The House bill contained a provision (sec. 575) that would require the Secretary of Defense to develop and carry out a test program for improving foreign language proficiency in the Department of Defense. The test program would focus on evaluating changes in the management of the foreign language proficiency program recommended in a June 1993 report by the Department of Defense Inspector General and the Sixth Quadrennial Review of Military Compensation. The test program would include an evaluation of adjustments in compensation, including foreign language proficiency pay for active and reserve component personnel, larger enlistment and reenlistment bonuses, and special duty assignment pay.

The Senate amendment contained no similar provision.

The Senate recesses with a technical amendment.

Clarification of punitive UCMJ article regarding drunken driving (sec. 576)

The House bill contained a provision (sec. 562) that would clarify the statutory standard for breath and alcohol measurements under Article 111 of the Uniform Code of Military Justice (10 U.S.C. 911) which proscribes drunken driving.

The Senate amendment contained a similar provision (sec. 543).

The Senate recesses.

LEGISLATIVE PROVISIONS NOT ADOPTED

Modification to Selected Reserve call-up authority

The House bill contained a provision (sec. 511) that would amend section 673b of title 10, United States Code, to provide a permanent increase in the existing Selected Reserve call-up authority from 90 to 180 days for both the initial and an additional period of service.

The Senate amendment contained a provision (sec. 511) that would authorize the President to delegate to the Secretary of Defense limited authority to call up units and members of the Selected Reserve under section 673b of title 10, United States Code. No more than 25,000 members of the Selected Reserve could be on active duty at any one time under this authority.

The Senate provision would require written notification to Congress within 24 hours of the exercise of this authority, setting forth the circumstances requiring the call-up and the anticipated use of called-up reservists or units.

The conferees agree to delete both provisions. The conferees generally support making the reserves more accessible in the expectation of increased reliance on them. However, the conferees are reluctant to expand the existing call-up authorities before exploring in hearings the implications of any such changes for the reserve components and employer support for reserve components.

Improved right of appeal in court-martial cases

The House bill contained a provision (sec. 561) that would amend Article 69 of the Uniform Code of Military Justice (10 U.S.C. 869) to provide that an individual whose case is reviewed by the Judge Advocate General of the military department concerned under Article 69 may petition the Court of Military Review (CMR) for that service to review the case under Article 66 (10 U.S.C. 866).

Under Article 66, every court-martial in which the sentence extends to death, dismissal, dishonorable or bad-conduct discharge, or confinement for one year or more is subject to mandatory review by a Court of Military Review unless the accused waives appeal. The CMR is a formal appellate tribunal within each military department composed of senior attorneys. Other cases (e.g., those involving a lesser sentence) may be reviewed by the Judge Advocate General concerned. The Judge Advocate General has the discretion to submit any of those other cases to the CMR.

The Senate amendment contained no similar provisions.

The House recesses. The conferees agree that the Secretary of Defense should review the relationship between review under Article 69 by the Judge Advocate General and appeal to a CMR under Article 66. The Secretary should provide the results of that review to the congressional defense committees not later than May 1, 1994.

At a minimum, the review should address the following issues: (1) whether the distinction in Article 69 between general courts-martial (which are subject to mandatory re-

view by the Judge Advocate General) and other courts-martial (which are subject to review only upon request) remains valid, particularly in view of the fact that the sentences imposed in some general courts-martial may be less severe than the sentences imposed in some special courts-martial; (2) what standards should defense counsel apply in determining whether to submit an appeal under Article 69; (3) what standard should the Judge Advocates General apply in determining whether a case reviewed under Article 69 should be submitted to a CMR for formal appellate review; and (4) whether the accused should be given the right to petition a CMR for review of decisions by the Judge Advocate General under Article 69.

Reduction in the maximum number of years for a military member to be maintained on the temporary disability retired list

The Senate amendment contained a provision (sec. 542) that would reduce from five to three the maximum number of years a service member may be retained on the temporary disability retired list before a final determination is made.

The House bill contained no similar provision.

The Senate recesses. The conferees agree that proper management of the list is essential, but believe that reducing the maximum number of years from five to three may disadvantage certain disabled members, including those undergoing cancer treatment.

TITLE VI—COMPENSATION AND OTHER PERSONNEL BENEFITS

LEGISLATIVE PROVISIONS

LEGISLATIVE PROVISIONS ADOPTED

Military pay raise for fiscal year 1994 (sec. 601)

The House bill contained a provision (sec. 601) that would authorize a 2.2 percent increase in basic pay, basic allowance for quarters, and basic allowance for subsistence for military personnel.

The Senate amendment contained a similar provision (sec. 601).

The House recesses.

Variable housing allowance (VHA) for certain members who are required to pay child support and who are assigned to sea duty (sec. 604)

The House bill contained a provision (sec. 602) that would permit members above paygrade E-6 who are assigned to sea duty and are entitled to a basic allowance for quarters (BAQ) at the "with dependent" rate solely by reason of child support payments to be entitled to a variable housing allowance (VHA) at the "without dependents" rate.

The Senate amendment contained no similar provision.

The Senate recesses.

Evacuation advance pay (sec. 605)

The House bill contained a provision (sec. 604) that would amend section 1006 of title 37, United States Code, to authorize the President to designate in advance or retroactively a place for which advance of pay will be made in connection with the ordered evacuation of members or dependents of members.

The Senate amendment contained a provision (sec. 622) that would designate permanent change of station pay advances to servicemembers evacuated in August 1992 from Homestead Air Force Base, Florida, because of Hurricane Andrew, as evacuation advance pay.

The House recesses with an amendment that would preserve the designation of pay advances to Hurricane Andrew victims as evacuation advance pay and amend section

1006 of title 37, United States Code, to provide the Secretary of Defense with the authority to designate places within the United States as evacuation sites warranting payment of advance pay.

Extension of authority for bonuses and special pays for nurse officer candidates, registered nurses, and nurse anesthetists (sec. 611)

The House bill contained a provision (sec. 611) that would make permanent the authority for bonuses and special pays for nurse officer candidates, registered nurses, and nurse anesthetists.

The Senate amendment contained a provision (sec. 612 (a)-(c)) that would extend the authority for these bonuses and pays until September 30, 1995.

The House recedes with a technical amendment.

Expansion and modification of certain bonuses for reserve forces (sec. 612)

The House bill contained two provisions (sec. 612 and 613(f)) that would extend certain expiring authorities to September 30, 1995, increase the Selected Reserve enlistment bonus from \$2,000 to an amount not to exceed \$5,000, and change the requirement to "pay one half of the bonus upon completion of the initial active duty for training" to "an amount not to exceed one half of the bonus may be paid." The provision would further specify that the total amount of expenditures that may be incurred to provide bonuses under this section may not exceed \$37,024,000 for fiscal year 1994, the amount contained in the budget request for the Selected Reserve enlistment bonus program.

The Senate amendment contained a provision (sec. 611) that would amend Selected Reserve enlistment bonus and affiliation bonus authorities to provide greater flexibility in the method of payment of the bonuses.

The Senate recedes with a technical amendment.

Extension of authorities relating to payment of other bonuses, and special pays (sec. 613)

The House bill contained a provision (sec. 613) that would extend the authorities for a variety of bonuses and special pays. The current authorities expired on September 30, 1993.

The Senate amendment contained a similar provision (sec. 612 (d)-(k)) that would extend the authorities for a variety of bonuses, special pays, and educational loan repayments.

The Senate recedes with an amendment that would combine the provisions of the House bill and the Senate amendment.

Reimbursement of temporary lodging expenses (sec. 621)

The Senate amendment contained a provision (sec. 621) that would expand the current temporary lodging expense reimbursement authority from four to ten days for moves to or within the United States, and from two to five days for moves from a stateside location to one outside the United States.

The House bill contained no similar provision.

The House recedes with an amendment that would make April 1, 1994 the effective date of the provision.

Payment of losses incurred or collection of gains realized due to fluctuations in foreign currency in connection with housing members in private housing abroad (sec. 622)

The House bill contained a provision (sec. 622) that would amend section 405(d) of title 37, United States Code, to authorize service secretaries to pay or collect funds for non-recurring expenses incurred by

servicemembers as a result of the fluctuation of U.S. and foreign currencies while occupying private housing outside the United States.

The Senate amendment contained a similar provision (sec. 652).

The House recedes.

Revision of definition of dependents for purposes of allowances (sec. 631)

The House bill contained a provision (sec. 631) that would revise the definition of the term "dependent" for purposes of allowances (37 U.S.C. 401(a)) to include certain minors in the legal custody of a member of former member of the armed forces.

The Senate amendment contained no similar provision.

The Senate recedes with a technical amendment.

Clarification of eligibility for tuition assistance (sec. 632)

The House bill contained a provision (sec. 632) that would amend section 2007(c) of title 10, United States Code, to make clear that selected reserve officers serving on active duty or full-time National Guard duty, who are otherwise eligible to receive tuition assistance by virtue of their active service and agreement to serve on active duty for two years following completion of the training or education for which tuition assistance was provided, are not precluded from receiving such assistance.

The Senate amendment contained no similar provision.

The Senate recedes with a technical amendment.

Sense of Congress regarding the provision of excess leave and permissive temporary duty for members from outside the continental United States (sec. 633)

The Senate amendment contained a provision (sec. 655) that would express the sense of the Senate that the Secretary of Defense should ensure that a member whose home of record is outside the continental United States and who is stationed inside the continental United States at the time of separation be eligible to receive the same amount of excess leave or permissive temporary duty as a member who is stationed overseas. The provision would also require a report on other areas of inequitable treatment.

The House bill contained no similar provision.

The House recedes with an amendment that would express the sense of Congress on this issue and strike the required report.

Special pay for certain disabled members (sec. 634)

The Senate amendment contained a provision (sec. 631) that would authorize an individual who has a service-connected disability rated as total to be paid a special pay not to exceed the monthly amount of veterans disability compensation the person receives.

This provision would take effect unless the Department of Defense submits, by January 1, 1994, to the Committees on Armed Services of the Senate and House of Representatives the report required by section 641 of the National Defense Authorization Act for Fiscal Year 1993 (Public Law 102-484).

The House bill contained no similar provision.

The House recedes.

LEGISLATIVE PROVISIONS NOT ADOPTED

Permanent authority for former prisoners of war to claim payments because of violations of the Geneva Convention

The Senate amendment contained a provision (sec. 641) that would amend section 6 of

the War Claims Act of 1948 (50 App. U.S.C. 2005), as amended by Public Law 91-289 (84 Stat. 323), by making permanent the authority for former prisoners of war (POWs) to claim payment for violations of the Geneva Convention of August 12, 1949, by their captors. The Senate amendment would also sever the connection between payments to victims of terrorism and POWs.

The House bill contained no similar provision.

The Senate recedes.

Inclusion of victims of terrorism in certain title 37 benefits

The Senate amendment contained a provision (sec. 642) that would authorize the payment of certain benefits authorized under title 37, United States Code, to victims of terrorism and members of the uniformed services held as captives.

The House bill contained no similar provision.

The Senate recedes.

Pay for members of the uniformed services during times of war, hostilities, or national emergency

The Senate amendment contained a provision (sec. 651) that would authorize the Secretary of Defense to issue regulations to limit the direct pay to servicemembers engaged in combat operations overseas during time of war, hostilities, or national emergency declared by the Congress or the President.

The House bill contained no similar provision.

The Senate recedes.

Extension of Operation Desert Shield postponement of certain tax-related acts to other contingency operations

The Senate amendment contained a provision (sec. 653) that would amend section 7508 of title 26, United States Code, by extending Operation Desert Shield postponement of tax obligations and other certain acts to personnel overseas supporting a contingency operation.

The House bill contained no similar provision.

The Senate recedes noting the jurisdiction of the Committee on Ways and Means of the House of Representatives over tax legislation.

TITLE VII—HEALTH CARE PROVISIONS

LEGISLATIVE PROVISIONS

LEGISLATIVE PROVISIONS ADOPTED

Primary and preventive health care services for women (sec. 701)

The House bill contained a provision (sec. 701) that would define the authorized services available to female members, former members, and beneficiaries under chapter 55, title 10, United States Code, to include primary and preventive health care services for women.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would expand the definition of "primary and preventive health care services for women."

Revision of the definition of dependents for purposes of health benefits (sec. 702)

The House bill contained a provision (sec. 702) that would revise the definition of the term "dependent" for purposes of health benefits (10 U.S.C. 1072(2)) to include certain minors in the legal custody of a member or former member of the armed forces.

The Senate amendment contained no similar provision.

The Senate recesses with a technical amendment.

Authorization to expand enrollment in the dependents' dental program to certain members returning from overseas assignments (sec. 703)

The Senate amendment contained a provision (sec. 706) that would require the Secretary of Defense to take appropriate action to allow military personnel returning from an overseas assignment to be eligible to enroll in the dental insurance program authorized by section 701 of the National Defense Authorization Act for Fiscal Year 1993 (Public Law 102-484).

The House bill contained no similar provision.

The House recesses with an amendment that would: (1) permit the Secretary of Defense to expand the dependents' program to permit the enrollment of certain dependents without regard to the length of the uncompleted portion of the member's period of obligated service after March 31, 1994; (2) require a report from the Department of Defense on the advisability of expansion of the benefit; and (3) require a 30-day notification of the exercise of the authority provided.

Authorization to apply section 1079 payment rules for the spouse and children of a member who dies while on active duty (sec. 704)

The conferees became aware of a situation in which a surviving spouse or dependent may unexpectedly incur substantially higher out-of-pocket medical care costs under CHAMPUS when the servicemember dies on active duty. This situation might occur when the spouse or other dependent is involved in ongoing treatment for a medical condition such as pregnancy at the time the servicemember dies.

The conferees agree to a provision that would authorize the secretary concerned to continue to apply the payment provisions under section 1079(b) rather than the payment provisions under section 1086(b) of title 10, United States Code, with respect to the treatment for an illness or medical condition for which the dependent was receiving treatment at the time the servicemember died. The lower cost-sharing requirements would be authorized for the duration of the treatment of the illness or medical condition or one year, whichever is shorter.

The conferees intend to ensure that active duty families do not incur financial hardship for continued medical treatment following the death of the servicemember. The conferees note that the service secretaries may already authorize continued medical care in military hospitals under such circumstances to a secretarial "designee" but may not utilize designee status in order to continue to provide CHAMPUS coverage or to prescribe the continuation of the active duty dependent cost-sharing prescribed under section 1079(b) of title 10, United States Code. The conferees encourage the administering Secretary to use either secretarial designee status or the authority provided in this provision to continue treatment for a pre-existing illness or medical condition at the time of the servicemember's death, depending on which method is most beneficial and cost-effective.

Codification of CHAMPUS peer review organization program procedures (sec. 711)

The House bill contained a provision (sec. 712) that would codify existing procedures for the CHAMPUS peer review organization (PRO) program. In addition, this provision would authorize the Secretary of Defense to adopt any quality or utilization review re-

quirements and procedures in effect for the Medicare peer review organization program and adapt them to the circumstances of the CHAMPUS program.

The Senate amendment contained a similar provision (sec. 702).

The Senate recesses with a technical amendment.

Increased flexibility for personal services contracts in military medical treatment facilities (sec. 712)

The House bill contained a provision (sec. 717) that would amend title 10, United States Code, to expand the current authority to utilize personal services contracts to supplement military and federal civilian employees in military treatment facilities (MTFs). This provision would allow the Secretary of Defense to establish simplified contracting procedures in lieu of the current Federal Acquisition Regulations (FAR) and would increase the maximum pay cap to \$200,000. Finally, this provision would require the Secretary of Defense to report to the Committees on Armed Services of the Senate and House of Representatives after exercising this expanded authority. The report shall specify the number of individuals compensated at the higher level permitted by this provision, the medical specialties involved, and the salaries offered.

The Senate amendment contained no similar provision.

The Senate recesses with a technical amendment. The conferees note that personal services contract personnel are utilized when the military treatment facility needs health care providers who will be subject to the same day-to-day supervision and controls that apply to military personnel and civil service employees. Personal services contract personnel are therefore considered to be employees for purposes of job performance, supervisory authority, quality assurance requirements, tort liability, and other purposes. However, they are exempt from civil service rules and civilian end strength limits. The regulations issued under the new authority should be consistent with these requirements.

Expansion of the program for the collection of health care costs from third-party payers (sec. 713)

The House bill contained a provision (sec. 718) that would strengthen the current authority for the Department of Defense to collect health care costs for services provided in military hospitals from insurance companies and other third party payers. The provision also would clarify congressional intent that collected funds be earmarked for use at the medical facility responsible for collecting the funds, and require the Secretary of Defense to report annually on the level of funds collected at each military treatment facility and the budget request for the operation of that facility.

The Senate amendment contained no similar provision.

The Senate recesses with an amendment that would modify the reporting requirements.

Alternative resources allocation method for medical facilities of the uniformed services (sec. 714)

The House bill contained a provision (sec. 719) that would revise the current statute that requires the use of diagnosis-related groups (DRGs) to allocate funds to military treatment facilities (MTFs). This provision would allow the Department of Defense to use either the current DRG-based method or institute a capitation-based method to allocate resources to MTFs.

The Senate amendment contained no similar provision.

The Senate recesses.

Federal preemption regarding contracts for medical and dental care (sec. 715)

The House bill contained a provision (sec. 713) that would permit the preemption of state or local government law or regulation for health care contracts to the extent that the Secretary of Defense determines that the state or local government law or regulation is inconsistent with a specific provision in the contract, or that such preemption is necessary to implement or operate the contract or to achieve other important federal interests.

The Senate amendment contained no similar provision.

The Senate recesses.

Specialized treatment facility program authority and issuance of nonavailability of health care statements (sec. 716)

The House bill contained a provision (sec. 711) that would extend until October 1, 1995, and revise the authority provided by sections 711 and 715 of the National Defense Authorization Act for Fiscal Years 1992 and 1993 (Public Law 101-190) concerning the specialized treatment facility (STF) program. This section would allow the designation of civilian STFs with service areas comparable in size to military STFs and authorize payment of transportation and related expenses for travel to STFs when it is determined that such care is cost-effective.

The Senate amendment contained a similar provision (sec. 701).

The House recesses with a technical amendment.

Delay of termination authority regarding status of certain facilities as uniformed services treatment facilities (sec. 717)

The House bill contained a provision (sec. 714) that would extend until December 31, 1995, the designation of ten former Public Health Service hospitals and clinics as uniformed services treatment facilities (USTFs).

The Senate amendment contained a similar provision (sec. 704) that would extend the designation for five years through fiscal year 1998.

The House recesses with an amendment that would: (1) extend the designation until December 31, 1996; and (2) require the Comptroller General and the Director of the Congressional Budget Office to evaluate jointly the participation agreements entered into between the USTFs and the Secretary of Defense and to report the results of that evaluation to Congress not later than six months after the date of enactment of this act.

The conferees expect the Department of Defense to develop and implement a plan to introduce competitive managed care into the areas now served by the USTFs to stimulate competition among health care provider organizations for the cost-effective provision of quality health care services. The conferees further expect that future programs be incorporated under the umbrella of national health care reform and its attendant emphasis on competition. The Department should provide periodic progress reports to the Committees on Armed Services of the Senate and House of Representatives on the implementation of such a plan.

Managed-care delivery and reimbursement model for the uniformed services treatment facilities (sec. 718)

The House bill contained a provision (sec. 715) that would direct the Secretary of Defense to begin operation of the managed-care

delivery and reimbursement model in the uniformed services treatment facilities not later than October 1, 1993. In addition, this section would authorize the imposition of reasonable charges for inpatient and outpatient care under the managed-care model.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would: (1) delay the October 1, 1993, effective date until the date of enactment of this act; (2) require an independent evaluation by a federally funded research and development center of the performance of each uniformed services treatment facility under the managed care delivery and reimbursement model; and (3) require a report to be submitted to the Committees on Armed Services of the Senate and House of Representatives not later than December 31, 1995. The conferees expect this independent review and cost analysis to be similar to that done by the RAND Corporation in connection with the expansion of the CHAMPUS reform initiative.

Flexible deadline for continuation of CHAMPUS reform initiative in Hawaii and California (sec. 719)

The Senate amendment contained a provision (sec. 703) that would amend section 713(b) of the National Defense Authorization Act for Fiscal Year 1993 (Public Law 101-484) to provide flexibility with regard to the August 1, 1993, date for the delivery of CHAMPUS services under the new CHAMPUS reform initiative contract for California and Hawaii.

The House bill contained no similar provision.

The House recedes with an amendment that would permit the new contract to begin as soon as practicable after the date of enactment of this act.

Clarification of conditions on expansion of CHAMPUS reform initiative to other locations (sec. 720)

The House bill contained a provision (sec. 716) that would clarify that the cost-effectiveness criterion prescribed by section 712 of the National Defense Authorization Act for Fiscal Year 1993 (Public Law 102-484) for certification of the expansion of the CHAMPUS reform initiative (CRI) should be determined based on the combined cost of care in military treatment facilities and under the Civilian Health and Medical Program of the Uniformed Services (CHAMPUS), and not on a single baseline such as standard CHAMPUS. This provision would further require that the Secretary of Defense ensure that, under any revision to CRI necessary to achieve certification, enrolled beneficiaries should obtain health care services at reduced out-of-pocket cost relative to standard CHAMPUS.

The Senate amendment contained no similar provision.

The Senate recedes.

Report regarding demonstration programs for the sale of pharmaceuticals (sec. 721)

The House bill contained a provision (sec. 736) that would amend section 702 of the National Defense Authorization Act for Fiscal Year 1993 (Public Law 102-484) to direct the Secretary of Defense to report to the Committees on Armed Services of the Senate and House of Representatives on the feasibility and advisability of increasing the size of the geographic areas determined to be adversely affected by the closure of health care facilities of the uniformed services in order to expand the number of persons eligible to participate in the demonstration projects for pharmaceuticals by mail or retail pharmacy

networks. This provision would also direct the Secretary to evaluate the feasibility and advisability of expanding participation eligibility to all non-active duty beneficiaries currently eligible to receive medical care under chapter 55 of title 10, United States Code. This report would be submitted to the Committees on Armed Services of the Senate and House of Representatives not later than January 1, 1994.

The Senate amendment contained no similar provision.

The Senate recedes.

Use of health maintenance organization model as an option for military health care (sec. 731)

The House bill contained a provision (sec. 720) that would direct the Secretary of Defense to prescribe and implement, not later than December 15, 1993, a health benefit option and cost-sharing requirements modelled on health maintenance organization (HMO) plans in the private sector and other government health insurance programs.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would direct the Secretary of Defense to prescribe and implement the health benefit option and cost-sharing requirements by February 1, 1994.

Clarification of authority for graduate student program of the Uniformed Services University of the Health Sciences (sec. 732)

The House bill contained a provision (sec. 732) that would clarify the authority of the Uniformed Services University of the Health Sciences (USUHS) to operate a graduate student program for individuals who function as teaching and research assistants. This section would clarify that the commissioned status and service obligation requirements for students at USUHS contained in title 10, United States Code, apply only to medical students, not graduate students.

The Senate amendment contained no similar provision.

The Senate recedes.

Authority for the Armed Forces Institute of Pathology to obtain additional distinguished pathologists and scientists (sec. 733)

The House bill contained a provision (sec. 733) that would authorize the Secretary of Defense to waive, on a case-by-case basis, the current statutory limitation on the number of distinguished pathologists and scientists and allow the Armed Forces Institute of Pathology (AFIP) to enter into additional agreements for the services of distinguished pathologists and scientists.

The Senate amendment contained no similar provision.

The Senate recedes.

Authorization for automated medical record capability to be included in medical information system (sec. 734)

The House bill contained a provision (sec. 721) that would permit the Secretary of Defense to include an automated medical record capability in the Department's acquisition of the composite health care system (CHCS), as prescribed by section 704 of the National Defense Authorization Act for Fiscal Year 1987 (Public Law 99-661). This provision would further direct the Secretary of Defense to develop a plan to test the use of an automated medical records capability at one or more military medical treatment facilities.

The Senate amendment contained no similar provision.

The Senate recedes.

Report on the provision of primary and preventive health care services for women (sec. 735)

The House bill contained a provision (sec. 734) that would require the Secretary of Defense to submit a report to Congress evaluating the health care services provided to eligible women through military treatment facilities and CHAMPUS, and to assess the projected health care needs for women in the year 2000.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would refine the content of the report and establish October 1, 1994, as the due date for the report.

Independent study of former Arctic Medical Study (sec. 736)

The Senate amendment contained a provision (sec. 708) that would require the Department of Defense to conduct an independent study of an arctic medical study conducted during the 1950s using Native Americans as subjects.

The House bill contained no similar provision.

The House recedes with an amendment that would allow the Secretary of Defense to identify the source of the funds necessary for the study.

Availability of report regarding the CHAMPUS chiropractic demonstration (sec. 737)

The House bill contained a provision (sec. 735) that would express the sense of Congress that the Secretary of Defense should: (1) expedite the analysis of data derived from the Department of Defense two-year demonstration project to test the participation of chiropractors under CHAMPUS; (2) submit findings and recommendations to Congress not later than October 1, 1993; (3) make all data resulting from the demonstration project available to Congress, including the General Accounting Office; and (4) immediately proceed with the staff work required to implement the recommendations contained in the DOD analysis of the demonstration project.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would strike the House provision and instead require the Secretary of Defense to make available to interested persons the report prepared by the Secretary evaluating the chiropractic demonstration.

Sense of Congress regarding the provision of adequate medical care to covered beneficiaries under the military medical system (sec. 738)

The Senate amendment contained a provision (sec. 707) that would direct the Secretary of Defense to encourage increased use of physicians, dentists, and other health care professionals in the reserve components of the military services to provide care to retired military personnel.

The House bill contained no similar provision.

The House recedes with an amendment that would encourage the use of reserve component physicians, dentists, and other health care professionals to provide services to all authorized beneficiaries, especially retired military personnel.

LEGISLATIVE PROVISION NOT ADOPTED

Exclusion of experienced military physicians from Medicare definition of new physician

The Senate amendment contained a provision (sec. 705) that would amend title 18 of the Social Security Act by exempting physicians and health care practitioners who have

served more than four years in any branch of the uniformed services from treatment as a "new physician or practitioner" under Medicare payment, upon leaving the service.

The House bill contained no similar provision.

The Senate recedes noting that section 13515 of the Omnibus Budget Reconciliation Act of 1993 (Public Law 103-66) precludes the need for additional legislation.

TITLE VIII—ACQUISITION POLICY LEGISLATIVE PROVISIONS

LEGISLATIVE PROVISIONS ADOPTED

Manufacturing technology and industrial preparedness (sec. 801)

The budget request contained \$147.7 million for manufacturing technology and industrial preparedness in PE 63705D.

The House bill contained no funding in PE 63705D, but contained \$35.0 million for manufacturing technology for the Defense Logistics Agency, \$50.0 million for Army manufacturing technology, \$120.0 million for Navy manufacturing technology, and \$110.0 million for Air Force manufacturing technology.

The Senate amendment contained \$171.0 million for manufacturing technology in PE 63705D, \$20.0 million for Army manufacturing technology, \$50.0 million for Navy manufacturing technology, and \$60.0 million for Air Force manufacturing technology. The Senate amendment also contained a provision (sec. 801) that would provide a legislative framework for DOD manufacturing technologies and industrial preparedness programs, including requiring cost sharing and competition for dual use manufacturing technology programs.

The conferees note that the Department of Defense did not request any funds for manufacturing technology and industrial preparedness in the military departments. The conferees also note that this lack of funding is not difficult to understand in light of the fact that, in recent years, the service manufacturing technology programs have become almost totally earmarked for projects that are added by Congress with no competition, no cost sharing, and little or no review by the authorizing committees or the services.

In light of this difficult situation, the conferees recommend a \$112.5 million authorization, which includes \$3.0 million for the Navy Ramp program, for manufacturing and industrial preparedness to be distributed as directed by the Director, Defense Research and Engineering. The conferees concur with the Department of Defense that these funds should be consolidated within the Office of the Secretary of Defense. The conferees specifically deny authorization of any funds for the military departments' manufacturing technology and industrial preparedness programs. The conferees further direct that the funds authorized for manufacturing technology and industrial preparedness be utilized for manufacturing technology programs and centers already in existence. The conferees explicitly deny authorization for the initiation of any new manufacturing technology or industrial preparedness programs.

The conferees also direct the Director, Defense Research and Engineering to obtain cost sharing arrangements wherever possible for those on-going manufacturing technology programs that are to be funded.

The conferees agree that manufacturing technology programs should be awarded on the basis of competition. Manufacturing technology programs that have dual-use potential should be cost-shared. The conferees will closely monitor all contracts and grants

awarded under the manufacturing technology program to ensure this policy is implemented by the Department of Defense. The conferees also agree to jointly sponsor legislation next year to require that contracts and grants be awarded on the basis of merit-based competitive procedures and to prohibit the legislative earmarking of the award of contracts and grants using funds authorized and appropriated for the Department of Defense.

University research (sec. 802)

The budget request contained \$242.6 million for university research in PE 61103D.

The House bill would increase university research by \$32.0 million.

The Senate amendment would reduce university research by \$42.6 million and create a new program entitled university research support program with a \$42.6 million funding level. The Senate amendment contains a provision (sec. 802) that would reserve the funds in the university research support program for institutions that have received less than \$1.0 million in federal grants in the last three fiscal years. The provision also would require all university grants to be awarded on the basis of merit-based competition.

The conferees agree that the university research program should be funded at \$222.6 million. This includes \$20.0 million for the Department of Defense Dependent Schools Director's Fund for Science, Mathematics, and Engineering and \$20.0 million for the computer-assisted education program. The conferees also agree to establish the university research support program and recommend a \$20.0 million funding level for grants to institutions that received less than \$2.0 million in federal grants in the last two fiscal years. The conferees agree to require the competitive awarding of these funds.

In addition, the conferees agree to authorize: \$20.0 million for the defense experimental program to stimulate competitive research (DEPCOR); \$5.0 million for adaptive optics research; and \$7.0 million for magnetic materials microscopy.

Critical Technologies Institute (sec. 803)

The Senate amendment contained a provision (sec. 803) that would adjust the size and composition of the Critical Technologies Institute operating committee. The Administration had requested a smaller, streamlined committee.

The House bill contained no similar provision.

The House recedes with an amendment that would raise Department of Commerce representation to the Under Secretary level and include the Director of the National Science Foundation on the operating committee.

Historically black colleges and universities (sec. 811)

The House bill contained a provision (sec. 802) that would authorize funding for historically black colleges and universities and would require certain reports on the progress of the program.

The Senate amendment contained a provision (sec. 811) that would authorize funding, restate in law the definition of a minority institution, and create a new program for grants to colleges that have a substantial minority enrollment but which do not qualify as minority institutions.

The Senate recedes with an amendment that would add the definition of minority institution to the House provisions.

Pilot mentor-protégé program (sec. 813)

The Senate amendment contained a provision (sec. 813) that would authorize \$50.0 mil-

lion for the pilot mentor-protégé program. The provision also would: (1) improve public access to the program's policy guidance which provides most of its operating details; (2) expand the potential for equity investment in a protégé firm by its mentor; and (3) extend the existing statutory deadline for any new mentor-protégé program developmental assistance agreements by one year to avoid a lapse in the program if the National Defense Authorization Act for Fiscal Year 1995 is not enacted before September 30, 1994.

The House bill contained no similar provision.

The House recedes with an amendment that would delete the expansion of equity investment by a mentor. The conferees authorize \$50.0 million dollars for the mentor-protégé program.

Provisions to revise and consolidate certain acquisition laws (secs. 821-828)

The House bill contained provisions (sec. 811-816 and 819) that would revise and consolidate certain acquisition laws as recommended by the Advisory Panel on Streamlining and Codifying the Acquisition Laws. The House bill contained two other provisions (secs. 817 and 818) that would revise Department of Defense policies concerning the acquisition of commercial products. The provisions also would establish a simplified acquisition threshold for certain laws applicable to the Department of Defense to streamline procurements under \$100,000.

The Senate amendment contained no similar provisions.

The Senate recedes with an amendment. The conferees agree that action on the recommendations of the Administration's National Performance Review, should receive priority attention by the Congress. The federal government's acquisition policies, including those applicable to the Department of Defense, too often impede the degree of commercial-government integration that is crucial to a solid industrial and technology base capable of meeting national security requirements.

The conference agreement would substantially adopt the revisions and consolidations in sections 811-816 and 819 of the House bill. The provisions in sections 817 and 818 of the House bill, dealing with commercial product acquisitions and the simplified acquisition threshold, address issues that have government-wide implications. They are more appropriately considered in the context of a comprehensive acquisition reform effort.

Defense acquisition pilot programs (secs. 831-839)

The Senate amendment contained provisions (secs. 831-39) that would facilitate the Department of Defense's use of the acquisition pilot program authority established in section 809(b)(1) of the National Defense Authorization Act for Fiscal Year 1991. The Senate amendment also would establish congressional policies concerning the objectives to be achieved by the defense acquisition pilot programs.

The House bill contained no similar provisions.

The House recedes.

Indirect costs of higher education institutions (sec. 841)

The Senate amendment contained a provision (sec. 821) that would allow institutions of higher education to be reimbursed in a manner similar to other defense contractors when performing contracts for the Department of Defense.

The House bill contained no similar provisions.

The House recedes with an amendment that would prohibit the Secretary of Defense from imposing a limit on reimbursement of allowable indirect costs to institutions of higher education unless a similar limitation is imposed on other defense contractors performing similar contracts.

Prohibition on award of certain Department of Defense and Department of Energy contracts to entities controlled by a foreign government (sec. 824)

The Senate amendment contained two provisions (secs. 822 and 823) that would exclude those organizations or corporations that are owned, but not controlled, by foreign governments from the prohibitions in sections 835 and 836 of the National Defense Authorization act for Fiscal Year 1993.

The House bill contained no similar provisions.

The Senate recedes on section 822.

The House recedes on section 823 with an amendment that would not change the definition of the term "entity controlled by a foreign government" as the Senate provision proposes. The amendment would specify, however, that the term "entity controlled by a foreign government" does not include an organization or corporation that is owned, but is not controlled, either directly or indirectly, by a foreign government if the ownership of that organization or corporation by that foreign government was effective before October 23, 1992. The conferees note that the term "corporation" is intended to include a corporation's subsidiaries, divisions, and groups, whenever they become part of the corporation, as long as they are covered by the same industrial security arrangement with the Department of Defense as the corporation.

The General Accounting Office (GAO) is reviewing the effectiveness of the industrial security arrangements between the Department and foreign-owned defense contractors. The Armed Services Committees of the Senate and House of Representatives will consider the results of the GAO review in 1994 and determine whether any additional legislation in this area is necessary.

Reports by defense contractors of dealings with terrorist countries (sec. 843)

The House bill contained a provision (sec. 831) that would require the Secretary of Defense to acquire certain information from persons entering into contracts with the Department for an amount in excess of \$500,000. The information would concern commercial transactions which the contractor had conducted with any terrorist country.

The Senate amendment contained a similar but broader provision (sec. 824).

The Senate recedes with an amendment that would describe more specifically the information that would be acquired from defense contractors and the conditions under which that information would be provided.

Department of Defense purchases through other agencies (sec. 844)

The Senate amendment contained a provision (sec. 825) that would require the Secretary of Defense to issue regulations governing the exercise of the Department's authority under the Economy act (31 U.S.C. 1535) to purchase goods and services under contracts administered by another agency.

The House bill contained no similar provision.

The House recedes with a technical amendment. The conferees recognize that proper use of this authority can benefit the government. The conferees agree that revising existing regulations is appropriate to ensure

that this authority is exercised in a reasonable manner.

ARPA authority for pilot projects (sec. 845)

The Senate amendment contained a provision (sec. 826) that would allow the Advanced Research Projects Agency (AARP) to use cooperative agreements in the execution of certain pilot projects and demonstrations.

The House bill contained no similar provision.

The House recedes.

Pricing policies for ranges and test facilities (sec. 846)

The House bill contained a provision (sec. 824) that would allow the commander of certain Air Force facilities to use flexible pricing when negotiating prices for civilian use of the facilities.

The Senate amendment contained a similar provision (sec. 827) that would extend this policy to all Department of Defense ranges and test facilities.

The House recedes with a technical amendment.

Reports on contract bundling (sec. 847)

The House bill contained a provision (sec. 821) that would require the Secretary of Defense and the General Accounting Office (GAO) concurrently to study and report on the extent of so-called contract bundling in defense procurement and assess its impact on the participation of small business concerns and disadvantaged small business concerns.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would clarify the respective data collection, assessment, and reporting requirements the provision would impose on the Secretary of Defense and the Comptroller General. Because the provision would require the Department to submit data to the GAO by February 1, 1994, the conference agreement would not require the Department to collect any new data. The requested information would be compiled from the extensive contract data the Department already collects. Similarly, the conference agreement would require GAO only to compile existing information. Despite the limited time afforded, the conferees fully expect the reports to assess the adequacy of: (a) the information being collected concerning the bundling of contract requirements; (b) the regulations or other policy guidance to procurement officials regarding when contract requirements may be consolidated or bundled; and (c) the policy guidance and authority accorded to various small business advocates within the federal procurement system.

Prohibition on competition between defense activities and small businesses for certain maintenance contracts (sec. 848)

The House bill contained a provision (sec. 822) that would clarify existing law by prohibiting DOD activities from competing against small businesses on set-aside contracts.

The Senate amendment contained no similar provision.

The Senate recedes.

Buy American provisions (sec. 849)

The House bill contained four provisions (secs. 825, 826, 827, and 828) that would address the Buy American Act and related issues.

The Senate amendment contained no similar provisions.

The Senate recedes with an amendment that would: (1) specify that no funds authorized pursuant to this Act may be expended

by a Department of Defense entity unless the entity, in expending the funds, complies with the Buy American Act; (2) require the Secretary of Defense to determine whether a person who has been convicted of affixing a false "Made in America" label to a product should be debarred from contracting with the Defense Department; and (3) require the Secretary of Defense to rescind a blanket waiver of the Buy American Act for a foreign country which the Secretary has determined has violated the terms of a reciprocal defense procurement agreement with the United States.

Clarification of the Small Business Competitiveness Demonstration Program Act (sec. 850)

The House bill contained a provision (sec. 829) that would clarify the Small Business Competitiveness Demonstration Program Act of 1988 (Title VII of Public Law 100-656) to make explicit that firms providing engineering services for military and aerospace equipment, and firms providing marine engineering services, were not covered by the Demonstration Program Act. The provision would also clarify that the small business size standards applicable to firms providing such engineering services could be modified.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would amend the Small Business Competitiveness Demonstration Program Act to make explicit that only engineering services meeting the definition of architectural and engineering services found in section 901 of the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 541 (3)), and awarded pursuant to the selection procedures required by Title IX of that Act, are covered by the Demonstration Program Act. The other forms of engineering services included in SIC Code 8711 relating to weapons and other military and aerospace equipment as well as marine engineering services and naval architecture are not covered by the Demonstration Program Act. Section 202 of the Small Business Credit and Business Opportunity Enhancement Act of 1992 (Public Law 100-366) included amendments to the Demonstration Program Act that sought to express to the Small Business Administration (SBA) the same consistent congressional intent.

The conferees note that the SBA has issued a comprehensive proposal to increase existing small business size standards for public comment. The SBA excluded any proposal to increase the size standard for any of the subdivisions of SIC Code 8711 on the basis that it was prohibited from doing so by the Demonstration Program Act. The conferees direct the SBA Administrator to promptly modify the published size standard proposals to include those subdivisions of SIC Code 8711 which were not included in the Demonstration Program Act.

LEGISLATIVE PROVISIONS NOT ADOPTED

Clarification of requirement for domestic manufacture of propellers for ships funded under the fast sealift program

The House bill contained a provision (sec. 823) that would require all propeller castings and forgings for ships in the fast sealift program to be poured, finished, and manufactured in the United States.

The Senate amendment contained no similar provision.

The House recedes.

The conferees note that the Department of Defense has the authority to restrict procurements to domestic sources to protect the domestic industrial mobilization base. The

conferees, however, are concerned about reports that the base of domestic suppliers of forgings and castings for Navy ships may be shrinking too rapidly.

The conferees direct the Secretary of Defense to provide a report to the congressional defense committees on the U.S. industrial capacity to pour and finish non-ferrous castings for both fixed pitch (mono-bloc) and controllable-reversible pitch propellers. The report should address the implications of this capacity for U.S. import policy regarding such castings and forgings. The conferees direct the Secretary to submit this report no later than March 1, 1994.

Authority to dispose of equipment whose operation and support costs exceed costs of procuring replacement equipment

The House bill contained a provision (sec. 830) that would authorize the Secretary of the Army to dispose of equipment that is needed but which have operation and support costs that exceed the costs of procuring approved replacement equipment, or are major end items that still have commercial utility.

The Senate amendment contained no similar provision.

The House recedes. Under current DOD policies, revenues from the sale of excess equipment through the DOD property disposal process are used to fund the property disposal process. The conferees believe that returning at least a portion of the proceeds from the property disposal process to the selling service would provide an incentive for inventory managers in the military services to eliminate outdated inventory stocks and equipment. The conferees direct the Secretary of Defense to submit a report to the congressional defense committees no later than March 1, 1994, on the consequences of changing current DOD policies to return revenues from the property disposal process to the selling service.

TITLE IX—DEPARTMENT OF DEFENSE ORGANIZATION AND MANAGEMENT LEGISLATIVE PROVISIONS

LEGISLATIVE PROVISIONS ADOPTED

Enhanced position for Comptroller of Department of Defense (sec. 901)

The House bill contained a provision (sec. 901) that would elevate the Comptroller of the Department of Defense from Executive Schedule IV to level III.

The Senate amendment contained a provision (sec. 902) that would require the Comptroller to inform, in a timely manner, the congressional defense committees regarding all matters relating to the budgetary, fiscal, and analytic activities of the Department of Defense and under the supervision of the Comptroller.

The conferees believe that both provisions have merit and have adopted both of them, as well as a provision that would make the Comptroller the chief financial officer of the Department of Defense. Pursuant to the Chief Financial Officers Act (Public Law 101-576), an agency chief financial officer is charged with performing duties that are basically indistinguishable from those the Comptroller of the Department of Defense is required by law to perform.

New position of Under Secretary of Defense for Personnel and Readiness (sec. 903)

The House bill contained a provision (sec. 902) that would create a new position of Under Secretary of Defense for Personnel and Readiness at the Executive Schedule III level and would reduce the authorized number of Assistant Secretaries of Defense from 11 to 10.

The Senate amendment contained no similar provision.

The Senate recedes.

Redesignation of positions of Under Secretary and Deputy Under Secretary of Defense for Acquisition (sec. 904)

The House bill contained a provision (sec. 903) that would change the title of the Under Secretary and Deputy Under Secretary of Defense for Acquisition to the Under Secretary and Deputy Under Secretary of Defense for Acquisition and Technology.

The Senate amendment contained no similar provision.

The Senate recedes.

Assistant Secretary of Defense for Legislative Affairs (sec. 905)

The Senate amendment contained a provision (sec. 901) that would require that one of the Assistant Secretaries of Defense be the Assistant Secretary of Defense for Legislative Affairs.

The House bill contained no similar provision.

The House recedes.

Director of Operational Test and Evaluation (sec. 907)

The House bill contained a provision (sec. 905) that would delete the requirement that the Director of Operational Test and Evaluation (OT&E) report directly, without intervening review or approval, to the Secretary of Defense. The provision also would require the Director of OT&E to consult closely with the Under Secretary of Defense for Acquisition and Technology and all other officers and entities of the Department of Defense responsible for acquisition. The Director and his staff would remain independent of these other officials.

The Senate amendment contained no similar provision.

The Senate recedes.

The conferees believe that the OT&E function should be placed under the new Comptroller office as a logical complement to that office's expanded evaluative responsibilities. Accordingly, the conferees direct the Secretary to place the OT&E function in this office. The conferees are willing, however, to review any future legislative proposal to change these organizational arrangements.

Authority for award by National Defense University of certain master of science degrees and congressional findings on professional military education schools (secs. 921 and 922)

The House bill contained a provision (sec. 931) that would authorize the President of the National Defense University to award a master of science degree in national security strategy to graduates of the National War College and master of science degree in national resource strategy to graduates of the Industrial College of the Armed Forces.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would provide congressional findings on the primary mission and objectives of the service and joint professional military education schools and the need to maintain separate service and joint schools. Therefore, the conferees direct that no funds appropriated for fiscal year 1994 be obligated for the consolidation of any service professional military education schools under the National Defense University.

The conferees further direct that the regulations the Secretary of Defense prescribes require the National Defense University to satisfy the qualifications of the appropriate

regional education accreditation institution before awarding any master of science degrees.

Civilian faculty for the George C. Marshall European Center for Security Studies (sec. 923)

The House bill contained a provision (sec. 934) that would authorize the Secretary of Defense to hire as many civilians as the Secretary considers necessary as professors, instructors, and lecturers at the George C. Marshall European Center for Security Studies.

The Senate amendment contained a provision (sec. 1064) that would also authorize the Secretary of Defense to hire directors, deans, scholars, and researchers.

The Senate recedes with an amendment that would authorize the Secretary of Defense to hire a director and deputy director for the Marshall Center, as an exception to the normal statutory provisions of title 10, United States Code, relating to faculties for Department of Defense educational institutions. This exception is made in recognition of the Marshall Center's unique status. In the future, the conferees are willing to consider the addition of other positions should the Department justify the need for such positions.

Enhanced flexibility relating to requirements for service in a joint duty assignment (sec. 931)

The House bill contained a provision (sec. 946) that would extend the expiring joint equivalency waiver for an additional four years; require that an officer, who is promoted with such a waiver after January 1, 1994, to general or flag officer, serve in a joint duty assignment as a brigadier general or rear admiral (lower half) (0-7); and grant exceptional authority to the Secretary of Defense, on a case-by-case basis, to postpone such a joint duty assignment until such officer is promoted to major general or rear admiral (upper half) (0-8) if necessary due to a lack of available 0-7 joint billets. The provision would further require the Secretary of Defense to certify to Congress that each military service has developed and implemented a plan to adjust their personnel policies to permit the orderly promotion of officers after the extension expires. The provision also would make the expiring transitional "serving in" waiver authority a permanent waiver, provided an officer serves a minimum of six months before selection by an 0-7 promotion board and completes the required two-year minimum tour in that position.

The Senate amendment contained a provision (sec. 1021) that would extend the expiring waiver authority for nuclear propulsion officers for five additional years; extend the expiring joint equivalency waiver for five additional years; make the expiring "serving in" waiver permanent, provided the officer serves at least six months before the promotion board convenes and serves at least two years in an assignment within that same organization; and modify the "good of the service" waiver authority to allow a delay in a joint duty assignment if an appropriate joint duty billet is not available, but require that a full joint duty tour be served prior to promotion to 0-8.

The conferees are disturbed by the failure of the military services to prepare adequately for the expiration of the transitional joint duty waivers in 1994, especially because the transition waivers, originally provided for two years, have already been extended for a total of eight years. The conferees are forced, however, to recognize the need to provide additional flexibility for service in a

joint duty assignment as a prerequisite for promotion to general or flag officer.

Accordingly, the conferees agree to extend the expiring "joint equivalency" waiver for an additional five years, but impose a ceiling on such waivers of twenty percent of the officers selected for promotion during calendar year 1995, with a reduction of five percent per year thereafter. Officers promoted under this extended waiver authority, however, must serve in a joint duty assignment prior to their selection for appointment to lieutenant general or vice admiral (0-9).

The conferees also provide, as a modification to existing law, that until January 1, 1999, officers granted a "good of the service" waiver for promotion to 0-7 may serve the requisite joint duty assignment as a flag or general officer at any time prior to their selection for appointment to 0-9.

The conferees agree to make the current "serving in" waiver permanent, provided that the officer concerned has served a minimum of six months in a joint duty assignment before the promotion board that selects the officer for promotion to 0-7 convenes. Such an officer would have to serve at least two years in joint duty assignments within that same immediate organization.

Finally, the conferees agree to extend the expiring waiver for nuclear propulsion officers for an additional three years. The conferees urge the nuclear propulsion community to continue building on recent progress toward qualifying enough nuclear propulsion officers in joint duty assignments to fully comply with the statutory joint officer policy requirements. The conferees believe that after January 1, 1997, the "good of the service" waiver will be sufficient to meet the needs of nuclear propulsion officers who will not have served in a joint duty assignment by then, particularly in view of other actions taken in this area.

Joint duty credit for equivalent duty in Operation Desert Shield/Desert Storm (sec. 932)

The House bill contained a provision (sec. 946) that would clarify that joint duty credit for equivalent duty in Operation Desert Shield/Desert Storm shall be considered equivalent to joint duty credit derived through any other means provided by authorities in title 10, United States Code.

The Senate amendment contained a provision (sec. 1022) that would similarly clarify the effect of such joint duty credit. The provision also would provide a 60 day period in which the Secretary of Defense could correct inequities resulting from the decisions on prior requests for such credit as well as consider new requests when the Secretary determines that an officer was unable to submit such a request as a result of an operational assignment.

The House recedes with an amendment that would provide a 90 day period in which the Secretary of Defense may correct such inequities.

Flexibility for required post-education joint duty assignment (sec. 933)

The House bill contained a provision (sec. 947) that would provide additional flexibility in the assignment of officers graduating from joint professional military education (JPME) schools by allowing up to one-half of the required 50 percent of officers to fulfill the post-JPME requirements during a second assignment following graduation.

The Senate amendment contained no similar provision.

The Senate recedes.

Reserve command arrangements (sec. 941)

The House bill contained provisions (secs. 921-924) that would require the secretaries of

the military departments to establish separate reserve commands reporting directly to the service chiefs of staff.

The Senate amendment contained no similar provisions.

The Senate recedes with an amendment that would amend section 903 of the National Defense Authorization Act for Fiscal Year 1991 (Public Law 101-510) by making the Army Reserve Command a separate Army command that is commanded by the Chief of Army Reserve, substituting the Commander-in-Chief of the United States Atlantic Command (CINCUSA) for the Commander-in-Chief of the Forces Command (CINCFOR), and repealing subsections (c) through (e) of that section.

The conferees believe that the Army Reserve Command should be a permanent and separate command of the Army. Thus, they recommend repealing those provisions of the National Defense Authorization Act for Fiscal Year 1991 inconsistent with the permanent and separate status of the command.

The substitution of CINCUSA for CINCFOR reflects the recent change in the Unified Command Plan (UCP) whereby Forces Command no longer has "specified" combatant command status. Under the UCP change, the United States Atlantic Command, an existing "unified" combatant command with an area of responsibility of the Atlantic Ocean and the Caribbean Sea, was further invested with the combatant command of Forces Command, Air Combat Command, Navy Atlantic Fleet, and Marine Forces Atlantic. It was also given responsibility for planning the land defense of CONUS and for joint training, force packaging, and facilitating deployments.

The House conferees note that the National Defense Authorization Act for Fiscal Year 1991 directed the Army to establish a Reserve Command for a two-year test period. This compromise agreement further provided that the Army Reserve Command would be subordinate to Forces Command, and would be subject to an assessment by an independent commission established by the Secretary of the Army. In October 1992, the commission issued its assessment and unanimously recommended that the Army Reserve Command become a major Army command that would report to the Army Chief of Staff, a structure similar to that of the Air Force Reserve Command. One agreement reached by the conferees this year provides that the existing Army Reserve Command be a separate Army command. The House conferees note that this incremental step presents the Army with an excellent opportunity to implement the commission recommendations in this area.

Flexibility in administering requirement for annual four percent reduction in number of personnel assigned to headquarters and headquarters support activities (sec. 942)

The House bill contained a provision (sec. 945) that would provide the Secretary of Defense with additional flexibility in reducing the number of personnel assigned to headquarters and headquarters support activities by allowing reductions in excess of the mandated four percent realized in any given year to be applied toward reductions for any succeeding year.

The Senate amendment contained no similar provision.

The Senate recedes.

Report on Department of Defense Bottom Up Review (sec. 943)

The House bill contained a provision (sec. 949) that would require the Secretary of De-

fense to submit a report in classified and unclassified forms to the congressional defense committees on the Bottom Up Review.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would change the reporting date and focus the report only on those issues that were not comprehensively addressed in the October 1993 Report on the Bottom Up Review. The Congress received this report after the House passed its bill.

Organization of the Office of the Chief of Naval Operations (sec. 944)

The Senate amendment contained a provision (sec. 903) that would delete the sunset provision in section 5038 of title 10, United States Code, which created the Director of Expeditionary Warfare position in the Office of the Chief of Naval Operations.

The House bill contained no similar provision.

The House recedes.

Increase in amount for CINC Initiative Fund (sec. 945)

The House bill contained a provision (sec. 1008) that would increase the amount requested for the CINC Initiative fund by \$5.0 million to \$30.0 million.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would authorize \$30.0 million to be appropriated pursuant to Defense-wide activities for the CINC Initiative Fund.

Commission on roles and missions (secs. 951-960)

The House bill contained provisions (title XIV) that would establish a commission on roles and missions of the armed forces. This action stemmed from a dissatisfaction with the scope of the roles and missions reforms recommended by the Chairman of the Joint Chiefs of Staff earlier this year in his triennial report. The provisions would require the President to appoint commission members for five-year terms. The provisions would also establish procedures by which the commission would annually review the implementing actions of the Department of Defense.

The Senate amendment contained no similar provisions.

The Senate recedes with an amendment that would shorten the commission's term, provide for the appointment of its members by the Secretary of Defense, and delete the requirement for the commission to review the actions of the Department of Defense. The conferees expect the commission to provide an adequate basis for further action on roles and missions and believe that it will energize the Department of Defense to address these issues more comprehensively.

LEGISLATIVE PROVISIONS NOT ADOPTED

Student loads at war colleges and command and staff colleges

The House bill contained a provision (sec. 422) that would require the number of students at the senior war colleges and command and staff colleges to remain at the same level as enrolled on October 1, 1992. The intent was to ensure that enrollment at the colleges would not be reduced as the size of the services decreased.

The Senate bill contained no similar provision.

The House recedes.

The conferees agree on the continuing importance of professional military education (PME), especially at this time of great political change in the world. The end of the Cold War has taken away the certainties that

guided American defense policies for more than two generations. If a smaller military is to handle the challenges of the late 20th and early 21st centuries, it must do so with officers educated to the same high standards as those that exist today.

The conferees are encouraged that the budgeted workload for most of the intermediate and senior level PME schools is higher in fiscal year 1994 than in fiscal year 1992. The conferees agree that quality instructional programs at each of the intermediate and senior level PME schools must remain high and enrollments robust.

The conferees request the Secretary of Defense to submit a report to the congressional defense committees by June 1, 1994 projecting student and faculty size over the period of the future years defense program for each intermediate and senior level service and joint PME school.

Redesignation of Armed Forces Staff College

The House bill contained a provision (sec. 932) that would redesignate the "Armed Forces Staff College" at Norfolk, Virginia, as the "Joint Armed Forces Staff College."

The Senate amendment contained no similar provision.

The House recedes.

Location of the new Joint Warfighting Center

The House bill contained a provision (sec. 933) that would require the new Joint Warfighting Center to be located at the Armed Forces Staff College (AFSC) in Norfolk, Virginia.

The Senate amendment contained a provision (sec. 1086) that would require the Center to be located with the Army Training and Doctrine Command At Ft. Monroe, Virginia.

The conferees agree to delete both provisions.

The conferees are aware that the Department of Defense has decided to locate the Center at Ft. Monroe and accept that decision. The conferees note that there are no current Department of Defense plans to upgrade the wargaming capability at the Armed Forces Staff College. The conferees urge that this situation be corrected and that the Department of Defense, particularly the Chairman of the Joint Chiefs of Staff and the Secretary of the Navy, develop plans for a wargaming capability at AFSC comparable to those at the Army, Navy, and Air Force professional military education schools. The conferees expect the Department of Defense budget for fiscal year 1995 to contain a request for funding to upgrade the wargaming capability at AFSC.

The conferees strongly support the establishment of the Joint Warfighting Center and are confident that it will contribute significantly to improving the development of joint doctrine and the capability of the armed forces to plan and execute combat operations as an integrated team. The conferees believe that the joint professional military education schools of the National Defense University—the National War College, the Industrial College of the Armed Forces, and the Armed Forces Staff College (AFSC)—should have a role in the development of joint doctrine. The conferees note that the AFSC is located in the Tidewater area close to the Joint Doctrine Center that will now be a part of the Joint Warfighting Center, as well as service doctrine development centers. Consequently, the conferees direct that the concept for the Joint Warfighting Center should include strong institutional linkage to the schools of the National Defense University in the area of joint doctrine development.

Assignment of reserve forces

The House bill contained a provision (sec. 941) that would amend existing law to delete the requirement for the assignment of reserve forces to the combatant commands.

The Senate amendment contained no similar provision.

The House recedes.

The House conferees believe that the issue raised by section 941 of the House bill transcends the question of who retains the authority to assign reserve component forces. While section 162(a) of title 10, United States Code, provides that the "secretaries of the military departments shall assign all forces under their jurisdiction to the unified and specified combatant commands," the House conferees believe that the ultimate responsibility and concomitant authority over any unit, reserve or active, that has not attained a specified level of combat preparedness should reside with the service secretaries, consistent with their statutory charter to organize, train, and equip forces under their respective military departments.

Moratorium on merger of Space Command and Strategic Command

The House bill contained a provision (sec. 942) that would place a moratorium on the proposed merger of the U.S. Space Command (SPACECOM) and the U.S. Strategic Command (STRATCOM) until December 1, 1994. The provision also would require the General Accounting Office to conduct a cost-benefit analysis of the proposed merger.

The Senate amendment contained no similar provision.

The House recedes.

The House conferees note that the recommendation to consolidate SPACECOM into STRATCOM, contained in the February 1993 Roles and Mission Report, has been under review by the Joint Staff pursuant to the direction of the Secretary of Defense. The preliminary results of this review indicate that any savings realized from a consolidation would be limited to manpower savings and that similar manpower savings may be achievable without actually merging the commands. The House conferees further note that the Chairman of the Joint Chiefs of Staff has stated that he is not convinced that the proposed merger is a good idea.

The House conferees believe that, should the proposal to merge SPACECOM and STRATCOM be reconsidered in the future, the Department should consider assessing: (1) the associated cost savings; (2) complications resulting from vesting a single organization with the separate functional responsibilities; (3) the impact of such a merger on the organization visibility and priority of space-related issues within the Department of Defense; and (4) the impact of a merger on existing United States-Canada defense agreements.

Report on options for organizational structure for imagery collection functions

The House bill contained a provision (sec. 948) that would require the Secretary of Defense, in consultation with the Director of Central Intelligence, to assess alternative organizational options for the execution of imagery management within the intelligence community. The provision would further restrict the elimination, consolidation, or restructuring of the Central Imagery Office until a report on the assessment is submitted to the Armed Services and Intelligence Committees of the Senate and House of Representatives.

The Senate amendment contained no similar provision.

The House recedes.

TITLE X—ENVIRONMENTAL PROVISIONS LEGISLATIVE PROVISIONS

LEGISLATIVE PROVISIONS ADOPTED

Modification of annual environmental reports (sec. 1001)

The House bill contained a provision (sec. 381) that would amend the annual Department of Defense reporting requirements for environmental restoration programs. The amendment would require the reports to include the amount of funds obligated for each response action for each facility at a military installation in the preceding year and the anticipated costs of, and progress on, response actions in the next fiscal year. In addition, the amendment would require the report to include a projection of both the cost and the time to complete the response actions at each military installation.

The Senate amendment contained a similar provision (sec. 324) but would include a requirement to identify the funding requirements for environmental restoration during each of the five years following the year covered by the report.

The conferees have combined the two provisions so that the annual reporting requirement will include the features in the Senate and House provisions. The conferees agree, however, that the report should be prepared based on the installation as a whole rather than by facility. The conferees urge the Department of Defense and the military services to have for public review more detailed information on the funding requirements and the progress on the individual environmental restoration actions at the installation.

Annual report on reimbursement of contractor environmental response costs for other than response action contractors (sec. 1001(c))

The House bill contained a provision (sec. 383) that would require the Secretary of Defense to submit an annual report on the amount of payments made or expected to be made to defense contractors for environmental response costs at contractor-owned or -operated facilities.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would limit the reporting requirement to the 100 companies that receive the largest dollar volume of prime contracts awarded by the Department of Defense during the fiscal year covered by the report. The first report would be due in 1995.

Indemnification of transferees of closing defense property (sec. 1002)

The House bill contained a provision (sec. 382) that would amend section 330 of the National Defense Authorization Act for Fiscal Year 1993 (Public Law 102-484) to: (1) include petroleum products in the materials for which indemnification is provided; (2) indemnify transferees for all damages arising from Department of Defense contractor activities, except the activities of response action contractors; and (3) clarify that the existing law would exclude transferees from indemnification where the transferee's own actions resulted in the contamination of the property.

The Senate amendment contained a similar provision (sec. 327) that would include petroleum products and also, would clarify that the indemnification extends to contractors carrying out defense activities and to transferees who control base closure property through leases.

The conferees agree to delete both provisions and to only amend section 330 of the National Defense Authorization Act for Fiscal Year 1993 (Public Law 102-484) to include

petroleum products in the materials for which indemnification is provided. The conferees believe that the provision would prevent transferees who have caused or contributed to the contamination from being indemnified.

Shipboard plastic and solid waste control (sec. 1003)

The Senate amendment contained a provision (sec. 328) that would establish deadlines beyond which Navy surface ships could no longer dispose of plastics at sea (after 1998) or plastic and wastes other than food wastes in special areas (after 2000) and that would establish a deadline (2008) for submarines. The provision would also establish a number of interim deadlines that would keep the Navy on track to meet the disposal deadlines.

The House bill contained no similar provision.

The House recedes with an amendment that would allow the President to exempt the Navy from compliance with the interim deadlines if the President determines that an exemption is in the national interest. The amendment also would exempt the Navy from compliance with the final deadlines in the event of a declaration of war or national emergency. This provision also would require the Navy to comply with Annex V of the Marpol Convention as expeditiously and as cost-effectively as possible.

Extension of applicability period for reimbursement for certain liabilities arising under hazardous waste contracts (sec. 1004)

The Senate amendment contained a provision (sec. 325) that would extend section 2708 of title 10, United States Code, for three additional years through fiscal year 1996. The provision would require owners and operators of hazardous waste facilities that have contracts with the Department of Defense, and that receive DOD hazardous waste, to reimburse the Department for all liabilities, costs, damages, or fines that are assessed against the Department due to the contractor's breach of contract or negligence.

The House bill contained no similar provision.

The House recedes.

Prohibition on the purchase of surety bonds and other guaranties for the Department of Defense (sec. 1005)

The Senate amendment contained a provision (sec. 326) that would prohibit the Department of Defense from purchasing surety bonds or other financial instruments that guarantee its direct performance.

The House bill contained no similar amendment.

The House recedes.

LEGISLATIVE PROVISION NOT ADOPTED

Funding for environmental restoration at military installations to be closed

The House bill contained a provision (sec. 2813) that would amend section 2906 of the Defense Base Closure and Realignment Act of 1990 (Public Law 101-510 as amended by section 2827 of Public Law 102-190) to allow funds from sources other than the base closure and realignment accounts to be used for environmental restoration of closing bases.

The Senate contained a similar provision (sec. 323).

The conferees agree to delete both provisions because there are adequate funds in the base closure and realignment (BRAC) accounts for fiscal year 1994 to conduct environmental remediation at closing bases. The conferees believe the BRAC accounts should remain the exclusive source of funding for this purpose.

TITLE XI—GENERAL PROVISIONS

LEGISLATIVE PROVISIONS

LEGISLATIVE PROVISIONS ADOPTED

Transfer authority (sec. 1101)

The House bill contained a provision (sec. 1001) that would allow the Department of Defense to transfer up to \$2 billion between accounts.

The Senate amendment contained a similar provision (sec. 1001) that would authorize transfer of up to \$1 billion.

The Senate recedes.

Clarification of scope of authorizations (sec. 1102)

The House bill contained a provision (sec. 1002) that would specify that no funds are authorized to be appropriated in this act for the Federal Bureau of Investigation.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would specify that no funds are authorized to be appropriated under this act for the Department of Justice.

Classified annex (sec. 1103)

There is a classified annex of legislative provisions to this conference report. The classified annex is incorporated by reference into this act and has the force and effect of law. The classified annex is available to the Senate and House of Representatives during consideration of this conference report, and will be made available to the President at the time of presentation of this legislation.

Revision of date for submittal of joint report on scoring of budget outlays (sec. 1104)

The Senate amendment contained a provision (sec. 1002) that would revise the date for submittal of the outlay report required by section 226 of title 10, United States Code.

The House bill contained no similar provision.

The House recedes.

Comptroller General audits of acceptance by Department of Defense of property, services, and contributions (sec. 1105)

The House bill contained a provision (sec. 1004) that would allow the Comptroller General to conduct audits of the Defense Cooperation Account at his discretion.

The Senate amendment contained a similar provision (sec. 1003).

The House recedes with a technical amendment.

Limitation on transferring defense funds to other departments and agencies (sec. 1106)

The House bill contained a provision (sec. 1006) that would require a certification from the Secretary of Defense before funds made available to the Department of Defense could be transferred to any other department or agency.

The Senate amendment contained no similar provision.

The Senate recedes with a technical amendment.

Sense of Congress concerning defense budget process (sec. 1107)

The House bill contained a provision (sec. 1007) that would express the sense of Congress concerning the defense budget process.

The Senate amendment contained no similar provision.

The Senate recedes with a technical amendment.

Funding structure for contingency operations (sec. 1108)

The House bill contained a provision (sec. 1008) that would authorize the Secretary of Defense to designate a military operation as

a national contingency operation. Congress would be notified about the designation, and the operating units which receive support services from a support unit would not have to reimburse the Defense Business Operations Fund (DBOF) for incremental costs of such support in an amount up to \$20.0 million. This amount could be increased by an additional \$20.0 million upon the President's notification to Congress. Reimbursement of amounts above \$40.0 million could be waived only after 30 days had elapsed since the Presidential notification and a joint resolution precluding obligation in excess of \$40.0 million had not been enacted by Congress under expedited procedures, unless the President declared a national emergency. The provision would require Presidential notification of a funding plan within two months of the beginning of a large-scale or long-term national contingency operation. Finally, the provision also would establish a "National Contingency Operation Personnel Fund" and authorize \$10.0 million for the fund for fiscal year 1994.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would authorize the Secretary of Defense to designate a military operation as a national contingency operation. This designation would permit operating units not to reimburse support units that operate through the Defense Business Operations Fund. The total unreimbursed funds resulting from such action would be limited to \$300.0 million at any one time. The amendment would require the Secretary of Defense to submit a financial plan to Congress within two months after the beginning of any military operation designated as a national contingency operation. The sum of \$10.0 million would be authorized to be appropriated for a fund, to be known as the National Contingency Operation Personnel Fund, for the incremental military personnel costs attributable to a national contingency operation. The amendment also would define the term "national contingency operation."

The conferees are deeply concerned over the cumulative negative impact the practice of diverting service operation and maintenance funds to finance unbudgeted contingency operations is having on overall military readiness. The conferees urge the Secretary of Defense to take full advantage of the authority provided by this provision to shield, whenever possible, service training and exercise accounts from the fiscal pressures created by the growing scope and number of unbudgeted contingency operations.

The conferees, however, intend this authority to be utilized only to cover the initial incremental costs of a military operation and not as a permanent alternate funding mechanism. The conferees do not want to jeopardize the integrity of the DBOF and want it clearly understood that the DBOF must be reimbursed through reprogrammings, transfers, supplemental appropriations, foreign contributions (as was done in Operation Desert Shield/Desert Storm), or some other funding means.

Authority for obligation of certain unauthorized fiscal year 1993 defense appropriations (sec. 1111)

The Senate amendment contained a provision (sec. 1011) that would authorize the obligation of \$4.3 billion in programs, projects, and activities for which the fiscal year 1993 appropriations exceeded the authorized amounts.

The House bill contained no similar provision.

The House recedes with a technical amendment.

Obligation of certain appropriations (sec. 1112)

The Senate amendment contained a provision (sec. 1012) that would prohibit the obligation of \$805.5 million in programs, projects, and activities for which fiscal year 1993 appropriations exceeded the authorized amounts.

The House bill contained no similar provision.

The House recedes with an amendment that would give the Secretary of Defense the discretion to award contracts for earmarked university research initiative projects using merit-based selection procedures.

Supplemental authorization of appropriations for fiscal year 1993 (sec. 1113)

The Senate amendment contained a provision (sec. 1014) that would authorize supplemental appropriations for fiscal year 1993 for the costs of Operation Restore Hope in Somalia, Operation Southern Watch in Iraq, and other matters.

The House bill contained no similar provision.

The House recedes with a technical amendment.

Support for law enforcement (sec. 1121)

The House bill contained a provision (sec. 1021) that would extend DoD support for law enforcement authorities contained in section 1004 of the National Defense Authorization Act for Fiscal Year 1991 through fiscal year 1995 and authorize \$40.0 million for support of law enforcement agencies for fiscal 1994.

The Senate amendment contained a provision (sec. 1061) that would amend section 1004(b) of the National Defense Authorization Act for Fiscal Year 1991 to authorize aerial and ground reconnaissance.

The conferees agree that support for law enforcement authorities should be extended through fiscal year 1995 and authorize \$40.0 million for such support during fiscal year 1994. The conferees further agree to amend section 1004(b) to authorize aerial and ground reconnaissance.

The conferees note that this reconnaissance authority is consistent with previous amendments to section 1004 of the National Defense Authorization Act for Fiscal Year 1991. An amendment to section 1004 by the National Defense Authorization Act for Fiscal Year 1993 has inadvertently prevented the Department from continuing activities within the United States, such as aerial reconnaissance of public lands to detect illicit narcotics production and processing. The conferees do not intend for this provision to expand significantly the Department of Defense's current authority to conduct operations outside the United States. To the extent that this authority is used for operations outside the United States, the conferees expect the Department to notify the appropriate congressional committees, as is currently the practice with respect to the use of authorities contained in sections 1004(b)(3), (4), and (5).

DEMAND REDUCTION ACTIVITIES

The conferees are aware that the Department plans to increase its demand reduction pilot outreach activities pursuant to the authority provided in section 1045 of the National Defense Authorization Act for Fiscal year 1993. The conferees encourage the Secretary to continue to pursue the innovative utilization of material, services, and personnel to carry out demand reduction activities in areas beyond the vicinity of military installations and National Guard facilities.

AIR RECONNAISSANCE LOW (ARL) TRANSFERS
As described elsewhere in this statement of managers, the conferees agree to transfer the procurement and the research and development portions of the ARL program from the counter-drug activities account to the Army. Additionally, the conferees agree to add \$14.0 million to the operation and maintenance funding in the counter-drug activities account for that program.

DRUG CONTROL STRATEGY

On October 20, 1993, after the Senate and House of Representatives had passed their bills, the Director of the Office of National Drug Control Policy (ONDCP) announced an interim national drug control strategy. In response to the interim strategy and the findings of an internal DOD comprehensive review, the Deputy Secretary of Defense issued new guidance for implementation of the national drug control policy on October 28, 1993.

The new guidance refocuses DOD interdiction efforts from the transit zone to the cocaine source nations and reaffirms efforts to support counter-drug law enforcement agencies and demand reduction, including an expansion of the community outreach programs that target "at-risk" youth.

The conferees are particularly encouraged with the planned redirection of counter-drug resources to support domestic law enforcement efforts. DOD support for counter-drug law enforcement, such as found along the southwest border of the United States, should receive priority consideration as the Administration and the Department continue to refine the national drug control policy.

This overall redirection should enable the Department to carry out its counter-drug efforts at far lower cost, thus allowing a reduction in the country-drug budget. Accordingly, the conferees reduce the requested funding for the counter-drug budget by \$300.0 million. The table that follows details the action taken by the conferees.

Drug Interdiction and Counter-Drug Activities (Operation and Maintenance)

[In thousands of dollars]

Fiscal year 1994 drug interdiction and counter-drug activities, O&M request ..	\$1,168,200
Reductions:	
Project 2314 (T) air reconnaissance low (proc,R&D)	49,898
Project 2306 sea-based aerostat (SBA)	25,544

Total increases	69,198
Fiscal Year 1994 drug interdiction and counter-drug activities, O&M budget ...	868,200
<i>Procurement of law enforcement equipment (sec. 1122)</i>	
The House bill contained a provision (sec. 1023) that would require the Secretary of Defense to establish procedures under which states and local governments may purchase law enforcement equipment in conjunction	

with the Department of Defense. The procedures would require advance payment for such equipment and reimbursement of the Department's administrative costs. Additionally, the purchasing states would be responsible for arranging and paying for shipment of the equipment to the localities within the state.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would limit the purchases to law enforcement equipment suitable for counter-drug activities and preclude equipment that the Department of Defense does not procure for its own purposes.

Review of Air Force plans to transfer heavy bombers to reserve component units (sec. 1131)

The Senate amendment contained a provision (sec. 1031) that would require the Secretary of Defense to review current Air Force plans for transferring a portion of the current heavy bomber inventory to Air National Guard and Air Force Reserve units. The provision would require the Secretary to report to the congressional defense committees on the results of his review.

The House bill contained no similar provision.

The House recedes.

Award of the Navy Expeditionary Medal (sec. 1142)

The Senate amendment contained a provision (sec. 1080) that would express the sense of the Senate that the Secretary of the Navy award the Navy Expeditionary Medal to those members who served in Task Force 16 during April 1942, which culminated in the air raid known as the "Doolittle raid on Tokyo".

The House bill contained no similar provision.

The House recedes.

Award of gold star lapel buttons to survivors of servicemembers killed by terrorist acts (sec. 1143)

The House bill contained a provision (sec. 1033) that would amend section 1126 of title 10, United States Code, to authorize the award of the gold star lapel button to survivors of servicemembers who lose or lost their lives after March 28, 1973 in terrorist acts or attacks; or military operations while serving outside the United States (including the commonwealths, territories, and possessions of the United States) as part of a peacekeeping force.

The Senate amendment contained no similar provision.

The Senate recedes.

Termination of certain Department of Defense reporting requirements (sec. 1151)

The Senate amendment contained a provision (sec. 1091) that would require the Secretary of Defense to submit, no later than April 30, 1994, a list of the reports required of the Department of Defense by law that the Secretary determines are unnecessary or incompatible with efficient management. The provision would specify that, unless reenacted into law, the requirement for any report included on the list would expire on October 30, 1995.

The House bill contained no similar provision.

The House recedes with an amendment that would: (1) require the Secretary of Defense to explain the Secretary's reasons for considering a report unnecessary or incompatible with efficient management; and (2) specify that nothing in the section shall be

interpreted to require a review of all reports required of the Department of Defense by law.

Reports relating to certain special access programs and similar programs (sec. 1152)

The House bill contained a provision (sec. 3131) that would improve congressional oversight of Department of Energy special access program carried out under the Department's atomic energy defense activities.

The Senate amendment contained a provision (sec. 1092) that would direct the head of any federal department or agency that carries out a special access program to submit to the appropriate congressional oversight committees, in conjunction with the submission of a budget for the next fiscal year, a report on each special access program carried out in the department or agency.

The House recedes with an amendment that would allow the Department of Defense, the Department of Energy, and the intelligence community to continue to report on special access programs in accordance with existing law.

The conferees intend these provisions to improve and make uniform congressional oversight of special access programs uniform by requiring that comprehensive data on all special access program be reported to Congress. The conferees encourage the heads of the various covered federal departments and agencies to coordinate and follow the Department of Defense's lead in the preparation and submission of these reports in a uniform manner.

Identification of service in Vietnam in the computerized index of the National Personnel Records Center (sec. 1153)

The House bill contained a provision (sec. 1042) that would require the Secretary of Defense to include in the computerized index of the National Personnel Records Center in St. Louis, Missouri, an indicator to allow for searches or selection of military records of military personnel based upon service in the Southeast Asia theater of operations during the Vietnam conflict.

The Senate amendment contained no similar provision.

Recognizing the jurisdictions of the Department of Defense and the National Personnel Records Center, the Senate recedes with an amendment that would require the Secretary to assist the Center to establish an indicator in the computerized index. The amendment would also require the Secretary of Defense to submit to Congress a report, within 180 days after the date of enactment of this act, with a plan to establish the required indicator.

Manpower requirements to implement export controls (sec. 1154)

The Senate amendment contained a provision (sec. 1062) that would require the Secretary of Defense and the Secretary of Energy to submit a joint report to Congress 180 days after enactment of this act. The report would include a statement of the DOD and DOE role in implementing export controls on goods and technology related to nuclear, chemical, and biological weapons. The report would include information on the number of personnel and the skills of currently available personnel to perform these tasks; historical information from previous fiscal years; and recommendations for legislation to eliminate deficiencies and to improve interagency coordination.

The House bill contained no similar provision.

The House recedes.

Report on military food distribution practices (sec. 1155)

The Senate amendment contained a provision (sec. 1081) that would require the Secretary of Defense to conduct a review which evaluates the feasibility of and economic benefits resulting from the expanded use of full-line distributors to deliver food directly to military end-users.

The House bill contained no similar provision.

The House recedes.

Extremely low frequency communications system (sec. 1161)

The Senate amendment contained a provision (sec. 1072) that would express the sense of Congress that the Secretary of Defense should evaluate low frequency (ELF) communications system and any alternatives; that the Secretary should convey the results of this evaluation to Congress along with the fiscal year 1995 budget request; and that the ELF system should again be considered in the next round of military base closures.

The House bill contained no similar provision.

The House recedes with an amendment.

The conferees agree to require a report on the evaluation described in the Senate provision and delete the findings relating to funding priorities and the size of the national debt.

Importance of naval oceanography survey and research in the post-Cold War period (sec. 1162)

The Senate amendment included a provision (sec. 1074) that would express the sense of Congress that additional reductions in the level of oceanographic survey and research efforts should be avoided.

The House bill contained no similar provision.

The House recedes.

Sense of Congress regarding U.S. policy on reprocessing spent fuel (sec. 1163)

The House bill contained a provision (sec. 1047) that would express the sense of Congress that the start-up or continued operation of any plutonium separation plant presents serious environmental hazards and increases the risk of proliferation.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would express the sense of Congress that the President should urge the reduction or cessation of spent commercial nuclear reactor fuel reprocessing to recover plutonium for reactor fuel until the environmental and proliferation concerns related to such reprocessings have been resolved.

Prevention of entry into the United States of certain former members of the Iraqi armed forces (sec. 1164)

The Senate amendment contained a provision (sec. 1082) that would express the sense of the Senate that certain former members of the Iraqi armed forces should not be admitted into the United States unless the President made certain certifications to Congress.

The House bill contained no similar provision.

The House recedes. The House conferees note that the Senate provision expresses the "sense of the Senate". As such, it is neither binding law nor an attempt to amend existing immigration laws.

Memorial to U.S.S. Indianapolis (sec. 1165)

The House bill contained a provision (sec. 1040) that would designate the memorial to the U.S.S. *Indianapolis* in Indianapolis, Indiana as the national memorial to the U.S.S. *Indianapolis*.

The Senate amendment contained a similar provision (sec. 1066).

The House recedes with a technical amendment.

Procedures for handling war booty (sec. 1171)

The House bill contained a provision (sec. 1031) that would establish standards for the taking of battlefield souvenirs.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would establish standards and procedures governing the taking and disposition of battlefield souvenirs.

Transportation of cargoes by water (sec. 1173)

The Senate amendment contained a provision (sec. 1070) that would require the Department of Defense to consider the transportation and distribution capabilities of privately owned U.S. flag merchant vessels when studying DOD sealift and related intermodal transportation requirements. The provision also would require the Secretary of Defense to certify to the Secretary of Transportation at least annually that the Department of Defense had afforded these operators an opportunity to present information on these capabilities.

The House bill contained no similar provision.

The House recedes with an amendment. The conferees agree that there is no reason for the Secretary of Defense to make such a certification to the Secretary of Transportation.

Modification of authority to conduct National Guard civilian youth opportunities program (sec. 1174)

The House bill contained a provision (sec. 1036) that would clarify that the 10-state limitation on the conduct of the National Guard civilian youth opportunities program, authorized by section 1091 of the National Defense Authorization Act for Fiscal Year 1993 (Public Law 102-484), would not apply to short-term urban youth corps and youth conservation corps programs operated under the auspices of the National Guard. The House provision would clarify that the territories and the Commonwealth of Puerto Rico would be eligible to be included in the program, and that the Department of Defense may advance funds to the states in accordance with usual practices applicable to such assistance programs.

The Senate amendment contained a similar, broader provision (sec. 1063) that would amend the National Guard civilian youth opportunities program to remove the requirement that the program be limited to 10 states. It would also authorize the Department of Defense to use, in fiscal year 1994, funds authorized and appropriated for this program in fiscal year 1993.

The House recedes with an amendment that would delete the authority in the Senate provision to use, in fiscal year 1994, funds authorized and appropriated for this program in fiscal year 1993. The conferees understand that the fiscal year 1993 funds for the program will be fully utilized. In the future, the conferees expect the Department of Defense to seek adequate appropriations in future budgets for the conduct of this program.

Effective date for changes in Servicemen's Group Life Insurance Program (sec. 1175)

The Senate amendment contained a provision (sec. 1079) that would establish that the effective date and time for any change in benefits under the Servicemen's Group Life Insurance Program (SGLI) be based on the date and time according to the time zone im-

mediately west of the International Date Line.

The House bill contained no similar provision.

The House recedes noting that this provision passed the House of Representatives as a separate bill (H.R. 2647) on August 2, 1993.

Burial of remains at Arlington National Cemetery (sec. 1176)

The Senate amendment contained a provision (sec. 1071) that would make eligible for burial in Arlington National Cemetery, Virginia, any former prisoners of war who, having served honorably in active military, naval or air service, die on or after the date of enactment of this act.

The House bill contained no similar provision.

The House recedes with a technical amendment.

Redesignation of Hanford arid lands ecology reserve (sec. 1177)

The House bill contained a provision (sec. 1046) that would change the name of the Hanford Arid Lands Ecology Reserve in Richland, Washington, to the "Fitzner/Eberhardt Arid Lands Ecology Reserve."

The Senate amendment contained no similar provision.

The Senate recedes.

Aviation leadership program (sec. 1178)

The House bill contained a provision (sec. 1049) that would authorize the Secretary of the Air force to establish and maintain an aviation leadership program to provide undergraduate pilot training and necessary related training to selected personnel of the air forces of friendly, less-developed foreign nations.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would clarify that this program should be carried out under regulations prescribed by the Secretary of Defense.

Administrative improvements in Goldwater Scholarship and Excellence in Education program (sec. 1179)

The Senate amendment contained in a provision (sec. 1065) that would amend the Barry Goldwater Scholarship and Excellence in Education Act (title XIV of Public Law 99-661; 20 U.S.C. 4703) by deleting the requirement that the Goldwater Scholarship Foundation maintain an office in Washington D.C. and allowing it to maintain its office in the metropolitan Washington, D.C. area. In addition, the provision would permit a member of the Foundation board of trustees to continue to serve as a member of the board until a successor is appointed.

The House bill contained no similar provision.

The House recedes.

Transfer of obsolete destroyer tender Yosemite (sec. 1180)

The Senate amendment contained a provision (sec. 1069) that would permit the Secretary of the Navy to transfer the obsolete destroyer tender Yosemite to a nonprofit organization. This transfer would be made subject to such terms and conditions that the Secretary considers appropriate.

The House bill contained no similar provision.

The House recedes.

Transfer of obsolete heavy cruiser U.S.S. Salem (CA-139) (sec. 1181)

The conferees agree to a provision that would permit the Secretary of the Navy to transfer the obsolete heavy cruiser U.S.S.

Salem (CA-139) to the United States Naval Shipbuilding Museum in Quincy, Massachusetts. The Secretary would be required to determine that: (1) the ship is environmentally safe; (2) the museum has adequate financial resources to maintain the cruiser in a satisfactory condition; and (3) the ship is of no further use to the United States for national security purposes. The Secretary could also require such additional terms and conditions as he deems appropriate.

Technical amendments (sec. 1182)

The Senate amendment contained a provision (sec. 1090) that would codify and clarify certain provisions of law and make certain technical amendments.

The House bill contained no similar provision.

The House recedes with an amendment.

Security clearances for civilian employees (sec. 1183)

The House bill contained a provision (sec. 943) that would require the Department of Defense to provide DOD civilian employees with the same procedural safeguards that are available to employees of defense contractors with respect to revocation or denial of a security clearance. The procedural safeguards provided to employees of DOD contractors are set forth in Executive Order 10865. The Executive Order was issued in 1960 in response to the decision of the Supreme Court in *Greene v. McElroy*, 360 U.S. 474 (1959). The Executive Order does not apply to civilian employees of the Department of Defense.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require the Secretary of Defense to review the procedural safeguards available to DOD civilian employees facing denial or revocation of security clearances. The purpose of the review is to evaluate the procedural rights of DOD civilian employees in view of the fact that certain other federal employees, as well as DOD contractor employees, are afforded a greater degree of procedural protection in such proceedings.

The conference agreement would require the Secretary to address the fundamental procedural rights at issue in security clearance denials and revocations in view of the substantive differences between: (1) the rights provided to DOD civilian employees and DOD contractor employees; (2) the rights provided to DOD civilian employees and similarly situated civilian employees in other government agencies; and (3) the rights provided to both DOD civilian employees and contractor employees with respect to collateral security clearances and with respect to sensitive compartmented information and special access programs.

The conference agreement would require the Secretary to transmit his report to the Congress not later than March 1, 1994. The agreement also would require the Secretary to issue regulations revising security clearance procedures for DOD civilian employees not later than May 15, 1994.

The conferees direct the Secretary to ensure that the review specifically address each of the following procedural safeguards in the context of the denial or revocation of security clearances with respect to civilian employees of the Department of Defense: (1) notice of the reasons for the proposed denial or revocation; (2) an opportunity to respond; (3) the right to a hearing or other appearance before a tribunal; (4) the right to be represented by counsel; (5) the availability of trial-type procedures, such as the opportunity to present and cross-examine witnesses; and (6) the opportunity to appeal any

final decision. If the Secretary determines that DOD civilian employees should not be provided with procedural rights that are as protective as those afforded to DOD contractor employees with respect to any of the foregoing matters, the Secretary's rationale for each such difference should be set forth in the report.

The conferees note that the subject of security clearances within the Department of Defense is undergoing detailed review by the Joint Security Commission established by the Secretary of Defense and the Director of Central Intelligence, which is scheduled to complete its work by February 1, 1994. The conferees agree that the Secretary should obtain the Commission's views on the issues set forth in the conference agreement, but note that the final responsibility for addressing these issues and issuing implementing regulations rests with the Secretary.

Videotaping of investigative interviews (sec. 1184)

The House bill contained a provision (sec. 944) that would require the Secretary of Defense to carry out a program for videotaping subject and witness interviews by military criminal investigating organizations, as determined appropriate by the Secretary. The House bill would make \$2.5 million available for this program from funds authorized for operation and maintenance.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would authorize use of operation and maintenance funds for videotaping investigative interviews. The conferees also direct the Secretary of Defense to prescribe regulations establishing DOD policy on videotaping interviews in connection with both criminal and administrative investigations not later than March 1, 1994.

Investigations on deaths of members of the armed forces from self-inflicted causes (sec. 1185)

The House bill contained a provision (sec. 950) that would require the Department of Defense Inspector General to reinvestigate certain cases where members of the armed forces died from self-inflicted wounds.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require the Secretary of Defense to review the military departments' procedures to investigate the deaths of members of the armed forces from self-inflicted causes. The conferees agree that this review could be undertaken as part of the general review of DOD investigative procedures directed by the conference report on the National Defense Authorization Act for Fiscal Year 1993 (H. Rept. 102-966) or as a separate review.

The conference agreement also would establish standards and procedures for the review and reinvestigation by the Department of Defense Inspector General of previous cases where members of the armed forces died from self-inflicted causes. In addition, the conference agreement would require the Secretary of Transportation to establish similar standards and procedures for the Coast Guard.

Defense export loan guarantees (sec. 1186)

The House bill contained a provision (sec. 1360) that would prohibit the use of defense conversion funds to finance (either directly or through the use of loan guarantees) the sale or transfer of any defense articles or services to foreign countries. The provision would authorize the Secretary of Defense to

exempt the sale or transfer of defense articles or services for civilian end-use from this restriction.

The Senate amendment contained a provision (sec. 1052) that would authorize a one-year program of loan guarantees for defense exports to NATO members, Israel, Australia, Japan, and South Korea.

The House recedes with an amendment that would specify that none of the funds authorized in this act for defense conversion, reinvestment, and transition programs may be used to finance the subsidy cost of the loan guarantees issued under this provision. The amendment would also provide that the President may not issue guarantees unless, not later than 180 days after this act is enacted that, he certifies to Congress that: (1) he intends to issue loan guarantees under this section; (2) the exercise of the loan guarantee authority is consistent with the objectives of the Arms Export Control Act; and (3) the exercise of the loan guarantee authority is consistent with the U.S. policy on conventional arms sales and nonproliferation goals.

LEGISLATIVE PROVISIONS NOT ADOPTED

Report on Department of Defense counter-drug program

The House bill contained a provision (sec. 1022) that would require the Secretary of Defense to submit to Congress a report evaluating the consistency of the drug interdiction and counter-drug activities undertaken or supported by the Department with the national drug control strategy required to be submitted to Congress in 1994. The provision also would prohibit the expenditure of 25 percent of the Department's counter-drug budget until the Secretary of Defense certified that the Department's counter-drug program was consistent with the revised national drug control strategy.

The Senate bill contained no similar provision.

The House recedes.

The conferees note that this provision is no longer necessary in light of the recent interim national drug control strategy, the Department of Defense's comprehensive review of the DOD counter-drug program, and the new Department of Defense guidance for implementation of the national drug control policy.

The conferees note that the Department's comprehensive review of the DOD counter-drug program recommended a study of the number of CINC's with primary responsibility for counter-drugs, and all counter-drug intelligence functions, with a focus on consolidating intelligence activities and reducing personnel and resources. The conferees agree that recommendation and believe that counter-drug tactics and doctrine should also be evaluated. Accordingly, the conferees request the Secretary of Defense, in consultation with the Chairman of the Joint Chiefs of Staff, the Commander in Chief, U.S. Atlantic Command, and the Commander in Chief, U.S. Southern Command, to provide the congressional defense committees with a review of counter-drug operational structure, tactics and doctrine, and intelligence functions and centers.

Meeting of Interallied Confederation of Reserve Officers

The House bill contained a provision (sec. 1037) that would express the sense of Congress welcoming the attendees at a meeting of the Interallied Confederation of Reserve Officers.

The Senate amendment contained no similar provision.

The House recedes.

Requirement for transfer of air refueling aircraft to Reserve components of the Air Force

The Senate amendment contained a provision (sec. 1032) that would require that the Secretary of the Air Force to transfer enough KC-135R tanker aircraft from active component squadrons to the Reserve components to modernize two KC-135E squadrons.

The House bill contained no similar provision.

The Senate recedes.

The conferees have finally received the tanker force study required by the statement of managers (H. Rept. 102-966) accompanying the National Defense Authorization Act for Fiscal Year 1993. Although the report was submitted months late, the conferees understand that it was not based on the results of the Bottom-Up Review (BUR). The conferees expect the Department to adjust its tanker force structure in the future years defense program to reflect the BUR results.

TITLE XII—COOPERATIVE THREAT REDUCTION WITH STATES OF THE FORMER SOVIET UNION

LEGISLATIVE PROVISIONS

LEGISLATIVE PROVISIONS ADOPTED

Cooperative threat reduction with states of the former Soviet Union (secs. 1201-1209)

The budget request contained \$400.0 million for cooperative threat reduction with states of the former Soviet Union, continuing the programs authorized under the Former Soviet Union Demilitarization Act of 1992 (title XVI of Public Law 102-484) and the Soviet Nuclear Threat Reduction Act of 1991 (title II of Public Law 102-228).

The House bill recommended the amount requested and contained findings (sec. 1202), program authorities (sec. 1203), and notification and reporting requirements (secs. 1205 and 1207) similar to those of the past two years. The House bill also contained a provision (sec. 1206) that would authorize \$979.0 million from fiscal year 1993 defense accounts for assistance to the independent states of the former Soviet Union, the amount provided for such purposes from defense accounts in the Foreign Operations Appropriations Act for Fiscal Year 1994.

The Senate amendment contained provisions (title XI) that, in addition to the provisions in sections 1202, 1203, 1205 and 1207 of the House bill, would authorize programs to house military personnel released from military service in connection with the basic purposes of the title. The Senate amendment contained no provision similar to section 1206 of the House bill.

The conferees agree to combine the provisions of the House bill and the Senate amendment. The conferees are pleased that, for the first time, the budget request included funding for cooperative threat reduction with states of the former Soviet Union. Previously, these programs were established and continued only at congressional initiative.

The conferees believe that the main focus of the programs authorized under this title must be on the dismantling and non-proliferation of weapons of mass destruction. The conferees agree that carefully measured programs for defense conversion, environmental restoration, and housing may be required in specific instances to accomplish these goals. At the same time, the conferees believe strongly that funds authorized under this title for conversion, environmental clean-up, and housing should be utilized only when essential to demilitarization, and only when no funds are available for such programs. In the case of environmental restoration and housing, the conferees insist that

the Administration make every effort to draw upon \$190.0 million appropriated for housing programs in support of troop withdrawals, and the \$285.0 million appropriated to assist environmental restoration in the Foreign Operations Appropriations Act for Fiscal Year 1994.

The conferees agree that prudent U.S. assistance in demilitarizing defense industries in the former Soviet Union is in U.S. national security interests, and have included a provision that would authorize a demilitarization enterprise fund to facilitate such assistance. The conferees request the Administration to make every effort to utilize funds available in the Foreign Operations Appropriations Act for Fiscal Year 1994 and in the Freedom Support Act to assist defense conversion, which is vital to privatization, economic reform, and demilitarization.

The conferees urge the Administration to ensure that all aspects of U.S. assistance to the countries of the former Soviet Union are coordinated so that they are internally consistent, carefully prioritized, and mutually reinforcing. To this end, the conferees enjoin the Administration to coordinate the programs authorized under this title with all other relevant activities of the U.S. government.

TITLE XIII—DEFENSE CONVERSION, RE-INVESTMENT, AND TRANSITION ASSISTANCE

LEGISLATIVE PROVISIONS

LEGISLATIVE PROVISIONS ADOPTED

Defense conversion, reinvestment, and transition assistance programs (sec. 1302)

The House bill contained a provision (sec. 1302) that would summarize the amounts authorized for defense conversion, reinvestment, and transition assistance programs. The House provision would authorize \$2.735 billion for these programs.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment. The conferees agree to authorize \$2.553 billion for defense conversion, reinvestment, and transition assistance programs. The categories in the following table are from the Administration's May 4, 1993 budget presentation in this area.

FUNDING OF DEFENSE CONVERSION, REINVESTMENT, AND TRANSITION ASSISTANCE PROGRAMS IN FISCAL YEAR 1994

(In millions of dollars)

DEFENSE TECHNOLOGY CONVERSION & RE-INVESTMENT (FUNDING SOURCE)	Conference
PE 603570E TRP/Dual-Use Partnerships (R&D)	624,000
Shipbuilding Initiative (Procurement & R&D)	197,000
[Other Technology Reinvestment Programs, Subtotal]	[1,397,315]
of which: PE 602301E Computing & Communications (R&D)	326,318
PE 603745E SEMATECH (R&D)	90,000
PE 603226E Major Innovative Technologies (R&D)	54,000
PE 602708E Integrated Command and Control Technology (R&D)	100,000
PE 602712E Materials & Electronics Technology (R&D)	260,000
PE 603739E Electronics Manufacturing/Lithography (R&D)	342,340
PE 601101E Defense Research Sciences (R&D)	79,657
Small Business Innovative Research (SBIR) (R&D)	145,000
Subtotal	2,218,315

¹ Figure represents only that part of SBIR program counted as part of technology reinvestment.

PERSONNEL TRANSITION ASSISTANCE (FUNDING SOURCE)	Conference
Troops to Teachers (O&M)	¹ (10)
Troops to Law Enforcement & Health Care (O&M)	¹ (10)
Environmental Training Grant for Higher Ed Institution (O&M)	¹ (10)
Environmental Clean-up Placement for Veterans (O&M)	¹ (10)
Occupational Conversion & Training (VA) (O&M)	25

PERSONNEL TRANSITION ASSISTANCE (FUNDING SOURCE)	Conference
Separation Pay & Health Benefits (O&M)	100
Transition & Relocation Assistance (O&M)	67
Temporary Early Retirement (PER)	(319)
Environmental Training for DOD Civilians (est.) (O&M)	¹ (8)
Regional Clearing House (O&M)	¹ (10)
Subtotal	192
COMMUNITY ASSISTANCE (FUNDING SOURCE)	
Office of Economic Adjustment (O&M)	70,000
Junior ROTC (O&M)	73,000
Subtotal	143,000
Total authorized	2,553,315
Total (including early retirement and other personnel assistance)	2,930,315

¹ To be supported out of unobligated funds appropriated for defense conversion in FY 1993 to DOD and Department of Labor.

Annual report on defense conversion, reinvestment, and transition assistance programs (sec. 1303)

The House bill contained a provision (sec. 1303) that would require the Secretary of Defense to prepare an annual report assessing the effectiveness of the defense conversion, reinvestment, and transition assistance programs.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment. The conferees urge the Secretary of Defense to make maximum use of information generated in the course of complying with this provision to improve the internal administration and effectiveness of conversion programs.

Funding for defense conversion and reinvestment research and development programs (sec. 1311)

The House bill contained a provision (sec. 1311) that would authorize \$624.0 million for specific research and development programs in the defense conversion and reinvestment program.

The Senate amendment contained a similar provision (sec. 204) that would authorize \$615.0 million.

The conference agreement includes a provision that would authorize \$624.0 million as follows:

Program	Millions
Dual-use critical technology partnerships	\$250
Commercial military integration partnerships	75
Regional technology alliances	75
Advanced manufacturing technology partnerships	50
Manufacturing engineering education grants	24
Manufacturing extension	30
Dual-use extension assistance programs	30
Agile manufacturing program	50
Advanced materials partnerships	30
U.S.-Japan management training program	10
Total	624

Repeal and amendment of certain provisions relating to defense technology base, reinvestment, and conversion (sec. 1312)

The House bill contained a provision (sec. 1312) that would repeal certain sections of the defense conversion program in title 10, United States Code, as well as strike references in the law to the National Technology and Industrial Base Council.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would authorize the President to assign the duties of the National Technology and Industrial Base Council to another inter-

agency organization in the Executive Branch.

Expansion of objectives of defense technology reinvestment projects (sec. 1313)

The House bill contained a provision (sec. 1313) that would expand the objectives of the technology reinvestment portion of the defense conversion program to include economic security objectives listed in section 2501(b) and (c) of title 10, United States Code.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment.

Defense dual-use assistance extension program (sec. 1314)

The House bill contained a provision (sec. 1314) that would expand the small business loan guarantee program under the defense dual-use assistance extension program (10 U.S.C. 2524) to include medium-sized business concerns. The provision would also amend section 2524 to specify the details of terms and conditions for guarantees under the program.

The Senate bill contained no similar provisions.

The Senate recedes with an amendment. The conferees agree to provide \$30.0 million for the defense dual-use extension program of which up to \$15.0 million may be used to fund the loan guarantee provisions of the program and up to \$15.0 million may be used to support information resource services for small businesses.

The conferees note that the National Defense Authorization Act for Fiscal Year 1993 (Public Law 102-484) authorized \$200.0 million for the various programs under section 2524 of which \$75.0 million was to be for small business assistance programs. However, only \$97.0 million was appropriated for the section 2524 programs and no funds were made available for the loan guarantee program authorized by section 2524.

Among the programs noted in the statement of managers accompanying the conference report (H. Rept. 102-966) was the Small Business Administration's (SBA) defense economic transition assistance loan guarantee program (15 U.S.C. 636(a)(21)), which was added to the Small Business Administration's existing guaranteed loan program in September 1992 as part of the Small Business Credit and Business Opportunity Enhancement Act of 1992 (Public Law 102-366). Also noted was the SBA small business development center program, a national network of university-based business assistance centers, whose charters (15 U.S.C. 648(c)(3)(G)) were amended by Public Law 102-366 to authorize them to furnish small firms with strategic business planning assistance to adjust to the closure or reduction of a DOD facility, or termination of a DOD program on which the firm was a contractor, subcontractor, or supplier.

Consistency in financial commitment requirements of non-federal government participants in technology reinvestment projects (sec. 1315)

The House bill contained a provision (sec. 1315) that would require that the federal cost of partnerships conducted under the technology reinvestment projects not exceed 50 percent of the total. The provision would allow the Secretary of Defense to increase the percentage of the federal cost share to 70 percent in the case of a partnership with small business concerns. Finally, the provision would authorize the use of funds derived by small businesses from the small business innovative research (SBIR) program or the small business technology transfer (STTT)

program to meet non-federal cost share requirements under a partnership.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment. The conferees do not believe that a change in the cost share ratio in favor of small business is necessary given the extent of small business participation in technology reinvestment projects thus far. The conferees agree to authorize the Secretary of Defense to permit SBIR and SBTB funds to count as part of the small business non-federal cost share.

Additional criteria for the selection of regional technology alliances (sec. 1316)

The House bill contained a provision (sec. 1318) that would create additional criteria for the Secretary of Defense to consider in awarding financial assistance to regional technology alliances.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment.

Conditions on funding of defense technology reinvestment projects (sec. 1317)

The House bill contained a provision (sec. 1314) that would specify focus areas for the Secretary of Defense to use in funding technology reinvestment projects in fiscal year 1994. The provision would also, among other things, require limitations on manufacturing resulting from technology developed in such projects.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require the Secretary of Defense to ensure that the principal economic benefits resulting from the technology projects in the defense conversion program accrue to the U.S. economy. The provision would also ensure that all technology reinvestment projects are awarded on a competitive, cost-shared basis and allow fiscal year 1994 funds to be used in projects solicited in fiscal year 1993.

Adjustment and diversification assistance for states and local governments from the Office of Economic Adjustment (sec. 1321)

The House bill contained a provision (sec. 1321) that would authorize \$69.0 million for the activities of the Office of Economic Adjustment. The provision also would authorize up to five percent of this amount to assist states and local governments in establishing programs that would qualify for operational assistance under section 4301 of the National Defense Authorization Act for Fiscal Year 1993 (Public Law 102-484).

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would authorize funds for community adjustment and that would limit, to five percent of the total amount authorized, the amount of funds that could be used for assistance to states in establishing economic diversification programs in response to either base or defense plant closures or reductions.

Assistance for communities adversely affected by catastrophic or multiple base closures or realignments (sec. 1322)

The House bill contained a provision (sec. 1322) that would make available, on a priority basis, funds authorized for Office of Economic Adjustment (OEA) assistance programs by directing that not less than 50 percent of such funds be available for those areas that have sustained more than one base closure or where the total labor force

within the area is estimated to be reduced by more than five percent.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would clarify that not less than 25 percent, but not more than 50 percent, of the funds available for assistance pursuant to section 2391, of title 10, United States Code, for fiscal year 1994, be available for these hard hit communities. The conferees expect the Department of Defense to give priority consideration to assisting communities that meet the criteria established in this section.

Continuation of pilot project to improve economic adjustment planning (sec. 1323)

The House bill contained a provision (sec. 1323) that would provide an additional \$1.0 million to supplement ongoing defense conversion pilot planning projects areas where dislocations are occurring from a combination of defense downsizing activities at military installations and national laboratories.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would clarify the funding source available to supplement this pilot project.

Personnel adjustment, education and training programs (secs. 1331-1333, 1336-1339 and 1373)

The House bill contained a series of provisions (sec. 1331-1336 and 1344) that would: (1) authorize and require the continuation of the "troops to teachers" program contained in the Defense Conversion, Reinvestment and Transition Assistance Act of 1992 (sections 4441-4444 of the National Defense Authorization Act for Fiscal Year 1993 (Public Law 102-484)); (2) require the Secretary of Defense to expand the "troops to teachers" program by assisting members of the armed forces to obtain employment with state and local law enforcement officials and health care providers; (3) require the Secretary of Defense to provide demonstration grants to institutions of higher education to provide education and training to dislocated defense workers and young adults in environmental restoration; (4) require the Secretary of Defense to give priority to the Secretary of Education in the transfer of real and personal property under DOD control; (5) require the Secretary of Defense to establish a demonstration program to promote the training and employment of veterans in construction and hazardous waste remediation industries; (6) authorize \$25.0 million in continued Department of Defense support for the servicemembers occupational conversion and training program being implemented by the Department of Veterans' Affairs; and (7) require the Secretary of Labor, in consultation with the Secretary of Defense, to carry out a demonstration project to establish one or more regional retraining services clearinghouses for certain members of the armed forces, certain DOD civilian employees, and certain defense contractor employees.

The House bill also contained a provision (sec. 1337) that would make certain technical amendments to the Job Training Partnership Act's defense diversification program.

The Senate amendment contained a provision (sec. 531) that would make technical amendments to section 441 of the National Defense Authorization Act of Fiscal Year 1993, which authorizes the "troops to teachers" program.

The Senate recedes with an amendment that would make those programs and projects addressed in sections 1331 through 1336 and 1344 of the House bill discretionary.

The amendment would authorize the Secretary of Defense to enter into agreements with states to allow them to arrange the placement of individuals in placement programs with local educational and law enforcement agencies, and with local health care providers. The amendment also would ensure the eligibility of DOD civilian employees at military installations closed or realigned under previous or future base closure or realignment laws for training, adjustment assistance, and employment services under the defense diversification program.

The conferees agree that these personnel adjustment, education, and training programs are important and deserve Department of Defense support. The discretionary nature of these programs should not be viewed as congressional ambivalence regarding their implementation, but should be taken as intended to provide the Secretary of Defense with the flexibility to manage these programs together with other important programs competing for the Department's resources. The conferees recommend the use of unobligated funds provided by title VIII of the Department of Defense Appropriations Act for Fiscal Year 1993 (Public Law 102-396) to initiate these programs.

Environmental education opportunities program (sec. 1334)

The Senate amendment contained a provision (sec. 1088) that would provide environmental education scholarships to servicemembers and civilian employees of the Departments of Defense and Energy. The servicemembers and employees must have been involuntarily separated, terminated, or laid off as a result of the decline in defense spending or as a result of a closure of a military installation, and ineligible for retirement or retainer pay. The scholarships would be available for undergraduate or graduate programs leading to a degree or a certificate at colleges and universities associated with Environmental Protection Agency hazardous substance research centers.

The House bill contained no similar provision.

The House recedes with an amendment that would clarify that the funding for this program will be included in defense conversion funds.

Employment of Department of Defense civilian personnel to carry out environmental restoration at military installations to be closed (sec. 1335)

The Senate amendment contained a provision (sec. 2817) that would authorize the Secretary of Defense to provide environmental training to civilian personnel employed at closing installations to carry out cleanup activities at those military installations. If such training is provided, the Secretary would give hiring priority, either directly or through contractors, to those employees who received this training. The employees eligible for retraining are those whose employment would be terminated by the Department of Defense because a military installation is being closed.

The House bill contained no similar provision.

The House recedes with a technical amendment.

The conferees understand that funds are available in federal accounts, other than the Base Closure Account, for the retraining of federal civilian employees for defense conversion. The conferees urge the Secretary of Defense to use Base Closure Account funds as a last resource for these retraining purposes. The conferees believe that there are

situations, such as workers who are already trained in such specialized areas as radiation work, where the overall cost of cleanup could be reduced by providing environmental training to those specially skilled employees. This authority should only be used when cost-effective.

National shipbuilding initiative (secs. 1351-1363)

Section 1031 of the National Defense Act for Fiscal Year 1993 (Public Law 102-484) required the President to submit a plan for revitalizing the U.S. shipbuilding industry. Our shipbuilding industry is unsurpassed in building the finest and most complex naval vessels in the world. With the end of the Cold War, however, the workload supporting the national security effort is dwindling. These shipyards, like many other defense firms, face a new challenge. They must translate their skills from the military to the commercial market.

The House bill contained several provisions (secs. 1351-1359) that would establish a national shipbuilding initiative (NSI) to sustain the U.S. shipbuilding industrial base. The NSI would assist the industry to become internationally competitive in commercial markets. The House provisions would authorize the Department of Defense to transfer \$200.0 million to the Maritime Administration (MarAd). MarAd would use these funds to guarantee loans for commercial ship exports and for shipyard modernization.

The House bill would also provide \$100.0 million for a maritime technology development program (Maritech) to be carried out by the Advanced Research Projects Agency (ARPA). The Maritech funds would be used to improve the technology base for shipbuilding techniques, develop innovative commercial ship designs, and improve production processes.

The Senate amendment contained no similar provisions.

The Senate recedes with an amendment.

After passage of the House bill, the President submitted a plan for revitalizing the shipbuilding industry ("Strengthening America's Shipyards: A Plan for Competing in the International Market"). The Administration's program is similar to the House program. It would provide export loan guarantees and would fund a Maritech program. The Administration's program, however, would be implemented differently.

The conferees considered both proposals carefully. The conferees agree to an integrated plan that balances the use of defense resources with domestic and private sector resources. The plan's principal elements are as follows:

a. Research and development.

The conferees agree to provide \$50.0 million for Maritech, to be administered by ARPA. ARPA will be able to obligate these funds on a cost-matching basis, either directly or through "in-kind" contributions. Private and public sector shipyards will be able to participate in the Maritech program.

b. Loan guarantees

(1) *Vessel construction.* The conferees agree to provide \$147.0 million of Department of Defense funds for loan guarantees on a one-time basis. These funds will remain available until the end of fiscal year 1997. Any DOD funds provided for loan guarantees must be matched on a dollar-for-dollar basis with Department of Transportation (DOT) funds. The recommended amount matches the amount proposed by the Administration for the DOT budget in future years plus the unobligated funds available from prior years in the MarAd loan guarantee accounts.

(2) *Shipyard modernization.* Out of the total funds available for loan financing, the conferees agree that a portion should be available to guarantee loans for U.S. shipyard modernization. Not more than 12½ percent of the funds, including matching funds, available per year for loan guarantees may be obligated for shipyard modernization. The Secretary of Transportation shall give priority to applications from shipyards that have engaged in naval ship construction.

(3) *Eligible vessels.* The House recedes from its requirement for a 10,000 gross ton minimum on vessel size. Vessels eligible for export loan guarantees must be at least 5,000 gross tons and commercially marketable on the international market.

(4) *Credit terms.* The policy of this and previous Administrations is to end the widespread practice that a number of foreign countries employ of providing direct and indirect subsidies to support their domestic shipbuilding industries. The conferees understand that, after several years of inconclusive negotiations, the principal shipbuilding nations are close to reaching an agreement to end such practices. The conferees hope that the parties will soon conclude such an agreement. With certain exceptions, the conferees note that the major shipbuilding nations have generally exercised discipline in granting export loan credit terms. The conferees hope that this restraint can be extended to a binding agreement that addresses the entire area of shipbuilding subsidies in whatever form. However, the conferees understand that previous negotiations have proven unrewarding. The provisions recommended by the conferees would give the Secretary of Transportation the authority to grant export loan credit terms in accordance with existing statutory terms. The provisions also would grant the Secretary the flexibility to set export loan credit terms, based on an assessment of foreign government practices that could cause unfair competition for U.S. shipyards. The conferees agree to establish a review council for this purpose.

The conferees understand that the United States Export-Import (Ex-IM) Bank is empowered to take countervailing measures against certain foreign government practice. These practices include subsidies, "soft-loan" financing, and "tied-aid" programs that are outside the scope of this loan guarantee provision. The conferees intend that the EX-IM Bank provide additional assistance to complement the terms and conditions of the national shipbuilding initiative.

(5) *Role of the Secretary of Defense.* The conferees recommend a provision that would require the Secretary of Defense to approve a loan guarantee application for a foreign entity. The conferees agree that the Secretary of Defense shall have a reasonable, but limited time within which to approve or disapprove such applications.

c. Charleston and Mare Island Naval Shipyard.

Finally, the House bill included a provision (sec. 1325) that would direct the Secretary of Defense to study the feasibility of converting and reutilizing Charleston and Mare Island Naval Shipyards as facilities primarily oriented toward commercial uses. The conferees agree to recommend this provision.

Encouragement for the purchase or lease of vehicles producing zero or very low exhaust emissions (sec. 1371)

The House bill contained a provision (sec. 1342) that would encourage the Secretary of Defense to expend not less than 10 percent of

funds available for the purchase of administrative use vehicles on the purchase or lease of zero or low exhaust emission vehicles.

The Senate amendment contained no similar provision.

The Senate recedes. The conferees note that the actions described in this provision could serve as a model for other diversification support activities the Secretary of Defense might undertake.

Revision to requirements for notice to contractors upon pending or actual termination of defense programs (sec. 1372)

The House bill contained a provision (sec. 1343) that would clarify the requirements under section 4471 of the Defense Conversion, Reinvestment and Transition Assistance Act of 1992 for notice to contractors and employees upon the proposed or actual termination or substantial reduction in the major defense programs. The provision would require contractors or subcontractors to retain an employee for six months after notification of the intent to terminate the employment of the employee as a result of such notice. Finally, the provision would provide additional remedies for the failure of contractors to comply with the notice requirements.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would delete the employee retention requirements, the coverage of Department of Energy programs, and the special compliance remedies.

The conferees note that section 3161 of the National Defense Authorization Act for Fiscal Year 1993 already encourages the Department of Energy to undertake early notification procedures for employees. These procedures are currently being implemented.

With respect to section 1342(g) of the House bill, the conferees note that the notice requirement contained in Public Law 102-848 is now being incorporated into DOD contract clauses. The conferees fully expect the Department to provide adequate notification to the congressional defense committees if it changes this policy.

Use of naval installations to provide employment training to non-violent offenders in state penal systems (sec. 1374)

The conferees became aware of an initiative between a private non-profit organization which provides assistance to prison inmates, and the Navy at Naval Station, Alameda, California. The initiative would permit non-violent inmates in the California penal system to perform building and grounds maintenance duties at the naval station, on a volunteer basis, as part of an employment training program. No appropriated funds would be used in the training program.

The conferees agree that this is a noteworthy initiative and adopt a provision that would authorize the Secretary of the Navy to conduct a demonstration project to test the feasibility of using Navy facilities to provide employment training for non-violent offenders in a state penal system prior to release from incarceration. The demonstration project would be limited to three Navy installations. The Secretary of the Navy could enter into agreements with private, non-profit organizations to provide necessary training and could lease or otherwise make available such real property the Secretary considers proper to provide the training. The non-profit organization would hold harmless and indemnify the United States for any injury or property damage in connection with the training.

The conferees encourage the Secretary of the Navy to evaluate the demonstration

projects and submit a report with recommendations as to expansion, termination, or continuation of the project.

LEGISLATIVE PROVISIONS NOT ADOPTED

Dissemination of list of conversion, reinvestment, and transition programs

The House bill contained a provision (sec. 1304) that would require the Economic Adjustment Committee to ensure the adequate dissemination of lists of available information on federal defense conversion programs to interested parties.

The Senate amendment contained no similar provision.

The House recedes. The conferees note that mechanisms currently exist in law to achieve the intent of the House provision.

Encouragement of industrial diversification planning for certain defense contractors

The House bill contained a provision (sec. 1341) that would require the Secretary of Defense to include a provision in each major defense contract encouraging industrial diversification by the contractor. The provision would also require the Secretary to sponsor up to five studies on diversification strategies.

The Senate amendment contained no similar provision.

The House recedes. The conferees note that section 4329 of the National Defense Authorization Act for Fiscal Year 1993 (Public Law 102-484) requires the Secretary of Defense to issue regulations encouraging defense contractors to engage in diversification planning.

Targeting of defense conversion funds

The Senate amendment contained a provision (sec. 804) that would express the sense of Congress that defense conversion programs should serve to relieve distress in areas of the country most adversely affected by defense cutbacks. The provision would also require reports focusing on small business participation in defense conversion programs.

The House bill contained similar provisions (secs. 1322 and 1324) pertaining to community assistance.

The Senate recedes. The conferees note the provisions adopted elsewhere in this conference report that would require the Secretary of Defense to report on small business participation in the defense conversion program and to target community assistance for those communities most seriously affected by base closures and other defense dislocations.

Small business participation

The Senate amendment contained a provision (sec. 805) that would require the Secretary of Defense to establish a goal that at least 15 percent of the total amount appropriated for partnerships in the defense conversion program be expended on partnerships including small businesses.

The House bill contained no similar provision.

The Senate recedes. The conferees note that experience with the technology reinvestment projects in 1993 indicates that small business participation will significantly exceed the 15 percent goal called for in the Senate provision.

Sense of Congress regarding establishment of an Office of Economic Conversion Information

The Senate amendment contained a provision (sec. 1068) that would express the sense of Congress that the President should establish an Office of Economic Conversion Information in the Department of Commerce.

The House bill contained no similar provision.

The Senate recedes. In light of the Administration's decision to set up the office in the Economic Development Administration within the Department of Commerce, the conferees believe that legislation is no longer necessary. The conferees direct the administration to report to Congress no later than June 30, 1994 on the progress and accomplishments of the new office.

Community assistance and technology reinvestment joint efforts

The conferees commend the efforts of the Office of Economic Adjustment (OEA) in the Department of Defense in helping communities plan for the redevelopment and reutilization of former military assets. The conferees believe that there is an important opportunity to capitalize on technology reinvestment efforts by the Advanced Projects Research Agency (APRA). One possible example might be the integration of technology reinvestment projects with overall community assistance efforts undertaken by OEA. Together, OEA and APRA programs represent important allies for those communities especially hard hit by defense spending reductions and military base closures. The conferees look forward to the development of innovative approaches to economic recovery for defense-dependent areas capitalizing on the strengths of the defense reinvestment, conversion and assistance programs operated by these two defense agencies.

TITLE XIV—MATTERS RELATING TO ALLIES AND OTHER NATIONS

LEGISLATIVE PROVISIONS

LEGISLATIVE PROVISIONS ADOPTED

Defense burdens and responsibilities (sec. 1401)

The House bill contained a provision (sec. 1043) that would address the sharing of defense burdens and responsibilities among the United States and its allies. The provision would make certain findings and express the sense of Congress on burdensharing; specify that the President should take certain burdensharing actions; reduce the amount requested for overseas basing activities; and allocate the resulting savings to operation and maintenance and military construction activities at military installations in the United States.

The Senate amendment contained a similar provision (sec. 1054) but it would make smaller reductions in the amount requested for overseas basing activities.

The Senate recedes with an amendment that would delete the U.S. contribution to the NATO Infrastructure program from the section's definition of "overseas basing activities." The amendment would also authorize the Secretary of Defense to exceed the limitation on spending on overseas basing activities by such amount as the Secretary determines to be necessary in the national interest, but not more than by \$582.7 million. The Secretary would not be able to exceed the limitation until the Secretary notified Congress and waited 15 days. The conferees note that, if the Secretary of Defense exercises this authority to exceed the limitation by as much as \$582.7 million, the amount available to be spent on overseas basing activities would reach \$17,498.1 million—the amount contained in the budget request.

Burdensharing contributions from designated countries and regional organizations (sec. 1402)

The House bill contained a provision (sec. 1044) that would expand and make permanent the authority of the Secretary of Defense to accept cash burdensharing contributions

from foreign countries and regional organizations.

The Senate amendment contained a provision (sec. 1051) that would make technical changes to this authority and that would make it permanent.

The Senate recedes with an amendment that would codify this authority in title 10, United States Code, and that would change the quarterly reporting requirement to an annual reporting requirement.

NATO review requirements (sec. 1411)

The Senate amendment contained a provision (sec. 1083-1085) that would require the President, in consultation with the Secretary of Defense and the Secretary of State, to report to Congress on the role NATO should play in the post-Cold War era.

The House bill contained no similar provision.

The House recedes with an amendment that would emphasize the importance of applying the full range of NATO capabilities in political, diplomatic, economic, social, and military efforts towards crisis prevention and management.

Modification of certain report requirements (sec. 1412)

The House bill contained a provision (sec. 1045) that would modify certain report requirements.

The Senate amendment contained no similar provision.

The Senate recedes.

Permanent authority to carry out AWACS memoranda of understanding (sec. 1413)

The House bill contained no similar provision.

The House recedes.

Extension of authority for certain foreign governments to receive excess defense articles (sec. 1421)

The House bill contained a provision (sec. 1034) that would make Bahrain eligible to receive excess defense articles.

The Senate amendment contained no similar provision.

The Senate recedes.

Report on effect of increased use of dual-use technologies on ability to control exports (sec. 1422)

The House bill contained a provision (sec. 1056) that would require the Secretary of Defense, in consultation with the Director of Central Intelligence, to submit a report on the effect the increased use of dual-use and commercial technologies by the Department of Defense could have on the ability of the United States to control the export of sensitive dual-use and military technologies and items.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require the Secretary of Defense to include in the report an assessment of the national security implications of lowering export licensing controls on dual-use items and technology and its effect on current and planned operational defense programs and capabilities. The amendment also would require the report to describe the steps being taken to ensure that decontrol of dual-use items and technology does not place current U.S. technology and defense capabilities at risk and the steps being taken to ensure that the decontrol of dual-use technologies does not contribute to an increased proliferation threat.

The report also should include an assessment of:

(1) efforts to limit the export of critical components or subcomponents, focusing on

areas where consensus among suppliers is possible and where the impact of denying access seriously degrades a foreign country's ability to achieve its weapons development goals, while having minimal impact on the U.S. economy; and

(2) creation of an economic environment that encourages U.S. business to dominate markets, through the sale of support services and equipment, where control of critical technologies is not possible. Such an approach would ensure U.S. familiarity with technology that it may confront when threats to its security emerge, facilitating development of peacetime, crisis, and wartime countermeasures.

The conferees note that the Administration is revising export control policy on a wide variety of advanced technologies (e.g., computers, telecommunications, space launch vehicles and technology) with potential adverse consequences for U.S. national security. For example, through the use of more capable computers, foreign countries could indigenously produce better military equipment requiring fewer field tests with a resultant loss of U.S. ability to anticipate new weapons developments.

The conferees recognize that no export control regime can realistically prevent the spread of new weapons and technologies. Moreover, the conferees recognize that U.S. businesses should not be excluded from competing in the global computer, telecommunications, and other markets. Many of these areas are the foundation of the U.S. economy, and a strong U.S. economy is essential for maintaining national security.

Therefore, given that the export of high technology products has positive and negative implications, the conferees believe that a prudent but realistic export control regime must be developed and implemented to serve both U.S. economic and national security interests.

Landmine moratorium extension act (sec. 1423)

The Senate amendment contained a provision (sec. 1094) that would extend for three more years the moratorium on landmine exports contained in the National Defense Authorization Act for Fiscal Year 1993.

The House bill contained no similar provision.

The House recedes with a technical amendment.

Codification of provision relating to overseas workload program (sec. 1431)

The House bill contained a provision (sec. 1035) that would codify in title 10, United States Code, the authority for the overseas workload program.

The Senate amendment contained no similar provision.

The Senate recedes with a technical amendment.

American diplomatic facilities in Germany (sec. 1432)

The Senate amendment contained a provision (sec. 1078) that would prohibit the purchase, construction, modification, or lease of diplomatic facilities in Germany until the Secretary of Defense certifies that the U.S. government has received or is scheduled to receive from the government of Germany not less than 50 percent of the value of facilities returned by the U.S. government to the government of Germany.

The House bill contained no similar provision.

The House recedes with an amendment that would make the prohibition effective as of January 1, 1995. The conferees are concerned that the United States receive fair

value for the facilities it returns to the government of Germany. The conferees request the Administration to keep the relevant committees of Congress closely informed about the progress of negotiations with the government of Germany of this issue.

Military service of retired personnel with newly democratic nations (sec. 1433)

The Senate amendment contained a provision (sec. 547) that would provide the consent of the Congress for a retired member of the uniformed services to accept employment by, or hold an office or position in, the armed forces of a newly democratic nation and accept compensation associated with such employment, office, or position provided the secretary concerned and the Secretary of State determine the nation is a newly democratic nation and jointly approve the employment or the holding of such office or position. The provision also would provide that the retirement pay and other benefits of the retiree may not be terminated by reason of employment or holding of an office or position consented to pursuant to this provision.

The House bill contained no similar provision.

The House recedes with an amendment that would require the secretary concerned and the Secretary of State to notify the appropriate congressional committees of the determinations and approvals under this provision. The conferees emphasize that this provision does not in any way abrogate the post employment requirements contained in the Ethics in Government Act.

Semiannual report on efforts to seek compensation from Government of Peru for death and wounding of certain U.S. servicemen (sec. 1434)

The House bill contained a provision (sec. 1038) that would direct the Secretary of Defense to report semiannually on efforts to obtain compensation from the Government of Peru for the military personnel wounded and the survivors of the airman killed when the Peruvian Air Force strafed their aircraft.

The Senate amendment contained no similar provision.

The Senate recedes.

LEGISLATIVE PROVISION NOT ADOPTED *Findings regarding defense cooperation between the United States and Israel*

The Senate amendment contained a provision (sec. 1053) that would express congressional findings regarding defense cooperation between the United States and Israel.

The House bill contained no similar provision.

The Senate recedes.

The conferees recognize the many benefits to the United States resulting from our strategic relationship with Israel. The conferees commend the Administration's commitment to maintaining Israel's qualitative edge over any combination of adversaries. The conferees support the Administration's desire to enhance Israeli-American military and technical cooperation. Despite the peace process, Israel continues to face a difficult threat environment compounded by the proliferation of weapons of mass destruction and their delivery systems.

TITLE XV—INTERNATIONAL PEACE-KEEPING AND HUMANITARIAN ACTIVITIES

LEGISLATIVE PROVISIONS

LEGISLATIVE PROVISIONS ADOPTED

General authorization of support for international peacekeeping activities (sec. 1501)

The Senate amendment contained a provision (sec. 1041) that would extend the termi-

nation date for section 403 of title 10, United States Code, until September 30, 1994. The provision also would authorize the Secretary of Defense to provide assistance for international peacekeeping during fiscal year 1994 in an amount not to exceed \$300.0 million in accordance with that section.

The House bill contained no similar provision.

The House recedes with an amendment that would further limit the availability of Department of Defense funds by requiring that: (1) the United States receive written commitments of full and prompt reimbursements for outstanding obligations incurred through letters of assistance or similar arrangements for logistics support, supplies, services, and equipment provided by the Department on a contract basis to the United Nations or a regional organization; and (2) the Department of Defense receive any reimbursement to the United States from the United Nations or a regional organization for such outstanding obligations unless the reimbursement is precluded by law.

Report on multinational peacekeeping and peace enforcement (sec. 1502)

The Senate amendment contained a provision (sec. 1042) that would require the President, in consultation with the Secretary of State and the Secretary of Defense, to submit a comprehensive report to Congress on U.S. policy on multinational peacekeeping and peace enforcement no later than the date on which the President submits the fiscal year 1995 budget.

The House bill contained no similar provision.

The House recedes with an amendment that would add several policy matters for analysis and discussion in the report and change the report deadline to April 1, 1994.

Military-to-military contact programs (sec. 1503)

The conferees agree to a provision that would provide \$10.0 million for military-to-military contacts and comparable activities that are designed to assist the military forces of other countries in understanding the appropriate role of military forces in a democratic society. The conferees support this program. This provision would simply serve as a bridge until Congress can take up the broader issue of the permanent level and scope of such contacts. Without this provision, existing activities already endorsed by Congress would have to be brought to an immediate halt. If the Department of Defense finds this authorization insufficient, the conferees are willing to consider a reprogramming to provide additional funding for this program.

Because title XII of this act (Cooperative Threat Reduction with States of the Former Soviet Union) will authorize programs to conduct military-to-military and defense contacts with the independent states of the former Soviet Union, all such military-to-military programs in those states should be carried out with funds authorized in title XII.

Humanitarian and civic assistance (sec. 1504)

The House bill contained a provision (sec. 1005) that would: (1) require the Secretary of Defense to, not later than March 1, 1994, prescribe regulations concerning humanitarian and civic assistance provided in conjunction with military operations; (2) clarify existing law by limiting the obligation of funds, other than funds appropriated for humanitarian and civic assistance, to incidental costs; (3) require that notifications to Congress relating to excess nonlethal supplies of the Department of Defense contain specific information; and (4) authorize \$58.0 million for

humanitarian assistance under sections 401, 402, and 2551 of title 10, United States Code.

The House bill contained another provision (sec. 1010) that would require the Secretary of Defense to include in the Secretary's next annual report a report of the Department's activities in connection with the four provisions in title 10, United States Code, relating to humanitarian assistance activities. The report would cover activities carried out by the date of the report during fiscal year 1994 and planned activities for the remainder of fiscal year 1994 and fiscal year 1995.

The Senate amendment would authorize \$48.0 million for humanitarian assistance.

The Senate recedes with an amendment that would: (1) combine the two House provisions into one section; (2) authorize \$48.0 million for humanitarian assistance for fiscal year 1994; and (3) require the Secretary of Defense to submit a report on the planned activities for fiscal year 1995 under the referenced sections, and, after consultation with the Secretary of State, the State Department's distribution during fiscal year 1993 of excess nonlethal supplies transferred to the Secretary of State pursuant to section 2547 of title 10, United States Code.

Sanctions against Serbia and Montenegro (sec. 1511)

The Senate amendment contained a provision (sec. 1087) that would codify several executive branch directives which impose sanctions against Serbia and Montenegro, prohibit the expenditure of appropriated funds for those countries, and require U.S. representatives to international financial institutions to oppose assistance to those countries. An exception would be provided for the reform of the electoral process and the development of democratic institutions or political parties in the two countries. Finally, the provision would authorize the President to waive these restrictions if he determines and certifies that a waiver would be in the national interest, but the waiver authority would be conditioned upon the territory of Bosnia-Herzegovina being controlled by a government recognized by the United States and not being subject to military action by Serbia and Montenegro or Bosnian Serbian forces.

The House bill contained no similar provision.

The House recedes with an amendment that would add humanitarian assistance to the exceptions and authorize a waiver or modification of the sanctions upon a determination by the President and certification to Congress that a waiver or modification was necessary to meet emergency humanitarian needs or to achieve a negotiated settlement of the conflict in Bosnia-Herzegovina.

LEGISLATIVE PROVISIONS NOT ADOPTED

U.S. forces under United Nations command

The House bill contained a provision (sec. 1041) that would require the Secretary of Defense to submit a report to Congress whenever U.S. forces, numbering in excess of 100, are assigned to serve under the operational control of a foreign national acting on behalf of the United Nations.

The Senate amendment contained no similar provision.

The House recedes.

The conferees note that the Senate and House of Representatives are planning to review all war powers-related issues and laws. The topic of executive branch reports and notifications related to the use of U.S. forces will be an appropriate subject of those reviews.

Department of Defense food stocks for assistance in Bosnia-Herzegovina and Armenia

The Senate amendment contained a provision (sec. 1093) that would make available 500,000 cases of meals ready-to-eat for distribution as humanitarian relief.

The House bill contained no similar provision.

The Senate recedes. The introduction of a new ration item specifically designed for use in humanitarian relief operations obviates the need for the Senate provision.

TITLE XVI—ARMS CONTROL MATTERS

LEGISLATIVE PROVISIONS

LEGISLATIVE PROVISIONS ADOPTED

Presidential study of global proliferation (sec. 1601)

The House bill contained a provision (title XV) that would create a National Commission on Arms Control.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require the President to study the factors contributing to the proliferation of strategic and advanced conventional military weapons and the policy options available to inhibit such proliferation. In order to assist the President in the conduct of this study, an advisory board, composed of five members appointed by the President, is to be established within 15 days after enactment of this act. The Secretary of Defense or the head of any other federal agency would be permitted to detail personnel to the advisory board to assist it in carrying out its duties. The amendment also would permit a federally funded research and development center designated by the Secretary of Defense to provide support services to the advisory board. The President would be required to submit to Congress a report on his findings and conclusions, together with the advisory board's report, and the President's comments on that report, by June 1, 1994.

Counterproliferation (secs. 1602-1607)

The House bill contained a provision (sec. 1055) that would authorize the Secretary of Defense to support international activities with respect to the nonproliferation of weapons of mass destruction (WMD) and their delivery systems. The provision would require the President to coordinate these activities with those authorized in section 504 of the Freedom Support Act (Public Law 102-511).

The Secretary of Defense would also be authorized to conduct counterproliferation policy studies and analyses. The Secretary would be required to submit a semiannual report on the activities carried out under this section. The House provision would also authorize \$6.0 million in operation and maintenance funds for counterproliferation studies and analyses and \$25.0 million for assistance for international activities.

The Senate amendment contained provisions (secs. 241-245) that would express the sense of Congress that the prevention of the proliferation of WMD is a high priority. Section 243 would establish a joint committee to review U.S. nonproliferation programs. Section 244 would require the joint committee to submit a report to Congress with the findings of the committee in both unclassified and classified form no later than May 1, 1994.

The House recedes with an amendment that would continue through fiscal year 1994, the authority in section 1505 of the National Defense Authorization Act for Fiscal Year 1993. The conference agreement would provide up to \$25.0 million in support for international nonproliferation activities, includ-

ing the On-Site Inspection Agency's (OSIA) support of the United Nations Special Commission on Iraq (UNSCOM). The conference agreement would authorize the Secretary of Defense to spend up to \$6.0 million to conduct counterproliferation studies and analysis in support of U.S. nonproliferation policy. The Secretary of Defense would be required to submit a 30-day advance notification to Congress before providing funds in support of international activities and OSIA support to UNSCOM. The Secretary would have to certify that the activity is in U.S. national security interests and that the provision of assistance does not adversely affect U.S. military preparedness. Funds used to conduct counterproliferation studies and analyses are to be derived from funds available to DOD in fiscal year 1994. The funds could not be obligated, however, until 15 days after the Secretary submits a report to Congress on existing DOD programs regarding such studies and analyses. The Secretary of Defense shall submit a semiannual report to Congress on the studies and analyses carried out, and the amounts spent on such activities.

The conferees further agree to establish a joint review committee which would consist of the Secretary of Defense, Secretary of State, Secretary of Energy, Director of Central Intelligence, Director of the Arms Control and Disarmament Agency, and the Chairman of the Joint Chiefs of Staff. The purpose of the committee would be to identify and review existing and proposed nonproliferation and counterproliferation capabilities and technologies and to review acquisition and technology programs and crisis management efforts to respond to WMD terrorism.

The conferees emphasize that the intent of the reporting requirement in the conference agreement is to obtain a clear and comprehensive explanation of the existing and proposed counterproliferation and nonproliferation programs in the federal departments and agencies represented on the joint review committee. The report should also explain how these programs are to be effectively integrated and coordinated. The conferees further emphasize that the goal of all such programs should be operational capabilities and technologies in the near-, mid-, and far-term that can be fielded in support of counterproliferation and nonproliferation policies. The report should make clear, for example, which programs, if any, are not intended to move beyond the proof-of-concept phase of development. If the joint review committee finds that, as an initial step, it must recommend the funding of numerous proof-of-concept efforts, the report should provide a clear roadmap of intentions to down-select in future years to being the most promising technologies on-line.

The conferees also note that many of the counterproliferation collection programs under consideration assume cooperative arrangements. The conferees believe there is merit in funding such cooperative efforts, but also in maintaining an adequate level of effort for stand-off detection and collection programs in the event that cooperative agreements are not reached.

Nuclear nonproliferation (sec. 1611)

The House bill contained a provision (sec. 1052) that would, among other things, declare U.S. policy objectives to end nuclear proliferation and reduce current nuclear arsenals and supplies of nuclear weapons materials through the successful completion and implementation of nuclear arms control and disarmament agreements with the states of the former Soviet Union and other foreign governments.

The Senate amendment contained no similar provision.

The Senate recedes.

The conferees agree that the report required by this provision should be submitted to the Committees on Armed Services of the Senate and House of Representatives, to the Senate Committee on Foreign Relations and the House Committee on Foreign Affairs.

Limitation on funds for plutonium storage in Russia (sec. 1612)

The House bill contained a provision (sec. 1054) that would condition funding for a plutonium storage facility in Russia on certification to Congress by the President that Russia is committed to halting the chemical separation of weapon-grade plutonium from spent nuclear fuel and is taking practical steps to this end. This provision would express the sense of Congress that Russia should cease all production and separation of plutonium, and it would require the President to report on efforts by the United States to achieve the objectives described in this provision.

The Senate amendment contained no similar provision.

The Senate recedes.

North Korea and the Non-Proliferation Treaty (NPT) (sec. 1613)

The House bill contained a provision (sec. 1048) that would express the sense of Congress regarding North Korea and the Treaty on the Non-Proliferation of Nuclear Weapons.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would urge continued talks between North Korea and South Korea on denuclearization of the Korean peninsula.

Proliferation of space launch vehicle technologies (sec. 1614)

The House bill contained a provision (sec. 1053) that would express the sense of Congress about the proliferation of space launch vehicle (SLV) technologies.

The Senate amendment included an identical provision (sec. 1077). This provision is set forth in this section.

The conferees are concerned that loosening the restrictions on space launch vehicle technology within the Missile Technology Control Regime (MTCR) could, over time, result in the proliferation of offensive ballistic missiles that are essentially indistinguishable from space launch vehicles. The conferees would be concerned, for example, if new MTCR members were permitted to retain their space launch vehicle programs and were offered U.S. SLV technology.

The Administration has assured the Congress that it will be consulted on MTCR-related policy issues, MTCR membership, and on the SLV exports. The conferees expect to be included in these consultations, including those in advance of exports in support of foreign SLV programs, and of U.S. plans to approve new members to the MTCR.

TITLE XVII—CHEMICAL AND BIOLOGICAL WEAPONS DEFENSE

LEGISLATIVE PROVISIONS

LEGISLATIVE PROVISIONS ADOPTED

Chemical and biological weapons defense (secs. 1701-1705)

The House bill included provisions (title XI) relating to the chemical and biological defense program.

The Senate amendment did not contain similar provisions.

The Senate recedes with amendments.

To meet the potential threat posed by the proliferation of chemical and biological weapons in the post-Cold War world, the conferees believe that the United States must strengthen on-going initiatives in the chemical and biological defense program, as well as in arms control and chemical demilitarization. For the past three years, the conferees have expressed concern about the conduct of the chemical and biological defense program and the readiness of U.S. armed forces. The conferees note improvements in the program, but believe that further improvements in program management are needed and that sustained efforts will be required to further strengthen the program so it can respond to the potential threat.

The conferees are particularly concerned that, in a declining budget environment, the requirements for an effective chemical and biological defense program not be ignored. The conferees believe that a high priority must continue to be placed on the chemical and biological defense program. The program must not be subjected to disproportionate cuts as budgets are reduced, nor should the requirements for effective defenses be ignored.

The conferees have agreed to a series of provisions that would strengthen the chemical and biological program. Section 1701 would direct the Secretary of Defense to fund the chemical and biological defense program after fiscal year 1994 in a separate DOD budget account. The program should reflect a coordinated and integrated chemical and biological defense program for the military departments with the Army in the role of executive agent. It would require assignment of the program to a single office within the Office of the Secretary of Defense. That office would have responsibility for policy coordination and oversight of both the chemical and biological warfare defense and chemical and biological medical defense programs. Additionally, the Department would be required to provide a report on its review of the management structure of the chemical and biological warfare defense program and measures that need to be taken to improve joint coordination, oversight, and ensure coherent and effective management of the program.

The conferees strongly support consolidation of chemical and biological defense training for the Army, Navy, Air Force, and Marine Corps at the Army's Chemical School. This action conforms with the Chairman of the Joint Chief of Staff's Military Training Structure Review and the Secretary of Defense's March 1993 Roles and Missions report.

Section 1703 would require the Secretary of Defense to include a number of matters in the Department's annual report to Congress. Section 1704 would express the sense of Congress that federal interagency planning for response to a chemical or biological emergency be strengthened. Section 1705 would authorize the Secretary of Defense to enter into agreements with the Secretary of Health and Human Services for DOD support to the national vaccination program.

Through the biological defense research program, the Department of Defense has the capability to research and manufacture anti-

dotes to chemical and biological warfare agents. Much of this manufacturing capability lies dormant during peacetime. The conferees believe that the Department should maintain a surge capability to provide vaccines and antidotes for unusual diseases as the U.S. armed forces become more involved overseas. The conferees also believe that the Department should work with other agencies to develop a coordinated capability for the qualification and production of vaccines to respond to both military requirements and emergency civilian requirements. The conferees direct the Secretary to report to the congressional defense committees by February 1, 1994 on the feasibility of providing such support. The Department should incorporate this reporting requirement with the report required elsewhere in this act on a DOD vaccine production facility.

The conferees recommend close cooperation between the United States and its allies on chemical and biological defense matters. They recommend that the Department of Defense consider the use of funds provided under the NATO research and development program for this purpose. Additionally, the conferees recommend that DOD and DOE, in connection with the Joint Review Committee, established in title XVI of this Act, consider conducting a pilot program with current research and development funding using state-of-the-art equipment developed by U.S. industry for chemical weapons agent detection and reconnaissance, on-site chemical weapons inspection and CWC verification, and stockpile and non-stockpile demilitarization.

The conferees emphasize that the United States can contribute to the CWC implementation process by providing DOD assistance in training CWC inspectors and international inspectors for the CWC and monitoring teams.

The conferees also believe that adoption of a verification and inspection regime for the 1972 Biological Weapons Convention (BWC) would strengthen the BWC by raising the economic and political costs to any nation that would seek a biological weapons program. The conferees encourage the Secretary of Defense to sponsor a study on implementation of a verification and inspection regime for the BWC.

DIVISION B—MILITARY CONSTRUCTION AUTHORIZATIONS

OVERVIEW

The amended budget request for fiscal year 1994 contained \$10,785,553,000 for military construction and family housing.

The House bill would authorize \$11,597,194,000 for military construction and family housing.

The Senate amendment would provide \$11,404,333,000 for this purpose.

The conferees recommend authorization of \$10,060,026,000 for military construction and family housing in fiscal year 1994.

FY 1994 MILITARY CONSTRUCTION AUTHORIZATION OF APPROPRIATIONS RECAPITULATION

Termination of certain military construction authorizations

In light of the recommendations for base closure and realignment forwarded by the President to the Congress on July 2, 1993, the committee recommends the termination of the following military construction authorizations that have not yet been obligated:

Army:

Fiscal year 1992:

	Millions
New York: Seneca Army Depot—Fire Station	1.150
Virginia: Vint Hill Farms—Barracks with Dining Facility	1.700
General Purpose Warehouse	1.850
Subtotal	4.700

Fiscal year 1993: Utah: Toolele Army Depot—Hazardous Material Storage

	9.200
--	-------

Total 9.200

Navy

Fiscal year 1989: California: (Family Housing) Long Beach NS—Family Housing (300 units)

	9.072
--	-------

Subtotal 9.072

Fiscal year 1990:

New York: NS Staten Island—Child Care Center	2.987
Land Acquisition (part of omnibus line)	1.675

Millions

South Carolina: NS Charleston—Defense Access Roads	3.000
Subtotal	7.662

California: (Family Housing) El Toro MCAS—Family Housing (200 units)

	14.100
--	--------

Subtotal 14.100

Subtotal 21.762

Fiscal year 1991:

Alaska: Amchitka FSSC Electronic Inst.	5.656
California: Pt. Magu PMTC—Security Improvements	2.070
Florida: Key West NAS—EOD Mobile Unit Facility	3.010
Virginia: Oceana NAS—Weapons System Training Addition	3.670
Subtotal	14.406

California: (Family Housing) Long Beach NS—Family Housing (300 units)

	24.928
--	--------

Subtotal 24.928

Total 39.334

Fiscal Year 1992:

Alaska: Adak NSGA—Classic Wizard Facility Addition	3.600
Bachelor Enlisted Quarters	9.100
California: Concord NWC—Missile Test Cell	1.250
California: NSY Mare Island—Road Realignment	3.570
Computer Operations Center	9.000
District of Columbia: Washington NAVDIST—Hazardous Waste Storage Facility	2.050
Florida: NSC Pensacola—Cold Storage Plant	5.700

Millions

Florida: Orlando NTC—Barracks	7.980
-------------------------------	-------

Georgia: Kings Bay NSB—Trident Training Facility Addition

	9.200
--	-------

Maryland: Annapolis NRTF—Antenna Modifications

	2.400
--	-------

S. Carolina: FMWTC Charleston—Fire Fighting Trainer Facility

	14.620
--	--------

Virginia: Norfolk NS—Fire Alarm System Improvements

	.340
--	------

Washington: Whidbey Island NAS—Flight Area Control & Surveillance Facility

	3.349
--	-------

Subtotal 72.159

Fiscal Year 1993:

California: NAS Miramar—Fix Point Aircraft Utilities

	9.700
--	-------

NSY Mare Island—Hazardous Material Storage

	8.000
--	-------

Florida: NAS Cecil Field—Jet Engine Test Cell

	5.850
--	-------

Tennessee: NAS Memphis—Fire and Crash Rescue Station

	1.750
--	-------

Subtotal 37.660

California: (Family Housing) MCAS El Toro—Family Housing Improvements (reduce lump sum)

	1.253
--	-------

Subtotal 1.253

Total 38.913

Air Force:

Fiscal year 1990:

Florida: Homestead AFB—Add to Transient Dorm	1.950
Alter Dormitories	5.400

	Millions
Ohio: Newark AFB—Child Development Center680
Subtotal	8.030
Fiscal year 1991:	
California: March AFB—Troop Subsistence Warehouse	1.050
Florida: Avon Park Range—Dormitory700
Florida: Homestead AFB—Alter Dormitories	5.500
Idaho: Mt. Home AFB—Squadron Operations	1.350
Maine: Bangor Airport—Squadron Operations970
New York: Griffis AFB—Add/Alter Missile Munitions Facility	2.300
Munitions Igloo	2.200
Subtotal	14.070
Fiscal year 1992:	
Florida: Homestead AFB—Alter Dormitory	4.900
New York: Griffiss AFB—Add to Squadron Operations Facility	1.500
New York: Plattsburgh AFB—Upgrade Electrical Distribution System	7.200
Alter Jet Fuel Storage880
Subtotal	14.480
Florida: (Family Housing) Homestead AFB—Family Housing Improvements (Reduce lump sum)	6.400
Subtotal	6.400
Total	20.880
Fiscal year 1993:	
California: (Family Housing) March AFB—Family Housing (320 units)	38.351
Michigan: K.I. Sawyer AFB—Improve 134 units of family housing	10.351
Subtotal	48.702
Defense agencies:	
Fiscal year 1992:	
Florida: Homestead AFB—Composite Medical Facility, PHI	10.000
Ohio: Defense Electronics Supply Center—Fire and Security Station	2.000
Texas: NAS Dallas—Medical/Dental Clinic	3.500
Total	15.500
Air National Guard:	
Fiscal year 1990: Texas: Dallas NAS—Add/Alter Dining Fac. & Medical Training Fac.540

Aerospace Ground Equipment Shop	1.700
Subtotal	1.700
Total	346.432

TITLE XXI—ARMY
FISCAL YEAR 1994

The House bill would authorize \$2,397,883,000 for Army military construction and family housing programs for fiscal year 1994.

The Senate amendment would authorize \$2,369,330,000 for this purpose.

The conferees recommend authorization of \$2,378,919,000 for Army military construction and family housing for fiscal year 1994.

Termination of authority to carry out certain projects (sec. 2105)

The Senate amendment contained a provision (sec. 2105) that would repeal certain military construction authorizations contained in the National Defense Authorization Acts for Fiscal Years 1992/1993 and 1993 (Public Laws 102-190 and 102-484). These projects were no longer needed due to intervening base closure or realignment decisions.

The House bill contained no similar provision.

The House recedes.

Construction of chemical munitions disposal facilities (sec. 2106)

The House bill contained a provision (sec. 2105) that would prohibit the obligation of funds authorized for the construction of a new chemical munitions disposal facility at Anniston Army Depot, Alabama until the Secretary of Defense certifies to Congress that the Johnston Atoll chemical agent disposal system has been fully operational for six months, has met all the required environmental and safety standards, and has proven to be operationally effective. The provision would also require the Secretary of the Army to schedule the award of a construction contract for another chemical munitions disposal facility in the United States during the same 12-month period in which the contract for the Anniston facility is awarded.

The Senate amendment did not contain a similar provision.

The Senate recedes with an amendment.

The Senate recedes with an amendment.

TITLE XXII—NAVY

FISCAL YEAR 1994

The House bill would authorize \$1,978,167,000 for Navy military construction and family housing programs for fiscal year 1994.

The Senate amendment would authorize \$1,866,186,000 for this purpose.

The conferees recommend authorization of \$1,858,505,000 for navy military construction and family housing for fiscal year 1994.

Termination of authority to carry out certain projects (sec. 2205)

The Senate amendment contained a provision (sec. 2205) that would repeal certain military construction authorizations contained in the National Defense Authorization Acts for Fiscal Years 1990/1991, 1992, and 1993 (Public Laws 101-189, 102-190 and 102-484). These projects were no longer needed due to intervening base closure and realignment decisions.

The House bill contained no similar provision.

The House recedes with an amendment that would adjust the list of terminated projects to delete projects that have already been placed under contract or are otherwise required. The amendment also would add projects that are no longer needed because of mission changes unrelated to base closures or realignments.

TITLE XXIII—AIR FORCE

FISCAL YEAR 1994

The House bill would authorize \$2,031,428,000 for Air Force military construction and family housing programs for fiscal year 1994.

The Senate amendment would authorize \$2,101,925,000 for this purpose.

The conferees recommend authorization of \$2,040,031,000 for Air Force military construction and family housing for fiscal year 1994.

Termination of authority to carry out certain projects (sec. 2305)

The Senate amendment contained a provision (sec. 2305) that would repeal certain military construction authorizations contained in the National Defense Authorization Acts for Fiscal Years 1992/1993 and 1993 (Public Laws 102-190 and 102-484). These projects were no longer needed due to intervening base closure or realignment decisions.

The House bill contained no similar provision.

The House recedes with an amendment that would update the list of terminated projects.

Relocation of Air Force activities from Sierra Army Depot, California to Beale Air Force Base, California (sec. 2306)

The House bill contained a provision (sec. 2305) that would amend section 2301(a) of the Military Construction Authorization Act for 1991 (Division B of Public Law 101-510) by striking funding for the Sierra Army Depot and authorizing funding for Beale Air Force Base for construction of a student dormitory and a munitions maintenance facility.

The Senate amendment contained two similar provisions (secs. 2306 and 2307).

The Senate recedes.

Combat arms training and maintenance facility relocation, from Wheeler AFB, Hawaii to Schofield Barracks Open Range, Hawaii (sec. 2307)

The House bill contained a provision (sec. 2306) that would amend section 2301(a) of the Military Construction Authorization Act for 1991 (Division B of Public Law 101-519) by striking the authorization of funds at Wheeler Air Force Base, Hawaii to construct a combat arms training and maintenance facility and authorizing this same project at Schofield Barracks, Hawaii.

The Senate amendment contained a similar provision (sec. 2308).

The Senate recedes.

Financial assistance for improvement of Dysart Channel, Luke Air Force Base, Arizona (sec. 2308)

The House bill contained a provision (sec. 2307) that would authorize the Secretary of the Air Force to transfer up to \$6.0 million to Maricopa County, Arizona, as the service's share of the renovation and improvement of a drainage channel that, among other things, protects Air Force real property on Luke Air Force Base, Arizona.

The Senate amendment contained a similar provision (sec. 2839) that would authorize an identical sum to the Maricopa County Flood District, Arizona.

The House recedes with a clarifying amendment.

Authority to transfer funds for school construction for Lackland Air Force Base, Texas (sec. 2309)

The House bill contained a provision (sec. 2308) that would authorize the Secretary of the Air Force to provide up to \$8.0 million of the amount authorized in section 2304(a)(1) of the National Defense Authorization Act for Fiscal Year 1993 (Public Law 102-484) to the Lackland Independent School District, Texas, for the design and construction of certain school facilities.

The Senate amendment contained no similar provision.

The Senate recedes.

Authority to transfer funds for family housing, Scott Air Force Base, Illinois (sec. 2310)

The House bill contained a provision (sec. 2309) that would authorize the Secretary of the Air Force to transfer funds to the County of St. Clair, Illinois for construction of up to 1,068 military family housing units at Scott Air Force Base, Illinois pursuant to the authority contained in section 2302 of the National Defense Authorization Act for Fiscal Year 1993 (Public Law 102-484).

The Senate amendment contained a similar provision (sec. 2309).

The House recedes.

Revised authorization for family housing, Randolph Air Force Base, Texas (sec. 2311)

The Senate amendment contained a provision (sec. 2310) that would amend section 2303(b) of the National Defense Authorization Act for Fiscal Years 1990 and 1991 (Public Law 101-189), by authorizing a \$95,000 unit cost for certain family housing at Randolph Air Force Base, Texas.

The House bill contained no similar provision.

The House recedes.

TITLE XXIV—DEFENSE AGENCIES

FISCAL YEAR 1994

The House bill would authorize \$4,304,684,000 for Defense Agencies military construction and family housing programs for fiscal year 1994. This title includes authorization of funds for base closure and realignment activities.

The Senate amendment would authorize \$4,097,814,000 for this purpose.

The conferees recommend authorization of \$3,268,394,000 for Defense Agencies military construction and family housing for fiscal year 1994.

Energy conservation projects (sec. 2402)

The House bill contained a provision (sec. 2402) that would authorize the Secretary of Defense to carry out energy conservation projects using funds authorized in section 2403(a)(12) of this act.

The Senate amendment contained a similar provision (sec. 2402).

The House recedes.

Termination of authority to carry out certain projects (sec. 2404)

The Senate amendment contained a provision (sec. 2404) that would repeal certain military construction authorizations contained in the National Defense Authorization Act for Fiscal Year 1992/1993 (Public Law 102-190). These projects were no longer needed due to intervening base closure or realignment decisions.

The House bill contained no similar provision.

The House recedes.

TITLE XXV—NATO

FISCAL YEAR 1994

The House bill and the Senate amendment would authorize \$240.0 million for the U.S. contribution to the NATO Infrastructure program for fiscal year 1994.

The conferees recommend a \$140.0 million authorization for this purpose, conforming the authorization to the Military Construction Appropriations Act for Fiscal Year 1994.

TITLE XXVI—GUARD AND RESERVE

FISCAL YEAR 1994

The House bill would authorize \$645,032,000 for military construction and land acquisition for fiscal year 1993 for the National Guard and Reserve components.

The Senate amendment would authorize \$729,078,000 for this purpose.

The conferees recommend authorization of \$720,197,000 for military construction and land acquisition for fiscal year 1994. This authorization would be distributed as follows:

Army National Guard	\$283,483,000
Army Reserve	101,433,000
Naval/Marine Corps Reserve	25,013,000
Air National Guard	236,341,000
Air Force Reserve	73,927,000

Reduction in certain prior year authorizations of appropriations for reserve military construction projects (sec. 2602)

The Senate amendment contained a provision (sec. 2602) that would reduce certain reserve component authorizations for fiscal years 1990, 1991, 1992, and 1993 to adjust for military construction projects, requested for those years, that are no longer required due to intervening base closure or realignment decisions.

The House bill contained no similar provision.

The House recedes with an amendment that would update the list of terminated projects that were no longer needed.

United States Army Reserve Command headquarters facility (sec. 2603)

The conferees agree to a provision that would authorize the construction of a headquarters facility for the U.S. Army Reserve Command at Fort McPherson, Georgia.

TITLE XXVIII—GENERAL PROVISIONS

LEGISLATIVE PROVISIONS

LEGISLATIVE PROVISIONS ADOPTED

Military family housing leasing programs (sec. 2801)

The House bill contained a provision (sec. 2802) that would amend section 2828 of title 10, United States Code, to provide annual adjustment to the threshold of high-cost domestic leases based on the Consumer Price Index.

The Senate amendment contained a similar provision (sec. 2801) that would permit 300 Department of Defense overseas leases to be increased above the statutory limit and adjusted to changes in the Consumer Price Index.

The Senate recedes with an amendment that would authorize the Secretary of the Navy to lease up to 2,000 additional units of family housing in Italy subject to the maximum lease amount.

The conferees are concerned about the cost of overseas leases for military family housing and recognize the situation in Italy as an exceptional case. This in no way prejudices whether the Navy's prospective leasing of overseas housing is effective. The conferees intend to reconsider overseas leasing costs as a burdensharing issue.

Sale of electricity from alternate energy and cogeneration production facilities (sec. 2802)

The House bill contained a provision (sec. 2803) that would amend section 2483(b) of title 10, United States Code, to clarify the authority to use proceeds from the sale of electricity from alternate energy and cogeneration production facilities.

The Senate amendment contained a similar provision (sec. 2802).

The House recedes with a technical amendment.

Authority for military departments to participate in water conservation programs (sec. 2803)

The Senate amendment contained a provision (sec. 321) that would allow the Department of Defense to participate in water conservation programs conducted by water utilities.

The House bill contained no similar provision.

The House recedes with a technical amendment that would allow the Department of Defense to participate in water conservation programs sponsored by any type of utility.

Clarification of authority for energy conservation programs at military installations (sec. 2804)

The Senate amendment contained a provision (sec. 322) that would amend section 2865 of title 10, United States Code, to allow funds saved as a result of water conservation activities at military installations to be retained by the military services and used for additional defense purposes.

The House bill contained a similar provision (sec. 2804).

The House recedes with a technical amendment.

In pooling the funds generated by the sale of electricity with those available from conservation savings for use by the heads of departments, agencies, or instrumentalities that have realized conservation savings, the conferees intend that such proceeds from the sale of electricity be available to those who have reaped conservation savings, including, where applicable, those who have generated conservation savings by using cogeneration facilities pursuant to the energy conservation plan.

Authority to acquire existing facilities in lieu of carrying out construction authorized by law (sec. 2805)

The House bill contained a provision (sec. 2805) that would amend title 10, United States Code, by authorizing the secretaries of the military services to acquire existing facilities in lieu of authorized construction projects if the secretary determines that acquisition would be more cost-effective and advantageous to the government.

The Senate amendment contained a similar provision (sec. 2804).

The House recedes with an amendment that would require the service secretary to wait 30 days after congressional notification before entering into a formal agreement for acquisition of such facilities. The Secretary also would be authorized to make necessary modifications or conversions to the acquired facility if the cost of such alterations does not exceed the authorized amount of the project. Such costs would be factored into the overall judgment of whether acquisition in lieu of construction is more advantageous to the government.

Clarification of Department of State housing pool participation (sec. 2806)

The House bill contained a provision (sec. 2806) that would amend subsection 2834(b) of title 10, United States Code, to clarify existing Department of Defense authority to accept housing leased by the Department of State.

The Senate amendment contained a similar provision (sec. 2805).

The Senate recedes.

Extension of authority to lease real property for special operations activities (sec. 2807)

The Senate amendment contained a provision (sec. 2806) that would extend, for two years, the existing authority and associated reporting requirements related to leasing options available to special operations forces that are contained in section 2680 of title 10, United States Code.

The House bill contained no similar provision.

The House recedes.

Land conveyance, Broward County, Florida (sec. 2811)

The House bill contained a provision (sec. 2826) that would authorize the Secretary of the Navy to convey approximately 18.45 acres of land and improvements located on Fort Lauderdale-Hollywood International Airport, Florida to Broward County. In exchange, the county would either pay the costs of constructing a suitable replacement facility or pay an amount equal to the fair market value of the parcel which the Navy would use to construct such a facility.

The Senate amendment contained a similar provision (sec. 2840).

The House recedes with an amendment that would provide the Secretary of the Navy with the option of accepting a replacement facility or the payment of the fair market value of the property to be conveyed.

Land conveyance, Naval Air Station, Oceana, Virginia (sec. 2812)

The House bill contained a provision (sec. 2826) that would authorize the Secretary of the Navy to convey, at fair market value, approximately 3.5 acres of real property and appropriate easements at Oceana Naval Air Station, Virginia.

The Senate amendment contained no similar provision.

The Senate recedes.

Land conveyance, Craney Island Fuel Depot, Naval Supply Center, Virginia (sec. 2813)

The House bill contained a provision (sec. 2829) that would permit the Secretary of the

Navy to convey, at fair market value, approximately 135.7 acres, including improvements, to the City of Portsmouth, Virginia.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would clarify the applicability of environmental statutes and the terms of consideration for this conveyance.

Land conveyance, Portsmouth, Virginia (sec. 2814)

The House bill contained a provision (sec. 2830) that would permit the Secretary of the Navy to convey, at fair market value, approximately 1.45 acres of land to the Peck Iron and Metal Company.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would clarify the applicability of environmental statutes to this land conveyance.

Land conveyance, Iowa Army Ammunition Plant, Iowa (sec. 2815)

The House bill contained a provision (sec. 2837) that would authorize the Secretary of the Army, to convey, at fair market value, approximately 127 acres of real property and improvements at the Iowa Army Ammunition Plant, Iowa to the city of Middletown, Iowa.

The Senate amendment contained no similar provision.

The Senate recedes with a technical amendment.

Conveyance of Radar Bomb Scoring Site, Conrad, Montana (sec. 2816)

The Senate amendment contained a provision (sec. 1838) that would authorize the Secretary of the Air Force to convey, without consideration, approximately 42 acres of land and improvements that constitutes the support base for the former Radar Bombing Scoring Site, Conrad Montana. The condition for the conveyance would be that the property be used for housing and recreation purposes.

The House bill contained no similar provision.

The House recedes.

Land conveyance, Charleston, South Carolina (sec. 2817)

The Senate amendment contained no similar provision (sec. 2842) that would authorize the Secretary of the Navy to convey, at no less than fair market value, approximately 10.9 acres of land that comprise a portion of the Charleston Naval Weapons Station South Annex, North Charleston, South Carolina to the Division of Public Railways, South Carolina Department of Commerce.

The House bill contained no similar provision.

The House recedes.

Land conveyance, Fort Missoula, Montana (sec. 2818)

The Senate amendment contained no similar provision (sec. 2844) that would authorize the Secretary of the Army to determine whether approximately 11 acres of land and improvements located in Fort Missoula, Missoula County, Montana is excess to the needs of the Department of the Army. If the property is excess, the Secretary may convey the property to the Northern Rockies Heritage Center for historic, cultural, or educational purposes.

The House bill contained no similar provision.

The House recedes with an amendment that would clarify the non-profit, tax exempt status of the Northern Rockies Heritage Center, and would clarify the applicability of en-

vironmental statutes to this conveyance. The conferees agree that prior to transferring the parcel identified in this section, the Department of Defense must comply with all other applicable provisions of law.

Release of reversionary interest, Old Spanish Trail Armory, Harris County, Texas (sec. 2820)

The House bill contained a provision (sec. 2827) that would authorize the Secretary of the Army to release the reversionary interests of the United States in and to approximately 6.89 acres of real property containing the Old Spanish trail Armory in Harris County, Texas. The provision would also allow a fair market exchange of real property between the University of Texas and the Texas National Guard Armory Board.

The Senate amendment contained no similar provision.

The Senate recedes.

Land easement, West Loch Branch, Naval Magazine Luaualei, Hawaii (sec. 2821)

The conferees agree to a provision that would authorize the Secretary of the Navy to grant a land easement for drainage and other public purposes to the city or county of Honolulu, Hawaii, on property constituting a portion of West Loch Branch, Naval Magazine Luaualei, Hawaii. In consideration, the grantee would pay the Navy fair market value for this interest.

Land transfer, Fort Sheridan, Illinois and Arlington County, Virginia (sec. 2822)

The Senate amendment contained a provision (sec. 2845) that would require the Secretary of Defense to report to the Committees on Armed Services of the Senate and the House of Representatives on the proposed transfer of land located at Fort Sheridan, Illinois for a 7.1 acre parcel of real property located in Arlington, Virginia for the purpose of constructing and operating the National Museum of the United States Army.

The House bill contained no similar provision.

The House recedes.

Modification of land conveyance, New London, Connecticut (sec. 2831)

The House bill contained a provision (sec. 2824) that would amend section 2841(a) of the National Defense Authorization Act for Fiscal Years 1992 and 1993 (Public Law 102-190). The original legislation contained a 20 year lease which the Navy terminated prematurely, rendering the original fair market value transfer formula moot. The provision would modify the original legislation and allow the land conveyance to proceed at less than fair market value.

The Senate amendment contained no similar provision.

The Senate recedes.

Modification of termination of lease and sale of facilities, Naval Reserve Center, Atlanta, Georgia (sec. 2832)

The Senate amendment contained a provision (sec. 2837) that would modify section 2846 of the National Defense Authorization Act for Fiscal Year 1993 by providing more flexible terms of payment and the authority for the Naval Reserve to lease back the Atlanta Naval Reserve Center once it has been purchased by the Georgia Institute of Technology. The term of the lease is intended to last only until new Naval Reserve facilities are completed.

The House bill contained no similar provision.

The House recedes.

Modification of lease authority, Naval Supply Center, Oakland, California (sec. 2833)

The House bill contained a provision (sec. 2836) that would amend paragraph (1) of sub-

section 2834(b) of the Military Construction Authorization Act for Fiscal Year 1993 (division B of Public Law 102-484) to revise the amount of land available for lease from 195 acres to those portions of the Naval Supply Center, Oakland, California, that the Secretary of the Navy determines to be available for lease to the City or Port of Oakland for nominal consideration.

The Senate amendment contained no similar provision.

The Senate recedes.

Expansion of land transaction authority involving Hunters Point Naval Shipyard, San Francisco, California (sec. 2834)

The House bill contained a provision (sec. 2835) that would amend section 2824(a) of the Military Construction Authorization Act for Fiscal Year 1991 (Division B of Public Law 101-510) to authorize the Secretary of the Navy to convey property to the City of San Francisco in lieu of entering into a lease.

The Senate amendment contained no similar provision.

The Senate recedes.

Conveyance of natural gas distribution system, Fort Belvoir, Virginia (sec. 2841)

The House bill contained a provision (sec. 2831) that would authorize the Secretary of the Army to convey to the Washington Gas Company, Virginia, at no less than fair market value, the natural gas distribution system on Fort Belvoir, Virginia.

The Senate amendment contained a similar provision (sec. 2831).

The House recedes.

Conveyance of the water distribution system, Fort Lee, Virginia (sec. 2842)

The House bill contained a provision (sec. 2832) that would authorize the Secretary of the Army to convey to the local water company, at no less than fair market value, the water service and water distribution system at Fort Lee, Virginia.

The Senate amendment contained a similar provision (sec. 2832).

The House recedes.

Conveyance of waste water treatment facility, Fort Pickett, Virginia (sec. 2843)

The House bill contained a provision (sec. 2833) that would authorize the Secretary of the Army to convey, at not less than fair market value, the waste water treatment facility at Fort Pickett, Virginia to the town of Blackstone, Virginia.

The Senate amendment contained a similar provision (sec. 2833).

The House recedes.

The Fort Pickett water treatment facility is being conveyed at the request of the town of Blackstone, Virginia, and should not be viewed as a precedent for, or encouragement of, transfers of water treatment facilities on a nationwide basis. Any transfers of Department of Defense water treatment facilities should be examined on a case-by-case basis. This is particularly true if transfers of ownership of waste water treatment works are driven by motivations to alter the application of environmental laws and regulations to a particular facility in a manner that is less protective of the environment.

Conveyance of water distribution system and reservoir, Stewart Army Subpost, New York (sec. 2844)

The House bill contained a provision (sec. 2834) that would authorize the Secretary of the Army to convey, at no less than fair market value, the water distribution system and reservoir at the Stewart Army Subpost, New York to the town of New Windsor, New York.

The Senate amendment contained a similar provision (sec. 2834).

The House recedes.

Transfer of electric power distribution system at Naval Air Station, Alameda, California, to the City of Alameda Bureau of Electricity (sec. 2845)

The House bill contained a provision (sec. 2838) that would authorize the Secretary of the Navy to convey to the Bureau of Electricity of the City of Alameda, California, the electric power distribution system located at the Naval Air Station, Alameda, California.

The Senate amendment contained no similar provision.

The Senate recedes with a technical amendment that would bring this provision into conformance with similar utility system conveyances contained elsewhere in this act.

Conveyance of electrical distribution system, Fort Dix, New Jersey (sec. 2846)

The Senate amendment contained a provision (sec. 2836) that would authorize the Secretary of the Army to convey to the local electrical utility company, at no less than fair market value, the electrical distribution system on Fort Dix, New Jersey.

The House bill contained no similar provision.

The House recedes.

Lease of real property, Camp Pendleton, California (sec. 2847)

The House bill contained a provision (sec. 2828) that would provide for the lease of real property, known as the San Mateo Basin, at Camp Pendleton, California, for a period of up to 50 years to the Tri-Cities Municipal Water District. All improvements and operation and maintenance costs, along with cash or additional required services in an amount equal to fair market value, would be provided by the Water District.

The Senate amendment contained a similar provision (sec. 2835).

The Senate recedes.

Disposition of real property at missile sites to adjacent landowner (sec. 2851)

The Senate amendment contained a provision (sec. 2856) that would amend section 9781 of title 10, United States Code, to authorize the Administrator of General Services to convey, for fair market value, excess real property at Air Force missile sites to adjacent land owners.

The House bill contained no similar provision.

The House recedes.

DOD vaccine production facility (sec. 2852)

The Senate amendment contained a provision (sec. 2852) that would prohibit the Department of Defense from obligating funds authorized in fiscal year 1994 for the Department of the Army for either the architectural design or construction of a vaccine production facility. The provision would direct the Secretary of Defense, in consultation with the Secretary of the Army, to submit a report to the Congress on the need for a DOD facility by February 1, 1994.

The House bill contained no similar provision.

The House recedes.

The conferees have concerns about the necessity for a dedicated DOD vaccine production facility. In the event the Department includes funds for a facility in the fiscal year 1995 budget request, the conferees agree that a report to Congress would facilitate the decisionmaking process. The report shall include: a cost-benefit analysis of the alter-

natives for a vaccine production facility, and a comparison of the costs to construct a dedicated DOD facility with the cost of a contracted commercial production and a civilian dual-use facility; and information on the appropriate vaccines necessary to protect the projected U.S. force. The report shall also address the economic feasibility of contracting with U.S. or foreign manufacturers to supply the necessary vaccines and the issue of indemnification. Additionally, the report shall include information on the Defense Department's plans to supply the necessary vaccines in the period between construction and the projected completion and validation of the facility.

Grant relating to elementary school for military dependents, Fort Belvoir, Virginia (sec. 2853)

The Senate amendment contained a provision (sec. 2853) that would authorize the Secretary of the Army to make a direct grant of \$8.0 million to the Fairfax County School Board, Virginia, to support the construction of a replacement public school on Fort Belvoir, Virginia that the local school system operates. The local school system would assume complete facility maintenance responsibility when the construction is completed.

The House bill contained no similar provision.

The House recedes.

Allotment of space in federal buildings to credit unions (sec. 2854)

The Senate bill contained a provision (sec. 2854) concerning allotment of space in federal buildings to credit unions.

The House bill contained no similar provision.

The House recedes.

Flood control project (sec. 2855)

The House bill contained a provision (sec. 2841) that would direct the Secretary of the Army to construct the Coyote and Berryessa Creeks flood control project in Santa Clara, California using funds appropriated to the U.S. Army Corps of Engineers for fiscal year 1994.

The Senate amendment contained no similar provision.

The Senate recedes.

Restrictions on land transactions relating to the Presidio of San Francisco, California (sec. 2856)

The conferees are concerned about a pending transfer of land at the Presidio of San Francisco, California from the Army to the Department of the Interior. Upon completion of this transfer, land now occupied by the Army would become part of the Golden Gate National Park. The conferees agree to a provision that would require, as a condition precedent to the transfer of land to the Department of the Interior, the Secretary of the Army to determine that the property to be transferred is excess to Army needs. In addition, the Secretary of Defense would be required to submit to the Committees on Armed Services of the Senate and House of Representatives a report describing the circumstances under which the property transfer would take place and under which the Army would continue to use facilities at the Presidio.

LEGISLATIVE PROVISIONS NOT ADOPTED

Termination of authority to carry out land acquisition in Muskingum County, Ohio

The House bill contained a provision (sec. 2602) that would amend the National Defense Authorization Act for Fiscal Year 1991 (Public Law 101-510) by repealing a \$5.67 million

authorization for a land acquisition to establish an Army National Guard training area in Muskingum county, Ohio.

The Senate amendment contained no similar provision.

The House recedes.

The conferees direct that the land acquisition previously authorized for a maneuver area in Muskingum County, Ohio, be terminated. The conferees further direct that the National Guard Bureau reprogram a portion of the funds previously authorized for that purpose to construct the following projects in the state of Ohio:

	Amount
Camp Perry, ammunition storage bunker	\$246,000
Camp Perry, upgrade fencing/lighting	600,000
Camp Perry, OMS	600,000
Camp Perry, combat pistol range	600,000
Camp Perry, multi-purpose range	600,000
Newton Falls, training equipment site	800,000
Rickenbacker Airport, upgrade fencing/lighting	400,000
<i>Increase in the maximum amount authorized to be obligated for emergency construction</i>	

The House bill contained a provision (sec. 2801) that would amend section 2803(c)(1) of title 10, United States Code, to increase the emergency construction authority from \$30.0 million to \$50.0 million.

The Senate amendment contained no similar provision.

The House recedes. The conferees believe the existing \$30.0 million authority is sufficient to meet emergencies in all situations where the President has not declared a national emergency or in the event of war.

Navy housing investment agreements and housing investment board

The House bill contained a provision (sec. 2807) that would amend chapter 649 of title 10, United States Code, to authorize the department of the Navy to invest in limited partnerships for the purpose of developing privately owned family housing units near military installations. This section would establish a board of Navy and private sector individuals to administer a revolving fund.

The Senate amendment contained no similar provision.

The House recedes.

The conferees recognize that many communities adjacent to military bases have not been able to provide safe, affordable housing for military personnel. This shortage of such housing is chronic at certain locations, necessitating lengthy commutes and lowering morale and efficiency. The Department of Defense has not given the House provision the careful examination it requires.

The conferees believe an initiative of this complexity merits executive branch evaluation and congressional examination through oversight hearings prior to consideration for enactment. The conferees direct the Secretary of Defense to review the House provision and the recent Congressional Budget Office report, *Military Family Housing in the United States*, and provide an analysis of the issues to the Committees on Armed Services of the Senate and the House of Representatives by March 30, 1994.

Should the Department conclude that the ideas contained in the House provision have merit, the conferees expect that this initiative would be developed for the benefit of military personnel of all the Services, and submitted to the Congress as part of the fiscal year 1995 budget request.

Conveyance of surplus real property, Fort Ord, California

The House bill contained a provision (sec. 2839) that would authorize the Secretary of the Army to convey certain parcels of real property located at Fort Ord, California for educational purposes to the Regents of the University of California and the Trustees of the California State University.

The Senate amendment contained no similar provision.

The House recedes.

In agreeing to the provisions relating to base closures in title XXIX of this act, the conferees intend to reduce the complexity of the existing system and allow for innovative reuse programs such as the program proposed by the reuse committee at Fort Ord.

Specifically, the conferees recognize that development without delay is critical to the success of the private-public effort. Because the University of California and the California State University system are public entities, the universities are eligible under section 2903 of this act to receive property at Fort Ord both for educational purposes and to foster economic redevelopment through transfer.

