a man of quiet achievement. While he has never been one to boast of his accomplishments, he certainly has many to be proud of. Like BOB ROE, he devoted himself to a life of public service long before coming to Congress. Because of his extensive State service, BARNEY was placed on the prestigious Appropriations Committee when he first came to the House of Representatives. He quietly set about helping the people of New Jersey through the appropriation process. New Jersey benefited greatly because he was there. BARNEY was also assigned to the Budget Committee, where I had the good fortune to serve with him. I witnessed firsthand his efforts to get the deficits under control and to cut spending. I will miss his achievements for them and his strong representation. I am very proud of my association with BARNEY as he has given balance and substance to our delegation.

MATTY RINALDO will be remembered for his honesty and fairness. It gives me great pride to have him as my friend. I cannot think of a single Democrat who is glad to see him leave the House of Representatives. He always did what he thought was right—and never succumbed to partisan bickering. MATTY and I have had a long association that goes back to the New Jersey State Senate. We shared a closeness then and our friendship has grown over the years. He is the ranking Member on both the Select Committee on Aging and the Energy and Commerce Subcommittee on Telecommunications and Finance. MATTY has been widely recognized for his outstanding service to his constituents, to our State, as well as to our country. His accomplishments and representation of our State will be very hard to duplicate. MATTY is greatly admired on both sides of the aisle and I share in that admiration of this outstanding public servant.

New Jersey is losing some of its best Representatives. Their combined experience will be hard to match. I feel fortunate to come from the same State as BOB, BARNEY, and MATTY. And I feel fortunate that I can call them my friends. It will be a long time before my State of New Jersey will be as well represented as it is by these Members.

IN RESPONSE TO ALLEGATIONS  
MADE AGAINST GOVERNOR CLINTON

HON. JAMES P. MORAN, JR.

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 8, 1992

Mr. MORAN. Mr. Speaker, in the 2 years that I have been privileged to serve in the U.S. House of Representatives, I have heard many outrageous allegations and many spurious claims. But never have I heard anything so outrageous, so scandalous, and so disrespectful as the diatribe I have heard during the special orders over the weekend.

Is Bill Clinton a Communist plant? Is he a Manchurian candidate trained by the KGB to infiltrate our political system first as a law professor in a major southern university, then as a candidate for Congress, then as an attorney general in Arkansas? Under this great plan hatched in the Kremlin and carried out in the streets of Arkansas, was the KGB plant then supposed to run for Governor, greatly improve the lives of his State's residents, and become recognized as one of the best Governors in the Nation? Would the Governor/KGB plant then run for President, win difficult primaries, capture his party's nomination and win on November 3?

Then what? What evils will the KGB plant inflict on the United States? Will he destroy our economic base, ship hundreds of thousands of manufacturing jobs overseas? Will he use the Agency for International Development to encourage American companies to relocate to foreign countries? Will he run up our national debt by more than \$3.5 trillion and push Federal deficits of more than \$300 billion per year? Will he destroy the foundations of our constitutional Government by refusing to work with the legislative branch and vetoing 36 bills in 4 years?

He would be too late. This has already been done by his predecessor, a former CIA Director and cold warrior.

The fact is that President Bill Clinton will change our country but not in the ways feared by the John Birch Society and the gentleman from California. Rather than opening California to an invasion by what remains of the Red Army, President Clinton will open the doors of hospitals across this country to the 35 million Americans who do not have health care. Rather than crippling America's economy and leading a proletariat revolution here in the United States, President Clinton will rebuild America and reinvest in our physical and human infrastructure. He will invest in our communities and establish a network of community development banks and enterprise zones. Rather than lead a revolution in our cities, President Clinton will work to make our streets safer by signing the Brady bill into law and by putting 100,000 new police officers on our streets. President Clinton will protect American families by signing the Family and Medical Leave Act into law, by cracking down on deadbeat parents, by expanding the earned income tax credit for dependent children. Finally, President Clinton will leave behind the politics of fear, exclusion, and division that are tearing our country apart.

When I heard the special orders of the weekend, I was reminded of a great folk anthem sung by Bob Dylan in the early 1960's. It was the "Talking John Birch Society Paranoid Blues." In this song, the protagonist looks up and down and all around and everywhere he looks he sees a Communist. The song was tongue in cheek and witty. Unfortunately, the special orders were not. They were vindictive, unsubstantiated, and far below the standards of comity and professionalism we in the House of Representatives should represent. We should be ashamed of the weird rantings of some of our colleagues.

TRIBUTE TO REV. RUFUS C.  
GOODMAN

HON. FRANK PALLONE, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 8, 1992

Mr. PALLONE. Mr. Speaker, on Friday, October 23, 1992, the Rev. Rufus C. Goodman will be honored on the occasion of his 30th anniversary as the leader of the Mount Carmel Congregation of Neptune, NJ. This historic milestone will be marked with a banquet at Mike Doolan's Restaurant in Spring Lake Heights, NJ.

Mr. Speaker, Reverend Goodman has exemplified, over his 30 years at Mount Carmel, all of the very finest attributes of Christian service and devoted leadership. He has faithfully ministered to the needs of his congregation and the surrounding communities, and has been an inspiration to people of all ages and all faiths. Reverend Goodman has always maintained that God has been his strength. His unique gift has been to turn his inner strength outward, to bring the force of his faith to enrich the spiritual life of others.

Thus, it is out of a deep sense of gratitude, thanksgiving, and appreciation for these 30

years, the congregation of Mt. Carmel has organized this banquet in honor of Reverend Goodman.

On this special occasion, I am proud to be able to add my voice to the chorus of praise, thanks, and good will being paid to Reverend Goodman, a wonderful man, a great spiritual leader, and a positive force for the betterment of our community.

TRIBUTE TO LTC(P) MICHAEL B. SMITH

HON. CHRISTOPHER H. SMITH

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 8, 1992

Mr. SMITH of New Jersey. Mr. Speaker, I rise this afternoon to pay tribute to my oldest brother, LTC(P) Michael B. Smith—we just call him Mick—on the occasion of his assuming command of the Aviation Brigade, 50th Armored Division, New Jersey Army National Guard.

A rare Sunday afternoon session of the House this week precluded me from joining family and friends at a ceremony in Ewing, NJ, officially effectuating the change of command.

Mr. Speaker, by all accounts my brother Mick is an excellent helicopter pilot—he flies Cobras, Hueys, and Loachs. Over the years he has served as an instructor pilot, got his fixed-wing rating and is an outstanding military officer. He is a master Army aviator, has flown over 4,200 accident-free hours and has received the Meritorious Service Medal, Army Commendation Medal, Army Achievement Medal, and numerous service medals and ribbons.

Mick, a graduate of Command and General Staff College, Fort Leavenworth, has served in numerous command positions, including commander of a tank unit, commander of an air cavalry unit, commander of an attack helicopter battalion, and now as commander of the Aviation Brigade.

Mick's wife Joan, his three kids, our parents and the entire family are so very proud of him.

Those of us who know him best, know that Mick is as tough as they come yet always fair. These uncommon and noble character traits were very much in evidence in Mick even from his earliest years as a kid.

My other older brother Tom—he flew fighter jets off the carrier *Enterprise* and is now a B-757 airline captain—always knew Mick as the kind of guy who stood his ground, spoke up for what he believed to be right, even if it meant standing alone. He's got backbone that just doesn't quit. To be sure, his moral courage and character left an indelible, positive impression on me.

Of course, Mick had two wonderfully dedicated and loving parents—Bern and Kay Smith—who taught the three of us more by example than by words, although we got the words too. They are especially proud of Mick.

A former varsity debater, Mick is gifted with a quick wit and logical mind. He gets respect the old fashioned way—he earns it.

I always looked up to Mick and have fond memories, especially in high school, of teachers and students saying, "Oh, you're Mickey

Smith's little brother." I was so proud, it meant instant acceptance, it meant I was OK and it was always a compliment.

Looking back, Mick was ever the leader, Tom and I always, in a very real sense, following in his footsteps.

For example, Mick attained the rank of Eagle in the Boy Scouts, Tom and I soon followed him to achieve that goal.

Mick had a large newspaper route—Tom and I inherited it from him.

Mick was a superb athlete, was competitive almost to a fault, and excelled in practically every sport—and taught me everything I know about soccer and wrestling, although I always trashed him in ping-pong. Tom and I followed and remain to this day highly competitive. There was always some kind of championship going on in the Smith house.

At Newark State College—now called Kean College—Mick was captain of both the varsity soccer team and varsity tennis team—a compelling statement of his athletic ability and the esteem in which he was held by his teammates.

Mick got his BA from Newark State College and his master's degree from Jersey City State. He has taught history, special ed, coached soccer, and served first as a vice-principal at an elementary school, then as principal at a special education high school in Woodbridge Township.

Having high confidence in Mick's judgment of an applicant's character and officer potential, each year, before I make nominations to the military academies, I have tapped Mick to serve as a member of my unpaid nominating committee.

They say the apple doesn't fall far from the tree. Mick's eldest son, David, is currently in Army basic training; Alison is a freshman at Cornell, hoping to become a veterinarian; while Ryan is a sophomore at Hopewell Valley High School.

Mr. Speaker, my family and I love Mick and see in him an example of what is right and honorable and true in our Nation's military.

HONORING TEMPLE JUDEA

HON. ELIOT L. ENGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 8, 1992

Mr. ENGEL. Mr. Speaker, it is with great pleasure that I acknowledge today the 40th anniversary of Temple Judea, a spiritual, social, and communal center located in the Pelham Parkway community.

For four decades, Temple Judea has been a leading member of the Union of American Hebrew Congress, the reform wing of Judaism. The rich traditions of the Jewish faith have been kept alive by its members, who have also contributed greatly to the communities in which they live.

I commend Rabbi Donald Milrod and the honorees at Temple Judea's anniversary luncheon for giving so much of their time and energy to benefit their neighbors and friends. Their faith is a shining example to us all.

PASSAGE OF CANCER REGISTRY LEGISLATION

HON. CONSTANCE A. MORELLA

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 8, 1992

Mrs. MORELLA. Mr. Speaker, I am pleased that Congress has approved S. 3312, legislation introduced by my colleagues from Vermont, Congressman SANDERS and Senator LEAHY; I am an original cosponsor of the bill. It will establish a critically needed national system of statewide cancer registries and will launch a study of breast cancer in the States with the highest breast cancer mortality rates.

Maryland leads the Nation in cancer mortality, and ranks ninth in breast cancer mortality rates. At the same time, the top 10 States with the highest age-adjusted breast cancer mortality rates lie within the north and mid-Atlantic regions. If we are to wage an effective campaign against cancer, it is critical that we establish a national system of statewide cancer registries. Many of our States lack statewide cancer registries and the State with registries are often incomplete and lacking in the resources necessary to adequately track the incidence, stage, and treatment of cancer. A complete and uniform system would allow health professionals to effectively target and evaluate cancer prevention and control efforts.

A national system of registries would also allow us to move forward with a study of the higher incidence of breast cancer in certain States. We must understand the factors behind this phenomenon in order to reverse this tragedy and prevent future cancer deaths across the country.