The conferees support the commitment of the Department of Defense, as expressed in a letter from the Deputy Secretary of Defense, to convey certain surplus real property at Fort Ord to the Trustees of the California State University system and the Regents of the University of California. The conferees expect the clean parcels of land to be conveyed by the spring of 1994 and parcels requiring environmental remediation to be conveyed as soon as practical.

Use of Army Corps of Engineers to manage military construction projects in Hawaii

The House bill contained a provision (sec. 2842) that would require that all military construction in Hawaii be designed and constructed through the Army Corps of Engineers.

The Senate amendment contained no similar provision.

The House recedes.

The conferees note that the current division of military construction and military family housing supervision appears to meet the Department of Defense's needs in the state of Hawaii. The Army Corps of Engineers, reflecting the Army's responsibility as executive agent for military family housing in Hawaii, is responsible for design, construction, maintenance, and repair of all the housing facilities in the state. The Naval Facilities Engineering Command (NAVFAC) provides design, construction, and maintenance services for non-military family housing for the navy. The Army Corps of Engineers and NAVFAC share in providing such services to the Air Force and other agencies.

The conferees believe that the current division of labor is appropriate to the mix of military missions in Hawaii. The conferees encourage the military departments to periodically review these arrangements should the state experience significant force structure changes.

Special rule for military construction on certain lands in the state of Hawaii

The House bill contained a provision (sec. 2843) that would require consultation with, and the written concurrence of, the Governor of the state of Hawaii before military construction could be carried out at an installation located on public lands the Republic of Hawaii ceded to the United States.

The Senate amendment contained no similar provision.

The House recedes.

Evaluation and report on proposals for purchase or lease of certain facilities, Arlington, Virginia

The Senate amendment contained a provision (sec. 2814) that would direct the Secretary of the Navy to evaluate revised lease proposals for buildings the Navy currently occupies in Arlington, Virginia. These proposals were submitted to the Base Closure and Realignment Commission during its deliberations and subsequent recommendation to relocate Navy activities from leased facilities in Arlington to government-owned facilities at other locations.

The House bill contained no similar provision.

The Senate recedes. The conferees understand that during the Commission's deliberations, it received various unsolicited and revocable lease and sale offers for buildings in Northern Virginia that are presently occupied by Navy tenants. The Commission did not have the information or expertise to evaluate property whether these offers provided the best value to the government, or if they met the Navy's requirements.

The conferees believe that any potential to save resources should be explored. Therefore, the conferees direct the Navy, in coordination with the General Services Administration, to carefully scrutinize and refine such offers. The Navy shall submit a report, no later than May 1, 1994, to the Committees on Armed Services of the Senate and the House of Representatives on the potential benefits, if any, to the government of such offers. The conferees believe this recommendation is consistent with the findings and recommendations of the 1993 Base Closure and Realignment Commission.

Land transfer, Woodbridge Research Facility, Virginia

The Senate amendment contained a provision (sec. 2841) that would direct the Secretary of the Army to transfer, without reimbursement, approximately 580 acres of land comprising the Harry Diamond Army Research Laboratory, Woodbridge Research Facility, Virginia to the Secretary of the Interior for incorporation into the Marumsc National Wildlife Refuge, Virginia.

The House bill contained no similar provision.

The Senate recedes.

The conferees understand that the Senate provision was in response to a provision in the House-passed Military Construction Appropriations Bill for Fiscal Year 1994 that would have transferred to the Library of Congress, contrary to the Defense Base Closure and Realignment Act of 1990 (Public Law 101-510) procedures, a portion of the Woodbridge property for a use that was not compatible with the natural setting. The conferees understand that the Library of Congress was provided with an alternative site through special legislation. Therefore, the Senate provision is no longer necessary, and the property at Woodbridge will be disposed of in accordance with the Defense Base Closure and Realignment Act of 1990.

The conferees support the Secretary of the Interior's intention to obtain this property at the earliest possible date and urge the Secretary of the Army to support the transfer.

Report on economic and environmental effects of the transfer of Mine Warfare Center of Excellence

The Senate amendment contained a provision (sec. 2851) that would direct the Secretary of the Navy to submit to the congressional defense committees an environmental

impact statement and an economic assessment of the establishment of the Mine Warfare Center of Excellence at Ingleside, Texas. The amendment would preclude any further movement of activities to Ingleside until the reports were received.

The House bill contained no similar provision.

The Senate recedes.

The conferees agree that the Navy's dismal record of mine countermeasure during the Persian Gulf war mandates extraordinary efforts. The conferees also acknowledge that the Mine Warfare Center of Excellence is a worthy endeavor. However, when the Department of Defense is closing installations, it is important that the Navy's plans to establish the Center be both environmentally and economically sound. The conferees are aware that the Navy is conducting a supplemental environmental impact statement on the movement of mine warfare forces to Ingleside and that the Office of the Secretary of Defense is doing a total cost analysis of consolidating mine warfare forces at Ingleside/Corpus Christi. The conferees direct the Secretary of Defense to provide this cost analysis to the congressional defense committees.

Study of effects of Air Force activities on Duck Valley Reservation

The Senate amendment contained a provision (sec. 2855) that would direct the Secretary of the Air Force to study the effects of Air Force operations on the Duck Valley Reservation of the Shoshone-Paiute Tribes in the States of Idaho and Nevada.

The House bill contained no similar provision.

The Senate recedes.

Massachusetts Military Reservation environmental concerns

The conferees understand that there are problems at the Massachusetts Military Reservation, which includes Otis Air National Guard Base, regarding the long-run environmental impact of the Reservation's facilities and activities, both current and planned. The conferees believe that the National Guard should address these issues as expeditiously as possible.

Authorization of projects not appropriated

The conferees did not recommend authorizations for military construction projects that were not funded in the Military Construction Appropriations Act for Fiscal Year 1994. However, the conferees would authorize the following two Reserve component projects which were in the budget request,

authorized and appropriated by both the Senate and the House, but subsequently deleted during the appropriations conference.

Florida: Army National Guard—Eglin AFB—multipurpose range complex	\$3,825,000
New Hampshire: Air National Guard—Pease AFB—upgrade KC-135 hydrant fueling system	5,600,000

The conferees have taken this unusual action because these projects have greater priority than those that received an appropriation, and because of the congressional support these two projects received throughout the legislative process. The conferees agree that both projects are essential to unit operations and readiness. Therefore, the conferees direct the Directors of the Army National Guard and the Air National Guard to submit a reprogramming request for the construction of these projects as soon as possible. Based upon the colloquies during final Senate consideration of the Military Construction Appropriations Act of Fiscal Year 1994, the conferees understand that the reprogramming requests will be considered favorably.

Navy unspecified minor construction

The conferees direct that, within funds authorized for unspecified minor construction, the Marine Corps undertake the following unspecified minor construction projects in fiscal year 1994: (1) \$1.4 million, controlled humidity warehouse, Beaufort Marine Corps Air Station, South Carolina; and (2) \$750,000, emergency off base water supply and \$1.0 million, flood protection, Camp Pendleton Marine Corps Base, California.

The conferees note that two additional projects at Camp Pendleton, relocation of six water wells and replacement of drainage structure, exceed the unspecified minor construction ceiling but encourage the Department of the Navy to budget these projects in the earliest fiscal year possible.

Homestead Air Force Base, Florida

The conferees are aware of the Air Force Reserve's need for a medical training facility at Homestead Air Force Base, Florida. The decision by the 1993 Defense Base Closure and Realignment Commission to retain an Air Force Reserve fighter wing and rescue squadron at Homestead in cantonment areas justifies this military construction requirement.

The conferees direct the Secretary of Defense to fund the medical training facility

(\$2.75 million) within funds authorized in the base realignment and closure III account.

Comiso buyout of leases

The conferees note that the budget request for the Air Force included \$20.2 million for family housing at Comiso Air Base, Italy. The purpose of this request was to buyout the unexpended term of a lease of family housing that was entered into when this ground launched cruise missile (GLCM) base was constructed in the mid-1980s. While the authorizing committees of both the Senate and the House of Representatives recommended support of this request, the conferees deleted this authorization because there was no accompanying appropriation. The conferees recommend that funds authorized to the Air Force for family housing operations be used if this initiative is pursued.

In light of the "dual track" diplomatic strategy that was used to deploy the GLCM force in Europe (i.e., construct bases and deploy the weapons while simultaneously negotiating the theater ban on such weapons), the conferees are dismayed that a U.S. long-term lease associated with any of these bases would not contain a provision for cancellation at the convenience of the government. Had such a provision been included in the lease, the conferees understand that this \$20.2 million liability to pay for housing that is of no use to U.S. forces at Comiso Air Base would have been avoided.

The conferees direct the Secretary of the Air Force to submit a report to the congressional defense committees no later than 180 days after enactment of this act on leases associated with the development and deployment of GLCM forces in Europe. The report should include:

(1) a brief description of each lease supporting each GLCM base with particular reference to the U.S. government's termination rights;

(2) in the case where termination for government convenience was not included, the reason for such omission;

(3) the extent of the U.S. government's participation or prospective liability to pay for the use of facilities that are no longer needed in light of the withdrawal of these forces and, in most cases, the closure of their support bases; and

(4) an assessment of the scope and cost of termination liability for a facility or other lease arrangements associated with the closure of overseas installations. This last issue should be addressed in coordination with the Secretary of the Army.

TITLE XXIX—DEFENSE BASE CLOSURE AND REALIGNMENT

Both the House bill and the Senate amendment contained numerous provisions that would address the process of closing domestic military installations after they have been approved for closure. The provisions also would assist communities that are adversely impacted by these actions to reorient their economies and to begin to recover from the loss of defense and related jobs and tax revenues.

Many provisions were meant to address the particular needs of individual communities, while others attempted to establish broad policy and authorities to deal with the challenge of community economic recovery. The lack of policy guidelines has resulted in unnecessarily slow community responses to the significant challenge of reorienting the economies of these communities. It has also resulted in diverse responses by the affected military services that have often complicated the communities' problems rather than facilitated solutions.

Announced during Senate and House consideration of the defense authorization bill, President Clinton's five point plan for community recovery has provided a framework to the conferees. In drawing the best ideas from the Senate and House bills and from communities and other affected interests, the conferees attempted to follow these basic principles:

Community economic redevelopment in the face of defense base or plant closures is a complex regional challenge which merits priority attention and a coordinated inter-agency response by the federal government.

The primary responsibility for shaping and implementing this redevelopment rests with the local community.

The real and personal property associated with closing military bases is an asset to the nation's citizens. Follow-on use by the military services must be based upon documented current or future need. Assets not needed for these purposes should be used to meet other governmental needs, with a high priority given to the redevelopment needs of local communities.

The base closure and community redevelopment process is an emotional process with many conflicting goals and requirements. These interests include environmental concerns, support of the shelter needs of the homeless, the chronic shortage of low and modest income housing, and the need for various forms of prisons and drug rehabilitation centers. Statutes advancing community redevelopment needs and community redevelopment plans must take all these interests into account, balancing these conflicts when they arise.

Inasmuch as the country's economic strength is a national security asset, assistance to affected communities to aid their economic redevelopment is a legitimate defense expense.

While each affected community faces unique challenges, all should be provided uniform access to assistance, consistent with the extent of the economic impact they experience.

The conferees believe that the provisions contained in title XXIX provide the statutory flexibility to achieve economic recovery in affected communities within this policy framework.

LEGISLATIVE PROVISIONS

LEGISLATIVE PROVISIONS ADOPTED

Congressional findings (sec. 2901)

The Senate amendment contained a provision (sec. 2902) that would express congres-

sional findings related to the economic impact a base closure can have on a local community and the potential role of the federal government in helping the community redevelop the property.

The House bill contained no similar provision.

The House recedes with an amendment that would clarify one of the findings.

Coordination of activities of other federal departments and agencies relating to installations to be closed (sec. 2901)

The Senate amendment contained a provision (sec. 2910) that would require the head of each federal department or agency with jurisdiction over any portion of the closure of a military installation to designate an individual to provide information and assistance to the installation's transition coordinator.

The House bill contained no similar provision.

The House recedes with an amendment that would incorporate the concepts contained in the Senate provision into another section of this act that would set forth congressional findings on the base closure process. The conferees believe that a point of contact at each involved federal agency would assist the communities involved in the redevelopment and reuse of closing bases.

Transfer of personal property at closing bases (sec. 2902)

The House bill contained a provision (sec. 2920) that would prohibit the Secretary of Defense from removing or disposing of any personal property at a closing military base until the Secretary approves an inventory of such property and the recognized community reuse group identifies items of use to the redevelopment of the closing military installation.

The Senate amendment contained a similar provision (sec. 2903).

The House recedes with an amendment that would direct the secretary of the military department to inventory a base's personal property within six months following the date a base is approved for closure. Following completion of the inventory, the secretary of the military department would be prohibited from removing personal property not needed for a military or other federal purpose until the local redevelopment authority had an opportunity to determine whether the personal property would be useful in the reuse of the base.

Authority to transfer property at closed installations to affected communities or states (sec. 2903)

The House bill contained a provision (sec. 2922) that would direct the Secretary of Defense to establish a pilot program to develop and evaluate the adequacy of economic revitalization criteria to govern the conveyance of certain surplus property at closed military installations, to local redevelopment authorities, in order to assist the surrounding communities recover from the closure of such bases. The program would also require the conveyance, at no cost, of all real and related personal property at certain closing installations to the local redevelopment authorities. The provision would require that pilot programs be conducted at the following installations: Naval Air Station Alameda, California; Naval Depot Alameda, California; Loring Air Force Base, Maine; Gentile Air Force Station, Ohio; and certain military facilities in Charleston, South Carolina.

The Senate amendment contained a provision (sec. 2904) that would allow the Secretary of Defense to transfer all or portions of a closing military base to a redevelopment

authority, or other governmental entity, at reduced cost or no cost, for economic redevelopment purposes. In addition, the provision would direct the Secretary of Defense to issue implementing regulations.

The House recedes with an amendment that would broaden the scope of the Secretary's discretion to transfer property and that would provide special help for rural communities in facing their economic redevelopment challenges. The expanded provision recommended by the conferees would benefit not only the communities surrounding the installations included in the House provision, but all similarly situated communities.

The Secretary shall prescribe regulations to implement this provision that take into account criteria such as the economic impact of closure, the financial condition of the community, and the prospects for redevelopment when determining the consideration, if any, that the transferee will provide for the property. The conferees recommend that the Secretary consult with the Administrator of the Economic Development Administration when evaluating the economic impact of closure, and the redevelopment plan.

In addition, the conferees direct the Secretary to maintain a record of the justification for each transfer at below estimated fair market value.

Expedited determination of transferability of excess property of installations to be closed (sec. 2904)

The Senate amendment contained a provision (sec. 2907) that would direct the Secretary of Defense to identify the property excess to the requirements of the Department of Defense and other federal agencies within six months after the date a base is finally approved for closure.

The House bill contained no similar provision.

The House recedes with a technical amendment.

Availability of property and services for assisting the homeless (sec. 2905)

The Senate amendment contained a provision (sec. 2908) that would amend section 2905(b) of the Defense Base Closure and Realignment Act of 1990 (part A of title XXIX of Public Law 101-510) to provide concurrent screening of surplus real property made available by base closures or realignments for use by other federal agencies and for use to support the homeless under the provisions of the Stewart B. McKinney Homeless Assistance Act (section 11301 et seq., title 42, United States Code).

The House bill contained no similar provision.

The House recedes with an amendment that would clarify the period of time in which the property at closing military installations is available for screening by homeless providers. The provision would allow the same time periods as provided by the McKinney Act for screening and application for use by the homeless. This period of availability would begin at the conclusion of the screening period to determine whether the Department of Defense or any other federal agency has a need for all or part of the property at the closing military installation. Following the time provided for screening by homeless providers and the federal government, the remaining property at closing installations would be available for one year to allow the communities and the local redevelopment authority to identify those portions of the closing military installation that are suitable for redevelopment and reuse.

Leasing of real property at closing installations (sec. 2906)

The House bill contained a provision (sec. 2817) that would authorize the secretary of a military department to lease property at an installation to be closed or realigned at less than fair market value if the Secretary determines that a public benefit would accrue as a result of the lease.

The Senate amendment contained a similar provision (sec. 2905).

The Senate recedes with a technical amendment.

The conferees are sensitive to several competing interests related to closing bases which have environmentally contaminated property. One interest is the remediation of the contamination on an expedited basis and reducing or eliminating any health hazards associated with the contamination so the property can be transferred from federal control. Another interest is the community's desire to generate new jobs, often using facilities located on environmentally contaminated parcels of land. If the lease is too short, redevelopment prospects would be discouraged from making the necessary capital investment.

The conferees are concerned that the lease of this property while necessary to economic redevelopment, not hinder the expeditious cleanup of the contaminated portions of closing bases. The conferees urge the Department of defense to work closely with the environmental Protection Agency and the appropriate state agencies to ensure that the lease of contaminated property is consistent with the protection of public health and safety, and the environment. The leases should be for the length of time necessary to foster redevelopment but not so long as to discourage the cleanup of the property as expeditiously as possible.

Authority to contract for certain functions at installations being closed or realigned (sec. 2907)

The House bill contained a provision (sec. 2812) that would amend section 204 of the Defense Authorization Amendments and Base Closure and Realignment Act (Public Law 100-536) and the Defense Base Closure and Realignment Act of 1990 (Public Law 101-510) to authorize base commanders at closing bases to contract for services such as fire-fighting and guard services without cost comparison studies.

The Senate amendment contained two similar provisions (secs. 2916 and 2919).

The conferees agree to delete Senate section 2916 and House section 2812. The House recedes to Senate section 2919 which would incorporate the intent of the two deleted provisions.

Authority to transfer property at military installations to be closed to persons conducting environmental restoration activities at the installation (sec. 2908)

The House bill contained a provision (sec. 2816) that would and section 204 of the Defense Authorization Amendments and Base Closure and Realignment Act of 1988 (Public Law 100-526) and section 2905 of the Defense Base Realignment and Closure Act of 1990 (Public Law 101-510) to authorize the Secretary of Defense to transfer real property or facilities, without reimbursement, at a closed military installation to any person who agrees to conduct all environmental restoration, waste management, and environmental compliance required under federal and state laws, and pay all the associated costs.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require agreements entered into under this authority to be made pursuant to regulations issued by the Secretary. In addition, the indemnification authority provided by section 330 of the National Defense Authorization Act for Fiscal Year 1993 would not be available for any transfers made pursuant to this section.

Availability of surplus military equipment (sec. 2909)

The Senate amendment contained a provision (sec. 2843) that would authorize the Secretary of Defense to make available surplus military equipment scheduled for retirement or disposal owing to military downsizing base closure or realignment to communities suffering economic hardships from the closure of a military base, if such equipment is important to the communities' economic development efforts, and if such equipment does not have an alternative military use. The communities need not have been affected by the base closure process that began in 1988.

The House bill contained no similar provision.

The House recedes with an amendment that would express the sense of Congress that the Secretary of Defense ought to provide surplus military equipment on a priority basis to U.S. communities that have suffered economic hardship from the closure of military bases, whether or not these closures occurred under the authorities of the Defense Base Closure Act of 1988 or 1990.

Identification of uncontaminated property at installations to be closed (sec. 2910)

The Senate amendment contained a provision (sec. 2913) that would direct the Secretary of Defense to expedite the identification of the clean portions of closing bases pursuant to the Community Environmental Response Facilitation Act of 1992. The provision also would require the Secretary to give preference to parcels where a reuse plan has been identified.

The House bill contained no similar provision.

The House recedes with an amendment that would direct expedited parcel identification to the maximum extent possible. The conferees expect the Secretary of Defense to announce the availability of uncontaminated parcels of land as soon as they have been identified, and not delay such announcements until all parcels on an installation or within a closure package are identified.

Compliance with certain environmental requirements relating to closure of installations (sec. 2911)

The Senate amendment contained a provision (sec. 2915) that would direct the Secretary of Defense to: (1) complete any necessary environmental impact statements within 12 months from the date a base closure community submits a single, final, redevelopment plan; and (2) base such an environmental impact statement on the final reuse plan prepared by the local community.

The House bill contained no similar provision.

Preference for local and small businesses (sec. 2912)

The House bill contained a provision (sec. 2821) that would authorize the Secretary of Defense to give preference to qualified businesses and small business concerns located in the vicinity of a closing military installation when awarding contracts for environmental restoration and mitigation at a military installation to be closed or realigned.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would extend the coverage to small and disadvantaged businesses.

Assistance to affected states and communities through the Office of Economic Adjustment (sec. 2913)

The Senate amendment contained a provision (sec. 2912) that would authorize the Secretary of Defense, through the Office of Economic Adjustment, to make planning grants to local reuse authorities to support development and implementation of reuse plans. In addition, this provision would require that all grant applications be acted upon within seven days after the date they are received.

The House bill contained a similar provision (sec. 1321).

The House recedes with an amendment that would clarify that the time for consideration of applications for planning grants is seven days, and the time for consideration of applications for assistance for community adjustments and economic diversification is 30 days.

Clarification of utilization of funds for community economic adjustment assistance (sec. 2914)

The Senate amendment contained a provision (sec. 2917) that would clarify that up to three percent of the funds made available to the Economic Development Administration for economic adjustment assistance pursuant to section 4305 of the National Defense Authorization Act for Fiscal Year 1993 (Public Law 102-484) could be used for administrative purposes.

The House bill contained no similar provision.

The House recedes.

Transition coordinates for assistance to communities affected by the closure of installations (sec. 2915)

The Senate amendment contained a provision (sec. 2909) that would direct the Secretary of Defense to appoint an on-site transition coordinator for each closing installation. This coordinator would serve as a single point of contact for all federal base disposal, cleanup, and reuse activities, and would chair the base property disposal, cleanup, and disposal team.

The House bill contained no similar provision.

The House recedes.

Sense of Congress on seminars on reuse or redevelopment of property at installations to be closed (sec. 2916)

The Senate amendment contained a provision (sec. 2914) that would direct the Secretary to conduct seminars in communities in which a military installation to be closed or realigned is located. The seminars would present information on the various federal programs that are available to help the communities adjust to the loss of a base.

The House bill contained no similar provision.

The House recedes with an amendment that would express the sense of Congress that the Secretary of Defense should conduct such seminars so that the communities are fully aware of the federal assistance that is available to them, such as job placement assistance.

Feasibility study to guarantee assistance to adversely affected communities (sec. 2917)

The House bill contained a provision (sec. 1321(c)) that would direct the Secretary of Defense to study the feasibility of assisting local communities recovering from the adverse economic impact of the closure or

major realignment of a military installation by reserving 10 percent of the total projected savings, realized in the first 10 years after closure, to be used for community assistance grants.

The Senate amendment contained no similar provision.

The Senate recedes.

Military base closure and realignment definitions (sec. 2918)

The Senate amendment contained a provision (sec. 2918) that would define certain terms and phrases relating to military base closures and realignments.

The House bill contained no similar provision.

The House recedes with an amendment that would provide additional relevant definitions.

Base closure account management flexibility (sec. 2921)

The House bill contained a provision (sec. 2811) that would amend section 207(a) of the Defense Authorization Amendments and Base Closure and Realignment Act (Public Law 100-256) and section 2906 of the National Defense Authorization Act for Fiscal Year 1991 (Public Law 101-510) to authorize the merger of the 1988 base closure and realignment (BRAC) account with the 1990 BRAC account when the 1988 account expires. The provision also includes a technical correction that would extend the life of the 1990 BRAC account to coincide with the expiration of the Secretary of Defense's authority to carry out a closure or realignment under the National Defense Authorization Act for Fiscal Year 1991 (Public Law 101-510).

The Senate amendment contained no similar provision.

The Senate recedes.

Limitation of expenditure of funds from the Defense Base Closure Account 1990 for military construction in support of transfers of functions (sec. 2922)

The Senate amendment contained a provision (sec. 2813) that would preclude the Secretary of Defense from using Base Closure Account 1990 funds for the construction of facilities that will support the relocation of activities from installations approved for closure or realignment under the Defense Base Closure Act of 1990, if the sites that are to receive such activities differ from those the Secretary documents as part of his justification for such closure and realignment recommendations to the Defense Base Closure and Realignment Commission. If the Secretary decides to alter the planned relocation of such activities, he would have to notify the Committees on Armed Services of the Senate and the House of Representatives of the new location and rationale for the change.

The House bill contained no similar provision.

The House recedes with an amendment that would remove the waiver of any related legislation.

Modification of requirement for reports on activities of the Defense Base Closure Account 1990 (sec. 2923)

The Senate amendment contained a provision (sec. 2811) that would amend the content of the annual report of receipts and expenditures of the Department of Defense Base Closure Account 1990 contained in section 2906 of the Defense Base Closure and Realignment Act of 1990 (Public Law 101-510). The provision would require the Department of Defense to report to the congressional defense committees the overall spending and funding

information for the report year by military service, and specific construction project data related to each military installation affected by these closures and realignments.

The House bill contained no similar provision.

The House recedes.

Additional report on residual value of overseas military installations that are closed (sec. 2924)

The Senate amendment contained a provision (sec. 2815) that would amend the annual report requirement regarding overseas military bases contained in section 1304 of the National Defense Authorization Act for Fiscal Year 1993 to include additional site specific data. After this report is published, the Comptroller General shall report to the Committees on Armed Services of the Senate and the House of Representatives on the overall accuracy of the Department of Defense report.

The House bill contained no similar provision.

The House recedes.

Sense of Congress on development of base closure criteria (sec. 2925)

The Senate amendment contained a provision (sec. 2812) that would direct the Secretary of Defense to consider, in proposing criteria to be used in selecting military bases for closure and realignment under the Defense Base Closure and Realignment Act of 1990, the direct costs of such closure or realignment actions to other federal government agencies and to estimate to the extent possible, similar state and local government costs.

The House amendment contained no similar provision.

The House recedes with an amendment that would express the sense of Congress that the Secretary of Defense should consider, to the extent feasible, the direct costs of base closures and realignments on state and local government and other federal agencies.

Modification of procedure for making recommendations for base closures and realignments (sec. 2926)

The conferees agree to a provision that would amend subsection (c)(1) of section 2903 of the Defense Base Closure and Realignment Act of 1990 (Public Law 101-150). The amendment would change the deadline from March 15, 1995 to March 1, 1995, when the Secretary of Defense must transmit to the Defense Base Closure and Realignment Commission and the Congress the list of military installation inside the United States that the Secretary would recommend for closure or realignment.

Not later than seven days after transmittal, the Secretary would be required to submit to Congress a summary of the selection process that resulted in the recommendation for each installation, including a justification for each recommendation. The amendment would further provide that any information provided to the Commission by the Secretary must also be submitted to Congress within 24 hours.

If the Commission proposes changes in the recommendations submitted by the Secretary of Defense, such changes would have to be published in the Federal Register not less than 45 days before the Commission transmits its recommendations to the President on July 1.

Public purpose extensions (sec. 2927)

The House bill contained a provision (sec. 1050) that would amend section 203 of the

Federal Property and Administrative Services Act of 1949 (section 484 of title 40, United States Code). This provision would authorize the Secretary of Transportation, after consultation with the Secretary of Defense and the General Services Administrator, to convey, at no cost, surplus real property (including buildings, fixtures, and equipment) located on closing military installations to state and local governments, political subdivisions, U.S. territories, and the District of Columbia for the development or operation of a port facility.

The Senate amendment contained no similar provision.

The Senate recedes.

Authority regarding financial institution on closed military installations to include all depository institutions (sec. 2928)

The House bill contained a provision (sec. 2815) that would amend section 2825 of the National Defense Authorization Act for Fiscal Years 1992 and 1993 (Public Law 102-190) to expand its applicability to all depository institutions, and to provide the right of first refusal to purchase facilities the depository institutions had constructed or significantly modified.

The Senate amendment contained no similar provision.

The Senate recedes.

Electric power allocation and economic development at certain military installations to be closed in the states of California (sec. 2929)

The House bill contained a provision (sec. 2818) that would require, for a 10-year period beginning on the date of the enactment of this act, electric power allocations provided by the Western Area Power Administration (WAPA) from the Central Valley Project (CVP) to closing military installations in California to be reserved for sale through long-term contracts to preference entities that agree to use such power to promote economic development at a military installation that is closed or slated for closure.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would allow any power not disposed of under this provision to be made available, on a temporary basis during the 10-year reservation period, to military installations in the state of California. The amendment would further provide that the Secretary of Energy, in consultation with the Secretary of Defense, shall submit to Congress a report with recommendations regarding the disposition of electric power allocations provided by the Federal Power Marketing Administration to other military installations closed or approved for closure. The report shall consider the option of using such power to promote economic development at closed military installations.

Testimony before the Defense Base Closure and Realignment Commission (sec. 2930)

The House bill contained a provision (sec. 2814) that would require that all testimony before the Base Closure and Realignment Commission be given under oath.

The Senate amendment contained no similar provision.

The Senate recedes.

LEGISLATIVE PROVISIONS NOT ADOPTED

Consideration of local and regional economic needs as part of the disposition of real property and facilities under base closure laws

The House bill contained a provision (sec. 1324) that would encourage the Secretary of Defense to consider local and regional economic needs in the disposition of real property under the Base Closure Acts of 1988 and

1990. In addition, the provision would require the Secretary to employ a specific set of criteria in evaluating the adequacy of local redevelopment plans.

The Senate amendment contained no similar provision.

The Senate recedes by incorporating the objective of the House provision within the real property disposal provision in title XXIX of this act. While the conferees declined to mandate criteria by which the Secretary should evaluate local economic development plans, they believe that the Secretary should carefully consider the factors contained in the House provision (e.g. the severity of the direct and indirect dislocation to the local economy and tax base, the potential for job creation, and the timeliness of a plan's mitigation efforts.).

Expansion of base closure law to include consideration of military installations outside the United States for closure and realignment

The House bill contained a provision (sec. 2819) that would amend the Defense Base Closure and Realignment Act of 1990 (Part A of title XXIX of Public Law 101-510) to require the Secretary of Defense and the Defense Base Closure and Realignment Commission (BRAC) to include recommendations for the termination and reduction of military operations carried out by the United States at military installations outside the United States. The provision would further provide that, unless 25 percent of the bases recommended for closure by BRAC in 1995 are installations located outside the United States, no bases would be closed in 1995.

The Senate amendment contained no similar provision.

The House recedes.

The conferees urge the Secretary of Defense to continue to reduce the overseas base structure as much and as quickly as possible.

Base disposal management cooperative agreement

The House bill contained a provision (sec. 2823) that would authorize the Secretary of Defense, in consultation with affected local communities, to select from one to 10 site managers to assist the Secretary in managing various activities associated with the closure or realignment of a military installation.

The Senate amendment contained no similar provision.

The House recedes.

Justification of recommendations for closure or realignment of installations previously considered for closure or realignment

The Senate amendment contained a provision (sec. 2816) that would specify additional rationale by which the Secretary would justify the recommended closure or realignment of a military installation whose closure or realignment has been previously rec-

ommended by the Secretary of Defense, but rejected by a previous Defense Base Closure and Realignment Commission.

The House bill contained no similar provision.

The Senate recedes.

Reports on costs of the closure or realignment of military installations

The Senate amendment contained a provision (sec. 2818) that would require the Secretary of Defense to submit a report to the congressional defense committees on the estimated costs of activities related to the closure or realignment of major installations approved for closure or realignment under the Defense Base Closure and Realignment Act of 1990. The provision would also provide additional cost monitoring in those cases in which the net closure costs exceed by 50 percent the estimate used to initially justify such a closure or realignment.

The House bill contained no similar provision.

The Senate recedes.

Consultation requirement for local reuse authorities and governments

The Senate amendment contained a provision (sec. 2819) that would amend section 2907 of the Defense Base Closure and Realignment Act of 1990 (Public Law 101-510) by requiring the local reuse authorities or local governments to submit a certification to the Secretary of Defense that DOD civilian employees, regional and local chambers of commerce, and appropriate representatives of governmental entities in the impacted region have been consulted regarding the plan for reutilization or redevelopment of a military installation approved for closure.

The House bill contained no similar provision.

The Senate recedes.

The conferees believe that local reuse authorities should be constituted and consult with the widest possible spectrum of groups who are affected by base closures or realignments, or who have an interest in reuse. Such development authorities should consult with the impacted regional political subdivisions, groups representing the housing needs of the homeless and low/moderate income residents, and other social organizations. The conferees believe that, because the closing military installations were developed with federal resources, they should be reused to further compatible federal goals to the maximum extent possible.

Delegation of authority to enter into leases of certain property

The Senate amendment contained a provision (sec. 2906) that would direct the Secretary of each military service to delegate the authority to lease base closure property that would be provided in section 2905 of the Senate amendment to the heads of the field installation level, such as base commanders.

The House bill contained no similar provision.

The Senate recedes.

The conferees understand that recent DOD policy requiring the approval of the Deputy Secretary of Defense of leases associated with closing bases has been rescinded. The underlying lease authority rests with the secretaries of the military services. The conferees encourage the delegation of this authority to the level of command that can best respond to local redevelopment needs and still exercise prudent and consistent stewardship over these public assets.

Community response board

The Senate amendment contained a provision (sec. 2911) that would require the Secretary of Defense to establish a community response board with respect to the closure of military installations. The board would meet three times a year to receive comments from base redevelopment authorities, propose possible solutions to any problems encountered in the reuse plan, and report to the President any comments and solutions the board has proposed.

The House bill contained no similar provision.

The Senate recedes.

The conferees believe that the Department of Defense should establish a forum or process, involving all relevant federal agencies, where local communities and redevelopment authorities can raise problems that they encounter as they work to redevelop and reuse the closing bases. This process should provide a mechanism for identifying and correcting systemic and unique problems with the redevelopment and reuse process. The conferees also expect such a process to identify suggestions for legislative initiatives that would amend the statutes governing the redevelopment and reuse of the closing bases.

DIVISION C—DEPARTMENT OF ENERGY NATIONAL SECURITY AUTHORIZATIONS AND OTHER AUTHORIZATIONS

TITLE XXXI—DEPARTMENT OF ENERGY NATIONAL SECURITY PROGRAMS

Subtitle A of Title XXXI of Division C of the House bill would authorize appropriations for the Department of Energy national security programs in the amount of \$11.0 billion.

Subtitle A of Title XXXI of Division C of the Senate amendment would authorize appropriations in the amount of \$11.3 billion for these purposes.

The conferees recommend an authorization of \$10.9 billion.

The budget request, the authorizations contained in the House bill and the Senate amendment, and the conference agreement are presented in the following tables.

Fiscal Year 1994 Department of Energy National Security Programs [Amounts in millions of dollars]	FY 1994 Authorization Request	FY 1994 House Authorization	FY 1994 Senate Authorization	Conference +/- Request	FY 1994 Conference Authorization

94-D-404, Melton Valley storage tank capacity increase, Oak Ridge National Laboratory, Oak Ridge, Tennessee	9.400	9.400	9.400		9.400
94-D-405, central neutralization facility pipeline extension project, K-25, Oak Ridge, Tennessee	1.714	1.714	1.714		1.714
94-D-406, low-level waste disposal facilities, K-25, Oak Ridge, Tennessee	6.000	6.000	6.000		6.000
94-D-407, initial tank retrieval systems, Richland, Washington	7.000	7.000	7.000		7.000
94-D-408, office facilities - 200 East, Richland, Washington	1.200	1.200	1.200		1.200
94-D-411, solid waste operation complex, Richland, Washington	7.100	7.100	7.100		7.100

November 10, 1993

CONGRESSIONAL RECORD—HOUSE

28987

Fiscal Year 1994 Department of Energy National Security Programs [Amounts in millions of dollars]	FY 1994 Authorization Request	FY 1994 House Authorization	FY 1994 Senate Authorization	Conference +/- Request	FY 1994 Conference Authorization
94-D-414, site 300 explosive waste storage facility, Lawrence Livermore National Laboratory, Livermore, California	0.370	0.370	0.370		0.370
94-D-416, solvent storage tanks installation, Savannah River, South Carolina	1.500	1.500	1.500		1.500
94-D-417, intermediate level and low activity waste vaults, Savannah River Site, Aiken, South Carolina	1.000	1.000	1.000	-1.000	
93-D-172, electrical upgrade, Idaho National Engineering Laboratory, Idaho					
93-D-174, plant drain waste water treatment upgrades, Y-12 Plant, Oak Ridge, Tennessee	3.500	3.500	3.500		3.500
93-D-175, industrial waste compaction facility, Y-12 Plant, Oak Ridge, Tennessee	1.800	1.800	1.800		1.800
93-D-176, Oak Ridge reservation storage facility, Oak Ridge, Tennessee	6.039	6.039	6.039		6.039
93-D-177, disposal of K-1515 sanitary water treatment plant waste, K-25, Oak Ridge, Tennessee	7.100	7.100	7.100		7.100
93-D-178, building 374 liquid waste treatment facility, Rocky Flats Plant, Golden, Colorado	1.000	1.000	1.000		1.000
93-D-180, environmental monitoring-RCRA groundwater monitoring installation, Richland, Washington					
93-D-181, radioactive liquid waste line replacement, Richland, Washington	6.700	6.700	6.000	-0.700	6.000

Fiscal Year 1994 Department of Energy
National Security Programs
[Amounts in millions of dollars]

	FY 1994 Authorization Request	FY 1994 House Authorization	FY 1994 Senate Authorization	Conference +/- Request	FY 1994 Conference Authorization
93-D-182, replacement of cross-site transfer system, Richland, Washington	6.500	6.500	6.500		6.500
93-D-183, multi-tank waste remediation facility, Richland, Washington	52.615	52.615	25.660	-6.955	45.660
93-D-184, 325 facility compliance/renovation, Richland, Washington					
93-D-185, landlord program safety compliance, Phase II, Richland, Washington					
93-D-186, 200 area unsecured core area fabrication shop, Richland, Washington					
93-D-187, high-level waste removal from filled waste tanks, Savannah River, South Carolina	13.230	13.230	13.230	-10.230	3.000
93-D-188, new sanitary landfill, Savannah River, South Carolina	1.020	1.020	1.020		1.020
92-D-171, mixed waste receiving and storage, Los Alamos National Laboratory, Los Alamos, New Mexico					
92-D-172, hazardous waste treatment and processing facility, Pantex Plant, Amarillo, Texas	0.300	0.300	0.300		0.300
92-D-173, NO _x abatement facility, Idaho Chemical Processing Plant, Idaho National Engineering Laboratory, Idaho	10.000	10.000	10.000		10.000

Fiscal Year 1994 Department of Energy
National Security Programs
[Amounts in millions of dollars]

	FY 1994 Authorization Request	FY 1994 House Authorization	FY 1994 Senate Authorization	Conference +/- Request	FY 1994 Conference Authorization
92-D-177, tank 101-AZ waste retrieval system, Richland, Washington	7.000	7.000	7.000		7.000
92-D-180, inter-area line upgrade, Savannah River, Aiken, South Carolina					
92-D-181, fire and life safety improvements, Idaho National Engineering Laboratory, Idaho					
92-D-182, sewer system upgrade, Idaho National Engineering Laboratory, Idaho					
92-D-183, transportation complex, Idaho National Engineering Laboratory, Idaho					
92-D-184, Hanford infrastructure underground storage tanks, Richland, Washington					
92-D-185, road, ground, and lighting safety improvements, 300/1100 areas, Richland, Washington					
92-D-187, 300 area electrical distribution conversion and safety improvements, Phase II, Richland, Washington					
92-D-188, waste management environment, safety and health (ES&H), and compliance activities, various locations	8.568	8.568	8.568		8.568
91-D-171, waste receiving and processing facility, module 1, Richland, Washington	17.700	17.700	17.700		17.700

Fiscal Year 1994 Department of Energy National Security Programs [Amounts in millions of dollars]	FY 1994 Authorization Request	FY 1994 House Authorization	FY 1994 Senate Authorization	Conference +/- Request	FY 1994 Conference Authorization
91-D-172, high-level waste tank farm replacement Idaho Chemical Processing Plant, Idaho National Engineering Laboratory, Idaho	3.213	3.213	3.213	-	3.213
91-D-173, hazardous low-level waste processing tanks, Savannah River, South Carolina	5.189	5.189	5.189	-	5.189
91-D-175, 300 area electrical distribution, conversion, and safety improvements, Phase I, Richland, Washington	10.580	10.580	10.580	-	10.580
90-D-172, aging waste transfer line, Richland, Washington	5.600	5.600	5.000	-0.600	5.000
90-D-174, decontamination laundry facility, Richland, Washington					
90-D-175, landlord program safety compliance-I, Richland, Washington	82.000	82.000			82.000
90-D-176, transuranic (TRU) waste facility, Savannah River, South Carolina	1.000	1.000	1.000	-	1.000
90-D-177, RWMC transuranic (TRU) waste characterization and storage facility, Idaho National Engineering Laboratory, Idaho	21.700	21.700	21.700	-	21.700
89-D-122, production waste storage facilities, Y-12 Plant, Oak Ridge, Tennessee	1.900	1.900	1.900	-	1.900
89-D-172, Hanford environmental compliance, Richland, Washington	11.700	11.700	11.700	-	11.700

Fiscal Year 1994 Department of Energy National Security Programs [Amounts in millions of dollars]	FY 1994 Authorization Request	FY 1994 House Authorization	FY 1994 Senate Authorization	Conference +/- Request	FY 1994 Conference Authorization
89-D-173, tank farm ventilation upgrade, Richland, Washington	1.800	1.800	1.000	-0.800	1.000
89-D-174, replacement high-level waste evaporator, Savannah River, South Carolina	23.974	23.974	23.974	-11.000	12.974
89-D-175, hazardous waste/mixed waste disposal facility, Savannah River, South Carolina	7.000	7.000	7.000	-7.000	
88-D-173, Hanford waste vitrification plant, Richland, Washington	85.000	85.000		-45.000	40.000
87-D-180, burial ground expansion, Savannah River, South Carolina					
87-D-181, diversion box and pump pit containment buildings, Savannah River, South Carolina	2.137	2.137	2.137	-0.800	2.137

LEGISLATIVE PROVISIONS

LEGISLATIVE PROVISIONS ADOPTED

Weapons activities (sec. 3101)

The House bill contained a provision (sec. 3101) that would authorize \$3.598 billion for operating expenses, plant projects, and capital equipment for weapons activities necessary to carry out the Department of Energy national security programs.

The Senate amendment contained a provision (sec. 3101) that would authorize \$3.698 billion.

The conferees recommend \$3.595 billion for weapons activities.

Environmental restoration and waste management (sec. 3102)

The House bill contained a provision (sec. 3102) that would authorize \$5.253 billion for operating expenses, plant projects, and capital equipment for defense environmental restoration and waste management activities.

The Senate amendment contained a provision (sec. 3103) that would authorize \$5.301 billion.

The conferees recommend \$5.182 billion for defense environmental restoration and waste management activities.

Nuclear materials support and other defense programs (sec. 3103)

The House bill contained a provision (sec. 3103) that would authorize \$2.059 billion for operating expenses, plant projects, and capital equipment for nuclear materials support and other defense programs.

The Senate amendment contained a provision (sec. 3104) that would authorize \$2.114 billion.

The conferees recommend \$1.964 billion for nuclear materials support and other defense programs.

Defense nuclear waste disposal (sec. 3104)

The House bill contained a provision (sec. 3104) that would authorize \$120.0 million for operating expenses incurred in carrying out the nuclear waste fund program.

The Senate amendment contained a provision (sec. 3105) that would authorize \$120.0 million for payment to the nuclear waste fund.

The conferees recommend \$120.0 million for payment to the nuclear waste fund.

Economic adjustment assistance (sec. 3102)

The House bill contained a provision (sec. 3103(e)) that would provide that \$6.0 million of the funds available for worker training and adjustment pursuant to section 3103(a)(7) of the House bill would be available for economic assistance and development funding for local counties containing the Department of Energy Savannah River Site property. To the extent practicable, the amount of assistance would be distributed as follows: (1) \$1.0 million to plan community adjustments and economic diversification; and (2) \$5.0 million to carry out a community adjustment and economic diversification program.

The Senate amendment contained no similar provision.

The Senate recedes.

Technology transfer funds at the Savannah River Site (sec. 3103)

The House bill contained a provision (sec. 3103(f)) that would authorize \$4.0 million of the funds authorized pursuant to sections 3101 (research and development) and section 3103 (nuclear materials support and other defense programs) for technology transfer activities at the Department of Energy Savannah River Site.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would authorize \$4.0 million from the funds authorized pursuant to section 3103(a)(1) (nuclear materials support) of this act to be used for technology transfer activities at the Savannah River Site.

Reprogramming (sec. 3121)

The House bill contained a provision (sec. 3121) that would set forth requirements and limitations on Department of Energy reprogramming actions.

The Senate amendment contained an identical provision (sec. 3121).

The Armed Services Committees of the Senate and House of Representatives received a reprogramming request from the Department of Energy by a letter dated August 18, 1993. Contrary to longstanding practice, the Department had obligated the funds before submitting the reprogramming request. The conferees are disturbed about this action, which not only ignored the existing statutory requirements governing reprogramming actions, but also redirected funds from a legally mandated activity to a discretionary activity. While the conferees reluctantly approve this reprogramming request after the fact, the conferees put the Department on notice that the recurring statutory provisions governing reprogrammings provide a good deal of flexibility to the Department and are easily complied with. Further abuses of the current provisions could require the Armed Services Committees to reconsider the Department's reprogramming procedures.

Limits on general plant projects (sec. 3122)

The House bill contained a provision (sec. 3122) that would authorize the Secretary of Energy to carry out general plant projects below \$1.2 million without specific congressional authorization for the project.

The Senate amendment contained a similar provision (sec. 3122) that would set the ceiling on general plant projects at \$2.0 million.

The House recedes.

Defense inertial confinement fusion program (sec. 3131)

The House bill contained a provision (sec. 3105(a)) that would authorize \$188.413 million for the inertial confinement fusion program.

The Senate amendment contained an identical provision (sec. 3106(b)).

The conferees recommend \$188.413 million for the inertial confinement fusion program. The conferees agree that \$172.553 million is for operating expenses and \$15.860 million is for capital equipment. The conferees confirm their support for the findings and recommendations of the National Academy of Sciences' 1990 report on the inertial confinement fusion program. The conferees believe that the recommended amount is sufficient to implement the Academy's recommendations.

This funding would provide \$25.198 million to continue the upgrade of the OMEGA laser and \$82.053 million to continue the upgrade of the NOVA laser. The conferees are pleased with the collaborative efforts of the Lawrence Livermore National Laboratory and the Los Alamos National Laboratory in this program. In addition, this funding would provide \$8.2 million to continue the useful work of the Naval Research Laboratory. The conferees also urge the Sandia National Laboratory to continue its work in meeting the milestones set out in the National Academy's report.

Payment of penalty assessed against Hanford project (sec. 3132)

The House bill contained a provision (sec. 3105(b)) that would permit the Secretary of Energy to pay a stipulated penalty of \$100,000, assessed in accordance with Article XIX of the Hanford Consent Agreement and Compliance Order, to the Hazardous Substances Superfund from funds appropriated to the Department of Energy for environmental restoration and waste management activities.

The Senate amendment contained a similar provision (sec. 3131).

The conferees agree that the Secretary of Energy may pay \$100,000 to the Hazardous Substances Response Trust, as a stipulated penalty under the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (42 U.S.C. 9601 et seq.) and the Hanford Consent Agreement.

Water management programs (sec. 3133)

The House bill contained a provision (sec. 3105(c)) that would permit the Secretary of Energy, from funds appropriated to the Department of Energy for environmental restoration and waste management activities, to reimburse the cities of Westminster, Broomfield, Thornton, and Northglenn, Colorado, in the amount of \$11.3 million for the cost of implementing water management programs.

The Senate amendment contained a similar provision (sec. 3103(d)) that would allow the Secretary to reimburse the cities in the amount of \$21.415 million and that would clarify that this reimbursement shall not be considered a major federal action for the purposes of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)).

The House recedes with an amendment that would allow the Secretary to reimburse the cities in the amount of \$11.3 million. In addition, the conferees agree that the program must be completed in fiscal year 1995.

Technology transfer activities (sec. 3134)

The House bill contained a provision (sec. 3105(d)) that would permit the Secretary of Energy to use the nuclear materials support and other defense programs appropriation, and stockpile support funding in the weapons activities appropriation, for technology transfer activities at Department of Energy production facilities, provided that those activities preserve or enhance the critical skills required for weapons production.

The Senate amendment contained a similar provision (sec. 3143).

The Senate recedes with a technical amendment.

Technology transfer and economic development (sec. 3135)

The Senate amendment contained a provision (sec. 3106(l)) that would prohibit the obligation of the funds requested by the Department of Energy for technology transfer and economic development activities in the southeastern United States until 30 days after the Secretary of Energy submits a report to the congressional defense committees setting forth a plan that would ensure the activities are regional in nature.

The House bill contained no similar provision.

The House recedes with an amendment that would allow the Department of Energy to obligate not more than \$5.0 million of the \$30.0 million in funds requested and authorized before the plan is submitted. In addition, the amendment would require the Secretary of Energy to submit the report to the congressional defense committees 30 days after the report is provided to the Secretary by the Savannah River Site (SRS).

The conferees expect the report to contain a clear spending plan that will benefit the communities surrounding the SRS in a fair and equitable manner. These communities include the counties of Aiken, Barnwell and Allendale in South Carolina, and Columbia and Richmond in Georgia. The SRS employs people from all of these surrounding counties. As a result, the economic health of these counties is directly tied to the ability of the SRS to work cooperatively with the entire community in drawing on the resources of the SRS to bring new businesses and opportunities to the area.

Prohibition on research and development of low-yield nuclear weapons (sec. 3136)

The House bill contained a provision (sec. 3105(e)) that would direct the Secretary of Energy to discontinue the ongoing concept design work within the Department of Energy's nuclear weapons laboratories. The provision also would direct the Secretary to refrain from any future feasibility, engineering, development, or production work associated with very low-yield nuclear weapons.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would clarify that the prohibition applies to activities that could lead to production of new low-yield nuclear weapons. While the conferees agree that the provision is intended to prohibit research and development geared toward the production of any low-yield nuclear weapons by the United States, the conferees recognize that there are instances where the Department of Energy may need to conduct research on these types of weapons for other purposes. This would include research, in the interest of counter-proliferation, on the designs of low-yield nuclear weapons as a way to: (1) understand others' activities, including potential terrorist threats; (2) provide information for export control activities; and (3) understand the potential damage that could be inflicted by the use of these types of weapons. In addition, the conferees agree that nothing in this section would prohibit the Department of Energy from performing the research and development necessary for modifications to existing weapons in order to address safety or reliability problems.

The conferees direct the Secretary to work with the President and interested agencies in discouraging the development of similar weapons in other countries.

Nuclear weapons testing (sec. 3137)

The Senate amendment contained a provision (sec. 3106(f)) that would provide funds for the Nevada Test Site, including infrastructure maintenance, maintenance of the technical capability to resume underground nuclear weapons testing, and activities relating to alternatives to underground testing. In addition, the provision would prohibit the Secretary of Energy from obligating funds in excess of the \$180.0 million provided, until the Secretary submits a report outlining a plan to maintain the technical capabilities at the Nevada Test Site and to determine alternatives to underground testing. The provision would also require the Secretary to submit an annual report to Congress setting forth any problems with the nuclear weapons in the stockpile and the resolution of such problems.

The House bill contained no similar provision.

The House recedes with an amendment that would provide \$211.3 million for the Nevada Test Site for infrastructure and for the maintenance of a capability to resume un-

derground testing and \$6 million for operating expenses at the Marshall Islands. The amendment would also require the Secretary to submit an annual report on the nuclear weapons stockpile.

Testing of nuclear weapons (sec. 3137)

The House bill contained a provision (sec. 3139) that would prohibit the use of funds to conduct the safeguard C program to maintain the U.S. capability to conduct atmospheric testing of nuclear weapons.

The Senate amendment contained a similar provision (sec. 231(d)).

The conferees agree that the United States no longer needs to maintain the capability to resume the atmospheric testing of nuclear weapons. The conferees also recognize that the safeguard C program includes activities other than maintenance of the capability to resume atmospheric testing. Thus, the provision the conferees recommended would prohibit the expenditure of any funds to maintain that capability.

Stockpile stewardship program (sec. 3138)

The House bill contained a provision (sec. 3135) that would establish a stockpile stewardship program to ensure the preservation of core intellectual and technical competencies in nuclear weapons design, system integration, manufacturing, security, use control, reliability assessment, and certification. The House bill would provide \$100.0 million for this program.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would provide \$157.4 million in funding for the program.

National security programs (sec. 3139)

The Senate amendment contained a provision (sec. 3106(a)) that would prohibit the obligation of more than 90 percent of the funds appropriated to the Department of Energy for national security programs, until the Secretary of Energy submits a five year budget plan as required by section 3144 of the National Defense Authorization Act for Fiscal Years 1990 and 1991 (Public Law 101-189).

The House bill contained no similar provision.

The House recedes with an amendment that would prohibit the obligation of more than 95 percent of the funds until the plan is submitted.

Expanded core facility dry cell (sec. 3140)

The Senate amendment contained a provision (sec. 3106(e)) that would prohibit the obligation or expenditure of funds appropriated or otherwise made available to the Department of Energy for fiscal year 1994 for project 90-N-102 expanded core facility dry cell project at the Naval Reactors Facility, Idaho until the shipment of spent naval nuclear propulsion to the Idaho National Engineering Laboratory, Idaho, is resumed.

The House bill contained no similar provision.

The House recedes.

Scholarship and fellowship program for environmental restoration and waste management (sec. 3141)

The Senate amendment contained a provision (sec. 3106(h)) that would provide \$1.0 million for the Department of Energy environmental scholarship and fellowship program carried out pursuant to section 3132 of the National Defense Authorization Act for Fiscal Years 1992 and 1993 (Public Law 102-190).

The House bill contained no similar provision.

The House recedes.

Training programs for management of hazardous materials and of hazardous materials emergency response activities (sec. 3142)

The Senate amendment contained a provision (sec. 3137) that would authorize the Secretary of Energy to carry out a training program for persons who work with hazardous materials and who have emergency response authority and responsibilities. The provision would authorize \$20.0 million to carry out the program.

The House bill contained no similar provision.

The House recedes with an amendment that would provide up to \$10.0 million of the funds authorized pursuant to section 3102 of this act to carry out a hazardous materials management and hazardous materials emergency response training program.

Hanford health information network (sec. 3143)

The Senate amendment contained a provision (sec. 3106(i)) that would provide \$1.75 million for the last year of the study on radiation effects downwind of the Department of Energy Hanford Site. The study is being conducted pursuant to section 3138 of the National Defense Authorization Act for Fiscal Year 1991 (Public Law 101-510).

The House bill contained no similar provision.

The House recedes.

Protection of nuclear weapons facilities workers (sec. 3143)

The Senate amendment contained a provision (sec. 3106(j)) that would provide \$10.0 million for activities relating to worker protection at nuclear facilities.

The House bill contained no similar provision.

The House recedes with an amendment that would provide \$11.0 million for the protection of nuclear weapons facilities workers. This funding is to be used to continue the activities the Department of Energy started pursuant to section 3132 of the National Defense Authorization Act for Fiscal Years 1992 and 1993 (Public Law 102-190) and to award training grants pursuant to this program. The conferees are concerned that fire fighters, a group with unique responsibilities at Department of Energy nuclear weapons facilities, have not been awarded a training grant under the section 3132 program. The conferees urge the Secretary of Energy to consider grant funding for training fire fighters if an acceptable grant proposal is submitted.

The House bill contained no similar provision.

Verification control technology (sec. 3144)

The Senate amendment contained a provision (sec. 3106(g)) that would prohibit the Department of Energy from obligating more than \$334,441,000 of the funds authorized for verification and control technology until the Secretary of Defense submits a report on non-proliferation and counter-proliferation activities.

The House bill contained no similar provision.

The House recedes with a technical amendment that would apply the prohibition on obligations to operating expenses only.

Tritium production requirements (sec. 3145)

The Senate amendment contained a provision (sec. 3132) that would create an office of tritium production and plutonium disposition under the Assistant Secretary of Energy for Defense Programs to be responsible for the research and development of technologies for tritium production and plutonium disposition.

The House bill contained no similar provision.

The House recedes with an amendment that would delete the requirement to establish an office. The amendment would require a report on the Department of Energy's plans for meeting tritium production requirements through 2008 and beyond, and set a date for completion of the environmental impact statement on the reconfiguration of the nuclear weapons complex.

Limitations on the receipt and storage of spent nuclear fuel from foreign research reactors (sec. 3151)

The House bill contained a provision (sec. 3137) that would require the Secretary of Energy to notify Congress 30 legislative days before receiving any emergency shipments of spent foreign research reactor fuel. In addition, the provision would prevent receipt of any spent foreign research reactor fuel that would exceed the existing storage capacity for such fuel at the Department of Energy's Savannah River Site, until an environmental impact statement is completed.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would limit the notice and wait period for receipt of the spent foreign research reactor fuel to 30 calendar days. The amendment also would clarify that the prohibition on the storage above current capacity at the Savannah River site would apply to fuel other than that received on a non-emergency basis.

The conferees note that the Department of Energy has announced that it will take the actions required by this provision. The announcement specified that the Department would receive no more than 700 fuel elements at the Savannah River Site until an environmental impact statement is completed. The current storage capacity is approximately 1,000 elements. The Department has also announced that the final environmental impact statement will be completed and the record of decision will be signed by the end of June 1995.

The conferees note that accepting this spent foreign research reactor fuel is an important aspect of the nonproliferation policy of the United States.

Extension of review of waste isolation pilot plant in New Mexico (sec. 3152)

The Senate amendment contained a provision (sec. 3139) that would amend section 1433 of the National Defense Authorization Act for Fiscal Year 1989 to extend a contract between the Department of Energy and the New Mexico Institute of Mining and Technology (NMIMT) for an additional five years. This contract extension would allow the NMIMT to continue to carry out the work of the Environmental Evaluation Group, which is independently evaluating the Department of Energy waste isolation pilot project in Carlsbad, New Mexico.

The House bill contained no similar provision.

The House recedes.

Baseline environmental management reports (sec. 3153)

The House bill contained a provision (sec. 3132) that would require the Secretary of Energy to prepare an environmental baseline against which future progress in environmental restoration and waste management programs can be measured. In addition, the provision would require annual reports, beginning in 1994, that would set out the status, costs, and variances in the environmental activities. The reports also would require the Secretary to estimate the out-year costs of Department of Energy environmental programs through 2019.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require the first annual reports to be provided in 1995, after the President submits the budget request for fiscal year 1996.

Lease of property at Department of Energy weapon production facilities (sec. 3154)

The House bill contained a provision (sec. 3140) that would allow the Secretary of Energy to leave or transfer surplus real or personal property to a public agency at no less than 50 percent of the fair market value of the property. The provision also would prevent the Secretary of Energy from moving personal property from a facility if the property could be useful in converting the property to civilian use.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would allow the Secretary of Energy to lease, at less than fair market value, property at Department of Energy facilities that are being reconfigured. This provision is designed to provide broad discretion to the Secretary to assist local communities adversely impacted by the reconfiguration of Department of Energy facilities.

The amended provision also would require the Secretary to obtain the concurrence of the Administrator of the Environmental Protection Agency for leases at sites that are on the National Priority List and of the appropriate state official for leases at sites that are not on the National Priority List.

Authority to transfer personal property and equipment to support reutilization are included elsewhere in this act. The conferees believe that the provision is consistent with the Secretary of Energy's guidance regarding the relocation of personal property and equipment.

Nothing in this section should be interpreted to affect or constrain the disposal of surplus property by the Department of Energy, as defined in section 3(g) of the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 472(g)). Nor is this provision intended to alter or contravene existing or future federal facility agreements under the Comprehensive Environmental Response Compensation and Liability Act of 1980 (42 U.S.C. 9601 et seq.) or any other provision of law.

In addition, the conferees recognize the need for a more comprehensive and long-range approach to leasing property at closing and reconfigured DOE facilities. Therefore, the Secretary is directed to report to Congress regarding additional changes that may be necessary. The report shall be submitted at the time the defense committees consider the fiscal year 1995 budget.

Finally, the conferees agree that it is in the public interest for the Department of Energy to facilitate the economic recovery of communities that experience adverse economic impact from the closure or reconfiguration of a Department of Energy facility. The Secretary of Energy should assist the communities, where possible, to alleviate such adverse impact. Delay in the reutilization of DOE property, facilities, and equipment for commercial use could contribute to the loss of a highly skilled work force from reduced business opportunities.

Authority to transfer certain Department of Energy property (sec. 3155)

The Senate amendment contained a provision (sec. 3133) that would permit the Secretary of Energy to transfer personal prop-

erty that would mitigate the adverse economic consequences of the closure of a Department of Energy facility, at less than fair market value, if such personal property is excess to the needs of the Department. In addition, the provision would allow the Secretary to transfer any other property that is to excess to the needs of the Department, if the replacement cost of such equipment does not exceed 110 percent of the cost of transporting the property to another Department of Energy facility.

The House bill contained no similar provision.

The House recedes with a technical amendment that would clarify that the property includes personal property and equipment belonging to the Department of Energy.

Improved congressional oversight of Department of Energy special access programs (sec. 3156)

The House bill contained a provision (sec. 3131) that would require an annual report on Department of Energy special access programs, set forth the matters to be included in the report, and provide a waiver of the requirement to report on a program if inclusion of information on that program would adversely affect the national security.

The Senate amendment contained no similar provision.

The Senate recedes.

Elsewhere in the conference report, the conferees have recommended a provision that would require other Federal agencies to prepare reports on their special access programs. The Department of Energy would not be included in the general provision; instead, the Department of Energy special access programs would be fully covered by the report required by this section.

Expansion of authority to loan personnel and facilities (sec. 3157)

The House bill contained a provision (sec. 3133) that would expand the Secretary of Energy's authority to loan personnel and facilities to include the Department of Energy's Savannah River Site in South Carolina.

The Senate amendment contained a similar provision (sec. 3134) that would include the Savannah River Site and the Department of Energy's Oak Ridge site in Oak Ridge, Tennessee.

The House recedes. The conferees expect that, in the case of the Savannah River Site, personnel and facilities will be loaned to the community development organization known as the Savannah River Regional Diversification Initiative. In the case of Oak Ridge, the conferees expect that personnel and facilities will be loaned to the community development organization known as the Roane Anderson Economic Council.

Modification of payment provision (sec. 3158)

The House bill contained a provision (sec. 3134) that would amend section 1532(a) of the Department of Defense Authorization Act for Fiscal Year 1986 by striking out "1996" and inserting in lieu thereof "1995." This is a technical correction of a typographical error in the provision terminating the Department of Energy's payments in lieu of taxes after ten years, beginning in fiscal year 1985.

The Senate amendment contained no similar provision.

The Senate recedes.

Contract goal for small disadvantaged businesses and certain institutions of higher education (sec. 3159)

The House bill contained a provision (sec. 3138) that would establish a 5 percent goal for the Department of Energy in contracting with small disadvantaged businesses (SDB)

and historically black colleges and universities and minority institutions (HBCU/MI) when carrying out Department of Energy national security programs. This goal would sunset in the year 2000, consistent with section 2323 of title 10, United States Code, which establishes a 5 percent SDB and HBCU/MI contracting goal for the Department of Defense.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would exclude the Department of Energy naval reactors program from the provision. The conferees urge the naval reactors program to work with small disadvantaged businesses and historically black colleges and universities to the extent practicable. The conferees recognize the program's unique nature prevents it from having the contracting flexibility that is present in other Department of Energy activities.

Amendments to Stevenson-Wydler (sec. 3160)

The House bill contained a provision (sec. 3104(d)(4)) that would amend the Stevenson-Wydler Act of 1980 (15 U.S.C. 3710a(d)) to expand the definition of a laboratory to include Department of Energy weapon production facilities.

The Senate amendment contained a similar provision (sec. 3148).

The Senate recedes with a technical amendment.

Standardization of requirements affecting Department of Energy employees (sec. 3161)

The Senate amendment contained a provision (sec. 3140) that would repeal standard of conduct provisions in Part A of Title VI of the Department of Energy Organization Act (Public Law 95-91) to conform the Department of Energy with government-wide standard of conduct requirements.

The House bill contained no similar provision.

The House recedes with an amendment that would repeal sections 603-607 of Part A of Title VI of the Department of Energy Organization Act because the government-wide standards of conduct have similar requirements and the Department of Energy sections are now duplicative.

The conferees agree to retain and amend sections 601, 602, and portions of section 608.

The conferees amended section 602 of the Department of Energy Organization Act to allow the Secretary of Energy to determine whether waiving the divestiture provision on a case-by-case basis is appropriate with a requirement that the assets be placed in a qualified trust pursuant to 5 C.F.R., Part 2634.

In addition, the amendment would require the Secretary of Energy to submit a report to the House Energy and Commerce Committee and the Senate Energy and Natural Resources Committee that would examine the efficacy and limitations of the remaining provisions and provide recommendations. The conferees also agree to examine the remaining provisions to determine if additional changes to the law are appropriate.

LEGISLATIVE PROVISIONS NOT ADOPTED

Counter-proliferation program

The House bill contained a provision (sec. 3136) that would establish a counter-proliferation mission in the Department of Energy and direct the Secretary of Energy to establish a database and tracking system to account for the production, storage, and use of weapons grade plutonium and uranium in the newly independent states of the former Soviet Union and other states.

The Senate amendment contained no similar provision.

The House recedes.

The conferees agree that, while the Department of Energy has certain unique capabilities for counter-proliferation, the Department's activities should be coordinated with ongoing activities in other agencies and in conjunction with the development of government-wide policies and goals for counter-proliferation activities. Establishment of such a program at this time is premature.

The conferees do believe that the United States must have the ability to track nuclear weapons and materials. Therefore, the conferees are disappointed that, despite the inclusion of section 3151(b) in the National Defense Authorization Act for Fiscal Year 1993, there has been no discernible progress between the United States and states of the former Soviet Union on an agreement to reciprocally release information on their nuclear stockpiles. The establishment of a reliable data base detailing where nuclear materials were produced, in what amount, and the current location and status of such materials, is the essential first step of an effective U.S. nonproliferation and counter-proliferation policy. The specific materials to be accounted for include, but are not limited to, plutonium, highly enriched uranium, and tritium.

Section 3152 of the National Defense Authorization Act for Fiscal Year 1993 authorizes the President to release restricted data if a reciprocity agreement is reached with a state of the former Soviet Union. Despite that authority, the conferees are particularly dismayed that the Department of Defense has not begun to engage its military counterparts in the former Soviet Union in negotiations leading to a reciprocal exchange of stockpile information. Without such an exchange, a complete and accurate database will be difficult to establish. Accordingly, the conferees again urge the Department of Defense to move forward expeditiously to negotiate such reciprocal agreements. The conferees fully expect the Department of Defense to report progress in the near future.

According to the Department of Energy's Office of Intelligence and National Security, the international nuclear analysis program could provide the database framework that could accommodate the information that would be exchanged between the states of the former Soviet Union and the United States if reciprocal agreements were reached. In fact, the Department of Energy plans to spend almost \$10 million in fiscal year 1994 on international nuclear analysis and other database programs for this purpose. The conferees appreciate the Department's efforts in this area and trust they will be maintained. However, the conferees also expect that, if the Department of Defense negotiates one or more reciprocal agreements, the necessary resources would be made available to accommodate the new information.

The conferees also note that a key element of any reciprocal agreement is the capability to track and verify the disposition of nuclear materials. Technology which can "tag" nuclear weapons components and materials as they are transported for dismantlement, storage, or destruction is essential to any reciprocity agreement. The conferees understand that such technology is available, but more work needs to be done to ensure it is foolproof and will be available whenever a reciprocity agreement is in place. The conferees suggest that Nunn-Lugar funds be considered for both the development and procurement of "tagging" technology, and

strongly urge the Department of Defense to coordinate its efforts with the Departments of Energy and State.

Prohibition on use of funds for advanced liquid metal reactor

The House bill contained a provision (sec. 3141) that would prohibit the use of funds appropriated to the Department of Energy for fiscal year 1994 or for any previous fiscal year for national security programs to support the advanced liquid metal reactor.

The Senate contained no similar provision. The House recedes.

Tritium production and plutonium disposition activities

The Senate amendment contained a provision (sec. 3102) that would authorize, as a separate funding category, \$83.0 million for carrying out tritium production and plutonium disposition activities. This funding authorization would be offset by \$43.0 million in prior year funds.

The House bill contained no similar provision.

The Senate recedes.

The conferees recommend authorization of \$30.0 million for plutonium disposition and related activities. Funding for this activity is included in section 3101(a)(5) of this act (weapons activities, complex reconfiguration).

The Secretary of Energy shall use the \$30.0 million provided for plutonium disposition activities for a full range of reactor and non-reactor technologies, including disposal options for plutonium such as vitrification. The Secretary is encouraged to use the funds to examine and review any technologies that could be used to address the serious issue of the storage and disposition of excess plutonium. These funds are available to conduct a full and open review of technologies. Further, the conferees direct the Secretary to consult with other relevant federal agencies, including, but not limited to, the Department of Defense and the Office of Science and Technology Policy, and to allow full public participation.

Fire protection and cooling or refrigeration systems

The Senate amendment contained a provision (sec. 3106(c)) that would prohibit the Secretary of Energy from obligating funds appropriated for fiscal year 1994 for the design, purchase, or installation of any fire protection system or cooling or refrigeration system that utilizes class I substances as listed under section 602(a) of the Clean Air Act (42 U.S.C. 7671a(a)). The Secretary could obligate the funds if the Secretary determines that an alternative system meeting the Department of Energy's operational requirements is not commercially available or is not proven to be cost-effective in a life-cycle cost analysis.

The House bill contained no similar provision.

The Senate recedes.

New tritium production and plutonium disposition activities

The Senate amendment contained a provision (sec. 3106(d)) that would designate funds, from the funds available for tritium production and plutonium disposition activities, for the evaluation of a variety of different reactor technologies.

The House bill contained no similar provision.

The Senate recedes.

Merger of certain funds with funds appropriated for new production reactors

The Senate amendment contained a provision (sec. 3106(k)) that would require that

funds made available to the Department of Energy for new production reactors in prior years be merged with funds made available for tritium production and plutonium disposition activities.

The House bill contained no similar provision.

The Senate recedes.

Inclusion of analysis of Nevada Test Site in environmental assessment of the reconfiguration of Department of Energy nuclear weapons complex

The Senate amendment contained a provision (sec. 3135) that would direct the Department of Energy to include an analysis of the Nevada Test Site in the environmental impact statement being prepared by the Department in connection with a decision on future weapons complex facilities and functions.

The House bill contained no similar provision.

The Senate recedes. Following passage of the Senate amendment, the Department of Energy decided to include an analysis of the Nevada Test Site, as envisioned by the Senate amendment, in the environmental impact statement for the reconfiguration of the Department of Energy nuclear weapons complex.

Department of Energy management

The Senate amendment contained a provision (sec. 3136) that would authorize two additional under secretaries for the Department of Energy.

The House bill contained no similar provision.

The Senate recedes.

Review of Department of Energy environmental compliance agreements

The Senate amendment contained a provision (sec. 3138) that would require the Secretary of Energy to review the various environmental agreements to which the Department is a party and submit a one-time report to Congress in 1996. The report would identify activities in the various agreements that: (1) could be completed faster than scheduled; (2) were no longer necessary; (3) could not be completed on schedule; or (4) could be completed within a reasonable period of time using more efficient or cost-effective technology than the one agreed upon. The provision would require the Secretary to prepare the report in consultation with the parties to the agreements and representatives of the community in which the Department of Energy facility covered by the agreement is located. The provision also would specify that it was not intended to void or amend any agreement being reviewed, or require any party to renegotiate any agreement that was being reviewed.

The House bill contained no similar provision.

The Senate recedes.

Cooperative research and development

The Senate amendment contained a series of provisions (secs. 3143-3146 and 3148-3150) that were drawn in large measure from S. 473, the Department of Energy National Competitiveness Technology Partnership Act of 1993. These provisions were designed to take maximum advantage of the skills and capabilities of the Department of Energy laboratories and to allow these skills to be used to enhance U.S. competitiveness. These provisions would expedite the process by which the Department of Energy enters into partnership agreements with industry for research and development and technology transfer. In addition, the provisions would

allow the DOE laboratories to engage in work beyond their traditional defense and energy missions.

The House bill contained no similar provisions.

The Senate recedes.

The Senate conferees are disappointed that implementation of these provisions will be delayed until next year. All conferees agree that the Department of Energy laboratories are a very important resource. The conferees also agree to examine the potential use of the laboratories to enhance the economic, technological, and scientific competitiveness of the United States while simultaneously maintaining their core competencies. In addition, the conferees will review the benefits of partnerships between industry and the Department of Energy laboratories.

Because of these provisions' benefits, the House conferees, who have not yet held hearings on a laboratory bill, agree to hold hearings so that a laboratory bill can be considered early in the next session of this Congress.

* * * * *

Management of the national security programs of the Department of Energy

The Armed Services conferees believe that the management of the nation's nuclear weapons program is outdated and in need of reexamination. The Armed Services conferees therefore believe that the executive branch should study the management of Department of Energy national security programs. The national security programs are authorized pursuant to this act and consist of: (1) nuclear weapons activities; (2) nuclear materials production, management, and disposition; (3) environmental restoration and waste management at nuclear weapon facilities; (4) safeguard and security activities; (5) naval reactor development; (6) intelligence activities; and (7) counter- and non-proliferation activities. The Armed Services conferees firmly believe that these activities should be under a single management structure because they are interrelated.

The arrangements made after World War II for the management of nuclear weapons activities were unprecedented, unique, and unlike anything in government. Nuclear energy in general, and the production of nuclear weapons in particular, were the object of intense congressional interest. The insistence on civilian control of nuclear energy was paramount, and resulted in the establishment of the Atomic Energy Commission (AEC), overseen by a joint committee of Congress. A measure of the unusual arrangements made in those days is the fact that for many years, the possession and custody of nuclear weapons were not in the hands of the military at all, but in the hands of AEC civilians. (Today that is not the case, and the military departments maintain custody and control of the nuclear weapons stockpile.)

In the intervening years, the singular nature of the nuclear weapons establishment has become less of a factor in the management and oversight of the program. The AEC and the joint committee were abolished. The non-regulatory activities of the AEC, including the nuclear weapons establishment, were assigned first to the Energy Research and Development Administration, and later to the Department of Energy.

In the Department of Energy today, the nuclear weapons and naval reactor activities (along with the environmental restoration of nuclear weapons plants) are not centrally managed. None of the managers at the Department of Energy is focused principally on

national security programs. In addition, as the emphasis of the Department of Energy shifts from national security to domestic matters, the conferees believe it is now appropriate to review the organization of the national security programs.

The Armed Services conferees believe the National Security Council should undertake a review of the organizational arrangements for these national security programs, and make recommendations to the President for any changes that should be made. In conducting this review, the National Security Council should take into account the views of as many current and former senior managers of the nuclear weapons complex as appropriate. The President should ensure that the results of this review are available to the Secretary of Defense and the Secretary of Energy at the time of their testimony in support of the budget request for fiscal year 1995.

International Atomic Energy Agency inspections

The conferees note that on September 28, 1993, the Administration proposed a framework for U.S. efforts to prevent the proliferation of weapons of mass destruction and the missiles to deliver them. One element of this proposal is to submit U.S. fissile weapons material to inspection by the International Atomic Energy Agency (IAEA). The conferees further note that, in an earlier statement of policy dated September 11, 1993, the Administration stated:

"[M]uch of the existing United States weapons stockpile is in the form of nuclear weapons components, and it will probably be necessary to develop methods by which the IAEA can credibly verify this material while protecting sensitive nuclear weapons design information from potential proliferation. Weapons components will be offered for IAEA safeguards when these methods have been developed."

The conferees strongly believe that methods must be developed that will eliminate the risk of compromising sensitive nuclear weapons components. This is especially important because critical nuclear weapon design data are available simply by looking at the shape of our nuclear weapon "pits."

The conferees therefore urge that, before the U.S. Government makes fissile weapons material subject to IAEA inspection, the Administration develop and apply technical methods that will prevent the compromise of restricted data. The Armed Services Committees of the Senate and House of Representatives will address this issue in hearings next year.

The conferees note, however, that sections 3151 and 3152 of the National Defense Authorization Act for Fiscal Year 1993 specifically authorize the release of such restricted data if it is in the context of a reciprocal exchange of nuclear stockpile information with a state of the former Soviet Union. The conferees agree that their admonitions should in no way be construed to conflict with the conferees' direction to negotiate such agreements set out elsewhere in the statement of managers, or the authority to release restricted data as part of the terms of such agreements.

TITLE XXXII—DEFENSE NUCLEAR FACILITIES SAFETY BOARD

LEGISLATIVE PROVISIONS

LEGISLATIVE PROVISIONS ADOPTED

Defense Nuclear Facilities Safety Board authorization (sec. 3201)

The House bill contained a provision (sec. 3201) that would authorize \$15,060 million for the operation of the Defense Nuclear Facilities Safety Board.

The Senate amendment contained a similar provision (sec. 3201) but would authorize \$18.0 million.

The conferees recommend \$16.560 million for operation of the Defense Nuclear Facilities Safety Board.

Requirements for transmittal to Congress of certain information prepared by Defense Nuclear Facilities Safety Board (sec. 3202)

The Senate amendment contained a provision (sec. 3202) that would require the Defense Nuclear Facilities Safety Board to submit to Congress its budget estimates, requests, other budget information, legislative recommendations, and statements of information in preparation of a report to be submitted to Congress, at the same time these documents are submitted to the Office of Management and Budget.

The House bill contained no similar provision.

The House recedes with an amendment that would exclude budget information from the simultaneous submittal requirement.

TITLE XXXIII—NATIONAL DEFENSE STOCKPILE

LEGISLATIVE PROVISIONS

LEGISLATIVE PROVISIONS ADOPTED

Disposal of obsolete and excess material contained in the National Defense Stockpile (sec. 3301)

The House bill contained a provision (sec. 3302) that would authorize the Secretary of Defense to sell up to \$500 million worth of material from the National Defense Stockpile in any fiscal year, and would provide that all receipts from the sales be deposited in the National Defense Stockpile Transaction Fund.

The Senate amendment contained a provision (sec. 3301) that would authorize disposal of 12 materials from the National Defense Stockpile that have been determined to be excess to the stockpile requirements recommended by the Department of Defense.

The House recedes with an amendment. The conferees agree to authorize disposal of 11 of the 12 materials from the National Defense Stockpile contained in the Senate provision. The conferees agree not to authorize the disposal of aluminum.

Authorized uses of stockpile funds (sec. 3302)

The Senate amendment contained a provision (sec. 3303) that would authorize the stockpile manager to obligate \$67.3 million from the National Defense Stockpile Transaction Fund during fiscal year 1994 for the authorized uses of funds under section 9(b)(2) of the Stock Piling Act.

The House bill contained no similar provision.

The House recedes.

Revision of authority to dispose of certain materials authorized for disposal in fiscal year 1993 (sec. 3303)

The House bill contained a provision (sec. 3304) that would permit the disposal of chromite and manganese ores from the stockpile only for processing within the United States during fiscal year 1994, and delay the authorized disposal of ferrochrome and ferromanganese from the stockpile until October 1, 1994.

The Senate amendment contained a similar provision (sec. 3302).

The House recedes.

Conversion of chromium ore to high purity electrolytic chromium metal (sec. 3304)

The House bill contained a provision (sec. 3305) that would require the stockpile manager to upgrade not less than 800 short tons

of chromium ore to high purity electrolytic chromium metal during each of fiscal years 1994 through 1996.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would authorize the Secretary of Defense to carry out a program to upgrade chromium ore in the National Defense Stockpile to high purity chromium metal if the Secretary determines that additional amounts of high purity chromium metal are needed in the National Defense Stockpile and includes the upgrade program in the Annual Materials Plan or any revision thereto.

Stockpiling principles (sec. 3311)

The Senate amendment contained a provision (sec. 3311) that would amend the Stock Piling Act to allow stockpile planning to be consistent with other areas of defense planning.

The House bill contained no similar provision.

The House recedes with an amendment that would make the Senate provision effective on October 1, 1994.

Modification of notice and wait requirements for deviations from Annual Materials Plan (sec. 3312)

The House bill contained a provision (sec. 3303) that would allow changes Annual Materials Plan to become effective 45 days after notification of the appropriate committees of Congress.

The Senate amendment contained a provision (sec. 3312) that would allow such changes to become effective 30 days after notification of the appropriate committees of Congress.

The Senate recedes.

Additional authorized uses of National Defense Stockpile Transaction Fund (sec. 3313)

The Senate amendment contained a provision (sec. 3314) that would authorize Stockpile Transaction Fund monies to be used for annual operating costs of the stockpile, including the costs of employees' salaries.

The House bill contained no similar provision.

The House recedes.

National emergency planning assumptions for biennial report on stockpile requirements (sec. 3314)

The Senate amendment contained a provision (sec. 3315) that would amend the requirements concerning planning assumptions in the biennial report on stockpile requirements required under the Stock Piling Act.

The House bill contained no similar provision.

The House recedes with an amendment that would make the Senate provision effective on October 1, 1994.

LEGISLATIVE PROVISIONS NOT ADOPTED

Rotation of materials to prevent technological obsolescence

The Senate amendment contained a provision (sec. 3313) that would allow for modernization and rotation of materials in the stockpile to prevent technological obsolescence.

The House amendment contained no similar provision.

The Senate recedes.

Repeal of advisory committee requirement

The Senate amendment contained a provision (sec. 3316) that would repeal the requirement to establish an Advisory Committee Regarding Operation and Modernization of the Stockpile contained in section 3306 of the National Defense Authorization Act for Fiscal Year 1993.

The House bill contained no similar provision.

The Senate recedes.

TITLE XXXIV—CIVIL DEFENSE

LEGISLATIVE PROVISIONS

LEGISLATIVE PROVISIONS ADOPTED

Civil defense authorization (sec. 3401)

The Administration requested \$146.391 million for fiscal year 1994 for activities authorized under the Federal Civil Defense Act of 1950, as amended. These funds are provided to the Federal Emergency Management Agency (FEMA) which administers the civil defense program.

The House bill (sec. 3401) would authorize the requested amount.

The Senate amendment (sec. 3401) would authorize \$152.9 million.

The Senate recedes. The conferees also urge the Federal Emergency Management Agency to complete the comprehensive study of domestic emergency preparedness funding requirements Congress directed in the National Defense Authorization Act for Fiscal years 1992 and 1993 (Public Law 102-190). The study was to have been completed on April 1, 1992.

The conferees endorse the Senate report's (S. Rept. 103-112) recommendation that FEMA procure equipment that will permit it to gain access to Department of Defense and other federal damage assessment capabilities. Prompt and accurate damage assessment will give federal authorities the ability to know what type and how much assistance states and localities need following a disaster. In recent studies, the General Accounting Office and the National Academy of Public Administration have underscored the importance of this information.

Civil Defense Act amendments (sec. 3402)

The House bill contained a provision (sec. 3402) that would amend the Civil Defense Act to reflect the "all-hazard" approach to emergency management. The act permits states to spend their federal civil defense funds to prepare for natural disasters "in a manner that is consistent with, contributes to, and does not detract from attack-related civil defense preparedness." The House bill would eliminate this spending restriction, and permit the use of civil defense funds to prepare for and respond to all kinds of emergencies and disasters.

The Senate amendment contained no similar provision.

The Senate recedes. The conferees note and endorse the discussion of the amendments in the House report (H. Rept. 103-200).

TITLE XXXV—PANAMA CANAL COMMISSION

LEGISLATIVE PROVISIONS

LEGISLATIVE PROVISIONS ADOPTED

Panama Canal Commission (secs. 3501-3506)

The Senate amendment contained provisions (secs. 3501-3506) that would authorize expenditures from the Panama Canal Revolving Fund for the operation and maintenance of the Panama Canal for fiscal year 1994. They also would provide the consent of the Congress for employees who are not citizens of the United States to accept civil employment with and compensation from agencies and organizations affiliated with the Government of Panama for which the consent of Congress is required by section 9 of Article I of the Constitution. The consent would be conditioned upon approval of such employment by their designated agency ethics official and by the Administrator of the Panama Canal Commission. Finally, the provisions would restate the right to challenge

adverse personnel actions through a negotiated grievance procedure for non-preference-eligible bargaining unit employees of the Commission.

The Panama Canal operates on a self-sustaining basis, utilizing tolls and revenues paid by canal users. Appropriated funds are not utilized for the operation and maintenance of the canal.

The House bill contained no similar provisions. A separate House bill contained provisions essentially identical to those in the Senate amendment.

The House recedes with a technical amendment.

From the Committee on Armed Services, for consideration of the entire House bill and the entire Senate amendment, and modifications committed to conference:

RONALD V. DELLUMS,
G. V. MONTGOMERY,
EARL HUTTO,
IKE SKELTON,
DAVE MCCURDY,
MARILYN LLOYD,
NORMAN SISISKY,
JOHN M. SPRATT, Jr.,
FRANK MCCLOSKEY,
SOLOMON P. ORTIZ,
GEORGE HOCHBRUECKNER,
GENE TAYLOR,
NEIL ABERCROMBIE,
TOM ANDREWS,
CHET EDWARDS,
ROBERT A. UNDERWOOD,
JANE HARMAN,
FLOYD SPENSE,
DUNCAN HUNTER,
JOHN R. KASICH,
HERBERT H. BATEMAN,
JAMES V. HANSEN,
CURT WELDON,
ARTHUR RAVENEL, Jr.,
RONALD K. MACHTLEY,

As additional conferees from the Permanent Select Committee on Intelligence, for consideration of matters within the jurisdiction of that committee under clause 2 of rule XLVIII:

DAN GLICKMAN,
BILL RICHARDSON,
LARRY COMBEST,

As additional conferees from the Committee on Banking, Finance and Urban Affairs, for consideration of sections 812 and 1316 of the House bill, and sections 1087, 2854, and 2908 of the Senate amendment, and modifications committed to conference:

HENRY GONZALEZ,
STEVE NEAL,
PAUL E. KANJORSKI,
TOM RIDGE,

Provided, Mr. Frank of Massachusetts is appointed in lieu of Mr. Gonzalez and Mr. Bereuter is appointed in lieu of Mr. Ridge solely for the consideration of section 1087 of the Senate amendment:

BARNEY FRANK,
DOUG BEREUTER,

As additional conferees from the Committee on Education and Labor, for consideration of sections 373, 1303, 1331, 1333-1337, 1343, 1344, and 3103 of the House bill and sections 338, 532, 1088, and 2853 of the Senate amendment, and modifications committed to conference:

WILLIAM D. FORD,
PAT WILLIAMS,
TOM PETRI,
BILL GOODLING,

As additional conferees from the Committee on Energy and Commerce, for consideration of sections 267, 382, 601, 1109, 1314, 2816, 2822, 2829, 2830, 2839, 3105 (b) and (c), 3132, 3137, 3140, and 3201 of the House bill and sections 322,

325, 327, 705, 822, 1088, 2802, 2803, 2833, 2842, 2844, 2913, 3106 (c), (d), (j), (l), 3131, 3132, 3133, 3136-3147, 3149, 3150, 3201, and 3202 of the Senate amendment, and modifications committed to conference:

JOHN D. DINGELL,
PHILIP R. SHARP,
AL SWIFT,
CARLOS J. MOORHEAD,
MICHAEL G. OXLEY,

Provided, Mr. Bliley is appointed in lieu of Mr. Oxley solely for the consideration of sections 267, 601, and 1109 of the House bill, and sections 705 and 3106 of the Senate amendment:

TOM BLILEY,

Provided, Mr. Bilirakis is appointed in lieu of Mr. Oxley solely for the consideration of sections 1314, 3137, 3140, and 3201 of the House bill, and sections 322, 2802, 2803, 3132, 3136, 3139-3147, 3149, 3150, 3201, and 3202 of the Senate amendment:

MIKE BILIRAKIS,

Provided, Mr. Stearns is appointed in lieu of Mr. Oxley and Mrs. Collins of Illinois is appointed in lieu of Mr. Swift solely for the consideration of section 822 of the Senate amendment:

CLIFF STEARNS,
CARDISS COLLINS,

Provided, Mr. Schaefer is appointed in lieu of Mr. Oxley solely for the consideration of section 3138 of the Senate amendment:

DAN SCHAEFER,

As additional conferees from the Committee on Foreign Affairs, for consideration of sections 234, 237, 241, 1005, 1008 (relating to funding structure for contingency operations), 1009 (relating to report on humanitarian assistance activities), 1021, 1022, 1034, 1038, 1041, 1043-1045, 1048, 1051-1055, 1105, 1107, 1008, 1201-1203, 1205-1208, 1360, 1501-1510, and 3136 of the House bill, and sections 216, 221, 223, 224, 241-245, 547, 1041, 1042, 1051-1054, 1061, 1067, 1077, 1078, 1083-1085, 1087, 1093, 1094, 1101-1103, and 1105-1107 of the Senate amendment, and modifications committed to conference:

LEE H. HAMILTON,
SAM GEJDNENSON,
TOM LANTOS,
BEN GILMAN,

As additional conferees from the Committee on Government Operations, for consideration of sections 818, 829, 1023, 1050, 2816, 2821, 2822, 2823, 2839, and 3140 of the House bill and sections 825, 2843, 2844, and 2902-2908 of the Senate amendment, and modifications committed to conference:

JOHN CONYERS, Jr.,
CARDISS COLLINS,
GLENN ENGLISH,
BILL CLINGER,
AL MCCANDLESS,

As additional conferees from the Committee on the Judiciary, for consideration of section 262 of the House bill, and modifications committed to conference:

JACK BROOKS,
MIKE SYNAR,
HOWARD L. BERMAN,
HAMILTON FISH, Jr.,
CARLOS J. MOORHEAD,

As additional conferees from the Committee on the Judiciary, for consideration of section 1022 of the House bill, and modifications committed to conference:

JACK BROOKS,
CHARLES SCHUMER,
JOHN CONYERS, Jr.,
HAMILTON FISH, Jr.,

As additional conferees from the Committee on the Judiciary, for consideration of section 1082 of the Senate amendment, and modifications committed to conference:

JACK BROOKS,
ROMANO L. MAZZOLI,
JOHN BRYANT,
HAMILTON FISH, Jr.,
BILL MCCOLLUM,

As additional conferees from the Committee on Merchant Marine and Fisheries, for the consideration of sections 1351, 1352, and 1354-1359 of the House bill and sections 654 and 3501-3506 of the Senate amendment, and modifications committed to conference:

GERRY E. STUDDS,
BILLY TAUZIN,
WILLIAM O. LIPINSKI,
JACK FIELDS,

As additional conferees from the Committee on Merchant Marine and Fisheries, for consideration of sections 265, 1314, and 3137 of the House bill and sections 328, 2841, 2851, 2915, 3103, and 3135 of the Senate amendment, and modifications committed to conference:

GERRY E. STUDDS,
JOLENE UNSOELD,
JACK REED,
JACK FIELDS,

As additional conferees from the Committee on Natural Resources, for consideration of section 2818 of the House bill and sections 2855, 3132, 3139, and 3174 of the Senate amendment, and modifications committed to conference:

GEORGE MILLER,
BRUCE F. VENTO,
DON YOUNG,

As additional conferees from the Committee on Post Office and Civil Service, for consideration of sections 364, 901, 934, 943, and 1408 of the House bill and sections 523, 1064, and 3504 of the Senate amendment, and modifications committed to conference:

WILLIAM (BILL) CLAY,
FRANK MCCLOSKEY,
ELEANOR H. NORTON,
JOHN T. MYERS,
CONSTANCE A. MORELLA,

As additional conferees from the Committee on Public Works and Transportation, for consideration of sections 2816 and 2841 of the House bill and sections 1068, 1087, 2833, 2842, and 2917 of the Senate amendment, and modifications committed to conference:

NORMAN Y. MINETA,
DOUGLAS APPEGATE,
BOB WISE,
BUD SHUSTER,
BILL CLINGER,

As additional conferees from the Committee on Rules, for consideration of section 1008 relating to funding structure for contingency operations) of the House bill, and modifications committed to conference:

BUTLER DERRICK,
TONY BEILENSON,
MARTIN FROST,
GERALD B.H. SOLOMON,
JAMES H. QUILLEN,

As additional conferees from the Committee on Science, Space, and Technology, for consideration of sections 215, 262, 265, 1303, 1304, 1312-1318, and 3105 of the House bill and sections 203, 233, 235, 803, and 3141-3148 of the Senate amendment, and modifications committed to conference:

GEORGE E. BROWN, Jr.,
TIM VALENTINE,
EDDIE BERNICE JOHNSON,

As additional conferees from the Committee on Small Business, for consideration of section 829 of the House bill, and modifications committed to conference:

JOHN J. LAFALCE,
NEAL SMITH,
JAN MEYERS,

As additional conferees from the Committee on Veterans' Affairs, for consideration of

sections 1071 and 1079 of the Senate amendment, and modifications committed to conference:

G.V. MONTGOMERY,
GEORGE E. SANGMEISTER,
BOB STUMP,

Provided, Mr. Slattery is appointed in lieu of Mr. Sangmeister solely for the consideration of section 1079:

JIM SLATTERY,

As additional conferees from the Committee on Ways and Means, for consideration of sections 653, 705, and 1087 of the Senate amendment, and modifications committed to conference:

J.J. PICKLE,
Managers on the Part of the House.

SAM NUNN,
J.J. EXON,
CARL LEVIN,
EDWARD M. KENNEDY,
JEFF BINGAMAN,
JOHN GLENN,
RICHARD SHELBY,
ROBERT C. BYRD,
BOB GRAHAM,
CHUCK ROBB,
JOSEPH I. LIEBERMAN,
RICHARD H. BRYAN,
STROM THURMOND,
JOHN WARNER,
BILL COHEN,
TRENT LOTT,
DAN COATS,
BOB SMITH,
DIRK KEMPTHORNE,
KAY BAILEY HUTCHISON,

Managers on the Part of the Senate.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mrs. BENTLEY) to revise and extend their remarks and include extraneous material:)

Mr. FISH, for 5 minutes, today.
Mr. BARTLETT of Maryland, for 5 minutes, today.
Mr. EWING, for 5 minutes each day, on November 19, 20, 21, 22, and 23.
Mrs. BENTLEY, for 5 minutes, today, in lieu of previously approved 60 minutes.

(The following Members (at the request of Mr. FILNER) to revise and extend their remarks and include extraneous material:)

Mr. GLICKMAN, for 5 minutes, today.
Mr. JEFFERSON, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(Mr. BUYER on the McCollum amendment to H.R. 1025 in the Committee of the Whole today.)

(Mr. DORNAN and to include extraneous material notwithstanding the fact that it exceeds two pages of the RECORD and is estimated by the Public Printer to cost \$1,222.)

(The following Members (at the request of Mr. FILNER) and to include extraneous matter:)

Mr. ANDREWS of New Jersey in two instances.

Mr. SKELTON.
Mr. VISCLOSKEY.
Mr. DELLUMS.
Mr. HAMILTON in two instances.
Mr. BROWN of California.
Mr. ENGEL.
Mr. WAXMAN.
Ms. WOOLSEY.
Mr. FINGERHUT.
Mr. DE LA GARZA.
Mr. FAZIO.
Mr. MINETA in two instances.
Ms. HARMAN.
Mr. DICKS.
Mr. TRAFICANT.
Mr. BARLOW.
Mr. RANGEL.
Mr. DINGELL in two instances.
Mr. FILNER.
Mr. PAYNE of New Jersey.
Mrs. LOWEY.
Ms. ENGLISH of Arizona.
Mr. DEUTSCH.
Mr. NADLER.
Mr. VENTO.
Mr. HOYER.
Mr. FALEOMAVAEGA.
Mr. BORSKI.
Mr. BROWN of Ohio.
Mr. KOPETSKI.
Mr. OWENS.
Mr. VALENTINE.
Mr. TOWNS.
Mr. FORD of Michigan.
Ms. SCHENK.

(The following Members (at the request of Mrs. BENTLEY) and to include extraneous matter:)

Mr. PACKARD.
Mr. BARTLETT of Maryland.
Mr. CALVERT.
Mr. DORNAN.
Mr. RIDGE.
Mrs. ROUKEMA in two instances.
Mr. GILMAN in three instances.
Mr. BURTON of Indiana.
Mr. RAMSTAD.
Ms. MOLINARI.
Mr. FAWELL.
Mr. COX.
Mr. SHAYS.
Mr. GRAMS.
Mr. YOUNG of Alaska.

(The following Members (at the request of Mr. DREIER) and to include extraneous matter:)

Mr. ARCHER.
Mr. EWING.
Mr. GUTIERREZ.
Mr. GOODLING.
Ms. DELAURO.
Mr. FRANKS of Connecticut.
Mrs. JOHNSON of Connecticut.

ENROLLED BILLS SIGNED

Mr. ROSE, from the Committee on House Administration, reported that that committee had examined and found truly enrolled bills of the House of the following titles, which were thereupon signed by the Speaker:

H.R. 2520. An act making appropriations for the Department of the Interior and relat-

ed agencies for the fiscal year ending September 30, 1994, and for other purposes.

H.R. 3116. An act making appropriations for the Department of Defense for the fiscal year ending September 30, 1994, and for other purposes.

SENATE ENROLLED JOINT RESOLUTION SIGNED

The SPEAKER announced his signature to an enrolled joint resolution of the Senate of the following title:

S.J. Res. 131. Joint resolution designating the week beginning November 14, 1993, and the week beginning November 13, 1994, each as "Geography Awareness Week."

ADJOURNMENT TO MONDAY, NOVEMBER 15, 1993

Mr. DREIER. Madam Speaker, I move that the House do now adjourn.

The motion was agreed to.

The SPEAKER pro tempore (Ms. SLAUGHTER). Pursuant to the provisions of House Concurrent Resolution 178, 103d Congress, the House stands adjourned until noon, Monday, November 15, 1993.

Thereupon (at 8 o'clock and 24 minutes p.m.), pursuant to House Concurrent Resolution 178, the House adjourned until Monday, November 15, 1993, at 12 noon.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. BROOKS: Committee on the Judiciary. H.R. 1025. A bill to provide for a waiting period before the purchase of a handgun, and for the establishment of a national instant criminal background check system to be contracted by firearms dealers before the transfer of any firearm; with an amendment (Rept. 103-344). Referred to the Committee of the Whole House on the State of the Union.

Mr. FORD of Michigan: Committee on Education and Labor. H.R. 2884. A bill to establish a national framework for the development of school-to-work opportunities systems in all States, and for other purpose; with an amendment (Rept. 103-345). Referred to the Committee of the Whole House on the State of the Union.

Mr. MINETA: Committee on Public Works and Transportation. H.R. 2868. A bill to designate the Federal building located at 600 Camp Street in New Orleans, LA, as the "John Minor Wisdom United States Courthouse" (Rept. 103-346). Referred to the House Calendar.

Mr. MINETA: Committee on Public Works and Transportation. H.R. 3186. A bill to designate the U.S. courthouse located in Houma, LA, as the "George Arceneaux, Jr., United States Courthouse" (Rept. 103-347). Referred to the House Calendar.

Mr. MINETA: Committee on Public Works and Transportation. H.R. 3356. A bill to designate the U.S. courthouse under construction at 611 Broad Street, in Lake Charles, LA, as the "Edwin Ford Hunter, Jr., United States Courthouse" (Rept. 103-348). Referred to the House Calendar.

Mr. MONTGOMERY: Committee on Veterans' Affairs. H.R. 3313. A bill to amend title 38, United States Code, to improve health care services of the Department of Veterans Affairs relating to women veterans, to extend and expand authority for the Secretary of Veterans Affairs to provide priority health care to veterans who were exposed to ionizing radiation or to Agent Orange, to expand the scope of services that may be provided to veterans through Vet Centers, and for other purposes; with amendments (Rept. 103-349). Referred to the Committee of the Whole House on the State of the Union.

Mr. MONTGOMERY: Committee on Veterans' Affairs. H.R. 3456. A bill to amend title 38, United States Code, to restore certain benefits eligibility to unremarried surviving spouses of veterans; with an amendment (Rept. 103-350). Referred to the Committee of the Whole House on the State of the Union.

Mr. FROST: Committee on Rules. House Resolution 305. Resolution waiving points of order against the conference report to accompany the bill (H.R. 2401) to authorize appropriations for fiscal year 1994 for military activities of the Department of Defense, to prescribe military personnel strengths for fiscal year 1994, and for other purposes (Rept. 103-351). Referred to the House Calendar.

Mr. DE LA GARZA: Committee on Agriculture. H.R. 3436. A bill to amend the Food Stamp Act of 1977 to ensure adequate access to retail food stores by recipients of food stamps and to maintain the integrity of the Food Stamp Program; with an amendment (Rept. 103-352). Referred to the Committee of the Whole House on the State of the Union.

Mr. ROSTENKOWSKI: Committee on Ways and Means. H.R. 3419. A bill to simplify certain provisions of the Internal Revenue Code of 1986, and for other purposes; with an amendment (Rept. 103-353). Referred to the Committee of the Whole House on the State of the Union.

Mr. CONYERS: Committee on Government Operations. H.R. 3425. A bill to redesignate the Environmental Protection Agency as the Department of Environmental Protection, and for other purposes; with an amendment (Rept. 103-355). Referred to the Committee of the Whole House on the State of the Union.

Mr. CLAY: Committee on Post Office and Civil Service. H.R. 3318. A bill to amend title 5, United States Code, to provide for the establishment of programs to encourage Federal employees to commute by means other than single-occupancy motor vehicles (Rept. 103-356 Pt. 1). Ordered to be printed.

Mr. DELLUMS: Committee of Conference. Conference report on H.R. 2401. A bill to authorize appropriations for fiscal year 1994 for military activities of the Department of Defense to prescribe military personnel strengths for fiscal year 1994, and for other purposes (Rept. 103-357). Ordered to be printed [H9563] F

REPORTED BILLS SEQUENTIALLY REFERRED

Under clause 5 of rule X, bills and reports were delivered to the Clerk for printing, and bills referred as follows:

Mr. CONYERS: Committee on Government Operations. H.R. 1593. A bill to amend the Government in the Sunshine Act to require the disclosure of certain activities, with an amendment; referred to the Committee on Judiciary for a period ending not later than February 28, 1994, for consideration of such provisions of the bill and amendment as fall within the jurisdiction of the committee pur-

suant to clause 1(1), rule X (Rept. 103-354, Pt. 1). Ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BOUCHER (for himself, Mr. BROWN of California, Mr. MILLER of California, Mr. LEHMAN, Mr. WALKER, and Mr. BOEHLERT):

H.R. 3485. A bill to authorize appropriations for carrying out the Earthquake Hazards Reduction Act of 1977 for fiscal years 1994, 1995, and 1996; jointly, to the Committees on Science, Space, and Technology and Natural Resources.

By Mr. ARCHER:

H.R. 3486. A bill to establish safe harbors from the application of the antitrust laws for certain activities of providers of health care services, and for other purposes; to the Committee on the Judiciary.

H.R. 3487. A bill to amend the Social Security Act to improve review procedures (particularly those involved in the disability determination process) under the OASDI, SSI, and Medicare Programs by making such procedures more cost-effective and by providing greater equity and efficiency for claimants and beneficiaries; jointly, to the Committees on Ways and Means, Post Office and Civil Service, and Energy and Commerce.

By Mr. BACHUS of Alabama (for himself, Mr. HUNTER, Mr. DORNAN, Mr. GOSS, Mr. LAUGHLIN, Mr. BURTON of Indiana, Mr. EMERSON, Mr. STUMP, Mr. DOOLITTLE, Mr. HUTCHINSON, Mr. HANSEN, Mr. BATEMAN, Mr. FIELDS of Texas, Mr. KING, Mrs. FOWLER, Mr. TAYLOR of North Carolina, Mr. EWING, and Mr. SMITH of Texas):

H.R. 3488. A bill to amend the National Foundation on the Arts and the Humanities Act of 1965 to limit the distribution of funds of the National Endowment for the Arts; to the Committee on Education and Labor.

By Mr. BORSKI (for himself and Mr. WISE):

H.R. 3489. A bill to improve economic productivity and create thousands of jobs by establishing an infrastructure reinvestment fund which will provide immediate, upfront funding of intermodal surface transportation programs, and for other purposes; jointly, to the Committees on Public Works and Transportation, Government Operations, Rules, and Ways and Means.

By Mr. DE LA GARZA:

H.R. 3490. A bill to include as creditable service, for purposes of the Civil Service Retirement System, certain periods of service performed in certain Federal-State cooperative agricultural programs; to the Committee on Post Office and Civil Service.

By Mr. FAWELL (for himself, Mr. GOODLING, and Mr. BALLENGER):

DELETIONS OF SPONSORS FROM PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, sponsors were deleted from public bills and resolutions as follows:

H. Res. 225: Mr. HOBSON.

DISCHARGE PETITIONS—ADDITIONS OR DELETIONS

The following Members added their names to the following discharge petitions:

Petition 4 by Mr. HOEKSTRA on House Joint Resolution 9: JACK FIELDS.

Petition 9 by Mr. WELDON on House Resolution 227: MEL HANCOCK, JAMES C. GREENWOOD, and JACK FIELDS.

EXTENSIONS OF REMARKS

WELFARE REFORM

HON. MARGE ROUKEMA

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 10, 1993

Mrs. ROUKEMA. Mr. Speaker, I am pleased to join with over 150 of my Republican colleagues this morning in introducing comprehensive welfare reform legislation.

The legislation we introduce today addresses the central crisis of our welfare system; namely, that welfare was intended to be a temporary safety net—not a perpetual web of dependency. Furthermore, our legislation recognizes that the philosophical underpinning of welfare reform must be responsibility: of society to the less fortunate, but equally of welfare recipients to society and its taxpayers.

Our legislation addresses the welfare crisis on several fronts. Above all, we have taken the pioneering step of requiring welfare recipients to work for their benefits. Parents on welfare must enroll in job training, job search, or education programs. If they have not independently found work after 2 years, they must then participate in a State-run jobs program. The Republican welfare bill ends the system of something for nothing, and ensures that AFDC recipients meet reasonable and responsible standards.

We accept our responsibility in establishing these programs as well. We have dramatically expanded job training and work programs, and included the funding necessary to implement them.

Our bill addresses other, glaring failures in our present welfare system. Our legislation prohibits benefits to adolescent mothers, requiring them to maintain residence in a family household. We encourage States to adopt profamily financial incentives for welfare families, and eliminate monetary penalties and obstacles to stable family formation. We end the proliferation of welfare benefits for noncitizens. We take steps toward addressing the failures of our child support enforcement system, and strengthen the requirements for paternity establishment in welfare programs.

I am particularly pleased that this legislation includes the Roukema amendment, which requires welfare recipients, as a condition of receiving AFDC benefits, to certify that their children have been properly immunized.

As my colleagues will recall, Republicans were united this year in voting against the President's budget package, and the time-honored approach of throwing money at the child immunization problem. In that light, the President's reconciliation package included more than \$600 million over the next 5 years for immunization programs.

However, as I have long maintained, the problem here is not money. All objective evidence indicates that the missing link in pre-school immunization is enforceable standards.

Today, either through ignorance or apathy, parents are failing to get their children immunized, making these children the victims. The Roukema amendment requires that parents, in order to qualify for AFDC benefits, must have their children properly immunized and up to date on the vaccinations. My amendment makes State compliance mandatory.

In addition, our bill requires that day care and child care centers which receive Federal moneys must certify that these same immunization requirements are met before enrolling a child.

For generations we have taken this approach in requiring immunizations for school enrollment, with remarkable success. When we require this immunization, and tell parents that their child won't start school without them, it happens—parents get their children the shots.

I would also stress that the immunization of children is preventive medicine. Medical and scientific evidence shows that every dollar invested in childhood immunization saves \$10 in future health care costs. Yet despite our vast technology, and remarkably effective vaccines, our Nation has begun to face increases in preventable childhood diseases.

Last year, in my own State of New Jersey, six children died from an outbreak of measles. These were unnecessary deaths. It is a national disgrace that in this country—the most advanced country on the globe, with the best medical care available—we rank with the Third World bloc when it comes to immunization standards.

I do have several concerns with the Republican package we are introducing today. This bill is not perfect, and in the months to come, I will be working to address what I perceive as its shortcomings.

In particular, I am concerned that we do not definitively prohibit States from increasing AFDC grants for children born to parents already on welfare.

Under the Republican task force package, States would be allowed to opt out of this provision, by passing a law to exempt themselves. It is unclear to me why the Federal Government, paying far and away the lion's share of the AFDC Program, feels the need to let States decide just how tough welfare reforms ought to be.

The definitive prohibition on these benefits increases should be a linchpin in any welfare reform effort, and I am disappointed that the conference did not adopt my amendment in this regard. Under my amendment, we would have told mothers already on welfare that if they decide to have another child, the Federal will not subsidize that choice. My amendment made clear that families on welfare would be faced with the same choices as every other American family: Can we afford another child, and how will we stretch our budget to meet these choices?

I would highlight that these reforms have already generated bipartisan support. They were

sponsored by a Democrat, African-American Assemblyman, adopted by New Jersey's Democratic legislature, and signed into law by a Democratic Governor. The Bush administration gave Federal approval to this provision last year. This was a key component of New Jersey's pioneering welfare reform package of 2 years ago, and garnered national attention.

Perhaps most important, earlier this week, New Jersey's welfare administration reported that in the first 2 months of this program, pregnancies among welfare mothers decreased 18 percent. This fact alone indicates that these provisions must be included in any full-scale reform that comes before the House of Representatives.

One additional area in which I feel our welfare reform effort is lacking is child support enforcement.

During consideration of this package in conference, I offered a comprehensive child support enforcement amendment to the provisions contained in the Republican task force package. My amendment was identical to legislation I introduced earlier this year, H.R. 1600, which implements the recommendations of the U.S. Commission on Interstate Child Support Enforcement. The failure of the conference to adopt this amendment represents, to me, a step backward. Clearly, we cannot have any real, comprehensive welfare reform without equally strong reform of our child support enforcement system.

Mr. Speaker, the importance of a strong child support title in any welfare system package cannot be understated. Invariably, child support enforcement is welfare prevention. Nonsupport of children by their parents is one of the primary reasons families have to resort to the welfare system in the first place.

The timely payment of court-ordered support is the fulfillment of a moral and legal obligation. If we are to advance real welfare reform, we must do everything in our power to ensure that these obligations are met.

Make no mistake about it: Failure to pay child support is not a victimless crime. The children going without these payments are the first victims. But ultimately, society and the American taxpayers are the victims, as they shoulder the burden of paying the welfare bill for those who do not meet their obligations.

Effective child support enforcement keeps people off the public dole, and actually saves the Federal Government money. This is broadly recognized across the board: The National Taxpayers Union estimated that the comprehensive provisions of my amendment would save \$25 million in Federal dollars the first year alone.

The Republican task force package before us contains the beginnings of child support reform, and my amendment incorporates most of those recommendations. However, my amendment goes much further in addressing the underlying flaws in our child support enforcement system, and making much needed

● This "bullet" symbol identifies statements or insertions which are not spoken by a Member of the Senate on the floor.

Matter set in this typeface indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

changes across the board. As every national authority on child support will affirm: A national child support enforcement system is an essential component of welfare reform. Moreover, our national enforcement system is only as good as our interstate collection mechanisms.

I was a leading voice in this debate, on both the Child Support Enforcement Amendments of 1984, and the Family Support Act of 1988. For the last 2 years, I have served as a member of the U.S. Commission on Interstate Child Support Enforcement, which last summer issued a comprehensive report, and recommendations for change, of our interstate child support system.

For example, only my amendment contains bold new initiatives to establish paternity—the most crucial element for establishment and collection of court-ordered child support. H.R. 1600 requires new paternity establishment initiatives, including mandatory hospital-based paternity programs. It simplifies paternity establishment process, and, in contested paternity, shifts the burden of proof to a father who has already acknowledged paternity.

My bill simplifies location of noncustodial parents and support order establishment, and creates a new line on the Federal W-4 for every new employee to indicate child support obligations. At the same time, we update the national computer network connecting State child support offices.

My amendment requires all States to make it a crime to willfully fail to pay child support.

For the first time, my amendment definitively allows States to serve child support orders on out-of-State employers. As the U.S. Commission noted, this direct service is one of the most successful methods of child support enforcement available, with success rates of 80 percent and more when used.

Finally, my bill addresses the important gaps in our present system, requiring States to withhold drivers' and occupational licenses from deadbeat parents; increasing the use of credit reporting and garnishment; and requiring uniform, national subpoenas to simplify burdensome paperwork requirements.

Mr. Speaker, in closing I would stress again: Failure to pay child support is not a victimless crime—first, and above all, the children pay; all too often, however, society and the taxpayers are left holding the bag for these deadbeat parents.

A comprehensive child support title must be an essential component of welfare reform—any welfare legislation that does not address this fundamental fact can be, at best, fragmentary and insufficient. Interstate child support is the missing link in our national system, as our national system can only be as strong as the interstate enforcement mechanisms. No comprehensive solution will be achieved as long as the strongest States are held back by the weakest ones.

In the months to come, I will be working to ensure bipartisan support for inclusion of these comprehensive child support enforcement provisions in any welfare reform package debated in Congress. I encourage my colleagues to join me in these efforts, and put forth real and effective welfare reform.

LET'S REMEMBER OUR VETERANS

HON. JOHN D. DINGELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 10, 1993

Mr. DINGELL. Mr. Speaker, I rise today to pay tribute to the brave and patriotic Americans who have served our Nation. Since its founding, the United States has fought in 11 major wars and many smaller conflicts. During these periods of strife, more than 40 million Americans have served in our military forces. Their courageous deeds have helped to ensure that democracy and freedom prevail in this country, and throughout the world.

Tomorrow, November 11, we celebrate Veterans Day. Veterans Day provides us with an opportunity to recognize the enormous accomplishments and the great sacrifices that the veterans of our Nation, both past and present, have made. Veterans Day is also a day of peace; peace made possible through the valiant efforts of these American patriots. November 11 truly is a fitting day to pay tribute to these special individuals and their achievements, because on that date in 1918, an armistice between the Allies and the central powers was signed. This agreement brought an end to the fighting of World War I.

As we prepare to celebrate this Veterans Day, it is important to remember all who have served our Nation. In the coming year, we will commemorate the 50th anniversary of many critical moments of World War II. For example, June 6, 1994, will mark the half-century point since Allied Forces landed on the beaches of Normandy, France for the D-Day invasion. Since World War II, American soldiers have also been called to arms throughout the world in places such as Vietnam, Korea, Lebanon and the Persian Gulf.

Today, despite the end of the cold war and subsequent breakup of the former Soviet Union, we continue to call upon our Armed Forces to help defend the principles upon which this Nation was founded. The present situation in countries such as Bosnia, Haiti, and Somalia illustrates that there are still many threats confronting us. Thankfully, we still have brave men and women who stand ready to help ensure that the flames of freedom and democracy continue to burn brightly.

Each of us owes a deep debt of gratitude to our veterans, and to the men and women serving in our Armed Forces. I am proud to join with my colleagues, and the people of this great Nation, as we pay tribute to those brave Americans who have defended this country and safeguarded our future.

A TRIBUTE TO COURAGE

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 10, 1993

Mr. BROWN of California. Mr. Speaker, Martin Luther King, Jr., said:

The ultimate measure of a man is not where he stands in moments of comfort and convenience, but where he stands at times of challenge and controversy.

Throughout the 217-year history of America's struggles, triumphs and determination, there have always been courageous individuals ready to defend the ideals of this great Nation. Among the myriad of brave Americans that have stood steadfast against the tide of oppression and threats to our way of life, as well as the challenges and controversies of their own times, one group stands out for their sacrifice and commitment to duty. Today we honor our American veterans everywhere, not only for leaving hearth and home to fight an unrelenting stream of conflicts, but for serving our Nation in the highest station available to any citizen—as protectors of our ideals and dreams.

Too often in the present day, many Americans have seemingly forgotten the meaning of our holidays. The first, and often unimpaired definition of a holiday is as a holy day—a day of reverence and respect for what is good, not only of God, but in mankind as well. When Veterans Day was first enacted into law it was to commemorate the armistice of 1918 and then later amended to include the end of war in 1945. Now, it encompasses so much more. It is and always shall be a tribute to the proud resolve of America's fighting men and women, of any era, who have bravely endured through 10 major wars and numerous clashes.

More than just a tribute to the pain any one of them has had to bear, it is a tribute to the resiliency of the human spirit, present in the hearts and minds of our veterans. It has been hypothesized that, "A hero is no braver than an ordinary man, but he is brave five minutes longer." That is what we are honoring today, those proverbial 5 minutes of each veteran's life. Those 5 minutes in which our veterans reached deeper into themselves than they had ever before—resisting their fear and surging on for their fellow Americans back home and their friends on the battlefield all around them. By paying respect to those 5 minutes, we are rewarded with a glimpse into some of the best qualities inside us all that we have the potential to realize. The qualities of loyalty, perseverance and courage.

When I talk of the courage that veterans have displayed so many countless times, I am not talking of the term courage as it is today—a term cheap with overuse. When I talk of courage, I talk of the true courage that is found in veterans everywhere. The courage that President John F. Kennedy described as when, "A man does what he must—in spite of personal consequences, in spite of obstacles and dangers and pressures—that is the basis of all morality." When Veterans Day commemorates the courage of this extraordinary group of people, it commemorates the courage to do what is right, rather than what is easy and uncomplicated.

Now more than ever, we as Americans must respond to the courage our veterans found within themselves for this country and the rest of the world. When our veterans call upon their fellow Americans for assistance we cannot be impulsive to their very real needs. If a veteran needs, desires, and has earned a greater education, then we must follow through on our commitment to provide that education. If a veteran seeks to find work, then we must provide that veteran with the training to prepare for a good-paying civilian

job, so that we will have done everything possible to make sure that veteran's search for employment was not in vain. If a veteran falls sick, we must nurse him or her back to health. After depending on them for so long to defend our ideals, we have to prove that the ideals of freedom, democracy, and opportunity that they fought for still exist. If we turn our backs to them, we turn our backs to all that is good and fundamental in our Nation. If we ignore their pleas, then we take one more disastrous step towards snuffing out the light that makes us the shining hope to the masses around the world. If we fail them, we will surely fail ourselves and all that we stand for.

At the same time, that is not to say that we veterans do not have a role to continue to fulfill in our country as well. We already have defended the ideals that America was founded on in the face of nearly overwhelming adversity, and we have to realize our fight is far from over. We now have to battle some of the fiercest enemies our Nation has ever faced—the enemies of cynicism, complacency, and apathy. We must help define America's vision of its role in our vastly changing world by reminding our fellow Americans of the good in our country, and our subsequent responsibilities. We, by being active participants in the very process of democracy we have guarded over, have the opportunity to demonstrate that significant objectives can be reached by possessing courage. Courage not against some tangible foreign despot or an evil empire, but courage against the faceless monster of our own doubts, fears, and indifference.

I know that all of you join me on this Veterans Day of November 11, 1993, in tribute to the courage and resolve of our brave American veterans who sacrificed a great deal to keep the ideals of this grand Nation alive through the tumultuous mosaic we know as American history. And I also know that we can join together as a committed citizenry in the fight to keep the ideals of our country, that our brave veterans fought so hard to protect, alive not just in the hearts of others in foreign lands who idolize American from afar, but in our own hearts and dreams as well.

LET'S ALL JOIN IN CELEBRATION
OF THE 218TH BIRTHDAY OF THE
U.S. MARINE CORPS

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 10, 1993

Mr. DORNAN. Mr. Speaker, I ask my colleagues and all of the citizens of this great country to join me in congratulating the few, the proud, the brave men and women of the U.S. Marine Corps who today are celebrating the 218th anniversary of the birth of the corps.

I will include for the RECORD a description about the creation of the Marine Corps in 1775 and a brief summary of the history of the Marines from the Shore of Tripoli in 1805 to humanitarian operations in Somalia earlier this year. Semper parati!

USMC—CONGRESSIONAL HERITAGE

On Friday, 10 November 1775, Colonel Benedict Arnold stood on the banks of the St.

Lawrence River and looked in frustration across a mile of storm-whipped water at the grand objective—Quebec. It was critical that Arnold's Army execute the crossing before British reinforcements arrived.

Outside Boston on that same day, General George Washington and his army were encamped at Cambridge. Although reasonably provisioned, there were shortages of blankets, uniforms, and powder.

In Philadelphia that Friday morning, the Second Continental Congress considered the situations near Quebec and Cambridge. At ten o'clock, the President of the Congress, John Hancock, convened the Congress. Major items of discussion focused on relieving pressure on Arnold's Army by securing Nova Scotia and then resupplying Washington's Army with its captured supplies.

The success of the Nova Scotia plan called for the creation of two battalions of Marines from Washington's Army. Accordingly, the Continental Congress resolved that two battalions of Marines would be raised and that they would be able to serve to advantage by sea when required. They would be distinguished by the names of the First and Second Battalions of American Marines.

General Washington considered the decision to raise the Marine battalions from his Army impractical because his army was reorganizing. Undaunted, Congress relieved Washington of this responsibility and ordered that the Marine battalions be created independently of the army.

The expedition to Nova Scotia was eventually abandoned, but the Congress refused to abandon the resolution to form the Marine battalions. In a time of distress and despite objections, the Continental Congress persevered and perpetuated the idea of a Corps of Marines. In the following decades and centuries, the Congress has continued to nurture and support America's Marines.

In the aftermath of WWII, Congress directed the maintenance of a versatile expeditionary force in readiness. The Congress said such a ready force, highly mobile, always at a state of readiness, can be in a position to hold full-scale aggression at bay while the American nation mobilizes its vast defense machinery. This expeditionary capability remains the hallmark of the Marine Corps.

Throughout our 218 year history, the United States Marine Corps has been privileged to maintain a unique relationship with the Congress of the United States. We are pleased to have the opportunity to share with Congress this observance of the 218th birthday of the United States Marine Corps.

The United States Marine Corps is America's foremost force in readiness. Characterized by its amphibious, expeditionary, and combined arms capabilities, the Marine Corps is a uniquely organized, responsive, and sustainable military force.

As a regular branch of our country's armed services, the Marine Corps was founded by a 10 November 1775 resolution of the Continental Congress. Since then, Marines have served our Nation in numerous conflicts.

We were with John Paul Jones and General George Washington during the American Revolution.

We stormed the "Shore of Tripoli" in 1805 and raised the United States Flag for the first time in the Eastern Hemisphere.

We were the first United States troops to enter the capital and to occupy the "Halls of Montezuma" in Mexico City during the Mexican War.

We were at Bull Run and New Orleans during the Civil War, in Cuba and the Philippines during the Spanish-American War, and in China during the Boxer Rebellion.

We fought gallantly at Belleau Wood, Soisson, St. Michiel, and the Argonne during World War I.

We pioneered the concept of close air support in Nicaragua as Marine Aviators flew the first air missions in support of infantry forces.

We confirmed the validity of amphibious warfare at Guadalcanal, Bougainville, Tarawa, Saipan, Iwo Jima, and Okinawa during our legendary World War II island campaign in the Pacific.

We executed a classic amphibious assault at Inchon, became the first military to conduct helicopter operations in battle, and destroyed seven enemy divisions at the Chosin Reservoir during the Korean Conflict.

We added to our lineage the names Da Nang, Hue City, Phu Bai, and Khe Sanh during the Vietnam Conflict.

We supported our Nation's interests in Beirut, Grenada, and Panama, and adopted new techniques, such as Vertical Short Take-Off Landing high-performance aircraft, and new concepts, such as Maritime Prepositioning Ships.

We demonstrated our expeditionary responsiveness, combat readiness, and logistical sustainability in defeating Iraqi aggression and liberating Kuwait during the Gulf War.

We demonstrated our humanitarian capabilities by distributing food to the starving people of Somalia, thereby Operation Restore Hope became the latest campaign in 218 years of proud and faithful service to our Country and Corps.

Today we celebrate that heritage in our traditional Marine Corps Birthday Ceremony.

THOMAS D. MIGNANELLI
RECEIVES KIM AWARD

HON. HENRY A. WAXMAN

OF CALIFORNIA

HON. HOWARD L. BERMAN

OF CALIFORNIA

HON. JULIAN C. DIXON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 10, 1993

Mr. WAXMAN. Mr. Speaker, we ask our colleagues to join us in congratulating Thomas D. Mignanelli for receiving the Helen K. Kim Memorial Award from Athletes & Entertainers for Kids.

The Kim Award was established to recognize business leaders who have a profound and continuous commitment to the public good. Thomas D. Mignanelli, retired president and chief executive officer of Nissan Motor Corp. of the USA, has an impressive history of bringing corporate assistance to athletes and entertainers who work to improve the lives of children and youth in our community.

On November 16, 1993, the Kim Award will be jointly presented to Mr. Mignanelli by Kareem Abdul-Jabbar and Kathy Ireland at the Harper's Bazaar Charity Soiree.

We salute Mr. Mignanelli and extend our thanks and best wishes to him.

IMPROVING THE DISABILITY CLAIMS GRIDLOCK IN THE SOCIAL SECURITY PROGRAMS

HON. BILL ARCHER

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 10, 1993

Mr. ARCHER. Mr. Speaker, today I am introducing the Social Security Procedural Improvement Act of 1993, a bill I have introduced in the past four Congresses. The disability program has reached near gridlock, and it is past time we took steps to streamline the process to make it more responsive to the public it serves and to ensure greater uniformity in a national program.

Essentially this is the same bill I first introduced in March 1986. I am convinced that the three main provisions of this bill are necessary. Those three provisions would: First, liberalize the criteria under which disability determinations for Social Security are administered; second, eliminate the appeals council and the review performed by it, and third, create a Social Security court, a proposal first advanced by my colleague JAKE PICKLE.

Let me expand on these provisions. The first would permit the Secretary of HHS to federalize State agencies at any time to assume the effective, equitable, and uniform administration of the program. This differs from current law which obligates the Secretary to show that the State agency has substantially failed to make decisions in accord with laws and regulation. This assures that the Secretary has the authority to federalize the disability program.

The States were initially given the responsibility because of their closer links to the medical community—from which reports would be needed—and because of the State link with vocational rehabilitation. Both rationales have been overtaken by program history and are no longer as relevant or important as the ensuring of effective, equitable, and uniform national administration of the disability program.

Let me assure you that this bill provides for fair and equitable treatment of the State employees who may be federalized. The disability determination process requires their continued expertise, and this bill provides an orderly and fair transition to Federal employment, with protections to ensure pay, leave, and pension benefits reasonably equivalent to Federal employees, so federalizing certain State agencies can be done in a cost-effective manner.

Second, it eliminates the appeals council, and the review performed by it, which is the third and final administrative appeal. This provision is intended to streamline the entire appeals process by eliminating a paper review of the decisions of administrative law judges. In fiscal 1993 that review took an average of 4 months and reversed only 4 percent of the cases appealed. I believe the applicants will benefit by quicker access to the new Social Security court.

I am heartened to report that on October 21, 1993 the Social Security Subcommittee held a hearing on the issue of the creation of a Social Security court. I advocated this bill's approach at that time and as I do now. The time

has come to get these cases out of the backlog of the district courts and into more specialized hands. SSA simply cannot administer the chaos created by the situation today.

In this context, the bill further provides that all appeals from this court would be channeled to the U.S. Court of Appeals for the Federal Circuit, again eliminating the potential for multiple and contradictory court decisions on a variety of highly technical program issues. I think it is important to note that the intent of this provision is not so much to stifle legal interpretation of statutory and regulatory requirements as to quantify those interpretations, so that the issues and costs can be resolved more speedily by the administration and Congress. The bill contains an adequate transitional period and mechanism to process pipeline cases, so those applicants caught in the transition should not be affected adversely.

This year my bill has two new features. SSA has, under demonstration project authority we enacted in 1980, been conducting case management pilot studies. Case management refers to front end services designed to help those able to return to work. Since SSA has lost control of the continuing disability review process, it is clear to me that we must invest more effort initially to identify and assist those who would benefit from such services. My bill requires that SSA add to its report on the pilot projects a legislative proposal to implement case management services on up to one-third of all beneficiaries by December 31, 1997, and up to one-half by December 31, 1999. This ought to give SSA the time and flexibility it would need to develop a plan it could live with.

Finally, there are small administrative costs associated with this bill, so as an offset I propose to eliminate survivor benefits which are payable solely on the basis of currently insured status. Currently insured covers the worker who had worked as little as 1½ years in the 3 years prior to death. In a fully mature program, that amounts to a windfall. I should make clear that my provision does not penalize younger workers. A year and a half of covered employment, or six quarters of coverage, fully ensures the young worker who dies before age 30.

SSA does not anticipate any immediate costs for this bill and cannot project a long term impact on the program. Personally I believe national uniformity would produce some substantial savings and more accurate determinations, as well as administrative savings, when compared to the current practice of administering divergent standards among differing circuit courts.

I commend these measures to all of my colleagues, and urge those on the Ways and Means Committee to consider the Social Security Procedural Improvement Act of 1993 as expeditiously as possible.

U.N. PEACEKEEPING—PART III

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 10, 1993

Mr. HAMILTON. Mr. Speaker, today I am submitting correspondence I received from the

State Department which includes the tentative forecast of the U.N. Security Council's program of work for November. As Ms. Sherman indicates, this program of work is subject to change. However, I believe this document provides useful information to Members interested in following the work of the Security Council.

I commend the administration for providing this information in an effort to keep Congress informed on the Security Council's work.

U.S. DEPARTMENT OF STATE,
Washington, DC, November 5, 1993.

HON. LEE H. HAMILTON,

Chairman, Committee on Foreign Affairs, House of Representatives, Washington, DC.

DEAR MR. CHAIRMAN, in accordance with the Administration's desire to keep the Congress informed of the work of the United Nations Security Council on peacekeeping operations, I am enclosing with this letter the tentative forecast of the program of work of the Security Council for November. This unofficial document is prepared by the U.N. Secretariat staff solely to assist the Council President and Members in planning the program of work for the month. As such it reports recent activities and forecasts what action may be required during the month.

We caution that the program of work of the Security Council is decided by the members and is subject to change at any time depending on circumstances. The forecast is thus only a reasoned estimate of future action. It is also worth mentioning that some items are listed by the Secretariat only as a reminder to the Members that the Council is still seized with them, but with no requirement that the item will be taken up by the Council.

Representatives from the State Department and the U.S. Mission to the U.N. will continue to convene briefings on Capitol Hill to discuss peacekeeping operations with Members and staff. Please feel free to contact us if you have questions or points to raise regarding these matters.

Sincerely,

WENDY R. SHERMAN,
Assistant Secretary,
Legislative Affairs.

TENTATIVE FORECAST OF THE PROGRAMME OF WORK OF THE SECURITY COUNCIL FOR THE MONTH OF NOVEMBER 1993

AFRICA

Angola

By resolution 864 (1993) of 16 September, the Security Council requested the Secretary-General to submit to it "as soon as the situation warrants, and in any case in good time before 1 November 1993 and again before 15 December 1993", a report on the situation in Angola and the implementation of that resolution.

The Secretary-General submitted his report on 27 October (S/26644). In this context, a draft presidential statement is being considered by the members.

Burundi

In a statement made by the President of the Council at the 3297th meeting on 25 October 1993, (S/26631) the Council requested the Secretary-General to monitor and follow closely the situation in Burundi, in close association with the Organization of African Unity (OAU), and to report to the Council thereon urgently. It also took note with appreciation of the dispatch by the Secretary-General of a Special Envoy to Burundi.

Libyan Arab Jamahiriya

On 13 August 1993, the Security Council, pursuant to paragraph 13 of resolution 748

(1992), reviewed the sanctions against Libya and concluded that there was no agreement that the necessary conditions existed for modification of the measures of sanctions established in paragraphs 3 to 7 of resolution 748 (1992) (S/26303).

In a tripartite declaration issued on 13 August 1993 (S/26304) by France, the United Kingdom and the United States, the three Governments asked the Secretary-General to take the necessary steps to achieve the full implementation by the Libyan Government of resolution 731 (1992) within 40 to 45 days. They also stated that if, by 1 October 1993, the Libyan Government had failed to comply with resolutions 731 (1992) and 748 (1992), they would table a resolution strengthening the sanctions in key oil-related, financial and technological areas.

In a letter dated 22 September 1993 to the Secretary-General (S/26500), Libya submitted a set of questions to be put to France, the United Kingdom and the United States, as well as to the members of the Security Council with a view to seeking a definitive clarification of the understanding that the three States have of resolution 731 (1992) and to obtaining a precise response thereto.

On 1 October 1993, a draft resolution, submitted by France, United Kingdom and United States, was circulated informally to Council members.

Mozambique

By resolution 863 (1993), adopted on 13 September 1993, the Security Council welcomed the Secretary-General's intention to send a survey team of experts in connection with the proposed UN police contingent and to report thereon to the Council. It also requested the Secretary-General to keep the Council informed of developments regarding the implementation of the provisions of the General Peace Agreement and to submit a report thereon in good time before 31 October 1993.

By resolution 879 (1993) of 29 October 1993, the Security Council decided, pending examination of the report of the Secretary-General due under resolution 863 (1993), to extend ONUMOZ's mandate for an interim period terminating on 5 November 1993.

Somalia

By resolution 814 (1993) of 26 March, the Security Council authorized the mandate for the expanded UNOSOM (UNOSOM II) for an initial period through 31 October 1993. It also decided to conduct a formal review of the progress towards accomplishing the purposes of resolution 814 (1993) no later than 31 October 1993.

By resolution 865 (1993) of 22 September, the Security Council requested the Secretary-General to direct the urgent preparation of a detailed plan setting out UNOSOM II's future concerted strategy with regard to humanitarian, political and security activities and to report thereon as soon as possible. It also requested the Secretary-General to keep the Council fully informed on a regular basis on the implementation of this resolution.

By resolution 878 (1993) of 29 October, the Security Council extended UNOSOM II's mandate for an interim period terminating on 18 November. It also requested the Secretary-General to submit a report concerning the further extension of UNOSOM II's mandate in good time before 18 November, in accordance with the request of the Secretary-General contained in his letter of 28 October 1993 (S/26663), to include recent developments in Somalia as well.

Western Sahara

It is the intention of the Secretary-General to submit a report during the second half of

November in pursuance of Security Council resolution 809 (1993). The report will include an update on the monitoring of the ceasefire, progress made in the work of the identification commission and a timetable for the registration process, further efforts concerning the interpretation and application of the criteria for vote eligibility and prospect for the holding of an early referendum.

AMERICAS

El Salvador

By resolution 832 (1993) of 27 May, the Security Council enlarged the mandate of the United Nations Observer Mission in El Salvador (ONUSAL) to include an electoral component for elections in spring 1994. It also decided that the enlarged mandate would be extended until 30 November 1993 and that it would be reviewed at that time on the basis of the recommendations to be presented by the Secretary-General. It further requested the Secretary-General to keep the Council fully informed of developments in the El Salvador peace process and to report on the operations of ONUSAL at the latest before the expiration of the new mandate period.

1. Commission on the Truth

In connection with the recommendations of the Truth Commission, the Secretary-General stated, in his report of 21 May 1993 (S/25812), his obligation to verify implementation of the Commission's recommendations and to report thereon at regular intervals to the Security Council.

The Secretary-General submitted his first report on the status of the implementation of the recommendations of the Truth Commission on 14 October 1993 (S/26581).

2. Electoral Process

Pursuant to resolution 832 (1993) of 27 May in which the Council requested the Secretary-General to keep it informed of further developments in the El Salvador Peace process and to report on the operations of ONUSAL, the Secretary-General, on 20 October, submitted his first report on the observations of the electoral process due to conclude with the general elections to be held in El Salvador in March 1994 (S/26606).

3. Human rights

By a * * * the Secretary-General transmitted a report of the Director of the Human Rights Division of the United Nations Observer Mission in El Salvador, covering the period from 1 May to 31 July 1993.

Haiti

In a statement made by the President at the 3301st meeting on 30 October 1993, the Council reaffirmed that the Governors Island Agreement remained fully in force as the only valid framework for the resolution of the crisis in Haiti, and expressed its readiness to strengthen the sanctions already in force if the military authorities continued to interrupt the democratic transition. In this regard, it requested the Secretary-General to report urgently to the Security Council (S/26668).

ASIA

Cambodia

By resolution 860 (1993) of 27 August, the Security Council approved withdrawal plans for UNTAC and confirmed that UNTAC's functions would end upon the creation in September of the new Cambodian Government. It also decided that, in order to ensure a safe and orderly withdrawal of the military component of UNTAC, the period of such withdrawal should end on 15 November 1993.

In a letter dated 12 October (S/26570) to the Secretary-General, the members of the

Council invited the Secretary-General to submit as soon as possible a further report setting out in greater details the proposed objectives and terms of reference of a team of 20 military liaison officers, together with detailed plans for its dispatch and an estimate of the resources required. They also invited the Secretary-General to consider and address the implications of the possibility of incorporating the officers in the United Nations office to be established in Cambodia. The Secretary-General submitted his report on 27 October 1993 (S/26649).

In response to a letter dated 28 October 1993 from the Secretary-General concerning the extension of deployment of certain categories of UNTAC military personnel and the extension of deployment of the existing members of the mine clearance and training units of UNTAC, a draft resolution has been circulated for consideration by the members.

Iraq

Review of Sanctions

Under resolution 687 (1991) and other relevant resolutions, the Security Council mandated itself to undertake reviews of the status of the sanctions and other procedures established by the Council in connection with the situation between Iraq and Kuwait.

Three of those reviews will fall due on 18 November 1993, as indicated below:

1. Paragraph 21 of resolution 687 (1991) (economic sanctions)

Under the above-mentioned paragraph, the Security Council is required to review every 60 days the provisions of paragraph 20 of that resolution in the light of the policies and practices of the Government of Iraq. The purpose of the review is to determine whether there are grounds for lifting or varying the prohibitions referred to in paragraph 20. The review will be the 16th in the series.

2. Paragraph 28 of resolution 687 (1991) (review of the Council's decisions in paragraphs 22 to 25)

Under the above-mentioned paragraph, the Security Council is required to review every 120 days the provisions set out in paragraphs 22, 23, 24 and 25 of that resolution. The forthcoming review will be the 8th in the series.

3. Paragraph 6 of resolution 700 (1991) (review of the guidelines to facilitate full implementation of paragraphs 24, 25 and 27 of resolution 687 (1991))

Under the above-mentioned paragraph, the Security Council decided to review the Guidelines for the implementation of the relevant provisions of resolution 687 (1991) at the same time as its regular reviews called for in paragraph 28 of that resolution. The forthcoming review will be the 8th in the series.

Tajikistan

In a statement made by the President, at the 3266th meeting on 21 August 1993 (S/26341), the Council welcomed the Secretary-General's proposal to extend the mandate of his Special Envoy until 31 October 1993 and to extend the tenure of United Nations officials in Tajikistan for a period of three months. The Council also looked forward to receiving periodic reports from the Secretary-General. In a letter dated 10 September 1993, the Secretary-General gave an account of contacts and efforts undertaken by him and by his Special Envoy. It is expected that the Secretary-General will submit another periodic report in early November.

In a letter dated 27 October 1993 to the President of the Council (S/26659), the Head of State of the Republic of Tajikistan requested a meeting of the Security Council to consider the continued tension on the Tajik-Afghan border.

MIDDLE EAST

Deportation of Palestinians: Pursuant to resolution 799 (1992), the Secretary-General submitted a report dated 25 January 1993 on the three missions undertaken by his representative to the Middle East (S/25149).

UNDOF

By resolution 860 (1993) of 26 May, the Security Council renewed the mandate of UNDOF for a period of six months, until 30 November 1993, and requested the Secretary-General to submit, at the end of this period, a report on developments in the situation and the measures taken to implement resolution 338 (1973).

EUROPE

Bosnia and Herzegovina

1. Massacre at Stupni Do

In a statement made by the President of the Council (S/26661), the members requested the Secretary-General to submit as soon as possible a complete report on the responsibility for the violations of international humanitarian law.

2. Safe areas

In resolution 844 (1993) of 18 June, the Security Council decided to authorize the reinforcement of UNPROFOR to meet the additional force requirements mentioned in paragraph 6 of the report of the Secretary-General (S/25939) and invited the Secretary-General to report to the Council on a regular basis on the implementation of resolutions 836 (1993) and 844 (1993).

3. Geneva talks

In a letter dated 23 September 1993, the Secretary-General transmitted a report by the Co-Chairmen of the Steering Committee of the International Conference on the Former Yugoslavia on the latest developments in the search for peace in Bosnia and Herzegovina (S/26486).

A follow-up report by the Co-Chairmen is expected.

4. Assassination of Deputy Prime Minister

In his statement of 8 January 1993, the President of the Council said that on receipt of the Secretary-General's report on the assassination of the Deputy Prime Minister of Bosnia and Herzegovina, the Council would "reconsider the matter forthwith".

Cyprus

By resolution 831 (1993) of 27 May 1993, the Security Council decided to conduct a comprehensive reassessment of UNFICYP at the time of reconsideration of the Force's mandate in December 1993. In that context, it requested the Secretary-General to submit a report one month before that assessment, to cover all aspects of the situation.

By resolution 839 (1993) of 11 June, the Council requested the Secretary-General to continue his mission of good offices, to keep the Security Council informed of the progress made and to submit a report on the implementation of the resolution by 15 November 1993 as part of the report called for in resolution 831 (1993).

In response to the Secretary-General's report on his mission of good offices in Cyprus dated 14 September 1993 (S/26438), the members of the Council expressed their continuing support for the Secretary-General's efforts and looked forward to receiving his report requested in resolution 831 (1993). On the basis of that report, the members of the Council will undertake a thorough review of the situation and, if necessary, consider alternative ways to promote the implementation of the resolution on Cyprus (S/26475).

Georgia

By resolution 858 (1993) of 24 August, the Security Council decided to establish a Unit-

ed Nations Observer Mission in Georgia (UNOMIG) and decided that "UNOMIG is established for a period of six months subject to the proviso that it will be extended beyond the initial 90 days only upon a review by the Council based on a report by the Secretary-General." It also requested the Secretary-General to report as appropriate, but in any event within three months, on the activities of UNOMIG.

In his report dated 7 October (S/26551), the Secretary-General gave a brief account of the initial effort to implement the mandate of UNOMIG and outlined the efforts to start a political process and the implications of the new situation which had arisen as a result of the collapse of the cease-fire and the ensuing military advances by the Abkhaz party. He also stated that he hoped to be in a position within two weeks to present recommendations to the Council relating to the future of UNOMIG and to the political aspects of the United Nations peace making role.

In a report dated 27 October 1993 (S/26646), the Secretary-General gave an account of the political efforts undertaken by his Special Envoy and the status of the mandate of UNOMIG, together with his recommendation for the continuation of the operation for three months. An addendum containing the financial implications of the operation will be submitted shortly (S/26646/Add.1).

In a letter dated 28 October 1993, the Permanent Representative of Sweden, in his capacity as representative of the Chairman-in-Office of the CSCE, transmitted informally a report of the CSCE mission to Georgia.

Nagorny Karabake

In resolution 874 (1993) of 14 October, the Council requested the Secretary-General, the Chairman-in-Office of the CSCE and the Chairman of the CSCE Minsk Conference to continue to report to the Council on the progress of the situation on the ground, and on present and future cooperation between the CSCE and the United Nations in this regard.

In letters of 26 October 1993 (S/26647), of 27 October (S/26650) and of 28 October (S/26662), Azerbaijan, Turkey and the Islamic Republic of Iran, respectively, requested an urgent meeting of the Security Council.

The Former Yugoslav Republic of Macedonia (FYROM)

In a letter to the Secretary-General of 6 October 1993, Mr. Cyrus Vance reported on his mission of good offices aimed at resolving the differences between Greece and the FYROM. He stated that the parties had agreed to defer further direct talks until a new Greek Government had been formed and that the new Parliament was scheduled to convene on or about 23 October. Consequently, he added that he was ready to assist the two sides to resume direct discussions on a continuous basis if and when it proved feasible.

OTHER MATTERS

ICJ Elections

By a note dated 27 September 1993 (S/26490), the Secretary-General stated that a communication dated 2 March 1993 was addressed to the States parties to the Statute of the International Court of Justice, drawing attention to the fact that the terms of office of five current members of the ICJ would expire on 5 February 1994.

In conformity with articles 4 and 13 of the Statute of the Court, the General Assembly and the Security Council during the 48th session of the General Assembly will elect five judges for a period of nine years, beginning on 5 February 1994.

The election in the General Assembly and the Security Council is scheduled for 10 November 1993.

Agenda for Peace

1. Regional arrangements and organizations

On 28 June, pursuant to the Presidential statement of 28 January (S/25184), the Secretary-General submitted a report concerning the replies received from regional arrangements and organizations (S/25996 and Corr. 1 and Add. 1-4).

2. Arrangements under Article 50 of the Charter

Pursuant to the Presidential statement of 30 December 1992 (S/25036), the Secretary-General will report to the Council on the question of special economic problems of States as a result of sanctions imposed under Chapter VII of the Charter.

3. New approaches to peace-keeping operations

Pursuant to the Presidential statement of 28 May 1993 (S/25859) the Secretary-General will submit a report to the Council.

KEY DOCUMENTS PROVE INNOCENCE OF JOSEPH OCCHIPINTI

HON. JAMES A. TRAFICANT, JR.

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 10, 1993

Mr. TRAFICANT. Mr. Speaker, as part of my continuing efforts to bring to light all the facts in the case of former Immigration and Naturalization Service agent Joseph Occhipinti, I submit into the RECORD additional key evidence in this case.

EXHIBIT E—AFFIDAVIT

1. I have been voluntarily working as an undercover agent for Staten Island Borough president Guy V. Molinari in order to prove the existence of a drug cartel conspiracy against former Immigration & Naturalization Service Officer Joseph Occhipinti, which resulted in his conviction for civil rights violations. This affidavit is the third affidavit I have executed which outlines the important results of my undercover investigation.

2. On or about April 15, 1992, I agreed to make busy of gambling Bolitas from various bodegas owned by the various government complainants who testified against Mr. Occhipinti. The purpose of the buys was to demonstrate to New York Post Reporter Miguel Garcilazo that these very same complainants who portrayed themselves as law abiding, were still involved in criminal activity. I was given the buy money from the New York Post and my conversations with the bodega employees were consensually monitored. The investigation resulted in busy of gambling bolitas being made from the following Bodegas. The bolitas were turned over to New York post reporter Garcilazo: (A) Crucey Grocery, 3882 Broadway, New York, New York; (B) Liranzo Grocery, 383 Audobon Avenue, New York, New York; (C) Johnny & Ray Grocery, 4167 Broadway, New York, New York; (D) Yeya Grocery, 1608 St. Nicholas Avenue, New York, New York; (E) Medina Grovery, 1502 St. Nicholas Avenue, New York, New York; and (F) J & M. Grocery, 275 Wadsworth Avenue, New York, New York.

CRUCEY GROCERY

3. On April 25, 1992, I went to the Crucey Grocery Store to meet with Agustin Crucey

and his associates to discuss the purchase of cocaine. I met "Freddy" who I previously identified as a drug associate to Agustin Crucey. Freddy told me that Agustin and Guondoles were out on an errand.

4. On or about May 9, 1992, I again met government complainant Agustin Crucey at the Crucey Grocery to further discuss the purchase of cocaine. I had portrayed myself as a local drug dealer interested in a new drug source. Agustin reconfirmed his interest in selling me cocaine. In fact, despite the shortage of cocaine in the streets, Agustin offered to sell me a kilogram of cocaine for \$27,000. Agustin agreed to introduce me to his drug source. I have formally advised the FBI of Agustin Crucey's drug trafficking activity and my interest in working for them as a confidential informant in order to help prove Mr. Occhipinti's innocence. However, the FBI has not yet contacted me. I also engaged Agustin Crucey into conversation about Mr. Occhipinti's case, however, Agustin Crucey told me that his "attorney" told him not to discuss the case. The conversation with Agustin Crucey was consensually monitored.

5. On June 6, 1992, I went to the Studio 84 Night Club with Agustin Crucey and Guondoles. I explained to them the fact I had set up drug operations in New Jersey and was interested in them (Agustin and Guondoles) as being the new source of my cocaine. As before, they agreed to sell me a kilogram of cocaine for \$27,000 and they would actually deliver the cocaine to New Jersey. I was given a sample package of cocaine from Guondoles after Agustin told him to do so. They also admitted to me that they store their drugs in an apartment on West 160th Street in Manhattan. The sample cocaine was turned over to investigators from Staten Island Borough President Guy V. Molinari's office. The conversation was not tape recorded because everyone who enters the Studio 84 Night Club is searched.

YEVA GROCERY

6. On or about April 28, 1992, I had a conversation with the brother of complainant Jose Elias Taveras. The conversation took place at Concourse Auto Repair located at 245 East 138th Street, Bronx, New York, which is owned by Jose Elias Taveras. The brother, who did not tell me his first name, admitted to me and others that his brother (Jose Elias Taveras) had intentionally perjured himself against Mr. Occhipinti in order to set him up.

EXHIBIT F—AFFIDAVIT

Marino Reyes, being duly sworn deposes and states:

(1) I am the owner of the Jose Grocery store located at 66-72 Fort Washington Avenue, New York, New York.

(2) On or about October 1992, I met with Jose Liberato at his grocery store at West 163rd Street and Broadway, New York, New York in order to buy platanos for my store. At that time, we were discussing the case of the former Immigration Officer Joseph Occhipinti. Liberato told me that he had to work hard in finding witnesses to falsely testify against Occhipinti. Liberato said he did this because Occhipinti was hurting his operation. I have personal knowledge that Liberato is involved in illegal gambling, loan sharking and food stamp (Wick Program) fraud. I am willing to cooperate with authorities to prove these crimes.

EXHIBIT G—AFFIDAVIT

I, Victoria Lopez, hereby certify that I am an adult over 21 years of age and a resident of the City of New York.

On or about the last week of March of 1990 I was returning from 181st Street where I had just finished paying my Con Edison light Bill when I went to Liberato's Bodega located on Audubon Ave. While at the checkout counter and within a few feet of the owner Mr. Jose Liberato, I overheard a conversation he was having with another individual.

I remember the conversation vividly because of the emotion and energy which was shown by Mr. Liberato. I heard him say that he was going to find people to make declarations against the federal agent that had gone to his business, and that he was going to have them lie about their encounter with the agent so that he would never come out of jail. He also boasted of having a lot of money and that he was going to put the agent behind bars no matter the cost.

On or about December 18, 1991 I became aware that Mr. Liberato had accused Immigration Agent Occhipinti of having violated his rights and I knew that this is what he was talking about on that previous occasion.

I make these declarations of my own free will and without threat or coercion.

EXHIBIT H—AFFIDAVIT

William Franz, being duly sworn, deposes and says:

1. I am Executive Assistant to the Hon. Guy V. Molinari, Borough President of Staten Island, New York.

2. I make this affidavit in support of the motion of Joseph Occhipinti for a new trial.

3. On June 10, 1992 I received an audio tape from a confidential source known to me which purports to contain two conversations had on June 3, 1992 and June 4, 1992 between the said confidential source and a Radames Liberato.

4. The confidential source also provided a handwritten translation of the said conversations, copies of which are annexed hereto and made a part hereof. The audio tapes in question are kept in the Office of the Borough President of Staten Island and are available as directed by the Court.

5. In the first of the two conversations, the source claims that Radames Liberato offered to sell a kilogram of cocaine for \$29,000 or a half kilo for \$18,500. In the same conversation the source claims that Liberato is supplied with cocaine by his brother Jose Liberato. He offers to sell from one to ten kilograms and states that it can be bought at the Medina Grocery Store.

6. In the second conversation with Radames Liberato the source claims that Liberato said that he and two others had "taken care of" an agent. He identified them as Radames and Jose Liberato and Elias Taveras.

THE NORTH AMERICAN FREE-TRADE AGREEMENT

HON. NORMAN D. DICKS

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 10, 1993

Mr. DICKS. Mr. Speaker, I rise to announce my support for legislation to implement the North American Free-Trade Agreement.

I fully appreciate the very strongly held convictions of those who sincerely oppose this agreement. They include organizations that I have repeatedly supported on a wide range of legislative controversies. I have withheld a commitment on this issue so that I could fully

and carefully consider the very serious arguments raised by the opponents as well as the proponents of the treaty. After weighing all the factors, I must conclude that proceeding with the North American Free-Trade Agreement is in the best interest of the American people and important for our future economic well being.

I share the anger and deep frustration that working men and women have expressed about the repeated announcements of plant closings and massive layoffs. More than 300,000 manufacturing workers have lost their jobs in the last year alone. Corporate leadership in this Nation has been callous to the human costs of economic streamlining. I am obviously ashamed of the conditions that employees in the Maquiladora region must endure. In this environment it is not difficult to understand why workers don't trust employers' assurances that their jobs are not threatened.

If I could be convinced that defeating the NAFTA would stop layoffs, that it would end offshore relocation, and that it would make businesses more enlightened toward the long-term benefits of fair treatment of their workers, I would be first in line to help defeat it. But these problems exist today, and they will continue to exist with or without this agreement. It is my judgment that the labor movement, out of sheer desperation, has targeted the wrong referendum.

The truth is that this agreement transforms the virtual free-trade situation that already exists on goods flowing from Mexico to the United States into a two-way street. Tariffs on goods coming into the United States from Mexico average about four percent at this time, while the Mexican Government levies an average tariff of 10 percent on American goods sold in Mexico. This 2.5-to-1 ratio is magnified in some critical sectors of the marketplace, in which Mexican tariffs are as much as 10 times United States levels. NAFTA also eliminates many of the import restrictions that have forced companies, especially in the automotive field, to locate production facilities in Mexico.

This two-way street is best for both Nations in the long-term. The Mexican Government has recognized that to achieve real economic growth in the longer term, it is important to encourage free and open trade that may involve some short term costs. Even without NAFTA, Mexico ran a \$7.5 billion manufacturing trade deficit with the United States in 1992. This trade is not just equipment to manufacture items for sale into the United States, as some have contended. In fact, 82 percent of the United States export growth from 1987 to 1992 was for Mexican consumption, whereas only 17 percent of the growth was comprised of components for goods exported back to the United States. This growth has taken place because Mexico, despite its real problem of disparity of wealth, has become a major economic market force. And even though the wealth in Mexico is not distributed as equitably as many of us would like, one-quarter to one-third of the population in Mexico still has relatively high real incomes, creating a market nearly the size of Canada's. This is a growing portion of the population, and it will only be encouraged by NAFTA. The bottom line is that the Mexican Government recognizes that world economics is not a zero sum game.

Trade with Mexico is already providing considerable benefit to the State of Washington, where merchandise exports have risen from \$83 million in 1987 to \$565 million in 1992, placing us fifth in the Nation in percentage growth of Mexican trade. Increased protection in the treaty for intellectual property is a key element for expanded trade in the growing software industry in our State and the Boeing Co. has estimated that the commercial aircraft market with Mexico will increase 25 percent by 2010 to about \$10 billion. Mexico has now become the third largest market for American forest products. Overall, the favorable balance of trade for the State of Washington with Mexico is better than 25-to-1.

Highly emotional debate has centered around the jobs impact of NAFTA. While it is impossible to predict with precision how many jobs may be affected, and where they may be affected, the overwhelming majority of studies conducted by objective organizations has indicated a net gain of well paying jobs as a result of the agreement. Overall, the direct economic impact is almost certain to be less than either its proponents or opponents, in a game of rhetorical escalation, now claim.

Clearly, the agreement is not flawless. It is probably impossible to develop an agreement between two sovereign nations that would be fully satisfactory to both. We need to work to assure that Mexican workers receive a fair return on their contribution to items they produce. We need to work with the Mexicans to improve the deplorable environmental and working conditions along our border.

Some believe that by rejecting this agreement we can expeditiously renegotiate an agreement with Mexico that will better address these issues. I am now convinced that the opposite is far more likely. I believe that the rejection of the agreement will set back mutual cooperation, will provide no incentive for Mexico to address these issues, and will provoke a new round of attempts to entice American firms to relocate in Mexico, while maintaining or increasing the current barriers to United States exports. On the other hand, I think the side agreements on labor and the environment, while not all we might want, provide a forum to promote progress in these areas that would not otherwise exist.

No trade agreement can be expected to address all the troubling issues of transitioning to global economic competition. With or without NAFTA, companies can still choose to relocate to Mexico—although it is interesting to note recent decisions by Raytheon, GM, and many small firms who earlier relocated and who now are coming back to the United States. Low-wage competition from other areas of Latin America and Asia will continue to challenge our economy. And our competitors, especially the Japanese, are still going to try to secure agreements around the world that will benefit themselves, at our expense.

But while the direct substance of the NAFTA is small in the overall economic scheme, its symbolism with respect to the course this Nation takes in future trade policy has become immense as this debate has unfolded. As the New Republic¹ forcefully stated:

As much as any event since the communist collapse, the vote on NAFTA could define

America's post-cold war identity. The nation's long-run economic health, its geopolitical reach, even its moral character, are very much at stake here. The defeat of NAFTA would be the first step in precisely the wrong direction—an America looking inward rather than outward, governed by fear rather than reason—and could make turning back difficult.

With the end of the cold war, the United States has just prevailed in the third major war of this century. After each of these triumphs we faced a fundamental decision on whether we would remain active in world affairs or crawl into a false cocoon of isolationism. After the First World War we decided to "Return to Normalcy" in a nostalgic effort to turn back the clock. We rejected entry into the League of Nations and instituted a protectionist economic policy. After a short boom, the result was the Great Depression and the rise of fascism.

After the Second World War, there was strong sentiment to focus on the homefront and withdraw from world responsibility. But with strong leadership from Harry Truman, the Marshall Plan and the Truman Doctrine were approved, leading the way for economic revival and the triumph of democracy.

We now find ourselves at a similar crossroads. It is naive to think that by denying world realities we can somehow return to a nostalgic past. The simple fact of the matter is we can and must compete in the real world. There is no going back.

We have critically important trade issues to resolve including the GATT process, in which we are trying to end foreign subsidies that undercut international sale of American products ranging from agriculture to aircraft. The leaders of the Pacific rim will soon meet in Seattle for the annual APEC conference to discuss the future of the massive Asian trade. Our leadership and leverage in these negotiations would be dramatically undercut if NAFTA were defeated.

President Clinton put it well when he posed the challenge in his inaugural address to squarely face the reality of global economic competition and to resist the temptation to put our heads in the sand and resort to a doomed effort at economic isolationism. I am confident that we can compete in the global market and provide well-paying, rewarding jobs for our people while mutually increasing economic well being. I have seen the people of Washington State take on this task and win.

In the final analysis, the NAFTA is a modest, but significant step in the right direction. Its rejection would be a fateful retreat from world leadership. That is why it has my wholehearted support.

REPORT OF THE SIXTH ANNUAL
CONGRESSIONAL BLACK CAUCUS
VETERANS BRAINTRUST HEARING

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 10, 1993

Mr. RANGEL. Mr. Speaker, I rise to present for the edification of my colleagues a report on the sixth annual Congressional Black Caucus

[CBC] veterans braintrust held in conjunction with the CBC legislative weekend, September 15, 16, and 17, 1993. The veterans braintrust was cosponsored by me and my colleagues, Representatives SANFORD BISHOP of Georgia, and CORINNE BROWN of Florida.

Veterans braintrust activities included workshops on post-traumatic stress—its impact on individuals and the community, and homelessness, and affordable housing development.

The theme of the veterans braintrust hearing was health care issues facing African-American veterans.

As the health problems of the African-American community grow, it is imperative to have more research, preventive medical procedures and quality health care services in that community. With respect to African-American veterans, the health problems are magnified.

African-American veterans and their families make up one-third of the Nation's African-American population and 17 percent of the total post Vietnam veteran population. This population of African-American veterans comprise 50 to 60 percent of the homeless veteran population.

Studies show that African-American veterans suffer at a disproportionate rate from tuberculosis, diabetes, heart disease, respiratory disease, substance abuse, cancer, AIDS, post traumatic stress disorder, and other mental illnesses.

Furthermore, African-American Vietnam veterans suffer an unemployment rate three times higher than most veterans of Vietnam. And where there is high unemployment and homelessness, health concerns prevail.

To address some of these concerns experts in the field were invited to testify.

The Honorable Jesse Brown, Secretary of the Department of Veterans Affairs—DVA—was the key witness. Secretary Brown's testimony focused on the services provided by DVA and putting veterans first. He talked of the successes of DVA and acknowledged areas that needed improvement.

Secretary Brown was followed by three panels. The first panel included professionals in the area of health care: Dr. Westley Clark, Fort Miley Medical Center, San Francisco, CA; Dr. Billy E. Jones, New York City Health and Hospitals Corp., New York City; and Dr. James Jones, Department of History, University of Houston, Houston, TX.

The second panel included representatives from the veterans service organizations who covered services available from those organizations and how they interact with all veterans. Of particular concern to the Members of Congress was the perception among African-American veterans that they were not welcomed by the veterans service organizations. Congressman RANGEL and others requested that more outreach efforts from the veterans service organizations be launched. Representatives from the veterans service organizations to testify included: Mr. William Bradshaw of the Veterans of Foreign Wars, Washington, DC; Mr. George C. Duggins of the Vietnam Veterans of America, Washington, DC; Mr. Dave Gorman of the Disabled Veterans of America, Washington, DC; Mr. Terry Grandison of the Paralyzed Veterans of America, Washington, DC; Ms. Muarine Hill, past State Commander of the Maryland Disabled

¹The New Republic, October 11, 1993.

Veterans of America; and Mr. John Vitkacs of the American Legion, Washington, DC.

The third panel included representatives from the DVA, who discussed the services provided by DVA, including the status of activities within the newly established Office of Minority Affairs that was created to deal with concerns of minority veterans. Critical testimony included a discussion by Dr. Susan Mather, Assistant Chief Medical Director for Environmental Medicine and Public Health, DVA on the status of health care services provided to women veterans: Women make up 4 percent of the veteran population. Of the 199,023 women serving in the military now, 61,023 (30 percent) are African-American.

Representatives from the DVA to testify included: Dr. Victor Raymond, Assistant Secretary for Policy and Planning, and the Chief, Minority Affairs Office, DVA; Dr. Susan Mather, Assistant Chief Medical Director for Environmental Medicine and Public Health, DVA; Dr. David Law, Acting Associate Deputy Chief Medical Director for Clinical Programs, DVA.

Following the hearing, Representatives RANGEL and BISHOP presented certificates of appreciation to 18 of the Congressional Veterans braintrust members for their outstanding service: Mr. Ronald Armstead, HVRD Director, Veterans Benefits Clearinghouse, Inc., Boston, MA; Mr. Ernest Branch, Executive Director, Veterans Benefits Clearinghouse, Inc., Boston, MA; Ms. Femi Brown, Adult Center Manager, Opa Locka Senior Focal Point/Elderly Services, Opa Locka, FL; Mr. Jeffries Cary, Black Veterans of All Wars, Baltimore, MD; Mr. Eric Glaude, Harlem Veterans Center, New York, NY; Mr. Mike Handy, Director, Office of Veterans Affairs, New York, NY; Mr. Anthony Hawkins, Congressional Relations Officer, Department of Veterans Affairs, Washington, DC; Col. Solomon Jamerson, (retired), Los Angeles, CA; Ms. Lane Knox, Women Veterans of the U.S. Armed Forces, Chicago, IL; Mr. Maceo May, Director of Housing, Swords to Plowshares, San Francisco, CA; Comdr. Carlton Philpot, Buffalo Soldier Monument Committee, Fort Leavenworth, KS; Mr. Clyde Poag, Team Leader, Veterans Center, Grand Rapids, MI; Ms. Gloria Reid, Clinical Coordinator, Veterans Center, Richmond, VA; Ms. Pamela Jo Sargent, National Association for Black Veterans, Milwaukee, WI; Mr. Wilson Smith, Jr., Afro-American Medal of Honor Memorial Association, Wilmington, DE; Mr. Ernest E. Washington, Jr., Mattapan, MA; Ms. Joanne Williams, Chicago Vietnam Veterans and Families Assistance Program, Chicago, IL; and Ms. Ruth Young, New York Coalition for Fairness to Veterans, New York, NY.

SECURITIES REGULATORY
EQUALITY ACT OF 1993

HON. JOHN D. DINGELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 10, 1993

Mr. DINGELL. Mr. Speaker, last week Mr. MOORHEAD, Mr. MARKEY, Mr. FIELDS, and I introduced H.R. 3447, the Securities Regulatory Equality Act of 1993 to amend the Federal se-

curities laws to equalize the regulatory treatment of participants in the securities industry. I am authorized to say on their behalf that the leadership of the Committee on Energy and Commerce intends that this legislation provide a strong and responsible framework for functional regulation to strengthen taxpayer and investor protections in the wake of recent decisions allowing banks to expand their securities activities. This legislation is a priority.

On October 19, Mr. GONZALEZ, chairman of the Committee on Banking, and Mr. SCHUMER, chairman of that committee's Democratic Caucus, introduced H.R. 3306, the Depository Institution Retail Investment Sales and Disclosure Act. Chairman GONZALEZ's floor statement noted that:

Although some Federal banking agencies have issued guidelines regarding sales of uninsured products, this legislation would go further to protect consumers from misleading and deceptive sales practices. Our bill would ensure that not only will banks be required to follow the SEC's rules for brokers and dealers, but also that they take into account the special risks of unsophisticated customers. This bill is designed to protect the vulnerable customer from unsafe and unsound tactics we have seen used in previous scandals.

Notwithstanding my grave jurisdictional and substantive concerns about certain provisions of H.R. 3306, I wholeheartedly support that bill's objectives and have asked Chairman GONZALEZ that I be listed as a cosponsor of his bill. I firmly believe that H.R. 3306 can be perfected, and this committee's concerns resolved when that bill is referred to us. I am committed to working diligently for its speedy passage.

Mr. Speaker, H.R. 3447 is an important and necessary corollary to the Banking Committee bill. Ideally, the two bills should be joined together as extraordinarily strong procompetition and proconsumer legislation.

Our bill would require banks engaging in securities activities to place those activities in a separate affiliate, which would register with the Securities and Exchange Commission [SEC] as a broker-dealer and be subject to securities laws and regulations just like any other participant in the securities business. It would also repeal anachronistic exemptions from SEC registration and reporting available to banks.

In 1933, when the Federal securities laws and the National Banking Act were passed, the National Banking Act excluded banks from the securities business, with the exception of certain very limited activity incidental to the banks' traditional trust activities. Therefore, regulatory coverage of banks under the Federal securities laws was deemed unnecessary, with the exception of the antifraud provisions. Erosion of the legal barriers between the two industries has rendered this lack of regulatory coverage contrary to the public interest.

Starting in 1987, the Federal Reserve Board [FRB] has issued a series of orders authorizing 31 parent bank holding companies, domestic and foreign—a list as of October 25, 1993 follows my statement—to conduct a full range of securities underwriting in separate affiliates, so-called section 20 subsidiaries, of the holding company, subject to certain conditions which include a 10-percent limit on revenues, firewalls to assure against conflicts of in-

terest, and other potential adverse effects to the institutions, to the financial safety net and to taxpayers, as well as a requirement that the affiliates be SEC-registered and -regulated broker-dealers. As such, the FRB is responsible for regulation and inspections of the bank holding company as a whole with respect to systemic risk, safety and soundness, and compliance with the firewalls, while the SEC is responsible for regulation and inspections with respect to compliance with the Federal securities laws.

By contrast, the Comptroller of the Currency has approved a broad range of securities activities—an updated list follows my statement—that may be conducted directly by and in national banks—with no separation, no securities capital, no firewalls, and no sales practice rules or other investor protections under the Federal securities laws. This regulatory vacuum is in contrast to the regulatory schemes for bank municipal securities and Government securities activities, which are regulated, respectively, under sections 15 (b) and (c) of the Securities Exchange Act of 1934. Irrespective of whether comprehensive financial services reform occurs in the immediate future, we must recognize that the securities powers granted administratively by the banking regulators require the immediate imposition of statutory safeguards to avert harm to investors and cost to taxpayers. The current patchwork quilt presents a clear and present danger to the American public.

The impromptu and inconsistent acts of the regulators have been at odds with sound public policy and have needlessly exposed our system of Federal deposit insurance to additional risks. By allowing certain securities activities to be conducted within the depository institution, they have in effect exposed the bank—and, by extension, the insurance fund—to the risks of the securities business. Moreover, bank regulators have recently compounded this problem by permitting bank-advised mutual funds to share the same name as their affiliated banks. As millions of Americans—1 in 4 American households owns shares in a mutual fund—pour money into mutual funds at a record rate, nearly \$1 billion a day, bringing their total assets to approximately \$2 trillion at the end of last month, and as banks constitute the channel for sales and distribution of up to 50 percent of mutual funds, the status quo—of seemingly insured investments—has become unacceptably risky to the American public.

Although banks have dramatically expanded their brokerage and investment advisory activities, the SEC is presently powerless to regulate them as either broker-dealers or investment advisers. Right now, banks do not have to register as such with the SEC if they engage in brokerage activities or provide investment advice to customers. They also are exempted from the registration and reporting requirements of the Federal securities laws when they offer their own securities to the public. Finally, they are not subject to the sales practice rules that are critical to the protection of investors. Clearly, the securities activities of banks fall between the cracks in our regulatory system. That is of particular concern when taxpayers confront a \$150 to \$175 billion tab for the savings and loan crisis, thanks largely to inadequate regulation.

The lack of proper regulation not only causes substantial potential regulatory disparities, but presents grave potential danger to investors, who may well assume that a security sold to them by a bank is federally insured. Our bill addresses the investor protection concerns currently posed by unregulated bank sales of securities to the public. Our bill will close the regulatory gap that currently exists, to the detriment of the American public. It is our hope that we avoid another S&L-type debacle where regulatory failure costs the public so dearly.

I encourage my colleagues to support this legislation when we bring it to the floor of the House.

I had intended to include with this statement the list of 31 section 20 subsidiaries of bank holding companies approved by the Federal Reserve and the list of securities activities approved by the Office of the Comptroller of the Currency for national banks, consisting of 4 activities approved by regulation or order, 19 activities approved by interpretation or approval, and an update of 10 activities approved by interpretation or approval since 1991. I strongly believe that this information should be a part of the public record. However, I have been advised by the office of the Public Printer at GPO that this information would contravene their guidelines for the printing of extraneous matter. Therefore, I am submitting my statement this week without this important information; the complete statement—as submitted on November 4, 1993 with these lists may be obtained by contacting the committee's offices.

NAFTA IS A SWINDLE

HON. MAJOR R. OWENS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 10, 1993

Mr. OWENS. Mr. Speaker, NAFTA represents an unfortunate continuation of the disastrous trickle down economics of George Bush and Ronald Reagan. NAFTA will assist the rich in their quest to get richer. But NAFTA is a swindle for the workers of America and for the majority of the American people. Not only will we lose thousands of manufacturing jobs if NAFTA is passed, we will also lose plants and other enterprises that are vital for the tax bases of our communities. NAFTA will impoverish large areas of America. The lure of slave labor wages will eventually entice even the most reluctant factory owners. Free trade becomes a swindle when two societies are as different as the United States and Mexico. It is dangerous to mix economies when the wage structures, the political systems, the physical environments, and the overall standards of living are so incompatible. The European Common Market works for all of the citizens of all of the countries because Europe has insisted on this environmental, political, and wage compatibility. NAFTA will facilitate gross exploitation of American workers and Mexican workers. Rich Americans and rich Mexicans will dictate the terms for employment. Goods manufactured at very low costs will be sold in the U.S. market at the highest possible prices.

NAFTA is a swindle. In ordinary street language NAFTA is a "hustle".

NAFTA IS A HUSTLE

Buy the Brooklyn bridge
And watch the economy grow
To make a hustle
Who needs Mexico
After NAFTA
I got a bridge to sell
My thing got more appeal
Cause painted steel
Looks solid and so swell
After NAFTA
Factories will stray
Kidnapping the few jobs
That didn't yet run away
After NAFTA
Grant me a special order
In the House well
I got a bridge to sell
Treat us hustlers equal
My thing has more appeal
My tangible bridge asset
Is the better capitalist bet
To make a hustle
Who needs Mexico
Keep the swindle
In the family
Deal in America
The old fashion way
Save the few jobs
That didn't yet run away
After NAFTA
I got a bridge to sell
My stable product has been
Negotiated many times
Mexico is fiscal quicksand
But bridge property
Is always in demand
Buy the Brooklyn bridge
And watch the economy grow
To make a hustle
Who needs Mexico

THE NORTH AMERICAN FREE-TRADE AGREEMENT

HON. TIM VALENTINE

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 10, 1993

Mr. VALENTINE. Mr. Speaker, next week, the House of Representatives will consider the North American Free-Trade Agreement. The decision we make could have far-reaching effects on our economy, our ability to compete in the global marketplace, and most important, the future of American workers and their families.

I intend to vote for the North American Free-Trade Agreement.

NAFTA will lay the foundation for continued growth in exports of American goods and services to our largest and most accessible markets—Canada and Mexico. The removal of trade barriers in North America will free American workers and companies from artificial constraints and allow them to reap the benefits of their productivity and competitiveness.

But there is much more at stake than our ability to trade freely north and south of our borders. By passing NAFTA, we are creating the world's largest and most lucrative marketplace. Our ability to compete with trading blocks in Europe and Asia is greatly enhanced. Economic growth through exports means financial security for our country.

Failure to pass NAFTA, on the other hand, will open the door of opportunity for our European and Asian competitors. Mexico is ready to take on trade partners. Japan and Europe are willing suitors just waiting for and opportunity. We cannot afford to stand behind outdated trade barriers while the rest of the world expands the free flow of goods.

All of us are aware of the criticisms that have been leveled at NAFTA. The critics are playing on fears of an uncertain future. They are fueling the fears of economic pain. But the plagues that the critics predict if NAFTA passes—job losses, environmental degradation, unfair labor standards—all exist today without NAFTA.

In fact, in many cases, the dangers we face if we do not approve NAFTA are even greater than the ones predicted with its passage. Without NAFTA, Mexico has no incentive to improve its environmental protection. Mexico has no incentive to enforce humane labor standards. Without NAFTA, many American businesses will have no choice but to move south if they want to tap into the fastest growing marketplace in the western hemisphere. With NAFTA, we gain access to a vital new market, we assure cooperation—not competition—with our neighbors, and we provide Mexico with the incentive to address the very concerns that worry us the most.

Put simply, we have much more to fear without NAFTA than we do with NAFTA.

Trade debates are nothing new in this country. Spirited, and even bitter, discussions about tariffs and trade policy have divided Americans since the earliest days of the Republic. From the time that New England manufacturers and Southern planters squared off over tariff policy in the 1780's, perhaps no single issue has been so persistently at the center of our Nation's economic and political conflicts.

While we continue our debate, the rest of the world is moving inexorably toward greater economic integration through freer trade. Standing against that tide will only cut us off from the opportunities that are essential if we are to prosper in the coming century. Rather than leaving the trade battle, we must lead it.

There will always be legitimate concerns about any trade agreement, and legitimate grounds to oppose trade agreements. But, as hard as we may wish for it, we will never achieve a risk-free agreement that protects all American interests.

In my mind, NAFTA is not a perfect agreement. I am tempted by the arguments of those who would hold out for something better.