TRIBUTE TO ANTHONY C. JULIAN

HON. JAMES A. TRAFICANT, JR.

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 8, 1992

Mr. TRAFICANT. Mr. Speaker, I proudly rise to pay tribute to Mr. Anthony C. Julian, the pioneer of consumer rights in my district. I stand here today to honor and commend his tireless efforts on behalf of the common man.

Mr. Julian's watchdog tendencies have spanned an entire career. He began by monitoring the accuracy and reliability of parking meters as a weightmaster for the city of Youngstown. Within 6 years he was promoted to director of consumer affairs and has served in that capacity since 1970.

Mr. Julian's accomplishments in the position are as numerous as they are noteworthy. He believed an educated consumer was a consumer less vulnerable to fraud and deceit. In response, he created the Consumer Education Information Library as well as numerous programs for television, radio, senior citizens, civic groups, and a host of others. He also created a volunteer consumer protection council. This council conducts surveys and consumer education workshops to keep the consumer alert. Mr. Julian is also responsible for the production and distribution of thousands of consumer education brochures.

Rest assured, Mr. Speaker, that these outstanding efforts have not gone unnoticed. His laurels, garnered on both a State and national level, speak for themselves: the Ohio Consumers Council Public Official Consumer of the Year, the National Bureau of Standards Certificate of Accomplishment, and the Ideal Citizen Award from the Administrator of Natural Law and Order. In addition, Mr. Speaker, his skills and wisdom have been doggedly pursued. He has been appointed to a number of prestigious councils, including the American Council on Consumer Interests and the Youngstown State University General Economics Advisory Council. He has also been elected president of the Youngstown Board of Education, which he has served on since 1979.

Today Mr. Julian devotes much of his time to our community, filling such roles as coach, supporter, leader, and gentleman. Thank you for caring enough to make a difference Mr. Julian. I am proud to have you in my district.

FRANK GUARINI

HON. DEAN A. GALLO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 8, 1992

Mr. GALLO. Mr. Speaker, I want to join with my colleagues to recognize the significant accomplishments of the gentleman from New Jersey's 14th Congressional District, FRANK GUARINI.

FRANK came to Congress in 1979, after more than a decade of service in local and State governments.

He gained an appointment to the powerful House Ways and Means Committee and has participated in some of the most important congressional debates of the 1980's.

He has been a major booster of what I call New Jersey pride and has waged an ongoing battle for the city and State of New York over New Jersey's claims on Ellis Island and other related issues.

There are many areas of FRANK's career of service that deserve recognition, but there is one particular series of events that I recall as a prime example of his continuous efforts on behalf of the people of New Jersey and the Nation as a whole.

During the planning stages for the 100th anniversary celebration for the Statue of Liberty, I was appalled to learn that new immigrants being sworn in on Ellis Island as a symbolic reminder of our immigrant heritage would all be from New York, and not from all parts of the country, as we had been promised.

This was to be a national celebration, but we were told that Federal law prevented us from inviting anyone outside of the district court's jurisdiction. We would need an act of Congress to make an exception in this case.

I talked the matter over with FRANK, who had been waging a battle with New York over jurisdiction of the island, and he suggested that we take the matter to our colleague, the chairman of the House Judiciary Committee, Peter Rodino.

Working together in a bipartisan fashion, the three of us got the legislation through Con-

gress and signed by President Reagan in less than 60 days.

As a result, the Ellis Island ceremonies were truly a national event, with new citizens from all parts of the country participating.

This is just one small example of the can-do spirit that FRANK GUARINI has brought to his career in public service. As a member of the Ways and Means Committee, FRANK has worked tirelessly on many of the most complex pieces of legislation in Congress, dealing with tax policy.

Yet, he also has a strong sense of the needs of his constituents and of the importance placed on issues of importance to New Jersey and the Nation.

Mr. Speaker, I, therefore, join with my colleagues in recognizing FRANK GUARINI's many accomplishments and wish him all the best in his future endeavors.

IN RECOGNITION OF GARY  
LYTTON AND ROOKERY BAY

HON. PORTER J. GOSS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 8, 1992

Mr. GOSS. Mr. Speaker, today I salute a true conservationist whose work in southwest Florida has earned national recognition. Gary Lytton, the manager of the Rookery Bay National Estuarine Research Reserve in Collier County, FL, was recently honored by the National Oceanic and Atmospheric Administration [NOAA] for excellence in estuarine reserve management. It is an honor that is certainly well deserved.

Rookery Bay is a true treasure. One of only 19 national estuarine research reserves, Rookery Bay is home to a rich diversity of outdoor life and it provides a wonderful learning and recreational experience for children, adults, sports enthusiasts, and scientists alike. It currently comprise 8,400 acres of open water, mangrove wetlands and uplands, offering a unique and undisturbed setting for wildlife and humanity to interact.

Gary Lytton's work to bring Rookery Bay up to national preeminence has been ongoing since he first came to the reserve in 1986 as an education coordinator. Through the years he expanded his responsibilities and became the driving force behind transforming the reserve from a relatively inactive site to one of the Nation's premier research and educational reserves. The education program at the reserve now serves more than 11,000 people a year; the reserve provides a training ground for State and local officials to learn about mangrove management; and it has secured more than \$1.5 million in grants for its programs. NOAA's recognition of these efforts underscores the tremendous gains that have been made at Rookery Bay.

A local newspaper in the area noted in a recent editorial that NOAA's reports on Rookery Bay weren't always so glowing. But clearly Gary Lytton and his hard-working team have turned things around. As the paper said, "The award has brought honor to our entire area." In southwest Florida we know just how special Rookery Bay is. We are proud of Gary Lytton

for his work in letting the Nation in on our good fortune.

ERIC MUNOZ, M.D., M.B.A., F.A.C.S.,  
NATIONAL PUERTO RICAN COALITION  
1992 LIFE ACHIEVEMENT  
AWARDEE

HON. DONALD M. PAYNE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 8, 1992

Mr. PAYNE of New Jersey. Mr. Speaker, I would like to bring to the attention of my colleagues an award that will be presented to one of the outstanding rising stars of New Jersey. Eric Munoz, M.D., will receive a 1992 Life Achievement Award from the National Puerto Rican Coalition.

Dr. Eric Munoz is medical director of the University of Medicine and Dentistry of New Jersey [UMDNJ] University Hospital, associate dean of clinical affairs, New Jersey Medical School, and an attending surgeon at University Hospital, Newark, NJ. Dr. Munoz was born in the Bronx, NY and grew up in a working class environment in central New Jersey. He received his undergraduate degree from the University of Virginia, his medical degree from the Albert Einstein College of Medicine and earned a master's degree in business administration from Columbia University. His clinical specialty is surgery; he was trained at Yale University, with a particular interest in trauma. Dr. Munoz has previously held academic appointments at the Yale University School of Medicine, New York Medical College and the State University of New York [SUNY], Stony Brook.

Dr. Munoz is a senior medical administrator, and is known for his expertise in health care administration, policy, financing and delivery. He has worked at a number of urban New York City teaching hospitals, and was head of research in the department of surgery at the Long Island Jewish Medical Center, a major teaching hospital in New York. He served as a commissioner on the Federal Prospective Payment Assessment Commission [ProPAC], from 1987 to 1990, which advises the U.S. Congress and Secretary of Health on Medicare health policy and payment. He has been appointed by the Governor of New Jersey to be chairman of the newly created Medical Practitioner Review Panel in New Jersey, which oversees 17,000 physicians.

Dr. Munoz is very involved in broadening health professions and educational opportunities for Hispanics and other minorities. He is a member of ASPIRA of America and serves on its national advisory panel of health career education, and on the board of directors of the National Puerto Rican Coalition, as well as a number of community activities, such as the Cub Scouts of America, board of directors of the United Way of Essex and West Hudson, and the Rotary Club of America. He is a member of the executive committee of the Newark Fighting Back, an organization established to reduce demand for illicit drugs and alcohol.

Mr. Speaker, I am sure my colleagues will want to join me as I extend my hearty congratulations and best wishes to a true community leader and member, Dr. Eric Munoz.

TRIBUTE TO BEN JONES

**HON. THOMAS J. DOWNEY**

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 8, 1992

Mr. DOWNEY. Mr. Speaker, during these final hours of the 102d Congress, I wanted to take the opportunity to pay tribute to my good friend and esteemed colleague BEN JONES. For the past 4 years, BEN ably served the people of Georgia's Fourth Congressional District. Sadly, BEN will not be returning to the House of Representatives next year and this place and all of us will be diminished by his absence.

President John F. Kennedy, in his book "Profiles in Courage," wrote:

For without belittling the courage with which men have died, we should not forget those acts of courage with which men \* \* \* have lived \* \* \* A man does what he must—in spite of personal consequences, in spite of obstacles and dangers and pressures—and that is the basis of all human morality.

These words aptly describe the congressional career of BEN JONES and I have no doubt that if President Kennedy were writing his book today, he would take note of BEN's unflinching political courage. In his willingness to do the right thing regardless of the political consequences, BEN JONES is truly a profile in courage.

BEN demonstrated this courage again and again. During the furor over flag burning, he recognized that beyond the emotion of the moment, there were larger constitutional issues at stake. The politically expedient course was to remain silent. But BEN stood on the House floor and urged his colleagues to stand firm against the efforts to weaken our civil liberties. When hysterical voices attempted to destroy the National Endowment for the Arts, BEN led the charge to safeguard the NEA and to preserve the principle of artistic freedom.

It is with a sense of loss and sadness that I say goodbye to BEN JONES. But BEN will continue to serve as an inspiration for us all and his voice will continue to echo in this Chamber.

THE 25TH ANNIVERSARY OF THE LEGAL SERVICES OF THE WESTERN CAROLINAS

**HON. ELIZABETH J. PATTERSON**

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 8, 1992

Mrs. PATTERSON. Mr. Speaker, I rise today to recognize the Legal Services Agency of the Western Carolinas on the occasion of their 25th anniversary. The Legal Services Agency of the Western Carolinas was founded under the premise of carrying out the concepts of our Constitution, which guarantees equal access to justice to all citizens. In the last 25 years, this agency has helped provide access to legal services to more than 60,000 needy residents in the upstate of South Carolina.

The success of Legal Services of the Western Carolinas can be traced to several

sources, but mainly to a great staff and committed volunteers. The caseload handled by this agency could stagger much larger private law firms. But we find that the volunteers and staff—wearing the hats of lawyer, social worker, teacher, and planner—make it because they have learned to treat people as individuals, instead of as cases.

Mr. Speaker, I want to express our deep appreciation and sincere congratulations to the Legal Services Agency of the Western Carolinas, its directors, staff, and volunteers on the occasion of their silver anniversary. Thanks for a job well done.

A TRIBUTE TO RANDOLPH B. YUNKER

**HON. NORMAN F. LENT**

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 8, 1992

Mr. LENT. Mr. Speaker, for the past 22 years, I have been privileged to have been served by a number of outstanding individuals on my personal staff. I want to take this opportunity to pay tribute to a fine young man who has not only given unselfishly of his time to me, but to the residents of my district as well.

For almost 6 years, Randy Yunker has served as my executive assistant in my Baldwin District Office. In that capacity, Randy has undertaken a number of responsibilities that have increased my effectiveness in helping my constituents. Randy has dealt on a daily basis with the residents I represent, helping to address the problems they have with the Federal Government or its agencies. In addition, Randy served as my personal representative with a number of important organizations on Long Island, always acting with the highest degree of professionalism and enjoying my complete trust.

I will always appreciate Randy's dedication, commitment, and loyalty. At a time when so often we focus on those who break our laws, it is only fitting that we pay tribute to those who work to make our society better. Randy Yunker has done just that, and I know that in the years to come, he will continue to serve his community and his country with the same level of integrity and dignity that he has shown me.

CONGRATULATIONS TO PASTOR MICHAEL TOBY

**HON. CHET EDWARDS**

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 8, 1992

Mr. EDWARDS of Texas. Mr. Speaker, I rise today to give special tribute to Pastor Michael Toby of the First Baptist Church in Woodway, TX, which I am privileged to represent. Pastor Toby will be celebrating his 15th anniversary as pastor on Sunday, October 25, 1992.

Pastor Toby has a distinguished list of accomplishments. After he graduated from Sam Houston State University, Pastor Toby at-

tended New Orleans Baptist Theological Seminary until 1969. In 1972 he began his education in the seminary at Southwestern Baptist Theological Seminary. He now is pastor at the First Baptist Church of Woodway where his accomplishments include over 1,000 baptisms, growth in membership from 1,050 to over 3,600. The First Baptist Church's Sunday School average attendance went from 292 to over 1,600, and he has sponsored 8 mission points in Waco, TX.

Pastor Toby has also distinguished himself in his civic service to our community. He has been a former president to the Hewitt/Woodway Rotary Club and is a member of the board of directors to Goodwill Industries, Woodway YMCA, and the Special Wish Foundation. He is a fine example of someone who is devoted to serving his community.

I extend my sincere appreciation and congratulations for his dedication to excellence and his capability of guiding his church and our community to an even brighter future. I also take note of his wife Jackie and two children, Joshua and Scott, who have also contributed to his community efforts.

I urge my colleagues to join me today in recognizing and honoring this man and his contribution to the central Texas community.

YESTERDAY'S MILITARY HEROES OUGHT NOT BE TODAY'S HOMELESS

**HON. CHARLES B. RANGEL**

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 8, 1992

Mr. RANGEL. Mr. Speaker, I rise to call to the attention of my colleagues one of our Nation's greatest failings: the plight of our homeless veterans.

As many as 250,000 men, one of every three of the single homeless men sleeping on the streets or in shelters on any given night, are veterans of the Armed Forces. An estimated 40 to 60 percent of them served during the Vietnam war. It is truly a tragedy that in our great country, many of yesterday's heroes—going back as far as World War I—are today's homeless.

These men, indeed some women veterans as well, were the subject of concern during this year's Veterans Braintrust Forum, an event which I sponsored for the fifth year this September during the 22d Annual Congressional Black Caucus Legislative Weekend.

Several panels of witnesses presented the hard facts and figures of veterans' homelessness. Federal, State, and local officials described various government programs for homeless veterans. Most inspiring were the comments from the veterans themselves, some of whom are now running programs that are benefiting hundreds of their less fortunate former brothers-in-arms.

I wish to recognize the following individuals who took the time to travel to Washington to participate in the Veterans Forum and to testify before our guests on the dais who included Veterans Braintrust executive board members and officials of the Department of Veterans Affairs:

Ms. Joan Alker, assistant director, National Coalition for the Homeless, Washington, DC; Mr. Al Peck, director, Salvation Army Borden Avenue Veterans Residence, New York City; Mr. Gerald Saunders, V-Cops/Borden Avenue Veterans Residence; Mr. Maceo May, cochairman, Swords to Plowshares, San Francisco; Mr. Arthur Barnham, Upward Bound Vets, Atlanta; Ms. Barbara Sabol, commissioner, Human Resources Administration, New York City; Adm. Benjamin P. Hacker, director, Department of Veterans Affairs, State of California; Mr. Erwin Pernick, counsel to the Secretary, U.S. Department of Veterans Affairs; Ms. Robin Higgins, Assistant Secretary, Veterans Affairs, U.S. Department of Labor, and Mr. Matt Johnston, Deputy Director, Office for Special Needs Assistance Programs, U.S. Department of Housing and Urban Development.

Joining me on the dais were: Mr. Ronald Ray, Assistant Secretary, Human Resources and Administration, Department of Veterans Affairs and head of the newly created Office of Minority Veterans Affairs and Mr. Gerald Hinch, Deputy Assistant Secretary, EEO, Department of Veterans Affairs.

From the executive board of the Veterans Braintrust: Mr. Ron Armstead and Mr. Ralph Cooper of Boston, Ms. Arlene Williams of Los Angeles, Mr. Mike Handy of New York City, Mr. Wayne Smith of Washington, Mr. Tom Wynn of Milwaukee, and Mr. Harold Bryant of East St. Louis, Mr. Arthur Wright of Seattle, Washington, Mr. Erwin Parsons of Cherrypoint MD, Representative Clarence Davis, Baltimore, Eric Glaude of New York.

Mr. Speaker, for the edification of my colleagues, I am entering the following statements, which were first presented at the Veterans Braintrust Forum on Homeless Veterans on September 25, 1992.

STATEMENT OF IRWIN PERNICK, COUNSELOR TO THE SECRETARY, AIDING AMERICA'S HOMELESS VETERANS

Mr. Chairman, I appreciate the opportunity to address this distinguished Forum on the compelling subject to homelessness among veterans. This is an issue about which Secretary Derwinski is deeply and personally concerned, and on which the Department of Veterans Affairs is committed to taking aggressive, remedial action.

As the homeless became increasingly visible in the late 1980's, VA initiated several programs to assist homeless veterans, families and survivors directly. In 1987, Congress lent major support to VA's efforts by passing legislation to launch two VA programs dedicated exclusively to the treatment and rehabilitation of homeless veterans: The HCMI Veterans Programs and the DCHV Program. Although the original authorities for these VA programs are found in earlier laws, the McKinney Act Amendments of 1988 recognized and authorized funding for both.

Each year, VA's HCMI staff locate and provide initial clinical assessments for approximately 10,000 homeless veterans. Since the beginning of the program in May 1987, more than 8,000 veterans have been referred to 200 community-based residential treatment facilities and received over 9,000 episodes of care. The ongoing national evaluation of the HCMI program, which was an integral part of the program's original design, indicate that the average age of homeless veterans seen in the program is 43, with an average income for the month prior to assessment of only \$207. Almost all of the homeless veterans ad-

mitted into the HCMI Program (97%) have a psychiatric diagnosis, including substances abuse. More than 40 percent have serious medical problems. Twenty-one percent have been homeless for 2 or more years.

In an effort to widen and integrate the services offered to homeless chronically mentally ill veterans, pilot initiatives have been approved and funded at certain HCMI sites:

VA medical centers in Dallas, Texas, and Brooklyn, New York, have been designated and funded as Comprehensive Homeless Centers for veterans. These projects are designed to coordinate a full spectrum of services for homeless veterans. Emphasis is placed on providing homeless veterans with a comprehensive array of VA and non-VA services that offer long term, lasting solutions to homelessness.

The VA medical centers in New York City, Louisville, and San Francisco, among others, have established special store-front drop-in centers for homeless chronically mentally ill veterans.

The VA medical center in New Orleans has established a special sobriety maintenance program for veterans involved in the HCMI program.

VA medical center in Houston has initiated special outreach and case management services for program veterans with AIDs or testing HIV positive.

Project TORCH provides primary health care, psycho-social assessment, and treatment as well as vocational, educational and other support services. This program serves as the point of entry to the DCHV program and other VA health care programs for homeless veterans who have traditionally been reluctant to use VA services. Other DCHV sites have comparable store-front "drop-in" centers.

Staff in Veterans Benefits Administration (VBA) Regional Offices regularly visit shelters and other places where the homeless congregate in an effort to reach out personally to homeless veterans, determine their eligibility for benefits, and help them apply for and receive them.

VA has several programs and initiatives to assist homeless veterans in addition to those identified to prevent individuals from becoming homeless.

The Home Loan Improvement Act: This Act allows VA to sell, at a discount, foreclosed properties to non-profit organizations and government agencies that will use them to shelter or house homeless veterans.

Public Law 99-570: The statute eliminated the requirement for a VA beneficiary to have a permanent, fixed address in order to receive a benefit payment check.

Expedited Claims: VBA working with VHA and the National Personnel Records Center, has established a system for expediting benefits claims for homeless persons—especially when physical examinations and medical records are required.

VA Outreach Priority: VBA continues to identify services to homeless veterans as one of its three outreach program priorities (active military pending separation, homeless and the elderly.)

VA Working Group on Homelessness: The WGH was established in 1987 and continues to be very active in assessing the needs of homeless veterans and their families and coordinating VA policy concerning the homeless. The WGH is also the sponsor of the Homeless Comprehensive Service Centers located in Dallas, Texas, and Brooklyn, New York.

Jobs for Homeless Veterans Initiative: This program links VA, Department of Labor

and the Social Security Administration in a ten-city model program in which veterans' organizations will sponsor homeless persons and help them use resources for their rehabilitation with job placement as their goal.

The Department of Veterans Affairs has established national initiatives and continues in its effort to both improve the access of homeless veterans to existing VA benefits and services, and to provide them with additional direct health care services.

Although VA offers no comprehensive solution to the housing, economic and health care problems faced by homeless veterans across the nation, it has provided a rich array of effective services to many thousands of veterans.

The intensity and diversity of the services VA provides is delivered to homeless veterans through the aggressiveness of the Department's outreach efforts and, above all else, in the commitment and caring demonstrated each day by the VA professional staff.

PRESENTATION BY ROBIN L. HIGGINS, ACTING ASSISTANT SECRETARY FOR VETERANS' EMPLOYMENT AND TRAINING

#### INTRODUCTION

I am pleased to be here today as the Acting Assistant Secretary for Veterans' Employment and Training;

Veterans' Employment and Training Service administers several programs to assist veterans take their rightful place in the work force; one specifically serves homeless veterans;

The program exclusively earmarked for these veterans is the Homeless Veterans Reintegration Project or HVRP, since 1988 funded by Stewart B. McKinney funds; and Grants are competitively awarded.

This program operates currently in 12 of the largest U.S. cities.

#### WHAT DOES THE PROGRAM DO?

Outreach workers who are formerly homeless veterans themselves go out to where the homeless are found to inform them of the program.

Since a profile of the average veteran in the program reveals that the homeless veteran is equally likely to be black or white, many of these outreach workers are minorities and relate to the clients out of their common experience.

Linkages are formed—in fact, required—with other agencies such as the Department of Veterans Affairs and Social Service providers for identification, medical attention, and other basic needs before and during the veterans' re-entry into the job market.

Grantees provide the veterans in the program with a wide-range of employment services such as assessment, resume preparation, training, and referral to jobs.