But I have concluded that it is unlikely that we could produce another agreement, at least in the near future. It is more likely that our place will be quickly taken by one or more of our economic competitors. In any case, the opportunity lost is an opportunity gained for Europe, Japan, and other Asian countries who are making steady progress toward building their economic markets.

In the final analysis, I must be guided by the interests of the people I represent. There are almost as many opinions on that issue as there are individual North Carolinians, but I believe that NAFTA will be good for my State.

Since 1987, North Carolina's merchandise exports to Mexico have grown by 365 percent.

In 1991 alone, North Carolina exported \$2.2 billion in goods to Mexico and Canada. Perhaps the most important, 57,000 North Carolina jobs are supported by manufactured exports to our North American neighbors, and the State, according to some estimates, will reap a net gain of over 1,300 new jobs if NAFTA is implemented.

North Carolina and the Nation cannot afford to turn our backs on NAFTA. We cannot afford to pass up the opportunity for measurable improvements in Mexico's environmental and labor policies just because the agreement does not solve all the problems in these areas. We cannot afford to turn our backs on a good agreement because of the vague, and surely illusory, promise of a perfect agreement. Finally, we cannot afford to let fear of an uncertain future paralyze us from action. Time, and our competitors march on.

The North American Free-Trade Agreement will be good for the United States in the long term. I will vote for it, and I urge my colleagues in the House to support it.

TRIBUTE TO DR. JAMES O.
DENNEY

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 10, 1993

Mr. BROWN of California. Mr. Speaker, on Sunday, November 7, 1993, Dr. James O. Denney, a member of my staff, and a former science fellow in my office, passed away after a sudden and brief illness. Memorial services were held at St. Mark's Episcopal Church on Wednesday, November 10, 1993.

The sudden death of an associate, a friend, a relative, is a cause for all of us to re-examine our own lives—to ask ourselves if we are truly aimed at doing the Lord's work on Earth.

Jim's death demands even more of us, for he was a unique person. He had the most creative and important years of his life before him and he was a link between many diverse communities.

Jim was devoted to the goal of creating bonds of understanding between these diverse communities of which he was a part. In the role in which many of us knew him best, as a science fellow, Jim was primarily a link between the academic and scientific community and the political community, a role he performed with excellence. He brought to this role his own deep concerns for environmental protection, sustainable agriculture, and arid lands research, all of which I shared. He also earned the respect of the diverse constituencies with which he worked on these issues, environmentalists, business, labor, farmers, and others. His last major assignment, participating in a national conference on health and the environment, drew praise from the organizers and participants in that conference.

Jim was also a linguist, fluent in Arabic and Spanish, among other languages and with considerable experience living in the culture of the Middle East. Language is of course the greatest link between cultures, and I had been planning with Jim a major effort to join the United States and Arab Nations in joint re-

search on arid lands agricultural problems, a subject of preeminent interest to the American Southwest. Jim was an authority on such matters, and could have been internationally noted as a link between our cultures.

Those who serve as the links between cultures, social systems, divergent groups of all kinds, have a special mission. That mission is to create understanding, to lessen conflict, to bring peace. They deserve a special blessing, as the Bible says, yet all too often they are condemned because they are messengers of change. For me, Jim Denney was a blessing. I give praise for all that he did to bring peace and understanding through his life.

Dr. Denney's obituary appeared in the Washington Post on November 10, 1993, and is reprinted here:

James Osborne Denney, 46, a legislative assistant for environment and agriculture in the Office of Representative George E. Brown, Jr. (D-CA), died Nov. 7 at George Washington University Hospital after a stroke.

Dr. Denney, who lived in Washington, was born in Pineville, Ky. He graduated from Rice University. He received a master's degree in horticulture from Texas A&M University and one in linguistics from the University of Texas at Austin.

He was fluent in Arabic and in 1985 worked as a horticultural consultant at the King Khaled International Airport in Riyadh, Saudi Arabia.

In 1992 he received a doctorate in plant physiology from the University of California at Davis. He also had studied at the American University in Cairo.

In 1992, Dr. Denney came to Washington on a congressional Science Fellowship of the American Society for Horticultural Science and was assigned to Brown's congressional office. On the completion of his fellowship, he became a legislative assistant.

Survivors include his father, Glenn E. Denney, and his stepmother, Marion C. Denney, both of San Antonio.

THE HEALTH CARE ANTITRUST
IMPROVEMENTS ACT OF 1993

HON. BILL ARCHER

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 10, 1993

Mr. ARCHER. Mr. Speaker, during our years of service in the Congress, Senator ORRIN HATCH and I have seen dramatic changes in the health care marketplace.

We have seen the Government encourage hospital construction, with Federal aid from the Hill-Burton Program.

We have seen the Government encourage hospital closures and consolidations, with the pressures for efficiency forced by the prospective payment system and other Medicare reimbursement changes.

We have seen the Government work to limit the flow of technological advances to the marketplace, with implementation of the Health Planning and Resources Development Act, Public Law 93-641.

And we have seen the Government recognize that consumers want, and need, access to the latest medical technology breakthroughs, with repeal of that act in 1986.

We have seen the Government encourage the education of health care providers, with programs such as the National Health Service Corps, graduate medical education under Medicare, and the health manpower programs authorized in title VII of the Public Health Service Act.

And we have seen Federal support for those programs cut back as resources dwindled in the 1980's and 1990's, and as oversupplies of certain specialties led to inefficient use of precious health care resources.

We have seen doctors, hospitals, and other providers band together to build efficient, cost-effective delivery systems which extend services to our citizens, especially those who live in the most underserved rural and urban areas.

And we have seen the long arm of the Justice Department and the Federal Trade Commission reach down to stymie the most effective of those collaborations, in all areas of our country, large and small.

Evolution of the health care marketplace will continue, and should continue, with or without a dramatic restructuring of our health care system. Effective and creative alliances will be forged between all types of health care providers in all areas of this country.

We believe that government should be a catalyst for such alliances, rather than an impediment to their formation. We believe that it is the function of government to foster the provision of quality health care services, rather than to concoct burdensome mandates and other disincentives which drive up the cost of care and price it out of the marketplace for many.

Today we join together to introduce The Health Care Antitrust Improvements Act of 1993, a measure to ensure that all players in the health care marketplace have the opportunity to pursue appropriate alliances and joint ventures that will provide better services and lower costs for health care consumers.

We have a long history of working to reform the antitrust laws that apply to the health care industry. The committees on which we serve, Ways and Means, Finance, and the Judiciary, have held extensive hearings into the issue of our antitrust laws and how they can harm those who receive health care services, rather than protect them.

We have heard countless stories of costly duplications of services, inefficient arrangements which communities cannot even begin to address because the very act of initiating discussions could trigger antitrust action by the Federal Government.

We have heard testimony from the Ukiah Valley Medical Center president, ValGene Devitt, who told us of her 43-bed, not-for-profit hospital's 4½-year ordeal after it sought to buy the assets of a 51-bed hospital nearby. Last year, a court found that the transaction benefited consumers and leads to an improvement in quality care.

More recently, we have seen two Utah hospitals needlessly spend over \$7 million just to prove to the Justice Department that their joint work in pediatrics helped patients, not harmed them.

Our extensive study of this issue has forced us to question the Government's motive in challenging such mergers.

Is it against our citizens' interests to see rural hospitals combine and improve their efficiency?

Is it against our citizens' interests for a community to effect millions of dollars in cost savings while eliminating duplicative services and staffing?

Or, more importantly, is it against our citizens' interests for the Government to spend millions on needless litigation, millions which could have been spent on patient care, to satisfy this Washington witch hunt?

As responsible Members of Congress who would like to see improvements to our health care delivery system, both now and in the future, we cannot stand by and allow the Federal Trade Commission and the Justice Department to drive up health care costs through such unwise antitrust actions.

While we applaud the administration's attention to reforming health care, we are concerned that their bill, the Health Security Act, offers little in the way of antitrust revision. The administration has offered general operating guidelines, but they are nonbinding and have no effect whatsoever in reducing the costs of private party antitrust litigation.

We believe that it is possible to craft a carefully balanced change to the statute which will both continue Federal protections against self-serving monopolies and institute the measure of flexibility necessary to foster resource-sharing alliances and group ventures.

Our legislation sets out specific safe harbors for the cooperative activities of health care providers. This will lead to lower costs while increasing provider quality and consumer access to needed services. Our bill also directs the Attorney General to undertake three specific tasks. First, to develop needed guidelines for providers developing joint ventures. Second, to administer a program for expediting reviews and granting of waivers. Third, to develop additional safe harbors as warranted by the changing needs of the health care industry and consumers.

This legislation was developed after extensive consultations with representatives of the health care provider community. We have designed The Health Care Antitrust Improvements Act of 1993 to respond to the needs of today's health care marketplace, as well as the evolving marketplace of the future.

In introducing this legislation, we recognize that our national dialog on health care reform will continue to evolve as the marketplace is evolving.

We recognize that changes in this draft will be necessary to accommodate unforeseen issues. We want to work with all in the health care arena to make those changes, be it health care facilities, such as hospitals, nursing homes, or home health agencies; licensed health care providers, such as physicians, nurse practitioners, or chiropractors; or other critical players in the health care marketplace, such as insurance companies.

In a similar spirit, we wish to work with our colleagues to refine this bill as it moves through the legislative process. It is abundantly clear to us that the Federal Government needs to take immediate action to clarify the rules of the game so that those in the health care community who wish to undertake alliances are assured a stable, predictable play-

ing field. That is the intent of The Health Care Antitrust Improvements Act of 1993.

TRIBUTE TO ROY T. THOMAS

HON. RONALD V. DELLUMS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 10, 1993

Mr. DELLUMS. Mr. Speaker, today I rise to honor Roy T. Thomas as he retires from the University of California at Berkeley. Roy T. Thomas has served as an academic and personal advisor, faculty advocate, and surrogate father for the many African-American students that have come to the Berkeley campus over the last 23 years. Professor Thomas is famous for the long lines of students waiting patiently outside his office door, for he seems to be in his office at all hours of the day and sometimes well into the evening. Former students who are now professionals dispersed throughout the world proudly attest to the pivotal role he has played in their lives. While experiences as a student of color at Berkeley can sometimes provoke pessimism and bleakness about one's academic success, Professor Thomas is always able to provide the right words, and just the right resources, to brighten even the darkest circumstances and motivate one to achieve. Many believe that Mr. Thomas is partially responsible for inspiring some of the most successful careers of lawyers, lobbyists, doctors, business persons, and policy analysts for his wisdom and fortitude not only advised many but taught them how to achieve their dreams. His retirement from the University of California at Berkeley will be a sad day.

Roy T. Thomas was born on April 4, 1931, in New Africa, MS, and was raised in Memphis, TN. He earned his bachelor of arts degree in English in January 1954 from Roosevelt College in Chicago, IL. Mr. Thomas earned a master of arts degree in English in June 1960 from New York University [NYU]. While in New York, he was an English instructor at Boys High School in Brooklyn. He served in the Adjutant Corps division of the U.S. Army from December 1954 through September 1956.

After graduation from NYU, Mr. Thomas moved to California and taught for 3 years as an English instructor at Fremont High School in Oakland, CA. During this time, he authored a Negro History-Christian Faith Series which included studies of Isaac Murphy, Benjamin Banneker, Sojourner Truth, Charles Drew, Langston Hughes, and W.C. Handy. In 1965, Mr. Thomas entered Stanford University as a doctoral student in English, and in 1967 he began writing his doctoral dissertation on the subject of the children in the writings of William Blake and Langston Hughes. From 1967, through 1970, Mr. Thomas taught as an English instructor at San Francisco City College and an assistant professor at San Jose State University. In September 1970 he became a lecturer in the newly formed African-American Studies Department at the University of California, Berkeley, where he has remained for the last 23 years.

In 1974, Mr. Thomas also became an associated director of the UC Berkeley Profes-

sional Development Program [PDP], which has numerous programs geared toward helping students of color excel in mathematics, the sciences, and more recently, the humanities. He has served in the following capacities: coordinator of the Minority Graduate Student Program; codeveloper of the Undergraduate Student Program; faculty mentor for the Summer Research Opportunity Program; English instructor for the pre-college academy; instructor for African-American Studies 98, specifically for PDP; and consultant for PDP's Summer Math Institute.

He has also served on the UC Berkeley Ethnic Studies Library Committee and the College of Letters and Science's Reading and Composition Committee; and Martin Luther King, Jr., Convocation Day Committee, as an adviser.

In addition to all of his activities on campus, Mr. Thomas has also been involved in numerous activities over the years. In the past, he has served as: committee member to bring South African ANC leader Nelson Mandela to the bay area; executive secretary to the San Francisco African-American Historical Society; consultant to the Oakland Museum for its oral history project, "Oakland's Black Pioneers"; board member for the Black Filmmakers Hall of Fame; chair of the Education Commission of the Shattuck Avenue United Methodist Church; and member of the educational aid committee for McGee Avenue Baptist Church.

Currently, he serves as: member of the Collegium of the Black Filmmakers Hall of Fame; chair and lecturer for the Annual Film Lecture Series at the Oakland Museum; director of community and cultural affairs for the city for Richmond, CA; and advisory board member to the Break the Cycle Tutorial Program for the Berkeley Public Schools.

Throughout his tenure at UC Berkeley, he has taken an extraordinary interest in the academic and professional development of thousands of students. Regardless of color or creed, Mr. Thomas nurtured every student as if he or she was his own. Roy Thomas is a man that does not accept mediocrity or complacency. He is widely respected for his ability to inspire students to challenge tradition when searching for solutions. This mindset has inspired students to create mentorship programs, produce films, and seek political office, just to name a few.

A surrogate father to hundreds of students, many wondered if Roy ever had a personal life, given that he was in his office from sunup to sundown. At the seasoned age of 62, he participates in the Bay Area Lake Meritt 10K run and has won in his age group. Students, professors, and alumni are all in awe of his remarkable ability to run marathons and climb mountains on a regular basis.

Words cannot simply express the admiration and esteem that UC Berkeley students, professors, alumni, and Berkeley and Oakland citizens hold for this individual. His contribution as an unselfish professor will last for generations to come. By teaching his students the art of turning their dreams into reality, he has taught them to teach others. This in itself is enough to honor a man who has demonstrated his ability to inspire young and old minds alike. He will be missed immensely, but his benevolence will always be remembered.

INTRODUCTION OF THE INFRA-
STRUCTURE REINVESTMENT ACT
OF 1993

HON. ROBERT A. BORSKI

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 10, 1993

Mr. BORSKI. Mr. Speaker, today, I am introducing the Infrastructure Reinvestment and Economic Revitalization Act of 1993, which, by applying the standard business practice of bond financing to the Highway Trust Fund, will greatly accelerate our ability to invest in the Nation's transportation infrastructure.

This bill would allow the future proceeds of the Federal gas tax to be used as a revenue stream by a new corporation to permit bonds to be issued for transportation projects. The many projects that are ready to be built today would be financed through these bonds. The bonds would then be paid off with the gas tax revenue.

The Infrastructure Reinvestment and Economic Revitalization Act will make it possible for us to move forward immediately with a major program of investment in our transportation infrastructure. It recognizes that there are billions of dollars in projects that are ready to go but lack financing.

Use of bonds will allow us to invest future gas tax proceeds and create thousands of new jobs now. An investment of \$1 billion in the transportation infrastructure would create up to 50,000 jobs, meaning a massive creation of jobs if we can offer bonds today based on 5-year revenue projections for the Highway Trust Fund.

This bill creates an Infrastructure Reinvestment Fund which would issue bonds to finance upfront payments for the programs already authorized in the Intermodal Surface Transportation Efficiency Act of 1991. Instead of waiting 6 years to pay out the funds authorized under ISTEA, we would make the funds available immediately to improve our highway and transit systems.

ISTEA was truly the most significant surface transportation bill since the authorization of the Interstate Highway System, but it will have its meaning diminished unless we find a way to provide full and immediate funding. With the bond financing envisioned under my bill, State and local transportation agencies could begin to make the transportation revolution authorized by ISTEA a reality today.

There is no question that the infrastructure financing needs exist and that they must be met if we are to be a global economic power in the 21st century. ISTEA changed the way the Federal Government looked at transportation for the first time since the 1950's. My bill will make the first meaningful change in the way we provide the financing for transportation through the Highway Trust Fund since the Federal gas tax was enacted in 1956.

The Federal Highway Administration estimates that \$45.7 billion is needed annually just to maintain our highway system at current levels and \$74.9 billion is needed annually to improve the system to meet future demands, compared to the current annual investment of \$36.2 billion by all levels of government. According to the Federal Transit Administration,

the Nation's transit systems require an annual investment of \$7.5 billion, one-third more than the fiscal year 1994 appropriation.

The issue is how we obtain the financing to pay for these essential improvements. Through the innovative financing mechanism proposed in the Infrastructure Reinvestment and Economic Revitalization Act, we can start to fulfill the promise of ISTEA and begin to meet our transportation infrastructure needs.

The American people have turned down any thoughts of doing business as usual and they have rejected the stand-pat philosophy that everything will just get better if we don't do anything.

They have called for their representatives in government to take action to make America a better place to live. They want a nation with an economy that will grow in the coming decades and which will support American industry's ability to compete in the global marketplace.

The Infrastructure Reinvestment Act of 1993 responds to the American public's strong demand that we take immediate action to improve the quality of life in our Nation. We can produce a real turn-around in our infrastructure investment program with this new financing mechanism.

I urge my colleagues to join me and co-sponsor the Infrastructure Reinvestment and Economic Revitalization Act of 1993.

VIETNAM WOMEN'S MEMORIAL

HON. KARAN ENGLISH

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 10, 1993

Ms. ENGLISH of Arizona. Mr. Speaker, this week over 100 women from the State of Arizona have journeyed to Washington for the Veterans Day events scheduled around the unveiling of the Vietnam Women's Memorial project.

The Vietnam Memorial has always been said to be a place of healing: A place to come home to for the veterans of the United States Military who have given a piece of themselves for their country. For 11 years, eight names on the Vietnam memorial has been all this country has known of the sacrifice of women in the Vietnam war. Over 90 percent of the women who served in Vietnam were in the health care profession: They nursed our sick, our wounded, and our dying. Over 265,000 women served courageously in the Vietnam war, and none of them were drafted. They all volunteered—no law made them leave their homes and their families—they did it to serve their country.

One of the most poignant reminders of the sacrifice that women have made for this country comes from the book called *Shrapnel in the Heart, Letters and Remembrances from the Vietnam Veterans Memorial*, written by Laura Palmer. In the book, the author highlights some of the people who have left letters, poems, and other mementos at the Vietnam Memorial. One of the people featured in the book is a woman known only as Dusty. It is not her real name, but her nickname from the war—she uses it in the book to hide her real

identity from her husband, who has no idea that Dusty ever served in the Army or in Vietnam.

Dusty served two tours in Vietnam, working in an evacuation hospital as a surgical, intensive-care, or emergency room nurse. The reason she chose to serve a second tour was because, in her words, "the wounded kept coming, the war was getting worse, and I was good at what I did." Dusty went to Vietnam because she opposed the war, and she felt that if she went to the streets to oppose the war, she would just be one more body in the mob of people. So she went to Vietnam to use her training to get as many people home alive as she could.

Dusty tells the story of one of the young men she remembers so vividly from those days in Vietnam. His name was David, and she was the last person to speak to him, and to see him alive. Eighteen years later, Dusty wrote a poem about David that I believe epitomizes the efforts and feelings of women in the Vietnam war.

Hello, David—my name is Dusty.

I'm your night nurse.

I will stay with you.

I will check your vitals every 15 minutes.

I will document inevitability.

I will hang more blood and give you something for your pain.

I will stay with you and I will touch your face.

Yes, of course, I will write your mother and tell her you were brave.

I will write your mother and tell her how much you loved her.

I will write your mother and tell her to give your bratty kid sister a big kiss and hug.

What I will not tell her is that you were wasted.

I will stay with and I will hold your hand.

I will stay with you and watch your life flow through my fingers into my soul.

I will stay with you until you stay with me.

Goodbye, David—my name is Dusty.

I'm the last person you will see.

I'm the last person you will touch.

I'm the last person who will love you.

So long, David—my name is Dusty.

David—who will give me something for my pain?

While we may not be able to take away the pain and suffering of the women who served their country so well, we can honor them, and show our appreciation for their devotion to this country.

For 11 years there has been something lacking for the women veterans of this great land, something real, yet tangible. Tomorrow, on the 75th anniversary of the ending of the "war to end wars" there will be a new dedication—one for the statue honoring the commitment and sacrifice made by women for the defense of his great land.

Starting tomorrow, a new monument in a small grove of trees on the ridge that frames the Wall's grassy front yard, will be home for the symbol of the service and sacrifice of this Nation's women veterans. To the women veterans who have made the journey to the Wall this year I say, "Welcome Home."

WHEN REMEMBERING OUR BRAVE
HEROES OF WORLD WAR II—
DON'T FORGET THE MARINES
FROM TARAWA

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 10, 1993

Mr. DORNAN. Mr. Speaker, as we celebrate the 50th anniversary of World War II, I ask my colleagues and the citizens of this country to remember a specific group of Marines whose courage and sacrifice demands special recognition. I am referring to the exploits of the Second Marine Division which fought in the bloody battle of Tarawa.

I will include for the RECORD an article from the current issue of the Smithsonian magazine describing the brave deeds of these heroic men. I urge everyone to read this article in order to have some appreciation for the courage and sacrifice of these American heroes from World War II. We must never forget these brave men.

[From the Smithsonian Mag., Nov. 1993]

TARAWA

(By Michael Kernan)

August 1943: Marine Maj. Gen. Julian C. Smith stands before a mahogany conference table in K Room, on the third floor of the Windsor Hotel in Wellington, New Zealand. General Smith blinks behind his glasses as a neat, small man in an admiral's uniform spreads a large chart across the table. Vice Adm. Raymond Spruance has come all the way from Hawaii to tell Smith that, in November, his 18,088-man Second Marine Division will be attacking Tarawa.

The map shows an atoll, more or less triangular, 18 miles long, a coral spine studded with tiny huts and trading stations. To the southwest is Bititu Island, more commonly known as Betio, where the Japanese have dug in. Spruance pronounces it "bay-show." The atoll itself he calls "tar-a-wa." Hardly anyone has heard of it.

Smith and his staff study the chart of Betio. They see a curious little island shaped like a cockatoo lying on its back. The legs are represented by a pier that juts straight out from its belly. The whole thing covers less than 300 acres; it is less than half a mile wide at its widest point and only a shade over two miles long. The 700-yard-long pier and the new airfield, on which the Japanese are still working, are the only noticeable features. Those and the wiggly lines that mark the reef surrounding it.

The Battle of Tarawa is not as famous as the earlier attack on Guadalcanal or later assaults on Iwo Jima and Okinawa, although more than 1,000 Americans were killed in the 76 hours required to take the island. But it was at Tarawa that the Marines made the first American seaborne assault against a heavily defended coral atoll. After Tarawa we would send in frogmen to clear the beach approaches, measure water depths, study local tides. The percentage of casualties for the number of men involved was appalling. In the public mind, both during the war and to this day, it produced an indelible image of men, up to their waists in water, helplessly slogging across hundreds of yards of Pacific shallows into the teeth of Japanese fire.

It is the fall of 1943. In Western Europe the war is approaching a sort of climax with the invasion of Italy. But in the Pacific, four

months after the U.S. victory at Midway, things are going slowly. Like Midway, Guadalcanal had been a turning point. After landing August 7, 1942, the Marines had to fight for six months, finally winning the island and its crucial airfield. Now another stage in the long, island-hopping road to Japan is about to begin.

The new major American objective in the Central Pacific is Kwajalein, 65 miles long, the largest atoll in the world and a superb base for planes and ships. But to take it, you need forward airbases in Tarawa and elsewhere in the Gilberts.

At the historic meeting in Wellington, Julian Smith diffidently remarks that the reef is going to be the main problem. His operations officer, Lieut. Col. David M. Shoup, glances around the table. Shoup, 38, had met the Japanese in jungle combat on Guadalcanal. "Amtracs," he mutters. Spruance shakes his head at this mention of amphibians. The landing will have to be made in ship's boats, he says. He does not give a reason.

October 1943: Julian Smith flies into Honolulu for a talk with Maj. Gen. Holland M. Smith, known to history as "Howlin' Mad" Smith, an expert on amphibious warfare who commands the Fifth Amphibious Corps under Admiral Spruance.

The two Smiths huddle over yet another map. This one shows the Tarawa atoll, Betio and its lagoon, with the depths marked at various points: seven, nine, five feet. There is one little problem. The soundings were taken by the Wilkes Expedition, a remarkable naval exploration of the Pacific and the Northwest coast of America (Smithsonian, November 1985). The map, drawn in 1841, carried a notation: "This chart should be used with circumspection; the surveys are incomplete."

Any attack will have to be blunt, head-on and quick, Julian Smith explains. The ocean side, to the south, is out of the question; aerial photographs show the enemy has mounted his most powerful defenses on that shore. Besides, there is a heavy surf.

This leaves the lagoon side. But here, say the New Zealanders who know these waters, the tides are tricky. They have a nasty way of "dodging," rising and falling at uneven rates in the shallow lagoon. Because of tactical considerations the attack will have to be made during a period of neap tides. Such tides occur near the first- and third-quarter phases of the moon and do not crest as high as the spring tides of the full and new moons. They sometimes remain at nearly the same depth for hours and on Tarawa they could be as low as three feet. Rear Adm. Harry Hill, put in command of the amphibious force, consults with local mariners and reaches a cautious consensus that neap high tide in the lagoon on November 20 will surely be close to five feet deep. A loaded Higgins boat, the conventional landing craft of 1943, draws between three and a half and four feet, leaving a narrow margin for error.

Nevertheless, Julian Smith quietly spells out his fears that the water may be too low for the Higgins boats. His people could be stranded far out on the reef and forced to wade for hundreds of yards under deadly fire. He has 75 amtracs (amphibious tractors) at Wellington, enough to get the first assault waves ashore, but will need at least 100 more. Holland Smith nods agreement. But when he is consulted, Rear Adm. Richmond Kelly Turner, who oversaw the Marine landings on Guadalcanal, insists that more of the 25-foot-long amtracs won't be needed. They're slow, he adds. All but impossible to steer in any

kind of a sea and no armor to speak of. Once they stall, they ship water over their low freeboard and swamp.

To the end of his life, Holland Smith would insist Tarawa should have been bypassed in the island-hopping campaign to reach Japan. Now he is outraged by the Navy's reluctance to give the Marines the equipment they need. Face darkening, he bursts out: "No amtracs, no operation!" Finally Turner agrees to give the Second Marine Division more amtracs. If the tide does come in low, he notes, they can ferry men from the larger Higgins boats to shore.

Since taking Tarawa from the British shortly after Pearl Harbor, the Japanese have been making it impregnable. Reconnaissance reveals a network of dugouts, coral-block machine-gun nests and interlocking communication trenches. Lines of fire have been sighted in so that every spot on the island can be crisscrossed with withering fire from many different angles.

The defenses include four eight-inch guns that threaten virtually every inch of the seaward approach to the shore; ten 75-millimeter mountain guns, six 70-millimeter cannon, nine 37-millimeter field pieces, four pairs of five-inch coastal guns, 14 light tanks and many anti-aircraft guns and mortars. Tank traps have been sunk in the beach. There are concrete blockhouses up to 40 feet in diameter and 17 feet high, and an incredible 500 pillboxes, sunken miniforts with shallow-curved cupolas and walls of reinforced concrete five feet thick. Rear Adm. Keiji Shibasaki, who has lately taken over the defenses, boasts that if they had a hundred years, "a million men could not take Betio." Along with 2,217 Korean laborers, Shibasaki has 4,836 men, of whom about 3,000 are fighting effectives, including 2,600 first-rate *rikusentai*, or special landing forces.

Most are concentrated on the south side, facing the open sea, where it is thought the Americans will land and be stopped at the beach by the mines and tank obstacles, wire tangles and guns. The American attack is expected at high tide in the morning, but the Japanese expect to counterattack at night and sweep every living enemy off the beach. The assumption is that Americans cannot see in the dark.

Latrines have been set on pilings out over the water. Based partly on the count of latrines visible from the air, American intelligence has underestimated the number of defenders at 2,800. The six Marine battalions scheduled to attack number twice that, though doctrine has it that success requires three times as many attackers as defenders. Torrents of steel and high explosives are to be hurled at the island from three battleships, for cruisers and nine destroyers. Waves of planes are scheduled to bomb and strafe the tiny patch of sand.

Lieut. Col. Shoup draws up the final attack plan. Three battalions will hit the lagoon-side beach at once: the Second Battalion, Second Marines and the Second Battalion, Eighth Marines side by side athwart the pier (Red Beach Two and Three, respectively) and the Third Battalion, Second Marines slightly to the west, at the cove that forms the cockatoo's throat (Red Beach One). As the landing drills wind up, the assault commander falls sick. Suddenly Shoup finds himself promoted to full colonel, commanding the Second Marines, the reinforced combat regiment that will lead the assault that he has planned.

Years later, when the taciturn, poetry-writing Shoup becomes commandant of the U.S. Marine Corps, it is partly because of

what he did at Tarawa. His experience there will also influence advice that he gives President John F. Kennedy in 1963 when the feasibility of invading Cuba comes up. Showing Kennedy a map of tiny Tarawa—as compared with the 800-mile-long Cuba—Shoup reminds the President of the “trouble we had” taking the little triangle of sand and coral.

The landing is now firmly set for neap tide on November 20, at 8:30 a.m. The date is a compromise. In November the only tides coming just after daybreak are neaps, with their lesser highs. During most of the month the spring tides, with their higher highs—the ideal time to run boats over the reef—are expected either before dawn or late in the afternoon. Predawn attack would rule out effective bombardment beforehand. An afternoon attack would mean that reinforcements would have to land at night.

Navy experts are still promising five feet of water at the end of the pier on the morning of November 20. One New Zealand Army Reserve officer who knows the island warns that there will be less than four feet over the reef, with a dodging tide making it even shallower. Everyone agrees that by the 22d the dodging tendencies will be over, but Admiral Turner decides not to put off the attack. Each day that passes, he has been told, increases the danger of a west wind, which would push waves up perhaps too steep for a landing. The landing of heavy matériel will certainly be delayed. Turner figures he has a two-to-one chance that the tides won't be a crucial problem. He is wrong.

Saturday, November 20, 2:20 a.m.: Transports heave to northwest of the island, which looms black in the path of the moon. By 2:55 a.m. 13 transports are reported in position 10,000 yards offshore. Boats are lowered and men begin clambering down the rope nets, but it turns out they are within range of Japanese guns—and in the wrong position, exactly in the line of fire between the battleships and the Japanese.

The whole timetable is thrown off. Transports are laboriously moved out of the way, as landing craft loaded with men bob along behind. The time of attack has to be postponed, first 15 minutes, then another 15. The revised H-Hour is 9 a.m.

5:42 a.m.: Everyone listens for the planes which at that moment are supposed to dump 1,500 tons of bombs on the island. Bolloxed communications hold them up. It is 6:20 a.m. before carrier-based Dauntless, Avenger and Hellcat aircraft roar overhead. They drop 500 tons of bombs, only a third of what Shoup had counted on to kill enemy troops and level buildings near the beaches.

6:22 a.m.: The naval bombardment opens, lasting nearly 90 minutes, littering every foot of the atoll with fragments from 3,000 tons of shells. It is 8:25 before the first waves of amtracs peel off from the line of departure and head for shore, some 6,000 yards away. Of the amtracs available, 87 are in the first three waves—42, then 24 and 21. The rest will come later. Each wave is 300 yards from the last. Some, at Shoup's suggestion, have been equipped with light armored shields specially welded in New Zealand. Each vehicle holds 20 to 25 men. They make less than four knots at sea.

At 8:55 a.m. all guns stop firing. Smoke has obscured the beach where the marines are landing, and for 20 crucial minutes the big guns have to remain silent. The Japanese use this moment to rush men massed on the south beach to cover the lagoon.

At 4,000 yards shells from the Japanese 75s start splashing around the amtracs. Then the 37s kick in, and at 2,000 yards long-range ma-

chine guns begin to spray bullets all over the sea. Soon rifle fire joins in. At 800 yards, amtracs reach the reef, crawl up over it and down into the water on the shore side. “Little boats on wheels,” the Japanese call them.

A few hundred yards ahead of the first wave, two landing boats, miraculously unscathed, touch the end of the pier and men pour out, firing at the Japanese machine guns hidden in the pier. This is the scout-sniper platoon led by First Lieut. William Deane Hawkins, 30, a rangy Texan. Everybody calls him “Hawk.” He has worked his way up through the ranks and does not believe he will survive the war.

Hawkins and his men race down the pier, hurling grenades at machine-gun nests, squirting fire from flamethrowers. Soon the pilings are ablaze.

The first wave of amtracs scrapes the sand in uneven increment: 9:10 on Red One; 9:17 on Red Three; 9:22 on Red Two. The beachhead is only ten yards wide. Amtrac drivers discover their machines can't climb over the four-foot seawall. Engines scream, throwing up showers of sand and splinters. The vehicles get hung up on the wall, sink back peppered with holes. In the chaos, some Second Battalion, Second Marines amtracs slant west to land on Red One with the Third Battalion, which the ferocity of the defense has already forced many yards west of its intended landing point. This is Maj. John F. Schoettel's battalion, but he is still trying to get to shore.

“CASUALTIES 70 PERCENT. CAN'T HOLD”

To men in the next wave of boats plugging toward the island, the noise is unbelievable: vast shuddering explosions that squeeze the body; the howl of steel fragments tearing the air apart just overhead; the spang of lead smashing into steel; gigantic splashes, underwater explosions that heave tons of green sea with enormous white-water crowns up into the air; guns chattering in long bursts, ripping the water into froth. And above the din a roar of human shouts, screams and cries.

Many of the amtracs are blasted to bits. Bodies sprawl on their decks. Men pile out, to sink under their decks or to float face down. Unhit amtracs start back for another load, running in reverse to keep their armored fronts to the enemy, but many lie dead in the water or skewed crazily on the torn sand. A message from an unidentified sender flashes to Gen. Julian Smith aboard the flagship *Maryland*: “Have landed. Unusually heavy opposition. Casualties 70 percent. Can't hold.” In the three-day assault, 90 out of 125 amtracs will be lost.

Now it is the turn of the Higgins boats.

Pounded for hours by wind and ocean chop as they wallowed and circled on the line of departure, the men are relieved to be moving in at last. But some can see the reef just under the surface ahead. Here and there, the coral is actually out of the water, drying in the sun.

With an ominous squeal of metal the front boat, halfway across the lagoon, scrapes its bottom, lurches, stops dead on the coral. Others join it. The second wave piles into the lead wave, and the third follows. Some boats back off. Men leap over the side, holding their rifles high. They are in shallow water 800 yards from shore.

All around them the surface is whipped by curtains of bullets. Shells explode among the men with towering splashes. Marines watch as first one, then another Higgins boat takes a direct hit, splitting them wide open, spilling men and gear into the sea. The rusty, barnacled wreck of a local freighter that

floundered on the reef during an earlier air strike plagues marines with crossfire from Japanese snipers hidden inside.

A wave of larger craft carrying Sherman tanks stops at the reef and disgorges the tanks into the sea. Time-Life correspondent Robert Sherrod, who came in with the fifth wave, reports: “One marine picked a half dozen pieces of shrapnel from his lap, stared at them. Another said, ‘Oh God, I'm scared. I've never been so scared in my life.’ * * * Said the wild-eyed small-boat boss: ‘It's hell in here. They've already knocked out lot of boats and there are a lot of wounded men lying on the beach from the first wave.’ * * *”

All along the front, men slosh in, waist-deep in bloody water, rifles over their heads, dodging and ducking as the bullets sing past. Their trousers are torn by the sharp coral, their knees and hands are bleeding.

On the concave beach at Red One, exposed to fire on three sides, of the 880 men of the Third Battalion, Second Marines only about 100 are still in action. One company reports only 40 survivors. Major Schottel, the battalion commander, still in a boat half a mile from shore, radios Shoup at 9:59: “Receiving heavy fire all along beach. Unable to land. Issue in doubt.” Minutes later, another message: “Boats held up on reef of right flank Red One. Troops receiving heavy fire in water.”

Shoup replies: “Land Red Beach Two and work west.”

Schoettel: “We have nothing left to land.” This news so shocks Shoup that he calls in his regimental reserve battalion to land on Red Two and work over toward Red One.

Despite his report, Schoettel's headquarters and weapons detachments are, in fact, still waiting in their Higgins boats; he has already lost 17 officers and believes his assault waves have been shattered to pieces. Only late in the day does a peremptory message from Julian Smith stir him to action: “Direct you land at any cost.” Later Schoettel reports to Shoup on Red Two, saying he got separated from his men—who land without him. Despite being demoralized, the major takes command of what is left of his battalion along with the First Battalion, Eighth Marines and battles for 48 hours to wipe out the “Pocket,” the toughest enemy complex on the island. Later, Schoettel is cited for bravery; he will die in action on Guam.

A pilot observer swooping back and forth over the battle notes. “The water seemed never clear of tiny men, their rifles held over their heads, slowly wading beachward. I wanted to cry.”

Red Two is the worst. Some 200 yards out, Lieut. Col. Herbert Amey's amtrac runs into a submerged wire fence. He jumps out, waves his pistol in the air, shouts, “Come on! These bastards can't stop us!” and sprints hard for shore. A cone of fire hits him in the throat and kills him instantly.

THE TERRIBLE TEST OF THE SEAWALL

Some of Amey's men hide behind a wrecked amtrac until Lieut. Col. Walter Jordan, who had come as an observer, leads them to the beach. He can't contact other landing teams because most radios are waterlogged, so he sends out runners. Marines are scattered on the spiky coral sand in small groups. Some are as far as 100 yards inland, but most lie at the foot of the seawall, heads down, out of the storm of lead that rakes the beach.

Men huddled at the seawall watch their reinforcements die in the water. Sergeants and lieutenants shout to them, taunting and bullying them. Now and then an officer rises by

himself to storm over the wall into the spray of lead. Very few follow. Those who do, scuttling madly across the sand, flop prone after five or six yards to shoot blindly at whatever is ahead. Some lie where they fall. Some inch their way back to roll exhausted over the seawall and lie there wide-eyed, panting.

Sgt. William Bordelon, a combat engineer attached to the Second Battalion, Second Marines, is one of five survivors of his 22-man platoon. His amtrac was blown up offshore. He crouches behind the coconut logs, large hands clenched on some satchel charges, a silent man with deepset gray eyes and a long, unsmiling face.

"Cover me!" he suddenly shouts and springs up over the wall and runs, zigzagging through the rain of bullets, to a Japanese pillbox squatting in the sand a few yards away. He swerves to the side and jams a satchel into the firing slit. A moment later the whole structure explodes in a mushroom of sand and log fragments. Bordelon races to the next pillbox, which covers the first. He throws a satchel inside that one too, and then blows up a third. Finally he runs back and slides down over the wall to get more satchels.

The front of his shirt is blossoming red. Bordelon ducks back to the beach to pull in a fellow engineer, foundering at the water's edge. Then the sergeant lopes up to the wall, picks up more satchels and starts forward again. Instantly he is stitched by gunfire from three directions and killed. He will get the Medal of Honor.

In one makeshift hospital in a captured pillbox, more than 100 wounded have been collected. In the gloom, doctors have to operate by flashlight. Suddenly a wounded man lifts his rifle and fires at a figure huddled in a corner. Shocked, ears ringing, the marines look at the sprawled body. It is a Japanese soldier who had crept inside. Marines find another and crush his head with a rifle butt. With the rage of battle on them, they keep fighting despite their wounds. Some don't bother to stop for bandages but press on, faces, hands, shirts smeared with blood.

It is about noon. Down the length of the beach, pockets of marines wait by the seawall. Behind them lies the carnage of blasted boats and bodies, spread-eagled on the rocks, hanging head down from wrecked craft, lying half submerged in the water, face down, rocking gently with the waves. Out in the lagoon, landing craft circle, dodging the constant fire.

As troops keep straggling onto the beach, the confusion mounts. Hardly any radios are intact. Officers are separated from their men. Entire units have come ashore at the wrong place. Aboard the cruiser *Indianapolis*, naval officers mill about in Admiral Spruance's cabin, some suggesting that the Fleet Commander take direct control of the operation. Spruance raps the table once. His cold eyes rake the room. The noise stops. "Gentlemen," he says crisply, "there are a number of senior officers in this landing in whom I have the utmost confidence. The operation will proceed."

The chaos on the beach at last sorts itself out. Colonel Shoup wades ashore after two boats fail under him. He finds 20 men cowering under the pier and rousts them out. A mortar shell knocks him off his feet, peppering his legs with shrapnel. He gets up, pulls past together and sets up HQ 50 yards past the seawall, next to a ruined air raid shelter.

The sun sinks. Yard by yard, the marines push beyond the seawall. One by one the pillboxes and shelters and dugouts get the treat-

ment, satchel charges or bangalore torpedoes thrust by hand inside the portholes. Flamethrowers are used if they can be taken close enough.

DAWN WILL BREAK ON A HELLISH SCENE

By nightfall 5,000 marines have crossed the line of departure. Fifteen hundred are dead or wounded, the others are crowded into the tiny island's fringes. Medical supplies are so short that corpsmen wade out into the surf to take first-aid kits from dead bodies. Morphine Syrettes are at a premium. There is hardly any water.

November 21: The sun rises, so hot and bright that it makes the eyes ache even before its orange-balloon image has fully lifted above the horizon. On the beach lie bodies exposed by the receding tide, dangling from smashed amtracs, tanks and wire traps. At 6 a.m. a reserve battalion that has been circling offshore for 20 hours swarms in over the reef at low tide. The men start wading in. Marines on the beach watch warily, knowing that the Japanese have plenty of ammunition still on hand in their bunkers.

This second day landing is worse than the first. The Japanese, whose concrete bunkers reinforced with palm trunks had enabled them to survive the bombings and strafings, are still alive, it seems. Machine guns smuggled at night aboard the grounded freighter cut down marines in rows. The men on the shore scream as they helplessly watch their reinforcements cut to pieces. Of 199 men in the first wave this day, only 90 reach shore. It takes five hours to land all the reserves. Almost half of the 800 are killed or wounded. The battalion loses all its flamethrowers in the water.

Nevertheless, this is a pivotal point. Shoup orders a head-on attack over the seawall. In a fury inspired by the slaughter they have just watched, the men charge inland.

Lieut. Deane Hawkins and his scouts take the point as usual, 150 yards into the trees. They reach the airstrip, but Hawkins is wounded again and again. He attacks a machine-gun nest with grenades, presses on with his men to knock out three more nests. He dies at an aid station during the night. He too wins the Medal of Honor.

Backed by the fresh reserve troops, the invasion gains momentum. Leapfrogging ahead, teams of engineers carrying flamethrowers and satchel charges alternate with covering groups of riflemen. They rush the airstrip in force and push beyond. By mid-afternoon Colonel Jordan learns that some 150 men, all that are left of his battalion, have reached the south shore and are holed up there with little ammo and no water. They have cut the island in two.

The First Battalion, Sixth Marines lands on Green Beach, bringing the first complete unit ashore with all weapons, including light tanks. Now pillboxes don't have to be removed by hand. Shoup, who had come in commanding a regimental combat team and wound up running eight battalions, gets a little relief. He will win the third Medal of Honor here.

Day Three: Marines begin the final drive. Jeeps are coming ashore, always a good sign because they mean the front has moved on ahead. The First Battalion, Sixth Marines, bypassing the four-acre Pocket at the cove, advance down the long south shore, tanks in the lead, relieving the beleaguered platoons by the airstrip. On Red Three, 400 yards east of the pier, Maj. Henry Growe, the only one of three assault team commanders to reach shore with his men on D-day morning, is blocked by a huge, sand-covered, concrete bombproof impervious to the heaviest fire.

Enter Lieut. Alexander Bonnyman, slim, diffident, Princeton, he is an engineer who owns several cooper mines near Santa Fe, New Mexico. His men have killed dozens of Japanese as they sortied out of the bombproof. Now Bonnyman and five others scramble up the sandy mound in the face of desperate firing.

For a moment Bonnyman is king of the mountain, 17 feet high. Then the Japanese rush him, racing up their side of the hill with shrill yells. Bonnyman stands alone, firing his carbine. He is hit, falls to his knees, rips out a magazine, jams in a fresh one, fires until the enemy turns and runs back down the hill. He follows, rubberlegged, tumbles and rolls to the bottom, dead. Behind him other engineers shove grenades into the ventilators of the bombproof and pour cans of gasoline down the vents. With a tremendous roar it blows up. The marines count 150 corpses inside. Bonnyman becomes the battles fourth and final Medal of Honor winner.

By nightfall on the third day the marines hold a line across the western half of the island and most of the north side. There are 7,000 ashore now, with perhaps 1,000 Japanese still hidden in dugouts. And now, in the dark, the Japanese counterattack at last. Three times they rush forward, at the end reduced to brandishing swords and bayonets. Many commit suicide. Three times they are repelled. Next morning, aided by strafing planes and naval guns, the marines break down the last bombproofs. It is over. Second Marine Division casualties: 1,027 killed, 2,292 wounded, 88 missing. Japanese and Korean casualties: 4,690 dead, 146 captured.

The American public will be outraged at what some call a modern Charge of the Light Brigade. Shortly after the battle, according to a 1962 issue of the Naval Institute Proceedings, a naval board of inquiry took up the question of the tides, although no other report surfaced. Admiral Spruance and all of the principals in the battle denied repeatedly that any such meeting took place. Other top-level conferences after the battle discussed many aspects of Tarawa, among them the need for more amtracs, better early bombardment, improved communications and the creation of underwater demolition teams. But the tides were not listed as a topic.

"INVALUABLE" INFORMATION—INACCURATE DETAILS

Admiral Turner—whose position has always been that he took a calculated risk and lost—will report on the local experts and their "dodging tides": "The information obtained from them was invaluable, in spite of some of it being inaccurate in matters affecting many of the details. * * * Adm. Chester Nimitz in his report says: "Hydrographic information was known to be incomplete. Tidal conditions were about as expected." Admiral Turner's biographer concludes: "All those in command at Pearl [Habor] realized that the shallow coral reef, aptly called a barrier reef * * * was a major hazard for the assault forces. * * * All were acquainted with the possibility of a 'dodging tide,' but the chances of it occurring on 20 November 1943 were judged slim. The risk was accepted along with dozens of other risks."

In a 1987 issue of *Sky & Telescope*, physicist Donald W. Olson, a professor at Southwestern Texas State University, analyzed the Tarawa tides and calculated that "from 9 a.m. until 10 p.m. on November 20, 1943, the water hovered within 6 inches of its mean level, 3.3 feet. It was a neap tide of reduced range, technically neither a dodging nor a

vanishing tide.* * * "But, Olson says, Navy experts at the time could not have predicted the atoll tides accurately because they did not then possess the detailed tidal "harmonic constants" for Tarawa.

As for "Howlin' Mad" Smith's postwar opinion that the battle should never have been fought at all, it is not widely shared. That early in the war no one could predict the effect of bypassing Tarawa and Makin. "Smith advocated going straight on into the Marshalls," former correspondent Sherrod points out. "But we know now that the Japanese were prepared to resist an invasion there. Tarawa had to be fought."

Sherrod, 84, who saw the action all through World War II, including Iwo Jima and Okinawa, says no experience matched wading in for 700 yards under shattering fire with the fifth wave at Tarawa. His book *Tarawa: The Story of a Battle* makes you feel you were there.

After the battle, in the quiet, naked Marines splash happily about in the cove, ignoring the signs warning of mines. As they look to the blue horizon, they get a nagging sense that something is missing. The dazzling white line of surf that brought death to so many has disappeared. At last the tide is up. The reef is gone!

COURT CONDEMNS HILLARY CLINTON'S TACTICS

HON. CHRISTOPHER COX

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 10, 1993

Mr. COX. Mr. Speaker, on Tuesday, November 9, the U.S. District Court for the District of Columbia ruled that defendant Hillary Rodham Clinton had no even arguable basis for withholding information about her health care task force from the public.

The judge called her rejections meritless. He called her responses incomplete and inadequate. To her refusal to respond to discovery request, the judge said: "The court condemns this litigation tactic, and will not tolerate it in future responses in this case."

According to campaign accounts, legal experts say that this is the "harshest criticism of the White House by a Federal court since Watergate."

The full text of the opinion follows:

[U.S. District Court for the District of Columbia, Civil Action No. 93-0399]

ASSOCIATION OF AMERICAN PHYSICIANS AND SURGEONS, INC., ET AL., PLAINTIFFS, VERSUS HILLARY RODHAM CLINTON, ET AL., DEFENDANTS

MEMORANDUM AND ORDER

This matter comes before the court on plaintiffs' motion to compel answers to interrogatories and production of documents. The Court has carefully read each of defendants' responses, along with all memoranda in support of and in opposition to plaintiffs' motion. On October 20, 1993, counsel also presented oral arguments to the court.

The exception to the Federal Advisory Committee Act applying to each working group body must be on the basis that the group is composed wholly of full-time government employees. (Court of Appeals' slip op., p. 26). When the body (be it a sub-group or whatever) is asked to render advice or recommendations as a group, it is a Federal Ad-

visory Committee Act advisory committee unless it is composed wholly of full-time government employees. (*Id.*, p. 29). This court's task is to inquire into:

1. The formality and structure of the working group and its sub-groups to determine if there are advisory committees within the working group, even if the working group itself is not an advisory committee.

2. The truth of the government's claim that all members of the working groups are full-time officers or employees of the government.

3. The status of the special government employees, where they came from, how many hours they worked, and whether they were full-time.

4. The status of the consultants—did each only come to a one-time meeting, or is his or her role functionally indistinguishable from other members of the group or sub-group. Any consultant who regularly attended and fully participated in meetings should be regarded as a member of that group or sub-group, and the consultant's status as a private citizen would then disqualify that group or sub-group from exempt status under the Federal Advisory Committee Act.

The Court of Appeals specifically cautioned that the Federal Advisory Committee Act cannot be avoided by simply appointing, for example, "10 private citizens as special government employees for two days, and then have the committee receive the section 3(2) exemption as a body composed of full-time government employees." (*Id.*, pp. 31-32).

Importantly, Circuit Judge Buckley, in his concurring opinion, noted the importance of the government's argument regarding compliance with ethics laws:

"Mr. Magaziner . . . took pains to stress the fact that every member of and consultant to the group—whether a regular or special government employee, whether working full time or part, for pay or without—was required to file a financial disclosure statement and to comply with other requirements of these laws."

(Court of Appeals slip op., Buckley, J. Concurring, at 11-12.) Discovery into the truth of Mr. Magaziner's affidavit on this point, then, also appears to be warranted.

Rule 26 must be liberally construed to allow discovery into any factual matter that is germane to any of the remaining legal issues in this case, and that may lead to the discovery of admissible evidence or may relate to circumstantial evidence.

Defendants have submitted meritless relevancy objections in almost all instances, and incomplete and inadequate responses in most instances, and plaintiffs' motion to compel shall be granted as set forth herein.

The court rejects defendants' objection that because the current complaint has no specific allegation that "the interdepartmental working group, its cluster groups or subgroup or any other groups were subject to the FACA" plaintiffs are not entitled to seek discovery on these issues. The complaint can be amended to conform to the evidence discovered, and there is no basis at this late stage—on remand, after full briefing—to now raise an archaic technical pleading objection. After full discovery, the court will require an amended complaint to be filed that conforms to the evidence and frames the issues for deciding dispositive motions or, if necessary, trial.

The court also rejects defendants' interpretation of their obligations to respond to outstanding discovery on an on-going basis. For example, in defendants' response to discovery request No. 2 (at p. 8), defendants noted

that "there are a few additional individuals listed who may have maintained expert or consultancy agreements . . . [who] are not designated as having been retained by a particular governmental entity pending the results of a continuing search for pertinent documentation." The proper response by the government would have been to file its incomplete information and move to enlarge time for filing its complete answer, with an estimate of how much time would be needed. Instead, the government decided it would file an incomplete answer and they supplement it whenever it pleased, effectively divesting this court of control over the discovery process and ensuring that during the briefing process on the motion to compel the government would continue to produce dribbles and drabs of information at its convenience. This has unnecessarily complicated judicial review by providing a constantly changing target. The court condemns this litigation tactic and will not tolerate it in future responses in this case.

Defendants initially submitted a preposterous response to plaintiffs' request for lists of individuals who participated with each working group, saying that for Groups 1A and 2A-D "no such list was ever created." The lack of a formal, pre-existing list obviously did not excuse defendants from complying with plaintiffs' request. Apparently even defendants now recognize that, since they have now filed supplemental responses regarding the individuals in Groups 1A and 2A-D. Again, the court rejects this improper litigation tactic.

Even more egregious, however, is the defendants' response that the lists of meeting participants they created "should not be understood as fully exhaustive or completely accurate lists. . . ." Defendants go on to say that given "the fluidity and informality of the process by which individuals participated in the interdepartmental working group . . . [the lists] contain the names of some individuals who did not attend any meetings or who only attended one or two. Similarly, some individuals who attended some working group meetings are undoubtedly not listed." Defendants admitted at oral argument that no effort was made to check the records of each working group for agendas, meeting minutes, and lists of participants, because such documents were not "routinely" prepared. This does not justify the government's refusal to find and produce those documents that were prepared—albeit perhaps pursuant to a protective order.¹ Defendants also admitted at oral argument that they made no effort to check Secret Service records of meeting participants. Again, while such records would not be complete—since some people with appropriate passes would not be listed—they would be probative, since the names plaintiffs are most likely seeking are those most likely to need special clearances for meetings. Defendants cannot simply check the records that happen to be in

¹The court understands the defendants' concerns about production of substantive working group documents which will be publicly released only if plaintiffs ultimately prevail. The court does not understand, but is willing to consider, any argument defendants might make for a protective order for agendas or minutes, to preclude use except in connection with this litigation. The court is doubtful that a protective order is warranted for participant lists. What the court has no doubt whatsoever about, however, is plaintiffs' entitlement to have an appropriate search conducted to locate all such agendas, minutes, and lists. To the extent that plaintiffs' original wording was overbroad, it has now been refined. Plaintiffs are entitled to try to gather evidence to show that "consultants" are the functional equivalents of fully participating members of groups and sub-groups.

Mr. Magaziner's office, a "sampling" of other records, and then claim to have properly responded. Defendants have again improperly thwarted plaintiffs' legitimate discovery requests.²

Defendants have refused to provide full information on what they call "audit groups" that were outside the interdepartmental working group, and have provided no information whatsoever on the "drafting group." The court rejects the argument that plaintiffs are not entitled to all germane information about all of the groups and sub-groups at the White House that dealt with health care reform issues. It matters not what label or title the group or sub-group had. Plaintiffs are entitled to inquire into the formality and structure of all these groups and sub-groups, and defendants are again improperly withholding the germane information.

Time and attendance records and records of payments made (for *per diem* or other work or for travel and other expenses) are clearly germane evidence since they may provide circumstantial evidence that plaintiffs can use to argue that the government's labels as special government employees as well as consultants are a sham. The same is true for financial disclosure or ethics forms—the signature and date and fact the form was or was not completed is germane to plaintiffs' contentions. The court will allow redaction to those other parts of the forms that are not already publicly available. Defendants have, however, even refused to provide to plaintiffs forms that are already publicly available. Defendants have no even arguable basis for such improper withholding.

Plaintiffs' Motion to Compel is GRANTED as set forth herein. Defendants shall, within 20 days of this date, file their final supplemental discovery response.

Plaintiffs are entitled to their attorney's fees, having prevailed on their motion to compel, and such an award of fees is not unjust under Rule 37 of the Federal Rules of Civil Procedure. Plaintiffs' detailed statement of fees and costs shall be filed within 10 days. Defendants may comment thereon within 5 days thereafter.

So ordered.

ROYCE C. LAMBERTH,
U.S. District Judge.

VETERANS DAY, 1993

HON. NITA M. LOWEY

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 10, 1993

Mrs. LOWEY. Mr. Speaker, I rise today to salute the millions of Americans whose courage has sustained our freedom. Through five wars and a long twilight struggle with tyranny, these heroes sacrificed for love of country, not only answering the call of our flag, but also honoring its meaning.

Seventy-five years after the armistice that concluded World War I, let us together honor their extraordinary contribution, and reflect upon the responsibilities they have entrusted to a great nation in a new world.

Because of their deeds, we know that greatness is not measured in force of arms, that

America is not emboldened by the pride of force, but by a deeper standard. They served not for self, but for a cause. They fought not to conquer, but to save. They struggled not in defiance of our humanity, but in its celebration.

That certainty, measured in a million acts of quiet determination, makes us weep for joy at the sight of the stars and stripes. A flag astride a vast land, lifted by ambition, limitless in its gentle charity. Emblem of the greatest Nation and people ever to walk the Earth.

Because they have done their work so well and with such effectiveness, we approach a new era, free of fear, but full of challenge. Yet the cause for which America's veterans served endures.

In their name, let us rededicate ourselves to the expansion of real freedom for all men and women—real freedom, and the opportunity to enjoy it. Let us summon the spirit of mission to a new call for leadership. Let us remember the dignity of ordinary Americans, summoned from home and family to meet the challenges of a great nation destined to lead.

We owe our heroes not only a guarantee of steadfast support in times of need or adversity, not only a special commitment to address the medical and social conditions which face so many of them, not only a dignified quality of life, but above all, an unyielding faith in the values which guided them home from the great crucibles of our time.

May God bless them, and may God bless America.

POLITICAL STATUS OF PUERTO RICO

HON. PETER DEUTSCH

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 10, 1993

Mr. DEUTSCH. Mr. Speaker, today I rise to talk about an issue which should be important to all Americans. On Sunday, the people of Puerto Rico will hold a plebiscite on the future political status of the island. As most of my colleagues are aware, the three options being considered are commonwealth, statehood, and independence. I take a special interest in Puerto Rico since my Florida district is the closest district to this part of the United States.

I am a strong supporter of self-determination for the people of Puerto Rico. As U.S. citizens, Puerto Ricans have made many valuable contributions to our country's heritage and culture. Although I believe statehood is the best option, I will support and work toward passing legislation on whatever option the people choose.

The people of Puerto Rico will only enjoy the full rights of their citizenship if Puerto Rico becomes a State. As long as the island remains a territory, Puerto Ricans will be totally dependent upon the wishes of Congress. This problem can be seen by the recent congressional decision to significantly curtail tax breaks for U.S. companies located on the island. In the history of the United States, territories that applied for statehood have never been denied admission to the Union. If the people of Puerto Rico choose statehood, I will

do whatever I can to pass good enabling legislation which would allow them that option.

I would like to bring to my colleagues' attention an issue which has been raised during the plebiscite campaign that greatly disturbs me. Several Members of this body have claimed that Puerto Rico should not become a State due to its different culture and language. Moreover, some politicians on the island claim that Puerto Ricans will be forced to speak only English. I deeply resent these scare tactics and statements which are being used to mislead the Puerto Rican people.

The people of Puerto Rico have only to look at the Congress of the United States to see that these statements are false. If Hispanic culture and language was suppressed by various States, we would not have 14 Members of Congress in the Hispanic Caucus. I want the people of Puerto Rico to understand that they can choose statehood and protect their language and culture at the same time.

The ability to protect the Hispanic culture and enjoy the full rights of U.S. citizenship is best symbolized by Florida's own Cuban-American community. In fact, the Cuban-Americans successfully lobbied Dade County this year to overturn the English-only law. Cuban-Americans enjoy full political rights and retain their own culture as much as they desire. Like California, New York, and many other States, Florida has a successful Hispanic population which enjoys full political rights.

The people of Puerto Rico should not be misled by those claiming that statehood would jeopardize their own culture. Puerto Rican voters should base their decisions on what is best for their island politically and economically. On Sunday, Puerto Ricans should vote their conscience and not be misled by scare tactics.

HONORING THE 25TH ANNIVERSARY OF THE EDUCATIONAL INFORMATION AND RESOURCE CENTER

HON. ROBERT E. ANDREWS

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 10, 1993

Mr. ANDREWS of New Jersey. Mr. Speaker, I rise today to bring to the attention of my colleagues an important educational resource in New Jersey. The Education Information and Resource Center [EIRC], located in Sewell, NJ, is being honored on the occasion of its 25th year of outstanding service to schools, parents, agencies, and communities.

Since its inception, this unique New Jersey resource has been able guided through the strong and effective leadership of a 21-member board of directors who represent the total educational community: teachers, administrators, school board members, parents, and representatives of business, industry, and higher education.

The center has achieved special recognition for its key role in developing and sustaining model educational and human service programs at all levels and is highly valued throughout New Jersey as well as in 36 States and a number of foreign countries.

² Defendants' burdensome argument is categorically rejected. This court does not accept such arguments without specific estimates of staff hours needed to comply, and defendants submitted no such estimates.

The center, which was founded in 1968, is the national headquarters for the National Talent Network, Hands Across The Water, the National Assault Prevention Center, the Information and Research Service, and the National Diffusion Network's State facilitator.

I resolve today that this House honor and congratulate ERIC on the occasion of its 25 anniversary, comments its 25 years of steadfast and excellent service to the children and parents of this country, and extends best wishes for continued success in the years to come.

I further resolve that a duly authenticated copy of this resolution, signed by the President and attested by the Secretary, be transmitted to the Educational Information and Resource Center.

TRIBUTE TO THE DONALD JACKSON NEIGHBORHOOD CORP. AND PRUDENTIAL INSURANCE CO.

HON. DONALD M. PAYNE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 10, 1993

Mr. PAYNE of New Jersey. Mr. Speaker, I would like to take this opportunity to draw to the attention of my colleagues in Congress the accomplishments of an outstanding organization in my district, the Donald Jackson Neighborhood Corp. [DJNC].

The Donald Jackson Neighborhood Corp. and Prudential Insurance Co. are being nationally recognized and celebrated by Social Compact, an industrywide effort of banks, thrifts, insurers, secondary markets, and mortgage companies to form community alliances with neighborhood nonprofit organizations to strengthen our Nation's "at-risk" neighborhoods. The Donald Jackson Neighborhood Corp. and Prudential have been selected from almost 120 applicants nationwide as Honorees for Partnership Achievement in conjunction with the 1993 Outstanding Community Investment Awards Program, which brings national recognition to outstanding partnership-based strategies for strengthening disadvantaged neighborhoods.

The Donald Jackson Neighborhood Corp. was founded in 1987 by the residents of Clinton Hill in Newark, NJ, by members of the Blessed Sacrament Church, a Roman Catholic parish. The Donald Jackson Neighborhood Corp. believes that social stability helps solve the problems of drug abuse, crime, and poverty endemic to disadvantaged populations. This nonprofit organization works to renew their urban community by assisting leaders to address critical neighborhood issues: providing affordable housing for low- and moderate-income families; establishing education, crime prevention, and employment programs and working to promote the economic development of the community.

The Clinton Hill section of Newark's south ward is one of the poorest neighborhoods in the city. Since 1967, more than 20 multifamily dwellings in the area have been destroyed or abandoned, resulting in the loss of thousands of housing units. This loss represents more than half of available rental housing in the neighborhood.

In addition to the physical disintegration, the community is plagued by crime. The crime rate in Newark is 1½ times that of the entire county, and the violent crime rate is almost double the county average. Muggings, shootings, and car thefts are common occurrences, and drugs are sold openly on street corners.

The Donald Jackson Neighborhood Corp. uses a multifaceted approach to combat the problems of the Clinton Hill community. The Donald Jackson Neighborhood Corp. and another organization rehabilitated two abandoned residential buildings, creating 70 low-income rental units. It has also developed another housing complex on its own, and led a campaign to attract public investment in Clinton Hill.

The corporation has, with other organizations, implemented a "Pass Plan" in neighborhood schools where high school graduates are able to qualify for special "passports" to career-oriented jobs or special college tuition scholarships. The corporation has worked with civic leaders to present forums on crime and persuaded the police to increase their presence in the community. As a result, the levels of violent crime and car theft have declined.

Prudential Insurance Co. has been a leader in the DJNC partnership. Prudential has demonstrated commitment to community revitalization by investing in affordable housing intermediaries such as the Local Initiatives Support Corp. [LISC] and the National Equity Fund [NEF]. Both LISC and NEF have been strong supporters of the Donald Jackson Neighborhood Corp. in addition to its financial contributions, Prudential generously donated personnel resources who have served as consultants to the corporation's many neighborhood projects. The Prudential has also been instrumental in using its influence to negotiate for building sites and tax abatement with government officials.

Clinton Hill has already benefited from the efforts of the Donald Jackson Neighborhood Corp. As a result of the lower crime rate, residents feel safer to venture into their community. Children are being offered more opportunities in school and in their range of possible careers. More people are going to bed at night with a roof over their heads. The economic needs of the community are being addressed, and many business owners have begun to see the potential of the area. Clinton Hill still has many problems, but the corporation's work has started it down the road to recovery.

In a time when our attention is becoming increasingly focused on the problems with modern society, it is nice to be able to focus on a real solution. The partnership between the Donald Jackson Neighborhood Corp. and The Prudential is a shining example of what can be done when we cooperate to work toward a common interest—the betterment of our entire community.

I want to again urge my colleagues to join me in commending the Donald Jackson Neighborhood Corp. for its commitment and its continued work in this regard, and I applaud them in their endeavors.

GUTIERREZ SLIAG EXTENSION BILL

HON. LUIS V. GUTIERREZ

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 10, 1993

Mr. GUTIERREZ. Mr. Speaker, today I am introducing a bill that is a fine example of the type of work the Congressional Hispanic Caucus has dedicated itself to during this term—reasonable, fiscally responsible legislation that helps Hispanics—and non-Hispanics across our Nation.

I want to thank my colleagues in the Hispanic Caucus who have been absolutely instrumental in helping to craft this important bill. I also want to thank the community groups and immigrant-advocacy groups across this Nation who have been a vital part of this process and I look forward to working with them to push this legislation forward and make it law.

The purpose of this legislation, Mr. Speaker, is really quite simple, yet urgently important.

It is designed to make it easier for people to become citizens of the United States. And it provides them with the tools and resources necessary to reach that important goal.

Let me briefly explain what this bill accomplishes. It amends the Immigration Reform and Control Act of 1986 to extend money made available under the State legalization impact assistance grants—better known as SLIAG.

This funding was made available in 1986 to provide educational services—such as English-language classes—and community outreach activities regarding citizenship and naturalization.

This was a wise and prudent allocation of money—an allocation that has eased the way for many of our brothers and sisters to become citizens and join in all the privileges that citizenship brings.

However, in a rare occurrence for this U.S. Congress, the authorization for this money has run out before the money has.

My legislation will not appropriate any new money, but it will allow States to continue to use already appropriated funds through 1997.

It does this in two simple steps.

In 1995, every State will be eligible to use unused SLIAG funds to pay any outstanding, allowable claims. After all allowable claims are paid, the remaining money—at least \$61 million—will be available to continue to provide educational services and public information and community outreach to eligible legalized aliens through 1997.

Also, States would be able to utilize any additional funds available for other services allowed in current law.

The timing of this is critically important.

As many of you know, the bulk of people made eligible for citizenship by IRCA will become eligible for citizenship during the next 3 years—just after SLIAG funds run out.

This extends the period of eligibility of these funds, which extends our ability to help people reach for the dream of citizenship.

Quite simply, this legislation guarantees that money allocated—not new money—money already allocated—to help people become citizens is spent for exactly that purpose and that purpose only.

Mr. Speaker, I truly believe this legislation is critical.

It seems we cannot discuss any issue in this Congress this year without having it become a discussion of immigration and immigrants.

Many of our colleagues would have you believe that every concern that comes before this Congress—from health care to unemployment compensation—is really a concern about immigrants and immigration.

We know, and statistics show, this simply is not the case.

But that is not to say that we should not make every resource available to people who come to this country with no desire other than to work hard and share in the American dream.

Our cities are filled with these people. From the Bronx to Los Angeles back to Humboldt Park and Pilsen and Little Village in Chicago, our neighborhoods are filled with people looking to build and develop our communities in America. And sometimes, all they need is a helping hand. This legislation gives them that help. It tells them that help is available. Help in learning to speak English. Help in learning about our Nation. Help in identifying the resources and programs that are available to them. Help in reaching the dream of becoming an American citizen.

That is the dream that this SLIAG extension will help every eligible legalized alien reach.

I thank my colleagues once again for their support, and I urge quick passage of this important legislation.

HEALTH CARE REFORM

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 10, 1993

Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington Report for Wednesday, November 10, 1993, into the CONGRESSIONAL RECORD:

HEALTH CARE REFORM

We are at the beginning of a long, arduous, and probably confusing congressional debate over health care. The clash will invoke some of the grand concepts in American politics: the quest for security versus the desire for individual freedom, the role of government action versus the cynicism about the ability of government to deliver, the needs of the poor and the aged against the anxieties of a hard-pressed middle class. The major issues of the debate include financing, choice of provider, who to cover, and what benefits to provide. The discussion involves new terms such as employer mandates, global budgets, health alliances, managed competition, point of service options, and single payer. At the present time none of the major plans can claim anything near majority support in Congress.

The dilemma of health care reform is that it seeks to answer two fundamental questions that push in opposite directions: how do we extend basic health coverage to 37 million uninsured, and how do we restrain the rapid rise in health care costs. There is great pressure to minimize the role of government but at the same time there is doubt that coverage will ever be universal or costs ever be contained unless the government intervenes.

PROPOSALS

How you approach health care reform depends on whether you think the system is in crisis or does not need much fixing. Proposals in Congress go from one extreme to the other, from a "single-payer plan" in which government would raise enough money through taxation to pay for health care for everyone, to plans that only tinker with the present system, such as by making insurance market reforms. The President's plan and most of the other viable proposals are somewhere in between.

The President's proposal is an extraordinary mix. It contains a passion to help the needy, a faith in free markets, and a focus on the middle class. It relies on existing health care services and expands price and quality competition among providers, while at the same time establishing an elaborate new framework of government regulations and price controls. But what strikes me most of all about it is its sheer complexity, its ambition, its determination to transform the health care system and make it work better. It is not a cautious plan. It is bold and visionary and pushes the boundary of what is doable. Already it has had more scrutiny than almost any legislative proposal in history.

POLITICAL PROCESS

Any health care reform proposal will have to satisfy hundreds of political constituencies that are deeply engaged in the battle over the issue. The President has already made many adjustments in his original proposal, and he is trying to answer criticism coming from the left and the right. He has quite clearly said that when it is over, he wants to achieve comprehensive health care security for all Americans. Everything else seems to be negotiable. My guess is that we are only at the beginning of the adjustments and compromises that will be made in the days ahead in the President's proposal. Politically, the challenge will be to build and maintain a sprawling coalition that will hold together during the debate.

Never has the consensus to overhaul our health care system been so strong. Republicans and Democrats in Congress want it, so do health care professionals, local government, big business and labor, and most other Americans. In one recent poll, 94 percent of those surveyed thought health care needed "fundamental reform or to be completely rebuilt". At the same time, people often mean quite different things when they talk about the need for reform. They assess the proposals in terms of how they would affect them—both as to cost and benefits. Part of the complexity of health care reform is that people are in so many different categories: uninsured, part-time worker, families with or without children, Medicare or Medicaid recipient, disabled, veteran, self-employed, federal worker, employee of large firm.

One question on my mind is whether the sense of urgency among the public which has marked the health care reform debate thus far will be sustained. The pace of legislation is sluggish and it will not be easy to maintain the momentum necessary to pass legislation. Many lobbying groups on health care want only minor change and are urging Congress to go slow. Another factor is the approach of next fall's elections. The conventional wisdom is that the closer the election, the more difficult it is to pass major legislation. But health care could be different. Thus far, most politicians think that the people are telling us: "Pass something."

MAJOR ISSUES

I think the primary points of contention will be several. First, the biggest fight will

likely be over how to pay for the plan. The President is proposing that the system be financed largely through an employer mandate, which would require employers to pay 80 percent of the cost of the average priced plan sold within the area. Others favor: a mandate requiring individuals to purchase coverage, no mandates, or broad-based taxes on companies and individuals. Some are concerned that cutbacks in existing health care programs to finance other benefits may be too fast, too soon, too much.

A second major point of contention will be the benefit package. Obviously the more generous the benefits, the greater the cost. Some lawmakers want to scale it back; others want to add services such as chiropractic care. Americans also want the package constructed so they can keep their own doctor.

A third issue will be how to control costs. The President's plan would limit the amount that health premiums would be allowed to increase each year. That puts a burden on health plans to figure out how to live within the budget. Others do not believe the government should have any role in limiting prices, while some believe the government should apply a Medicare-type fee schedule for all doctors, hospitals, and health providers.

The power of the new health alliances the President's plan sets up will also be a point of contention. Some fear that these large quasigovernment alliances will be much too powerful, given their authority to dictate which health plans can sell coverage and at what price.

Another key issue is how quickly coverage should be expanded. The President provides subsidies for low-wage workers and small businesses and would expand benefits for long-term care and prescription drugs. Many in Congress are skeptical about the President's estimates of how much the government subsidies would cost and they would prefer to delay the target date for universal coverage.

CONCLUSIONS

Although I have many questions about his proposal, and believe it must be scrutinized by Congress and the American people, I do think the President has performed an important public service in putting health care reform to the front of the national agenda. The system today gobbles up huge amounts of dollars and bypasses many people in the country. He is forcing the country to acknowledge this, and he has made a bold proposal to try to make something happen.

HONORING JOAN RIBAUDO FOR 25 YEARS OF COMMUNITY SERVICE

HON. JERROLD NADLER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 10, 1993

Mr. NADLER. Mr. Speaker, I rise today to join the many grateful neighbors in Bensonhurst and Gravesend who will tonight honor Joan Ribaudo for her 25 years of distinguished community service at a reception to be held at the Oriental Manor in Brooklyn.

As is so often the case, Joan was drawn to community service out of concern for the welfare of her children. Starting as a den leader coach for the Cub Scouts and a troop leader with the Girl Scouts, Joan became active in her local schools. She served the Parents-Teachers Association of P.S. 247, serving as

co-president and president for 2 years. When her children graduated to Seth Low Junior High School, she served on the PTA there as treasurer and as first vice president.

Joan also served on the board of Coney Island Hospital and rallied to the aid of the Marlboro community in a time of crisis. She has worked effectively as a member of the Seth Low Community Council, the Bensonhurst West End Community Council, Community Board No. 11 and was elected by her neighbors as the Democratic State committee-woman/district leader of the 47th Assembly District.

As a member of the New York State Assembly and recently as the representative in Congress serving Bensonhurst, I have known Joan Ribaldo as a member of the staff of my former colleague Assemblyman Frank Barbaro. Joan's skill and dedication in meeting the needs of the citizens of the 47th Assembly District has earned her the respect, love, and admiration of the entire community.

Mr. Speaker, these days we hear a lot of talk about reinventing Government and making Government more accountable to the people. In our corner of Brooklyn, however, these laudable principles are alive and well. Concerned citizens are active in their communities, and they strive to make life better for their neighbors and for their children. Joan Ribaldo is one such citizen. Her 25 years of service to the people of Brooklyn is an example of citizenship at its finest. I hope every member of this House will join me and Joan's neighbors in honoring her service and her example.

INTRODUCTION OF THE FECA FRAUD DETERRENCE ACT

HON. HARRIS W. FAWELL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 10, 1993

Mr. FAWELL. Mr. Speaker, today I am introducing legislation designed to deter fraud and abuse in the Federal Employees' Compensation Act [FECA]. This bill would enable the Department of Labor to eliminate benefits to individuals who have been convicted of defrauding the FECA program and save the Federal Government \$22.6 million over 5 years.

FECA is a workers' compensation law applicable to more than 3 million civilian employees of the Federal Government. It is a generous program that pays tax-free, inflation adjusted benefits to injured workers. The program pays compensation directly to injured employees, provides for the payment of medical expenses, and pays benefits to dependents of covered workers in case of a work-related death. Responsibility for administration of the program lies within the Department of Labor in the Office of Workers' Compensation Programs, [OWCP].

Currently, the criminal and administrative sanctions applicable to persons committing fraud against the FECA program are very limited. In some cases when OWCP discovers fraud they are unable to terminate benefits. Consequently, former Federal employees who have been convicted of defrauding the work-

ers' compensation program continue to receive benefits under the program simply because OWCP lacks the statutory authority to terminate compensation benefits. There is no reason why individuals who are in jail should continue to receive benefits from the very program they were convicted of defrauding. Under current law, FECA benefits may be suspended or terminated only where the medical evidence establishes that the compensable disability has ceased or where the claimant has refused to work after suitable employment has been offered.

While the majority of FECA claims are legitimate, a minority of the claims involve individuals filing fraudulent claims. In one instance, an individual failed to report that he was working while receiving FECA benefits. It was later discovered that the individual had, in fact, made false statements and fraudulently received almost \$200,000 in FECA benefits. Although he was tried and convicted in Federal court on these charges, OWCP was unable to terminate his compensation benefits based solely on his conviction for making false statements to acquire benefits.

Eliminating fraud in the FECA program is just one of the many items included in Vice President GORE's National Performance Review report on reinventing Government. Enactment of this legislation would enhance the deterrent value of the Federal Employees' Compensation Act, enable the Government to punish those who defraud the program and, most importantly, save the taxpayers the cost of supporting those who defraud the program.

TRIBUTE TO THE PARTNERS IN EDUCATION PROGRAM

HON. SHERROD BROWN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 10, 1993

Mr. BROWN of Ohio. Mr. Speaker, I rise today to recognize the accomplishments of the "Partners in Education" Program being carried out at Eastern Heights Junior High School in Elyria, OH.

Partners in Education is a unique program that has given students more reasons to stay in school as well as an incentive to work harder. By forming a student-mentor relationship with local business and government leaders, students gain an invaluable wealth of knowledge and experience.

Leaders who participate in this program act as mentors and tutors, donors of equipment and supplies, and special contest sponsors. Whether it be the donation of a free meal to honor roll students, or the gift of a free saxophone lesson from a professional musician, the incentives and encouragement by local business and government leaders seem to be working.

The success of Partners in Education can be seen in a variety of areas. The most obvious being an increasingly positive attitude from the participating students about learning, and a greater interest in assuming new responsibilities. In addition to a higher percentage of students making the honor roll there has also been increased parental involvement

in PTO/PTA programs and teachers are more motivated and excited.

The Partners in Education program is the type of creative approach to learning that is making a difference in our schools and the lives of young people. Please join me in commending this combined effort by business and government leaders to help parents and educators reward and support students in furthering their educations.

TRIBUTE TO JULIA WASHINGTON ON THE OCCASION OF HER RE- TIREDMENT FROM THE PUBLIC SCHOOL SYSTEM

HON. EDOLPHUS TOWNS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 10, 1993

Mr. TOWNS. Mr. Speaker, it is with great pride that I honor Julia Washington, an educator who has contributed a vast amount of her time and efforts to the New York community. On Friday, November 12, 1993, a special celebration will take place in Queens, NY. On this evening, an outstanding citizen and educator will be recognized on her retirement from a remarkable career. Ms. Washington is retiring from her position as principal at P.S. 284.

Ms. Washington earned a bachelor of arts degree in education from Brooklyn College. She proceeded to obtain a master of arts degree in education. Subsequently, she took supervision and administration courses at St. Johns University. Her hard work resulted in a New York State Teachers Certification for school administrator and supervisor.

Julia has held a number of notable positions. She has worked as a district educational coordinator, an acting assistant principal, a supervisor for the summer Headstart Program, and an early childhood supervisor. Her responsibilities included assisting teachers, developing good teaching techniques, and implementing educational programs.

Her civic activities have been prolific. She has served as chairman for the Girl Scout Council of Greater New York and for over 5 years. Julia was the den mother for the Boy Scouts of America South District for 2 years. Transcending the work of most citizens, Julia has worked with parents and the community in implementing educational and early childhood programs, while distributing necessary information and materials to set these plans in motion.

Now retiring from 23 years of experience as principal at P.S. 284, Julia Washington has earned every honor that has been bestowed upon her. Please join me in acknowledging Ms. Washington for her selfless service to our children and the community. She is one of the greatest educators of our time.

MAAC PROJECT

HON. BOB FILNER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 10, 1993

Mr. FILNER. Mr. Speaker, I rise today to acknowledge the contribution made by the partnership between the Metropolitan Area Advisory Committee [MAAC] project and the International Savings Bank in my congressional district.

This partnership was recently honored nationally by the Social Compact with America's Neighborhoods 1993 Outstanding Community Investment Award, which brings recognition to outstanding partnership-based strategies for strengthening disadvantaged neighborhoods.

The MAAC project is a nonprofit, social service agency serving more than 30,000 residents of San Diego County. Founded in 1965, the MAAC project operates 23 separate programs, addressing the employment, housing, health care, and education needs of the community. The MAAC project is being honored at this time for creating a major redevelopment project in the Logan Heights neighborhood of San Diego, an area with unemployment hovering around 29 percent.

Through the financial assistance of the International Savings Bank, this redevelopment project will include affordable rental housing for low-income families, social services like child care, job skills training, and family counseling, and commercial space that will bring new stores into the neighborhood, providing needed services and employment opportunities. A cultural center is also planned, complete with a Hispanic theater and museum.

Construction will provide jobs for the unemployed, and 55 percent of the subcontracting will be done through minority-owned firms. A preapprenticeship program will train local youth in the building trade.

In partnership with MAAC, International Savings Bank has agreed to become a permanent lender for the Mercado Apartments development. Besides providing a permanent loan, the bank was able to secure an additional \$800,000 for gap financing.

The Social Compact awards program recognizes the most innovative and effective strategies in the Nation for affordable housing, community, and economic development—carried out by partnerships between financial service institutions and neighborhood-based nonprofit organizations. Social Compact is an industry-wide effort in which hundreds of financial service institutions have committed to increasing the flow of capital into lower income communities and to expanding support for effective neighborhood nonprofit organizations.

It is a pleasure to recognize, with these remarks, the outstanding contribution to the San Diego community by this partnership between the MAAC project and the International Savings Bank—and to congratulate them on receiving the Social Compact 1993 Outstanding Community Investment Award.

LEGISLATION TO ASSURE INTEGRITY OF FOOD STAMP PROGRAM

HON. THOMAS W. EWING

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 10, 1993

Mr. EWING. Mr. Speaker, I rise today in support of H.R. 3436, legislation which seeks primarily to clarify that food stamp recipients will be able to redeem food stamps at all legitimate food stores.

This legislation includes an important anti-fraud provision which I had introduced earlier this year, and which Senator MITCH MCCONNELL had introduced in the other body, as part of a comprehensive food stamp anti-fraud package. My provision would allow USDA to share certain information about food stores that participate in the program with Federal and State law enforcement agencies. This will provide an important deterrent against fraud in the food stamp program, and will open up additional avenues for tracking and pursuing such fraud. Safeguards are present in this legislation to prevent unauthorized use of this information.

Additionally, the committee report contains language to assure that this new definition does not become a back door to participation in the food stamp program by retail establishments which are not actually food stores. I worked with Mr. STENHOLM, Mr. ROBERTS, and Mr. EMERSON on this language, which I feel will provide valuable guidance to USDA in developing regulations to implement this bill.

Mr. Speaker, this legislation will assure that food stamp recipients will be able to redeem food stamps at legitimate food stores, and only legitimate food stores, and will provide USDA with additional means of assuring the integrity of the Food Stamp Program. I urge its adoption.

PUERTO RICO STATUS REFERENDUM

HON. DON YOUNG

OF ALASKA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 10, 1993

Mr. YOUNG of Alaska. Mr. Speaker, on November 14, the U.S. citizens of the people of Puerto Rico will vote in a referendum regarding their preferred relationship with the United States. This is an historic occasion for the people to finally decide if they want to be a permanent part of these United States.

The statehood status definition is clear and consistent with legislative language used to admit previous territories into the Union. However, I am concerned with the highly unrealistic definitions of what constitutes the status choices of commonwealth and independence.

In the interest of political comity, the current pro-statehood government of Puerto Rico permitted the parties advocating commonwealth and independence to supply their own definitions in the referendum law. The result has been a balanced referendum electoral law, but with exaggerated status definitions on the referendum ballot for commonwealth and, to a lesser degree, independence.

It is ridiculous to suggest that the United States would ever agree to a commonwealth with permanent union between Puerto Rico and the United States. Only by being incorporated into the body politic of the United States can Puerto Rico be considered to be in permanent union.

We are a democracy united by a Constitution which extends equal protection, rights, and privileges to all. The United States will not set aside over two centuries of reliance upon this near-sacred document to be "bound by a bilateral pact that could not be altered, except by mutual consent." Even the North American Free-Trade Agreement [NAFTA] allows a member to end the agreement with a 6-month notice.

U.S. citizenship is endowed through the U.S. Constitution. It is through incorporation into the Union that one can obtain irrevocable American citizenship, not merely through some commonwealth guarantee. As unfortunate as it may seem, the citizenship of individuals born in Puerto Rico is not protected to the same degree as those born in a state or where the Constitution has been extended in full. This sensitive subject has been addressed and clarified many times in the recent years by the Congressional Research Service, the Department of Justice, and in several congressional hearings.

It is unfortunate that commonwealth purports to be able to obtain the full extension of Federal programs like the Supplemental Security Income [SSI] and food stamps allocations equal to those of the States, without assuming comparable financial responsibilities. It is a facade for commonwealth to infer that section 936 would be retained for very long in the future, let alone being reformed, thereby somehow assuring the creation of more and better jobs.

The independence definition makes a broad assumption that the United States would agree to let individuals in an independent Puerto Rico retain U.S. citizenship. When the people of the United Nations' trust territory in Micronesia chose to be a freely associated state with the United States, they were denied the option of U.S. citizenship. Many of the other claims of the independence definition are highly speculative as no benefit, program, service, or other right for Puerto Ricans under independence has ever been passed by both Houses of Congress.

The United Nations has resolved this to be the Decade of Decolonization. November 14 will be an opportunity for the people of Puerto Rico to decide how they want to end this decade and century under the United States flag. This is a time for the people of Puerto Rico to ask themselves if they want to be full first class citizens as an equal permanent part of the United States. No other status option on the ballot, not commonwealth and certainly not independence, can realistically guarantee equality under the U.S. Constitution.

I will be watching with intense interest and concern as the U.S. citizens of Puerto Rico choose from among the following referendum status definitions:

STATEHOOD

A vote for statehood is a mandate to reclaim the inclusion of Puerto Rico as a State of the Union.

STATEHOOD

Is a non-colonial status of full political dignity;

Will allow us to have the same rights, benefits and responsibilities of the Fifty States;

Is a guaranteed permanent union and an opportunity for economic and political progress;

Is a permanent guarantee of all the rights provided by the constitution of the United States of America—including the preservation of our culture;

Is a permanent guarantee of American citizenship, our dual language, anthems and flags;

Is complete participation in all Federal programs;

Is the right to vote for President of the United States and to elect no fewer than six representatives and two senators to Congress.

In exercising our rights as American Citizens, we will negotiate the terms of our admittance, which will be submitted to the people of Puerto Rico for its ratification.

COMMONWEALTH

A vote for commonwealth is a mandate in favor of:

A guarantee for progress, our security and that of our children within a status of complete political dignity based on the permanent union between Puerto Rico and the United States, bound by a bilateral pact that could not be altered, except by mutual consent.

COMMONWEALTH GUARANTEES

Irrevocable American citizenship;
Common market, common currency and common defense with the United States;
Fiscal autonomy for Puerto Rico;
Puerto Rican Olympic Committee and international sports self-representation;
Complete development of our cultural identity; with the Commonwealth, we are Puerto Rican first.

We will develop the Commonwealth within specific guidelines set forth to Congress. We will immediately propose:

To reform Section 936, assuring the creation of more and better jobs;

To extend Social Security Complementary Insurance (SSI) to include Puerto Rico;

To obtain Food Stamp allocations equal to those of the States;

To protect our other agricultural products, in addition to coffee.

Any additional changes will be submitted to the people of Puerto Rico for their prior approval.

INDEPENDENCE

Independence in the right of self-government of our people; and the enjoyment of all the powers and attributes of sovereignty.

In the execution of this inalienable and irrevocable right, Puerto Rico will govern itself by a Constitution that will establish a democratic government, protect human rights and affirm our nationality and language.

Independence will give Puerto Rico the necessary powers to attain greater development and prosperity, including the powers to protect and stimulate our industry, agriculture and commerce, control immigration and negotiate international accords that would broaden markets and promote investments from other countries.

A Friendship and Cooperation Treaty with the United States and a transition process to achieve independence, in accordance with federally approved House and Senate committee legislation will enable; the continuation of acquired Social Security veterans

and other benefits; Puerto Rican citizenship and that of the United States, for those who chose to retain it; the right to use our own currency or the dollar; free access to the United States markets; tax incentives for North American investments; Federal funding in an amount equal to the current allocation for at least one decade; and the eventual demilitarization of the country.

IN RECOGNITION OF PATRICK J. NORTON'S SERVICE TO THE CITY OF WAYNE

HON. WILLIAM D. FORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 10, 1993

Mr. FORD of Michigan. Mr. Speaker, I would like to take this opportunity to recognize Patrick J. Norton's 29 years of service on the Wayne City Council. Beginning his continuous service on the Wayne City Council in 1964 and serving as mayor from 1970 to 1975 and again from 1979 to 1991, Pat has been a progressive, future-oriented leader in Wayne.

During Pat's tenure as mayor of Wayne, the city was faced with the challenges that many downtowns confronted in the 1980's—the replacement of the individual retailer with the development of the megamall. As mayor, Pat established a committee to outline a vision for the city into the year 2000. His dedication to urban renewal projects was probably his greatest contribution to the city. Among his achievements as mayor and councilman are the construction of a new community center; the renovation of the old recreation center to be the new city hall; the renovation of the old city hall to be the new 29th District Court; the acquisition, renovation and reopening of the State Wayne Theater; the construction of Goudy, Washington, Mill Trail, and McClaughrey Parks; the renovation of the Wayne-Westland Library; the construction of 76 award winning public housing units; and the renovation and opening of a new public services facility. Pat also worked tirelessly with the Ford Motor Co. on the expansion and renovation of the Wayne Assembly and Michigan Trucks Plants, as well as on the construction of their Wayne Stamping Plant. The citizens of the city of Wayne have certainly had an industrious public servant in Patrick Norton.

Pat's talents and perseverance have been recognized by many. He received the Top Elected Official Award for 1986–87 from the Metropolitan Detroit Area Chapter of the American Society for Public Administration. In 1991, he was chosen by the American Leadership Conference to participate in a conference which provided then-Soviet participants a chance to question Americans about democracy and a freeworld market. Pat was also either elected or appointed to numerous boards including: The board of trustees of the Michigan Municipal League, vice chairman of the board of directors of the Peoples Community Hospital Authority, and chairman of three city committees.

The city of Wayne is losing a dedicated, committed public servant with Pat's decision not to seek reelection. One only has to take a drive around the city of Wayne to witness the

positive contributions of his leadership and service in that community. In 1964, Pat and I began serving the people of the city of Wayne. It has truly been a pleasure working with him to further the interests of our shared constituency. I wish Pat the best in his future endeavors.

HONORING THE REVEREND DR. NATHANIEL TYLER-LLOYD

HON. ELIOT L. ENGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 10, 1993

Mr. ENGEL. Mr. Speaker, I am pleased to acknowledge today the 33d anniversary of the pastorship of the Reverend Dr. Nathaniel Tyler-Lloyd, which is being celebrated at Trinity Baptist Church in my district this week.

In 1960, Reverend Tyler-Lloyd was called to assume the leadership of Trinity Baptist Church, one of the oldest churches in the Williamsbridge section of the Bronx. Since that time, his dedication to his ministry and his leadership in the community have had a positive effect on both the church and the immediate neighborhood. Through his guidance, Trinity Baptist has experienced marvelous growth, which includes a Christian educational center and multipurpose fellowship hall to accommodate an enlarging congregation.

The leadership ability of Reverend Tyler-Lloyd has earned him recognition throughout the Christian community. He has been honored for his compassionate work on AIDS, serves on the boards of an array of respected organizations, and has traveled the world with his family spreading a message of hope.

It is my honor to congratulate Reverend Tyler-Lloyd for all these achievements, and thank him on behalf of my constituents for his continuing efforts.

NAFTA AND ORANGE COUNTY

HON. RON PACKARD

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 10, 1993

Mr. PACKARD. Mr. Speaker, NAFTA will be a tremendous economic boon for Orange County. Like the rest of California, Orange County is still mired in a recession. The county needs an economic boost that will not only benefit us in the long run, but will give us the jumpstart we need now. NAFTA will give us that boost.

In the first year alone, NAFTA will double Orange County's exports to Mexico and create more than 800 new jobs. By the end of the decade, county exports to Mexico will increase fivefold, creating 10,000 net new jobs.

Orange County's most competitive industries will benefit immediately under NAFTA. For instance, when Orange County manufacturers export medical instruments to Mexico, we're slapped with a 16-percent tariff. That raises the price of our goods making us less competitive. NAFTA will immediately eliminate those tariffs making us more competitive.

Mexican consumers will be able to buy our products for 16 percent less than they currently do. When prices go down, sales go up. That means increased trade, increased profits, and new jobs for Orange County.

Orange County's biggest export to Mexico—rubber and plastics—faces similar benefits. Tariffs on these goods which currently go as high as 20 percent will be wiped out under NAFTA. Without NAFTA, Mexico would be free to raise tariffs as high as an incredible 50 percent.

Other Orange County goods that will greatly benefit under NAFTA are computers, electronics, and machinery. Tariffs on these goods will also be zeroed out. But that's not all. Other important trade barriers, such as licensing restrictions and quotas will be eliminated under NAFTA.

When Mexico began removing restrictive trade barriers a decade ago, Orange County exports to that country doubled. But that trend is just a small prelude to the windfall of benefits NAFTA will bring. Rather than tinkering at the edges, NAFTA will dramatically bring down the barriers that impede trade between Orange County and Mexico.

ARSON PENALTIES BILL

HON. STENY H. HOYER

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 10, 1993

Mr. HOYER. Mr. Speaker, as the chairman of the Congressional Fire Services Caucus, I am pleased to join the founder of the Fire Caucus, Curt Weldon, in introducing legislation to increase the penalties for arson crime committed in our country.

In the past 2 weeks, our country has witnessed the destructive nature of arson fires as they raged through southern California, destroying homes, lives, and forever changing the nature of neighborhoods and communities.

It is estimated that the southern California fires resulted in nearly 1 billion dollars' worth of damage and three deaths. I could not read about the three known deaths caused by these fires without thinking back to last year when a young girl in my district was killed after an arsonist threw a molotov cocktail through the window of her babysitter's apartment. Young Vania Zamba was only 1 year old when her life was taken in this premeditated and monstrous act.

I do not believe that the current penalties for arson match the despicable nature of this crime, or the terrible suffering which results from arson fire.

This legislation will double the maximum sentences for convicted arsonists in this country, and, unlike a similar Senate amendment passed last week, will set mandatory minimum sentences. This is a tough bill which will send a strong message to potential arsonists across the country: If you commit this crime, you will do the time.

Annually, 700 people in our country die as a result of arson fire, and nearly 2 billion dollars' worth of property is destroyed. In some of our major metropolitan cities, arson is the No. 1 cause of fire. We cannot allow this trend to continue.

Just this year, Congressman RICK BOUCHER, with the help of Congressman GEORGE BROWN, pushed through the Arson Prevention Act of 1993. This legislation, along with a new training facility for arson investigators—which I have been working on with the Bureau of Alcohol, Tobacco, and Firearms—will improve arson investigations and help identify and stop arsonists before they strike.

It is hoped that the longer and mandatory sentences included in the legislation I introduce today will also stop arsonists before they commit a crime. But in the event they do commit this heinous act, they will have to face better trained arson investigators and stiffer penalties. I urge my colleagues to support this important effort.

BUTLER COUNTY VETERAN OF THE YEAR

HON. THOMAS J. RIDGE

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 10, 1993

Mr. RIDGE. Mr. Speaker, as we approach Veterans Day, I would like to pay tribute to a constituent of mine who, through his community service, has demonstrated the contributions American vets can continue to make to their communities. This coming Saturday, Steve Zavacky, Jr. of Renfrew, PA, will be named Butler County Veteran of the Year, 1993. This is an honor that Mr. Zavacky certainly deserves.

During World War II, Mr. Zavacky served his country with distinction in the Army's 479th Engineer Maintenance Company. Mr. Zavacky's service to his country did not end with his discharge from the Army. In the same since, he has remained active in veterans associations and participated in many community projects. He had ably assisted the Butler County Military Veterans' Committee in various capacities.

In addition, he holds lifetime memberships in both the Michael Kosar American Legion Post 778 and VFW Post 249. And, in his 42 years at the American Legion his posts have included past commander, first vice commander, second vice commander, treasurer, and historian.

An adept designer and builder, Mr. Zavacky supervised the construction of Post 778's Legion Park. This is only one of the numerous projects that Steve selflessly and energetically took on with pride. Other examples of his altruistic spirit are the acclaimed "Wings of Peace" veterans' monument in Penn Township, which he built and designed, and the flagpole and flag monument at the Highfield Community Center.

The love and patriotism Steve feels for his country can be seen in his numerous service projects. Steve's goodwill and hard work reach far beyond the veterans' community. His contributions to the quality of life in Butler County include spending 36 years on the Butler County Safety Council, actively serving his church, and constructing a memorial to honor Pennsylvania State Troopers from Butler who were killed in action.

Saturday will not be the first time Mr. Zavacky will be recognized for the ongoing

contributions he makes to his community. Among the other awards he has received are the Legionnaire of the Year in 1981 and the Volunteer Veterans' Service Award from the VA Medical Center in Butler. Steve is richly deserving of those awards, as well as this latest honor.

TRADE TO BENEFIT BOTH COUNTRIES

HON. THOMAS J. BARLOW III

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 10, 1993

Mr. BARLOW. Mr. Speaker, our debate over the North American Free-Trade Agreement is bringing to the floor a long needed focusing on what the purpose of our trade relations should be. We do not want to be wearing away at the proud societies with whom we trade.

We take as a matter of faith that all sides of wise trade arrangements should benefit. In shaping wise trade arrangements we must try to ensure the well-being of the societies with whom we trade so that strong trading partnerships continue to grow and strengthen through time.

Tariffs are taxes levied at our borders. Clearly tariffs of 11 to 20 percent levied by the Mexican Government on our exports to their nation has not hurt the economic growth of Mexico nor halted the rising volume of exports from the United States to Mexico.

Let us focus on where such tariffs are spent. We want to be a constructive partner with Mexico in its work to develop its infrastructure for the benefit of the Mexican people—roads, schools, hospitals, water systems, police, and fire protection. Perhaps we should collect tariffs at the border on their goods entering our Nation equivalent to their tariffs on our goods entering Mexico and use such moneys through shared lending arrangements to help our valued and proud trading partner, to assist our neighboring Mexican people. We do no less with tax policy for the benefit of our own people. Wise tax policies are essential to ensure that true prosperity is developed in our nations. True prosperity is the well-being of all our people.

TRIBUTE TO PATRICK HASSETT

HON. PETER J. VISCLOSKY

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 10, 1993

Mr. VISCLOSKY. Mr. Speaker, I rise to commend to you today a truly exceptional man, Patrick Bassett.

Thursday, November 11, 1993, marks the observance of Veterans Day, honoring veterans who have pledged allegiance to their country, and all of its endeavors. This day is set aside to recognize the boldness and bravery of those who have fought to uphold the standards of democracy.

On this Veterans Day, a ceremony to honor Patrick Hassett will be held at the Dyer VFW Post 6448, at 2125 Gettler Street, in Dyer, IN.

Mr. Hassett will be honored for his assistance in the transport of United States troops to the Persian Gulf during the gulf war, as part of the Civil Reserve Air Fleet. As a civilian, Patrick does not qualify for military honors; however, his dedication to his country warrants public acknowledgment and praise. I will be honored to have this opportunity to present Patrick Hassett with three Combat and Service Medals, as conferred by the U.S. Air Force: the Air Medal, the Aerial Achievement Medal, and the Desert Storm Civil Service Medal. Patrick will also receive the Liberation of Kuwait Medal, granted by the Kuwaiti Government.

A native of Merrillville, IN, Patrick attended Merrillville public schools, before going on to Army ROTC Program at Embry Riddle Aeronautical University, in Daytona Beach, FL. Upon entering the Army as first lieutenant in 1980, he later ascended to the rank of captain, retiring in 1988. At that time, Patrick entered into employment with Eastern Airlines.

In closing, I would like to again commend Patrick Hassett, and all those who have served their country, for their bravery, courage, and undying commitment to patriotism and democracy. May God bless them all.

IN SUPPORT OF OUR NATION'S
VETERANS

HON. LYNN C. WOOLSEY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 10, 1993

Ms. WOOLSEY. Mr. Speaker, I rise today to remind my colleagues that although we must pay special tribute on Veterans Day to the men and women who have served our country, we cannot forget them on the other 364 days of the year.

Sadly, many of the veterans of Marin and Sonoma Counties are forgotten. The North Bay Vet Center is the only facility between San Francisco and Eureka, a 300-mile span, which provides veterans and their families with counseling and other necessary services. Despite a population of over 60,000 veterans in Sonoma County alone, this center is not fully funded. Mr. Speaker, the North Bay Vet Center has only two counselors and a temporary office manager to handle a caseload 200 percent greater than normal.

I recently asked Veterans Affairs Secretary Jesse Brown to upgrade the North Bay Vet Center to allow our veterans access to the services they have earned. Mr. Speaker, the money is already in the V.A. budget—and I can't think of a better use for it. I hope that Secretary Brown will give a long-overdue Veterans Day present to the veterans of Marin and Sonoma Counties by providing adequate funding for the North Bay Vet Center.

TRIBUTE TO OREGON'S VETERANS

HON. MICHAEL J. KOPETSKI

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 10, 1993

Mr. KOPETSKI. Mr. Speaker, in honor of Veterans Day, I rise to announce a long-awaited

event in my home State of Oregon. This past September, a bill signing ceremony marked the end of an 8-year effort by Oregon veterans and others in their campaign to realize an Oregon State Veterans Home. Oregon Senate bill 447 was signed into law by Gov. Barbara Roberts during a ceremony at the Oregon Department of Veterans Affairs [ODVA].

Legislation which would allow Oregon to participate in the U.S. Department of Veterans Affairs State Home Program has been an ongoing effort for at least a decade. Veterans' organizations have expended much effort, but had not realized their goal until this recently concluded legislative session. Much of the credit belongs to the United Veterans' Groups of Oregon, a coalition of congressionally chartered Oregon veterans service organizations. The American Legion, Department of Oregon, also took a lead role in this issue. ODVA did a superb job of providing technical assistance to the legislature.

With the approval of this legislation, Oregon becomes 1 of 46 States which already have or are building State veterans homes. States are rapidly realizing this cost-sharing method of providing care to their veterans is a benefit for all.

The legislation requires ODVA to plan, construct, and operate a skilled care facility for veterans in need of treatment. The initial facility will have approximately 150 beds, and will provide a variety of care levels.

The care provided to veterans will be varied, depending on the individual veteran's needs. Both skilled and semiskilled care will be provided, as well as specialized treatment for a 25-bed Alzheimer unit. The staff at the facility will assist the veterans to function at their highest, most independent level. Surrounded by other veterans, as well as supportive staff and family, the veterans will receive much deserved recognition as well as care.

The funds required for construction and initial equipment used in the facility will come from several different sources. It is anticipated the Federal Government, through a portion of the U.S. Department of Veterans Affairs grant budget, will provide \$8.4 million—65 percent—of the required funds. An additional \$4.6 million—35 percent—will be guaranteed by the State of Oregon.

Whichever funding approach, or combination of approaches is used, there would be significant economic advantage to the vicinity in which the facility is located. The \$13 million construction and development budget will provide numerous high-wage jobs. Once the facility is in operation, an annual payroll of over \$2 million will be created. Additional dollars will flow into the community through monies spent by facility visitors.

The veterans of this State, working together with their State legislators, have accomplished something some said would never happen. This was accomplished by prioritizing goals, focusing efforts, and setting aside differences. I stand ready to assist my fellow Oregonians in this effort.

TRIBUTE TO GOODWILL
INDUSTRIES' 60TH ANNIVERSARY

HON. VIC FAZIO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 10, 1993

Mr. FAZIO. Mr. Speaker, I rise today with Congressman BOB MATSUI to pay tribute to Goodwill Industries of Sacramento Valley, Inc. for its 60 years of dedicated service to people with disabilities in the six counties of the Sacramento Valley region. Goodwill Industries of Sacramento Valley, Inc. services the counties of Sacramento, Placer, Sutter, Yolo, Butte, and Shasta, much of which lies within the boundaries of the Third and Fifth Congressional Districts, which we serve.

As you may know, Goodwill hires more people with disabilities than any other employer. They also strive to train and place workers with disabilities in a variety of jobs in the private sector. Goodwill Industries of Sacramento Valley, Inc. has 226 employees, 32 of them with disabilities. Some of the graduates of the programs are full-time employees. Goodwill Sacramento has 59 active clients in the rehabilitation programs. The annual average placement into jobs for people with disabilities who go through the Goodwill program is 118 people.

But Goodwill does more than just rehabilitate persons with disabilities. Their practice of the unwritten motto reduce, reuse, recycle, resell, and rehabilitate, has returned taxpaying citizens to the work force and an uncountable amount of donated goods back into the marketplace. Ninety-nine percent of all donated goods are returned to the market rather than end up in a landfill.

For the Sacramento area, Goodwill provides a \$5.4 million budget, only 10 percent of which is for administration. Goodwill is among the top 10 nonprofits nationally in effective administration. Its employees paid, in 1992, \$487,748 in State and Federal taxes.

On November 19, Goodwill Industries of Sacramento Valley, Inc. will celebrate its 60th birthday with an awards dinner at the Radisson Hotel in Sacramento. Mr. Speaker, we take great pride in standing before you today to pay homage to this truly great organization and wish them another 60 years and more of dedicated service to the community—service that will continue to help people move from Government assistance programs to satisfying jobs and independence. When people have jobs, many of our social problems are reduced or prevented. That is why Goodwill Industries is called the working solution, and that is why we take this time to honor their 60 successful years in the Sacramento Valley.

TRIBUTE TO HARLEY KNOX, 1993
CITIZEN OF THE YEAR

HON. KEN CALVERT

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 10, 1993

Mr. CALVERT. Mr. Speaker, one of the things that makes America great is the fact

that in towns and cities across the face of our country there are citizens who are willing to step forward and dedicate their talents and energies to make life better for their friends and neighbors. Riverside County has been fortunate to have many such citizens—men and women who have given freely of themselves so that our beautiful area in southern California will continue to be a desirable place to live for generations to come. Mr. Harley Knox is one of these exceptional citizens.

Mr. Knox has been a successful businessman in Riverside County, having owned and operated three major businesses, including one of the world's largest producers of lawn seed, and a manufacturing company specializing in the engineering and development of seed handling and processing equipment.

In addition to providing jobs for hundreds of Riverside County families through his business enterprises, Harley Knox has generously volunteered his time and talents to the betterment of the entire community. His many civic activities are far too numerous to list, but they include membership in several business oriented groups such as the Valley Group and the Monday Morning Group, as well as civic groups such as Riverside Community College, Riverside County General Hospital, the Silver Eagle Club, the Moreno Valley YMCA Steering Committee, and the Property Owners Association of Riverside.

Mr. Knox is also active in the Inland Empire Economic Partnership, Inc., the California Military Support Group, the Riverside Community Hospital Foundation and the Moreno Valley Business Property Owners Association.

In recognition of his many contributions to our community, Harley has received countless awards including the man of the year award from the U.S. Power Squadron, the outstanding service award of the Building Industry Association, the Riverside Community College Endowed Scholarship Campaign, Award, and numerous other awards and commendations from the YMCA, March Air Force Base and other professional and political organizations.

A strong believer that the creative arts add to the quality of life of a community, Harley Knox has been a member of the Moreno Valley Cultural Arts Foundation, the Moreno Valley Historical Society, and a strong supporter, along with his wife, Donna, of the Riverside County Philharmonic.

Above all, Harley is a devoted family man. Along with Donna and their son, Aaron, who is part of the family business, the Knox family has a history of 35 years of service to the community of Moreno Valley and Riverside County.

On November 12, Harley Knox will receive yet another well-deserved tribute in recognition of his years of community service. He has been unanimously selected by the Valley Group as the 1993 citizen of the year.

To these many honors, I would like to add my personal congratulations, and the thanks of the people of the 43rd Congressional District to a true business pioneer and civic leader, Mr. Harley Knox.

REMEMBERING KRISTALLNACHT

HON. CHRISTOPHER SHAYS

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 10, 1993

Mr. SHAYS. Mr. Speaker, on November 9 and 10, the 55th anniversary of the "Night of the Broken Glass," or Kristallnacht, will be observed.

Kristallnacht marked the beginning of the Holocaust and the beginning of the sickening violence against Jews. There was no punishment for the destruction, no protection of the basic human rights of those injured or killed. Anti-Semitism reared its ugly violent head and was allowed to continue to rage in Western Europe for years to come.

Mr. Speaker, anti-Semitism in any age, in any form, cannot be tolerated.

It is vitally important that we remember historical events such as Kristallnacht so that the prejudice and hatred they represent may never be repeated.

IN COMMEMORATION OF THE 55TH ANNIVERSARY OF THE KRISTALLNACHT

HON. NANCY L. JOHNSON

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 10, 1993

Ms. JOHNSON of Connecticut. Mr. Speaker, it is with sadness that I rise today to pay respect to the victims and family members of those who suffered atrocities at the hands of Adolf Hitler and the Nazi Party. Accordingly, on this day marking the 55th anniversary of the Nazi pogroms in Germany and Austria, also known as Kristallnacht, I ask that we take a moment to remember those who needlessly perished because of their religious beliefs. In order that we may prevent the cries of hatred and persecution decreed on that night from being repeated, their memory must never leave our thoughts.

Kristallnacht, "The Night of the Shattered Glass," marked the beginning of the most intense anti-Semitic campaign in history and signaled the onset of the Holocaust.

May we never again witness such wanton disregard for human life and deep seated intolerance for people. Indeed, the methodical destruction of 7,500 Jewish businesses, 275 synagogues, the arrest and deportation of 30,000 Jewish men to concentration camps, and the loss of nearly 100 Jewish lives was an atrocity and injustice of astounding proportion that cries out for recognition and eternal condemnation. Formal commemoration of Kristallnacht is a step toward preventing its recurrence.

On the occasion of this heartwrenching anniversary, I urge all Americans to continue their efforts to advance freedom and secure lasting peace, whether it be in our own backyard or on other continents. Inasmuch as we have always stood for the basic freedoms due every man and woman, we must instill this commitment in our children so they will never tolerate the hatred that caused the brutalities that our generation has witnessed.

TRIBUTE TO DORTHY STAPLETON

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 10, 1993

Mr. SKELTON. Mr. Speaker, I take this opportunity to recognize an outstanding Missourian for her 28 years of dedicated service to the city of Lexington, Dorthy Stapleton.

Dorthy Stapleton retired as Lexington's municipal court clerk several weeks ago. On February 1, 1965, Dorthy became the city's first deputy clerk. On June 1, 1966, she became the city clerk. As city clerk, she was responsible for day-to-day recordkeeping, bookwork, typing, and other clerical duties. Dorthy is an active member of the Lexington community, belonging to the United Methodist Church, the Machpelah Cemetery Board, and the Lexington Garden Club.

I urge my colleagues to join me in congratulating Dorthy Stapleton on her career as Lexington's city clerk and best wishes for a happy retirement.

CONGRESS MUST STOP BURDENING LOCAL GOVERNMENTS WITH UNFUNDED MANDATES

HON. JIM RAMSTAD

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 10, 1993

Mr. RAMSTAD. Mr. Speaker, I rise today to call on Congress to pass H.R. 1295, a bill to require all legislation to have a fiscal impact statement on States, localities, and the private sector before the legislation can be considered on the floor of the House or Senate.

Our Nation's Governors and locally elected officials have given notice to Congress that they can no longer afford to comply with Federal mandates without receiving the necessary funding.

The problem of unfunded mandates has grown as Congress has experienced greater financial constraints. Congress simply passes laws without providing funding, forcing State and local governments to raise taxes or cut back on services in order to comply with the mandates from Washington. The growing cost of these mandates takes away the ability of our locally elected officials to address local needs and priorities.

These laws are often good public policy, but it is simply unacceptable for Congress to pass on the cost of these legal mandates to local governments, which already have scarce resources to address the important issues of public safety, street maintenance, emergency services and other vital local programs.

In the 101st Congress alone, there were enough unfunded mandates passed to cost States \$15 billion over a 5-year period.

I strongly urge my colleagues to end this practice of passing costly burdens on to local government. With the Nation's staggering deficit and mind-boggling national debt, it to easy for some politicians to enact headline-grabbing policies for the supposed good of the country and then pass the bill on to local governments.

Mr. Speaker, let us today pledge to take fiscal responsibility for our actions. Our great country can no longer afford the burdensome and failed policy of unfunded mandates. I strongly urge my colleagues to pass H.R. 1295.

H.R. 2599, THE SPACE
ADVERTISING PROHIBITION ACT

HON. SUSAN MOLINARI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 10, 1993

Ms. MOLINARI. Mr. Speaker, on July 1, 1993 I introduced legislation with Representatives MARKEY, MORELLA, and ESHOO that will effectively ban billboard advertising in space. On April 12 of this year, Space Marketing Inc. of Roswell, GA, announced its plans to place 1-mile-long advertisements in the Earth's orbit, towed by satellites.

These space billboards would be visible to the naked eye on earth, as large and at least as bright as a full Moon, and engineered to be more visible at sunrise and sunset. These billboards can even be positioned to appear to target audiences at peak times of the day and evening.

What should we say to the parents of this Nation when they have to explain to their children why the hemorrhoid ointment advertisement is next to the Moon or the Sun? It is alarming enough that advertising has become a virtual omnipresent facet of our daily lives. Are we going to remain idle and permit our children to grow-up believing that an orbiting billboard is part of nature, just like the Sun and Moon?

There will be no more romantic moonlit strolls or breathtaking sunrises. No more practicing the ancient art of naked eye astronomic study. And no longer could we look to the heavens for unadulterated inspiration and comfort.

Billboards in space is a clear violation on our environment. Unlike television programs and Earth advertisements, we would not be able to turn these stellar pervaders off.

We can only dream of the new heights that society will reach in terms of technological advancements. Billboards in space however, amount to nothing more than a nightmare.

WELFARE REFORM

HON. WILLIAM F. GOODLING

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 10, 1993

Mr. GOODLING. Mr. Speaker, today, I join the minority leader, minority whip and House Republicans in an effort to begin debate on welfare reform, a topic that is on the minds of many residents of the 19th Congressional District in Pennsylvania. Our ideas on welfare reform will hopefully put to end an era that has increased dependency on Government and has been a tragic burden on the backs of the American taxpayer. I believe real welfare reform must avoid repeating what has not

worked in the past and instead focus on building individual responsibility with less dependency on the Government.

Last year during the campaign, President Clinton promised to "end welfare as we know it" and I commend him for making those statements. I look forward to working with him in an effort to end programs that have not worked. The welfare reform legislation we are introducing today will do just that.

While no concrete details have been forthcoming, the President indicated the basic premise of his plan will be to provide States greater flexibility in implementing welfare and Medicaid programs. He indicated his support for limiting the eligibility for recipients of welfare and cash assistance to 2 years and then they are required to enter the workforce. The President also proposed providing increased childcare services for mothers and health care for welfare children. He expressed support for increased penalties for deadbeat dads and increased coordination of resources to force deadbeat dads to meet their responsibilities. From his statements, the President seems to be serious about enacting welfare reform. However, I must warn the President to beware of the "povertyocrats," those committed to the same broken welfare system which instead of helping individuals to get off of welfare makes them subservient to the system.

First and foremost, I believe there is an unsupported sentiment on the part of the general public that most welfare recipients are on welfare because that is where they want to be.

There are many reasons people end up on welfare—most of which are not related to their unwillingness to work. Loss of a job, loss of the family breadwinner, homelessness, and disability are all reasons why people end up on welfare. The majority of these individuals would like to return to work, to feel the pride in being able to support themselves and their families. Often they face insurmountable roadblocks which keep them from becoming working, productive citizens.

When the Congress enacted H.R. 1720, the Family Support Act of 1988, we tried to address these specific problems by providing families with transitional benefits. The Congress tried to make work an appealing alternative to Government and provided incentives for single parents to return to work. The welfare law required States to guarantee child care services to families for 12 months following the month they become ineligible for assistance because of increased earnings or increased hours of employment. If child care was necessary for the parent if they were to continue to work, we provided that benefit. We also forced States to continue Medicaid coverage for a total of 12 months for families who received welfare for any 3 of the previous 6 months but have become ineligible because of increased employment hours or earnings.

At the time, we believed these two provisions alone should encourage welfare recipients who become employed to stay employed. They do not, however, address serious problems such as a lack of education or job skills necessary to obtain and retain employment.

As my colleagues know, there are numerous estimates of the number of individuals in this country who are functionally illiterate. The U.S. Department of Education recently re-

ported that some 90 million adults, approximately 47 percent of the U.S. adult population, demonstrate low levels of literacy, while most of them describe themselves as able to read and write well. These figures certainly underscore literacy's strong connection to our Nation's economic status and places too many individuals at a distinct disadvantage when seeking employment. How can someone who cannot read and write fill out a job application? How can they determine which bus to take to reach a potential job site? How can they read the instructions on the operation of potentially dangerous equipment? Most importantly, how can they learn the skills they need to continue to grow in their job and receive the promotions necessary to keep their family from once again becoming dependent on welfare?

Technological advances have greatly increased the literacy and job skills necessary for individuals to obtain employment. Unskilled labor is a job category which is quickly becoming a thing of the past and high school drop outs, for example, are finding it increasingly difficult to find work which pays them a decent, living wage.

Since I have been in Congress, I have always believed welfare assistance should be tied to work, job training, or education. I also believe a greater percentage of Federal assistance should be in aid rather than administration.

I believe welfare reform must include the following four fundamentals: tighten eligibility requirements, strengthen antifraud efforts, enforce parental responsibility, and institute real work requirements. The ideas included in the Republican welfare reform proposal will provide the Nation with a benchmark to begin the debate on welfare reform based upon these four ideas.

First, the Republican welfare plan will strive to tighten eligibility requirements by enforcing the establishment of paternity. In other words, if paternity is not established, welfare and cash assistance will be limited and in some cases denied. The Republican welfare plan would tighten eligibility requirements for immigrants and aliens while offering States the ability to craft their own reform plans based on their own needs.

Second, the Republican welfare reform plan would strengthen existing antifraud efforts. This proposal would dramatically reform the current system by implementing an individual case management system requiring that qualified welfare recipients sign a contract with the State designating providing for a timetable of benefit eligibility. This proposal is also intended to improve the quality of the system by utilizing resources by Federal, State, and local governments.

Third, the Republican welfare reform plan will enforce parental responsibility by imposing strict paternity establishment guidelines. This proposal would work with States to develop a system of referencing movement of individuals from State to State, specifically designed to track deadbeat dads. This proposal would also provide States incentives and the ability to develop their own systems for paternity establishment.

Finally, the Republican welfare proposal would institute real work requirements. This

plan would make work a requirement for receiving welfare benefits. Making work a requirement was paramount to the passage of the Family Support Act, however, the Congress did not pass the funds, and most [JOBS] related proposals were left unfunded and untested. This proposal would job requirement with savings achieved in other areas of the proposal.

I do have some concerns about the Republican welfare reform plan relating to the education and labor provisions. The Republican proposal includes broad waiver authority which allows Federal agencies to waive congressionally passed requirements. I also have concerns over proposals to consolidate certain food assistance programs and welfare work provisions. I will work with the other sponsors of this legislation to improve this legislation.

Mr. Speaker, I believe the time has come to take a different approach to welfare reform. I believe the Republican welfare proposal has the components to intelligently begin the debate on how best to reform our Nation's welfare system.

THE 55TH ANNIVERSARY OF
KRISTALLNACHT

HON. ROSA L. DeLAURO

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 10, 1993

Ms. DeLAURO. Mr. Speaker, this week marks the 55th anniversary of an event that opened one of the most nightmarish chapters in human history. During the late night and early morning hours of November 9 and 10, 1938, the Nazis orchestrated a pogrom against Jews throughout Germany and Austria that would become known as "Kristallnacht," or "the Night of the Broken Glass."

Ostensibly a spontaneous expression of German rage at the assassination of a German diplomat in Paris by a young Jew, Kristallnacht actually was organized by the Nazis, perhaps as a warning to those few Germans who still gave help and sympathy to the Jews that the party could mobilize a mob against them if it chose. SA and SS troopers, together with the mob, smashed windows in Jewish shops and homes, demolished Jewish property, burned synagogues, and beat Jewish men, women, and children as their German neighbors and the police stood by watching. During that horrible night, nearly 100 Jews

were killed, 7,500 Jewish businesses, and 275 synagogues were destroyed, and 30,000 Jewish men were arrested and deported to concentration camps. Kristallnacht heralded a violent turn in the anti-Semitic program that had begun in 1933 with the Nuremberg Laws.

Within days, Reich Minister Hermann Goering issued a "Decree Eliminating the Jews from German Economic Life," which prohibited Jews from owning businesses or carrying on a trade independently. Those Jewish businesses that had somehow survived Kristallnacht were expropriated and ownership transferred to "Aryan" hands. A 25 percent "flight tax" was enacted on all Jewish property leaving German territory, and to compensate for the riot damage, a 1 billion mark (\$400 million) fine was levied on the Jewish community. Nearly 150,000 German and 6,000 Austrian Jews—about a third of the Jewish population of the Reich—fled following Kristallnacht.

In the wake of the pogrom, Goering headed a meeting of the council of ministers in which he announced that Hitler had asked that "the Jewish question be now, once and for all, treated in its entirety and settled in some way." Those words portended Hitler's "final solution" to the Jewish question: the Holocaust.

As we mark this solemn anniversary, we must rededicate ourselves to righting persecution and prejudice whenever and wherever it rears its head. The principles of tolerance and freedom form the basis of the American creed—they are the foundations on which our Nation is built.

But we must also recall the tragic history of those dark times so that we can avoid repeating it. In the last several years, the ranks of the "Skinheads" and other neo-Nazi groups have swelled, both in Europe and here at home. In the past few weeks, my own State of Connecticut has been plagued by a series of hate crimes, including the defacement of several synagogues with swastikas. Clearly, we must be externally vigilant, so that the pronouncements of the next Hitler are not dismissed merely as the ravings of a r. adman, or the next Kristallnacht excused as an isolated act perpetrated by a mob.

As citizens of the most powerful Nation on the face of the earth—a Nation that abhors prejudice and bigotry and values tolerance as one of its founding principles—we must ensure that the Holocaust never happens again.

TRIBUTE TO EDWARD F. FEIGHAN

HON. ERIC FINGERHUT

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 10, 1993

Mr. FINGERHUT. Mr. Speaker, I rise today to pay tribute to a good friend and former Member of this distinguished body, Congressman Edward F. Feighan. His tenure in Congress saw many great accomplishments, but none more important than his work on the Brady bill. It was the persistence and dedication of Representative Feighan, my predecessor as Representative of the 19th District of Ohio, that brought the Brady bill to the forefront of public attention.

Representative Feighan introduced the Handgun Violence Prevention Act in February of 1987. The bill mandated a 7-day waiting period for handgun purchases. The Brady bill, named after former Reagan Press Secretary James Brady and his wife Sarah, became known nationwide as a simple measure with the potential to save millions of lives. Representative Feighan was willing to lead the flight for the American people because he had a vision of giving the police officers of America a new tool in their endless battle against heartless criminals who have taken away our streets and neighborhoods.

Though many shied away from gun control legislation, it was Representative Edward Feighan who said, "Enough is enough," and took on one of the most powerful lobbying groups in the country, the NRA. Representative Edward Feighan wrote in a New York Times piece, "Who would argue against legislation that could keep criminals and crazies from buying a handgun?" Today, three administrations later, the 103d Congress has a duty to continue the fight Representative Edward Feighan started in 1987.

If the Brady bill passes, it will forever change the streets and neighborhoods of America. No longer will felons or mentally unstable individuals be permitted to purchase handguns which kill innocent people daily. Representative Edward Feighan saw this legislation pass this House once, but never signed into law. We can make history by sending this legislation to President Clinton to be signed into law. When that occurs, Representative Edward Feighan will deserve the lion's share of the credit.

HOUSE OF REPRESENTATIVES—Monday, November 15, 1993

The House met at 12 noon.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

We begin this day, O God, with thanksgiving for the potential of the time before us. In spite of the duties to which each must attend and the apprehensions and concerns that are a part of every person's life, we focus on Your good gifts of love and freedom, of justice and mercy, and all the possibilities of support and blessing, one for another. With praise and adoration, O gracious God, we thank You for this day and pray that Your Spirit, that breathes into us regeneration and reconciliation, will be our benediction now and evermore. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

PLEDGE OF ALLEGIANCE

The SPEAKER. Will the gentleman from California [Mr. HUFFINGTON] come forward and lead the House in the Pledge of Allegiance.

Mr. HUFFINGTON led the Pledge of Allegiance as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

NAFTA WILL FURTHER THE INTERESTS OF THE PEOPLE OF OUR NATION

(Mr. SKELTON asked and was given permission to address the House for 1 minute.)

Mr. SKELTON. Mr. Speaker, Missourian Mark Twain once said: "The more you explain it to me, the more I don't understand it." In all of the discussion about the North American Free-Trade Agreement, some are making it sound complicated to the point of confusion. Boiled down to the bottom line, the truth is that the lowering of the Mexican tariff walls will allow more American goods and commodities to be sold south of the border. A strong trade pact between Canada, the United States, and Mexico will be formed. Why else do the Japanese oppose it so?

During recent weeks, I have talked with many, many people back home;

met with several experts, pro and con; and studied the issue extensively. Further, looking at this agreement through the eyes of the people I represent, knowing of their hopes and dreams, I have concluded that this agreement is good for American worker, good for American farmers, good for American manufacturers, good for American processors, and good for American agribusiness. This agreement will be of benefit to the people I represent, to the people of Missouri, and to America as a whole.

Let us separate the wheat from the chaff—let us make a decision upon sound principles that will further the interests of the people of our Nation. Let us take this positive step for the future of our country and keep working to make things better. I believe in the wisdom of a sign I once saw on the back of a pickup truck in Hickory County, MO, which read: "America—We ain't perfect, but we ain't done yet."

The passage of this agreement and the can-do American attitude will keep us No. 1.

IN FAVOR OF NAFTA

(Mr. FISH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FISH. Mr. Speaker, for weeks and months I have listened to hundreds and heard from thousands. The arguments vary, but the question for me is constant—What is in the best interest of my country? I have decided that [NAFTA] the North American Free-Trade Agreement is in our best interest, and I will vote for it this week.

Arriving at this decision has been difficult because opponents of the agreement include respected labor and environmental leaders—allies of mine over the years in the cause of social justice and environmental protection.

The debate over NAFTA has been framed largely in terms of job loss versus a growing market for U.S. products. While the extent of job loss is disputed, the anxiety I sense from so many American workers who feel threatened is real. It is essential that the Federal Government respond with help for those affected.

I am persuaded that at stake is U.S. leadership in promoting world trade and the chance to position ourselves for a dynamic future of economic growth.

A "no" vote on NAFTA puts at risk the GATT negotiations with their

promise of vastly increased trade and jobs at home.

A "no" vote denies United States products preferential treatment in the growing Mexican economy and corresponding jobs at home.

The United States has been losing jobs not only because of the trade practices of our foreign competitors but also because U.S. consumers favor foreign products. At the same time, the increasingly high productivity of the American worker demands a larger market for the goods produced. I think it is clear that a market larger than just the U.S. market is needed to generate the jobs we need at home.

The answer is the vision, the promise of a Western Hemisphere free-trade zone. Our best hope for the future is the expanding export market of Latin America and the jobs it will create at home.

We must take the first steps with NAFTA, embracing the future with characteristic American confidence, or we will lose this historic opportunity to regenerate and strengthen our economy with the promise of broader markets for our goods and a robust economy for this generation and the next.

VOTE AGAINST THIS NAFTA

(Ms. KAPTUR asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. KAPTUR. Mr. Speaker, this week, regardless of what our strongly held views might be on NAFTA, we ought to be quite thankful that in this democratic republic we will be allowed the opportunity to fully debate here, unlike in Mexico where the opposition will not be given a voice.

This morning I opened my mail and received a letter from a woman from Cape Coral, FL, not even in my district, and she said,

Perhaps you could bring this observation to the forefront in one of your appearances. She said,

It is said our President and country will lose face and respect and dreaded things will happen if NAFTA doesn't pass. On the contrary, I believe if NAFTA is defeated it will send a resounding affirmation to the world that the U.S.A. is indeed a true and working democracy. The people will have spoken and their Congress will have listened. Truly a superpower and an inspiration to emerging democracies.

THE UNITED STATES IS NOT READY FOR NAFTA

(Mr. BUNNING asked and was given permission to address the House for 1

□ This symbol represents the time of day during the House proceedings, e.g., □ 1407 is 2:07 p.m.

Matter set in this typeface indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

minute and to revise and extend his remarks.)

Mr. BUNNING. Mr. Speaker, NAFTA has been one of the most gut-wrenching decisions I have ever had to make.

I believe in fair and free trade and my initial inclination was to support this treaty.

But I listened to the people back home who had concerns about NAFTA. And I took a second look at the agreement and I came to these conclusions.

Regardless of who is right about the long-term net gain or loss of jobs, NAFTA would dislocate hundreds of thousands in the United States and we have done nothing to prepare ourselves to address it. We are not ready for NAFTA.

The side agreements create a vast bureaucracy that threatens our sovereignty and our Nation's ability to change our own laws and standards. That is intolerable.

And finally, a treaty like this depends on faith. You must have faith in your workers' ability to compete, faith in your producers' ability to compete and faith in your Government to create an atmosphere conducive to competition.

I have faith in our workers and our businessmen. But our own current Government policies and this treaty do not give me much faith in our ability to create a truly competitive atmosphere in this country.

For these reasons, I cannot support this NAFTA at this time. I intend to vote "no."

FORMER GOVERNMENT EMPLOYEES WHO SUPPORT NAFTA

(Mr. TRAFICANT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. TRAFICANT. Mr. Speaker, here are some former Government employees who now support NAFTA: From the Ways and Means Committee, chief counsels Dowley and Salmon. They now get paychecks from Turkey and England.

Former chairman of that committee, Charlie Vanik. He represents and gets a paycheck from Belgium.

How about some supporters who used to work for the Office of the Trade Representative to help draft all of these trade deals, Frank Samolis, Kurt Gibbons, and Julia Buss. They get paychecks from Japan.

And how about the former Trade Representative himself, Bill Brock. He gets a paycheck with his assistant, Darrell Cooper, from Taiwan.

□ 1210

Mr. Speaker, these fat cats who made all of these trade deals are now making a living on the backs and at the expense of the American workers, and I liken this trade pact between the Unit-

ed States and Mexico as like a dad who decides to take on the diet of his newborn son.

No. 1, after a couple of weeks, he ends up passing gas, spitting up, and wetting the bed, and if you do all of that, dad, and miss work enough, you will lose your job.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Hallen, one of its clerks, announced that the Senate had passed without amendment a joint resolution of the House of the following title:

H.J. Res. 79. Joint resolution to authorize the President to issue a proclamation designating the week beginning on November 21, 1993, and November 20, 1994, as "National Family Week".

The message also announced that the Senate had passed with amendments in which the concurrence of the House is requested, bills of the House of the following titles:

H.R. 821. An act to amend title 38, United States Code, to extend eligibility for burial in national cemeteries to persons who have 20 years of service creditable for retired pay as members of a reserve component of the Armed Forces;

H.R. 2532. An act to designate the Federal building and U.S. courthouse in Lubbock, TX, as the "George H. Mahon Federal Building and United States Courthouse"; and

H.R. 2330. An act to authorize appropriations for fiscal year 1994 for the intelligence and intelligence-related activities of the U.S. Government, the Community Management Account, and the Central Intelligence Agency Retirement and Disability System, and for other purposes.

The message also announced that the Senate insists upon its amendment to the bill (H.R. 2330) "An act to authorize appropriations for fiscal year 1994 for the intelligence and intelligence-related activities of the U.S. Government, the Community Management Account, and the Central Intelligence Agency Retirement and Disability System, and for other purposes," requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints:

From the Select Committee on Intelligence: Mr. DECONCINI, Mr. WARNER, Mr. METZENBAUM, Mr. GLENN, Mr. KERREY, Mr. BRYAN, Mr. GRAHAM, Mr. KERRY, Mr. BAUCUS, Mr. JOHNSTON, Mr. D'AMATO, Mr. DANFORTH, Mr. GORTON, Mr. CHAFEE, Mr. STEVENS, Mr. LUGAR, and Mr. WALLOP; from the Committee on Armed Services: Mr. NUNN and Mr. THURMOND to be the conferees on the part of the Senate.

The message also announced that the Senate agrees to the amendments of the House to bills and a joint resolution of the Senate of the following titles:

S. 654. An act to amend the Indian Environmental General Assistance Program Act of 1992 to extend the authorization of appropriations;

S. 1490. An act to amend Public Law 100-518 and the U.S. Grain Standards Act to extend

the authority of the Federal Grain Inspection Service to collect fees to cover administrative and supervisory costs, and for other purposes; and

S.J. Res. 142. An act designating the week beginning November 7, 1993, and the week beginning November 6, 1994, each as "National Women Veterans Recognition Week."

The message also announced that the Senate had passed a bill and joint resolutions of the following titles, in which the concurrence of the House is requested:

S. 1621. An act to revise certain authorities relating to Pershing Hall, France;

S.J. Res. 143. Joint resolution providing for the appointment of Frank Anderson Shrontz as a citizen regent of the Board of Regents of the Smithsonian Institution; and

S.J. Res. 144. Joint resolution providing for the appointment of Manuel Luis Ibanez as a citizen regent of the Board of Regents of the Smithsonian Institution.

FLUNKING OUT

(Mr. HEFLEY asked and was given permission to address the House for 1 minute.)

Mr. HEFLEY. Mr. Speaker, when evaluating the failure or success of a President, the public looks at five areas: the economy, foreign affairs, the deficit, crime, and taxes.

How is the President doing? According to a USA Today poll, the American people aren't very impressed.

When it comes to the economy, he gets a D. With foreign affairs, he gets a D minus. With the deficit, he gets a D minus. And with crime and taxes, he gets a pair of F's.

Mr. Speaker, crime and taxes are the preeminent issues that concern the American voter. The recent elections proved that fact. The President is flunking both.

And it is only because the American people have a generous spirit that Mr. Clinton is not getting an F with the economy, foreign affairs, and the deficit.

The President better get the message. The American voters are none too impressed with his extreme liberal approach to these issues, and are close to flunking him out if he does not improve in these five key areas.

UNITED STATES MUST CONTINUE LEADERSHIP IN OPENING UP MARKETS

(Mr. MATSUI asked and was given permission to address the House for 1 minute.)

Mr. MATSUI. Mr. Speaker, many of the opponents of NAFTA have said that they really believe in the concept of free trade, that they support the GATT, they support NAFTA, but not this NAFTA.

Mr. Speaker, this weekend I happened to be at Borders Book Store, and I happened to find a new book, and I would urge my colleagues to pick this

book up. It is entitled "The Case Against Free Trade, GATT, NAFTA, and the Globalization of Corporate Power," and it is written by the opponents of NAFTA, Ralph Nader, Bill Greider, Jerry Brown, Lorie Wallach, from Public Citizen.

I might just point out that in the preface of the book, Ralph Nader says:

This book contains essays by leading citizen-oriented trade experts. They dissect the ideological roots of the free-trade mantra, discuss the trade negotiations themselves and, most vividly and most importantly, detail the devastating effect that such trade governance has had and the much more severe effect it will have if the Uruguay round expansion of GATT and NAFTA are enacted.

I might just point out that this is not a symbolic vote. What this vote is is whether or not the United States would like to continue its leadership in the area of opening up markets, and the only way we can do it is by demonstrating that NAFTA is what we want to pass in the House on Wednesday.

APPOINTMENT OF CONFEREES ON H.R. 2330, INTELLIGENCE AUTHORIZATION ACT FOR FISCAL YEAR 1994

Mr. DICKS. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 2330) to authorize appropriations for fiscal year 1994 for the intelligence and intelligence-related activities of the U.S. Government, the Community Management Account, and the Central Intelligence Agency Retirement and Disability System, and for other purposes, with a Senate amendment thereto, disagree to the Senate amendment, and agree to the conference asked by the Senate.

The SPEAKER. Is there objection to the request of the gentleman from Washington? The Chair hears none, and without objection, appoints the following conferees.

From the Permanent Select Committee on Intelligence, for consideration of the House bill, and the Senate amendment, and modifications committed to conference: Messrs. GLICKMAN, RICHARDSON, DICKS, DIXON, TORRICELLI, COLEMAN, SKAGGS, and BILBRAY, Ms. PELOSI, Messrs. LAUGHLIN, CRAMER, REED, COMBEST, BEREUTER, DORNAN, YOUNG of Florida, GEKAS, HANSEN, and LEWIS of California.

From the Committee on Armed Services, for the consideration of defense tactical intelligence and related activities: Messrs. DELLUMS, SKELTON, and SPENCE.

There was no objection.

A REMINDER ABOUT GOVERNMENT REFORM

(Mr. ALLARD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ALLARD. Mr. Speaker, upon election to office I, like everyone elected to this House, vowed to address the concerns of the people of my district. I am here to remind you of some of these concerns. The first is the concept of Government reform. Little did I know then, it would be more of a concept than a reality. In the words of Webster, reform is to put an end to an evil by introducing and enforcing a better method or course of action. I think we all agree that there are faults and abuses within Congress and also a justifiable need to correct them. The problem lies not with the introduction of reform measures, but rather with the implementation. Where is the conviction to change? When will we get a chance to vote on them? Our colleagues in the Senate have introduced reform legislation and are already moving forward with these changes. Today I want to remind you of some ways in which we can accomplish change. Some of these items are the adoption of a balanced budget amendment, simplifying the budget process and making it more accountable, and granting the President authority of a line-item veto. If we are to change we must first move. It is time to shake off the paralysis that has developed after years of inaction on the reforms I have just mentioned. The only thing that is slower than molasses on a cold January morning is the rate at which this Congress is moving toward reform.

It is about time to heat up the kettle and increase accountability by adopting these measures.

QUESTIONS WE SHOULD ASK OURSELVES ABOUT NAFTA

(Mr. RICHARDSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RICHARDSON. Mr. Speaker, as we face a NAFTA vote on Wednesday, here are the questions we should be asking ourselves: Are we going to be voting for hope or for fear, for the past or the future? Are we going to put our heads in the sand and go with isolationism or protectionism, or are we going to step up to the plate and choose world economic leadership in a new global economy? Are we going to send President Clinton to Seattle empty handed and embarrassed as he meets with Asian leaders the next day after the vote? Are we going to surrender to growing Mexican and Latin American markets to Japan and Western Europe, or are we going to create the world's largest trading bloc with the United States as its leader?

Do we want to surrender up to 200,000 high-wage, high-skilled jobs to Japan? Are we prepared to turn our backs on a Mexico that has extended its hand of friendship?

Do you think that there will be more labor, environmental protection, and

democratization in Mexico if NAFTA goes down?

Mr. Speaker, the choice is clear. The right vote for the country is for NAFTA.

LET US VOTE ON REAL CONGRESSIONAL REFORM

(Mr. THOMAS of Wyoming asked and was given permission to address the House for 1 minute.)

Mr. THOMAS of Wyoming. Mr. Speaker, I would like to take just a second to talk about congressional reform.

Nearly everyone in this House ran on a platform of change, change in the way Congress functions, fundamental change like balanced budget amendments, a real line-item veto, a Congress that lives under the same rules that it imposes on others.

The demand for change appears, however, to have been nothing more than campaign rhetoric. Mr. Speaker, the House has skirted the issue of congressional reform too long. The game of joint dodgeball with the American public should end.

Taxpayers are tired of playing monkey in the middle. They are not alone. House Republicans are also tired of being ignored.

Despite our calls for free and open debate in the committee and on the floor, a fairer party ratio in committee membership and staffing, and open committee hearings and meetings, for an end to proxy voting, it is business as usual.

Even the much ballyhooed Joint Committee on the Reorganization of Congress has failed to produce. Mr. Speaker, it is time for the Joint Committee on Organization of Congress to live up to its name. It is time for us to vote on a real congressional reform package under an open rule.

A VOTE FOR NAFTA

(Mr. MAZZOLI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MAZZOLI. Mr. Speaker, after talking with scores of people back home and here in Washington and after reading volumes of material until literally my head ached, I have determined to vote for the North American Free-Trade Agreement when it reaches the floor on Wednesday.

At the end of the day, Mr. Speaker, I think that passage of NAFTA will do more good than harm for the lot and the future of U.S. workers and for the U.S. economy.

But, Mr. Speaker, in candor, I have voted many times in this House over my 23 years with very much more enthusiasm that I will vote for NAFTA on Wednesday. That is because, Mr. Speaker, I share the very same concerns and uncertainties and worries

and frustrations that my people at home experience about whether or not NAFTA will, in fact, create more jobs here in the United States than it would destroy; whether, in fact, NAFTA will create more high-paying jobs for our American workers; about whether all the pledges to assist workers and industries adversely affected by NAFTA will be honored.

Mr. Speaker, when and if NAFTA is adopted on Wednesday, I hope that we in the House and our colleagues in the Senate will recognize the deep obligations that we still bear to the American workers and to their fate and to their future.

NAFTA: A RISING TIDE LIFTS ALL SHIPS

(Mr. DREIER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DREIER. Mr. Speaker, what a wonderful load of 1-minute we have had this morning.

Let me say that over the past several weeks and months, we have been listening to more than a few of our colleagues say things like, "DAVID, you are on the right track by supporting the North American Free-Trade Agreement. It is going to be very good, it is going to be all the things that my friend, the gentleman from New Mexico [Mr. RICHARDSON], said a few minutes ago."

□ 1220

"But I am having such a tough political time considering voting for it." I would say to my colleagues who are in that position that you have got to realize a couple of things about this vote we are going to face on Wednesday: Anyone who votes against the North America Free-Trade Agreement is voting against a \$1.5 billion tax cut.

Mr. Speaker, anyone who votes against the North American Free-Trade Agreement is voting against our effort to get at the root of illegal immigration. People leave Mexico and come to the United States to seek economic opportunity. A rising tide lifts all ships. We are going to be able to get effectively at the root of these problems if we pass the North American Free-Trade Agreement.

If we turn it down, the problems that exist today will continue. The right political vote is "yes" on the North American Free-Trade Agreement.

VOTE "NO" ON THIS NAFTA

(Mr. LEVIN asked and was given permission to address the House for minute and to revise and extend his remarks.)

Mr. LEVIN. Mr. Speaker, this NAFTA is in deep trouble because it fails to address the Mexican Govern-

ment's deliberate intervention to keep wages and salaries down while productivity rises in order to attract United States investment to Mexico. This policy has worked; look at the 2,000 plants with over 600,000 workers averaging 1 buck 25 cents an hour in plants with comparable productivity.

In an effort to cover over the Achilles' heel of this NAFTA, it was argued over the weekend that, one, by law Mexico has now tied minimum wages to productivity, but that is simply incorrect, as the Mexican Minimum Wage Commission is still working on this matter, with unknown results. It is also argued that because wages above the minimum are tied to the minimum wage in Mexican labor contracts, all wages in Mexico will rise with productivity. But that claim does not make any sense, since the minimum wage in Mexico in recent years has increased even less than average wages. Look at the results of the first quarter of 1993. Productivity went up 9 percent, wages rose only 1 percent.

This NAFTA needs to be renegotiated to confront economic realities rather than giving a green light to Mexican practices that tilt the playing field against American workers and small businesses.

Mr. Speaker, the American people, facing continued drops in their standard of living, want nothing less and they are right.

THE FUTURE AFTER THE NAFTA VOTE

(Ms. HARMAN asked and was given permission to address the House 1 minute and to revise and extend her remarks.)

Ms. HARMAN. Mr. Speaker, as Wednesday's NAFTA vote draws near—with the final result likely to be determined by a vote or two—this opponent of this NAFTA feels compelled to make a few remarks about the process. Win or lose, I hope we will learn lessons for the next time.

(1) STARTING WITH THE PEOPLE

The process of drafting this treaty didn't. People in my district and elsewhere are enormously uncomfortable with this treaty, fearing the loss of jobs. Whether they are right or wrong, their anxiety is real. And the reason so much arm twisting is going to pass this treaty relates, in my view, to the fact that so many Members sense the anxiety of their constituents. If the support of past Presidents and Cabinet members cannot convince the public of the benefits of this treaty, then there is something wrong with the treaty itself.

(2) TRADING FOR VOTES

Politics may be the art of compromise, but there is something very unsettling about the unprecedented trading to influence this vote. Interest groups and donors are sending menac-

ing warnings, "vote against me and you'll never get another dime," and the administration is making some desperate deals. This activity is antithetical to consensus building, and the public is turned off by it.

(3) DIVISIVE RHETORIC

The debate on this treaty has been undeniably divisive, but this is not the way it has to be. The issue at heart is not a moral choice, it is based on tangible calculations about job creation and loss. Nevertheless, the language used has emphasized the imperative of passing this treaty right now. This is misguided. After Wednesday, there is no reason we cannot return to the negotiating table and agree to specific changes that would reassure opponents that the treaty is in the national interest.

(4) INVOKING ARMAGEDDON

The public is not buying the dire predictions of either side. Claims of massive job gains or losses have never been substantiated. The CBO probably had it right over a year ago when it stated, "the impact on jobs will be minimal." A front page story in today's Los Angeles Times dramatically downgrades its earlier estimates of job creation in California due to NAFTA, and says the flight of low-skilled manufacturing jobs to Mexico is likely to continue. Nor is it true that Mexico's Government will fall if the treaty fails—or that Japan will replace the United States as Mexico's major trading partner. One of the most exaggerated claims is that the debate is between those who embrace the future and those mired in the past. Not so: the debate is about what the future will look like with this NAFTA, or without it. And reasonable people can disagree.

Whatever happens on Wednesday, I want to implore us all to strive to build a real consensus around the result. If this NAFTA passes, let's make it work. And if it fails, let's join together to draft and pass a better NAFTA. If we accomplish this, we will have done a service to the American worker, to humanitarian causes, and to the true spirit of free and fair international trade.

POSTELECTION RESULTS IN NEW JERSEY

(Mr. FRANK of Massachusetts asked and was given permission to address the House for 1 minute.)

Mr. FRANK of Massachusetts. Mr. Speaker, it is a great mistake for us to let the victims of a particular misdeed speak only for themselves. They want to speak for themselves, but others should join.

So I want to join today in expressing my outrage at the comment from Ed Rollins last week when he talked boastfully about his efforts to subvert the democratic process in New Jersey.

Mr. Rollins now tells us that he was not telling the truth when he talked about what he did. Obviously there were some things that were tried that were wrong.

Now we have Mr. Rollins lying about whether or not he was telling us the truth. It is essential that this be fully investigated. The worst thing we can do, as elected officials, is to allow the cynicism to corrode this country that says, "Oh, they all do it."

The kind of activity Mr. Rollins spoke about, of spending money illegally to try to persuade people not to vote, is intolerable.

The later obfuscation does not make it any better.

It is essential that this be fully investigated by people with subpoena power so that we make it clear that this is not the sort of thing that everybody does and democracy will be defended against attacks like this.

NAFTA: THE STATUS QUO IS NOT ACCEPTABLE

(Ms. PELOSI asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. PELOSI. Mr. Speaker, anyone who has visited the United States-Mexico border knows that the environmental status quo is not acceptable. I am particularly concerned with the impact on health by this polluted environment, especially the health of children, who have a higher rate of hepatitis there. One of our colleagues has a school in his district where the children have a 100-percent rate of hepatitis. And of course the increased rate of breast cancer in the region.

For this reason I believe it is important for us to pass a NAFTA which will be good for the environment. This NAFTA I believe is. That is why it has the endorsements of the Environmental Defense Fund, the National Wildlife Federation, the World Wildlife Fund, the Natural Resources Defense Council, the National Audubon Society, and Conservation International.

The Natural Resources Defense Council states that with this NAFTA, for the first time there will be a powerful institution charged with protecting the North American environment. That is the Commission on Environmental Cooperation. For the first time nations are obligated by an agreement to uphold their own environmental laws. For the first time a North American environmental agreement gives citizens direct recourse when environmentally threatened.

For the first time the United States and Mexico will work cooperatively to improve the environment.

Mr. Speaker, I urge my colleagues to vote "yes" on NAFTA on Wednesday.

NAFTA WILL OPEN UP THE PRESENT CLOSED MARKETS OF OUR TRADING PARTNERS

(Mr. WYDEN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WYDEN. Mr. Speaker, a vote Wednesday against the North American Free-Trade Agreement is a vote to reduce America's leverage in our fight to open up the closed markets of our trading partners. Here is why: We have got a trade surplus with Mexico, and Mexican tariffs are far higher than ours. On the other hand, we have got a huge trade deficit with the Asian countries, who have closed their markets to many of our products. But if we cannot close a trade deal which blatantly favors us, our credibility will be hard hit when we ask the Asian countries to open their markets to our goods.

Vote for the North American Free-Trade Agreement and enhance our country's ability to get our exports into worldwide markets.

NAFTA: A HISTORY-MAKING VOTE

(Mr. INSLEE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. INSLEE. Mr. Speaker, the upcoming NAFTA vote would make some of us, who are human, think twice about it. It is controversial.

But I want to tell you I look forward to this vote like no other vote I have looked forward to before. The reason I am going to vote "yes" is because I realize that this is one moment in the brief time that I have been here that history will record how I believe we intend to advance our economic prospects, because history will record each one of our votes. It will record on a black-and-white basis a "yes" or a "no" basis what we believe. Whether we believe that free trade is the future of our economy and the world economy or that protectionism is our future.

On this vote it will be a very clear, a crystal-clear decision on where we stand. And when each one of us looks down to the bottom of our hearts and decides how we are going to be recorded by history, I hope that others will join me in saying that our future is for free trade. And when we send the gladiator to Seattle from America to fight for free trade at the Asian conference next Monday, this weekend, we ought to send him strong with the wind so that the story is not "winless in Seattle."

We should send him with the thought that many of us believe that we need free trade as our future.

□ 1230

WHO WINS AND WHO LOSES WITH NAFTA?

(Mr. COPPERSMITH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COPPERSMITH. Mo Udall once said, "Everything has been said, only not everyone has said it," so I wish to join so many of my colleagues this afternoon in speaking in support of the North American Free-Trade Agreement.

In addition to the points that my colleagues have raised already, we also have to think about who wins and who loses in the NAFTA vote. If this House votes in favor of NAFTA, we show that we understand the lessons of history, that free trade and growth in exports has been and will be America's road to economic success. A positive vote shows our country's leadership in our hemisphere and in the world. Approving NAFTA shows we will face forward, trying to build an expanding economic future. A defeat will show Congress is more interested in holding on to a past that may not even have existed.

If NAFTA loses, I think it enshrines the politics of crankiness. A defeat empowers political leaders like Ross Perot and Jesse Jackson, who cannot agree on anything positive, but agree only on what they oppose. They agree only to try to stop changes that the American people need.

Mr. Speaker, this vote gives us an opportunity to stand for what we need to do to move this country forward. This vote also is a test of whether we in this House can build coalitions from the center outward, on whether the flanks of either party will control the agenda.

I fear for our progress on the people's business in this House on other contentious issues if we cannot empower the center, those who understand what action is truly in our country's best interests and put it ahead of partisanship, or if instead we will give greater emphasis to ideologies on the left and the right. For so many reasons, we must support NAFTA.

THE FOREIGN AID GIVEAWAY

(Mr. TAYLOR of Mississippi asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. TAYLOR of Mississippi. Mr. Speaker, in the 4 years that I have served in this body, I am continually appalled and upset at the course of action this Nation takes. In those 4 years this Nation has given over \$13 billion in foreign aid to one nation, Israel, money that we had to borrow from our grandchildren's future in order to give away. We have given away about \$60 billion in foreign aid, but you know, it is not enough now for Congress to give away

your money that they have borrowed, now they want to give away your jobs.

Now they want to vote for something called NAFTA. All NAFTA does is eliminate taxes on products coming from Mexico. When it is all said and done, it eliminates taxes on products coming from Mexico, so while this Congress just a few months ago voted to raise taxes on American corporations, if they stay, they said, "By the way, if you go to Mexico, you don't have to pay minimum wage. You don't have to pay workmen's comp. You don't have to live by the pollution laws. You don't have to live by the OSHA laws. You can make your product down there and bring it back up tax free."

Mr. Speaker, it is time for Congress to quit giving away your money. It is especially time for Congress to quit giving away your jobs.

MEXICO'S TRADE RELATION WITH UNITED STATES HAS TURNED AROUND

(Mr. LAUGHLIN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LAUGHLIN. Mr. Speaker, I am delighted that I have the opportunity to follow my friend, the gentleman from Mississippi, because he was talking about giving away jobs and giving Mexican products tax-free status. I think he is reading from a different book than I have been looking at.

We have turned around the trade relationship with Mexico since they started lowering the tariffs on our products. If you look at just agriculture alone, Mexico has had a 25-percent tax on the rice and beef produced in America, 10 to 20 percent on corn and grain, 10 percent on cotton.

Those tariffs are taxes on our products and they are going to be reduced in time down to zero, so that our farmers can sell more products to the Mexican citizen.

That is why we in the body should have the courage to vote in favor of the North American Free-Trade Agreement, because if our farmers have a future, it is a future because they can sell their products in the global market.

It does not help just the farmer, or the rancher. Those farmers and ranchers have loans at small banks in small communities. Those ranchers and farmers do business with small businesses.

So a defeat of NAFTA would do irreparable harm not only to our relationship and ability to do trade in a global economy, but it will do irreparable harm to the small businessman, the farmer and the rancher.

NAFTA IS A VOTE TO CUT TAXES AND CREATE JOBS

(Mr. WALKER asked and was given permission to address the House for 1 minute.)

Mr. WALKER. Mr. Speaker, I want to build on the remarks that the gentleman from Texas just delivered.

This is, in fact, a tax cut; namely, NAFTA. It is a tax cut for the American people. It is a tax cut for the people of Mexico.

In both cases the economies will benefit.

The fact is what we have learned over the last few years about the economy is that if you cut taxes, you increase the productivity of jobs in the private sector, and therefore you create more jobs. You give employers incentives to bring jobs into the economy.

This tax cut is going to result in exactly that kind of job creation in our country. We are going to benefit in Pennsylvania where we already have an average of a thousand jobs per congressional district that are tied to trade with Mexico.

If NAFTA is defeated, we stand to lose, but if NAFTA is approved, we stand to increase.

I think that is going to happen all across the country.

There is one other thing we ought to keep in mind. If NAFTA is approved, the chances are that it will be seen only as a blip on the history screen, because it will be part of a much larger trend toward the globalization of the economy; however, if NAFTA is defeated, it will be a terrible disaster because at that point we will have put ourselves in the way of history and we will stand to be run over by it.

If NAFTA is rejected, the chances are that this Nation will define itself as not desiring to be a part of the global economy. The rest of the world will interpret that as meaning we want our economy to go into the decline, rather than move ahead. That would be a disaster.

NAFTA AND CALIFORNIA WINES

(Mr. LEHMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LEHMAN. Mr. Speaker, I want to limit my comments with regard to NAFTA today to just one industry, very crucial to our economy in California. Currently California wines, American wines going into Mexico face a 20-percent tariff. Effective right now, the tariff on Chilean wines going into Mexico is 14 percent and will go to zero in 1996.

U.S. wine makers and U.S. wine growers are going to lose market share dramatically without NAFTA which will significantly reduce the tariff on U.S. wines going in ultimately to zero after the agreement passes.

Without NAFTA, we are going to lose market share. We are going to have to take vines out of production. We are going to cripple the California wine industry.

This, Mr. Speaker, is the harbinger for future deals in Latin America where we are on the verge of busting into that market, but without NAFTA will not have the leverage to do it.

Mr. Speaker, I urge that we pass NAFTA and help a crucial industry in California.

COMMUNICATION FROM CHAIRMAN OF COMMITTEE ON PUBLIC WORKS AND TRANSPORTATION

The SPEAKER pro tempore (Mr. MONTGOMERY) laid before the House the following communication from the chairman of the Committee on Public Works and Transportation; which was read and, without objection, referred to the Committee on Appropriations:

COMMITTEE ON PUBLIC WORKS AND TRANSPORTATION,

Washington, DC, November 9, 1993.

Hon. THOMAS S. FOLEY,
Speaker, House of Representatives,
Washington, DC.

DEAR MR. SPEAKER: Enclosed are copies of resolutions adopted today by the Committee on Public Works and Transportation. These resolutions authorize studies of potential water resources projects by the Secretary of the Army, acting through the Chief of Engineers, in accordance with the provisions of section 4 of the Act of March 4, 1913.

Sincerely yours,

NORMAN Y. MINETA,
Chairman.

There was no objection.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to the provisions of clause 5 of rule I, the Chair announces that he will postpone further proceedings today on each motion to suspend the rules on which a recorded vote or the yeas and nays are ordered, or on which the vote is objected to under clause 4 of rule XV.

Such rollcall votes, if postponed, will be taken at the end of the legislative business day, but not before 4 p.m. today.

EARTHQUAKE HAZARDS REDUCTION ACT OF 1977 AUTHORIZATION, FISCAL YEARS 1994, 1995, AND 1996

Mr. BROWN of California. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 3485) to authorize appropriations for carrying out the Earthquake Hazards Reduction Act of 1977 for fiscal years 1994, 1995, and 1996.

The Clerk read as follows:

H.R. 3485

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. AUTHORIZATION OF APPROPRIATIONS.

Section 12 of the Earthquake Hazards Reduction Act of 1977 (42 U.S.C. 7706) is amended—

- (1) in subsection (a)(7)—
 (A) by inserting "of the Agency" after "to the Director";
 (B) by striking "and" after "September 30, 1992"; and
 (C) by inserting ", \$20,160,000 for the fiscal year ending September 30, 1994, \$20,805,000 for the fiscal year ending September 30, 1995, and \$21,450,000 for the fiscal year ending September 30, 1996" after "September 30, 1993";
 (2) in subsection (b)—
 (A) by striking "and" after "September 30, 1992"; and
 (B) by inserting ", \$49,861,000 for the fiscal year ending September 30, 1994; \$51,457,000 for the fiscal year ending September 30, 1995; and \$53,052,000 for the fiscal year ending September 30, 1996" after "September 30, 1993";
 (3) by adding at the end of subsection (c) the following new sentences: "There are authorized to be appropriated, out of funds otherwise authorized to be appropriated to the National Science Foundation, \$17,500,000 for engineering research under this Act and \$10,500,000 for geosciences research under this Act, for the fiscal year ending September 30, 1994. There are authorized to be appropriated, out of funds otherwise authorized to be appropriated to the National Science Foundation, \$18,060,000 for engineering research under this Act and \$10,836,000 for geosciences research under this Act, for the fiscal year ending September 30, 1995. There are authorized to be appropriated, out of funds otherwise authorized to be appropriated to the National Science Foundation, \$18,620,000 for engineering research under this Act and \$11,172,000 for geosciences research under this Act, for the fiscal year ending September 30, 1996."; and
 (4) by adding at the end of subsection (d) the following new sentences: "There are authorized to be appropriated, out of funds otherwise authorized to be appropriated to the National Institute of Standards and Technology, \$1,532,000 for the fiscal year ending September 30, 1994. There are authorized to be appropriated, out of funds otherwise authorized to be appropriated to the National Institute of Standards and Technology, \$1,581,000 for the fiscal year ending September 30, 1995. There are authorized to be appropriated, out of funds otherwise authorized to be appropriated to the National Institute of Standards and Technology, \$1,630,000 for the fiscal year ending September 30, 1996.".

SEC. 2. BUY AMERICAN PROVISIONS.

(a) COMPLIANCE WITH BUY AMERICAN ACT.—No funds appropriated pursuant to this Act may be expended by an entity unless the entity agrees that in expending the assistance the entity will comply with sections 2 through 4 of the Act of March 3, 1933 (41 U.S.C. 10a–10c, popularly known as the "Buy American Act").

(b) SENSE OF CONGRESS; REQUIREMENT REGARDING NOTICE.—

(1) PURCHASE OF AMERICAN-MADE EQUIPMENT AND PRODUCTS.—In the case of any equipment or products that may be authorized to be purchased with financial assistance provided under this Act, it is the sense of the Congress that entities receiving such assistance should, in expending the assistance, purchase only American-made equipment and products.

(2) NOTICE TO RECIPIENTS OF ASSISTANCE.—In providing financial assistance under this Act, the Director of the Federal Emergency

Management Agency shall provide to each recipient of the assistance a notice describing the statement made in paragraph (1) by the Congress.

(c) PROHIBITION OF CONTRACTS.—If it has been finally determined by a court or Federal agency that any person intentionally affixed a fraudulent label bearing a "Made in America" inscription, or any inscription with the same meaning, to any product sold in or shipped to the United States that was not made in the United States, such person shall be ineligible to receive any contract or subcontract made with funds provided pursuant to this Act, pursuant to the debarment, suspension, and ineligibility procedures described in section 9.400 through 9.409 of title 48, Code of Federal Regulations.

(d) RECIPROCALITY.—
 (1) GENERAL RULE.—Except as provided in paragraph (2), no contract or subcontract may be made with funds authorized under this Act to a company organized under the laws of a foreign country unless the Director of the Federal Emergency Management Agency finds that such country affords comparable opportunities to companies organized under laws of the United States.

(2) EXCEPTION.—(A) The Director of the Federal Emergency Management Agency may waive the rule stated under paragraph (1) if the products or services required are not reasonably available from companies organized under the laws of the United States. Any such waiver shall be reported to the Congress.

(B) Paragraph (1) shall not apply to the extent that to do so would violate the General Agreement of Tariffs and Trade or any other international agreement to which the United States is a party.

SEC. 3. LIMITATION ON APPROPRIATIONS.

No funds are authorized to be appropriated for carrying out the Earthquake Hazards Reduction Act of 1977 for any fiscal year other than a provided by the amendments made by this Act.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from California [Mr. BROWN] will be recognized for 20 minutes, and the gentleman from New York [Mr. BOEHLERT] will be recognized for 20 minutes.

The Chair recognizes the gentleman from California [Mr. BROWN].

Mr. BROWN of California. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, in 1977 I joined with Senator Cranston to introduce the Earthquake Hazards Reduction Act of 1977 to bring a national commitment to a long-term earthquake hazards reduction program. Now more than ever, there is a great need to maintain that commitment. Earthquakes remain a serious threat to communities in 39 States, my State of California in particular.

In June 1992, the largest earthquake to strike southern California in 40 years occurred near the town of Landers. Scientists estimate a 1 in 2 chance of a major urban earthquake in southern California during the next 5 to 10 years. The 42d District continues to feel aftershocks from the Landers Big Bear earthquakes and from other local fault sources several magnitude 2 and above events per week. The area is

of particular concern because of the proximity of the San Andreas Fault and the stress that may have been added to the local faults due to the Landers event.

The bill under consideration provides authorizations for fiscal year 1994, equal to the appropriated levels for these programs, with inflationary increases for fiscal years 1995 and 1996.

I want to recognize the outstanding efforts of Mr. BOUCHER of Virginia, chairman of the Subcommittee on Science of the Committee on Science, Space, and Technology for his diligent efforts to set us on a course of correct some of the deficiencies in the National Earthquake Hazards Reduction Program.

I want to acknowledge the distinguished ranking Republican member of the Committee on Science, Space, and Technology, Mr. WALKER of Pennsylvania and Mr. BOEHLERT of New York, ranking Republican member of the Subcommittee on Science, for their cooperation and assistance in developing H.R. 3485. I also appreciate the efforts of the Committee on Natural Resources, which shares jurisdiction over the program, especially Chairman MILLER of California and Mr. YOUNG of Alaska, ranking Republican member, Mr. LEHMAN of California, chairman of the Energy and Mineral Resources Subcommittee, and the ranking Republican member, Mrs. VUCANOVICH of Nevada, for facilitating consideration of the bill.

I urge my colleagues to support passage of H.R. 3485, the authorization for the Earthquake Hazards Reduction Act for fiscal years 1994, 1995, and 1996.

□ 1240

Mr. Speaker, I reserve the balance of my time.

Mr. BOEHLERT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in strong support of H.R. 3485. The program we are reauthorizing today has been instrumental in reducing the loss of life and property from earthquakes.

This bill provides very modest increases for this valuable program; authorizations are at the appropriated levels for this fiscal year and inflation increases are provided for fiscal 1995 and 1996. That is a reasonable investment in a program that pays itself back many times over in preventing earthquake losses.

We would like to see this program have an even greater impact on earthquake mitigation, and for that reason members of our committee and the Committee on Natural Resources have written to the President, asking that he undertake a high-level review of the program to ensure that it is operating optimally.

The health of this program should be of concern to every Member of this body. Earthquakes are not limited to

the west coast—I am tempted to say unfortunately; in fact, 39 States face seismic risks. And, of course, as we have seen with this summer's flooding, catastrophic natural disasters affect everyone in this country because of the need for Federal disaster aid.

I urge my colleagues to support this bill.

Mr. Speaker, I yield such time as he may consume to the gentleman from Pennsylvania [Mr. WALKER], the ranking minority member.

Mr. WALKER. Mr. Speaker, I thank the gentleman from New York [Mr. BOEHLERT] for yielding this time to me. This is a good bill and one that the House should approve. It is there because of the work of a number of people who each made a contribution that I think has turned this into a bill of considerable merit.

I wish to thank both our committee chairman, the gentleman from California [Mr. BROWN], and the Subcommittee of Science chairman, the gentleman from Virginia [Mr. BOUCHER], for their openness on this legislation and their willingness to work with the minority. In particular I want to thank Chairman BROWN for his willingness to hold the program budget to a true baseline freeze so that we are not dealing with a situation where we are massively increasing the spending in this area.

Furthermore, Mr. Speaker, I share the concerns of many Members on both sides of the aisle that this program, the Earthquake Hazards Reduction Program, needs better strategic planning and agency coordination. I am pleased that this committee is taking efforts within this bill to enforce stronger oversight, and I am convinced that this bill will lead to a better program in the future.

Additionally, Mr. Speaker, I want to thank the ranking Republican member, the gentleman from New York [Mr. BOEHLERT] for all his efforts at that level. His contributions have made this a better bill. He is someone, as he has pointed out in his remarks, who understands that earthquakes are a national concern, and we are trying to build a program here that speaks to that national concern.

Likewise I would like to express my appreciation to the gentlewoman from Washington [Ms. DUNN] for offering an amendment that is typically offered in our committee by the gentleman from Minnesota [Mr. GRAMS]. That particular amendment is language to prohibit appropriation of funds that are not authorized after fiscal year 1996 in this case. What that means is that we have essentially a sunset clause as it affects this particular piece of legislation. I think that, too, strengthens it.

I am proud to be a cosponsor of this bill, and I urge my fellow colleagues to support passage.

Mr. BROWN of California. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I do not wish to prolong the debate on this. I do take umbrage at the use of the word "unfortunately" by Mr. BOEHLERT. But I will not ask that his words be taken down at this point. It is true that this program probably, as with most programs, needs further analysis in order to improve its coordination and focus, and we have taken steps in that direction.

I should point out also that there is a very substantial move to relieve, at least in large part, the costs of catastrophic events such as earthquakes by considering the possibility of taking care of these costs through an insurance program. Those steps are under way also.

Mr. Speaker, I think we are making progress in this whole area of both mitigating and compensating for catastrophic events, and I hope that that will continue.

Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. BOEHLERT. Mr. Speaker, I yield myself such time as I may consume.

I would just like to make certain that the written record reflects what the visual record will reflect, and that is, when our distinguished chairman, the gentleman from California [Mr. BROWN], made his remark, his tongue was planted firmly in his cheek. The fact of the matter is too many people, particularly in my State of New York, and others who are privileged to live in the Northeast, think that earthquakes are a California phenomenon when they are not. They are national in scope, and they know no boundaries, and so we have to be concerned, as Americans, about this problem, and we have to do something about it, and I am glad to say we are doing something about it.

Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore (Mr. MONTGOMERY). The question is on the motion offered by the gentleman from California [Mr. BROWN] that the House suspend the rules and pass the bill, H.R. 3485.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended, and the bill was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. BROWN of California. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

FEDERAL EMPLOYEES CLEAN AIR INCENTIVES ACT

Ms. NORTON. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 3318) to amend title 5, United States Code, to provide for the establishment of programs to encourage Federal employees to commute by means other than single-occupancy motor vehicles.

The Clerk read as follows:

H.R. 3318

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE; PURPOSE.

(A) SHORT TITLE.—The Act may be cited as the "Federal Employees Clean Air Incentives Act".

(b) PURPOSE.—The purpose of this Act is to improve air quality and to reduce traffic congestion by providing for the establishment of programs to encourage Federal employees to commute by means other than single-occupancy motor vehicles.

SEC. 2. AUTHORITY TO ESTABLISH PROGRAMS.

(a) IN GENERAL.—Chapter 79 of title 5, United States Code, is amended by adding at the end the following:

"§ 7905. Programs to encourage commuting by means other than single-occupancy motor vehicles

"(a) For the purpose of this section—

"(1) the term 'employee' means an employee as defined by section 2105 and a member of a uniformed service;

"(2) the term 'agency' means—

"(A) an Executive agency;

"(B) an entity of the legislative branch; and

"(C) the judicial branch;

"(3) the term 'entity of the legislative branch' means the House of Representatives, the Senate, the Office of the Architect of the Capitol (including the Botanic Garden), the Capitol Police, the Congressional Budget Office, the Copyright Royalty Tribunal, the Government Printing Office the Library of Congress, the the Office of Technology Assessment; and

"(4) the term 'transit pass' means a transit pass as defined by section 132(f)(5) of the Internal Revenue Code of 1986.

"(b)(1) The head of each agency may establish a program to encourage employees of such agency to use means other than single-occupancy motor vehicles to commute to or from work.

"(2) A program established under this section may involve such options as—

"(A) transit passes (including cash reimbursements therefore, but only if a voucher or similar item which may be exchanged only for a transit pass is not readily available for direct distribution by the agency);

"(B) furnishing space, facilities, or services to bicyclists; and

"(C) any non-monetary incentive which the agency head may otherwise offer under any other provision of law or other authority.

"(c) The functions of an agency head under this section shall—

"(1) with respect to the judicial branch, be carried out by the Director of the Administrative Office of the United States Courts;

"(2) with respect to the House of Representatives, be carried out by the Committee on House Administration of the House of Representatives; and

"(3) with respect to the Senate, be carried out by the Committee on Rules and Administration of the Senate.

"(d) The President shall designate 1 or more agencies which shall—

"(1) prescribe guidelines for programs under this section;

"(2) on request, furnish information or technical advice on the design or operation of any program under this section; and

"(3) submit to the President and the Congress, before January 1, 1995, and at least every 2 years thereafter, a written report on the operation of this section, including, with respect to the period covered by the report—

"(A) the number of agencies offering programs under this section;

"(B) a brief description of each of the various programs;

"(C) the extent of employee participation in, and the costs of the Government associated with, each of the various programs;

"(D) an assessment of any environmental or other benefits realized as a result of programs established under this section; and

"(E) any other matter which may be appropriate."

(b) CHAPTER ANALYSIS.—The analysis for chapter 79 of title 5, United States Code, is amended by adding at the end the following:

"7905. Programs to encourage commuting by means other than single-occupancy motor vehicles."

SEC. 3. EFFECTIVE DATE.

This Act and the amendments made by this Act shall take effect on January 1, 1994.

The SPEAKER pro tempore. Pursuant to the rule, the gentlewoman from the District of Columbia [Ms. NORTON] will be recognized for 20 minutes, and the gentleman from Wisconsin [Mr. PETRI] will be recognized for 20 minutes.

The Chair recognizes the gentlewoman from the District of Columbia [Ms. NORTON].

Ms. NORTON. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the purpose of H.R. 3318, the Federal Employees Clean Air Incentives Act, is to improve air quality and to reduce traffic congestion by authorizing Federal agencies to establish programs to encourage Federal employees to commute by means other than single-occupant vehicles. An agency's program may involve offering transit passes, space or facilities to bicyclists, or nonmonetary incentives to encourage employees to consider alternative means of commuting to work.

Private sector employees have been eligible for a tax-free transit subsidy since 1984. The Treasury, Postal Service, and General Government Appropriations Act of 1991 extended this benefit to Federal employees and this authorization expires December 31, 1993. The Energy Policy Act of 1992 subsequently increased the amount of this subsidy which is tax-deductible from \$21 to \$60 per month. Most agencies, however, currently provide a subsidy of only \$21 per month.

Under this Clean Air Act Amendment of 1990, both private and public employees in several of the Nation's largest

cities will soon be required to implement trip-reduction programs in order to reduce toxic emissions produced by motor vehicles. The Federal Employees Clean Air Incentives Act is one of the ways in which Federal agencies in these and other cities may satisfy the Clean Air Act requirements and help clean up our environment.

In fact, last month, President Clinton released his climate change action plan which is intended to return the U.S. greenhouse gas emissions to 1990 levels by the year 2000. Part of President Clinton's proposal targets growth in transportation emissions and calls for providing a powerful reward for commuters to use mass transit, carpool, or find means other than single-occupancy vehicles to get to work. This bill does just that.

The Subcommittee on Compensation and Employee Benefits held two hearings on the transit subsidy program. We received testimony from the Department of Transportation, the General Accounting Office, Federal employee organizations, mass transit organizations, and environmental and commuter policy organizations. All witnesses expressed their desire to see the transit subsidy authorization made permanent. In addition, the subcommittee received numerous letters indicating that transit subsidies are supported by employees and Federal agencies nationwide.

The Committee on Post Office and Civil Service unanimously approved H.R. 3318 on October 27, 1993. I urge the House to adopt H.R. 3318.

□ 1250

Mr. Speaker, I reserve the balance of my time.

Mr. PETRI. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 3318, the Federal Employees Clean Air Incentives Act. This bill is consistent with the goals of the Clean Air Act and the Energy Policy Act to establish a permanent incentive program encouraging Federal and private sector employees to use public transportation.

This bill is critical, as metropolitan areas which do not meet the Clean Air Act requirement and those areas which do not meet national and ambient air quality standards, must develop emission reduction programs. Reauthorization of this program for Federal employees will help to shift behavioral patterns and continue the greater use of public transportation, aiding the cleanup of our air and environment.

Increased user participation of mass transit would help keep costs down for all mass transit users. This program was started in 1980 by Executive Order 12191. It directed Federal agencies to promote ridesharing and the use of other forms of public mass transportation as a means to conserve energy resources, reduce traffic congestion and improve air quality.

The General Accounting Office found that as of April 1993, 75 Federal agencies and organizations out of approximately 150 and 7 of the 14 Cabinet-level departments participated in the Transit Benefit Program. The current provision authorizing Federal agencies to participate in programs encouraging Federal employees to use public transportation was enacted in the fiscal year 1991 Treasury and Postal Appropriations Act and expires on December 31, 1993.