#### WHAT HAVE WE ACCOMPLISHED?

For the first 3 years of operation we have: made 36,222 outreach contacts, enrolled 17,396 homeless veterans, placed 6,933 in gainful employment, and, remarkably, the cost per placement has been under \$1,000 each year (which is not expensive considering the support services these veteran participants need).

#### PROFILE OF THE AVERAGE HOMELESS VETERAN IN HVRP

Based upon information collected by an independent evaluator the average participant in the program is: a 38 year old male, equally likely to be black or white, a non-combatant Army veteran of the Vietnam era with a high school education.

HVRP has served approximately 48% black veterans according to an independent evaluator, even though black veterans (age 38 years) comprise only 8% of the general veterans population according to the census bureau.

I'm not sure why this is, except that generally programs are located in larger cities where there is a larger concentration of minorities and poor. There is also a cluster of younger (average age 28) peacetime veterans in some of the sites.

#### OUR OTHER FINDINGS ABOUT HOMELESS VETERANS:

##### This Information Is Self-Reported

High proportion of alcohol (45%) and drug abuse (33%), or both (23%).

Post traumatic stress disorder was reported by 18% of the participants.

Most frequent reasons cited for being homeless were lack of income and substance abuse.

More educated than the average homeless person with 87% with at least a high school diploma.

Most had been on the street for about a year.

Fifteen percent were disabled.

#### VII. CONCLUDING COMMENTS

Let me switch gears in concluding in two ways: One of our other very successful programs is TAP—the Transition Assistance Program—where we actually go onto bases and give transition training to servicemembers up to 180 days before they get out of the military.

Early intervention is key to preventing the problems that unemployment can cause.

Once the stress of long-term unemployment begins—substance abuse, disease, hopelessness and other problems which can lead to homelessness are harder to correct. If we do it right now, we hope to avoid exacerbating this problem in the future.

#### STATEMENT BY BARBARA J. SABOL, ADMINISTRATOR/COMMISSIONER, HUMAN RESOURCES ADMINISTRATION, NEW YORK CITY, NY

Good afternoon, colleagues, friends, and honored guests. I am honored to have been invited by my Congressman, the Honorable Charles Rangel, of Harlem, to speak before this distinguished group and discuss a number of initiatives my agency has in place to serve homeless Veterans in New York City. I bring you greetings from a former marine who now serves in another capacity, the distinguished Mayor of the city of New York, my boss, the Honorable David N. Dinkins.

As you know, homelessness is one of our country's most tragic, complicated and perplexing public policy and social service problems. Homelessness is the result of a myriad of underlying root causes, including poverty, racism, and discrimination, neglect in the home; abuse of various kinds; failure of the school system; the health and mental health support systems, not enough affordable housing; and economy in which there are no jobs or jobs that pay substandard wages; aids, and drug and alcohol abuse—all contributing factors to homelessness.

These factors manifest themselves in despair, isolation, rejection, denial, anger, low self-esteem, surrender and a host of other harmful behaviors. Some clients are able to handle their homelessness better than others, yet for all there are unanswered questions regarding uncertain futures.

For many, homelessness forces a focus upon survival for the moment—from hour to hour, from day to day. Daily survival usually takes place in the only "home" the homeless know—city streets or a city shelter.

We have made a commitment at HRA that our shelter programs must improve so that emergency relief, which provides immediate respite from life on the streets, can become a viable part of a continuum of service delivery. To build upon and improve existing shelters so that they are cleaner, safer, and run by staff who are better trained to be able to address the needs of the homeless veteran, our Taylor initiative for homeless veterans is a part of that commitment.

Ever present among New York City's homeless has been the veteran. Although much has been written on the subject of vets who have become homeless, most veterans have heretofore been part of a greatly underserved population, who are not only combat veterans, but also are those who have not been in active combat.

What are the reasons for homelessness, for some is that an institutional lifestyle that is missing, and the inability to cope with a society without structure to dictate daily activity for others, such as the combat and combat era veterans who suffer from post traumatic stress disorder, the problems are understandably much more complex. Still others present causes exactly the same as non-veteran homeless programs.

Much like the nonveteran, the veteran's struggle with homelessness has been characterized by a lack of resources to address those needs. Above all, the need of veterans to be recognized as a separate service population has traditionally been overlooked. At HRA, we have recognized the value of helping veterans within an environment of peers, and have, with the Taylor initiative, begun to address veterans' needs within a formal service delivery framework.

As of August 1992, the New York City shelter system houses 1,085 male veterans. Of this number, 817 have honorable discharges. They have served in Vietnam, Korea, World War II, and even a few in World War I. Approximately 2% of all men across the country living in homeless shelters are veterans.

HRA has responded to the unique needs of this key service population through with the unprecedented collaboration of Federal, State, and local veteran entities, HRA developed an initiative entitled "the Taylor Plan: a continuum of care for homeless veterans in the NYC Shelter System."

The Department of Labor also assists with certifying eligible veterans for targeted job tax credits which gives tax incentives to employers, and provides linkages to the federal bonding program which bonds ex-offenders.

While I will not go into extensive detail at this forum, other components of the Taylor plan include services for elderly veterans at the Camp Laguardia Shelter; a substance abuse and mental health program at the Franklin Avenue Shelter; a comprehensive care program for HIV-ill and medically frail veterans; and a veterans center for women at the Kingsbridge Armory Shelter.

Last, but not least of the Taylor initiative includes, in Congressman Rangel's district, on 119th Street in East Harlem, city funding has provided for rehabilitation and construction of a single room occupancy facility for veterans which will be run by non-profit groups, with appendant support services.

What we are demonstrating with the Taylor initiative is that we recognize the homeless veteran as a viable part of our community who needs and deserves our commitment and targeted services. We believe that the Taylor plan is tangible evidence of HRA's commitment, and one which we hope will be replicated in other parts of the country.

#### STATEMENT BY BENJAMIN T. HACKER, DIRECTOR, CALIFORNIA DEPARTMENT OF VETERANS AFFAIRS

In California it is estimated that there are 250,000 homeless, and of this total, 100,000 are veterans, 80,000 of whom served in Vietnam.

It is of interest to note that nationally the number of homeless veterans today is greater than the number of U.S. servicemen who died during the Vietnam war.

Today I want to talk about one of the most effective initiatives in the country yet engaged to confront the Homeless issue. In San Diego, California in 1988.

The Vietnam Veterans of San Diego, under the leadership of the Executive Director Robert Van Keuren and therapist John Nachison, created "Stand Down", a 3-day period of respite for homeless veterans.

Project Stand Down is a well-planned, highly organized, 3-day encampment for homeless veterans, providing them both a reprieve from the streets and a real opportunity to focus on putting their lives back in order. "Stand Down" is a military term, and refers to the relocation of combat troops from a hostile environment to a place that is safe and secure for rest and recovery.

What happens at Stand Down is nothing short of phenomenal, in providing for homeless veterans, male and female—and families, the amenities and comforts of a normal life which most Americans take for granted.

Typical sites for Stand Down include parks and fairgrounds, and school grounds, and for 3-days at no charge, veterans and their families are provided a wide assortment of services, to include: showers, haircuts, and new clothing and personal items, on-site issuance of personal ID cards, medical and dental care in a field hospital provided by the U.S. Dept. of Veterans Affairs, on-site court hearings to deal with outstanding misdemeanors and low grade felonies, so veterans can clear their records, free legal representation and assistance for criminal and civil legal problems, alcohol, drug and mental health counseling, job counseling by representatives of the California Department of Employment Development and other agencies, referrals and personal contact with a wide range of community social service agencies, food and temporary housing, access to a continuing follow-up program.

Stand Down is only three days in length, but those three days can be of unparalleled impact in helping a veteran to bridge the gap between self-empowerment and homelessness. The ID card is critical in reestablishing an identity and reaffirming for the Vet once again that "He is Somebody."

The on-site opportunity to have outstanding legal warrants and tickets conclusively handled, in a manner that the Vet can, not only afford, but which also leaves him with his dignity intact, is a watershed event in the lives of most of the stand down participants.

The key to this process is the handling of outstanding misdemeanors through an "alternative sentencing" program. Instead of fines or jail terms, the Vet is assigned to a period of community service, which may be at the "Stand Down" site or at a local community agency, such as the Salvation Army. The relief that the veteran feels is no longer having to "look over his shoulder", but now being able to walk with pride in the knowledge that he is no longer the subject of an outstanding police warrant, is for many, a feeling that few can adequately describe.

A statistical review of some of the more significant findings from the Stand Down experience include the following general obser-

vations: though blacks represent 8 percent of the 27 million veterans in the Nation, they approximate 50 percent of those homeless veterans participating in California Stand Down programs. Included among a number of programs targeted to homeless veterans sponsored by the U.S. Dept. of Veterans Affairs, is the Domiciliary Care for Homeless Veterans Program. Thirty-eight percent of the homeless Vets participating in this program are black.

To continue with the statistical review, the average age of the Stand Down participant is 42, further confirming the fact that 82 percent of those participants reporting combat service, are from the Vietnam war era, approximately 65 percent of the Stand Down participants have an educational background that is at or less than high school. Thirty-five percent have had education beyond high school, 72 percent of the veterans had been without employment for more than 3 months, and 60 percent had been without permanent shelter for more than 3 months.

With regard to the demand for the available services provided at the Stand Down site, once again the service most frequently requested was legal. Of interest is the observation that based on the experience in California to date, black homeless are arrested or ticketed by local police at a rate far higher than that of their white counterparts.

Following legal services, the next highest demand was for dental services at 49 percent; substance abuse counseling and treatment, 37 percent; vision treatment, 30 percent; followed by emotional, podiatry, and other medical treatment in that order.

The Stand Down statistics in California reinforce those of the U.S. Department of Veterans Affairs, which show that nationally 98 percent of homeless veterans are single males; almost 80 percent suffer from alcohol dependency, half from drug dependency, and more than a third suffer from mental illness. Approximately 50 percent satisfactorily complete treatment programs.

Against the odds, San Diego's Stand Down has happened every year since 1988, and today is the largest volunteer event to help homeless veterans in the U.S. It has been replicated in Long Beach, San Francisco, and Sacramento, as well as in Denver, Colorado, and Portland, Oregon.

The success of this effort can be attributed to a number of factors, not the least of which is the strong single-minded persistence of the sponsoring private non-profit agency. In every locale in which a Stand Down Program has been attempted, there has been an outpouring of support from both government and private offices and organizations—to include VA regional offices; VA medical centers; county veterans service officers; and veteran organizations such as the Disabled American Veterans; Veterans of Foreign Wars; and the American Legion.

STATEMENT BY MACEO A. MAY, HOUSING DEVELOPMENT AND PROGRAM DIRECTOR, SWORDS TO PLOWSHARES

Mr. Chairman and members of the Committee, on behalf of the Congressional Black Caucus, Swords to Plowshares and veterans, I want to thank you for the opportunity to share some insights about a program we operate in San Francisco which has enjoyed some success in breaking the cycle of homelessness amongst veterans, and re-integrating those veterans back into the mainstream of our society. I also want to share with you some concerns and recommendations, particularly in the areas of housing and rehabilitation of black, Hispanic and other ethnic minority veterans.