H.R. 3318 makes the program permanent and encourages all three branches of the Government to make this program available to their employees—including members of the uniformed services. The head of each agency may develop programs to discourage the use of single-occupancy motor vehicles, such as transit passes defined by section 132(f)(5) of the Internal Revenue Code, space, facilities and/or services for bicyclists, and nonmonetary incentives.

Mr. Speaker, this bill received a full hearing by the Subcommittee on Compensation and Employee Benefits, and many local and State jurisdictions from all over the country wrote in support of the measure. The legislation was ordered to be reported by the Committee on Post Office and Civil Service. I urge my colleagues to support H.R. 3318.

Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Ms. NORTON. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore (Mr. MONTGOMERY). The question is on the motion offered by the gentlewoman from the District of Columbia [Ms. NORTON] that the House suspend the rules and pass the bill, H.R. 3318.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Ms. NORTON. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks, and include therein extraneous matter on H.R. 3318, the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from the District of Columbia? There was no objection.

GEORGE ARCENEUX, JR., UNITED STATES COURTHOUSE

Mr. TRAFICANT. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 3186) to designate the U.S. courthouse located in Houma, LA, as

the "George Arceneaux, Jr., United States Courthouse."

The Clerk read as follows:

H.R. 3186

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. DESIGNATION.

The United States courthouse located at 800 East Main Street in Houma, Louisiana, is designated as the "George Arceneaux, Jr., United States Courthouse".

SEC. 2. LEGAL REFERENCES.

Any reference in a law, regulation, document, record, map, or other paper of the United States to the courthouse referred to in section 1 is deemed to be a reference to the "George Arceneaux, Jr., United States Courthouse".

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Ohio [Mr. TRAFICANT] will be recognized for 20 minutes and the gentleman from Wisconsin [Mr. PETRI] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Ohio [Mr. TRAFICANT].

Mr. TRAFICANT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, George Arceneaux, Jr., was born on May 17, 1928, in Houma, LA, and died in April 1993. He traced his roots back to the Acadians of Nova Scotia, Canada. While working in Washington, DC, he attended law school at American University, graduating in 1957. From 1960 to 1978, Judge Arceneaux practiced law in the private sector in Houma, LA.

On September 26, 1979, President Jimmy Carter appointed Arceneaux to the U.S. District Court for the Eastern District of Louisiana. He was the first Acadian judge named to the Federal court since the 1920's.

Judge Arceneaux has great sympathy for those individuals who lived in rural south Louisiana and had to do business with the Federal court in New Orleans.

These people were forced to make a long and arduous trip to the Federal court in New Orleans, if they needed to file papers, fulfill jury duty or had other matters to take up. Consequently, Judge Arceneaux began to champion the idea of building a satellite courthouse in Houma. In spite of many obstacles, Judge Arceneaux persisted in pressing forward to achieve this goal. I am proud to say that the satellite courthouse is now under construction.

Judge Arceneaux had a distinguished career. He was renowned for his contributions to his community and was well respected by his fellow judges. Therefore, it is fitting and proper that the U.S. courthouse located at 800 East Main Street in Houma, LA, be designated as the "George Arceneaux Jr., United States Courthouse".

Mr. Speaker, I reserve the balance of my time.

Mr. PETRI. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker. I rise in support of H.R. 3186, a bill to designate the U.S. Courthouse located in Houma, LA, as the "George Arceneaux, Jr., United States Courthouse." Judge Arceneaux was born May 17, 1928, in New Orleans, LA, attended local schools and graduated valedictorian from Louisiana State University in 1949. He served in the U.S. Army during the Korean war as an intelligence analyst. He later served as legislative and administrative assistant to then Senator Allen Ellender, until the Senator's death in 1972.

While on the congressional staff, Judge Arceneaux earned a law degree at night from American University. Judge Arceneaux, an Acadian by heritage, practiced law in Houma until President Carter appointed him to the Federal bench in 1979. Judge Arceneaux served with distinction until his death in April 1993. It is fitting and appropriate to name this building in Judge Arceneaux' honor, as a tribute to his tireless dedication to locate this facility in Houma to serve the citizens of this rural area.

Mr. Speaker, I have no requests for time, and I yield back the balance of my time.

Mr. TRAFICANT. Mr. Speaker, I yield such time as he may consume to the distinguished gentleman from Louisiana [Mr. TAUZIN].

Mr. TAUZIN. Mr. Speaker, I thank the gentleman for yielding me this time.

Mr. Speaker, I come before you today to tell you about a remarkable man from south Louisiana, Judge George Arceneaux—and about why I have introduced a bill, H.R. 3186, cosponsored by the entire Louisiana delegation, to name a new Federal courthouse in Houma, LA, after Judge Arceneaux.

George Arceneaux, Jr., was born in Houma, LA, to a family that traces its roots back to the exile of the Acadians from Nova Scotia. When appointed to the Federal bench in 1979, Judge Arceneaux was the first Acadian judge named to the Federal court since the 1920's.

After graduating valedictorian of his 1945 class at Terrebonne High School, he went on to Louisiana State University, graduating in 1949 and becoming a print journalist for a local newspaper. This career was interrupted by the Korean war, when he served as an intelligence analyst with the 38th Military Intelligence Service Company at Fort Meade, MD.

After an honorable discharge, Arceneaux went to work as a legislative assistant, then administrative assistant to Senator Allen J. Ellender of Houma, who died in 1972 at the height of his career in public service as President pro tempore of the U.S. Senate. While in Washington, Arceneaux married and earned his J.D. degree from American University in 1957.

In 1960, Arceneaux returned to Houma to practice law until his ap-

pointment by President Jimmy Carter to the U.S. District Court for the Eastern District of Louisiana in New Orleans on September 26, 1979. After a distinguished career on the bench, Judge Arceneaux died in April 1993, following unsuccessful surgery for lung disease.

During his years in private practice and on the bench, Judge Arceneaux devoted significant time and energy to improving both the judiciary and the community—through service on the Judicial Conference and on numerous community boards and charities. But perhaps he is best remembered for his lifelong efforts to bring the Federal court to Houma.

It was while working in Washington that Judge Arceneaux took note of the hardship that traveling to New Orleans to conduct any business with the Federal court caused the people in rural south Louisiana. After returning to Houma to practice law, Judge Arceneaux saw firsthand the difficulty and inconvenience the distant location of the Federal court caused the people of the Houma area—whether filing papers or being called as witnesses or for jury duty.

Through the years, Judge Arceneaux continued to push the idea of this satellite courthouse. He remained steadfast in his devotion through the long and complicated process, overcoming countless obstacles within the Federal court system and finally through Congress.

As the Houma Courier noted in an editorial following his death:

It took nearly a lifetime, but U.S. District Judge George Arceneaux, Jr., who died in April, saw his dream become a reality. Well almost. Just before his death, construction began on a Federal courthouse here in Houma.

Though his dream of presiding over Federal court here will not be realized, his plan to make the court accessible to the people of Terrebonne, Lafourche, Assumption, St. James, and St. John Parishes must be. Arceneaux spent his life serving others, working in Washington, assisting clients in Houma, sitting on the Federal bench, and as vice president of Rotary International. * * * But he should be remembered by the people of this area for bringing the Federal court to them. Those whose lives he touched—and there are literally thousands—are now responsible for seeing the project through to its conclusion. This must be his legacy.

Mr. Speaker, I am proud to have known Judge Arceneaux and can think of no greater and more fitting tribute than naming this new Federal courthouse after him. I urge swift passage of H.R. 3186.

Mr. TRAFICANT. Mr. Speaker, I yield myself such time as I may consume. Mr. Speaker, I support the comments of Chairman TAUZIN and thank him for his leadership in bringing forth the naming of the Federal building after Judge Arceneaux. I think it is fitting and proper.

Mr. Speaker, I support the bill. Judge Arceneaux was right when he said that

all the little people have to go to the big cities all the time to get things done, and he said that should be changed. I agree with Judge Arceneaux.

Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Ohio [Mr. TRAFICANT] that the House suspend the rules and pass the bill, H.R. 3186.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. TRAFICANT. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on H.R. 3186, the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

EDWIN FORD HUNTER, JR., UNITED STATES COURTHOUSE

Mr. TRAFICANT. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 3356) to designate the United States courthouse under construction at 611 Broad Street, in Lake Charles, LA, as the "Edwin Ford Hunter, Jr., United States Courthouse."

The Clerk read as follows:

H.R. 3356

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. DESIGNATION.

The United States courthouse under construction at 611 Broad Street, in Lake Charles, Louisiana, shall be known and designated as the "Edwin Ford Hunter, Jr., United States Courthouse".

SEC. 2. REFERENCES.

Any reference in a law, map, regulation, document paper, or other record of the United States to the courthouse referred to in section 1 shall be deemed to be a reference to the "Edwin Ford Hunter, Jr., United States Courthouse".

□ 1300

The SPEAKER pro tempore (Mr. MONTGOMERY). Pursuant to the rule, the gentleman from Ohio [Mr. TRAFICANT] will be recognized for 20 minutes, and the gentleman from Wisconsin [Mr. PETRI] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Ohio [Mr. TRAFICANT].

Mr. TRAFICANT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, Edwin Hunter was a native son of Louisiana. He was born in 1911 in Alexandria, LA, and with the

exception of a short time at George Washington University here in Washington, DC, he lived and practiced law in Louisiana.

He was appointed to the Federal circuit by President Eisenhower in 1954 and served in that capacity until 1993. From 1970 to 1976 he presided as chief judge for the Western District of Louisiana. During the same time he was chief judge, Hunter also was a member of the National Advisory Committee on Federal Civil Rules.

Judge Hunter was a prodigious lawyer and judge. He has been honored by the Department of Justice and numerous local and civic organizations. He was a champion of settlement through pretrial conference and is associated with such landmark decisions as the railroad rate case, and Bartie versus U.S. Weather Bureau. Therefore, it is fitting and proper to designate the U.S. courthouse under construction at 611 Broad Street, in Lake Charles, LA, as the "Edwin Ford Hunter, Jr., U.S. Courthouse."

Mr. Speaker, I reserve the balance of my time.

Mr. PETRI. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 3356, a bill to designate the U.S. courthouse under construction at 611 Broad Street, in Lake Charles, LA, as the "Edwin Ford Hunter, Jr., U.S. Courthouse." Judge Hunter was born in Alexandria, LA, on February 18, 1911, and educated in local schools. He received a law degree from George Washington University in 1937, while working part time on Capitol Hill under the patronage of the late Senator John Overton.

Judge Hunter returned to Shreveport to practice law. His career was interrupted by World War II where he served with distinction in the U.S. Navy, attaining the rank of lieutenant. In 1954 President Eisenhower appointed him to the U.S. District Court, Fourth Southern Division of Louisiana. From 1970 to 1976 Judge Hunter served as chief judge of the Western District of Louisiana, and in 1976 he took senior status. Today Judge Hunter handles 25 percent of the Lake Charles docket and all Lake Charles dispositive cases. It is fitting to name this building under construction in Judge Hunter's honor.

Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. TRAFICANT. Mr. Speaker, I support H.R. 3356 and urge all my colleagues to join me in support of the legislation.

Mr. HAYES. Mr. Speaker, I want to express my great thanks to Chairman MINETA and Chairman TRAFICANT for their work to report this bill, H.R. 3356, which designates the U.S. Courthouse under construction in Lake Charles, LA, as the "Edwin F. Hunter, Jr. United States Courthouse."

Judge Hunter has enjoyed a long and exemplary career on the bench, starting with his

appointment by President Eisenhower. Naming this courthouse in his honor is a proper tribute for all he has given to the Lake Charles community, and to this Nation.

Judge Hunter was named as a Federal judge in 1954 after more than a decade of private practice. He has served as a State Representative in the Louisiana Legislature, the State chairman of the American Bar Association, commander of the Lowe-McFarlane American Legion Post, and is a decorated naval officer who served in World War II. Judge Hunter currently handles 25 percent of the Lake Charles docket and all Lake Charles dispositive motions, in addition to Lafayette and Shreveport cases.

The courthouse naming in honor of Judge Hunter has the wide support of the entire Lake Charles and Louisiana public.

I have additional background information for inclusion in the RECORD, and stand ready to assist in any way necessary to promote its passage.

JUDGE EDWIN FORD HUNTER, JR.

PERSONAL

Born February 18, 1911 at Alexandria, Louisiana to Mr. and Mrs. Edwin Ford Hunter; grandson of Judge and Mrs. Edwin Gardner Hunter; great-grandson of Judge and Mrs. Robert A. Hunter.

Married Shirley Kidd October 11, 1941; three children. Edwin Kidd Hunter (attorney). Janin Hunter Robert (educator), and Kelly Hunter Bowler (pharmacist); 3 grandchildren.

PROFESSIONAL

L.L.B. from George Washington University, 1937 (pre-law at LSU); Practiced law, Smith, Hunter, Risinger and Shuey, in Shreveport, Louisiana, 1940-1953; U.S. Judge, Appointed by President Eisenhower, 1954-1993; Chief Judge, Western District of Louisiana, 1970-1976; and, Presided Federal Appellate Courts in New York, Texas, Georgia & South Carolina.

LA State Chairman, American Bar Association, 1945; Commander, American Legion Post, Shreveport, LA, 1945; LA State Legislature Representative from Caddo Parish, 1948-1952; LA Campaign Manager & Executive Counsel, Governor Robert Kennon, 1952-1953; and, National Advisory Committee on Federal Civil Rules, 1970-1976.

MILITARY

U.S. Navy, Lieutenant, 1942-1945 (Six Battle Stars).

DISTINCTIONS

Justice Department Commendation for Integration (Time Magazine feature), 1960; Our Lady Queen of Heaven Catholic Church Man-of-the-Year, 1991; King of Krewe Du La Contree, 1992; Significant Sig of Sigma Chi Fraternity, 1993.

OTHER

Judge Hunter's decisions have rarely been reversed in 40 years on the bench. He is noted for efficiently getting rid of a docket of 15-20 cases per week through settlement in pre-trial conferences.

From 1953 to taking Senior status in 1976, handled at least 300 cases a year, 8000 civil cases. From 1956 to 1992 sat with 5th circuit several times a year, about 20 cases a section (about 720 cases). Also many 3-judge cases (2 district judges, 1 circuit appeals judge).

At present, 82 years of age and handles 25% of Lake Charles Docket and all Lake Charles dispositive motions, in addition to a few Lafayette and Shreveport cases. Sits occasionally by designation with the U.S. Court of Appeals for the 5th Circuit.

Enacted the 6-man civil jury later approved by U.S. Supreme Court.

Presided over more admiralty cases than any judge in United States.

Well known decisions: Bartie vs. U.S. Weather Bureau (Hurricane Audrey); railroad rate case which was adopted as decision of U.S. Supreme Court; and, Leger case which has been cited over 100 times.

Mr. TRAFICANT. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Ohio [Mr. TRAFICANT] that the House suspend the rules and pass the bill, H.R. 3356.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. TRAFICANT. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks and include therein extraneous material on H.R. 3356, the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

JOHN MINOR WISDOM UNITED STATES COURTHOUSE

Mr. TRAFICANT. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 2868) to designate the Federal building located at 600 Camp Street in New Orleans, LA, as the "John Minor Wisdom United States Courthouse."

The Clerk read as follows:

H.R. 2868

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. DESIGNATION.

The Federal building located at 600 Camp Street in New Orleans, Louisiana, shall be known and designated as the "John Minor Wisdom United States Courthouse".

SEC. 2. REFERENCES.

Any reference in a law, map, regulation, document, paper, or other record of the United States to the Federal building referred to in section 1 shall be deemed to be a reference to the "John Minor Wisdom United States Courthouse".

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Ohio [Mr. TRAFICANT] will be recognized for 20 minutes, and the gentleman from Wisconsin [Mr. PETRI] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Ohio [Mr. TRAFICANT].

Mr. TRAFICANT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this bill is cosponsored by all of the members of the Louisiana

delegation to honor a man of courage, imagination, compassion, and intellect. At age 88 Judge Wisdom is still a senior judge with an active docket. In his long career, he participated in numerous landmark legal decisions, primarily in the area of civil rights, such as Meredith versus Fair which desegregated the University of Mississippi landmark indeed. Judge Wisdom insists on an understanding and a respect for the rule of law. He enjoys a national reputation as a leader and role model in the judicial field.

It is fitting and proper to honor a courageous man, Judge John Minor Wisdom, by designating the courthouse in New Orleans in his name and in his honor.

Mr. Speaker, I reserve the balance of my time.

Mr. PETRI. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker. I rise in support of H.R. 2868, a bill to designate the U.S. courthouse located at 600 Camp Street, New Orleans, LA, as the "John Minor Wisdom United States Courthouse."

Judge Wisdom was born in New Orleans, LA on May 17, 1905, attended local schools, graduated from Washington and Lee University in 1925, and received a law degree from Tulane University in 1929. From 1929 to 1957 Judge Wisdom practiced law in New Orleans, with the exception of World War II, where he served with distinction in the U.S. Army Air Corps as a lieutenant colonel.

In 1957, President Eisenhower appointed Judge Wisdom to the Fifth Circuit Court of Appeals, where he participated in over 5,000 cases, and has written over 1,000 majority decisions on issues of voter registration, school desegregation, treatment of the mentally ill, employment discrimination, voting rights, trials by jury, product liability, asbestos liability, and interstate commerce issues. Judge Wisdom has shown the courage to rule on issues that brought the scorn and threats of those who disagreed with him.

Our legal system has been enriched by Judge Wisdom's participation in the judicial process. Through his love of liberty and his country he has demonstrated a high morality to his fellow citizens. For this we are grateful. It is fitting that the U.S. courthouse where Judge Wisdom has served with distinction for 36 years be named in his honor.

I have known Judge Wisdom personally for over 25 years and can truly say that no judge better deserved his name—"Wisdom."

I recall well first visiting the judge and his family in New Orleans for Mardi Gras in 1966 at the height of the civil rights controversies before the fifth circuit.

The judge already had carved out a reputation, together with several of his fifth circuit colleagues, as a leading protector for the Constitution and con-

gressional will in the implementation of voting rights, school desegregation, and access to public accommodations throughout the South.

At that time, with less than 10 years on the bench, Judge Wisdom already had begun building an impressive body of judicial work. Barry Sullivan, one of his former law clerks and a leading authority on the judge, has said that, his work "stands as a sturdy testimonial to the continued importance of liberal learning in adjudication and to the view of adjudication as an exercise in intellectual and moral excellence."

As Mr. Sullivan further noted, Judge Wisdom "has written, not only with clarity, elegance and style, but also with moral courage and intellectual authority, in virtually every area of law known to the Federal courts."

The naming of the courthouse in honor of Judge Wisdom will not just recall the name of one of the South's most distinguished citizens, it will also serve as a constant reminder for generations to come of that extraordinary body of wisdom—well over 1,000 masterly opinions—produced by one of our country's greatest minds and moral forces.

I urge my colleagues to join me in supporting H.R. 2868.

Mr. Speaker, I yield such time as he may consume to the distinguished gentleman from Louisiana [Mr. LIVINGSTON].

Mr. LIVINGSTON. Mr. Speaker, I thank my friend, the gentleman from Wisconsin [Mr. PETRI], for his fine remarks, as well as the remarks of the gentleman from Ohio [Mr. TRAFICANT], on behalf of a truly outstanding American, Judge John Minor Wisdom. I rise in support of H.R. 2868, and thank as well Chairman MINETA and the ranking Republican on the Committee on Public Works and Transportation, the gentleman from Pennsylvania [Mr. SHUSTER], as well as the ranking member of the subcommittee, the gentleman from Tennessee [Mr. DUNCAN], for their efforts in helping this legislation come to pass.

I want to congratulate my colleague, the gentleman from Louisiana [Mr. JEFFERSON], for being the primary sponsor of this legislation, because it honors a great man, a learned man, and the personification of a gentleman and a scholar.

Mr. Speaker, Judge Wisdom is currently on senior status with the Fifth Circuit Court of Appeals, but as I spoke with him just a couple of weeks ago, I can attest that that means nothing more than an adjustment of status, rather than workload.

□ 1310

He is working all the time, on cases before the fifth circuit and on cases of interest to which he might be assigned in the lower court system or on three-judge panels.

He is a very busy and industrious individual, and I'm proud to congratulate Judge Wisdom and his lovely wife, Bonnie, for attaining this recognition of a job well done.

Judge Wisdom has been an outstanding leader in civil rights, but he is likewise a learned expert on the judicial system, on archeology, on Greek tragedy, on Louisiana civil law. And in addition to being an outstanding jurist, he has provided a farm club for outstanding people who have worked for him as law clerks, and who have gone on to earn their stripes in their respective fields.

A former Governor of Tennessee was one of his law clerks; other Federal judges have been his law clerks. Eventually, perhaps even the President of the United States might claim to be one of Judge Minor Wisdom's law clerks.

Mr. Speaker, I applaud the sponsors of this legislation. I am pleased to be a cosponsor of this bill honoring a great American jurist.

[Excerpts From Fifth Circuit Reporter]
THE WISDOM PHENOMENON—A PERSONAL
PROFILE OF JUDGE JOHN MINOR WISDOM
(By Laura R. Robinson¹)

There is an aura surrounding Judge John Minor Wisdom which can be described as the "Wisdom phenomenon". It has characterized his entire career. His accomplishments as a lawyer, jurist and civic leader outshine the vast majority of Americans alive today. To those who know and love Judge Wisdom, his greatness is defined not by his achievements, but by his character. He is gentleman of the highest order, with a sense of gentility and humor rarely found in such a scholarly person. A former law clerk spoke of his own disappointment in the role models he had at a prestigious Eastern law school—men of great intelligence, but hard of heart. After clerking for Judge Wisdom, though, he is "filled with a new enthusiasm" for practicing law. He remarked, "Although it sounds like a cliché, he is both a gentleman and a scholar, which is an unusual combination" for someone of his professional caliber.

Included in the job description of "Law Clerk" to Judge Wisdom is the responsibility of driving the judge to and from work every day. The Judge has always had his clerks drive him, partly because his own driving reputation is well-earned, but mostly to get to know his clerks better. His first law clerk, Judge Martin L.C. Feldman of the United States District Court in New Orleans, recalls the picture the two of them made on a typical Friday afternoon in 1957. Judge Feldman was driving a two-seater MG with a lot of style and not much trunk space. After an afternoon of bridge (Judge Wisdom is an avid player), he and "Marty" would load up the MG, with two huge briefcases piled on Judge Wisdom's lap until he could barely see over, the rest of Judge Wisdom's books and briefs flowing out of the trunk, and Judge Wisdom sporting a gray homburg.

Judge Wisdom was born in New Orleans (pronounced "New Or-lee-ans") in 1905. In 1925, he received his bachelor of arts degree from Washington and Lee College, his father's alma mater. He received his bachelor of laws degree from Tulane University

School of Law in 1929. He accepted a job immediately following law school with the New Orleans firm of Monroe and Lemmon (one of the only firms offering a salary), but in August of 1929, he and a classmate, Saul Stone, hung out their shingle. They had neither money nor clients, but did have high ambitions. The firm of Wisdom and Stone was successful, and Judge Wisdom's private practice there grew until he was appointed to the bench in 1957 by President Eisenhower.

Judge Wisdom is a long-time active member in the Republican Party in Louisiana. He served as a Republican National Committeeman from Louisiana from 1952 until 1957. He is particularly proud of his instrumental role in moving the Louisiana delegation away from Taft to support of Eisenhower. On more than one occasion, Judge Wisdom and his wife, Bonnie, would personally bring into the precinct meetings (usually sparsely attended) the one or two people who would tip the voting balance in favor of Eisenhower. One particularly treasured picture is of Judge Wisdom with President Eisenhower while Eisenhower was on the campaign trail.

Judge and Mrs. Wisdom's interest in political events is as strong today as it was 30 years ago. A recent law clerk found it particularly interesting to watch the judge during the senate confirmation hearings for Judge Robert Bork. At that particular time, the Bork hearings were the only thing in the news that either the judge or the law clerk really had that much interest in following. One day when the two of them were driving home, they made many stops trying to buy a copy of the New York Times. After their last unsuccessful stop at an empty stand, the Judge got back in the car and commented, "I guess everyone in town is reading about the Bork hearing." While the Judge and Bork disagreed on many critical issues, he was shocked at the campaign mounted against Bork. Most of the people who know Judge Wisdom think that Judge Wisdom himself belongs on the Supreme Court, and that President Nixon made a sad mistake when he did not nominate Judge Wisdom during his presidency.

Even though Judge Wisdom never received a Supreme Court appointment he has been recognized in many other ways for his outstanding scholastic ability and wise judgment. He and the late Judge Henry J. Friendly were elected on the same day, March 17, 1961, to the American Law Institute, of which Judge Wisdom is a life member and a member of the Council. He has served on the Advisory Committee on Appellate Rules (1973-78) and, since 1975, he has sat on the bench of the Special Court under the Regional Railroad Reorganization Act of 1973. He has recently received the Tulane University Alumnus Award for 1989.

He is currently on "senior status" with the Fifth Circuit Court of Appeals, which is a "retirement" status. Realistically, however, Judge Wisdom has a very active career today. He still carries a full caseload and sits not only on the Fifth Circuit, but also on appellate panels all over the nation. He still works regularly six days a week, which "surprised and disappointed" some of the clerks. His interests are wide-ranging and include Tulane football, opera, literature, politics, and bridge. He and his wife still maintain a full social life, and he is known for never passing up a good party. In short, he has a passion for life.

The visitor to his chambers will usually find him "unavailable" on Friday afternoons. This has been an interesting coincidence for many years, although he used to be

"at the Supreme Court library doing research" on Fridays. Rumor has it that he can be found playing bridge at the Louisiana Club. This rumor has been rampant for nearly thirty years, although a visitor would be hard pressed to find anyone in his chambers who would admit it.

He is perhaps one of the most literary and expressive judges on the bench today and takes great pleasure in executing a well-crafted opinion. He is well known for his landmark decisions in the area of civil rights, including *Jefferson County Board of Education*, 372 F.2d 836 (5th Cir. 1966); *Singleton I and II*, 348 F.2d 729 (5th Cir. 1965), 355 F.2d 865 (5th Cir. 1966); and *Meridith v. Fair*, 298 F.2d 696 (5th Cir. 1962), cert. denied, 371 U.S. 828, 83 S.Ct. 49, 9 L.Ed.2d 66 (1962), which dramatically altered the law on school segregation. Other significant cases included *Offshore Company v. Robison*, 266 F.2d 769 (5th Cir. 1959), which established liberal tests for determining what is a "vessel" and who is a "seaman"; *Borel v. Fibreboard Products Corporation*, 493 F.2d 1076 (5th Cir. 1973), cert. denied 419 U.S. 869, 95 S.Ct. 127, 42 L.Ed.2d 107 (1974), recognizing manufacturer liability for insulation material for failure to warn workers of dangers associated with asbestos; and *Local 189, United Papermakers and Paperworkers v. United States*, 416 F.2d 980 (5th Cir. 1969), cert. denied 397 U.S. 919, 90 S.Ct. 926, 25 L.Ed.2d 100 (1970), which adopted the "rightful place" theory prohibiting the award of future jobs based on a seniority system with locked-in race discrimination. Judge Wisdom's scholarship in executing his opinions becomes even more impressive when one considers the circumstances under which they were written. The Judge is well known for writing two or three opinions at one time; such was the circumstance under which his opinion in *Offshore Company v. Robison* was issued. He has written vigorous, concise and incredibly scholarly opinions, some 25 to 30 pages long, within a matter of days.

His ability to maintain such intense concentration, though, has also brought out traits which make him endearingly human. Once he walked into the library with a puzzled look on his face, stood a moment and his law clerk asked if he could be of assistance. Judge Wisdom asked the clerk where Volume 39 of the Tulane Law Review was. He explained that he had last seen his glasses when reading that particular volume, and so was sure that he would find his glasses with that volume. The law clerk sheepishly pointed out that Judge Wisdom's glasses were on his forehead, and Volume 39 of the Tulane Law Review was in his hand. Both men had a good laugh. Judge Wisdom returned to his chambers to finish drafting his three opinions concurrently, while his law clerk diligently returned to work. He often lets his law clerks draft opinions, but always reminds them to "put in plenty of law review articles" and other secondary authority.

One of his most abiding interests, however, will always remain his law clerks. He hires them with humor, for example, looking for law students with the "particular quality" of an "ability to carry a briefcase and bartend," and "whimsey." He also hires them with a great deal of thought, intending for them to be lifetime friends. He remains in close contact with his clerks long after their one-year commitment is over. His former law clerks also periodically organize reunions, the most recent one being in September of 1987 for the judge's thirtieth anniversary on the bench.

The Judge goes to great lengths to be of personal assistance to his clerks, both while

¹Footnotes at end of article

they are clerking for him and afterward. For example, when he began clerking with Judge Wisdom, Judge Feldman was fresh out of the Army. The Judge decided that Feldman should get a judge advocate commission. Judge Wisdom happened to know the General of the Judge Advocate Corps, so, when the General was scheduled to be in New Orleans, he invited the General to play bridge at his house with two other people. The foursome played into the evening in Judge Wisdom's beautifully decorated living room, the floor of which was covered by Mrs. Wisdom's expensive Oriental rug. The General was a prolific cigar smoker and, at one point, his cigar fell on the floor, burning a huge hole in the rug. The following morning, Feldman appeared at the house to drive Judge Wisdom to work—totally unaware of anything that had transpired the night before. Judge Wisdom greeted him at the door with the good news that Feldman had the commission. Immediately, Mrs. Wisdom pushed Judge Wisdom out of the door and began berating an innocent Feldman about her beautiful rug being sacrificed in the name of patriotism.

Judge Feldman was the first of Judge Wisdom's law clerks to be sworn in as a judge himself. He insisted that his real swearing-in be done privately in Judge Wisdom's chambers, with only spouses and Judge Wisdom's law clerks and staff present. Everyone was doing their part to make everything look perfect, when Judge Wisdom decided that he had to wear his "best robe" for the swearing-in. His secretary searched through his robes and after finding his best robe, gave it to Judge Wisdom who wore it while swearing in Judge Feldman. Immediately following the swearing-in, Judge Wisdom took his robe off and put it on Judge Feldman. Both men were near tears at the depth of emotion this act conveyed,² but it exemplified and expressed Judge Wisdom's depth of feeling, his sense of loyalty, and his consideration and thoughtfulness. Later, Judge Wisdom was undergoing one of his many knee surgeries at the time of Judge Feldman's official swearing-in, and so Mrs. Wisdom made a presentation to Judge Feldman on behalf of Judge Wisdom at the formal ceremony.

Judge Wisdom has a strong sense of loyalty to other people, and especially to his staff. When Judge Wilson's secretary of thirty-five years officially retired, the judge gave her a "raving send-off" at a party thrown to her honor. The judge has never been known to criticize her, but rather has always been very supportive of her, both when she was working and now that she has retired. His clerks characterized his sense of loyalty as "striking"—a rare quality in today's world. It was obvious to them that Judge Wisdom has an abiding sense of human being's worth and believes that people are entitled to fundamental respect—and are not to be "used". Judge Wisdom taught his law clerks much about the law, but by his example, he taught them even more about character and virtue.

The judge has always treated women, as well as men, as his equals. The judge and his wife, Bonnie, have been described as presenting a model for a marriage partnership. Their relationship is built on mutual respect, love and support. This is not to say that they always agree, since both of the Wisdoms are strong-willed, and Mrs. Wisdom is certainly a match for the judge intellectually. But, as one family friend commented, you always think of the two of them together. Mrs. Wisdom shares the judge's affection for his law clerks, and together the two of them create an atmosphere of intimate

hospitality in their home and in their family for all of the law clerks.

While Judge Wisdom considers women to be his equals, he is still very much an old-fashioned Southern gentleman. And, so it happened that he and one of his female law clerks came to a standstill, literally, one afternoon on the way home from work. The judge is very insistent that no woman carry his briefcase. However, on this occasion, the judge had just undergone knee surgery and was using a walker or a cane to make his way around. Gail Agrawal picked up his briefcase outside of his office door and asked if he was ready to go. He was very chipper as he walked out of the door, and then he suddenly stopped at the sight of Gail holding the briefcase. He said, "I need my briefcase." She replied, "I have your briefcase." They both stood there for some time, neither giving in. Finally, with a sigh, she relinquished the briefcase. Thereafter, she and the other law clerks came up with a scheme in which every day she was to drive the judge, one of the other clerks "needed a ride somewhere" and so was available to carry the briefcase. Transparent as this scheme was, it worked.

Judge Wisdom's unique combination of a warm, caring, lively personality, a brilliant mind, and an outstanding career make him one of the most loved and respected judges on the federal bench. On May 8, 1989, Judge Wisdom will be formally presented with the DeVitt Award for distinguished service—widely recognized as the most prestigious honor given to a federal judge. One cannot find a more deserving recipient than John Minor Wisdom, and all who know him and love him are full of pride for him. He has earned the honor and distinction.

FOOTNOTES

¹1989 by the Bar Association of the Fifth Federal Circuit. Laura Robinson is an associate at Strasburger and Price. Many thanks to the following people for contributing information for this profile: Eric Weber (Munger, Tolles & Olson, Los Angeles); Tony Friedrich (Arnold & Porter, Washington, D.C.); Bill Pryor (Cabaniss & Johnston, Birmingham); Judge Martin L.C. Feldman (U.S. Dist. Judge, E.D.La., New Orleans); Paul Verkuil (President, William and Mary College); David Stone (Stone, Pigman, Walther, Wittmann & Hutchinson, New Orleans); Lamar Alexander (President, University of Tennessee and former Governor of Tennessee); Gail Agrawal (Monroe & Lemann, New Orleans); Cabell Chinnis (Latham & Watkins, Washington, D.C.).

²Unfortunately, this act left Judge Wisdom with some not-so-nice robes, so all of his staff decided to give a new robe for Christmas. Judge Feldman came to the Christmas party and quite innocently asked in a loud voice whether the law clerks and staff were giving Judge Wisdom a robe for Christmas. After a shocked silence, one of his secretaries admitted that, yes, they were, and Judge Feldman was thoroughly chastised.

JOHN MINOR WISDOM—VITA

John Wisdom received his A.B. in 1925 from Washington & Lee University and his LL.B. in 1929 from Tulane Law School. He practiced law in New Orleans from 1929 to 1957. From 1938 to 1957 he also taught law at Tulane. During World War II he served in the Army Air Force and attained the rank of Lieutenant Colonel. From 1954 to 1957 he was a member of the President's Commission on [Anti-Discrimination in] Government Contracts.

He was appointed to serve as a Circuit Judge United States Court of Appeals for the Fifth Circuit in 1957 just three years after *Brown v. Board of Education* was decided. He took Senior Judge status on January 15, 1977.

Judge Wisdom has served as a member of the Judicial Panel on Multi-District Litigation (1968-79), and as the panel's chairman

(1975-79). He has served on the Advisory Committee on Appellate Rules and on the Special Court organized under the Regional Rail Reorganization Act of 1973. He has been a member of the American Law Institute for over forty years, and is a member (emeritus) of the council.

Honorary degrees include LL.D.s from Oberlin College (1963); Tulane University (1976); San Diego University (1979); Haverford College (1982); Middlebury College (1987); Harvard University (1987). He received the first Louisiana Bar Foundation Distinguished Jurist Award (1986) and the Tulane Distinguished Alumnus Award (1989).

In his thirty-one years on the bench he has participated in the decisions of more than 4,600 cases, signed over 950 published majority opinions and written unnumbered per curiams and unpublished opinions. In addition, he has written stirring dissents which have persuaded the Supreme Court to grant writs and to reverse.

Judge Wisdom's opinions create an intellectual structure for the law, and speak to the deepest issues with learning, eloquence, technical virtuosity and passion. Ambitious in length and scope, impressive in the compilation of authorities, deft in wit and imagery, his opinions have often been the source of ideas—even language—for United States Supreme Court opinions.

Many of his opinions helped to define civil rights law across the United States. Among them are:

United States v. Louisiana (1965) which approved the freezing principle suspending state voters' registration law; and affirmed the duty of federal courts to protect federally created or federally guaranteed rights.

United States v. Jefferson County Board of Education (1967) which was the landmark case using affirmative action to desegregate schools "lock, stock, and barrel."

Meredith v. Fair (1962) which desegregated the University of Mississippi.

United States v. City of Jackson (1963) which desegregated bus and railroad terminals in Jackson, Mississippi.

Dombrowski v. Pfister (1965) where the Supreme Court upheld his dissent which would enjoin the State of Louisiana from using the legislature and judiciary to harass civil rights leaders by unwarranted prosecution.

Local 189, United Papermakers and Paperworkers v. United States (1976) which was the landmark case that adopted the "rightful place" theory and that prohibited awarding jobs based on a seniority system with locked-in race discrimination.

Judge Wisdom's expertise is not relegated only to civil rights and the judicial system. He has also written landmark opinions in such fields as admiralty, evidence, labor law, antitrust, and the Louisiana Civil Code.

Two decades ago *Time Magazine* said of him:

He is equally at home in archaeology, Greek tragedy and Louisiana civil law . . . (He) is one of the best (and most painstaking) opinion writers on any U.S. bench.

In the midst of his astounding workload, Judge Wisdom found time to show an interest in the people that worked for him. Charles S. Treat echoes the sentiment of many who nominated Judge Wisdom:

On a personal level, Judge Wisdom is the epitome of a Southern gentleman. He is a surrogate grandfather to my generation of clerks, taking a genuine and continuing interest in the lives, families, and careers of his judicial family. His extensive list of former clerks is virtually a nationwide legal fraternity, drawn together by our mutual

and deep respect for the Judge and love for the man.

Judge Wisdom was born in New Orleans and will be eighty-four on May 17, 1989. He is married to the former Bonnie Stewart Mathews. They had three children: John Jr. (deceased), Kathleen Scribner, and Penelope Tose. Judge Wisdom currently resides in New Orleans, Louisiana.

Mr. TRAFICANT. Mr. Speaker, I yield such time as he may consume to the gentleman from Louisiana [Mr. JEFFERSON], the chief sponsor of the bill.

Mr. JEFFERSON. Mr. Speaker, I want to commend the chairman of the Public Works and Transportation Committee, Mr. MINETA and the chairman of the Public Buildings and Grounds Subcommittee, Mr. TRAFICANT, for moving so quickly with this important bill.

The bill we consider today, H.R. 2868, will designate the Federal building at 600 Camp Street in New Orleans as the "John Minor Wisdom U.S. Courthouse." This bill is cosponsored by all the Members of the Louisiana delegation; Congressmen LIVINGSTON, TAUZIN, FIELDS, McCRERY, BAKER, and HAYES and by Congressman PETRI of Wisconsin.

Thousands of pages have been written about Judge John Minor Wisdom over the years. Among other laudatory descriptions, he has been called a quintessential appellate judge of great courage, imagination, ingenuity, compassion, and flexibility.

His opinions bore his unmistakable imprint, the Wisdom pennant, as one of his former colleagues for whom I clerked, Judge Alvin Rubin denominated it. Of one of his opinions used to illustrate this point, Judge Rubin wrote:

It was lucid and succinct; it states the governing principles, and applies that principle to finally resolve the issue. It thus serves the ideal functions of every fine appellate opinion: clarifying the rule of law applicable to the case before the court and deciding the merits of that case.

Judge Wisdom joined the U.S. Court of Appeals for the Fifth Circuit in 1957 and is still an active member at the age of 88—a senior judge with an active docket.

Judge Wisdom has participated in over 5,000 reported cases and has authored over 1,000 published majority opinions in his 36 years on the court. Although he has written distinguished opinions in many areas of law—from admiralty law to contracts law, to constitutional law, and employment law Judge Wisdom will be best remembered for his work in the area of civil rights.

A former colleague on the fifth circuit and now a senior judge on the eleventh circuit, Judge Elbert Tuttle said:

Judge Wisdom's most admired and most important decisions were . . . in the broad field of civil rights, primarily racial civil rights. The immediate benefits from these

decisions to the parties were immeasurable. But beyond that, in the reasoning that led him to his conclusions for the court in those cases . . . [he] espoused a judicial philosophy that has redounded to the benefit of our whole society.

Some of the leading cases authorized by Judge Wisdom included:

United States versus Louisiana—which suspended the State discriminatory voters' registration law.

United States versus Jefferson County Board of Education—a landmark case on school desegregation.

Meredith versus Fair—which desegregated the University of Mississippi.

Labat versus Bennett—which required the Orleans parish jury venue to be drawn from a cross-section of the community.

United States versus Texas Education Agency—which set new standards for school desegregation affecting Hispanics.

I have included a more extensive list of cases for the RECORD.

Mr. Speaker, it has been written that Judge Wisdom's "task was to give effect to the Constitution in a hostile environment by teaching understanding and respect for the rule of law." A former law clerk brought the hostile environment to life and made it understandable to all when he wrote that Judge Wisdom's "dogs were poisoned; rattlesnakes were thrown into his garden; he and his family were kept awake during much of the night by abusive telephone calls; and he received wholesale shipments of crude and hate-filled mail." But, "Judge Wisdom was unbending in the face of such abuse and intimidation—his conviction never wavered."

Mr. Speaker, our legal system has been enriched by Judge Wisdom's role in reshaping the law of civil rights and liberties in America and by doing so, reshaping the very face of opportunity in America. Recalling the words penned by Maxwell Anderson in his play "Valley Forge": "There are some men who lift the age they inhabit, till all men walk on higher ground * * * " John Wisdom is such a man. He has lifted the level of the age in which he lives by combining his love of liberty and high morality to advance human rights to a degree rarely achieved by a single individual. Thanks to him, we all stand on higher ground.

For this reason above many, many others, it is most fitting that the Federal courthouse in New Orleans be named after this legendary figure in American jurisprudence.

Mr. TRAFICANT. Mr. Speaker, I yield such time as he may consume to the distinguished gentleman from Missouri [Mr. WHEAT], a member of the Committee on Rules.

Mr. WHEAT. Mr. Speaker, when I came on the floor, I intended to speak on another measure, which I will still talk about at the appropriate time. But I rise now because it is a privilege and

an honor for me to add my voice to those who want to honor Judge Wisdom for his long, active, and distinguished career as a jurist.

We are talking about a man who is truly one of the giants in the civil rights movement, at a time when it was not just unpopular but, in fact, dangerous to be a leader and to be progressive on this issue.

At a time when this country is looking to find leaders who can set an example of the tone for our Nation, as we head into our 21st century, I cannot think of any more appropriate or fitting honor than to name a Federal courthouse in New Orleans after this distinguished gentleman, and I am proud to support this legislation that was offered by the gentleman from Louisiana [Mr. JEFFERSON] and by the members of the Louisiana delegation, ably handled by the gentleman from Ohio [Mr. TRAFICANT], because it truly does recognize a gentleman who represents the very finest of America and the very finest of American ideals.

Mr. TRAFICANT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I want to associate myself with the remarks of all who have spoken. I also want to echo the remarks of the gentleman from Missouri [Mr. WHEAT], when he talked about the courageous nature of this judge. I think this bill is absolutely fitting.

Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. PETRI. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore (Mr. MONTGOMERY). The question is on the motion offered by the gentleman from Ohio [Mr. TRAFICANT] that the House suspend the rules and pass the bill, H.R. 2868.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. TRAFICANT. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days to revise and extend their remarks on H.R. 2868, the legislation just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

RICHARD BOLLING FEDERAL BUILDING

Mr. TRAFICANT. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 2559) to designate the Federal building located at 601 East 12th Street in Kansas City, MO, as the "Richard Bolling Federal Building."

The Clerk read as follows:

H.R. 2559

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. DESIGNATION.

The Federal building located at 601 East 12th Street in Kansas City, Missouri, shall be known and designated as the "Richard Bolling Federal Building".

SEC. 2. REFERENCES.

Any reference in a law, map, regulation, document, paper, or other record of the United States to the Federal building referred to in section 1 shall be deemed to be a reference to the "Richard Bolling Federal Building".

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Ohio [Mr. TRAFICANT] will be recognized for 20 minutes and the gentleman from Wisconsin [Mr. PETRI] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Ohio [Mr. TRAFICANT].

Mr. TRAFICANT. Mr. Speaker, I yield myself such time as I may consume. Congressman Richard Bolling was elected to the 81st Congress on November 2, 1948, and was reelected to the 16 succeeding Congresses. In all, he served the Nation in Congress for 34 years.

While in Congress, Richard Bolling distinguished himself by serving as chairman of the House Committee on Rules, chairman of the Joint Economic Committee, and as a member of the Democratic steering and policy committee. These important positions reflect the high esteem Bolling's colleagues held him in.

Congressman Bolling died on April 21, 1991. His hard work and dedication are hallmarks of his outstanding career and his contributions to the Nation.

It is fitting and proper to honor Richard Bolling by designating the Federal building located at 601 East 12th Street in Kansas City, MO, as the "Richard Bolling Federal Building."

Mr. Speaker, I reserve the balance of my time.

Mr. PETRI. Mr. Speaker, I yield myself such time as I may consume. I rise in support of H.R. 2559, a bill to designate the building located at 601 East 12th Street in Kansas City, MO, as the "Richard Bolling Federal Building."

Richard Walker Bolling was born May 17, 1916, in New York City. He received his bachelors and masters degrees from the University of the South, Sewanee, TN.

He was elected to the 81st Congress on November 2, 1948, and was reelected to the 16 succeeding Congresses. While in Congress, he served as chairman of the House Committee on Rules, Joint Economic Committee, chairman of the Select Committee on Committees, and was a member of the Democratic Steering and Policy Committee. He retired in 1982 and died on April 21, 1991.

Mr. Speaker, I had the privilege of serving during a number of my years in Congress with Richard Bolling. I found

him a very intelligent, very outspoken, and courageous Member of this body.

He was not afraid to stand up and instruct the rest of us on what he felt, whether we agreed or not, was the right thing to do.

He sometimes had a reputation for being a little bit aloof, but I, as a junior Member of the opposite party, found him very warm and considerate and always willing to spend some time to give me some answers, answer questions or help me to understand what it was that was going on around this place.

□ 1320

So they used to have Bolling's classroom, I think, over in the corner of this floor, and I was a happy student in that classroom so far as the operation of this institution is concerned.

So, it is a great privilege for me, and I think it is fitting that the Federal building in Kansas City, MO, be named in honor of this outstanding legislator and great American. I urge enactment.

Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. TRAFICANT. Mr. Speaker, I yield such time as he may consume to the gentleman from Kansas City, MO, Mr. ALAN WHEAT, the very capable chief sponsor of this bill.

Mr. WHEAT. Mr. Speaker, I am pleased and honored to rise today and ask the House to help me pay tribute to the late Congressman Dick Bolling of Kansas City. Dick, who retired in 1982 and passed on in 1991, left his imprint on this institution and this country like few before him. To honor his service, which stretched from the Pacific theater in World War II, to the battles of the civil rights era, to the struggles for the reform of Congress, it is fitting that we create the Richard Bolling Federal Building in downtown Kansas City, a city which he represented so well in this body.

Dick Bolling was a passionate reformer, a scholar, a writer, and a leader of unsurpassed honesty and knowledge. Dick never took the easy road to the top, yet he seemed to arrive on the summit of nearly every mountain he dared to climb. Enlisting as a private in World War II, he emerged 5 years later as a lieutenant colonel with a Bronze Star. Running for Congress, he defeated an incumbent in an upset victory. Growing up in New York and segregated Alabama, Dick believed in fundamental civil rights for all Americans, and his brilliance and diligence helped win passage of the first meaningful civil rights legislation for blacks since Reconstruction, the Civil Rights Act of 1957. By the 1970's, Dick Bolling was a powerful, senior member of the House, yet he championed sweeping new reforms to improve the efficiency and effectiveness of what he called in his 1965 book, a "House Out of Order."

Mr. Speaker, Dick Bolling was demanding and dynamic, and he never shied away from fighting for a cause in which he believed. His knowledge of House rules and his tenacious adherence to principle made him an indispensable advisor to congressional leaders, Presidents, and national and international statesmen. Perhaps more importantly, he was also a hero and mentor to countless of his junior colleagues, counseling them to show the same selfless courage that marked so much of his career.

Dick Bolling's constituents were not left behind as their Congressman gained national prominence. Dick was never far from home, as his district office—one of the very first—testified. As he fought civil rights battles on the national stage in the 1950's and 1960's, he also addressed the skirmishes at home, hiring black staff aides and meeting regularly with black constituents. When the local political machine geared up to defeat him, he gathered his many friends from the community in a grassroots campaign and destroyed their power instead.

Many people who knew Dick would agree that he went through life with a tough, shining armor of knowledge and competence. That armor was marked by every battle that a difficult and interesting life had offered. Dick wielded his knowledge of parliamentary procedure as a sharp weapon on behalf of progressive causes. The impact of his talented and dedicated service was felt in every corner of the land.

The Federal building holds a prominent place in downtown Kansas City, as does the memory of Dick Bolling in the hearts of so many of his former colleagues and constituents. To dedicate that building as a monument to Dick Bolling's service to his Nation and his district is a proper tribute. Mr. Speaker, I ask my colleagues to join with me and honor the legacy of this great leader, by supporting this legislation to create the Richard Bolling Federal Building.

Mr. TRAFICANT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I want to identify myself with the remarks of the gentleman from Missouri [Mr. WHEAT] relative to honoring Richard Bolling by designating the Federal building in Kansas City, MO, as the "Richard Bolling Federal Building."

Mr. Speaker, today the gentleman from Tennessee, Mr. JIMMY DUNCAN, our ranking member of the subcommittee, is not able to be here. I want to pay tribute to him and to his great leadership. Without his help none of this legislation would have been possible, and without his participation openly and freely in developing this legislation without gridlock and partisanship, which is hallmark of these bills.

Mr. MINETA. Mr. Speaker, at the outset, I want to commend Congressman WHEAT, a distinguished member of the Rules Committee, for sponsoring this important legislation. I also want to commend Congressman TRAFICANT, chairman of our Subcommittee on Public Buildings and Grounds, and Congressman DUNCAN, ranking Republican member of the subcommittee, for their efforts in moving this important bill.

Mr. Speaker, I strongly support H.R. 2559, which would name a Federal building in Kansas City after Richard Bolling. Elected in 1948, Chairman Bolling served the people of Kansas City, MO, for 17 consecutive terms using his in-depth knowledge of House rules to help achieve passage of such landmark legislation as the 1964 civil rights bill. Moreover, as a member of the Rules Committee for 27 years and its chair for 4 years, Chairman Bolling championed national health insurance and congressional reform long before they became the issues of today. The author of two books on House procedures, Congressman Bolling also chaired the bipartisan Congressional Reform Committee of 1973. In 1975, my first year in Congress, we instituted many of that committee's reform proposals realigning committee jurisdictions and designing the current budget process. Based on Congressman Bolling's outstanding contributions to Kansas City and the Nation, I urge support of H.R. 2559.

Mr. GEPHARDT. Mr. Speaker, I rise in support of H.R. 2559. This legislation, sponsored by my colleague, Congressman ALAN WHEAT, designates the Federal building at 601 East 12th Street in Kansas City as the Richard Bolling Federal Building.

Richard Bolling was first elected to serve in the House of Representatives in 1948, and he served this body with the passion and dedication that we have come to identify in all of our Nation's great leaders. Those who had the honor of working with Dick Bolling knew him to be a gifted student of history and a wise instructor of the legislative process. Throughout his 17 consecutive terms in office, he was a great leader in the Congress and a good friend to many of us.

Dick Bolling's public career service began with his entry into World War II as an Army private. While loyally serving his country, Dick earned a Legion of Merit award and a Bronze Star for his courageous service in the Pacific theater. After the war, he accepted a position as a veterans adviser with the University of Missouri in Kansas City.

As a Representative of the Fifth District of Missouri, Dick never once lost sight of his foremost responsibility in Congress. To ensure his constituents the accessibility they deserved, he established one of the first district offices in the Nation. In addition, he became one of the first to use a mobile congressional office. In 1955, Dick accepted a seat on the House Rules Committee, which he later chaired.

Throughout his career in Congress, Dick Bolling demonstrated a staunch and genuine passion for social justice. In 1957, he proved instrumental in the passage of a landmark piece of civil rights legislation—the first such legislation since Reconstruction. Seven years later Dick played an equally influential role in

passing the now legendary Civil Rights Act of 1964.

In 1989, 7 years after his retirement from this body, Dick returned to the Hill to become an informal adviser of mine. His knowledge and wisdom on vital issues served not only to guide me, but also to reinvigorate this body with the spirit he radiated for 34 years. He was a friend and a confidant. I respected his precise judgment, and I valued his integrity. We will continue to miss his presence on this floor, and we are grateful for the legend he has left behind. This designation is but a small tribute to the great service he rendered our country.

Mr. TRAFICANT. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore (Mr. MONTGOMERY). The question is on the motion offered by the gentleman from Ohio [Mr. TRAFICANT] that the House suspend the rules and pass the bill, H.R. 2559.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. TRAFICANT. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days to revise and extend their remarks on H.R. 2559, the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

□ 1330

BAN ON SMOKING IN FEDERAL BUILDINGS ACT

Mr. TRAFICANT. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 881) to prohibit smoking in Federal buildings, as amended.

The Clerk read as follows:

H.R. 881

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Ban on Smoking in Federal Buildings Act".

SEC. 2. FINDINGS.

Congress finds that—

(1) environmental tobacco smoke is a cause of lung cancer in healthy nonsmokers and is responsible for acute and chronic respiratory problems and other health impacts among sensitive populations;

(2) environmental tobacco smoke comes from secondhand smoke exhaled by smokers and sidestream smoke emitted from the burning of cigarettes, cigars, and pipes;

(3) citizens of the United States spend up to 90 percent of a day indoors and, consequently, there is a significant potential for exposure to environmental tobacco smoke from indoor air;

(4) exposure to environmental tobacco smoke occurs in public buildings and other indoor facilities;

(5) the health risks posed by environmental tobacco smoke exceed the risks posed by many environmental pollutants regulated by the Environmental Protection Agency; and

(6) the Administrator of General Services, having broad authority and longstanding experience with respect to the acquisition and management (including restriction of smoking) of space occupied by Federal employees, is particularly qualified to issue regulations to institute and enforce a prohibition on smoking in such space.

SEC. 3. SMOKING PROHIBITION IN FEDERAL BUILDINGS.

(a) SMOKING PROHIBITION.—

(1) GENERAL RULE.—On and after the 180th day after the date of the enactment of this Act, smoking shall be prohibited in any indoor portion of a Federal building, except in areas designated pursuant to paragraph (2).

(2) DESIGNATION OF SMOKING AREAS.—The head of a Federal agency may permit smoking in a designated area of a Federal building owned or leased for use by such agency if such area—

(A) is ventilated separately from other portions of the Federal building;

(B) is ventilated using a method determined by the Administrator of General Services to be at least as effective as the method described in subparagraph (A); or

(C) is ventilated in accordance with Federal indoor air quality standards for environmental tobacco smoke, if such standards are in effect.

(b) ENFORCEMENT.—

(1) EXECUTIVE BRANCH BUILDINGS.—

(A) IN GENERAL.—The Administrator of General Services shall issue regulations, and take such other actions as may be necessary, to institute and enforce the prohibition contained in subsection (a) as such prohibition applies to Federal buildings owned or leased for use by an Executive agency.

(B) DELEGATION.—The Administrator is authorized to delegate, and to authorize the re-delegation of, any authority vested in the Administrator under subparagraph (A) (except for the authority to issue regulations) to any official of the General Services Administration or to the head of any other Executive agency.

(2) JUDICIAL BRANCH BUILDINGS.—The Director of the Administrative Office of the United States Courts, after consultation with the Administrator of General Services, shall take such actions as may be necessary to institute and enforce the prohibition contained in subsection (a) as such prohibition applies to Federal buildings owned or leased for use by an establishment in the judicial branch of the Government.

(3) LEGISLATIVE BRANCH BUILDINGS.—

(A) HOUSE OF REPRESENTATIVES.—The House Office Building Commission shall take such actions as may be necessary to institute and enforce the prohibition contained in subsection (a) as such prohibition applies to Federal buildings owned or leased for use by the House of Representatives.

(B) SENATE.—The Committee on Rules and Administration of the Senate shall take such actions as may be necessary to institute and enforce the prohibition contained in subsection (a) as such prohibition applies to Federal buildings owned or leased for use by the Senate.

(C) OTHER ESTABLISHMENTS.—The Architect of the Capitol shall take such actions as may be necessary to institute and enforce the prohibition contained in subsection (a) as such prohibition applies to Federal buildings owned or leased for use by an establishment in the legislative branch of the Government

(other than the House of Representatives and the Senate).

SEC. 4. REPORT.

Not later than 2 years after the date of the enactment of this Act, the Administrator of General Services shall transmit to the Committees on Public Works and Transportation and on Government Operations of the House of Representatives and the Committee on Environment and Public Works of the Senate a report containing—

(1) information concerning the degree of compliance with this Act; and

(2) information on research and development conducted by the Administrator on methods of ventilation which are at least as effective as the method described in section 3(a)(2)(A).

SEC. 5. PREEMPTION.

Nothing in this Act is intended to preempt any provision of law of a State or political subdivision of a State that is more restrictive than a provision of this Act.

SEC. 6. DEFINITIONS.

For the purposes of this Act, the following definitions apply:

(1) EXECUTIVE AGENCY.—The term "Executive agency" has the same meaning such term has under section 105 of title 5, United States Code.

(2) FEDERAL AGENCY.—The term "Federal agency" means any Executive agency or any establishments in the legislative or judicial branches of the Government.

(3) FEDERAL BUILDING.—The term "Federal building" means any building or other structure (or portion thereof) owned or leased for use by a Federal agency; except that the term shall not include any building or other structure on a military installation, any health care facility under the jurisdiction of the Secretary of Veterans Affairs, or any area of a building that is used primarily as living quarters.

(4) MILITARY INSTALLATION.—The term "military installation" means a base, camp, post, station, yard, center, homeport facility for any ship, or other activity under the jurisdiction of the Department of Defense, including any leased facility. Such term does not include any facility used primarily for civil works, rivers and harbors projects, or flood control projects.

The SPEAKER pro tempore (Mr. MONTGOMERY). Pursuant to the rule, the gentleman from Ohio [Mr. TRAFICANT] will be recognized for 20 minutes and the gentleman from Wisconsin [Mr. PETRI] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Ohio [Mr. TRAFICANT].

Mr. TRAFICANT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 881, as amended, will protect Federal workers and members of the public who visit Federal buildings from the serious health hazard of environmental tobacco smoke [ETS], also known as secondhand smoke. This smoke harms not only the smoker, but also the innocent nonsmoker.

In January 1993, the Environmental Protection Agency issued a report on the effects of secondhand smoke on nonsmokers. The report concluded that secondhand smoke is a human carcinogen and is responsible for approxi-

mately 3,000 lung cancer deaths each year in nonsmoking adults.

This report led me to introduce H.R. 881, the Ban on Smoking in Federal Buildings Act on February 16, 1993. As introduced, the legislation called for a complete ban on smoking in any indoor portion of Federal buildings.

After a series of public hearings, the bill was amended to provide reasonable exceptions to the total ban on smoking. Yet, it still provides the protection that nonsmokers require. I believe we have addressed the matter of fairness in the legislation and this has resulted in the bill having 44 cosponsors and bipartisan support.

The committee held 2 days of balanced, comprehensive hearings on this legislation. The witnesses included the then Surgeon General Antonia C. Novello, who stated that the Department of Human Services supported the objectives of H.R. 881 and added that tobacco use and exposure to tobacco smoke are harmful and can lead to disease, disability, and even death.

The Commissioner of the Public Buildings Service from the General Services Administration [GSA] also testified that GSA supported a ban on smoking in Federal buildings. According to the Commissioner, GSA houses about 1 million Federal employees in 7,800 owned and leased buildings. GSA's current regulations on smoking limit smoking to designated rooms, but because of the common practice in commercial buildings of recirculating air, room designation does not stop the spread of smoke. In addition, the witness stated that although requiring separately ventilated rooms for smokers would be more effective, it might result in a large expense ranging from \$58.5 to \$97.5 million.

Two expert witnesses opposed H.R. 881. There specific criticism focused on EPA's scientific methodology. However the expert panel of EPA officials, statisticians, and scientists defended the methodology and the results of the EPA report.

If anyone doubts the seriousness of smoking as a health hazard, it is important to realize that the Department of Labor is already awarding damages in instances of smoke in the workplace. The director of the office of workers' compensation programs, Department of Labor, testified at the hearing that under the Federal Employees Compensation Act, the program has awarded compensation benefits to Federal employees who have been affected by tobacco smoke in the workplace.

States that have banned smoking in their public facilities include California, New Jersey, Ohio, Maryland, Michigan, Utah, Idaho, and others, as well as cities.

The chairman of the Department of Critical Care Medicine, St. Francis Medical Center and Society of Critical Care Medicine, Pittsburgh, PA, was an-

other expert witness in support of the ban on smoking. He testified that in children, secondhand smoke clearly increases the risk of lower respiratory tract infections, including bronchitis and pneumonia, resulting in the hospitalization of 7,500 to 15,000 infants and children each year. This expert further testified that we must ensure that scarce and expensive health care resources are allocated in the most efficient manner possible. Too many other unpredictable and unpreventable illnesses and injuries require our attention.

H.R. 881, as amended, would ban smoking in any indoor portion of a Federal building, subject to specified exceptions. The primary exception is that the designated smoking area be ventilated separately from other indoor portions of the building. The other two exceptions address the issue of equivalency in separate ventilation techniques and in quality measurements.

Finally, no later than 2 years after enactment, GSA is required to submit a report to the House and Senate Public Works Committees and the House Committee on Government Operations on compliance with the act and on research and development conducted by the administrator on methods of ventilation which are at least as effective as separate ventilation.

The definition section clarifies which Federal entities will be covered by the act. For instance, the following entities would not be covered: Any building or other structure on a military installation, any health care facility under the jurisdiction of the Secretary of Veterans Affairs, or any area of a building used primarily as living quarters.

It is important to note that another provision ensures that this act will not preempt a more restrictive provision in any State or local law.

H.R. 881 is very significant legislation that would have Congress take a leadership position for the Nation in protecting our citizens from the hazards of secondary smoke. It is a very serious health issue that needs to be addressed now. I urge your strong support for H.R. 881.

Mr. Speaker, I reserve the balance of my time.

Mr. PETRI. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 881, a bill to ban smoking in Federal buildings. As we come to the end of the first session of the 103d Congress, on behalf of the gentleman from Tennessee [Mr. DUNCAN], ranking Republican on the Public Buildings and Grounds Subcommittee, I wish to congratulate my colleague, the chairman of the Subcommittee on Public Buildings and Grounds, the gentleman from Ohio [Mr. TRAFICANT], who has shown spirited bipartisan leadership in this,

and other legislation that the subcommittee has considered and passed this session. I also wish to congratulate the vice chair of the subcommittee, the Delegate from the District of Columbia, Ms. NORTON who has brought enthusiasm, intelligence, and a sense of commitment to the subcommittee. You should be proud of your legislative accomplishments, which have included passage of Columbia Hospital for Women, an ambitious GSA capital investment program, the African-American Museum on the Mall, needed changes to the Smithsonian building program, numerous naming bills, and last a change to the manner of scoring real estate transactions. You have established, and executed an ambitious legislative program. You have also joined the ranking Republican on the Public Building and Grounds Subcommittee in seeking out wasteful spending in construction of Federal buildings, and I believe our efforts have truly made a difference. Whether it is a project in your State or mine, you stood with me in assuring the American taxpayer that Federal building construction projects were no longer rubber stamped by this subcommittee, but were rigorously examined and scrutinized before approval.

The bill before us now, H.R. 881, would, 180 days after enactment, ban smoking in Federal buildings. This ban would extend to buildings of the legislative, judicial and executive branch, but would exempt DOD facilities, Veterans Department health care facilities and Government housing. The bill allows for smoking in areas of buildings that would be separately ventilated, or ventilated using a method that is at least as effective as if the area is separately ventilated, or is ventilated in accordance with Federal indoor air quality standards for environmental tobacco smoke, if such standards are in effect.

The Subcommittee on Public Buildings and Grounds held 2 days of hearings on H.R. 881, and compiled a hearing record of 567 pages of written material on the bill. Witnesses included, the Surgeon General, EPA, OSHA, GSA, OPM, private physicians, epidemiologists, building design experts, representatives of the Tobacco Institute, the American Lung Association, and Members of Congress. Numerous meetings and deliberations were held. An earlier oversight hearing was held on the status of smoking regulations in Federal buildings. This bill is a product of these activities. I believe this is a sensible bill which addresses the issue of secondhand smoke in the Federal workplace, while respecting the rights of individuals. We have balanced to need for a more healthy indoor environment without punishing those who choose to smoke. I support this bill and urge my colleagues to vote for this bill.

Mr. ANDREWS of Texas. Mr. Speaker, will the gentleman yield?

Mr. PETRI. I am happy to yield to the gentleman from Texas.

Mr. ANDREWS of Texas. Mr. Speaker, I am curious in that when I was listening to the gentleman's remarks why the Veterans' Administration health facilities are excluded from the bill. Possibly I misheard the gentleman. Would he, please, explain that to me?

Mr. TRAFICANT. Mr. Speaker, will the gentleman yield?

Mr. PETRI. I am happy to yield to the gentleman from Ohio [Mr. TRAFICANT], the chairman of the subcommittee, for a definitive response to the gentleman's question.

Mr. TRAFICANT. Mr. Speaker, we felt it was very important. Our major concern was the workmen's compensation cases in the Federal workplace and the General Services Administration.

Our committee has jurisdiction over the areas in which we have brought forward, and we left these other areas open for the interpretation of Congress through the process to be addressed.

The gentleman from Illinois [Mr. DURBIN] is here. He has played a leadership role and has already addressed these rules, and what we are trying to do is get a specific piece of legislation moved forward that would affect our workplace relative to the workmen's compensation issue and others.

□ 1340

And that will be addressed in comprehensive programming down the line by other committees.

Mr. ANDREWS of Texas. If the gentleman would continue to yield for one more question, I appreciate the opportunity to ask it. Veterans' hospitals certainly is an area that the Congress has looked at before and tried to cease smoking in those hospitals, especially because almost every other hospital in this country has eliminated smoking from those facilities.

This bill does not address that. It is certainly an area I would think the Congress would want to look at.

Mr. TRAFICANT. If the gentleman would continue to yield, the Committee on Veterans' Affairs is looking at this. As this bill goes through the process, all of these other concerns that are salient to the bill and important will be dealt with. The bill has been streamlined to deal with the Federal workplace, which falls under the jurisdiction of our committee. It deals with the issue of health-related workers compensation cases that have already been awarded in regard to those veterans who have been exposed. So those things will be put on the table as the bill goes through the process where these other committees have jurisdiction and will be working their will.

Mr. ANDREWS of Texas. I thank the gentleman for his response.

Mr. PETRI. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. TRAFICANT. Mr. Speaker, I yield 3 minutes to the gentleman from North Carolina [Mr. VALENTINE], an able member of the committee.

Mr. VALENTINE. Mr. Speaker, I thank the gentleman for yielding this time to me.

Mr. Speaker, I rise in opposition to H.R. 881.

This legislation is simply unfair—unfair to those Federal workers who choose to smoke; unfair to those citizens who smoke and whose business takes them into Federal buildings; and unfair to the thousands of Americans, including many in North Carolina, who earn an honest and honorable living from tobacco production.

It seems to me that we should be able to accommodate both smokers and nonsmokers and protect the legitimate rights of each. Indeed, legislation we passed to establish rules for the use of tobacco in veterans hospitals proves that it is possible to implement a reasonable policy that does not trample on the rights of either group.

Moreover, the policy that has been put into effect right here in the House office buildings demonstrates this fact clearly. The designated public smoking area in the Rayburn Building is right outside my office. Although the majority of my staff members are nonsmokers, I am unaware of even a single complaint from anyone about this smoking area.

Despite these examples of how to do it right, the legislation we are considering today fails the basic fairness test. Although it has been dressed up with rhetoric that appears, at least superficially, to allow for separate smoking areas, the practical effect of this bill is crystal clear: it will effectively ban smoking in Federal office buildings.

My colleagues on the other side of this issue will emphatically deny that this bill is designed to ban smoking. But, the evidence to the contrary is clear. Whenthis bill was presented to the Congressional Budget Office for a cost estimate, the cost of implementing this legislation was estimated at between zero and \$50 million. The CBO was astute enough to realize that the de facto result of this legislation would, for the most part, be a complete ban, rather than a reasonable compromise.

Let there be no doubt about this: the requirement for a separate ventilation system for smoking areas will make the cost of establishing such areas prohibitive.

Let there also be no doubt about one other fact: that fundamental unfairness of this bill could be fixed easily. Simply providing that smoking areas be separated from other areas and that the air from smoking areas be exhausted directly outside the building would allow limited smoking and would protect nonsmokers from environmental tobacco smoke.

We know that this reasonable solution works—it is what we are doing here in the House of Representatives. If it is good enough for the Congress, why is it not good enough for executive branch employees? Why is it not good enough for citizens who visit Federal buildings?

We have a solution here in the House that is both fair and effective—why not apply it across the Government?

Mr. Speaker, I had hoped that we could reach a fair solution that respects the interest of smokers and nonsmokers. Instead, we are faced with a heavyhanded measure that will hurt many more people than the Federal workers who are most directly affected. I am opposed to this punitive bill.

Mr. TRAFICANT. Mr. Speaker, I yield such time as he may consume to the gentleman from Illinois [Mr. DURBIN] who is the leader in the House on this particular issue.

Mr. Speaker, my subcommittee dealt with the issue at hand, but DICK DURBIN is without doubt a leader this Nation should respect. He is now one of the cardinals in the Congress, head of the Subcommittee on Agriculture, Rural Development, Food and Drug Administration, and related agencies of the Committee on Appropriations.

Mr. DURBIN. I thank the gentleman from Ohio.

Mr. Speaker, I want to salute the gentleman from Ohio [Mr. TRAFICANT] for his tenacity and leadership on this issue. I can tell you that I have been working on this issue for many years with the gentleman from Texas [Mr. ANDREWS], the gentleman from Oklahoma [Mr. SYNAR], and so many, many others on both sides of the aisle, but Mr. TRAFICANT has shown an extraordinary gift in bringing this bill to the floor today, and I want to salute him and his staff for their hard work in bringing it to our attention and consideration.

Let me speak for a moment to the point raised by my friend—and he is my friend—and fellow colleague from North Carolina, the gentleman who spoke just before me. In that situation, the gentleman raised a question as to whether or not we were setting a separate standard for Congress as opposed to the rest of the Nation. Let me make it clear this bill applies to all three branches of the Federal Government, that the standard that will be applied to Federal buildings and workers in those buildings will apply just as well to Members of Congress and the buildings that we occupy here on Capitol Hill.

For over a year I have been fighting a battle to try to bring sanity and a smoking policy to the House side of Capitol Hill, with limited success. As I walked in today to begin this debate, I had to walk through a cloud of smoke right outside this Chamber, and we

supposedly have a policy of only allowing smoking in separately ventilated areas. It is not being enforced.

The same is true down in the House dining room and many other areas. We need what this bill offers, a standard uniform national approach to all Federal buildings, including the buildings occupied by Members of Congress.

My friend, the gentleman from Texas [Mr. ANDREWS] raised a question as to whether VA hospitals should be exempt. In my opinion they should not. But I will not criticize the author of this legislation for excluding them.

When I first introduced legislation to ban smoking on airplanes, the first draft of the bill only banned it on flights of 2 hours or less. Then a year or 2 later it was expanded to virtually all flights in America.

We had to accept a compromise to make our point.

I salute the gentleman for the compromises he thinks will be necessary. But make no mistake, veterans as well as the doctors and medical personnel in VA hospitals have the same right to be protected from second-hand smoke as anyone else. And I hope that this legislation passes. And we can then see follow-on legislation to protect them as well as people working on military installations.

Some units of the Federal government have already stepped out and shown leadership here. The Department of Health and Human Services, the U.S. Postal Service, the Environmental Protection Agency have already banned smoking on their premises.

I am sorry to say the Federal Government is really not leading the way here. Most of America is way ahead of Congress and the Federal Government on this issue. Try to go into a State government office now and find people smoking; you will not find it. They realize as everyone else does that that is an imposition on nonsmokers and should not be allowed.

I think frankly I am glad to see the Federal Government in a way catching up, and I salute the gentleman from Ohio [Mr. TRAFICANT] for pushing this issue. But we will have to fight this every step of the way. The tobacco lobby and its friends on Capitol Hill will resist this change as the bill courses over to the other body and they will resist any change in the future. Those of us who are determined to protect nonsmokers from second-hand smoke will have to continue that sort of effort and vigilance.

Lest anyone conclude I have a vengeance against smokers, I do not. Let me say this: I hope that as part of this program we will include smoke cessation clinics so that employees across the Federal Government have a chance and opportunity to quit with medical supervision and assistance, if needed. I really believe this is a terrible addic-

tion. I have seen it in my own family and among my friends, and we should extend a helping hand to those people who genuinely want to stop smoking.

I want to salute again my colleague from Ohio and all of those who support this legislation. I am looking forward to working with him for not only the passage of this bill but more legislation in the future that protects other nonsmokers.

Mr. VOLKMER. Mr. Speaker, will the gentleman yield?

Mr. DURBIN. I yield to the gentleman from Missouri.

Mr. VOLKMER. I thank the gentleman for yielding.

Mr. Speaker, I have reviewed this legislation, and I am just curious if the gentleman can tell me: If an employee of a Federal agency, in spite of this bill—let us assume the bill becomes law—an employee out there in Illinois or in Missouri or any place else happens to get caught smoking where he should not be smoking, what happens to that person?

□ 1350

Mr. DURBIN. Mr. Speaker, if the gentleman does not mind, I would like to yield to the gentleman from Ohio [Mr. TRAFICANT] for a response.

Mr. TRAFICANT. Enforcement as written in the report of the bill is as follows:

Executive branch buildings. The Administrator of General Services shall issue regulations and take other actions as may be necessary to promulgate such actions in accordance with submission to the Congress.

Judicial branch buildings. The Director of the Administrative Office of the United States Courts shall likewise take such actions in concert with all these other groups that are responsible for enforcement, a practical program of enforcement.

In the House of Representatives, the House Office Building Commission shall take such actions.

In the Senate, it would be the Committee on Rules and Administration.

In other establishments, the Architect of the Capitol shall take such actions as may be necessary to institute and enforce the prohibition contained in any of the legislative branch operation.

The point is, nobody has cast anything in stone. We want to see what will work.

What we have now is an administrative policy of people blowing smoke in the eyes of that policy. This will become a law and that law shall be enforceable and it will be within the scope of everyone's good common sense to effect the program of enforcement. It does not tie their hands.

Mr. VOLKMER. Mr. Speaker, if the gentleman will yield further, in other words, it is up to the individual. Within the executive branch, they can draft regulations.

Mr. TRAFICANT. The respective groups responsible for the enforcement

of these buildings shall have a concerted plan that conforms with the intent and the scope of the legislation.

Mr. VOLKMER. In other words, you could have three different types of enforcement. Like in the executive branch, it could be that you lose your job for 30 days if you are caught smoking or else you could be fined \$1,000 if you are caught smoking.

In the legislative branch, it could be that you are reprimanded and asked not to do it again.

In the judicial branch, it could be that you have to go the courthouse and watch the judge operate for a day.

Mr. TRAFICANT. At this point, yes; but remember, in that courthouse there are jury rooms. There are individuals who come into these Federal buildings who do not work there. This takes into consideration the flexibility, the differences and scope and service of the entity. We do not produce a product. We provide a service and all of us provide a different service. It is left open to be fair enough to be promulgated into a plan that we can enforce, not what we have now, which is an absolute joke.

Mr. DURBIN. Mr. Speaker, let me just say in response to my colleague, the gentleman from Missouri. When we proposed banning smoking on airplanes, the people who opposed that legislation said, "You don't know what you're going to get started here. There will be fistfights in the aisles of airplanes. The flight attendants will be wrestling the people to the ground. They are going to be starting fires in the restrooms. We are going to have more lawsuits than you can possibly imagine."

Do you know what? It never happened. Because we announced what the policy was, people voluntarily got into the program. Smokers and nonsmokers alike, we had one incident per 1 million airline passengers, one per 1 million, and now it is even fewer.

If the folks know what the rules are, smokers and nonsmokers, they will play by those rules. We will not have to hold over their heads the threat of sitting in a courtroom all day or going to jail or whatever it might be.

I just think what we have to do is have an understandable policy that people can live by to protect folks who smoke and those who do not.

Mr. Speaker, I rise in support of H.R. 881. It is time for the Federal Government to fully protect its workers and visitors from secondhand smoke in Federal buildings, including buildings owned or leased by the executive, legislative, and judicial branches of the U.S. Government.

On January 7 of this year, after several years of intensive study, the Environmental Protection Agency formally classified environmental tobacco smoke as a group A carcinogen. This classification is reserved for substances which are known to cause cancer in humans, including asbestos, benzene, and arsenic.

EPA found that secondhand smoke causes approximately 3,000 lung cancer deaths annually in U.S. nonsmokers.

In addition, exposure to secondhand smoke causes 150,000 to 300,000 lower respiratory tract infections such as bronchitis and pneumonia in young children each year, causes additional episodes of asthma and increased severity of asthma symptoms in children who already have asthma, and may be a risk factor for 8,000 to 26,000 new cases of asthma annually in children who would not otherwise become asthmatic.

In response to EPA's findings, I introduced legislation, as did the gentleman from Ohio [Mr. TRAFICANT], to protect Federal employees from secondhand smoke. I am pleased that H.R. 881 has reached the House floor.

The EPA and others who have examined this issue have told us there are only two ways to protect nonsmokers from the hazards of breathing secondhand smoke. Either indoor smoking must be banned, or it must be limited to separately ventilated smoking areas. Separate smoking sections that are not separately ventilated are not acceptable, because the smoke recirculates through the building's ventilation system directly into the rooms used by nonsmokers.

H.R. 881 does not require that agencies establish separately ventilated smoking rooms, nor does it provide funding for such rooms. However, it leaves open the possibility of separate ventilation in cases where separate ventilation could be accomplished without significant cost. Of course, the simplest and least expensive way to protect people from secondhand smoke is to ban smoking indoors.

Federal employees and visitors to Federal buildings deserve an environment that is free from the hazards of secondhand smoke. I have received letters and phone calls from a number of Federal employees since my bill was introduced, describing the shortcomings of the present Federal smoking policy and the need for greater protections so that these employees can breathe the air in their workplaces without being subjected to secondhand smoke.

A Federal smoking ban would give Federal workers the same protections that many of their private sector counterparts enjoy. The Society for Human Resource Management has periodically surveyed its members regarding their smoking policies. In 1986, only 2 percent of the firms that responded had a no-smoking policy. By 1991, 34 percent of the firms that responded indicated they have declared their facilities smokefree. Today the percentage is undoubtedly even larger. The Federal Government should provide similar protection.

Employees of some Federal agencies are already able to breathe freely without exposure to secondhand smoke. The U.S. Department of Health and Human Services, the U.S. Environmental Protection Agency, and the U.S. Postal Service have each taken action to protect their employees from exposure to this carcinogen. Now, it is time to give all Federal employees the same smokefree environment. I urge my colleagues to support this legislation, so that Federal workers and visitors to Federal buildings can breathe freely.

Mr. TRAFICANT. Mr. Speaker, I yield 2½ minutes to the distinguished

gentleman from Kentucky [Mr. MAZZOLI] whose help along with that of the gentleman from Illinois [Mr. DURBIN] and the key leaders in the House, we will need as this matter goes forward.

Mr. MAZZOLI. Mr. Speaker, I thank the gentleman for yielding this time to me.

Let me join others of my colleagues in saluting the work done by the gentleman from Ohio [Mr. TRAFICANT] on this bill. It is a very difficult bill. It was a very difficult legislative effort the gentleman from Ohio put forth in behalf of the House and in behalf of the people of America who need to be protected from what is called ETS, or the environmental tobacco smoke. So I rise in strong support of the bill.

I hope it is given positive treatment in the other body and then becomes the law of the land, because I think with it will come savings in America, not just in money, because it is known that tobacco smoke is re-circulated and things get dirty and people have to have their clothes cleaned, and on and on; but there will be savings in lives also because people have adverse health effects from breathing in smoke directly or breathing in second-hand smoke.

I say that with, I guess, is some trepidation in a way, because I am from Kentucky, which is one of the major tobacco States in the Nation, but it has been my observation, as I go back home virtually every week, that more and more people are reaching the position which this bill posits, which is that smoking and tobacco use, smoke itself, are hazardous to human health.

I think it ought to be noted that this bill occurs on what we call the Suspension Calendar which is reserved usually for noncontroversial bills.

Back in 1986 when the gentleman from Illinois, who preceded me in the well and also had great courage in moving the bill toward banning smoking in airplanes, his kind of bill, which I also supported, could never have been put on this kind of docket.

Why is the bill of the gentleman from Ohio [Mr. TRAFICANT] on this Suspension docket? It represents a change in thinking on the part of the American people. There has been a change in thinking on the part of the American people concerning smoking and health. I think the bulk of the American people feel that any reasonable, responsible, organized and preannounced effort, as this is, to tell us the new rules of the road will be supported.

So Mr. Speaker, I salute the gentleman from Ohio for bringing us to this point. I hope that our colleagues in the House can support the bill and I hope eventually it becomes the law of the land.

Mr. TRAFICANT. Mr. Speaker, will the gentleman from Wisconsin yield me 1 minute?

Mr. PETRI. Mr. Speaker, I have yielded back the balance of my time,

but if I may reclaim my time, I will yield a minute to the gentleman from Ohio.

The SPEAKER pro tempore. Without objection, the gentleman from Wisconsin reclaims his time.

There was no objection.

Mr. TRAFICANT. No. 1, Mr. Speaker, the gentleman from Tennessee [Mr. DUNCAN] is a leader. He would not allow a smoking bill to be unfair. This is very fair.

No. 2, if the GSA determines that it is effective, a simple exhaust fan can get the job done, saving us from liability in courts on workmen's compensation cases. An exhaust fan would be adequate.

Finally, everybody in this body and everybody in Government will be under the same rule. It is an outright blatant fallacy to say that we will be treated differently.

The Architect of the Capitol, the Building Commissioner, the Director and the administrative head of GSA shall promulgate and enforce those plans and rules consistent with the legislative mandate needed here today.

This is a tough bill. I want to thank the gentleman from Illinois [Mr. DURBIN], the gentleman from Tennessee [Mr. DUNCAN], the gentleman from Kentucky [Mr. MAZZOLI], and all the staff for bringing out a very fair piece of legislation.

Mr. MINETA. Mr. Speaker, I want to commend the gentleman from Ohio [Mr. TRAFICANT] for his fine explanation of the bill and I want to commend him and the Public Buildings and Grounds Subcommittee's ranking Republican member [Mr. DUNCAN] for their leadership on this important and complex bill.

I also want to thank other committees who helped make today possible, and in that regard, I am enclosing with my statement an exchange of letters between the Energy and Commerce and Public Works Committee on this bill.

The Surgeon General began warning us of the hazards of smoking almost 30 years ago, and today's evidence of the effects of smoking is truly daunting. According to the American Cancer Society, one in three regular smokers will die from their habit. The medical evidence has long been clear. Smoking kills.

Today, we are being warned anew. Environmental tobacco smoke, or ETS, which consists of second-hand smoke and the sidestream smoke from lit cigarettes, is also deadly.

Furthermore, ETS causes thousands of people, especially children, to suffer unnecessary asthma attacks and respiratory infections.

Additionally, because Americans spend up to 90 percent of their time indoors, there is a significant potential for exposure to ETS.

Based upon the concern for the health of employees and potential workers' compensation liability, 85 percent of public and private employers have smoking policies and more than one-third declared their facilities smoke-free in a 1991 survey. States are also concerned. For instance, my home State of California has barred smoking from space owned or leased by the State.

Currently, smoking restrictions are in force in most Federal buildings. However, in buildings without no smoking provisions, there remains a serious potential workers' compensation issue. The Federal Employees' Compensation Act, or FECA, already covers injuries and illnesses related to ETS like any other work-related illness. To date, FECA claims have been filed due to work place injuries from ETS. Settlements have cost U.S. taxpayers thousands of dollars.

Based upon my concern for the health of Federal employees and potential liability of the U.S. Government and, thus, the taxpayers from future ETS-related worker compensation claims, I support H.R. 881, the Ban on Smoking in Federal Buildings Act. Under H.R. 881 as reported by the Committee on Public Works and Transportation, smoking would be prohibited in Federal buildings unless the building provided a specific area, separately ventilated, for smokers. I believe this approach effectively balances Federal employees' health concerns, the U.S. Government's potential workers' compensation liability issues, and individual rights.

H.R. 881 is long overdue and I urge its adoption.

The letters referred to follow:

COMMITTEE ON ENERGY AND COMMERCE,
Washington, DC, November 15, 1993.

Hon. NORMAN Y. MINETA,
Chairman, Committee on Public Works and Transportation, Washington, DC.

DEAR MR. CHAIRMAN: On October 15, 1993, the Committee on Public Works and Transportation reported H.R. 881, the Ban on Smoking in Federal Buildings Act (H. Rpt. 103-298, Part 1).

That legislation, by prohibiting smoking in federal buildings, proposes to address public health and safety issues relating to federal employees and the general public who work in or visit legislative, executive, and judicial branch buildings.

As you know, under Rule X, clause 1(h)(16), of the Rules of the House of Representatives, the Committee on Energy and Commerce has jurisdiction of "public health and quarantine" and health issues in general. Based on Rule X, related issues, and attendant precedents, we believe we are entitled both to a sequential referral of the bill and to be named conferees thereon. However, our Committee agreed not to pursue a sequential referral of the bill based upon your Committee's desire to bring H.R. 881 to the floor this session and your agreement to acknowledge our Committee's jurisdiction of this matter.

That waiver should not be construed as a waiver of our Committee's jurisdiction over the subject matter of H.R. 881, nor does it imply a waiver of our Committee's representation in any conference with the Senate.

I am pleased to cooperate with you on this matter and request that this letter be made part of the record during floor consideration of the bill.

Sincerely,

JOHN D. DINGELL,
Chairman.

COMMITTEE ON PUBLIC WORKS
AND TRANSPORTATION,
Washington, DC, November 15, 1993.

Hon. JOHN D. DINGELL,
Chairman, Committee on Energy and Commerce,
House of Representatives, Washington, DC.

DEAR MR. CHAIRMAN: Thank you for your letter on H.R. 881, the "Ban on Smoking in Federal Buildings Act".

Because of your Committee's jurisdiction over public health issues, I recognize your right to sequential referral of H.R. 881. However, I understand that you did not pursue that given the timing of the bill.

I further recognize that your not pursuing the referral should in no way be construed as a waiver of any jurisdiction your Committee has relating to this issue, including any right you may have to be named conferees on the bill. I will gladly include our exchange of correspondence on this matter in the Record during House consideration of H.R. 881.

Sincerely yours,

NORMAN Y. MINETA,
Chairman.

Mr. LANCASTER. Mr. Speaker, I rise to express my concern about this legislation.

It seems to me that rather than trying to impose a legislative mandate from Washington to deal with smoking policies for Federal buildings, we should place that responsibility on building managers and agency leaders. What might be a desirable policy in a large building with hundreds or even thousands of Federal employees might be totally unsuitable for smaller facilities.

I acknowledge that the language being presented today has been altered from the version reported from committee, and I think the added flexibility is a step in the right direction. Nevertheless, I think we have not fully considered all the nuances of this question. I would have preferred a procedure which would have allowed fuller debate and the possibility of amendments from the floor. I am hopeful that there will be closer review of this bill when it reaches the Senate.

Mr. PETRI. Mr. Speaker, I yield back the balance of my time.

Mr. TRAFICANT. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore (Mr. TAYLOR of Mississippi). The question is on the motion offered by the gentleman from Ohio [Mr. TRAFICANT] that the House suspend the rules and pass the bill, H.R. 881, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. TRAFICANT. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks and include therein extraneous material on H.R. 881, the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

HAZARD MITIGATION AND FLOOD DAMAGE REDUCTION ACT OF 1993

Mr. APPLGATE. Mr. Speaker, I move to suspend the rules and pass the

bill (H.R. 3445) to improve hazard mitigation and relocation assistance in connection with flooding, to provide for a comprehensive review and assessment of the adequacy of current flood control policies and measures, and for other purposes, as amended.

The Clerk read as follows:

H.R. 3445

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Hazard Mitigation and Flood Damage Reduction Act of 1993".

SEC. 2. HAZARD MITIGATION.

(a) **FEDERAL SHARE.**—Section 404 of The Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5170c) is amended by striking "50 percent" and inserting "75 percent".

(b) **TOTAL CONTRIBUTIONS.**—Section 404 of such Act is further amended by striking "10 percent" and all that follows through the period and inserting "15 percent of the estimated aggregate amounts of grants to be made under this Act (less administrative costs) with respect to such major disaster."

(c) **APPLICABILITY.**—The amendments made by this section shall apply to any major disaster declared on or after June 10, 1993.

SEC. 3. PROPERTY ACQUISITION AND RELOCATION ASSISTANCE.

Section 404 of The Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5170c) is further amended—

(1) by inserting "(a) IN GENERAL.—" before "The President"; and

(2) by adding at the end the following:

"(b) **PROPERTY ACQUISITION AND RELOCATION ASSISTANCE.**—

"(1) **GENERAL AUTHORITY.**—In providing hazard mitigation assistance under this section in connection with flooding, the Director of the Federal Emergency Management Agency may provide property acquisition and relocation assistance for projects which meet the requirements of paragraph (2).

"(2) **TERMS AND CONDITIONS.**—An acquisition or relocation project shall be eligible for funding pursuant to paragraph (1) only if—

"(A) the recipient of such funding is an applicant otherwise eligible under the hazard mitigation grant program established under subsection (a);

"(B) the recipient of such funding enters into an agreement with the Director under which the recipient provides assurances that—

"(i) properties acquired, accepted, or from which structures will be removed under the project will be dedicated and maintained in perpetuity to uses which are compatible with open space, recreational, or wetlands management practices;

"(ii) new structures will not be erected in designated special flood hazard areas other than (I) public facilities which are open on all sides and functionally related to a designated open space, (II) rest rooms, and (III) structures which are approved in writing before the start of construction by the Director; and

"(iii) no future disaster assistance for damages relating to flooding will be sought from or provided by any Federal source for any property acquired or accepted under the acquisition or relocation project."

SEC. 4. FLOOD CONTROL AND FLOODPLAIN MANAGEMENT POLICIES.

(a) **STUDIES.**—The Secretary of the Army shall conduct studies to assess national flood control and floodplain management policies.

(b) **CONTENTS.**—The studies conducted under this section shall—

(1) identify critical water, sewer, transportation, and other essential public facilities which currently face unacceptable flood risks;

(2) identify high priority industrial, petrochemical, hazardous waste, and other facilities which require additional flood protection due to the special health and safety risks caused by flooding;

(3) evaluate current Federal, State, and local floodplain management requirements for infrastructure improvements and other development in the floodplain and recommend changes to reduce the potential loss of life, property damage, economic losses, and threats to health and safety caused by flooding;

(4) assess the adequacy and consistency of existing policies on nonstructural flood control and damage prevention measures and, where appropriate, identify incentives and opportunities for greater use of such nonstructural measures;

(5) identify incentives and opportunities for environmental restoration as a component of the Nation's flood control and floodplain management policies;

(6) examine the differences in Federal cost-sharing for construction and maintenance of flood control projects on the Upper and Lower Mississippi River systems and assess the effect of such differences on the level of flood protection on the Upper Mississippi River and its tributaries; and

(7) assess current Federal policies on pre-event repair and maintenance of both Federal and non-Federal levees and recommend Federal and non-Federal actions to help prevent the failure of these levees during flooding.

(c) **CONSULTATION.**—In conducting studies under this section, the Secretary of the Army shall consult the heads of appropriate Federal agencies, representatives of State and local governments, the agricultural community, the inland waterways transportation industry, environmental organizations, recreational interests, experts in river hydrology and floodplain management, other business and commercial interests, and other appropriate persons.

(d) **REPORT.**—Not later than June 30, 1995, the Secretary of the Army shall transmit to Congress a report on the results of the studies conducted under this section.

SEC. 5. FLOOD CONTROL MEASURES ON UPPER MISSISSIPPI AND LOWER MISSOURI RIVERS AND THEIR TRIBUTARIES.

(a) **STUDIES.**—The Secretary of the Army shall conduct studies of the Upper Mississippi River and Lower Missouri River and their tributaries to identify potential solutions to flooding problems in such areas and to recommend specific water resources projects that would result in economically and environmentally justified flood damage reduction measures in such areas.

(b) **CONTENTS.**—The studies conducted under this section shall—

(1) reflect public input;

(2) include establishment of baseline conditions to allow for a full assessment of economic and environmental costs and benefits associated with flood damage reduction projects and changes in land use patterns;

(3) identify options for development of comprehensive solutions for improved long-term flood plain management;

(4) identify feasibility studies of specific projects or programs that are likely to improve flood damage reduction capabilities;

(5) assess the impact of the current system of levees and flood control projects and current watershed management and land use practices on the flood levels experienced on the Upper Mississippi River and Lower Missouri River and their tributaries in 1993 and evaluate the cost-effectiveness of a full range of alternative flood damage reduction measures, including struc-

tural and nonstructural measures, such as the preservation and restoration of wetlands;

(6) recommend flood control improvements and other flood damage reduction measures to reduce economic losses, damage to public facilities, and the release of hazardous materials from industrial, petrochemical, hazardous waste, and other facilities caused by flooding of the Upper Mississippi River and Lower Missouri River and their tributaries; and

(7) assess the environmental impact of current flood control measures and the flood control improvements recommended under this section.

(c) **CONSULTATION.**—In conducting studies under this section, the Secretary of the Army shall consult the heads of other Federal agencies with water resources and floodplain management responsibilities.

(d) **REPORT.**—Not later than June 30, 1995, the Secretary of the Army shall transmit to Congress a report on the results of the studies conducted under this section.

SEC. 6. EMERGENCY RESPONSE.

Section 5(a)(1) of the Act entitled "An Act authorizing construction of certain public works on rivers and harbors for flood control, and for other purposes", approved August 18, 1941 (33 U.S.C. 701n(a)(1)), is amended by inserting before the first semicolon the following: ", or in implementation of nonstructural alternatives to the repair or restoration of such flood control work if requested by the non-Federal sponsor".

SEC. 7. TREATMENT OF REAL PROPERTY BUYOUT PROGRAMS.

(a) **INAPPLICABILITY OF URA.**—The purchase of any real property under a qualified buyout program shall not constitute the making of Federal financial assistance available to pay all or part of the cost of a program or project resulting in the acquisition of real property or in any owner of real property being a displaced person (within the meaning of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970).

(b) **DEFINITION OF "QUALIFIED BUYOUT PROGRAM"**—For purposes of this section, the term "qualified buyout program" means any program that—

(1) provides for the purchase of only property damaged by the major, widespread flooding in the Midwest during 1993;

(2) provides for such purchase solely as a result of such flooding;

(3) provides for such acquisition without the use of the power of eminent domain and notification to the seller that acquisition is without the use of such power;

(4) is carried out by or through a State or a unit of general local government; and

(5) is being assisted with amounts made available for—

(A) disaster relief by the Federal Emergency Management Agency; or

(B) other Federal financial assistance programs.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Ohio [Mr. APPELGATE] will be recognized for 20 minutes, and the gentleman from New York [Mr. BOEHLERT] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Ohio [Mr. APPELGATE].

□ 1400

Mr. APPELGATE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the Committee on Public Works and Transportation brings before the House important legislation

to assist in the response to the Midwest floods of 1993—floods that devastated parts of 11 States. The bill provides immediate assistance to those people whose homes are in the floodplains and who are desirous of moving out of harm's way. And, no new appropriation of money is needed.

H.R. 3445 also authorizes a comprehensive review and assessment of the adequacy of current flood control policies and measures nationwide and in particular for the upper Mississippi and lower Missouri River basins.

Mr. Speaker, flooding in the upper Mississippi and lower Missouri River basins in mid-June and July came after 6 months of heavy and persistent rainfall. During the first half of 1993, precipitation was 1½ to 2 times normal levels throughout the affected area.

The levees and reservoir controls could not fully contain the increased flows on the Mississippi and Missouri Rivers or their tributaries. Over 17,000 square miles of farmlands, forest, homes and businesses were inundated.

In previous disasters, some communities have considered moving out of the floodplain. But this disaster has been historic in the fact that over 200 communities have approached the Federal Government about relocating out of the floodplain to higher ground. This amount of interest has overwhelmed the Federal Government's ability to assist in such relocations. Presently, more than 10 Federal agencies have certain authorities and available assistance for relocations but many requirements are contradictory and complicated. It has been very difficult for small-town mayors to piece together existing Federal programs into a workable relocation plan.

Under H.R. 3445, the amount of funds available for hazard mitigation would increase from 10 percent of the funds for public facilities assistance to 15 percent of all disaster assistance funds for a particular disaster, exclusive of administrative costs. In the Midwest, this could mean a fourfold increase in funds available for mitigation efforts such as relocations. I wish to reemphasize that the increased funds available do not represent new money. These mitigation funds will be available from already appropriated disaster relief funds.

Under most disaster relief and emergency assistance act programs, the Federal Government provides 75 percent of the eligible costs. However, the act only provides for a 50-percent Federal share for hazard mitigation measures. H.R. 3445 would place hazard mitigation on an equal footing with repair and reconstruction by raising the Federal share for hazard mitigation to match the other programs at 75 percent.

H.R. 3445 would also modify the Corps of Engineers existing levee repair program to make nonstructural alter-

natives an option. Under present law, even though it may be more cost effective or environmentally preferable to implement nonstructural alternatives, such as relocations, flood-proofing or elevation of structures, funds under the corps program cannot be used for that purpose. H.R. 3445 gives the Corps of Engineers the opportunity to fund nonstructural options, but only at the non-Federal sponsors' request.

Another provision that is important to the communities considering relocation is the clarification of the applicability of the Uniform Relocations Assistance and Real Property Acquisition Policies Act of 1970 in regard to relocations carried out as part of the post disaster response. The Uniform Relocation Act provides relocation expenses to people who are displaced by a Federal project or program. H.R. 3445 lists the conditions that meet the test for a voluntary relocation which would be exempt from the Uniform Relocation Act.

This will allow for greater participation rates and at less cost to State and local government.

The scope of the flooding in the Midwest has reopened the discussion concerning the difficult policy issues of the role of the Federal Government in the area of floodplain management. These issues include the effectiveness of structural and nonstructural flood control efforts; incentives and disincentives of Federal programs relating to various flood control options; the extent to which Government policies and programs encourage development in floodplains; and to what extent structural flood control efforts may have exacerbated flood conditions.

H.R. 3445 directs the Secretary of the Army to undertake a study to assess national flood control and floodplain management policies generally.

H.R. 3445 also requires the Secretary to undertake flood management studies for the upper Mississippi and lower Missouri River basins. These studies are to consider, among other aspects of the river system, the impact of the current system of levees and flood control projects on the river and to recommend other flood control measures, including nonstructural measures, that would be appropriate. These studies are to be coordinated with other Federal Government agencies and other interests and be submitted to Congress by June 30, 1995.

The legislation before you today is based on H.R. 2931, introduced by the gentleman from Illinois [Mr. DURBIN] and H.R. 3012 introduced by the gentleman from Missouri [Mr. VOLKMER]. I want to thank Representatives DURBIN and VOLKMER and the other Members whose districts were inundated by the flooding for bringing these issues to our attention. I especially want to thank the gentleman from California [Mr. MINETA], the ranking minority

member of the full committee, the gentleman from Pennsylvania [Mr. SHUSTER] and the subcommittee ranking Republican, the gentleman from New York [Mr. BOEHLERT] for their assistance in this bipartisan effort to assist the people who have been harmed by this great natural disaster.

I urge adoption of this important and timely legislation.

Mr. Speaker, I reserve the balance of my time.

Mr. BOEHLERT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise today in support of the Hazard Mitigation and Flood Reduction Act. This legislation is a critical step toward understanding the causes of last summer's flooding and toward limiting similar tragedies.

The residents of the Midwest have suffered enormous hardships over the past 6 months—thousands were left homeless and billions of dollars in property damages have been left in the wake of the great flood. The legislation before us today will bring assistance and certainty to the lives of those living along the upper Mississippi and its tributaries.

Before I discuss the specifics of H.R. 3445, I would like to commend Chairman MINETA, ranking Republican BUD SHUSTER, and Chairman APPELEGATE for their work to expeditiously move this legislation through the House. I am hopeful that our colleagues in the Senate will give this measure the same prompt consideration. We must get a comprehensive flood mitigation bill to the President's desk this fall.

Mr. Speaker, H.R. 3445 is primarily a combination of two widely supported bills—one introduced by Congressman VOLKMER and one by Congressman DURBIN.

The bill approved last week by the Public Works and Transportation Committee responds directly to the need for changes in the Federal Disaster Relief and Flood Control Programs highlighted by this year's flooding.

The first of the bill's three basic components amends and clarifies FEMA's Hazard Mitigation and Relocation Assistance Programs. These changes will help provide more Federal assistance to encourage people to voluntarily "get out of harm's way"—that is, relocate out of the flood plain. Specifically, the bill modifies FEMA's Hazard Mitigation Program and clarifies the applicability of the Uniform Relocation Act to voluntary relocations.

The second basic component directs the Army Corps of Engineers to review, in consultation with key agencies and groups, national flood control and flood plain management policies, as well as specific measures for the upper Mississippi and lower Mississippi River basins.

The third component is an amendment to the corps' existing program for levee repair and restoration. The provision would provide the corps the opportunity to offer nonstructural options if

requested and supported by the non-Federal project sponsor.

Mr. Speaker, our Nation's flood response and flood control policies need to be modified. H.R. 3445 is a reasonable step in that direction and should bring a significant reduction in future flood losses. When people living in dangerous flood plains seek to move, our Government should assist their effort, not hinder it. This point was hammered home by many during the markup of H.R. 3445 including Congressman EMERSON and Congresswoman DANNER of our committee, who represent those directly affected. I appreciate their thoughtful input to this legislation.

Mr. Speaker, H.R. 3445 will effectively reduce future losses of life and property that result from flooding. Reduced damages will translate into a reduced need for Federal relief dollars. I urge all of my colleagues to support the passage of this measure.

□ 1410

Mr. Speaker, before I conclude I would like to make two important observations: First, the great floods of the year brought forth the best of America. In my own district in beautiful upstate New York, in Delaware County, the 2,500 people of the town of Davenport, under the leadership of their dynamic supervisor, Ray Christiansen, adopted Davenport, IA, a distant city of over 100,000 people, and said, "We want to help you. We recognize your special needs." Those dedicated people from Davenport, NY, sent a whole tractor-trailer full of goods and products that the people of Davenport, IA, needed during this time of crisis.

What a wonderful story that is for America, people half a continent away, in a small community, responding to the needs of their fellow Americans who were suffering so greatly.

So I would like to commend the people of Davenport, NY, and say how grateful I am to have the privilege of representing people who are so thoughtful and caring and so responsive in times of crisis.

Finally, Mr. Speaker, I would like to take particular note of the fact that this is the first bill the gentleman from Ohio [Mr. APPLGATE] has brought forth in his new position as chairman of the subcommittee. He has been magnificent in providing leadership to the subcommittee, in moving the hearings along expeditiously, and in reaching out to all of our colleagues, Republicans and Democrats alike, and in essence following the admonition of Lyndon Baines Johnson, who was wont to say, "Come, let us reason together." We have reasoned together and we have fashioned an outstanding product.

Mr. Speaker, I say to the gentleman from Ohio [Mr. APPLGATE], "You deserve a great deal of credit. What a pleasure it is to work with you."

Mr. Speaker, I reserve the balance of my time.

Mr. APPLGATE. Mr. Speaker, I yield 3 minutes to our very distinguished majority leader, the gentleman from Missouri [Mr. GEPHARDT].

Mr. GEPHARDT. Mr. Speaker, I want to begin by giving my heartfelt thanks to the chairman and the ranking member of the subcommittee for a tremendous job in putting this legislation together. I also want to thank the chairman and the ranking member of the full committee for doing a tremendous job in bringing together this legislation and in a short time getting it in front of us and allowing us to have the chance to pass it before the Congress finishes its work this year.

I think this bill is a very wise investment in the rebuilding of flood-stricken communities. It provides hope to families that they can get back into safe housing as soon as possible, and it will help ensure that Federal disaster funds already appropriated are spent in the most effective manner.

The State of Missouri alone has sustained flood destruction of over \$260 million in what is the worst flood in anyone's memory. Thousands of families have been out of their homes now for more than 4 months. Every time that any of us go home, we spent a lot of time talking to these flood victims, and their question always is, whether or not they had insurance—and many of them did—"Should I stay and rebuild, or can I leave?"

Under today's law and circumstances, there is no human way that we could ever cobble together enough money from Federal, State, local, and private sources to be able to get a buy-out fund necessary to even give people 20 or 25 cents on the dollar so that they could be in a position to go out and take on a new loan on a new piece of property outside the flood plain.

This legislation primarily gives FEMA the flexibility, not the money but the flexibility, with the money they already have in order to be able to better cooperate with the Federal, State, and local governments so that where buy-out funds make sense and can be put together, we have the ability through FEMA funds to be able to do that.

I think this makes sense for the Government, I think it makes sense for taxpayers, and I know it makes sense for some of the victims of the disaster. None of them will be made anywhere near whole. All of them have suffered a great tragedy that will take many, many years, if ever, to overcome. This legislation gives us an opportunity and the possibility that we can cobble together buy-out funds, local, Federal, State, and private, in order to get people into a position where, with great loss, they can move out of a property that might flood again and be able to

take on a new loan and a new mortgage and be in a place that will be high and dry the next time if a flood occurs.

Mr. Speaker, I urge the Members to vote for this legislation, and again I thank profusely the members on both sides of the subcommittee and the full committee that strongly supported this bipartisan legislation.

Mr. BOEHLERT. Mr. Speaker, I yield 2 minutes to my colleague, the gentleman from Missouri [Mr. TALENT].

Mr. TALENT. Mr. Speaker, I thank the gentleman for yielding me this time.

Mr. Speaker, during the difficult days of July and August when the flood was hitting in the Midwest one of the things people in my district constantly asked me was: "Look, the attention of the Nation is on us now during the difficult times when we are fighting these waters. What are people going to do when the waters have gone down? Are they going to leave us alone, or are they going to be there to help?"

I think the significant thing about this bill is that it sends a signal that the Government is still aware of the problem and is still going to be there to help, and I think there are two significant things about it that we are addressing in this legislation. The first is the whole question of people who have been put out of their homes, whose homes have been very substantially damaged and who face now the issue of whether to try and rebuild according to Federal and local regulations or whether to try to seek a buy-out and to relocate.

Those individuals, as much as they need anything else, need some certainty about the options that are going to be available.

As has been said here today, very few people are going to be made completely whole, but they need to know how much they can count on, what kind of support is going to be available, and whether there will be help in relocating. And if they are going to have to make the difficult decisions about whether they should stay or whether they should move, I believe this legislation sends a signal that the Federal Government is moving as quickly as possible to try to identify those areas of uncertainty and eliminating them. The committee deserves a great deal of credit in putting it out in an expeditious way.

The other really important aspect of the bill—and there is a number of good features in it—is the comprehensive study that it mandates, with particular emphasis on the upper Mississippi and the upper Missouri tributaries so that we can begin looking at what we can do in a broad fashion to prevent these kinds of floods in the future or, failing that, to try to protect the people in the area from the damage that would otherwise occur.

□ 1420

It is essential that we take a comprehensive approach. If we do not, this thing is going to get piecemealed. Everybody is going to go in and try to get what they can for their area. It would be much better if we did in the upper Mississippi what has already happened in the lower Mississippi and approach this thing in a comprehensive way. So the important thing about this legislation overall is that it sends the signal to the people in the area that we have not forgotten you; we are monitoring the situation, trying to help in any way possible.

Again, I congratulate the committee and the distinguished chairman and ranking member for putting the bill out.

Mr. BOEHLERT. Mr. Speaker, I yield 1 minute to the gentleman from Nebraska [Mr. BEREUTER].

Mr. BEREUTER. Mr. Speaker, I rise in support of H.R. 3445 and commend the committee for their work on this excellent and necessary legislation.

I do have one question for the chairman, a clarification of section 5. It is my understanding that section 5, when it refers to the lower Missouri River, will refer to that portion of the river before the last, that is to say, the most downstream, control structure, the Gavins Point Dam, which creates the Louis and Clark Reservoir.

Mr. Speaker, I would ask the chairman, is my understanding correct?

Mr. APPELEGATE. Mr. Speaker, if the gentleman will yield, that is my understanding. The gentleman is correct.

Mr. BEREUTER. Mr. Speaker, with that kind of clarification, which I think is entirely reasonable, that is to say the stretch of the river below the last control structure, I certainly rise in support of the legislation and urge all of my colleagues to support it.

Mr. APPELEGATE. Mr. Speaker, I yield 2 minutes to the gentleman from California [Mr. MINETA], the very distinguished chairman of the Committee on Public Works and Transportation.

Mr. MINETA. Mr. Speaker, I want to commend the gentleman from Ohio [Mr. APPELEGATE] for his fine explanation of the bill and I want to commend him and the Subcommittee on Water Resources and Environment's ranking Republican [Mr. BOEHLERT] for their leadership on this important bill. I also want to pay special recognition to the following Members who have labored long and hard on behalf of their constituents and the Nation on this important issue: Congressmen VOLKMER, DURBIN, GEPHARDT, EMERSON, COSTELLO, DANNER, and SKELTON.

The destruction of the midwest floods of 1993 urges us to review and reconsider our present flood policies. Not only the directly affected victims of the floods, but also the taxpayers who are contributing for reconstruction in

the Midwest, have asked us to do what we can to reduce the impact of future floods.

In the past, the Federal Emergency Management Agency has helped people who wanted to move out of Harm's way. But the scale was very small. Today, as towns try to look to the future, many see more floods. Over 200 communities, many of which have been victims of numerous floods during the last 20 years, have approached the Federal Government about relocations out of the flood plains to higher ground. The legislation before the House today will increase the availability of Federal assistance for relocations. Additionally, the bill authorizes the Corps of Engineers to fund nonstructural alternatives to the repair or reconstruction of damaged levees, if requested by the non-Federal sponsor.

Long-term studies are also authorized to give the Congress the information we need to determine what our flood control policies should be for the 21st century.

Mr. Speaker, I again wish to thank the leadership of the subcommittee, the chairman as well as the ranking Republican, and my fine colleague, the gentleman from Pennsylvania [Mr. SHUSTER], the ranking Republican on our committee, and urge the adoption of this very important legislation.

Mr. SHUSTER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in strong support of this legislation. It is really a combination of two widely supported bills, one introduced by the gentleman from Missouri [Mr. VOLKMER] and one introduced by the gentleman from Illinois [Mr. DURBIN]. Certainly many Members have contributed mightily to it, particularly those Members from Missouri and Illinois whose districts were directly impacted, the gentleman from Missouri [Mr. EMERSON], the gentleman from Illinois [Mr. SANGMEISTER], the gentleman from Illinois [Mr. POSHARD], the gentlewoman from Missouri [Ms. DANNER], and certainly the majority leader, the gentleman from Missouri [Mr. GEPHARDT]. So this is very worthy of our support. I urge its passage.

Mr. Speaker, I reserve the balance of my time.

Mr. APPELEGATE. Mr. Speaker, I yield 3 minutes to the gentleman from Missouri [Mr. VOLKMER], one of the principal sponsors of this bill.

Mr. SHUSTER. Mr. Speaker, I yield 1 minute to the gentleman from Missouri.

The SPEAKER pro tempore (Mr. TAYLOR of Mississippi). The gentleman from Missouri [Mr. VOLKMER] is recognized for 4 minutes.

Mr. VOLKMER. Mr. Speaker, I first wish to take this opportunity, along with others, to thank the gentleman from California [Mr. MINETA], the chairman of the Committee on Public Works and Transportation, and also

the ranking minority member, the gentleman from Pennsylvania [Mr. SHUSTER], the subcommittee chairman, the gentleman from Ohio [Mr. APPELEGATE], and the ranking minority member on the subcommittee, the gentleman from New York [Mr. BOEHLERT], for having this legislation here before us today.

Mr. Speaker, I rise today in support of H.R. 3445, the Hazard Mitigation and Flood Damage Reduction Act of 1993. This bill incorporates legislation that I sponsored along with legislation introduced by the gentleman from Illinois.

This legislation will give FEMA the added flexibility to help people voluntarily relocate out of the flood plain through the Hazard Mitigation Grant Program. Increasing the Federal share and raising the cap for available funds will provide increased support to State and local governments to take mitigation measures now and reduce expenditures for disasters in the future.

I have a particular interest in this legislation because portions of all the counties that I represent along the Mississippi and Missouri Rivers were flooded and received Presidential declarations for individual assistance and public assistance. I have seen firsthand the damage caused by this summer's floods which inundated entire towns and fields. Businesses were closed and farmland that once produced bountiful crops were turned into mud bogs and sand bars.

Mr. Speaker, I have traveled extensively throughout my district since early spring, when the first flood began to exact its heavy toll on the levees, homes, and property in the flood plain. Levees that have withstood years of flooding gave way this year to the heavy rains. Homes that have not been affected by high water before were flooded. In my State of Missouri estimates for flood related damage have exceeded \$3 billion and are still rising as the damage assessment continues. Many areas in my district have not had just one flood but a succession of two or three separate floods this year. The city of Alexandria in the northeast corner of my district was one of the first towns to be flooded and was one of the last cities to have the water recede. For many the only option currently available is to use the money they receive to rebuild in the flood plain either because government programs are not flexible enough to assist them to relocate out of the flood plain and they cannot afford to relocate on their own.

Many of the people that live in the flood plain do not live there because they want to, they live there because it is all they can afford. Many that have had their homes damaged or destroyed by the flood have come forward and said they would move out of the flood plain but they do not have sufficient funds to do so.

Currently, individual and family grants are available from FEMA for up

to \$11,900 to help cover the costs of elevating and rebuilding in the flood plain. Federal money for relocation is available from two sources, section 1362 of the National Flood Insurance Program [NFIP] and section 404 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act. As it now stands, few people will be able to participate in the section 1362 buy-out because such a low percentage of people are enrolled in the National Flood Insurance Program and the program has stringent requirements that make it difficult to relocate unless a property has suffered damage three or more times in a 5-year period or suffered damage of 50 percent or more once. Use of hazard mitigation grant money in section 404 is limited because many of the areas that have been affected by the flood cannot afford the 50-50 match that is in present law. Total funds available for section 404 are limited to 10 percent of the funds allocated for section 406, public assistance.

H.R. 3445 will amend section 404 of the Stafford Act by changing the current 50-50 Federal-State cost share to a 75-75 Federal-State cost share. It will also raise the current Federal funding for the Hazard Mitigation Grant Program limitation from the current 10 percent of the estimated aggregate amounts to be made under section 406 to 15 percent of the estimated aggregate amounts of grants to be made under the disaster program. I feel that H.R. 3445 will provide an opportunity for the flood victims to move from the flood plain while reducing the continued need for Federal dollars to be spent for emergency services and rehabilitation of personal and public property. If we act now, we can mitigate the damage when future floods come as we know they will. It is very apparent to me that rather than encouraging people to spend Federal money to rebuild in the flood plain it is fiscally responsible to use that money to relocate people out of the flood plain especially when their preference is to leave the flood plain.

□ 1430

Mr. APPELGATE. Mr. Speaker, I yield 2 minutes to the distinguished gentleman from Illinois [Mr. DURBIN], a principal author of this bill.

Mr. DURBIN. Mr. Speaker, I thank the gentleman for yielding time to me.

I want to salute the Committee on Public Works and Transportation, both Democrats and Republicans, for bringing this important bill to the floor.

This last Saturday, I flew over the flooded areas of my district. Many people are surprised to know that we still have flooding. In fact, we do. The aftermath of this flood will be with us for many, many months and perhaps years to come.

The gentleman from Missouri [Mr. VOLKMER] has outlined a way to help

the people presently suffering from flood damage to their businesses and homes and to mitigate damages in the future. I support that section of the bill, and I am glad it is part of this package.

The provision which I have included in the bill takes a different approach. Let me give my colleagues a little history, very briefly.

In 1927, a major flood on the Mississippi River led Congress and the President to sign legislation assigning the responsibility for levee protection to the lower Mississippi south of Cape Girardeau, MO, to the Federal Government. The river, of course, is wider and flows more deeply in that part of our Nation.

But, in fact, the Federal Levee System, and 6 billion dollars' worth of Federal expenditures, have protected those folks from the ravages of the flood. And that is why the flood of 1993 and all the damage was virtually north of that Cape Girardeau, MO, location, because of that decision made in Congress 66 years ago.

It was not just God's design. It was also the design of the Federal Government.

What we are asking for is a study by the Army Corps of Engineers to ask priority protection on the Upper Mississippi River and on the Illinois and Missouri Rivers to try to find out where we should invest our funds, Federal, State, and local, to prevent the kind of damage and disaster we have just lived through.

Clearly, transportation is one of the highest priorities. When we knocked out passage across the Mississippi River for cars and trucks and railroads, we literally paralyzed the Midwest and most of the country so that has to be one of our high priorities.

But it also goes beyond that, to toxic waste sites, water supply systems, sewage treatment plants, so many other areas that were threatened by this flood need to be protected in the future. We are asking the Army Corps of Engineers, working with other Federal agencies, making certain that they take into account environmental considerations, to come up with proposals, not only for structural changes in levees but for nonstructural approaches, perhaps the expansion of wetlands.

We think that in the next year the Army Corps of Engineers can produce this study, give guidance to Congress and the administration for the mitigation in future disasters.

I thank the Committee on Public Works and Transportation for their help with this effort.

Mr. APPELGATE. Mr. Speaker, I yield 1 minute to the gentleman from Pennsylvania [Mr. BORSKI], chairman of the Subcommittee on Investigations and Oversight of the Committee on Public Works and Transportation.

Mr. BORSKI. Mr. Speaker, I wish to express my support for H.R. 3445 which

will provide an immediate response to this past summer's flooding along the Upper Mississippi and Lower Missouri River Valleys.

I commend our chairman, the gentleman from California [Mr. MINETA], and the ranking Republican member, the gentleman from Pennsylvania [Mr. SHUSTER], the subcommittee chairman, the gentleman from Ohio [Mr. APPELGATE], and the ranking Republican member, the gentleman from New York [Mr. BOEHLERT], for their work on the bill.

This bill directly reflects our findings in the Subcommittee on Investigations and Oversight that increased funding should be made available for the buy-out of property in the flood plain. While this past summer's floods produced more interest in the buy-out option, limited funding prevented more widespread use of buy-outs.

Under H.R. 3445, the cap for funds available for buy-outs, the Hazard Mitigation Program, will be increased from 10 percent of the total disaster assistance funds available to 15 percent.

The new FEMA Director, James Lee Witt, who has a long background in the disaster relief program, testified before the Investigations and Oversight Subcommittee that hazard mitigation is among the most significant—and most overlooked—aspects of disaster relief.

By raising the cap for hazard mitigation, the drafters of H.R. 3445 have recognized that disaster relief starts by looking ahead to potential disasters. The disaster relief program should not be limited to mopping up the last disaster.

Our subcommittee investigation also found that the Upper Mississippi Basin requires a comprehensive study that has input from various perspectives. While the Army Corps of Engineers should have the lead in developing flood control policies, other agencies should have a role as well.

I also commend the committee leadership on the strong direction in the committee report for the Corps of Engineers to consult with other Federal agencies, and State and local governments, on a continuous, cooperative, and comprehensive basis. The studies should be completed as quickly as possible but they must be open throughout the process to all points of view.

H.R. 3445 results from the disaster that was faced by thousands of people along the Mississippi and Missouri Rivers. I hope that the disaster areas that require immediate attention will receive top priority in this national study effort and that the broad nature of the national studies will not prevent compliance with the 18-month deadline.

Mr. Speaker, I urge the passage of H.R. 3445.

Mr. SHUSTER. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore (Mr. TAYLOR of Mississippi). The question is

on the motion offered by the gentleman from Ohio [Mr. APPELEGATE] that the House suspend the rules and pass the bill, H.R. 3445, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. APPELEGATE Mr. Speaker, I ask unanimous consent that all Members have 5 legislative days to revise and extend their remarks on H.R. 3445, the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

NEGOTIATED RATES ACT OF 1993

Mr. RAHALL. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 2121) to amend title 49, United States Code, relating to procedures for resolving claims involving unfiled, negotiated transportation rates, and for other purposes, as amended.

The Clerk read as follows:

H.R. 2121

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Negotiated Rates Act of 1993".

SEC. 2. PROCEDURES FOR RESOLVING CLAIMS INVOLVING UNFILED, NEGOTIATED TRANSPORTATION RATES.

(a) IN GENERAL.—Section 10701 of title 49, United States Code, is amended by adding at the end the following:

"(f) PROCEDURES FOR RESOLVING CLAIMS INVOLVING UNFILED, NEGOTIATED TRANSPORTATION RATES.—

"(1) IN GENERAL.—When a claim is made by a motor carrier of property (other than a household goods carrier) providing transportation subject to the jurisdiction of the Commission under subchapter II of chapter 105 of this title, by a freight forwarder (other than a household goods freight forwarder), or by a party representing such a carrier or freight forwarder regarding the collection of rates or charges for such transportation in addition to those originally billed and collected by the carrier or freight forwarder for such transportation, the person against whom the claim is made may elect to satisfy the claim under the provisions of paragraph (2), (3), or (4) of this subsection, upon showing that—

"(A) the carrier or freight forwarder is no longer transporting property or is transporting property for the purpose of avoiding the application of this subsection; and

"(B) with respect to the claim—

"(i) the person was offered a transportation rate by the carrier or freight forwarder other than that legally on file with the Commission for the transportation service;

"(ii) the person tendered freight to the carrier or freight forwarder in reasonable reliance upon the offered transportation rate;

"(iii) the carrier or freight forwarder did not properly or timely file with the Commission a

tariff providing for such transportation rate or failed to enter into an agreement for contract carriage;

"(iv) such transportation rate was billed and collected by the carrier or freight forwarder; and

"(v) the carrier or freight forwarder demands additional payment of a higher rate filed in a tariff.

If there is a dispute as to the showing under subparagraph (A), such dispute shall be resolved by the court in which the claim is brought. If there is a dispute as to the showing under subparagraph (B), such dispute shall be resolved by the Commission. Pending the resolution of any such dispute, the person shall not have to pay any additional compensation to the carrier or freight forwarder. Satisfaction of the claim under paragraph (2), (3), or (4) of this subsection shall be binding on the parties, and the parties shall not be subject to chapter 119 of this title.

"(2) CLAIMS INVOLVING SHIPMENTS WEIGHING 10,000 POUNDS OR LESS.—A person from whom the additional legally applicable and effective tariff rate or charges are sought may elect to satisfy the claim if the shipments each weighed 10,000 pounds or less, by payment of 20 percent of the difference between the carrier's applicable and effective tariff rate and the rate originally billed and paid. In the event that a dispute arises as to the rate that was legally applicable to the shipment, such dispute shall be resolved by the Commission.

"(3) CLAIMS INVOLVING SHIPMENTS WEIGHING MORE THAN 10,000 POUNDS.—A person from whom the additional legally applicable and effective tariff rate or charges are sought may elect to satisfy the claim if the shipments each weighed more than 10,000 pounds, by payment of 15 percent of the difference between the carrier's applicable and effective tariff rate and the rate originally billed and paid. In the event that a dispute arises as to the rate that was legally applicable to the shipment, such dispute shall be resolved by the Commission.

"(4) CLAIMS INVOLVING PUBLIC WAREHOUSEMEN.—Notwithstanding paragraphs (2) and (3), a person from whom the additional legally applicable and effective tariff rate or charges are sought may elect to satisfy the claim by payment of 5 percent of the difference between the carrier's applicable and effective tariff rate and the rate originally billed and paid if such person is a public warehouseman. In the event that a dispute arises as to the rate that was legally applicable to the shipment, such dispute shall be resolved by the Commission.

"(5) EFFECTS OF ELECTION.—When a person from whom additional legally applicable freight rates or charges are sought does not elect to use the provisions of paragraph (2), (3), or (4), the person may pursue all rights and remedies existing under this title.

"(6) STAY OF ADDITIONAL COMPENSATION.—When a person proceeds under this section to challenge the reasonableness of the legally applicable freight rate or charges being claimed by a carrier or freight forwarder described in paragraph (1) in addition to those already billed and collected, the person shall not have to pay any additional compensation to the carrier or freight forwarder until the Commission has made a determination as to the reasonableness of the challenged rate as applied to the freight of the person against whom the claim is made.

"(7) LIMITATION ON STATUTORY CONSTRUCTION.—Except as authorized in paragraphs (2), (3), (4), and (9) of this subsection, nothing in this subsection shall relieve a motor common carrier of the duty to file and adhere to its rates, rules, and classifications as required in sections 10761 and 10762 of this title.

"(8) NOTIFICATION OF ELECTION.—

"(A) GENERAL RULE.—A person must notify the carrier or freight forwarder as to its election

to proceed under paragraph (2), (3), or (4). Except as provided in subparagraphs (B), (C), and (D), such election may be made at any time.

"(B) DEMANDS FOR PAYMENT INITIALLY MADE AFTER DATE OF ENACTMENT.—If the carrier or freight forwarder or party representing such carrier or freight forwarder initially demands the payment of additional freight charges after the date of the enactment of this subsection and notifies the person from whom additional freight charges are sought of the provisions of paragraphs (1) through (7) at the time of the making of such initial demand, the election must be made not later than the later of—

"(i) the 60th day following the filing of an answer to a suit for the collection of such additional legally applicable freight rate or charges, or

"(ii) the 90th day following the date of the enactment of this subsection.

"(C) PENDING SUITS FOR COLLECTION MADE BEFORE OR ON DATE OF ENACTMENT.—If the carrier or freight forwarder or party representing such carrier or freight forwarder has filed, before or on the date of the enactment of this subsection, a suit for the collection of additional freight charges and notifies the person from whom additional freight charges are sought of the provisions of paragraphs (1) through (7), the election must be made not later than the 90th day following the date on which such notification is received.

"(D) DEMANDS FOR PAYMENT MADE BEFORE OR ON DATE OF ENACTMENT.—If the carrier or freight forwarder or party representing such carrier or freight forwarder has demanded the payment of additional freight charges, and has not filed a suit for the collection of such additional freight charges, before or on the date of the enactment of this subsection and notifies the person from whom additional freight charges are sought of the provisions of paragraphs (1) through (7), the election must be made not later than the later of—

"(i) the 60th day following the filing of an answer to a suit for the collection of such additional legally applicable freight rate or charges, or

"(ii) the 90th day following the date of the enactment of this subsection.

"(9) CLAIMS INVOLVING SMALL-BUSINESS CONCERNS, CHARITABLE ORGANIZATIONS, AND RECYCLABLE MATERIALS.—Notwithstanding paragraphs (2), (3), and (4), a person from whom the additional legally applicable and effective tariff rate or charges are sought shall not be liable for the difference between the carrier's applicable and effective tariff rate and the rate originally billed and paid—

"(A) if such person qualifies as a small-business concern under the Small Business Act (15 U.S.C. 631 et seq.),

"(B) if such person is an organization which is described in section 501(c)(3) of the Internal Revenue Code of 1986 and exempt from tax under section 501(a) of such Code, or

"(C) if the cargo involved in the claim is recyclable materials, as defined in section 10733."

(b) CONFORMING AMENDMENT.—Subsection (e) of such section is amended by striking "In" and inserting "Except as provided in subsection (f), in".

(c) APPLICABILITY.—The amendments made by subsections (a) and (b) of this section shall apply to all claims pending as of the date of the enactment of this Act and to all claims arising from transportation shipments tendered on or before the last day of the 24-month period beginning on such date of enactment.

(d) REPORT.—Not later than 18 months after the date of the enactment of this Act, the Interstate Commerce Commission shall transmit to Congress a report regarding whether there exists a justification for extending the applicability of

amendments made by subsections (a) and (b) of this section beyond the period specified in subsection (c).

(e) ALTERNATIVE PROCEDURE FOR RESOLVING DISPUTES.—

(1) **GENERAL RULE.**—For purposes of section 10701 of title 49, United States Code, it shall be an unreasonable practice for a motor carrier of property (other than a household goods carrier) providing transportation subject to the jurisdiction of the Commission under subchapter II of chapter 105 of such title, a freight forwarder (other than a household goods freight forwarder), or a party representing such a carrier or freight forwarder to attempt to charge or to charge for a transportation service provided before September 30, 1990, the difference between the applicable rate that is lawfully in effect pursuant to a tariff that is filed in accordance with chapter 107 of such title by the carrier or freight forwarder applicable to such transportation service and the negotiated rate for such transportation service if the carrier or freight forwarder is no longer transporting property between places described in section 10521(a)(1) of such title or is transporting property between places described in section 10521(a)(1) of such title for the purpose of avoiding the application of this subsection.

(2) **JURISDICTION OF COMMISSION.**—The Commission shall have jurisdiction to make a determination of whether or not attempting to charge or the charging of a rate by a motor carrier or freight forwarder or party representing a motor carrier or freight forwarder is an unreasonable practice under paragraph (1). If the Commission determines that attempting to charge or the charging of the rate is an unreasonable practice under paragraph (1), the carrier, freight forwarder, or party may not collect the difference described in paragraph (1) between the applicable rate and the negotiated rate for the transportation service. In making such determination, the Commission shall consider—

(A) whether the person was offered a transportation rate by the carrier or freight forwarder or party other than that legally on file with the Commission for the transportation service;

(B) whether the person tendered freight to the carrier or freight forwarder in reasonable reliance upon the offered transportation rate;

(C) whether the carrier or freight forwarder did not properly or timely file with the Commission a tariff providing for such transportation rate or failed to enter into an agreement for contract carriage;

(D) whether the transportation rate was billed and collected by the carrier or freight forwarder; and

(E) whether the carrier or freight forwarder or party demands additional payment of a higher rate filed in a tariff.

(3) **STAY OF ADDITIONAL COMPENSATION.**—When a person proceeds under this subsection to challenge the reasonableness of the practice of a motor carrier, freight forwarder, or party described in paragraph (1) to attempt to charge or to charge the difference described in paragraph (1) between the applicable rate and the negotiated rate for the transportation service in addition to those charges already billed and collected for the transportation service, the person shall not have to pay any additional compensation to the carrier, freight forwarder, or party until the Commission has made a determination as to the reasonableness of the practice as applied to the freight of the person against whom the claim is made.

(4) **TREATMENT.**—Paragraph (1) of this subsection is enacted as an exception, and shall be treated as an exception, to the requirements of sections 10761(a) and 10762 of title 49, United States Code, relating to a filed tariff rate for a

transportation or service subject to the jurisdiction of the Commission and other general tariff requirements.

(5) **NONAPPLICABILITY OF NEGOTIATED RATE DISPUTE RESOLUTION PROCEDURE.**—If a person elects to seek enforcement of paragraph (1) with respect to a rate for a transportation or service, section 10701(f) of title 49, United States Code, as added by subsection (a) of this section, shall not apply to such rate.

(6) **DEFINITIONS.**—For purposes of this subsection, the following definitions apply:

(A) **COMMISSION, HOUSEHOLD GOODS, HOUSEHOLD GOODS FREIGHT FORWARDER, AND MOTOR CARRIER.**—The terms "Commission", "household goods", "household goods freight forwarder", and "motor carrier" have the meaning such terms have under section 10102 of title 49, United States Code.

(B) **NEGOTIATED RATE.**—The term "negotiated rate" means a rate, charge, classification, or rule agreed upon by a motor carrier or freight forwarder described in paragraph (1) and a shipper through negotiations pursuant to which no tariff was lawfully and timely filed with the Commission and for which there is written evidence of such agreement.

(f) **PRIOR SETTLEMENTS AND ADJUDICATIONS.**—Any claim that, but for this subsection, would be subject to any provision of this Act (including any amendment made by this Act) and that was settled by mutual agreement of the parties to such claim, or resolved by a final adjudication of a Federal or State court, before the date of the enactment of this Act shall be treated as binding, enforceable, and not contrary to law, unless such settlement was agreed to as a result of fraud or coercion.

(g) **RATE REASONABLENESS.**—Section 10701(e) of title 49, United States Code, is amended by adding at the end the following: "Any complaint brought against a motor carrier (other than a carrier described in subsection (f)(1)(A)) by a person (other than a motor carrier) for unreasonably high rates for past or future transportation shall be determined under this subsection."

SEC. 3. STATUTE OF LIMITATIONS.

(a) **MOTOR CARRIER CHARGES.**—Section 11706(a) of title 49, United States Code, is amended by striking the period at the end and inserting the following: "; except that a motor carrier (other than a motor carrier providing transportation of household goods) or freight forwarder (other than a household goods freight forwarder)—

"(1) must begin such a civil action within 2 years after the claim accrues if the transportation or service is provided by the carrier in the 1-year period beginning on the date of the enactment of the Negotiated Rates Act of 1993; and

"(2) must begin such a civil action within 18 months after the claim accrues if the transportation or service is provided by the carrier after the last day of such 1-year period."

(b) **MOTOR CARRIER OVERCHARGES.**—Section 11706(b) of title 49, United States Code, is amended by striking ". If that claim is against a common carrier" and inserting the following: "; except that a person must begin a civil action to recover overcharges from a motor carrier subject to the jurisdiction of the Commission under subchapter II of chapter 105 of this title for transportation or service—

"(1) within 2 years after the claim accrues if such transportation or service is provided in the 1-year period beginning on the date of the enactment of the Negotiated Rate Act of 1993; and

"(2) within 18 months after the claim accrues if such transportation or service is provided after the last day of such 1-year period.

If the claim is against a common carrier."

(c) **CONFORMING AMENDMENT.**—Section 11706(d) of title 49, United States Code, is amended—

(1) by striking "3-year period" each place it appears and inserting "limitation periods";

(2) by striking "is extended" the first place it appears and inserting "are extended"; and

(3) by striking "each".

SEC. 4. TARIFF RECONCILIATION RULES FOR MOTOR CARRIERS OF PROPERTY.

(a) **IN GENERAL.**—Chapter 117 of title 49, United States Code, is amended by adding at the end the following:

"§11712. Tariff reconciliation rules for motor common carriers of property

"(a) **MUTUAL CONSENT.**—Subject to Commission review and approval, motor carriers subject to the jurisdiction of the Commission under subchapter II of chapter 105 of this title (other than motor carriers providing transportation of household goods) and shippers may resolve, by mutual consent, overcharge and undercharge claims resulting from incorrect tariff provisions or billing errors arising from the inadvertent failure to properly and timely file and maintain agreed upon rates, rules, or classifications in compliance with sections 10761 and 10762 of this title. Resolution of such claims among the parties shall not subject any party to the penalties of chapter 119 of this title.

"(b) **LIMITATION ON STATUTORY CONSTRUCTION.**—Nothing in this section shall relieve the motor carrier of the duty to file and adhere to its rates, rules, and classifications as required in sections 10761 and 10762, except as provided in subsection (a) of this section.

"(c) **RULEMAKING PROCEEDING.**—Not later than 90 days after the date of the enactment of this section, the Commission shall institute a proceeding to establish rules pursuant to which the tariff requirements of sections 10761 and 10762 of this title shall not apply under circumstances described in subsection (a) of this section."

(b) **CONFORMING AMENDMENT.**—The analysis for chapter 117 of title 49, United States Code, is amended by adding at the end the following:

"11712. Tariff reconciliation rules for motor common carriers of property."

SEC. 5. CUSTOMER ACCOUNT CODES AND RANGE TARIFFS.

(a) **CUSTOMER ACCOUNT CODES.**—Section 10762 of title 49, United States Code, is amended by adding at the end the following:

"(h) **CUSTOMER ACCOUNT CODES.**—No tariff filed by a motor carrier of property with the Commission before, on, or after the date of the enactment of this subsection may be held invalid solely on the basis that a numerical or alpha account code is used in such tariff to designate customers or to describe the applicability of rates. For transportation performed on and after the 180th day following such date of enactment, the name of the customer for each account code must be set forth in the tariff (other than the tariff of a motor carrier providing transportation of household goods)."

(b) **RANGE TARIFFS.**—Such section is further amended by adding at the end the following:

"(i) **RANGE TARIFFS.**—No tariff filed by a motor carrier of property with the Commission before, on, or after the date of the enactment of this subsection may be held invalid solely on the basis that the tariff does not show a specific rate or discount for a specific shipment if the tariff is based on a range of rates or discounts for specific classes of shipments. For transportation performed on or after the 180th day following such date of enactment, such a range tariff must identify the specific rate or discount from among the range of rates or discounts contained in such range tariff which is applicable to each specific shipment or must contain an objective means for determining the rate."

SEC. 6. CONTRACTS OF MOTOR CONTRACT CARRIERS.

(a) *IN GENERAL.*—Section 10702 of title 49, United States Code, is amended by adding at the end the following new subsection:

"(c) **CONTRACTS OF CARRIAGE FOR MOTOR CONTRACT CARRIERS.**—

"(1) *GENERAL RULE.*—A motor contract carrier providing transportation subject to the jurisdiction of the Commission under subchapter II of chapter 105 of this title shall enter into a written agreement, separate from the bill of lading or receipt, for each contract for the provision of transportation subject to such jurisdiction which is entered into after the 90th day following the date of the enactment of this subsection.

"(2) *MINIMUM CONTENT REQUIREMENTS.*—The written agreement shall, at a minimum—

"(A) identify the parties thereto;

"(B) commit the shipper to tender and the carrier to transport a series of shipments;

"(C) contain the contract rate or rates for the transportation service to be or being provided; and

"(D)(i) state that it provides for the assignment of motor vehicles for a continuing period of time for the exclusive use of the shipper; or

"(ii) state that it provides that the service is designed to meet the distinct needs of the shipper.

"(3) *RETENTION BY CARRIER.*—All written agreements entered into by a motor contract carrier under paragraph (1) shall be retained by the carrier while in effect and for a minimum period of 3 years thereafter and shall be made available to the Commission upon request.

"(4) *RANDOM AUDITS BY COMMISSION.*—The Commission shall conduct periodic random audits to ensure that motor contract carriers are complying with this subsection and are adhering to the rates set forth in their agreements."

(b) *CIVIL PENALTY.*—Section 11901(g) of such title is amended—

(1) by inserting "or enter into or retain a written agreement under section 10702(c) of this title" after "under this subtitle" the first place it appears; and

(2) by striking "or (5)" and inserting "(5) does not comply with section 10702(c) of this title, or (6)".

(c) *CRIMINAL PENALTY.*—Section 11909(b) of such title is amended—

(1) by inserting "or enter into or retain a written agreement under section 10702(c) of this title" after "under this subtitle" the first place it appears; and

(2) in clause (1) by inserting after "make that report" the following: "or willfully does not enter into or retain that agreement".

SEC. 7. BILLING AND COLLECTING PRACTICES.

(a) *IN GENERAL.*—Subchapter IV of chapter 107 of title 49, United States Code, is amended by adding at the end the following:

"§10767. Billing and collecting practices

"(a) *REGULATIONS LIMITING REDUCED RATES.*—Not later than 120 days after the date of the enactment of this section, the Commission shall issue regulations that prohibit a motor carrier subject to the jurisdiction of the Commission under subchapter II of chapter 105 of this title from providing a reduction in a rate set forth in its tariff or contract for the provision of transportation of property to any person other than (1) the person paying the motor carrier directly for the transportation service according to the bill of lading, receipt, or contract, or (2) an agent of the person paying for the transportation.

"(b) *DISCLOSURE OF ACTUAL RATES, CHARGES, AND ALLOWANCES.*—The regulations of the Commission issued pursuant to this section shall require a motor carrier to disclose, when a document is presented or transmitted electronically for payment to the person responsible directly to

the motor carrier for payment or agent of such responsible person, the actual rates, charges, or allowances for the transportation service and shall prohibit any person from causing a motor carrier to present false or misleading information on a document about the actual rate, charge, or allowance to any party to the transaction. Where the actual rate, charge, or allowance is dependent upon the performance of a service by a party to the transportation arrangement, such as tendering a volume of freight over a stated period of time, the motor carrier shall indicate in any document presented for payment to the person responsible directly to the motor carrier for the payment that a reduction, allowance, or other adjustment may apply.

"(c) *PAYMENTS OR ALLOWANCES FOR CERTAIN SERVICES.*—The regulations issued by the Commission pursuant to this section shall not prohibit a motor carrier from making payments or allowances to a party to the transaction for services that would otherwise be performed by the motor carrier, such as a loading or unloading service, if the payments or allowances are reasonably related to the cost that such party knows or has reason to know would otherwise be incurred by the motor carrier."

(b) *CONFORMING AMENDMENT.*—The analysis for such subchapter is amended by adding at the end the following new item:

"10767. Billing and collecting practices."

(c) *VIOLATION.*—

(1) *IN GENERAL.*—Section 11901 of such title is amended by redesignating subsection (l) as subsection (m) and by inserting after subsection (k) the following:

"(l) *RATE DISCOUNTS.*—A person, or an officer, employee, or agent of that person, that knowingly pays, accepts, or solicits a reduced rate or rates in violation of the regulations issued under section 10767 of this title is liable to the United States for a civil penalty of not less than \$5,000 and not more than \$10,000 plus 3 times the amount of damages which a party incurs because of such violation. Notwithstanding any other provision of this title, the express civil penalties and damages provided for in this subsection are the exclusive legal sanctions to be imposed under this title for practices found to be in violation of the regulations issued under section 10767 and such violations do not render tariff or contract provisions void or unenforceable."

(2) *VENUE.*—Section 11901(m)(2) of such title (as redesignated by paragraph (1)) is amended by striking "or (k)" and inserting "(k), or (l)".

SEC. 8. RESOLUTION OF DISPUTES RELATING TO CONTRACT OR COMMON CARRIER CAPACITIES.

Section 11101 of title 49, United States Code, is amended by adding at the end the following:

"(d) *RESOLUTION OF DISPUTES RELATING TO CONTRACT OR COMMON CARRIER CAPACITIES.*—If a motor carrier (other than a motor carrier providing transportation of household goods) subject to the jurisdiction of the Commission under subchapter II of chapter 105 of this title has authority to provide transportation as both a motor common carrier and a motor contract carrier and a dispute arises as to whether certain transportation is provided in its common carrier or contract carrier capacity and the parties are not able to resolve the dispute consensually, the Commission shall have jurisdiction to, and shall, resolve the dispute."

SEC. 9. LIMITATION ON STATUTORY CONSTRUCTION.

"Nothing in this Act (including any amendment made by this Act) shall be construed as limiting or otherwise affecting application of title 11, United States Code, relating to bankruptcy; title 28, United States Code, relating to the jurisdiction of the courts of the United States (including bankruptcy courts); or the Employee Retirement Income Security Act of 1974.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from West Virginia [Mr. RAHALL] will be recognized for 20 minutes, and the gentleman from Wisconsin [Mr. PETRI] will be recognized for 20 minutes.

PARLIAMENTARY INQUIRIES

Mr. LIPINSKI. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. LIPINSKI. Mr. Speaker, I would like to know if the gentleman from Wisconsin [Mr. PETRI] is opposed to this piece of legislation.

Mr. PETRI. Mr. Speaker, I am not. It is a good piece of legislation.

Mr. MINETA. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. MINETA. Mr. Speaker, it is my understanding that the gentleman from Illinois is opposed to the bill and that the gentleman from Wisconsin is not.

However, I am trying to provide equal treatment to all.

In order to do that, I ask unanimous consent that the debate time on the bill be as follows: 20 minutes to be controlled by the gentleman from Illinois [Mr. LIPINSKI]; 20 minutes to be controlled by the gentleman from Wisconsin [Mr. PETRI]; and 20 minutes to be controlled by the gentleman from West Virginia [Mr. RAHALL].

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The SPEAKER pro tempore. The gentleman from Illinois [Mr. LIPINSKI] will be recognized for 20 minutes, the gentleman from Wisconsin [Mr. PETRI] will be recognized for 20 minutes, and the gentleman from West Virginia [Mr. RAHALL] will be recognized for 20 minutes.

The Chair recognizes the gentleman from West Virginia [Mr. RAHALL].

GENERAL LEAVE

Mr. RAHALL. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days to revise and extend their remarks in the RECORD on H.R. 2121, the bill under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from West Virginia?

There was no objection.

Mr. RAHALL. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 2121 seeks to resolve disputes over the validity of the rates paid by shippers for motor carrier transportation services.

This dispute is framed within the context of efforts by the trustees of failed trucking companies to collect from shippers amounts arising out of the rate that was actually paid, and what is alleged to have been the applicable legal rate.

This bill does this by providing for a procedure under which claims involving less-than-truckload shipments

could be settled at 20 percent of the original claimed amount, and 15 percent for claims involving truckload shipments.

The bill would also provide complete amnesty from claims pending against small businesses, charitable organizations, and scrap recyclers. In addition, provision is made for claims pending against public warehousemen to be settled at 5 percent of the claimed amount.

It is also important to note that the bill, as amended by the committee, prohibits previously settled claims from being reopened and adjudicated under the settlement procedures in the bill.

On other matters, the bill reaffirms that the carrier cost-based factors set forth in section 10701(e) be used to determine rate reasonableness, except with respect to undercharge claims that are the subject of the bill.

And finally, H.R. 2121 includes provisions relating to contracts, off bill discounting, and range tariffs.

Mr. Speaker, it is extremely important, in the view of this gentleman from West Virginia, that any legislation dealing with the pending issue equitably treat those men and women who have been denied their back wages and whose pensions are in jeopardy as a result of trucking company bankruptcies.

I believe that the version of H.R. 2121 approved by the committee is more reflective of these concerns, and is deserving of our support.

In this regard, I want to express my deep appreciation to the chairman of the Committee on Public Works and Transportation, NORM MINETA, for his diligence and flexibility in meeting some of the concerns I originally had with this legislation.

Mr. Speaker, I reserve the balance of my time.

□ 1440

Mr. PETRI. Mr. Speaker, I yield such time as he may consume to the gentleman from Pennsylvania [Mr. SHUSTER], our esteemed colleague and the ranking Republican on the full committee.

Mr. SHUSTER. Mr. Speaker, I rise in strong support of H.R. 2121, the Negotiated Rates Act of 1993.

Today, we are considering one of the most important and critical issues facing businesses in America today. It has already affected the lives and economic health of hundreds of thousands of American companies, it has stifled our economy and caused the failure of many businesses and the loss of jobs. The evil force causing all this havoc is the undercharge crisis. And today, this House will do something about it.

I would like to extend my thanks to the leadership of the Public Works and Transportation Committee; Chairman NORM MINETA, subcommittee Chairman

NICK RAHALL and ranking minority subcommittee member TOM PETRI for their hard work and dedication to bringing this bill to the floor this year.

Quite simply, the undercharge crisis has been caused by certain trustees of bankrupt trucking companies repudiating the trucking company's own rates for past transportation services, and then trying to benefit from this unseemly conduct in a bankruptcy proceeding.

I would like to give you an example of what has been happening to thousands of American companies and why so many feel so injured and outraged about this issue. I am sure that every single one of you has stacks of letters in your offices with stories every bit as shocking as the one I'm about to describe.

A small wholesale mom-and-pop carpet distributor with only six employees shipped carpet at a rate of 16 cents per yard—exactly the price they had agreed upon with the trucking firm hired to deliver it. The carpet was delivered, they paid the bill. End of story. Right?

Wrong. Two years later the trucker went bankrupt and the trustee who was appointed for the firm found a higher charge for the shipment—a lot higher. This small firm, the kind that makes up the backbone of the American economy, was sued for \$16,892 in undercharges for one small shipment. That made the freight charge \$32 per yard for carpet that costs \$1.79 to \$6.99 per yard at the retail level. That amounts to more than a 20,000-percent increase.

The unscrupulous bankruptcy trustees of these carriers have gone after both Fortune 500 companies and the corner druggist alike. There are even cases where they have sued charities and religious groups, even nuns. Virtually no stone has been left unturned in their search for dollars.

Besides the broken lives and dreams of the people who have been forced out of business or lost their jobs because of this situation, there is a cost to all of us. The value of all potential undercharge claims that could be pursued is estimated to be close to \$32 billion dollars. That's four times the cost of Desert Storm.

That money could do a lot of good for the American economy. Because it's already in the checking accounts of so many businesses, it could be used to make investments and create new jobs. As William Tucker of the Tucker Co. said at hearings before the Public Works and Transportation Committee last year after having spent \$22,000 to fight an undercharge claim:

That's \$22,000 of capital which will never be spent by my firm to hire people, expand our markets, buy a computer, serve a shipper or carrier, or move a pound of freight.

As it is, the money is simply being set aside to pay for administrative costs, legal expenses, and payments to

collection agents and trustees. And make no mistake my friends, it is the lawyers and collection agents who are benefiting from this scheme, not employees of these former trucking companies and their pension funds, which some have alleged. From testimony at hearings our committee has held on this issue and a recent GAO study, we know that anywhere from up to 80 percent of undercharge claims already collected have gone to these parties.

I found this situation so incomprehensible and outrageous that I introduced legislation, H.R. 1710, which would wipe out all of these claims permanently. I continue to believe that this is the only truly fair solution to this problem. However, after many discussions with the chairman of our committee and my good friend, NORM MINETA, I became convinced that H.R. 2121 represented the only resolution we could politically achieve and so, in the spirit of compromise, I became an original cosponsor of that bill in May of this year.

Subsequently, the committee adopted an amendment in the nature of a substitute offered by subcommittee Chairman RAHALL which made some changes from the introduced bill. The bill as reported represents a delicate balance of all interested parties with concerns about this issue. We must preserve that balance in order to achieve resolution of this issue this year. Though I would like to make it clear that I would still prefer my bill or the original H.R. 2121 as introduced, I support the bill we are considering today wholeheartedly. The reason is because it represents the best chance we have of achieving a long needed end to this festering problem.

I would like to comment on one section of the bill in particular. The amendment to section 9 of H.R. 2121 in the motion to suspend clarifies the committee's intention that H.R. 2121 does not affect the jurisdiction of the courts of the United States, including bankruptcy courts, to determine any matter regarding a bankrupt carrier, other than determinations statutorily required by H.R. 2121 to be resolved by the ICC. The obligation of the court or bankruptcy court to refer any of these determinations to the ICC in accordance with this statute is mandatory and not discretionary. The committee intends in section 9 that the courts in which the bankrupt carrier's estate is being adjudicated should continue to make all other determinations necessary to fully and finally wind up a bankrupt carrier's estate proceedings.

I will say to my colleagues that in all my years in Congress, I have not encountered a more inequitable situation as this one where honest, hardworking companies are being gouged by overzealous bankruptcy trustees through a simple loophole in the law. What

makes the inequity all the more abominable is the fact that the party extorting payments from innocent victims is the successor to the same party which violated the law in the first place. In recent suits, these carrier's representatives are even trying to disavow rates which were legally filed, but are alleged to have some sort of technical problem. The creativity of these trustees to extract money from innocent victims appears endless.

Today marks a historic step in the long journey to resolving this problem. The House of Representatives will finally speak on behalf of thousands of Americans held economic hostage. Let us take action and resolve this crisis once and for all by passing this legislation today.

I urge all of my colleagues to do the right thing for America and support this bill.

Mr. LIPINSKI. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I would like to start off by saying that I appreciate all the work, all the energy that the chairman, the gentleman from California [Mr. MINETA], the gentleman from Pennsylvania [Mr. SHUSTER], ranking member of the full committee, and the chairman of the subcommittee, the gentleman from West Virginia [Mr. RAHALL], and the ranking minority member of the subcommittee, the gentleman from Wisconsin [Mr. PETRI], have put into this piece of legislation.

Mr. Speaker, the gentleman from Pennsylvania [Mr. SHUSTER] mentioned that the figure is \$32 billion that is held in a great deal of dispute by people on my side of this issue. We maintain that the figure is closer to \$2 billion only. The gentleman from Pennsylvania [Mr. SHUSTER] also mentioned suing charity organizations and religious organizations. Fortunately, this piece of legislation would not allow that to happen. That was part of the bill that I introduced pertaining to this situation.

Mr. Speaker, I rise in strong opposition to H.R. 2121, the Negotiated Rates Act of 1993.

This bill was intended to be a compromise between the concerns of shippers and the former workers of bankrupt motor carriers. The supporters of H.R. 2121 maintain that it is a fair compromise, but I maintain that it is nothing of the sort.

Mr. Speaker, undercharges are the result of unfiled negotiated rates of a bankrupt carrier. Following the financial collapse and eventual bankruptcy of a trucking company, employees are forced to try to collect unpaid wages, pension benefits, and health and welfare contributions from the estates of their bankrupt employer.

Without undercharge settlements, these hardworking men and women will never get what is due to them.

The language in H.R. 2121 provides for settlement of undercharge claims

at rates varying from 20 to 5 cents on the dollar. However, section 2(e) of the bill wipes out the majority of undercharge claims.

The bill effectively eliminates 90 to 95 percent of all undercharge claims. This constitutes forgiveness of millions of dollars of liability owed by large Fortune 500 companies.

I believe that H.R. 2121 should be a real compromise which recognizes the legitimate interests of all parties. By eliminating the vast majority of claims, we reject the interests of employees and their pension and health and welfare funds whose only hope of collecting the money owed to them is the recovery of undercharges.

Mr. Speaker, I remind my colleagues that this is a critical labor vote. The International Brotherhood of Teamsters, Transportation Trades Department of the AFL-CIO and the entire AFL-CIO oppose H.R. 2121 because of its unfair treatment of the former trucking employees, many of whom are unemployed or have found jobs at lesser pay.

Mark my words, support of this legislation in its present form would be selling out the American worker.

Last week, along with some of my colleagues, I requested that this bill be removed from the Suspension Calendar. This is not an uncontroversial bill. It does not belong on this floor without the opportunity for amendments.

Mr. Speaker, I strongly urge my colleagues to defeat the motion to suspend the rules. American workers are counting on all of us in this Chamber. Let us not sell them short. Please oppose this bill.

Mr. Speaker, I reserve the balance of my time.

Mr. RAHALL. Mr. Speaker, I yield 2 minutes to the gentleman from Pennsylvania [Mr. BORSKI], the distinguished chairman of the Subcommittee on Investigations and Oversight of the Committee on Public Works and Transportation.

Mr. BORSKI. Mr. Speaker, I thank the gentleman for yielding time to me.

Mr. Speaker, I wish to express my support for H.R. 2121 as a reasonable and fair way to resolve the undercharges situation which has lasted for far too long.

It is time for Congress to take action to eliminate the cloud which has hung over virtually thousands of businesses that have contracted to ship goods in a good-faith manner.

After making these agreements in the normal business fashion, these businesses then find out they are liable for charges of much more than the amount to which they agreed.

H.R. 2121 establishes a procedure for resolving these claims and a set percentage that businesses can pay as a compromise. Small shipments would require a payment of 20 percent of the difference while large shipments would require 15 percent of the difference.

It is important to note that those settlements that have already been concluded cannot be reopened. Those claims that have been paid will stand as decided.

H.R. 2121 is truly a compromise to resolve a situation in which the shippers lost and the employees of the bankrupt trucking companies were losers as well. The only winners were those few lawyers who understood the very complicated rate filing and undercharge situation.

I commend the chairman, the gentleman from California [Mr. MINETA] and the chairman of the Subcommittee on Surface Transportation of the Committee on Public Works and Transportation, the gentleman from West Virginia [Mr. RAHALL], as well as the ranking member, the gentleman from Pennsylvania [Mr. SHUSTER], and the gentleman from Wisconsin [Mr. PETRI] for their work on this very complicated legislation. I urge passage of H.R. 2121 so the businesses of America will understand that Congress can act to resolve unfair and unjust situations.

The committee has developed a good bill that will help eliminate a \$32 billion problem facing the Nation's businesses and it deserves to be approved.

□ 1450

Mr. PETRI. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in strong support of this legislation, H.R. 2121, the Negotiated Rates Act of 1993.

This legislation will end a long and troubled chapter in transportation history. Today we will finally put an end to the freight undercharges crisis which has had a devastating effect on businesses, large and small, nonprofit organizations, and the American economy.

I want to thank my colleagues on the Public Works and Transportation Committee for their efforts to shepherd this bill through the committee and to the floor today. Chairman NORM MINETA, subcommittee chairman, NICK RAHALL, and ranking minority member BUD SHUSTER have all provided strong leadership to ensure that the Congress addressed this crisis responsibly this year. I would also like to thank the shipping community for their many years of hard work and effort to resolve this problem.

The bill before us will provide various alternatives for shippers to resolve undercharge claims brought against them by representatives of bankrupt motor carriers. Frankly, I would have preferred to see more generous relief offered to shippers along the lines of Congressman SHUSTER's bill, H.R. 1710, which I have also cosponsored. However, in the interest of compromise and of achieving a resolution, I am lending my full measure of support for H.R. 2121.

I would like to comment on one section of the bill in particular. The

amendment to section 9 of H.R. 2121 in the motion to suspend clarifies the committee's intention that H.R. 2121 does not affect the jurisdiction of the courts of the United States, including bankruptcy courts, to determine any matter regarding a bankrupt carrier, other than determinations statutorily required by H.R. 2121 to be resolved by the ICC. The obligation of the court or bankruptcy court to refer any of these determinations to the ICC in accordance with this statute is mandatory and not discretionary. The committee intends in section 9 that the court in which the bankrupt carrier's estate is being adjudicated should continue to make all other determinations necessary to fully and finally wind up a bankrupt carrier's estate proceedings.

We are all very familiar with the many undercharge horror stories that plague our American businesses. I am especially concerned about the impact this problem has had on small businesses, many of which have faced economic ruin as a result of these claims.

It is imperative that we take action now to relieve these businesses of a heavy burden. I urge all of my colleagues to vigorously support this bill.

Mr. Speaker, I reserve the balance of my time.

Mr. LIPINSKI. Mr. Speaker, I yield such time as he may consume to the gentleman from California [Mr. FILNER].

Mr. FILNER. Mr. Speaker, I thank the gentleman from Illinois for yielding me this time.

Mr. Speaker, I know that the supporters of this legislation, and the subcommittee chairman, and my full committee chairman have sought a fair and reasonable accommodation of the dispute over undercharge claims brought by trustees of bankrupt motor carriers. My own criteria for fairness would say that it must allow for some collection of undercharges so that the former employees of these bankrupt carriers can recover at least some of the back wages, severance, and vacation pay owed them, and unpaid contributions to pension and health and welfare plans. In most cases, undercharges are the only assets available to pay the debts owed to former employees and their pension funds.

Unfortunately, as currently drafted, H.R. 2121 has two critical defects. Most significant is that section 2(e) of the bill effectively eliminates all undercharge claims on shipments moving before September 30, 1990, thereby overruling the Supreme Court's *Maizlin* decision. Consequently, the bill will effectively deny recovery on thousands of claims filed in bankruptcy proceedings by former employees of motor carriers for underpaid wages, pensions, and related matters.

In addition, the bill's settlement percentages preclude the trustees of bankrupt motor carriers from recovering an

adequate portion of the disputed undercharge claims to pay employee-related claims. Large and wealthy shippers are afforded significant relief at the expense of working people.

Over the past dozen years, hundreds of thousands of good paying jobs in the trucking industry have been lost. It should be the goal of this Congress to assist these displaced workers only in securing meaningful and productive employment, but also in recovering the debts owed them for years of dedicated service.

I ask my colleagues to reject H.R. 2121, return the bill to committee for a truly fair and reasonable resolution of the undercharge problem.

Mr. RAHALL. Mr. Speaker, I yield 3 minutes to the gentleman from Alabama [Mr. CRAMER].

Mr. CRAMER. Mr. Speaker, I thank the distinguished chairman of the Subcommittee on Surface Transportation for yielding me this time. I rise in strong support of H.R. 2121, the Negotiated Rates Act, and I would like to commend Chairman MINETA and Chairman RAHALL and the distinguished ranking members of the committee for this bipartisan measure that does address the undercharge issue. This is an issue that has created great business uncertainty and economic inefficiency all across the country, and I think we are better off to move very quickly and expeditiously on this matter. And I congratulate the committee again for that.

We do not need to leave this matter to fester in the courts for years and years or to fester before the bankruptcy courts or to wait on the Interstate Commerce Commission to issue its ruling. The resolution of this problem is in the best interests of this country.

I would now like to engage the chairman of the Subcommittee on Surface Transportation in a colloquy.

Mr. RAHALL. Mr. Speaker, if the gentleman will yield, I am happy to engage in a colloquy with my friend, the gentleman from Alabama, who is a member of the Committee on Public Works and Transportation.

Mr. CRAMER. Mr. Speaker, it is my understanding that H.R. 2121 provides that shippers of recyclable materials, as defined in section 10733, will not be liable for the difference between a motor carrier's applicable and effective tariff rate and the rate originally billed and paid. Is that correct?

Mr. RAHALL. Yes, that is correct.

Mr. CRAMER. It is also my understanding that section 10733 defines recyclable materials as waste products for recycling or reuse in the furtherance of recognized pollution control programs and that examples of such material are metal, paper, plastic, glass, or textiles that are diverted, collected, stored, sorted, shredded, sheared, baled, chipped, separated, or

sized for use in making new products. Is this correct?

Mr. RAHALL. The gentleman is correct, that is the intent of the provisions of H.R. 2121 regarding recyclables.

Mr. CRAMER. I thank the chairman. That is quite a mouthful, but you have added great clarity to this.

Mr. PETRI. Mr. Speaker, I yield such time as he may consume to our distinguished colleague, the gentleman from Arkansas, Mr. TIM HUTCHINSON.

Mr. HUTCHINSON. Mr. Speaker, I thank the gentleman for yielding me this time.

Mr. Speaker, I rise today in support of H.R. 2121, which represents the culmination of months of bipartisan work on a controversial subject.

I have probably been contacted by more constituents in my district on this issue than on any other subject that has come before the Surface Transportation Subcommittee. I have heard phrases like patently unfair, a violation of signed agreements, to describe the situation these companies face as a result of the improper filings of bankrupt carriers.

I might also point out the majority of the companies receiving these back bills are small businesses. Some opportunistic collection agencies have seen the death of small carriers as a chance to produce considerable revenue at the expense of innocent shippers who relied in good faith on carrier representations as to their applicable rates. Because those rates were the prevailing rates in the marketplace and the same as those of viable and profitable carriers, there was no reason to question their validity.

Bankruptcy trustees have retained the collection agencies at no risk and at no cost, only to guarantee a percentage of what has been recovered. Collection agencies have filed tens of thousands of lawsuits alleging that shippers are liable for rates often twice as high as those the bankrupt carriers quoted, billed, and accepted as payment in full for their services.

The threat of undercharge claims is like a cancer in the transportation industry and discourages shippers from using common carriers in order to avoid potential liability. It also burdens the economy with millions of dollars in litigation costs.

If the money and energy now being absorbed by the defense of undercharge claims could be redirected into more productive channels, it would do much in itself to stimulate the economy, and moreover, would do so without any cost to the taxpayers.

Mr. Speaker, I am proud to be a co-sponsor of this legislation and I commend Chairmen MINETA and RAHALL, as well as Mr. SHUSTER and Mr. PETRI for their leadership on this measure. I encourage my colleagues to support H.R. 2121.

□ 1500

Mr. LIPINSKI. Mr. Speaker, I yield such time as he may consume to the gentleman from Minnesota [Mr. OBERSTAR], the second-ranking member of the Committee on Public Works and Transportation and the chairman of the Subcommittee on Aviation.

Mr. OBERSTAR. Mr. Speaker, I thank the gentleman for yielding me this time.

Mr. Speaker, the legislation before us is an attempt to resolve the very complex problem resulting from a practice that everyone recognizes is reprehensible, should never have been permitted, but which took place, caused by unfiled negotiated rates that resulted in undercharges.

Thousands of lawsuits have been filed around the country against shippers by the trustees of bankrupt carriers to recover those undercharges. This legislation attempts to deal with and untangle this very complex problem, and it does so very well from the standpoint of the shippers, from the standpoint of the big carriers, but it does not do very much, if anything at all, for the employees, the truck drivers. There is no way for them to recover back wages, severance and vacation pay, unpaid contributions to their pension and health and welfare plans.

That is my objection to this legislation.

Now, these undercharges were the result of shippers paying carriers rates below the legally required and filed tariff. Those rates were sharply discounted, an illegal practice, and that practice contributed in significant part to the instability of the industry and to the very large fallout of independent and even common-carrier trucking companies.

The bankruptcies have proliferated across this country, but when it came to filing claims, the shippers did very well. They filed claims and have been successful, but when the employees came to file claims for unpaid wages, unpaid health benefits, unpaid welfare contributions, which total in the millions of dollars, they were told to go to the back of the line; there is no provision for them. This legislation does not deal with that aspect of the trucking undercharge issue.

The legislation that the gentleman from Illinois has introduced does, in fact, deal with this problem, and I say very responsibly. The gentleman provides, in his legislation, H.R. 2020, for relief for the shippers of very significant amounts of liability. Bankrupt carriers can recover, but they will be able to recover enough money to enable them to pay the significant claims of former employees for their pension funds and their health and welfare and other benefits that I cited a moment ago.

We should not be enacting one-sided legislation that comes down in favor of

only one, or largely in favor of only one, class of interests. H.R. 2121 effectively eliminates any possibility of former employees of bankrupt carriers from recovering any portion of their claims in bankruptcy for back pay, severance, vacation, health and welfare and benefit claims.

I think we ought to scuttle this legislation, and we ought to come back with the legislation that the gentleman from Illinois has, I think, so very wisely and, I thought, very persuasively advocated in committee, and that would be legislation that I could very happily support.

I cannot support legislation that throws away the workers, that leaves them aside and does not give them a fair chance. We should not be a party to such consequences in legislation.

Mr. LIPINSKI. Mr. Speaker, I thank the gentleman very much for his remarks.

Mr. RAHALL. Mr. Speaker, I yield 3 minutes to the distinguished gentleman from Texas [Mr. LAUGHLIN].

Mr. LAUGHLIN. Mr. Speaker, I rise in support of H.R. 2121, and I certainly want to compliment the chairman of our committee, in fact, the entire leadership of my committee, for working so hard to resolve this complex problem that our committee has been faced with.

The chairman, the gentleman from California [Mr. MINETA], the ranking Republican on the committee, the gentleman from Pennsylvania [Mr. SHUSTER], the chairman of the subcommittee, the gentleman from West Virginia [Mr. RAHALL], and the ranking minority member, the gentleman from Wisconsin [Mr. PETRI], have given great leadership on this most unfortunate problem.

Debate on the freight undercharge issue has been going on for over 5 years. In fact, in the last 2 years, our committee has held 4 full days of hearings trying to find solutions to these complex problems.

Most businesses use for-hire freight carriers to ship their products, and it is a common practice for shippers and carriers to negotiate rates for freight transportation services.

Under current law, a carrier is responsible for filing the negotiated rate with the Interstate Commerce Commission. Unfortunately, some carriers failed to comply with the law by not filing the quoted rate, a fact often unknown to the shippers.

Over the past decade, many of these carriers have filed bankruptcy, and their States have filed claims for the difference between the quoted negotiated rate and the higher rate that the carrier had on file with the Interstate Commerce Commission.

To understand the position these businesses now find themselves in, imagine receiving a bill from an airline carrier who had gone into bankruptcy,

and you being billed for the difference between the discounted ticket that you had previously purchased and the full price that the airline carried on its books.

The potential liability to American business is estimated at more than \$32 billion, roughly \$133 for every man, woman, and child, or four times the cost of Operation Desert Shield-Desert Storm.

The Negotiated Rates Act of 1993 provides a fair and equitable approach to solving this crisis by providing procedures under which shippers can settle undercharged claims in an expeditious manner, and perhaps most importantly, it will minimize the legal and administrative costs that are siphoned away in the litigation of these claims in the courts and before the Interstate Commerce Commission.

I urge my colleagues to vote in support of H.R. 2121, and certainly appreciate the leadership given on this issue by the leaders of our committee.

Mr. PETRI. Mr. Speaker, I yield such time as he may consume to our distinguished colleague, the gentleman from North Dakota [Mr. POMEROY].

Mr. POMEROY. Mr. Speaker, I thank the gentleman for yielding me this time.

Mr. Speaker, this is simply a matter of common sense.

H.R. 2121, the Negotiated Rates Act of 1993, tries to make some sense out of bankruptcy proceedings which would seek to lay on small employers across this country liabilities for shipments they have long since concluded and forgotten about.

The very real impact of bankruptcy estate actions attempting to reach in this foul fashion into the pockets of these small employers would be to bankrupt the small employers. That does not advance any social purpose for unfunded workers' pensions or anything else.

Just look at some of these very real-life examples across the face of North Dakota: Hansen's Furniture, a small family owned furniture business, \$69,000 sought from a bankrupt estate out of North Carolina; Schroeder's Furniture, Langdon, ND; Ron Brown Furniture, Mandan, ND, \$13,000 unpaid obligation; Jerry's Furniture in Dickinson, ND, \$17,000; and a Toeiefson Furniture in Minot, \$5,500.

And so it continues. These are small businesses who are working in small towns on the thinnest of margins, and for them to have to face these obligations simply is not fair, and it is not within the reach of their ability to meet these charges.

I am concerned, very concerned, about workers with unpaid obligations from these now-defunct trucking operations, but knowing what I know about bankruptcy actions, I think it is a whole lot more likely that these unpaid charges are going to find their

way into the pockets of bankruptcy lawyers and not meeting the pension obligations of the workers that we are so concerned about.

□ 1510

So for these reasons and the very real interests of the small employers I have mentioned and thousands of others across this country, I ask for support of this resolution and enactment of this bill.

Mr. PETRI. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. LIPINSKI. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, there has been an awful lot of talk here about money going to attorneys, and I have some information here from two of the trustees that is supported by Teamster testimony and documentation before the subcommittee; also, an August 1993 GAO report.

The letters that I have are from the trustees of the two largest bankruptcies, Transcon and PIE, which show that, first, moneys have gone to pay employees' wages and pension claims; second, administrative and professional fees paid or to be paid are reasonable and entirely consistent with or better than the amounts typically paid in collection cases; third, future undercharge collections will unquestionably be used to make payments to former employees.

It is also clear that H.R. 2121 in its present form will result in the elimination of a large percentage of undercharge claims so that no payments to employees or their pension funds will be possible. As I say, these letters are supported by testimony of the Teamsters before the subcommittee and also the August 1993 GAO report on undercharges.

The GAO report shows, first, the legal and audit fees associated with undercharge collections are approximately 44 percent of the amount recovered. Given the amount of litigation and the risk of noncollection, these fees are not unreasonable. Clearly, the amount of such fees will be substantially reduced with the enactment of legislation which eliminates much of the uncertainty regarding these claims. That is in the GAO report, table 1.6.

In addition, trustees for PIE have indicated that audit and legal fees for his estate are currently at 27 percent and will likely not pass 30 percent by the time it is all over.

Second, undercharges represent a sizable portion of the distributions made to date. The table in the GAO report, 3.2, indicates that 32.1 percent of distribution to creditors is from undercharges. This percentage will drastically increase in the future because undercharges represent the only remaining assets in most bankruptcy claims.

Third, the total value of all undercharge claims sought is approximately \$1.2 billion. Approximately \$984 million of that amount is outstanding. GAO report table 1.1 and 1.2: While this certainly is a large figure, it is far, far, far below the \$32 billion that the ICC claims as being sought in undercharges.

I just thought I would like to try to clear up some of these legal expenses that have been talked about here on the floor.

The SPEAKER pro tempore (Mr. TAYLOR of Mississippi). The gentleman from West Virginia [Mr. RAHALL] has 9 minutes remaining, the gentleman from Illinois [Mr. LIPINSKI] has 7 minutes remaining, and the gentleman from Wisconsin [Mr. PETRI] has yielded back the balance of his time.

Mr. PETRI. Mr. Speaker, I ask unanimous consent if I may reclaim the balance of the time which I yielded. I have had additional requests for time.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

Mr. LIPINSKI. I object, Mr. Speaker. The SPEAKER pro tempore. Objection is heard.

Mr. LIPINSKI. Mr. Speaker, on the basis of the request of my full committee chairman, the gentleman from California [Mr. MINETA], I withdraw my objection.

The SPEAKER pro tempore. The gentleman from Illinois withdraws his objection.

Mr. PETRI. Mr. Speaker, I renew my request.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin to reclaim his time?

There was no objection.

The SPEAKER pro tempore. There being no objection to the request, the gentleman from Wisconsin [Mr. PETRI] has 10 minutes remaining.

Mr. RAHALL. Mr. Speaker, I yield 2 minutes to the gentleman from North Carolina [Mr. VALENTINE], a very valued member of our Committee on Public Works and Transportation.

Mr. VALENTINE. I thank the gentleman for yielding this time to me.

Mr. Speaker, I rise in support of H.R. 2121, the Negotiated Rates Act of 1993, and suggest to the membership that the situation that brought us in the Congress to a necessity to introduce this legislation indicates that what we should be about is the reform of the Bankruptcy Code in this country.

The freight undercharge crisis is having a chilling effect on thousands of small businesses who are unable to make investment decisions or expand their hiring until it is resolved.

H.R. 2121 provides a fair and equitable approach to solving this crisis by providing procedures under which shippers can settle undercharge claims in an expeditious manner. It would pro-

vide specified settlement procedures the company could use if they wanted to avoid protracted litigation and it would provide a new defense against these claims if they chose to contest them.

I urge my colleagues to support H.R. 2121. It is sorely needed.

Mr. PETRI. Mr. Speaker, I yield 2 minutes to my distinguished chairman, the gentleman from West Virginia [Mr. RAHALL].

Mr. RAHALL. I thank the gentleman for yielding this time to me.

Mr. Speaker, I would like to respond to a couple of concerns that were raised by the distinguished gentleman from Illinois [Mr. LIPINSKI] in his earlier statement. Let me commend the gentleman from Illinois for his concerns on this issue that are concerns we shared initially together, and I appreciate his valiant efforts. However, I would like to say to him that an issue he raised earlier on in his statement was one in which I said I had an original concern as well. However, based upon new information we received, I would like to state to my friend that section 2(e) of the bill would not wipe out, contrary to his concern, would not wipe out 90 to 95 percent of all undercharge claims as some have alleged.

Section 2(e) deals only with negotiated rate claims. It has nothing to do with the other types of undercharge claims. Only a minority of all undercharge claims are negotiated rate claims as opposed to coded rate claims or disputes over contract and common carriage.

Let me cite two examples: PIE and Transcon, which are the two largest bankrupt trucking companies and have initial undercharge claims that account for more than 40 percent of the total initial claim value of all bankrupt carriers.

Seventy-seven percent of PIE's claims relate to coded rates, not negotiated rates. That means more than three-fourths of PIE's claims are unaffected by section 2(e).

Only 30 percent of Transcon's claims relate to negotiated rates, not 90 percent. More broadly, ICC estimated that no more than 5 percent of all undercharge claims, not just those of PIE and Transcon, relate to negotiated rates. These data alone clearly show that section 2(e) would not wipe out 90 to 95 percent of all undercharge claims. Quite the contrary, section 2(e) would likely affect only a small minority of all claims.

There is another compelling reason why section 2(e) would have only minimal impact, and that is that this bill prohibits reopening claims that are already settled, a provision which I added to the substitute amendment in full committee, and those previously adjudicated claims are locked in, the average settlement has been around 30 percent. So this legislation assures

that they cannot be reopened under any cases except of course where fraud is shown. I appreciate the gentleman from Illinois' work and his concerns. I believe we have addressed them in my bill.

Mr. PETRI. Mr. Speaker, I yield 1 minute to the gentleman from Texas, Mr. PETE GEREN.

Mr. PETE GEREN of Texas. Mr. Speaker, I thank the gentleman for yielding this time to me.

Mr. Speaker, as a member of the Public Works and Transportation Committee and a cosponsor of H.R. 2121, I rise in strong support of this legislation and in opposition to the position taken by my good friend the gentleman from Illinois [Mr. LIPINSKI], and urge my colleagues to do the same.

The legislation before us represents a compromise that is due in large part to the untiring efforts of Chairman MINETA of the full Public Works and Transportation Committee, Chairman RAHALL of the Surface Transportation Subcommittee, and Mr. SHUSTER, the ranking member of the committee.

Mr. Speaker, the undercharge issue has been with us for far too long and it is about time that we take the necessary steps to bring about its end. This legislation represents a compromise that takes into account the interests of all parties concerned and establishes an equitable procedure for settling claims by bankrupt trucking companies or their creditors. Because this is a compromise, no party got everything they wanted. That is the nature of any compromise. But I am convinced that the compromise that was reached in this legislation is the best that we could ever expect given the controversy surrounding this issue.

Mr. Speaker, among its merits, this is a vote for small business.

I urge all of my colleagues to take this long overdue action and support this legislation.

□ 1520

Mr. LIPINSKI. Mr. Speaker, I yield 2 minutes to the gentleman from Pennsylvania [Mr. BLACKWELL], a member of the committee.

Mr. BLACKWELL. Mr. Speaker, I rise in opposition to H.R. 2121, the Negotiated Rates Act of 1993. The bill will deny former trucking company employees important benefits they have earned.

This bill seeks to eliminate hundreds of millions of dollars in liabilities owed to the estates of bankrupt trucking companies.

As a result, however, the claims that have been filed by former employees, including their pension, health and welfare funds will be eliminated as well.

Shippers of cargo, over time, violated long-standing requirements of the Interstate Commerce Act, by failing to pay filed tariff rates. Instead, pref-

erential rates were paid, often below the carriers' costs.

Because of this system, many carriers went bankrupt. Former employees of these companies are owed back pay, severance, vacation pay as well as pension, health and welfare funds.

None of these debts owed to the former employees will be paid under H.R. 2121, in its current form.

With so much at stake, Mr. Speaker, this bill should not be on the Suspension Calendar. More and careful thought should be given to its content.

This bill is unfair and should be defeated and returned to committee.

Mr. LIPINSKI. Mr. Speaker, I yield myself such time as I may consume.

I would like to comment on a few things that the gentleman from West Virginia [Mr. RAHALL] had to say. I appreciate the work the gentleman from West Virginia [Mr. RAHALL] has done on this bill. I know he has spent a tremendous amount of time on this bill and I know that he has agonized over this compromise greatly.

I simply would like to say that I do not know where the latest information that he received came from. I am sure the gentleman would be happy to supply me with that information. I do not know where it came from. I have great doubts about it at the present time.

If section 2(e) affects this piece of legislation in such a small way, I strongly suggest we just remove it from this legislation and this legislation would gain a great deal more support.

Also, this piece of legislation as it came out of the Senate does not have the section 2(e) in it. So if we were to remove section 2(e) in this bill, it would certainly be more in line with the Senate bill.

Mr. Speaker, we have all said this is an extremely difficult bill. There is no question about that, but because it is such an extremely difficult bill, No. 1, it should not be on the Suspension Calendar. There should be an opportunity for people to put forth amendments to this. There were amendments put forth in the full committee. They were defeated, but I honestly believe that they had a significant amount of support. Those amendments and perhaps some other amendments should be put forth on this House floor.

This is a bill that is opposed by the International Teamsters Union. It is a bill that is opposed by the entire AFL-CIO. It is a bill that is enormously important to labor.

Anyone who is going to vote "no" Tuesday on NAFTA should give great thought and consideration to voting "no" today on this bill, because this bill also affects the American working men and women very, very significantly.

So, Mr. Speaker, I ask my colleague to vote for the American men and women. Vote no on this suspension.

Mr. Speaker, I yield back the balance of my time.

Mr. PETRI. Mr. Speaker, I yield myself the balance of the time.

Mr. Speaker, just to conclude on this side, is H.R. 2121 a perfect bill? No, it is not. It does not represent a perfect piece of effort, but is it better than doing nothing, and the answer is clearly yes. It would be good for small business. It will end a lot of uncertainty. It will save a lot of money that would otherwise be wasted on legal fees and be of benefit to our country.

Therefore, I would strongly urge my colleagues to support this legislation when we vote it later this afternoon.

Mr. Speaker, I yield back the balance of my time.

Mr. RAHALL. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, again I salute our full committee chairman, the gentleman from California [Mr. MINETA], for his patience and fairness in working with me on this legislation. Because of his willingness, we have addressed a number of concerns that affect the working men and women of our country, including their wages and pension benefits.

Mr. Speaker, I yield the balance of my time to our distinguished chairman of the full committee, the gentleman from California [Mr. MINETA].

The SPEAKER pro tempore. The gentleman from California [Mr. MINETA] is recognized for 7 minutes.

Mr. MINETA. Mr. Speaker, first of all, let me say that I rise in strong support of H.R. 2121. I wish to thank the ranking Republican member, the gentleman from Pennsylvania [Mr. SHUSTER], the gentleman from West Virginia [Mr. RAHALL], and the gentleman from Wisconsin [Mr. PETRI] for their work and effort on this bill.

I would also like to thank the gentleman from Illinois [Mr. LIPINSKI] for his efforts in terms of improving the work product that we have.

Mr. Speaker, there are businesses all over America, large and small, which have been put under a financial and legal cloud in the past few years by claims made against them by defunct trucking companies. The story is often the same: The trucking company negotiated a shipping rate with the business, they reached agreement, and the shipping services were performed and paid for as agreed. However, the trucking company then did not file the negotiated rate with the ICC as required by law. Months or years later, the trucking company went into bankruptcy and ceased operation, and trustees operating on behalf of the trucking company brought claims against the shipping business, on the grounds that because the trucking company had never filed the agreed to rate it was not valid. In those claims they demanded the difference between the agreed to rate and whatever rate was on file.

In the case of small businesses, or of any business which relied routinely on

a particular trucking company to ship its products and materials, the undercharge claims made against them often threatened them with ruin. And in fact businesses have failed, closed their doors, and turned their employees out in the streets because they simply did not have the means to pay either these claims or the high costs of defending against them through protracted litigation.

This intolerable situation is creating a heavy drag on our Nation's economy. Current estimates of the total amount of undercharge claims range from \$2 to \$32 billion. Literally thousands of business and charitable organizations have these claims pending against them, and many more fear they will become targets of undercharge claims. Their ability to make decisions to invest in their own companies, and to expand their hiring, is often wiped out while they try to figure out whether and how to pay the claims or pay the high litigation costs of resisting those claims. They are trapped either way. And they are angry that they have been put in this impossible situation.

They had a valid agreement for the shipping services and the rate, mutually agreed to.

They lived up to their obligations under the agreement.

The trucking company had the legal obligation to file the rate once it had been agreed to.

The hard fact here is that through the trustee, the trucking company is in effect attempting to profit by reneging on its own rate agreement and by its failure to file the rate it agreed to. That is not behavior anyone should profit from, and shipping companies all over America have been justifiably outraged by it.

The risk has fallen to us to resolve the undercharge crisis and to do it in a way that is fair and allows America's businesses to resolve this issue, get it behind them with as little additional legal expense as possible, and get on with the business of investing in their companies, of becoming more competitive, and of spending their money on new hiring rather than on endless legal fees.

H.R. 2121 is the product of that effort. I want to commend the members of our committee for their efforts to sort out this difficult issue. We held our first hearing on this issue in 1990, and we have been at work on it ever since. I particularly want to commend the subcommittee chairman, NICK RAHALL, for the extra effort he has made to assure that this is a fair and equitable settlement of a difficult issue. The substitute amendment he crafted and which was adopted in subcommittee definitely accomplished that goal. We in fact now have a product which enjoys very broad support, including the support of the administration, and the shipper groups, and all the major

trucking industry organizations. Not surprisingly, the bill is now cosponsored by over 230 Members of the House.

The bill provides several different options by which these undercharge claims can be resolved.

First, it provides a settlement option of 15 or 20 percent depending on the type of shipment involved, or of 5 percent in the case of warehousemen. It further waives all claims in the case of small businesses, charitable organizations, and recyclers. Shippers may take the settlement option when they believe it to be the most expeditious and practical way to end the costly litigation in which they are now trapped.

Second, it provides shippers with the unreasonable practice defense which the ICC and five circuit courts told them they had, before the Maislin case in 1990 reversed the legal situation. This defense is only offered with respect to a transportation service provided prior to September 1990, and only with respect to negotiated rate cases. This option allows shippers to argue the unreasonable practice issue directly to the ICC in order to achieve a resolution of the case.

Third, the bill provides that potential disputes may be settled through mutual consent and that such settlement resolves any legal liability arising from the case. In some instances this will encourage voluntary settlements.

Fourth, the parties may continue on their costly litigation, as at present. It is our hope, however, that given the more expeditious and lower cost alternatives we have provided, most parties will elect one of these alternatives.

And fifth, the bill clarifies the legality and future requirements with regard to certain other fare practices—such as range rates, contract rates, and coded rates—so that these practices are not allowed to fester as an enormous source of contention as negotiated rates have.

We in the committee have paid special attention to the question of how much of these undercharge claims are ever made available to creditors and, in particular, how much is ever made available to former employees. Some have argued that payment of more claims, or higher settlements of those claims, even though burdensome on shipping companies, would be appropriate so that the additional funds would go to creditors in general and former trucking company employees in particular. Unfortunately, what we have found is that little of what is claimed in these cases goes to creditors, even less goes to former employees, and the only ones who seem to prosper from these claims are the bankruptcy lawyers, trustees, administrators, and others who live off the bankruptcy process.

The fact is, most of the money from claims already settled has gone to law-

yers and trustees for legal, collection, and administrative expenses. These types of expenses rank much higher under bankruptcy law in the priority system of estate liability distribution than do wages and pensions of former employees. In the largest cases to date, former employees can expect at most only 2 to 3 cents on each dollar claimed. Legal, collection, and administrative expenses have received far more of the funds than all former employees put together.

It is a cruel hoax by the trustees who mislead former employees into thinking that if only they could get shippers all over America to pay out enormous amounts in claim settlements, more money would come their way for wage and pension distributions. It is this dismal system of extremely paltry distributions to former employees which the bankruptcy trustees would now like to see us preserve to the fullest extent possible, claiming that doing so would be for the good of the employees.

Everyone here, myself included, would like creditors to receive more of what they are owed. We would especially like to see former employees of the bankrupt receive more of what they are owed.

But if you want to put more money into the hands of former employees, channeling more money through undercharge litigation is the worst possible way to do it.

Instead, the bankruptcy process should be reformed to give higher priority to payout to former employees. The bankruptcy process should be streamlined by emphasizing incentives for settlement so that far less of the available funds goes to those who live off the process and more goes to creditors, including former employees.

Trustees, bankruptcy lawyers, and others would not support these changes. But those are the kinds of changes that would make a real difference to the former employees.

Allowing more undercharge claims to be made against more shippers would enrich trustees, lawyers, and those who live off the bankruptcy process, would do very little for the former employees of the bankrupt companies, and would harm thousands of companies whose growth prospects and employees would suffer.

We should keep in mind that a process which loads billions of dollars of claims, legal expenses, and uncertainty on employers all over America, putting their own futures and the futures of their employees at risk, all in return for a couple of cents on the dollar for another group of employees, has harmed more employees than it has helped.

Finally, Mr. Speaker, I would note that we have made a few technical and clarifying amendments to the bill today. Among them, we are clarifying in section 9 of the bill that we do not

intend in this legislation to affect either the bankruptcy code or the jurisdiction of the bankruptcy courts, matters over which our committee does not have jurisdiction. At present, when a carrier is in bankruptcy, and when in the course of the bankruptcy proceeding an issue arises over which the ICC has particular expertise, the court typically refers that issue to the ICC pursuant to the doctrine of primary jurisdiction. The ICC decides that particular issue, and the ICC's decision is then incorporated by the court into the overall adjudication of the bankruptcy case. Nothing in this legislation would alter the current statutory framework which established the respective jurisdictions of the courts and the ICC.

In conclusion, H.R. 2121 represents a fair solution to a sorry saga in our Nation's trucking industry. It will end the wasteful litigation and dissipation of assets resulting from the charges and countercharges erupting in our business community. The controversy has been with us too long; it has cost too much, and it needs to be resolved now.

It is time to lift this burden of unnecessary cost, inefficiency, and regulatory turmoil from the backs of our businesses and their workers. Everyone involved will be better off if we can quickly and equitably resolve this dispute, rather than let it fester for years in Federal courts, bankruptcy courts, and before the ICC.

America's resources should be spent on growth and on investments in productivity and competitiveness, not on suing each other into the Stone Age. I urge my colleagues to support H.R. 2121 and to help bring this wasteful madness to an end.

COMMITTEE ON THE JUDICIARY,
Washington, DC, November 15, 1993.

Hon. NORMAN Y. MINETA,
Chairman, Committee on Public Works and Transportation, Rayburn House Office Building, Washington, DC.

DEAR MR. CHAIRMAN: On November 9, 1993, the Committee on Public Works and Transportation ordered reported H.R. 2121, the "Negotiated Rates Act of 1993."

As you know under Rule X of the House of Representatives, our Committee has jurisdiction over "bankruptcy" and "Federal Courts" [see Rule X, Clause 1(1)(3) & (6)]. Based on this jurisdiction, we are concerned that H.R. 2121, as currently drafted, could be construed to limit or otherwise affect application of Title 28, United States Code, relating to the jurisdiction of the courts of the United States (including bankruptcy courts). On the basis of these concerns and others, our Committee has requested sequential referral of the bill.

However, it is my understanding that as a result of staff discussions on this issue, amended language will be included in the version of H.R. 2121 to be called-up on suspension that will make it clear that nothing in the bill shall be construed as limiting or otherwise affecting application of Title 28, United States Code, relating to the jurisdiction of the courts of the United States (including bankruptcy courts).

Based on these assurances, such a change in statutory language would also create cir-

cumstances whereby the Judiciary Committee would withdraw its request for a sequential referral. This particular waiver, however, should not be construed as a relinquishment of our Committee's claim to jurisdiction on matters of this nature. We would also expect to have Members of our Committee named as Members of the Conference Committee on the legislation (on any matters within our jurisdiction).

Lastly, I would request inclusion of our exchange of correspondence on this matter in the Record during House consideration of H.R. 2121, and in any report by the Committee on Public Works and Transportation on H.R. 2121.

Sincerely,

JACK BROOKS,
Chairman.

COMMITTEE ON PUBLIC WORKS
AND TRANSPORTATION,
Washington DC, November 15, 1993.

Hon. JACK BROOKS,
Chairman, Committee on the Judiciary, Rayburn House Office Building, Washington, DC.

DEAR MR. CHAIRMAN: Thank you for your letter on H.R. 2121, the "Negotiated Rates Act of 1993."

Because of your Committee's jurisdiction over Federal courts and bankruptcy, I recognize your right to request a sequential referral of H.R. 2121. However, and in accordance with your letter, I am pleased that we were able to agree on language clarifying that we do not intend in this legislation to affect either the Bankruptcy Code or the jurisdiction of the bankruptcy courts. Based on our agreement, it is my understanding that you will not pursue your request for a sequential referral.

I further recognize that in pursuing the referral, your action will in no way be construed as a waiver of any jurisdiction your Committee has relating to this issue. I will gladly include our exchange of correspondence on this matter in the Record during House consideration of H.R. 2121 and in any report by the Committee on Public Works and Transportation on H.R. 2121.

Sincerely yours,

NORMAN Y. MINETA,
Chairman.

Mr. BROOKS. Mr. Speaker, as Mr. MINETA has noted, the Committee on the Judiciary had earlier expressed concern that H.R. 2121, the Negotiated Rates Act of 1993, as ordered reported by the Committee on Public Works and Transportation, could have been construed to limit the jurisdiction of the Federal courts, including the bankruptcy courts. However, pursuant to an understanding between the Committee on the Judiciary and the Committee on Public Works and Transportation, Mr. MINETA has offered an amendment to section 9 of H.R. 2121 clarifying that nothing in the proposed act shall be construed to limit or otherwise affect the jurisdiction of the Federal courts to make determinations in bankruptcy cases and proceedings.

Under current law, the Federal courts (and the bankruptcy courts) have broad jurisdiction to make determinations in cases filed under the Bankruptcy Code. See, for example, 28 U.S.C. 157 and 1334, and Bankruptcy Rule 9019. Moreover, with regard to undercharge claims filed by bankrupt motor carriers, specific recognition has been given to the broad jurisdiction of the courts. *White v. United States*, 989 F.2d 643 (3d Cir. 1993). Despite

their broad jurisdictional authority, where time permits and pursuant to the doctrine of primary jurisdiction, the Federal courts may choose to defer to the expertise of the Interstate Commerce Commission [ICC] with respect to specific issues. See *Reiter v. Cooper*, 113 S. Ct. 1213 (1993). Once the ICC has considered the matter, the applicable Federal court, may choose to incorporate some or all of the ICC's findings into the overall adjudication of the bankruptcy case.

The current procedure permits the Federal courts to assure the timely and fair administration and adjudication of bankruptcy cases. Pursuant to changed language of section 9 of the act from the language reported from the Public Works Committee, the Federal courts including the bankruptcy courts, will continue to have jurisdiction to make determinations in connection with motor carrier undercharge claims and related issues where the motor carrier has sought the protection of the Bankruptcy Code. As a result of this provision, in the event of a bankruptcy filing, reference in the act to resolution by, determinations by, and review and approval by the Commission shall be subject to the original jurisdiction of the Federal courts pursuant to 28 U.S.C. 157 and 1334.

Mr. BALLENGER. Mr. Speaker, I rise in support of the Negotiated Rates Act of 1993 (H.R. 2121).

On June 10, I became a cosponsor of H.R. 2121, which would amend title 49 of the United States Code relating to procedures for resolving claims involving unfilled and negotiated transportation rates. I strongly support this legislation and would like to publicly thank Chairman NORMAN MINETA for introducing this important legislation and for ushering it through the Public Works and Transportation Committee.

When I was elected to Congress in 1986, I stepped aside as president of my family's manufacturing company in Hickory, NC, and relinquished all control of day-to-day activities; however, I have remained on as chairman of the board of directors. Some time ago, I was informed that my company, like many across the country, has \$18,000 in undercharge claims pending against it. This figure has since increased to \$81,000. Without enactment of legislation to correct this abuse, we had no choice but to seek legal counsel.

During the 102d Congress, long before I had any knowledge of my own company's predicament, this matter was brought to my attention. I agreed then that an inequity existed that needed to be addressed, and cosponsored legislation (H.R. 3243) to fix this problem. However, opposition from the labor unions essentially killed any chances of this bill being considered. Similar legislation, the Negotiated Rates Equity Act of 1991 (S. 1675), died at the end of the last session. It has been reported that the Interstate Commerce Commission [ICC] estimates the total freight undercharge claims against companies like mine to be \$27 billion.

I urge my colleagues to pass H.R. 2121 and end this unnecessary attack on American business.

Mr. KYL. Mr. Speaker, as a cosponsor of H.R. 2121, the Negotiated Rates Act, I rise in support of this bill.

Mr. Speaker, this legislation finally resolves a problem that has gone unresolved for far too long, threatening many small businesses with economic calamity.

Small businesses, and some large businesses too, had negotiated in good faith, in some cases many years ago, for discounted rates with trucking companies. Small businesses in Arizona, like Copperstate Automotive Products, Pruitt's Fine Home Furnishings, Sun Control Tile, Bea's Lamps, and Interstate Lumber to name just a few, negotiated special rates, received the agreed-upon services, and faithfully paid their bills—in full and on time.

The problem? Before filing those negotiated rates with the Interstate Commerce Commission [ICC], some trucking companies went bankrupt. And in 1990, the U.S. Supreme Court, in the case of *Maislin v. Primary Steel, Inc.*, ruled that, although unfair, current law allows the bankrupt carriers to collect, from their former customers, the difference between the negotiated rate and the ICC-filed trucking rate.

For many small businesses, the undercharge claims are significant. Some will have difficulty paying the additional fees without risking bankruptcy themselves. Others may choose to litigate. But, in either event, they are faced with charges in excess of those mutually agreed upon prior to services being rendered—and long after the original bills had been paid.

Frankly, I do not believe any additional liability, above and beyond the original negotiated rates, should be imposed on shippers who now find themselves caught in the middle. But, many small businessmen and women have nevertheless urged support for this bill as a compromise; as the best chance of resolving this problem in the near term.

The Negotiated Rates Act provides a mechanism to resolve such undercharge claims. On shipments of 10,000 pounds or less, a person can elect to satisfy the claim by paying 15 percent of the difference between the filed and the negotiated rates. For shipments over 10,000 pounds, the rate is 10 percent. And, for small businesses and charitable organizations, the rate is 5 percent.

Mr. Speaker, I urge my colleagues to do what is right and fair and support this legislation so that the President can sign it before the year is out.

□ 1530

The SPEAKER pro tempore (Mr. MONTGOMERY). All time has expired.

The question is on the motion offered by the gentleman from West Virginia [Mr. RAHALL] that the House suspend the rules and pass the bill, H.R. 2121, as amended.

The question was taken.

Mr. LIPINSKI. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Pursuant to clause 5, rule I, and the Chair's prior announcement, further proceedings on this motion will be postponed.

The point of no quorum is considered withdrawn.

SCHOOL-TO-WORK OPPORTUNITIES ACT OF 1993

Mr. FORD of Michigan. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 2884) to establish a national framework for the development of school-to-work opportunities systems in all States, and for other purposes, as amended.

The Clerk read as follows:

H.R. 2884

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE; TABLE OF CONTENTS.

(a) SHORT TITLE.—This Act may be cited as the "School-to-Work Opportunities Act of 1993".

(b) TABLE OF CONTENTS.—The table of contents is as follows:

- Sec. 1. Short title; table of contents.
- Sec. 2. Findings.
- Sec. 3. Purposes and congressional intent.
- Sec. 4. Definitions.
- Sec. 5. Federal administration.
- Sec. 6. Authorization of appropriations.

TITLE I—SCHOOL-TO-WORK OPPORTUNITIES BASIC PROGRAM COMPONENTS

- Sec. 101. General program requirements.
- Sec. 102. Work-based learning component.
- Sec. 103. School-based learning component.
- Sec. 104. Connecting activities component.

TITLE II—SCHOOL-TO-WORK OPPORTUNITIES SYSTEM DEVELOPMENT AND IMPLEMENTATION GRANTS TO STATES

Subtitle A—State Development Grants

- Sec. 201. Purpose.
- Sec. 202. Authorization.
- Sec. 203. Application.
- Sec. 204. Use of amounts.
- Sec. 205. Allocation requirement.
- Sec. 206. Reports.

Subtitle B—State Implementation Grants

- Sec. 211. Purpose.
- Sec. 212. Authorization.
- Sec. 213. Application.
- Sec. 214. Review of application.
- Sec. 215. Use of amounts.
- Sec. 216. Allocation requirement.
- Sec. 217. Administrative costs.
- Sec. 218. Reports.

Subtitle C—Development and Implementation Grants for School-to-Work Programs for Indian Youths

- Sec. 221. Authorization.
- Sec. 222. Requirements.

TITLE III—FEDERAL IMPLEMENTATION GRANTS TO LOCAL PARTNERSHIPS

- Sec. 301. Purposes.
- Sec. 302. Authorization.
- Sec. 303. Application.
- Sec. 304. Use of amounts.
- Sec. 305. Conformity with approved State plan.
- Sec. 306. Reports.
- Sec. 307. High poverty area defined.

TITLE IV—NATIONAL PROGRAMS AND REPORTS

- Sec. 401. Research, demonstration, and other projects.
- Sec. 402. Performance outcomes and evaluation.
- Sec. 403. Training and technical assistance.
- Sec. 404. Amendment to Job Training Partnership Act to provide school-to-work opportunities activities for Capacity Building and Information and Dissemination Network.
- Sec. 405. Reports to Congress.

TITLE V—WAIVER OF STATUTORY AND REGULATORY REQUIREMENTS

- Sec. 501. State and local partnership requests and responsibilities for waivers.
- Sec. 502. Waiver authority of Secretary of Education.
- Sec. 503. Waiver authority of Secretary of Labor.
- Sec. 504. Combination of Federal funds for high poverty schools.

TITLE VI—SAFEGUARDS

- Sec. 601. Safeguards.

TITLE VII—REAUTHORIZATION OF JOB TRAINING FOR THE HOMELESS DEMONSTRATION PROGRAM UNDER THE STEWART B. MCKINNEY HOMELESS ASSISTANCE ACT

- Sec. 701. Reauthorization.

SEC. 2. FINDINGS.

The Congress finds that—

(1) three-fourths of all high school students in the United States enter the workforce without baccalaureate degrees, and many do not possess the academic and entry-level occupational skills necessary to succeed in the changing workplace;

(2) a substantial number of youths in the United States, especially disadvantaged students, students of diverse racial, ethnic, and cultural backgrounds, and students with disabilities, do not complete school;

(3) unemployment among youths in the United States is intolerably high, and earnings of high school graduates have been falling relative to those individuals with more education;

(4) the workplace in the United States is changing in response to heightened international competition and new technologies, and these forces, which are ultimately beneficial to the Nation, are shrinking the demand for and undermining the earning power of unskilled labor;

(5) the United States lacks a comprehensive and coherent system to help its youths acquire knowledge, skills, abilities, and information about and access to the labor market necessary to make an effective transition from school to career-oriented work or to further education and training;

(6) students in the United States can achieve high academic and occupational standards, and many learn better and retain more when they learn in context, rather than in the abstract;

(7) while many students in the United States have part-time jobs, there is infrequent linkage between those work experiences and either the student's career planning or exploration, or with school-based learning;

(8) work-based learning, which is modeled after the time-honored apprenticeship concept, integrates theoretical instruction with structured on-the-job training, and this approach, combined with school-based learning, can be very effective in engaging student interest, enhancing skill acquisition, developing positive work attitudes, and preparing youths for high-skill, high-wage careers;

(9) Federal resources currently fund a series of categorical, work-related education and training programs, many of which serve disadvantaged youths, that are not administered in a coordinated manner; and

(10) in 1992 approximately 3,400,000 individuals in the United States ages 16 through 24 had not completed high school and were not currently enrolled in school, a number representing approximately 11 percent of all individuals in this age group, which indicates

that these young persons are particularly unprepared for the demands of a 21st century workforce.

SEC. 3. PURPOSES AND CONGRESSIONAL INTENT.

(a) PURPOSES.—The purposes of this Act are to—

(1) establish a national framework within which all States can create statewide School-to-Work Opportunities systems that are a part of comprehensive education reform, that are integrated with the systems developed under the Goals 2000: Educate America Act, and that offer opportunities for all students to participate in a performance-based education and training program that will enable them to earn portable credentials, prepare them for a first job in a high-skill, high-wage career, and increase their opportunities for further education;

(2) utilize workplaces as active learning components in the educational process by making employers joint partners with educators in providing opportunities for all students to participate in high-quality, work-based learning experiences;

(3) use Federal funds as venture capital, to underwrite the initial costs of planning and establishing statewide School-to-Work Opportunities systems that will be maintained with other Federal, State, and local resources;

(4) promote the formation of partnerships that are dedicated to linking the worlds of school and work among secondary and postsecondary educational institutions, private and public employers, organized labor, government, community-based organizations, parents, students, and local education and training agencies;

(5) promote the formation of partnerships between elementary, middle, and secondary schools and local businesses as an investment in future workplace productivity and competitiveness;

(6) help all students attain high academic and occupational standards;

(7) build on and advance a range of promising school-to-work programs, such as tech-prep education, career academies, school-to-apprenticeship programs, cooperative education, youth apprenticeship, business-education compacts, and promising strategies that assist school dropouts that can be developed into programs funded under this Act;

(8) improve the knowledge and skills of youths by integrating academic and occupational learning, integrating school-based and work-based learning, and building effective linkages between secondary and postsecondary education;

(9) motivate all youths, including low-achieving youths, school dropouts, and youths with disabilities to stay in or return to school or a classroom setting and strive to succeed by providing enriched learning experiences and assistance in obtaining high skill, high wage employment and continuing their education in secondary and postsecondary educational institutions;

(10) expose students to the vast array of career opportunities and facilitate the selection of career majors based on individual interests, goals, strengths, and abilities;

(11) increase opportunities for minorities and women by enabling individuals to prepare for careers which are not traditional for their race or gender; and

(12) further the National Education Goals set forth in title I of the Goals 2000: Educate America Act.

(b) CONGRESSIONAL INTENT.—It is the intent of the Congress that the Secretary of Labor and the Secretary of Education jointly administer this Act in a flexible manner that—

(1) promotes State and local discretion in establishing and implementing School-to-Work Opportunities systems and programs; and

(2) contributes to reinventing government by building on State and local capacity, eliminating duplication, supporting locally established initiatives, requiring measurable goals for performance, and offering flexibility in meeting these goals.

SEC. 4. DEFINITIONS.

For purposes of this Act, the following definitions apply:

(1) ALL STUDENTS.—The term "all students" means male and female students from a broad range of backgrounds and circumstances, including disadvantaged students, students with diverse racial, ethnic, and cultural backgrounds, American Indians, Alaskan Natives, Native Hawaiians, students with disabilities, students with limited English proficiency, migrant children, school dropouts, and academically talented students.

(2) APPROVED STATE PLAN.—The term "approved State plan" or "approved plan" means a State plan to establish a School-to-Work Opportunities system that is submitted by a State to the Secretaries under section 213 and approved by the Secretaries in accordance with section 214.

(3) CAREER GUIDANCE AND COUNSELING.—The term "career guidance and counseling" means programs—

(A) which pertain to the body of subject matter and related techniques and methods organized for the development in individuals of career awareness, career planning, career decisionmaking, placement skills, and knowledge and understanding of local, State, and national occupational, educational, and labor market needs, trends, and opportunities;

(B) which assist individuals in making and implementing informed educational and occupational choices; and

(C) which aid students to develop career options with attention to surmounting gender, race, ethnic, disability, language, or socioeconomic impediments to career options and encouraging careers in nontraditional occupations.

(4) CAREER MAJOR.—The term "career major" means a coherent sequence of courses or field of study that prepares a student for a first job and that—

(A) integrates occupational and academic learning, integrates work-based and school-based learning, and establishes linkages between secondary and postsecondary education;

(B) prepares the student for employment in broad occupational clusters or industry sectors;

(C) typically includes at least 2 years of secondary school and 1 or 2 years of postsecondary education;

(D) results in the award of a high school diploma, a General Equivalency Diploma, or alternative diploma or certificate for those students with disabilities for whom such alternative diploma or certificate is appropriate, a certificate or diploma recognizing successful completion of 1 or 2 years of postsecondary education (if appropriate), and a skill certificate; and

(E) may lead to further training, such as entry into a registered apprenticeship program, or admission into a degree-granting college or university.

(5) COMMUNITY-BASED ORGANIZATIONS.—The term "community-based organizations" has the meaning given such term in section 4(5)

of the Job Training Partnership Act (29 U.S.C. 1503(5)).

(6) ELEMENTS OF AN INDUSTRY.—The term "elements of an industry" means, with respect to a particular industry that a student is preparing to enter, such elements as planning, management, finances, technical and production skills, underlying principles of technology, labor and community issues, health and safety, and environmental issues related to that industry.

(7) EMPLOYER.—The term "employer" includes both public and private employers.

(8) GOVERNOR.—The term "Governor" means the chief executive of a State.

(9) LOCAL EDUCATIONAL AGENCY.—The term "local educational agency" means a public board of education or other public authority legally constituted within a State for either administrative control or direction of, or to perform a service function for, public elementary or secondary schools in a city, county, township, school district, or other political subdivision of a State, or such combination of school districts or counties as are recognized in a State as an administrative agency for its public elementary or secondary schools. Such term includes any other public institution or agency having administrative control and direction of a public elementary or secondary school.

(10) LOCAL PARTNERSHIP.—The term "local partnership" means a local entity that is responsible for local School-to-Work Opportunities programs and that—

(A) consists of employers, representatives of local educational agencies and local postsecondary educational institutions (including representatives of area vocational education schools, where applicable), local educators (such as teachers, counselors, or administrators), representatives of organized labor, other representatives of non-managerial employees, and students; and

(B) may include other entities, such as—

- (i) employer organizations;
- (ii) community-based organizations;
- (iii) national trade associations working at the local levels;
- (iv) industrial extension centers;
- (v) rehabilitation agencies and organizations;
- (vi) registered apprenticeship agencies;
- (vii) local vocational education entities;
- (viii) proprietary institutions of higher education (as defined in section 481(b) of the Higher Education Act of 1965, (20 U.S.C. 1088(b)) which continue to meet the eligibility and certification requirements under section 498 of such Act;
- (ix) local government agencies;
- (x) parent organizations;
- (xi) teacher organizations;
- (xii) vocational student organizations;
- (xiii) private industry councils established under section 102 of the Job Training Partnership Act (29 U.S.C. 1512);
- (xiv) federally recognized Indian tribes, Indian organizations, and Alaska Native villages; and
- (xv) Native Hawaiians.

(11) POSTSECONDARY EDUCATIONAL INSTITUTION.—The term "postsecondary education institution" means an institution of higher education (as such term is defined in section 481 of the Higher Education Act of 1965 (20 U.S.C. 1088)) which continues to meet the eligibility and certification requirements under section 498 of such Act.

(12) REGISTERED APPRENTICESHIP AGENCY.—The term "registered apprenticeship agency" means either—

(A) the Bureau of Apprenticeship and Training in the Department of Labor; or

(B) a State or local agency designated by the Secretary of Labor and the Secretary of Education under section 498 of such Act.

(13) REGISTERED APPRENTICESHIP AGENCY.—The term "registered apprenticeship agency" means either—

(A) the Bureau of Apprenticeship and Training in the Department of Labor; or

(B) a State apprenticeship agency recognized and approved by the Bureau of Apprenticeship and Training as the appropriate body for State registration or approval of local apprenticeship programs and agreements for Federal purposes.

(13) REGISTERED APPRENTICESHIP PROGRAM.—The term "registered apprenticeship program" means a program registered by a registered apprenticeship agency.

(14) RELATED SERVICES.—The term "related services" includes the types of services described in section 602(17) of the Individuals with Disabilities Education Act (20 U.S.C. 1401(17)).

(15) SCHOOL DROPOUT.—The term "school dropout" means an individual who is no longer attending any school, is subject to a compulsory attendance law, and who has not received a secondary school diploma or a certificate from a program of equivalency for such a diploma.

(16) SCHOOL SITE MENTOR.—The term "school site mentor" means a professional employed at the school who is designated as the advocate for a particular student, and who works in consultation with classroom teachers, counselors, and the employer to design and monitor the progress of the student's school-to-work program.

(17) SECRETARIES.—The term "Secretaries" means the Secretary of Education and the Secretary of Labor.

(18) SKILL CERTIFICATE.—The term "skill certificate" means a portable, industry-recognized credential issued by a School-to-Work Opportunities program under an approved plan, that certifies that a student has mastered skills at levels that are at least as challenging as skill standards endorsed by the National Skill Standards Board established under the Goals 2000: Educate America Act, except that until such skill standards are developed, the term "skill certificate" means a credential issued under a process described in a State's approved plan.

(19) STATE.—

(A) IN GENERAL.—Except as provided in subparagraph (B), the term "State" means each of the several States, the District of Columbia, and the Commonwealth of Puerto Rico.

(B) TITLES IV AND V.—For purposes of titles IV and V, the term "State" means each of the several States, the District of Columbia, the Commonwealth of Puerto Rico, the Commonwealth of the Northern Mariana Islands, American Samoa, Guam, the Virgin Islands, the Federated States of Micronesia, the Republic of the Marshall Islands, and Palau.

(20) STATE EDUCATIONAL AGENCY.—The term "State educational agency" means the officer or agency primarily responsible for the State supervision of public elementary and secondary schools.

(21) WORKPLACE MENTOR.—The term "workplace mentor" means an employee at the workplace who possesses the skills and knowledge to be mastered by a student, and who instructs the student, critiques the student's performance, challenges the student to perform well, and works in consultation with classroom teachers and the employer.

SEC. 5. FEDERAL ADMINISTRATION.

(a) JOINT ADMINISTRATION.—

(1) IN GENERAL.—Notwithstanding the Department of Education Organization Act (20 U.S.C. 3401 et seq.), the General Education Provisions Act (20 U.S.C. 1221 et seq.), the statutory provisions relating to the establishment of the Department of Labor (29 U.S.C. 551 et seq.), and section 166 of the Job Training Partnership Act (29 U.S.C. 1576), the Secretaries shall jointly provide for the ad-

ministration of this Act, and may issue whatever procedures, guidelines, and regulations, in accordance with section 553 of title 5, United States Code, they deem necessary and appropriate to administer and enforce the provisions of this Act.

(2) SUBMISSION OF PLAN.—Not later than 120 days after the date of the enactment of this Act, the Secretaries shall develop and submit a plan for the joint administration of this Act to the Committee on Education and Labor of the House of Representatives and the Committee on Labor and Human Resources of the Senate for review and comment on such plan by such committees.

(b) TERMINATION OR SUSPENSION OF ASSISTANCE.—

(1) IN GENERAL.—The Secretaries may terminate or suspend any financial assistance under this Act, in whole or in part, or not extend payments under an existing grant under this Act, if the Secretaries determine that a recipient has failed to meet any requirements of this Act, including—

(A) reporting requirements under section 402(c);

(B) regulations under this Act; or

(C) an approved plan submitted pursuant to this Act.

(2) NOTICE AND OPPORTUNITY FOR HEARING.—If the Secretaries terminate or suspend financial assistance, or do not extend payments under an existing grant under paragraph (1), with respect to recipient or proposed recipient, then the Secretaries shall provide—

(A) prompt notice to such recipient or proposed recipient; and

(B) the opportunity for a hearing to such recipient or proposed recipient not later than 30 days after the date on which such notice is provided.

(3) NONDELEGATION.—The Secretaries shall not delegate any of the functions or authority specified under this subsection, other than to an officer whose appointment was required to be made by and with the advice and consent of the Senate.

(c) ACCEPTANCE OF GIFTS.—The Secretaries are authorized, in carrying out this Act, to accept, purchase, or lease in the name of the Department of Labor or the Department of Education, and employ or dispose of in furtherance of the purposes of this Act, any money or property, real, personal, or mixed, tangible or intangible, received by gift, devise, bequest, or otherwise.

(d) USE OF VOLUNTARY AND UNCOMPENSATED SERVICES.—Notwithstanding section 1342 of title 31, United States Code, the Secretaries are authorized to accept voluntary and uncompensated services in furtherance of the purposes of this Act.

SEC. 6. AUTHORIZATION OF APPROPRIATIONS.

(a) IN GENERAL.—There are authorized to be appropriated to the Secretaries to carry out this Act \$300,000,000 for fiscal year 1995 and such sums as may be necessary for each of the fiscal years 1996 through 2002.

(b) RESERVATIONS.—From amounts appropriated under subsection (a) for any fiscal year, the Secretaries—

(1) shall reserve an amount equal to not more than one half of 1 percent of such amounts for such fiscal year to provide grants under sections 202(b) and 212(b) to the Commonwealth of the Northern Mariana Islands, American Samoa, Guam, the Virgin Islands, the Federated States of Micronesia, the Republic of the Marshall Islands, and Palau;

(2) shall reserve an amount equal to not more than one half of 1 percent of such amounts for such fiscal year to provide

grants under subtitle C of title II to establish and carry out School-to-Work Opportunities programs for Indian youths that involve Bureau funded schools (as defined in section 1139(3) of the Education Amendments of 1978 (25 U.S.C. 2019(3)));

(3) shall reserve an amount equal to 10 percent of such amounts for such fiscal year to provide grants under section 302(b) to local partnerships located in high poverty areas; and

(4) may reserve an amount equal to not more than 5 percent of such amounts for such fiscal year to carry out title IV.

(c) AVAILABILITY OF FUNDS.—Amounts authorized to be appropriated under subsection (a) are authorized to remain available until expended.

TITLE I—SCHOOL-TO-WORK OPPORTUNITIES BASIC PROGRAM COMPONENTS

SEC. 101. GENERAL PROGRAM REQUIREMENTS.

A School-to-Work Opportunities program under this Act shall—

(1) integrate work-based learning and school-based learning, as provided for in sections 102 and 103, integrate academic and occupational learning, and build effective linkages between secondary and postsecondary education;

(2) provide all students opportunities to complete a career major; and

(3) incorporate the basic program components provided in sections 102 through 104.

SEC. 102. WORK-BASED LEARNING COMPONENT.

The work-based learning component of a School-to-Work Opportunities program shall include—

(1) a planned program of job training and work experiences, including pre-employment and employment skills to be mastered at progressively higher levels, that are relevant to a student's career major and lead to the award of a skill certificate;

(2) paid work experience;

(3) workplace mentoring;

(4) instruction in general workplace competencies; and

(5) broad instruction in a variety of elements of an industry.

SEC. 103. SCHOOL-BASED LEARNING COMPONENT.

The school-based learning component of a School-to-Work Opportunities program shall include—

(1) career awareness and career exploration and counseling (beginning at the earliest possible age, but beginning no later than the middle school grades) in order to help students who may be interested to identify, and select or reconsider, their interests, goals, and career majors, including those options that may not be traditional for their gender, race, or ethnicity;

(2) initial selection by interested students of a career major not later than the beginning of the 11th grade;

(3) a program of study designed to meet the same academic content standards the State has established for all students, including, where applicable, standards established under the Goals 2000: Educate America Act, and to meet the requirements necessary for a student to earn a skill certificate;

(4) a program of instruction and curriculum that integrates academic and vocational learning (including applied methodologies and team-teaching strategies), and incorporates instruction in a variety of elements of an industry, appropriately tied to a participant's career major;

(5) regularly scheduled evaluations involving ongoing consultation with students and school dropouts to identify their academic

strengths and weaknesses, academic progress, workplace knowledge, goals, and the need for additional learning opportunities to master core academic and vocational skills; and

(6) mechanisms which allow students participating in a school-to-work program to transfer to a post-secondary program.

SEC. 104. CONNECTING ACTIVITIES COMPONENT.

The connecting activities component of a School-to-Work Opportunities program shall include—

(1) matching students with employers' work-based learning opportunities;

(2) serving as a liaison among the employer, school, teacher, parent, student, and, if appropriate, other community partners;

(3) providing technical assistance and services to employers, including small and medium sized businesses, and others in designing work-based and school-based learning components, counseling and case management services, and in the training of teachers, workplace mentors, school site mentors, and counselors;

(4) providing assistance to schools and employers to integrate school-based and work-based learning and integrate academic and occupational learning;

(5) providing assistance to participants who have completed the program in finding an appropriate job, continuing their education, or entering into an additional training program, and linking students with other community services which may be necessary to assure a successful transition from school to work;

(6) collecting information regarding post-program outcomes of participants in the School-to-Work Opportunities program and analyzing such information, to the extent practicable, on the basis of socioeconomic status, race, gender, ethnicity, disability, limited English proficiency, school dropouts, and academically talented students; and

(7) linking youth development activities under this Act with employer and industry strategies for upgrading the skills of their workers.

TITLE II—SCHOOL-TO-WORK OPPORTUNITIES SYSTEM DEVELOPMENT AND IMPLEMENTATION GRANTS TO STATES

Subtitle A—State Development Grants

SEC. 201. PURPOSE.

The purpose of this subtitle is to assist States and the territories in planning and developing comprehensive, statewide systems for school-to-work opportunities.

SEC. 202. AUTHORIZATION.

(a) IN GENERAL.—The Secretaries may provide development grants to States in such amounts as the Secretaries determine is necessary to enable such States to complete development of comprehensive, statewide School-to-Work Opportunities systems that may have begun with funds provided under the Job Training Partnership Act (29 U.S.C. 1501 et seq.) and the Carl D. Perkins Vocational and Applied Technology Education Act (20 U.S.C. 2301 et seq.).

(b) GRANTS TO TERRITORIES.—From amounts reserved under section 6(b)(1), the Secretaries shall provide grants in accordance with this subtitle to the Commonwealth of the Northern Mariana Islands, American Samoa, Guam, the Virgin Islands, the Federated States of Micronesia, the Republic of the Marshall Islands, and Palau, to complete development of comprehensive School-to-Work Opportunities systems in those territories.

SEC. 203. APPLICATION.

(a) IN GENERAL.—The Secretaries may not provide a development grant under section

202 to a State unless the State submits to the Secretaries an application in such form and containing such information as the Secretaries may reasonably require.

(b) COORDINATION WITH GOALS 2000: EDUCATE AMERICA ACT.—A State seeking assistance under both this Act and the Goals 2000: Educate America Act may—

(1) submit a single application containing plans that meet the requirements of both Acts and ensure that both plans are coordinated and not duplicative; or

(2) if such State has already submitted its application for funds under the Goals 2000: Educate America Act, submit its application under this Act as an amendment to the Goals 2000: Educate America Act application so long as such amendment meets the requirements of this Act and is coordinated with and not duplicative of the Goals 2000: Educate America Act application.

(c) CONTENTS.—Such application shall include—

(1) a timetable and an estimate of the amount of funding needed to complete the planning and development necessary to implement a comprehensive, statewide School-to-Work Opportunities system for all students;

(2) a description of how the Governor, the State educational agency, the State agency officials responsible for vocational education, job training, and employment, economic development, and postsecondary education, the State sex equity coordinator assigned under section 111(b)(1) of the Carl D. Perkins Vocational and Applied Technology Education Act (20 U.S.C. 2321(b)(1)), and other appropriate officials will collaborate in the planning and development of the State School-to-Work Opportunities system;

(3) a description of how the State has enlisted and will continue to enlist the active and continued participation in the planning and development of the statewide School-to-Work Opportunities system of employers and other interested parties such as locally elected officials, secondary and postsecondary educational institutions or agencies, business associations, industrial extension centers, employees, organized labor, teachers, related services personnel, students, parents, community-based organizations, Indian tribes, rehabilitation agencies and organizations, registered apprenticeship agencies, and vocational educational agencies;

(4) a description of how the State will coordinate its planning activities with each local partnership within the State that has received a grant under title III, if any;

(5) a designation of a fiscal agent to receive and be accountable for funds provided from a grant under section 202; and

(6) a description of how the State will provide opportunities for students from low-income families, low achieving students, students with limited English proficiency, and school dropouts to participate in school-to-work programs.

SEC. 204. USE OF AMOUNTS.

The Secretaries may not provide a development grant under section 202 to a State unless the State agrees that it will use all amounts received from such grant to develop a statewide School-to-Work Opportunities system, which may include—

(1) identifying or establishing an appropriate State structure to administer the School-to-Work Opportunities system;

(2) identifying existing secondary and post-secondary school-to-work programs which might be incorporated into the State system;

(3) identifying or establishing broad-based partnerships among employers, labor, edu-

cation, government, and other community-based organizations and parent organizations to participate in the design, development, and administration of School-to-Work Opportunities programs;

(4) developing a marketing plan to build consensus and support for School-to-Work Opportunities programs;

(5) promoting the active involvement of business (including small and medium sized businesses) in planning, developing, and implementing local School-to-Work Opportunities programs, and in establishing partnerships with elementary, middle, and secondary schools;

(6) identifying ways that existing local school-to-work programs could be coordinated with the statewide School-to-Work Opportunities system;

(7) supporting local School-to-Work Opportunities planning and development activities to provide guidance, training and technical assistance for teachers, employers, mentors, counselors, administrators, and others, in the development of School-to-Work Opportunities programs;

(8) developing training programs for teachers, counselors, mentors, and others on counseling and training women, minorities, and individuals with disabilities for high-skill, high-wage careers in non-traditional occupations;

(9) initiating pilot programs for testing key components of State program design;

(10) developing a State process for issuing skill certificates that is consistent with the work of the National Skill Standards Board and the criteria established under Goals 2000: Educate America Act;

(11) designing challenging curricula in cooperation with representatives of local partnerships;

(12) developing a system for labor market analysis and strategic planning for local targeting of industry sectors or broad occupational clusters;

(13) analyzing the post high school employment experiences of recent high school graduates and dropouts;

(14) preparing the plan required for submission of an application for an implementation grant under subtitle B;

(15) working with localities to develop strategies to recruit and retain all students in programs under this Act, including those from a broad range of backgrounds and circumstances, through collaborations with community-based organizations, where appropriate, and other entities with expertise in working with these students; and

(16) coordinating recruitment of out-of-school, at-risk, and disadvantaged youths with those organizations and institutions who have a successful history of working with such youths.

SEC. 205. ALLOCATION REQUIREMENT.

The Secretaries may not provide a development grant under section 202 to any State in an amount exceeding \$1,000,000 in any fiscal year.

SEC. 206. REPORTS.

The Secretaries may not provide a development grant under section 202 to a State unless the State agrees that it will submit to the Secretaries such periodic reports as the Secretaries may reasonably require relating to the use of amounts from such grant.

Subtitle B—State Implementation Grants

SEC. 211. PURPOSE.

The purpose of this subtitle is to assist States and the territories in the implementation of comprehensive, statewide School-to-Work Opportunities systems.

SEC. 212. AUTHORIZATION.

(a) **IN GENERAL.**—The Secretaries may provide implementation grants to States in such amounts as the Secretaries determine is necessary to enable such States to implement comprehensive, statewide School-to-Work Opportunities systems.

(b) **GRANTS TO TERRITORIES.**—From amounts reserved under section 6(b)(1), the Secretaries shall provide grants in accordance with this subtitle to the Commonwealth of the Northern Mariana Islands, American Samoa, Guam, the Virgin Islands, the Federated States of Micronesia, the Republic of the Marshall Islands, and Palau, to implement comprehensive School-to-Work Opportunities systems in those territories.

(c) **PERIOD OF GRANT.**—The provision of payments under a grant under subsection (a) or subsection (b) shall extend over a period of 5 fiscal years and shall be subject to the annual approval of the Secretaries and subject to the availability of appropriations for the fiscal year involved to make the payments.

(d) **LIMITATION.**—A State or territory shall be eligible to receive only 1 implementation grant under subsection (a) or subsection (b), as the case may be.

SEC. 213. APPLICATION.

(a) **IN GENERAL.**—The Secretaries may not provide an implementation grant under section 212 to a State unless the State submits to the Secretaries an application in such form and containing such information as the Secretaries may reasonably require.

(b) **COORDINATION WITH GOALS 2000: EDUCATE AMERICA ACT.**—A State seeking assistance under both this Act and the Goals 2000: Educate America Act may—

(1) submit a single application containing plans that meet the requirements of both Acts and ensure that both plans are coordinated and not duplicative; or

(2) if such State has already submitted its application for funds under the Goals 2000: Educate America Act, submit its application under this Act as an amendment to the Goals 2000: Educate America Act application so long as such amendment meets the requirements of this Act and is coordinated with and not duplicative of the Goals 2000: Educate America Act application.

(c) **CONTENTS.**—Such application shall include—

(1) a plan for a comprehensive, statewide School-to-Work Opportunities system under a State plan that meets the requirements described in subsection (d);

(2) a description of how the State will allocate funds under this Act to local partnerships; and

(3) a request, if the State decides to submit such a request, for 1 or more waivers of certain statutory or regulatory requirements, as provided for under title V.

(d) **STATE PLAN.**—A State plan shall—

(1) designate the geographical areas to be served by local partnerships, which shall, to the extent feasible, reflect local labor market areas;

(2) describe how the State will stimulate and support local School-to-Work Opportunities programs that meet the requirements of this Act, and how the State's system will be expanded over time to cover all geographic areas in the State, including urban and rural areas;

(3) describe the procedure by which the Governor, the State educational agency, the State agency officials responsible for vocational education, job training and employment, economic development, and post-secondary education, the State sex equity

coordinator assigned under section 111(b)(1) of the Carl D. Perkins Vocational and Applied Technology Education Act (20 U.S.C. 2321(b)(1)), and other appropriate officials will collaborate in the implementation of the School-to-Work Opportunities system;

(4) describe how the State has obtained and will continue to obtain the active involvement in the statewide School-to-Work Opportunities system of employers and other interested parties such as locally elected officials, secondary and postsecondary educational institutions or agencies, business associations, industrial extension centers, employees, organized labor, teachers, related services personnel, students, parents, community-based organizations, rehabilitation agencies and organizations, registered apprenticeship agencies, local vocational educational agencies, vocational student organizations, and State or regional cooperative education associations;

(5) describe how the School-to-Work Opportunities system will coordinate with or integrate existing local school-to-work programs and other appropriate programs, including those financed from State and private sources, with funds available from related programs under other provisions of Federal law, such as—

(A) the Adult Education Act (20 U.S.C. 1201 et seq.);

(B) the Carl D. Perkins Vocational and Applied Technology Education Act (20 U.S.C. 2301 et seq.);

(C) the Elementary and Secondary Education Act of 1965 (20 U.S.C. 2701 et seq.);

(D) the Higher Education Act of 1965 (20 U.S.C. 2701 et seq.);

(E) the Job Opportunities and Basic Skills Training Program authorized under part F of title IV of the Social Security Act (42 U.S.C. 681 et seq.);

(F) the Goals 2000: Educate America Act;

(G) the Individuals With Disabilities Education Act (20 U.S.C. 1400 et seq.);

(H) the Job Training Partnership Act (29 U.S.C. 1501 et seq.);

(I) the National Apprenticeship Act (29 U.S.C. 50 et seq.);

(J) the Rehabilitation Act of 1973 (29 U.S.C. 701 et seq.); and

(K) the National and Community Service Trust Act of 1993;

(6) describe the State's strategy for providing training for teachers, employers, mentors, counselors, and others, including programs which focus on the counseling and training of women, minorities, and individuals with disabilities for high-skill, high-wage careers in non-traditional occupations, and provide assurance of coordination with such activities in other Acts;

(7) describe how the State will adopt, develop, or assist local partnerships in the development of model curricula and innovative instructional methodologies, to be used in the secondary, and where possible, the elementary grades, that integrate academic and vocational learning and promote career awareness, and that are consistent with academic and skill standards established pursuant to the Goals 2000: Educate America Act;

(8) describe how the State will expand and improve career and academic counseling in the elementary and secondary grades, which may include linkages to career counseling and labor market information services outside of the school system;

(9) describe the resources, including private sector resources, the State intends to employ in maintaining the School-to-Work Opportunities system when funds under this Act are no longer available;

(10) describe how the State will ensure effective and meaningful opportunities for all students to participate in School-to-Work Opportunities programs;

(11) describe the State's goals and the methods it will use, such as awareness and outreach, to ensure opportunities for young women to participate in School-to-Work Opportunities programs in a manner that leads to employment in high-performance, high-paying jobs, including nontraditional employment, and goals to ensure an environment free from racial and sexual harassment;

(12) describe how the State will ensure opportunities for low achieving students, students with disabilities, and school dropouts to participate in School-to-Work Opportunities programs;

(13) describe the State's process for assessing the skills and knowledge required in career majors and awarding skill certificates that is consistent with the work of the National Skill Standards Board and the criteria established under Goals 2000: Educate America Act;

(14) describe the manner in which the State will, to the extent feasible, continue programs funded under title III in the State School-to-Work Opportunities system;

(15) describe how local school-to-work programs, including those funded under title III, if any, will be integrated into the State School-to-Work Opportunities system;

(16) describe the performance standards that the State intends to meet in establishing and carrying out the School-to-Work Opportunities system, including how the standards developed under section 115 of the Carl D. Perkins Vocational and Applied Technology Education Act (20 U.S.C. 2301 et seq.) have been incorporated into such performance standards or are used in coordination with such standards;

(17) designate a fiscal agent to receive and be accountable for funds provided from a grant under section 212; and

(18) describe the means by which students who are involved in a school-to-work program may transfer to a post-secondary program.

(e) **APPROVAL OF STATE PLAN.**—In developing the State plan that meets the requirements described in subsection (d)—

(1) the Governor shall approve those portions of the plan under the jurisdiction of the Governor; and

(2) other appropriate officials or entities shall approve those portions that address matters that, under State or other applicable law, are not under the jurisdiction of the Governor.

SEC. 214. REVIEW OF APPLICATION.

(a) **IN GENERAL.**—The Secretaries shall review each application submitted by a State under section 213, including the State plan contained in such application, and shall approve or disapprove such application in accordance with this section.

(b) **APPROVAL CRITERIA.**—The Secretaries may approve an application only if the State demonstrates in the application—

(1) that the State plan is replicable, sustainable, and innovative;

(2) that the officials listed in section 213(d)(3) will collaborate in the planning and development of the proposed plan;

(3) that other Federal, State, and local resources will be used to implement the proposed plan;

(4) the extent to which such plan would limit administrative costs and increase amounts spent on delivery of services to students enrolled in programs under this Act; and

(5) if the State, according to census data, has at least 1 urban and at least 1 rural area, the State will ensure the establishment of a partnership in at least 1 urban and 1 rural area in the State.

(c) **DISAPPROVAL.**—If the Secretaries determine that an application submitted by a State does not meet the criteria under subsection (b), or that the application is incomplete or otherwise unsatisfactory, the Secretaries shall—

(1) notify the State of the reasons for the failure to approve the application;

(2) if the application does not meet the criteria under subsection (b), inform the State of the opportunity to apply for a development grant under subtitle A, except that further development funds may not be awarded to a State that receives an implementation grant; and

(3) if the application is incomplete or otherwise unsatisfactory, permit the State to resubmit a corrected or amended application.

(d) **USE OF FUNDS FOR REVIEW OF APPLICATIONS.**—The Secretaries may use amounts reserved under section 6(b)(4) for the review of applications submitted under subsection (a).

SEC. 215. USE OF AMOUNTS.

The Secretaries may not provide an implementation grant under section 212 to a State unless the State agrees that it will use all amounts received from such grant to implement the State's School-to-Work Opportunities system in accordance with the following requirements:

(1) **SUBGRANTS TO LOCAL PARTNERSHIPS.**—

(A) **AUTHORITY.**—

(i) **IN GENERAL.**—Except as provided in clause (ii), the State shall provide subgrants to local partnerships, according to criteria established by the State, for the purpose of carrying out School-to-Work Opportunities programs described in title I.

(ii) **PROHIBITION.**—The State shall not provide subgrants to local partnerships that have received implementation grants under title III, except that this prohibition shall not apply with respect to local partnerships that are located in high poverty areas, as such term is defined in such title.

(B) **APPLICATION BY LOCAL PARTNERSHIP.**—The State may not provide a subgrant under subparagraph (A) to a local partnership unless the partnership submits to the State an application that—

(i) describes how the program will include the basic program components and otherwise meet the requirements of this Act;

(ii) sets forth measurable program goals and outcomes;

(iii) describes the local strategies and timetables to provide School-to-Work Opportunities program opportunities for all students as appropriate for the specific locality;

(iv) provides assurances that, to the extent practicable, school-to-work opportunities provided to students will be in industries and occupations offering high-skill, high-wage employment opportunities; and

(v) provides such other information as the State may require.

(C) **DISAPPROVAL OF APPLICATION.**—If the State determines that an application submitted by a local partnership does not meet the criteria under subparagraph (B), or that the application is incomplete or otherwise unsatisfactory, the State shall—

(i) notify the local partnership of the reasons for the failure to approve the application; and

(ii) if the application is incomplete or otherwise unsatisfactory, permit the local partnership to resubmit a corrected or amended application.

(D) **USE OF AMOUNTS BY LOCAL PARTNERSHIP.**—The State may not provide a subgrant under subparagraph (A) to a local partnership unless the partnership agrees that it will use all amounts received from such subgrant to carry out activities to implement School-to-Work Opportunities programs described in title I, and such activities may include—

(i) recruiting and providing assistance to employers, including small and medium sized businesses, to provide the work-based learning components in the School-to-Work Opportunities program;

(ii) establishing consortia of employers to support the School-to-Work Opportunities program and provide access to jobs related to students' career majors;

(iii) supporting or establishing intermediaries to perform the activities described in section 104 and to provide assistance to students and school dropouts in obtaining jobs and further education and training;

(iv) designing or adapting school curricula that can be used to integrate academic and vocational learning, school-based and work-based learning, and secondary and postsecondary education;

(v) providing training to work-based and school-based staff on new curricula, student assessments, student guidance, and feedback to the school regarding student performance;

(vi) designing or expanding and improving career awareness, exploration, and counseling activities, beginning at the earliest possible age, but beginning no later than the middle school grades;

(vii) establishing in schools participating in a School-to-Work Opportunities program a graduation assistance program to assist at-risk students, low-achieving students, and students with disabilities in graduating from high school, enrolling in postsecondary education or training, and finding or advancing in jobs;

(viii) providing supplementary and support services, including child care and transportation;

(ix) conducting or obtaining an in depth analysis of the local labor market and the generic and specific skill needs of employers to identify high-demand, high-wage careers to target;

(x) integrating work-based and school-based learning into existing job training programs for school dropouts;

(xi) establishing or expanding school-to-apprenticeship programs in cooperation with registered apprenticeship agencies and apprenticeship sponsors;

(xii) assisting participating employers, including small- and medium-size businesses, to identify and train workplace mentors and to develop work-based learning components;

(xiii) promoting the formation of partnerships between elementary, middle, and secondary schools and local businesses as an investment in future workplace productivity and competitiveness;

(xiv) designing local strategies to provide adequate planning time and staff development activities for teachers, school counselors, and school site mentors, including opportunities outside the classroom which are in the worksite;

(xv) enhancing linkages between existing after-school, weekend, and summer jobs, career exploration and school-based learning; and

(xvi) coordinating recruitment of dropouts and at-risk and disadvantaged youths by the local partnership with recruitment of these individuals by organizations and institutions

which have a history of success in working with these targeted individuals.

(E) **PARTNERSHIP COMPACT.**—The State may not provide a subgrant under subparagraph (A) to a local partnership unless the partnership agrees that it will establish a process by which the responsibilities and expectations of students, parents, employers, and schools are clearly established and agreed upon at the point of entry of the student into a career major program of study.

(F) **ADMINISTRATIVE COSTS.**—The local partnership may not use more than 5 percent of amounts received from a subgrant under subparagraph (A) for any fiscal year for administrative costs associated with activities in carrying out, but not including, activities under subparagraphs (D) and (E) for such fiscal year.

(G) **ALLOCATION REQUIREMENTS.**—

(i) **FIRST YEAR.**—In the 1st fiscal year for which a State receives amounts from a grant under section 212, the State shall use not less than 70 percent of such amounts to provide subgrants to local partnerships under subparagraph (A).

(ii) **SECOND YEAR.**—In the 2d fiscal year for which a State receives amounts from a grant under section 212, the State shall use not less than 80 percent of such amounts to provide subgrants to local partnerships under subparagraph (A).

(iii) **THIRD YEAR AND SUCCEEDING YEARS.**—In the 3d fiscal year for which a State receives amounts from a grant under section 212, and in each succeeding year, the State shall use not less than 90 percent of such amounts to provide subgrants to local partnerships under subparagraph (A).

(2) **ADDITIONAL STATE ACTIVITIES.**—The State may also—

(A) recruit and provide assistance to employers to provide work-based learning for all students;

(B) conduct outreach activities to promote and support collaboration in School-to-Work Opportunities programs by businesses, organized labor, and other organizations;

(C) provide training for teachers, employers, workplace mentors, counselors, and others;

(D) provide labor market information to local partnerships that is useful in determining which high-skill, high-wage occupations are in demand;

(E) design or adapt model curricula that can be used to integrate academic and vocational learning, school-based and work-based learning, and secondary and postsecondary education;

(F) design or adapt model work-based learning programs and identifying best practices;

(G) conduct outreach activities and providing technical assistance to other States that are developing or implementing School-to-Work Opportunities systems;

(H) reorganize and streamline State systems to facilitate the development of a comprehensive School-to-Work Opportunities system;

(I) identify ways that existing local school-to-work programs could be integrated with the statewide School-to-Work Opportunities system;

(J) design career awareness and exploration activities (that may begin as early as the elementary grades, but beginning no later than middle school grades) such as job shadowing, job site visits, school visits by individuals in various occupations, and mentoring;

(K) design and implement school-sponsored work experiences, such as school-sponsored

enterprises and community development projects;

(L) encourage the formation of partnerships between elementary, middle, and secondary schools and local businesses as an investment in future workplace productivity and competitiveness;

(M) coordinate recruitment of out-of-school, at-risk, and disadvantaged youths with those organizations and institutions who have a successful history of working with such youths; and

(N) conduct outreach to all students in a manner that most appropriately meets their need and the needs of their communities.

SEC. 216. ALLOCATION REQUIREMENT.

The Secretaries shall establish the minimum and maximum amounts available for an implementation grant under section 212, and shall determine the actual amount granted to any State based on such criteria as the scope and quality of the plan and the number of projected program participants.

SEC. 217. ADMINISTRATIVE COSTS.

The State may not use more than 5 percent of amounts received from an implementation grant under section 212 for any fiscal year for administrative costs associated with activities in carrying out, but not including, activities under section 215 for such fiscal year.

SEC. 218. REPORTS.

The Secretaries may not provide an implementation grant under section 212 to a State unless the State agrees that it will submit to the Secretaries such periodic reports as the Secretaries may reasonably require relating to the use of amounts from such grant.

Subtitle C—Development and Implementation Grants for School-to-Work Programs for Indian Youths

SEC. 221. AUTHORIZATION.

(a) IN GENERAL.—From amounts reserved under section 6(b)(2), the Secretaries shall provide grants to establish and carry out School-to-Work Opportunities programs for Indian youths that involve Bureau funded schools (as defined in section 1139(3) of the Education Amendments of 1978 (25 U.S.C. 2019(3))).

(b) ADDITIONAL AUTHORITIES.—The Secretaries may carry out subsection (a) through such means as they find appropriate, including—

(1) the transfer of funds to the Secretary of the Interior; and

(2) the provision of financial assistance to Indian tribes and Indian organizations.

SEC. 222. REQUIREMENTS.

In providing grants under section 221, the Secretaries shall require recipients of such grants to comply with requirements similar to those requirements imposed on States under subtitles A and B of this title.

TITLE III—FEDERAL IMPLEMENTATION GRANTS TO LOCAL PARTNERSHIPS

SEC. 301. PURPOSES.

The purposes of this title are—

(1) to authorize the Secretaries to provide competitive grants directly to local partnerships in order to provide funding for communities that have built a sound planning and development base for School-to-Work Opportunities programs and are ready to begin implementing a local School-to-Work Opportunities program; and

(2) to authorize the Secretaries to provide competitive grants to local partnerships to implement School-to-Work Opportunities programs in high poverty areas of urban and rural communities to provide support for a comprehensive range of education, training,

and support services for youths residing in such areas.

SEC. 302. AUTHORIZATION.

(a) GRANTS TO LOCAL PARTNERSHIPS.—

(1) IN GENERAL.—Subject to paragraph (2), the Secretaries may provide implementation grants directly to local partnerships in States in such amounts as the Secretaries determine is necessary to enable such partnerships to implement a School-to-Work Opportunities program.

(2) RESTRICTIONS.—A local partnership—

(A) shall be eligible to receive only 1 grant under this subsection;

(B) shall not be eligible to receive a grant under this subsection if such partnership is located in a State that—

(i) has been provided an implementation grant under section 212; and

(ii) has received amounts from such grant for any fiscal year after the 1st fiscal year under such grant; and

(C) that receives a grant under this subsection shall not be eligible to receive a grant under subsection (b).

(b) GRANTS TO LOCAL PARTNERSHIPS IN HIGH POVERTY AREAS.—

(1) IN GENERAL.—Subject to paragraphs (2) and (3), the Secretaries shall, from amounts reserved under section 6(b)(3), provide grants to local partnerships which are located in high poverty areas in States in such amounts as the Secretaries determine is necessary to enable such partnerships to implement a School-to-Work Opportunities program in such areas.

(2) RESTRICTIONS.—A local partnership—

(A) shall be eligible to receive only 1 grant under this subsection; and

(B) that receives a grant under this subsection shall not be eligible to receive a grant under subsection (a).

(3) PRIORITY.—In providing grants under paragraph (1), the Secretaries shall give priority to local partnerships that have a demonstrated effectiveness in the delivery of comprehensive vocational preparation programs with successful rates in job placement through cooperative activities among local educational agencies, local businesses, labor organizations, and other organizations.

(c) PERIOD OF GRANT.—The provision of payments under a grant under subsection (a) or (b) shall extend over a period of 5 fiscal years and shall be subject to the annual approval of the Secretaries and subject to the availability of appropriations for the fiscal year involved to make the payments.

SEC. 303. APPLICATION.

(a) IN GENERAL.—The Secretaries may not provide an implementation grant under section 302 to a local partnership unless the partnership—

(1) submits to the State for review and comment an application in such form and containing such information as the Secretaries may reasonably require; and

(2) submits such application to the Secretaries.

(b) TIME LIMIT FOR STATE REVIEW AND COMMENT.—

(1) IN GENERAL.—The State shall provide for review and comment on the application under subsection (a) not later than 30 days after the date on which the State receives the application from the local partnership.

(2) SUBMISSION WITHOUT STATE REVIEW AND COMMENT.—If the State does not provide review and comment within the 30-day time period specified in paragraph (1), the local partnership may submit the application to the Secretaries without first obtaining such review and comment.

(c) CONTENTS.—Such application shall include—

(1) the designation of a fiscal agent to receive and be accountable for amounts received from a grant under section 302;

(2) the State's comments regarding such application under subsection (a)(1);

(3) information that is consistent with the content requirements for a State plan that are specified in paragraphs (4) through (10) of section 213(d); and

(4) a description of how the partnership will meet the other requirements of this Act.

(d) USE OF FUNDS FOR REVIEW OF APPLICATIONS.—The Secretaries may use amounts reserved under section 6(b)(4) for the review of applications submitted under subsection (a).

SEC. 304. USE OF AMOUNTS.

The Secretaries may not provide an implementation grant under section 302 to a local partnership unless the partnership agrees that it will use all amounts from such grant to carry out activities to implement a School-to-Work Opportunities program described in title I, including the activities described in clauses (i) through (xvi) of section 215(1)(D).

SEC. 305. CONFORMITY WITH APPROVED STATE PLAN.

The Secretaries may not award a grant under section 302 to a local partnership located in a State that has an approved plan unless the Secretaries determine, after consultation with the State, that the plan submitted by the partnership is in accord with the approved State plan.

SEC. 306. REPORTS.

The Secretaries may not provide an implementation grant under section 302 to a local partnership unless the partnership agrees that it will submit to the Secretaries such periodic reports as the Secretaries may reasonably require relating to the use of amounts from such grant.

SEC. 307. HIGH POVERTY AREA DEFINED.

For purposes of this title, the term "high poverty area" means—

(1) a census tract, a contiguous group of census tracts, a nonmetropolitan county, a Native American Indian reservation, or an Alaska Native village, with a poverty rate of 30 percent or more, as determined by the Bureau of the Census; or

(2) an area that has an unemployment rate greater than the national average unemployment rate for the most recent 12 months for which satisfactory data are available.

TITLE IV—NATIONAL PROGRAMS AND REPORTS

SEC. 401. RESEARCH, DEMONSTRATION, AND OTHER PROJECTS.

(a) IN GENERAL.—From amounts reserved under section 6(b)(4), the Secretaries shall conduct research and development and establish a program of experimental and demonstration projects, to further the purposes of this Act.

(b) ADDITIONAL USE OF AMOUNTS.—Amounts reserved under section 6(b)(4) may also be used for programs or services authorized under any other provision of this Act that are most appropriately administered at the national level and that will operate in, or benefit more than, one State.

SEC. 402. PERFORMANCE OUTCOMES AND EVALUATION.

(a) IN GENERAL.—The Secretaries, in collaboration with the States, shall by grants, contracts, or otherwise, establish a system of performance measures for assessing State and local programs regarding—

(1) progress in the development and implementation of State plans that include the basic program components and otherwise meet the requirements of title I;

(2) participation in School-to-Work Opportunities programs by employers, schools, students, and school dropouts, including information on the gender, race, ethnicity, socioeconomic background, limited English proficiency, and disability of all participants;

(3) progress in developing and implementing strategies for addressing the needs of students and school dropouts;

(4) progress in meeting the State's goals to ensure opportunities for young women to participate in School-to-Work Opportunities programs;

(5) outcomes of participating students and school dropouts, by gender, race, ethnicity, socioeconomic background, limited English proficiency, and disability of the participants, including information on—

(A) academic learning gains;

(B) staying in school and attaining a high school diploma, or a General Equivalency Diploma, or alternative diploma or certificate for those students with disabilities for whom such alternative diploma or certificate is appropriate, skill certificate, and college degree;

(C) placement and retention in further education or training, particularly in the student's career major; and

(D) job placement, retention, and earnings, particularly in the student's career major; and

(6) the extent to which the program has met the needs of employers.

(b) EVALUATION.—The Secretaries shall conduct a national evaluation of School-to-Work Opportunities programs funded under this Act by grants, contracts, or otherwise, that will track and assess the progress of implementation of State and local programs and their effectiveness based on measures such as those described in subsection (a).

(c) REPORTS.—Each State shall provide periodic reports, at such intervals as the Secretaries determine, containing—

(1) information described in paragraphs (1) through (6) of subsection (a); and

(2) information on the extent to which current Federal programs implemented at the State and local level may be duplicative, outdated, overly restrictive, or otherwise counter-productive to the development of comprehensive statewide School-to-Work Opportunities systems.

SEC. 403. TRAINING AND TECHNICAL ASSISTANCE.

(a) PURPOSE.—The Secretaries shall work in cooperation with the States, the State sex equity coordinators assigned under section 111(b)(1) of the Carl D. Perkins Vocational and Applied Technology Education Act (20 U.S.C. 2321(b)(1)), employers and their associations, secondary and postsecondary schools, student and teacher organizations, organized labor, and community-based organizations to increase their capacity to develop and implement effective School-to-Work Opportunities programs.

(b) AUTHORIZED ACTIVITIES.—The Secretaries shall provide, through grants, contracts, or other arrangements—

(1) training, technical assistance, and other activities that will—

(A) enhance the skills, knowledge, and expertise of the personnel involved in planning and implementing State and local School-to-Work Opportunities programs, such as training of personnel to assist students; and

(B) improve the quality of services provided to individuals served under this Act;

(2) assistance to States and local partnerships in order to integrate resources available under this Act with resources available

under other Federal, State, and local authorities; and

(3) assistance to States and local partnerships to recruit employers to provide the work-based learning component of School-to-Work Opportunities programs.

SEC. 404. AMENDMENT TO JOB TRAINING PARTNERSHIP ACT TO PROVIDE SCHOOL-TO-WORK OPPORTUNITIES ACTIVITIES FOR CAPACITY BUILDING AND INFORMATION AND DISSEMINATION NETWORK.

Section 453(b)(2) of the Job Training Partnership Act (29 U.S.C. 1733(b)(2)) is amended—

(1) in subparagraph (C)(ii)(V), by striking the period at the end of such subparagraph and inserting “; and”; and

(2) by adding at the end the following new subparagraph:

“(D)(i) from the amount appropriated pursuant to section 6(a) of the School-to-Work Opportunities Act of 1993, collect and disseminate information—

“(I) on successful school-to-work programs carried out pursuant to such Act and innovative school and work-based curriculum;

“(II) on research and evaluation conducted concerning school-to-work opportunities activities;

“(III) that will assist States and partnerships in undertaking labor market analysis, surveys or other activities related to economic development;

“(IV) on skill certificates, skill standards and related assessment technologies; and

“(V) on methods for recruiting and building the capacity of employers to provide work-based learning opportunities; and

“(ii) from such amount, facilitate communication and the exchange of information and ideas among States and partnerships carrying out school-to-work opportunities programs pursuant to such Act.”.

SEC. 405. REPORTS TO CONGRESS.

Not later than 24 months after the date of the enactment of this Act, and every 12 months thereafter, the Secretaries shall submit a report to the Congress on all School-to-Work Opportunities programs carried out pursuant to this Act. The Secretaries shall, at a minimum, include in each such report—

(1) information concerning the programs that receive assistance under this Act;

(2) a summary of the information contained in the State and local partnership reports submitted under titles II and III and section 402(c); and

(3) information regarding the findings and actions taken as a result of any evaluation conducted by the Secretaries.

TITLE V—WAIVER OF STATUTORY AND REGULATORY REQUIREMENTS

SEC. 501. STATE AND LOCAL PARTNERSHIP REQUESTS AND RESPONSIBILITIES FOR WAIVERS.

(a) STATE REQUEST FOR WAIVER.—A State may submit, as a part of the State plan (or as an amendment to the plan) described in section 213(d), a request for a waiver of 1 or more statutory or regulatory provisions described in section 502 or 503 from the Secretaries in order to carry out the School-to-Work Opportunity system established by such State. Such request may include different waivers with respect to different areas within the State.

(b) LOCAL PARTNERSHIP REQUEST FOR WAIVER.—

(1) IN GENERAL.—A local partnership that seeks a waiver of any of the laws specified in section 502 or 503 shall submit an application for such waiver to the State and the State shall determine whether to submit the application for such waiver to the Secretaries.

(2) TIME LIMIT.—

(A) IN GENERAL.—The State shall make a determination to submit the application under paragraph (1) not later than 30 days after the date on which the State receives the application from the local partnership.

(B) DIRECT SUBMISSION.—If the State does not make a determination to submit the application within the 30-day time period specified in subparagraph (A), the local partnership may submit the application to the Secretaries without first obtaining such review and comment.

(c) WAIVER CRITERIA.—The request by the State shall meet the criteria contained in section 502 or section 503 and shall specify the laws or regulations referred to in those sections that the State wants waived.

SEC. 502. WAIVER AUTHORITY OF SECRETARY OF EDUCATION.

(a) WAIVER AUTHORITY.—

(1) IN GENERAL.—Except as provided in subsection (c), the Secretary of Education may waive any requirement under any provision of law referred to in subsection (b), or any regulation issued under such provision, for a State that requests such a waiver and has an approved State plan under section 214—

(A) if, and only to the extent that, the Secretary of Education determines that such requirement impedes the ability of the State or a local partnership to carry out the purposes of this Act;

(B) if the State provides the Secretary with documentation of the necessity for the waiver, including—

(i) the specific requirement that will be waived;

(ii) the specific positive outcomes expected from the waiver and why those outcomes cannot be achieved while complying with the requirement;

(iii) the process which will be used to monitor the progress in implementing the waiver; and

(iv) such other information as the Secretary may require;

(C) if the State waives, or agrees to waive, similar requirements of State law; and

(D) if the State—

(i) has provided all local partnerships in the State, and local educational agencies participating in a local partnership in the State, with notice and an opportunity to comment on the State's proposal to seek a waiver;

(ii) provides, to the extent feasible, students, parents, and advocacy and civil rights groups an opportunity to comment on the State's proposal to seek a waiver; and

(iii) has submitted the comments of the local partnerships and local educational agencies to the Secretary of Education.

(2) APPROVAL OR DISAPPROVAL.—The Secretary of Education shall promptly approve or disapprove any request submitted pursuant to paragraph (1) and shall issue a decision that shall—

(A) include the reasons for approving or disapproving the request, including a response to comments; and

(B) be disseminated by the State seeking the waiver to interested parties, including educators, parents, students, advocacy and civil rights organizations, and the public.

(3) APPROVAL CRITERIA.—In approving a request under paragraph (2), the Secretary of Education shall consider the amount of State resources that will be used to implement the State plan.

(4) TIME PERIOD FOR WAIVER.—Each waiver approved under paragraph (2) shall be for a period not to exceed 5 years, except that the Secretary of Education may extend such period if the Secretary determines that the

waiver has been effective in enabling the State or local partnership to carry out the purposes of this Act.

(b) **APPLICABLE PROVISIONS OF LAW.**—The applicable provisions of law referred to in this subsection are the following:

(1) Chapter 1 of title I of the Elementary and Secondary Education Act of 1965, including the Even Start Act.

(2) Part A of chapter 2 of title I of the Elementary and Secondary Education Act of 1965.

(3) The Dwight D. Eisenhower Mathematics and Science Education Act (part A of title II of the Elementary and Secondary Education Act of 1965).

(4) The Emergency Immigrant Education Act of 1984 (part D of title IV of the Elementary and Secondary Education Act of 1965).

(5) The Drug-Free Schools and Communities Act of 1986 (title V of the Elementary and Secondary Education Act of 1965).

(6) The Carl D. Perkins Vocational and Applied Technology Education Act.

(c) **WAIVERS NOT AUTHORIZED.**—The Secretary of Education may not waive any requirement under any provision of law referred to in subsection (b), or any regulation issued under such provision, relating to—

(1) the basic purposes or goals of such provision of law;

(2) maintenance of effort;

(3) comparability of services;

(4) the equitable participation of students attending private schools;

(5) parental participation and involvement;

(6) the distribution of funds to State or to local educational agencies;

(7) the eligibility of individuals for participation in a program under such provision of law;

(8) public health or safety, labor standards, civil rights, occupational safety and health, or environmental protection; or

(9) prohibitions or restrictions relating to the construction of buildings or facilities.

(d) **TERMINATION OF WAIVERS.**—The Secretary of Education shall periodically review the performance of any State or local partnership for which the Secretary has granted a waiver under subsection (a) and shall terminate the waiver if—

(1) the Secretary determines that the performance of the State, local partnership, or local educational agency affected by the waiver, as the case may be, has been inadequate to justify a continuation of the waiver; or

(2) the State fails to waive similar requirements of State law as required or agreed to in accordance with subsection (a)(1)(B).

SEC. 503. WAIVER AUTHORITY OF SECRETARY OF LABOR.

(a) **WAIVER AUTHORITY.**—

(1) **IN GENERAL.**—Except as provided in subsection (c), the Secretary of Labor may waive any requirement under any provision of the Job Training Partnership Act (29 U.S.C. 1501 et seq.), or any regulation issued under such provision, for a State that requests such a waiver and has an approved State plan under section 214—

(A) if, and only to the extent that, the Secretary of Labor determines that such requirement impedes the ability of the State or a local partnership to carry out the purposes of this Act;

(B) if the State provides the Secretary with documentation of the necessity for the waiver, including—

(i) the specific requirement that will be waived;

(ii) the specific positive outcomes expected from the waiver and why those outcomes

cannot be achieved while complying with the requirement;

(iii) the process which will be used to monitor the progress in implementing the waiver; and

(iv) such other information as the Secretary may require;

(C) if the State waives, or agrees to waive, similar requirements of State or territory law; and

(D) if the State—

(i) has provided all local partnerships in the State with notice and an opportunity to comment on the State's proposal to seek a waiver;

(ii) provides, to the extent feasible, students, parents, and advocacy and civil rights groups an opportunity to comment on the State's proposal to seek a waiver; and

(iii) has submitted the comments of the local partnerships to the Secretary of Labor.

(2) **APPROVAL OR DISAPPROVAL.**—The Secretary of Labor shall promptly approve or disapprove any request submitted pursuant to paragraph (1) and shall issue a decision that shall—

(A) include the reasons for approving or disapproving the request, including a response to comments; and

(B) be disseminated by the State seeking the waiver to interested parties, including educators, parents, students, advocacy and civil rights organizations, and the public.

(3) **APPROVAL CRITERIA.**—In approving a request under paragraph (2), the Secretary of Labor shall consider the amount of State resources that will be used to implement the State plan.

(4) **TIME PERIOD FOR WAIVER.**—Each waiver approved under paragraph (2) shall be for a period not to exceed 5 years, except that the Secretary of Labor may extend such period if the Secretary determines that the waiver has been effective in enabling the State or local partnership to carry out the purposes of this Act.

(b) **WAIVERS NOT AUTHORIZED.**—The Secretary of Labor may not waive any requirement under any provision of the Job Training Partnership Act (29 U.S.C. 1501 et seq.), or any regulation issued under such provision, relating to—

(1) the basic purposes or goals of such provision of law;

(2) the eligibility of individuals for participation in a program under such provision of law;

(3) the allocation of funds under such provision of law;

(4) public health or safety, labor standards, civil rights, occupational safety and health, or environmental protection;

(5) maintenance of effort; or

(6) prohibitions or restrictions relating to the construction of buildings or facilities.

(c) **TERMINATION OF WAIVERS.**—The Secretary of Labor shall periodically review the performance of any State or local partnership for which the Secretary has granted a waiver under subsection (a) and shall terminate the waiver if—

(1) the Secretary determines that the performance of the State or local partnership affected by the waiver has been inadequate to justify a continuation of the waiver; or

(2) the State fails to waive similar requirements of State or territory law as required or agreed to in accordance with subsection (a)(1)(B).

SEC. 504. COMBINATION OF FEDERAL FUNDS FOR HIGH POVERTY SCHOOLS.

(a) **IN GENERAL.**—In order to integrate existing school-to-work transition activities with activities under this Act and maximize

the effective use of resources, a local partnership may carry out schoolwide school-to-work activities in schools that meet the requirements of subparagraphs (A) and (B) of section 263(g)(1) of the Job Training Partnership Act (29 U.S.C. 1643(g)(1) (A) and (B)) by combining Federal funds under this Act with other Federal funds from among those programs under—

(1) the provisions of law listed in paragraphs (2) through (6) of section 502(b); and

(2) the Job Training Partnership Act (29 U.S.C. 1501 et seq.)

(b) **USE OF FUNDS.**—A local partnership may use the Federal funds combined under subsection (a) under the requirements of this Act, except that the provisions contained in paragraphs (1) through (6) and paragraphs (8) and (9) of section 502(c), and paragraph (1) and paragraphs (3) through (6) of section 503(b) shall remain in effect with respect to the use of such funds.

(c) **ADDITIONAL INFORMATION IN APPLICATION.**—A local partnership seeking to combine funds under subsection (a) must include in its application under title II or title III—

(1) a description of the funds it proposes to combine under the requirements of this Act;

(2) the activities to be carried out with such funds;

(3) the specific outcomes expected of participants in schoolwide school-to-work activities; and

(4) such other information as the State, or Secretaries, as the case may be, may require.

(d) **DISSEMINATION OF INFORMATION.**—The local partnership shall, to the extent feasible, provide information on the proposed combination of Federal funds under subsection (a) to parents, students, educators, advocacy and civil rights organizations, and the public.

TITLE VI—SAFEGUARDS

SEC. 601. SAFEGUARDS.

The following safeguards shall apply to each School-to-Work Opportunities program carried out under this Act:

(1) **NONDISCRIMINATION.**—Nothing in this Act shall be construed to modify or affect any Federal or State law prohibiting discrimination on the basis of race, religion, color, ethnicity, national origin, gender, age, or disability.

(2) **PROHIBITION OF WAGES.**—Funds appropriated pursuant to section 6 shall not be expended for the wages of youth participants or workplace mentors.

(3) **LABOR STANDARDS.**—The labor standards contained in section 143 of the Job Training Partnership Act (29 U.S.C. 1553), except for the standards contained in subsection (a)(4) of such section, shall apply to each program.

(4) **INDIVIDUALS NOT ENTITLED TO SERVICES.**—Nothing in this Act shall be construed to provide any individual with an entitlement to the services authorized by this Act.

(5) **SIMILAR AUTHORITY OF OTHER OFFICIALS OR ENTITIES NOT SUPERSEDED.**—Nothing in this Act shall be construed to negate or supersede the authority of any official or entity responsible under State or other applicable law for authority that is similar to authority specified under this Act.

(6) **SUPPLEMENT NOT SUPPLANT REQUIREMENT.**—Funds provided under this Act shall be used to supplement and not to supplant Federal, State, and local public funds expended to provide services for existing school-to-work opportunities systems and programs.

(7) **OTHER SAFEGUARDS.**—The Secretaries shall provide such other safeguards as they deem appropriate in order to ensure that participants in a program are afforded adequate supervision by skilled adult workers,

or, otherwise, to further the purposes of this Act.

TITLE VII—REAUTHORIZATION OF JOB TRAINING FOR THE HOMELESS DEMONSTRATION PROGRAM UNDER THE STEWART B. MCKINNEY HOMELESS ASSISTANCE ACT

SEC. 701. REAUTHORIZATION.

Section 739(a) of the Stewart B. McKinney Homeless Assistance Act (42 U.S.C. 11449(a)) is amended by striking "the following amounts:" and all that follows and inserting "such sums as may be necessary for each of the fiscal years 1994 and 1995."

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Michigan [Mr. FORD] will be recognized for 20 minutes, and the gentleman from Pennsylvania [Mr. GOODLING] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Michigan [Mr. FORD].

Mr. FORD of Michigan. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of the bill, H.R. 2884, the School-to-Work Opportunities Act of 1993.

At the markup of this bill before the Committee on Education and Labor, I remarked that for those who were wondering when we were going to stop working on higher education matters for a minute and devote ourselves to the majority of young people whose education never reaches that level, this is the when.

The school-to-work bill has been the subject of unprecedented cooperation between the Departments of Labor and Education, which will share responsibility for implementing it. Our first hearing on the bill drew Secretaries Reich and Riley, who presented testimony jointly written. Their appearance was symbolic of the entire process of making this program a reality.

I want to read a couple of lines from an article about the bill in Friday's National Journal. The article first refers to Vice President GORE'S effort to reinvent government, which, as the article says, "boils down to making government make sense." The piece goes on: "That often means tearing down bureaucratic barriers that no longer work and recombining functions in new ways to get the job done."

Of Secretary Reich and Secretary Riley, the article says:

They elicited from their mutually suspicious bureaucracies an unprecedented degree of collaboration on a plan to help young people who don't get a college degree—three out of four nationwide—acquire the skills and employment experience they need to get good jobs. The scheme would combine the best elements of high school, youth apprenticeships and what has come to be called 'tech prep'—coordinated programs that span the last 2 years of high school and the first 2 years of technical college.

Mr. Speaker, since the bill's introduction on August 6, the Committee on Education and Labor has held three hearings. On November 3, we approved the bill after both Republicans and

Democrats offered and supported amendments. Today, on a bipartisan basis, we will move the bill one step closer to the President's desk.

As National Journal reported, the goal of this legislation is to expand career and education options for the 75 percent of high school students who do not receive a college degree. By providing flexibility in establishing school-to-work systems, we expect that States and school districts will be able to build on the many successful, innovative programs they already have implemented.

Under the school-to-work concept, educators, employers, and labor representatives develop partnerships in which high school juniors and seniors attend school part time and go to work part time. Their school course work complements their particular on-the-job experience, enhancing their qualifications in the eyes of potential employers. School-to-work participants receive not only a high school diploma, but a certificate of competency in the set of skills necessary for their chosen field. Alternatively, these young people go on to appropriate postsecondary education or training. At the end, they will have a ready answer for employers whose first question is always, "Do you have any experience?"

The Federal role in school-to-work is to provide grants to States and localities to establish these partnerships, and to establish a flexible framework to ensure that students receive the kind of training that will launch them on successful careers.

The basic components, developed by States, include work-based and school-based learning, and coordination of the two.

Under work-based learning, students would receive job training, paid work experience, workplace mentoring, and instruction in skills and in a variety of elements of an industry. At school, students would explore career opportunities with counselors. They would receive instruction in a career major, selected no later than 11th grade. The study program's academic and skill standards would be those contained in the administration's school reform bill, H.R. 1804, the Goals 2000: Educate America Act. Typically, their coursework would include at least 1 year of postsecondary education and periodic evaluations to identify strengths and weaknesses.

The coordinating activities involve employers, schools, and students, who together match the students with work opportunities. Teachers, mentors, and counselors also will receive program instruction.

States' school-to-work plans, submitted for Federal implementation grants, would have to detail how the State would meet program requirements. They also would explain how the plans would extend the opportunity to par-

ticipate to poor, low-achieving, and disabled students and dropouts.

This bill is an important blueprint to help us build a high-skilled work force for the 21st century. In line with other proposals developed by the Clinton administration, it does not establish new Federal bureaucracies but makes States and localities partners with the Federal Government in achieving goals crucial to improving the lives of our citizens.

Mr. Speaker, with the leadership of the President and his Cabinet, and the hard work of the department staffs and our committee staff, we are ready to take the next step to assist millions of young people get their fair shot at the American dream—a good wage in return for skilled work that employers need.

I urge my colleagues to support the bill.

□ 1540

Mr. GOODLING. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 2884, the School-to-Work Opportunities Act of 1993.

This legislation is designed to bring together partnerships of employers, educators, workers, and others for the purpose of building a high-quality school-to-work transition system in the United States.

Such a system would prepare this Nation's youth for careers in high-skill, high-wage jobs. For this reason, I have been happy to work in a bipartisan manner with Chairman FORD and the administration to develop this legislation, with the goal of establishing such a comprehensive school-to-work system in this country.

It has become an all-too-well-known statistic in recent years, that only about 50 percent, or approximately 1.4 million of this Nation's youth enter some form of postsecondary education the fall after they graduate from high school. Of these, only about half successfully complete a baccalaureate degree. For the remainder, representing three out of four U.S. youth, a rough and often painful transition to a career begins.

Yet our U.S. educational system continues to be disproportionately geared to meeting the needs of college-bound youth. There is simply no mechanism in most of our schools to link young people to employers.

While not identical, the legislation we are introducing today, shares many of the key components of a bill that my colleague from Wisconsin, Mr. GUNDERSON and I introduced earlier this year, to create a system of school-to-work transition and youth apprenticeship programs in the United States.

Both measures provide considerable flexibility at the State and local levels, allowing communities to develop programs that meet their individual economic and labor market needs.

Both are built around partnerships at the local level, that bring employers, schools, teachers, workers, students, and the community together to design the system.

Both require the integration of school-based and work-based learning.

Both bills are designed so that the successful completion of a school-to-work program will lead to a high school diploma, a portable certificate of competency in an occupation, a certificate or diploma from a postsecondary institution, if appropriate, and employment in a high-skill, high-paying job.

And both are built on successful efforts in progressive States and communities—such as those programs in my district—found both in the York Youth Apprenticeship Program, and in Project Connections (undertaken by involved employers and the school district of the city of York)—where young students are provided with challenging academic curricula and at the same time engaged in related career development opportunities.

During the hearing process in the Education and Labor Committee, we heard from numerous witnesses, representing such varied constituencies as the business community, educators, organized labor, and community-based organizations—all of whom testified in strong support for this legislation. And as a result, a number of improvements were made in the bill as we moved it through the committee.

We were successful in increasing the emphasis on serving youth through career awareness, exploration, and counseling programs in the middle school years, and even earlier where possible.

We were also successful in maintaining the strong role that employers must play in all aspects and at all levels of this system, if it is to be a success.

Legitimate concern continues to persist that this legislation will result in just one more new program added to the over 150 Federal employment and training programs that already exist in this country.

While this would be true if the bill were an ongoing grant program, with no coordination requirements—it is not.

Probably one of the greatest strengths of this legislation is that while it does not eliminate any existing job training or education programs—it will serve as a coordinating mechanism by which existing education and training programs will be integrated at the State and local levels.

The competitive implementation grants provided to States and local partnerships under the bill, are one-time 5-year grants—or venture capital—that are to be used to leverage change in existing education and training programs.

In order to receive an implementation grant, States and local programs must show how existing programs will be integrated, and how school-to-work activities will continue once Federal money is gone.

Further, a broad use of waivers under the legislation will result in linkages between programs never before possible.

Mr. Speaker, I truly feel that this is an innovative and very important piece of legislation, that will result in positive change in how we educate our youth and prepare them for the world of work.

I am proud to have been a part of its development.

I therefore urge my colleagues to join me in support of its passage.

Mr. FORD of Michigan. Mr. Speaker, I yield 3 minutes to the gentleman from Michigan [Mr. KILDEE], the chairman of the Subcommittee on Elementary and Secondary Education.

Mr. KILDEE. Mr. Speaker, I rise in strong support of H.R. 2884, the School-to-Work Opportunities Act of 1993.

In today's highly competitive global economy, business performance is increasingly reliant upon the knowledge and skills of its workers.

Changes in business structures and increased use of technology in the workplace require that today's entrants into the work force be better educated and more highly skilled.

Mr. Speaker, I have some exciting school-to-work programs operating in my district which are successfully preparing high school students for the workplace.

A joint partnership among General Motors, the UAW, and Flint schools prepares students to enter skilled trades through a program that offers challenging academic and work-based components.

Students in the manufacturing training partnership are learning skills that will lead to high-skilled, high-wage jobs.

Other students from the Flint area are able to gain skills through a cooperative effort between Hurley Hospital and the Genesee-area Skills Center.

Mr. Speaker, these programs are not only having a positive effect on the students involved in them, they are having a positive effect on the community at large.

In fact, school-to-work programs in Flint are considered an integral part of local economic development.

I am pleased to support this legislation because I have seen the difference school-to-work programs make in students' lives.

H.R. 2884 provides opportunities for high school students to enter the workplace better prepared by establishing, for the first time, a national framework for a school-to-work system.

Programs created under this system through broad-based partnerships in

States and communities will enable all students to participate in education and training programs that will better prepare them for a first job, enable them to earn portable credentials, and increase their opportunities for meaningful secondary and postsecondary education.

Mr. Speaker, the School-to-Work Opportunities Act will help communities develop and implement school-to-work programs that will increase opportunities for all students to enter the workplace ready to perform.

Mr. Speaker, I want to extend my gratitude to Mr. Tom Kelley of the Elementary, Secondary, and Vocational Subcommittee staff for his very effective research and work on this bill. I know Secretary Riley and Secretary Reich join with me in extending our thanks and congratulations to Tom Kelley.

Mr. FORD of Michigan. Mr. Speaker, I yield 3 minutes to the gentlewoman from Connecticut [Ms. DELAURO].

Ms. DELAURO. Mr. Speaker, I rise today in strong support of the School-to-Work Opportunities Act of 1993. This bold initiative takes a vital step toward giving all of our Nation's young people the knowledge and skills to make a successful transition from school to a first job, in a higher skill, higher wage career.

In my State of Connecticut, young people are now suffering from record high levels of unemployment. This initiative offers real hope for the first time in a long time to many of these young people and to the 75 percent of our Nation's young who will not, and often do not have the means to achieve a college degree. For these young people, for their families, and for the communities in which they live, the school-to-work initiative promises a rigorous regimen of education and training necessary to allow them to compete successfully for the high skill, high wage jobs of tomorrow.

The School-to-Work Program is also vital for our Nation's security and future economic prosperity. We are entering an age in which the level of education and skill of a nation's workers will determine whether that nation is able to attract the high skill, high wage jobs on which its prosperity and security will increasingly depend. It is time that we joined almost all the nations with which we compete in the global market and institute a school-to-work system that gives our young people and our Nation the ability to compete successfully in this rapidly expanding market.

As a member of the Labor, HHS, and Education Subcommittee, I have had the opportunity to work with my colleagues and with Secretaries Riley and Reich to appropriate sufficient funding to assure a successful launch of this important initiative. This is a program that embodies the type of critical investment in American young people

and workers that will yield our Nation and each of our communities increasingly high dividends for generations to come.

□ 1550

Mr. GOODLING. Mr. Speaker, I yield myself such time as I may consume.

I rise to participate in a colloquy with the gentleman from Michigan [Mr. FORD]. The gentleman from Wisconsin [Mr. GUNDERSON] had hoped to be here, and I had hoped he would be here because he has worked long and hard over the years to develop good school-to-work programs and apprenticeship programs.

He is not here so I will enter into a colloquy, if I might, with the chairman.

Mr. Speaker, even with my strong support for this legislation, I am concerned over a change made to the bill that we are considering here today from the version of H.R. 2884 that was reported out of the Education and Labor Committee—dealing with the issue of State governance of school-to-work programs.

Specifically, this change would provide very specific and separate approval authority to the Governor for those portions of a State's school-to-work opportunities plan which fall under the jurisdiction of the Governor, and separate approval authority to other State officials for those portions of a State's plan which fall under the jurisdiction of those State officials, respectively.

While I fully understand the need, and strongly agree that all relevant State agency heads as well as the Governor must be fully involved and committed to the planning and implementation of a State's school-to-work system if this effort is to succeed—I am concerned that this specific language will actually do just the opposite—encouraging individual State agencies and officials to view this school-to-work initiative as a collection of separate activities under the separate jurisdictions of their individual agencies—rather than an integrated, collaborative system.

Am I correct to assume that the chairman agrees that this school-to-work effort must be a collaborative effort on the part of all key State officials?

Mr. FORD of Michigan. Mr. Speaker, will the gentleman yield?

Mr. GOODLING. I yield to the gentleman from Michigan.

Mr. FORD of Michigan. Mr. Speaker, the gentleman is correct. In fact, the bill requires collaboration among the individual State partners in the development and implementation of a State's school-to-work system.

Mr. GOODLING. Mr. Speaker, it is my understanding that the National Governor's Association and the Chief State School Officers are currently try-

ing to work out a compromise on this issue.

Based on these negotiations, and on the understanding that the language that provides this separate approval authority will be changed in conference, I have agreed to support passage of H.R. 2884 today.

May I have the chairman's assurance that he will work with me as we go to conference with the Senate, to replace this language with compromise language that strengthens the bill's collaboration requirements—and that does not encourage the separate development and implementation of school-to-work activities by individual State agencies—or encourage individual State officials to exercise a final veto over the entire State plan?

Mr. FORD of Michigan. Mr. Speaker, if the gentleman will continue to yield, I agree with the gentleman that we will work together to craft a compromise on this language during the conference with the Senate. The inclusion of this language today has facilitated in moving the legislation forward, with the clear understanding that I am committed to reaching an agreeable alternative with the gentleman before the legislation comes back to the House.

Mr. GOODLING. Mr. Speaker, I thank the chairman for his assurance. I, too, want to thank the staff, particularly on my side of the aisle Mary Gardner-Clagett. They worked long and hard to help us produce what I think is a good piece of legislation. I hope all Members will support it.

Mr. BALLENGER. Mr. Speaker, H.R. 2884, the School-to-Work Opportunities Act of 1993 is an attempt to help American students make the transition from high school to the working world smoothly and successfully. I recognize that not all students will have the luxury of attaining a college education. This legislation is for them. The bill emphasizes the importance of combining work-based and school-based learning. By coordinating the instruction received in both places, the students will be better equipped upon graduating to enter the work force.

The concept of mentoring, embodied in this bill, is one that I have long endorsed and recognized as necessary to training young people to be successful competitors in this global economy.

While I am excited about the potential contained within this bill, I am equally concerned about the number of similar job training programs already in place in the Federal Government. According to a GAO study released in 1992, there are 125 Federal job training programs already in existence. Of concern to me are the overlapping responsibilities, duplication of services, and unnecessary costs.

I do not wish to detract from the importance of job training, however, it is unfortunate that this bill does not do a better job of consolidating and improving existing programs. In light of the ever-swelling budget deficit, now is the time to streamline and downsize, to develop better and more efficient programs with less

resources. This bill did not rise to that challenge.

Mr. WILLIAMS. Mr. Speaker, as we begin our debate today, I am glad that a number of my concerns with this legislation have been addressed.

The bill that we are considering today responds to the issue of governance of this system by providing the safeguard that:

Nothing in this Act shall be construed to negate or supersede the authority of any official or entity responsible under State or other applicable law that is similar to authority specified under this Act.

In addition, this point is reemphasized in the committee amendment today which impacts the approval of the State plan. The amendment states that:

The Governor shall approve those portions of the plan under the jurisdiction of the Governor; and other appropriate officials or entities shall approve those portions that address matters that, under State or other applicable law, are not under the jurisdiction of the Governor.

States like Montana and Michigan, with separately elected superintendents of public instruction, will have their legal decision-making structure protected. This ensures that the chief State school officer will make the relevant decisions under this act as opposed to the single, cookie-cutter approach in the original bill.

The legislation also goes a long way to ensuring that young women will be served equitably under this act and exposed to jobs that they have traditionally been steered away from.

The bill ensures necessary labor standards and ensures that funds under the act will be used to supplement and not supplant existing Federal, State, and local funds.

As we move to conference with the Senate, I am also concerned that we commit to supporting this bill in conference and not cave in to the peculiarities of Senate time agreement in order to have legislation on the President's desk by the time we recess.

Mr. GUNDERSON. Mr. Speaker, I rise in support of H.R. 2884, the School-to-Work Opportunities Act of 1993.

Similar to legislation that my colleague from Pennsylvania, Mr. GOODLING, and I introduced earlier this Congress, this bill is designed to establish high-quality, work-based learning programs throughout the United States, that train youth for skilled, high-wage careers which do not require a 4-year college degree.

Establishment of such a school-to-work transition system in the country would address a serious inadequacy in this Nation's educational system, as well as significantly improve the quality of the U.S. work force, enabling the United States to better compete in the global marketplace.

Demographic trends, technological change, increased international competition, a changing workplace, and inadequacy of our U.S. education and training systems have resulted in shortages of skilled workers and an excess of unskilled, hard-to-employ individuals.

A significant proportion of U.S. youth graduate from high school with inadequate basic skills and totally lacking in work-readiness competencies.

Yet the United States is the only major industrial national lacking a formal system for

helping youth make the transition from school to work.

Very little attention is paid in our U.S. educational system to preparing youth for the workplace.

Like our earlier legislation, the bill under consideration today has the goal of expanding the range of education and career options for the 70 to 75 percent of American youth who will not complete a 4-year B.A. degree.

By providing a broad degree of flexibility in establishment of school-to-work systems in States and localities, the legislation builds on successful efforts already undertaken by innovative States and communities—such as those efforts in Wisconsin—while providing Federal guidance on the establishment of a national school-to-work policy.

This legislation would provide development grants to all States for the early planning and development of statewide school-to-work efforts.

The bill further provides one-time, 5-year implementation grants to States who after further along in their school-to-work efforts, to aid in the actual establishment and expansion of State and local school-to-work programs.

The implementation grants, expected to go out to States in waves, have been aptly described by the administration as venture capital—a one-time infusion of Federal assistance that will leverage change in existing programs—ultimately resulting in broad-based change in the way we teach and prepare our youth for the world of work.

At the heart of this system are local partnerships of employers, educators, workers, students, and the community, who will build local school-to-work programs to meet the economic and educational needs of their individual communities.

The active and vital role of employers is stressed throughout the legislation at the State and local levels.

Under the proposal, school-based and work-based learning must be integrated, with students participating in school-to-work programs gaining valuable work experience under the guidance of a workplace mentor.

Career awareness, exploration, and counseling opportunities are encouraged for all students—beginning as early as possible, but no later than in the middle school years—in order that all youth have a sense of the opportunities that lay ahead combined with the right education.

Finally, and most importantly, students completing this program would receive a high school diploma, a certificate of competency in an occupation, entry into appropriate post-secondary education, where appropriate, and/or entry into a skilled, high-paying job with career potential.

Mr. Speaker, I feel that the legislation before us today moves us in the right direction in meeting the needs of non-college-bound youth, whose needs have been so inadequately met in recent years.

I feel it strikes the right balance, involving all the necessary players, at every level; providing maximum flexibility to States and particularly to local programs to craft programs that meet individual community needs; and leveraging change in existing programs through the one-time infusion of new money,

and through waivers of regulatory and statutory provisions in existing Federal education and training programs.

This is not business as usual, and as a result, I support passage of H.R. 2884, and urge my colleagues to do the same.

Mrs. UNSOELD. Mr. Speaker, I enthusiastically support H.R. 2884, the School-to-Work Opportunities Act. As an original cosponsor of this bill, I believe it is high time for us to think more creatively about the lifelong process of education. No longer can we expect our students to move in a nice straight line from elementary school to middle school to high school and then on to a job. Students should be able to experience life in the workplace—and in the business community—before they graduate from high school, not after. I believe this bill takes us in that direction.

The bill provides much-needed funding for States and communities to establish programs that serve the 75 percent of our population without a college degree. Under a provision I inserted, this bill also encourages States to help establish business-education partnerships between local businesses and elementary and middle schools. With the amount of Federal funding for education shrinking over the past 12 years, it's time for us to think about new ways to support our public schools. Business-education partnerships and school-to-work programs are two innovations that make sense—both substantively and financially.

Mr. KREIDLER. Mr. Speaker, I would like to voice my strong support for H.R. 2884, the School To Work Opportunities Act of 1993. This program is long overdue. It will help meet the needs of noncollege bound high school students for career education.

About half of America's young people do not go on to college; 75 percent do not achieve a college degree. Our rapidly changing work force requires the improvement of our students' basic skills to compete in a global economy. They should have access to both academic and vocational education in accordance with their interests, needs, and abilities.

In my State of Washington, the school-to-work concept has already been successfully linking high school students with career opportunities. Students in the Bethel School District are using "Career Paths" that emphasize integration of academic and vocational education. These students are able to gain valuable work experience while going to school. Beginning in the eighth grade, students are encouraged to explore their career interests and start taking classes that relate to those fields. The local community is involved as well, by allowing students into the workplace to experience hands-on learning.

I was proud to cast my vote in favor of the School To Work Opportunities Act. It is time that we respond to the changing needs of our global economy by improving our education system as well as our work force, and by providing our students the skills and opportunities they need to compete.

Mr. GOODLING. Mr. Speaker, I yield back the balance of my time.

Mr. FORD of Michigan. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore (Mr. MONTGOMERY). The question is on the motion offered by the gentleman from

Michigan [Mr. FORD] that the House suspend the rules and pass the bill, H.R. 2884, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. FORD of Michigan. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks, and to include therein extraneous material, on the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

LOW-INCOME HOME ENERGY ASSISTANCE PROGRAM AMENDMENTS

Mr. GONZALEZ. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 3321) to provide increased flexibility to States in carrying out the Low-Income Home Energy Assistance Program, as amended.

The Clerk read as follows:

H.R. 3321

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. INCREASED STATE FLEXIBILITY IN THE LOW-INCOME HOME ENERGY ASSISTANCE PROGRAM.

Section 927 of the Housing and Community Development Act of 1992 (Public Law 102-550) is amended—

(1) in subsection (a)—
(A) by striking the parenthetical phrase; and

(B) by inserting before the period “, except as provided in subsection (d)”;

(2) in subsection (b)—
(A) by striking “such” and inserting in lieu thereof “or receiving energy”; and

(B) by inserting before the period “for any program in which eligibility or benefits are based on need, except as provided in subsection (d)”;

(3) by inserting at the end thereof the following new subsection:

“(d) SPECIAL RULE FOR LOW-INCOME HOME ENERGY ASSISTANCE PROGRAM.—For purposes of the Low-Income Home Energy Assistance Program, tenants described in subsection (a)(2) who are responsible for paying some or all heating or cooling costs shall not have their eligibility automatically denied. A State may consider the amount of the heating or cooling component of utility allowances received by tenants described in subsection (a)(2) when setting benefit levels under the Low-Income Home Energy Assistance Program. The size of any reduction in Low-Income Home Energy Assistance Program benefits must be reasonably related to the amount of the heating or cooling component of the utility allowance received and must ensure that the highest level of assistance will be furnished to those households with the lowest incomes and the highest energy costs in relation to income, taking into

account family size, in compliance with section 2605(b)(5) of the Low-Income Home Energy Assistance Act of 1981 (42 U.S.C. 8624(b)(5))."

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Texas [Mr. GONZALEZ] will be recognized for 20 minutes and the gentleman from Nebraska [Mr. BEREUTER] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Texas [Mr. GONZALEZ].

Mr. GONZALEZ. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 3321, as amended, is designed to give States more flexibility in administering the Low-Income Home Energy Assistance Program [LIHEAP], as that program relates to federally assisted housing. This legislation is an amended version of the bill as originally introduced by Congressman BARNEY FRANK on October 20, 1993. H.R. 3321, as amended, needs to be passed quickly so that States can implement this change for the current heating season.

I am submitting for the RECORD a section-by-section analysis and short summary of H.R. 3321, as amended.

This bill clarifies an interpretation of current housing law that has apparently hindered States in carrying out the LIHEAP program. Some States have interpreted the law as requiring them to provide LIHEAP assistance to a tenant of federally assisted housing without taking into account the amount of any utility allowance that the tenant may also be receiving. H.R. 3321, as amended, would clarify the law to permit States to consider the tenant's utility allowance in determining their LIHEAP assistance.

Specifically, the bill amends section 927 of the Housing and Community Development Act of 1992 to allow States to take into consideration the amount of the heating or cooling component of a utility allowance received by a tenant of federally assisted housing, in determining their LIHEAP benefits. The legislation provides, however, that the size of any reduction in LIHEAP benefits to the tenant must be reasonably related to the amount of the heating or cooling component of the utility allowance received by the tenant.

Currently, section 927 of the 1992 Housing Act prohibits States from reducing or denying LIHEAP payments to tenants of federally assisted housing who are responsible for paying heating or cooling bills. In addition, it requires such tenants to be treated identically with other low-income families eligible for LIHEAP, including those who do not live in assisted housing and who do not receive utility allowances.

Congressman FRANK specifically amended H.R. 3321 to address my concerns that tenants of federally assisted housing not be unfairly disadvantaged by this change in the law. This was done by adding language to the legisla-

tion that strengthens the current law requirement that tenants of federally assisted housing with heating or cooling costs cannot be automatically denied LIHEAP assistance, and by conforming language in the bill to language in the LIHEAP statute that requires that such assistance is to be provided to those households with the lowest incomes and highest energy costs.

I would also like to make clear that this legislation is not intended to permit States, in administering LIHEAP, to establish a priority for funding individuals who do not receive utility allowances, as utility allowances do not always adequately relieve the utility burden of tenants of assisted housing.

As this legislation only amends a housing statute—the 1992 Housing Act—it is within the jurisdiction of the Committee on Banking, Finance and Urban Affairs, which I chair. However, as LIHEAP itself is within the jurisdiction of the Energy and Commerce Committee and the Education and Labor Committee, the respective chairmen of those committees have been advised of this legislation, and they have expressed their support. I would like to introduce into the RECORD at this time letters of support from Chairman DINGELL and Chairman FORD.

Finally, the Congressional Budget Office reviewed H.R. 3321 as introduced and reported that there are no Federal, State, or local costs associated with the bill. I am submitting the CBO estimate for the RECORD at this time.

I therefore urge the adoption of H.R. 3321, as amended.

SECTION-BY-SECTION SUMMARY—H.R. 3321, AS AMENDED

SECTION 1. INCREASED STATE FLEXIBILITY IN THE LOW-INCOME HOME ENERGY ASSISTANCE PROGRAM

Amends section 27 of the Housing and Community Development Act, entitled "Clarification on Utility Allowances," as follows:

(1) Amends section 972(a) to provide that tenants who are responsible for making out-of-pocket payments for utility bills, and who receive utility allowances under certain specified Federally-assisted housing programs, cannot have their eligibility or benefits under other energy assistance programs reduced or eliminated, except as provided for in the new section 927(d) established by this bill.

(2) Amends section 927(b) to provide that tenants described in subparagraph (1) above are to be treated identically with other households eligible for or receiving energy assistance, including in the determination of home energy costs and incomes for any program in which eligibility or benefits are based on need, except as provided in new section 927(d).

(3) Establishes a new section 927(d) to provide that tenants receiving utility allowances under specified Federally-assisted housing programs, who are responsible for paying some or all heating or cooling costs, cannot have their eligibility for the Low-Income Home Energy Assistance Program (LIHEAP) automatically denied.

Allows a State to consider the amount of the heating or cooling component of utility allowances received by such tenants when setting benefit levels under LIHEAP.

Provides that the size of any reduction in LIHEAP benefits must be reasonably related to the amount of the heating or cooling component of the utility allowance received by the tenant, and must ensure that the highest level of assistance will be furnished to those households with the lowest incomes and the highest energy costs in relation to income, taking into account family size, in compliance with section 2605(b)(5) of the Low-Income Home Energy Assistance Act of 1981.

SHORT SUMMARY—H.R. 3321, AS AMENDED

This legislation clarifies current housing law to provide States with more flexibility in the administration of the Low-Income Home Energy Assistance Program (LIHEAP) as that program relates to Federally-assisted housing.

H.R. 3321 amends section 927 of the Housing and Community Development Act of 1992 to allow States to take into consideration the amount of the heating or cooling component of a utility allowance received by a tenant of federally-assisted housing, in determining their LIHEAP benefits.

In order to ensure that tenants of federally-assisted housing are not unfairly disadvantaged by this change in the law, the legislation specifically provides that tenants of federally assisted housing who are responsible for paying some or all of their heating or cooling costs cannot be automatically denied assistance under LIHEAP. In addition, it provides that any reduction in LIHEAP benefits must be "reasonably related" to the amount of the heating or cooling component of the utility allowance. Finally, the legislation conforms with the current LIHEAP statute requirement that assistance is to be provided to those households with the lowest incomes and the highest energy costs.

COMMITTEE ON EDUCATION AND LABOR,

Washington, DC, November 4, 1993.

Hon. HENRY B. GONZALEZ,
Chairman, Committee on Banking, Finance,
and Urban Affairs, House of Representatives,
Rayburn House Office Building,
Washington, DC.

DEAR MR. CHAIRMAN: I understand that the Committee on Banking, Finance, and Urban Affairs may soon consider and seek House floor consideration of H.R. 3321, a bill to provide increased flexibility to States in carrying out the Low-Income Home Energy Assistance Program. As you are aware, the measure has been jointly referred to the Committee on Education and Labor.

This effort to clarify the intent of amendments included in section 927 of the Housing and Community Development Reauthorization Act of 1992, Public Law 102-550, will permit States to more efficiently allocate limited LIHEAP resources among eligible beneficiaries of the program. While amending section 927 of Public Law 102-550, H.R. 3321 would directly establish rules of construction for determination of LIHEAP eligibility. However, in order to expedite consideration of this legislation, I would have no objection to discharging the Committee on Education and Labor, without prejudice to its continued legislative jurisdiction over the Low-Income Home Energy Assistance Program.

With kind regards,
Sincerely,

WILLIAM D. FORD,
Chairman.

COMMITTEE ON ENERGY
AND COMMERCE,

Washington, DC, November 9, 1993.

Hon. HENRY B. GONZALEZ,
Chairman, Committee on Banking, Finance,
and Urban Affairs, Rayburn House Office
Building, Washington, DC.

DEAR MR. CHAIRMAN: Thank you for your letter of November 4, 1993 supporting H.R. 3321, a bill to provide states with useful flexibility to efficiently utilize the limited resources of the Low-Income Home Energy Assistance Program (LIHEAP). As you know, I have long been a supporter of LIHEAP and its help in addressing the heating needs of the old, the disabled, and the working poor.

As you noted, the bill amends language included in the Housing and Community Development Act of 1992 that was designed to ensure that residents of subsidized housing who are receiving utility allowances remain eligible for LIHEAP benefits. As studies have shown, utility allowances alone are not always adequate to meet the heating needs of the residents.

I am satisfied that the changes in H.R. 3321, including your suggested changes to the original text, retain this important safeguard while meeting the concerns of Representative Frank who has led efforts to move H.R. 3321 this year.

After review, I support the efforts to move this bill, as amended, expeditiously on the suspension calendar. Thank you for your attention to this important matter.

Sincerely,

JOHN D. DINGELL,
Chairman.

CONGRESSIONAL BUDGET OFFICE,
Washington, DC, October 25, 1993.

Hon. BARNEY FRANK,
House of Representatives,
Washington, DC.

DEAR CONGRESSMAN: The Congressional Budget Office has reviewed H.R. 3321, a bill to provide increased flexibility to states in carrying out the Low-Income Home Energy Assistance Program (LIHEAP), as introduced on October 21, 1993. CBO estimates there would be no federal, state or local costs associated with this bill. Further, we estimate there would be no direct spending effects; therefore, the bill is not subject to the pay-as-you-go procedures of section 252 of the Balanced Budget and Emergency Deficit Control Act of 1985.

This bill would allow states to reduce the LIHEAP benefit for certain individuals by an amount that is reasonably related to the amount of the heating or cooling component of the utility allowance provided by various housing programs. Under current law, states are not allowed to reduce or eliminate LIHEAP benefits to individuals receiving utility allowances through these programs. As a result, states are paying full LIHEAP benefits to some individuals receiving utility allowances, resulting in these individuals receiving more benefits than they need to pay their energy expenses. This bill would give states the option to reduce LIHEAP benefits for these individuals.

LIHEAP provides federal grants to states to assist low-income persons with their energy bills. This bill would not alter the funds made available to states. If states reduce benefits to certain individuals, these states could increase benefits to others. Federal grants would be unaffected.

If you wish further details on this estimate, we will be pleased to provide them.

The CBO analyst is Cory Oltman who can be reached at 226-2820.

Sincerely,

ROBERT D. REISCHAUER,
Director.

Mr. Speaker, I ask unanimous consent that the gentleman from Massachusetts [Mr. FRANK] be permitted to manage the debate and allocate time.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. FRANK of Massachusetts. Mr. Speaker, I yield myself such time as I may consume.

I appreciate the courtesy the chairman of the full committee has shown to me, as he has to other Members in helping us move this.

Mr. Speaker, this bill is necessitated by an error that I made last year. I think I got it right this time.

In the housing bill that we passed, actually not last year but 2 years ago, we meant to give the States flexibility, so that people who lived in assisted housing and who were otherwise eligible for low income heating assistance could get it. The problem has been that the law was being interpreted to say that if one was in public housing, or assisted housing, they could not get any home heating assistance, even if they had to pay part of their heating bill.

Now, where the individual tenant pays none of the heating bill, it seemed unnecessary for them to get this assistance. We wrote legislation, which was intended to give flexibility, but in the drafting process, I made a mistake. And we wound up with too much rigidity.

Fortunately, that was called to our attention by some people. In fact, some of the Legal Services group on whom I rely for information and whom I ask from time to time for an evaluation, pointed this out as have some others.

We now have a situation where, if we do not move quickly and change this, not only will the States be able to give home heating assistance to these who need it, it will be mandated to some people who do not need it. That is, some people who, in fact, get all of their heating bills paid for as part of their public assistance will get a windfall. That windfall will come out of a limited pot that cost other people money.

I should note, by the way, that this will cost the Federal Government nothing. This bill, because it merely deals with how we allocate funds already appropriated, does not add one cent to the appropriation. It simply provides for a fairer way to distributing money already appropriated for the year.

□ 1600

What this bill does is what we should have done in the first place. It gives the States the flexibility, and what it says is that a State may give partial heating assistance to people who pay

part of their bills, or whatever is appropriate. The home heating issue is an important one. It has not gotten, in my judgment, appropriate funds. It is very important that we do it in the right way, so this is a piece of legislation which corrects a mistake and provides, as it says, State flexibility, and it is flexibility which is geared to need.

Mr. Speaker, I reserve the balance of my time.

Mr. BEREUTER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this Member rises in strong support of the bill, H.R. 3321, as amended. I also express the support of the gentlewoman from New Jersey [Mrs. ROUKEMA] whose statement of support will be included.

This Member also compliments the gentleman from Massachusetts [Mr. FRANK] for leading the efforts to fix this inadvertent problem created during consideration of the 1992 Housing and Community Development Act.

The intent of the legislation is very straightforward. It amends section 927 to give the States added flexibility to consider the amount of assistance provided to residents as part of their rental assistance and to set Low-Income Home Energy Assistance Program [LIHEAP] benefits in a manner that relates to the actual cost of utilities.

To explain, low-income families receive a utility allowance as part of their rental assistance payment. This utility allowance is often insufficient to pay the actual cost of utilities. Until 1992, some States denied LIHEAP to families who qualified for the program because they received a utility allowance. Consequently, Congress passed legislation that required States to provide energy assistance payments under the LIHEAP Program regardless of whether families received utility allowances as well.

The unintended consequence of the 1992 legislation, however, is that now States are compelled to pay families the same dollar amount of LIHEAP assistance regardless of circumstances. As a result, some families who receive both the LIHEAP assistance and the utility allowance receive more assistance than they should receive.

The legislation will rectify this situation by giving States authority to reduce the LIHEAP utility subsidy to individuals who also receive utility payments from other housing programs. It is budget neutral, restores equity to the impact of the program, and simply, makes good sense. This Member urges adoption of H.R. 3312.

Mr. Speaker, I reserve the balance of my time.

Mr. FRANK of Massachusetts. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I simply want to again thank the chairman of the committee for facilitating this, and I also want to note, as an example of cooperation,

this was jointly referred to the Committee on Banking, Finance and Urban Affairs, to the Committee on Education and Labor, and to the Committee on Energy and Commerce, and I appreciate the willingness of the chairs of the Committee on Energy and Commerce and the Committee on Education and Labor to write, as they have, to us saying they have no objection, and in fact support this bill going forward. The bill was jointly referred, but we have the approval of the two committees.

Mrs. ROUKEMA. Mr. Speaker, I rise in support of H.R. 3321 which would amend the Housing and Community Development Act of 1992 with respect to the Low-Income Home Energy Assistance Program.

I want to first commend the gentleman from Massachusetts [Mr. FRANK] for bringing this particular problem to our attention. I also want to commend the chairman for expediting the consideration of this legislation before the winter heating season kicks into full operation.

H.R. 3321 would allow a State to make a LIHEAP payment to a low income tenant of public housing or section 8 housing, which reflects the difference between the tenant's actual utility bill and the utility allowance the tenant receives as part of their Federal assistance.

Historically, most tenants of federally assisted and public housing paid a fixed percentage of their income as rent. The rent usually included utilities.

In the 1980's, many public housing agencies began to meter individual units and required the tenants to assume payment for their own utilities. To offset these additional costs, HUD allowed the PHA's to grant a utility credit against a tenant's rent. These credits, however, very seldom amounted to the exact utility payment.

When the LIHEAP program first went into effect, many States denied payments to certain tenants in federally assisted housing who received utility credits which the States felt were adequate or nearly adequate to cover the out-of-pocket costs to the tenant. The States felt that with the limited funds available for the LIHEAP Program, these double dippers should be restricted from the program.

In response, last year the Congress added a provision in the housing bill which said that if a low-income person was eligible for the LIHEAP payment, the State could not deny any portion of that payment, even if the tenant received a utility credit. The rationale was simply that the credit still did not equal the total utility payment made by the tenant and therefore the LIHEAP payment was necessary.

Since then, States like Massachusetts, which have many low-income tenants eligible for LIHEAP, and have

limited budgets for programs like this, have complained that if a full LIHEAP grant had to be given to each federally assisted tenant, who currently receives a utility credit, there would not be enough funds for families in nonsubsidized housing.

H.R. 3321 would retain the basic requirement of current law but would create a limited exception to permit States greater flexibility in structuring their LIHEAP grants. States would be permitted to consider tenants utility credits when determining or adjusting the amount of LIHEAP benefits provided to eligible tenants who live in federally assisted housing.

In other words, the legislation would permit a State to pay the difference between the utility cost and the utility credit which a tenant receives. The result would be to increase current grant amounts to those already eligible and to make more funds available for eligible families who receive no Federal subsidy at all.

This does have the support of the States and does not appear to be controversial.

I urge the House to pass this legislation.

Mr. BEREUTER. Mr. Speaker, I yield back the balance of my time.

Mr. FRANK of Massachusetts. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore (Mr. MONTGOMERY). The question is on the motion offered by the gentleman from Texas [Mr. GONZALEZ] that the House suspend the rules and pass the bill, H.R. 3321, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. FRANK of Massachusetts. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on H.R. 3321, as amended, the bill just considered and passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

REMOVAL OF NAME OF MEMBER AS COSPONSOR OF H.R. 3325

Mr. FRANK of Massachusetts. Mr. Speaker, I ask unanimous consent to remove my name as a cosponsor of H.R. 3325.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

BLM EXPANSION OF GENE CHAPPIE SHASTA OHV AREA

Mr. VENTO. Mr. Speaker, I move that the House suspend the rules and pass the bill (H.R. 2620) to authorize the Secretary of the Interior to acquire certain lands in California through an exchange pursuant to the Federal Land Policy and Management Act of 1976, as amended.

The Clerk read as follows:

H.R. 2620

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. FINDINGS AND PURPOSE.

(a) FINDINGS.—The Congress finds—

(1) the Bureau of Land Management desires to obtain the lands described in section 3(a) for purposes of an access and staging area being planned in cooperation with the National Park Service;

(2) the lands described in section 3(b) constitute an isolated tract acquired by the United States in 1936 for purposes of a Forest Service fire lookout, but such lands are no longer needed for that or any other National Forest purpose, and all improvements have been removed from such lands;

(3) the lands described in section 3(b) are entirely surrounded by private lands owned by a family one of whose members also owns the lands described in section 3(a); and

(4)(A) the owners of the land described in section 3(a) are willing to transfer those lands to the United States in exchange for the lands described in section 3(b); but

(B) under existing law, such an exchange cannot be accomplished administratively.

(b) PURPOSE.—The purpose of this Act is to authorize the Secretary of the Interior to acquire the lands described in section 3(a) through an equal-value exchange for the lands described in section 3(b).

SEC. 2. AUTHORIZATION FOR EXCHANGE.

Solely for purpose of acquisition by the Secretary of the Interior (on behalf of the United States) of the lands described in section 3(a) through an equal-value exchange pursuant to section 206 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1716), the lands described in section 3(b) shall, for the 36-month period beginning on the date of enactment of this Act, be deemed to be public lands, as defined in section 103(e) of such Act (43 U.S.C. 1702(e)).

SEC. 3. LAND DESCRIPTIONS.

(a) OHV AREA TRACT.—The lands whose acquisition through exchange is specifically authorized by this Act are described as follows: S½SW¼ of section 26, township 33 north, range 7 west, Mount Diablo Base and Meridian, Shasta County, California, comprised of 80 acres, more or less.

(b) DELTA POINT LOOKOUT TRACT.—The lands which under this Act are deemed to be public lands for purposes of exchange is a parcel described as follows: Mount Diablo Meridian, township 36 north, range 5 west, section 23, SW¼NW¼SE¼, NW¼SW¼SE¼, SE¼NE¼SW¼, NE¼SE¼SW¼, comprised of 40 acres, more or less.

SEC. 4. ACQUISITION.

Section 104 of the Everglades National Park Protection and Expansion Act of 1989 (16 U.S.C. 410r-8) is amended by adding at the end the following new subsection:

“(k)(1) Notwithstanding any other provision of this Act, the Secretary is authorized to use funds appropriated pursuant to this Act, including any available funds appropriated to the National Park Service for construction in the Department of the Interior

and Related Agencies Appropriations Acts for fiscal years 1991 through 1994 for project modifications by the Army Corps of Engineers, in such amounts as determined by the Secretary, to provide Federal assistance to the State of Florida (including political subdivisions of the State) for acquisition of lands described in paragraph (4).

"(2) With respect to any lands acquired pursuant to this subsection, the Secretary may provide not more than 25 percent of the total cost of such acquisition.

"(3) All funds made available pursuant to this subsection shall be transferred to the State of Florida or a political subdivision of the State, subject to an agreement that any lands acquired with such funds will be managed in perpetuity for the restoration of natural flows to the park or Florida Bay.

"(4) The lands referred to in paragraph (1) are those lands or interests therein adjacent to, or affecting the restoration of natural water flows to, the park or Florida Bay which are located east of the park and known as the Frog Pond, Rocky Glades Agricultural Area, and the Eight-and-One-Half Square-Mile Area."

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Minnesota [Mr. VENTO] will be recognized for 20 minutes and the gentleman from California [Mr. CALVERT] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Minnesota [Mr. VENTO].

GENERAL LEAVE

Mr. VENTO. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on H.R. 2620, the legislation now under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

Mr. VENTO. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 2620, introduced by Mr. MATSUI and Mr. HERGER, both of California, would authorize but not require the Secretary of the Interior to carry out an exchange involving lands in northern California. The Natural Resources Committee amended the bill to add provisions dealing with Everglades National Park, in Florida, desired and supported by the entire Florida House and Senate delegations.

The California provisions of the bill involve an isolated tract of nationally owned lands that were acquired a half century ago for use as a forest service fire lookout. They are no longer used for that purpose, all improvements have been removed, and the site is no longer needed for any other national forest purpose.

This tract is located in the middle of private lands owned by a family that also owns another parcel of land which the Bureau of Land Management is considering acquiring, for use in connection with an off-road-vehicle recreation area. The family evidently is willing to consider transferring that parcel to the United States, but would prefer to do so through an exchange for

the isolated tract in the middle of the family holdings.

The bill would authorize, but not require, such an exchange by providing that for a 3-year period, and solely for purposes of exchange, the surrounded tract would be considered as being BLM lands. This is essentially a house-keeping measure, and is not controversial.

The Florida provisions would authorize the Secretary of the Interior to use funds appropriated pursuant to the 1989 Everglades Expansion Act—Public Law 101-229—for flood control in the Rocky Glades agricultural area, Frog Pond, and 8½-square-mile area to provide Federal assistance to the State of Florida for acquisition of these lands.

The 1989 act authorized the transfer of funds from the National Park Service to the U.S. Army Corps of Engineers for constructing flood control and water modification projects in the three named areas. Studies now show that acquiring these lands and flooding them to restore the natural water flows to the Everglades National Park and Florida Bay would be the most beneficial in terms of the overall park restoration efforts. Approximately \$17.4 million remains unobligated of the approximately \$22.7 million that had been appropriated to the National Park Service for the purposes of the 1989 act. The State of Florida, the south Florida water management district and Dade County have agreed to form a partnership to provide funding for a large part of the proposed land acquisition. Authorizing the use of already appropriated funds to assist in the effort will provide needed funds to ensure that the land acquisition process can go forward and provides the Secretary the ability to require that the lands thus acquired will be managed for the benefit of the park.

Since the enactment of the 1989 legislation, the Everglades and Florida Bay have experienced significant decline. The lack of water flow to and through the park, as well as the nature of that flow, has caused severe deterioration of the indigenous plant and animal life in the park and the bay. A field hearing held in the Florida Keys in July 1993 highlighted the urgent need to mitigate the severe damage. Restoring the natural flows through the Everglades to Florida Bay is a priority both for the preservation of this unique resource and for those economically dependent upon a healthy Everglades ecosystem.

The bill stipulates that the Federal contribution may not exceed 25 percent of the total cost of the land acquisition, and requires that the lands so acquired must be managed for the restoration of natural water flows to the park or Florida Bay. The Federal Government will neither acquire the land directly nor hold title to the property, but the Federal interest is protected by

the provisions ensuring that these lands will be managed for the benefit of the park and Florida Bay.

I participated in the field hearing in July and was impressed by the willingness of all parties—local, State, and Federal agencies as well as interested business persons and private citizens—to work together to restore the Everglades ecosystem. The participation of the entire Florida delegation has been critical in this effort, particularly in seeking this authorization. Their persistence and hard work certainly speaks to the importance of a healthy Everglades to Florida's environment and economy. I support authorizing the reprogramming of these funds, and I urge my colleagues support this positive first step in restoring the Everglades ecosystem.

Mr. Speaker, I reserve the balance of my time.

Mr. CALVERT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 2620 and commend the gentlemen from California [Mr. HERGER] and [Mr. MATSUI], for their hard work. As fully explained by the chairman, the gentleman from California [Mr. VENTO], H.R. 2620 will permit an equal-value land trade involving the Forest Service, BLM, and private owners in northern California. This legislation will allow the BLM to add a critical piece of property to the Gene Chappie/Shasta OHV Area that will serve as a staging area for off-road vehicle use. Under current regulations, this three-way trade is not possible and therefore this legislation is necessary to complete this trade.

However, H.R. 2620 also includes a nongermane amendment that was added at full committee which authorizes \$25 to \$30 million to acquire buffer zones along the eastern edge of Everglades National Park. The committee has never held a hearing on this legislation and we are uncertain regarding the merits and necessity of this proposal.

As a general rule, I oppose establishing buffer zones around parks and I do not see a good reason to spend limited Federal dollars to acquire lands outside of parks when we face a backlog of \$1 to \$2 billion to acquire previously authorized lands inside of park boundaries.

With the exception of the nongermane amendment, I support H.R. 2620.

Mr. MATSUI. Mr. Speaker, I rise in support of H.R. 2620, legislation providing for the Bureau of Land Management's expansion of the Gene Chappie Shasta OHV Area. Before discussing the merits of this legislation, I would like to begin by thanking Chairman VENTO and the members of the Subcommittee on National Parks, Forests, and Public Lands for their hard work on this legislation. I would also like to thank the committee and subcommittee staff for their hard work, and I would particularly

like to mention Mr. Stanley Sloss, counsel to the subcommittee, for his fine work.

Representative HERGER and I introduced H.R. 2620, legislation which will facilitate a land transfer in northern California. This land transfer will allow the Bureau of Land Management [BLM] to add a critical piece of property to the Gene Chappie/Shasta OHV Area.

The intent of this legislation is to allow a parcel of land which was acquired by the Forest Service to be exchanged by BLM in order to achieve the land exchange. The Forest Service land is an isolated tract which was acquired for the Delta Point Lookout on April 20, 1936, under the Emergency Civil Works Act of March 31, 1933. The lookout is no longer needed, and was removed from the parcel, returning the land to its former unimproved status.

The Forest Service parcel is entirely surrounded by private lands, which are owned by the Cibula family of northern California. Consequently, the Cibulas have long been interested in acquiring this parcel. By the same token, the Cibula family owns the parcel of land sought by BLM for purposes of expanding the Gene Chappie/Shasta OHV Area. The Cibulas will consider giving up their parcel only if they can obtain the Forest Service parcel their property surrounds. They will not accept a cash transaction, nor will they accept other offered lands. Therefore, the only apparent way for BLM to acquire the parcel for the OHV area is to be able to offer the Cibulas the land acquired by the Forest Service.

Although the Forest Service is fully willing and cooperative in the effort, under existing legal authorities the Forest Service is authorized to dispose of the acquired parcel only in return for lands which become part of the National Forest System. Since the Cibula parcel is needed for a BLM public domain project, there is no apparent way to achieve the shared goals of the Forest Service, BLM, and the Cibulas under existing law.

H.R. 2620 will allow the Cibulas to work with the two Federal agencies in order to work out the mutually agreeable transaction: the Cibulas will receive the Forest Service parcel in exchange for their family parcel, which will be received by BLM.

This legislation does not require the exchange to take place; it merely allows the parties to proceed should terms agreeable to BLM, the Forest Service, and the Cibulas be established. Our legislation also recognizes all the Federal legal requirements for land exchanges.

Mr. Speaker, our legislation should not be controversial; it merely serves as a mechanism in order to allow BLM, the Forest Service, and a private citizen to exchange properties to the advantage of all concerned, including the Federal Government. Again, I thank the subcommittee and committee members and staff, and I urge my colleagues to pass this legislation today.

Mr. SHAW. Mr. Speaker, I am pleased that the House has recognized the significance of H.R. 2620, the BLM expansion of the Gene Chappie/Shasta OHV Area, and approved it today. Included in this legislation is an authorization of land acquisition efforts to aid in restoring and protecting Florida Bay. I commend the Committee on Natural Resources for their work on this vital initiative.

The Federal, State, and local partnership plan indicates that land must be purchased in south Dade County, including Frog Pond, the Rocky Glades Agricultural Area, and the 8½-square-mile area. Acquisition of these areas is necessary so that canal stages and groundwater levels can be raised to natural levels, wet season ponding can return, and gradual sheetflow restored over a 6–9 month hydroperiod as compared to the current 0–1 month.

Based on the enormous financial undertaking of this effort, it is imperative that Federal, State, and local agencies collaborate to obtain the funds necessary for land acquisition.

This legislation authorizes the Department of the Interior to transfer funding that originally was intended to be allocated to the Corps of Engineers to build seepage canals and a pump station for flood control to go instead toward land acquisition efforts.

The land acquisition initiative is fundamental to the recovery and sustained health of Florida Bay. I am pleased that we are one step closer to saving what was once—and can be again—a beautiful body of water and one of Florida's most vital natural resources.

Mr. JOHNSTON of Florida. Mr. Speaker. I am pleased to rise today in support of a land acquisition project to halt the environmental crisis in Florida Bay. H.R. 2620 would authorize the use of funds that have been appropriated under the 1989 Everglades National Park Protection and Expansion Act to provide Federal assistance for this plan.

Most scientists agree that Florida Bay's ill health is produced by a synergy of factors that originate farther up in the ecosystem. H.R. 2620 would authorize the Federal Government to contribute 25 percent of the necessary resources to purchase private lands in South Dade County that are commonly known as the Frog Pond, the Rocky Glades Agricultural Area, and the 8½ Square Mile Area. The State of Florida, Dade County, and the South Florida Water Management District will contribute the remaining 75 percent. Moreover, as the Everglades Expansion Act authorizes the Park Service to transfer funds to the Army Corps of Engineers for the construction of flood control structures for these lands, this would provide up to \$18.7 million for the Federal share.

Once this acquisition is complete, these lands would be flooded for the purpose of restoring historic water flows into the bay, thus returning healthy hydrologic conditions. The Department of the Interior, the Park Service, and the Army Corps of Engineers agree that this method is the best and most effective plan of action.

Florida Bay is actually the tail end of a system that is plagued with water flow problems, from the Kissimmee River origin to the plankton-choked waters off the Florida Keys. Florida's historically rapid development and our ignorance of the importance of the greater Everglades ecosystem's water flow is the cause of this costly mismanagement. Florida has seen the loss of half its original wetlands and an ongoing dieoff of seagrass meadows, mangrove habitats, sponges, shellfish, and other marine life. When Floridians speak of these changes, they often point to the now-familiar "dead zone" area of the bay, where nothing survives but acres of algae blooms.

The crisis in Florida Bay affects Floridians not only as a tragic environmental loss but as an economic nightmare as well. Loss of the seagrass habitat alone already has impacted many economically important fish and shellfish species; lobster harvests alone have an annual dockside value of \$24 million. The bay ecosystem has not only supported the livelihood of thousands of commercial and sport fishermen, but has attracted millions of tourists, promoting hundreds of millions of dollars of spending in the State each year.

□ 1610

Mr. CALVERT. Mr. Speaker, I have no requests for time, and I yield back the balance of my time.

Mr. VENTO. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore (Mr. MONTGOMERY). The question is on the motion offered by the gentleman from Minnesota [Mr. VENTO] that the House suspend the rules and pass the bill, H.R. 2620, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

The title of the bill was amended so as to read: "A bill to authorize the Secretary of the Interior to acquire certain lands in California through an exchange pursuant to the Federal Land Policy and Management Act of 1976, and for other purposes."

A motion to reconsider was laid on the table.

CONVEYING CERTAIN LANDS IN CAMERON PARISH, LA

Mr. VENTO. Mr. Speaker, I move to suspend the rules and pass the Senate bill (S. 433) to authorize and direct the Secretary of the Interior to convey certain lands in Cameron Parish, LA, and for other purposes, as amended.

The Clerk read as follows:

S. 433

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. CONVEYANCE OF LANDS.

(a) IN GENERAL.—Subject to the limitations set forth in this section, the Secretary of the Interior (hereinafter in this Act referred to as the "Secretary") is directed to convey by quitclaim deed and without monetary consideration, all right, title, and interest of the United States in and to certain lands located in Cameron Parish, Louisiana, described as section 32, Township 15 south, Range 10 West, Louisiana Meridian, as depicted on the official plat of survey on file with the Bureau of Land Management, to the West Cameron Port Commission for use as a public port facility or for other public purposes. As used in this subsection, the term "other public purposes" means governmental or public welfare purposes (including, but not limited, to schools and roads) within the authority of a unit of local government under the laws of the State of Louisiana, and includes a commercial use by the West Cameron Port Authority of lands conveyed by

the United States pursuant to this Act so long as the revenue from such use is devoted to such governmental or public welfare purposes.

(b) **RESERVATION OF MINERALS.**—The United States hereby excepts and reserves from the provisions of subsection (a) all minerals underlying the lands, including the right to enter and remove same.

(c) **REVERSION TO THE UNITED STATES.**—If the lands conveyed by the United States pursuant to this Act cease to be operated by the West Cameron Port Authority for use as a public port facility or for other public purposes, such lands shall revert to the United States: *Provided*, That the lands shall revert if the Secretary determines that such lands, or any portion thereof, have become contaminated with hazardous substances (as defined in the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (42 U.S.C. 9601 and following)).

(d) **RETENTION OF PROPERTY FOR COAST GUARD.**—The Secretary, after consultation with the Coast Guard and the West Cameron Port Authority, shall except and reserve from such conveyance all right, title, and interest to approximately 3.0 acres of land known as the Calcasieu Pass Radio Beacon Site used by the Coast Guard, along with any improvements thereon, for the continued use and benefit of the Coast Guard.

(e) **RETENTION OF OTHER ENCUMBRANCES.**—(1) The Secretary shall not convey any right, title, or interest held by the United States on the date of enactment of this Act in or to the following encumbrances, as identified on the map referred to in section 2—

(A) a permit granted to the United States Army to install and maintain an automatic tide gauge for recording storm and hurricane tides; and

(B) height restrictions in relation to the radio beacon tower.

The Secretary, after consultation with the Coast Guard, may include in the deed of conveyance any other restrictions the Secretary determines necessary for the benefit of the Coast Guard, including, but not limited to restrictions on height of structures, and requirements to shield seaward facing lights.

SEC. 2. LETTERMAN-LAIR COMPLEX AT PRESIDIO.

The Secretary of the Interior is authorized to negotiate and enter into leases, at fair market rental and without regard to section 321 of chapter 314 of the Act of June 30, 1932 (40 U.S.C. 303b), for all or part of the Letterman-Lair complex at the Presidio of San Francisco to be used for scientific, research or educational purposes. For 5 years from the date of enactment of this section, the proceeds from any such lease shall be retained by the Secretary and used for the preservation, restoration, operation and maintenance, improvement, repair and related expenses incurred with respect to Presidio properties. For purposes of any such lease, the Secretary may adjust the rental by taking into account any amounts to be expended by the lessee for preservation, maintenance, restoration, improvement, repair and related expenses with respect to the leased properties.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Minnesota [Mr. VENTO] will be recognized for 20 minutes, and the gentleman from California [Mr. CALVERT] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Minnesota [Mr. VENTO].

GENERAL LEAVE

Mr. VENTO. Mr. Speaker, I ask unanimous consent that all Members may

have 5 legislative days in which to revise and extend their remarks on the measure presently under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

Mr. VENTO. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, S. 433 as amended would do two things. First, it would direct the transfer of certain lands in Cameron Parish, LA, to a local port authority so that they may be used in connection with development of public port facilities. Second, it would authorize the Secretary of the Interior to lease certain properties at the Presidio, in San Francisco, CA.

The Cameron Parish provisions are similar to ones passed by the House in the last Congress on which legislative action was not completed. That part of the bill involves about 162 acres located approximately 1 mile north of the Gulf of Mexico that were withdrawn in 1875 for use by the Coast Guard, which now uses only a portion of the site and has relinquished the rest back to management by the Bureau of Land Management. Cameron Parish desires to develop a public port facility, including commercial docking facilities, warehouses and offices, and a community industrial park as well as recreational facilities such as boat-launching areas and a marina. Under the bill, the transfer would be limited to the surface estate and would be made without compensation. The transferred lands could be used only as a public port facility or for other public purposes. The United States would retain approximately 3 acres for use by the Coast Guard.

S. 433 was amended by the Natural Resources Committee to authorize the Secretary of the Interior to lease certain buildings at the Presidio of San Francisco. This stop-gap interim authority is needed in order to secure tenants for these buildings and reduce the costs to the Federal Government of operating and maintaining the Presidio.

The Presidio of San Francisco is a 1,400 acre military base located at the base of the Golden Gate Bridge in San Francisco. It contains a wealth of natural, historical, and recreational resources including over 500 historic buildings representing 220 years of military history, beautiful coasts, and rare plant species in the midst of a densely populated metropolitan area. On October 1, 1994, the Presidio will be transferred from the U.S. Army to the National Park Service to be administered as part of the Golden Gate National Recreation Area [GGNRA]. This transfer is a result of a 1972 law which required the Presidio to be transferred to the National Park Service when it was determined to be excess to the Army's needs.

S. 433 as amended would authorize the Secretary of the Interior to nego-

ciate lease agreements and secure tenants for the Letterman-Lair complex of buildings. This complex contains approximately 50 buildings including a hospital and a state-of-the-art biological research institute. These buildings could be leased for a substantial monthly sum and the proceeds could be used for defraying other costs associated with the Presidio. The National Park Service has received inquiries from prospective tenants who are interested in leasing this space but negotiations cannot begin in earnest until the National Park Service has the authority to negotiate and enter into a lease.

Mr. Speaker, the transition of the Presidio from a military base to an urban national park is a challenging task which will require our best efforts in order to make it a success. The Natural Resources Committee will be considering comprehensive legislation next session concerning the future management and financing of the Presidio. The provision in S. 433 is a necessary interim step which has the support from both sides of the aisle and from the administration. I urge its passage today.

Mr. Speaker, I reserve the balance of my time.

Mr. CALVERT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of S. 433 which has been fully explained by Chairman VENTO.

S. 433 would direct the Interior Department to transfer lands in West Cameron Parish, LA, to the West Cameron Port Commission. This transfer would allow the development of a public port facility and increased recreational opportunities such as a marina, park areas, and fishing piers.

I would like to thank Congressman JIMMY HAYES for his hard work on this win-win legislation which affects his district. Likewise, I would like to congratulate Chairman VENTO for agreeing to move this legislation forward.

I urge my colleagues to support S. 433.

Mr. HAYES. Mr. Speaker, the passage of this bill, S. 433, the Cameron Parish lands conveyance, is something for which the good people in Cameron Parish, LA, have been waiting a long time.

This area, commonly referred to as Monkey Island, is located 1 mile north of the Gulf of Mexico in southwestern Louisiana, and bordered by the Calcasieu Ship Channel and the Calcasieu Pass. This bill passed both Houses last year, in the Senate, as a stand-alone bill, and in the House, as part of S. 3100, which also included the Bodie Protection Act, and the Cave Creek Canyon Act. Unfortunately, time left at the end of the session did not permit reconciliation of the different House and Senate versions.

I introduced the bill in the House this year as H.R. 1139, and last Congress as H.R. 5712. I have been working with Cameron officials since I came to Congress in 1987 to convey the land.

A small, 3-acre area of the Monkey Island tract once housed a Coast Guard radio beacon station. This area has been unused for over a decade, but, under the bill, would be retained by the Coast Guard. The remaining 155 acres, according to local Cameron officials, has been unused this century. The West Cameron Port Commission would like to develop a public port facility on this land.

Cameron is a town that has been hit particularly hard by the oil and gas slump. The residents of this area have kept their economy above water by relying on the fisheries, and the recreation and tourism industries. Development of a public use port facility would allow Cameron Parish to provide increased recreational opportunities through boat launching facilities, a marina, fishing piers, and park areas.

In addition, the port would provide a strong economic stimulus for the area through the development of a commercial docking facility, port commission offices, port-related cargo warehouse, facilities and a community industrial park.

Cameron Parish has worked since 1983 to obtain this land so that they can put it to good use. The passage of this bill is essential in making the hopes of the people of this area a reality.

I would like to thank Chairman MILLER and Chairman VENTO for their assistance in this effort; I stand ready to assist them in any way necessary to ensure that this bill is signed into law.

Mr. CALVERT. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. VENTO. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Minnesota [Mr. VENTO] that the House suspend the rules and pass the Senate bill, S. 433, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the Senate bill, as amended, was passed.

A motion to reconsider was laid on the table.

AMENDING ACT ESTABLISHING GOLDEN GATE NATIONAL RECREATION AREA

Mr. VENTO. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 3286) to amend the Act establishing Golden Gate National Recreation Area to provide for the management of the Presidio by the Secretary of the Interior, and for other purposes, as amended.

The Clerk read as follows:

H.R. 3286

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. LETTERMAN-LAIR COMPLEX AT PRESIDIO.

The Secretary of the Interior is authorized to negotiate and enter into leases, at fair

market rental and without regard to section 321 of chapter 314 of the Act of June 30, 1932 (40 U.S.C. 303b), for all or part of the Letterman-LAIR complex at the Presidio of San Francisco to be used for scientific, research or education purposes. For 5 years from the date of enactment of this section, the proceeds from any such lease shall be retained by the Secretary and used for the preservation, restoration, operation and maintenance, improvement, repair and related expenses incurred with respect to Presidio properties. For purposes of any such lease, the Secretary may adjust the rental by taking into account any amounts to be expended by the lessee for preservation, maintenance, restoration, improvement, repair and related expenses with respect to the leased properties.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Minnesota [Mr. VENTO] will be recognized for 20 minutes, and the gentleman from California [Mr. CALVERT] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Minnesota [Mr. VENTO].

GENERAL LEAVE

Mr. VENTO. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill presently under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

Mr. VENTO. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this is the technical amendment bill that really repeats an earlier action in terms of the Cameron Parish, but we want to put it in two forms, and this is the major bill. We obviously would like it to be passed and considered by the Senate. It is an important provision.

Mr. Speaker, in terms of further explanation of the content and the importance, I yield such time as she may consume to the gentlewoman from California [Ms. PELOSI], who has provided such positive leadership in terms of this important land policy issue in her district.

Ms. PELOSI. Mr. Speaker, I thank Chairman VENTO for his diligence and speed in bringing H.R. 3286 before us today. I particularly also want to commend the majority and minority staff for their cooperation in helping make it possible for us to address in a timely fashion the needs of the Presidio base conversion. Also I am especially happy to be joined by my colleague from California [Mr. LANTOS] and I want to thank him for his assistance on this important project. I appreciate all of the support for the Presidio conversion, and particularly the efforts to seek the necessary short-term authority for the National Park Service.

This measure includes language for the purpose of authorizing the National Park Service to lease its major tenant facility at the Presidio—the Letterman-Lair complex. To address

the longer term management needs of the Presidio, I have introduced legislation (H.R. 3433) to create a public benefit corporation to achieve maximum potential in real estate management and economic viability. The joint structure would keep essential park activities under the purview of the National Park Service while the corporation would develop and manage real estate and financing activities at the park. H.R. 3286 and S. 433 are considered first steps toward accomplishing this goal.

Early lease of the Letterman-Lair facility at the Presidio would accelerate the pace of conversion from post to park by engaging a high-quality tenant at this site. In order to create an early stream of revenue to sustain the Presidio and to reduce the need for Federal support, it is critical to secure a major tenant at Letterman.

The revenues generated from a major lease, or leases, at the site would generate a sizable income for the park and would also contribute toward the rehabilitation of the facility. It is an important and necessary step at this stage of the park planning process.

The final Presidio plan is expected to be approved by April 1. Ideally, the National Park Service will be prepared to engage a lease for Letterman-Lair coincidental with this date, or by the time of its transfer from the Army next spring.

The primary historic use of the Letterman complex as a science center will continue. Its new focus will be on scientific research and education to improve human and environmental health. Programs will be instituted to create a better understanding of the relationship of health and the environment—in an important emerging field where new approaches are required to meet the human health needs of the next century and to improve our response to difficult environmental problems.

I hope my colleagues will join in supporting this measure. It is essential to generate income from the Presidio and to enhance its self sustainability. I believe we can create at the Presidio a double success: a military base closure that saves money while providing a public benefit. Thank you for supporting H.R. 3286.

□ 1620

Mr. CALVERT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise to be recognized on H.R. 3286, a bill to authorize the Secretary of the Interior to lease the Letterman-Lair hospital complex at the Presidio of San Francisco and to retain receipts from such leases to offset Federal costs.

Mr. Speaker, many persons, on both sides of the aisle, have expressed doubt about the \$1.2 billion draft plan released by the National Park Service

last month which details their plans for converting the Presidio into a park. Beyond the question of whether the Park Service mission should be expanded to include medical research and international cultural affairs, it is a plan the American taxpayers simply cannot afford.

Unfortunately, because the National Park Service is now well over a year behind on their planning, and the Army is scheduled to depart the Presidio in less than 1 year, we in Congress are facing a crisis of hundreds of vacant buildings in the Presidio next fall with no way to pay for it.

Therefore, I agree that this stopgap measure we are acting on today is essential. Because it does not restrict policy options to address important questions at the Presidio over the long term, I do not intend to oppose it.

I wish to commend both Ms. PELOSI and Chairman MILLER for listening to our concerns on this matter and wish to assure them that we will continue to constructively pursue appropriate long-term options to save important national treasures at the Presidio.

Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. VENTO. Mr. Speaker, I yield such time as he may consume to the gentleman from California [Mr. LANTOS], a supporter of the bill and a leader in working with the problems with the GGNRA just last year.

Mr. LANTOS. Mr. Speaker, I want to thank the gentleman from Minnesota [Mr. VENTO], the distinguished chairman, and the gentleman from California [Mr. MILLER], the chairman, and our Republican friends for cooperating on this matter. I particularly want to express my appreciation and admiration for my colleague, the gentleman from California [Ms. PELOSI], who has taken the lead on this issue as, indeed, she has taken the lead on so many San Francisco issues.

I will not repeat the reasons for the importance of passing this legislation. It has bipartisan support. It will be important in terms of saving money for the American taxpayer, and it will provide significant new opportunities for the constructive use of these very important facilities.

I urge all of my colleagues to support the legislation.

Mr. VENTO. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I wanted to thank the gentleman from California [Mr. LANTOS] for his role in GGNRA, a bill passed in the last session on the Phleger properties, was a very key parcel, and he carried that measure and did very well with it in the House, and finally it was signed into law.

Mr. Speaker, this is a reasonable bill. It is limited to dealing with the likelihood of the Lair-Letterman lease from the University of California. I hope the

Park Service is successful with it. They need this authority.

I urge my colleagues to support it.

Mr. Speaker, H.R. 3286 as amended is a bill which provides interim authority to the Secretary of the Interior to lease certain buildings at the Presidio of San Francisco. This stopgap interim authority is needed in order to secure tenants for these buildings and reduce the costs to the Federal Government of operating and maintaining the Presidio.

The Presidio of San Francisco is a 1,400-acre military base located at the base of the Golden Gate Bridge in San Francisco. It contains a wealth of natural, historical, and recreational resources, including over 500 historic buildings representing 220 years of military history, beautiful coasts, and rare plant species in the midst of a densely populated metropolitan area. On October 1, 1994, the Presidio will be transferred from the U.S. Army to the National Park Service to be administered as part of the Golden Gate National Recreation Area [GGNRA]. This transfer is a result of a 1972 law which required the Presidio to be transferred to the National Park Service when it was determined to be excess to the Army's needs. The Golden Gate National Recreation Area is currently the most visited unit of the National Park System, and the addition of the Presidio will provide millions of national and international visitors with the opportunity to enjoy and learn from this truly unique area.

H.R. 3286, introduced by Representative NANCY PELOSI, would provide authority to the Secretary of the Interior to negotiate lease agreements and secure tenants for the buildings at the Presidio. The bill was amended by the Natural Resources Committee to focus that authority on the Letterman-Lair complex of buildings. The Letterman-Lair complex contains approximately 50 buildings including a hospital and a state-of-the-art biological research institute. These buildings could be leased for a substantial monthly sum and the proceeds could be used for defraying other costs associated with the Presidio. The National Park Service has received inquiries from prospective tenants who are interested in leasing this space but negotiations cannot begin in earnest until the National Park Service has the authority to negotiate and enter into a lease.

Mr. Speaker, the transition of the Presidio from a military base to an urban national park is a challenging task which will require our best thinking in order to make it a success. The Natural Resources Committee will be considering comprehensive legislation next session concerning the future management and financing of the Presidio. H.R. 3286, as amended, is a necessary interim step which has bipartisan support of Members and the support of the administration. I urge its passage today.

Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore (Mr. MONTGOMERY). The question is on the motion offered by the gentleman from Minnesota [Mr. VENTO] that the House suspend the rules and pass the bill, H.R. 3286, as amended.

The question was taken; and (two-thirds having voted in favor thereof)

the rules were suspended and the bill, as amended, was passed.

The title of the bill was amended so as to read: "A bill to authorize the Secretary of the Interior to lease certain properties at the Presidio of San Francisco, California."

A motion to reconsider was laid on the table.

OLD FAITHFUL PROTECTION ACT OF 1993

Mr. LEHMAN. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 1137) to amend the Geothermal Steam Act of 1970 (30 U.S.C. 1001-1027), and for other purposes, as amended.

The Clerk read as follows:

H.R. 1137

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Old Faithful Protection Act of 1993".

SEC. 2. FINDINGS AND PURPOSES.

(a) FINDINGS.—The Congress finds that—
(1) Yellowstone National Park is a unique and irreplaceable national and international treasure and part of one of the few remaining undisturbed hydrothermal systems in the world;

(2) there is a risk that unrestricted groundwater use or hydrothermal or geothermal resource development adjacent to Yellowstone National Park in the States of Montana, Wyoming, and Idaho will interfere or adversely affect the hydrothermal and geothermal features of such Park or the management of relevant mineral resources;

(3) further research is needed to understand the characteristics of the protected systems and features and the effects of development on such systems and features on lands outside of Yellowstone National Park but within the Yellowstone Protection Area, as such area is defined in this Act;

(4) preservation and protection, free from injury or impairment, of the hydrothermal system associated with and the features within Yellowstone National Park is a benefit to the people of the United States and the world;

(5) cooperation between the United States and the States of Montana, Idaho, and Wyoming to protect and preserve Yellowstone National Park is desirable; and

(6) as a settlement of litigation concerning water rights, including the reserved water rights of the United States associated with units of the National Park System in Montana, the Department of the Interior and the Department of Justice, on behalf of the United States, and a Compact Commission, on behalf of the State of Montana, have developed a Compact that, when ratified by the State and signed by the Secretary of the Interior and the Attorney General of the United States, will constitute such a settlement of litigation concerning matters within its scope and which, in Article IV, also establishes a program for regulation of development and use of groundwater in areas adjacent to Yellowstone National Park.

(b) PURPOSES.—The purposes of this Act are—

(1) to require the Secretary to take the necessary actions to preserve and protect the hydrothermal system associated with, and the hydrothermal and geothermal features

within, Yellowstone National Park from injury or impairment by protecting the Federal reserved water rights of Yellowstone National Park;

(2) to provide a framework for management by the States of Montana, Wyoming, and Idaho of regulated resources outside of but significantly related to Yellowstone National Park to the extent such States implement appropriate approved programs for such management that are adequate to preserve and protect, free from injury or impairment, the protected systems and features;

(3) to authorize, as provided in section 8, approval of Article IV of the Compact as such an appropriate State program; and

(4) to require relevant research.

SEC. 3. DEFINITIONS.

For purposes of this Act:

(1) The term "Secretary" means the Secretary of the Interior.

(2) The term "Yellowstone Protection Area" means the area in Montana, Idaho, and Wyoming identified on the map entitled "Yellowstone Protection Area", numbered 20036, and dated May 1993, and any modifications thereof as may be made under section 7.

(3) The term "protected systems and features" means the hydrothermal and geothermal systems and hydrothermal and geothermal features associated with Yellowstone National Park.

(4) The term "regulated resources" means—

(A) geothermal steam and associated geothermal resources, as defined in section 2(c) of the Geothermal Steam Act of 1970 (30 U.S.C. 1001(c)); and

(B) hydrothermal resources.

(5) The term "geothermal well" means a well or facility producing or intended to produce regulated resources.

(6) The term "hydrothermal system" means a groundwater system, including cold water recharge and transmission and warm and hot water discharge.

(7) The term "hydrothermal resources" means groundwater with a temperature in excess of 59 degrees Fahrenheit and any other groundwater that, on the basis of research pursuant to section 6, and, in a State with an approved State program, pursuant to the procedures in such approved State program, is determined to have characteristics that indicate it may be directly related to the protected systems and features.

(8) The term "approved State program" means a program of Montana, Idaho, or Wyoming that has been submitted to the Secretary and has been approved pursuant to this Act.

(9) The term "Compact" means the water rights compact ratified in 1993 by the State of Montana through enactment of H.B. 692.

(10) Except as otherwise provided in this Act, terms used in this Act shall have the same meaning as in the Geothermal Steam Act of 1970.

SEC. 4. RESTRICTION ON FEDERAL LANDS.

The Geothermal Steam Act of 1970 (30 U.S.C. 1001 and following) is amended by adding at the end thereof the following new section:

"Sec. 30. (a) The Congress hereby declares that—

"(1) Yellowstone National Park possesses numerous hydrothermal and geothermal features, including Old Faithful geyser and approximately 10,000 other geysers and hot springs, and warrants designation as a significant thermal feature unto itself;

"(2) the establishment of the Park in 1872 reserved to the United States a water right

which includes a right with respect to groundwater (including the water in the hydrothermal system supporting such features) necessary to preserve and protect such features for the benefit of future generations; and

"(3) Federal legislation is desirable to protect these Federal water rights from possible injury or damage.

"(b) The Congress hereby declares that any use of, or production from, any existing geothermal well, as such term is defined in section 3(5) of the Old Faithful Protection Act of 1993, or any exploration for, or development of, any new geothermal well or any facility related to the use of geothermal steam and associated geothermal resources within the boundary of the Yellowstone Protection Area, as defined in section 3(2) of the Old Faithful Protection Act of 1993, risks adverse effects on the hydrothermal and geothermal features of Yellowstone National Park.

"(c) The Secretary shall not issue a lease under this Act for lands within the boundary of the Yellowstone Protection Area, as defined in section 3(2) of the Old Faithful Protection Act of 1993. Nothing in this section shall be construed to either affect the ban on leasing referenced under section 28(f) or to apply to any lands not owned by the United States."

SEC. 5. MORATORIUM ON OTHER LANDS.

(a) PROHIBITION.—(1) Except as provided by sections 7 and 8 of this Act, there shall be no use (except for monitoring by the Secretary or monitoring under an approved State program) of, or production from, any existing geothermal well and no exploration for, or development of, any new geothermal well or any other new facility related to the use of regulated resources within the Yellowstone Protection Area.

(2) Nothing in this subsection shall be construed to affect existing facilities other than geothermal wells.

(b) MANAGEMENT.—The Secretary shall review National Park Service management of Yellowstone National Park and shall take such steps as may be necessary to protect the protected systems and features and the hydrothermal, geothermal, and groundwater resources of such National Park free from injury or impairment.

(c) RULE OF CONSTRUCTION.—Nothing in this section shall be construed to affect the ban or prohibitions referenced under sections 28(f) and 30(c) of the Geothermal Steam Act of 1970.

SEC. 6. RESEARCH.

(a) IN GENERAL.—The National Park Service, in consultation with the Forest Service, the United States Geological Survey, and each State agency implementing an approved State program, shall research the characteristics of the protected systems and features, inventory and research the existing and potential effects (including cumulative effects) of hydrothermal, geothermal, mineral, or other resources development (including development of groundwater other than regulated resources) on such systems and features, and periodically inform Congress concerning the results of such inventory and research.

(b) UNDER STATE PROGRAM.—If an approved State program provides for research described in subsection (a), the Secretary, in cooperation with the relevant State, may conduct such research in areas within and adjoining Yellowstone National Park.

(c) NONINTRUSIVE METHODOLOGIES.—Except for research within a National Park System unit approved by the Secretary or elsewhere under a permit issued by a State agency im-

plementing an approved State program, research pursuant to this section shall exclusively use nonintrusive methodologies.

(d) LIMITATION.—Nothing in this Act shall be construed as authorizing any activities within any unit of the National Park System inconsistent with laws or policies applicable to the relevant unit.

SEC. 7. STATE MANAGEMENT PROGRAMS.

(a) DEVELOPMENT.—The States of Montana, Wyoming, and Idaho are encouraged to develop State programs for the management of regulated resources outside of Yellowstone National Park to preserve and protect, free from injury or impairment, the protected systems and features.

(b) PERMIT.—As of the date of enactment of this Act, no person shall engage in any use (including research), production, exploration, or development of any regulated resources on any land located within the Yellowstone Protection Area except to the extent authorized by a permit issued by a State agency implementing an approved State program.

(c) STATE AUTHORITY.—(1) In the implementation of an approved State program, a State may exercise the authority to grant permits under subsection (b) for the use (including research), production, exploration, or development of any regulated resources within the Yellowstone Protection Area.

(2) Notwithstanding any other provision of law, no permit issued prior to the date of enactment of this Act shall be deemed to have been issued in the implementation of an approved State program, but in the event that after the date of enactment of this Act the Secretary, on the basis of research pursuant to section 6, determines that groundwater with a temperature of 59 degrees Fahrenheit or less has characteristics that indicate it may be directly related to the protected systems and features, a permit issued prior to such determination with respect to such groundwater shall not be invalidated unless, pursuant to the procedures in an approved State program it is determined that continued utilization of the groundwater covered by such permit would be inconsistent with the purposes of this Act.

(3)(A) The Secretary shall monitor the implementation of an approved State program (including the State's enforcement thereof) to assure consistency with the requirements of this Act.

(B) The Secretary may suspend implementation of an approved State program if such implementation (including the State's enforcement thereof) is not being exercised in a manner consistent with this Act. During any such suspension, no permit granted under such program shall be effective except to the extent the Secretary determines that the permitted activities would be consistent with the purposes of this Act.

(C) If an approved State program includes procedures for the exercise of the Secretary's authority to suspend such a program's implementation, the Secretary shall follow such procedures.

(d) APPROVAL BY THE SECRETARY.—(1) The Secretary may approve a program submitted by a State if the Secretary determines that such program, when implemented, will fulfill the purposes of this Act regarding the protection of the protected systems and features.

(2) The Secretary shall not approve any State program submitted under this section until the Secretary has—

(A) solicited, publicly disclosed, and considered the views of the heads of other State and Federal agencies the Secretary determines are concerned with the proposed State program;

(B) solicited, publicly disclosed, and considered the views of the public; and

(C) found that the State has the necessary legal authority and qualified personnel for the regulation and management of regulated resources outside Yellowstone National Park consistent with the requirements of this Act.

(3)(A) The Secretary may approve or disapprove a program in whole or in part.

(B) If the Secretary disapproves any proposed State program, in whole or in part, the Secretary shall notify the State in writing of the decision and set forth in detail the reasons therefor. The State may submit a revised State program or portion thereof.

(4) The Secretary shall not approve any State program that does not, at a minimum—

(A) include ongoing scientific review of restrictions, boundaries, and permits applicable to the development of a regulated resource;

(B) require that, in conducting the scientific review referred to in subparagraph (A) and in implementing the State program, any doubt shall be resolved in favor of protection of the protected systems and features;

(C) allow the State agency authorized to administer the program to reject recommendations based on the scientific review referred to in subparagraph (A), to the extent such rejection is necessary to guarantee no adverse effect on the hydrothermal system within Yellowstone National Park; and

(D) enable citizens of such State to obtain judicial review of actions taken by the State agency implementing the program to the extent necessary to assure that such actions are consistent with all applicable law, including this Act.

(e) SCOPE.—Except to the extent an approved State program is being implemented by a State, section 5(a) of this Act shall apply to the Yellowstone Protection Area.

(f) MODIFICATION OF YELLOWSTONE PROTECTION AREA.—(1) The boundaries of the Yellowstone Protection Area in a State may be modified pursuant to an approved State program to the extent such modification is approved by the Secretary.

(2) The Secretary shall not approve any such modification that the Secretary finds would not be consistent with the purposes of this Act.

(3) The Secretary shall revise the map of the Yellowstone Protection Area to reflect any approved boundary modifications.

(4) If an approved State program includes procedures for the exercise of the Secretary's authority to approve modifications of the boundaries of the Yellowstone Protection Area, the Secretary shall follow such procedures.

(g) COOPERATIVE AGREEMENTS.—The Secretary is authorized to enter into cooperative agreements with the States of Montana, Idaho, and Wyoming and with the Secretary of Agriculture to fulfill the purposes of this Act.

(h) FEDERAL FINANCIAL ASSISTANCE.—(1) Subject to appropriation, the Secretary may provide financial assistance for the implementation of an approved State program. In providing such assistance, the Secretary may enter into appropriate funding agreements, including grants and cooperative agreements, with a State agency or agencies, upon such terms and conditions as the Secretary deems appropriate.

(2) A recipient State may invest funds provided under this subsection so long as such funds, together with interest and any other earnings thereon, shall be available for use

by the State only under the terms and conditions of the approved State program and an agreement entered into with the Secretary under this subsection and shall not be used by the State for any other purpose.

SEC. 8. MONTANA PROGRAM.

(a) APPROVAL.—(1) The Congress finds that Article IV of the compact, when implemented, will fulfill the purposes of this Act regarding the protection of the protected systems and features.

(2) All provisions of section 7 are applicable to this section, except for purposes of section 7(d)(1) the Compact shall be deemed to have been submitted to the Secretary, and, notwithstanding sections 7(d)(2), 7(d)(3), and 7(d)(4), once signed by the Secretary and the Attorney General of the United States, Article IV thereof shall be considered an approved State program for regulation of groundwater resources, including the hydrothermal resources within the Montana portion of the Yellowstone Protection Area. Article IV of the Compact shall not be considered an approved State program for the management of regulated resources within the Montana portion of the Yellowstone protection area other than groundwater resources.

(b) SCOPE.—Nothing in this Act shall be construed as amending the Compact or as altering its status in relationship to any litigation with regard to water rights.

(c) REVIEW PROCEDURES.—For purposes of sections 7(c)(3)(B), 7(c)(3)(C), 7(f)(1), and 7(f)(2), the provisions of the Compact with respect to—

(1) review of administrative decisions under Article IV of the Compact;

(2) enforcement of the Compact;

(3) the discretion of any party to the Compact to withdraw therefrom; and

(4) modification of boundaries and restrictions within the Controlled Groundwater Area,

shall be deemed to be procedures for the exercise of the Secretary's authority to approve modifications of the boundaries of the Yellowstone Protection Area or to suspend the implementation of an approved State program.

SEC. 9. IDAHO PROGRAM.

For purposes of section 7(d)(1), the provisions of Section 42 of the Idaho Code related to geothermal resources shall be deemed to have been submitted to the Secretary for approval as an approved State program.

SEC. 10. WYOMING PROGRAM.

For purposes of section 7(d)(1), the provisions of the laws of the State of Wyoming referenced in the letter from the Wyoming State Engineer included in the Committee report to accompany H.R. 1137 of the 103rd Congress shall be deemed to have been submitted to the Secretary for approval as an approved State program.

SEC. 11. CITIZEN SUITS.

(a) IN GENERAL.—(1) Any person may commence a civil suit on the person's own behalf to enjoin any party, including the United States, except for a State or agency or political subdivision thereof, that the plaintiff alleges—

(A) is in violation of any provision of this Act; or

(B) is using a regulated resource in the absence of, or beyond the scope of the terms or conditions of, a permit issued pursuant to an approved State program, or in violation of regulations issued under the authority of an approved State program.

(2) The Federal district courts shall have jurisdiction, without regard to the amount in controversy or the citizenship of the parties—

(A) to require the Secretary or another party to take any steps required or permitted by this Act, if those steps are necessary to fulfill the purposes of this Act; or

(B) to enforce the provisions, prohibitions, permits, or regulations of an approved State program.

(b) VENUE AND INTERVENTION.—(1) Any suit under this section may be brought in any appropriate judicial district.