WHAT IS THE PROGRAM?

The Transitional Housing Program is a four- to six-month, community-based, therapeutic, residential environment which focuses on the continuing social rehabilitation and reintegration of homeless veterans into the community and society. The program is designed to accommodate 20 homeless veterans with chronic psychological and emotional problems (oftentimes, coupled with substance abuse/addiction disorder) who demonstrate the potential to achieve and maintain functional independence and self sufficiency in the community.

WHAT DOES IT DO?

The program provides the residential stability so necessary to make anything else happen. In conjunction, it provides an extensive program of support services and in-depth therapy on site, and in conjunction with an array of community and DVA resources. Some of the more significant components of services and activities are:

Comprehensive health and medical services, primarily through cooperation and partnership with the DVA Medical Center, but also utilizing community resources where necessary.

Intensive individual and group counseling to help clients manage their condition, and re-develop important components of their lives that are necessary to facilitate self sufficiency and support.

An intense focus on substance addiction and relapse prevention.

Literacy and pre-vocational work to prepare vets for employment. This component also includes job placement.

Development of interim and long term housing after program completion.

While these are some of the more significant areas, a host of other services and activities are utilized to "prepare the veteran" for re-integration.

WHAT MAKES IT UNIQUE COMPARED TO OTHER RESIDENTIAL PROGRAMS?

The program is veteran specific—veterans are the only population served. Because of its specificity, it is the only community based program positioned to address Post Traumatic war stress and adjustments disorder conditions unique to veterans.

The program is able to bring to bear the considerable and comprehensive resources of the main organization, which enhances its ability to enable the veteran to dramatically increase his/her chances of success in and out of the program. Examples:

LEGAL

Our legal component is able to assist veterans with discharge upgrades, agent orange as well as other benefit claims/appeals, (particularly, before the Court of Veterans Appeals), and provide legal advice/referrals for family, tax, employment and landlord problems.

EMPLOYMENT

Through several employment contracts with the Dept of Labor, the State and Private Industry councils, the employment component is able to offer literacy development, testing, classroom training and job placement. The employment component has existed since 1976 and has an enviable track record in achievement of performance goals and effectiveness.

HUMAN SERVICES

Our human services component provides emergency needs services, as well as substance abuse, and emotional counseling—particularly in the areas of PTSD and adjustment disorders. This service provides an

effective and viable means of aftercare and support for veterans completing our program. It also maintains a computer link with housing services within the community which enhances our ability to help veterans find housing after discharge.

The linkage and rapport we have established with the Dept of Veterans Affairs' local Health Care for Homeless Veterans component exemplifies the kind of partnership we feel is necessary to comprehensively address the needs of veterans.

STATEMENT BY MR. ARTHUR BARHAM, VETERANS UPWARD BOUND PROGRAM, ATLANTA

In 1971, the Southeastern Regional Office, National Scholarship and Service Fund for Negro Students, (SERO-NSSFNS, Inc.) developed an Adult Basic Education program, for returning Vietnam Veterans that had not graduated from high school. The program uses a holistic concept of preparing non high school graduates for a Post Secondary Education.

In 1988, the ancillary extension services developed and offered by the VUB program was developed into a formal project, funded by the U.S. Department of Labor through a grant to the City of Atlanta under the 1987 Stewart B. McKinney Homeless Assistance Act. The SERO-NSSFNS program known locally as "Atlanta Vet Reentry Project (AVRP)" is operated under a contract with the City of Atlanta. AVRP began operating in 1989 and has since served more than 1000 unemployed veterans. The project focuses on helping many disadvantaged veterans re-integrate back into the mainstream of society by securing permanent employment. The foundation of the project's operation are empowering the disadvantaged veterans grasp opportunities and master goal setting techniques for long-term success.

To further enhance the original VUB concept to serve veterans whether educationally and/or economically disadvantaged, the staff of VUB, developed and implemented a plan to provide low cost housing to veterans. "Harris House (HH)", a transitional housing endeavor, was created in 1989 through a partnership agreement between SERO-NSSFNS' VUB, and New Century Housing Corporation (NCHC). The U.S. Housing and Urban Development has provided 75% of the funding required for the development and 25% for operating the project, with the remaining funds generated from local contributions. Since its inception the project has assisted more than 100 veterans with low cost, safe housing, and the ability to maintain a stable independent living environment.

STATEMENT BY ALFRED PECK, DIRECTOR, THE SALVATION ARMY BORDEN AVENUE VETERANS RESIDENCE, LONG ISLAND NEW YORK, NY

"Can you get me into Borden Avenue?" has become the query of many of the veterans of the United States Armed Services in New York City. Borden Avenue is a New York City shelter specifically set aside for homeless veterans. The shelter is run by the Salvation Army under contract to the New York City Human Resources Administration. BAVR houses 400 men and we are always full. Word has been passed that the City's shelter for homeless veterans is "the best show in town." It is clear, safe, and air-conditioned, no small consideration during this sweltering summer. Borden Avenue is a place to start over, not a place to end up."

BAVR will be five years old on Veterans Day, 1992. It's the first, the largest and in the opinion of many, the best organized veterans

shelter in the country. In 1982, the New York City's Comptroller office released a study, "Soldiers of Misfortune," which focused attention on the high percentage of veterans among the City's homeless population. The report stressed the responsibility of the Veterans Administration to reach out to these veterans most in need of assistance. It alleged that only a small percentage were receiving benefits, and that most were not aware of the benefits to which they might be entitled.

The Human Resources Administration (HRA) became the City's liaison with the Veterans Administration (VA) which, in concert with the New York State Division of Veterans Affairs (SDVA), initiated the Homeless Veterans Outreach Program. This cooperative effort provided access to benefits for shelter residents through on-site visits by VA benefits counselors and SDVA counselors, who also assist in the upgrading of discharges. HRA also designated a veterans liaison at each shelter to coordinate with the outreach team, assist in tracking applications.

Veterans began to press for a separate shelter for veterans at which services could be coordinated more directly and hence more effectively.

Many of the veterans suffer from multiple dysfunctions. Most prominently, drug and alcohol addictions, exacerbated in some cases by post traumatic stress disorder (PTSD) and other mental illness, with resulting physical health problems. These must be treated before a veteran can make a successful transition to independent living. "We can find them jobs and a place to live, but if they don't address their real problems, it's only a matter of time before they lose the job and end up back on the streets, or in some other shelter," said a social worker in the early days of the shelter.

To create an atmosphere where staff and veterans know how to proceed, BAVR has developed a two part contract that "obligates" the new arrival to a social service plan that will lead to "mutual goals" agreed to by the man and the administrators of the residence.

#### STATEMENT BY GERALD SAUNDERS, SERGEANT MAJOR V-COPS

I found myself homeless and fighting back the effect of Post Traumatic Stress Disorder disturbance I obtained while in combat in Vietnam. I needed a place to stay and the Borden Avenue Veteran Residence was there. I needed a way to direct my energy and give back to the community and the V-Cops gave me that opportunity.

The nights are dark in Long Island City. The summer is hot and the winter cold. But, when I put on the green shirts and the jacket of the V-Cops pride in myself is elevated. I know I will be doing something that the community respects.

We come together at the 108th precinct in Long Island City. We receive our orders for the evening and move out into the night. We want to show the community that we're not hopeless. So using the one set of skills we have all acquired, military skills, V-Cops conduct patrol on the streets of Queens much in the same fashion they would conduct military drills.

The same tactics we used in Vietnam, we use on the streets and it works.

Each V-Cop wears a green T-Shirt with yellow letters which reads "V-Cops 108th Precinct," a green baseball-style jacket which also reads "V-Cops 108th Precinct" and a black beret. Each V-Cop is assigned a partner for the night and the group travels in formation everywhere we go.

The V-Cops, unlike the Guardian Angels, work in full cooperation with the police. Although we do not carry weapons our aim is to stop a crime before it takes place. Many of the V-Cops interventions have led to arrests, according to 108th Precinct statistics.

The subways are a common place for the V-Cops to patrol. While traveling on the trains we ride two to a car, one at each end. After the train stops at the platform and the doors open each V-Cop looks out the door and raises his right arm, signaling to the other that "all is clear" in his section of the train. When the group is ready to exit the train, each V-Cop steps outside the car, raises both his arms, and turns one hundred and eighty degrees to the right. To a subway rider they look like a row of green tops spinning in unison. To a bad guy it looks like time to find a new train. To the riding public it is a signal they can relax.

This type of unity serves as an intimidation to criminals on the subways and on the streets. On a more personal level, however, it also provides me with a sense of camaraderie with the opportunity to make lasting friendships.

Community leaders have told me that the neighborhood patrols serve as an effective criminal deterrent and give residents an extra sense of security. "How do you measure something like this?", said a Community Board member who also serves as an auxiliary policeman with the 108th Precinct. "Any presence, any people on the street in this neighborhood gives people another inkling of faith." He said, "Maybe I don't have to run." "There's a perception that something's happening—and these guys are part of it."

"There's no question in my mind that their effectiveness on the street can be measured", the President of the 108th Precinct Community Council, which serves as a liaison between police and the community, once told me. The V-Cops are a physical presence out there and people are becoming accustomed to seeing them on the streets. Once the word gets out, the bad guys see these guys. They know they have radios and are able to communicate with the precinct. They serve the purpose of eyes and ears for the regular police force."

#### STATEMENT OF JOAN C. ALKER, ASSISTANT DIRECTOR, NATIONAL COALITION FOR THE HOMELESS

Thank you for inviting me to speak with you today. I hope you all have in front of you a copy of the Executive Summary from the National Coalition for the Homeless' report on homeless veterans, entitled "Heroes Today, Homeless Tomorrow: Homelessness Among Veterans in the United States" which we released last year on Veteran's Day. This should provide you with a basic overview of the problem and, in our view, the shamefully inadequate federal response. If you would like more information the complete report is available from our office. I wanted to take this time to say a few words about the larger social and political forces which have contributed to modern American homelessness and where we are on this issue today.

Mass homelessness has been around for some time now—more and more Americans than ever before see homeless people on their way to work or on TV. The current recession, rising unemployment, and cuts in state and local benefits have combined to drive demand for emergency services to unprecedented levels. Less than six months after the end of the Persian Gulf war, we began receiving

reports of veterans of Operation Desert Storm showing up in shelters. Most providers report that the greatest increases in demand are from families, those who are recently unemployed, and those who are working but still poor. Every day thousands and thousands of men, women, and children are being turned away from shelters to make whatever makeshift arrangements they can for the night. Those who are on the streets are becoming more desperate and remaining there for longer periods of time as jobs, affordable housing, treatment options, and other services become increasingly scarce. Many homeless people and service providers are at their breaking points. It seems as though our political leaders have turned a blind eye to the despair and wasted human potential that we see on our streets.

In the past 20 years we have gone from a situation of a slight surplus of units affordable to the poorest 20% of renter households to a shortage of over 5 million in 1991. Safety net programs have been cut back, wages have stagnated, poor people have gotten poorer, and rich people have gotten richer. As a result the competition for scarce low-cost housing units among the poor has become so fierce, that any crisis or disability—the loss of a job, mental or physical illness, even a benefit check that gets lost in the mail—can push someone onto the street. In the case of veterans these factors may be directly related to their military service as is evidenced by the high percentage of homeless veterans with Post Traumatic Stress Disorder. And racism clearly play a role in homelessness—minorities are overrepresented in the homeless population at large as well as among homeless veterans although we do not know exactly by how much. A study of homeless men in Los Angeles found that homeless veterans were more likely to be black than homeless men in LA who were not veterans. And despite passage of Fair Housing legislation many years ago racial discrimination in housing remains rampant.

Yet it is important to remember that even 10 years ago we did not have these record numbers of homeless people, and that there are programs in every community that are working to get people off the street. Indeed we will hear about some of these later on this afternoon. What we are lacking is the political will to devote the resources that are needed. Most of our housing assistance does not go to poor and homeless people who need it most but rather to rich people through tax subsidies. Indeed the bottom fifth of the income distribution receives only 13% of all housing subsidies while the top fifth receives 60%. In other words for every dollar the government is spending in direct housing subsidies to the poorest 20% of the population, they are losing \$4 in tax subsidies to the richest 20%.

In the course of writing our report, I had the opportunity to examine closely our government's response to the needs of homeless veterans as well as to meet many men and women who have served in the armed forces and are now homeless. Surely the epidemic of homelessness among veterans that we are seeing today must rank as one of our nation's most shameful broken promises. I hope that we can work together to create the political change that is needed to end this tragedy.

CONGRESSMAN TERRY BRUCE

**HON. RICHARD J. DURBIN**

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, October 8, 1992*

Mr. DURBIN. Mr. Speaker, the close of the 102d Congress will see the departure of many fine Congressmen who have served their districts and the Nation with distinction.

My colleague and friend, TERRY BRUCE, is such a person.

TERRY BRUCE was first elected to the Illinois State Senate in 1970 at the age of 26. During the next 14 years, he distinguished himself as a leader in many fields, particularly education. His talent and hard work resulted in his selection as majority leader of the Illinois State Senate. There were few, if any, important legislative issues considered by the Illinois General Assembly during that period which did not have TERRY BRUCE's input.

In 1984, he was elected to serve in the U.S. House of Representatives from the 19th Congressional District.

TERRY BRUCE's reputation and skill earned him a spot on the coveted Energy and Commerce Committee.

On that committee, TERRY tackled the most difficult and complex issues. He became an expert on the complexities of the Clean Air Act. He labored long and hard to find the right balance between environmental quality and economic growth. His fine work with that legislation will keep families working, businesses open, and dreams realized for generations to come. At the same time, his efforts served the legislative goal of improving air quality for decades to come in America.

TERRY BRUCE was never afraid to tackle a legislative challenge. When the Chicago & Northwestern Railway went on strike in 1991 and imperiled the entire economy of Chicago and the Midwest, TERRY BRUCE rose to the occasion. Chairman JOHN DINGELL and TERRY's colleagues on the Energy and Commerce Committee acknowledged that TERRY demonstrated extraordinary leadership in bringing that strike to a fair conclusion.

TERRY was particularly proud of his work to help the University of Illinois in his district. As a major research university, the University of Illinois relied on its congressional delegation, and its own Congressman in particular, to make certain that research opportunities from Washington were available. TERRY played a key role in securing the biotech research facility at the University of Illinois. This facility will be solving problems and improving the quality of life around the world for many years to come. TERRY BRUCE's hard work made it happen.

There are few communities in downstate Illinois which have not been touched by the legislative contributions of Congressman TERRY BRUCE. From the necessities of community life such as highways and bridges to those elements which enhance the quality of life for our families, TERRY BRUCE has made an enduring contribution to his State.

From his first campaign, his wife, Charlotte, and later his daughters, Emily and Ellen, were at his side. They passed out cookies at plant gates and worked day and night to help TERRY

win many elections. Their familiar, smiling faces and hard work in every election contest were assets that money could never buy.

The good news about this tribute is that TERRY BRUCE still has many years of opportunity ahead of him. Though he was a casualty of reapportionment, his outstanding reputation, and his record of achievement leave the door wide open for future service.

TERRY BRUCE's departure from the House of Representatives is a loss for the State of Illinois and the Nation. We are fortunate that extraordinary people like TERRY BRUCE have the dedication to enter public service and the talent to make such a positive contribution to the lives of so many others.

**THE UNITED STATES AND JAPAN  
CAN WORK TOGETHER FOR PEACE****HON. FORTNEY PETE STARK**

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, October 8, 1992*

Mr. STARK. Mr. Speaker, the United States should begin now to work with Japan, survivor of the only nuclear war to date, on the greatest project the world can imagine: A collectively enforced peace, and the elimination of all nuclear weapons from the face of the Earth.

Today, I am introducing legislation which sets forth a blueprint to achieve this end. Real progress can be made by 1995, the 50th anniversary of the founding of the United Nations—and the 50th remembrance of the atom bombing of Hiroshima and Nagasaki. That year also will see the nations that entered into the Nuclear Non-Proliferation Treaty in 1970 gather to renegotiate and extend it.

We can capitalize on this coincidence of events by strengthening the United Nations Charter, and at the same time agreeing that the next step in the evolution of civilization is the renunciation of nuclear weapons.

Japan, which became our close ally in the cold war struggle, is our ideal partner for leading the world in this effort. Japan is the only nation that has endured the nightmare of nuclear explosions. As the country which has renounced militarism, Japan has a moral authority that can draw the nations of the world together in this cause.

One could envision a world conference in Japan—at Hiroshima or Nagasaki—in which the goal is established of eliminating nuclear weapons and concrete steps are started to achieve that end.

These steps could include a greatly strengthened Nuclear Non-Proliferation Treaty, an end to nuclear testing by all nations, an improved International Atomic Energy Agency [IAEA] that would truly safeguard and monitor nuclear activities with a stronger United Nations that would back up the IAEA's inspectors—by force if necessary.

The goal of this endeavor is breathtaking. The actual steps are slow, even unexciting, and could take 20 or 30 years to fully implement. But this long journey could eventually lead to a new world, free of mutually assured destruction, free of the specter of charred

cities and blackened skies, free of the horrifying possibility that civilization as we know it could end on just 20 minutes notice.

But this is more than just a noble and lofty pursuit—it is also staunchly in the national interests of the United States and other democratic countries. During the cold war, nuclear weapons worked to our strategic advantage, by deterring overwhelming Soviet superiority in tanks and manpower in Europe, the Far East, and elsewhere. But with the collapse of the USSR, we no longer need to extend a nuclear umbrella over ourselves or our allies.

Today, the leading military threat to the United States, Japan, and Europe is nuclear weapons in the hands of independent despots like Saddam Hussein. For these regimes, the bomb is their great equalizer against our conventional military superiority—the gulf war would have been very different had we faced a nuclear-armed Iraq. A strict global regime to prevent all countries from building the bomb will help us avoid a future nightmare involving nuclear blackmail. As long as it's verifiable, such an agreement will work in our strategic interests.

Over the last year, Congress and the President have taken several important steps in the right direction, including the June agreement with Russia to further reduce our respective nuclear arsenals and the recent 9-month nuclear testing moratorium and ban on testing after 1996. Additionally, the 1993 Defense authorization bill includes the Nuclear Weapons Reductions Act, which calls for additional cuts in the nuclear arsenals of all countries. Finally, pending in Congress is legislation to reduce the threat of nuclear proliferation through tightened export controls, sanctions for violators, and stronger international safeguards and inspections. These steps amount to a solid foundation for pursuing a world without nuclear weapons.

Japan, as nuclear victim and nonnuclear power, must join with the United States in leading this process. Historically, Japan seems to have been one of the few societies on earth which developed extraordinary capability in a high-technology weapon—and then essentially banned that weapon. Japan's use of firearms in the 16th and 17th centuries was at the cutting edge of mass destructions, but by the time of Commodore Perry's arrival in 1853 such weapons had been made almost taboo.

As history also shows, however, such progress toward peace must be reinforced or it can be reversed. Today, Japan and the United States often seem locked in a downward spiral of finger-pointing and name-calling. Japanese phrases like "kenbei" and "bubei" translate as contempt and even hatred of American ways, while on our side public officials who should know better crack sick jokes about World War II.

But we should remember: Trade fights come and go. Trade deficits swing from month to month, the dollar and yen shift from day to day—and in the long run history will little note nor long remember. What mankind would always remember is leadership to move the world out of the nuclear arms nightmare.

Instead of spending all our energy in trade disputes, let us commit ourselves to working on something that will be of importance for all future generations. In a partnership with Japan

for arms control and peace, 1995 could be the beginning of a new age. There could be no greater way to remember those of all nations who died in the horror of World War II.

**S. 1579, THE TELEPHONE DISCLOSURE AND DISPUTE RESOLUTION ACT**

**HON. NITA M. LOWEY**

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Thursday, October 8, 1992*

Mrs. LOWEY. Mr. Speaker, I rise in support of this legislation to regulate our Nation's pay-per-call industry. I would like to commend Chairmen SWIFT and MARKEY for their hard work on this bill, and I thank them for including my provision to stop pay-per-call companies from taking advantage of our Nation's senior citizens.

Some time ago a constituent contacted me to share her frustration at having been the victim of a 1-900 scam. She spent more than 5 minutes, at \$2 a minute, trying to get information about Medicare from a private company that tried to create the impression that it was run by the Federal Government.

Although the 900 telephone line industry has brought many services to Americans, we cannot let private companies defraud unknowing citizens.

My amendment will ensure that private companies do not trick consumers into believing they are government-run or government-sponsored. It requires that 900 lines that appear as if they may be government programs or services contain a message in their opening audiotext specifying that their services are not approved or endorsed by the Federal Government.

Our Nation's senior citizens deserve the most accurate and helpful information about the programs they rely on. Passing this bill is an important step in preventing unscrupulous companies from profiting by deceiving them. I urge my colleagues to support this legislation.

**DEPARTURE OF REPRESENTATIVE SID MORRISON**

**HON. NORMAN D. DICKS**

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

*Thursday, October 8, 1992*

Mr. DICKS. Mr. Speaker, I am addressing the House today on behalf of the entire Washington State congressional delegation in order to pay tribute to Congressman SID MORRISON, who will not be with us for the 103d Congress. SID was first elected in 1980 and since that time has been a Representative in the truest sense of the word. He has diligently represented the views and concerns of the people of the fourth district of Washington, including the agricultural interests, small businesses, and the high technology community in the Tri-Cities. And most recently, he has served as a mediator, a broker of ideas and, at times, a referee on the contentious spotted owl/timber crisis situation that has impacted the Pacific

Northwest. As we wish him well, I wanted the Members of the House to see a copy of a letter that our Washington State delegation in the House has sent to SID, thanking him for his significant contributions to the success of our collective efforts. I am enclosing a copy of that letter for the RECORD.

CONGRESS OF THE UNITED STATES,  
HOUSE OF REPRESENTATIVES,  
Washington, DC, October 10, 1992.