(2) In any such suit under this section in which the United States is not a party, the Attorney General of the United States, at the request of the Secretary, may intervene on behalf of the United States as a matter of right.

(c) COSTS.—The court, in issuing any final order in any suit brought under this section, may award costs of litigation (including reasonable attorney and expert witness fees) to any party, whenever the court determines such award is appropriate.

(d) NONEXCLUSIVE RELIEF.—The injunctive relief provided by this subsection shall not restrict any right which any person (or class of persons) may have under any statute or common law to seek judicial review of actions taken by the State agency implementing an approved State program or to seek enforcement of any standard or limitation or to seek any other relief including relief against the Secretary.

(e) NOTICE.—Before seeking the injunctive relief authorized under this section, notice of intent to sue shall be given to the Secretary, the State agency implementing any relevant approved State program described in section 7, and each intended defendant. Such notice shall allow the minimum period of time necessary for an intended defendant to take those measures that (1) will cure any alleged violations of this Act, or (2) will end any alleged improper use of regulated resources, as described in subsection (a)(1)(B).

SEC. 12. JUDICIAL REVIEW.

(a) ADMINISTRATIVE PROCEDURES.—Except as provided in this section, any Federal agency action or failure to act to implement or enforce this Act shall be subject to judicial review in accordance with and to the extent provided by chapter 7 of title 5, United States Code.

(b) REMEDY.—The sole remedy available to any person claiming deprivation of a vested property right by enactment of this Act or Federal action pursuant to this Act shall be an action for monetary damages, filed pursuant to sections 1491 or 1505 of title 28, United States Code, in the Court of Federal Claims. Any just compensation awards determined by the Court of Federal Claims to be due to a claimant shall be paid consistent with section 2517 of such title.

SEC. 13. REGULATIONS.

No later than two years after the date of enactment of this Act, the Secretary shall promulgate such rules and regulations as are necessary to implement this Act.

SEC. 14. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated such sums as may be necessary to carry out this Act.

SEC. 15. SCOPE OF ACT.

Nothing in this Act shall be construed as increasing or diminishing any rights of the United States with respect to water, or as affecting any previous adjudication of or any agreement concerning any such rights.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from California [Mr. LEHMAN] will be recognized for 20 minutes, and the gentleman from Wyoming [Mr. THOMAS] will be recognized for 20 minutes.

The Chair recognizes the gentleman from California [Mr. LEHMAN].

Mr. LEHMAN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, now, as much as ever, the integrity of the incomparable geothermal features of Yellowstone National Park demand Federal protection. Geologists tell us that we still know very little about the complex interactions within a geothermal system. This evidence supports providing maximum protection to the last fully intact geothermal system in the world. Until we improve our understanding of these systems, virtually no development is acceptable.

I take a personal interest in this legislation. I have three national parks in my congressional district and strongly believe that their protection is essential to the national interest. In 1984, I fought efforts by the city of San Francisco to raise the height of Hetch Hetchy Dam, located within Yosemite National Park in my district. I firmly believed then—as I do now—that the city had no right to further drown pristine park land without approval by Congress.

The situation in Yellowstone is not unlike the situation in Yosemite. Yellowstone Park is a priceless Federal resource, for which there exists a Federal reserved water right dating back to 1872. Development threatens to encroach upon and destroy Yellowstone's natural beauty. In this case, however, the State of Montana, in cooperation with the National Park Service, has negotiated a compact to perfect the park's Federal reserved water rights. The quantification of this right will provide the park with the critical protection it deserves.

The bill we have before us today is the product of a great deal of hard work. I am happy to say it was reported with bipartisan support from the Natural Resources Committee. This is a tribute to the efforts of Mr. WILLIAMS, the chairman of the Subcommittee on National Parks, Forests and Public Lands; Mr. VENTO; Mr. THOMAS of Wyoming; and Mr. LAROCCHIO of Idaho. This bill accomplishes four major objectives:

First, it provides certain protection for the over 10,000 geothermal features of Yellowstone National Park and the hydrothermal system that supports such features;

Second, it approves and incorporates relevant aspects of the Montana company to quantify the park's Federal reserved water rights into this protection scheme;

Third, it establishes a framework for management of Yellowstone National Park's hydrothermal system within the States of Wyoming and Idaho; and

Fourth, it provides for ongoing research to better understand the complex interactions between development outside the park and the geothermal system associated with the park.

Mr. Speaker, the bill we have before us addresses the concerns of Members in States adjacent to the park, namely, Montana, Wyoming, and Idaho, and I urge this body to expeditiously pass this bill so that Yellowstone can be provided the guaranteed protection it deserves.

Mr. Speaker, I reserve the balance of my time.

Mr. THOMAS of Wyoming. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in lukewarm support of H.R. 1137, the Old Faithful Protection Act, as amended. On the other hand, I am not steamed about it either. H.R. 1137 would create a zone around Yellowstone National Park, the majority of which lies within my State of Wyoming, with the express purpose of preserving and protecting the geothermal and hydrothermal resources of the park.

There can be no dispute that protecting the park and its unique geothermal features is well within the public interest and highly desirable. This has been my position all along. However, what I have objected to is the mechanism by which this bill sought to provide that protection.

Rather than relying on State water laws and State regulation, the bill sought to give the Secretary of the Interior the power to require each State to formulate a protection plan which is then subject to Federal approval or veto. This was worrisome to me for several reasons.

Water is of critical importance to Wyoming. In fact, the State constitution approved by Congress declares water to be the property of the State. Around that constitutional provision, we have built up a unique and comprehensive body of statutes and regulations governing the use of any water, including hydrothermal and geothermal resources.

H.R. 1137 as introduced, overlooked the fact that State law, such as Wyoming's, can adequately protect the park's resources, and instead constituted an unnecessary Federal incursion into an important State function. While it is important to protect Yellowstone, it is also important to protect the sovereignty of the States.

With that object in mind, and with the cooperation of the Chair and the gentleman from Montana, H.R. 1137 was amended in committee to require the Secretary to review Wyoming State water law relevant to Yellowstone's geothermal and hydrothermal resources. If he finds it to be consistent with the purposes of the act, then those laws would be considered as the equivalent of an approved State program for purposes of the act. This amendment is very similar to a provision already extant in the bill to provide for comparable review of Idaho State law by the Secretary. Montana has already

reached an agreement with the Federal Government covering that State's concerns.

Mr. Speaker, although not perfect the bill as amended has removed many of my previous concerns regarding the scope of the Federal intrusion. While in my opinion the Secretary is still vested with too much authority to interfere in what is traditionally a State sphere, I believe the bill as amended has taken an important step toward recognizing the sovereignty of the States. I hope that any remaining differences can be resolved in the other body.

I consequently urge my colleagues to support passage of H.R. 1137.

□ 1630

Mr. Speaker, I reserve the balance of my time.

Mr. LEHMAN. Mr. Speaker, I yield such time as he may consume to the gentleman from Minnesota [Mr. VENTO].

Mr. VENTO. Mr. Speaker, I thank the gentleman for yielding me this time.

Mr. Speaker, I strongly support this bill, and join in commending the leadership of the gentleman from Montana [Mr. WILLIAMS] and the gentleman from California [Mr. LEHMAN] on this important matter.

The bill combines very strong protection of the national interest with recognition of the important role that the States involved—especially the State of Montana—can play in connection with management of the spectacular geothermal resources in the Yellowstone area. This special area has been protected since the 1870's when it was set aside as a natural reservation and protected by the U.S. Government.

I also want to thank the gentleman from Wyoming [Mr. THOMAS] for his willingness to work with Representative LEHMAN and the rest of us on this side of the aisle who have been involved in developing this legislation. The committee adopted several amendments offered by Mr. THOMAS to clarify certain points and to lay the groundwork for the State of Wyoming to be in a position to play a role in the management scheme embodied in the bill. The issue of water so important to the Western States and its arid environment run head first into the geothermal hydrological system of Yellowstone National Park.

I am sure, Mr. Speaker, we all agree that protection of Old Faithful and other resources and values of Yellowstone National Park is something that should command bipartisan support and cooperation. I urge the passage of the bill.

Mr. WILLIAMS. Mr. Speaker, I want to thank the Natural Resources Committee and the House leadership for presenting this important legislation today, on a day in which the agenda is obviously very full. This is, of course,

not the first time the House of Representatives has shown its commitment to the protection of Yellowstone National Park and its geothermal wonders. In the face of geothermal drilling, the House of Representatives passed legislation last Congress which the Senate failed to return to us. With increasing jeopardy the threats still exist to the park, and I am hopeful that the extensive work that this body has dedicated to this legislation will have cleared the way for the Senate to join us in our commitment.

With this legislation we are again showing our belief that we must protect Yellowstone National Park. Yellowstone is the last remaining undisturbed geothermal basin on Earth.

In a very real way our struggle to protect Old Faithful and the geysers and hot pools of Yellowstone reflect our basic understanding of nature's importance and value. The Congress' work to preserve these features is a microcosm of the commitment and cooperation necessary if we ever hope to protect our national treasures for future generations. The regular eruptions of Old Faithful and this Nation's investment in their preservation are as much a symbol of the American spirit as the Statue of Liberty or the cowboy, or the first step on the Moon.

This legislation bans the development of geothermal resources on Federal land adjacent to Yellowstone National Park and places a moratorium on private land geothermal resources within a specified area until or unless a certified State-Federal program is in place which accomplishes protection of the park's resources. The legislation clearly states the Federal policy of no risk to Yellowstone and lays out the Secretary of the Interior's role in determining what is an appropriate State program, providing the authority to the Secretary to take whatever actions are necessary to supplement any gaps in State regulation and Federal law. The bill also provides for ongoing research in the area of geothermal protection. The legislation finds that Montana's compact, recently developed, is an approved State program for ground water protection, and it submits the Idaho laws regarding geothermal resources for review, under the provisions of the act, for possible certification.

My goal has not changed since we first discussed the issues facing Yellowstone. I want rock-ribbed, ironclad, copper-riveted, zero risk protection for Old Faithful and all of Yellowstone's world famous geysers and hot water wonders. With this legislation before us today I believe we can also add federally guaranteed to the list of assurances.

When we passed legislation last Congress, the idea was simpler than this year: it was to directly ban any use of hot water adjacent to the park. The in-

tervening months, the permitting of wells, the actions by adjacent States, and most importantly the election of an administration that shared this committee's unwillingness to risk any possible harm to Yellowstone, necessitated that our solution be more comprehensive. In the year since last Congress' action, the Interior Department, the States of Montana, Idaho, and Wyoming, myself and Congressman LEHMAN, the staffs of the Public Lands and Mining Subcommittees, my staff, and numerous conservation organizations have dedicated themselves to crafting the legislation before you today.

Amendments were offered and accepted in committee to clarify our intent and basically reaffirm the approach that Congressman LEHMAN reported from his subcommittee this past summer. This legislation addresses the concerns of the States adjacent to the park. With amendments offered by Congressman LAROCO and Congressman THOMAS, the States of Idaho and Wyoming agree with this legislation.

The State role is clearly defined in the legislation and yet it also makes clear the Federal policy of no risk to Yellowstone. This legislation is a delicate balancing act between these two principals but I believe each is achieved fairly and firmly.

I also note that the State of Montana and the staff of the Montana Reserved Water Rights Compact Commission deserve particular mention in this discussion today. It was their work with the Department of the Interior that essentially showed us the way to a comprehensive Federal-State approach to the protection of State water rights and Federal resources. By negotiating a compact with the Federal Government, the State of Montana clearly showed that in areas of mutual concern the Federal Government and the States can cooperate and achieve significant results. After negotiating this State compact, it would have been easy for the State to refuse to review those decisions within the discussion of this legislation. Instead, the commission dedicated its staff to assisting in providing legislation that fits with the Federal-State compact and defines a framework that can be adopted to other States as well. This dedication to the protection of Yellowstone deserves our thanks and admiration.

This, of course, is an important point. We are not just legislating for Yellowstone National Park today; we are following through on a Federal policy that was started in 1986 under the amendments to the Geothermal Steam Lease Act. Once the Federal Government developed a policy to allow for the leasing of steam as a resource like any mineral, then it was important to set aside those areas that should not be subject to commercial development. Yellowstone is only the most famous. There are others listed as protected

under the Steam Act, and folks concerned about those places, like Crater Lake in Oregon, are looking to this legislation to help clarify how protection can be achieved. This will most certainly not be the last time the Congress will review this type of legislation.

One of the issues that has received a great deal of discussion in the past is the dispensation of the well recently drilled and permitted by the Church Universal and Triumphant in the Corwin Springs KGRA in Montana. This legislation stops the use of any subsurface well in the area including the Church's. The Justice Department reviewed this legislation and deemed that it was likely not a taking of private property rights for two reasons: It does not stop the historic use of the surface flows, and it does not permanently take away use of the well, it only assures that any use meet the test of no impairment or harm to the protected features of Yellowstone.

This is important legislation. It is one of the most important bills of conservation legislation passed this Congress. I urge my colleagues to again join us in voting to save Yellowstone National Park and its natural wonders.

Mr. THOMAS of Wyoming. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. LEHMAN. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore (Mr. MONTGOMERY). The question is on the motion offered by the gentleman from California [Mr. LEHMAN] that the House suspend the rules and pass the bill, H.R. 1137, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. LEHMAN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on H.R. 1137, the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

ACKNOWLEDGING THE 100TH ANNIVERSARY OF THE OVERTHROW OF THE KINGDOM OF HAWAII

Mrs. MINK. Mr. Speaker, I move to suspend the rules and pass the Senate joint resolution (S.J. Res. 19) to acknowledge the 100th anniversary of the January 17, 1893 overthrow of the Kingdom of Hawaii, and to offer an apology to native Hawaiians on behalf of the

United States for the overthrow of the Kingdom of Hawaii.

The Clerk read as follows:

S.J. RES. 19

Whereas, prior to the arrival of the first Europeans in 1778, the Native Hawaiian people lived in a highly organized, self-sufficient, subsistent social system based on communal land tenure with a sophisticated language, culture, and religion;

Whereas a unified monarchical government of the Hawaiian Islands was established in 1810 under Kamehameha I, the first King of Hawaii;

Whereas, from 1826 until 1893, the United States recognized the independence of the Kingdom of Hawaii, extended full and complete diplomatic recognition to the Hawaiian Government, and entered into treaties and conventions with the Hawaiian monarchs to govern commerce and navigation in 1826, 1842, 1849, 1875, and 1887;

Whereas the Congregational Church (now known as the United Church of Christ), through its American Board of Commissioners for Foreign Missions, sponsored and sent more than 100 missionaries to the Kingdom of Hawaii between 1820 and 1850;

Whereas, on January 14, 1893, John L. Stevens (hereafter referred to in this Resolution as the "United States Minister"), the United States Minister assigned to the sovereign and independent Kingdom of Hawaii conspired with a small group of non-Hawaiian residents of the Kingdom of Hawaii, including citizens of the United States, to overthrow the indigenous and lawful Government of Hawaii;

Whereas, in pursuance of the conspiracy to overthrow the Government of Hawaii, the United States Minister and the naval forces of the United States caused armed naval forces of the United States to invade the sovereign Hawaiian nation on January 16, 1893, and to position themselves near the Hawaiian Government buildings and the Iolani Palace to intimidate Queen Liliuokalani and her Government;

Whereas, on the afternoon of January 17, 1893, a Committee of Safety that represented the American and European sugar planters, descendants of missionaries, and financiers deposed the Hawaiian monarchy and proclaimed the establishment of a Provisional Government;

Whereas, the United States Minister thereupon extended diplomatic recognition to the Provisional Government that was formed by the conspirators without the consent of the Native Hawaiian people or the lawful Government of Hawaii and in violation of treaties between the two nations and of international law;

Whereas, soon thereafter, when informed of the risk of bloodshed with resistance, Queen Liliuokalani issued the following statement yielding her authority to the United States Government rather than to the Provisional Government:

"I Liliuokalani, by the Grace of God and under the Constitution of the Hawaiian Kingdom, Queen, do hereby solemnly protest against any and all acts done against myself and the Constitutional Government of the Hawaiian Kingdom by certain persons claiming to have established a Provisional Government of and for this kingdom.

"That I yield to the superior force of the United States of America whose Minister Plenipotentiary, His Excellency John L. Stevens, has caused United States troops to be landed at Honolulu and declared that he would support the Provisional Government.

"Now to avoid any collision of armed forces, and perhaps the loss of life, I do this

under protest and impelled by said force yield my authority until such time as the Government of the United States shall, upon facts being presented to it, undo the action of its representatives and reinstate me in the authority which I claim as the Constitutional Sovereign of the Hawaiian Islands."

Done at Honolulu this 17th day of January, A.D. 1893.; Whereas, without the active support and intervention by the United States diplomatic and military representatives, the insurrection against the Government of Queen Liliuokalani would have failed for lack of popular support and insufficient arms;

Whereas, on February 1, 1893, the United States Minister raised the American flag and proclaimed Hawaii to be a protectorate of the United States;

Whereas the report of a Presidentially established investigation conducted by former Congressman James Blount into the events surrounding the insurrection and overthrow of January 17, 1893, concluded that the United States diplomatic and military representatives had abused their authority and were responsible for the change in government;

Whereas, as a result of this investigation, the United States Minister to Hawaii was recalled from his diplomatic post and the military commander of the United States armed forces stationed in Hawaii was disciplined and forced to resign his commission;

Whereas, in a message to Congress on December 18, 1893, President Grover Cleveland reported fully and accurately on the illegal acts of the conspirators, described such acts as an "act of war, committed with the participation of a diplomatic representative of the United States and without authority of Congress", and acknowledged that by such acts the government of a peaceful and friendly people was overthrown;

Whereas President Cleveland further concluded that a "substantial wrong has thus been done which a due regard for our national character as well as the rights of the injured people requires we should endeavor to repair" and called for the restoration of the Hawaiian monarchy;

Whereas the Provisional government protested President Cleveland's call for the restoration of the monarchy and continued to hold state power and pursue annexation to the United States;

Whereas the Provisional Government successfully lobbied the Committee on Foreign Relations of the Senate (hereafter referred to in this Resolution as the "Committee") to conduct a new investigation into the events surrounding the overthrow of the monarchy;

Whereas the Committee and its chairman, Senator John Morgan, conducted hearings in Washington, DC., from December 27, 1893, through February 26, 1894, in which members of the Provisional Government justified and condoned the actions of the United States Minister and recommended annexation of Hawaii;

Whereas, although the Provisional Government was able to obscure the role of the United States in the illegal overthrow of the Hawaiian monarchy, it was unable to rally the support from two-thirds of the Senate needed to ratify a treaty of annexation;

Whereas, on July 4, 1894, the Provisional Government declared itself to be the Republic of Hawaii;

Whereas, on January 24, 1895, while imprisoned in Iolani Palace, Queen Liliuokalani was forced by representatives of the Republic of Hawaii to officially abdicate her throne;

Whereas, in the 1896 United States Presidential election, William McKinley replaced Grover Cleveland;

Whereas, on July 7, 1898, as a consequence of the Spanish-American War, President McKinley signed the Newlands Joint Resolution that provided for the annexation of Hawaii;

Whereas, through the Newlands Resolution, the self-declared Republic of Hawaii ceded sovereignty over the Hawaiian Islands to the United States;

Whereas the Republic of Hawaii also ceded 1,800,000 acres of crown, government and public lands of the Kingdom of Hawaii, without the consent of or compensation to the Native Hawaiian people of Hawaii or their sovereign government;

Whereas the Congress, through the Newlands Resolution, ratified the cession, annexed Hawaii as part of the United States, and vested title to the lands in Hawaii in the United States;

Whereas the Newlands Resolution also specified that treaties existing between Hawaii and foreign nations were to immediately cease and be replaced by United States treaties with such nations;

Whereas the Newlands Resolution effected the transaction between the Republic of Hawaii and the United States Government;

Whereas the indigenous Hawaiian people never directly relinquished their claims to their inherent sovereignty as a people or over their national lands to the United States, either through their monarchy or through a plebiscite or referendum;

Whereas, on April 30, 1900, President McKinley signed the Organic Act that provided a government for the territory of Hawaii and defined the political structure and powers of the newly established Territorial Government and its relationship to the United States;

Whereas, on August 21, 1959, Hawaii became the 50th State of the United States;

Whereas the health and well-being of the Native Hawaiian people is intrinsically tied to their deep feelings and attachment to the land;

Whereas the long-range economic and social changes in Hawaii over the nineteenth and early twentieth centuries have been devastating to the population and to the health and well-being of the Hawaiian people;

Whereas the Native Hawaiian people are determined to preserve, develop and transmit to future generations their ancestral territory, and their cultural identity in accordance with their own spiritual and traditional beliefs, customs, practices, language, and social institutions;

Whereas, in order to promote racial harmony and cultural understanding, the Legislature of the State of Hawaii has determined that the year 1993 should serve Hawaii as a year of special reflection on the rights and dignities of the Native Hawaiians in the Hawaiian and the American societies;

Whereas the Eighteenth General Synod of the United Church of Christ in recognition of the denomination's historical complicity in the illegal overthrow of the Kingdom of Hawaii of 1893 directed the Office of the President of the United Church of Christ to offer a public apology to the Native Hawaiian people and to initiate the process of reconciliation between the United Church of Christ and the Native Hawaiians; and

Whereas it is proper and timely for the Congress on the occasion of the impending one hundredth anniversary of the event, to acknowledge the historic significance of the illegal overthrow of the Kingdom of Hawaii, to express its deep regret to the Native Hawaiian people, and to support the reconciliation efforts of the State of Hawaii

and the United Church of Christ with Native Hawaiians; Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. ACKNOWLEDGMENT AND APOLOGY.

The Congress—

(1) on the occasion of the 100th anniversary of the illegal overthrow of the Kingdom of Hawaii on January 17, 1893, acknowledges the historical significance of this event which resulted in the suppression of the inherent sovereignty of the Native Hawaiian people;

(2) recognizes and commends efforts of reconciliation initiated by the State of Hawaii and the United Church of Christ with Native Hawaiians;

(3) apologizes to Native Hawaiians on behalf of the people of the United States for the overthrow of the Kingdom of Hawaii on January 17, 1893 with the participation of agents and citizens of the United States, and the deprivation of the rights of Native Hawaiians to self-determination;

(4) expresses its comments to acknowledge the ramifications of the overthrow of the Kingdom of Hawaii, in order to provide a proper foundation for reconciliation between the United States and the Native Hawaiian people; and

(5) urges the President of the United States to also acknowledge the ramifications of the overthrow of the Kingdom of Hawaii and to support reconciliation efforts between the United States and the Native Hawaiian people.

SEC. 2. DEFINITIONS

As used in this Joint Resolution, the term "Native Hawaiian" means any individual who is a descendent of the aboriginal people who, prior to 1778, occupied and exercised sovereignty in the area that now constitutes the State of Hawaii.

SEC. 3. DISCLAIMER.

Nothing in this Joint Resolution is intended to serve as a settlement of any claims against the United States.

The SPEAKER pro tempore. Pursuant to the rule, the gentlewoman from Hawaii [Mrs. MINK] will be recognized for 20 minutes, and the gentleman from Wyoming [Mr. THOMAS] will be recognized for 20 minutes.

The Chair recognizes the gentlewoman from Hawaii [Mrs. MINK].

GENERAL LEAVE

Mrs. MINK. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the Senate joint resolution under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from Hawaii?

There was no objection.

Mrs. MINK. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this resolution is of enormous significance to the people of Hawaii and, more particularly, the native Hawaiians. I want to commend the chairman of the full committee, Mr. MILLER, and the ranking Republican member for allowing this bill to come directly to the floor. This is a matter of commemorating an event that occurred 100 years ago in Hawaii which has very dramatically changed and al-

tered the course of a people who occupied those lands 100 years ago.

Mr. Speaker, 100 years ago the people of Hawaii were a kingdom to themselves and they were recognized by the United States as an independent nation and extended full and complete diplomatic recognition.

Only as a result of events surrounding the overthrow and the failure of the U.S. Congress to recognize the illegality of the overthrow subsequently that the people of Hawaii lost not only their republic and their right to self-governance but that the lands of the kingdom of Hawaii were also transferred without compensation and without consent to the United States.

This has remained a very difficult issue for the State of Hawaii and the people of Hawaii. I believe the adoption of this resolution today will go a long way toward providing that kind of recognition that the natives in Hawaii have sought all these years.

Mr. Speaker, the United Church of Christ was the first movers to bring about a reconciliation because, as we know, the missionaries who first came to Hawaii were very much a part of the movement that finally led to the overthrow.

So the United Church of Christ meeting recently adopted a resolution of reconciliation, urging their members to find ways in which to reflect upon what happened and to bring the people together, and have initiated this process. So one of the important points in the resolution is to acknowledge not only the 100th anniversary but also the fact that the United Church of Christ in its own initiative has taken steps to initiate this process of reconciliation.

I think the most important function that this body and this Congress and the American Government can do is to acknowledge what happened, the serious error that occurred, and to participate in this effort of reconciliation and by so doing adopt this resolution and in it convey an apology for what occurred 100 years ago.

Mr. Speaker, I reserve the balance of my time.

Mr. THOMAS of Wyoming. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of Senate Joint Resolution 19. The gentlewoman from Hawaii has already explained the provisions of the resolution, so I will be brief.

I find it highly fitting that we consider this legislation this year before we adjourn; 1993 marks the 100th anniversary of the overthrow of the sovereign Kingdom of Hawaii with the assistance of U.S. military forces.

That overthrow brought to an ignoble end this country's recognition of the Kingdom of Hawaii as a sovereign independent nation, a status we repeatedly recognized in treaty and international agreement.

Treaty relations between the United States and the Hawaiian government began with the signing of a bilateral agreement between the parties in 1826 by a Capt. Thomas Jones on behalf of the United States and the Regent Ka'ahumanu on behalf of the Hawaiian King Kau'ikea'ouli. After that date, the United States concluded a series of treaties with the sovereign Kingdom of Hawaii: the 1849 Treaty of Commerce, Friendship, and Navigation; the 1855 Treaty Concerning Rights of Neutrals at Sea; the 1870 Postal Convention; an 1875 Treaty of Reciprocity; the 1883 Convention for the Exchange of Money Orders; the 1884 Treaty of Commercial Reciprocity; and the 1888 Parcel Post Convention.

Because the increased number of rights granted to Americans that accompanied this treaty process and accompanying increase in trade greatly swelled the numbers of whites on the islands, native Hawaiians became a minority in their own land. From a population of approximately 300,000 in 1778, by 1890 the Hawaiian people were reduced to a population of 41,000 that owned a little under one-quarter of the land.

In response to the growing commercial power of the whites and their demands, King Kamehameha III introduced land reforms in 1848 called the Great Mahele in which Hawaiian lands became alienable for the first time. By 1852, thousands of acres were owned by a few westerners—the early land barons—while native Hawaiians owned only a tiny fraction. The white 9 percent of the population owned 67 percent of the taxable land in the Kingdom.

Having asserted economic dominance over the Kingdom by the late 1880's, the westerners turned to establish complete political control as well. The principal white landowners founded the Hawaiian League in 1887 to increase their power at the expense of the monarchy. In consequence, they staged a coup d'état on July 6, 1887, and forced the King to promulgate a new constitution, the Bayonet Constitution of 1887, which supplanted the power of the monarch with that of the white landowners. Under the constitution, the voting class was limited to landowners, a move which disenfranchised 75 percent of the native population.

In 1893, the American merchant community, dissatisfied with its lack of total political control and fearing a diminution of the control it did possess, organized to overthrow the constitutional monarchy that ruled the kingdom. The merchants formed a committee on public safety made up entirely of non-Hawaiians. The fact that the revolt was led solely by non-native mercantile interests was evident even on the mainland at the time; a contemporary article in the Fresno Daily Evening Expositor noted that the uprising was "formulated by the sugar producing elements of the Islands."

The U.S. Minister in Hawaii, John L. Stevens, was openly hostile to the monarchy, as one historian has put it: "He desired that the monarchy should fall, and that the Islands should be annexed to the United States." Stevens conspired with the merchants, and sent a letter to the State Department stating that "the Hawaiian pear is now fully ripe, and this is the golden hour for the United States to pluck it." His letter outlining his intentions would not reach the State Department until several months after the revolt.

On the day the merchants planned their revolt, Stevens unilaterally ordered 162 marines from the U.S.S. *Boston* to land in Honolulu to lend support to the merchants. He had already informed the rebels of his plans, and that diplomatic recognition of their cause would be quickly forthcoming: "the troops * * * would be ready to land any moment * * * and would recognize the existing government whatever it might be."

The rebels overthrew the monarchy and proclaimed a provisional government which Stevens was quick to recognize in the name of the United States, even though he had no authority to do so. The reigning monarch, Queen Lili'uokalani, was forced to surrender her authority in a document stating that she "yield[ed] to the superior force of the United States, whose minister * * * has caused United States troops to be landed at Honolulu and declared that he would support the said provisional government."

The Republic of Hawaii was proclaimed soon thereafter in 1894, and among its official acts was the expropriation of all lands belonging to the crown without compensation to the Queen, Lili'uokalani, or the Hawaiian people. The lands were immediately made available to westerners for purchase.

In 1898, the United States unilaterally annexed the kingdom as a territory, thereby abrogating the independent status of the kingdom that we had recognized in treaty over the preceding 70 years. With that annexation, the United States, without paying any compensation to the native Hawaiian people, took title to the crown and government lands previously expropriated by the Republic.

Mr. Speaker, the responsibility of instrumentalities of the U.S. Government for the overthrow and subjugation of the native Hawaiian government and people is clear. In a report to Congress in 1893, the President stated:

But for the notorious predilections of the United States Minister for annexation, the Committee of Safety * * * would never have existed. But for the landing of United States forces upon false pretenses respecting the danger to life and property, the Committee would never have exposed themselves to the pains and penalties of treason by undertaking the subversion of the Queen's Government. But for the presence of the United

States forces in the immediate vicinity and in position to afford all needed protection and support, the American merchants would not have proclaimed the provisional government. But for the lawless occupation of Honolulu under false pretenses by United States forces * * * the Queen and her government would never have yielded.

Mr. Speaker, in closing let me address some of the arguments made by opponents of this legislation. Some have said that passage of this resolution would be divisive; that it sets part of the Hawaiian population apart from the rest. This contention, however, is nothing more than a canard. I believe that it would have exactly the opposite effect. Senate Joint Resolution 19 is an important first step in closing an unfortunate period in our relations with the Hawaiian people and in commencing a reconciliation between them and the United States. The goal is to bring together, not to divide.

Second, there are some who are worried that the resolution will form the genesis of a call for reparations or a civil lawsuit against the United States. However, anyone with even a passing familiarity with the history of this issue knows full well that a substantial basis for such a suit already clearly exists. This resolution does nothing to tip the scales in favor of the proponents of litigation; if I thought it did, I would not support it.

Mr. Speaker, it is high time that the United States acknowledge its role in this regrettable affair. I urge my colleagues to support passage of Senate Joint Resolution 19—it is the right thing to do, and the right time to do it.

Mr. Speaker, I reserve the balance of my time.

Mrs. MINK. Mr. Speaker, I yield such time as he may consume to my colleague, the gentleman from Hawaii [Mr. ABERCROMBIE].

Mr. ABERCROMBIE. I thank the gentlewoman for yielding this time to me.

Mr. Speaker, I wish to acknowledge the ranking member, the gentleman from Wyoming [Mr. THOMAS], our good friend and colleague on the Committee on Natural Resources.

□ 1640

Educating Members of Congress is the key to securing justice for native Hawaiians. Understanding has to precede action. That is why this resolution is so important. That is why we are particularly grateful to our friends and colleagues here for their support.

The resolution lays out in graphic detail what happened to Hawaiians and sounds a compelling call for justice.

So I rise in support of the resolution to acknowledge and apologize to the native Hawaiians on behalf of the United States for its involvement in the overthrow of the kingdom of Hawaii.

I think it is especially appropriate that we take up this resolution in the centennial year of the overthrow.

To native Hawaiians, this act of dispossession is something that has rankled for over 100 years. Native Hawaiians are acutely conscious of their history, and today's action is an important step toward healing a wound which has festered for far too long.

Mr. Speaker, as the resolution says in expressing its commitment to acknowledging the ramifications of the overthrow of the kingdom of Hawaii, this provides a proper foundation for a reconciliation between the United States and the native people of Hawaii.

Mrs. MINK. Mr. Speaker, I yield such time as he may consume to my colleague, the gentleman from the American Samoa [Mr. FALEOMAVAEGA].

Mr. FALEOMAVAEGA. Mr. Speaker, I would certainly like to commend the distinguished gentlewoman from the State of Hawaii [Mrs. MINK] and also our colleague, the gentleman from Hawaii [Mr. ABERCROMBIE] for bringing this legislation out to the floor.

Certainly I want to commend the gentleman from Wyoming [Mr. THOMAS] for his support of this piece of legislation.

Mr. Speaker, I rise in strong support of Senate Joint Resolution 19 to acknowledge the 100th anniversary of the January 17, 1893, overthrow of the Kingdom of Hawaii, and to offer an apology to native Hawaiians on behalf of the United States for the overthrow of the Kingdom of Hawaii.

Before the illegal overthrow of Queen Lili'uokalani in 1893, the Kingdom of Hawaii was a highly organized, civilized sovereign nation which entered into treaties and conventions with many nations, including the United States. Few Americans know that for nearly 70 years, the United States recognized the independence of the kingdom of Hawaii and extended full and complete diplomatic recognition to the Hawaiian government.

Mr. Speaker, there is no doubt in my mind that without the active support and intervention by U.S. diplomatic and military representatives, the overthrow of Queen Lili'uokalani on January 17, 1893, would have failed for lack of popular support and insufficient arms.

On December 18, 1893, President Grover Cleveland, in a message to Congress described the overthrow of the Kingdom of Hawaii as "an act of war committed with the participation of a diplomatic representative of the United States without the authority of Congress," and he acknowledged that by such acts, the government of a peaceful and friendly people was overthrown.

To this day, no official apology has ever been made to native Hawaiians, nor has there ever been an attempt at a federal policy addressing their rights.

U.S. Senator DANIEL AKAKA of Hawaii has said, "the deprivation of Hawaiian sovereignty, which began a century ago, has had devastating effects

on the health, culture, and social conditions of native Hawaiians, with consequences that are evident throughout the islands today."

Senator AKAKA, a native Hawaiian whose grandparents were present during the overthrow of the Hawaiian government is absolutely correct when he says that, too often, when American policymakers think about native Americans, they mistakenly consider only native American Indians and Alaska Natives as native peoples of the United States.

Mr. Speaker, native Hawaiians are, indeed, native Americans. While they are culturally Polynesian, they are descendants of the aboriginal people who occupied and exercised sovereignty in the area that now constitutes our 50th State of Hawaii. In addition to a formal apology to the people of Hawaii, it is also time for the Federal Government to develop a comprehensive Federal policy that addresses the needs of the native American people of Hawaii.

Mr. Speaker, to conclude, I would like to close with a plea from Queen Liliuokalani to the American people 100 years ago in which she lamented the plight of her people.

Oh, honest Americans, as Christians, hear me for my downtrodden people. Do not covet the little vineyard of Naboth's, so far from your shores, lest the instrument of Ahab fall upon you, if not on your day in that of your children.

The children to whom our fathers told of the living God . . . are crying aloud to Him in their time of trouble; and He will keep His promise and will listen to the voices of His Hawaiian children lamenting for their homes.

Mr. Speaker, after 100 years, it is time for the U.S. Congress to offer a formal apology to the noble people of Hawaii for the overthrow of their legitimate government—it is the least we can do. While this apology will not bring back their land which we stole; bring back their culture which we destroyed; or, bring back their spirit which we broke; Senate Joint Resolution 19 will begin the process of reconciliation with my brothers and sisters of Hawaii.

I ask my colleagues to do the right thing today and support Senate Joint Resolution 19.

□ 1650

Mr. THOMAS of Wyoming. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mrs. MINK. Mr. Speaker, I yield such time as he may consume to the honorable gentleman from California [Mr. MILLER].

Mr. MILLER of California. Mr. Speaker, I thank the gentlewoman from Hawaii [Mrs. MINK] for yielding this time to me, and I just want to take this time to commend my colleagues, the gentlewoman from Hawaii [Mrs. MINK], and the gentleman from

Hawaii [Mr. ABERCROMBIE] for their work on behalf of this resolution.

One of the testimonies to the strength of this country is that every now and then we can go back and set the record straight and recognize our errors, recognize our mistakes and recognize our faults, and in this country's long history of dealing with native peoples, native Americans, native Hawaiians, we have had to do that from time to time. I recognize that as an element of strength, of recognition that our Government is not infallible, that men and women in government, in high places, from time to time make mistakes, and clearly, with the overthrow of this sovereign Hawaiian government we made such a mistake and then attempted to later obscure that mistake with formal government actions. This resolution today takes a long and difficult step in educating this Nation as to the true history of the overthrow of the Kingdom of Hawaii. It puts the American people on notice as to the correctness, it does not infer any new rights to native Hawaiians. But it clearly also invokes the name of the U.S. Government in an apology to native Hawaiians for those actions that were taken.

Mr. Speaker, this is long overdue, and I will hope that our colleagues would support this, and I would hope that they would recognize the tireless effort on behalf of this resolution by the gentlewoman from Hawaii [Mrs. MINK] and the gentleman from Hawaii [Mr. ABERCROMBIE], and I would urge my colleagues to support this measure.

Mrs. MINK. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, it is with a great deal of honor and humility that I accepted the honor of serving as the manager of this bill that means so much to the people of Hawaii, and I want to especially thank the subcommittee chairman, the honorable gentleman from New Mexico [Mr. RICHARDSON], for giving me this opportunity to record my presence on the floor managing this bill.

Mr. Speaker, I rise in support of the resolution calling for the Government of the United States to issue a formal apology to native Hawaiians for its role in overthrowing the legal Government of the Kingdom of Hawaii in 1893.

During the nearly 1,200 years preceding the European discovery of Hawaii in 1778, native Hawaiians were the only inhabitants of the islands of Hawaii. In those 12 centuries, native Hawaiians developed a self-sufficient and highly structured communal land tenure-based society characterized by a language and culture of great subtlety and a religion of great complexity. While the native Hawaiians were no more able than others at creating a perfect society, they did develop the enduring patterns of relationships and interactions between social groups that are the hallmarks of a successful society.

Although native Hawaiians shared a common language, culture and religion, they did

not share a common government until 1810 when the island of Kauai joined the Kingdom of Hawaii. Established in 1795 by King Kamehameha I after he conquered most of the Hawaiian islands, the Kingdom of Hawaii was accorded full and complete diplomatic recognition by the United States from 1826 to 1893.

Christian missionaries first arrived in Hawaii from New England in the early 19th century and succeeded in transforming the kingdom into a Christian nation within a generation. The sons and grandsons of the missionaries established successful businesses which grew to form the economic backbone of the kingdom. In addition to wielding economic influence, these missionary-descended businessmen, together with American and European-born businessmen, exerted great political influence.

The committee of public safety, an association comprised of these Western businessmen, gained enough political power by 1877 to force Hawaii's seventh monarch, King David Kalakaua, to sign a new Constitution which diminished his power and ousted his Cabinet appointees. The new Constitution also established a ministry responsible to the legislature and not the King.

In concert with this new Constitution, the committee of public safety influenced the legislature into passing a bill which restricted the vote to persons who earned at least \$600 a year or owned at least \$3,000 worth of property. In this way, the franchise was transferred from native Hawaiians to a small minority of American and European-descended businessmen.

When King David Kalakaua died in 1891, he was succeeded by his sister, Liliuokalani. Intent on reversing the decline of native Hawaiian influence over the affairs of the kingdom, Queen Liliuokalani aligned herself with a group of Hawaiian politicians and activists working to restore the power of the monarchy. Queen Liliuokalani felt a powerful monarchy was the only way native Hawaiians could be given a voice in their government.

On January 13, 1893, Hawaiian members of the legislature succeeded in garnering enough votes to oust the members of the Cabinet. Queen Liliuokalani followed this action by quickly appointing her own Cabinet and drawing up a new Constitution which provided for a strong monarchy.

Just as quickly, the committee of public safety began to plan for the abolition of the monarchy and the formation of a provisional government. Mr. John L. Stevens, the United States Minister to the Kingdom of Hawaii, joined the committee of public safety in planning the overthrow of the Hawaii Government. U.S. Minister Stevens directed armed personnel aboard the U.S.S. *Boston* to enter Honolulu on January 16, 1893, and station themselves near Iolani Palace, the royal residence, and other Hawaiian Government buildings to intimidate Queen Liliuokalani and members of her government.

On January 17, 1893, the committee of public safety proclaimed the abolition of the monarchy, the creation of a provisional government, and its intention to seek the annexation of Hawaii to the United States. U.S. Minister Stevens extended diplomatic recognition to the provisional government without the consent of the native Hawaiian people or the lawful Government of Hawaii.

Faced with armed U.S. military forces and unwilling to place her supporters in danger, Queen Liliuokalani yielded her authority under protest to the provisional government. U.S. Minister Stevens raised the American flag and proclaimed Hawaii to be a protectorate of the United States on February 1, 1893.

It must be noted that when Queen Liliuokalani yielded her authority, she indicated she believed the U.S. Government would return Hawaii to the Hawaiian people once it learned of the actions of its representative, John Stevens, and the injustices committed by the committee of public safety.

An investigation, initiated by President Grover Cleveland and conducted by former Congressman James Blount, concluded that the United States diplomatic and military representatives to the Kingdom of Hawaii had abused their authority and were responsible for the change in government. Minister Stevens was recalled from his diplomatic post and the commander of the U.S. military forces stationed in Hawaii was disciplined and forced to resign his commission.

President Cleveland delivered a message to Congress on December 18, 1893 in which he described the illegal acts of those who participated in the overthrow of the Hawaiian Government as an "act of war, committed with the participation of a diplomatic representative of the United States and without the authority of Congress." He went on to call for the restoration of the Hawaiian Monarchy by noting that a "substantial wrong has thus been done which a due regard for our national character as well as the rights of the injured people requires that we should endeavor to repair."

However, the Senate Foreign Relations Committee, rejected the Blount Report and President Cleveland's call for the restoration of the Hawaiian monarchy after being lobbied by the Provisional Government of Hawaii. The Senate Foreign Relations Committee then announced its intention to conduct its own investigation into the events surrounding the overthrow of the Hawaiian Monarchy.

The Senate Foreign Relations Committee heard from members of the Provisional Government of Hawaii who justified the actions of U.S. Minister Stevens and the need to annex Hawaii. Because of the investigation by the Senate Foreign Relations Committee, no action was taken to restore the Hawaiian Monarchy. At the same time, however, supporters of Hawaiian annexation in the Congress failed to round up the needed two-thirds majority.

As the stalemate over the issue of restoring the Hawaiian Monarchy continued, Queen Liliuokalani was forced to sign a formal statement of abdication and swear allegiance to the Republic of Hawaii on January 24, 1895 while under house arrest in Iolani Palace. And, President William McKinley, President Cleveland's successor, signed the Newlands Joint Resolution, by which the self-declared Republic of Hawaii ceded sovereignty over the Hawaiian Islands to the United States, on July 7, 1898.

As part of the Newlands Joint Resolution, the Republic of Hawaii also ceded to the United States 1,800,000 acres of crown, government, and public lands of the Kingdom of Hawaii, without the consent of or compensation to the native Hawaiian people or their sov-

ereign government. And, through the enactment of the Organic Act by the Congress of the United States, Hawaii became a U.S. territory on April 30, 1900.

The loss of sovereignty came at the close of a 100-year period during which the native Hawaiian population had declined precipitously. Because native Hawaiians had lived in virtual isolation for nearly 12 centuries, they had built up no immunity to a variety of Old and New World diseases. As a result, native Hawaiians succumbed to measles and other usually nonfatal illnesses brought to the islands by Americans, Asians, and Europeans. Between the European discovery of Hawaii by Capt. James Cook in 1778 and the late 1800's, the numbers of native Hawaiians declined from an estimated 500,000 to fewer than 50,000. The scale of this population decline was extraordinary, perhaps unprecedented.

Over the course of the 19th century, native Hawaiians witnessed the suppression of their language and culture, their near extermination, and, finally, the loss of their sovereignty. Disenfranchised from their land, culture, and ability to self-govern, the indigenous people of Hawaii suffered a fate shared by other displaced indigenous peoples. Like the aborigines in Australia and native Americans in this country, native Hawaiians are now among the most impoverished and dispossessed people in the State of Hawaii.

Over 100 years ago, representatives of the U.S. government and military abused their authority by helping a small yet privileged and powerful group of American and European businessmen overthrow the government of a sovereign nation, the Kingdom of Hawaii. The U.S. Government subsequently gave its mantle of approval to this illegal action by accepting lands ceded to the United States by the self-proclaimed Republic of Hawaii and by annexing the Hawaiian Islands as a territory.

In spite of the passage of 100 years, the fact that Hawaii is now an integral part of the United States, and the argument that the illegal 1893 takeover of the Kingdom of Hawaii eventually provided citizens of Hawaii with full citizenship in the world's most enduring democracy, none of this erases the fact that the takeover of the Kingdom of Hawaii was an illegal act which transformed native Hawaiians into strangers in their own land.

While history cannot be rewritten, it can—and must—be acknowledged. As such, the United States should—and must—acknowledge its role in overthrowing the legal Government of the Kingdom of Hawaii by issuing an official apology.

Mr. Speaker, I have no further requests for time and I yield back the balance of my time.

Mr. RICHARDSON. Mr. Speaker, I rise in support of Senate Joint Resolution 19, a bill to acknowledge the 100th anniversary of the January 17, 1893 overthrow of the Kingdom of Hawaii, and to offer an apology to native Hawaiians on behalf of the United States for the overthrow of the Kingdom of Hawaii.

The Hawaiian Islands were unified under one government in 1810 under King Kamehameha I. It was an independent, sovereign monarchy which traded and had treaties with several nations including the United States between 1826–1893.

Western businessmen concerned that the monarchy might not look as favorably on them in the future, began a successful campaign which spread back to the United States the word that the safety of U.S. citizens might be in jeopardy. With the assistance of the U.S. Minister, who was our Government's representative in the islands, U.S. Armed Forces invaded Hawaii in January 1893.

A provisional government was quickly established and, under protest, the Queen stepped down from power.

She believed that once the United States conducted an inquiry of the recent actions, she would be reinstated to her proper role.

President Grover Cleveland did conduct an investigation and described the actions in Hawaii as an "act of war, committed with the participation of a diplomatic representative of the United States and without authority of Congress." He called for the reinstatement of the Hawaiian monarchy. The provisional government, however, fought this request and remained in power.

In 1898 President William McKinley signed the resolution annexing the Hawaiian Islands and some 1.8 million acres of land to the United States.

Mr. Speaker, without the assistance of the diplomatic representative of the United States to the sovereign Hawaiian Islands, the overthrow would not have happened.

The purpose of Senate Joint Resolution 19 is to spell out the events which led to the overthrow of the government of Hawaii, annexation, and finally to statehood in 1959. It is foremost an educational document. It is also meant to finally apologize to the people of Hawaii for the improper actions taken by a representative of this government.

I want to thank my colleagues from Hawaii, Mrs. MINK and Mr. ABERCROMBIE, for the work they have done to bring this resolution to the floor today. They have worked tirelessly on behalf of their constituents to educate the Congress as to the history of Hawaii. This resolution is another step in that direction.

Senate Joint Resolution 19 does not infer any new rights to native Hawaiians. It is an apology that is long overdue and I urge my colleagues to support it.

The SPEAKER pro tempore. The question is on the motion offered by the gentlewoman from Hawaii [Mrs. MINK] that the House suspend the rules and pass the Senate joint resolution, Senate Joint Resolution 19.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended, and the Senate joint resolution was passed.

A motion to reconsider was laid on the table.

FRIENDSHIP WITH RUSSIA, UKRAINE AND OTHER NEW INDEPENDENT STATES ACT

Mr. HAMILTON. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 3000) for reform in emerging new democracies and support and help for improved partnership with Russia, Ukraine, and other New Independent States of the former Soviet Union, as amended.

The Clerk read as follows:

H.R. 3000

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLES.

This Act may be cited as the "Act For Reform In Emerging New Democracies and Support and Help for Improved Partnership with Russia, Ukraine, and Other New Independent States" or as the "FRIENDSHIP Act".

SEC. 2. TABLE OF CONTENTS.

The table of contents for this Act is as follows:

- Sec. 1. Short titles.
- Sec. 2. Table of contents.
- Sec. 3. Definition.

TITLE I—POLICY OF FRIENDSHIP AND COOPERATION

- Sec. 101. Findings.
- Sec. 102. Statutory provisions that have been applicable to the Soviet Union.

TITLE II—TRADE AND BUSINESS RELATIONS

- Sec. 201. Policy under Export Administration Act.
- Sec. 202. Representation of countries of Eastern Europe and the independent states of the former Soviet Union in legal commercial transactions.
- Sec. 203. Procedures regarding transfers of certain Department of Defense-funded items.
- Sec. 204. Soviet slave labor.
- Sec. 205. Multilateral Export Controls Enhancement Amendments Act.

TITLE III—CULTURAL, EDUCATIONAL, AND OTHER EXCHANGE PROGRAMS

- Sec. 301. Mutual Educational and Cultural Exchange Act of 1961.
- Sec. 302. Soviet-Eastern European research and training.
- Sec. 303. Fascell Fellowship Act.
- Sec. 304. Board for International Broadcasting Act.
- Sec. 305. Scholarship programs for developing countries.
- Sec. 306. Report on Soviet participants in certain exchange programs.

TITLE IV—ARMS CONTROL

- Sec. 401. Arms Control and Disarmament Act.
- Sec. 402. Arms Export Control Act.
- Sec. 403. Annual reports on arms control matters.
- Sec. 404. United States/Soviet direct communication link.

TITLE V—DIPLOMATIC RELATIONS

- Sec. 501. Travel restrictions.
- Sec. 502. Personnel levels and limitations.
- Sec. 503. Other provisions related to operation of embassies and consulates.
- Sec. 504. Foreign Service Buildings Act.

TITLE VI—OCEANS AND THE ENVIRONMENT

- Sec. 601. Arctic Research and Policy Act.
- Sec. 602. Fur seal management.
- Sec. 603. Global climate protection.

TITLE VII—REGIONAL AND GENERAL DIPLOMATIC ISSUES

- Sec. 701. United Nations assessments.
- Sec. 702. Soviet occupation of Afghanistan.
- Sec. 703. Angola.
- Sec. 704. Self determination of the people from the Baltic states.
- Sec. 705. Obsolete references in Foreign Assistance Act.

Sec. 706. Review of United States policy toward the Soviet Union.

Sec. 707. Policy toward application of Yalta Agreement.

TITLE VIII—INTERNAL SECURITY; WORLDWIDE COMMUNIST CONSPIRACY

- Sec. 801. Civil defense.
- Sec. 802. Report on Soviet press manipulation in the United States.
- Sec. 803. Subversive Activities Control Act.

TITLE IX—MISCELLANEOUS

- Sec. 901. Ballistic missile tests near Hawaii.
- Sec. 902. Emigration from the Soviet Union.
- Sec. 903. Nondelivery of international mail.
- Sec. 904. Persecution of Christians.
- Sec. 905. Murder of Major Arthur Nicholson.
- Sec. 906. Soviet Pentecostals.

SEC. 3. DEFINITION.

As used in this Act (including the amendments made by this Act), the terms "independent states of the former Soviet Union" and "independent states" have the meaning given those terms by section 3 of the Freedom for Russia and Emerging Eurasian Democracies and Open Markets Support Act of 1992 (22 U.S.C. 5801).

TITLE I—POLICY OF FRIENDSHIP AND COOPERATION

SEC. 101. FINDINGS.

The Congress finds and declares as follows: (1) The Vancouver Declaration issued by President Clinton and President Yeltsin in April 1993 marked a new milestone in the development of the spirit of cooperation and partnership between the United States and Russia. The Congress affirms its support for the principles contained in the Vancouver Declaration.

(2) The Vancouver Declaration underscored that—

(A) a dynamic and effective partnership between the United States and Russia is vital to the success of Russia's historic transformation;

(B) the rapid integration of Russia into the community of democratic nations and the world economy is important to the national interest of the United States; and

(C) cooperation between the United States and Russia is essential to the peaceful resolution of international conflicts and the promotion of democratic values, the protection of human rights, and the solution of global problems such as environmental pollution, terrorism, and narcotics trafficking.

(3) The Congress enacted the FREEDOM Support Act (Public Law 102-511), as well as other legislation such as the Soviet Nuclear Threat Reduction Act of 1991 (title II of Public Law 102-228) and the Former Soviet Union Demilitarization Act of 1992 (title XIV of Public Law 102-484), to help meet the historic opportunities and challenges presented by the transformation that has taken place, and is continuing to take place, in what once was the Soviet Union.

(4) The process of reform in Russia, Ukraine, and the other independent states of the former Soviet Union is ongoing. The holding of a referendum in Russia on April 25, 1993, that was free and fair, and that reflected the support of the Russian people for the process of continued and strengthened democratic and economic reform, represents an important and encouraging hallmark in this ongoing process.

(5) It is important that reformers and democrats in the independent states of the former Soviet Union recognize the resolve of the people of the United States to do business with the independent states in a new spirit of friendship and cooperation, and the support of the people of the United States for continued democratic and economic reform.

(6) Certain statutory provisions that are relics of the Cold War should be revised or repealed as part of United States efforts to foster and strengthen the bonds of trust and friendship, as well as mutually beneficial trade and economic relations, between the United States and Russia, the United States and Ukraine, and the United States and the other independent states of the former Soviet Union.

SEC. 102. STATUTORY PROVISIONS THAT HAVE BEEN APPLICABLE TO THE SOVIET UNION.

(a) IN GENERAL.—There are numerous statutory provisions that were enacted in the context of United States relations with a country, the Soviet Union, that are fundamentally different from the relations that now exist between the United States and Russia, between the United States and Ukraine, and between the United States and the other independent states of the former Soviet Union.

(b) EXTENT OF SUCH PROVISIONS.—Many of the provisions referred to in subsection (a) imposed limitations specifically with respect to the Soviet Union, and its constituent republics, or utilized language that reflected the tension that existed between the United States and the Soviet Union at the time of their enactment. Other such provisions did not refer specifically to the Soviet Union, but nonetheless were directed (or may be construed as having been directed) against the Soviet Union on the basis of the relations that formerly existed between the United States and the Soviet Union, particularly in its role as the leading communist country.

(c) FINDING AND AFFIRMATION.—The Congress finds and affirms that provisions such as those described in this section, including the joint resolution providing for the designation of "Captive Nations Week" (Public Law 86-90), should not be construed as being directed against Russia, Ukraine, or the other independent states of the former Soviet Union, connoting an adversarial relationship between the United States and the independent states, or signifying or implying in any manner unfriendliness toward the independent states.

TITLE II—TRADE AND BUSINESS RELATIONS

SEC. 201. POLICY UNDER EXPORT ADMINISTRATION ACT.

The Export Administration Act of 1979 is amended—

(1) in section 2 (50 U.S.C. App. 2401), by striking paragraph (11) and by designating paragraphs (12) and (13) as paragraphs (11) and (12), respectively; and

(2) in section 3 (50 U.S.C. App. 2402), by striking paragraph (15).

SEC. 202. REPRESENTATION OF COUNTRIES OF EASTERN EUROPE AND THE INDEPENDENT STATES OF THE FORMER SOVIET UNION IN LEGAL COMMERCIAL TRANSACTIONS.

Section 951(e) of title 18, United States Code, is amended by striking "the Soviet Union" and all that follows through "or Cuba" and inserting "Cuba or any other country that the President determines (and so reports to the Congress) poses a threat to the national security interest of the United States for purposes of this section".

SEC. 203. PROCEDURES REGARDING TRANSFERS OF CERTAIN DEPARTMENT OF DEFENSE-FUNDED ITEMS.

(a) LIMITATION ON CERTAIN MILITARY TECHNOLOGY TRANSFERS.—(1) Section 223 of the National Defense Authorization Act for Fiscal Years 1988 and 1989 (10 U.S.C. 2431 note) is amended to read as follows:

SEC. 223. LIMITATION ON TRANSFER OF CERTAIN MILITARY TECHNOLOGY TO INDEPENDENT STATES OF THE FORMER SOVIET UNION.

"Military technology developed with funds appropriated or otherwise made available for the Ballistic Missile Defense Program may not be transferred (or made available for transfer) to Russia or any other independent state of the former Soviet Union by the United States (or with the consent of the United States) unless the President determines, and certifies to the Congress at least 15 days prior to any such transfer, that such transfer is in the national interest of the United States and is to be made for the purpose of maintaining peace."

(2) Section 6 of that Act is amended by amending the item in the table of contents relating to section 223 to read as follows:

"Sec. 223. Limitation on transfer of certain military technology to independent states of the former Soviet Union."

(b) **REPEAL OF OBSOLETE PROVISION.**—Section 709 of the Department of Defense Appropriations Authorization Act, 1975 (50 U.S.C. App. 2403-1) is repealed.

SEC. 204. SOVIET SLAVE LABOR.

(a) **REPEAL.**—Section 1906 of the Omnibus Trade and Competitiveness Act of 1988 (19 U.S.C. 1307 note) is repealed.

(b) **CONFORMING AMENDMENT.**—Section 1(b) of that Act is amended by striking the item in the table of contents relating to section 1906.

SEC. 205. MULTILATERAL EXPORT CONTROLS ENHANCEMENT AMENDMENTS ACT.

Section 2442 of the Multilateral Export Control Enhancement Amendments Act (50 U.S.C. App. 2410a note) is amended—

(1) by striking paragraph (1); and
(2) by redesignating paragraphs (2) through (5) as paragraphs (1) through (4), respectively.

TITLE III—CULTURAL, EDUCATIONAL, AND OTHER EXCHANGE PROGRAMS

SEC. 301. MUTUAL EDUCATIONAL AND CULTURAL EXCHANGE ACT OF 1961.

The Mutual Educational and Cultural Exchange Act of 1961 is amended—

(1) in section 112(a)(8) (22 U.S.C. 2460(a)(8)), by striking "Soviet Union" both places it occurs and inserting "independent states of the former Soviet Union"; and

(2) in section 113 (22 U.S.C. 2461), by—

(A) amending the section caption to read "EXCHANGES BETWEEN THE UNITED STATES AND THE INDEPENDENT STATES OF THE FORMER SOVIET UNION.—";

(B) by striking "an agreement with the Union of Soviet Socialist Republics" and inserting "agreements with the independent states of the former Soviet Union"; and

(C) by striking "made by the Soviet Union" and inserting "made by the independent states";

(D) by striking "and the Soviet Union" and inserting "and the independent states"; and

(E) by striking "by Soviet citizens in the United States" and inserting "in the United States by citizens of the independent states".

SEC. 302. SOVIET-EASTERN EUROPEAN RESEARCH AND TRAINING.

The Soviet-Eastern European Research and Training Act of 1983 (22 U.S.C. 4501-4508) is amended—

(1) by amending the title heading to read "**TITLE VIII—RESEARCH AND TRAINING FOR EASTERN EUROPE AND THE INDEPENDENT STATES OF THE FORMER SOVIET UNION**";

(2) in section 801, by striking "Soviet-Eastern European Research and Training" and inserting "Research and Training for Eastern Europe and the Independent States of the Former Soviet Union";

(3) in paragraphs (1), (2), and (3)(E) of section 802, by striking "Soviet Union and Eastern European countries" and inserting "countries of Eastern Europe and the independent states of the former Soviet Union";

(4) in section 803(2), by striking "Soviet-Eastern European Studies Advisory Committee" and inserting "Advisory Committee for Studies of Eastern Europe and the Independent States of the Former Soviet Union";

(5) in section 804—

(A) in the section heading by striking "THE SOVIET-EASTERN EUROPEAN STUDIES";

(B) in subsection (a), by striking "Soviet-Eastern European Studies Advisory Committee" and inserting "Advisory Committee for Studies of Eastern Europe and the Independent States of the Former Soviet Union";

(C) in subsection (d), by striking "Soviet and Eastern European countries" and inserting "the countries of Eastern Europe and the independent states of the former Soviet Union"; and

(6) in section 805(b)—

(A) in paragraphs (2)(A), (2)(B), and (6), by striking "Soviet and Eastern European studies" and inserting "studies on the countries of Eastern Europe and the independent states of the former Soviet Union";

(B) in paragraphs (3)(A) and (3)(B), by striking "fields of Soviet and Eastern European studies and related studies" and inserting "independent states of the former Soviet Union and the countries of Eastern Europe and related fields";

(C) in paragraph (3)(A) by striking "the Soviet Union and Eastern European countries" and inserting "those states and countries";

(D) in paragraph (4)—

(i) by striking "Union of Soviet Socialist Republics" the first place it appears and inserting "independent states of the former Soviet Union"; and

(ii) by striking "the Union of Soviet Socialist Republics and Eastern European countries" and inserting "those states and countries"; and

(E) in paragraph (5)—

(i) by striking everything in the first sentence following: "support" and inserting "training in the languages of the independent states of the former Soviet Union and the countries of Eastern Europe."; and

(ii) in the last sentence by inserting immediately before the period "and, as appropriate, studies of other languages of the independent states of the former Soviet Union".

SEC. 303. FASCELL FELLOWSHIP ACT.

Section 1002 of the Fascell Fellowship Act (22 U.S.C. 4901) is amended in the section heading by striking "IN THE SOVIET UNION AND EASTERN EUROPE" and inserting "ABROAD".

SEC. 304. BOARD FOR INTERNATIONAL BROADCASTING ACT.

(a) **BALTIC DIVISION.**—Section 307 of the Board for International Broadcasting Authorization Act, Fiscal Years 1984 and 1985 (Title III of Public Law 98-164; 97 Stat. 1037) is repealed.

(b) **SOVIET JAMMING.**—Section 308 of that Act (97 Stat. 1037) is repealed.

SEC. 305. SCHOLARSHIP PROGRAMS FOR DEVELOPING COUNTRIES.

Section 602 of the Foreign Relations Authorization Act, Fiscal Years 1986 and 1987 (22 U.S.C. 4702) is amended by striking paragraphs (6) and (7) and by redesignating para-

graphs (8), (9), and (10) as paragraphs (6), (7), and (8), respectively.

SEC. 306. REPORT ON SOVIET PARTICIPANTS IN CERTAIN EXCHANGE PROGRAMS.

Section 126 of the Department of State Authorization Act, Fiscal Years 1982 and 1983 (Public Law 102-138; 96 Stat. 282) is repealed.

TITLE IV—ARMS CONTROL

SEC. 401. ARMS CONTROL AND DISARMAMENT ACT.

(a) **REPORTS ON STANDING CONSULTATIVE COMMISSION ACTIVITIES.**—Section 38 of the Arms Control and Disarmament Act (22 U.S.C. 2578) is amended by striking "United States-Union of Soviet Socialist Republics".

(b) **LANGUAGE SPECIALISTS.**—Section 51 of that Act (22 U.S.C. 2591) is amended—

(1) by amending the section heading to read "SPECIALISTS FLUENT IN RUSSIAN OR OTHER LANGUAGES OF THE INDEPENDENT STATES OF THE FORMER SOVIET UNION";

(2) by striking "Soviet foreign and military policies" and inserting "the foreign and military policies of the independent states of the former Soviet Union"; and

(3) by inserting "or another language of the independent states of the former Soviet Union" after "Russian language".

(c) **COMPLIANCE WITH AGREEMENTS.**—Section 52 of that Act (22 U.S.C. 2592) is amended—

(1) in paragraph (1), by striking "the Soviet Union" both places it appears and inserting "Russia";

(2) in paragraph (3), by striking "Soviet adherence" and inserting "Russian adherence" and by striking "the Soviet Union" and inserting "Russia"; and

(3) in paragraph (5), by striking "the Soviet Union" and inserting "Russia".

(d) **ON-SITE INSPECTION AGENCY.**—Section 61(4) of that Act (22 U.S.C. 2595(4)) is amended—

(1) in subparagraph (A), by striking "the Soviet Union" and inserting "Russia, Ukraine, Kazakhstan, Belarus, Turkmenistan, Uzbekistan";

(2) in subparagraph (B), by striking "Soviet";

(3) in subparagraph (C), by striking "the Soviet Union" and inserting "Russia"; and

(4) in subparagraph (D), by striking "Soviet".

SEC. 402. ARMS EXPORT CONTROL ACT.

The Arms Export Control Act is amended—

(1) in section 94(b)(3)(B) (22 U.S.C. 2799c(b)(3)(B)), by striking "Warsaw Pact country" and inserting "country of the Eastern Group of States Parties"; and

(2) in section 95(5) (22 U.S.C. 2799d(5))—

(A) by striking "Warsaw Pact country" and inserting "country of the Eastern Group of States Parties"; and

(B) by inserting before the period at the end "or a successor state to such a country".

SEC. 403. ANNUAL REPORTS ON ARMS CONTROL MATTERS.

(a) **SOVIET COMPLIANCE WITH ARMS CONTROL COMMITMENTS.**—(1) Section 1002 of the Department of Defense Authorization Act, 1986 (22 U.S.C. 2592a) is repealed.

(2) Section 1(b) of that Act is amended by striking the item in the table of contents relating to section 1002.

(b) **ARMS CONTROL STRATEGY.**—(1) Section 906 of the National Defense Authorization Act, Fiscal Year 1989 (22 U.S.C. 2592b) is repealed.

(2) Section 3 of that Act is amended by striking the item in the table of contents relating to section 906.

(c) **ANTIBALLISTIC MISSILE CAPABILITIES AND ACTIVITIES OF THE SOVIET UNION.**—(1)

Section 907 of the National Defense Authorization Act, Fiscal Year 1989 (102 Stat. 2034) is repealed.

(2) Section 3 of that Act is amended by striking the item in the table of contents relating to section 907.

SEC. 404. UNITED STATES/SOVIET DIRECT COMMUNICATION LINK.

(a) **CHANGING REFERENCES.**—The joint resolution entitled "Joint Resolution authorizing the Secretary of Defense to provide to the Soviet Union, on a reimbursable basis, equipment and services necessary for an improved United States/Soviet Direct Communication Link for crisis control," approved August 8, 1985 (10 U.S.C. 113 note) is amended—

(1) in the first section—
(A) by striking "to the Soviet Union" both places it appears and inserting "to Russia"; and

(B) by striking "Soviet Union part" and inserting "Russian part"; and

(2) in section 2(b), by striking "the Soviet Union" and inserting "Russia".

(b) **SAVINGS PROVISION.**—The amendment made by subsection (a)(2) does not affect the applicability of section 2(b) of that joint resolution to funds received from the Soviet Union.

TITLE V—DIPLOMATIC RELATIONS

SEC. 501. TRAVEL RESTRICTIONS.

Section 216 of the State Department Basic Authorities Act of 1956 (22 U.S.C. 4316) is amended—

(1) in subsection (a), by striking everything following "apply" and inserting "appropriate restrictions to the travel while in the United States of the individuals described in subsection (b)."; and

(2) in subsection (e), by striking paragraph (1) and by redesignating paragraphs (2) and (3) as paragraphs (1) and (2), respectively.

SEC. 502. PERSONNEL LEVELS AND LIMITATIONS.

(a) **PERSONNEL CEILING ON UNITED STATES AND SOVIET MISSIONS.**—Section 602 of the Intelligence Authorization Act, Fiscal Year 1990 (Public Law 101-193; 103 Stat. 1710) is repealed.

(b) **REPORT ON PERSONNEL OF SOVIET STATE TRADING ENTERPRISES.**—(1) Section 154 of the Foreign Relations Authorization Act, Fiscal Years 1988 and 1989 (Public Law 100-204; 101 Stat. 1353) is repealed.

(2) Section 1(b) of that Act is amended by striking the item in the table of contents relating to section 154.

(c) **REPORT ON ADMISSION OF CERTAIN ALIENS.**—Section 501 of the Intelligence Authorization Act, Fiscal Year 1988 (22 U.S.C. 254c-2) is repealed.

(d) **SOVIET MISSION AT THE UNITED NATIONS.**—Section 702 of the Intelligence Authorization Act for Fiscal Year 1987 (22 U.S.C. 287 note) is repealed.

(e) **SOVIET EMPLOYEES AT UNITED STATES DIPLOMATIC AND CONSULAR MISSIONS IN THE SOVIET UNION.**—(1) Section 136 of the Foreign Relations Authorization Act, Fiscal Years 1986 and 1987 (22 U.S.C. 3943 note) is repealed.

(2) Section 1(b) of that Act is amended by striking the item in the table of contents relating to section 136.

(f) **DIPLOMATIC EQUIVALENCE AND RECIPROcity.**—(1) Section 813 of the Foreign Relations Authorization Act, Fiscal Years 1986 and 1987 (Public Law 99-93; 99 Stat. 455) is repealed.

(2) Section 1(b) of that Act is amended by striking the item in the table of contents relating to section 813.

SEC. 503. OTHER PROVISIONS RELATED TO OPERATION OF EMBASSIES AND CONSULATES.

(a) **CONSTRUCTION OF DIPLOMATIC FACILITIES.**—Section 132 of the Foreign Relations

Authorization Act, Fiscal Years 1992 and 1993 (Public Law 102-138; 105 Stat. 662) is amended—

(1) by repealing subsections (a) through (d) and subsections (h) through (j); and

(2) in subsection (e)—
(A) by striking "(e) EXTRAORDINARY SECURITY SAFEGUARDS.—";

(B) by striking "(1) In" and inserting "(a) EXTRAORDINARY SECURITY SAFEGUARDS.—In" and by striking "(2) Such" and inserting "(b) SAFEGUARDS TO BE INCLUDED.—Such";

(C) by setting subsections (a) and (b), as so redesignated, on a full measure margin; and
(D) in subsection (b), as so redesignated—

(i) by striking "paragraph (1)" and inserting "subsection (a)"; and

(ii) by redesignating subparagraphs (A) through (E) as paragraphs (1) through (5), respectively, and by setting such redesignated paragraphs on a 2-em indentation.

(b) **POSSIBLE MOSCOW EMBASSY SECURITY BREACH.**—(1) Section 133 of the Foreign Relations Authorization Act, Fiscal Years 1992 and 1993 (Public Law 102-138; 105 Stat. 665) is repealed.

(2) Section 2 of that Act is amended by striking the item in the table of contents relating to section 133.

(c) **UNITED STATES-SOVIET RECIPROcity IN MATTERS RELATING TO EMBASSIES.**—(1) Section 134 of the Foreign Relations Authorization Act, Fiscal Years 1990 and 1991 (22 U.S.C. 4301 note) is repealed.

(2) Section 1(b) of that Act is amended by striking the item in the table of contents relating to section 134.

(d) **REASSESSMENT OF SOVIET ELECTRONIC ESPIONAGE CAPABILITY FROM MOUNT ALTO EMBASSY SITE.**—(1) Section 1232 of the National Defense Authorization Act, Fiscal Year 1989 (Public Law 100-456; 102 Stat. 2056) is repealed.

(2) Section 3 of that Act is amended by striking the item in the table of contents relating to section 1232.

(e) **DIPLOMATIC RECIPROcity.**—(1) Sections 151 through 153 of the Foreign Relations Authorization Act, Fiscal Years 1988 and 1989 (Public Law 100-204; 101 Stat. 1351) are repealed.

(2) Section 1(b) of that Act is amended by striking the items in the table of contents relating to sections 151 through 153.

(f) **ELECTRONIC ESPIONAGE CAPABILITY FROM MOUNT ALTO EMBASSY SITE.**—(1) Section 1122 of the National Defense Authorization Act for Fiscal Years 1988 and 1989 (Public Law 100-180; 101 Stat. 1149) is repealed.

(2) Section 6 of that Act is amended by striking the item in the table of contents relating to section 1122.

(g) **ASSESSMENT OF SOVIET ELECTRONIC ESPIONAGE CAPABILITIES.**—Section 901 of the Intelligence Authorization Act, Fiscal Year 1988 (Public Law 100-178; 101 Stat. 1017) is repealed.

(h) **FOREIGN ESPIONAGE ACTIVITIES IN THE UNITED STATES.**—Section 1364(c) of the National Defense Authorization Act for Fiscal Year 1987 (Public Law 99-661; 100 Stat. 4001) is repealed.

SEC. 504. FOREIGN SERVICE BUILDINGS ACT.

Section 4(j) of the Foreign Service Buildings Act, 1926 (22 U.S.C. 295(j)) is repealed.

TITLE VI—OCEANS AND THE ENVIRONMENT

SEC. 601. ARCTIC RESEARCH AND POLICY ACT.

Section 102(a) of the Arctic Research and Policy Act of 1984 (15 U.S.C. 4101(a)) is amended—

(1) in paragraph (2), by striking "as" and all that follows through the comma; and

(2) in paragraph (10), by striking " , particularly the Soviet Union,".

SEC. 602. FUR SEAL MANAGEMENT.

The Act of November 2, 1966, commonly known as the Fur Seal Act of 1966, is amended—

(1) in section 101(h) (16 U.S.C. 1151(h)), by striking "the Union of Soviet Socialist Republics" and inserting "Russia (except that as used in subsection (b) of this section, 'party' and 'parties' refer to the Union of Soviet Socialist Republics)"; and

(2) in section 102 (16 U.S.C. 1152), by striking "the Union of Soviet Socialist Republics" and inserting "Russia".

SEC. 603. GLOBAL CLIMATE PROTECTION.

The Global Climate Protection Act of 1987 (title XI of the Foreign Relations Authorization Act, Fiscal Years 1988 and 1989; 15 U.S.C. 2901 note) is amended—

(1) in section 1106—

(A) by striking "UNITED STATES-SOVIET RELATIONS" in the section heading and inserting "UNITED STATES RELATIONS WITH THE INDEPENDENT STATES OF THE FORMER SOVIET UNION";

(B) by striking "Soviet Union" and inserting "independent states of the former Soviet Union";

(C) by striking "their joint role as the world's two major" and inserting "the extent to which they are"; and

(D) by striking "United States-Soviet relations" and inserting "United States relations with the independent states"; and

(2) in section 1(b), in item in the table of contents relating to section 1106, by striking "United States-Soviet relations" and inserting "United States relations with the independent states of the former Soviet Union".

TITLE VII—REGIONAL AND GENERAL DIPLOMATIC ISSUES

SEC. 701. UNITED NATIONS ASSESSMENTS.

Section 717 of the International Security and Development Cooperation Act of 1981 (Public Law 97-113; 95 Stat. 1549) is amended—

SEC. 902. EMIGRATION FROM THE SOVIET UNION.

(a) REPEAL.—Section 1202 of the Foreign Relations Authorization Act, Fiscal Years 1988 and 1989 (Public Law 100-204; 101 Stat. 1410) is repealed.

(b) CONFORMING AMENDMENT.—Section 1(b) of that Act is amended by striking the item in the table of contents relating to section 1202.

SEC. 903. NONDELIVERY OF INTERNATIONAL MAIL.

(a) REPEAL.—Section 1203 of the Foreign Relations Authorization Act, Fiscal Years 1988 and 1989 (Public Law 100-204; 101 Stat. 1411) is repealed.

(b) CONFORMING AMENDMENT.—Section 1(b) of that Act is amended by striking the item in the table of contents relating to section 1203.

SEC. 904. PERSECUTION OF CHRISTIANS.

(a) REPEAL.—Section 1204 of the Foreign Relations Authorization Act, Fiscal Years 1988 and 1989 (Public Law 100-204; 101 Stat. 1411) is repealed.

(b) CONFORMING AMENDMENT.—Section 1(b) of that Act is amended by striking the item in the table of contents relating to section 1204.

SEC. 905. MURDER OF MAJOR ARTHUR NICHOLSON.

(a) REPEAL.—Section 148 of the Foreign Relations Authorization Act, Fiscal Years 1986 and 1987 (Public Law 99-93; 99 Stat. 427) is repealed.

(b) CONFORMING AMENDMENT.—Section 1(b) of that Act is amended by striking the item in the table of contents relating to section 148.

SEC. 906. SOVIET PENTECOSTALS.

(a) REPEAL.—Section 805 of the Foreign Relations Authorization Act, Fiscal Years 1986 and 1987 (Public Law 99-93; 99 Stat. 450) is repealed.

(b) CONFORMING AMENDMENT.—Section 1(b) of that Act is amended by striking the item in the table of contents relating to section 805.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Indiana [Mr. HAMILTON] will be recognized for 20 minutes, and the gentleman from Arizona [Mr. KYL] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Indiana [Mr. HAMILTON].

Mr. HAMILTON. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, at the Vancouver summit last April, President Yeltsin asked President Clinton to help put United States-Russian relations on a new footing.

President Yeltsin specifically asked that the United States review its laws and regulations. He asked for the United States to repeal or rescind those laws, regulations and policies that had become obsolete following the demise of the Soviet Union.

Russia is one of the legal successor states to the Soviet Union. It is subject to a long series of cold-war restrictions that had been intended for the previous Soviet regime, not the Russian successor state.

Those restrictions impede the ability of the United States and Russia, and the United States and other New Independent States, to build relations on a new basis of friendship. Specifically, these restrictions stand in the way of the development of normal diplomatic and trade relations.

The bill before us, H.R. 3000, was introduced on August 6 by the majority leader and minority leader at the administration's request. Both leaders travelled to Russia this past April and heard the same message as did President Clinton. They share the President's policy stance: it is time to begin the process of repealing cold war restrictions.

Title I of H.R. 3000 is a statement of United States policy of friendship and cooperation with Russia and the New Independent States. Ensuing titles modify or repeal certain provisions of law relating to: Trade and business relations; cultural, educational, and other exchange programs; arms control; diplomatic relations; oceans and the environment; regional and general diplomatic issues; internal security as well as other issues.

H.R. 3000, as introduced, covered many areas of jurisdiction in the House and so it was referred to several committees. The Committee on Foreign Affairs has worked closely with each of them. I want to thank each committee for its cooperation in bringing this bill to the floor. I want to thank: Chairman DELLUMS and the ranking member, Mr. SPENCE, of the Committee on Armed Services; Chairman GONZALEZ and the ranking member, Mr. LEACH, of the Committee on Banking, Finance and Urban Affairs; Chairman BROOKS and the ranking member, Mr. FISH, of the Committee on the Judiciary; Chairman STUDDS and the ranking member, Mr. FIELDS of Texas, of the Committee on Merchant Marine and Fisheries; Chairman CLAY and the ranking member, Mr. MYERS of Indiana, of the Committee on Post Office and Civil Service; Chairman BROWN and the ranking member, Mr. WALKER, of the Committee on Science, Space, and Technology; Chairman GLICKMAN and the ranking member, Mr. COMBEST, of the Permanent Select Committee on Intelligence; and Chairman ROSTENKOWSKI and the ranking member, Mr. ARCHER, of the Committee on Ways and Means.

Above all, I want to thank the leadership. The Speaker, the majority leader, and the minority leader have been driving forces in guiding this legislation through committees and to the House floor.

May I say that I appreciate that the gentleman from California [Mr.

ROHRBACHER] has a concern about a provision in this bill with respect to the captive nations resolution.

I want to assure the gentleman that this bill does not alter the text of the captive nations resolution in any way. The bill simply states that we should look forward, and not construe that resolution as being directed against Russia, Ukraine or the other independent states of the former Soviet Union, connoting an adversarial relationship between the United States and the New Independent States, or signifying or implying in any manner unfriendliness toward the independent states.

I also want to assure the gentleman from California of my support for House Joint Resolution 237, to authorize the construction of an international monument in the District of Columbia to honor the victims of communism.

I will work with the committee of jurisdiction, the House Administration Committee, with respect to this resolution, and work with the other body, to help move this resolution forward.

I also will support this provision should it come back as an amendment to this bill from the other body.

The significance of H.R. 3000 is that the House is going on the record, and taking action. We are starting to clean up the layers of anti-Soviet legislation accumulated over many years, through many Congresses, since the beginning of the cold war. This bill is a first step in the process. There will be other steps in the months ahead, including addressing trade issues. Through a process of regulatory review, the administration will also address COCOM, export controls, and other regulatory restrictions.

This bill is a tangible step toward a new United States relationship with Russia, Ukraine, and the other New Independent States. I hope that the Congress will complete action on this bill expeditiously. I urge my colleagues to support H.R. 3000, as amended.

Mr. Speaker, I reserve the balance of my time.

□ 1700

Mr. KYL. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I urge my colleagues to vote against this particular piece of legislation for both procedural and substantive reasons.

This is an important piece of legislation and should not come before this body late on a Monday afternoon when very few Members are here to participate, let alone observe the debate; when nobody knows what is in the bill; when the bill has not been the subject of hearings in the committees to which it was referred; when there are no findings which call for the provisions of law to be repealed, as is called for in this piece of legislation; and when there are significant questions that remain regarding the appropriateness of

the repeal of all of the provisions of law that would be repealed by this bill. So procedurally, this is not the appropriate method for bringing this bill forward.

Specifically, my concerns could be addressed, as were some other concerns earlier in the day, by working with the authors of the bill and cleaning it up. That is what the amendment process is all about. That is what could have been accomplished, had this bill been brought to the floor under the normal procedures.

The chairman of the committee notes that the bill was referred to four committees. One of those committees, the Committee on Armed Services, is the committee on which I sit. And yet our committee did nothing with respect to this bill. The sequential referral was not waived by the Committee on Armed Services, and it was not until today that three specific problems were worked out with certain members on the committee, myself not included.

Mr. Speaker, this is not the way to legislate, where important provisions of law are worked out at the very last minute. Members have no opportunity to understand whether something is in or not in the bill, and have no opportunity to offer amendments, which would be the appropriate way to clean it up.

I have no objection to the intent of this legislation. The intent, of course, is to clean up the laws with respect to the former Soviet Union and clearly to signal to the new leaders of the former States of the Soviet Union our desire to be entirely cooperative with their efforts to proceed with democratization and the development of peaceful relations with the West. In that we all concur.

The question is whether it is wise to repeal all of the pieces of legislation that would be repealed in this bill. There are two general categories of things that are repealed. First, there are historical references; and, second, are remaining operative provisions of law.

It is not wise, in my view, to repeal all of the historical references. There is no reason, for example, to repeal the provisions objecting to the operations of the former Soviet Union in Afghanistan and Angola. The question is, who engaged in those operations? It is the former Soviet Communist regime, the regime that we condemned in this legislation, that engaged in those operations. It is that former regime which the democratic forces have been fighting. It is that regime from which power has been taken. And so it seems to me somewhat problematic as to why it would be in the United States interest or the interest of Boris Yeltsin or other democrats in Russia to wipe from our statutes the United States condemnation of acts of the Soviet Union which have been subsequently condemned by

the leaders of Russia and other former States of the Soviet Union themselves.

In other words, why revise history? Why purge the history books, including the statutes of the United States of America, of condemnation of actions that have been condemned by the democrats in Russia themselves? What is the purpose?

This is designed to make Boris Yeltsin feel any better. But, in fact, the two things that Boris Yeltsin wants us to deal with are the Export Administration Act and the Jackson-Vanik amendment, and neither of those two are dealt with in this bill because, obviously, those are too important and need far too much work to be repealed at this point in time.

As a result, what has happened is that several less significant provisions of law were singled out for repeal. But for those parts that are historical references, such as the sense of Congress resolutions or statements of policy with respect to the invasion of Afghanistan and Soviet assistance to Angola, it can serve no purpose for the democratic leaders of Russia to repeal those provisions; and, clearly, we have no purpose in pleasing the former Communists of the Soviet Union by revising history in this fashion.

Now, another part of this bill repeals the sense of Congress resolutions calling for the end of the persecution of individuals on the basis of their faith, most notably Christians and Jews, and a sense-of-Congress resolution concerning the free immigration of Jews and others. Why would we want to repeal these provisions? Does the Congress no longer believe that freedom of religion and freedom of immigration is important to the states of the former Soviet Union?

As a matter of fact, if you look at the statistics of immigration from the former Soviet Union, you find that from 1990 when 186,815 Jews were allowed to immigrate through the years 1991, 1992, and 1993, those numbers are now down to 136,000.

I do not know why those numbers have declined over time, but each year there has been a decline in the number of Jews immigrating from the former Soviet Union.

There have been continued articles and speeches with respect to difficulties under which minorities, particularly Christian and Jewish minorities in Russia, have suffered. Indeed, in September of this year Senator LUGAR organized a letter with hundreds of signatures from Members of Congress expressing our concern about reports that missionaries were being harassed and detained in Russia.

A report for the Institute of Jewish Affairs says, "Anti-Semitic demonstrations in Moscow, St. Petersburg, and elsewhere were fairly commonplace in 1993."

My point is this: to repeal sections of our law that condemn this kind of

practice sends precisely the wrong message. We are not condemning the actions of Boris Yeltsin. What we are trying to do is to support Boris Yeltsin in his efforts to wipe out this kind of practice. And wiping these things from our statute does not support his efforts in that regard.

The bill also repeals language requiring the United States to apply diplomatic pressure to extract payment of fees for United Nations missions. As the payer of 33 percent of the operating expenses of the United Nations, I would think it in our best interests to ensure that the successor states to the Soviet Union will pay their bill.

Although changes to our export policy supported in this bill are minor, I wonder why the Congress would want to begin the process of reforming our export policies when the New York Times reported just last week that Russia and China have signed a new military agreement for the Chinese, "to purchase Russian know-how and technology relating to rocketry, anti-submarine warfare, and air defense."

This agreement made the news at the same time a headline in the Los Angeles Times carried a warning that China is upgrading its nuclear arms by developing new warheads and better intercontinental ballistic missiles.

On another issue, Mr. Speaker, I object strongly to repealing references in the Foreign Assistance Act which condemn the murder of Maj. Arthur Nicholson in 1985 in East Germany. This was a heinous act of cold blooded murder. Those responsible for Major Nicholson's death should be held accountable. I know of no apology to the major's widow nor any offer of financial restitution. Should not history report and continue to record our condemnation of this murder? Why should the Russians care, if they had nothing to do with it? And, of course, if they did, we should not be repealing the act. If they did not, the condemnation should stand.

The original vision of the bill, Mr. Speaker, contained a provision that repealed the requirement to submit annual reports of noncompliance of arms control agreements by successor states of the Soviet Union, and Russia is currently not complying with either START or the Convention on Biological weapons.

It is my understanding that the Committee on Armed Services did not object to this provision only because the act of the arms control reauthorization bill contains a similar reporting requirement. I think this report is an integral part of formulating our national security strategy and should scrupulously detail each and every arms control violation of all nations, including Russia.

Mr. Speaker, I want to reserve some time for the ranking member of this committee to state his views, and so I

will simply conclude this part of my remarks by pointing out that we have to distinguish between the people who used to run the Soviet Union, which was a Communist state engaging in activities antithetical to the interests of the West and of the United States, and the democrat leaders, including Boris Yeltsin, of the State of Russia and the other former states of the Soviet Union today. It takes nothing away from their efforts and our support for those efforts to retain on our books the condemnation of activities of the former Communist Soviet Union which ought to remain on the statutes and ought not be repealed by this legislation.

Mr. Speaker, I yield 6 minutes to the gentleman from New York [Mr. GILMAN], the ranking member of the Committee on Armed Services.

Mr. GILMAN. Mr. Speaker, I rise in support of the motion to suspend the rules and pass H.R. 3000, the Friendship with Russia, Ukraine and Other New Independent States Act.

The bill, H.R. 3000, was, as my colleague, the gentleman from Arizona, pointed out, referred to seven different authorizing committees. As he may know, the Foreign Affairs Committee did in fact meet, marked up and reported those provisions of the bill lying within its jurisdiction. Most of the remaining committees did, in fact, indicate to the Foreign Affairs Committee that they had reviewed their provisions and did not intend to meet on them.

Mr. Speaker, H.R. 3000 is meant to signal a new era in our relations with all of the New Independent States of the former Soviet Union. It had its genesis, however, in our particular concern over events in the Russian Federation throughout 1993.

As the major successor State to the Soviet Union—retaining much of its population, resources and nuclear armaments—Russia is a country in which the cause of democracy and economic transformation is a vital one, not just for the Russian people, but for the whole world.

President Clinton made a commitment to Russian President Yeltsin at his Vancouver summit in April that he would ask the Congress to repeal or revise United States statutes that might be outdated given the end of the cold war.

As a result, the Friendship Act was introduced by the gentleman from Illinois, the distinguished minority leader, Mr. MICHEL and the gentleman from Missouri, the distinguished majority leader, Mr. GEPHARDT, a clear signal of the bipartisan interest in supporting reform not just in Russia, but in Ukraine and the other New Independent States as well.

Mr. Speaker, today we are challenged to start out on a new relationship with each of those New Independent States that once were a part of the communist Soviet Union, our former cold war ad-

versary. I believe that it is time to meet that challenge.

At the same time, however, we cannot forget the many difficulties that we faced during the cold war, especially in the areas of communist espionage and subversion, the diversion of sensitive technology, the arms race, and the communist enslavement of entire nations.

I make this point to underline my belief that, while we are building new relationships with each of the New Independent States, we must nevertheless judge their actions carefully.

Mr. Speaker, I also fully understand the concerns of those who fear that H.R. 3000, by deleting or revising several statutes that have become more or less historical in nature, might send the wrong signal to certain elements within Russia.

I am referring, of course, to those in Russia who seem to believe that a Russian sphere of influence over its neighbors should now succeed the old Soviet Empire, and I have in mind the bill's reference to "Captive Nations Week" and the deletion of findings regarding United States policy.

Mr. Speaker, let me say this. I am confident that this Congress will closely monitor such factions within Russia and that United States foreign policy will be influenced by the degree to which they might exert any concrete influence over Russia's policies toward its neighbors.

At the same time, I believe that we can take this opportunity to underline our determination to build a new relationship with Russia and the other New Independent States—as symbolized by this bill—and that, by doing so, we will help combat the influence of such elements. After all, there is a great deal that is promising in our new relations with Russia. Russian-American exchange programs are being undertaken on a broad scale. American assistance is being provided to economic privatization and political democratization programs.

Our Defense Department is working to build its contacts with their Ministry of Defense and to help it securely store and dismantle nuclear armaments.

Accordingly, Mr. Speaker, I urge my colleagues to support the friendship with Russia, Ukraine, and other New Work States Act as we seek to build new relations with Russia and the other New Independent States.

□ 1710

Mr. HAMILTON. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I just want to respond to the comments of the gentleman from Arizona. He made a number of expressions of concern with the fact that we had had no hearings, that objections had not been fully considered. I just want to let him know that the

first I knew of his objection to this bill was this afternoon.

This bill was introduced in August, introduced by the minority leader and the majority leader. I have checked with the staff here. We have had no indication of objection to this bill from the gentleman from Arizona.

I have also checked with the Committee on Armed Services, and they do not have any record of any objection. Maybe there was an objection. We just do not have a record of it.

But it does seem to me extraordinarily strange that the gentleman would not let the chairman of the committee handling the bill know of his objections prior to coming to the floor. We have leaned over backward to check with the chairman and the ranking member and the leadership on this bill, and it has been widely circulated and widely discussed.

Believe me, it is not my intention to bypass the gentleman. I just did not know of his objection.

Mr. KYL. Mr. Speaker, will the gentleman yield?

Mr. HAMILTON. I yield to the gentleman from Arizona.

Mr. KYL. Mr. Speaker, I cannot think of a Member of this body who is more fair, who is more objective than the chairman of the Committee on Foreign Affairs. I know that the chairman would never attempt to "slide one by" anyone. That certainly was not the implication that I intended to create.

But the Committee on Armed Services and I specifically was informed of this first this morning. I did not know that this bill was going to be on the floor of the House. While the bill had been referred to the Committee on Armed Services, our committee had never waived sequential referral, and I would just ask the chairman if it is not correct that it was not until today, this very day that the bill is now going to be voted on, that the objections of the members of the Committee on Armed Services were first dealt with and resolved; is that not correct?

Mr. HAMILTON. Mr. Speaker, it is my understanding that we have been in constant conversation with the staff of the Committee on Armed Services for the past month on this bill and that only in the last few hours have all of those objections been removed. That is my understanding, at least.

In any event, I want to assure the gentleman that it was not my intention to ignore him or to "slide it" by him, to use his words. We did all that we knew we could do to meet the objections.

I also want to emphasize that this bill is here today because the majority and the minority leaders have requested it and pushed it forward. It is their bill. And that bill comes out of their meetings with President Yeltsin and others, which they had in April of this year. We do not want to attach the

restrictions that applied to the Soviet Union to Russia.

As the gentleman from New York has said, we are seeking here, with this bill, to be very forward looking. We are not trying to excuse in any way the conduct of the Soviet Union. What we are trying to do is put the relationship with Russia, which, under international law, has responsibility for obligations of the Soviet Union, we are trying to put that relationship on a new footing and new foundation.

I wanted the gentleman from Arizona to understand how diligently we have worked to try to consult with all persons that we knew had an objection to the bill.

Mr. Speaker, I reserve the balance of my time.

Mr. KYL. Mr. Speaker, I yield 2 minutes to the gentleman from California [Mr. ROHRABACHER].

Mr. ROHRABACHER. Mr. Speaker, I rise in qualified support for H.R. 3000.

The Soviet Union was a deadly enemy of the United States for many decades, especially for the last four decades. A democratic Russia, on the other hand, is our friend, and we should try to nurture the relationship with a democratic Russia.

□ 1720

Communists who control the Soviet Government were a threat to our way of life and a pariah to our free people. Those reformers who are now struggling to lay the foundation for democracy in Russia are allies of all free people. Actually, they should be heroes to all free people.

Ronald Reagan talked about relegating communism to the dustbin of history. He did not talk about relegating Russia to the dustbin of history. He did not talk about relegating the Russian people anywhere, he talked about communism, Communist tyranny.

The best way to relegate Communist tyranny to where it belongs is to do our best to recognize that it was communism that caused the problems, but the Russian people do not bear the blame, and certainly the current Russian Government that is trying to put communism behind them do not bear that burden of blame.

The faster we move to morally bolster the democratic reformers in the new democratic Russia, the safer this world will be, and this legislation is part of that process. This legislation lays the blame of tyranny and genocide to the Communists, who ran the Soviet Union, and now, by implication, blames the Communists who are the threat to the democratic reformers in the current democratic Russia.

Consistent with that thought, I have struggled and fought and worked to try to put an amendment on this bill, and I have the support of the chairman to try to build a monument to the victims of communism over these last seven

decades, a monument that would be built right here in Washington, DC, with private money, done by private people.

Mr. Speaker, that would be very appropriate. It would be something that would be symbolic for this, the land of freedom, to have a memorial to the victims of communism. We are going to try to get this in an amendment in the bill coming back from the Senate, but another way to build a memorial to those many millions of people who died at the hands of Communist tyranny would be to pass this legislation, because this legislation is itself a memorial to those people who died under Communist tyranny, by recognizing the changes in a new democratic Russia.

Mr. KYL. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I think that the gentleman from California [Mr. ROHRABACHER], while qualifiedly supporting the bill, has put his finger on the key point here. That is that I doubt that there is anyone in this body who does not want to try to support the democrats who lead and are attempting to lead the states of the former Soviet Union today. Part of that support is to demonstrate to them that we understand that they had little or nothing to do with the acts of the leaders of the Communist regime during the cold war when the Soviet Union engaged in activities which were contrary to the interests of the West and the United States, and that in keeping provisions of law that condemn the actions of the former officials of the Soviet Union, we in no way denigrate the efforts of those democrats who are attempting to bring about freedom and democracy and free markets in the former States of the Soviet Union today.

It seems to me unnecessary to repeal those provisions of law, and in fact, in a strange, ironic twist, almost in opposition to their efforts to fight the Communist regime, because there are still Communist elements left in Russia and in the other former States of the Soviet Union.

Mr. Speaker, for example, when in our statutes we condemned the murder of Maj. Arthur D. Nicholson, Jr., and that statute is on our books today, and we called upon the people who were responsible for that murder to apologize, and to indemnify the family of Major Nicholson, why should that provision not be left in U.S. statute? Why should we repeal that? Clearly, Boris Yeltsin had nothing to do with that. Clearly, the people in his regime and those responsible for the leadership of the other now democratic former States of the Soviet Union were not responsible for the murder of Maj. Arthur D. Nicholson, Jr.; so why should not our condemnation of that act remain in our statutes?

Mr. Speaker, under this bill, this is wiped from the face of U.S. law. It is

turned out. It will not exist any more. That does nothing to advance the cause of democracy in Russia, because I do not think any of us are suggesting that it is the Russian leaders who were responsible for this act. That is, in effect, what I am trying to say here today.

Mr. Speaker, if this bill had come up under regular procedure, rather than under suspension—and I doubt that anybody on our side, until the very latter part of last week, knew that this bill was coming up on suspension—if it came up under the regular rules we could amend out sections such as this, so these would be left in our law, and it would do no harm whatsoever to our relationship with President Yeltsin and others.

However, because this is a bill coming up on suspension, we cannot amend it. I suspect there are other provisions that even my colleague, the chairman of the committee, would like to clean up in this bill, so I would simply suggest this to my colleagues: we ought to defeat this bill on suspension today, allow it to go back and be cleaned up and come back before us and it can be done very easily before we adjourn. Then pass the bill, which I will gladly support when these provisions can be cleaned up, and we can pass the bill with appropriate amendments.

Until then, Mr. Speaker, I must oppose this bill on suspension, because it sends exactly the wrong message to the folks for freedom around the country, including those people in the former Soviet States that are trying so desperately to gain freedom in their countries and to put the past of the Communist regime of the Soviet Union behind them.

Mr. Speaker, I yield back the balance of my time.

Mr. HAMILTON. Mr. Speaker, I yield 3 minutes to the gentleman from Missouri [Mr. GEPHARDT], the distinguished majority leader.

Mr. GEPHARDT. Mr. Speaker, I want to first congratulate the chairman of the committee and the ranking member and all the members who were involved in developing this legislation. When President Yeltsin met with President Clinton, the first and most important request that he made was that we take the action, or at least some of the actions, that we are talking today. This is a matter of building confidence among the reformers in Russia that we believe what they are doing is the right thing to do. They are saying to us: We need a sign of assurance from America that the cold war is indeed over, that these matters no longer apply and are relevant to the relationship between the two countries, and that we want to open up more commerce and trade and a stronger relationship.

Mr. Speaker, when the gentleman from Illinois, BOB MICHEL, and I, and the gentleman from Georgia [Mr. GING-

RICH] and the gentleman from New York [Mr. SOLOMON] were in Russia earlier this year, it was a matter of discussion again with President Yeltsin. He feels very strongly that this should be done substantively, and I think he feels very strongly that it would be a sign of confidence that the people in America and the Representatives of the people in America believe that what is happening in Russia is positive, and that we want the moves to democratization, the moves to private property, the moves to capitalism to continue.

Mr. Speaker, I think this is a very important piece of legislation. I believe it would have been even optimal if we could have passed it earlier in the year, but later is better than never. The Russians face a tough set of circumstances this winter, and the reformers are not yet out of the woods. They have a long way to go. President Yeltsin is right now trying to write a constitution for his country. He is trying to incorporate into that constitution the concept of private property, which is probably the most important reform that they can make, so that the collective farms can be privatized.

I urge Members to support this legislation. It will help the reformers in Russia; it will advance the cause of democracy and capitalism in Russia, and it will stand behind all of the rhetoric that we have made over the years about what we want to have happen in the former Soviet Union.

I commend the Members who have developed this legislation, and ask the Members on both sides of the aisle to support this very important legislation.

Mr. HAMILTON. Mr. Speaker, might I ask of the Chair how much time I have remaining?

The SPEAKER pro tempore (Mr. LAUGHLIN). The gentleman from Indiana [Mr. HAMILTON] has 7 minutes remaining.

Mr. HAMILTON. Mr. Speaker, I yield 3 minutes to the gentleman from Georgia [Mr. GINGRICH], the distinguished Republican whip.

Mr. GINGRICH. Mr. Speaker, I thank the gentleman for yielding time to me.

Mr. Speaker, I very much respect what my friend, the gentleman from Arizona [Mr. KYL] is doing today. I think he has raised some issues that need to be dealt with. In discussing just now with the gentleman from New York [Mr. GILMAN], our ranking member, and with the gentleman from Indiana [Mr. HAMILTON], the chairman of the committee, I think I can assure my good friend, the gentleman from Arizona [Mr. KYL] that there will be a serious effort made in the other body to continue to improve and clean up any language which is involved.

□ 1730

But I want to take just a minute to reinforce what the majority leader just

said and express to the House why we are trying to get this to the other body as quickly as we can.

Frankly, it has been a little embarrassing, given our long process of legislation here, to have the Soviet empire gone, and to be blocked by our own laws from offering the kind of help and doing the kind of things particularly in the private sector which we want to do to help those parts of the former Soviet empire which are trying to become democracies, and which are trying to be in a position to have a greater opportunity to seek prosperity through free enterprise. And often various totally legitimate laws that we passed during the cold war now have become not only obsolete, but actively harmful to the process of trying to help democracy.

This bill is an effort to clean up that sort of legislative undergrowth that is left over from the cold war. It will now go to the other body where our hope is that action can be quick enough that prior to our leaving at the end of this session we can finally pass this bill, get it to the President to be signed, so that as we go home for Thanksgiving we also create a greater opportunity for the people of Russia and Ukraine and elsewhere in the former Soviet empire to have an opportunity to work toward their own thanksgiving and their own better future.

So I urge a yes vote. I appreciate very much what my friend from Arizona has done in bringing these questions to our attention. I very much appreciate the chairman and the ranking member's agreement to work to improve this bill in the other body.

Mr. HAMILTON. Mr. Speaker, I yield myself such time as I may consume, and I thank the gentleman from Georgia.

I just wanted to respond to the concern of the gentleman from Arizona [Mr. KYL] with respect to the language of provisions regarding Lt. Col. Arthur D. Nicholson. He expressed two or three times his concern, I think appropriately. I want to let him know, as he may or may not know, that there were two provisions in the law relating to Arthur Nicholson's murder. This bill does strike one of those provisions, but one remains, and I will quote that language which remains to the gentleman.

I am quoting only part of the language, but I think it is the most pertinent part.

The death of Lieutenant Colonel Nicholson was an untimely, unnecessary, cold-blooded murder committed against a United States military officer in pursuit of his official duties by a member or members of the Armed Forces of the Soviet Union, in a painful and degrading manner.

The Congress deplores and condemns the cold-blooded murder of Lieutenant Colonel Arthur D. Nicholson, Jr. It is the sense of Congress that the Government of the Soviet

Union should apologize for and renounce the murder of Lieutenant Colonel Nicholson; and indemnify the family of Lieutenant Colonel Nicholson financially.

So in this bill, as amended, one of the provisions condemning the murder of Lt. Col. Arthur D. Nicholson will indeed remain in existing law, and I think it is appropriate that that is done, and it is done at the request of the Armed Services Committee.

Let me just simply reiterate what the minority leader and the minority whip and the majority leader have said. What we are trying to do with this bill is to create a forward-looking relationship with Russia. President Yeltsin has requested it, President Clinton has requested it, the majority leader has requested it, the minority leader has requested it.

We want to build a new basis of friendship. It is important that this bill go forward if that new basis is to be sustained and to continue.

Mr. ROSTENKOWSKI. Mr. Speaker, H.R. 3000, as introduced by request by Majority Leader GEPHARDT and Minority Leader MICHEL, contained four provisions that fell within the jurisdiction of the Committee on Ways and Means First, section 201—Eligibility for Generalized System of Preferences [GSP]; second, section 203—Prohibitions and Restrictions on Importations of Strategic and Critical Materials into the United States; third, section 206—Lend Lease; and fourth section 207—Soviet Slave Labor. Three of these sections, 201, 203, and 206, were revenue provisions, and the Committee on Ways and Means therefore did not believe it was timely to include them in the amended version of H.R. 3000 the House is considering today. I would note that the revenue provision on GSP was identical to one that was signed into law in August as part of the Omnibus Budget Reconciliation Act of 1993.

The Committee on Ways and Means did not object to the inclusion, in the version of H.R. 3000 being considered by the House this afternoon, of the provision on Soviet slave labor since this is not a revenue measure. This provision would repeal section 1906 of the Omnibus Trade and Competitiveness Act of 1988. Section 1906 states the sense of the Congress that the President should express to the U.S.S.R. America's strong moral opposition to Soviet slave labor policies, and should instruct the Secretary of the Treasury to enforce the provisions, under section 307 of the Tariff Act of 1930, relating to the import of items produced by forced labor.

In an effort to expedite the legislative processing of H.R. 3000, the Committee on Ways and Means, in lieu of holding a formal markup of this bill, requested in writing that the Committee on Foreign Affairs not include the revenue provisions on GSP, the importation of strategic and critical materials, and lend lease in the amended version of H.R. 3000 on today's calendar. The Committee on Foreign Affairs agreed to drop these provisions, and I would like to take this opportunity to thank the distinguished chairman of this committee as well as its members for accepting the Committee on Ways and Means' recommended changes to H.R. 3000.

Mr. HAMILTON. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore (Mr. LAUGHLIN). The question is on the motion offered by the gentleman from Indiana [Mr. HAMILTON] that the House suspend the rules and pass the bill, H.R. 3000, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

CONFERENCE REPORT ON H.R. 2401, NATIONAL DEFENSE AUTHORIZATION ACT FOR FISCAL YEAR 1994

Mr. FROST. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 305 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 305

Resolved, That upon adoption of this resolution it shall be in order to consider the conference report to accompany the bill (H.R. 2401) to authorize appropriations for fiscal year 1994 for military activities of the Department of Defense, to prescribe military personnel strengths for fiscal year 1994, and for other purposes. All points of order against the conference report and against its consideration are waived. The conference report shall be considered as read.

The SPEAKER pro tempore. The gentleman from Texas [Mr. FROST] is recognized for 1 hour.

Mr. FROST. Mr. Speaker, for purposes of debate only, I yield 30 minutes to the gentleman from New York [Mr. SOLOMON], pending which I yield myself such time as I may consume. All time yielded during the consideration of this resolution is for the purpose of debate only.

Mr. Speaker, House Resolution 305 is a simple rule facilitating the consideration of the conference report to accompany H.R. 2401, the Department of Defense Authorization Act. The rule waives all points of order against the conference report and its consideration. The rule also provides that the conference report shall be considered as read.

Mr. Speaker, as Members know, the Congress sent the appropriations bill for the Department of Defense to the President last week. This rule will allow the House to take up the authorization for DOD so that it too may be sent to the President for his signature.

The chairman of the Armed Services Committee, Mr. DELLUMS, is to be congratulated for bringing this carefully crafted conference report back to the House. The chairman and his colleagues on the Armed Services Committee have fashioned a bill which reflects the national security needs of our Nation in this post-cold war world, as well as the necessity of cutting spending. I urge adoption of this reso-

lution in order that we may proceed to the consideration of this conference report.

Mr. SOLOMON. Mr. Speaker, I yield myself such time as I might consume.

Once again, I rise to join my friend from Texas in urging all Members to support the rule, but not necessarily the conference report that will follow it.

As the gentleman from Texas has indicated, this rule waives all points of order against the conference report for the national defense authorization and all points of order against its consideration.

This type of rule was requested by the appropriate Members from both sides of the aisle, and so Members can feel comfortable in supporting it.

Mr. Speaker, I must take this opportunity today to address many of the same thoughts I expressed last week when the conference report for Defense appropriations was considered.

First, I believe we must commend the work done by the new chairman and the new ranking Republican member of the Armed Services Committee.

They have some of the most difficult assignments of any Members in this House, and they truly do an outstanding job.

They have performed their tasks very well and have done the best they could under some extraordinarily challenging circumstances.

We must also be very appreciative of the fact that the authorizers on one hand and the appropriators on the other kept in contact with each other throughout their respective conferences and they both produced conference reports which are reasonably consistent and harmonious with each other.

All of that said, Mr. Speaker, I must state again my profound concern about the slippery slope down which our Nation is heading.

A moment ago I referred to extraordinary challenges that were presented to the conferees on this bill.

And I cannot repeat it often enough: The Clinton administration is proceeding with a 4-year plan of Defense spending which comes in far below what the administration's own bottom-up review has defined as the minimum amount necessary to protect the security of the country.

Mr. Speaker, that simple fact of life is going to come back someday and haunt this House and every Member in it—not to mention the other body and the White House itself.

And I am going to keep repeating it and challenging this House every chance I get—as a warning that our Nation is becoming increasingly unprepared to deal with a major crisis abroad and to protect our essential interests.

I refer right now to the Washington Post story in Sunday's edition entitled

"Army Challenges Clinton Defense Cuts." That is our U.S. Army challenging our President's defense cuts. The first paragraph of this article, Mr. Speaker, says,

The Army has mounted a vigorous challenge to the Clinton administration's program of defense cuts, warning in an internal document that planned reductions will leave the service "substantially weakened" and ultimately threaten national security.

□ 1740

Now, how does all that happen?

Here is another article from the New York Times, and I am including these articles, Mr. Speaker, at this point in the RECORD. The other article is entitled, "Pentagon's New Somalia Bill Is \$300 Million."

Mr. Speaker, I have heard you on this floor, I have heard good Democrats like the gentleman from Missouri [Mr. SKELTON], who is the chairman of the Armed Forces Subcommittee on Personnel, talk about the serious problems we are going to have with our national defense because of the drain that is taking place in Somalia and many other places around this world where we are involved in U.N. operations.

This is putting a severe drain on our national defense preparedness, Mr. Speaker, and something has got to be done about it.

I have grave doubts about the capacity of this administration to deal with a significant crisis that is taking place right now at the 38th parallel in a place called Korea, or in the former Soviet bloc, or the Middle East, just for examples. If the present trend continues, who knows what potentially disastrous situations a new administration will inherit in 1997 or whenever the inevitable crisis is finally at our doorstep.

I do not want anybody coming back here and saying they did not know.

Mr. Speaker, I urge Members to support the rule. The rule is a fair rule. We want to expedite the business of this House. I would ask for a "yes" vote on the rule when the time comes.

[New York Times, Sunday, Nov. 14, 1993]

PENTAGON'S NEW SOMALIA BILL IS \$300 MILLION

(By Eric Schmitt)

Washington.—The Pentagon plans to ask Congress for an additional \$300 million to pay for the military operation in Somalia through next March, when American forces are to withdraw, a senior Defense Department official said on Friday.

The official, who spoke on condition of anonymity, said the extra money was needed because the Somalia operation was being paid for with money earmarked for other activities, like routine training, in the 1994 fiscal year.

The request, which still needs White House approval, is in addition to the \$261 billion 1994 military budget approved on Wednesday and signed by President Clinton on Thursday. That budget sets aside no money for the Somalia mission.

The Pentagon has historically paid for military operations—war-fighting as well as

peacekeeping—through an account called operations and maintenance. The Pentagon sometimes recoups the costs of specific military missions through a supplemental appropriation.

Last year, for example, Congress approved \$750 million to help offset the \$981.5 million in incremental costs the military incurred in Somalia from December 1992, when the operation started, to September 1993.

The senior official said that if Congress did not approve the extra spending for this year, the Pentagon might be forced to reduce routine training and combat exercises, a step that Congress has vigorously opposed.

"The services are paying for Somalia by borrowing money they planned to spend in the third and fourth quarters of this fiscal year," the official said.

For that reason, Pentagon and Congressional officials say lawmakers would probably approve the extra financing. The United States now has about 7,450 troops in Somalia and 8,600 on ships offshore.

Combat readiness has become an increasingly important concern, both at the Pentagon and on Capitol Hill. Senior commanders recall with anguish that the military reductions after the Vietnam War in the late 1970's drastically cut training time and resulted in combat units fielded at levels well below full strength.

The Army, in particular, has complained that the Pentagon's long-term budget plan does not include enough money to execute the kind of missions that civilian policy makers envision.

The senior Pentagon official criticized the Army for not paring its costs in the same way the Navy and Air Force have.

U.S. WORKER IN U.N. IS SLAIN IN MOGADISHU

MOGADISHU, SOMALIA.—An American worker with the United Nations was killed and two other foreigners were wounded today in a carjacking as United Nations officials warned of possible terrorist attacks by a Muslim group.

The American, Kai Lincoln, was fatally wounded in a shootout when four gunmen stopped a vehicle carrying him and two other workers. One attacker was killed and the other foreigners, a Liberian woman and a Norwegian man, were wounded. The assailants sped off with the car.

Mr. Lincoln, who was 23, arrived in Mogadishu in May and had worked in the United Nations information and operations center.

Regarding possible attacks by Muslim terrorists, the United Nations military force said Gen. Mohammed Farah Aidid, the clan leader who controls southern Mogadishu, "will be held responsible."

Intelligence reports indicate "the presence in Mogadishu of an unspecified number of individuals, possibly Hezbollah fundamentalists, with expertise in car bombings," Maj. Dave Stockwell, spokesman for the United Nations force, said.

Neither Major Stockwell nor the American military spokesman, Col. Steve Rausch, would specify which country might be behind the threats.

[From the Washington Post, Nov. 14, 1993]

ARMY CHALLENGES CLINTON DEFENSE CUTS

(By John Lancaster)

The Army has mounted a vigorous challenge to the Clinton administration's program of defense cuts, warning in an internal document that planned reductions will leave the service "substantially weakened" and ultimately threaten national security.

The memorandum approved by Army Chief of Staff Gordon R. Sullivan identifies 57 major weapons and spending programs that will be eliminated and 63 that will be scaled back if the administration follows through on plans to cut the defense budget by \$88 billion over five years. "The outcome of these reductions may be a future force which does not possess the technological superiority required to prevail over all potential conflicts arising from the changing world order," said the document, which was completed last month and forwarded to the Pentagon's civilian leaders.

"The Army requires additional resources if it is to meet continual demands for a technologically superior response and, at the same time, maintain the ability to respond to" the likely range of threats.

Although some grousing from the military is inevitable given the scope of planned defense cuts, the Army document is noteworthy both for its strident tone and for its explicit warning that the reductions threaten the nation's ability to fight and win wars.

In that regard, the document is an explicit challenge to Defense Secretary Les Aspin, who recently unveiled the administration's plan for a smaller, more mobile post-Cold War military of 1.4 million uniformed men and women, compared with 1.6 million under the Bush administration's proposed "base force" plan. Aspin has said repeatedly that in spite of the cuts, the nation's military will retain its "combat readiness" and ability to fight and win two nearly simultaneous regional conflicts.

Aspin has described the "bottom up" review as a collegial, "broadly collaborative" effort in which the military services had substantial say. The memorandum makes clear, however, that the Army feels slighted by the process in comparison with the other services, especially the Marine Corps, which fares better under Clinton's plan than it did under President George Bush's proposal. The internal document was included as an unclassified addendum to the Army's secret Program Objective Memorandum, which outlines the service's proposed spending plan for the years 1995 through 1999. Portions of the addendum have begun to leak out in the defense trade press, and a copy was obtained by The Washington Post.

"We're not only on the razor's edge but in danger of falling off the razor's edge," said an officer on Sullivan's staff who asked not to be named. "I think there is a lot of recognition not only within the Army but outside the Army, on [Capitol Hill], that the bottom up review is flawed, that you can't get there from here."

A senior defense official, who also spoke on condition of anonymity, disputed such claims. He suggested the Army is feeling the pain of defense cuts more acutely than other services because it has not matched their successes in paring unneeded bases and overhead.

"I don't think the Army has done as much as the Navy and Air Force in looking at their infrastructure," the official said. "They haven't done as much in retooling their overhead. *** Why does the Army still have to have 17 separate branches. *** These are basically people who work in offices."

Most of the hard choices, in any event, have been postponed. On Wednesday, Congress passed a \$261 defense spending plan for fiscal 1994, shaving a modest \$2.5 billion from the administration's request but deferring serious debate on the recommendations in the bottom-up review until next year. The

budget is about \$12 billion smaller than the 1993 spending plan, Bush's last.

In a statement yesterday, Aspin thanked Congress for producing a budget that "largely protects the readiness of our forces."

Pentagon officials acknowledge, however, that over the long term Aspin will have a tough time fulfilling his pledge to maintain readiness, a broad category that includes everything from steaming hours logged by Navy ships to the availability of bullets and spare parts. At a briefing yesterday on the 1994 defense budget, a senior official said continuing military operations in places such as the Persian Gulf region and Somalia are draining operating funds that normally would be used to promote readiness. As a result, he said, the administration will ask Congress for a supplemental appropriation of \$300 million to cover U.S. military operations in Somalia through March 31, the planned withdrawal deadline for U.S. troops in that country.

"I'm going to have readiness problems if we keep having contingencies and I have to eat it out of operating funds," the official said. "I'm having to make hard choices right now which brigades go to the National Training Center in the Mojave Desert, where the Army conducts armored warfare exercises."

"Is there a readiness problem that we have right now?" the official added. "I don't think so. But I sure worry about it."

The Army memo is especially gloomy on the prospects for modernizing the force. "Army modernization * * * is driven by a severely constrained fiscal policy," the document said. "It forces the soldier's war-fighting capability far below the level of the Army's technological potential."

Mr. Speaker, I yield 3 minutes to the gentleman from Arizona [Mr. KYL].

Mr. KYL. Mr. Speaker, I thank the gentleman for yielding me this time, and I commend him for his excellent statement, a statement with which I concur. I shall not oppose the rule, either.

Mr. Speaker, I am opposing the defense authorization conference report because I am greatly disappointed in the overall course this bill and the Clinton defense plan sets for the future direction of our national defense. With all due respect to the chairman, who allowed a fair debate on the issues, this bill and the Clinton defense plan are failures.

The administration began the year by plucking a defense number out of thin air and then attempted to craft a national security strategy around it. The result is a number that can't be justified, a strategy that does not fit the funding profiles, and missions that cannot be carried out. That leaves this Nation with a defense plan that seriously undermines our ability to maintain a robust and effective fighting force.

I am also very dismayed that the defense bill now routinely funds non-defense activities at the expense of the men and women of the Armed Forces, and potentially at the expense of our national security. For example, \$1.1 billion was provided for dismantlement assistance to Russia despite the fact

not one single missile has been disassembled and only 5 percent of the \$800 million authorized in previous years has been spent. To support the aid for Russia, \$300 million was transferred from DOD's Drug Interdiction Program.

Other examples of nondefense expenditures include an increase of \$300 million above the administration's request for the Technology Reinvestment Program [TRP] and language that allows nonnational security-related technologies to be funded with defense conversion dollars. Additionally, community roads, ponds, sewers, and a plethora of other development projects are funded through this bill as well as duplicative medical research on everything from irritable bowel syndrome to Lyme disease. The Department of Defense is even paying for security at the World Cup Games and Olympics.

Increases in nondefense expenditures at the expense of defense research, production, acquisition, and manpower. This kind of defense mismanagement must not continue.

Finally, I am very disappointed that the conferees dropped a House provision which would have required notification to Congress prior to placing U.S. troops under U.N. command. In 1918, during World War I, Gen. John Pershing set a precedent that U.S. soldiers should remain in large units under U.S. command. The historical success of that precedent speaks louder than words we can utter today. Prudence dictates that we heed the lessons of history. The Clinton administration, however, is reportedly considering changing this precedent in Presidential Decision Direction No. 13, by allowing as a matter of formal policy the placement of U.S. forces under U.N. command for peacekeeping operations.

On its face, this policy projects a sense of gross indifference for the lives of American servicemembers. Such an indifference, whether real or perceived, risks undermining the very essence of our Armed Forces—their morale. We should all heed Gen. Douglas MacArthur's admonition that "morale will quickly wither and die if soldiers come to believe themselves the victims of indifference or injustice on the part of their government." I strongly oppose PDD 13 and believe that Congress should immediately address this issue.

For these and other reasons, I will not vote for the fiscal year 1994 defense authorization bill.

Mr. SOLOMON. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. FROST. Mr. Speaker, I have no further requests for time, I yield back the balance of my time, and I move the previous question on the resolution.

The previous question was ordered. The resolution was agreed to.

A motion to reconsider was laid on the table.

Mr. DELLUMS. Mr. Speaker, pursuant to House Resolution 305, I call up the conference report on the bill (H.R. 2401) to authorize appropriations for fiscal year 1994 for military activities of the Department of Defense, for military construction, and for defense activities of the Department of Energy, to prescribe personnel strengths for such fiscal year for the Armed Forces, and for other purposes.

The Clerk read the title of the bill. The Speaker pro tempore (Mr. MONTGOMERY). Pursuant to House Resolution 305, the conference report is considered as having been read.

(For conference report and statement, see proceedings of the House of Wednesday, November 10, 1993, at page 28625.)

The SPEAKER pro tempore. The gentleman from California [Mr. DELLUMS] will be recognized for 30 minutes, and the gentleman from South Carolina [Mr. SPENCE] will be recognized for 30 minutes.

The Chair recognizes the gentleman from California [Mr. DELLUMS].

Mr. DELLUMS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of the conference report on H.R. 2401, the national defense authorization bill for fiscal year 1994.

This report, this conference report, will provide \$261 billion for defense, some \$2.5 billion below the President's request, \$3.2 billion below the House-passed bill.

I believe my colleagues can support this conference agreement for several reasons: First, it puts people first by funding a 2.2-percent pay raise.

Second, it provides a significant installment on American economic security by authorizing \$2.9 billion for economic conversion.

And, third, it reallocates operation and maintenance spending to improve force readiness.

The agreement also reshapes tactical aircraft modernization and improves major procurement programs.

For example, the conferees agreed to end the debate between the B-2 and the B-1 by providing the necessary funds to allow the B-1 to become fully operational and to cap the B-2 at 20 aircraft at \$44.4 billion.

In exchange for the cap, the conferees agreed to use this conference report as the second vote to authorize additional aircraft.

Mr. Speaker, in my humble opinion, we have finally come to the end of the debate on the B-2 bomber. It is this gentleman's considered opinion that the conference agreement entered into will also end the discussion of the further need for the procurement of any additional bombers for the foreseeable future.

Mr. Speaker, in addition, the bill authorizes the continuation of the C-17 aircraft, a program, as you well know,

that was in significant difficulty. We did so at a production rate of no more than six a year, four this year with the ability for two more if certain production and test milestones are met.

There are a number of other limitations on this program. As you well know, it is a program in great difficulty.

We asked the Department of Defense to come back and give us their program for how they would put this program on track and how they would deal with the issue of airlift into the foreseeable future. They did that.

The House agreement, the conference agreement, is an installment on the Pentagon's effort to get a handle on that program.

The conference agreement allocates approximately \$197 million for a shipbuilding initiative and about \$10 billion for environmental cleanup.

The conferees also agreed to establish a commission on the roles and missions of the military and a Presidential study on controlling nuclear arms proliferation.

In research and development, the conference report funds the ballistic missile defense, formerly known as SDI, at \$2.7 billion, a reduction of almost \$1 billion from the President's request.

□ 1750

The conferees are particularly upset over the amount of earmarking that has taken place in the past and, frankly, continues to take place. Therefore, agreement was reached to urge the administration to use competitive and cost-sharing procedures wherever possible.

In this year's bill it is permissive, it went from shall to may. However, the House and the Senate agree strongly that we would jointly sponsor legislation next year to require that contracts and grants be awarded on the basis of merit, based upon competitive procedures, and to prohibit legislation earmarking the awards.

It is this gentleman's hope, Mr. Speaker, that not only will the Committee on Armed Services come to grips with the issue of earmarking but all authorizing committees in this House will come to terms with the issue of earmarking. It is a practice that has to be behind us; it is not, in this gentleman's opinion, good government.

In operations and maintenance, the conference report authorizes \$88.5 billion, including \$900 million in readiness enhancements.

Mr. Speaker, there were also two other provisions, one that passed the House overwhelmingly, known as the Andrews amendment, an amendment that would provide for a prohibition against using defense conversion funds to support weapons sales abroad. However, there was also, as we went into

conference, an amendment offered by the other body, known as the Kempthorne amendment. This provision on defense export funding, known as the Kempthorne amendment, would have provided the President authority to allow the Department of Defense to guarantee loans for the sale of defense products.

Frankly, Mr. Speaker, this was not palatable to this gentleman and many of us in the conference.

There were three options available to us. One option was that the other body would recede to the House on the Andrews amendment, a meritorious and noteworthy amendment that would not allow defense conversion funds to be used for the purposes of promulgating arms sales, and that this body would recede to the other body regarding the Kempthorne amendment. The position that we took was that this was too high a price to pay in order to maintain support for the Andrews amendment.

There were two other options. One was to throw both amendments over the side and agree to come back next year. Frankly, Mr. Speaker, that was an option that this gentleman would have preferred. In my opinion, the Kempthorne amendment does violence to the whole concept of arms proliferation, something that we need to get our hands on.

The problem was that in the context of the dynamics between this body and the other body, that option was not available because Members of the other body felt strongly that some compromise version of the Kempthorne amendment should be in this bill, which then led us to the third option, and that was, on the one hand the acceptance of the Andrews amendment and some compromise version of the Kempthorne amendment.

The conferees agreed to incorporate a House provision using defense conversion funds to support weapons sales abroad into a provision authorizing the President to provide \$25 million in loan guarantee in support of commercial weapons sales under certain conditions.

Because the administration opposed such authority, and frankly because we oppose such authority, the conferees agreed in the spirit of comity between the two bodies to make the funding contingent upon the President's certification to Congress that, one, he intended to exercise the authority; and, two, that such authority would be exercised with specific reference to the Arms Export Control Act; and, three, the exercise of such authority would be consistent with the policy of the United States in the areas of conventional arms sales and counter-proliferation efforts.

The President would have up to 180 days to make such a certification before any funds could be utilized. And if the President did not so certify, the authority would elapse.

I might point out, interestingly enough, Mr. Speaker, that the other day when this body passed the conference report on appropriations for the Department of Defense, they did not appropriate one dime for this provision. It is this gentleman's hope that that would be the way that this provision eventually gets dealt with.

Finally, Mr. Speaker, in other areas the bill also authorized \$10.6 billion for military construction and family housing, \$12 billion for the Department of Energy defense activities.

On balance, Mr. Speaker, the conference report reflects a well-reasoned and prudent approach to funding defense programs for the coming year. It has turned a very significant corner, has put significant dollars into economic conversion, significant dollars into environmental restoration, significant dollars in the hands of military forces by virtue of family quality-of-life issues, pay raise issues.

We have gotten a handle on tactical air. It seems to me we finally put a cap on the B-2 bomber. It is this gentleman's hope we have ended the debate on the bomber so we can use funds for other purposes.

There are a number of good things in this bill I think worthy of support.

Mr. Speaker, with those comments, I reserve the balance of my time.

Mr. SPENCE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I would like to take this opportunity to express my thanks to my chairman, the gentleman from California, for his cooperation, fairness, and willingness to allow all sides to be heard during our many deliberations over the course of this past year.

I look forward to working with him in the future as we try to fulfill our responsibilities to provide for the national security needs of this country.

Mr. Speaker, having said that, this conference report cuts \$2.6 billion in budget authority and \$2.7 billion in outlays below President Clinton's request, a request that was already too low, in my opinion. The cuts in this bill reflect only about 10 percent of the 5-year defense cuts proposed by this administration. I do not see how it will be possible to cut an additional \$100 billion-plus during the next 4 to 5 years.

I remind my colleagues that these proposed defense cuts follow 9 consecutive years of reductions in defense spending.

We have already closed hundreds of bases in this country and abroad. We have cut back on people, weapons systems, readiness, procurement, and research and development.

Again, I repeat, Mr. Speaker, this year's DOD authorization bill will keep us in business. It could have been worse. During the next few years we are facing disaster if we carry through with the proposed budget of this administration.

I believe that people, readiness, and a strong industrial base have been responsible for the "second-to-none" U.S. military that has evolved over the past decade.

Yet personnel endstrengths continue to plummet, morale is down, recruiting is suffering, career uncertainty is up.

Despite the Clinton administration's opposition, we managed to provide the troops with a 2.2 percent pay raise.

In the area of readiness, deployments are up, non-traditional missions are increasing, elements of the force are stretched, and the military's ability to meet U.S. global commitments is suffering.

In readiness, we managed to reallocate approximately \$1 billion into "readiness enhancements" such as training dollars, maintenance backlogs, and European retrograde.

On the "people" and "readiness" fronts, the trends are not encouraging. As former Chairman of the JCS, General Powell, has indicated, the little "yellow warning lights" are beginning to blink. These are warning lights we should pay close attention to.

Relative to our industrial base. Excess capacity in the defense industrial base was already being aggressively reduced under the Bush defense cutbacks. For example, Secretary Cheney proposed, and Congress endorsed, termination of more than 100 weapons systems.

The procurement budget has been reduced by almost 50 percent in the past 4-5 years.

This very conference report cuts almost \$4 billion from the Research and Development account.

The heart and soul of a viable industrial base is its skilled workforce, which has been decimated by the past nine years of spending cutbacks. Not only are jobs being lost, but they are well-paying jobs encompassing unique engineering and manufacturing skills.

The Clinton administration's own Bureau of Labor Statistics estimates that the Clinton defense spending reductions will result in the loss of an additional 1.2 million defense-related jobs over the next 4-5 years.

The fiscal year 1994 defense budget has been referred to as a "treading water" budget—a budget that transitions from the Reagan-Bush defense reductions to the more dramatic Clinton cutbacks.

If this bill's \$15 million outlay reduction from last year's spending levels is merely a "transition" bill, we should all sit up and take notice of where President Clinton thinks our military ought to transition.

There are already indications that Secretary Aspin's recommended future force structure will be too small to meet U.S. defense strategy—and that even if it could, this smaller force structure is probably too expensive to maintain under Clinton-proposed defense spending levels.

Reducing defense spending is dangerous enough in my opinion. Perpetuating a gap between political rhetoric and military reality is criminal.

I repeat, this next year's DOD authorization bill will keep us in business, it could have been worse. However, during the next few years we are facing imminent danger if we carry through on the proposed defense budget cuts proposed by this administration.

Mr. Speaker, I reserve the balance of my time.

Mr. DELLUMS. Mr. Speaker, I yield 2 minutes to my distinguished colleague, the gentleman from Mississippi [Mr. MONTGOMERY].

Mr. MONTGOMERY. Mr. Speaker, I thank the gentleman for yielding this time to me.

Mr. Speaker, I rise in support of the conference report on H.R. 2401, the fiscal year 1994 DOD authorization bill. It is a balanced bill that meets the minimum needs of the military while recognizing the realities of the changing world and the realities of the Federal budget.

Mr. Speaker, I certainly commend our chairman, the gentleman from California [Mr. DELLUMS], and the ranking minority member, the gentleman from South Carolina [Mr. SPENCE], and their staffs for a job, as I say, a job well done.

Mr. Speaker, it has many provisions that are good for the military and I support them. It approves as requested in the budget, the strength levels for all components except the Marine Corps Reserve and the Navy Reserve, which were increased slightly. It sets a minimum force structure for the Army National Guard and provides about \$1 billion in procurement authorization to modernize the Guard and Reserves. It expands the reserve GI bill to authorize use for graduate studies, a provision I have been seeking for several years now. It is a good bill for the National Guard and Reserve.

Mr. Speaker, as I have said before, I believe we are going too far and too fast in reducing our military forces. We included in this bill a provision that requires a certification that the Army can meet its mission requirements before the active Army can be reduced below 550,000 in end strength.

I still believe that the defense budget is as low as it can go and still meet our national security needs. There are several items that eat up defense funds that are not strictly defense items, such as defense conversion, environmental cleanup, aid to the former Soviet Union, and counterdrug activities that total about \$15 billion. When you combine these programs with the required funding for the humanitarian relief operations such as in Somalia, Bosnia, and so forth, the real spending power of the defense budget is greatly reduced.

As we begin looking at the fiscal year 1995 budget, I will be working hard to

ensure we maintain a strong defense and don't damage our capability to provide for our national security. I urge my colleagues to support this conference report on the DOD authorization bill for fiscal year 1994.

Mr. SPENCE. Mr. Speaker, I yield 6 minutes to the gentleman from California [Mr. DORNAN]

□ 1800

Mr. DORNAN. Mr. Speaker, first of all I want to sincerely thank both of our leaders. I want to thank the committee chairman, the gentleman from California [Mr. DELLUMS], not only for his hard work, but a fairness that has become his middle name in letting the minority or any dissenting Democrats have some impact on the process here.

Of course, I want to thank Captain U.S. Navy, retired, the gentleman from South Carolina [Mr. SPENCE] for his great leadership on our side.

In thanking them for all their hard work, it gives me a heavy heart to announce that, of course, I will be voting against this because of all the things the bill was unable to accomplish.

Over the weekend I flew to Dallas to talk to some doctors who live in fear about what the administration is going to do to make them second-class citizens. All the way there I had a chance to absorb about four national newspapers and what kind of new disorderly world we live in.

Is everybody in this House aware that 10,000 people have died in Kashmir in the northern provinces of India in the last few years, and we still have a U.N. peacekeeping force there since 1948 that we are paying about 35 percent of the bill for?

Do you know the death toll in Bosnia is now reaching into the tens of thousands and there is more mortaring of children and killing of women over the weekend, and we still talk about putting 25,000 troops in there, while we cut our defense budget, and the savage cuts are to come over the next 3 years.

Is everybody aware that over 35,000 people have died in Dushanbe—where the heck is that? Oh, it is Tajikistan. Does that help?

But we wonder if there is a U.N. peacekeeping role where we will do the dirty work. It will be our men doing the fighting, and now we are putting women into combat positions.

No, no; this is not the ideal defense bill.

But let us talk about the good stuff. There is a 2.2-percent pay raise restored. I say, "Thank you, Mr. Chairman." Thanks to the gentleman from South Carolina [Mr. SPENCE]. I had the first free standing bill in to accomplish that.

We do not start putting our young people in harm's way, and some of them not so young, all around the world and then chop their pay.

Homosexual ban maintained. This one I will have to go to the leadership on our side for hanging tough.

Ask the men that I have met recently in Fort Benning, Cairo West Airport, Mogadishu itself. It came up everywhere I went, Fort Bragg, Fort Campbell.

Let the fighting men and women in the field dictate this, or at least listen to them as we, the civilian rulers, make the decisions. I am very pleased that the ban in the main has stayed.

Of course, it is idiotic not to ask people to do recruiting, when after you have shaved his head and put him in baggy fatigues, you get some big grizzled sergeant saying, you better not be, because if you are, we don't want you, and you better go see the sergeant and get an administrative discharge, and we waste all that money.

Ask them like a gentleman or a lady up front, are you, or are you considering being homosexually active? It is not compatible with military service.

Six C-17 Globemaster-III aircraft, a true defense system of the post-cold war world, but every bit as dangerous and bloody a world, requested and approved. Great.

Single stage rocket technology. Revolutionary new space launch system, additional funding. Great.

There is \$900 million additional funding for readiness enhancements, including equipment repair. We are not going back to the Carter hollow army with ships that cannot sail and airplanes that you fly at your own risk. Check your G-suit and check your ejection equipment, because you may be using them, Lieutenant.

Now, many of these positive provisions should not have even been considered, the C-17, six of them, pay raises, homosexual ban, unless the committees were forced to deal with issues because of action or inaction by the current administration. We had to push and advance most of these things within the committee.

Despite these positive measures by the conference, many vital areas of defense have remained dangerously underfunded or totally ignored. Let us tick off some.

I went down to the Redstone Arsenal, Huntsville, AL, the home of the U.S. Army Space and Missile Defense Command.

Ballistic missile defense continues to be cut, leaving deployment of any system, the theater systems that we brag we support here or strategic systems, in doubt.

I reiterate again that a single wild missile with a nuclear warhead coming at this country anytime in the next 10 years, if not the foreseeable future beyond that, this country is utterly indefensible. We have no defense.

I repeat what I said, as the townspeople march on the fictitious mad Dr. Victor Frankenstein's castle to burn it down because of what he had done, citizens of this country will burn down this building, the way the British did

in August of 1814, if a nuclear missile ever takes out a chunk of North Dakota or New York or Miami or Los Angeles or Seattle or a big chunk of Alaska. They will burn this place down, because we are leaving our country without a deployable defense against any type of errant nuclear-tipped missile for all the rest of this century and probably years beyond. This is a disgrace.

Continued funding of nondefense pork type programs, such as the Olympic games support. The Olympic games in Atlanta have about 10 or 11 multibillion dollar corporation sponsors. Why did they not get one more sponsor to save our fellow Americans the tax dollars which snuck by me in my own city of L.A., which had great gains, to have our G.I.'s on our tax dollars going around having security and picking up paper to boot, which is what they did in L.A., at taxpayers' expense because we want to get this thing through conference and cannot stand up to certain good-guy Senators. That is pork.

A Women's Health Research Center, that should be NIH or CDC. Do not put this burden on the Defense Department.

We gave them \$210 million for breast research last year. I had a scare a couple years ago with my own wife on that. Of course I want money in this research, but the military was not prepared to spend 3 out of \$210 million.

So what does my own Republican colleague say in the other body? Just transfer it over to NIH. We decided we would on our own, transfer this money out of the Defense budget. That is not only pork, it is playing games with the appropriations and the authorizing process around here.

Inaction on desperately-needed modernization programs, such as the CV-22. That is the special operations area variant of the Marine Corps Osprey, the exciting tilt-rotor technology for the future.

When you have been plucked out of the water, as I was, 6 miles off the coast by a little HUP-1 Piasaki Guardian Angel helicopter, you tend to think in terms of rescue, and this long-range high-speed variant of a Czar bird to go in and rescue captured or shot-down pilots, to not have money in there is sad; but the program is alive. Maybe we can get it next year.

Suffice it to say, President Clinton plans to cut defense spending by over \$126.9 billion from 1994 through 1998.

The cuts in this budget are the tip of the iceberg in drastic defense reductions.

These are in addition to all the Reagan-Bush cuts which were approved, as difficult as they were, by this House from 1986 through 1989. This is about the 9th or 10th year of direct hard cuts to the military.

The Reagan-Bush cuts amounted to about a 27-percent reduction in defense

spending. Had the Bush plan through 1997 been implemented, the real decline would have been 32 percent. Now under Clinton we are planning to cut defense at least by 45 percent, almost in half, and still put people in Aided's way, in harm's way, and not give them the gunships or the ground armor backup.

Mr. Speaker, I vote against this Defense bill without any problem at all, but with great admiration for my chairman and my Republican leader.

I believe this committee took some very important steps to ensure that our military remains highly motivated and well equipped to deal with the broad spectrum of national security contingencies this Nation may face for the rest of this decade and well into the next century. However, despite these very specific steps to ensure the combat readiness of our armed forces, there are still some alarming shortcomings which could prove unacceptably dangerous to our troops in the future.

These shortcomings must be immediately addressed by both the Congress and the administration if we are to fulfill our obligation to these troops, and their families, who have volunteered to defend this Nation. I also am very concerned that despite some very positive action on specific areas of the defense budget, we as a committee seem to continue to ignore the obvious warning signs of drawing down the armed forces too far, too fast. If we do not immediately recognize this danger and take aggressive steps to preserve the readiness of our military, we will be unable to avoid the hollow forces of the past, which history has taught us make us unable to achieve victory on the battlefield without great loss of military and civilian life.

I would like to commend the committee first and foremost for the steps taken to maintain the high morale of our troops—the soldiers, sailors, airmen, and Marines who must deploy on a moment's notice to anywhere in the world in harm's way. After initially accepting the President's recommendation to freeze military pay in fiscal year 1994, members finally agreed to accept the recommendations of my legislation, H.R. 1670, The Military Pay Raise Act, and fully restored the 2.2-percent cost-of-living pay increase for members of the military.

Additionally, efforts by the administration to lift the ban against homosexuals in the military were soundly defeated as the committee adopted the goal of my bill, H.R. 667, The Military Readiness Act, which sought to codify the ban into public law. Both House and Senate Armed Services Committees included language which recognizes that homosexuality is incompatible with military service, allows commanders in the field to continue to use their own discretion in the investigation and enforcement of policies necessary to maintain good order and discipline, and seeks to prevent costly litigation in the courts. The primary purpose of the armed forces remains to prepare for and to prevail in combat, not social experimentation. Truly we have codified Ban +.

In the area of equipment modernization, I would like to commend the committee for fully embracing three high technology systems vital to preserving our future ability to project power.

First, the committee accepted the recommendations of myself and Congressman PETE GEREN of Texas to provide additional funding for the procurement of 36 OH-58D Kiowa Warrior Army helicopters. Despite a clear requirement for at least 100 additional aircraft, the Department of Defense failed to request any more OH-58D's. This advanced armed scout helicopter finally gives Army aviators the long-range optics and armament necessary to adequately perform the armed reconnaissance mission in low intensity, high intensity, and even counternarcotics operations.

Next, the committee accepted the recommendations of myself and my colleagues from California, Congressmen BROWN, ROHRBACHER, and MINETA, to transfer the promising single stage to orbit rocket technology [SSRT] program from the Ballistic Missile Defense Organization [BMDO] to the Advanced Research Projects Agency [ARPA] adding over \$75 million in new funding. Besides the obvious application to national security space launch requirements, SSRT is also a prime example of a dual use technology that is equally valuable to the civilian sector. SSRT has the potential, in the form of the Delta Clipper rocket, to make space launches as reliable and as inexpensive as air travel with the legendary DC-3 transport aircraft.

Finally, the committee clearly recognized the pressing requirement of immediately upgrading naval strike aviation by fully funding the F/A-18 C/D and E/F Hornet programs. Despite the clear need for these aircraft, Congress has failed in the past to aggressively fund replacement aircraft for the aging Navy and Marine air fleets. Combat proven in Operation Desert Storm, the F/A-18 will provide Marine and Navy forward deployed squadrons with the same flexibility and firepower as the fabled F4U Corsair and F4 Phantom II strike fighters of World War II, Korea, and the Vietnam conflict.

Despite these very positive moves, I am very disappointed that other very important proposals were not included in the bill. With regards to troop morale and readiness, the committee did not accept my amendment which would have required the discharge of noncombat assignable, nondeployable, HIV-positive servicemembers within 90 days. The retention of these members is not fair to other fully fit soldiers who must be deployed in their place and go in harm's way at an increased tempo. This does nothing to improve combat readiness, and is not a proper use of precious declining resources. Fortunately, Mr. DELLUMS and Mr. SKELTON agreed to hold prompt, future hearings on the issue.

The committee also rejected the request of both the Air Force and Department of Defense to proceed forward with the immediate development of advanced precision guided munitions [PGMs] for the B-2 Shadow intercontinental stealth bomber. Conventional upgrades to aircraft such as the B-2 are a very inexpensive but effective method of modernizing our military forces. Unfortunately, the committee rejected this request and instead continued to limit all funding for the overall program.

Both the committee and the administration continue to ignore the revolutionary capabilities of the V-22 Osprey tiltrotor aircraft. Al-

though the V-22 was funded at requested levels, the committee failed to provide modest funding or language directing that a special operations variant, the CV-22, be developed. Such action not only risks ignoring the speed and range requirements of special forces and search and rescue operations, but also ignores the revolutionary capability a fully developed V-22 could bring to Marine amphibious operations.

Finally, I am quite concerned that the committee did little to recognize the coming disaster in military readiness if we do not immediately address problems with maintenance and training. Without proper and adequate funding of specialized training schools such as the Air Force's Red Flag advanced fighter pilot flying unit, or proper and adequate equipment maintenance such as readily available spare parts, the greatest military force in the history of combat, the U.S. military, could suddenly come to a bloody and grinding halt on the battlefields of tomorrow.

Mr. DELLUMS. Mr. Speaker, I yield 2 minutes to the distinguished gentlewoman from Colorado [Mrs. SCHROEDER], the distinguished chairwoman of the Subcommittee on Research and Technology of the Committee on Armed Services.

Mrs. SCHROEDER. Mr. Speaker, I thank the gentleman for yielding this time to me, and I thank him for his very hard work on this Defense authorization.

I want to say that I think everybody worked very, very well and we really owe a tremendous sense of gratitude to the gentleman from California who has worked tremendously hard to try to put together as fair an overall package as we could.

I am proud to say that even though \$4 billion came out of my account, and that was very painful, we have retained and added to the most pork-resistant program in the Defense Department \$300 million, and that is the conversion TRP program.

Now, you know and I know that nobody wants a pork resistant program. Everybody says they do, but when push comes to shove, they do not.

I am very, very pleased that we have been able to withstand all of this and for all the hits we took on earmarking and everything, it is not our committee that was doing it.

We have really retained the best pork resistant program I think yet to be found where we are building on the terrific research base that has been put out there for the Armed Services, and I am very proud of that.

I am also very proud of the women's health part. I heard the gentleman before say, "Why don't they just give it to the National Institutes of Health?"

I will tell you why, because women in the military have unique and very different problems. Women moving into the military are major players in the military. If you do not constantly focus on this, they tend to forget women are in the military, a big exam-

ple being this whole issue around the gulf war syndrome.

□ 1810

We are all very concerned about the gulf war syndrome, but they are about to go into testing on that without gender coding it, and women appeared to be having very different symptoms because of their metabolic differences than men were having. Well, if it is not gender coded, it does not make any sense. When do we start treating women as full participants and people we are very proud of? We put them in uniform, we send them everywhere, we have them taking care of everyone else's health care, and we are finally trying to catch up, so I am very proud that we have done that, and I think it is long, long overdue, and I thank the gentleman from California [Mr. DELLUMS] for his hard work in this whole area.

The fiscal year 1994 Defense Authorization Act authorizes the Secretary of Defense to establish a Defense Women's Health Research Center, to coordinate research on women's health issues related to service in the Armed Forces.

This provision builds upon two significant facts: the growing number of women in the military, and the historical underrepresentation of women in medical research protocols. Because the military health care system has a unique ability to track research subjects over long periods of time, the Women's Health Research Center can play a major role in advancing women's health care research.

Although the House provision made the center a mandatory program, at the insistence of the Senate, it is within the discretion of the Secretary of Defense whether to establish the center, or to use the authorized funds for women's medical research at existing DOD medical centers. Our intent is clear, however, that the purpose of this funding is to provide for a multidisciplinary, multiinstitutional research program coordinated under a single coordinating agent within DOD.

Mr. SPENCE. Mr. Speaker, I yield 2 minutes to the gentlewoman from Florida [Mrs. FOWLER], a real hard-working new member of our committee.

Mrs. FOWLER. Mr. Speaker, I rise today in support of the conference report on the Defense authorization bill. I want to congratulate Chairman DELLUMS and our ranking Republican member, FLOYD SPENCE, for their excellent work on this large and complex bill.

There are a number of important achievements in this year's bill. We have provided a much-deserved cost-of-living increase to our service personnel, enhanced critical logistics capabilities, and moved forward on our next generation of submarines. I am also especially pleased that we have opened up many new opportunities to women in the military.

At the same time, I must voice my deep concern about the severe cuts

that our national defense budget has sustained. This year's bill provides some \$13 billion less than the Bush administration had budgeted for this fiscal year, and it is clear there will be renewed efforts to cut defense spending even further next year. I want to stress that I will give my most careful scrutiny to the Bottom-Up Review and oppose plans to cut defense spending too deeply in the days ahead.

Mr. DELLUMS. Mr. Speaker, I yield 2 minutes to the gentleman from Missouri [Mr. SKELTON], chairman of the Subcommittee on Military Forces and Personnel.

Mr. SKELTON. Mr. Speaker, on behalf of the Subcommittee on Military Forces and Personnel, I am pleased to report to the House on the personnel portions of H.R. 2401, the conference report on the Defense Authorization Act for fiscal year 1994.

At the outset, I want to commend all the members of the conference—especially the ranking members, JON KYL and DAN COATS and my counterpart in the other body, RICHARD SHELBY—for their diligence and hard work on the difficult issues before us this year. A special congratulations to our chairman, the gentleman from California [Mr. DELLUMS], for the first DOD bill under his leadership, plus a thank you to our ranking member, the gentleman from South Carolina [Mr. SPENCE].

In the middle of the conference, the Subcommittee on Military Forces and Personnel held a hearing on "The Impact of Peacekeeping on Army Personnel Requirements." Conducting such a hearing during conference was quite out of the ordinary. It may have been a first, yet the importance of the topic merited holding the hearing when we did. Among those who testified were retired Generals John Vessey, Carl Vuono, and Max Thurman, respectively former Chairman of the JCS, former Army Chief of Staff, and former Commander U.S. Southern Command. As a result of the hearing, we altered our work in mid-conference on Army end strength. We have serious concerns about Army force reductions and the two war strategy the administration says the Army can carry out, especially with forces engaged in peacekeeping. In effect, we have put the administration on notice.

Elsewhere, I am especially pleased with action taken on the matter of funding a full 2.2 percent military pay raise. It was done in a responsible fashion by finding offsets in the fiscal year 1994 Defense budget request. Many in the military have come to view a pay raise as symbolic of Congress' support for maintaining an adequate quality of life. This action will help maintain morale of service members in a time of turbulence.

On the issue of DOD policy on homosexuals, the conference elected to support the men and women of the Armed

Forces on this issue. I am very cautious about any change that threatens the morale and cohesion of our fighting force. We must not risk undermining the best military force in our Nation's history. Second best is not an acceptable option on the battlefield.

Based on the testimony of the Secretary of Defense, the Joint Chiefs, the general counsel of the Department of Defense, and the services' senior enlisted members during our hearings this past summer, I am convinced that the heart and soul of the pre-January 1993 policy has been preserved. The result is a policy that will change very little of the day-to-day life of service members. The bottom line remains the same as it always has been, homosexuals will be separated if they demonstrate conduct that is disruptive to morale and unit cohesion.

The language in the conference report codifies the critical elements of the old policy. The language includes a statement of congressional support for reinstating the practice of asking applicants about their sexual orientation if the Secretary of Defense determines that is necessary in the future.

I know we are all anxious to put this issue behind us and get on with the many other challenges ahead. I believe codification essential if we hope to put this divisive issue behind us. The language approved by the conference allows us to achieve that purpose.

On the issue of end strengths, the conference figures represent an active duty reduction of 104,800 below fiscal year 1993 levels, and a reserve reduction of 55,630.

Here are some other highlights. The conference report: directs the Army to develop a plan to test small unit integration; approves the Secretary of Defense's request to repeal the statutory restriction on the assignment of women to combatant vessels; and authorizes funding for an improved pharmaceutical benefit for dependents and retirees.

THOUGHTS ON DEFENSE IN GENERAL

Allow me now to address the overall defense picture. Quality people, modern weapons and equipment, tough training, and intelligent, well-educated leaders are the key elements that make for strong, capable and flexible armed forces. The investments of the early 1980's allowed us to raise, equip, train, and maintain military forces second to none.

The following facts should be kept in mind as we go through this examination of the fiscal year 1994 conference report. First, this is the ninth year of a real decline in defense spending. The current request of \$250.7 billion in budget authority is almost \$30 billion less than what had been planned for in fiscal year 1994 only two years ago. Second, over 120 major defense programs have been cut since the 1990 budget agreement. Third, we are reduc-

ing the size of our forces and the people who man them. Over the past 3 years the Army has eliminated four active Army divisions (from 18 to 14), the Navy 99 ships (547 to 448), and the Air Force 20 active duty squadrons (76 to 56). This year alone, personnel reductions will total 104,800 in the active component and 55,630 in the reserve component. Fourth, as many of our colleagues know, bases are being closed or consolidated at home and abroad, over 800 prior to this year. In Europe, our forces have come down from 314,000 in 1990 to 160,000 by the end of this year. Fifth, the resources freed for other needs in our society have been considerable. Outlays devoted to defense as a percentage of GNP reached 6.5 percent in fiscal year 1986. The figure for fiscal year 1993 is 4.6 percent, a drop of almost 2 percentage points. This is one way to measure the peace dividend. Another way to measure the peace dividend, the way I measure it, is in the war that was never fought—World War III with the Soviet Union.

As I noted earlier quality people are an important element, the most crucial element, in any military force. There are signs, however, that we are not maintaining the high standards of the past few years. High school graduates entering the services have dipped from 97 percent at the time of Desert Storm to 94 percent today. The comparable figure in 1980, the low point of the post-Vietnam era, was 68 percent. Similarly there has been some deterioration in enlistment test results. Today the figure for those who score in the upper half is 70 percent. During Desert Storm it was 75 percent. In 1980, it was 37 percent. Yes, we are in much better shape than we were in 1980, but there are some warning signs that we would be imprudent to ignore.

Last year I was concerned about the cuts in the operations and maintenance accounts [O&M]. These are the accounts that fund the kind of tough operational training our forces need if they are to maintain their readiness. I remain concerned but am reassured to some extent that measures are being taken in the fiscal year 1994 budget to protect direct readiness of units by the reallocation of funds to increase operating tempo and training for operational units. We will have to monitor this matter closely year by year.

My real concern relates to the size of the defense budget and the size of the force structure in future years. We have seen what has come out of Secretary Aspin's Bottom-Up Review. We still need the details. I understand the desire of some to shift resources from defense to domestic needs. My fear is that those who would urge accelerated cuts in defense spending and force structure will lead us to the same place we have found ourselves on past occasions in our history—with military forces ill-prepared to fight. This was

the case in Korea in the summer of 1950 and in the deserts of Iran in the spring of 1980. We need not repeat these sad experiences yet again in some other distant location, and I will work to the best of my ability to ensure that, at least in this era, past is not prologue. Americans want a reduction in defense spending, but they don't want to undo the great investments in time, effort, and money that have resulted in the finest military force in our Nation's history.

It is far better to maintain a larger military force than a smaller one if the larger force reduces the likelihood the nation will have to be used in a general war. George Washington was right: "To be prepared for war is one of the most effectual means of preserving peace." And in the long run cheaper, too.

Earlier this year, in a speech at West Point, President Clinton warned about cutting defense too much. "The budget cuts that have come at the end of the cold war were necessary, even welcome," he said. "But we must be mindful," he continued, "that there is a limit beyond which we must not go." In a press interview that same day the President described his intent as sending "a cautionary note to the House and Senate." He continued, "I think we have cut all we should right now." I believe the President is right on target.

Despite the cuts in both spending and force structure, I shall vote for this measure because I believe it maintains the strong, capable, and flexible armed forces for the 1990's and beyond that this Nation requires. The committee members have done their homework on the bill before you today, and I request that the House take great care in its efforts to re-fashion the committee's work.

I close by expressing my genuine pleasure with the work of the new committee chairman, the new ranking member, and the committee staff for the fine work done on the fiscal year 1994 defense bill. This committee continues to do first class work in a variety of important defense issues. The new chairman has led the committee in a manner that does credit to his well-deserved reputation for fairness. As did his predecessor, he has attempted to raise the sights of committee members from the line-item trees to the policy forest. He is having a fair measure of success. While there are still disagreements on line items and policies among the members, and between the Congress and the administration, the differences are to a greater degree based on well-articulated policy choices. This is how the work on national defense should be done, especially in the years ahead as the choices become tougher.

Mr. SPENCE. Mr. Speaker, I yield 2 minutes to the gentleman from Florida [Mr. BILIRAKIS].

Mr. BILIRAKIS. Mr. Speaker, I would like to highlight one aspect of

this legislation which I believe will have a positive impact on many of our Nation's veterans.

Since I was elected to the House of Representatives in the 98th Congress, I have been working to enact legislation that would eliminate a 19th-century provision of law that requires a disabled career military veteran to waive the amount of his retired pay equal to the amount of his VA disability compensation.

Nationwide, more than 300,000 disabled military retirees must give up their retired pay in order to receive their VA disability compensation. In effect, they must pay for their military retirement, something no other Federal retiree is required to do.

For those of you who are not familiar with this offset, let me give you an example of its inequitable effect on military retirees. It is possible that two Federal retirees with the same service-connected disability suffered in the same battle, who have worked the same number of years in Federal service, will be treated differently. Why? Because one served all his years in the military and the other served only 2 years in the military and the remainder in civil service.

The military retiree must pay for his disability benefits from his retirement check. But the civil service retiree may receive both his civil service retirement and his VA disability in spite of the fact that his military service is included in calculating his civil service retirement, and in spite of the fact that he had been receiving VA disability during all his years as a civil servant.

The military retiree is unjustly penalized by the fact that he chose military service as his career. In effect, the military retiree is singled out solely because of his career choice.

Probably the most frustrating fact to me is that we have asked these brave men and women to serve during a time of need, under tremendous duress and danger, and yet the Government fails to abide by its commitment to provide full military retirement. How can we possibly expect to maintain a viable national defense if servicemembers realize that if they experience a service-connected disability, they cannot receive VA disability compensation and military retired pay?

In the House of Representatives, my legislation to eliminate the offset has received widespread bipartisan support. Moreover, this legislation is backed by the Nation's veterans organizations. Given this overwhelming support in Congress and in the veterans community, Congress should be compelled to take action on this matter.

Therefore, I am pleased that the conference report to H.R. 2401 takes the first step toward eliminating this discriminatory offset. The conference report provides that retirees with a 100-

percent disability rating would be eligible to receive retirement pay and disability compensation concurrently. This important provision will be effective January 1, 1994, unless the Department of Defense issues a report that Congress requested in the fiscal year 1993 Department of Defense Authorization Act.

While I would have preferred the language that was contained in the Senate bill, S. 1298, I believe that conference report is an important step forward toward correcting an unfair law.

The time has come to make sure that we keep our promises to those who have shouldered the burden of our Nation's defense. Retired veterans should be rewarded rather than penalized for having served their country for 20 plus years. I hope that soon they can receive the compensation they have earned.

Mr. DELLUMS. Mr. Speaker, I yield 2 minutes to the distinguished gentleman from Oklahoma [Mr. MCCURDY], chairman of the Subcommittee on Military Installations and Facilities, who negotiated all the military construction programs in the conference report.

Mr. MCCURDY. Mr. Speaker, I am pleased to rise in support of the conference report to H.R. 2401, the Defense Authorization Act for fiscal year 1994. I would like to compliment the chairman of the full committee, the Gentleman from California [Mr. DELLUMS], and the gentleman from South Carolina [Mr. SPENCE], the ranking Republican, for their leadership of the committee and the conference report we bring to the floor today which should be commended to the body. With the completion of the Bottom-Up Review by the Department of Defense in the midst of the committee's markup process, the committee had no easy task in crafting a bill which comprised the basic tenets of the win-win strategy articulated by the administration.

Two key components of this new strategy are the conferee's support for the C-17 and the agreement to not reduce Army end strength without Presidential certification.

I have been a supporter of the C-17 for many years, and had the opportunity recently to fly in one of the test aircraft. The Bottom-Up Review has convinced me even more about the need for the C-17's capabilities. I share the concerns that my colleagues have with respect to performance and management issues associated with this plane and have been encouraged by the actions of the Department of Defense in undertaking a thorough review of this program. I am hopeful that this review will be able to put the C-17's problems behind us. The conferees' actions protect this option without prejudging the outcome of the review and I encourage my colleagues to support it.

I firmly believe that with the growing number of peacetime missions and

the need to effectively carry out the win-win strategy, the Army must not be placed in a position of not being able to effectively respond to these contingencies. I strongly support the conferees' decision not to reduce Army end strength to drastically reduced levels. We must ensure that our military leadership has the necessary resources available to carry out its missions.

The Subcommittee on Military Installations and Facilities, which I chair, has authorized over \$10 billion in much-needed active and reserve military construction projects for fiscal year 1994. Even with the decline in the defense budget, we must all understand the need for a modernized infrastructure in order that our All Volunteer Force can live and work in a decent environment. The conferees are also recommending a base closure assistance package, title 29, which comes to grips with the economic malady faced by local communities when a base closure is undertaken. The title provides for a uniform property conveyance process which will enable local entities to acquire property on closing installations in a quicker fashion and provides discretion to the Secretary of Defense to convey this property at less than fair market value if needed. This will greatly aid communities in their prospects for robust economic redevelopment. The conferees have also provided for fast track environmental cleanup and greater Federal interaction in further complementing the property reuse process.

Mr. Speaker, I would like to thank the gentleman from California [Mr. HUNTER], the ranking Republican, and all the members of my subcommittee, the conference panel, and my Senate counterpart, Senator GLENN, Ms. Alma Moore and John Reskovic on staff, for their hard work in providing a conference report which responds to the call for a strong national defense. I urge its adoption.

□ 1820

Mr. SPENCE. Mr. Speaker, I yield 4 minutes to the gentleman from Pennsylvania [Mr. WELDON].

Mr. WELDON. Mr. Speaker, I rise in support of the conference agreement and urge our colleagues to support this effort. I want to start off by applauding the committee chairman for doing, I think, a fine job in his first year as chairman and working in a true bipartisan way to allow us to reach a decision and an agreement on a final Defense bill, and certainly our ranking member, the gentleman from South Carolina [Mr. SPENCE], for his leadership in working with members on the Republican side to reach an agreement in what was in many people's minds an impossible situation. I think we did the best we could, Mr. Speaker, in an impossible or very difficult situation.

My concerns about the final Defense bill that is before us today and before

the other body is that the numbers were basically pulled out of the air. The original numbers were not based on a real net threat assessment in terms of where we face problems around the world. Rather, this number was given to us and we were told to try to fit defense spending into that picture.

There are some in this country who have the mistaken impression that somehow we have increased defense spending dramatically over the last several decades. In fact, if we look at the current trend in defense spending and what we are currently spending this year, we are running a little bit above 3 percent of gross national product, which is down from a high of 9 percent of gross national product during the 1960's when John Kennedy was President.

If you look at defense spending as a percentage of total Federal dollars in outlays, it is about 17 cents of every Federal dollar this year, when back in the sixties it was somewhere over 50 cents of every Federal dollar. We in fact are decreasing defense spending. And, in fact, in this current environment where we are concerned about job loss, the Office of Technology Assessment and the Congressional Budget Office have both estimated that if we continue on the current trend that President Clinton has put out for us, and that is cutting defense spending by \$128 billion over 5 years, we will see a loss of somewhere between 1.5 and 2 million real jobs. These are both jobs in the military as well as jobs in the private sector in those companies that are doing defense contract work.

Mr. Speaker, I happen to think that we are on the wrong course. We should be basing our defense numbers on the problems that are out there, on the problems in the Soviet Union, the 64 hostile situations that are occurring around the world at this very moment.

We in this body want to commit our troops all over the world, whether it is Bosnia, whether it is Haiti, or whether it is in the Somalia situation, or whether it is in Macedonia. Unfortunately, these young men and women are feeling the impact of the cuts we are making already in this first year budget.

Earlier this year I was over in Somalia with some of our colleagues on a trip to meet with our troops and to get an assessment for how well the mission was going. What we heard from our young marines on the ground in Somalia was that they had been deployed three of the last four holiday seasons. And the reason is because we have cut back the marines, we have cut back our military so dramatically already that we are forcing these young people to stay deployed for longer lengths of time at more deployments around the world, which destroys their quality of life, and which ultimately impacts morale.

Mr. Speaker, we have to be aware of these things. We have to be aware that if we continue on the trend established by this President, ultimately I think our military preparedness is going to suffer.

So I urge my colleagues in supporting this bill, which is a bipartisan conference report, as I said before, worked out by our chairman and ranking member and the other body, to keep in mind in future years that our defense budget numbers need to be based on the real threat, not some arbitrary number handed to us. Our job as members of the committee is to assess the threat to the security of this Nation, not to take a number out of the air and try to force in our national security needs in some artificial way. That is in fact what we did this year, and we are going to pay the price for that unless we can turn this around in the outyears.

Mr. Speaker, I will be back next year, along with many of my colleagues on both sides of the aisle, to make sure that we truly respond to the needs that are out there in terms of what our defense spending numbers should be. But again I urge support for this conference agreement, and I applaud the leaders on both sides for the hard work and the coordination of the efforts among both sides of the aisle.

Mr. DELLUMS. Mr. Speaker, I yield 1 minute to the distinguished gentleman from Florida [Mr. HUTTO], the chairman of the Subcommittee on Readiness, who negotiated all the operations and maintenance matters in this conference agreement.

Mr. HUTTO. Mr. Speaker, I rise in support of the conference report on the fiscal year 1994 National Defense Authorization Act.

We worked hard this year in crafting a bill that protects the readiness of the Armed Forces in an austere budget. We added funds to ensure our forces would be effective and safe on the battlefield. At the same time, the conferees continued to attack waste and inefficiency.

Mr. Speaker, while some of us have concerns that we are drawing down our defense too much too soon, I congratulate Chairman DELLUMS for his leadership through the difficult deliberations this year. This conference report represents a good compromise on major issues affecting the national security of our Nation, and I urge my colleagues' support.

Mr. SPENCE. Mr. Speaker, I yield 2 minutes to the gentleman from California [Mr. HUNTER].

Mr. HUNTER. Mr. Speaker, I want to thank the ranking member for recognizing me and letting me say a few words. I just want to compliment the gentleman from South Carolina [Mr. SPENCE] and our chairman, the gentleman from California [Mr. DELLUMS], for their excellent management of this conference.

I would classify this conference and the leadership that they exhibited and

my colleagues, the gentleman that just spoke, the gentleman from Florida [Mr. HUTO], and our ranking members on the Republican side and my chairman on the Subcommittee on Military Construction, the gentleman from Oklahoma [Mr. MCCURDY], and all of the members who attended the conference and worked the conference, I would classify this conference as excellent management of inadequate dollars.

Mr. Speaker, it is funny, a lot of us get up and continually make the case, fell that we need to make the case for a strong national defense. Yet our words are always superseded by events, because world events make a case for a strong national defense.

I think some of the euphoria that attended the falling of the Berlin Wall had died away now and we realize that large parts of this world are burning today.

So I want to say that I look on the dollars that we are cutting this year as a down payment on a \$219 billion cut in national security that the President has advocated, and I hope that this Congress reverses that course next year.

Just a few things in particular, I think the fact that we live in an age of missiles, we are going to see enemy missiles directed at ourselves or our allies in the near future. I think that is something we can count on. Yet our missile defense system is moving along with the same sense of urgency as a highway project. We are not going to see a capability until late in this decade, maybe early in the next century.

So I want to commend all my colleagues for their very hard work. I want to urge them to relook at the President's recommendation and reverse this course that we are presently on.

Mr. DELLUMS. Mr. Speaker, I yield 2 minutes to the distinguished gentleman from Tennessee [Mrs. LLOYD], who did an admirable job in negotiating and heading up the acquisition panel in the context of this conference.

Mrs. LLOYD. Mr. Speaker, it gives me great pleasure to rise in support of this conference report. The chairman is to be congratulated on his leadership. In his first conference as chairman, he was confronted with several controversial issues in need of resolution. The gentleman rose mightily to the task and it was inspiring to serve under him as one of his panel chairs. The chairman was fair, listened and gave all the members of the committee a chance to participate. To Chairman DELLUMS, my thanks. The staff, who perhaps put in even more hours, are equally deserving of our respect and thanks. In particular, Doug Necessary, Steve Thompson, Cathy Garman, Bruce MacDonald, Joan Rohlfing, Sharon Storey, Jim Anton, and Marilyn Elrod.

The acquisition panel was tasked with making many difficult procure-

ment decisions. While there were many areas in which the House and Senate were in agreement, there were equally as many that required negotiation. I would like to discuss some of the programs of interest to the Members.

The C-17. As many of my colleagues already know, the Department of Defense is facing a shortage of airlift capability when it comes to outsized cargo, landing space and overall airframe endurance. The C-17 aircraft was envisioned as the solution to this shortfall. However, program delays, missed milestones, failed wing tests, and poor program management—both from the contractor and the Air Force, have plagued this once promising program. We on the committee were faced with deciding its future.

After significant deliberations, we authorized the six aircraft requested. At the same time, we created a C-17 alternative program should the existing program continue to be problematic. Now, of the six aircraft authorized, two are linked to specific DOD milestones. If milestones are not met, the Under Secretary of Defense for Acquisition, may choose not to procure the remaining two aircraft in favor of some alternative. Congress is to be notified of any actions in this regard. We on the committee believe this approach yields the appropriate balance of flexibility and accountability so that we can salvage this program while also ensuring that our future airlift needs are met.

Many of my colleagues have been around for previous debates on the B-2 Stealth bomber. Like the C-17, this program has had a high profile media life. With past problems and cost overruns Congress attempted, in earlier defense bills, to gain control of this critical program. Specifically, Congress asked that certain criteria or hooks be addressed before we would consider funding the last five B-2 aircraft. DOD has responded to our request. The GAO, upon preliminary review, has concluded that the requirements at this point in the program have been met. Accordingly, with passage of this bill, the funding for the last five aircraft will be obligated. We have also included a \$44.4 billion cost cap on the B-2, effectively terminating the program at 20 aircraft.

With the B-1 adopting a conventional role, the committee fought for and won significant funding for the conventional upgrades to the B-1—the backbone of the bomber force. With over 90 aircraft in our inventory and a cap on the B-2 program at 20, the importance of the conventional bomber platform is stressed.

In the area of tactical aviation, several decisions have been made. In accordance with the Bottom-Up Review, the Navy AF/X and the Air Force multirole fighter [MRF] have been terminated. We fully funded the F/A-18E/F, the F-22, and we have authorized the

final 12 F-16 fighters. The committee also approved significant funding to develop a modified F-14 to replace the aging A-6 deep strike aircraft on our carrier decks. With the cancellation of the AF/X, this program takes on added importance.

Acquisition reform is every bit as important to the future of our national defense as the programs mentioned above are. For far too long we have asked vendors to navigate their way through a sea of duplicative, onerous, and archaic acquisition regulations to make a simple sale to the Department of Defense. Many of the conclusions and suggestions contained in the section 800 acquisition reform report are embodied in this bill.

Mr. Speaker, there is much more to the fiscal year 1994 Defense authorization than I have mentioned here. In my opinion, this legislation represents the best that we have to offer. It strikes that very delicate balance between what is right for our national security and what is right for our wallets. I urge support for this bill.

□ 1830

Mr. SPENCE. Mr. Speaker, I yield 2 minutes to the gentleman from Washington [Mr. DICKS].

Mr. DICKS. Mr. Speaker, I want to thank my colleague, the gentleman from South Carolina [Mr. SPENCE], who is one of the most decent and hard-working individuals in this institution, for yielding time to me for these brief remarks.

I also want to congratulate our chairman, the gentleman from California [Mr. DELLUMS], for his outstanding job on this bill. I think it is a bill which the House can certainly support and one that I think he has handled masterfully for his first bill as chairman of this committee.

Over the last decade, I have always been concerned about airlift and mobility. As we bring America's troops back to the United States, I think we all have to be concerned that we have the airlift and the sealift in order to redeploy them.

I want to commend the committee and the conference for adopting one of the most creative approaches to dealing with our airlift responsibilities. I have always supported the C-17 Program. And yet, I think every one of us worries about that program.

I think what the conference did, in creating an alternative, in calling for a competition and saying that we want them to go out and look at a nondevelopmental aircraft, either military or a commercial derivative.

I had the opportunity to be with Mr. Don Deutsch, our Assistant Secretary for Acquisitions, this weekend. He has told me that he has followed what the committee has done. He is going to start a program. We are going to have a competition, and I think it is going to be good for everyone involved.

I think we need to have an alternative to the C-17. I think we need to have an airplane to replace the C-141's, and I see this as a supplement, as a complement to the C-17.

I hope we can build a significant number of them, but I think we can take a commercial, off-the-shelf aircraft, like the 747 freighter, which, by the way, carries more in tons and pounds than does the C-5, and use it as a viable alternative for airlift purposes.

I commend the committee for their creative actions.

Mr. DELLUMS. Mr. Speaker, I yield 1 minute to the distinguished gentleman from Massachusetts [Mr. MEEHAN].

Mr. MEEHAN. Mr. Speaker, I rise in support of the conference report on the 1994 Defense authorization bill. I commend Chairman DELLUMS for his leadership in crafting a defense budget that preserves combat effectiveness while easing the transition to a civilian economy.

I regret the outcome of the debate over gays in the military, but the committee advanced the cause of equality by providing for the permanent assignment of women to Navy combat ships.

I also applaud the conferees for their foresight in authorizing \$2.9 billion for defense reinvestment and economic conversion activities, and \$562 million to clean up military installations. This funding is critical to communities like those surrounding Fort Devens, an Army base in my district that is about to close.

Another area of significant interest to me is funding for industrial base and technology programs. Massachusetts has a strong high-technology, highly skilled work force, and we must ensure a smooth transition from defense to commercial markets for some 296,000 workers in defense or defense-related jobs. That is why the \$624 million authorized in the conference report for the Technology Reinvestment Project is vital to economic recovery in Massachusetts. The conferees were wise to reject proposals to allow defense conversion funds to be used for arms sales.

I am pleased that the conferees adopted my language requiring the Secretary of Defense to develop and submit to Congress a detailed plan to coordinate development and implementation of theatre missile defense programs with our allies. This represents a reasonable first step in getting our allies to share in the cost of theatre missile defense research and development programs.

Finally, I want to express my appreciation to the chairman and his extremely capable staff for their hard work on this bill.

Mr. DELLUMS. Mr. Speaker, I yield 1 minute to the distinguished gentleman from California [Ms. HARMAN].

Ms. HARMAN. Mr. Speaker, I rise in strong support of the conference report.

My colleagues on and off of the Armed Services Committee all know how much hard work has gone into forging the agreement between the House and Senate. This agreement is the first step toward right-sizing the defense budget.

Congress has done many important things in this bipartisan bill. We have: Made tough choices among key tactical aircraft programs; reshaped missile defense programs to meet postcold war threats; increased defense conversion funding by two-thirds above last year's level; continued the Nunn-Lugar program and provided additional aid to the former Soviet Republics; opened new opportunities for women in the armed forces; and met our airlift needs by putting the C-17 Program on track and developing fallback options.

Mr. Speaker, the gentleman from California [Mr. DELLUMS] deserves great credit for these achievements.

During this long, hard process he has paid attention to detail and kept the committee focused on its top goal: shaping a rational, affordable and strong national defense. It is an honor to serve with him on the committee and in the conference.

Mr. Speaker, I urge my colleagues to support the conference report, which is an important reflection of his leadership.

Mr. DELLUMS. Mr. Speaker, for the purposes of entering in a colloquy with my distinguished colleague, the gentleman from California [Mr. FARR], I yield myself 2 minutes.

Mr. FARR of California. Mr. Speaker, will the gentleman yield?

Mr. DELLUMS. I yield to the gentleman from California.

Mr. FARR of California. Mr. Speaker, in the interest of clarifying the provisions of title 29—which are now part of this conference report before us today—and how those provisions apply to the conveyance needs of the University of California and the California State University System at Fort Ord, I have several questions. I believe that the University of California and the California State University System are public entities and should be considered eligible as public entities and should be considered eligible as public entities for conveyance of property under title 29 of the conference report. Am I correct in this interpretation?

Mr. DELLUMS. The gentleman from California is correct and the conference report confirms the intent of Congress in this regard. I believe the intent of Congress in enacting this legislation is to reduce the complexity of the existing system by promulgating regulations which allow for innovative reuse programs. Therefore, I believe the gentleman from California is correct.

Mr. FARR of California. Mr. Speaker, if the gentleman will continue to yield, am I correct in my understanding that the conferees support the commitment

by the Department of Defense to convey the lands at Fort Ord to the California State University System and the University of California and that the conferees direct the Secretary of Defense to make this a priority item under the terms agreed to in a letter dated October 21, 1993?

Mr. DELLUMS. The gentleman from California is correct. The conferees are firm in their support of the commitment by the Department of Defense to convey the lands at Fort Ord as you have stated. Furthermore, the conferees believe that this transfer should be accomplished according to the terms of the letter you referenced and should be a priority item.

□ 1840

Mr. FARR of California. Mr. Speaker, am I correct when I state that you concur with the rationale for the withdrawal of the House language as embodied in my amendment, but remain prepared to pass specific legislation which would allow conveyance of lands at Fort Ord to the California State University System and the University of California under the same terms and conditions as outlined in the legislation which I have withdrawn?