DEAR SID: We are taking this opportunity, as the 102nd Congress comes to an end, to send a special note of thanks to you for the diligence, persistence and perseverance you demonstrated in guiding our delegation's efforts to achieve a balance solution to the Pacific Northwest timber supply crisis. It is fitting and necessary at this point, we believe, to recognize officially the difficult task you accepted and the conscientious work that you did in keeping our collective view fixed upon a national and reasonable solution to the Northwest's most urgent natural resource conflict. As the "convener" of an unending series of (unending) delegation meetings in 1434 Longworth, you have displayed the valuable trait of a marathon runner: an awareness that this is a long-distance race with no easy sprint to victory. It has been that recognition on your part, most especially, that has kept us moving forward through the most difficult periods of impasse and disagreement and which has resulted in significant strides toward the development of a cogent timber strategy in this 102nd Congress.

All of us owe a great debt to you, Sid, for your vision and for your strength. We will miss you for your insight and for your persistence as a convener, but most of all we will miss you as a friend. Best wishes in all your future endeavors.

Sincerely,

TOM FOLEY.  
AL SWIFT.  
JOHN MILLER.  
JOLENE UNSOELD.  
NORM DICKS.  
ROD CHANDLER.  
JIM McDERMOTT.

**MUCH ADO ABOUT SOMETHING**

**HON. CHARLES H. TAYLOR**

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, October 8, 1992*

Mr. TAYLOR of North Carolina. Mr. Speaker, I am here to inform this House and the Nation about an upcoming event in Cleveland County, NC, on October 17. Our individual communities are steeped in culture, traditions, and special foods that represent the diversity and richness of our heritage. And so, on October 17, the people of the Cleveland County area will be celebrating Livermush Expo 1992.

Livermush is made by combining some of the "finer" parts of the pig, including the "snoots," together with spices and cornmeal. This wonderful cuisine was first sold commercially in the 1920's and became a staple during the Depression. Its virtues were first celebrated in October 1987 when the Cleveland County Commissioners and the Shelby City Council passed resolutions proclaiming that "livermush is the most delicious, most economical, and most versatile of meats." Well, that made what most people of the area al-

ready know official. There was nothing left to do but proclaim the first Livermush Exposition.

I have sent invitations to our national leaders, including both Presidential candidates, and some word about the excitement of the occasion is beginning to drift in.

President Bush has indicated that while he does not care for broccoli, he is certain he would love livermush. After all, pork rinds are one of his favorite foods. And if you look under the skin of any pork rind eater, you will find the makings of a livermush lover.

It has been said that Presidential candidate Bill Clinton has tried livermush but swears he didn't swallow. Its certain he would like it though, since the University of Arkansas has a few "Hawgs."

Vice President Quayle must love livermush because when asked to spell it, he wrote down "G-O-O-D-E."

And Senator AL GORE said that he may include the story of livermush in his next book on the environment since livermush is the best example of recycling he knows.

Some of you may think that this is much ado about nothing, but as this t-shirt says, the Livermush Expo 92 is "Mush Ado About Something."

Mack's Livermush of Shelby, NC, Hunter Livermush of Marion, NC, and others will be displaying their products on the 17th. Harriet Holton will demonstrate several uses of livermush, perhaps a livermush Christmas tree. They will be serving livermush at the Shelby Cafe on Main Street, and Harley Hog and the Rockers will be playing. Kids will be entertained by pot belly pigs and events at the piglet pen. Elvis is expected to make an appearance.

Everyone may not make it to Hog Heaven but it's a sow certainty that everyone will be welcomed at the October 17 Livermush Expo in Shelby, NC.

**THE LOWER MISSISSIPPI DELTA DEVELOPMENT FINANCING CORPORATION ACT**

**HON. BILL EMERSON**

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

*Thursday, October 8, 1992*

Mr. EMERSON. Mr. Speaker, I am pleased to join with my friend and colleague from Mississippi, Mr. ESPY, in introducing the Lower Mississippi Delta Development Financing Corporation Act. Today represents the culmination of years of hard work, and we have an excellent product as a result. I commend Mr. ESPY and others who have worked on this project for all of their fine work.

The lower Mississippi Delta region of the country consists of 219 counties and parishes that are among the Nation's poorest. When the Lower Mississippi Delta Development Commission issued its report in May 1990, the statistics were eye opening. Substantial poverty, poor health, high infant mortality, lack of education, and lack of suitable infrastructure are among the factors which have limited the opportunities available to residents of the delta region.

Despite these adverse conditions, the people of the delta prefer hope to despair. They

are hard working and forthright, and they are one of the region's most tremendous resources. They did not come to the Congress looking for a handout; rather, the Congress is, by virtue of this bill, offering the region a hand up.

This bill will give the delta region the ability to help itself. The Delta Corporation is a means to provide structured seed money to this region that needs it so badly, but it is not a Federal program to continue ad infinitum. It will not be another bureaucracy; we have too many of those in this country already. This Corporation will be a private corporation operating under a Federal charter. At the end of fiscal year 1998, the Corporation will reorganize under a State charter, and it will be private in every sense of the word. With this legislation, we are helping the people of the delta to create a structure which will eventually be entirely delta-run, delta-managed, and delta-financed.

This is how the Corporation will work: The President will appoint the initial Board of Directors, with the advice and consent of the delta congressional delegation. The Board of Directors will establish bylaws, appoint officers and employees of the Corporation, and issue stock. It will possess all the powers of any ordinary private corporation: Owning and transferring real and personal property; acquiring or establishing subsidiaries; entering into contracts; et cetera. The Corporation will receive up to \$100 million in Federal funding over a span of 5 years, and it will be on its own after that.

The Corporation will play an instrumental role in stimulating entrepreneurial activity and infusing capital into the delta region. It is directed by this legislation to provide technical training programs for local communities, provide regional economic research and analysis, raise funds for economic development, and work with local financial institutions to provide microloan funds, seed and venture capital, revolving loans, and other financial tools. All in all, the Corporation will create a climate in which economic development can flourish in the delta region.

I am truly excited about the potential unleashed by the Delta Corporation. This bill represents a true investment in the people of the region—not another bureaucracy, and not another Government giveaway—and our return on this investment will be manifold. The Delta Corporation will truly help folks to help themselves, and I hope to see it swiftly enacted in the 103d Congress.

#### THE FUTURE OF REGIONAL TRANSMISSION GROUPS

### HON. EDOLPHUS TOWNS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 8, 1992

Mr. TOWNS. Mr. Speaker, I was disappointed that we were unable to include a regional transmission group [RTG] provision in the bill. The RTG proposal represents the consensus agreement of virtually every sector of the industry including the utilities, municipal and co-op systems, IPP's environmental

groups, and others. The RTG approach, among other things, would help to meet the goal of increased transmission access through cooperative, voluntary relationships, and alternative dispute resolution mechanisms, not protracted litigation at FERC.

We should do everything possible to enact legislation quickly next session to provide these groups with the appropriate legal framework they need to operate most effectively. I consider the enactment of an RTG provision of significant importance to my constituents in New York and electric consumers all over the country. I am anxious to work with my colleagues to consider the RTG provision as early as possible in the next session.

#### H.R. 4016, COMMUNITY ENVIRONMENTAL RESPONSE FACILITIES

### HON. NANCY PELOSI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 8, 1992

Ms. PELOSI. Mr. Speaker, H.R. 4016, the Community Environmental Response Facilities Act would provide much-needed relief to many communities, like my district of San Francisco, affected by base closures.

The loss of jobs and capital from base closures have magnified the effects of the current recession for many people, particularly in California. In order to mitigate these effects, it is imperative that bases are cleaned up and ready for new uses within their community. H.R. 4016 would accomplish this by allowing military installations to be parceled into remediated and nonremediated areas and permit development on the remediated sections.

Such a process holds particular importance for my district in which the Presidio Army Base and Hunters Point Naval Shipyard, a Superfund site, are being closed. Allowing development to proceed on sections of Hunters Point that are free from contamination will provide much-needed economic relief for the citizens in the surrounding areas who have been hardest hit by the recession.

The opportunities that the Presidio and Hunters Point offer for the surrounding communities are tremendous. The sooner these opportunities are available, the sooner we can help rebuild our economy and local communities.

I urge my colleagues to support this important legislation

#### A TRIBUTE TO RONALD WHITE DURING THE FRIENDS OF LABOR CHARITY DINNER

### HON. LUCIEN E. BLACKWELL

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 8, 1992

Mr. BLACKWELL. Mr. Speaker, I rise and ask my colleagues to join me in paying tribute to attorney Ronald White for his dedication and commitment to serving his community.

Mr. Speaker, in recognition of his community involvement which is demonstrative of his

philosophy of building bridges, Attorney White will be honored by his friends and loved ones at the Friends of Labor Charity Dinner that will be held on October 17, 1992, in the great city of Philadelphia.

Mr. Speaker, I know firsthand of Attorney White's many accomplishments. He has been unselfish in sharing his many talents in an effort to strengthen and to bring about a certain bond to his community. Mr. Speaker, his allegiance is steadfast and his determination unyielding.

Mr. Speaker, Attorney White is indeed the kind of citizen about which any Representative would be proud to boast. Although several years ago, Attorney White established the law firm of White, McClellan, & Singley, he nonetheless finds the time to serve on the boards of the Community Development Corp.; Cunningham Community Center; African Americans for Cultural Development; Philadelphia Anti-Drug/Anti-Violence Network and the Philadelphia Public Defenders Association.

In addition, Mr. Speaker, his sound career as a litigator has enabled him to gain membership with prestigious boards such as the Pennsylvania Bar, Supreme Court of Pennsylvania Bar, the Federal Court Eastern District of Pennsylvania, and the U.S. Court of Appeals for the Third District.

Mr. Speaker, I invite my colleagues to join me in congratulating and extending best wishes for future success to attorney Ronald Avon White.

#### H.R. 5678, REGARDING FUNDING FOR AN ESTUARINE RESOURCES CENTER

### HON. H. MARTIN LANCASTER

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 8, 1992

Mr. LANCASTER. Mr. Speaker, I am pleased to rise in support of the conference report on H.R. 5678. This report allocates funds for important and deserving projects, one of which is in eastern North Carolina. The Pamlico-Tar River Foundation, a nonprofit group of over 2,000 members, and the town of Washington, N.C., are seeking to establish the North Carolina Estuarine Resources Center. The major function of this center would be to educate the residents and visitors of north-eastern North Carolina about the important concerns of watershed protection.

The complex integrity of watersheds, wetlands, and estuarine systems are only now beginning to be understood, and it is imperative that new information is shared to provide insight into the vast resources in the Albemarle-Pamlico region. Decisions governing the management of these natural resources will carry significant implications, economic, ethical, and ecological, for each and every citizen in north-eastern North Carolina. Therefore, public education on these issues is imperative, and a permanent educational facility located on the western side of the Albemarle-Pamlico Sounds is a necessary element.

CONFERENCE REPORT ON H.R. 11,  
THE REVENUE ACT OF 1992

**HON. MIKE SYNAR**

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 8, 1992

Mr. SYNAR. Mr. Speaker, early on Tuesday morning I voted against the conference report on H.R. 11, the Revenue Act of 1992, because it contains a simple, yet devastating, inherent flaw that will bust the Federal budget. While the bill provides a variety of tax benefits I support, the flaw in the legislation is that these benefits are permanent while the means to pay for them are only temporary. The ultimate result of this imbalance is an estimated \$10 billion in yearly net revenue losses to the U.S. Treasury. In short, I voted "no" on this bill because it can't pay for itself and it ends up greatly increasing a deficit that already drains our economy of significant growth potential.

In the true spirit of an election year, H.R. 11 attempts to promise something to everyone in the short term and delay paying for this largess until after election day. What has been promised to everyone, and much ballyhooed by H.R. 11's supporters, are a number of politically popular, and permanently implemented, tax benefits. These include provisions which allow tax deductible contributions to individual retirement accounts [IRA's], permit deductible amortization of good will, permanently extend the low-income housing credit, repeal the luxury tax on pleasure boats and provide passive loss relief for real estate developers.

While I generally support these specific tax benefits they will eventually cost the Federal Treasury close to \$10 billion per year. It is fiscally irresponsible for Congress to grant permanent tax benefits without replacing this lost revenue with the same amount of permanent new revenue offsets. Unfortunately, H.R. 11 not only fails to replace the revenue it loses, it uses a host of budgetary gimmicks to mask this failure.

First, most of the revenue raisers in the bill are only temporary. For example, the bill raises an estimated \$14 billion in revenue by increasing the estimated taxes for individuals and raising taxes on securities firms' inventories. Unfortunately, the new estimated tax rules don't increase taxes, they merely accelerate collections. This produces a one-time gain in the short term and that's it. Similarly, the securities firms' tax revenue results from a one-time increase due to an inventory accounting change.

Second, because the bill attempts to be revenue neutral within the 5-year budget window, it encourages tax revenue collections within the budget window by promising increased taxpayer savings, which translates into lost tax revenues, in the years beyond the budget window. This is most evident in the bill's IRA provisions. The bill raises revenue in the short term by charging taxpayers a one-time fee for rolling over current IRA's into new H.R. 11 style IRA's. The incentive for switching to the new style IRA is the promise of greater savings to the taxpayer than those available on current IRA's.

Unfortunately, future taxpayer savings provided by the bill cost more than the current

revenue provisions raise, thus making the IRA provision a money loser in the long term. This is of no concern to the bill's proponents, however, because the revenue losses are recorded outside the current budget window. In essence this provision is like a family that borrows from next month's paycheck to pay this month's bills and declares its budget balanced by only looking at this month's income and expenses.

Finally, the bill manipulates the effective dates of the IRA provisions to increase revenue estimates in the near term while pushing revenue losses outside the budget window. For example, the IRA rollovers start first which result in greater revenues from the collection of the rollover fees. However, the bill's increased deductions for the new style IRA's don't start until 1995. This has the effect of postponing a true accounting of the bill's cost past the current budget window and preserves the bill's illusion of budget neutrality.

H.R. 11 offers a number of tempting baubles in the form of politically popular tax breaks. Unfortunately, it attempts to pay for these baubles with budgetary sleight of hand that will ultimately increase the Federal deficit. I voted against H.R. 11 because real tax benefits need to be paid for with real tax revenues not accounting gimmicks.

H.R. 6168

**HON. JAMES L. OBERSTAR**

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 8, 1992

Mr. OBERSTAR. Mr. Speaker, at this hour it appears unlikely that the other body will have an opportunity to pass its own bill reauthorizing the airport and airway trust fund before we adjourn. This means that important aviation programs will lapse unless the other body passes a bill previously passed by the House.

In recent months we have passed two aviation reauthorization bills. On May 19, by a vote of 410 to 2 we passed H.R. 4691, a reauthorization bill reported by the Committee on Public Works and Transportation. On Friday, October 2, in order to expedite the legislative process, we passed H.R. 6093 which was a compromise between the earlier House bill and a bill reported by the Senate Committee on Commerce, Science, and Transportation. Since then we have learned that the other body would like to see adjustments to H.R. 6093. Because it appears that there will be no opportunity for a conference to discuss these problems directly, we are this morning asking the House to pass a new bill to deal with the problems raised by the other body. We hope they will find this bill acceptable and pass it.

The major difference between the new bill and H.R. 6093 is that the new bill limits the Airport Improvement Program authorization to 1 year. Apart from this, the new bill does not make any major departures from H.R. 6093 and follows the same basic approach as the bill which the House passed in May. The bill is important legislation since if the bill is not passed, there will be no authority for new grants for airport development. In the current

state of the economy the country cannot afford even a temporary shutdown in a program which sustains approximately 100,000 jobs.

Finally Mr. Speaker, I am taking this occasion to clarify the meaning of some of the provisions of the bill. First, Mr. Speaker, I wish to clarify that section 511(h)(2) of the Airport and Airway Improvement Act of 1982 [AAIA], as amended, does not apply to car rental firms doing business at an airport for the purposes of determining compliance with any requirement imposed pursuant to section 511(a)(17) of AAIA. Administration of DBE assurance for car rental firms shall be governed by section 511(h)(3) of AAIA, as amended.

In addition, I note that section 511(h)(3)(C) of AAIA, as amended, provides that nothing in the law on DBE assurance "shall require a car rental firm to change its corporate structure to provide for direct ownership arrangements." For example, a car rental firm is not required, but is permitted by the DBE assurance sections 511(a)(17) and 511(h) of the AAIA, as amended, to transfer corporate assets or engage in joint ventures, partnerships or subleases.

Mr. Speaker, this is important legislation for transportation and for jobs. I urge its immediate passage.

TRIBUTE TO REPRESENTATIVE  
BEN JONES

**HON. JIM RAMSTAD**

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 8, 1992

Mr. RAMSTAD. Mr. Speaker, I rise today to pay tribute to a departing colleague who will be sorely missed by every Member of this House and every person whose life he has touched. I refer to the distinguished gentleman from Georgia, [BEN JONES].

Although I have only known BEN for the last 2 years, we've had lunch together with four other colleagues virtually every Wednesday in the office of our colleague from Missouri, BILL EMERSON.

We are from the North, South, East, and West of this great country. Three Democrats, three Republicans. With different backgrounds and different legislative interests. But we share a powerful bond. We are all grateful recovering alcoholics—and BEN JONES is a special member of our fellowship.

BEN's total honesty and disarming openness about his alcoholism and recovery have been an inspiration to each one of us and everyone else in this body. BEN's leadership on behalf of people recovering from chemical dependency will be missed. His efforts to assist others still suffering from the ravages of alcoholism and drug addiction will also be missed.

But most of all, we will miss BEN's daily nudges. "How ya'all doin', JIM?" he would ask daily in that distinctive dialect—reminiscent to this Minnesotan of Cooter on "Dukes of Hazard."

BEN was there in the good days and the not-so-good ones. He would always take time to listen to anyone in need of assistance or just a listening ear.

BEN, thanks for caring; thanks for sharing; thanks for leading; and thanks for listening. On

behalf of BILL EMERSON, ROD CHANDLER, and our other two Wednesday lunch members, I salute you for the hundreds of hours you spend to help other recovering people.

Although you will no longer be a Member of this body, your spirit will remain with us. We will carry on our traditions, and you will be with us always. God bless you, BEN, and our best wishes to you and Alma in your new life together.

TRIBUTE TO STAFF MEMBERS

HON. CARROLL HUBBARD, JR.

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 8, 1992

Mr. HUBBARD. Mr. Speaker, I take this opportunity to pay tribute and express appreciation to the excellent staff of the First Congressional District of Kentucky and of the Banking Subcommittee I chair.

Yes, thanks to those staff members I'm privileged to work with both in Washington and Kentucky to represent and assist the people of Kentucky's First Congressional District.

Thanks also to those staff members who work for the Subcommittee on General Oversight and Investigations of the House Banking, Finance and Urban Affairs Committee.

I express my gratitude to my longtime, efficient administrative assistant Lorraine Grant, who has served on our staff for 17 years.

Special thanks to three longtime staff members—Mary Lee Lawton, Cornelia (Neal) Henson, and Elaine Sullivant—who have worked untiringly and effectively for the people of Kentucky's First District.

Mary Lee Lawton has worked diligently in our Henderson field office for 15 years. Mary Lee has assisted multitudes of western Ken-

tuckians in person and by telephone in a professional, helpful manner.

Cornelia (Neal) Henson has typed, produced, and processed in an efficient manner many thousands of letters to Kentuckians during her 14 years on our staff here in Washington.

Elaine Sullivant of Paducah has worked diligently for 13 years and 7 months as chief field representative for the First District of Kentucky. The thousands of Kentuckians who have called our Paducah office will miss Elaine Sullivant's friendly, excellent assistance.

Mary Martha Fortney has been on my staff for 12 years and has served so ably for 6 years as staff director of the Subcommittee on General Oversight and Investigations of the House Banking Committee.

I pay tribute to the following very efficient, hard-working staff members who have served and continue to work in our Washington office for western Kentuckians: Legislative Director Maureen Fletcher, 3½ years; chief caseworker Elwanda Newbold, 3½ years; and Cheryl McGlotten, legislative assistant, 2 years.

I express admiration and appreciation to my very excellent district staff in western Kentucky: Debbie Foy of Mayfield, 10 years; Caroline Hall of Henderson, 7½ years; Shirley Carter of Hopkinsville, 6 years; Patti Hawkins of Madisonville, 4 years; Ava Siener of Paducah, 3½ years; Malcolm West of Central City, 3 years; Raye Ann Heath and Debbie Reid, both of Symsonia, 2 years.

Special thanks also to the excellent staff of the Subcommittee on General Oversight and Investigations. I've already mentioned Mary Martha Fortney, the staff director. I also pay tribute to the subcommittee's counsel, Steve Skonberg, 1 year, 1 month; and professional staff members Sam Woodall, 2½ years, and

Dave Liddle, 1 year, 8 months. Steve Skonberg, Sam Woodall, and Dave Liddle deserve compliments for their excellent work.

HONORING ROSA ROSARIO-GARCIA

HON. ELIOT L. ENGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 8, 1992

Mr. ENGEL. Mr. Speaker, I take this opportunity to recognize the work of a friend and community leader, Rosa Rosario-Garcia, who is being honored by here colleagues on October 23.

Rosa has served as chairperson of the board of directors of the Hispanic Counseling Center on Long Island, which is celebrating 15 years of service to the community. It is fitting that during this gala event the Hispanic Counseling Center is saluting the effort and dedication put forth by Rosa Rosario-Garcia.

Through the work of Rosa and her colleagues, the chemically dependent, the mentally ill, and their families have been given an opportunity to reach and sustain a productive way of life. By specifically serving people with limited English-speaking ability, the Hispanic Counseling Center has reached out to a population that is often underserved or completely ignored. The center's efforts are, indeed, a model for other service providers who must help to fill this void.

For these reasons and more, I commend Rosa Rosario-Garcia for blazing this new and exciting trail. The fruits of her labor are most evident in the many lives she has touched in a positive way.