Mr. DELLUMS. That is correct. The gentleman from California may be assured that I will move such legislation if the process to be established under title XXIX or the process allowed under existing statutes fails to provide the requisite vehicle to allow conveyance of lands at Fort Ord to the two universities as provided in your legislation.

Mr. FARR of California. Mr. Speaker, if the gentleman will continue to yield, may I express my appreciation for the efforts of the Department of Defense to find a means of supporting the conveyance needs of the University of California and the California State University System at Fort Ord. I am pleased with the progress made toward a successful reuse effort at Fort Ord and am impressed with the willingness of the Department of Defense to work for a reasonable and practical solution of our problems.

Mr. DELLUMS. Mr. Speaker, I join with the gentleman from California in expressing appreciation for the effort and commitment of the Department of Defense to find a solution to this problem.

Mr. FARR of California. I would like to commend the chairman for his outstanding work on this legislation and to again thank the distinguished chairman of the Armed Services Committee for his participation in this colloquy.

Mr. DELLUMS. Mr. Speaker, I yield myself such time as I may consume, for the purpose of entering into a colloquy with my distinguished colleague, the gentleman from Massachusetts [Mr. STUDDS].

Mr. STUDDS. Will the gentleman yield?

Mr. DELLUMS, I yield to the gentleman from Massachusetts.

Mr. STUDDS. Mr. Speaker, first, I want to offer my sincere thanks to the gentleman for his cooperation with the leadership of the Committee on Merchant Marine and Fisheries in developing the National Shipbuilding and Shipyard Conversion Act of 1993, which is included in the conference report. This act is a superb example of how two committees can work closely together. This initiative will be extremely beneficial to revitalizing American shipyards and employing American shipyard workers.

I would like to confirm my understanding on one aspect of the initiative having to do with new loan guarantees under title XI of the Merchant Marine Act, 1936, for shipyard modernization. In guaranteeing these loans, the Secretary of Transportation must give priority to shipyards that have engaged in naval ship construction.

Mr. Speaker, the Fore River Shipyard in Quincy, MA, has had a long and admirable history of naval ship construction. It has built such prestigious naval vessels as the U.S.S. *Lexington* and the U.S.S. *Salem*. Am I correct that Quincy Shipyard would qualify for shipyard modernization loan guarantees based on its past construction of Navy ships?

Mr. DELLUMS. Mr. Speaker, the gentleman from Massachusetts is correct. A shipyard such as Quincy which built ships for the Navy in the past would be one of those yards which should have priority for shipyard modernization loan guarantees to be provided under the conference agreement.

Mr. STUDDS. Mr. Speaker, I thank the gentleman for this confirmation, and urge my colleagues to support the conference report.

Mr. Speaker, I want to express my personal thanks to the chairman of the committee for working so closely with my committee.

Mr. DELLUMS. Mr. Speaker, I would like to say that I thank my distinguished colleague, the gentleman from Massachusetts [Mr. STUDDS]. It was a wonderful opportunity to work with this gentleman. I believe that the provisions we are discussing now will redound to the benefit of millions of people in this country.

Mr. STUDDS. Mr. Speaker, I thank the gentleman.

Mr. DELLUMS. Mr. Speaker, I yield myself such time as I may consume, for the purposes of entering into a colloquy with the gentlewoman from California [Ms. PELOSI].

Ms. PELOSI. Mr. Speaker, will the gentleman yield?

Mr. DELLUMS. I yield to the gentleman from California.

Ms. PELOSI. Mr. Speaker, I thank the distinguished gentleman for yielding time to me.

Before engaging in a colloquy with the chairman of the committee, I want

to commend him for his distinguished service in bringing this legislation to the floor. I am honored to be engaged in a colloquy with him on this, his first DOD authorization bill as chairman of the committee. Congratulations, Mr. Chairman.

Mr. Speaker, I would say to the gentleman, it is my understanding that subsection (1) of section 2856 is simply a confirmation of Public Law 92-589 authored by Phillip Burton in 1972—that Presidio lands excess to the needs of the Department of Defense would be transferred for management by the National Park Service a part of the Golden Gate National Recreation Area. Is this your understanding?

Mr. DELLUMS. The gentlewoman is indeed correct.

Ms. PELOSI. Mr. Speaker, if the gentleman will continue to yield, it is my further understanding that this language is intended to be in keeping with the Base Closure Commission recommendations of 1989 and 1993, in which the Presidio was initially slated for closure, and in which the 6th Army was allowed to negotiate with the National Park Service for the retention of the 6th Army Headquarters at the Presidio.

Is that the gentleman's understanding?

Mr. DELLUMS. The gentlewoman is indeed correct.

Ms. PELOSI. I thank the gentleman.

Mr. DELLUMS. Mr. Speaker, might I inquire as to the remaining time on both sides of the aisle?

The SPEAKER pro tempore (Mr. CARDIN). The gentleman from California [Mr. DELLUMS] has 2 minutes remaining, and the gentleman from South Carolina [Mr. SPENCE] has 8 minutes remaining.

Mr. DELLUMS. Mr. Speaker, I yield 1 minute to the gentleman from Oklahoma [Mr. MCCURDY] for the purposes of entering into a colloquy with one of our distinguished colleagues.

Mr. MCCURDY. Mr. Speaker, I thank the gentleman for yielding time to me.

I yield to the distinguished gentleman from Virginia [Ms. BYRNE].

Ms. BYRNE. Mr. Speaker, I thank the gentleman for yielding to me.

Mr. Speaker, I also thank the chairman and subcommittee chairman for the fine work they have done on this conference report.

Mr. Speaker, the Senate-passed Defense authorization bill for fiscal year 1994 contained a provision, section 2841, that would direct the Secretary of the Army to transfer, without reimbursement, approximately 580 acres comprising the Harry Diamond Army Research Laboratory to the Secretary of the Interior for incorporation into the Marumco National Wildlife Refuge in Virginia. It is my understanding that this provision is not contained in the final conference report. I would appreciate an explanation of the reasons the

conferees did not accept this provision and would request the assistance of the Conferees in encouraging this particular transfer.

Mr. MCCURDY. The conferees agreed that Senate section 2841 was a response to a provision in the Appropriations bill that would have transferred, contrary to the Defense Base Closure and Realignment Act, a portion of the Woodbridge facility to the Library of Congress. Since that time, we understand that an alternative site has been selected making this provision unnecessary. Let me assure the gentlewoman that the conferees believe that property affected by closure and realignment must be disposed of in a uniform fashion. The conferees have provided in title 29 of the conference report a conveyance process where property on closing installations can be obtained in a more expeditious manner. This legislation will allow the Secretary of the Interior the opportunity to obtain this property more quickly under the auspices of the Base Closure and Realignment Act. With respect to the transfer at the Woodbridge Research Facility, I can assure the gentlewoman of the conferees, support of the Interior Secretary's intention to obtain this property at the earliest possible day and urge the Secretary of the Army to be supportive of this transfer.

Mr. SPENCE. Mr. Speaker, I yield 1 minute to the gentleman from California [Mr. DELLUMS].

The SPEAKER pro tempore. The gentleman from California [Mr. DELLUMS] now has 2 minutes remaining.

Mr. DELLUMS. Mr. Speaker, I yield 1 minute to my distinguished colleague, the gentleman from California [Mr. MILLER].

Mr. MILLER of California. Mr. Speaker, I thank the gentleman for yielding time to me.

Mr. Speaker, I just want to take this minute to thank the committee, both the majority and the minority side, for how they handled all the competing interests they had this year. I especially want to thank the chairman, my colleague, the gentleman from California [Mr. DELLUMS], for the manner in which he has handled the issue of the base closures and the military conversion in the San Francisco Bay area.

Whether it was his negotiations with the President of the United States or the negotiations in this committee, in this conference committee, the passage of this legislation, he has treated the problem of base closures as a problem that affects the entire San Francisco Bay area, and he has made a determination that this is a problem and a predicament that the entire bay area is going to have to survive, because it makes little difference where our constituents live, we will suffer the largest civilian job loss of any of the base closure recommendations this year.

Mr. Speaker, there are many things that need to be done to make these

properties valuable for re-use and an important part of the communities in which they reside. We took our first step with the passage of this legislation, with the shepherding of a number of provisions that affect both the base in my district, Mare Island, Alameda Naval Air, Treasure Island in the San Francisco Bay area. I just want to say on behalf of the Mare Island community, the residents of Vallejo, and the residents of the bay area, we want to say thank you very much to the chairman for how he has handled this, with dignity for all of us who were involved.

Mr. DELLUMS. I thank the gentleman.

The SPEAKER pro tempore. The gentleman from California [Mr. DELLUMS] has 1 minute remaining, and has the right to close debate.

Mr. SPENCE. Mr. Speaker, I yield 2 minutes to the gentleman from California [Mr. DELLUMS].

The SPEAKER pro tempore. The gentleman from California now has 3 minutes remaining.

Mr. DELLUMS. Mr. Speaker, I yield 1 minute to the gentleman from Missouri [Mr. SKELTON].

Mr. SKELTON. Mr. Speaker, I thank the gentleman for yielding time to me.

In this bill, Mr. Speaker, is the final verbiage concerning the stealth B-2 bomber. I wish to congratulate the chairman and the conferees for making this the final provision. This, of course, authorizes some 20 B-2 bombers for \$44.4 billion.

□ 1850

It also incorporates the fact that this vote on this conference report is comparable and is the same as the second vote that was required in last year's bill. That of course is a big plus.

Let me mention to the chairman and to this body that the first B-2 bomber will arrive in proper ceremonies at Whiteman Air Force Base near Knob Noster, MO, on the 17th day of December. That of course will be a major day not just for the people in the Pettis and Johnson County area of Missouri, but it will be a major day for the U.S. Air Force and for the national security of our country.

Mr. DELLUMS. Mr. Speaker, I yield myself the balance of our time.

Mr. Speaker, we come to the end of our discussion on the conference report on the bill, H.R. 2401. At this time I first would like to thank all of my colleagues for their very generous remarks. Second, I would like to thank the gentleman from South Carolina [Mr. SPENCE], a very easy person to work with, an extraordinary gentleman, easy to communicate with. It has been a great opportunity to serve with the gentleman in this first year in my capacity as full committee chair.

I am proud of the fact, Mr. Speaker, that over 95 percent of the issues were resolved at the panel level. This is, as

I understand it, unprecedented. We also had freshmen Members on the conference, and I think what we brought back to the body is in the spirit of what left this House. We worked very hard to maintain the integrity of the House position, and I think those Members who voted for the bill as it left the House going into conference can indeed vote for it as it returns.

Mr. FARR. Mr. Speaker, I rise today in support of the conference agreement to H.R. 2401, the fiscal year 1994 DOD Authorization Act, and to commend the distinguished chairman of the House Armed Services Committee, Mr. DELLUMS for his hard work, and outstanding stewardship of the committee in his first conference as chairman. This conference agreement we are about to vote on is an excellent example of the direction that our Nation needs to take in the post-cold-war era. While authorizing \$2.6 billion less than the administration's fiscal year 1994 request, and \$12 billion less than fiscal year 1993 appropriations, the conference agreement continues to allow for sound investment in our post-cold-war military needs.

I want to take this opportunity to call your attention to an extremely important provision of the bill which would allow for the transfer of surplus real property at military bases to the local communities for the purposes of economic development. I commend the Department of Defense for its efforts to work out a suitable agreement for transferring the requested parcels of land at Fort Ord, CA, between all parties, and I thank the distinguished chairman of my committee for his guidance and assistance in this process, as well as for his strong support for seeing this initiative through, as illustrated in our earlier colloquy. The conference agreement before us will make possible the transfer of certain parcels of property at Fort Ord, CA, to the California State University [CSU] and the University of California [UC], for the purposes of developing a 4-year campus at the Fort Ord site, with a focus on the marine and environmental sciences, in conjunction with a science, research, policy and development center, focusing on the development of environmental remediation technology for use in the cleanup of former military bases. This provision in the conference agreement will make it possible to lay the foundation for the development of the Monterey Bay region as a world center for marine and environmental science and technology. While highlighting the marine environment of California's central coast, including the newly established Monterey Bay National Marine Sanctuary, this provides unparalleled opportunities to use our region's natural resources including the sanctuary, as a marine laboratory. In addition to providing viable economic growth opportunities for the impacted Fort Ord region, this project is evolving into a model success of defense base reuse, through a joint education/research venture which will provide for the development of public/private partnerships and alliances, through facilitating collaborative research opportunities and providing an interface between science, technology and policy, a most worthwhile endeavor.

Ms. SNOWE. Mr. Speaker, I rise in support of the Defense Department authorization con-

ference report, and would like to specifically point out several provisions under the defense conversion title that will help ensure that the Federal Government lives up to its responsibility to assist communities adversely impacted by the base closure and realignment process.

Everyone in this body understands the terrible economic dislocation which results from military base closures. Many of our bases are located in rural areas whose economies are largely dependent on the stimulus provided by the base. I speak from firsthand experience in this matter. Loring Air Force Base, in the district which I represent in northern Maine, is one of these bases.

The language approved by the conferees on the conveyance of base property is based on my amendment that was adopted by the House. My amendment allowed the Department of Defense to convey the property at closing military bases—specifically naming Loring Air Force Base, the military installations in Charleston, SC, the Naval Air Station and Depot in Alameda, CA, and Gentile Air Force Station in Ohio, in a pilot project—to the local redevelopment authorities without consideration. It would have permitted those designated organizations responsible for the re-use of a base to negotiate and/or solicit contracts for post-closure activities confident in the knowledge that the base will be turned over to them after it closes.

The conferees amended my language to give the Secretary of Defense the discretion to transfer some or all of a closing military base property that would provide special help for rural communities in facing their economic redevelopment challenges. The new conveyance language contained in this conference report is intended to allow the Secretary of Defense to transfer Loring's base property at no cost to the Loring Development Authority for the purpose of community redevelopment.

The language also requires the Secretary to develop criteria to be looked at—including the economic impact of closure on the community, the financial condition of the community and the prospects for redevelopment. When Loring closes in September of 1994, the local economy will lose \$70 million a year. This is about 25 percent of the economic activity in Aroostook County. The loss of Loring will be economically devastating and nearly 10,000 jobs will be at risk or simply lost. About 900 civilian and 3,000 military personnel are employed at the base, funneling more than \$130 million annually into the Maine economy. Another 6,000 civilian jobs are supported by the base, generating a total of \$240 million annually in personal income.

The language in the conference report will maintain the ability of rural communities facing base closure, like Loring, to help plan for their own future. After all, it is the local community that bears the brunt of closure and they should be given the tools—which in some cases includes the base property—to rebuild their economy.

Another critical provision of this bill establishes a contracting preference for local businesses in the vicinity of bases facing closure or realignment.

There are currently no laws or regulations which require the Defense Department to give preference for closure-related contracts to

local contractors. Thus, under the status quo, the DOD cannot legally give special consideration to businesses near a base selected for closure, even if the business is fully capable of performing the work at a competitive price.

DOD regulations, as well as the Small Business Act, do establish small business set-asides on certain jobs, but small businesses everywhere can apply for these contracts. There is no provision in the DOD's current regulations that explicitly gives preference to local businesses on small business set-asides.

The result of the present regulations on contracting is that perfectly qualified local businesses lose out on contracts to firms outside of the State. In fact this has happened at Loring. Earlier this year, a contract for constructing a landfill cover—a basic construction contract—was awarded to a firm in Michigan despite the presence in Northern Maine of several contractors who were capable of doing the work competently at a fair price. This kind of contracting policy makes no sense and it is grossly unfair to qualified local businesses facing the dire economic prospects of base closure.

To remedy the problems inherent in DOD contracting policy, I offered an amendment to the House version of H.R. 2401 which would establish a primary preference for local businesses in the vicinity of bases scheduled for closure or realignment; small businesses were also mentioned for special consideration. This amendment was accepted by the House.

Recognizing the problems with current DOD contracting policy, the conference has wisely retained my provision on local contracting preference. The conference report gives primary preference for contracts related to closure or realignment to businesses located in the vicinity of the installation. Small businesses and small disadvantaged businesses will also receive special consideration, but the language gives qualified local businesses the first preference.

The specific intent of the language is to avoid situations in the future where qualified local businesses lose out on closure-related contracts to businesses located far from the installation, not because these businesses are incapable of competently performing the work at a reasonable price, but because of flawed DOD contracting policy. With passage of H.R. 2401 and its provision on local contracting preferences, qualified local businesses—and in particular small and small disadvantaged businesses in the vicinity of the installation—will now have meaningful opportunities to win contracts. This provision will help local businesses survive the aftermath of base closure.

Base closure, or the impending closure of a base, is a traumatic experience for local economies and businesses. Communities that suddenly lose their economic lifeline need help to adjust and recover. The property conveyance and local contracting provisions of H.R. 2401 will reaffirm the Federal Government's responsibility to communities affected by base closure and help them weather the difficult economic transition.

Mr. HANSEN. Mr. Speaker, as the world's focus shifts away from super power military confrontation, America's role in humanitarian efforts around the world is in the spotlight. The C-17 Globemaster III airlifter substantially en-

hances this country's ability to lend assistance on a global basis.

In Somalia, for example, the C-17 could have used more airfields than the existing long-range airlifters—C-5 and C-141. It also could have allowed more cargo to be unloaded at major airfields such as Mogadishu, because four C-17s could have maneuvered into and parked on the same ramp that could only accommodate one C-5 and one C-141.

In the Alaskan oilspill, 17 C-5s and 2 C-141s were used to move oil cleanup equipment to Elmendorf Air Force Base near Anchorage. That equipment then had to travel 9 to 14 hours on the road to Valdez, a lengthy delay when the first 24 hours after a spill is critical to containing environmental pollution. Twenty-one C-17s could have delivered the same equipment directly into Valdez airport, eliminating the delays for ground travel time, and potentially preventing much of the spilled oil from spreading to the shoreline.

In Bosnia and Herzegovina, the airport at Mostar is normally long enough to accommodate any United States airlifter. However, the fighting there has cratered the runway, effectively cutting the runway in half, leaving less than 3,700 feet for operations. The C-17 could be able to deliver humanitarian aid and outsize equipment to assist relief operations to Mostar. Only the much smaller C-130 could operate at Mostar, and is not capable of delivering outsize equipment.

In the Armenian earthquake, C-17s could have been used to fly rescue teams and relief supplies directly to Armenia, rather than stopping in Turkey and unloading C-5s and loading C-141s for the final flight into Armenia. That capability would have gotten rescue teams on site on the first critical day to save lives, rather than 1 day later. The cargo and supplies could have been moved in 13 C-17 missions rather than the 32 missions that were flown with the C-141 and C-5s.

The C-17 is well suited to humanitarian operations. In the case of disaster relief operations such as earthquakes and floods, the C-17 could deliver large earthmovers and bulldozers too large for the C-130 and C-141 into small airfields—or damaged airfields—near the disaster area that are denied to the larger C-5. On the same mission, the C-17 could be quickly reconfigured to carry injury victims out of the area on the return flight, eliminating the need for a separate medical evacuation aircraft.

Because it was designed to operate from small, austere airfields, the C-17 could use landing strips without substantial ground support facilities that would be needed for other large aircraft. In addition, the designed-in reliability and maintainability would make it less likely that the C-17 would suffer a breakdown while on a humanitarian/disaster relief mission.

In addition, the C-17 is less expensive to fly—36 percent less per million ton-mile delivered than the C-141 and 19 percent less than the C-5. It requires fewer air crew and maintenance personnel, which means less additional cost for support of personnel during an operation. Lower maintenance costs mean the C-17 can be used more often and for more hours without increasing maintenance costs compared to current airlifters.

Whether for humanitarian efforts to save starving people in less developed nations of

the world or to carry large equipment to react quickly to natural disasters, the C-17 is an ideal aircraft. Its ability to carry large equipment and cargo loads directly to small fields or primitive landing areas enhances the Nation's ability to respond to humanitarian needs in this country and abroad. It can perform these missions at less cost to the taxpayer.

Mr. STARK. Mr. Speaker, the 1994 National Defense Authorization Act, H.R. 2401, contains three important amendments on nuclear nonproliferation.

First, the McCloskey-Stark-McCurdy amendment establishes a comprehensive integrated strategy to stop the spread of nuclear weapons. Today, the United States faces many new nuclear dangers, including:

North Korea refuses international nuclear inspections and may have enough plutonium for several nuclear weapons;

Ukraine continues to refuse to accede to the Nuclear Non-Proliferation Treaty [NPT] as it promised to do when it signed the Lisbon Protocols to the Start I treaty, potentially undermining the extension of the NPT in 1995;

Rumors persist about leakage of nuclear materials and technology from the New Independent States of the former Soviet Union;

China continues to assist nuclear and missile programs in countries like Pakistan and Iran, in violation of its repeated promises. The PRC recently conducted a nuclear test, ending the international testing moratorium;

Iran is aggressively seeking a nuclear weapons capability. Tehran is acquiring an advanced nuclear infrastructure, despite its immense reserves of oil and natural gas;

Iraq refuses to fully comply with the UN inspectors' demands on dismantling its nuclear weapons program;

India and Pakistan, who have fought three wars in the past, both have small nuclear arsenals that they can assemble on short notice; and

Britain, France, Japan, and Russia plan to produce hundreds of tons of plutonium for nuclear power over the next several decades, a costly energy policy that will create proliferation opportunities for terrorist groups and rogue-states like Iran and Libya.

All of this occurs at a crucial time, with the NPT coming up for review and extension in 1995. The United States needs a comprehensive nonproliferation policy to ensure a lengthy extension of the NPT and to address the treaty's weaknesses. The McCloskey-Stark-McCurdy amendment is the Congressional vision of how to accomplish these goals. The amendment had the bi-partisan support of the House Committees on Armed Services and Foreign Affairs. It sets forth a series of policy goals, including—

Successfully concluding all pending nuclear arms control agreements with all republics of the former Soviet Union;

Strengthening the International Atomic Energy Agency and improving nuclear export controls;

Utilizing diplomatic and regional security initiatives to reduce the incentives for non-nuclear countries seeking to acquire nuclear weapons;

Supporting indefinite extension of the Nuclear Non-Proliferation Treaty and conclusion of a comprehensive nuclear test ban treaty [CTBT];

Reaching agreement with the Russian Federation to not produce new types of nuclear warheads and supporting a global ban on production of weapons-usable fissile material; and

Pursuing a multilateral agreement to significantly reduce the strategic nuclear arsenals of all nuclear powers.

The amendment also requires a report from the administration that addresses the policy implications of an adoption of a United States policy of no-first-use of nuclear weapons and of a verifiable bilateral agreement with the Russian Federation, to be extended to all nuclear weapon states, under which both countries would dismantle all tactical nuclear weapons.

Together, these policies will close dangerous loopholes in existing international efforts against proliferation, while helping to garner the political support necessary from developing countries to extend the NPT.

The amendment calls for the Clinton administration to pursue a permanent fissile material production ban for military or civilian purposes, with all stockpiles placed under bilateral or international controls and all nuclear facilities of all countries placed under IAEA safeguards. This would cost millions of dollars but is far cheaper than the billions some propose spending on ballistic missile defense.

The only real barrier to building the bomb is getting the necessary few pounds of plutonium or highly enriched uranium. The more fissile material in circulation, the greater chance some will wind up in the hands of rogue-states or terrorists. A fissile material cut-off would close the NPT loophole that allows a North Korea or Iraq to produce bomb-usable material legally, and then withdraw from the treaty on short notice.

Last year, President Bush announced a unilateral fissile material production halt for U.S. weapons. A ban on fissile materials would not adversely affect the United States which long ago gave up plans to use plutonium in nuclear power reactors as dangerous and uneconomical. But India, for instance, which objects to the NPT as discriminatory, would have a hard time not joining such a universal agreement that treats all countries equally.

The amendment requires the President to report on the issue of "no first use." Keeping the option of nuclear "first use" open may have made sense during the cold war, when NATO feared being overrun by the Warsaw Pact's tanks. Today, the United States is the world's only conventional military superpower. Waving our nukes at Saddam or North Korea's Kim only demonstrates to these tyrants the bomb's value—i.e., if they had it, the United States would not feel so free to threaten them.

The United States should propose a multilateral agreement formally binding all nuclear weapons states not to be the first to use nuclear weapons. At the same time, positive assurances of aid in case of nuclear attack should be offered but only to NPT parties, creating strong incentive to join the treaty.

The McCloskey-Stark-McCurdy amendment once again puts Congress on record supporting a CTB and emphasizes the importance of a test ban in achieving our other nonproliferation goals. The CTB is critical to selling non-nuclear powers on a long-term extension of

the NPT. The essential deal in the 1960's treaty was that the nuclear weapons states would eventually eliminate their nuclear arsenals in exchange for the rest of the world not developing them. At previous NPT review conferences, many developing nations argued that a test ban is the minimal step required for the nuclear states to meet their end of the bargain.

The amendment also calls for further strategic nuclear reductions. After START I & II are ratified, the administration should seek a multilateral START III agreement to cut United States and Russian strategic arsenals to lower levels, perhaps in the range of 1000–2000 each, with lower levels for other nuclear countries. This level, proposed by the National Academy of Sciences in 1991, would retain strategic stability while reducing the risks of an accidental nuclear launch—and save billions of dollars as well. Finally, we should make clear that we will seek further verifiable reductions as international relations improve.

While many of these agreements have been elusive individually, they are easier to negotiate as part of a package in which all nations take on some additional restraints. If pursued seriously over the next 1½ years, these agreements should generate sufficient international support for a long-term and possible indefinite extension of the NPT, for a bolder and more aggressive IAEA—which could catch potential nuclear cheats like Iraq or North Korea, and for more stringent nuclear export controls to hinder would-be proliferators like Iran.

President Clinton has embraced many of the goals set forth in this amendment. I am hopeful that he will heed the call of Congress, and pursue a truly comprehensive strategy on stopping the spread of nuclear weapons.

A second amendment in H.R. 2401 addresses the immediate proliferation threat of North Korea. The amendment urges President Clinton, United States allies, and the U.N. Security Council to keep pressure on North Korea until it comes clean on its nuclear program. It also calls for the international community to press for more talks between North and South Korea to denuclearize the Korean peninsula, which will help reduce tensions in the region.

Finally, the Defense Authorization Act focuses on one other pressing nuclear proliferation issue—the plans of Britain, France, Japan, and Russia to produce tons of plutonium for commercial nuclear power. In the next few weeks, Britain will decide whether to start up its Thermal Oxide Reprocessing Plant [THORP]. THORP is expected to produce 59 tons of plutonium over the next 10 years. There is heated debate on this issue in Britain because the plant is uneconomical after the first decade and may require taxpayer subsidies even before then. The United Kingdom's energy and budget policies are not our business, but the United States does have the right to express concern about the proliferation and environmental threats posed by THORP. Leading scientists have pointed out that international safeguards cannot detect thefts or diversions of even large amounts of plutonium from a plant the size of THORP. There is the very real possibility that a terrorist group or rogue-state, working with a contact inside the

plant, could acquire enough plutonium for several dozen nuclear bombs and no one would know. The President should let the British know that THORP is an unreasonable and unacceptable threat to United States national security.

The Kennedy-Pelosi-Stark amendment in H.R. 2401 calls on President Clinton to do just that. The amendment says the President should take action to encourage Britain and other countries from starting up plutonium production facilities. President Clinton himself recently acknowledged the dangers of plutonium in a letter to Congress. The President said: "The United States does not encourage the civil use of plutonium. Its continued production is not justified on either economic or national security grounds, and its accumulation creates serious proliferation and security dangers." Given the President's concerns and the strong statement of Congress on the dangers of plutonium, I am hopeful that the administration will forcefully address this issue.

Mr. Chairman, I wish to thank the distinguished chairman of the Armed Services Committee, the gentleman from California, the distinguished ranking member of the committee, the gentleman from South Carolina, the distinguished chairman of the Foreign Affairs Committee, the gentleman from Indiana, and the distinguished ranking member of that committee, the gentleman from New York, for their support for these amendments and leadership on this important issue.

Mr. PICKLE. Mr. Speaker, I have high regard for the Defense authorization bill conference report, however, I want to make known my concern for a certain provision. I signed the report as a House Ways and Means Committee conferee on section 653, 705, and 1087 of the Senate amendment, and modification committed to conference. My concern is for the provision that ties the President's hands on trade embargoes to Serbia and Montenegro. I do not think it is right to restrict our President in making such decisions in foreign policy. I am aware that there is a waiver provision allowing the President to remove the sanctions only if our national security is threatened and other specified waiver conditions are met. I would hope that this type of restrictive action does not set a precedent because the President needs as much latitude as possible when dealing in foreign policy.

Mr. HAMILTON. Mr. Speaker, I rise in support of the conference report to accompany H.R. 2401, authorizing appropriations for the Department of Defense for fiscal year 1994.

The Committee on Foreign Affairs has jurisdiction over many of the provisions incorporated in this conference report. I would like to commend my good friend from California [Mr. DELLUMS] the chairman of the Armed Services Committee, and the ranking minority member [Mr. SPENCE] for their extraordinary efforts in working out the literally thousands of issues that were in disagreement between the House and the Senate in the context of this bill.

I would note, however, that there are several provisions in the conference report that remain of some concern to the Committee on Foreign Affairs. I insert a letter detailing these provisions in the RECORD at this point:

COMMITTEE ON FOREIGN AFFAIRS,
Washington, DC, November 15, 1993.

Hon. THOMAS S. FOLEY,

The Speaker, U.S. House of Representatives,
Washington, DC.

DEAR MR. SPEAKER: We write in reference to H.R. 2401, the Department of Defense Authorization Act, Fiscal Year 1994, which was approved by the House on September 29, 1993, and the Senate amendment thereto, which was approved on September 7, 1993.

As you know, the Committee on Foreign Affairs has legislative jurisdiction over multiple provisions in this legislation. As conferees, we have signed the conference report on the bill, but we do so with reservations about the process, as well as several provisions. As outside conferees, we are vastly outnumbered on the conference committee. Thus, attempts to make changes in legislation in areas of importance to us, and well within our committee's jurisdiction, were difficult.

Specifically, we are concerned about the final language in the conference report on sections 547 and 1041 of the Senate amendment and sections 1041, 1047, and 1056 of the House bill. We address each below in the order of priority.

Senate section 1041 provides authority for the United States to use Department of Defense funds to pay U.S. peacekeeping assessments to the United Nations. The provision maintains language, included in existing law last year, that is intended to preclude use of this transfer authority. In conference, the provision was revised to include additional limitations on the use of such funds, without clarification that the United States is one of the U.N.'s largest debtors. In short, none of our suggested changes on the provision in the bill most important to United States foreign policy were accepted.

House section 1041 requires a detailed report to the Congress 30 days before U.S. forces were to be placed under the operational control of a foreign commander. We sought changes in this provision, removing the requirement for a prior report and adding expressions of the sense of the Congress that consultation and notification by the executive branch should occur before such decisions were made. These provisions incorporate our views on the necessity for timely consultations as prerequisite for the making of a better U.S. foreign policy. Yet, in the end, the provision was dropped in its entirety and replaced by report language discussing planned war powers reviews by the House and the Senate. While we support the war powers reviews both Houses will undertake, we do not see those reviews as a substitute for this provision.

Section 1056 of the House bill requires a report by the Secretary of Defense on the effect of the increased use of dual-use and commercial technologies on the ability of the United States to control exports of such items. This section was part of an amendment that Chairman Dellums offered on the floor during consideration of the bill (Amendment No. 112). The Committee did not separately request conferees for this item because it considered its request covered by the request for conferees on the Dellums' amendment. We were not named as conferees, however, on section 1056, which was further expanded in conference. Thus, the Committee on Foreign Affairs had no role at all in the crafting of legislative language which will affect areas solely within its legislative jurisdiction.

Section 1047 of the House bill expresses the sense of Congress regarding U.S. plutonium

policy. We specifically requested conferee status on this section. Our request was denied because the language, on its face, did not reference U.S. policy toward foreign countries that processed plutonium and thus could be construed as an entirely domestic provision relating only to plutonium processing in the United States. We argued at that time that the section should be interpreted to reference plutonium processing plants worldwide. In conference, the section was changed to make explicit its reference to plutonium processing activities in foreign countries and the effect of such activities on weapons proliferation. Again, the Committee on Foreign Affairs was denied any opportunity to affect such language because we were not named as conferees to this section.

Finally, Senate section 547 provides congressional consent to service by retired members of the U.S. Armed Forces in the military forces of newly democratic nations. We requested that this provision require that the executive branch notify the Congress before it makes its decisions on individual cases. The provision includes a notification requirement, but does not specify that such notification must precede the final executive branch determination on the case.

We understand that there is no specific action that can be taken at the time to address these concerns. We wish in this letter to record our concerns with a process that has hampered our ability to influence foreign policy issues of intense interest to our committee.

We believe that the Committee on Foreign Affairs should have sole conferee status on future defense authorization bills on issues in the sole jurisdiction of the Committee on Foreign Affairs and an equal number of conferees when the Committee on Foreign Affairs Committee and the Committee on Armed Services are joint conferees. Only in such a manner can foreign affairs issues be addressed satisfactorily in future years. We hope that we can work together in support of a better outcome in the next legislative cycle.

Thank you for your consideration of this matter.

With best regards,
Sincerely,

LEE H. HAMILTON,
Chairman.

BENJAMIN A. GILMAN,
Ranking Member.

Ms. WOOLSEY. Mr. Speaker, I rise today to vote against this conference report because I object to the excessive levels of defense spending—spending that is wasteful in the post-cold-war era. I am also opposed because of the offensive language restricting gays and lesbians in the military.

Twenty-five years ago, as a human resources director of a high-technology manufacturing firm, I instituted a strict policy of non-discrimination on the basis of sexual orientation.

I am appalled that, all these years later, I find myself in the Halls of Congress trying to do the same thing—preparing Congress for the 21st century.

I do not support the don't-ask/don't-tell/don't-pursue policy. I say don't ask me to support it, don't tell me that it's fair, and don't pursue it without rewriting it.

I say to my colleagues that this is an issue of civil rights at its most basic level. Until every man and woman has the same opportunity to serve their country unencumbered by

the prejudices of others, America is not truly the land of the free.

Ms. FURSE. Mr. Speaker, as a member of the Armed Services Committee, I want to comment on the fiscal year 1994 Defense Authorization Act which the House has just passed. As a new Member of Congress, I was involved in a number of initiatives in my first authorization bill.

I am particularly pleased that the conference report contains a provision I authored banning research and development of low-yield nuclear weapons, commonly referred to as mininukes. I especially appreciated the support of Chairman DELLUMS, Military Application of Nuclear Energy Panel Chairman SPRATT, and Representative STARK in gaining passage of this historic prohibition. This is the first time the United States has established a permanent unilateral ban of an entire class of nuclear weapons.

In addition, I am pleased that this bill contains three other provisions I initiated. One establishes the goal that 5 percent of Department of Energy defense programs' contracts be granted to small disadvantaged businesses and historically black colleges and universities and minority institutions. Another provision provides \$1.75 million in ARPA funding to complete development and conduct an evaluation and test of the advanced landing system, which will make smaller airports and remote locations instrument accessible. Finally, the national shipbuilding initiative is an important step to spur activity in our shipyards. It was a pleasure to work on this section as a member of the Merchant Marine and Fisheries Committee, and I spearheaded an effort to enable broader participation in the Loan Guarantee Program by reducing the tonnage limitation to 5,000 gross weight tons.

It is a real pleasure to serve on the Research and Technology Subcommittee with Chairwoman SCHROEDER. I was pleased to co-sponsor and advocate for her provision establishing the Defense Women's Health Research Center. It is high time we make the investments necessary to support the women who now make up 11 percent of our Armed Forces.

The field of supercomputing is one that is vital to future growth and development; it is especially important in my district, known as the Silicon Forest with its multitude of high-technology firms. I am pleased that, in great part due to my efforts on the House side, this bill enables open competition for funding among the vendors of various architectures. We need to have maximum flexibility and allow buyers to choose the supercomputer type most suited to their requirements. Another important item which I advocated for in this bill is the establishment of a pilot program to use National Guard personnel in medically underserved communities. My State, Oregon, would be one site for this pilot program.

Important arms control items in the bill I worked for include Representative EVANS' 3-year extension of the export moratorium on antipersonnel land mines and \$10 million to assist nations in clearing land mines; Representative MEEHAN's provision withholding 20 percent of the funding for theater missile defense until the President certifies that he has asked our allies to share in those development

costs; Representative STARK's nonproliferation policy guidelines calling for further reductions in nuclear weapons, a strengthened International Atomic Energy Agency, and achievement of a comprehensive nuclear test-ban treaty; and Representative DANNER's ban on funding for the Safeguard-C Program which conducts atmospheric, space, and oceanic nuclear tests prohibited by the 1968 Limited Test Ban Treaty.

I am pleased with the \$3.3 billion we provided in this bill for economic conversion. However, I am disappointed that my House-passed proposal that defense contractors be urged to develop conversion plans was not accepted in the final bill. I will introduce additional legislation next year addressing the need to diversify our defense-dependent industrial base to move viable work in the post-cold-war era.

The emphasis in this bill on environmental cleanup—with its \$10.8 billion in funding—is consistent with my focus on the importance of environmental technology. The improvements we made in quality-of-life programs for our personnel, including a pay raise, are also important.

At the end of day, however, I still believe that this bill's price tag is too high. The Department of Defense accounts for over half our discretionary spending. The cold war has ended, and we must establish a more appropriate balance between defense spending and our Nation's other pressing needs. I am willing to spend every penny necessary for a sound national defense, but I am not willing to spend 1 penny more. This budget does not yet accurately address the real security needs of the United States for the 21st century.

In addition, I am disappointed that this bill codifies the ban on gays serving in the military. We know gays and lesbians serve with distinction now, and we have the most capable Armed Forces in the world. We need to be realistic and recognize the great contribution being made by all the members of our Armed Forces.

I have tremendous respect for Chairman DELLUMS, and I look forward to working with him in future years as we continue to bring about affordability in our defense spending.

Mrs. SCHROEDER. Mr. Speaker, as chairwoman of the Research and Technology Subcommittee of the House Armed Services Committee, I want to comment further on one aspect of the fiscal year 1994 Defense Authorization Act. The act includes funding for technical risk reduction and engine development for the Marine Corps advanced amphibious assault vehicle program. The conferees consider this program central to providing an enhanced amphibious assault capability for the Marines. The propulsion system is one of the primary areas of risk to the system's successful development.

For several years, the authorizing committees have strongly supported the development of advanced engine technology for the advanced amphibious assault vehicle in the form of the stratified charge rotary engine. The conference report on the fiscal year 1994 defense authorization includes an increase of \$5.9 million to continue this development. Regardless of the funding level established for the advanced amphibious assault vehicle program,

we believe that the Marine Corps must continue work on the stratified charge rotary engine and other engine technologies until a choice among the competing propulsion systems can be made on the basis of actual testing of the full scale propulsion system. It is too early in the development, the required engine testing has not been completed, and the risk is too great to reduce the program to consideration of a single engine candidate.

Mr. DELLUMS. Mr. Speaker, I yield back the balance of my time.

Mr. SPENCE. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore (Mr. CARDIN). Without objection, the previous question is ordered on the conference report.

There was no objection.

The SPEAKER pro tempore. The question is on the conference report.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. DELLUMS. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 273, nays 135, not voting 25, as follows:

□ 1911

The Clerk announced the following pairs:

On this vote:

Mr. Wheat for with Mr. Sanders against.
Mr. Foglietta for with Mr. Thomas of California against.

Mr. Glickman for with Ms. Furse against.

Ms. DUNN and Mr. FISH changed their vote from "yea" to "nay."

Mr. CLAY changed his vote from "nay" to "yea."

So the conference report was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PERSONAL EXPLANATION

Mr. ENGEL. Mr. Speaker, I was unavoidably detained for rollcall vote 565. If I was present, I would have voted "yes."

GENERAL LEAVE

Mr. DELLUMS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the conference report on the bill, H.R. 2401.

The SPEAKER pro tempore (Mr. CARDIN). Is there objection to the request of the gentleman from California?

There was no objection.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to the provisions of clause 5, rule I, the Chair will now put the question on the motion to suspend the rules on which further proceedings were postponed earlier today.

NEGOTIATED RATES ACT OF 1993

The SPEAKER pro tempore. The pending business is the question of suspending the rules and passing the bill, H.R. 2121, as amended.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from West Virginia [Mr. RAHALL] that the House suspend the rules and pass the bill, H.R. 2121, as amended.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

RECORDED VOTE

Mr. LIPINSKI. Mr. Speaker, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 292, noes 116, not voting 25, as follows:

[Roll No. 566]

□ 1929

Mr. HYDE, Mr. HUGHES, Ms. EDDIE BERNICE JOHNSON of Texas, and Mr. DICKS changed their vote from "aye" to "no."

So (two-thirds having voted in favor thereof), the rules were suspended and the bill, as amended, was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Mr. RAHALL. Mr. Speaker, I ask unanimous consent that the Committee on Public Works and Transportation be discharged from further consideration of the Senate bill (S. 412) to amend title 49, United States Code, regarding the collection of certain payments for shipments via motor common carriers of property and nonhousehold goods freight forwarders, and for other purposes, and ask for its immediate consideration in the House.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore (Mr. MENENDEZ). Is there objection to the request of the gentleman from West Virginia?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 412

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Undercharge Equity Act of 1993".

SEC. 2. DETERMINATIONS OF REASONABLENESS OF CERTAIN RATES.

Section 10701 of title 49, United States Code, is amended by adding at the end the following new subsection:

"(f)(1) Subject to paragraph (10) of this subsection, when a claim is made by a motor carrier of property (other than a household goods carrier) or by a nonhousehold goods freight forwarder, or by a party representing such carrier or freight forwarder, regarding the collection of rates or charges in addition to the rates or charges originally billed and collected by the carrier or freight forwarder, the person against whom the claim is made may elect to satisfy such claim under paragraph (4) or (5) of this subsection, upon showing that—

"(A) such carrier or forwarder is no longer transporting property or is transporting property for the purpose of avoiding the application of this subsection; and

"(B) as to the claim at issue, (i) the person was offered a transportation rate or charge by the carrier or forwarder other than the rate or charge legally on file with the Commission for that shipment, (ii) the person tendered freight to the carrier or forwarder in reasonable reliance upon the offered transportation rate or charge, (iii) the carrier or forwarder did not properly or timely file with the Commission a tariff providing for such transportation rate or charge or failed to execute a valid contract for transportation services, (iv) such transportation rate or charge was billed and collected by the carrier or forwarder, and (v) the carrier or forwarder demands additional payment of a higher rate or charge filed in a tariff.

Satisfaction of the claim under paragraph (4) or (5) of this subsection shall be binding on the parties, and the parties shall not be subject to chapter 119 of this title.

"(2) If there is a dispute as to paragraph (1)(A) of this subsection, such dispute shall be resolved by the court in which the claim is brought. If there is a dispute as to paragraph (1)(B) (i) through (v) of this subsection, such dispute shall be resolved by the Commission. Pending the resolution of any such dispute, the person shall not have to pay any additional compensation to the carrier or forwarder.

"(3) In the event that a dispute arises as to the rate or charge that was legally applicable to the shipment, such dispute shall be resolved by the Commission within 1 year after the dispute arises.

"(4) A person from whom the additional legally applicable tariff rate or charge is sought may elect to satisfy such claim if the shipment weighed 10,000 pounds or less, by payment of 20 percent of the difference between the carrier's or forwarder's legally applicable tariff rate or charge and the rate or charge originally billed and collected.

"(5) A person from whom the additional legally applicable tariff rate or charge is sought may elect to satisfy such claim if each shipment weighed more than 10,000 pounds, by payment of 10 percent of the difference between the carrier's or forwarder's legally applicable tariff rate or charge and the rate or charge originally billed and collected.

"(6) Notwithstanding paragraphs (4) and (5) of this subsection, when a claim is made by a carrier or forwarder described in paragraph (1)(A) of this subsection, or by a party representing such carrier or forwarder, regarding the collection of rates or charges in addition to the rate or charge originally billed and collected by the carrier or forwarder, and the person against whom the claim is made is a small-business concern or charitable organization, that person shall not be required to pay the claim and the claim shall be deemed satisfied. Satisfaction of the claim under this paragraph shall be binding on the parties, and the parties shall not be subject to chapter 119 of this title.

"(7) When a person from whom the additional legally applicable rate or charge is sought does not elect to use the provisions of paragraph (4), (5), or (6) of this subsection, the person may pursue all rights and remedies existing under this title.

"(8)(A) When a person proceeds under paragraph (7) of this subsection to challenge the reasonableness of the legally applicable rate or charge being claimed by the carrier or forwarder in addition to the rate or charge originally billed and collected, the person shall not have to pay any additional compensation to the carrier or forwarder until the Commission has made a determination (which shall be made within 1 year after such challenge) as to the reasonableness of the challenged rate or charge as applied to the shipment of the person against whom the claim is made. Subject to subparagraph (B) of this paragraph, the Commission shall require the person to furnish a bond, issued by a surety company found acceptable by the Secretary of the Treasury, or to establish an interest bearing escrow account.

"(B) The surety bond or interest bearing escrow account required under subparagraph (A) of this paragraph shall be set or established in an amount equal to—

"(i) 20 percent of the amount claimed by the carrier or forwarder for the additional rate or charge, in the case of a shipment weighing 10,000 pounds or less; and

"(ii) 10 percent of such claimed amount, in the case of a shipment weighing more than 10,000 pounds.

"(9) Except as authorized in paragraphs (4), (5), and (6) of this subsection, nothing in this subsection shall relieve a motor carrier or freight forwarder of the duty to file and adhere to its rates, rules, and classifications as required in sections 10761 and 10762 of this title.

"(10) If a carrier or forwarder or party representing such carrier or forwarder makes a claim for additional rates or charges as described in paragraph (1) of this subsection, the person against whom the claim is made must notify such carrier, forwarder, or party as to the person's election to proceed under paragraph (4) or (5) of this subsection. Such notification—

"(A) with respect to a claim made before the date of enactment of this subsection, shall be not later than the 30th day after such date of enactment; and

"(B) with respect to any claim not described in subparagraph (A) of this paragraph, shall be not later than the 60th day

after the filing of an answer to a complaint in a civil action for the collection of such rates or charges, or not later than the 90th day after the date of enactment of this subsection, whichever is later.

"(11) In this subsection—

"(A) 'charitable organization' means an organization which is exempt from taxation under section 503(c)(3) of the Internal Revenue Code of 1986 (26 U.S.C. 503(c)(3)); and

"(B) 'small-business concern' means a person who would qualify as a small-business concern under the Small Business Act (15 U.S.C. 631 et. seq.)."

SEC. 3. STATUTE OF LIMITATIONS.

(a) MOTOR CARRIER CHARGES.—Section 11706(a) of title 49, United States Code, is amended by striking the period at the end and inserting in lieu thereof the following: "; except that a common carrier providing transportation or service subject to the jurisdiction of the Commission under subchapter II of chapter 105 of this title—

"(1) must begin, within 24 months after the claim accrues, a civil action to recover charges for such transportation or service if such transportation or service is provided by the carrier on or after the date of enactment of this exception and before the date that is 1 year after such date of enactment; and

"(2) must begin such a civil action within 18 months after the claim accrues if such transportation or service is provided by the carrier on or after the date that is 1 year after such date of enactment."

(b) MOTOR CARRIER OVERCHARGES.—Section 11706(b) of title 49, United States Code, is amended by striking the period at the end of the first sentence and inserting in lieu thereof the following: "; except that a person must begin within 24 months after the claim accrues a civil action to recover overcharges from a carrier subject to the jurisdiction of the Commission under subchapter II of chapter 105 of this title for transportation or service taking place on or after the date of enactment of this exception and before the date that is 1 year after such date of enactment, and for transportation or service taking place on or after the date that is 1 year following such date of enactment, a person must begin such a civil action within 18 months after the claim accrues."

(c) CONFORMING AMENDMENT.—Section 11706(d) of title 49, United States Code, is amended by striking "3-year period" each place it appears and inserting in lieu thereof "limitations period".

SEC. 4. TARIFF RECONCILIATION RULES FOR MOTOR COMMON CARRIERS OF PROPERTY.

(a) IN GENERAL.—Chapter 117 of title 49, United States Code, is amended by adding at the end the following new section:

"§ 11712. Tariff reconciliation rules for motor common carriers of property

"(a) Subject to Interstate Commerce Commission review and approval, motor carriers subject to the jurisdiction of the Commission under subchapter II of chapter 105 of this title and shippers may resolve, by mutual consent, overcharge and undercharge claims resulting from billing errors or incorrect tariff provisions arising from the inadvertent failure to properly and timely file and maintain agreed upon rates, rules, or classifications in compliance with sections 10761 and 10762 of this title. Resolution of such claims among the parties shall not subject any party to the penalties of section 11901, 11902, 11903, 11904, or 11914 of this title.

"(b) Nothing in this section shall relieve the motor carrier of the duty to file and adhere to its rates, rules, and classifications as

required in sections 10761 and 10762, except as provided in subsection (a) of this section.

"(c) The Commission shall, within 90 days after the date of enactment of this section, institute a proceeding to establish rules pursuant to which the tariff requirements of section 10761 and 10762 of this title shall not apply under circumstances described in subsection (a) of this section."

(b) CONFORMING AMENDMENT.—The analysis for chapter 117 of title 49, United States Code, is amended by adding at the end the following:

"11712. Tariff reconciliation rules for motor common carriers of property."

SEC. 5. EFFECTIVE DATE; APPLICABILITY.

(a) GENERAL RULE.—Except as provided in subsection (b), the provisions of this Act (including the amendments made by this Act) shall take effect on the date of enactment of this Act.

(b) APPLICABILITY OF SECTION 2.—The amendments made by section 2 shall apply to any proceeding before the Interstate Commerce Commission, and to any court action, which is pending or commenced on or after the date of enactment of this Act and which pertains to a claim arising from transportation shipments tendered any time prior to the date that is 18 months after such date of enactment. Unless Congress determines a continuing need for section 2 and enacts additional legislation, section 2 shall not apply to any such proceeding which pertains to a claim arising from transportation shipments tendered on or after the date that is 18 months following such date of enactment.

(c) REPORT.—The Interstate Commerce Commission shall submit a report to Congress, within 1 year after the date of enactment of this Act, regarding whether there exists a justification for extending the applicability of section 2 beyond the limitation period specified in subsection (b).

MOTION OFFERED BY MR. RAHALL

Mr. RAHALL. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. RAHALL moves to strike all after the enacting clause of the Senate bill, S. 412, and to insert in lieu thereof the provisions of H.R. 2121, as passed by the House.

The motion was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed.

The title of the Senate bill was amended so as to read: "A bill to amend title 49, United States Code, relating to procedures for resolving claims involving unfiled, negotiated transportation rates, and for other purposes."

A motion to reconsider was laid on the table.

A similar House bill (H.R. 2121) was laid on the table.

PERSONAL EXPLANATION

Mr. CLEMENT. Mr. Speaker, as one of the first cosponsors of the original legislation when it was introduced in the 101st Congress, and as a cosponsor and strong supporter of H.R. 2121, had I been present I would have voted "yea" on final passage.

PERSONAL EXPLANATION

Mr. FINGERHUT. Mr. Speaker, due to personal family business, I was de-

layed in returning from the Veterans Day holiday. Accordingly, I missed two rollcall votes.

Mr. Speaker, I would ask that the RECORD reflect that on rollcall No. 565, I would have voted "aye," and on rollcall No. 566, I also would have voted "aye."

PERSONAL EXPLANATION

Ms. FURSE. Mr. Speaker, travel problems resulting from inclement weather prevented me from being present on the House floor for rollcall vote 565 and rollcall vote 566. Had I not been unavoidably detained, I would have voted "no" on rollcall 565 and "yes" on rollcall 566.

□1930

BUYING VOTES FOR NAFTA IS A NATIONAL DISGRACE

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Ohio [Ms. KAPTUR] is recognized for 5 minutes.

Ms. KAPTUR. Mr. Speaker, this week here in Washington a very important debate about the future of jobs in North America and the United States will occur here in this House Chamber, and this debate should be on the merits of the agreement, whether it is what is right for our people, whether it is what is right for democracy building on the continent, whether it is right for the future of our country. In spending time in reading the legislation that is before us, however, what is truly tragic are the number of special deals that have been cut to literally buy votes in this institution. We, as a Nation, need to do better than this.

Tonight, Mr. Speaker, for the RECORD I am submitting the names of several individuals who have lobbied to cut these special deals from an article entitled, "Distorted Democracy. NAFTA, Revolving Doors and Deep Lobbying." Let me go through a few of these special deals tonight. These should not be in this agreement because basically what they represent is bought votes in this institution.

On page 183 of the agreement, lines 7 through 14, we hear about a new southwest regional animal health bio-containment facility, and such sums as are necessary to carry out this subsection are indicated. We are going to have to find the money for it somewhere down the road. I would like to know in which congressional district this new facility is going to go, how much it is going to cost and who is going to pay for it.

Then on page 271 of the agreement we have a new center for the study of Western Hemisphere trade. I do not know why we need a center. We have already passed a bill, if this thing goes through, to take care of trade. I would like to know in whose district in Texas

this is going, and how much it is going to cost and where we are going to get the money.

And here is one that is really close to my heart because for years we have been trying to get the Japanese to pay their fair share of taxes in this country, and in this bill there is \$17 million of tax forgiveness for Honda Motor Corp. Now my colleagues will remember when they did not follow the customs laws and they paid penalties, but all of a sudden on page 48 of the bill, and I cannot understand why this is in a trade bill, we have a nice little special deal where Honda Motor Corp. will have \$17 million forgiven.

Now I say, "You have to be a pretty good attorney to understand this provision, but what is interesting is who happened to lobby it through: Howard Baker and Peter Wallison." Some estimate the firms could have been paid up to \$1 million to get things fixed. What happened to candidate Clinton's promise to collect taxes from foreign multinationals, and why is this in this legislation if this is supposed to be a trade agreement?

Mr. Speaker, I hope Honda Motor Corp. writes me a letter tomorrow because I do not think the debate this week should have to do with who is able to cut special deals in this institution. We ought to have a clean bill. The Committee on Ways and Means ought to send a clean bill to this floor. This is outrageous, and the kind of stuff that is going on over at the White House is a disgrace to this Nation.

Mr. President, if you can't win votes on the merits, stop buying them.

[From the Multinational Monitor, October 1993]

DISTORTED DEMOCRACY—NAFTA, REVOLVING DOORS AND DEEP LOBBYING

(By Charles Lewis)

From 1989 to the present, Mexican government and business interests have spent at least \$25 million in Washington to promote the development and enactment of NAFTA. Mexico has employed a veritable phalanx of Washington law firms, lobbyists, public relations companies and consultants. This number is conservative—the cumulative total as reported to the U.S. Department of Justice. Based on statements made to the Center for Public Integrity by the most knowledgeable Mexican NAFTA official in Washington, Mexican interests will spend an additional \$5 million to \$10 million to promote NAFTA in 1993, bringing Mexico's total NAFTA-related expenditures in Washington to more than \$30 million by the time the dust settles.

Ironically, this massive effort has been waged by a country not known for its financial robustness. Before 1990, Mexico's spending on representation in Washington was mostly to promote tourism. In the context of lobbying by foreign interests on a specific issue, Mexico has mounted the most expensive, elaborate campaign ever conducted in the United States by a foreign government.

To comprehend the sheer dimension of this effort, it should be noted that to date, pro-NAFTA expenditures by Mexican interests already exceed the combined resources of the three largest, and best-known foreign lobbying campaigns waged in Washington during

the past quarter century: the operations mounted by South Korea during Koreagate, by Japanese interests during the Toshiba controversy, and by Kuwait following the Iraqi invasion.

Since 1989, to achieve maximum access to the U.S. political process, Mexican interests have hired at least 33 former U.S. government officials with experience throughout the federal government, from Congress to the White House, from the State Department to the Treasury Department. Some of those former officials include:

Bill Brock of the Brock Group. This former U.S. Trade Representative testified about trade issues before a Senate committee in 1991, made favorable comments about Mexico, but did not mention his financial ties to the Mexican government.

Timothy Bennett of SJS Advanced Strategies. This former Assistant U.S. Trade Representative who worked on U.S.-Mexican trade issues subsequently was retained by Mexican business interests regarding NAFTA.

Ruth Kurtz—This former International Trade Commission and Senate trade analyst was hired by Mexican business interests. She has had frequent contact with her former Capitol Hill colleagues, and organized several all-expense-paid trips for them to Mexico.

As a part of the unprecedented NAFTA campaign, during the past two years Mexican business interests have taken at least three members of Congress, a governor, and 48 congressional staffers on a dozen separate "fact-finding" trips to Mexico.

Two high-level appointments to the Clinton Administration, Charlene Barshefsky and Daniel Tarullo, have been paid by Mexican interests to do NAFTA-related work. But those are only the most recent Mexican connections to the Clinton administration.

After Mexico discovered George Bush might not win re-election, Bill Clinton and his thinking about NAFTA suddenly gained new urgency. Mexico began talking to Clinton campaign officials in the summer of 1992. Weeks after the election, two Clinton transition officials met with Mexico President Carlos Salinas' chief of staff, and on January 9, 1993, Salinas and Clinton met in Texas. The Mexican leader was the only head of state the President-elect saw during the transition period. At least two paid lobbyists for Mexico were on the Clinton transition team:

Joseph O'Neil of Public Strategies. This former top aid to Senator Lloyd Bentsen assisted the Treasury Secretary during the transition process. At the same time, he and his firm were on a six-figure retainer to Mexico.

Gabrielle Guerra-Mondragon of Guerra & Associates and TKC International. This former special assistant to the U.S. Ambassador to Mexico has been lobbying the Congress on behalf of Mexico, and while on retainer was also a Clinton transition advisor on national security issues.

Just as Mexican companies are aggressively promoting NAFTA, so too are U.S. companies. The U.S. business community has created a handful of new organizations and tapped some old ones to work on gaining support for the NAFTA. Because the disclosure laws are weak, it is difficult to calculate how much U.S. corporations and trade associations are spending in their effort to gain support for NAFTA. These groups are in contact with Mexican Embassy offices in Washington, and one key organization alone, USA*NAFTA, expects to spend at least \$2 million.

Canada, despite its traditionally strong lobbying presence in Washington, has not been particularly aggressive or active in its efforts to promote NAFTA. Canada, of course, already has a trade agreement with the United States. Other factors that help explain Canada's "silent partner" role in NAFTA include the political fallout that Prime Minister Brian Mulroney suffered in the aftermath of the U.S.-Canada Free Trade Agreement and Canada's current recession.

By any measure, the anti-NAFTA forces have been financially "out-gunned" by the Mexicans and the U.S. business community in this lobbying effort—because of the poor quality of existing public records and lax disclosure requirements it is impossible to gauge by precisely how much. But this motley collection of environmental and consumer groups, labor unions and conservative business organizations to date have spent a fraction of what NAFTA proponents have spent. In terms of grassroots organization NAFTA's opponents have millions of people's names on mailing lists, but it is unclear to what extent they have been contacted or organized regarding NAFTA. Meanwhile, the AFL-CIO has organized a few trips to Mexico for members of Congress, and three organizations which receive at least some labor money—the Economic Policy Institute, the Economic Strategy Institute and the Congressional Economic Leadership Institute—have sponsored fact finding trips to Mexico for members of Congress. Finally, in terms of both money and organization, the entry into the fray of billionaire former presidential candidate Ross Perot has markedly shifted the power equation and makes the legislative outcome of NAFTA somewhat less predictable.

At the most superficial level, as a general matter, when huge sums of money are injected into the political process, democracy usually becomes distorted. People or groups without the wherewithal to obtain influence and access to the corridors of power find themselves in effect disenfranchised.

Author William Greider has written about a sophisticated form of political planning he calls "deep lobbying," the purpose of which is to define public argument and debate. "It is another dimension of mock democracy—a system that has all the trappings of free and political discourse but is shaped and guided at a very deep level by the resources of the most powerful interests."

How does all of this relate to NAFTA? For starters, the debate is about something called the North American Free Trade Agreement. Not only have powerful interests managed to make their agenda America's agenda, they've even been able to help define public perceptions by labeling it with a positive-sounding name.

For years, the logic, the assumptions and the seeming inevitability of NAFTA have been carefully constructed—by prominent business interests in the three respective countries, their elected, responsive government officials and their legions of paid representatives. Getting presidents and prime ministers to think and talk about NAFTA, getting the trade negotiators together to hammer out the logistics, controlling how the actual agreement will be disseminated and thus described to the public and girding for battle legislatively, all require substantial sums of money and hired Washington insiders. But for the NAFTA proponents, it has been worth it, because the parameters of the political discourse and debate have been set, leaving the other side at a serious disadvantage.

Except for some token memberships on a few trade advisory committees, the more modestly-funded anti-NAFTA forces frequently have been ignored, reduced to the reactive role of eleventh-hour yammering naysayers. Because of deep lobbying, the NAFTA opponents automatically become trivialized as almost caricature-like figures, mere props in the trading game.

In the end, not only has the massive infusion of money once again distorted democracy, it has undermined the public's confidence and trust in the integrity of the decision-making process.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. The Chair will remind Members that comments should be addressed to the Chair.

NAFTA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois [Mr. PORTER] is recognized for 5 minutes.

Mr. PORTER. Mr. Speaker, if the economy of the United States were as strong and growing today as it was in the 1980's, there would be no doubt whatsoever that the NAFTA, the North American Free-Trade Agreement, would be easily adopted in both the House and the Senate.

□ 1940

It is the insecurity that is a result of the end of the cold war with adjustments from an economy that has been virtually on a wartime basis for the last 45 years, to a peacetime basis, that has led us to question our ability to face a free-trade future.

Mr. Speaker, anyone who looks at NAFTA honestly understands that on a trade basis, NAFTA is a win-win-win situation: A win for the United States of America creating new jobs, export jobs that pay better salaries than other jobs; a win situation for Mexico; and a win situation for the Canadian economy and people as well.

We must ask ourselves whether the United States, the most productive economy on Earth, the largest exporting economy in the world, the economy with the world's most productive workers, can trade with a weak economy to ourself and a teeny economy to our north freely. Can we afford as a people to do that? And the answer is obviously easily. Easily, Mr. Speaker.

There is nothing that we have to fear, and NAFTA is an agreement that is in our national interest. We give up far, far less under the agreement than does Mexico, whose trade barriers are far higher than our own and will be brought down under this agreement.

Protectionism is not what makes economies work. Protectionism does not create jobs. It robs the future, as a matter of fact, in exactly the same way

that deficits rob the future. It robs our children and grandchildren of the jobs that would be created through freedom.

We have to only look back in our own history, Mr. Speaker, and what we attempted to do at the beginning of a frightening period at the end of the 1920's and the early 1930's, to see what protectionism did to rob our future at that time.

We decided that what we had to do was to protect American workers and American jobs, and we passed the Smoot-Hawley tariff. It actually robbed us of a future, because we should have understood, but apparently did not, that other countries would put in the same kinds of protections in retaliation for ours, and as they did so, the lights went out all over Europe, all over the Far East, all over the United States, and jobs ceased to exist. It took us until the beginning of World War II to regain those jobs.

The kind of anti-NAFTA thinking that we see today is the same kind of thinking that said years and years ago that we cannot have new technologies, because new technologies will rob us of jobs in the future. This is the Luddite thinking. Had we followed that at the time, Mr. Speaker, we would have had sweat shops dominating our economy today instead of the growing economy that we have and are capable of having and will have under NAFTA.

People say, well, yes, it will create a net increase in jobs. But won't it mean some job losses?

Mr. Speaker, of course it will mean some job losses. The very understanding that we ought to have coming out of the end of the Cold War is that what works for people is freedom, and that State central bureaucracies that guarantee jobs for everyone really guarantee nothing but mediocrity and stagnation. In a dynamic economy you have winners and losers because you take risks. And, yes, we should not guarantee every single job, because that means stagnation. What we have to do is guarantee opportunity, take risk. And, yes, it is tough stuff, but we have had it throughout our history of freedom. People will have to train for better jobs that are created through exports. As we have seen over and over again, these are the good jobs, and Americans will have to work hard in order to compete and have them.

Mr. Speaker, on the environment, the Sierra Club and Friends of the Earth are wonderful organizations, but they are short-sighted organizations. Almost all the major organizations understand that there will be a net gain for the environment as a result of NAFTA; that our resources will be committed for the improvement of the environment on the border with Mexico; that Mexico will be led to enforce its environmental laws.

Mr. Speaker, this is a time for leadership. This is a time when, after urging

the world for 45 years that we must be free traders for the betterment of all peoples on Earth, we will lose that leadership, we will lose our values for democracy and human freedom and the rule of law if we do not pass NAFTA. If we turn away from our path of free trade and open markets by defeating NAFTA we lose credibility in the eyes of the world, and with it our ability to project our values of freedom democracy, human rights, the rule of law, and free markets overseas at the very moment our ability to influence positive change should be at its zenith.

I urge Members that they must vote for it.

ON NAFTA

The SPEAKER pro tempore (Mr. MENENDEZ). Under a previous order of the House, the gentleman from Texas [Mr. GONZALEZ] is recognized for 5 minutes.

Mr. GONZALEZ. Mr. Speaker, I rise tonight to place in the RECORD a summary of the three separate individual hearings that the Committee on Banking, Finance and Urban Affairs under my direction called very early on the so-called North American Free-Trade Agreement. The reason for it was that up to the time we called the hearings, there was no mention at any time that this agreement contained anything but supposedly trade matters, much less very complicated and extensive banking, finance, and even securities sections. Chapter 14, for example, on banking and financial services, is very comprehensive and very far-reaching.

We thought that in order to inform the Members, at least of the committee, and as far as possible citizens, who up to now and even now have not had the benefit of knowing of these hearings, that they should be held. We were more or less blanked out by the media. Even the last hearing which we had some 10 days ago was not covered, other than incidentally in the foreign press.

So today I want to place in the RECORD a summary of the three hearings, because I think the Members should know when they vote on Wednesday exactly what in this area is involved.

Now, in a more comprehensive way, I deplore the pressure and emotionalism, and in fact I join the previous speaker, the gentlewoman from Ohio [Ms. KAPTUR], in condemning what otherwise would be out and out bribery attempts, when the President trades out such things as favors and pork and banks even for a vote. Why, if a businessman were to do that, he would have been accused of bribery, and it is very disturbing.

But the reason for it and the reason for the passion that has developed on this issue, which should be considered dispassionately and openly, is that the

whole process over the course of 14 months that led to the formulation of these agreements was in total and absolute secrecy. You cannot get your hands on minutes or a record of the transcript, if they have one.

Who was it that shaped the agreements? When we had the first hearing of the Committee on Banking, Finance and Urban Affairs, we had the Assistant Secretary of the Treasury, who said that he had participated in the negotiations on Chapter 14 on banking and financial services.

□ 1950

And I asked him how many members of the banking and financial community participated. He said, "Quite a number."

And I said, "Well, did they actually take part in the discussions?"

And he said, "Yes."

"Has anybody known who they are?"

"No."

I said, "Would you make the list available?"

He said, "Well, all right, I will do that, as far as that particular section is concerned."

So just 2 weeks ago, he sent the list. It has all the leading, most powerful megabanks and their attorneys. These are the guys that wrote that section.

Now, if anybody thinks that as a Member of this House he or she can delegate to that class to protect the general interest, then they are either very naive or willfully irresponsible. That has not been our experience in our oversight duties, as members of the Banking Committee.

But leaving that aside, if this has worked in secrecy, and there are other sections that are far more insidious in nature, in which, in effect, the whole basis of our Government since colonial times, based on representation, will be sacrificed for, my colleagues, if this is approved, we will be delegating to over a dozen commissions, quasi-judicial in nature, who will have the power to sue American business concerns in their courts and who will have an intrusive and an interfering force in what ought to be matters debated and carried out in open and free debate in the Congress.

Mr. Speaker, I include for the RECORD the summaries to which I referred:

A SUMMARY OF HEARINGS HELD BY THE COMMITTEE ON BANKING, FINANCE AND URBAN AFFAIRS OF THE NORTH AMERICAN FREE-TRADE AGREEMENT

(Prepared by the Committee Staff, November 9, 1993)

Most of the debate surrounding the North American Free Trade Agreement ("NAFTA") has focused on its impact on labor and environmental concerns, with little consideration of the far reaching financial services provisions. As a result, the Committee held hearings on September 8 and 28, and November 8, 1993 on the financial services provisions (Chapter 14) of NAFTA and the ramifications for U.S. financial service providers.

namely banks, insurance companies and securities firms. The committee focused on the U.S.-Mexico relationship since the U.S.-Canadian trade relationship was previously negotiated in the U.S.-Canada Free Trade Agreement. During these hearings the Committee heard from a diverse group of witnesses, including U.S. financial services regulators, financial consultants and analysts, academics and American businesspersons and investors doing business in Mexico.

BACKGROUND

Chapter 14 of NAFTA sets out rules governing the treatment that each government must accord to those financial institutions in its territory that are owned by investors from other NAFTA countries. In general, U.S. banks and other financial services providers will be permitted to operate wholly-owned subsidiaries (by establishing a new subsidiary or purchasing existing Mexican firms) and will be able to operate under the same terms as their Mexican counterparts.

NAFTA calls for a transition period running from 1994 to 2000 during which time U.S. and Canadian banks would be able to grow in aggregate market capitalization from 8% to 15% of the capitalization of the Mexican banking system. Each individual bank's market share would be capped at 1.5% throughout this period. After the year 2000, all caps would be removed. However, Mexico could impose an optional one-time, three year moratorium on any further U.S. or Canadian bank expansion, should they attain a 25% share of the Mexican market before the year 2004.

SEPTEMBER 8, 1993: HEARING ON THE FINANCIAL SERVICES CHAPTER OF NAFTA

(Witnesses: Steven Davison, Senior Vice President of Ferguson and Company; Jack Guenther, Vice President and Senior International Affairs Officer, Citicorp/Citibank; Christopher Whalen, Senior Vice President, The Whalen Company, and Editor, *The Mexico Report*; Nikos Valance, economist and professor, Queens College of the City University of New York, Andres Penaloza, economist and Parliamentary Advisor of the Staff of the Commission on Budget and Planning of the Mexico Chamber of Deputies)

Summary: The volatility of the Mexican economic and political systems, along with broader bank powers, and an aggressive lending environment pose substantial safety and soundness risks to U.S. financial services firms operating in Mexico.

The Committee heard testimony from several witnesses about the possible risks associated with doing business in Mexico. The risks identified for banks include: greater potential credit exposure due to broader bank powers, and an aggressive and volatile lending environment. This environment has resulted in rising levels of troubled assets, not unlike the lending environment in the U.S. during the 1980s which caused problems for many banks. In addition, these witnesses identified several broader concerns which would apply to all financial service providers. Specifically, the volatility of the Mexican economy and its political system, and corruption which permeates Mexico's political and regulatory institutions.

During the debt crisis of the 1980s, the peso was devalued 30 percent and Mexico nationalized its entire banking system. Billions of dollars in deposits held by Mexican and foreign nationals were illegally seized and converted to dollars at the lower exchange rate. Recently the banks were returned to private hands under the direction of the government of President Salinas. Eighteen Mexican

banks currently operate in Mexico. Private investors paid an average of over three times the current book value or 21 times the book value of the institution at the time of nationalization. The prices were driven by investor perception that this was a unique opportunity considering the Mexican economy and the "underbanked" condition of the Mexican market. Mr. Stephen Davidson testified that the high cost of privatizing the banks has left these institutions thinly capitalized. The need to generate an adequate return for investors and justify the substantial acquisition premiums has created an incentive for risk taking by Mexican banks. In addition, Mr. Christopher Whalen testified that the privatization of the Mexican banking system simply converted state owned "monopolies" into private hands, while essentially leaving in place the highly cartelized industry. Mr. Whalen also expressed concern about the lack of public accounting for where the funds were obtained to buy these banks or how funds raised overseas in stock and bond offering have been deployed. Since the use of nominees to hold stock in Mexican companies is common, it is impossible to know who exactly owns these stocks.

Many of the witnesses agreed that U.S. banks would be entering an already aggressive and speculative Mexican banking environment, which includes rapid loan growths, with large non-performing assets ratios, reminiscent of the banking environment in the U.S. during the 1980's. U.S. bank subsidiaries operating in Mexico will have powers not currently available in the United States under the constraints of the Glass-Steagall Act. Banks will be permitted to underwrite securities, and engage in bond derivative product trading in Mexico through securities affiliates. Underwriting is generally considered to pose greater credit exposure than lending and is thus generally considered to represent a higher risk activity, especially in a volatile Mexican securities market. Mr. Davidson testified that there has been a steady increase in the problem loans held by Mexican banks. Analysts believe that the Mexican banks' non-performing loan ratios are anywhere between 7% to 30%, very high compared with that of the United States. In addition, Mr. Davidson expressed concerns that unless Mexican bank profits continue to be strong, it will be difficult to maintain aggressive growth and increase the bank capital ratios. Currently it is widely held that Mexican banks are thinly capitalized.

One of the most important aspects of U.S. financial institutions entrance into the Mexican banking system is the adequacy of regulatory supervision. Due to the recent privatization of the banking system, the regulatory system itself has simply been untested, especially in a crisis situation. According to Mr. Whalen, Mexican banks are essentially unregulated when it comes to activities and investments and are self-regulated with regard to disclosure of financial data, since private auditors hired by the banks, and not the regulators, perform assessments of loan portfolios and other aspects of bank operations. These audits are essentially "rubber stamped" by the Mexican National Banking Commission. Mr. Whalen notes that some Mexican banks are well managed, but contends for the most part the industry is characterized by management practices that are unacceptable in the U.S. such as unsafe accounting practices, high concentrations of loans to single borrowers, and dependence on dollar financing for peso activities. Mr. Jack Guenther testi-

fied on behalf of Citibank that the Mexican regulatory structure is "strict and well regulated." However, it is important to note that the Mexican system of self-regulation would be unacceptable in the United States. In addition, while Mexico is considering a deposit insurance system, there is currently no deposit insurance for Mexican deposits. Again, the American experience shows that in a worst case scenario, a crisis of confidence can result in a potential risk to the banking system.

Because of political corruption Mexico, Mr. Whalen contends that approval of NAFTA will expose American banks and financial companies to an environment in which they cannot succeed. A bank cannot reliably determine who owns a given financial asset or real property which is pledged as collateral.

Another issue of concern is the omission in NAFTA of an exchange rate stabilization mechanism. The European countries first efforts to unify focused on ways to stabilize their currencies. Both Mr. Nikos Valance and Mr. Andres Penaloza testified that the omission of an exchange rate stabilization mechanism in NAFTA was deliberate and a mistake. Mr. Valance argues that without an established exchange rate stabilization mechanism it is possible for foreign corporations to exert pressure on the Mexican government to devalue the peso, thus lowering wages in terms of other currency. In addition, Mr. Davidson cautions that the relatively volatile currency in Mexico poses increased potential exchange and interest rate risks to U.S. financial institutions. The fact that these issues are not addressed in NAFTA was of considerable concern to many of the witnesses.

U.S. financial services providers face considerable risks upon entering the Mexican market. These issues should be considered carefully by institutions seeking to enter Mexico and by U.S. regulators, most importantly the Federal Reserve, which is solely responsible for the supervision of foreign subsidiaries of U.S. banks.

SEPTEMBER 28, 1993: HEARING ON THE FINANCIAL SERVICES CHAPTER OF NAFTA

(Witnesses: John P. LaWare, Member of the Board of Governors of the Federal Reserve; Mary Schapiro, Commissioner, U.S. Securities and Exchange Commission; Alene Evans, Member of the Texas Board of Insurance, and Chairperson of NAFTA Working Group of the National Association of Insurance Commissioners; Barry Newman, Deputy Assistant Secretary for International Monetary Affairs, Department of Treasury; Ira Shapiro, General Counsel, Office of the U.S. Trade Representative)

Summary: The regulatory agencies have expressed little concern regarding the potential risks faced by the U.S. financial services industry post-NAFTA. The negotiating process of NAFTA raises serious concerns about the agreement.

The Committee heard testimony from U.S. government officials, including bank, securities and insurance regulators regarding the possible risks for U.S. financial services corporations entering the Mexican market. In addition, the Committee requested information on the negotiating process and participation of public and private individuals in the development of NAFTA.

Governor John LaWare of the Federal Reserve Board testified on the implications of NAFTA for the banking industry. An important component of NAFTA, which all the regulators agree, allows each country to grandfather certain provisions of existing law that do not conform to national treatment or most favored nation ("MFN") principles. Accordingly, the United States has

reserved a number of provisions of federal law that limit the national treatment available to foreign banks or individuals. The degree of discrimination in these laws cannot be increased and any future measures must conform to the national treatment and MFN principals.

Under NAFTA, a country would have right to a hearing on whether another country is abiding by its obligations under the agreement through the dispute settlement mechanism. If the dispute arbitration panel finds that a country's law or regulation violates NAFTA, the country may change the offending measure. If it does not, the complaining country has the right to suspend benefits to firms of the offending country that are commensurate with the harm suffered by the firms of the complaining country.

In addition, Governor LaWare outlined the "prudential carve-out" which provides that nothing in the services provisions of NAFTA shall be construed to prevent a country from adopting or maintaining reasonable measures for prudential reasons, which include among other things, the protection of consumers of financial services and the maintenance of the safety and soundness. Governor LaWare testified that NAFTA would not in any way diminish the ability of the U.S. to apply sound prudential standards to financial institutions from Mexico or Canada operating in the U.S. nor would it in any way affect the requirements imposed on U.S. banks in operations outside the U.S. In addition, he states that NAFTA cannot be used as a back door to engage in impermissible activities in the United States. Despite testimony received at the September 8th hearing, Governor LaWare did not identify issues regarding potential risks to U.S. financial institutions operating in Mexico after NAFTA.

Commissioner Schapiro testified concerning the securities aspects of NAFTA. U.S. securities laws and rules generally do not discriminate against or among firms or investors from other nations, including Canada and Mexico. Thus, U.S. securities laws essentially already provide the national treatment and MFN treatment required by NAFTA. Commissioner Schapiro also pointed to the "prudential carve-out" as an important aspect of NAFTA, which will allow the SEC to continue to regulate the U.S. securities markets in the current manner. Commissioner Schapiro's testimony did not address issues concerning potential risks for securities firms operating in Mexico post-NAFTA.

Alene Evans testified on the provisions and principles of NAFTA that relate to the business of insurance. Ms. Evans explained that the NAFTA Working Group has had particular concerns about State participation in the dispute resolution process. NAFTA does not provide for state participation in dispute resolution, leading to the potential for the undermining of State regulation on insurance. This is especially important in the area of insurance, since the states, and not the Federal government, are the primary regulators of the business of insurance.

Ms. Evans outlined a number of possible risks to U.S. and Mexican policy holders in purchasing insurance from an insurer operating under the laws of another country, including possible difference in asset value at the time of replacement, possible currency devaluation or currency cost, and differing legal standards and judicial systems. Under current Mexican law and after NAFTA, a Mexican policy holder would be forced to sue a U.S. company in the U.S. rather than in Mexico.

In addition, Mexico does not have a guaranty fund, as many States do in the event of insurer insolvency. Thus a resident of the U.S. who purchased an insurance policy from a Mexican insurance company would not be protected by a guaranty fund if the company went insolvent.

Information provided to the Committee by Mr. Newman, and Mr. Schapiro on the negotiating process raises considerable cause for concern. Over 100 private sector firms and their representatives were not just consulted, but were allowed to review drafts of the agreement while the negotiations were in progress. In light of the case of Mr. Robert Bostick (see November 8, 1993 hearing), a reason for concern exists about the possibility that one or more of these individuals and their firms may have sought to profit on the confidential information they received. No information was provided to the Committee about what, if any, ethical restrictions were placed on those individuals. In addition it is interesting to note that the agreement was negotiated in part at the Watergate Hotel.

NOVEMBER 8, 1993: HEARING ON ABUSES WITHIN THE MEXICAN POLITICAL, REGULATORY, JUDICIAL AND BANKING SYSTEMS AND IMPLICATIONS FOR THE NORTH AMERICAN FREE TRADE AGREEMENT

(Witnesses: Honorable Sarah Vogel, North Dakota Commissioner of Agriculture; Kaveh Moussavi, formerly IBM Corporation's Political Agent in Mexico; Alex Argueta, Developer from Tucson, Arizona; Lucia Duncan, Coordinator, American Investors in Mexico)

Summary: Corruption runs deep in Mexico's political, regulatory, judicial and banking systems. American investors and businesspersons doing business in Mexico face overwhelming dangers and risk to their investments and well-being.

The Committee's third hearing on NAFTA examined the nature and scope of corruption in the Mexican political, regulatory, judicial and banking systems. This topic is very relevant and important to the consideration of the agreement. The purpose of the hearing was to inform American investors and businesspersons of the dangers created by the pervasive corruption in Mexico's public and private institutions. Given the lack of attention given to this important issue in the public debate on NAFTA, the Committee invited individuals to testify who could discuss their experiences in or knowledge of corruption in Mexico.

Commissioner Sarah Vogel described to the Committee how Mexican banks are improperly profiteering off of a U.S. loan program administered by the Department of Agriculture. Under the GSM-102 loan program, U.S. banks offer federally insured loans to Mexican banks at 7-9% interest for a three year term. \$1.25 billion is insured annually under the program. The Mexican bank is then supposed to lend those funds to Mexican importers under the same terms for the purchase of American agricultural products. This benefits American farmers by supplying Mexican importers with a source of credit to purchase American agricultural products.

However, Mexican banks abuse the program by extending credit to the importers for only 180 days, instead of three years. The banks then take the repaid principal and loan it to other customers for two and a half years at 25% to 30% interest. During this period, the loan is still insured by the U.S. government and the Mexican bank makes a large profit on the interest rate spread. At any one time there are loans totaling approximately \$5 billion which are outstanding and insured by the Federal government

under the GSM-102 program. Thus, the Mexican importers, who have trouble with a 180 day repayment schedule, and American farm exporters, are not benefiting from the program, while the Mexican banks get rich off the program.

The corruption which confronts American businesspersons is not limited to the banking system. Mr. Kaveh Moussavi, who represented IBM Corporation in its bid for the contract to modernize Mexico's air traffic control system, testified as to the pervasive abuses within the government. Officials of the Salinas Government solicited a bribe from IBM through him in exchange for their assistance in securing the contract for IBM. When he refused to pay, the government canceled all bids and issued a new solicitation designed to ensure awarding of the contract to a different company.

IBM and Mr. Moussavi went public with their story and filed suit against Mexico in an English court. Soon thereafter, the government of Mexico sought to buy his silence by offering to help him win any other contract he was involved with in Mexico. When he refused this bribe, the Mexican government began a campaign of smear and intimidation. More troubling, he and his family have had their lives threatened. Currently, the Mexican government claims to be investigating the matter, and the air control system remains as unsafe as ever.

Another disturbing case involves the mistreatment of Mr. Alex Argueta. Mr. Argueta was an Arizona-based real estate developer who invested in some land and a processing plant in Mexico. The investment was financed through a Mexican bank, which sought to take an equity interest in the project. He declined their offer and soon his troubles began. The bank accused him of misusing loan proceeds and tried to take control of his investments. While such a dispute would be a civil matter in the United States, the bank and officials of the Mexican Attorney General's office colluded to bring criminal charges against Mr. Argueta.

While in Mexico seeking to respond to the claims against him, he was taken in the middle of the night from his hotel room and detained on false pretenses. The Mexican agents held him for two days, threatened him with bodily harm, and publicly defamed and humiliated him. He was eventually locked in a Mexican prison for sixteen months and deprived of assets worth approximately \$20 million. He has sought justice in the Mexican court system, but to no avail. He decided to publicize his plight out of hope that the Mexican government would be forced to compensate him and to warn future American investors of the dangers of doing business in Mexico.

In addition, the Committee heard testimony from Ms. Lucia Duncan, coordinator for American Investors in Mexico (A.I.M.). This group consists of American investors who in various and unrelated instances found themselves being mistreated by the corruption permeating Mexico's institutions. The investments members of AIM have at risk in Mexico ranged from a few thousand to many millions. She cautioned all potential investors that an American has few safeguards and many dangers in Mexico. She is opposed to NAFTA since it contains no safeguards or guarantees for American investors.

Finally, the Committee invited representatives of both the Justice Department and the Labor Department to testify on the case of Mr. Robert Bostick. Mr. Bostick was a high level Labor Department official who recently pled guilty to illegally seeking to profit from

NAFTA while he was a negotiator for the agreement. The Committee sought to determine whether or not American interests were compromised during the negotiations as a result of Mr. Bostick's activities. The Committee also asked the Justice Department to provide information on any other such investigations of individuals involved in the NAFTA negotiations. Both agencies refused to appear and testify, and Mr. Bostick's plea agreement has been sealed by the Court. Ironically, Mr. Bostick is scheduled to be sentenced on November 17, the day the House is scheduled to vote on NAFTA.

NORTH AMERICAN FREE-TRADE AGREEMENT IMPLEMENTATION ACT

Mr. GONZALEZ, from the Committee on Banking, Finance and Urban Affairs, submitted the following Adverse Report:

[To accompany H.R. 3450 which on November 4, 1993, was referred jointly to the following committees for a period ending not later than November 15, 1993: Ways and Means, Agriculture, Banking, Finance and Urban Affairs, Energy and Commerce, Foreign Affairs, Government Operations, the Judiciary, and Public Works and Transportation]
[Including cost estimate of the Congressional Budget Office]

The Committee on Banking, Finance and Urban Affairs, to whom was referred the bill (H.R. 3450) to implement the North American Free Trade Agreement, having considered the same, reports unfavorably thereon and recommends that the bill do not pass.

H.R. 3450

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE AND TABLE OF CONTENTS.

(a) **SHORT TITLE.**—This Act may be cited as the "North American Free Trade Agreement Implementation Act".

(b) **TABLE OF CONTENTS.**—

- Sec. 1. Short title and table of contents.
Sec. 2. Definitions.

SECTION X SECTION OF THE PRINCIPAL PROVISIONS WITHIN THE JURISDICTION OF THE COMMITTEE ON BANKING, FINANCE AND URBAN AFFAIRS

H.R. 3450, North American Free Trade Agreement Implementation Act

TITLE V, SUBTITLE D, PART 2

Sec. 541. North American Development Bank.

Authorizes the President to accept membership for the U.S. in the North American Development Bank. The U.S. may subscribe up to 150,000 shares of the capital stock of the Bank for which \$1,500,000,000 is authorized (\$225,000,000 of which may be used for paid-in capital and \$1,275,000,000 may be used for callable capital) without fiscal year limitations.

Limits funding for fiscal year 1995 to \$56,250,000 for the paid-in portion of U.S. capital stock and up to \$318,750,000 for the callable capital portion of the U.S. share of the capital stock of the Bank.

Sec. 542. Status, Immunities, and Privileges.

Clarifies that Article VIII of Chapter II of the Cooperation Agreement shall have full force and effect in the U.S., its territories and possessions, and the Commonwealth of Puerto Rico upon entry into force of the Cooperation Agreement.

Sec. 543. Community Adjustment and Investment Program.

Authorizes the President to enter into an agreement with the Bank that facilitates im-

plementation by the President of a program for community adjustment and investment in support of the Agreement. Establishes a Community Adjustment and Investment Program Advisory Committee.

Sec. 544. Definition.

Definition of Border Environment Cooperation Agreement.

EXPLANATION OF PROVISIONS WITHIN THE JURISDICTION OF THE COMMITTEE ON BANKING, FINANCE AND URBAN AFFAIRS

TITLE V, SUBTITLE D, PART 2, NORTH AMERICAN DEVELOPMENT BANK

The committee believes the Administration proposal to authorize a North American Development Bank (NADBank) is seriously defective and therefore reported out the proposal unfavorably.

The committee notes the fundamental problems with the proposal that were raised at the hearing organized by the Subcommittee on International Development. A major concern of the committee—highlighted by the testimony of Rep. David Obey—is the uncertainty as to how the proposal would be funded, especially in view of the fact that the United States is in arrears on authorized commitments to existing international financial institutions by about \$819 million. The committee is also extremely concerned that NADBank financing would need to be more concessional than the Administration assures and that the capital contribution would therefore not support the \$2 to \$3 billion of loans anticipated by the Administration.

The committee is also troubled by the logic and precedent of allowing an institution with substantial representation of foreign interests to participate in determining how the United States would use funds within its own borders. The committee also questions the proposal's focus on water pollution and municipal solid waste and neglect of other environmental problems such as air pollution and toxic waste dumps. Finally, the committee is concerned that much of the pollution in the area is attributable either directly or indirectly to the maquiladoras and that they would assume an appropriate degree of responsibility for mitigating their impact on the environment.

STATEMENTS MADE IN ACCORDANCE WITH HOUSE RULES

In accordance with clauses 2(1)(2)(B), 2(1)(3) and 2(1)(4) of Rule XI of the Rules of the House of Representatives, the following statements are made.

COMMITTEE VOTE

(Rule XI, Clause 2(1)(2)(B))

On November 10, 1993. The Committee on Banking, Finance and Urban Affairs, with a quorum present, ordered H.R. 3450, reported adversely by voice vote.

OVERSIGHT FINDINGS AND RECOMMENDATIONS
(Rule XI, Clauses 2(1)(3) (A) and (D), and Rule X, Clauses 2(b) (1) and (2) and 4(c)(2))

On October 27, 1993, the Subcommittee on International Development, Finance, Trade and Monetary Policy held a hearing on the proposed North American Development Bank and other issues within the jurisdiction of the Banking Committee.

Accordingly, the Committee recommends that the House not enact any provisions of H.R. 3450 within the jurisdiction of the Committee on Banking, Finance and Urban Affairs.

ADVISORY COMMITTEE STATEMENT

(Section 5(b) of the Federal Advisory Committee Act)

No advisory committee within the meaning of section 5(b) of the Federal Advisory Committee Act are created by this legislation.

INFLATION IMPACT STATEMENT

(Rule XI, Clause 2(1)(4))

The Committee finds that the bill will not have any impact on any inflationary trends in the national economy.

COST ESTIMATE OF THE CONGRESSIONAL BUDGET OFFICE PURSUANT TO SECTION 403 OF THE CONGRESSIONAL BUDGET ACT OF 1974

(Rule XI, Clause 2(1)(3)(C))

CHANGES IN EXISTING LAW MADE BY THE BILL, AS REPORTED

In compliance with clause 3 of rule XIII of the Rules of the House of Representatives, changes in existing law made by the bill, as reported, are shown in part 1 the report, filed by the Committee on Ways and Means.

U.S. CONGRESS,

CONGRESSIONAL BUDGET OFFICE,

Washington, DC, November 15, 1993.

Hon. HENRY B. GONZALEZ,
Chairman, Committee on Banking, Finance, and Urban Affairs, House of Representatives, Washington, DC.

DEAR MR. CHAIRMAN: The Congressional Budget Office has prepared the enclosed cost estimate for H.R. 3450, the North American Free Trade Agreement Implementation Act.

Enactment of H.R. 3450 would affect direct spending and receipts. Therefore, pay-as-you-go procedures would apply to the bill.

If you wish further details on this estimate, we will be pleased to provide them.

Sincerely,

ROBERT D. REISCHAUER.

CONGRESSIONAL BUDGET OFFICE COST ESTIMATE

1. Bill number: H.R. 3450.
2. Bill title: North American Free Trade Agreement Implementation Act.
3. Bill status: As ordered reported by the House Committee on Banking, Finance and Urban Affairs on November 10, 1993.
4. Bill purpose: H.R. 3450 would approve the North American Free Trade Agreement (NAFTA) entered into on December 17, 1992, with the governments of Canada and Mexico. It would provide for tariff reductions and other changes in law related to implementation of the agreement. The bill also would create a transitional adjustment assistance program for affected workers, require the use of an electronic fund transfer system for collecting certain taxes, and increase certain customs user fees. It also would authorize appropriations for a number of agricultural and other programs.
5. Estimated cost to the Federal Government: The following tables summarize CBO's estimate of the budgetary impact of H.R. 3450. Table 1 shows the impact of the bill on direct spending and revenues. Table 2 details the estimated costs that depend on future appropriation actions.

TABLE 1.—CBO ESTIMATES OF CHANGES IN REVENUES AND DIRECT SPENDING ASSOCIATED WITH H.R. 3450

(By fiscal year, millions of dollars)¹

	1994	1995	1996	1997	1998	5-year total
CHANGES IN REVENUES (Net)						
Reduction in tariff rates	-214	-489	-547	-609	-672	-2,531
Electronic Federal Tax Deposit System ²						
On-budget	49	262	272	371	1,207	2,161
Off-budget						
On-budget	23	116	135	146	701	1,121
Customs Enforcement Initiative	17	22	22	23	23	107
Customs Modernization Provisions	-3	-3	-3	-3	-3	-15
CHANGES IN OUTLAYS						
Increases in						
Customs fees (offsetting receipts)	-93	-203	-221	-241	0	-758
Increased spending for Current Trade Adjustment Assistance Program ³	10	25	25	20	25	105
New trade adjustment assistance benefits	(4)	7	8	9	9	33
Effects on agricultural price support programs	-64	-86	-66	-1	33	-184
North American Development Bank	0	54	2	0	0	56
Customs modernization provisions	-5	-5	-5	-5	-5	-25
EFFECT ON DEFICIT						
Net increase or decrease (-) in deficit:						
On-budget	-1	0	-1	0	-493	-495
Off-budget	-23	-116	-135	-146	-701	-1,121

¹ This table does not include any discretionary spending that would be associated with NAFTA.² Estimate provided by the Joint Committee on Taxation.³ Trade adjustment assistance (TAA) for training costs is currently limited by law to a maximum of \$80 million a year. This estimate assumes that this cap is maintained. If it were raised or eliminated, CBO estimates that TAA costs resulting from NAFTA would be a total of \$25 million higher over the 1994-1998 period than shown above.⁴ Less than \$500,000.

TABLE 2.—CBO ESTIMATES OF AUTHORIZATIONS OF APPROPRIATIONS ASSOCIATED WITH H.R. 3450

(By fiscal year, in millions of dollars)

	1994	1995	1996	1997	1998	5-year total
Agriculture programs:						
Estimated authorizations	96	22	22	22	22	184
Estimated outlays	18	61	34	37	22	172
North American Development Bank:

Estimated outlays	16	18	10	11	11	66
Total authorizations:						
Estimated authorizations	117	38	89	89	89	422
Estimated outlays	34	79	100	104	89	406

Basis of Estimate:**CHANGES IN REVENUES**

Tariff rate reductions: Under NAFTA, all tariffs on U.S. imports from Mexico would be

eliminated by 2008. Tariffs would be phased out for individual products at varying rates according to one of six different timetables from immediate elimination to elimination over 15 years for some goods. Based on the composition of imports from Mexico in 1991, tariffs would be eliminated on about 60 percent of dutiable goods on January 1, 1994, and tariff revenue would be reduced by about 65 percent in calendar year 1994. By 1998, duties on about 70 percent of goods that are currently subject to duty would be eliminated, and tariff revenue would be about 85 percent lower than under current law.

Goods currently afforded duty-free treatment under the Generalized System of Preferences (GSP) would receive permanent duty-free treatment under NAFTA. Under current law, the GSP program is scheduled to expire after September 30, 1994. Therefore, this estimate includes the revenue loss from extending duty-free treatment in GSP goods imported from Mexico past the GSP's expiration date under current law.

CBO estimates that the provisions of NAFTA that reduce tariff rates would reduce revenues by \$2.5 billion over 1994 through 1998, net of income and payroll tax offsets. This estimate is based on Census Bureau data for 1991 and 1992 on imports from Mexico. This estimate includes the effects of increased imports from Mexico that would result from the reduced prices of imported products in the U.S.—reflecting the lower tariff rates—and has been estimated based on the expected substitution between U.S. products and imports from Mexico. In addition, it is likely that some of the increase in U.S. imports from Mexico would displace imports from other countries. In the absence of specific data on the extent of this substitution effect, CBO assumes that an amount equal to one-half of the increase in U.S. imports from Mexico would displace imports from other countries.

Electronic Federal Tax Deposit System: The new federal tax deposit system would electronically transfer tax deposits to the Treasury, eliminating the need for banks to process paper coupons and checks. The change, which would be phased in gradually over several years, would allow deposits to be credited to the Treasury on the day of deposit instead of the day after deposit. Adoption of this system would not change the amount of taxes paid by taxpayers, but would shift the receipt by the Treasury of certain tax revenues from the beginning of one fiscal year to the end of the preceding year. The Joint Committee on Taxation has estimated that these changes would increase on-budget receipts by \$2.2 billion and off-budget receipts by \$1.1 billion over the fiscal years 1994 and through 1998.

Customs Enforcement Initiative: The bill would allow Customs Service auditors to access IRS income tax return information. This would allow auditors to use businesses' tax information on the valuation of imports and is expected to result in higher customs duty audit assessments. CBO estimates, net of income and payroll tax offsets, that the access to the information would result in increased receipts of \$107 million over fiscal years 1994 through 1998.

Customs Modernization: Title VI of H.R. 3450 would expand the base of goods eligible for customs duty drawbacks and would allow increased exemptions from duty on certain personal articles, decreasing customs duties by \$7 million each year. Title VI also would require payment of interest on merchandise revaluations after entering an item through U.S. Customs, increasing receipts by \$4 mil-

lion each year. CBO estimates, net of income and payroll tax offsets, these provisions would decrease receipts by \$3 million each year.

CHANGES IN DIRECT SPENDING

Customs User Fees: H.R. 3450 would make several changes to user fees charged by the U.S. Customs Service, which are recorded in the budget as offsetting receipts. For the fiscal years 1994 through 1997 only, the current \$5 passenger fee would be increased to \$6.50 and the exemption granted to passengers arriving in the United States from Canada, Mexico, and the Caribbean would be removed. For fiscal years 1999 through 2003, customs user fees would be extended at the current \$5 rate. (Under current law, these fees sunset at the end of fiscal year 1998.) CBO estimates that the \$1.50 passenger fee increase and the removal of the exemption would result in additional fee collections of \$758 million over the fiscal years 1994 through 1997.

Current Trade Adjustment Assistance (TAA) Program: Under current law, the TAA program provides cash assistance and training to workers who can demonstrate that increased imports contributed importantly to the loss of their job. If NAFTA were to be approved, CBO estimates that approximately 4,500 additional workers annually for fiscal years 1995 through 1998 would become eligible for TAA. The additional workers would not qualify for TAA immediately because workers must exhaust their unemployment benefits prior to collecting TAA. The fiscal year 1994 estimate assumes approximately 1,000 workers would qualify for TAA, assuming that NAFTA becomes effective January 1, 1994. Under current law, TAA recipients are required to participate in job training unless they receive a waiver. Currently, about 60 percent of the recipients train and 40 percent receive waivers. The average training cost is approximately \$4,000 per person. Based on an average cash benefit of \$4,800, CBO estimates the additional TAA cash assistance would be \$5 million in 1994 and \$20 million each year for fiscal years 1995 through 1998, and we estimate the additional TAA training benefits would be \$5 million in 1994 and \$10 million each year for fiscal years 1995 through 1998, if all newly eligible workers were to receive their full training benefit.

Nevertheless, the TAA training program is a capped entitlement. The training benefits are capped at \$80 million in fiscal years 1994, 1995, 1996, and 1998. In fiscal year 1997, the cap on funding for TAA training is \$70 million. Because CBO's baseline is \$5 million below the cap in fiscal years 1994, 1995, 1996, 1998 and equal to the cap in fiscal year 1997, the estimated increase in TAA training costs with the existing caps would be \$5 million each year in fiscal years 1994, 1995, 1996, 1998 and zero in fiscal year 1997.

New Trade Adjustment Assistance Benefits: The bill would add a new subchapter to the TAA program to allow workers who lose their job because their firm shifts production to Mexico or Canada to qualify for TAA. In addition, workers would be required to enter a job training program by their sixteenth week of unemployment or their sixth week of TAA certification, whichever is later, to be eligible for benefits. Unlike the current TAA program, beneficiaries under this subpart could not receive a waiver from training and still collect cash assistance. TAA cash and training benefits under this amendment would be available to those who are displaced from their jobs between January 1, 1994, and September 30, 1998. CBO estimates

that fewer than 1,000 workers annually would qualify for TAA payments under this provision. The average training benefit would be \$4,000 per person, and the average cash benefit would be approximately \$6,000 per person. CBO estimates that total TAA payments under this new subpart would be less than \$500,000 in fiscal year 1994, \$7 million in fiscal year 1995, \$8 million in fiscal year 1996, and \$9 million in each of the fiscal years 1997 and 1998.

Effects on Agricultural Price Support Programs: Gradual reductions in tariff and non-tariff barriers on agricultural products under the North American Free Trade Agreement are expected to result in increased trade between the United States and Mexico. An estimated net increase in U.S. exports of commodities currently supported by agriculture programs would result in higher market prices and a reduction in government support payments. While lower acreage reduction program (ARP) requirements (to compensate for increased demand) would mitigate some of the price increase, the ARP level could not be reduced in some years.

The bill also would require end use certificates for imports of wheat and barley. Such certificates would tend to discourage imports and raise the price for domestically produced grain, resulting in slightly lower program payments.

CBO estimates that increased exports and higher prices, combined with the requirement for end use certificates on imports of wheat and barely, would reduce federal expenditures on agricultural programs by \$184 million during 1994 through 1998. The majority of these savings would be derived from higher prices and lower program payments for feed grains. The dairy sector and other grains would benefit noticeably from increased exports, leading to a reduction in federal support purchases and lower program costs.

North American Development Bank: Section 542 would authorize the President to accept membership in a North American Development Bank. The bank would be a multilateral bank with stock held by member states. The bill would authorize the United States to subscribe to 150,000 shares of capital stock and the appropriation of \$1,500 million to purchase the stock. It would appropriate \$56.25 million in 1995 for the first paid-in stock subscription, and would provide an authorization of appropriations for the remaining amount without fiscal year limitation.

The North American Development Bank would have the same structure as other regional development banks. Only 15 percent of the bank's stock would be paid-in or purchased, by the member states. The balance would be callable capital. Callable capital would secure borrowing by the bank in private capital markets. The bank would relend the funds. Member states would make payments on callable capital subscriptions only to the extent that the bank could not service its debt from earnings on its investments.

The estimate assumes the U.S. government would subscribe to the capital stock in four equal annual installments. The first installment would be funded by the \$56.25 million appropriated for paid-in capital and the authorization for callable capital subscriptions provided in section 541(a)(3) of this bill. The estimate assumes that the final three installments of paid-in capital would be provided in appropriations acts in 1996, 1997, and 1998. The estimate assumes that the appropriation for paid-in capital would represent outlays in the year provided. The authorization to subscribe to the callable capital

stock is not expected to result in any appropriations or outlays during the period of the estimate.

Section 543 authorizes the President to enter into an agreement with the Bank to receive 10 percent of the paid-in capital actually paid to the Bank by the United States. The bill would authorize the President to use these funds, without further appropriation, to make loans or loan guarantees through existing federal programs to support the community adjustment and investment program defined in the Cooperation Agreement. CBO estimates this provision would result in a receipt to the government from the Bank of \$5.6 million in 1995, and subsequent spending of the same amount through existing community development loan and loan guarantee programs.

Customs Modernization: H.R. 3450 would make several changes in the administrative procedures of the Customs Service. Customs would be allowed to release unclaimed merchandise for sale or destruction after six months rather than the one-year period mandated by current law. CBO estimates that this provision would decrease storage costs by \$6 million annually. In addition, the number of entries that could be filed informally would be increased. Informal entries are assessed a lower customs user fee, and we estimate that this provision would decrease fee collections by \$1 million annually. The net effect of these changes would be an outlay reduction of about \$5 million a year.

SPENDING SUBJECT TO APPROPRIATIONS ACTION

Agriculture: Sections 321 and 361 of the bill would authorize a number of program changes that could increase federal outlays in agricultural programs by an estimated \$172 million over the 1994-1998 period. The majority of costs would reflect authorizations for assistance for farm workers in markets adversely affected by increased trade with Mexico (\$20 million per year) and the construction of a containment facility for agricultural products from Mexico. Other provisions would require the Secretary of Agriculture to provide information and reports on various agriculture markets and to monitor end use certificates.

North American Development Bank: Beyond the amount appropriated for 1994, H.R. 3450 would authorize additional appropriations of \$168 million for paid-in capital of the bank.

Section 543 would authorize the President to enter into an agreement with the Bank to receive 10 percent of the paid-in capital paid to the Bank by the United States. The bill would authorize the President to use the 10 percent portion to make loans or loan guarantees through existing federal programs to support the community adjustment and investment program defined in the Cooperation Agreement. CBO estimates this provision would result in a receipt to the government from the Bank of \$5.6 million annually over the 1996-1998 period, and subsequent spending of the same amount through existing community development loan and loan guarantee programs.

NAFTA Secretariat: Title I would authorize the appropriation of up to \$2 million to fund the United States section of the secretariat established by the agreement. These funds would be used to pay for the activities of the secretariat, as well as the commission, several committees and subcommittees, and various working groups subordinate to the secretariat. It also would allow the U.S. section to retain and spend reimbursements from the Mexican or Canadian section. We assume that the U.S. section of the secretar-

iat would be established within the International Trade Administration of the Department of Commerce (DOC), and that the secretariat and the various committees under its jurisdiction would use the full \$2 million authorized to pay for personnel and other costs.

Commerce Department Fees: Title III (sub-title E) would require the DOC to make available to the public certain information relating to sanitary procedures and would permit the DOC to charge reasonable fees for this information. Such fees would raise \$1 million to \$2 million annually and would be available for spending under existing authority.

Customs Automation Program: H.R. 3450 would establish the National Customs Automation Program, an automated and electronic system for processing information on commercial imports. We estimate that this program would cost \$3 million in fiscal year 1994, assuming appropriation of the necessary funds.

Tax Collection Expenses: The bill would authorize the Harbor Maintenance Trust Fund to use, for the first time, up to \$5 million annually to cover the administrative costs of collecting the harbor maintenance tax. We estimate that this would result in costs of \$5 million annually, assuming appropriation of the necessary funds.

Commissions: Section 532 would authorize an annual appropriation of \$5 million for 1994 and 1995 for the United States contributions to the annual budget of the Commission for Environmental Cooperation. This commission is described in article 43 of the North American Agreement on Environmental Cooperation; its purpose is to address environmental issues affecting the continent. Section 533 would authorize annual appropriations of \$5 million, starting in 1994, for the Border Environment Cooperation Commission (BECC) that is established by the Border Environment Cooperation Agreement. This commission would assist in developing solutions to environmental problems in the U.S.-Mexico border region. The BECC would certify environmental construction projects for the North American Development Bank (established by section 541) and other financial institutions.

International Trade Commission: Various provisions of the bill would require the International Trade Commission to monitor certain imports and to investigate and determine petitions for relief from imports benefiting from the agreement. Based on information supplied by the commission, CBO estimates that these duties will require an additional authorization of less than \$1 million per year.

6. Pay-as-you-go considerations: Section 252 of the Balanced Budget and Emergency Deficit Control Act of 1985 sets up pay-as-you-go procedures for legislation affecting direct spending or receipts through 1998. CBO estimates that enactment of H.R. 3450 would affect direct spending and receipts. Therefore, pay-as-you-go procedures would apply to the bill. The following table summarizes CBO's estimate of the pay-as-you-go impact of H.R. 3450. These figures represent the direct spending estimates in Table 1, excluding the effects on off-budget revenues.

[By fiscal year, in millions of dollars]

	1994	1995	1996	1997	1998
Change in outlays	-152	-208	-257	-218	62
Change in receipts	-151	-208	-256	-218	555

7. Estimated cost to state and local governments: None.

8. Estimate comparison: None.

9. Previous CBO estimate: On November 4, 1993, CBO prepared an estimate, based on draft language, of the direct spending and revenue effects of the North American Free Trade Agreement Implementation Act. That estimate of revenues and direct spending is identical to the estimate for H.R. 3450.

10. Estimate prepared by: Kim Cawley, Mark Grabowicz, Mary Maginniss, Eileen Manfredi, Ian McCormick, John Webb, and Robert Sunshine (226-2860), Cory Oltman (226-2820), Melissa Sampson (226-2720), Linda Radey (226-2693) and Joseph Whitehill (226-2940).

11. Estimate approved by: C.G. Nuckols, Assistant Director for Budget Analysis.

ANOTHER BIG NEWS STORY

The SPEAKER pro tempore (Mr. MENENDEZ). Under a previous order of the House, the gentleman from Pennsylvania [Mr. WELDON] is recognized for 5 minutes.

Mr. WELDON. Mr. Speaker, over this past weekend, where we celebrated Veterans Day, many of us were involved with our constituents. There were two news stories regarding manipulation of minority voters in the recent election of November 2.

One of these stories had unbelievable national coverage. I saw the news stories on Sunday in which the news commentators were talking about the outrageous comments and supposed, alleged actions, although he has now denied it, of the consultant, Ed Rollins, to Christine Todd Whitman in winning the New Jersey gubernatorial race.

Let me say at the outset that I was appalled by his comments and feel that if he did anything remotely near what he said that he should be subject to the proper action of our legal system.

I heard commentator after commentator alleging that Republicans typically try to suppress ethnic votes and in all elections. I saw Jesse Jackson and Al Sharpton with a major national news conference standing up and, with the Democratic Party in New Jersey, saying how outrageous it was that these alleged actions would take place, although to this day no specific instances of these actions have been brought forth.

There was a second story, Mr. Speaker, that was on the front page of the Philadelphia Inquirer on Sunday, which was not the subject of national news media stories and analysis. This had to do with the race for the Second Senatorial District in Pennsylvania in the city of Philadelphia, which will determine the political control of our State senate.

On election night, when the machines were opened, Republican Bruce Marks, out of 40,000 votes, won the election by 562. However, when the absentee ballots were opened, there were 1,391 Democrat votes and 366 Republican votes, which switched the tide of that election, and, even though it is being challenged in our State courts, indicate

that now Bill Stinson is, in fact, the winner.

The Philadelphia Inquirer, last week, spent 3 days in the Latino areas of the Second Senatorial District. They have documented cases that are outlined in detail naming people in this front page story with the headline across the paper directly under the banner, where people admitted to voting twice, where people were approached and told they could vote at home, where people were told to put their X by the Democrat place on the ballot because they thought they were announcing they were members of the Democratic Party when, in fact, they admitted in statements given to the Inquirer that they wanted to vote for Bruce Marks but ended up voting, by absentee ballot, for Bill Stinson.

Manipulation of Latino, Hispanic voters in Philadelphia, why is there no national outrage? Why is there no calling for a Federal investigation? Why is there no outrage on the part of Jesse Jackson and Al Sharpton in Philadelphia saying we should investigate this?

Manipulation of any minority voter is wrong, whether it is by Ed Rollins or whether it is by the Democratic candidate for the Senate seat in Philadelphia.

Mr. Speaker, I, today, call for a full Federal investigation of the Second Senatorial election in the city of Philadelphia and the State of Pennsylvania. There are factual details of people who have given statements to the Philadelphia Inquirer that their vote was manipulated, that they were told one thing. Committee people, Democratic committee people who said they had never seen such fraud in an election. I ask this body, as it debates the issue of fairness for all people in the election process, to be fair in terms of what party we are talking about. Manipulating black or Hispanic voters is wrong when it is done by either party, and we as a people should stand up against the allegations against Ed Rollins, as we should the allegations, as documented by the Philadelphia Inquirer on Sunday.

I urge my colleagues, Mr. Speaker, to focus some attention on the two major stories that broke this past weekend and to get the facts and to follow through with the appropriate justice in both cases, regardless of the political party involved.

A NEW NAFTA AGREEMENT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Maryland [Mrs. BENTLEY] is recognized for 5 minutes.

Mrs. BENTLEY. Mr. Speaker, NAFTA government and NAFTA corporate culture are two phrases I learned in reading the Washington Post Outlook section on Sunday. The proponent of the North American Free-

Trade Agreement [NAFTA] claim the agreement is about free trade and nothing more.

That myth was been laid to rest yesterday in an article by William A. Orme, Jr., entitled "NAFTA Is Just One Facet of a Growing Economic Cohesion." Mr. Orme has excellent credentials for his subject. He was a special correspondent to the Washington Post in Mexico City from 1981 to 1988. He is the author of "Continental Shift: Free Trade and the New North America."

I believe that some of the statements in the Orme article are so important that I will quote them without editorializing and let you judge for yourself just what it means. His article is a condensation from his book, "Continental Shift." He stated:

When NAFTA was first proposed, critics in all three countries—Canada, Mexico and the United States—claimed that its hidden agenda was the development of a European-Style common market.

Yet the critics were essentially right. NAFTA lays the foundation for a continental common market, as many of its architects privately acknowledge.

Part of this foundation, inevitably, is bureaucratic: The agreement creates a variety of continental institutions—ranging from trade dispute panels to labor and environmental commissions—that are, in aggregate, an embryonic NAFTA government.

Border environmental and public works problems are being addressed by new regulatory bodies, and new financial mechanisms are being developed within the NAFTA framework. These institutions won't be just concepts, or committees, but large buildings with permanent staff.

The environmental commission is to be housed in Canada, the labor commission in the United States, and the coordinating NAFTA Secretariat in Mexico. With their trilateral personnel and a mandate to work collectively and independently, these agencies should develop a distinctive NAFTA corporate culture.

NAFTA would be a consortium of 92 states, and provinces, plus scattered federal districts, territories and dependencies.

More important than formal trade reforms will be the informal progress toward market unification, with revamped transportation networks, new trade corridors and population centers, and new industrial specializations.

NAFTA would restructure the continent, with lines of people and goods running north-to-south as well as east-to-west, and once-fixed borders blurring in overlapping spheres of economic influence and political power.

You may draw your own conclusions from the article, but the glossary of terms is interesting. I saw the terms:

Foundation for a Common Market—bureaucratic—continental institutions—embryonic NAFTA government. I also saw new financial mechanisms—new regulatory bodies—large buildings with permanent staffs—market unification—and restructure the continent.

This sounds like something more extensive than just lowering tariffs so free trade can flow.

As I read this story, I questioned who would knowingly vote to set in motion

a new government, as Mr. Orme indicated. What we do on NAFTA could forever change the face of America. Something of this gravity for the country should be fully debated, not only in Congress, but in every town meeting hall across America. No longer can supporters of NAFTA point a finger of protectionism at their opponents. We have the true story now.

□ 2000

A CALL FOR A FAIR AND JUST SETTLEMENT IN NORTHERN IRELAND

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Massachusetts [Mr. NEAL] is recognized for 60 minutes.

Mr. NEAL of Massachusetts. Mr. Speaker, tonight for the next hour we are going to have an opportunity, Democrats and Republicans alike, to renew our call for a fair and just settlement in Northern Ireland. It is hard to imagine in this tiny northeast corner of Ireland, where 1.5 million people live in an area that is approximately the size of the State of Connecticut, that we could witness the longest standing political dispute in the history of the Western World. Just think of it. Think of what has happened during the last 4 years internationally. We have witnessed the demise of the Soviet Union, the yoke of Marxism has been lifted from the necks of the people of Eastern Europe, the Berlin Wall has been dismantled in front of our very eyes, Russian troops are leaving Lithuania, and majority rule is coming to South Africa.

Yet, in this small province of six counties in Northern Ireland, the killing and the maiming goes on and on. Tonight we are going to speak of one certain fact, and that is that there is no wisdom in the status quo.

From all that I see, Ireland may well be at a crossroads. There now exists a real opportunity for peace. The pain and suffering have gone on for too long. The continuing death and destruction is more than any small community anywhere in the world should have to bear. It is not surprising, therefore, that there is a great current of opinion in Ireland and here in the United States as well which insists that this opportunity must not be allowed to pass. The time must be grasped. To do so will require political courage and political conviction.

Albert Reynolds, the Irish Prime Minister, asked the question clearly last week: Who is afraid of peace? The answer to this question is equally clear. Peace is in the interests of everybody. It is in the interests of the people of Ireland, North and South. It is in the interests of the British people, and it is something that we in the United States have been yearning for for many decades.

If there is even a glimmer of hope that peace can be achieved, that prospect must be relentlessly pursued. John Hume is a deeply respected democrat, much admired across Ireland, in Europe, and throughout the United States. In recent sad decades in Northern Ireland's troubles there is no one who has stood taller or more authoritative and no one who has commanded such a breadth of vision. His recent talks with Gerry Adams may yet prove to offer a real chance of lasting peace in Ireland. The Hume-Adams talks have opened a door, and it is the responsibility of all those involved to keep that door open and to ensure this initiative, which was so courageously embarked on by John Hume, is developed to the full.

Mr. Speaker, I yield to the gentleman from New York [Mr. MANTON].

Mr. MANTON. Mr. Speaker, I am pleased to join in this special order to discuss prospects for a united Ireland. At the outset, I want to commend Mr. NEAL for reserving time to discuss this important issue. The recent surge in sectarian violence in Northern Ireland serves to remind the international community that while Northern Ireland may not be a front page story, the intractable conflict which has cost countless lives, both Catholic and Protestant, through violence, despair, and hunger strikes, still rages on.

Mr. Speaker, although efforts to bring peace to Northern Ireland have been launched many times during recent years, the British Government has used its power to block most meaningful efforts. Recently Gerry Adams, president of Sinn Fein, and John Hume, leader of the SDLP Party who together represent the majority of Catholic voters in Northern Ireland, proposed a peace initiative which was designed to bring peace to the six counties of the North. Unfortunately, the Hume-Adams plan was quickly dismissed by the British Government.

The British Government continues to stick by its long-held view that the problems of Northern Ireland should be solved by bilateral negotiations between the British Government and the Government of the Republic of Ireland. Not only has this approach failed to achieve even a modicum of success the many times it has been tried before, it is based on the unreasonable assumption that the problems of Northern Ireland can be solved without the input of the people who live in Northern Ireland playing a significant role. To me, the British approach to solving the Northern Ireland problem smacks of a colonial mindset. They simply believe they know what is best for the people of Northern Ireland.

While the British Government continues to believe they can lead Northern Ireland, by any unbiased standard, the more than 20-year tenure of direct British rule in Northern Ireland, which

has transformed the six counties of the North into a virtual British colony, has been a failure. Even if we discount the political and moral arguments against continued British rule, it is clear that ending the status quo is an economic necessity. It is clearly time for the British to go.

According to Patrick Mayhew, Britain's Secretary of State for Northern Ireland, the province costs the British 3 billion pounds, or \$4.44 billion, a year. Mayhew also acknowledges that England has no economic or strategic interests there. Mayhew has stated however, that as long as the majority wishes to remain in the United Kingdom, the British Government will continue to pay the steep annual costs without complaining.

While the British Government may be willing to continue this spending without complaint, the British public is not. All public opinion polls in Britain for more than 20 years have shown a majority of the British favor withdrawing troops from Ireland. The public also fails to share the British Government's unwavering interest in controlling peace negotiations there. Around 80 percent favor peace talks that would bring all parties in the North and South to the table to negotiate peace.

In addition to financial support, the British currently provide considerable military commitment to the six counties of the North; 19,000 troops are currently stationed in Northern Ireland. These soldiers are not peacekeepers but rather participants in a war that has lasted 25 years, and cost more than 3,000 lives, created in excess of 31,000 injuries and untold billions of dollars in property damage. If the same proportion of the populations of England, Scotland, and Wales had been affected, it would have left 100,000 dead and well over 1 million injured and maimed.

Mr. Speaker, it is clear that every policy the British Government has tried to exert its rule in Northern Ireland has failed. This thesis is not just the view of the Catholic minority but is supported by formidable independent authorities. According to Amnesty International, the European Commission, and European Court of Human Rights, the United Kingdom has the worst human rights record in Europe. What has become routine practice by the British, the founders of our own system of jurisprudence, in Northern Ireland may shock some Americans. In Northern Ireland, the British practice: internment without trial, have eliminated the right to a jury trial and an accused's right to silence, and impose state-sponsored censorship. According to these respected human rights organizations, British rule is also responsible for a series of unjustified killings by members of security forces, police sponsored torture, and the inhuman and degrading treatment of prisoners.

The pattern of violence in the North of Ireland has almost overwhelming repercussions in the Republic of Ireland. There, an already struggling economy must spend four times as much per capita as the United Kingdom on security costs related to Northern Ireland to contain the conflict to the North. As a result of the toll this struggle has taken on the Republic's economy, the principal export of the Republic is its educated young people.

After a quarter century of conflict and economic disaster, a substantial peace dividend would accrue to all involved parties if this war could be ended. Not only would military security and other related expenditures be available to help reconstruct Ireland's economy, but a well-educated work force would benefit from foreign investment in enterprises that would prosper in a peaceful climate.

Mr. Speaker, the decision of how the whole of Ireland should be governed is a question which should be decided not by foreign governments, but by the people of Ireland. But to say this is not enough. To realize this goal, the people of the Republic and Northern Ireland, just like the South Africans and Namibians, and Palestinians and Israelis need help and encouragement from abroad. The United Nations, the Conference on Security and Cooperation in Europe, the European Community, the International Monetary Fund, the World Bank, and most of all the United States must work to demonstrate to all the parties including the Unionists in the North that a united Ireland makes economic, social, and political sense. I hope we have begun this effort today.

□ 2010

Mr. NEAL of Massachusetts. I thank the gentleman from New York.

Mr. Speaker, I yield to another gentleman from New York [Mr. GILMAN].

Mr. GILMAN. Mr. Speaker, I thank the gentleman for yielding.

I would like to take this opportunity to commend my colleague from Massachusetts, Mr. RICHARD NEAL, for organizing this special order on the problems in Northern Ireland.

At a time in history when the world has experienced such extraordinary events as the fall of the Berlin Wall, the breakup of the Soviet Union, Nelson Mandela being released from prison, and the recent signing of a peace agreement between the PLO and Israel, this is the time to redouble our efforts in trying to resolve the hostility in Northern Ireland. We in the United States have the moral responsibility to speak out on human rights wherever they may be violated throughout the world, and clearly Northern Ireland falls into that tragic category.

Last year, it was gratifying to note that the Irish agenda took a prominent place in the Presidential campaign.

Now our job is to make certain that it retains that priority, and to ensure that the Congress continues to do all it can to bring about peace and justice in Northern Ireland.

In September, I was pleased to join with the gentlemen from New York, Mr. MANTON and Mr. FISH in chairing a meeting between the Ad Hoc Committee for Irish Affairs and the leaders of the major Irish organizations, including the Ancient Order of Hibernians. One theme which was repeated throughout that meeting was that we must take advantage of and harness the energy and enthusiasm generated by the peace treaty for the Middle East, and translate that momentum for peace into a new beginning for Northern Ireland.

Our priorities must continue to include the MacBride principles, seeking a special envoy to Northern Ireland, and working toward the end of human rights abuses both in Northern Ireland and, as many Irish-American nationalists can attest to in our own country.

Moreover, let us also focus on the recent Hume-Adams initiatives. While the details of their discussions have remained closely guarded, we all hope that their talks will lead to a positive change in Northern Ireland. We must work to see that this window of opportunity does not close. In particular, I urge the British Government to remain open to those discussions, and not dismiss them out of hand.

As my colleagues may know, the current situation in Northern Ireland is tense, and may become worse before it becomes any better. With the Unionists reacting to the Hume-Adams talks with terrorist attacks in Northern Ireland, and the IRA conducting a stepped-up bombing campaign, the situation is highly explosive. Nevertheless, the majority in Northern Ireland truly is longing for peace. This opportunity must not be thrown away because of the tragic acts of a few.

Be assured that our House Ad Hoc Committee on Irish Affairs will continue to work toward peace and justice in Northern Ireland. And I encourage our colleagues who are not members of the ad hoc committee to join with us in pursuing this problem, actively seeking solutions to this far too long conflict.

Mr. NEAL of Massachusetts. Mr. Speaker, I thank the gentleman from New York.

Mr. Speaker, I yield to another gentleman from New York [Mr. ACKERMAN].

Mr. ACKERMAN. Mr. Speaker, permit me to commend the distinguished gentleman from Massachusetts [Mr. NEAL] for calling this important and timely special order.

For as long as I have served in the Congress, the violence which continues to beset Northern Ireland has deeply troubled me. Children are forced to grow up surrounded by fear, never

knowing whether today is the day that they or a friend, or a relative will accidentally be caught in a fracas of bullets.

These children cannot help but wonder why they have been singled out, to live in a country occupied by soldiers, in a land forced to subordinate its own self-determination to archaic remnants of imperialism.

A place where tanks roam the streets, and where children witness the humiliation of their parents being searched and harassed by foreign troops as they go through certain sections of their own town on their way to their own homes.

Those of us who follow Northern Ireland closely were elated to learn that John Hume and Gerry Adams were willing to talk to each other. We were dismayed to learn that the hopes such talks represented were diminished by a British Government which refuses to deal with those whom they refer to as terrorists.

Mr. Speaker, even Yitzhak Rabin and Yasir Arafat are talking to each other. None of us ever expected to see that happen. Why cannot this intolerable situation in the north of Ireland see the beginning of an end as well? Why can't we do more to encourage dialog among the parties involved? And if we indeed want that dialog and if we want the parties to talk to each other, why did we not give a visa to Gerry Adams? Is it not entirely un-American to prevent an individual from presenting their views, and hypocritical at that, considering our other utterances?

In just a few days, Irish Deputy Prime Minister and Foreign Minister, Richard Spring will visit the House Foreign Affairs Committee. He has presented a white paper outlining six key principles for achieving peace in Northern Ireland. I believe these principles should be seriously considered.

It is paradoxical to note that the beautiful towns of Northern Ireland are often the names used to denote the death and destruction that has occurred there. It is tragic that this land of lush greenery is so often thought of in terms of blood and death and destruction. We must do what we can to end this.

Let me conclude by commending my friends and colleagues in this body who have shared this interest and concern over conditions in Northern Ireland. It is time to end the occupation of Northern Ireland. It is time to allow the people of that land to pursue their own course without fear, and it is time for the violence to end.

Mr. NEAL of Massachusetts. Mr. Speaker, I thank the gentleman from New York.

I yield to another gentleman from New York [Mr. WALSH].

Mr. WALSH. Mr. Speaker, I would like to thank my distinguished colleague and good friend and classmate,

the gentleman from Massachusetts [Mr. NEAL] for requesting the time for this very important special order.

□ 2020

As an American legislator of Irish descent, in my career, I have supported the disinvestment of our Nation's businesses in South Africa to end apartheid. I have supported Lech Walesa in his quest to make Poland a free country again. I have cheered watching Estonia, Latvia, Lithuania, and the Ukraine rebuild and be reborn as free nations. I have supported the discussions between the Palestinians and the Israelis which may lead to peace. I have supported democracy movements in Nepal where I served in the Peace Corps and watched the kingdom end and an elected government take shape, and in Nicaragua.

Now, my colleagues, it is Ireland's turn.

The Catholic minority in Northern Ireland is suffering from the bigotry and prejudice that has existed in many countries including our own for centuries. We cannot as a people or as a nation erase all prejudice from the minds of others, but we can conduct our Nation in a way that encourages military allies, friends such as NATO, as well as our foes, to work toward alleviating the poverty that is so often spawned by government action or inaction. In Northern Ireland, there needs to be an initiative. I believe one has been proposed and I believe the United States should undertake our own initiative, if only to complement the current Adams-Hume initiative.

There has never been an American initiative. We have been successful in helping other nations, such as South Africa to eliminate apartheid. We should look to one of our strongest allies, Great Britain, and to our own people, roughly 15 percent of whom have their Irish ancestors to thank for their American citizenship, for ideas and pledges of cooperation. The spotlight of attention needs to shine on this troubled land. If for nothing else than for the children who are growing up only to be bitter, if they are growing up at all.

As we encourage the Israelis and Arabs to come together, so too should we encourage good people in Northern Ireland to ignore the bombings, the terror, the insidious hatred espoused so publicly by the parties bent only on personal gratification and revenge, to come together and find a way to succeed.

We in the United States get sidetracked by many issues. When news is of Somalia, we, being good people, want to help. We motivate our leaders to send aid. In some cases, to send the military. We are not now talking about sending military aid. We may be talking about sending the right signals to all parties involved, and that may in-

volve money in the long run, but right now we can do the most good by sending the signal that we are paying attention. That we know of the Adams and Hume proposal. And that we expect results. The message needs to go out to the American people as well. The focus is peace, how we can help, and that there is hope.

It's not often that we can accomplish something so important coming on the heels of the Berlin Wall falling, the death of communism, apartheid, and Israeli-Arab animosity in the Middle East. We can do something that will not create a single job, will not garner a single vote nor maybe even create a single headline. But our support, however directly or indirectly we can deliver it, may leave us gratified that we contributed to solving an ancient struggle, a solution which has evaded problem-solvers for generations.

Mr. NEAL of Massachusetts. Mr. Speaker, I thank the gentleman from New York.

Mr. Speaker, I now yield to the gentlewoman from Connecticut [Mrs. KENNELLY], one of the distinguished leaders of our party.

Mrs. KENNELLY. Mr. Speaker, I thank the gentleman from Massachusetts [Mr. NEAL] for bringing us here tonight. I so well remember the evenings that our former chairman of our Irish group, Congressman Brian Donnelly, would gather us in this well to speak about Ireland, to talk about what might be done that the people there and in our forefathers' country could have peace. I thank the gentleman from Massachusetts [Mr. NEAL] for continuing this tradition. And as we all know, former Congressman Brian Donnelly is now Ambassador Donnelly and is carrying on this fight and is having his own time of being able to represent what we have all tried to represent and what we are trying to do tonight.

Mr. Speaker, in this ever-changing post-cold war world, the international spotlight has focused on the situations in Russia, Bosnia, Somalia, and Haiti, to name several. The attention we have given to these countries has allowed developments in other regions of the world to go largely ignored. One such example is the continued strife in Northern Ireland. I would like to take a few moments to share some of my thoughts on this situation with my colleagues.

In the past 24 years, an estimated 3,000 lives have been lost in the conflict in Northern Ireland. Over the years Congress has continuously introduced resolutions addressing issues relating to Northern Ireland. United States administrations have traditionally avoided the issue because our country's close relationship with Britain. I was pleased to hear then-candidate Bill Clinton discuss possible policy changes toward Northern Ireland, including a

proposal to send a United States peace envoy to Northern Ireland.

I am encouraged by the discussions which began earlier this year between John Hume, leader of the Social Democratic Labor Party [SDLP], and Sinn Fein leader Gerry Adams. These talks have been widely criticized because of Sinn Fein (Sinn Fenn)/Irish Republican Army [IRA] violence. However, after years of stalemate which have led to massive loss of life, such discussions are at least a step in the right direction and should not be dismissed out of hand.

I urge the Clinton administration and Congress to support continued discussions between British Prime Minister John Major and Irish Prime Minister Albert Reynolds. Irish Foreign Minister and Deputy Prime Minister Dick Spring, who will be on Capitol Hill tomorrow, recently introduced a six-step peace plan to end the violence in Northern Ireland. The United States should seize this opportunity to publicly pledge its assistance in furthering peace efforts in Northern Ireland.

I am very aware of the cultural, religious, and political difference which tear this region apart. However, earlier this year I sat on the White House lawn and watched Israeli Prime Minister Rabin and Palestinian Liberation Organization Chairman Arafat shake hands and agree to work toward Arab/Israeli peace. I remember thinking on that day, that if these ancient enemies can come together for the common good of their people and the world, then anything is possible.

Mr. NEAL of Massachusetts. Mr. Speaker, I yield to the gentleman from New York [Mr. KING] who, again, like the rest of us, has had a longstanding interest in this issue.

Mr. KING. Mr. Speaker, I thank the gentleman for yielding to me.

Mr. Speaker, at the very outset, I want to commend the gentleman from Massachusetts [Mr. NEAL] for the outstanding job he has done in scheduling this special order this evening, and I think, more importantly, for the dedication and effort that he has given to the cause of peace and justice in Ireland.

Because, very frankly, it is not a popular issue. It is not a particularly politically correct issue, but it is one that all of us who are concerned about human rights should rally behind.

I want to emphasize that this is not a partisan issue. It is not a Republican or Democrat issue, not is it a Catholic or Protestant issue. Indeed, it is a human issue, and it is an issue which troubles the conscience of all people concerned about the violations of human rights.

I think I should state at the outset that when we are talking about the situation in Northern Ireland that it is very important to emphasize what the gentleman from New York [Mr. MANTON] said earlier this evening, and that

is that the British Government has been cited by the European Commission on Human Rights, the European Court of Human Rights, and Amnesty International as having the worst record for human rights violations of any country in Western Europe, and that is the basic cause of the violence.

In the past 25 years since this latest round of troubles began in Ireland, British policies have only exacerbated and caused an increase in the violence in the north of Ireland, and it is the British who are carrying out state terrorism against the people in the occupied six counties.

That is why it is so essential that we get away from conventional diplomacy, that we get away from letting the British determine who it is that is going to come to the peace table, because it is the British who are the cause of the problem, and because they are the cause of the problem, they cannot be the solution to it.

It is so important that we, the United States and, indeed, all governments throughout the world, encourage the recent peace initiative by John Hume and Jerry Adams. These two gentlemen together represent the Irish Catholic constituency in the north of Ireland, and how outrageous it is for the British Government to say that they are not going to sit down with Jerry Adams.

□ 2030

Who are they to decide who should sit at the peace table when it is their policies which are ultimately responsible for the violence in the north of Ireland?

Mr. Adams represents a party which, in the last local elections, received more votes than any other party in Belfast. It is the British who have said we should turn to democracy rather than to violence. And yet, when we have a political leader such as Mr. Adams, who was elected three times to the British Parliament and represents a party which has such a wide range of support in the north, now they say they will not allow him to come to the peace table.

Well, the British do not have clean hands; they do not have the moral standing to deny anyone the right to come to the peace table. Indeed, I would say that, if I were Mr. Adams, I would be reluctant to sit down with the British because they are the ones who have the blood of thousands of innocent people on their hands.

The fact is all of us want to reach a resolution of this crisis. I have been to the north of Ireland a number of times and I have never met more decent people than the people who live in the occupied six counties, and that applies to Catholics and Protestants alike. All of them suffer under the yoke of British oppression.

So I would urge our Government, I urge the President, I would urge the

State Department, I would ask the leaders of this House and the leaders of the other body and all molders of public opinion to encourage the Adams-Hume peace initiative. This could be the last best hope for peace in Ireland.

Let us get behind a course for peace and let us get away from the British policy and the outdated policies of repression and oppression.

I would just say also parenthetically—and this again is not a partisan issue because no one is more critical of the Republican administrations than I have been—but I must say that I would ask President Clinton to reverse his policy of denying a visa to Jerry Adams. If Yassir Arafat can stand on the south lawn of the White House, certainly Jerry Adams should be allowed in this country to explain his position, to explain to the American people why he and John Hume have a plan and a formula for peace and why with all the parties in Ireland, Catholic and Protestant alike, north and south, why if they come to the table peace will be at hand.

There is an expression in the north of Ireland, and I am not going to ruin the translator's night by saying it in Gaelic, but translated it means, "Our day will come."

And, yes, the day of peace will come when America uses its best interests and its resources and its power to urge our supposed closest ally, Britain, who after 800 years of oppression finally do the right thing and give peace and justice and unity to all the people of Ireland.

I thank the gentleman for yielding to me.

Mr. NEAL of Massachusetts. Mr. Speaker, I thank the gentleman for his comments.

Mr. Speaker, I yield to a great friend of Ireland as well, the gentleman from Pennsylvania [Mr. COYNE].

Mr. COYNE. I thank the gentleman for yielding to me and for bringing about this special order.

Mr. Speaker, I support strongly renewed efforts to resolve the dispute over Northern Ireland. It is my hope that the United States Government will take an active part in a diplomatic campaign to achieve peace and justice for all of Ireland.

Conflict in Northern Ireland between Catholics and Protestants has brought tragedy and death to both sides, with over 3,000 killed in the past 25 years. The latest outbreak of violence last month involved a bombing in Belfast that killed 10 and sparked a round of retaliation by Protestant extremists which resulted in the death of a dozen Catholics. It is exactly this cycle of violence which must be stopped by all sides of this conflict.

The people of Northern Ireland can have no illusions about the fact that peace and justice will not be won with bombs, killings, and tit for tat retaliation.

There is a clear and absolute need for active dialog involving all parties to secure peace and justice in Northern Ireland. A settlement of the dispute over Northern Ireland can be achieved if there is respect for the democratic rights of the people of Ireland to self-determination.

It is in this context that the United States should welcome Republic of Ireland Foreign Minister Dick Spring who will be visiting Washington, DC, this week. Foreign Minister Spring will be discussing with the Clinton administration and Members of Congress the latest efforts to achieve a just and lasting peace in Northern Ireland.

The latest round of public efforts to negotiate a peaceful settlement to the strife in Northern Ireland involves two separate efforts. Both the Government of the Republic of Ireland and the Government of Great Britain have been discussing ways to promote justice and a respect for human rights in Northern Ireland. There have also been discussions by two major Irish political leaders, Gerry Adams and John Hume, about how to resolve the basic disputes which divide Northern Ireland from the Republic of Ireland.

These talks are and should be of great interest to the United States. Millions of Americans take pride in their Irish heritage and look forward to the day when there will be a united Ireland. It is important that the Government of the United States do everything in its power to promote a dialog on Northern Ireland which seeks to achieve peace and justice in that troubled land. It is my hope that President Clinton will renew his campaign commitment to name a special envoy to support this dialog.

Mr. Speaker, the world has witnessed amazing events over the past several years such as destruction of the Berlin Wall, the end of the cold war and historic peace efforts in South Africa and the Middle East. I remain hopeful that the world will also have an opportunity soon to celebrate peace in Northern Ireland. Now is the time for all parties in this conflict to rededicate themselves to this goal.

I thank the gentleman for yielding to me.

Mr. NEAL of Massachusetts. Mr. Speaker, I thank the gentleman from Pennsylvania [Mr. COYNE] for his comments.

Mr. Speaker, once again, to demonstrate how broad the support in this House of Representatives is for the current peace initiative in Ireland, I yield to the gentleman from Hawaii [Mr. ABERCROMBIE].

Mr. ABERCROMBIE. I thank the gentleman very much for yielding to me.

Mr. Speaker, as Americans we cherish our birthright, the first amendment. I want to repeat that because I am exercising it at this very moment.

For those who are observing our deliberations here on the floor whether by electronic means or in person here in our gallery, Members who may be watching our listening, we take for granted what seems to us to be the obvious, our first amendment rights, the most fundamental. The first amendment, not the second, third, or fourth, though all of those are important to us, but what was first? Free speech. It makes the difference between tyranny and freedom.

Let me quote to you just a few lines from an article in the Washington Post of November 2 of this year. That is November 2; this is not ancient history, this is right now. This is with respect to the aforementioned Jerry Adams and the Sinn Fein Party.

As a result of his being considered a nonperson by the British Government, a nonperson, television and radio stations are banned by law from broadcasting his voice.

Now, this is not the South Africa apartheid days, this is not the Iraq of Saddam Hussein, this is England, this is our supposed ally. He is forbidden to be on television or radio in person or otherwise, and his voice, when interviews are conducted with him, must be dubbed by an actor.

I dare say that many people in this country are hearing this for the first time and are scarcely able to believe their ears when I say it. Regardless of what you think about the Sinn Fein or any of the competing parties or interests in Northern Ireland, I submit to you that they themselves are far better able to come to a conclusion as to what is best for Ireland, Northern Ireland, than a British Government that goes so far and fears so much what Mr. Adams or any other member, any other Irish nationalist, may say, that they are forbidden from appearance on television or radio to the point that their voices are dubbed by actors. This is the reality, this is the reality. And this comes at a time when it is not difficult at all in the United States of America to find pictures of Princess Diana in a gym, to have CNN and other news outlets publish ad nauseam photos and commentary with respect to the architectural opinions of Prince Charles or the difficulties that the royal family may be having with divorce.

□ 2040

But when it comes to murder and mayhem, it comes to the occupation of Northern Ireland, when it comes to a judicial system as totalitarian, as dictatorial as any on the face of the Earth, as any in history, we are unable to get anything other than the dubbed words of an actor.

Our first amendment and its mandate of freedom of speech and a free press is something that our Founding Fathers and Mothers knew only too well, is something that tyrants want to silence.

They also knew that dialog and the open exchange of new ideas is the very backbone of our success, the essence of democracy and freedom.

Gerry Adams is the leader of a legal political party in Ireland and the United Kingdom. He previously was elected a member of the British Parliament, the equivalent of myself and any other Member of this floor.

Think of it, that if we had a disagreement on this floor, that your words, Mr. Speaker, would have to be dubbed by an actor, that you would be prevented from appearing and making your views known in the United States of America.

As leader of the Sinn Fein Party, he represents the will, as has previously been noted, of almost half the population of Northern Ireland; but because he is visible and will not publicly condemn the Irish Republican Army, he has been branded its leader, and therefore dubbed a terrorist.

He has been denied, as has been indicated, a visa to visit the United States of America. We, of all countries of the world, we should be anxious to have those with whom we might agree or disagree come to our shores in a spirit of free debate.

I do not intend to plead Mr. Adams' case one way or the other, but as an American, as a Member of the U.S. Congress, as someone who has sworn to uphold and defend the first amendment and all our Constitution, I believe with all my heart that we should hear for ourselves the basis for the denial of Mr. Adams' visa. All we have been told is that there is information in his file, whatever that is and wherever that is and whoever keeps it, but it has convinced the President ostensibly that he is a dangerous man. Well, there are lots of dangerous people in the world. I think the greatest danger is not being able to hear him.

Mr. Adams has never been convicted nor has he been charged with a crime. He was, however, interned, Mr. Speaker, for 7 months in the 1970's, without ever being charged with a crime, 7 months. That is British justice, and we wonder why the people of Ireland claim injustice. His only crime appeared to be then and now that he is an Irish Nationalist and that he refuses to condemn the IRA.

Americans should be allowed to hear the views of Sinn Fein and its President and make up their own minds.

Dozens of Members of Congress, Republican and Democrat, liberal and conservative, you have seen that tonight, have petitioned the President on numerous occasions for his admittance. The President himself, as a candidate, voiced loud support for and promised action on the Adams visa.

I want to conclude, Mr. Speaker, by saying that it has been said that "in war, truth is the first casualty." Let us do justice to the vision and the wisdom

of our Founding Fathers and Mothers as set forth in that first amendment to the Constitution. Let us put an end to this un-American censorship and restore truth to our immigration policy. Let the intelligent people of America make up their own minds, Mr. Speaker, and Mr. President. Grant Mr. Adams permission to enter the United States.

Mr. NEAL of Massachusetts. Mr. Speaker, I thank the gentleman from Hawaii, and it demonstrates again broad geographic support for this position.

Mr. Speaker, I yield to the gentleman from Washington State [Mr. MCDERMOTT], a classmate of mine who came here via Chicago.

Mr. MCDERMOTT. Mr. Speaker, I want to first commend the gentleman from Massachusetts [Mr. NEAL] on putting together this special order, because I think it is an issue that many of us who have been active in civil rights and human rights around the world have always felt in our hearts that we did not say anything about Ireland. This is a time, I think, when things are opening up that it makes good sense for us to speak out.

The question we have to ask ourselves is how many times have we been told that the problems in Northern Ireland are a dispute between the Protestants and the Catholics? How many times have we seen the issue reported in the press as a religious conflict?

All knowledgeable commentators tell us that this is a dispute of politics, competing interests, competing nationalisms. That, at the core, this is the outworking of the long out-of-date imperialism of the British Empire.

Yes, it is true that most loyalists are Protestant and most nationalists are Catholic. That's a function of history and geography. On the ground, today's dispute is rarely over religious doctrine. In fact, interreligious marriage is now commonplace.

We knew that the differences between Israel and the Palestinians were rooted in religion, but nurtured by political struggle. We refused to accept religion as a justification for oppression, or for violence.

Ecumenical programs and groups holding all manner of religious views are active in the struggle to find a just and peaceful solution to the problems of Northern Ireland. Let us actively avoid characterizing this dispute as a religious one. Let us acknowledge that this misconception will only be perpetuated until we take some personal responsibility for putting it to rest. Let us support efforts by those of good will to find solutions to this tragic political tangle. Let us resolve to help all parties find common ground on which to build a lasting peace.

Mr. NEAL of Massachusetts. Mr. Speaker, I thank the gentleman from Washington.

Mr. Speaker, I yield to another gentleman from Massachusetts [Mr. MEEHAN].

Mr. MEEHAN. Mr. Speaker, I, too, would like to commend my colleague, the gentleman from Massachusetts [Mr. NEAL] for organizing this special order on such an important issue, and also thank him for his assistance to me as a freshman Member of the U.S. Congress.

During his campaign for the Presidency, Bill Clinton stated that he deplored British Government actions to manipulate our judicial system in cases tied to Northern Ireland. He referred specifically to the case of Joseph Doherty, in which the Justice Department, at the instigation of Britain, pursued unprecedented legal positions on the subject of extradition.

So extraordinary were these efforts, that U.S. Federal courts—on more than one occasion—commented adversely on their startling nature. In one case, the court actually characterized as a threat the British-orchestrated suggestion that repeated attempts would be made to get Doherty if requests for extradition were denied.

What troubled Mr. Clinton, and what troubles me, is that this unseemly subservience to the politics of a foreign government was justified by the United States on the grounds of foreign policy. I object. Our policies can stand or fall on their own feet. And who should be granted the power to keep our judicial system from granting the full benefit of our law to anyone who stands at its bench?

Now, however, we must ask the question: Has the President forgotten the matters which so troubled him? I suggest, as a start, that he formally request that the British Government grant Doherty credit for the time he served here fighting extradition. Doherty was subsequently deported and such credit has been refused to date.

And I implore all of us to take as our personal responsibility any future fights to keep foreign governments—friend or foe—from interfering with our judicial system.

Mr. NEAL of Massachusetts. Mr. Speaker, I thank the gentleman from Massachusetts for his comments.

Mr. Speaker, I yield to the gentleman from New Jersey [Mr. MENENDEZ].

□ 2050

Mr. MENENDEZ. Mr. Speaker, I want to thank the gentleman from Massachusetts [Mr. NEAL] for organizing this event. I also want to thank the other Members who are so concerned about the North of Ireland, especially the gentleman from New York [Mr. MANTON] and the gentleman from New York [Mr. FISH], the cochairs of the Ad Hoc Congressional Committee for Irish Affairs.

THE TROUBLES

The North of Ireland is at a watershed moment in its history. A peace

process is underway which may hold the solution to the troubles in the North of Ireland.

The troubles is what the British call the sectarian violence in the North of Ireland which has followed the massive civil rights demonstrations of 1968. And troubles they are; more than 3,000 lives and 35,000 injuries have been claimed thus far.

But the real trouble is the British presence in the North. It has been so for centuries, and it remains so today. Unless the real trouble is addressed, the other troubles will not go away.

THE UNITED STATES AND THE PEACE PLAN

Now, just as the violence is escalating, Sir John Hume, a British Member of Parliament for the Social Democratic Labor Party, and Gerry Adams, leader of the Sinn Fein Party, have drafted a peace plan. This plan promises an end to the violence and the beginning of self-determination and a new day for the people of Ulster. Just as the United States supports the peace plan put forward by the Palestine Liberation Organization and the Israeli Government, so should we support full implementation this peace plan.

Recently, the ability of America's diplomacy and her resolve to act as a world leader has been called into question. One of the ways the United States can answer critics is to lead the effort for peace, justice, and human rights in the North of Ireland. What the United States does diplomatically—or fails to do—during this crucial time, will influence the political status of the North for years to come.

In the wake of the Middle East Peace Initiative, the President declared that to every manmade problem there is a manmade solution. I hope the President would use the good offices of the United States to help solve the manmade problem—the manmade tragedy—in the North of Ireland.

Tonight, I join my colleagues in calling on the President and Secretary Christopher to engage our British friends in a process that would lead ultimately to a satisfactory resolution of this tragedy.

First, the President should make good on his campaign promise of appointing a Special Envoy to Northern Ireland. He does not need British permission to do so.

Second, the United States must practice a policy which equally condemns atrocities on both sides. If we will deny Gerry Adams a visa due to his alleged IRA ties, then we should also deny a visa to the Reverend Ian Paisley, the firebrand British Member of Parliament who has alleged ties to Protestant terrorist groups in the North. These two short steps would go a long way toward letting the British know that we mean business.

Third, just as the United States supports the peace plan put forward by the Palestine Liberation Organization and

the Israeli Government, so should we support full implementation of the Hume-Adams peace plan.

BRITISH POLICIES

And yet, the going won't be easy. The North of Ireland has been dominated by Great Britain for centuries and has been governed and occupied by her since 1922. Today 17,300 British troops are on patrol in the North. I have said it before and I will say it again tonight: There will not be peace in the North of Ireland until the last boot of the last British soldier leaves the North of Ireland.

Unlawful British rule is supported by an entrenched system of justice that is best described as a system of injustice. A juryless, one-judge Diplock court system denies citizens the basic right to trial by a jury of their peers—something we and British subjects outside Northern Ireland take for granted.

I personally observed this system of injustice at work last September during a personal visit to Belfast, Northern Ireland. Along with the group, "Voice of the Innocent," I witnessed the preliminary presentation of the prosecution's case in the trial of the Ballymurphy Seven.

Seven boys from the Ballymurphy section of west Belfast, ages 17 to 21 at the time of arrest, are on trial for the dubious charge of "suspicion of attempted murder." They are charged in connection with a coffee-jar bombing in Belfast on August 2, 1991, in which no one was hurt. There is not a shred of forensic evidence against them, nor any eyewitnesses. All of these boys except one have been held without bail since August 1991. In every case, prosecution is based on confessions that each boy claims was forced through physical or mental torture during interrogations in which no attorney was present. From the moment these boys were lifted, or arrested, they entered a lose-lose situation.

Unlike American citizens and British subjects outside of Northern Ireland, Catholics in Northern Ireland are at a disadvantage when they choose to remain silent after being arrested. The Diplock judges may presume guilt when a person refuses to answer questions. Nor do they have attorneys present during interrogation.

These unjust practices violate international fair standards. Sadly, there is an even darker side of Britain's policy toward Northern Ireland. Emergency laws permit the British Army and security forces to harass and abuse civilians, including women and children—in many cases with impunity.

I will cite just one example. The respected human rights group, Helsinki Watch, in its 1993 report found that children were, frequently stopped on the street, kicked, hit, insulted, and abused by security forces. Children under 18 and adults were threatened,

tricked, insulted, and frequently physically assaulted by police during interrogation.

Beating up these youths, torturing them in prison, forcing confessions from them for acts they did not even commit—these actions not only dash the hopes and destroy the dreams of an entire generation of Irish youths, but it also helps the IRA to recruit many of them.

Recently a former British Army captain and intelligence officer, Fred Holroyd, told a group of Members of Congress that the British are pursuing a hidden and dirty little war against Catholics in the North. Captain Holroyd explained that the M16 British security forces in which he served are vital to a strategy of aiding and abetting the terrorist acts by Protestant extremists. For voicing his conscience, Captain Holroyd was smeared and dismissed from the British Army.

The British continue to prefer bullets to dockets to mete out justice in Northern Ireland. British Members of Parliament, British courts, and the British press all corroborate this. For example, last month, Ken Livingstone, a British Member of Parliament, testified in San Francisco that all Members of Parliament are aware that British security forces in Northern Ireland have a shoot-to-kill policy toward Irish nationalists. This kill-them-first-sort-them-out-later policy is barbaric by any standard.

Mr. Livingstone's colleague, MP Bernadette Devlin McAliskey testified in the same courtroom that she had been told by the Royal Ulster Constabulary [RUC], the Northern Irish police, that she risked assassination if she came to San Francisco to testify.

END THE CRYING GAME

Despite these blatant injustices, I cannot condone terrorist attacks on innocent civilians by anyone, anywhere. So, I cannot and I do not condone the violence of the IRA. But I cannot either condone terrorist attacks by Protestant extremists, with the complicity of British intelligence, upon Catholics in the North of Ireland.

If she is to help the people of Northern Ireland, America must stop looking at Northern Ireland through British lenses. Instead we must look at Northern Ireland through the sure lens of peace, justice, and respect for human rights.

One of the pillars of this administration's foreign policy is human rights. All over the world we defend and promote human rights. If this pillar is to remain standing, if the United States wants to remain credible as the world's human rights champion, then we must stand up for human rights whether it is with a friend or a foe.

We must insist to our British friends that it is time to right the wrongs in Northern Ireland. By not standing up to the British as we ought to in this

matter, we are participating in their legacy of disgrace.

For the people of North of Ireland the troubles are indeed a crying game. For the British Government those same troubles are a crying shame. Tonight I call on the President to help put an end to the suffering and the pain in the North of Ireland.

Mr. NEAL of Massachusetts. Mr. Speaker, just weeks ago I stood on the south lawn of the White House and watched Yitzhak Rabin, the Prime Minister of Israel, shake hands with Yasser Arafat, and I never believed in my lifetime that I would witness such a historic moment. But there is a simple truth tonight, and that is that the history that has unfolded in front of us over the last 4 years across this globe has stood still in Northern Ireland because the forces of 800 years are still at work.

There is another harsh reality tonight, and that is the simple truth that partition does not work. It did not work in Korea, it did not work in Vietnam, and it did not work in Pakistan and India, and it certainly does not work in those six tiny provinces of North Ireland.

Ireland's friends in the United States share the priority that is now emerging, and that priority is peace. It is needed now. Peace in Ireland would transform the political landscape. It would usher in a new era with new political arrangements for the island where its relationship with Britain could be successfully developed.

Let nobody doubt the sincerity of those of us in the Congress who are concerned with Ireland and its people. We have a passionate interest in the well-being of the people of Northern Ireland, fair treatment of the people of Northern Ireland and in freedom from discrimination and the desire to ensure that human rights violations do not occur. I believe, in addition, that peace will improve the prospects of achieving a durable political settlement, and I cannot think of anything that would be more roundly applauded here than to see all Irishmen sitting down in an environment of peace to discuss their political future.

In the United States we follow developments in Ireland with deep interest and deep concern, and President Clinton has recently welcomed the efforts to reinvigorate the negotiations for peace in Northern Ireland. He said that the United States stands ready to support that process in any appropriate way. The President is to be commended for his interest. His words of encouragement and support strike a deep chord in Ireland. The British Government listens to Irish-Americans and to those of us in this Congress who are concerned about Irish issues.

I think our message is a clear one. It is that peace processes must be given every opportunity to develop. The Brit-

ish should know that our interests will not cease and our concern will not ease until such time as there is a fair, balanced and lasting solution to the continuing tragedy of Northern Ireland.

Mr. DORNAN. Mr. Speaker, if the gentleman from Massachusetts [Mr. NEAL] would yield briefly, I just found out that my distinguished colleague has about 4 minutes left, and, before it is all eaten up, Mr. Speaker, I want to associate myself with all of his remarks.

I agree that for particularly bright, advanced people partition is even more unseemly and unworkable than anywhere else in the world. I was shot with a rubber bullet there on February 20, 1992. That is 2½ years ago. I was there in May of 1969 when all of this began coming back from Biafra. I have gone up the Shankill. I have talked to people on both sides in every neighborhood, and they are dying for a solution because they miss their old friendships. It is more an economic struggle than a religious one. With each passing year it becomes more inane. Too many people are frozen in concrete in London. We need such imagination.

Mr. Speaker, I appreciate all of the insights and imagination the gentleman from Massachusetts has brought to this, and it is an honor to be associated with this excellent special order tonight.

Mr. NEAL of Massachusetts. Mr. Speaker, I thank the gentleman from California [Mr. DORNAN] for his unyielding support on this issue.

Mr. Speaker, tomorrow Foreign Minister and Tanaiste Dick Spring will be visiting Washington. Those of my colleagues who are interested in Northern Ireland look forward greatly to hearing from him on how he sees the opportunities for peace on the political horizon, but I want to close this special order, Mr. Speaker, in the manner that I began this special order and to thank my colleagues from across this Nation tonight that have stood with us in support of peace in Northern Ireland and, hopefully, the eventual unification of those counties with the Republic of Ireland.

□ 2100

In the last 4 years we have seen Yitsak Rabin shake hands with Yasser Arafat on the White House lawn; we have seen the Berlin Wall come down and Russian troops leave Lithuania; we have seen the Soviet Union disintegrate, Marxism die, and the yoke of that Marxism being lifted from the necks of the people of Eastern Europe. There have been free elections in Nicaragua and El Salvador during this period of time.

Why is it that after 800 years, we cannot see a peaceful settlement in this tiny part of northeast Ireland, people that comprise 1.5 million in number, in a geographic region the size of the State of Connecticut?

Mr. Speaker, I want to thank all Members tonight for their attention to this matter and the vigor which they have brought to this issue.

Mr. HOKE. Mr. Speaker, during the recent July congressional recess, I fulfilled a campaign pledge made to West Side residents of Irish descent who are concerned about the state of affairs in Northern Ireland. With the assistance of the U.S. State Department and Cleveland City Councilman Pat O'Malley, I was privileged to gain an extraordinary exposure to Ireland's expansive landscape of political views and opinions during a visit to Belfast at my own expense from July 6 to 10.

I met with party leaders representing the entire spectrum of major political parties from Gerry Adams, leader of pro-unification Sinn Fein to Ian Paisley, the leader of the Democratic Unionist Party [DUP] which represents the most extreme loyalist, pro-British element.

Unlike our American political parties, the political parties in Northern Ireland are not distinguished primarily by their commitment to economic or social principles. Whereas our political parties debate ideological differences over the legitimate and appropriate size of government, the role of regulation, how much we should tax ourselves, and so forth, the Irish parties are distinguished first and foremost by their various commitments to the future geopolitical status of Northern Ireland.

At one end of the political spectrum are the pure Republicans, the Catholic faction which demands that Northern Ireland become part of the Republic of Ireland to the south. This is the position held by the Sinn Fein party, which received about 12 percent of the popular vote in the last election. At the other end of the spectrum is the Protestant faction which believes Northern Ireland should always be a part of Britain. They are represented by the DUP which received about 17 percent of the vote in the last election. In the middle are three other parties which have the majority of popular support, although none has a majority by itself. The Social Democratic Labor Party [SDLP], led by John Hume of Derry, is the pro-nationalist, pro-unification party that gathered about 22 percent of the vote. The Ulster Unionist Party is a pro-union centrist party with 29 percent of the vote. Finally, there is the appropriately named Alliance Party, the only political party with substantial numbers of both Catholics and Protestants, which predictably is also the smallest party and received only about 8 percent of the vote.

In addition to meeting with political leaders, I met with representatives of the court system, the Royal Ulster Constabulary, and the Northern Ireland Office—the British government's representative. I also met with Jean Kennedy Smith, the United States Ambassador to the Republic of Ireland, as well as a host of community development, socioeconomic, and business groups.

It's been said the first indication that one is beginning to understand the problems in Northern Ireland is a sense of complete confusion. By that standard, I'm fast becoming an expert. The fact of the matter is there are no simple solutions to these very complex problems. It is at once both axiomatic and profoundly unfortunate that if the problems of Northern Ireland were simple and lent them-

selves to simple solutions, they would have been resolved long ago.

Lending to the confusion is the practice by nearly every political leader I met in Ireland of using historical events to prove his or her point, reaching back as far as needed to illustrate it. To put this in perspective, bear in mind that Saint Patrick converted the Celts to Christianity in AD 432 and the British came to northern Ireland nearly 400 years before Columbus sailed for the Americas.

It is not unusual for Americans visiting Northern Ireland to be struck by the similarities between Ireland's current situation and our civil rights movement of the 1960's. The primary difference being that Ireland suffers not from a history of racial discrimination, rather from a history of religious discrimination, specifically discrimination against Catholics by Protestants. What is unfortunate is that the Irish have not yet benefited from the lessons of the politics of inclusion that we have here in the United States.

Instead of including all political groups with popular support in the political process, the British government has actually aggravated the natural political polarities by excluding those of dissenting views, specifically the Sinn Fein party. To the extent that all groups are brought within the process and thereby made responsible and accountable for outcomes, society succeeds in pulling dissenting elements into the social and political mainstream. Certainly the past 250 years of American history convincingly illustrate this point.

If I had to single out one flaw in British policy toward Northern Ireland over the past 20 years, it would be its ignorance of this political truth. By way of example, I had the privilege of touring the Conway Mills Project, an established community center that was founded by Father Des Wilson in 1982, a supporter of the re-unification of Ireland. It has applied and been turned down for grants from the international Fund for Ireland [IFI], a program for commercial development in Ireland that receives half of its funding from the United States and the other half from the European community.

Father Wilson is working in the poorest section of Catholic West Belfast on a number of initiatives designed to improve peoples' lives through economic development, education, and hunger relief. The Conway Mills Community Center includes classrooms and a small business incubator. Actively involved in special community projects, it also has a small theater, a day care center, and an inexpensive snackbar. Frankly, it reminded me of the community center in the Cleveland neighborhood of Tremont.

But the British government had indicated to the IFI that it did not want Conway Mills to be funded in any way because of the politics of Father Des Wilson. I personally spoke to the Director of the IFI and requested that the Conway Mills grant request be reconsidered. Bear in mind that 50 percent of the IFI's funding is appropriated by the U.S. Congress. I explained that I thought it was not only important to support Conway Mills because of the value of its programs, but equally important to draw it out of the underground and into the mainstream. This will profoundly impact not only how the individuals involved with Conway Mills

are viewed by outsiders, but how those individuals view themselves and their own relation to the larger society in which they live.

Because of the polarized environment and rigid positions held by Ireland's parties, I'm relatively discouraged regarding the prospects for near-term reconciliation of these differences. That notwithstanding, I was tremendously impressed and inspired by one group with whom I met, the Northern Ireland Commission for Integrated Education (NICIE). Led by Fiona Stephens, this is a parent-driven initiative which has established integrated schools with student bodies composed of about equal numbers of Protestants and Catholics. It is tragic that the vast majority of the people of Northern Ireland grow up never meeting or getting to know people of different religious faiths except in brief commercial transactions, feeding the development of deep-seated prejudice at a very young age. NICIE has only been around for a few years, yet it already has over 18 schools with 4,000 students. While this represents only 2 percent of Ireland's student population, it was the most hopeful indication I saw that these differences will eventually be worked out.

The untenability of the British position is that they built a political and economic system which exploited the religious differences and rivalries between two communities in order to serve and maintain their own colonial purposes. Now in a vastly changed 1990's European Community, Northern Ireland finds itself saddled with the rotting remnants of an unjust foundation. No lasting and equitable solution will be possible without the full inclusion and participation of all political parties. The British and Dublin Governments are clearly in the positions of leadership to initiate a new era of reconciliation and cooperation in which the politics of pride and paranoia are replaced by the politics of inclusion and reason.

Mr. CONYERS. Mr. Speaker, I rise today to urge the Governments of Ireland and Great Britain to work more actively for a true and lasting peace in Northern Ireland. The governments in both Dublin and London must work with political and sectarian parties in Northern Ireland to move beyond the senseless violence toward establishing a reconciliation process.

For more than 2 decades, secular violence has torn Northern Ireland, leaving over 3,000 dead. The last 2 weeks have been among the bloodiest in the conflict, claiming 24 victims of ruthless bombings and reprisal shootings. These indiscriminate attacks are deplorable, and cannot be justified.

At the same time, I commend the courage and commitment of Sinn Fein Party president Gerry Adams and Social Democratic and Labour Party leader John Hume who have continued to meet secretly in an attempt to iron out a peace initiative. Unfortunately their efforts have been stymied by the government of Prime Minister John Major, who refuses to accept any solution sought by Mr. Adams unless he renounces violence despite his continued denials of any involvement in terrorism.

Like most of my colleagues here, I do not condone violence by anyone. The attacks of the past 2 weeks must not continue. However, it is important to point out the Amnesty International Report for 1993 which attributes

human rights violations to Protestant and Catholic extremists and the Government of the United Kingdom. Now is the time for all groups to end violence, and for all groups to sit at the peace table and agree to a fair and lasting peace in Northern Ireland. If Israel and the Palestinians can come to terms on self rule, certainly the gap between the parties in Northern Ireland can be bridged.

Mr. Speaker, I also wish to take this opportunity to urge President Clinton to follow through with his campaign promise to appoint a special envoy to Northern Ireland. The United States has taken an active leadership role in resolving conflicts around the globe. From El Salvador to Israel, American administrations have used their influence to bring ideological enemies to the bargaining table. Now is the time for President Clinton to afford Northern Ireland the same opportunity. As with the Middle East peace process, perhaps an outside mediator can help the sides come to an agreement by bringing fresh thoughts and viewpoints to the table. Certainly it cannot hurt.

All of us, especially John Hume and Gerry Adams, can take consolation in the words of John Pentland Mahaffy, who once said: "Ireland is a country in which the probable never happens and the impossible always does."

Mr. KENNEDY. Mr. Speaker, I want to thank Representative NEAL for organizing this special order tonight. I think it is important that those of us in this body who have been concerned with peace and justice in Northern Ireland gather to recommit ourselves to this search.

At the end of October a cycle of extremist violence, including the IRA bombing in Belfast and a number of shootings by Loyalist paramilitaries, plunged Northern Ireland into the bloodiest period in half a decade. One of those killed by the IRA bomb on October 23 was Leanne Murray, a 13-year-old girl on a shopping errand for her mother. Leanne had spent this past summer in the United States on a program where she befriended Roisin Coulter, a Catholic girl also from Belfast.

The two were unlikely to meet each other in Northern Ireland, where Catholic and Protestant communities are segregated in housing and education. Leanne's death is particularly painful because of the hope and basic humanity she had shown in trying to reach across the divide that runs through her homeland.

When loyalist paramilitaries opened fire a week later on a Halloween party at a bar in Greysteel, they were attacking not only individuals, but also the hope embodied in the simple but profoundly important effort of their Catholic and Protestant victims to find a way to live their lives together when so much around them would pull them apart.

I have joined others in condemning the death and destruction brought by violence from both the IRA and the loyalist bands that have achieved the macabre distinction of claiming even more victims than the IRA this year and last.

But this tragedy would only be deepened if recent attacks are allowed to undermine the prospects for peace. We will do little to advance the cause of peace if the cycle of violence is followed by nothing more than the usual condemnations. If the violence is to be

brought to an end, then every opportunity for dialogue must be explored.

Several people tonight have spoken about the initiative that has been crafted by John Hume and Gerry Adams. Hume and Adams argue that the proposal they have crafted could lead to dialogue involving all the parties, including Sinn Fein, in a situation without violence. This opportunity must not be missed. In measuring the proposal it is essential to set aside the question of whether it fits with our longstanding positions on the issue of Northern Ireland. We must ask instead whether it can open a process leading to a desperately needed peace.

Today, once again, I would urge the British and Irish Governments to search for a way, whether in public or private, to adopt a more welcoming posture to the Hume-Adams initiative. A more generous approach by those governments would involve some political risk. But Mr. Hume and Mr. Adams are putting themselves at personal and political risk in making their proposal. Anyone who sets this proposal aside must take upon themselves the responsibility of putting forward a concrete and believable plan to achieve the same ends.

If the British and Irish Governments are unsuccessful over the coming weeks in restarting broad-based talks that can lead to a durable peace, then I think it will be time for the United States to seriously consider the appointment of a special envoy to Northern Ireland. This would be a clear signal of U.S. commitment to bringing about a solution to the conflict. The Envoy could encourage negotiations among all parties who agree to end the use of violence and could use his or her good offices to facilitate those negotiations as a neutral party.

While our attention has been riveted in the past weeks on the need for peace in Ireland, we must never lose view of the need for justice as well. The tragedy of Northern Ireland today is not just the extremist violence. The tragedy is also the discrimination and deprivation that mark the lives of the Catholic community in the North day in and day out.

As we labor to keep open the path to dialogue and peace, I would urge my colleagues to involve themselves as well in the struggle for equal justice and fair employment in the North.

Since the partition of the island of Ireland in 1921, the government of the United Kingdom has had the responsibility of ensuring fundamental human rights and civil liberties for the people of Northern Ireland. Instead, that government has contributed greatly to the systematic denial of these rights through perennial renewal and reinforcement of "emergency" legislation.

Under these conditions too many residents of Northern Ireland are denied basic human liberties and rights, including freedom of speech, freedom of the press, protections against self-incrimination, the right to trial by jury and guarantees of due process of law. The denial of these rights, and the misapplication of justice fuel the cynicism of those who resort to violence. A system of justice that cannot win the confidence of every community in the North undermines those who advocate political and peaceful means to seek justice.

I would invite my colleagues to join me in a resolution that calls upon the President to urge

the British government to move toward reconciliation in Northern Ireland by initiating a process for the declaration and constitutional incorporation of human rights and civil liberties, similar to the United States bill of Rights and European Convention on Human Rights. The resolution also calls upon the President to urge the European Community to take action to ensure that the Government of the United Kingdom is brought up to par with the rest of the community's member nations in the oversight and protection of human rights and civil liberties in Northern Ireland.

Finally, I think it is essential that we keep our focus on the fundamental problem of employment in Northern Ireland. The Catholic community has known horrendous discrimination for decades. Catholic unemployment remains at 18 percent, twice the level in the Protestant community.

Friends of Ireland in the United States must keep up the pressure for specific goals and timetables for recruiting Catholics and women in the North's civil service. Because investment with fairness must be part of our nation's policy for bringing peace with justice to Northern Ireland, we should seek expanded support for the MacBride principles campaign and continue our efforts to ensure that firms who receive United States Government contracts make every affirmative effort to break down the discrimination in recruitment, training, and promotion. In our discussions with the British and Irish Governments we must push them to target investment in the North to those areas that have suffered generations of high unemployment.

The need for peace in Northern Ireland is urgent. The agenda for justice is no less pressing. At this time of sorrow but also of enormous hope, I am proud to stand today with my colleagues in the Congress, and with the people in Northern Ireland, in their courageous struggle for justice and peace.

Mr. FISH. Mr. Speaker, I would like to thank my colleague Mr. NEAL and the American Irish Political Education Committee for organizing this opportunity to speak about the need for action to promote peace and justice in Northern Ireland.

As has been stated this evening, the theme for this week is "Peace Is Possible. I Can Help." This is a motto I have followed not just this week, but every week for the past 15 years.

My first contact with Ireland came in the early 1950's when I served as a Vice Consul of the United States Foreign Service in Dublin. I then returned in 1978, as the ranking minority member of the Immigration Subcommittee, to investigate reports of visa denials to British subjects of Irish descent by United States consular posts in London, Dublin, and Belfast.

That Judiciary Committee trip forever changed my outlook on Northern Ireland. Despite the thorough briefings we had on the situation prior to our departure, we were totally unprepared for what we saw during our 4 days there. We were especially struck by the violation of human rights the people of Northern Ireland are subjected to day in and day out.

Since that time, I have worked with my colleagues as one of the cochairs of the Ad Hoc Committee on Irish Affairs, to realize the goals of peace, justice, freedom, and an end to all discrimination in Northern Ireland.

The ad hoc committee was extremely encouraged by five promises candidate Clinton made to the Irish-American community during his campaign: First, to support the MacBride Principles—on the Federal and State levels—and other efforts to end anti-Catholic discrimination in the workplace; second, to appoint a special envoy to Northern Ireland to facilitate the peace process; third, to implement an equitable visa policy which does not deny protection to Irish political refugees, including granting a visa to Sinn Fein President Gerry Adams; and fourth, to improve human rights and help bring about a lasting solution to the strife in Northern Ireland. To date, unfortunately, President Clinton has failed to take action to fulfill these important pledges.

Certainly a solution which has eluded men not just for decades, but for centuries, will not be easy. But peace and justice in Northern Ireland are possible if leadership is exhibited, policies are developed to end the great economic injustices there, and all violence is ended. President Clinton has an opportunity to exhibit the necessary leadership by appointing a special envoy, granting a visa to Gerry Adams and advocating for passage of MacBride Principles legislation.

Peace is possible, and I will help by continuing to press the President to fulfill these promises.

GENERAL LEAVE

Mr. NEAL of Massachusetts. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the subject of my special order tonight.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

NAFTA FACTS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California [Mr. DREIER] is recognized for 60 minutes.

Mr. DREIER. Mr. Speaker, I have taken out this special order this evening to talk about an issue which we will be voting on in this House within the next 48 hours. In fact, I hope that within 48 hours we will have cast our votes here and put over the top the initiative which is designed to break down tariff barriers, expand export opportunities for United States-manufactured products, to expand opportunities for United States consumers, to bring down the magnet which draws people illegally from Mexico to the United States, and I hope very much we will be able to pass the NAFTA.

We have for the past several weeks and months been talking regularly about it here during these special orders. Over the last several weeks I have been sending out to my colleagues facts on NAFTA. I do not mean f-a-x, I mean f-a-c-t-s. Because this debate has really boiled down to basically fear versus facts.

I think we all saw that in the debate held on the Cable News Network the other night. We have seen a wide range of debates on this issue, and we know that as the American people learn more and more about the North American Free-Trade Agreement, they naturally become more and more supportive of it.

This afternoon we got the word from the Washington Post-ABC News Poll which showed that the American people are equally divided. It was 42 percent that support the NAFTA, and 42 percent oppose it.

Contrary to what many of us have found, people often say because the opponents have been so vociferous in their opposition and the noise level has been very high, but the fact of the matter is, when the American people learn what this really is, they move toward support of it.

We found, of course, the same thing taking place here in the U.S. Congress. I am pleased to say that as I have spoken with many of our colleagues, they often say that it is the right thing to do, but they are still having a difficult time facing the politics of the North American Free-Trade Agreement.

I am looking forward to being joined by a number of my colleagues who have indicated an interest in speaking out here on the floor again tonight, as they often have. I would like to take just a few minutes to go through a number of the facts that I have been sending out every day. I have a stack of them here, and I will not go through all of them, but I would like to refer to a few of them to underscore again that this is an argument of facts versus fear.

I would like to begin by referring to NAFTA Fact No. 1, in which I said the latest evaluation of the Organization of Economic Cooperation Development, known as the OECD, ranks Mexico as the world's 13th largest economy and the 10th largest consumer base.

Of course, the reason I mention that is that when we heard Mr. Perot in the debate the other evening, he said there are 85 million people in Mexico who are so poor they cannot afford to buy anything. The fact of the matter is, Mexico ranks as the 13th largest economy and the 10th largest consumer base.

NAFTA Fact No. 2: The congressional Office of Technology Assessment in October of 1992 released a study which found that it was cheaper to build a car in a United States auto plant than in a Mexican auto plant. That is contrary to what so many people have said. They say all of these cars are being produced very cheaply in Mexico. The fact of the matter is, the cost of building the average automobile in a United States plant is \$8,770; the cost in a Mexico auto plant is \$9,180. That is a fact about NAFTA.

NAFTA Fact No. 3: Today Mexican tariffs on chemicals and petrochemicals average 15 percent, while Amer-

ican tariffs average just 2 percent. Both will be phased out to zero under the North American Free-Trade Agreement, with Mexico giving up seven times more production than the United States. That is a fact about NAFTA.

NAFTA Fact No. 4: In 1992, the United States exported \$13.5 billion of capital goods to Mexico, which accounted for 33.6 percent of all American exports to Mexico. The reason I say that is we so often hear of our colleagues decrying the fact that so many capital goods are going down to Mexico. But the fact of the matter is, in comparison, capital goods account for 58.5 percent of United States exports to Canada, 53.5 percent of exports to Germany, 53.5 percent of exports to Australia, and 32.2 percent of exports to Japan.

Basically, what we have seen is that the argument that has been provided about this tremendous flow of capital goods to Mexico from the United States is not as large as it is to many other countries around the world, and, quite frankly, it is not necessarily a bad thing. That is a fact about the North American Free-Trade Agreement.

NAFTA Fact No. 5: A bipartisan group of 276 leading American economists, including 12 Nobel laureates in economics, have written the President in support of the North American Free-Trade Agreement. In their statement they say the agreement will be net positive for the United States, both in terms of economic employment creation and overall economic growth. That is a fact about the North American Free-Trade Agreement.

NAFTA Fact No. 6: The Economic Policy Institute, which is a think tank, released one of the few studies that predicts that NAFTA will hurt our economy. But the Economic Policy Institute received almost all of its funding from large national unions, and it has six union presidents on its board of directors.

Now, we all know where organized labor stands on this issue. They have come out in opposition to it, and they have funded the one major economic study from the Economic Policy Institute which has come out in opposition to the North American Free-Trade Agreement. That is a fact about NAFTA.

NAFTA Fact No. 7: No provision of the North American Free-Trade Agreement requires the United States to change or compromise truck safety standards, weight limits, vehicle size restrictions, or operator license requirements. We continue to hear from many people that what would happen under NAFTA is we would see all these old heaps roll across the border and come in and create accidents here in the United States. But it is a fact that any truck that comes over has to comply not only with the standards for the trucks, but the driver must comply

with all of the operator standards that we have here in the United States. That is a fact about the North American Free-Trade Agreement.

NAFTA Fact No. 8, which is a very important one for us to recognize, Mr. Speaker, and that is that during the negotiations on the North American Free-Trade Agreement, the Bush administration held over 1000 meetings and briefings with Members of Congress and staff, private sector advisory committees, and trade associations.

So many people have said that the NAFTA is something that is being rushed through. As my friend from Tucson knows very well, I was privileged to join with him six and one-half years ago introducing a resolution calling for the breaking down of tariff barriers between the United States and Mexico.

I am happy to yield to my friend.

Mr. KOLBE. I appreciate the gentleman yielding. I think you make a very good point and one that I think our colleagues ought to pay special attention to, because one of the arguments that we hear most frequently from those who are opposed to NAFTA is why is this thing 2000 pages long? Why is it so complicated?

Of course, the answer is because, unfortunately, our tariff laws are very complicated. They refer to every single item that might be sold or traded, and it refers to what levels of tariffs we have.

So we are taking down these tariffs. So it does take a lot of language, a lot of pages in a piece of legislation, in order to do that.

But I think my friend made a very good point, and that is that there has been a tremendous amount of consultation on this. I was a part of one trip that went down to Mexico with our then United States Trade Representative, Carla Hills, which included a whole lot of the industry groups, a whole lot of the advisory groups.

□ 2110

And there were literally thousands of people that were advising the U.S. Trade Representative on this and talking to the Members of Congress as we went through this process so there was input all the way along the line. I think that is one of the really misunderstood things about the fast track process. It is not fast. It is called fast track, because at the end of it, once it is negotiated, you have a single vote. And that is for very logical reasons, so that when the agreement is done, both sides know the agreement is done and either there is going to be a yes or no to that. It is not going to be picked apart. But there was ample consultation with Members of Congress.

I know that Ambassador Hills was coming up here as often during the final months of the negotiations, as often as 15 and 20 times a month to

talk to Members and groups about this so it was not as though there was not consultation, nor that interest groups were involved in this.

Mr. DREIER. Mr. Speaker, I thank my friend for his contribution. We have got to remember that fast track passed this House 2½ years ago.

Mr. KOLBE. May 1991.

Mr. DREIER. We have seen a long negotiating process, and I believe it is somewhat disingenuous of many of the opponents of NAFTA, who have continued to argue not this NAFTA, we had over 1,000 meetings held by the negotiators with Member of Congress, private sector organizations. They had, as my friend says, all kinds of input in the negotiating process as it proceeded. And we hear people say, throw this NAFTA out.

My response is, put together a North American Free-Trade Agreement that will have the support of Jesse Jackson and Pat Buchanan, of Ralph Nader and Ross Perot, of Jerry Brown.

As you look at the people who have been opposing, the coalition that has been opposing this, it would be virtually impossible to strike an agreement that would have the kind of input that the Bush administration put into the North American Free-Trade Agreement. I think that has to be recognized to those who continue to say, as we often see in the posters behind these anti-NAFTA rallies, not this NAFTA.

Mr. KOLBE. I think that is an excellent point and one that I think needs to be emphasized. That is another one of the great myths that I think we are hearing from people.

I think, as you suggested, it is very disingenuous when people say, I am really for free trade; I am really for a North American Free-Trade Agreement. It is just this agreement I do not like.

They know perfectly well that there is not going to be another agreement. There is not going to be another agreement in a generation, in probably in the lifetime of you or me or most of the people that might be listening this evening or of our colleagues.

The reason for that is fairly simple. A tremendous amount of political compromises and sacrifices and give and take went into this agreement on both sides, and if we are to say no to this, if we are to slap the Mexican Government and the Mexican people in the face by saying, we negotiated this, now we are saying no to it, it is politically not realistic to assume that the Mexican Government would turn around, having been slugged in the face, and say that was so much fun, let us try it again.

There is not going to be another agreement.

Mr. DREIER. The fact of the matter is, there are many people who stand up there under a poster that says, "Not this NAFTA," who admit that they want no NAFTA. There are a few peo-

ple in this House who have said they are protectionists and they do not want to see us expand trade. And those are people who have stood under the sign that says, "Not this NAFTA."

Mr. KOLBE. My colleague is quite right. Many of these people do not want to have a North American Free-Trade Agreement, they are just opposed to a Free-Trade Agreement.

Mr. DREIER. Mr. Speaker, I am happy to yield to my friend, the gentleman from Hickory, NC [Mr. BALLENGER], who has been a strong advocate of the North American Free-Trade Agreement, who has fought for human rights and political pluralism and free market throughout Latin America, and his efforts on behalf of NAFTA will finally help us reap the benefits of the many years of effort that he has put into trying to bring about free and fair elections in Latin America.

Mr. BALLENGER. Mr. Speaker, I thank the gentleman for yielding.

I would like to tell the folks back home that basically in my real life, before I came up here, I was a manufacturer who supplied packaging to the textile industry. And what really surprises me is for Ross Perot to come out and say, after NAFTA, there is going to be this great sucking sound.

My company has been supplying the textile industry for 40 years. And for 40 years, each year we lose another customer, another one of these sweater plants or dress plants. They do not go to Mexico. Very few of them went to Mexico. The large majority of them went to the Far East.

They are all in Hong Kong, Thailand, Malaysia. Those folks there use their thread, they use their cloth, and they cut it and sew it and sell it in this country for a small amount.

Mr. KOLBE. And they use their packaging.

Mr. BALLENGER. Yes, which hurts terribly.

But in the meantime, suppose NAFTA passes and the jobs that are now in the Far East could be brought to Mexico, because of the fiber arrangements we have. You have to look at it from the viewpoint that I come from. I have got 60,000 textile workers that work in my district. But if they bring it back from the Far East to Mexico and, because of the fiber forward arrangements in that, they would be using our thread and our cloth and creating more jobs in our industry here in the United States.

Mr. DREIER. Of course, it becomes extraordinarily difficult for businesses in the Pacific rim and the Far East and businesses in Europe and any other part of the world that are not part of the North American Free-Trade Agreement to get in. Why? Because the tariff barriers that exist today for the United States, your business is sending products to Mexico, actually, will continue

for those countries in other parts of the world that are not part of the NAFTA.

Mr. BALLENGER. I am not worried about that great sucking sound. Because for 40 years, that sucking sound has been going to the Far East.

Mr. KOLBE. I would like to respond. I think the gentleman from North Carolina has made another very good point that needs to be remembered by our colleagues, and that has to do with specifically with the textile provisions in this bill.

There are provisions that are very, very favorable to the textile industry in this country, because you referred to the fiber forward part of the agreement. Now, that is going to be malarkey or black magic to most of the people that would be listening to this and even to a lot of Members. I think it is important to understand what that means.

When we talk about fiber forward, that means in order for the product to be considered a North American product, and thus be duty free and not have to pay the duty as it moves between Canada, Mexico, and the United States, it must at least have the fabric, the sewn fabric used in it. Now, the cotton can come from another location outside the country, but the fabric has to be made in this country. That means because we have very, very competitive and very low-cost producers of the fabric, because of the, as you well know, because of the capital investment in that, we are going to have a tremendous advantage in using the Mexican labor force in terms of the sewing of these products. We will be supplying the fabric that now is being sewn in the People's Republic of China, and the fabric is being made there as well or maybe the fabric is being made in Taiwan and taken over to the PRC. But we get none of the business now.

Mr. BALLENGER. There is nothing to lose, as far as the textile industry is concerned, as far as this agreement is concerned.

Mr. DREIER. I would like my friend to read this very helpful letter.

Mr. BALLENGER. This came out on November 15, which is a resolution to the Board of Directors of the American Textile Manufacturers Institute and it resolved that its member companies "pledge not to move jobs, plants or facilities from the United States to Mexico as a result of the North American Free-Trade Agreement."

Common sense says, the investment that they have in this country and the productivity of our workers is such that if you remove the tariff barrier, there is no reason to move plants to Mexico.

Mr. KOLBE. I cannot think of anything that might happen that would be a better break on these jobs moving out than to have this arrangement with Mexico that allows us to take ad-

vantage of what we do so well in this country and what Mexico can do so that we can produce shirts and blouses and coats and slacks and raincoats and everything else, and we can produce these goods that we can sell to Europe and we can sell to Japan, and that now we do not have a competitive edge in doing that.

I think there is going to be a tremendous advantage in the textile industry and in the textile and apparel manufacturing industry for the United States.

□ 2120

Mr. BALLENGER. I hate to just use my own industry in my own area.

Mr. DREIER. We do not mind one bit hearing about your industry.

Mr. BALLENGER. My two big industries are textiles and furniture and fiber optics, where we have no problem. But ever since Mexico began being involved in getting into the GATT treaty, they started reducing their tariff, and since 1987, let me just give the growth in our sales just from North Carolina to Mexico in a period since 1987.

Textile products have increased by 946 percent; apparel, even, and that is where everybody says we are going to lose all these jobs, apparel has increased by 523 percent. Furniture, unbelievably, again one of my State's largest industries, 6,800 percent in a period of five years. That is unbelievable growth as far as North Carolina is concerned in shipments to Mexico.

If we remove that last tariff barrier, there is no reason in the world this growth could not continue. It is just unbelievably one of the greatest possibilities that we have, at least as far as North Carolina is concerned, and the country.

Mr. KOLBE. If the gentleman will yield further, it is important that we note that Canada and Mexico are the two largest export markets for the United States textile and apparel products. It is estimated that those jobs or those exports to those two countries support 72,000 textile-related jobs in this country, and that is growing very, very rapidly.

Our exports of fibers, of textiles and apparel, to Mexico have increased by more than 25 percent, on average, every year since Mexico joined the GATT. Compound that, 25 percent each year. It is now more than \$1.5 billion of textiles that go to Mexico alone, so we have a tremendous amount. Canadian and Mexican markets represent more than 28 percent of our total exports in textiles.

Mr. BALLENGER. Our country at the present time, if we did not have the export market that we have, this recession that we are supposedly coming out of right now would have been one of the worst recessions in the history of the country.

Mr. DREIER. We know in this country people working in the export sector

earn 17 percent higher than those who are working in areas that are simply for domestic consumption in the United States.

I am going through my NAFTA facts. Knowing that you were talking about this issue of productivity, I flipped ahead to NAFTA Fact No. 12. It basically states that a study by the Hudson Institute compared manufacturing wages and productivity in the United States and Mexico. The findings showed that United States manufacturing compensation was 4.7 times higher than in Mexico, while United States manufacturing productivity was 4.6 times higher than in Mexico, basically saying that the marketplace is working, here.

The American worker, as my friend, the gentleman from Hickory, is going through his tremendous experience in the manufacturing business, knows that the American worker is far more productive. We are hoping, and if one believes, if anyone here believes in what we have been arguing for the past four decades as a country, encouraging free markets throughout the world, we know that what we are doing is we are getting towards a market level and wage rates are going to increase on both sides, making this a win-win arrangement, which is very positive for us.

Mr. BALLENGER. If the gentleman will yield further, it is not surprising to the two of you that the one organization that should profit more from this whole kit and caboodle is the United Auto Workers, and their workers in Detroit, MI?

My understanding is at this point we ship less than a thousand cars a year, and remove the tariff, we are projecting that we would sell 60,000 cars.

Mr. DREIER. In the first year, the first year projections are that 60,000 automobiles will be sold to Mexico, and according to Robert Holdman, the executive vice president of General Motors, that number will exceed even beyond that in years to come. Why? In Mexico there is 1 automobile for every 123 Mexicans. In the United States there is 1 automobile for every 2.5 Americans.

Mr. BALLENGER. I would ask the gentlemen, have they ever thought of the idea that basically the opponents to NAFTA are looking back, they are looking at the past, they are worried about what happened to them in the past, and nobody is looking to the future?

I think that those of us that are supporting NAFTA are looking to the future and the growth of our country.

Mr. DREIER. We are, and we have been joined by our very able new colleague, the gentleman from Pine Bluff, AR [Mr. DICKEY], who has done a spectacular job in leading his class on behalf of the North American Free-Trade Agreement.

I am happy to yield to the gentleman from Arkansas [Mr. DICKEY].

Mr. DICKEY. I thank my distinguished colleague from Claremont, California. Is that correct?

Mr. DREIER. Yes.

Mr. BALLENGER. The gentleman is close.

Mr. DICKEY. I have something I want to add to this, if I may. Those of us who do not take PAC money are in somewhat of a different position in this discussion than we are in other discussions for these two reasons. One is that there is no influence that can get to us. I think the voters need to know that, that the people who do not take PAC money, the PAC's do not have any way of coming in and saying "We want to collect, or give you a better chance of reelection next time," because we were reelected on the basis of the people's votes and not any of the lobbyists.

A second point is that the reason we do not take PAC money is because we are for the little person. The little person is out there, the average person is out there saying, "I want my Representative to give me a straight opinion, with no reference to what somebody has given him from the northern States or the PAC's or groups of people who have gathered this mass amount of money together."

How does that relate to NAFTA? I want the people of America to know and I want you all to know that it is the average person that I am representing when I am saying I am for NAFTA. It is the people who have jobs, who want more security in their jobs, and people who do not have jobs. Those are the same people that I am trying to represent when I say no to PAC money. I am saying yes to NAFTA. I am saying to those people, they should be given a chance to have better jobs and better opportunities.

There is one other point that I want to make. I have spent some time in athletics, particularly in basketball. I know that when you try to freeze a ball on a basketball team, you lose, usually. You might win that game, but if your attitude of your team is that once we get ahead we are going to hold onto the ball, then you somehow lose the spirit of the team. You lose the competitive edge.

When we try to build a fence around this country and we say we are just going to hold onto what we have, we are going to suffocate our job supply. We are going to suffocate our attitude and our spirit of competitiveness. I believe that is mainly the part that I want to emphasize.

Mr. KOLBE. If the gentleman will yield, a great deal has been made of this issue of PAC money. I really admire the fact that the gentleman does not take any PAC money, that you run your campaign using just individual contributions from citizens. I think that is very commendable.

I think it needs to be pointed out, however, that for those who have been critical of contributions made by political action committees to those who might be in support of NAFTA, that the same can just as easily be said of the other side. I am sure the gentleman is very well aware of that. The labor unions have been very, very strong in their support of those who are opposed to NAFTA. They have given a large number of contributions to Members who are opposed to it.

Similarly, as we know, this morning's Wall Street Journal has a very interesting article about Roger Milliken who is a very famous and large textile manufacturer, and the way that he has consistently been fighting free trade and for protectionism throughout the years with the money that he has used to fund various think tanks and operations here in Washington against free trade.

There are plenty of people and organizations on the other side that have been very free in spending their money to try to defeat this. In fact, I dare say, there is a lot more money out there being spent to defeat this than there is money being spent to try to pass this.

Mr. DICKEY. I think that, too, because in the debate we tried to find out how much Mr. Perot had been spending on this, and I guess to date we do not know, is that right?

Mr. DREIER. He did not answer the question when it was posed to him by Vice President GORE on Larry King Live the other night. Maybe he has provided the answer since then. If he has, I have not seen it.

Mr. KOLBE. The Perot organization has been very careful not to ever, or very clear that they are not going to reveal any of the sources of their money, or how they get it, and where they spend it. I think that is important for the American people. They have become a major player in the American political scene, and yet we have no idea what the sources of their money are, and how they are spending it.

Mr. BALLENGER. He did not bring that material with him. It was one of those things that he happened to overlook, that he was not sure they were going to ask that question, so he did not bring that.

Mr. KOLBE. That is right. He just did not have that information with him, but it still has not been made public.

Mr. DREIER. I am happy to further yield to my friend from Pine Bluff, AR [Mr. DICKEY].

□ 2130

Mr. DICKEY. The other thing I want to emphasize is market share. It is difficult for any country or any business, if you step back one step from that, to try to get a market, a new market, and to try to get one that is free and open.

We have an 85 million person market here that we can service. It is on our

border. We do not have to cross the seas. We do not have to do anything except just lay down the tariffs and cross the border and deliver what goods we have, and what goods we are making in the United States with American jobs.

That is not where it ends though. We can go from there to Central America and to South America, and we have 700 million people who we can start pulling for to lift their standard of living so that we can then sell them more.

I just do not see how we can lose in that situation.

Mr. DREIER. I think my friend makes a very good point on this issue when he raises the point of we can start pulling, because historically there has been more than a little friction between Latin America and the United States of America, and there is a great attempt being made today to unite this hemisphere and the North American Free-Trade Agreement is the first step on that route toward establishing the elimination of trade barriers with Chile, which wants to embark on a free-trade agreement just as soon as we complete the NAFTA, and many other countries in the region. The Andean Pact will be going into effect in 1995 where we will see five Latin American countries coming together in a free-trade area.

Yesterday's Washington Post had a fascinating editorial written by President Gaviria of Colombia who referred to the fact that a free-trade arrangement between a Latin American country and the United States has been extraordinarily beneficial in growth on both sides. That is the example to which we should be looking as we consider embarking on this kind of an agreement.

I am very happy that we have been joined by a friend who traveled with us to Mexico just about a week ago now to talk about this arrangement with business people, American business people in Mexico, Mexican business people, opposition leaders in Mexico and Mexican Government officials, and even consumers in the Wal-Mart store in Mexico City.

I am happy to yield to the gentleman from Texas [Mr. BARTON].

Mr. BARTON of Texas. Mr. Speaker, I thank the distinguished gentleman from California for yielding.

Before I comment, let me just say the excellent leadership that you and Congressman KOLBE have given on our side, and of course Congressman MATSUI, Congressman RICHARDSON, and Congressman GIBBONS on the Democratic side show that this is truly a bipartisan issue, and we are going to work very hard to pass the NAFTA bill on Wednesday.

The item I would like to talk about a little bit is this whole question that has been debated back and forth about either the creation or the loss of jobs. As the gentleman from California [Mr.

DREIER] pointed out earlier this evening, every study that has been done on the job impact, except one, has said there is going to be a positive job creation if we pass NAFTA.

To put that in simple terms, and just to walk through some of the numbers, we have a trade surplus with Mexico this last year. We have data that we exported about \$5.4 billion more in goods and services in Mexico than they exported to us.

Mr. DREIER. To those 85 million poor people who cannot afford to buy anything?

Mr. BARTON of Texas. As you well know, they actually average about \$450 per person.

Mr. DREIER. Is that not more than Japan and Western Europe?

Mr. BARTON of Texas. It actually is, substantially more.

Mr. DREIER. It sounds to me like they are not quite as poor as we have been led to believe.

Mr. BARTON of Texas. That is right. They buy about one-third more.

But the point is if we are already exporting more to Mexico than we are importing, then we are creating jobs in this Nation. And if, as you so well know and the other distinguished gentleman from North Carolina knows, if their tariffs are 20 percent on average and our tariffs are 4 percent on average, if we reduce their tariffs to zero, or in stages, then we are going to export even more. So we have to create jobs in this country. And every study but one, which was primarily funded by the labor unions, has indicated that that is the case, that we are going to create jobs in this country.

So the people who are opposed to NAFTA because they fear they may lose their jobs, and that is a sincere concern, there is no question about that, I think they have a very exaggerated case being made to them about the impact of the loss of jobs. And if in fact they are in an industry that might lose jobs to Mexico, the reality is that if you are trying to produce in Mexico, sell in the United States, as you so well know, and the other gentlemen know so well, they can do that today under the maquiladores program. And a very important fact in the maquiladores program is between 1979 and 1990 the United States lost about 3 million manufacturing jobs. During that same time period we created 16 million net jobs overall, but we did lose about 3 million manufacturing jobs.

The maquiladores plants in Mexico employ 380,000 people, so the jobs that are lost in manufacturing, they did not all go to Mexico. In fact, only 380,000 jobs are in the maquiladores zone right now.

And in spite of the fact that we lost 3 million manufacturing jobs, we actually increased our productivity in the United States in the manufacturing sector. We are the most, as you well

know, the most productive manufacturing economy in the world. We are 30 percent more productive than the No. 2 nation, which is Japan.

Mr. BALLENGER. If the gentleman will yield on that point, while you are speaking of the maquiladores operation, that is 380,000 jobs, according to what you said. But at the present time we are shipping to Mexico right now without removing the barrier that we have and there are 700,000 in this country today that exist because of what we are selling in Mexico.

Mr. BARTON of Texas. And on that basis we are creating jobs, but I am just trying to point out, as you talked about in the opening statements, talking about the facts and the facts of NAFTA, we are a net job creator because of exports to Mexico. The jobs that have been lost in the manufacturing sector have gone all over the world.

We still have the most productive manufacturing sector in the world, and by creating a market, as you so well know, of the 85 million consumers in Mexico, we are going to create even more jobs.

Mr. KOLBE. If the gentleman will yield for one moment, I know we have had others who have joined us here, and I want to get them in on this discussion, but I think there is a very important kernel in what the gentleman has just said there that needs to be recognized.

I am prepared to concede, frankly, that both the proponents and the opponents of NAFTA have used some hyperbole when it comes to the jobs issue. It has been hyped just a little bit, this whole issue, and I think you have to put this in perspective.

Let us say it gains 250,000 jobs. Let us say it loses 500,000 jobs. Do my colleagues know what the average number of jobs that are lost and created each week in the United States is?

Mr. DICKEY. It would be several hundred thousand.

Mr. KOLBE. It is 400,000. 400,000 jobs every week are lost and gained, and we know that because when the number of new unemployment compensation applications rises above 400,000, unemployment goes up; when it falls below that, unemployment goes down.

So, in other words, the net that is changing every week, that is the equilibrium, is 400,000. So even if we are talking about losing 250,000 jobs, and I believe that clearly it is a net job gainer, but even if we are talking about losing that over 5 years, we are talking about 3 days' worth of what the job gain and loss is in this country today.

Mr. BARTON of Texas. If the gentleman will yield, the worst case scenario, the worst case scenario for jobs lost directly attributable to NAFTA is 500,000 jobs lost over a 15-year period.

Mr. KOLBE. That is right. That is why I say I think that point is very important, that when you put it in the

perspective of what is churning within the job market every single week, that it is not that significant. I think it has a tremendously positive effect in terms of net job creation over the long period as it generates more sales, and I think it is a net job gainer. But I think that point needs to be kept in mind.

Mr. DREIER. The economy of Mexico is one-twentieth the size of the United States economy. It needs to be realized that as many people seem to be scared to death of the Mexican economy, we are the largest, most productive economy in the world, and our workers are by far and away the most productive on the face of the Earth. And these figures that we have as facts demonstrate that, plus all of us here represent 600,000 people, and we know that in the districts which we are privileged to represent that we have many of those hard-working, capable people.

Mr. BARTON of Texas. If the gentleman will yield, I think the economy of the great State of California, of which you are I believe one of 52 distinguished Members, is twice as large as the economy of Mexico. That is, your State's economy is approximately twice as large as the entire economy of Mexico.

□ 2140

Mr. DREIER. Our State's economy is actually the sixth-largest economy on the face of the Earth.

Mr. Speaker, I am pleased to yield to one of those 52 Representatives who has been a great leader in the effort to pass the North American Free-Trade Agreement. He represents many union members in his district, and he knows the North American Free-Trade Agreement is going to be a benefit to them, and I am happy to yield to my friend from Long Beach, the gentleman from California [Mr. HORN].

Mr. HORN. I thank the gentleman very much.

There is no question but there is a plus for everyone in this. There might be temporary dislocation, but what gets me as we are coming down here to the wire and going to vote in 2 days on this agreement, and I regard this agreement as one of the two most significant issues of the 1990's that face this Nation, and we are going to step up to the bat and bat a home run for history and the future of this Nation, or we are going to be completely paralyzed by fear and intimidation.

I know that each of us here have been talking to various colleagues in both parties to make sure we have that majority to win this battle for the good of our children, our grandchildren, and those to come.

What I hear as I talk to people are some of the really strangest arguments I have ever heard on any public issue in 35 years. I do not doubt the sincerity of people and all that on the other side.

But a lot of them are making up their mind simply because of political

intimidation. In one case today I heard descriptions of violence in his constituency and threats of that. You know, enough is enough. We have got to rise up, make these decisions based on our conscience, not simply our constituency, and today I have put in the RECORD, because I did not want to put my colleagues to sleep here, a little bit that relates to what we are doing to what Edmund Burke once said in the English Parliament, which every one of us has used, that, "I owe the constituency my judgment, and I do a disservice in essence if I do not provide that judgment."

All of us are going to stand for election in the fall of 1994, and for all of us, this might be an issue. I suspect this will not be much of an issue.

We are going to go on to health care, which is equally, if not more, controversial, and to me it is the other key issue of the 1990's. We have both of them in this particular Congress.

But what worries me is that some people are simply putting their finger to the wind and being swayed by a small group that when you get information out to the full electorate they simply vote for NAFTA.

We saw this in the Gore-Perot debate when there was a shift of 20 points between the people that made a judgment prior to hearing the debate and the people that watched the debate, and then did they change their mind after.

Mr. DICKEY. If the gentleman will yield, considering the Perot debate and considering the fact that we have these people who are so adamantly against our position in this issue, I would like to bring up two things that were not answered in that Perot debate.

One was: What would you add to make this NAFTA better? That question was asked and it hung in that debate, and it still has not been answered.

Second was brought up indirectly.

Mr. DREIER. The response, by the way, was, "Work on it."

Mr. DICKEY. Yes. I think the other part of it was that the 6-month termination was available to us at any time. If it is as bad as you think it is, no answer has been given to that in this discussion yet by the opponents, and all we get is fear and intimidation and threats.

Mr. DREIER. My friend is absolutely right. I think that at this point along the lines of what my friend from Long Beach said, I would like to ask the gentleman from Tucson to report on the town hall meeting he had just this past weekend.

One of the things we found is in going into meetings one would conclude that everyone in the room opposes the North American Free-Trade Agreement. Why? Because the volume level of the opponents is so high, and at this point I yield to my friend from Tucson, the gentleman from Arizona [Mr. KOLBE], to report on that.

Mr. KOLBE. I appreciate your yielding.

The gentleman and I had a little conversation about this.

Obviously I have been a supporter of NAFTA for a long time. It was hardly any surprise in my district for me to be talking about it as I have been for the last several years.

But I felt that it was incumbent to do a town hall specifically on this subject before we had the vote, so I scheduled a town hall last Thursday. I went through a presentation, and actually I thought it was quite good, not only my presentation, but we had products lined up behind us, products from southern Arizona that are exported to Mexico, either distributed through Arizona or manufactured there and sent down there, and then I had a panel of three business people tell us about how their exports and how their business has increased because of doing business with Mexico. After they finished that and I finished my explanation, we immediately launched into a dialog, and there were people all over the room, and there were about 150-200 people there who were standing up shaking their fists and shouting about how bad NAFTA was, as though they had not heard a single word that had been said in its defense there, and this went on and on and on for an hour and a half, and at the end of the evening, I thought that I had better find out here where people really are, because you would have thought there were not five people in the entire room that were in favor of NAFTA.

We took a straw poll, and it was almost 3 to 1 in favor of it.

The problem is that it is the opponents that make all the noise in this thing.

Mr. DICKEY. I think you can hear it in this body right here.

Mr. KOLBE. That is right.

Mr. BARTON of Texas. Take a vote right now.

Mr. KOLBE. While I am on this topic, I wanted to mention one of our colleagues, another Member from the great State of California that I was talking to just a few minutes ago, and he was watching us from his home or from his office, and I am talking about the gentleman from California [Mr. CUNNINGHAM], and he announced that he was going to be in favor of the North American Free-Trade Agreement.

It has been a tough decision for him to make that, because there are a lot of Perot people, a lot of union people down there in the San Diego area that have been against it, but as he said, "I have studied this thing very, very carefully, and I made the decision that I am making," he said, "because I have looked at the facts, and the facts are very, very clear that this works to the benefit of the American worker. It works to the benefit of the American

consumer. It works because it is going to help provide jobs." He said, "I just wish you would convey to our friends over there on the floor that are with you tonight that I have made this decision not as one who was caught by any special-interest group." Indeed, if he was going to cast the easy political vote, he would have been deciding against this. But he came out for it because he recognized that it is in the interests of the American worker and the American consumer, and that is what is going to be good for America in all of this.

I just think that all of us are very appreciative of having the gentleman from California [Mr. CUNNINGHAM] come out in favor of this. We admire his courage that he has shown through the years as a fighter pilot, as a POW, as he has been a great person, and I think that we are very appreciative.

Mr. DREIER. I thank my friend for his contribution and his excellent report on another brilliant Californian who has made a very wise decision.

Demonstrating that this is a bipartisan issue, I am very happy to see that we have been joined by our friend, the gentleman from Texas [Mr. GEREN], and I am happy to yield to him at this time.

Mr. PETE GEREN of Texas. I appreciate the gentleman yielding. I thank him for giving me the opportunity to join my colleagues in this discussion of, I think, one of the most important issues that Congress is going to consider this year or for many years to come.

I just came from my office where I got a call from a constituent. I heard from him what I know many of you all have heard from your constituents. They have example after example of plants that have closed and moved to Mexico, and they say that you cannot be for NAFTA because of this that happened yesterday and the year before and the year before that.

It seems to me that our biggest problem in selling NAFTA is not what NAFTA is going to do but what has happened up until now. All of the economic insecurity out there is really what has stemmed from what has happened pre-NAFTA, not what NAFTA offers.

I wanted to just share a conversation that I had with the former Speaker of the House that I think goes a long way toward addressing some of these concerns. I was talking about this issue with Jim Wright, somebody who certainly has had a long and distinguished record of supporting the labor movement in this country and somebody who strongly supports NAFTA and is working very hard for its passage.

He said, in responding to the concerns that people have had about plants that have gone to Mexico, he said that NAFTA has nothing to do with them. He said that with NAFTA,

plants can go to Mexico, but NAFTA does not affect that decision one way or the other. What NAFTA does, if we pass NAFTA, we will be able to sell American products in Mexico without the high tariffs, the high penalties, that Mexico is putting on American products. That is what NAFTA is all about.

It is about tariffs. It is about penalizing American goods. It is not about whether or not a plant can or cannot move to Mexico. NAFTA does not touch that.

I just wanted to come and join you all after this latest conversation that I had with a constituent, but it is one that I know you all have heard over and over again, and I think Speaker Wright with his distinguished record of support for the labor movement did such a great job of explaining what NAFTA is truly all about.

Mr. HORN. If the gentleman will yield further, I agree with what the gentleman has said, that NAFTA is not responsible, obviously, for the plants that have moved there for the last 30 years.

On the other hand, NAFTA, when implemented, will take away at least one reason why a plant might move to Mexico, and that is it will eliminate the Mexican law that says that if you want to sell in certain areas in Mexico, you must have a plant there.

Am I not correct?

Mr. DREIER. My friend is absolutely correct. There is another reason, and the fact of the matter is, as the gentleman from Texas [Mr. GEREN] has said, the plants have moved to Mexico without NAFTA, and they will move to Mexico with NAFTA.

□ 2150

But we need to realize that contrary to many of the reports that are out there that U.S. businesses move to Mexico to simply use its cheap labor as an export platform to send products back to the United States, that is not the case. Seventy percent of the business that is done by United States-owned operations that are in Mexico is done to take advantage of the Mexican consumer market. Why do they go there to do that? Because the tariffs are so high that they have no choice.

We found that 55 percent of the items that are on the shelves of the Wal-Mart store are U.S.-manufactured products. But the prices of those products in Mexico are sometimes 3 times greater than they are on the shelves of the Wal-Mart store in the United States. Yet they are still selling there.

So when we reduce that tariff barrier, many businesses which have had to move to Mexico so that they can gain access to those consumers will not have to go. They will be able to stay in the United States.

One of the best examples from our State is IBM. The tariff structure that

exists right now on computers is as high as 20 percent. The chief executive officer of IBM has said if NAFTA is defeated, they will have no choice but to move some of their operations from California to Mexico. Why? Because Mexico is one of the largest and growing markets for computers, computer software, electronic goods, and they will not have to move down there to take advantage of that. If NAFTA passes, they would not have to. They will be able to stay in California.

Mr. Speaker, I yield to the gentleman from North Carolina.

Mr. BALLENGER. The gentleman mentioned buying groceries and things at the Wal-Mart. But unless I am mistaken, there are several people here who have States right on the border: Is it not true that Mexicans came across the border to buy our products because they want our products but cannot get them down there?

Mr. DREIER. I yield to my friend from Arizona.

Mr. KOLBE. Not long ago, and some of my colleague have heard me tell the story but I think it is a very good one, not long ago I visited one of the largest Safeway stores in the State of Arizona, which is not in Phoenix, not in the Tucson area, it is down in a little community called Douglas, a town of about 10,000 people on down on the border.

This Safeway is gigantic, huge. You ask how could they have a store of that size in a community of 10,000? Well, 80 to 85 percent of their business is being done with people coming across the border from the neighboring State of Sonora and the little town of Agua Prieta, who are coming across there in order to shop at this store in Douglas, AZ.

Now, I went there and walked to the back of the store to the meat department. Now, in a Safeway store, on average 14 percent of the dollar volume of a Safeway store is in meat. Meat is the high end of your grocery market, as you all know, when you go out and buy steak or chuck or anything else; it is on the high end. Well, 24 percent of the dollar volume in this Safeway store comes from the meat department. There were nine butchers back there. Safeway is unionized. These are all union workers, union butchers. Nine of them back there, they were sawing, they were chopping, they were grinding, they were wrapping, they were packing, they were shoving that meat out there as fast as they could out into those coolers where it was being picked up by the Mexicans who were coming across the line to buy that. They are coming across because the meat is better quality and it is a cheaper price than they can get at home.

Do not tell me we cannot compete with union wages. We are doing it every day. And that is a good example. Do not tell me that Mexicans do not have the money—Agua Prieta is a very

poor town, by the way—do not tell me Mexicans do not have money. They have an insatiable desire for American products, and they are spending the dollars that they have on American goods, American products.

They spend already more on a per capita basis than the Europeans do or the Japanese do, despite the fact that they have an income about one-sixth or one-seventh of the Japanese or the Europeans.

Imagine when Mexico is transformed and they truly have an economy that is close to the European country or close to Korea, let us say, which is maybe one-half or one-third of what we have today—and that is not too far in the future when that will be the case—imagine how many more dollars they are going to have to spend on United States products.

Mr. DREIER. You know, when my friend talks about this huge level of income, the huge income levels, one is struck by the fact that our competition in this country does not come from poor nations, it comes from nations like Germany, where the wage rates are 60 percent higher than the wage rates right here in the United States. The competition comes from Japan, where wage rates are about on par with wage levels in the United States.

It does not come from these very, very poor nations that we see throughout the world. That is why I cannot understand why so many of our colleagues are fearful of that.

I yield to my friend from Texas.

Mr. BARTON of Texas. I thank my friend.

Now I have a comment, and then I want to ask a question of my colleague, the gentleman from Texas, from Fort Worth, TX.

Many of United We Stand groups had protests, picketing operations over the weekend. I know Congressman GEREN was picketed in his office. I am a member of the United We Stand, and so I received the information to picket my own office.

I called up the coordinator, had my staff call the coordinator for my district, and said, "Instead of having a demonstration, why don't we have a debate," as the gentleman had in his town meeting.

Well, we had a debate in a bowling alley. The opponent, against NAFTA, was a very well-read young man named Lyndon Johnson, believe it or not. So Lyndon Johnson took the negative that NAFTA was bad, and JOE BARTON took the affirmative that NAFTA was good. Of the undecideds in the room, and there were approximately 75 people, of which maybe 15 were undecided, at the end of the debate the overwhelming number of those people came up to me and said they were going to support NAFTA.

But my question, when I heard Congressman GEREN talking about speaking with Jim Wright, the former

Speaker, being for NAFTA, my question is: Is that just private conversation, or has the former Speaker, formerly strongly in support of NAFTA and in some way publicized that he is strongly insupport of NAFTA?

Mr. DREIER. I yield to the gentleman from Texas.

Mr. PETE GEREN of Texas. Mr. Speaker, former Speaker Wright is not only working for this agreement privately, he is working quite publicly. In fact, he has written an editorial that appeared in the Wall Street Journal recently. The former Speaker has taken a good deal of his own personal time to come to Washington and is actively going door to door calling on Members, trying to impress upon them the importance of this agreement, not just to our State of Texas but to the whole country.

It is an issue that he believes passionately in, and he is, though a private citizen now, is taking his own private time, his own personal expenses, and coming up here working the halls of Congress trying to get this agreement passed.

Mr. BARTON of Texas. And before I yield back, as the gentleman from California pointed out a minute ago, there is no question that many of the people who are opposed to NAFTA are absolutely totally sincere in their opposition. But when you really sit down and spend time with them, I have found that if they really understand the facts in a, I would say, reasonable number of times they will go, if not from being totally negative, they will go at least to being undecided.

Mr. DREIER. My friend is absolutely right. That was confirmed, as I said earlier tonight, by the Washington Post/ABC News poll which was released showing 42 percent of the American people support NAFTA and 42 percent oppose NAFTA. So it is evenly split now, contrary to the reports that we have gotten in the past about all of this opposition.

The difference is that the American people have begun to focus in on this. The whole point of this special order this evening was to talk about specific facts about the North American Free Trade Agreement.

I yield to my friend from Long Beach.

Mr. HORN. One of the perceptions that I have is that a lot of our colleagues and a lot of the voters have a misperception of what is the modern Mexico. Certainly it is not as advanced as the superpower to its north. On the other hand there is a substantial middle class, and it is rising regularly. And yet the perception seems to be there is a few rich people living behind 30-foot walls that own most of the country and everybody else is in a rural village with a dirt road, does not have a job, and wants to head to the United States.

The reality is you have got professional people, highly educated people,

raising families, giving them a proper education, becoming part of the skilled technological force of Mexico, occupying offices, doing all the things we know the American middle class does.

As my colleague mentioned, the purchasing power that is seen in that Safeway store in Arizona is pent-up purchasing power, wanting quality goods, and it is people who have money to spend and can be major consumers. The vision of every ex-President and the current President and most of us in this debate is of a common trade zone that stretches from the North Pole, someday, to the South Pole and truly is an integrated economic institution with a huge market where everybody can have not only economic freedom but political freedom.

Mr. DREIER. I thank my friend for his very helpful contribution.

For the last hour we have been focusing on the facts of the North American Free Trade Agreement versus the fear propounded by the opponents of NAFTA. My time has expired, but I know that my friend from Arizona has time, and we have a gentleman from Pine Bluff who is anxiously looking forward to being recognized.

With that, I yield back the balance of my time in hopes that the gentleman from Tucson will be as generous as I have been.

□ 2200

MORE FACTS ABOUT NAFTA

The SPEAKER pro tempore (Mr. MENENDEZ). Under a previous order of the House, the gentleman from Arizona [Mr. KOLBE] is recognized for 60 minutes.

Mr. KOLBE. Mr. Speaker, continuing where we were in this discussion of the North American Free Trade Agreement, I am happy to yield to my friend, the gentleman from Pine Bluff, AR [Mr. DICKEY].

Mr. DICKEY. Mr. Speaker, I thank the gentleman for yielding to me.

I would like to give in this discussion something that builds off what the distinguished gentleman from California has mentioned, and that has to do with the alignment all the way from Alaska to the Yucatan Peninsula, an alignment that would be not only an economic bloc that would rival anything in the world, but would indirectly amount to military strength or result in equal military strength. I think that is one of the strongest points of this whole discussion, at least one of the most far-reaching points of this discussion, that if we get that many people together, we bind them together economically, we do not have to have gunboat philosophies and procedures. We can do it economically. We then represent a large number of people who can match other nations that might be threats to us in numbers and in

strength. I think that is another point that needs to be brought up.

I would like to hear the comments of the rest of the gentlemen here.

Mr. KOLBE. Well, Mr. Speaker, I certainly agree with the gentleman. I think that it has a lot to do with strengthening our competitive edge.

You know, we live in a world in which we are under increasing pressures from other countries in the marketplace. We cannot simply put our heads in the sand and assume that we are going to be able to be competitive if we are not out there fighting to remain competitive.

One of the ways that we can do that is to join forces with countries that are in our own hemisphere, such as Canada and Mexico, the same as the European community has done, although they have gone much farther than this agreement would go. I think that is one of the great misunderstandings sometimes raised by Pat Buchanan and those who talk about this being an American Maastricht. This is not a European-style economic union. It is simply a free-trade agreement, but to the extent that they have joined together in order to create a marketplace and to the extent that Japan is joining together with other Asian countries, such as South Korea, Taiwan, Singapore, and Hong Kong, to form an alliance of the Asian manufacturing nations and they are more competitive, by doing that the United States, Canada, and Mexico, have an opportunity here to create the world's largest trading bloc, larger than the European community, larger than those Asian communities that we just talked about.

This agreement really represents only the hinge on the door to all of Latin America. Chile is standing in the wings right now ready today to join in a free-trade agreement with the United States, so that they can have access to our markets and we can have total access to their markets.

Venezuela is close behind them. Columbia is interested in it. Argentina, the other countries of Latin America and Central America, are all there interested and waiting, but we have told them, wait. First let us complete NAFTA. Let us get Mexico, Canada and the United States together, and then the other countries can follow behind them.

So what kind of a signal do we send to those countries of Latin America, each one of whom we have joined with in a bilateral framework agreement that calls for these countries to make changes to their economy, that says, "If you will reduce your public debt, if you will reduce your inflation rate, if you will open up your marketplace, if you will privatize, if you will bring down tariffs, there will be a reward at the end, and the reward is going to be more trade with the United States."

That is what we have said to every one of these countries, and yet somehow those who oppose NAFTA must understand that we are slamming the door on those countries, not just on Mexico, but on all of Latin America who seeks to join with us in this agreement in order to make themselves and us and the Western Hemisphere a gigantic marketplace, not one that excludes other countries. I am not into this thing of excluding Europe or Japan or being anti-Japanese, but when that creates a very, very competitive marketplace for us. That I think is absolutely critical in this debate.

Our colleagues simply cannot ignore the consequences of what a negative vote will mean in terms of our trade relationships with the rest of the Americans and our political relationships with those countries.

Mr. Speaker, I yield to the gentleman from Fort Worth, TX, Mr. PETE GEREN. Mr. PETE GEREN of Texas. Mr. Speaker, I thank the gentleman for yielding to me.

There are two points that I have come across in trying to persuade those who are against NAFTA to support NAFTA that I feel our opponents have made the most of. One is blaming NAFTA for job losses that occurred long before NAFTA was even considered. I think we have discussed that in some detail.

The other myth that has been perpetrated on the American public is that the Mexican country has no buying power. The gentleman made a number of points that illustrate that is not true.

I would like just to raise two other points that help explain to the American people that not only do the Mexican people have buying power, they have a significant buying power, and buying power that has the potential to allow us to reap great rewards in selling American products down there.

I represent Fort Worth, TX. Every single day of the year a Union Pacific train leaves Fort Worth. It is a mile long, a mile long going to Mexico. Five years ago they had a train about once a month that went to Mexico. This train carries American-made goods to Mexico every single day, a mile of American goods going down there to be purchased by Mexican consumers.

Another point is American automobile purchases.

Mr. KOLBE. Mr. Speaker, if the gentleman will permit, what kind of products are on that train that are going down there to Mexico?

Mr. PETE GEREN of Texas. Many types, many agricultural products, grain and other foodstuffs grown in this country, manufactured products.

What is exciting about that particular train is not what it carries now, but what it can carry after NAFTA, oilfield supplies which currently are blocked

from the market down there, one of the most booming oil markets in the world and we are the best in the world in making oilfield supplies. We cannot sell them to Mexico right now unless you make them in Mexico. We will be able to fill up another train with oilfield products that will be carried from Texas into Mexico and be carried from the Midwest of our country.

Mr. KOLBE. Most auto parts are another example that are excluded today.

Mr. PETE GEREN of Texas. Absolutely. As far as Mexico's current consumption or purchase of automobiles, last year in 1992 there were 700,000 new vehicles sold to people in Mexico. Over 400,000 were automobiles. The rest were trucks and vans.

Mr. KOLBE. I believe that is a doubling of the market in 5 years. They doubled their new auto sales in 5 years there.

Mr. PETE GEREN of Texas. Absolutely, and what a different picture that paints of Mexican buying power than we have heard from all the opponents of NAFTA. To listen to the opponents of NAFTA, you would think that everyone in Mexico lived in a mud hut and walked to work. There were 700,000 vehicles sold last year.

Do you know how many were American? One thousand. One thousand was all that we were able to get into the market. Imagine with the strength of the American automobile industry what kind of opportunities we will have down there after NAFTA. That means tens of thousands of jobs.

This is not a big business issue. This is a United Autoworker issue. This is an issue of American workers being able to make cars to sell into Mexico.

I think it is so important that this myth about Mexico's poverty is exploded between now and the time of the vote. Mexico has tremendous buying power, and they have a middle class and upper class that is greater than the whole population of the country of Canada. It is a great opportunity for American products.

Mr. KOLBE. Mr. Speaker, I appreciate the gentleman shedding some light on that, because I think my memory kind of rings a bell with me, when the gentleman talked about some people saying they all live in poverty there.

I think it is a gentleman who lives in a little city just next door to the gentleman there that in the debate last week had a big picture saying this is how all the Mexicans lived, showing this very, very poor cardboard shack community, which certainly does exist in Mexico, and he says this is how all Mexicans live.

I cannot tell you the number of comments I have had from my friends in Mexico who have called up absolutely outraged at the idea that he would try to foist on the American public the idea that every Mexican lives that way.

It really is such an insult. It certainly does not contribute to our understanding of the problems and what is happening down there.

Mr. Speaker, I am happy to yield to the gentleman from Long Beach, CA [Mr. HORN].

Mr. HORN. Mr. Speaker, I was fascinated by the point the gentleman from Texas made, because he is absolutely correct. We only sold 1,000 American automobiles in Mexico, and the estimates of Ford, Chrysler and General Motors, are that the first year after the implementation of the North American Free-Trade Agreement they will sell 60,000 cars in Mexico.

□ 2210

There has been a pent-up demand for it. Tariffs, and all sorts of nontariffs, and everything else, have kept the American automobile out of Mexico.

And on the gentleman's point, which is quite correct, of this complete misperception of what is the modern Mexican citizen, it seems to me the other misperception related to that is that there is no such thing as expanding economic growth.

It seems to me there is a mindset of some in this Chamber, and a lot outside this Chamber, that there is one pie of fixed diameter and fixed radius, and, no matter what happens, the argument is how to divide the pie into pieces. It is sort of the old labor bit of the 1930's: management gets so much, labor gets so much. The fact is the whole economics and dynamics of trade are that there is mutual benefit for all parties to that trade or there is not going to be mutual trade over time.

Mr. Speaker, it just cannot be dumping of one nation that is more powerful on another. There has got to be need expressed in economic terms, and with that comes economic productivity, and with 19,600 workers behind every single billion dollars we export somewhere, obviously there is economic growth, just as we have had without NAFTA with Mexico: \$10 billion in 1986-87; \$40 billion in 1992.

That benefits both nations. That is not the same pie that was present in 1986-87. It is a much larger pie to the mutual interests of both countries.

Mr. KOLBE. Mr. Speaker, I appreciate the comments of the gentleman from Long Beach, CA, and, as I listen to our discussion here tonight, I am struck by what seems so obvious to me and that these arguments make so much logical sense that they are so obvious, so commonplace, so correct that it seems to me that every one of our colleagues should find this a very easy vote, that they would be for the North American Free-Trade Agreement. It is a vote about reducing taxes on our products that are sold in Mexico and products that are sold up here in the United States, and that is good for consumers, that is good for producers, and that is good for jobs.

I wonder if my colleagues might just share with me their thoughts about what is it in this debate that makes this so difficult. How can this vote be hanging literally in the balance just 48 hours from now, and why is it that others have not seen this? And I would be happy to yield to the gentleman.

Mr. HORN. I think every one of us that have talked to Members of both persuasions, for NAFTA, against NAFTA, realize that, if there were a secret ballot in this institution, and none of us want a secret ballot in the institution, but, if there were, NAFTA would overwhelmingly pass the House of Representatives. This is the reality.

Mr. KOLBE. So what is it out there with the public that they have not seen these arguments?

Mr. HORN. It is the fear of losing their seat, it is the intimidation, it is a little bit of anti-Hispanic, anti-Latino, et cetera, that is also there. I am not saying all opposed are saying that, but we pick up a few here, a few there, that obviously have different motives for what is ruling their behavior.

For those of us that believe in term limits, if we go after 2 years, it will not matter to us. In California law you will go after 6 years, and in the proposal most of us want in this Chamber you would go after 12. But, as the gentleman knows, some Members feel the whole Nation and statecraft of America will collapse if their presence is not in this Chamber, and, therefore, it becomes very easy to rationalize when they feel the pressure at home, which I am convinced does not represent the majority of most constituencies, just as the gentleman's experiences show.

I had the same experience. I listened to a lot of shouting and yelling one night, and all I had to do was look at the eyes of the other two-thirds of the audience, and they were not with it. But they do not want to stand up and get into a fight with their neighbor.

Mr. KOLBE. Well, I am quite sure the American public will not be in jeopardy if this gentleman is not there, but I am not so sure that it would not be in jeopardy if the gentleman from Long Beach was not in this House.

I am happy to yield to the gentleman from Pine Bluff.

Mr. DICKEY. Mr. Speaker, I thank the gentleman from Arizona [Mr. KOLBE].

I want to mention two things, and it starts with Dr. Demmings' philosophy that he took to Japan and we rejected, and that is a win-win situation. Dr. Demmings, as I heard him expound in a seminar here, states that there should not be winners and losers in economic competition, and I want my colleagues to think also. Go back with me a minute or two to when Henry Ford developed the assembly line and the mass production vehicle. He finally came to the realization that he had to pay his

workers so his workers could buy the cars. He came up with a \$5 a day wage for his workers, which was pretty revolutionary at the time. It fueled the consumer buying power, and then we were off and going as far as developing cars.

Now we go back to Henry Ford and Dr. Demmings. The way it works now is for us to be pulling for the Mexicans, be pulling for the Central Americans, be pulling for those people in South America to elevate their station in life, and I think something very significant, very significant, is that the law now in Mexico is that the minimum wage is not based on an index. It is based on a reference to productivity and inflation. If that particular minimum wage comes up and those wages do increase, we benefit. I do not want anybody in the United States to think that we want to suppress or oppress these people and keep the minimum wage down. We want the minimum wage to come up because we are selling to the Mexicans. We are not taking our productivity, sending it down there to get back. We are only getting 25 percent back as it is now. We are trying to reach that market. If that market is prospering, we will prosper, and that has to do with environmental concerns, too.

So, Mr. Speaker, I would like for us to acknowledge openly that we are accepting Dr. Demmings' philosophy that it is win for America, it is win for Canada, and it is win for America. If it is not, we got 6 months termination. Any nation can get out of it.

Mr. KOLBE. Well, I think the gentleman, when he talks about Dr. Demmings, simply reflects what Adam Smith had told us all along, and I think that Adam Smith's basic tenets about trade are still applicable in this debate and in this issue, and that is that trade is not a win-lose situation. It is a win-win situation. Both sides gain as you trade more with each other. The consumer gains. Each of the countries gains from that. And I think that point is very well taken.

I think it is also important to note, and I am sure some of our colleagues may not be aware of this, that Mexican real wages have risen quite dramatically in the last few years. Since Mexico joined GATT; that is the General Agreement on Tariff and Trade, Mexican wages have increased 28 percent. That is real wages. That is after inflation is factored out of it. Wages have increased 28 percent since Mexico joined GATT. Now there are a lot of us in this country that wish that our wages had increased in real terms 28 percent.

The result is Mexico has gone, Mr. Speaker, from a ratio in 1987 of about one-thirteenth of United States wage rates to today, about one-sixth or one-seventh, and they are poised for another fairly substantial increase in their real wages that will close that

gap even more. In fact, it will close that gap in such a way that some companies now locating in Mexico will begin to look elsewhere for locating their plants, to look to other countries that are lower-wage countries just as Japan relocated some of its factories in South Korea. Those factories have now relocated in the People's Republic of China or relocated in Malaysia, and Malaysia is becoming a little high, so they are relocating now to Indonesia. And so it is a spillover effect, and that is the reality of the world we live in today.

I do not mean that we do not have jobs here. We have the high end of the jobs. We have the jobs we ought to want to keep in this country, and I think that is important for us to keep in mind.

I am happy to yield to the gentleman from Fort Worth.

Mr. PETE GEREN of Texas. In responding the gentleman's question of why is NAFTA such a hard sell today, and there is tremendous anxiety all over this country. I cannot speak for the whole country. I can only relate what has been told to me by my colleagues. But I know that is certainly true in the district I represent. We have had tremendous job loss. We have had plants close. We have been hit awfully hard by the recession. Plants have moved to Mexico, to China, to wherever, and there is the erroneous perception that somehow NAFTA is going to make that easier to do, going to make it easier to pack up and move to Mexico, pack up and move offshore and export American jobs.

That is an erroneous perception. NAFTA has nothing to do with that, and our success in selling NAFTA depends on overcoming that misperception, as we have talked earlier. NAFTA will not make it easier to move a plant to Mexico. NAFTA will make it easier to sell America goods to Mexico.

□ 2220

In fact, NAFTA will take away the tariff incentives that currently exist to move a plant to Mexico.

Mr. KOLBE. As the gentleman knows, a tariff is a tax. It is a tax on our products today we are trying to sell in Mexico. It is a tax on Mexican products that are being sold here in the United States. So, you know, we talk a lot about trade between Mexico and the United States, as though somehow the United States Government was selling this good to the Mexican government.

That is not the way trade works, as you well know. Trade is between people. It is between businesses and people. One person in Mexico selling a product to somebody here in the United States, an American producer selling products to somebody down there in Mexico who is consuming them. It is people selling to each other. And tariffs

are erected by governments as a barrier to that trade.

So I think our good friend and former colleague, Jack Kemp, has made that point very, very well when he says this really has a lot to do with economic freedom, with your ability to make choices, to be able to choose to do what you want, to do your business without the artificial restraint of government.

Mr. PETE GEREN of Texas. I think a good way to understand the impact of tariffs is look at it like a sales tax. It would be like walking into a Wal-Mart and you are going to buy a weed eater. The weed eater that says made in USA has a 10, 15, or 20 percent sales tax. The weed eater made in Mexico has no sales tax. Which product has the advantage on the shelf? That is what the Mexican citizen is faced with when he goes into a Wal-Mart. The biggest Wal-Mart in the world is in Mexico City. The American product has a 10 to 20 percent sales tax on it. The Mexican product does not have a tax on it. After the 15-year phase-in, that American product is going to be able to compare equally with that Mexican product on that shelf.

That is what NAFTA is about. It does not make it easier to move a plant to Mexico. It makes it easier to sell American goods in Mexico.

Mr. KOLBE. Remarkably, even with the fact that Mexico still remains tariffs as high as they do, the fact they have brought them down from an average of 50 percent down to an average of about 11 percent today has stimulated a tremendous amount of those sales that you are talking about. So actually the two weed eaters, side by side, it is remarkable how many of them will go ahead and pick the U.S.-made weed eater, with a tax of 20 percent on it, simply because they believe that it is a better quality product. They have had experience in the days when Mexico protected its own electronics industries and other consumer products industries. They have had experience with bad products down there. And so there is a natural desire to buy the U.S. product.

But your point is well-taken. If you take that 20 percent tax off of there, you have reduced the price by 20 percent. How many more goods are you going to be able to sell if you reduce the price by 20 percent.

I yield to the gentleman from California [Mr. HORN].

Mr. HORN. I agree with the gentleman's point on that. And while we can hope that plants will not leave the United States for any other country, if a plant leaves and has a choice of Korea and Hong Kong and Taiwan and Malaysia and Singapore, I would hope that plant would locate in Mexico or Canada, for one very simple reason: when a plant locates there, whether it is a Mexican plant internally or a plant from another country, they are going

to buy their major capital goods and major needed products to have an efficient plant from the neighboring superpower. And if you go to Korea or Taiwan, the likelihood is you will buy from Japan. If you went to Europe, the likelihood is you would buy from Germany, France, Italy, or Great Britain perhaps. And I think it is very important to again stress that plants have gone to Mexico before Mexico joined the General Agreement on Tariffs and Trade in 1986. For more than 30 years, major plants have been in Guadalajara. Plants have gone to Mexico since they joined GATT, but without the North American Free-Trade Agreement on the books.

Again, NAFTA takes away one reason why you have to go to Mexico. People that relocate their plants are not always interested in lower labor cost. In this case, they had to go there, many of them, to get access to the market.

My colleague from Arkansas also mentioned another trigger word, which is I think about misperceptions in this chamber. It is sure related to it. That is the environment.

Everybody says, "Well, if you agree with NAFTA, the environment will be worse."

The environment is horrible without the North American Free-Trade Agreement. The one hope for overcoming the sewers that are some of the rivers that are bordering both the United States and Mexico is to agree to the North American Free-Trade Agreement, which has a process to do something about it, and hopefully will keep both countries' feet to the fire, if you can do that to a country, and see that something is done about the environment.

You would think, listening to some of our colleagues in special orders and elsewhere, that environmentalists are unanimously against the North American Free-Trade Agreement. Environmentalists are not unanimously against it. Indeed, the majority of members of environmental groups are in groups that support the North American Free-Trade Agreement, the National Wildlife Federation, among them, and many others.

Mr. PETE GEREN of Texas. Is not the Audubon Society and the Environmental Defense Fund?

Mr. KOLBE. A lot of organizations are out there that have been supportive of it.

Mr. HORN. They recognize the obvious, that we do have a mess on our hands in some of these areas. Some of our colleagues from San Diego talk about that. We at least will be able to clean them up, with the cooperation of both nations.

Mr. KOLBE. The gentleman makes I think very well the point, the abstract point, or the point in an abstract way very well, about how indeed we have a comparative advantage if we reduce

our tariffs and plants are located here and components are being brought from the United States.

I would like to illustrate it with a very practical example. Some of my colleagues have heard this before, but I think it bears repeating. That is not long ago I visited a plant being built in Sierra Sonora, the capital of the state directly to the south of my State of Arizona. This plant being built was being built under license to a toy manufacturer, I think it was Mattel Toy manufacturer, and they were going to relocate from the People's Republic of China all the production of the Barbie dolls, all the production in the world of Barbie dolls, to this plant.

Now, why were they moving it from the PRC to Hermosillo, and how the heck does that help us here in the United States?

Well, the answer is fairly simple. Eighty-five percent of the value in the Barbie doll is not in the paint, but is in the plastic that goes into the doll. That is the value. Because Mexico had reduced its tariffs down to about 10 or 12 percent I believe on plastic, and they had the prospects of it coming down to zero, it was now cost effective, cost efficient, for them to move that production from China to Mexico, to buy the plastic from the United States, take it down to Mexico, produce it or put the pieces together, package it, and ship it to the United States and all over the world from Hermosillo, Mexico.

But 85 percent of the value of that Barbie doll is going to be coming from work that is produced here in the United States. While today if you go out on the shelf of the store and get a Barbie doll for your daughter or granddaughter, not 1 percent, not 0 percent of it, is going to be produced in the United States.

So I say to those who say we are losing some of these jobs to Mexico, I say we are gaining some of these jobs, and they are the kind of jobs we ought to want. We ought to be more interested in the job of the person that is producing that very important plastic than the person who pastes the hair on top of the head of the Barbie doll. Some of us do not have as much hair up there, but Barbie dolls do have some hair on top of their heads there. Those are the jobs we ought to be more concerned about.

Mr. DICKEY. I think both your points are excellent, and excellent in this respect: I would like to expand on that a minute. Five to six percent of our finished product in the United States is made up of component parts made in other countries. Japan's finished product has 30 percent that have been brought in from other countries. Thirty percent versus 6 percent, let us say.

Now, what the problem we really are having, and the automobile industry is an indication of this, the problem we

are really having in the world market is price, not so much as quality, but price. And the automobile industry showed us that when we were building great big gas guzzlers. And every labor agreement that was coming, management came into them and said, "We will pass it on to the consumer." Management was not paying anything, the consumer was. We had two sets of eyes watching us on price and quality, and that was Japan and Germany. They just waited until that thermometer went up, until it got high enough where they could compete.

If we can take this component part theory you all just mentioned and bring in, and let some of these components be made outside of our country, we can bring them in, and, just say in the automobile, bring our component level up to 30 percent, we can produce a lower priced car and we can reclaim the market share in America.

□ 2230

And in doing that with an automobile, we can do it with other things, too. All we have to do is let go a little bit to receive, and we can find that. When Mexico's gets up or when the cost in Mexico gets so high, we can move to other places, hopefully, Central America or South America. But then we have, again, a win-win situation. I think we ought to look at that. We ought to look very carefully at that. But if we let labor costs get out of hand, or any costs get out of hand and price, again, is our enemy, we are going to get beat on the world market. The global competition is going to beat us, like it should. So I say we can join with Mexico to become stronger even in acquiring our own American market share back, and that is more jobs. That is the higher paying jobs; 17 percent more is paid for export jobs than other jobs.

Mr. KOLBE. I think that is a very good point.

Mr. HORN. Your comment reminds me of the fact that the Ford Motor Co.'s International Division was highly competitive with the Japanese and, indeed, kept them out of many countries due to being more competitive, Brazil in particular. And the problem came in the domestic production in the United States with, as you called it, those gas guzzlers that they were about 10 years behind facing up to. And the time that Ford was finally turned around to even give GM a run for its money was when they brought the International people back that know what competition was, had the ideas, had built the smaller, more efficient cars, and they started turning Ford around with the Sable and other products that the American people did want to buy.

Mr. KOLBE. When we talk about manufacturing and the fear that we are losing our manufacturing base in this country, that turns out, on closer in-

vestigation—and we will have some more discussion of this in a couple of days—that turns out, on closer investigation, that that is simply not true.

As a matter of fact, the United States, the percent of our gross domestic product that comes from manufacturing today is about the same or even a percent higher than it was 40 years ago, around 1950. So we are still producing as much of our wealth from manufacturing as we were back then.

The difference, of course, comes in the employment levels. Employment levels are down by more than 50 percent, and that has been necessary in order to keep that manufacturing sector productive and competitive. That comes from productivity. That is what keeps our head above water. That is what keeps us competing with countries like Malaysia or Indonesia or Mexico or other countries.

We are still producing as much of our wealth from manufacturing as we ever did. We are doing it with less people. It does not mean we have less jobs in this country, because of course, there are many more jobs than there were in 1950. They are different kinds of jobs. And many of them, most of them are very good jobs. They are often not as hard. They are not as physically hard, as physically dangerous with as much noise and as much heat and with as much physical labor as many manufacturing jobs in 1950 required. But they are very good-paying jobs, but they are different kinds of jobs.

I think that is the reality of what we are facing today.

Mr. PETE GEREN of Texas. I thank the gentleman for being so generous in sharing his time with all of us, as we discuss this important issue in front of us as a Congress and as a country.

I want to discuss an example of a specific employer where we will see American job growth, if NAFTA passes.

As I think everybody in this country knows, the oil and gas industry in our country has been devastated over the last 10 years. We have lost over half a million jobs. They are not J.R. jobs. We are talking about good-paying, blue-collar jobs, making oil field equipment, putting it in the ground.

We had a huge segment of the Southwestern, Southern, and Florida economy that was dependent upon the oil and gas industry. Well, when it went away, so did these jobs.

There is a company in the district that I represent, that currently employs 160 people. It nearly went broke during the downturn, but rather than going broke and accept the fate that befell so many companies that were faced with the downturn in the oil and gas industry, this guy decided he was going to export.

He now exports to Indonesia, to Russia, to China, to the Middle East. And this company that had been around 300, went down to almost 20, because of ex-

ports is up to 160 employees, 160 very good, well-paid, blue-collar jobs for people who need them very badly.

You notice when I mentioned the countries that he exports to, I did not mention our neighbor to the south, one of the biggest oil-producing regions in the world.

He wanted to sell into Mexico. He contacted the Mexican oil industry down there and said, I have got some tools that would be good for your oil industry and your country. It could make it more productive.

Mexico said, you can sell those down here if you will build a plant down here, if you will build a factory in Mexico.

He, wanting to grow his company, went to Mexico and tried to put together a plant down there. Finally, because of many circumstances, he just threw up his hands and said, it is not possible, went back to Texas and continued to sell around the world, does not sell a single piece of equipment into the country of Mexico, a neighbor just a few hundred miles to the south.

He has already estimated that if NAFTA passes, he will double his work force of blue-collar workers from 160 to 320 people almost overnight, 160 to 320 good-paying blue-collar jobs, full health care benefits, retirement plan. And that is not speculation. Those are jobs unquestionably that will come to one of the most hard-hit areas of our economy in this country, if NAFTA passes, good blue-collar jobs.

This is not benefiting big business. This benefits 160 workers who are right now out of work and looking for a way to pay the bills.

Mr. KOLBE. I appreciate the gentleman from Texas bringing this information to our attention. I think you make a point that is well worth keeping in mind, and that is the opportunities that exist in the energy-production field.

Admittedly, there are some disappointments. We did not get as much as perhaps we would have liked out of this agreement. We are not able to invest in an equity position in energy production in Mexico, but we knew going into the negotiations that for sensitive political reasons that have very long historical backgrounds, as I think my friend from Texas knows, that was not going to happen.

But what we do have is the opportunity to sell equipment and services, geological services, drilling services, contracts and equipment in Mexico. And the Mexican oil industry is very much in need of a huge infusion of capital investment. Pemex and the Mexican Government understand this. They know that they have an extraordinarily inefficient, an extraordinarily inefficient producer of oil today, one of the very high-cost producers, as a matter of fact, in the world. They need to take steps to be more competitive and

to get their costs down with a product, the price for which is set on the world market.

There is no separate price set for Mexican oil as opposed to Saudi oil or Nigerian oil. It has got to compete in the world marketplace.

If their costs are high, they are not going to be able to compete. So Mexico understands that, and they are taking steps to do that. And they are going to be making a huge investment in the years ahead in new drilling, new exploration, new equipment, new refineries, all of those things that our technological know-how in the United States—and most particularly in the State of Texas—will be able to benefit from.

Mr. PETE GEREN of Texas. Unquestionably, that is one of the areas where Mexico's need for investment is going to mean good-paying blue-collar jobs for Americans. And it is, again, it is not theoretical. We can specifically point to out-of-work Americans who had good jobs, could support their family well. And because of forces totally outside of their control, they lost their way to make a living.

When we are able to open up Mexico to the sale of American goods and services in the energy sector, we are going to put a whole lot of folks back to work that need the jobs and that deserve jobs. That is a reason to support NAFTA.

Mr. KOLBE. I appreciate the gentleman's contribution.

Mr. DICKEY. So that we will keep this focus on jobs, I would like to describe, as the gentleman from Texas did, what it is going to be like in south Arkansas. We have the soil and the climate and the conditions that allow us to grow the finest yellow soft pine in the world. And that is structural lumber and timber for the development of a country like Mexico in its essence.

□ 2240

We also have agricultural products that are grown in surplus right now, in excess, crops that are kept in storage bins. All of these things are grown in Arkansas and cannot be moved to Mexico. The threat is not to move those to Mexico, as you could a plant. We have those things there. We will sell because of our proximity to the border of Mexico, and because of the infrastructure that we already have in place, we will sell more timber products and more agriculture products, particularly rice.

I want the Members to know that rice is a big part of our economy. That is going to mean nothing but jobs and prosperity for our little area of the world in Arkansas. I cannot but help but believe in the same things in Tucson and in California, where we will create jobs.

I would like for us to keep our attention on the fact that we are creating jobs and people do not have to move to

Mexico. People do not like to travel across the world, trying to relocate their homes and their residences just because of money, if that is the case. I will say this, we do not want people to invest in Mexico. I do not care if they say that nobody but Mexicans can ever own their land, because we want to keep our people at home. We want to increase their level of living, because we will be sending export jobs down there, give them more security, because we are going to have more jobs. There are going to be more jobs available for our work force.

I would like to keep this, as I bring in the example of Arkansas, as we heard about Fort Worth. It is jobs, jobs, jobs that we are going to protect and create, and also benefit by doing so the nation of Mexico, hopefully Central America and South America.

Mr. KOLBE. Mr. Speaker, I appreciate the gentleman's contribution and his comments. Of all the arguments in this whole debate that to me make little sense, of the arguments coming from the other side in this debate, I should say, is the argument that somehow NAFTA is going to increase this flood of illegal immigration into the United States. For the life of me I cannot even understand the logic of that argument, how it is constructed, much less being unable to see any facts which would support such an argument.

The fact of the matter is that in the long run, the only solution, the only solution to solving the problem of the flood of illegal immigration from a country like Mexico, on our border, which has an income, a per capita one-seventh of ours, the only solution is for that country to grow and to be able to provide jobs, good paying jobs, for its own people, much as Canada on our other border can do.

If that occurs, there then will be less incentive for those people to come to the United States. How the opponents of NAFTA can argue, if we can just keep Mexico poor we will be better off from an immigration standpoint, is absolutely beyond me to understand. Maybe my academic friend, the gentleman from California [Mr. HORN] can explain to me how some of these people come to this conclusion.

Mr. HORN. Mr. Speaker, will the gentleman yield?

Mr. KOLBE. I am happy to yield to the gentleman from California.

Mr. HORN. Mr. Speaker, I was one of the first in the country to call attention to the illegal immigration in the 1970's. I have talked to several Presidents of the United States as to what ought to be done, until the current President, a Democrat, and I am a Republican, he finally suggested what I suggested in the 1970's, a counterfeit-proof social security card, so we could keep track of who is crossing our border and who wishes to be employed in the United States.

The facts of life are that the turning down of NAFTA is what will create more illegal immigration to this country. It is the exact reverse of what the opponents have said. Right now we do have several thousand a night pouring over the southern border. Nobody talks much about the Canadian border, but we have had illegal immigration pouring over that border for all of the 20th century, waves coming down into Maine, to Michigan, to New York, whenever there is a depression or a recession in Canada, to work in wood cutting or to do other things that were somewhat blue collar type activities.

The facts are that they have got it all backwards; that unless we get the economy of both the United States and Mexico going, there will be many more people coming here illegally. Our parents came here legally, or when there were no immigration laws in this country.

The problem with illegal immigration is that there are hundreds of thousands of people throughout the world waiting to be admitted legally to the United States, and that three-quarters of a million people come in here legally each year. We admit more people to our country than all the rest of the world combined.

We have a lot of things to do to stop illegal immigration. A lot of us, I am sure my colleague and I and various others, there are dozens of us on pieces of legislation here to help do it, whether it be the counterfeit-proof social security card, whether it be limiting benefits in the United States, whether it be amending the Constitution to straighten out whether children of illegals can be citizens of the United States, all of those things, plus the fact that we are finally facing up in this Chamber to more power for the Border Patrol and more strength, when we voted \$60 million a few months ago to be added to the Border patrol to stop the tide of illegal immigration.

All I can say is if people want to promote illegal immigration, please vote down NAFTA on November 17th and you will have much more illegal immigration than you have ever wanted.

Mr. KOLBE. I appreciate the leadership of my friend, the gentleman from California [Mr. HORN] on this subject. He really has been a leader on the issue of immigration and of illegal immigration.

Mr. Speaker, I think we need to remember that what drives these people to come from Mexico, there are many motivations, and some certainly come because they like the freedom that exists here, although Mexico is a relatively free and open society. However, I think all of us would agree the overwhelming primary motivation for Mexicans who come to this country is because they want a better life for themselves and their families. They do not leave their families behind in

Michoacan or Guanajuato, the states down in Mexico, they do not leave their families behind down there because they want to abandon them and go to a country with a foreign language and foreign culture. They go because they want the jobs that are provided up here, that will enable them to make some money and take it back to their families there.

In the long run, if we can create an environment in their own country where they have good paying jobs, then there will be less reason for them to have to sneak out those jobs here in the United States. It is as straightforward and simple as that. We can either help Mexico grow, not by taking away growth from the United States, but by growing ourselves, but we can help Mexico grow and reduce the illegal immigration, or we can keep Mexico as poor as we possibly can. For sure, then, we are going to have more illegal immigration.

Mr. HORN. And they will not be buying our products.

Mr. KOLBE. They will not be buying our products under those circumstances.

Mr. DICKEY. If the gentleman will continue to yield, I really think the point is good, and we are getting into some social problems and some social attitudes. I want to carry that thing a little further in this respect.

What we need to do is look at the leadership of Mexico right now, when they say, "We need to decide this issue by January 1. We need to decide the issue of whether or not we are going to be in this pact with Canada and the United States or not." The significant thing we have to hear is, they have spent four years talking to their people, saying, "Yes, we can deal with the United States; yes, we can lower the barriers and prosper. Watch this." Then they brought them down a little bit, they saw, and they had the encouragement.

The reason we need to make this decision now is that it is not reasonable to expect the Mexican Government to be able to hold their populace together when we say no to NAFTA and they perceive it as a rejection of the Mexican people. You mentioned that a while ago in your discussion, STEVE.

I think what we have got to do is, we have to encourage them and say, "Yes, your improvements need to be more," but, for sure, if they sense rejection from the powerful neighbor from the north, there will be more immigration this way. We will get the best that the Mexican people have, the ones who are ambitious, the ones who are not lazy, who are family people, who want to contribute. They are going to be going and taking the risk of coming across here. The Mexican Government wants to keep them there. They are asking us to say yes.

If we do not, if we say no, we have the risk that there is a rejection and

we will never be able to put it together again. If we say yes, and by some reason all of these fears, facts, and tactics and everything else are correct, we can always get out of it. The risk is this. We say yes to NAFTA, we say yes to the Mexican people, "We are going to help you pull yourselves up by your bootstraps. If in fact we are making a mistake, you all can get out of it. If we are using you as a door mat, you can get out of it," or we can get out of it.

The other side of it is a negative. It is freezing the ball. It is just holding onto it. It is getting out of the game. It is taking our competitive challenges away, and I think it is going to hurt us in the long run, and it is going to cost us jobs. I want to get back to that.

□ 2250

It is going to cost us jobs. People are going to want to move there.

Mr. KOLBE. President Salinas has said it very very well I think when he said, "I have a choice. I can either send goods to you or I can send people to you. I can ship one or the other." He said, "I would rather sell products to you rather than send people to you." And I think he understands very well what the answer to keeping people at home in Mexico, the best and the brightest, as my friend from Arkansas referred to them, to keeping those people there, and that is being able to provide opportunities for them there.

We are running close to the end of our time, but I am happy to yield to my colleagues for one last comment before we wrap up.

Mr. HORN. Our comments on immigration remind me of one red herring that was recently dragged across the trail in an attempt to get more anti-NAFTA votes, and that is the claim that more drugs will come into the country as a result of NAFTA.

Now what we are talking about is there will be greater trade because of NAFTA; therefore, more containers, more trucks crossing our borders, more containers coming into the port of Long Beach and the port of Los Angeles, which happen to be in my particular congressional district, the largest port complex in America, and one of the largest in the world. And there is no question that the opportunity will be there. With more trade there are more products coming in, more boxes and more containers. That is obvious. And we are obviously going to have to do something about drugs.

But it has no relationship to whether we approve or disapprove NAFTA any more than any other trade agreement between countries that ease trade coming here, and we obviously have to be alert. We need to increase our programs that educate young people against the need for drugs, and we need to be more vigilant in terms of different types of either drug, FBI, Customs, so forth that inspect particular

products coming into the United States of America.

Mr. KOLBE. Listening to the comments that the gentleman from California makes, it seems to me that if we follow that line of reasoning we ought to be ready to take it to the next logical step. If more trade with Mexico is going to result in more opportunities for drugs to come across in legitimate traffic of goods coming from Mexico, then surely we ought to be willing to stop trade with other countries. We should stop ships from sailing into our ports. We should stop planes from flying across oceans. We should try to shut ourselves off, much as China did thousands of years ago when they found that that was not successful either. You could not shut out the rest of the world. China, thousands of years ago, was a lot easier to shut out when there were miles and thousands of miles and only horseback to get from one part of the world to another. Today it is much more difficult, and we cannot simply realistically assume that we are going to shut out drugs by shutting out trade with the world.

I think the gentleman has made that point very well.

Mr. DICKEY. Another point, if I may say so, as Mexico is the doorway to Central and South America, it is also the doorway to Colombia where we know the drug traffic is created in so many instances. I want my colleagues to think about this. If we go forward and we get into an economic agreement with Colombia, through Mexico, delivery across the Mexican country and Central American countries, then we are going to have economic leverage.

We have been trying to do it militarily, have we not? We have been trying to do it with arrests, with power or gunboat philosophy. Now we can do it economically. It may take longer, but it is going to be more solid, and I think we can get to the drug problems economically, but we cannot do it by saying no to NAFTA.

Mr. KOLBE. I appreciate the gentleman's comments.

I am happy to yield if the gentleman would like to make a final closing comment. Otherwise we will close this debate here.

Mr. HORN. We yield to you and your eloquence to close the debate.

Mr. DICKEY. Do your best for us, if you will.

Mr. KOLBE. First of all, I want to thank the gentlemen for their contributions here this evening. I think in the course of these last almost 2 hours we have had at least seven Members from both sides of the aisle, politically speaking, on this subject, and again demonstrating the bipartisan nature of this debate.

In about 48 hours from now the American people will have an answer to a question, a very important question that is being asked right here in

the House of Representatives: Does the Congress of the United States, do the American people have the courage to face our future, to go forward, to compete in the world, or are we going to try to wall ourselves off from the rest of the world in what will be a futile attempt to somehow keep a fortress America in an area when there is no fortress America, because there is no fortress world out there? The debate that we will have in the course of these last 2 days will be extraordinarily important. I believe this vote will say everything about the future of this country, the direction that we are going to go in the next several years, to have the confidence to face that future, to believe that America can compete.

I know that this debate is going to be one of the most important that any of us will ever engage in, and I know that my colleagues understand that this vote is not only one of the most difficult they will ever cast, but it is also one of the most important, perhaps the most important vote we will cast in our entire careers in the Congress of the United States. And I believe that when that vote is taken in about 48 hours, I believe I know what the answer will be, because I believe I know what the American people will want their representatives to say, and that is that we have confidence in the future, we believe in ourselves, we believe that we can compete with the world.

But during the course of these next 48 hours, we will have an opportunity to go over some of these arguments again, and tomorrow evening, the last night on the eve of this great and historic debate and historic vote in this body we will have an opportunity once again to outline some of the arguments why the North American Free-Trade Agreement is good for America. It is good for American consumers, it is good for the American workers, it is good for our relationship with Mexico and all of Latin America, it is good for our children's future.

I thank the gentlemen for their contribution in this debate this evening.

NORTH AMERICAN FREE-TRADE AGREEMENT

The SPEAKER pro tempore (Mr. MENENDEZ). Under a previous order of the House, the gentleman from Illinois [Mr. POSHARD] is recognized for 60 minutes.

Mr. POSHARD. Mr. Speaker, as a Member of Congress who has studied this issue nearly 2 years, having attended literally hundreds of meetings and engaged my staff in much research, I concluded some time ago that the NAFTA was wrong for our country. And I know that honorable people looking at the same set of facts can disagree. Many of the folks that just spoke to us here are some of my best

friends in this Congress, and I have honest disagreement with them in regard to this particular issue.

I have held 12 public forums of 3 hours each in every part of my district over the past month to discuss and debate this agreement. I want to restate the major arguments for this NAFTA, many of which have just been made, and explain why I disagree with those arguments.

The first argument for NAFTA from those who favor this agreement is that this is a free-trade agreement and it will create thousands of jobs in this country by ending tariffs and creating more exports to Mexico to satisfy a growing Mexican market.

Well, true free-trade means that an industry competes for market share by building a better product than its competitor. When American firms compete in Europe or here at home, they have to win market share by wise management and by being more creative or more resourceful because our economies are nearly equal. There is no inherent advantages with respect to wages or benefits, or energy costs, or supplies and so on. True free trade does not win over our competitors by building a product at one-tenth the wages others must pay. But under NAFTA, a company can beat its competitor in this country by simply moving to Mexico and taking advantage of low wages and nonenforcement of environmental laws of that country.

The Mexican Government, which controls every variable of the Mexican economy, including wages and prices, purposely holds down wages and refuses to enforce environmental laws to entice United States manufacturers to Mexico.

□ 2300

I have here a copy of the article in the Business Week magazine of April 19, 1993, entitled "The Mexican Worker." It is describing the skill and the conditions of the Mexican worker in Mexico. It says, and I am reading in the Business Week article,

As Arriega and millions of other Mexican workers pursue their careers, few realize how closely their progress is monitored and controlled by government officials. Every Thursday morning for the past 6 years, a cadre of economists, including six cabinet members and top business leaders and union officials, has gathered around a large table in the Labor Secretariat offices in Mexico City. There they thrash out agreements that control prices and wages and brainstorm on ways to boost productivity. It is the kind of social pact that has been tried in many other Latin American countries, but only in Mexico with its one-party rule have such agreements stuck. Mandated by the country's leading economist, President Carlos Salinas, the goal is to lift the productivity of Arriega and his fellow workers to first-world levels. In their drive to modernize Mexico, Salinas and his planners command nearly every variable of the economy. To smother inflation and to preserve Mexico's huge labor-cost gap with the U.S. and other producers, Salinas

fixes salaries through a complex business-labor agreement that is known as 'El Pacto.' He annoints and boots out labor union bosses and state governors alike. Salinas' technocrats juggle import duties and steer investment from one region to another.

Total, absolute government control of all wages and prices, the very thing that the supporters of this NAFTA in this Congress would never agree to the American Government engaging in.

The Mexican worker has a minimum wage of 57 cents per hour and an average wage in the high-technology United States plants in Mexico of \$1.27 per hour with 34 cents per hour in benefits. Their wages were cut in half when President Salinas took office in the 1980's.

To this point in time, 5 years later, they have gained back only 13.5 percent of the 50 percent of the wages they lost while the productivity rate in Mexico has grown at 24.5 percent over that same 5-year period, a phenomenal growth.

The folks who just spoke here talked about a rising middle class in Mexico. How can there be a rising middle class when the minimum wage is 57 cents an hour? The workers in the United States factories there are making \$1.61 an hour, and 90 percent of the Mexican laborers make less than \$22 per day.

Their system allows United States manufacturers to build or move plants to Mexico which would otherwise be located in this country, costing us thousands of jobs in the process. Those same plants in Mexico ship their products back to this country and undercut American manufacturers who cannot compete with the low wage base and lax environmental enforcement in Mexico, again costing us additional thousands of jobs.

I have here a list of communities that I have represented over the past 5 years that have lost jobs to these cheap exports: Brown Shoe Co. in Murphysboro, IL, estimated employees, 500 people; Joe Mack Glove Co., 125 employees; Intuitions in Carbondale, 360 employees; Cal Crest Outerwear in Murphysboro, 200 employees; International Shoe in Chester, IL, Florsheim Shoes in Anna, IL, Good Luck Gloves in Metropolis, IL; Forest City Co., which has had plants in DuQuoin and Pinckneyville and many others, over 1,500 employees in the textile industries alone that have lost their jobs to these cheap imports flooding back into this country.

In 1992 the great majority of all American exports to Mexico were capital goods, that is, materials and machinery for building and operating American industrial plants in Mexico, and intermediate goods, raw materials, supplies and components for manufacturing, assembling, and exporting back to the United States.

The gentlemen before made the comment about the percentage of capital goods from this country going to other

countries of the world is just as high as it is, or as those that are going to Mexico. True. But capital goods from this country are not going to other countries to produce products for the U.S. market. They are being sent there to make products for the host country.

Barely over one-third of our exports to Mexico were targeted for the Mexican consumer market. Nearly two-thirds were targeted for the United States consumer market.

Herein lies the most significant difference between the pro-NAFTA and anti-NAFTA groups. It is the character of trade, which is the issue here.

Mexico is not building an economy based on satisfying its own consumer market which is what true free trade would do. It is building an export-platform-based economy meant primarily to satisfy the 260 million people in this country who have the highest purchasing power of any country in the world, equal to nearly all of the nations of Europe put together, and it is building that economy by siphoning off United States industries.

It means extremely high profits for the industry that move there, but a declining job base in America.

Many of our industries cannot compete against the flood of cheap imports and will either be forced to move to Mexico or drive down the wages of their employees in this country to stay in business.

NAFTA supporters claim that additional jobs will be created from increased exports. But when you factor in the job losses from the diversion of investment from this country to Mexico and the job losses from imports coming back into this country from Mexico, the net effect is a loss of jobs in this country.

The gentleman who just spoke admitted that we lost 3 million manufacturing jobs during the last decade, but only 130,000 of these to Mexico. Well, the others were lost to other low-wage countries.

We believe that NAFTA, with the additional provisions that it provides for security in Mexico, will simply exacerbate the flow of those jobs.

The administration points out that because of the more open trade in Mexico under the Salinas administrative reforms, we are now running a trade surplus of \$5 billion a year with Mexico, whereas before we were running a deficit.

Again, let us consider the whole picture. First, we ran large trade surpluses with Mexico from 1970 to 1981 before any of these so-called reforms.

I have here a diagram that the U.S. Trade Representative's office uses showing us in deficit with Mexico from 1983 until about 1991, and then going into a surplus of the last few years. But what you do not see and what is not being shown to you is that if you go all the way back to 1970, and you can see

that from 1970 through 1981, we were running a surplus with Mexico then, before any of these so-called reforms that have led to our surplus now.

Many economists believe that the surpluses that we ran in the 1970's and the surpluses we are running now, as well as the deficit that we ran in the 1980's, were caused by manipulation of the peso. Many economists, including Mr. Hufbauer of the Institute for International Economics, whom the proponents must often quote in favor of NAFTA, warn us that Mexico, which has overvalued the peso to finance its high debt with foreign capital and United States investment, will likely devalue the peso after the 1994 elections somewhere between 10 and 20 percent.

Just a 10-percent devaluation of the peso will wipe out any gains we may have achieved from eliminating the Mexican tariffs which average about 10 percent on our United States exports.

□ 2310

Second, nearly two-thirds of that \$5 billion surplus represents materials that are headed straight back to the United States. This contention that the average Mexican consumer now spends over \$450 per year on United States products, second only to Canada, is absolutely misleading. The administration arrives at this figure by dividing total United States exports to Mexico of \$40.5 billion by the 90 million Mexican citizens and concludes that each citizen spends \$450 per year on our goods. The great majority of our exports to Mexico never enter the Mexican consumer market; they are sent back here. The rest are consumed disproportionately by the people of Mexico who have the economic wherewithal to do so, but certainly not the Mexican laborer, 90 percent of which make less than \$22 per day.

Again, when you examine this agreement with respect to the character of trade, it is not a free-trade agreement which seeks to satisfy a growing consumer market in Mexico. It is a protected investment agreement to encourage United States manufacturers to move to Mexico to satisfy the consumer market in this country.

The second argument that is made in favor of NAFTA is that low wages in Mexico reflect low productivity. Firms are not moving to Mexico, so this argument goes, for low wages but to take advantage of the Mexican consumer market.

Well, many United States businesses publicly admit that they are going to Mexico for lower wages. Here is one ad, and I am sure many people in this country have seen it, which is run in trade magazines by the Mexican Government, citing its low wages in advertising for foreign investment. It shows an American businessman sitting at his desk scratching his head and he is

saying, "I can't find good, loyal workers for \$1 an hour within a thousand miles of here." At the bottom it says, "Yes, you can, Yucatan." It goes on to say that, "We are only 460 miles and 90 minutes by air from the United States. Labor costs under \$1 an hour, including benefits, far lower than in the Far East, and the turnover rate is less than 5 percent a year, and you can save over \$15,000 a year per worker if you had an offshore production plant here. So if you want to see how well you or your client manages while making your company more competitive, call for a free video tour of the state of Yucatan. And when the United States is too expensive and the Far East too far, yes, you can in Yucatan."

Here is an American firm, the Americas Industry Relocation Services, in Philadelphia, that sent a letter to a firm in my district in Effingham, IL. Here is the letter that they sent to him. It says,

DEAR SIR: With the pending passage of the North American Free-Trade Agreement, Mexico represents one of the best areas to expand your industrial base, market products, and substantially reduce your labor costs. The agreement will benefit all sectors, including the woodworking industry. We can set up new offshore operations 100 percent owned by you or in a joint venture with a Mexican partner. We can have your company successfully set up a facility in Mexico. We have a team of corporate, legal, and fiscal professionals, both United States and Mexican nationals, with years of experience in Mexico and Latin America.

They go on to send another sheet with this invitation that is a pro forma labor-savings worksheet, asking the owner of this company to fill this out. They give an example here of the difference in cost of labor in Mexico and the United States.

They say,

Assume you have U.S. labor with fringes at \$15 an hour times 40 hours' work per week, that is \$600 cost per worker per week in the U.S. If you have 100 employees times \$600 weekly wages 52 weeks a year, that is \$3,120,000 in wages and benefits you are paying in the U.S. Now, in Mexico, at \$1 an hour with fringes times 40 hours worked per week, that is \$40 cost per worker per week in U.S. dollars times 100 employees at a \$40 weekly wage, 52 weeks a year, that is \$208,000 yearly labor cost for 100 workers in U.S. dollars. So your saving per year in Mexico is \$2,912,000.

They already work it out for you and ask you to apply this worksheet to your own company. This is what is going on all over this country.

The Vice President said the other night that the Mexican worker is one-fifth as productive as the United States worker. Again let us consider the whole picture. NAFTA supporters combine the very poor, inefficient, non-productive agricultural sector of Mexico with the new high-technology visibility there by American manufacturers, and by doing so this pulls down the average productivity rate for the country as a whole. But when you compare

the export-based high-technology factory in Mexico with its counterpart factory in this country producing the same product, it is 85 to 100 percent as productive and the wages are 10 to 15 percent of the United States level.

The previous gentleman spoke about the American automobile manufacturing industry. You see the ads being run right now by Mr. Iacocca. They have said that we are selling 6,000 cars per year to Mexico; but by the year 2000 we will be selling 100,000 cars a year under this NAFTA.

What they do not tell you is that by the year 2000 we will be importing 1 million cars a year from Mexico. If it is cheaper to build a car in Mexico—or if it is cheaper to build a car in the United States than in Mexico, as was indicated, then why have 200,000 American manufacturing jobs moved there to manufacture cars? That is if we are only selling 6,000 cars per year there.

We are not moving there to satisfy the Mexican consumer market; we are moving there to build and assemble the cars and send them back into this market.

The export-based economy is what Mexico is building and it is United States investment that is building it, to the detriment of our own manufacturing base. The effect of this agreement will be to further depress wages in this country and to exacerbate wage competition between the United States and Mexican workers.

The result will be not to bring Mexican wages up to United States levels, but just the reverse.

The third argument from the pro-NAFTA side says that the cost of labor is only one element, maybe as low as 20 percent, in the cost of making a product. This is too small a factor for business to go to Mexico for labor costs.

But direct labor costs are only one factor. Indirect labor costs—in the form of cheaper construction costs, business services and lower taxes because of cheaper and fewer government services—also reflect cheaper labor in Mexico. Direct labor represents by far the largest share of what the employer considers controllable costs. It is assumed that business is already getting the lowest possible price for supplies and components, materials, energy, interest rates and so on, if they are managing their business correctly. If wages were not important, businesses would not spend high sums lobbying against anything which may increase them.

Firms which move to Mexico will actually gain the added advantage of buying components and supplies from firms in Mexico whose labor costs are also lower than they would be in the United States. Right now it is primarily the large manufacturers that are moving their factories to Mexico.

□ 2320

They can afford the loss of one or two factories if the Mexican Government

fails or chooses to nationalize their firms. They are not going out of business. The smaller supplier firms which may only have one or two factories or perhaps one or two patents on the product that they produce, they cannot risk the move.

Under NAFTA there are guarantees that nationalization of American companies will not happen and intellectual property rights are protected. Smaller and medium-size supplier firms all over this country will now have the security they need to move to Mexico and they will be under pressure from the large corporate plants they supply to move closer to the main assembly plant in Mexico. If the supplier plant does not want to move, it can easily be built in Mexico to take additional advantage of the low wage base.

Another argument that is put forward is that companies can move to Mexico. NAFTA will not stop the flight.

Well, NAFTA provides a psychological boost. It gives the U.S. Government's seal of approval here.

I mentioned earlier the protection of intellectual property rights which does not presently exist, which will be given security under this NAFTA, protection from nationalizing U.S. industries which does not currently exist will give security under this NAFTA. Other barriers will be removed, such as the remaining tariffs, but just as importantly, there will be guarantees that tariffs will not be raised.

All these things together are significant conditions that do not now exist and given the right agreement, all of these things would be welcomed and would be encouraged. Under the right circumstances of free trade, these things would be very desirable, but under this NAFTA which promotes an export platform based economy, these will only have the effect of further encouraging industry to leave this country.

Another argument. These jobs will eventually be lost anyway to low-wage countries, so it is better to lose jobs to Mexico than to Asia. We just heard that.

There are some jobs that would go to Asia if there were no low-wage alternatives in Mexico, but it is just as likely that NAFTA will divert Asian and European investment to Mexico that otherwise would have come to the United States and created jobs here. In any case, we can not be indifferent to the fate of whole industries.

I hear this comment all the time as I talk to folks who support this agreement. Well, there will be some winners and there will be some losers, as though people were just statistics.

Those hundreds of people that I just mentioned a moment ago in the textile industry who have already lost their jobs in apparels and textiles, they are not just statistics. They are real people

with real families and real needs and they are out of work now because of this policy and what this Agreement will continue to encourage. Other industries will face the same fate.

And what is our saving grace for the so-called statistics who are just going to be the losers? Well, it is retraining funds, and even under this Agreement that is being promoted the retraining funds have been cut back over half of what they were in the original agreement.

I represent on the southern end of my district coal miners. I watched the Clean Air Act being passed through this assembly. I heard about the saving grace then or retaining funds, of how we were going to retrain all these miners who were going to be put out of work, and in my state that is about 13,000 jobs.

Show me one miner today anywhere in my district after three years and thousands of job losses, show me one that has been retrained for a job anywhere near the \$30,000 to \$35,000 they were making before that Federal piece of legislation passed. And these folks will meet the same fate. We just brush them off as if they are just statistics.

The fourth argument, that NAFTA will slow down illegal immigration into the United States. Well, this is the same claim that was made under the Maquiladora plan nearly 30 years ago, and that arrangement has actually increased immigration by drawing Mexican workers to the border areas. Much of Mexico's growth under this NAFTA will continue to occur in the border areas because of its nearness to the United States markets.

In addition, under NAFTA 800,000 to 3 million Mexican farm families will be dislocated because of the agricultural products coming from this country into Mexico and because of the reforms that have already been initiated there in getting these people off the public lands and larger corporate agricultural interests farming both lands.

How many of these families will be flooding the border areas looking for work?

If Mexico had a decent wage base, these workers could stay in Mexico and sustain their families there, but on \$1.27 an hour with 34 cents an hour benefits, they will be crossing the border illegally and putting further pressure on American taxpayers to pay the bill.

Another argument, if we do not agree to this NAFTA, Mexico will make some sort of deal with the Japanese.

The key issue in NAFTA is increased access to the United States market. The Japanese are not going to give Mexican products increased access to their market. If we cannot get into Japan by threatening access to our consumer market, the largest in the world, how are the Mexicans going to do that with an economy 4 percent the size of ours?

Does anyone really believe that Japan is going to open up its doors in exchange for a tiny impoverished Mexican market? It is just as liable to believe that Japan would welcome this agreement so they could use Mexico as an export platform to ship their goods into the United States even easier.

The important point here is for the United States to maintain control over access to our own markets to use as leverage for getting better treatment in international trade.

The next argument, we must support President Salinas because he is a reformer. Well, President Salinas has made reforms in Mexico, but I am not sure most Americans would agree with many of those reforms.

Would most Americans agree to our government cutting every wage in the country by 50 percent, as President Salinas did when he took over?

Would most Americans agree for the government to maintain absolute control over wages and prices in the entire country?

Would most Americans agree to one party harassing and jailing opposition party members in order to maintain strike one-party control? I do not think so.

This week in this House you will see many hours of debate on NAFTA televised worldwide. You will not see one second of debate in the Mexican General Assembly, because there will be none. Opposition to NAFTA is not allowed there.

I cannot tell you the number of people who have testified before our committees here, who have spoken to us personally, journalists, professors, priests, who tell us that any stated opposition to NAFTA in Mexico is forcefully repressed. Almost every major human rights group has condemned the Salinas administration as being one of the most abusive governments in this hemisphere. Many of the Catholic Bishops in Mexico and over 300 religious organizations in this country have condemned this agreement.

Here is an ad that was run in a paper just last week here in Washington: "Reject this NAFTA, U.S. religious leaders appeal to Congress."

It is signed by hundreds of religious organizations in this country and Mexico who disagree with this agreement because of the abusiveness to Mexico's own people by this administration.

□ 2330

The European Economic Community faced a similar situation in building their free-trade agreement. They had four Third World economies with primarily one-party-rule government on their borders: Portugal, Spain, Greece, and Turkey. They knew, as it has been shown in Eastern Europe and the former Soviet Union, that totalitarian government, and free enterprise and trade cannot exist together. It is de-

mocracy and the free enterprise system which complement each other. The EEC demanded democratic reforms from these countries as a first priority for entrance into their free-trade alliance. We should learn from the European Economic Community.

Is it right to ask that democratic reforms take place in Mexico since we are going to be so heavily vested there? Under NAFTA it is the American taxpayer who will at least partially be responsible for the billions of dollars spent in infrastructure development in Mexico. Our banks, insured by the taxpayers of this country, will be underwriting and guaranteeing the security of billions of dollars of investment in factories in Mexico. Our taxpayers will be footing the bill for additional billions in environmental cleanup that presently exists because Mexico will not enforce its own environmental laws, and its claim of violation of national sovereignty in the side agreements will make future enforcement nearly impossible.

Not one Republican who supports this agreement, Mr. Speaker, has proposed a single new tax to pay for it, and not one Democrat who supports this agreement has proposed a single cut in other programs in our budget to pay for it. Additional cuts in our budget are supposed to go toward reducing our own \$4 trillion debt. The cost for this agreement is borne totally by the American taxpayer, not the industries who benefit most by moving there.

My colleagues, this agreement will be a model for the rest of this hemisphere. Mexico is the first pitch in the first inning. Central America and South America will be the next to join. The agreement is only a first step, and we need to get it right from the beginning.

It is not in our interest, and we should never encourage any other country in the world by entering into a free-trade agreement with them, to suppress the wages of their people or to ruin their own environment by maximizing the profits for anybody in the world. That is not what we stand for as a people. We have never stood for that. Is it not to our long range advantage to have a politically stable, democratically reformed government on our borders? Is it not to our advantage not to condone an abusive one-party-rule form of government? We have an opportunity here, by leveraging access to our own markets, to enact both economic and governmental reform which will ensure greater security for our future, but this NAFTA will not do that.

Mr. Speaker, this country is the bastion of democracy for the entire world, and yet we are giving a nod and a wink to a government in a free-trade agreement, so called, to further suppress their people, and what do my colleagues think the outcome of that will be for the other countries of Central

and South America who are waiting and who must come into this agreement eventually? Those of us who oppose this agreement know that we need a North American Free-Trade Agreement, we know that there will be competition from the Pacific Rim nations and the EEC in the future, we know we have to compete. The question is not a free trade agreement. It is what kind of free trade agreement.

My colleagues, I just want to share for a moment information from my own State of Illinois, information that came out before all of the incredible claims now of thousands of jobs being created in this place or that place or even, on the other side, of hundreds of thousands of jobs being lost. This is the Illinois Department of Employment Security's estimate of jobs for Illinois under this NAFTA that came out some time ago.

The North American Free-Trade Agreement is expected to increase Illinois jobs sustained by exports to Mexico by approximately 6,200 jobs from 1994 to 2000. These are just jobs created from exports, but they do not include the subtraction of jobs that we will lose from imports coming back into this country replacing our own jobs here or the diversion of investment away from this country to Mexico in the process.

The United States Council of Mexico-United States Business Committee, which represents the joint Chambers of Commerce between the two countries, says while the national job impact relative to total employment is expected to be small, the positive impact on Illinois is expected to be significant. The \$457 million increase in Illinois because exports generated from increased investment in Mexico is expected to expand employment by more than 10,300 new jobs over 10 years, 1,030 jobs a year after the NAFTA is fully implemented, that is, after at least 10 years. Illinois' net employment rolls will be over 4100 jobs greater than they would have been in the absence of NAFTA, 410 jobs per year, and those are the folks who are promoting this agreement, who support this agreement, 410 jobs a year, and I will not even deal with the job losses that are being claimed from the other side.

How significant an impact really is that to put the country through this type of an agreement? I represent a lot of oil and gas producers, small independents. I met with them this past week. Here is the assessment of the effect on their industry under this agreement.

A long term result of the above could be greater United States exports of crude oil from Mexico and possibly of refined products as well. These independent gas and oil producers which represent hundreds of jobs in our area, every time they meet with me they say that the only thing that is going to

save their industry is to shut off the cheap oil imports coming to this country or to put an oil import fee on them. Under this agreement we are going to get more foreign oil flooding this country. What is that going to do to the smaller independents?

The agriculture community in my district favors this agreement, and I understand that. I just want to read something to my colleagues. The administration funding plan assumes that NAFTA will increase commodity prices for U.S. farmers, thus decreasing the need for deficiency payments under the Commodity Credit Corporation by \$183 million over 5 years. However, USDA statistics show that the assumption of higher commodity costs resulting from increased export opportunities under NAFTA is not supported by past commodity price data.

□ 2340

The USDA statistics show, and I have them right here, from the USDA, the ERS, Economic Research Services of the USDA. And what do they show? They show that between 1984 and 1992, U.S. agriculture imports increased 14 percent, from 38 billion to 42 billion. However, during the same period average corn prices dropped 23 percent, from \$2.67 per bushel in 1984 to \$2.05 per bushel in 1992. Soybean prices dropped 8 percent, wheat 4 percent, and milk 2 percent between 1984 and 1992. Those are figures from the economic research statistics of the U.S. Department of Agriculture.

There is not necessarily a positive correlation between increased exports and increased farm prices to the farmer in the field. If that were true, the prices of agriculture products should have been going up during those years instead of going down while exports were increasing.

I favor a free-trade agreement, one which pays the Mexican laborers a decent wage so they can sustain themselves in their own country and truly become greater consumers of American products, including agriculture products from the State of Illinois.

Does it not stand to reason that if people were making more than \$1.27 an hour in wages and 34 cents an hour in benefits, if they were making \$3 an hour or \$3.50 an hour, that they could buy more agriculture products from any State in this country? That is what those of us who want a different NAFTA feel we need to be negotiating here.

We will sell more agriculture products with this NAFTA, but imagine how much more we could sell to a consumer in Mexico who has real earnings, a rising standard of living, and genuine buying power?

I favor a free-trade agreement, a free-trade agreement which requires Mexico to pay for the cleanup of its own mess and subscribes to enforceable environmental standards.

I favor a free-trade agreement, one which requires democratic reforms as the insurance for protection of the billions of dollars of American taxpayer investment in Mexico and for obvious future political stability in this hemisphere.

These are my views. I respect the views of those who disagree with me, both Democrat and Republican, for this is not a partisan issue.

On this floor tonight you heard some very conservative Republican friends support this agreement. Your heard some very conservative Republican friends oppose this agreement, Mrs. BENTLEY and others.

But I will be voting against this NAFTA because I do not think this is the right agreement for our country. Ladies and gentleman, I sat for 2 hours and listened to the previous speakers in favor of this agreement. I heard them ask the question, why is this NAFTA such a hard sell? And they suggested several things. They suggested that, well, it is political fear that we have, those of us who are opposed to this NAFTA. Others suggested that it is because we are beholden to PAC's. Others said that if we had a secret vote, NAFTA would win, implying, as the President did, that we are somehow voting against our conscience here. Another said that if we had term limits, we would not worry about our jobs and we would be voting for this agreement.

Well, I have never said this on the floor of the United States House of Representatives before. It is not something that I want to deal with here all that much with my colleagues. But I am against this particular agreement. I think we can negotiate a better deal. And I do not take one penny of PAC moneys.

I have been here 5 years. I do not take a penny, not from labor, not from business, not from anybody.

When I ran for office in 1987, I told the people of my district then that I do not want to be a career legislator. I am a government teacher. I have taught my children in the classroom about the concept of the citizen legislator, that we train ourselves for a profession, we serve in this national assembly for a time, and we voluntarily get out of here and let other folks have their shot at solving the problems.

I said if I am fortunate enough to be elected for 10 years by the will of the people, I will not serve any longer than that.

I am against this agreement, and I voluntarily limited myself to 10 years in this House, it so be the will of the people. The same thing that the folks who are suggesting that if there were term limits available, we would all be voting for this.

To suggest that the people of this great body, after all you have got to do through your life to get here, to want to be a part of helping to resolve and

solve some of the problems of this nature, to suggest that we would do anything on an issue this serious, to sell our votes or sell our soul just to get re-elected or because we are afraid of somebody, to even insinuate that is something that I would never do to another colleague, ever.

This is the greatest deliberative body on the face of the Earth. I think the people that serve here for the most part love this institution. We love this country, and we want to do what is right by this Nation. We weigh in balance sometimes for months and years, as in the case of this issue, so we can come to some understanding and some decision that is right with our conscience and right, at least on balance, in our judgment. And we ought never be accused by our colleagues or the President of the United States or anyone else of sacrificing our conscience or our judgment for our jobs.

The people who oppose this NAFTA oppose it because we think we can do better. We think this is wrong for our country. We have seen others do it differently and do it right. And we are simply asking, why cannot we negotiate an agreement that raises the wages of the Mexican laborer so they can buy more of our products and truly be consumers? Why can we not negotiate an agreement that gives each nation the responsibility of cleaning up its own mess? Why can we not negotiate an agreement, as the Europeans did, which would bring about political stability in a domestic fashion on our borders, for our children and future generations? Is there something wrong with wanting to do that?

Mr. Speaker, I do not think there is. I want a free-trade agreement, but I cannot in my conscience and I cannot in my judgment support this NAFTA. Therefore, I cannot vote for it in this House of Representatives.

□ 2350

IN OPPOSITION TO NAFTA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania [Mr. KLINK] is recognized for 60 minutes.

Mr. KLINK. Mr. Speaker, I apologize to those who are here for prolonging the evening, but it is an important debate which has occurred. And earlier, as my colleague from Illinois [Mr. POSHARD] said, we sat here and listened to those on the other side of the issue as they talked about all of the good arguments for this North American Free-Trade Agreement.

I agree with the gentleman from Illinois. I, too, am a free trader. I, too, would like to see a NAFTA agreement, but one that does not create problems, but one that solves problems.

As a founding member of the anti-NAFTA caucus, I thought that I had

calculated all of the problems with the North American Free-Trade Agreement. It became very evident to me that NAFTA is going to cause the export of hundreds of thousands of United States jobs. And there will be, as the previous speaker spoke, massive environmental degradation, a sharp decline in health and in safety standards. I really thought that I had enough reasons to vote against this NAFTA, but I will tell my colleagues, I really want to focus my comments this evening on what we have heard in the Banking, Finance, and Urban Affairs Committee, on which I serve.

We have heard several weeks of testimony concerning abuses within the Mexican political, regulatory, judicial, and financial services sector. What I am going to talk about this evening is not the opinion of this Congressman from Pennsylvania, but I am going to talk about the testimony that we have heard, what others are saying, others who have their own expertise about this NAFTA.

We heard testimony from Ms. Lucia Duncan, who described several accounts of Mexican courts allowing seizure, without cause, of property owned by Americans. I will talk more about that a little later on.

We also heard from IBM's political agent in Mexico, Mr. Kaveh Moussavi, who has been named public enemy number one by the Salinas government simply for filing a formal fraud complaint with the Mexican Government. When Mr. Moussavi contacted a Mexican attorney, because he wanted to obtain judicial redress in that nation, the attorney told him, and I quote her, "Your naivete is touching. This is not the United Kingdom, nor is it the United States."

Mr. Moussavi decided to go public with his case, again, which I will describe. He was threatened over the telephone that if he were to testify before this United States Congress about the corruption that he had found in Mexico, when he returned to Britain, which is where he lives, he would have one less child.

Mr. Alex Argueta, a developer from Tucson, AZ. He testified before the Banking Committee also, and he said that he is living proof that large, centralized banks in Mexico defraud their clients and then steal their savings. Mr. Argueta testified that gangster tactics were used against him after he obtained a \$20 million loan from a Mexican bank.

After he was held incommunicado in Mexico for 2 days, he was then imprisoned for 16 months. He was released only after he signed a promissory note which changed the terms of that loan, and subsequently, \$20 million of Mr. Argueta's money was confiscated by the Mexican Government. He has yet to get back his \$20 million.

These examples, along with a lack of banking regulations and a large vol-

ume of drug money being laundered by Mexican banks, give more and more reasons to oppose this NAFTA agreement.

I want to talk a little bit more about some other testimony that we have heard and just go over it in brief.

Mr. Chris Whelan, is a consultant from here in Washington, DC, at the Whelan Company. And essentially, when he came before the Banking, Finance and Urban Affairs Committee, he started off by saying, and this is pretty much a direct quote, I am a civil libertarian. He said, "I am an economic free trader. I want to see a free-trade agreement signed between Mexico and the United States."

But he then went on to say that the current economic policies of the Salinas government are to blame for stealing jobs from American workers. He said that Mexico has no commitment to civil liberties. They have no commitment to the protection of property rights and/or the rule of law.

Mr. Whelan went on to tell us that signing the NAFTA agreement with Mexico, in his words, "Mafia government," is going to undermine and corrupt the American financial and industrial operations by opening our economy to a system that is compromised by drug money, political fraud and of rising violence.

Mr. Whelan also told us that approval of the NAFTA will expose American banks and financial companies to an environment in which they cannot reliably determine who owns a given financial asset or real property and where there is no recourse in the event of default. That goes back to the comments I made about the previous witnesses.

NAFTA would eventually allow U.S. banks to purchase Mexican banks, to purchase Mexican insurance companies and even commercial entities. The NAFTA agreement would allow consumers to purchase financial services across the border. Mexican banks essentially are unregulated, when it comes to activities in investments. Mexican law allows the banks to affiliate with security firms, with insurance companies or even those commercial concerns.

The Mexican banks are essentially self-regulated insofar as the disclosure of financial data is concerned. The Mexican banks are allowed really to utilize private auditors that come in and make assessments of the loanportfolios and other aspects of the banking operations. Those audits, we have heard testimony, are simply rubberstamped by the National Banking Commission.

Now, when you take into account the issue of how the Mexican banks finance their operations, the banks in Mexico have deliberately followed a strategy of crossfunding their high-yield pesos loans along with credit card receiv-

ables and other local currency assets with less expensive dollar CD's, with overnight borrowings and with the issuance of foreign bonds dominated by the dollars and other currency.

Publicly available information has suggested the level of dollar liabilities in some of the bigger Mexican financial institutions runs as high as 30 percent in total liabilities, even though the Government regulations limit those dollar liabilities to only 20 percent.

We have also found that capital adequacy in the Mexican banks is not good. The Mexican banks do not follow generally accepted accounting principles. To operate in Mexico or even to acquire Mexican financial institutions is going to expose the United States banks to potentially huge losses, while increasing the process of political and societal corrosion in the United States due to narcotics trade and to related problems.

The other problem with this is that the FDIC still stands, that is the American taxpayers, stills stands behind the American banks. So this NAFTA allows our banks here to go down and invest in financial institutions, in insurance firms, and in other operations in Mexico while the American taxpayer stands behind those institutions in the form of FDIC guarantees.

We have had, Mr. Speaker, one savings and loan bailout. We do not need savings and loan bailout No. 2.

According to estimates, and again I am going back to Mr. Whelan's report to the Banking Committee, he said, according to estimates from sources inside Mexican and American law enforcement agencies, the total revenues from the production of marijuana and heroin in Mexico and the transshipment reached an astronomical total of \$100 billion in 1992.

I want to talk just briefly, too, about the comments of another witness before us. This was Mr. Andros Penlosi. He is an economist and parliamentary adviser on the staff of the Commission of Budget and Planning in the Mexican Chamber of Deputies. And he had some very interesting things to say.

He said that members of the State Party, the PRI Party, the Commission for Financing and Development of State Property, whose funds covered part of Carlos Salinas de Gortari's campaign costs, are now owners and are the principal beneficiaries of the sale and concessions of State businesses and services. That is right. The people who have contributed to President Salinas, the people who have been part of his party, who have helped him maintain his control of the Government, are now getting the sale and the concessions of State businesses and services.

To go on again with Mr. Penlosi's testimony before Banking, he said,

These entrepreneurs continue to influence national economic policies. They impose

their personal as well as group needs. They introduce self-serving measures and subsidies. The government supports them in opening markets and maintaining monopolies, in reducing and controlling competition, in setting prices and tariffs, in stimulating speculative activities with extraordinary profits.

□ 2400

Again, going back to Mr. Penaloza's comments, he calls it a Salinastroika system which he says has handsomely paid its sponsors, according to Forbes magazine, among the wealthiest persons in the world. There are now 13 Mexican super millionaires. That is 11 more than there were back in 1991, just in the past 2 years, 13 Mexican super millionaires. This number is surpassed only by the United States, Germany, and Japan.

To go back to what he is talking about is the fact that these people have supported the Salinas government, and as a result of being so supportive of their government, they have been able to buy into these businesses that are being sold off by the Mexican Government. The list, he said, includes various financiers: the Garza Sada family, which controls Vitro and G.F. Serfin. The third most important financial group in Mexico is on this list.

Carlos Slim, who, besides being the majority stockholder of Telmex, is now head of the recently authorized Banco Inbursa, which already includes some financial firms. The Garza Leguera family, along with other families, which control Bancomer, which is No. 2 in the Mexican financial system, these as well as other investor groups directed by Eugenio Garza Leguera control the Visa group. This is a conglomerate of 100 companies in various different fields: beer and soft drinks, other industrial, commercial, and service activities.

Many others, such as Alferdo Harpo Helo, which is Slim's cousin, and Roberto Hernandez, owner of largest Mexican financial group, Banamex, have been very active in the present administration.

Only 2 years after these financial groups have been formally established and reinforce the sale of banking systems, they handled more than 97 investment funds and some 60 financial firms, especially stock brokerage and banks, but the groups also hold retail stores, leasing companies, currency exchanges, billing companies, underwriters, insurance companies, investment funds, real estate companies, and other services.

Remember, under this NAFTA, banks from the United States will be doing business directly with these people who hold these financial institutions in Mexico.

He goes on to say, "There is a quid pro quo, and that is now the United States financial institutions," as I said, "will be able to do business in

Mexico that they cannot currently do in this country," and that is important. They can operate as financial groups. We know that the total assets of the Mexican financial system are equal to those of most important United States banks.

"Of the total financial resources in North America," and again, I am going back to Mr. Penaloza's testimony, he says, "Of the total financial resources in North America, the United States handles 95 percent, Canada 4 percent, and Mexico, with almost three times the population of Canada, has only 1 percent."

He goes on to say, "These terrible differences are reasons in themselves to deny the equality of competitive opportunity which, in certain moments in certain areas, might be applied. The most-favored-nation status," he says, "should be accompanied by the developing nation status in order to justify non-discrimination."

There again are a lot of other problems, and I will not go on at this moment into Mr. Penaloza's testimony, but it is quite extensive. I will talk, though, about what a lot of people thought was really a great idea. That was the creation of this North American Development Bank. As a result of this bank, we know that at least one Member of the House has decided to vote in favor of NAFTA. This was a wonderful thing, he said, the North American Development Bank. It gave him the cover to vote. We understand some other people said this may give them the cover.

Let me just tell the Members what happened last week in the Committee on Banking, Finance and Urban Affairs as we met to mark up the North American Development Bank Group. The chairman of the Subcommittee on International Development, Finance, Trade and Monetary Policy of the Committee on Banking, Finance and Urban Affairs, the gentleman from Massachusetts, BARNEY FRANK, reported back and recommended that that bill, the bill developing the NAD Bank, be turned out negative. I just want to read part of the letter he wrote to the chairman of the full Committee on Banking, Finance and Urban Affairs, the gentleman from Texas, HENRY B. GONZALEZ.

He says, "As presented, the proposal received virtually no responses from Members who attended the hearing and it is unclear how the administration could alter the proposal to make it more appealing." No. 1, "the basic concern—emphasized in the testimony of Representative DAVE OBEY—" of Wisconsin "was the uncertainty as to how the proposal would be funded."

We have heard this before: How are we going to pay for NAFTA, especially in view of the fact the United States is in arrears on the authorized commitment to existing international finan-

cial institutions by about \$819 million. We are in arrears to other financial international institutions by \$819 million, but to get a couple of votes for NAFTA we are going to create a new North American Development Bank. Mr. Speaker, it makes no common sense.

The gentleman from Massachusetts [Mr. FRANK] then goes on to say that an additional concern was that the NAD bank financing would need to be more concessional than the administration assumes and that the capital contribution would therefore not support the \$2 billion to \$3 billion of loans anticipated by the administration.

The subcommittee also believes that Members also questioned the logic and precedent of allowing an institution with substantial representation of foreign interests to participate in determining how this country, the United States, would use funds within its own borders.

No. 4, another issue about the NAD Bank was the issue of the proposed focus on water pollution and municipal solid waste, and it neglects other environmental problems, such as air pollution and toxic waste dumps.

Finally, the committee, in the letter to the gentleman from Texas [Mr. GONZALEZ], says, "It was suggested that much of the pollution in the area is attributable either directly or indirectly to the maquiladoras, and they should assume more responsibility for mitigating the impact on the environment." The companies that are making the money are making the pollution, in short, and they are not, under this NAFTA, responsible for paying for that clean up.

I want to go now to some other testimony before the Committee on Banking, Finance, and Urban Affairs. This is by John P. LaWare. For those who do not know Mr. LaWare, he frequently testifies before congressional committees and subcommittees. He is a member of the Board of Governors of the Federal Reserve, certainly someone who knows something about financial institutions. He talks about each country in this NAFTA agreement agreeing to allow financial institutions of other countries to establish and to operate in its market through subsidiaries.

He says, "Thus, a Mexican or a Canadian bank in the United States would be treated as a United States banking organization, and any non-banking activities of the affiliates of the bank will continue to be subject to provisions of the Bank Holding Act."

However, we should note that American companies, United States of America companies that move to Central America, move down to Mexico, will be able to end run banking laws. I will get into that a little bit further in the testimony.

One of the things that we also want to talk about is that those American

banks and security companies that go down there are going to have opportunities to provide sophisticated financial services to United States companies, as well as to Mexican firms, and that they will increasingly need the type of innovative services which the United States financial services companies excel in. We agree with that.

Mr. LaWare goes on to say, "Of course, the United States banks and bank holding companies will be subject to the same regulation of their Mexican operation by the Federal Reserve System as currently apply to all of their foreign operations." In other words, we are supposed to monitor what the United States banks do in Mexico. When in fact there is no regulation of the Mexican banks in their own country, how are we going to monitor and enforce laws in another nation? It simply does not make sense.

Again, the chairman, the gentleman from Texas [Mr. GONZALEZ] has talked about, in some of his testimony in the committee, and he has talked about it on the floor of this House of Representatives, some of the things that he is afraid as chairman of the full Committee on Banking, Finance and Urban Affairs will occur. One of the things that we are all afraid of that are on the committee is that large banks which have been very eager to bypass the Glass-Steagall Act, a law which prohibits bank holding companies from buying security firms or from buying insurance companies, that they now could buy Mexican banks, and that in Mexico they could operate a security firm or an insurance company, as well as leasing and managing the subsidiaries.

NAFTA limits United States participation in Mexico to subsidiaries of United States institutions until the United States permits interstate branch banking, which, of course, we have not done. We may, in the Committee on Banking, Finance and Urban Affairs be addressing interstate branching within the next few weeks, hopefully before this session of Congress is finished.

The biggest American banks will be able to engage in high-risk investments and there is no requirement in this NAFTA for these banks to put up adequate reserves should these investments go sour. Again, Mr. Speaker, this could lead to another bailout of the financial industry by the American taxpayer. It is another price of NAFTA that you will not hear those that are in favor of this NAFTA agreement ever refer to on the floor of this House.

NAFTA would result in even more difficulty, we have heard, in the Committee on Banking, Finance and Urban Affairs, of tracking money laundering.

□ 0010

I want to go to some more testimony, and again, this is not testimony by this

Member of Congress, but testimony before the Banking Committee by those who have come before us and have various expertise relating to the NAFTA. This is Mary Schapiro, who is the Commissioner for the U.S. Securities and Exchange Commission. She talks about the purchase and sale of Mexican securities by United States investors. They have jumped from \$363 million a year back in 1982 to a decade later, 1992, \$19 billion. Indeed, the largest Mexican company, Telmex, is more actively traded in New York than it is in Mexico City.

What you have to understand is that American companies, the multi-billion-dollar corporations, have found out that there is a gold mine in Mexico, and that, in my opinion, is what this NAFTA agreement is. It is what those who support this NAFTA agreement want.

In response to the increased cross-investment activities, the SEC has strengthened its relations with the security regulators in Canada and Mexico, but we have to wonder if they have done it enough.

Again, continuing with the testimony, and this is really one of the things that bothers me because, as you study the lack of enforcement in Mexico of their own laws, again I remind Members this is Mary Schapiro, Commissioner of the United States Securities and Exchange Commission, who says, "If the increase in securities activities among the three NAFTA countries leads to any need for increased enforcement of U.S. securities laws, the SEC's counterparts in Canada and Mexico will assist the SEC in their enforcement efforts." That is laughable, and we will talk about the enforcement in Mexico a little bit later on.

I want to talk again just briefly, we are getting only to the issues coming before the Banking Committee. There are some issues we have talked about, the interstate commerce, the trucks coming from Mexico, the usurping of the States' rights to set laws as it pertains to truck safety requirements, to weights, to lengths of trucks. I also get into the same issue, and Eileen Evans, a board member of the Texas Board of Insurance, chairperson of a NAFTA working group, testified before us. She really talked about, again, how big this NAFTA is. She said in her testimony, "It provides a framework for linking the insurance markets of the United States, Mexico, and Canada, thus forming the largest regional insurance market in the world, 38 percent of the world's insurance premiums." That is a whole bunch of money, and there is a lot of money to be made.

But one of the questions that came up, technical questions at the end of her testimony, was are the States' anti-trust laws affected, and the answer is this, that the Treasury Department's response has been that "State anti-

trust laws should not be impaired unless they are inconsistent with NAFTA." In other words, if they are inconsistent with NAFTA, we have a problem, and the States are left out in the cold.

Going to further testimony, this now gets into some of the regulation that we are going to have a problem with. I have this testimony by Steven Davidson, his testimony before our Banking Committee. He was the senior vice president of Ferguson & Co. What he talked about in his testimony, and I will just read one brief paragraph, he said, "In short, we must rely primarily on United States bank regulators to bear responsibility for adequate supervision of foreign operations of our financial institutions. Do not count on those regulators in Mexico taking care of us." He said it is his understanding that NAFTA does not explicitly address or require the exchange of examination and regulatory information between Mexican and United States banking authorities. I will repeat that again. It is his understanding, in testimony, that NAFTA does not explicitly address or require the exchange of examination or regulatory information between Mexican and United States banking interests.

Now one of the other things we are very concerned about is the devaluation of the peso, and we have heard some of that testimony this evening. In fact, the gentleman from Illinois [Mr. POSHARD], talked about that. I want to talk about this again. It goes back to Mr. Whalen. He wrote an article entitled "Coming Mexican Devaluation." And I want to read just parts of it. He talks about how in Europe the hard-currency block, led by Germany, still seemed to be moving toward some type of cohesive currency union. Yet, strangely enough, he says, "In the face of the movement in Europe toward a single trading and payment system, the question of a common monetary unit has not been included in the debate over the North American Free-Trade Agreement." Mr. Whalen continues saying, "Part of the reasons for this omission lie in the obvious fact that Canada, and to a much lesser degree Mexico, are already dependent on the U.S. economy, and thus are tied de facto to the dollar standard. Ottawa," he said, "acknowledges the need to maintain rough purchasing power parity between the Canadian dollar and the greenback and has been forced to take action in recent weeks and months to defend the Canadian dollar against its southern counterpart. Mexico's monetary posture, however, is far less wedded to any stable measure of purchasing power parity, and Mexico has historically been tied very closely to the availability of external financing, and more recently a short-term portfolio investment."

Now I want to talk again just briefly and sum up what Mr. Whalen has said.

And there are some very succinct points in this. "Strangely, in fact, in the face of the movement in Europe toward a single trading and payment system as they form the common market, the question of a common monetary unit has not been included in the NAFTA debate. Salinas is in the incredibly untenable position of defending a fundamentally weak currency, while imports of raw materials and of manufactured goods pour across Mexico's newly opened borders. The rising trade deficit and what it implies for Mexico's ability to earn badly needed foreign exchange is ominous. After reaping almost \$10 billion in the first 6 months of this year, the overall deficit now seems to be headed for about \$20 billion. The recent decision by the Mexican Government to increase the rate of devaluation of the peso to roughly 5 percent annually represents a turning point in the economic stability program forged by the Salinas government, but the downward move in the peso is not going to be the last."

I will read testimony from some other people who also agree with this, and who are well able to make that determination.

"Even with the obvious need for Mexico to adjust its competitive position, there is no monetary mechanism either actual or in prospect in the NAFTA to smooth the way for the inevitable adjustment of the value of the peso. Mexican companies are increasingly turning to the foreign bound market in an effort to raise funds not available from the foreign equity markets or the domestic peso capital markets. By using inflows of foreign investment and private borrowings to finance Banco de Mexico's dollar funding, the Salinas government is essentially mortgaging Mexico's future in terms of future inflation and investor confidence."

In fact, what they are trying to do is hold off devaluation until after we vote this week on the NAFTA.

"In order for the peso-based non-maquiladores industries to attract badly needed capital, they must be profitable. The first ingredient needed to ensure a favorable investment environment is a competitive peso/dollar exchange rate, which does not exist now."

I want to go back to an article from March of this year, and things have not changed. In fact, I think you will see that more has happened to really prove this true over the course of the year. And the headline reads "Some Fear Sharp Peso Devaluation After NAFTA." The subhead line is "Mexico's move would reduce surplus with U.S." And this was in the *Journal of Commerce*. It starts out saying that "several trade experts are warning that Mexico could sharply devalue the peso after the North American Free-Trade Agreement takes force, and thereby reduce the U.S. trade surplus with Mexico."

Again, we have heard testimony in the Banking Committee that backs this up. They say in the article that "Mexico could play a 'nasty trick' on its U.S. supporters through such a devaluation." That is according to Jorge Castinada, a Mexican visiting professor at Princeton University who warned a House committee last week when he said such a devaluation would aim to sharply reduce United States exports to Mexico. Now Mr. Castinada is one of several trade experts who is anticipating a peso devaluation.

The United States, which until 2 years ago was in chronic deficit with Mexico, last year scored a record \$5.4 billion surplus. That is according to the U.S. Commerce Department reports.

□ 0020

Worldwide, Mexico's worldwide merchandise trade deficit last year jumped to about \$20 billion, according to unofficial estimates, and some economists believe it will swell further even this year.

Partly behind those trade patterns, though, is the overvalued peso. Although the Mexican Government is methodically letting the peso depreciate against the dollar by nearly 5 percent a year, it does not offset Mexican inflation which last year was about 12 percent. An overvalued peso reflects a deliberate Mexican effort to contain inflation.

Now, Gary Hofbauer, who is a senior fellow at the Washington-based Institute for International Economics, said that he anticipates a fairly substantial devaluation in the peso sometime next year. He doubts there will be a devaluation before the U.S. Congress acts to bring NAFTA into force.

Now, this article is from March. We are going to vote on NAFTA this week, and you may see something next week, but he thinks that otherwise they may also hold off until after the Mexican elections next year. Otherwise he is expecting a significant peso devaluation, and he is believing that devaluation could be somewhere between 10 and 20 percent, and it might be politically timed to occur shortly after the Mexican election for President which is in August of 1994.

He estimates that a 10- to 20-percent devaluation, and this is again Gary Hofbauer, the senior fellow of the Washington-based Institute of International Economics, his estimate is that this 10- to 20-percent devaluation would stop the United States trade surplus with Mexico from growing, or would reduce it modestly.

Again, going into other testimony before the Committee on Banking, Finance and Urban Affairs, and this is Gregory Woodhead from the Trade Task Force, again, going into the same idea of devaluation of the peso and how this is going to affect the trade balance

between the United States and Mexico. Again, Mr. Woodhead says that first there is a significant economic pressure to devalue the peso relative to the dollar. The overvalued peso is contributing to a surge in imports pushing Mexico's current-account balance into deficit.

Secondly, he said there is an extreme political pressure to maintain an overvalued peso at least until President Salinas' successor has been elected and NAFTA has been ratified.

To devalue sooner would reduce confidence in the Mexican development program, place the issue of succession in doubt, and would raise another obstacle to the implementation of a North American Free-Trade Agreement.

In recent history of Mexican exchange rate policy, together with present economic pressure suggests that this devaluation is going to occur.

Now, let us just talk about the peso in recent history. By the end of 1987, there were four traumatic devaluations of the peso in just over a decade, with Mexico trapped in a vicious cycle of peso overvaluation, then sharp devaluation, and then flaming inflation led to peso overvaluation. In February of 1977 the peso devalued from a fixed rate of 1 U.S. dollar to 12.5 pesos to 1 U.S. dollar to 22.7 pesos. By the end of 1987, 1 U.S. dollar was worth 2,209 pesos. It continued to devalue to, by the end of 1992, 1 U.S. dollar was worth 3,100 pesos.

Again, going back to Gregory Woodhead from the Trade Task Force, he says in his testimony before our committee there is now substantial economic pressure again to devalue the peso. In 1992, Mexico's merchandise trade deficit jumped to \$21 billion, and the trend is to grow further with devaluation running at a rate of 2.5 to 4 percent a year. The current devaluation rate does not offset the difference between United States and Mexican rates of inflation.

Again, that rate of inflation for Mexico last year was 12 percent.

When I first began, I talked about several different cases, that just testified before us, and I think a week or so ago. One of the gentlemen who testified before us was from IBM. His name was Kevin Moussavi, and as I said during my introduction of this special order, Mr. Speaker, he has been named Public Enemy No. 1 by the Salinas government. This is someone who worked for IBM who was down there trying to put a bid in on upgrading their air traffic control system in Mexico which is really defective.

What he got for his trouble was a solicitation for a bribe of \$1 million which IBM, being a good government citizens, turned down, would not pay,

and when they went public, he was declared Public Enemy No. 1 by the Salinas government, had his life threatened, and the lives of his family members threatened.

I want to read just a few segments of a letter that he wrote to our chairman, the gentleman from Texas [Mr. GONZALEZ], chairman of the full Committee on Banking, Finance and Urban Affairs. He said, "I have represented American and other foreign companies in Mexico." These are the words of Mr. Moussavi, "and other developing countries for many years. This experience," says Mr. Moussavi, "leads me to draw your attention to important issues with respect to public procurement that have a direct bearing on whether Mexico can or will live up to its commitments within the broader framework of a NAFTA. I speak in particular," he says, "about the bidding process which Mexico began last August in order to upgrade that country's air traffic control system. The urgency of the task," he says, "was underlined by the fact that in Mexico City alone the volume of daily traffic, air traffic, has grown from less than 100 landings per day in 1988, 5 years later, they have 500 planes landing per day." He said that in November of last year after the first round of bids, and again Mr. Moussavi was representing IBM, they put a bid in on the new equipment.

He said he was approached by three individuals who, without a shadow of a doubt, had extremely close connections to the Ministry of Communications and Transport. Those men asked Mr. Moussavi to pay a \$1 million bribe in order to assure that IBM would win the contract. Now, the men did not ask him to give them the money. Listen where they wanted this money to go: They wanted that million dollars taken and specifically made in the form of a donation to the Solidarity Corps, or the public works program that was started by President Carlos Salinas 3 years earlier. He said, "I refused the request, and 10 days later the Mexican Government suddenly, and without a meaningful explanation, canceled the tender on the grounds that none of the companies participating had met the necessary technical specifications, and a few days later the Mexican Government invited these very same companies to submit new bids for the same project."

He says that the terms and the specifications for the new tender were so dramatically changed that he and IBM had little doubt that the earlier tender had been canceled by someone with great political influence, someone who needed a way of reducing the price to win the deal. He says that there was no question that the enormous influence-peddling, favoritism, and unfair bid-rigging of bids had been taken against his client, IBM, and that this was the explicitly stated opinion of IBM offi-

cers who were with him on the scene at the time of the tender.

Now, the five losing bidders in this were some well-known companies. Raytheon was one; Comequip of Miami; WestinghouseCorp.; Siemens; some very well known companies.

Each one of these companies and the countries from which those companies are based filed written protests with the Mexican Government saying that the bidding had been mishandled and that their bids fully met all required technical specifications.

The embassies of the United States, the United Kingdom, and Japan also protested to the Mexican Government.

The Canadian Trade Minister, Mr. Michael Wilson, formally wrote to the then Transportation and Communications Director complaining about the irregularities in this tender.

Mr. Moussavi goes on to say that based on this intimate personal knowledge of these bids he can say that most of the losing proposals submitted were superior to that of the package that was ultimately chosen, and yet the protests were all brushed aside by the Mexican Government even though they were filed formally by the embassies of these countries.

No meaningful investigation took place by the Government of Mexico. Mr. Moussavi says that, "IBM and I decided to go public with our concerns. Apart from the irregularities of the tender, we were anxious about the safety aspects of the award and the potential danger to anyone flying into Mexico who as dependent upon this air traffic control system."

He says with the support of IBM early, back in the early part of this year, 1993, he briefed the Financial Times of London, and he described the events that surrounded the bidding for the new air traffic control system for Mexico. This then led to the publication of a number of stories on the episode starting back on February 3, 1993.

He says that after publication of the first story, officials of the Mexican Government began extremely hostile public campaigns in an attempt to discredit Mr. Moussavi.

He says that he himself was the victim of bribery, but he found himself on the defensive. They were attacking him simply for coming forward and saying a bribe had been made or had been offered. His sole offense was to report that attempted bribe and to raise serious questions about a process for procuring a computer and a radar system vital for protecting the safety of tens of thousands of people who travel through Mexican airspace.

□ 0030

And yet senior officials in the Mexican Government, he says, preferred to attack him on television and the press, threatening him. In May of this year he said he received a copy of a letter

dated March 17 from the Technical Assessment Group to President Salinas. The letter made a number of very important points, essentially decrying any of the previous attempts to really upgrade the Mexican air traffic control system. He says apart from the sustained campaign of libel and character assassination engaged in by the Government of Mexico, he also has had to suffer death threats; that is, he and his family. In his own country he had to obtain special police protection. The Government of Mexico threatened journalists who tried to interview him.

Consular officials of the Mexican Government had, in fact, intervened directly to intimidate journalists from Mexico, at least one of whom subsequently lost her job as a result of taking interest in the Moussavi/IBM case. All of these incidents have been brought to the attention of the authorities in the United Kingdom.

Now, I have a serious problem, Mr. Speaker, when anyone is threatened with their life or the life of a family member for testifying in front of the U.S. Congress. We cannot have anyone intimidated, anyone threatened for coming to the U.S. Congress and giving us information pertinent or otherwise.

We will make the determination, but we need as much information not only on NAFTA but on any issue that this House of Representatives must decide. For any entity anywhere in the world to threaten those witnesses if they come before the Congress is absolutely deplorable and, I think, should be condemned.

I want to get away from Mr. Moussavi for just a second and talk about some other people who testified before us. Their testimony was equally disturbing.

The next witness I want to talk about again was just here 2 weeks ago. Her name was Lucia Duncan. She resides in Las Vegas, NV, and is a coordinator for a group, American Investors in Mexico. She said she is of Mexican ancestry, speaks fluent Spanish, has lived in Mexico for many years both as a child and as an adult. Therefore, Mexico was always one of her favorite countries. She loved to go there.

She told us that she and her husband both share a great love for the Mexican culture, for the music, the food, the life style. Several years ago after traveling extensively in Mexico, they finally realized their dream of owning property in Mexico. After a lot of comparison shopping, they purchased a condo in the Baja Peninsula. Almost immediately, Mr. Speaker, they encountered a barrage of problems. They say their problems were not devastating, but, you have to remember here is someone who knows Mexico, someone who knows the language, someone who can handle herself. She said the first problem came up shortly after they purchased their unit, again a condo in the

Baja. They offered it as a vacation wedding gift to some friends. When they arrived at the condo, they were informed—on their honeymoon—by the staff that the room was not available. This was only the first problem.

You have to remember they owned the unit, but when they get there, people down in Mexico say, "I am sorry, the room is not available." They had rented it out.

Now, this is only the first of many similar problems. They said these problems began to take their toll on them.

They said they had another problem with the management company, involving mismanagement of funds.

This time, they were able to file a complaint with a newly formed consumer protection agency. Filing this complaint, though, involved many hurdles, one of which was the need to resubmit the complaint in Spanish. They said it was extremely difficult and frustrating. It took months to eventually resolve the problem.

She went on to say that she feels she succeeded only because she is familiar with Mexican customs and was able to translate the letters into Spanish herself.

One of the other stories she tells is a problem down there about who owns what property. One serious problem, she said, relates to land controlled by the Ejido. Ejido are basically local Indians who have been granted the right to occupy and to use certain property under Mexican law. They have the right to lease the property to others on a relatively short-term basis, but they cannot transfer title of land.

In addition, they have the right to extend the lease and to continue occupying the land even after constructing substantial improvements, basically at the whim of the Ejido Indians.

While in Mexico, they met a man who had acquired property from the Ejidos, at least he thought he had acquired the property. This property consisted of a gutted, abandoned structure built over 40 years earlier. The gentleman invested 10 years of his life and virtually all of his assets to create a charming and economically successful hotel with an additional 34 custom homes, an investment that represented millions of dollars for him and for the American families who invested in these homes. Now that the hotel is completed and is successful, a local businessman in Mexico and the Ejido Indians have decided they want the land back, including the hotel, including the 34 homes, and of course they want it back for free. This poor man has exhausted his health, he has exhausted his wealth, and he has fought the confiscation of his property. In spite of his efforts and in spite of the obvious injustices of this situation, it is very possible that he is going to lose everything that he has worked for.

And, again, going back to Ms. Duncan's testimony, she talks about an-

other case involving a group of approximately 150 investors from the United States who purchased hotel suites in Puerto Vallarta. After investing \$8,000, they found that the Mexican management group was time-sharing their units, the units that they thought they owned. Even struggling years later they still cannot find anyone in the United States who will listen to their problems or offer any real help except to put the person directly responsible for their problems in charge back in Mexico. She said as one of the homeowners succinctly put it, it was like putting the person in charge of our problems is like putting the fox in charge of the chicken coop. She said one of the members was actually ordered out of the homeowner meeting at gunpoint.

Again, she says most of the cases she is familiar with involve individuals, but there are other stories. She talked about an amazing story about a gentleman named Bill Flanagan, who is a Houston businessman who was awarded a judgment against Pemex and others. The judgment totaled over \$450 million. Mr. Flanagan spent many years of his life involved in this dispute and, in spite of the validity of his claims, in spite of the fact that he won the judgment, he has been unable to collect \$1 of the money that is due him.

What do you say to individuals who have spent years of their lives and struggled with injustice and they go down to Mexico to make investments and then they have no recourse? That is the testimony that we heard.

I just want to talk briefly, too, about one other incident which I think has not received as much notification as it does. I will wrap up after this. This is a news release when we were away on the August recess. We were away and not a lot of attention was given to NAFTA and other issues.

This release came out of the U.S. Department of Justice, the office of J. Ramsey Johnson. "United States Attorney J. Ramsey Johnson announced that Robert Bostick, the former Associate Deputy Undersecretary for International Labor Affairs at the United States Department of Labor pleaded guilty in the United States Department of Labor pleaded guilty in the United States District Court today for agreeing to accept 10 percent of the net profits from a Mexican worker housing project to be constructed on the United States/Mexican border." He is working for us, but he wants 10 percent kick-backs.

Again he pleaded guilty.

"Mr. Bostick entered into the agreement while he was a Department of Labor official with responsibilities that included", Mr. Speaker, Mr. Bostick's responsibilities included "negotiating on the North American Free-Trade Agreement," the agreement that we are going to vote on 2 days from

now. He is one of the negotiators on that. He pleaded guilty to taking kick-backs to housing programs that are going to be built on the Mexican-United States border.

A spokesperson for the United States attorney noted "Mr. Bostick pleaded guilty to agreeing to accept a percentage of the net profits from a project that was at one time anticipated to generate up to \$10 million in net profit. Mr. Bostick faces a maximum sentence of 5 years in prison and a fine of \$250,000. Mr. Johnson praised the investigators from the Office of the Inspector General and everyone else who was involved."

But how much have we heard about this, someone working on the North American Free-Trade Agreement on our side pleads guilty and he is going to prison and is going to have to pay a big fine?

□ 0040

I want to read just a little bit if I can again from the U.S. District Court document which came down. It says, repeating again:

As part of his responsibilities, the defendant, Robert Bostick, was involved in an effort to promote low-income housing subsidized by the Mexican government for low-paid Mexican workers living along certain sections of the United States-Mexican border. Mr. Bostick's responsibilities included oversight for technical assistance programs concerned with Mexican labor standards and their enforcement.

Mr. Bostick's responsibilities also included working on the North American Free Trade Agreement by (1) assisting in the actual negotiating on NAFTA, by (2) developing an adjustment assistance program, and (3) managing a technical assistance program and cooperating with Mexico to help address concerns regarding Mexican labor standards and their enforcement.

So we keep hearing, Mr. Speaker, about how this agreement is going to be fixed. There are going to be special concessions to peanut farmers, to sugar farmers, to financial resources, to flat glass, all these holes in this fast-track agreement are going to be fixed, yet we see this gentleman, Mr. Bostick, who was one of those people who was supposed to be in there fixing this agreement, negotiating this agreement, but he wants 10 percent of \$10 million that is going to be made when this low-income housing for the Mexican workers is going to be constructed.

The document goes on to state how he talked with four executives, identified only as Executive A, B, C, and D, and how he conspired and set up really a fraudulent way of getting this money to him. They had different names, an intermediary's name put on the document, later Mr. Bostick's name was put on the document instead of the intermediary, but he was supposed to get the money.

But again, he pleaded guilty. He said, "I did it."

But how many times, Mr. Speaker, have we heard the proponents of the

North American Free-Trade Agreement talk about these problems, talk about those who know about the devaluation of the Peso taking place, 10 to 20 percent, and what that is going to do to our balance of trade with Mexico.

Mr. Speaker, there are so many other reasons why we should vote "no" on this North American Free-Trade Agreement. I am sure that over the debate that is going to take place this week we will be hearing a lot of those.

I just want to say to the other Members of the House who may be watching this late at night, to others who may be watching on C-SPAN, I have only talked tonight about the testimony in front of one committee, the Committee on Banking, Finance and Urban Affairs; one set of issues, but Mr. Speaker, you can see not only the devaluation of the Peso, but the banks and other institutions of this country going to Mexico and running our banking laws, creating the possibility of another bailout by the American taxpayer.

We need a North American Free-Trade Agreement. I really believe that, but this is a flawed agreement. We cannot change this agreement. We cannot make it better. We have got all these side agreements which the administration keeps waving in front of everyone and the proponents keep waving, but you have heard by what I have read here tonight here from the testimony, there is no enforcement in Mexico.

The gentleman I told you about won a \$450 million settlement. He cannot get a dime.

Mr. Argueta, \$20 million of his money was taken simply because he would not do business the way the Mexican Government wanted him to do business.

Mr. Speaker, again I probably will be rising and taking my position against the NAFTA many times over the next couple of days as we try to get as many votes as we can, and then pledge to work very hard after we defeat this NAFTA to go back and secure an agreement that will work for the people on both sides of the border.

With that, Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore (Mr. MENENDEZ). The Chair would caution Members against addressing their remarks to a television audience.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. CLEMENT (at the request of Mr. GEPHARDT) for today on account of official business.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mrs. BENTLEY) to revise and extend their remarks and include extraneous material:)

Mr. TALENT, for 60 minutes, on November 18.

Mr. GUNDERSON, for 30 minutes, on November 18.

Mr. WELDON, for 5 minutes today, in lieu of previously ordered 60 minutes.

Mrs. BENTLEY, for 5 minutes today, in lieu of previously approved 60 minutes.

(The following Members (at the request of Mr. KOPETSKI) to revise and extend their remarks and include extraneous material:)

Ms. KAPTUR, for 5 minutes each day, on November 15, 16, 17, and 18.

Mr. GONZALEZ, for 5 minutes each day, on November 15, 16, and 17.

Mr. WISE, for 5 minutes, on November 16.

Mr. KOPETSKI, for 60 minutes each day, on November 16 and 18.

Mr. MILLER of California, for 60 minutes each day, on November 15 and 16.

Mr. DE LA GARZA, for 60 minutes each day, on November 15 and 16.

Mr. MARTINEZ, for 60 minutes, on November 16.

Ms. NORTON, for 60 minutes, today.

Mr. FALCOMAVEGA, for 60 minutes, on November 16.

Mr. KLINK, for 60 minutes, today.

Mr. GONZALEZ, for 60 minutes each day, on November 18 and 19.

Mr. JOHNSON of Georgia, for 60 minutes each day, on November 17, 18, 19, and 20.

Mr. HINCHEY, for 15 minutes, on November 16.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mrs. BENTLEY) and to include extraneous matter:)

Mr. HORN.

Mr. SOLOMON.

Mr. GILMAN.

Mr. PACKARD.

Mrs. MORELLA.

Mr. LEWIS of California.

Mr. HYDE.

Mr. HANSEN.

Mr. BATEMAN.

Mr. ROHRBACHER.

(The following Members (at the request of Mr. KOPETSKI) and to include extraneous matter:)

Mr. HAMILTON.

Mr. BONIOR.

Mr. ROSTENKOWSKI.

Mr. TRAFICANT.

Mr. SHARP.

Mr. BRYANT.

Mr. OBEY.

Mr. ENGEL in two instances.

Mr. MORAN.

Mr. BLACKWELL.

Mr. NADLER.

Mr. ANDREWS of Texas.

Mr. LEWIS of Georgia.

(The following Members (at the request of Mr. DREIER) and to include extraneous matter:)

Mr. DE LA GARZA.

Mr. RICHARDSON in two instances.

Mr. NADLER.

Mr. BATEMAN.

(The following Members (at the request of Mr. KLINK) and to include extraneous matter:)

Ms. WOOLSEY.

SENATE BILL REFERRED

A bill of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S. 1621. An act to revise certain authorities relating to Pershing Hall, France; to the Committee on Veterans' Affairs.

SENATE ENROLLED JOINT RESOLUTION SIGNED

The SPEAKER announced his signature to an enrolled joint resolution of the Senate of the following title:

S.J. Res. 142. Joint resolution designating the week beginning November 7, 1993, and the week beginning November 6, 1994, each as "National Women Veterans Recognition Week."

BILLS PRESENTED TO THE PRESIDENT

Mr. ROSE, from the Committee on House Administration, reported that that committee did on the following date present to the President, for his approval, bills of the House of the following titles:

On Nov. 9, 1993:

H.R. 175. An act to amend title 18, United States Code, to authorize the Federal Bureau of Investigation to obtain certain telephone subscriber information; and

H.R. 1345. An act to designate the Federal building located at 280 South First Street in San Jose, CA, as the "Robert F. Peckham United States Courthouse and Federal Building."

ADJOURNMENT

Mr. KLINK. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 12 o'clock and 45 minutes a.m.), the House adjourned until today, Tuesday, November 16, 1993, at 12 noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2132. A letter from the Acting Chairman, Commodity Futures Trading Commission, transmitting the Commission's study of swaps and off-exchange derivatives trading, pursuant to Public Law 102-546; to the Committee on Agriculture.

2133. A letter from the Comptroller General, the General Accounting Office, transmitting a report of deferrals of budget authority in the General Services Administration building programs that should have been, but were not, reported to the Congress by the President, pursuant to 2 U.S.C. 686(a) (H. Doc. No. 103-168); to the Committee on Appropriations and ordered to be printed.

2134. A letter from the Director, the Office of Management and Budget, transmitting the cumulative report on rescissions and deferrals of budget authority as of November 1, 1993, pursuant to 2 U.S.C. 685(e) (H. Doc. No. 103-167); to the Committee on Appropriations and ordered to be printed.

2135. A letter from the Under Secretary of Defense, transmitting Selected Acquisition Reports [SARS] for the quarter ending September 30, 1993, pursuant to 10 U.S.C. 2432; to the Committee on Armed Services.

2136. A letter from the Director, Congressional Budget Office, transmitting their report on evaluating DOD's certification regarding expansion of the CHAMPUS Reform Initiative into Washington and Oregon, pursuant to Public Law 102-484, section 712(c) (106 Stat. 2436); to the Committee on Armed Services.

2137. A letter from the Acting Chairman, Federal Deposit Insurance Corporation, transmitting the Corporation's semiannual report of activities and efforts relating to utilization of the private sector, pursuant to 12 U.S.C. 1827; to the Committee on Banking, Finance and Urban Affairs.

2138. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of D.C. Act 10-141, "Water Main Break Fund Establishment Temporary Act 1993," pursuant to D.C. Code, section 1-233(c)(1); to the Committee on the District of Columbia.

2139. A letter from the Auditor, District of Columbia, transmitting a copy of the report "Lawrence Street Warehouse Lease," pursuant to D.C. Code, section 47-117(d); to the Committee on the District of Columbia.

2140. A letter from the Auditor, District of Columbia, transmitting a copy of the report "Contracting Out For Prison Cell Space," pursuant to D.C. Code, section 47-117(d); to the Committee on the District of Columbia.

2141. A letter from the Secretary of Education, transmitting notice of final funding priorities—Rehabilitation Short-Term Training, pursuant to 20 U.S.C. 1232(d)(1); to the Committee on Education and Labor.

2142. A letter from the Secretary of Education, transmitting the 15th annual report on the implementation of the Individuals with Disabilities Education Act, pursuant to 20 U.S.C. 1401, et seq; to the Committee on Education and Labor.

2143. A letter from the Secretary of Energy, transmitting the annual report on the State Energy Conservation Program for calendar year 1992, pursuant to 42 U.S.C. 6325; to the Committee on Energy and Commerce.

2144. A letter from the Director, Defense Security Assistance Agency, transmitting notification of the Department of the Navy's proposed Letter(s) of Offer and Acceptance [LOA] to the CCNAA for defense articles and services (Transmittal No. 94-09), pursuant to 22 U.S.C. 2776(b); to the Committee on Foreign Affairs.

2145. A letter from the Deputy Director, Defense Security Assistance Agency, transmitting notification of the Department of the Navy's proposed Letter(s) of Offer and Acceptance [LOA] to Greece for defense articles and services (Transmittal No. 94-06), pursuant to 22 U.S.C. 2776(b); to the Committee on Foreign Affairs.

2146. A letter from the Deputy Director, Defense Security Assistance Agency, transmitting notification of the Department of the Navy's proposed Letter(s) of Offer and Acceptance [LOA] to Turkey for defense articles and services (Transmittal No. 94-05), pursuant to 22 U.S.C. 2776(b); to the Committee on Foreign Affairs.

2147. A letter from the Deputy Director, Defense Security Assistance Agency, transmitting notification of the Department of the Air Force's proposed Letter(s) of Offer and Acceptance [LOA] to Singapore for defense articles and services (Transmittal No. 94-04), pursuant to 22 U.S.C. 2776(b); to the Committee on Foreign Affairs.

2148. A letter from the Assistant Secretary for Legislative Affairs, Department of State, transmitting notification of a proposed license for the export of major defense equipment and services sold commercially to the United Arab Emirates (Transmittal No. DTC-43-93), pursuant to 22 U.S.C. 2776(c); to the Committee on Foreign Affairs.

2149. A communication from the President of the United States, transmitting a report on developments since his last report of June 30, 1993, concerning the national emergency with respect to Haiti, pursuant to 50 U.S.C. 1703(c) (H. Doc. No. 103-165); to the Committee on Foreign Affairs and ordered to be printed.

2150. A communication from the President of the United States, transmitting notification that the emergency regarding export control regulations for chemical and biological weapons is to continue in effect beyond November 16, 1993, pursuant to 50 U.S.C. 1622(d) (H. Doc. No. 103-166); to the Committee on Foreign Affairs and ordered to be printed.

2151. A letter from the Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting copies of international agreements, other than treaties, entered into by the United States, pursuant to 1 U.S.C. 112b(a); to the Committee on Foreign Affairs.

2152. A letter from the Director, Office of Management and Budget, transmitting OMB estimate of the amount of change in outlays or receipts, as the case may be, in each fiscal year through fiscal year 1998 resulting from passage of S. 1548 and H.J. Res. 228, pursuant to Public Law 101-508, section 13101(a) (104 Stat. 1388-582); to the Committee on Government Operations.

2153. A letter from the Treasurer, Army and Air Force Exchange Service, transmitting the actuaries' report for the retirement plan for employees of the Army and Air Force Exchange Service; for the supplemental deferred compensation plan for members of the executive management program; and the general information sheet for the retirement savings' plan and trust for employees of the Army & Air Force Exchange Service, pursuant to 31 U.S.C. 9503(a)(1)(B); to the Committee on Government Operations.

2154. A letter from the Chairman, Farm Credit System Insurance Corporation, transmitting the annual report under the Federal Managers' Financial Integrity Act for fiscal year 1992, pursuant to 31 U.S.C. 3512(c)(3); to the Committee on Government Operations.

2155. A letter from the Secretary of Labor, transmitting the ninth report on trade and employment effects of the Caribbean Basin Economic Recovery Act, pursuant to 19 U.S.C. 2705; to the Committee on Ways and Means.

2156. A letter from the Assistant Attorney General for Legislative Affairs, and Assistant Secretary of Marketing and Inspection Services, USDA, transmitting a corrected re-

port on the extent and effects of domestic and international terrorism in animal enterprises, pursuant to Public Law 102-346, section 3(b); jointly, to the Committees on Agriculture and the Judiciary.

2157. A letter from the Under Secretary for Acquisition, Department of Defense, transmitting the third quarter calendar year 1993 report identifying contracts awarded with a waiver of the prohibition on contracting with entities unless they certify that they do not comply with the secondary Arab boycott of Israel, pursuant to Public Law 102-396, section 9069(b)(2) (106 Stat. 1917); jointly to the Committees on Armed Services and Appropriations.

2158. A letter from the Assistant Secretary for Environmental Restoration and Waste Management, Department of Energy, transmitting the report of the record of decision on "Decommissioning of Eight Surplus Production Reactors at the Hanford Site, Richland, Washington"; jointly, to the Committees on Armed Services, Merchant Marine and Fisheries, and Energy and Commerce.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. GONZALEZ: Committee on Banking, Finance and Urban Affairs. H.R. 3225. A bill to support the transition to nonracial democracy in South Africa; with an amendment (Rept. 103-296, Pt. 3). Ordered to be printed.

Mr. MINETA: Committee on Public Works and Transportation. H.R. 3445. A bill to improve hazard mitigation and relocation assistance in connection with flooding, to provide for a comprehensive review and assessment of the adequacy of current flood control policies and measures, and for other purposes; with an amendment (Rept. 103-358). Referred to the Committee of the Whole House on the State of the Union.

Mr. MINETA: Committee on Public Works and Transportation. H.R. 2121. A bill to amend title 49 United States Code, relating to procedures for resolving claims involving unfiled, negotiated transportation rates, and for other purposes; with an amendment (Rept. 103-359). Referred to the Committee of the Whole House on the State of the Union.

Mr. BROWN of California: Committee on Science, Space, and Technology. H.R. 3485. A bill to authorize appropriations for carrying out the Earthquake Hazards Reduction Act of 1977 for fiscal years 1994, 1995, and 1996 (Rept. 103-360, Pt. 1). Ordered to be printed.

Mr. ROSTENKOWSKI: Committee on Ways and Means. H.R. 3450. A bill to implement the North American Free-Trade Agreement (Rept. 103-361, Pt. 1). Ordered to be printed.

Mr. GONZALEZ: Committee on Banking, Finance and Urban Affairs. H.R. 3450. A bill to implement the North American Free-Trade Agreement; adversely (Rept. 103-361, Pt. 2). Ordered to be printed.

Mr. DINGELL: Committee on Energy and Commerce. H.R. 3450. A bill to implement the North American Free-Trade Agreement (Rept. 103-361, Pt. 3). Ordered to be printed.

Mr. MILLER of California: Committee on Natural Resources. H.R. 2620. A bill to authorize the Secretary of the Interior to acquire certain lands in California through an exchange pursuant to the Federal Land Policy and Management Act of 1976; with amendments (Rept. 103-362). Referred to the

Committee of the Whole House on the State of the Union.

Mr. MILLER of California: Committee on Natural Resources. H.R. 3286. A bill to amend the act establishing Golden Gate National Recreation Area to provide for the management of the Presidio by the Secretary of the Interior, and for other purposes; with amendments (Rept. 103-363). Referred to the Committee of the Whole House on the State of the Union.

Mr. MILLER of California: Committee on Natural Resources. H.R. 1137. A bill to amend the Geothermal Steam Act of 1970 (30 U.S.C. 1001-1027), and for other purposes; with an amendment (Rept. 103-364). Referred to the Committee of the Whole House on the State of the Union.

Mr. MILLER of California: Committee on Natural Resources. S. 433. An act to authorize and direct the Secretary of the Interior to convey certain lands in Cameron Parish, LA, and for other purposes; with an amendment (Rept. 103-365). Referred to the Committee of the Whole House on the State of the Union.

Mr. BROWN of California: Committee on Science, Space, and Technology. H.R. 3400. A bill to provide a more effective, efficient, and responsive government; with amendments (Rept. 103-366, Pt. 1). Ordered to be printed.

Mr. MONTGOMERY: Committee on Veterans' Affairs. H.R. 3400. A bill to provide a more effective, efficient, and responsive government; with amendments (Rept. 103-366, Pt. 2). Ordered to be printed.

Mr. CLAY: Committee on Post Office and Civil Service. H.R. 3400. A bill to provide a more effective, efficient, and responsive government; with amendments (Rept. 103-366, Pt. 3). Ordered to be printed.

Mr. MINETA: Committee on Public Works and Transportation. H.R. 3400. A bill to provide a more effective, efficient, and responsive government; with amendments (Rept. 103-366, Pt. 4). Ordered to be printed.

Mr. MILLER of California: Committee on Natural Resources. H.R. 3400. A bill to provide a more effective, efficient, and responsive government; with amendments (Rept. 103-366, Pt. 5). Ordered to be printed.

Mr. ROSE: Committee on House Administration. H.R. 3400. A bill to provide a more effective, efficient, and responsive government; with an amendment (Rept. 103-366, Pt. 6). Ordered to be printed.

Mr. STUDDS: Committee on Merchant Marine and Fisheries. H.R. 3400. A bill to provide a more effective, efficient, and responsive government; with amendments (Rept. 103-366, Pt. 7). Ordered to be printed.

Mr. BROOKS: Committee on the Judiciary. H.R. 3400. A bill to provide a more effective, efficient, and responsive government; with amendments (Rept. 103-366, Pt. 8). Ordered to be printed.

Mr. DE LA GARZA: Committee on Agriculture. H.R. 3400. A bill to provide a more effective, efficient, and responsive government; with amendments (Rept. 103-366, Pt. 9). Ordered to be printed.

Mr. GONZALEZ: Committee on Banking, Finance and Urban Affairs. H.R. 3400. A bill to provide a more effective, efficient, and responsive government; with an amendment (Rept. 103-366, Pt. 10). Ordered to be printed.

SUBSEQUENT ACTION ON A REPORTED BILL SEQUENTIALLY REFERRED

Under clause 5 of rule X the following action was taken by the Speaker:

[Submitted November 12, 1993]

The Committee on Government Operations discharged from further consideration of H.R. 881; H.R. 881 referred to the Committee of the Whole House on the State of the Union.

[Submitted November 15, 1993]

The Committees on Armed Services, Banking, Finance and Urban Affairs, Education and Labor, Foreign Affairs, Government Operations, Energy and Commerce, Permanent Select Committee on Intelligence, and Ways and Means discharged from further consideration of H.R. 3400; H.R. 3400 referred to the Committee of the Whole House on the State of the Union.

The Committees on Agriculture, Foreign Affairs, Government Operations, Judiciary, and Public Works and Transportation discharged from further consideration of H.R. 3450; H.R. 3450 referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Ms. BYRNE:

H.R. 3506. A bill to amend the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 with respect to interest on amounts recoverable under that act; jointly, to the Committees on Energy and Commerce and Public Works and Transportation.

By Mr. PARKER (for himself, Mr. MONTGOMERY, Mr. WHITTEN, Mr. OBERSTAR, Mr. HANCOCK, Mr. JEFFERSON, Mr. PENNY, Mr. SABO, Mr. EMERSON, Mr. TAUZIN, Mr. LIVINGSTON, Mr. FIELDS of Louisiana, Mr. THOMPSON, Mr. TAYLOR of Mississippi, and Mr. POMEROY):

H.R. 3507. A bill to amend the Internal Revenue Code of 1986 to provide a tax exemption for health risk pools; to the Committee on Ways and Means.

By Mr. RICHARDSON:

H.R. 3508. A bill to provide for tribal self-governance, and for other purposes; to the Committee on Natural Resources.

By Mr. STUDDS (for himself, Mr. MANTON, Mr. YOUNG of Alaska, and Mr. FIELDS of Texas):

H.R. 3509. A bill to approve a Governing International Fisheries Agreement; to the Committee on Merchant Marine and Fisheries.

By Mr. WASHINGTON:

H.R. 3510. A bill to eliminate segregationist language from the second Morrill Act; to the Committee on Agriculture.

By Mr. GILMAN (for himself, Mr. MURTHA, Mr. SOLOMON, and Mr. HYDE):

H.J. Res. 292. Joint resolution to approve and encourage the use by the President of any means necessary and appropriate, including diplomacy, economic sanctions, a blockade, and military force, to prevent the development, acquisition, or use by North Korea of a nuclear explosive device; to the Committee on Foreign Affairs.

By Mr. MORAN (for himself, and Ms. BYRNE):

H.J. Res. 293. Joint resolution to provide for the issuance of a commemorative postage stamp in honor of Capt. Francis Gary Powers; to the Committee on Post Office and Civil Service.

By Mr. ACKERMAN (for himself, Mr. FALEOMAVAEGA, and Mr. LEACH):

H. Con. Res. 180. Concurrent resolution expressing the sense of the Congress with respect to the South Pacific region; to the Committee on Foreign Affairs.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 65: Mr. SAM JOHNSON.

H.R. 163: Mr. GALLO and Mr. BACHUS of Alabama.

H.R. 349: Mr. KILDEE and Mr. WHEAT.

H.R. 401: Mr. KYL.

H.R. 429: Mr. GALLO.

H.R. 546: Mr. NEAL of North Carolina and Mr. TORRES.

H.R. 760: Mr. NADLER.

H.R. 1047: Mrs. THURMAN, Mr. MORAN, Mr. COPPERSMITH, Mr. KLUG, Mr. FINGERHUT, Mr. BARRETT of Wisconsin, Mr. SWETT, Mr. CLEMENT, Mr. HAMBURG, Mr. ROYCE, Mr. KANJORSKI, Mr. GENE GREEN of Texas, Ms. PELOSI, Mr. SHAYS, Mr. ANDREWS of Maine, and Mr. SANDERS.

H.R. 1168: Mr. MCHALE.

H.R. 1276: Mr. HYDE.

H.R. 1295: Mr. BAKER of Louisiana.

H.R. 1595: Mr. ENGEL.

H.R. 1620: Mr. ZELIFF.

H.R. 1622: Mr. ZELIFF.

H.R. 1627: Mr. BLUTE and Mr. ENGEL.

H.R. 1719: Mr. JOHNSON of South Dakota.

H.R. 2059: Mr. ZELIFF.

H.R. 2121: Mr. ZELIFF, Mr. STEARNS, Mr. FRANKS of New Jersey, and Mr. ENGEL.

H.R. 2135: Mr. TRAFICANT, Mr. POMBO, Mr. SLATTERY, Mr. JEFFERSON, Mr. SHAYS, Mr. SKEEN, Mr. LIVINGSTON, and Mr. DE LUGO.

H.R. 2159: Mr. GORDON.

H.R. 2161: Mr. ZELIFF.

H.R. 2173: Mr. FLAKE.

H.R. 2219: Mr. ZELIFF.

H.R. 2227: Mr. KINGSTON, Mrs. CLAYTON, Mr. DIAZ-BALART, and Mr. FISH.

H.R. 2292: Mr. BILIRAKIS.

H.R. 2335: Mr. ENGEL.

H.R. 2365: Mr. ZELIFF, Mr. KREIDLER, Mr. UPTON, Mr. DEAL, Mr. ANDREWS of Maine, Mr. GLICKMAN, Mr. SLATTERY, Ms. LAMBERT, and Mr. JOHNSON of Georgia.

H.R. 2429: Ms. WATERS, Mr. GREENWOOD, Mr. SANDERS, Mr. MURPHY, Mrs. MINK, Mr. BECERRA, Mr. LANTOS, Mr. BEILENSON, Ms. FURSE, Mr. DIXON, Mr. PALLONE, Mr. GEJDESON, Mr. STRICKLAND, Mr. HALL of Ohio, Mr. HORN of California, and Mr. PETE GEREN of Texas.

H.R. 2443: Mr. KLUG, Mr. GEJDESON, Mr. CARDIN, Mr. LEWIS of Georgia, Mr. YOUNG of Alaska, Mr. ROGERS, Mr. DIXON, Mr. VIS-CLOSKY, Mr. MENENDEZ, Mr. FAZIO, Mr. WELDON, Mr. MICA, Mr. TUCKER, Mr. CLYBURN, Mr. PARKER, Mr. GREENWOOD, Mr. TRAFICANT, Mr. TAUZIN, Mr. FORD of Michigan, Mr. SCHIFF, Mr. FAWELL, Mr. SISISKY, Mr. HALL of Ohio, Mr. BARTON of Texas, Mr. QUILLEN, Mr. SKELTON, Mr. MCHALE, Ms. ROS-LEHTINEN, Mr. SABO, Mr. HUGHES, Mr. REYNOLDS, Mrs. VUCANOVICH, Mr. BOUCHER, Mr. VOLKMER, Mr. GOSS, Mr. BLACKWELL, Mr. MCKEON, Mr. HUNTER, Mr. THOMAS of California, and Mr. INHOPE.

H.R. 2461: Mr. COYNE.

H.R. 2469: Mr. OBERSTAR and Mr. MINGE.

H.R. 2541: Mr. ZELIFF.

H.R. 2599: Mr. ANDREWS of Maine and Ms. BYRNE.

H.R. 2622: Mr. GALLEGLY and Mr. BARCA of Wisconsin.

H.R. 2663: Mr. KOPETSKI, Mr. GINGRICH, Mr. ABERCROMBIE, and Mr. DEFazio.

H.R. 2788: Mr. BISHOP.
 H.R. 2789: Mr. SHAYS, Mr. KIM, and Mr. EMERSON.
 H.R. 2803: Mr. JEFFERSON, Mr. DOOLEY, and Mr. BREWSTER.
 H.R. 2831: Mr. SANDERS.
 H.R. 2835: Mr. RAMSTAD.
 H.R. 2898: Mr. HINCHEY.
 H.R. 3017: Mr. SMITH of Oregon.
 H.R. 3086: Mr. ZELIFF, Mr. UPTON, and Mr. JACOBS.
 H.R. 3097: Mrs. CLAYTON and Mrs. THURMAN.
 H.R. 3098: Mr. LAZIO, Mr. GUTIERREZ, and Mr. COPPERSMITH.
 H.R. 3137: Mr. SANTORUM, Mr. ZIMMER, Mr. TORRES, Mr. ANDREWS of Texas, Mr. EMERSON, Mr. GILLMOR, Ms. BYRNE, and Mr. LEWIS of Florida.
 H.R. 3205: Mr. TAYLOR of Mississippi, Mr. TORRES, and Mr. GLICKMAN.
 H.R. 3206: Mrs. LLOYD.
 H.R. 3213: Mr. FISH.

DELETIONS OF SPONSORS FROM PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, sponsors were deleted from public bills and resolutions as follows:

H.R. 3325: Mr. FRANK of Massachusetts.

EXTENSIONS OF REMARKS

U.N. PEACEKEEPING—PART IV

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Monday, November 15, 1993

Mr. HAMILTON. Mr. Speaker, in a continuing effort to keep my colleagues informed on U.N. peacekeeping, I am today submitting a list provided by the Department of State on November 5, 1993, of all U.N. peacekeeping forces and related missions.

Each peacekeeping mission is briefly described, along with the total U.N. cost—of which the United States pays 30.4 percent—as well as the number of United States and other forces involved in each mission.

U.N. PEACEKEEPING FORCES AND RELATED MISSIONS¹

MIDDLE EAST

UN Truce Supervision Organization (UNTSO).

Established: 1948; Personnel: 219 (17 U.S.); Estimated Cost (1993): \$31 million.

UNTSO was established with a mandate of indefinite duration to supervise the truce in the Arab-Jewish hostilities called for by the Security Council at the end of the British mandate in Palestine. It has performed a variety of tasks since then, including assisting UNDOF and UNIFIL. Approximately twenty countries furnish observers.

UN Disengagement Observer Force on the Golan Heights (UNDOF).

Established: May 31, 1974; Personnel: 1,130 (0 U.S.); Estimated Cost (1993): \$43 million.

UNDOF monitors the buffer zone between Israeli and Syrian forces on the Golan Heights. Its six-month mandate has been renewed each November and May. Troops are provided by Austria, Canada, Finland and Poland.

UN Interim Force in Lebanon (UNIFIL).

Established: March 19, 1978; Personnel: 5,264 (0 U.S.); Estimated Cost (1993): \$153 million.

UNIFIL was established to assist in restoring peace in southern Lebanon. Its six-month mandate has been renewed each January and July. Fiji, Finland, France, Ghana, Ireland, Italy, Nepal, Norway, Poland and Sweden furnish troops.

UN Iraq-Kuwait Observation Mission (UNIKOM).

Established: April 9, 1991; Personnel: 333 (15 U.S.); Estimated Cost (1993): \$75+ million.

UNIKOM monitors the demilitarized zone between Iraq and Kuwait set up in the aftermath of the Gulf War. Thirty-three countries furnish observers. Its mandate continues indefinitely until all five permanent Security Council members agree to terminate its operations. Difficulties in finding troops and funding have delayed its planned expansion.

UN Force in Cyprus (UNFICYP).

Established: March 4, 1964; Personnel: 1,005 (0 U.S.); Estimated Cost (1994): \$47 million.

UNFICYP was created in 1964 to halt violence between the Turkish Cypriot and

Greek Cypriot communities and to help maintain order on the island. In 1993, troop contributors, unreimbursed by the UN for many years, demanded a down-sizing of the force and a switch from voluntary to assessed contributions. After the Greek and Cypriot governments agreed to pay more than half of the \$47 million annual cost of a reduced force proposed by the Secretary General, the Security Council agreed to fund the balance through assessments. Austria, the United Kingdom and Argentina currently are the major troop contributors. UNFICYP's six-month mandate has been renewed each May and December.

UN Protection Force (UNPROFOR) (former Yugoslavia) (Chapter VII with the exception of Macedonia).

Established: February 21, 1992; Personnel: 24, 822 (647 U.S.); Estimated Cost (1993): \$900 million.

UNPROFOR was initially established with a twelve-month mandate as an interim arrangement to create the conditions of peace and security required for the negotiation of an overall settlement of the Yugoslav crisis. Through subsequent Security Council resolutions, functions were added to its mandate, including providing security at Sarajevo airport, monitoring certain areas in Croatia, protecting humanitarian convoys, deploying observers in Macedonia, and enforcing an arms embargo on Bosnia-Herzegovina. More than twenty nations contribute personnel. Its current mandate expires March 31, 1994.

UN Observer Mission in Georgia (UNOMIG).

Established: August 24, 1993; Personnel: 88 authorized (0 U.S.); Estimated cost: \$16 million for six months.

UNOMIG is to monitor compliance with the cease-fire agreement reached between the Republic of Georgia and Abkhaz separatist forces on July 27. Its mandate is for six months, but it is to extend beyond ninety days only after consideration by the Security Council of a report from the Secretary General on whether the parties are making progress toward implementing peace. Four military observers and four civilian staff had been deployed when recent fighting initiated by Abkhaz forces in violation of the cease-fire agreement caused the UN to suspend deployment.

ASIA

UN Military Observer Group in India and Pakistan (UNMOGIP).

Established: January 5, 1949; Personnel: 38 (0 U.S.); Estimated Cost (1993): \$5 million.

Created to assist in the implementation of the cease-fire agreement of January 1, 1949, between India and Pakistan, UNMOGIP observes, reports, and investigates complaints from the parties on violations of the cease-fire. States providing personnel are Belgium, Chile, Denmark, Finland, Italy, Norway, Sweden, and Uruguay. UNMOGIP's mandate is of indefinite duration.

UN Transitional Authority for Cambodia (UNTAC).

Established: February 28, 1992; Personnel: 12,669 (4 U.S.); Estimated Cost (1993): \$1.9 billion.

UNTAC's mission was to restore and maintain peace, promote national reconciliation, and ensure the exercise of the right to self

determination of the Cambodian people through free and fair elections. Its mandate expired with the formation of a new government in September 1993. The withdrawal of UNTAC's personnel is to be completed by November 15, 1993. More than thirty countries provided troops or observers.

AMERICAS

UN Observer Mission in El Salvador (ONUSAL).

Established May 20, 1991; Personnel: 362 (0 U.S.); Estimated Cost (1993): \$49 million.

Its initial mandate to monitor the human rights agreement between the Government of El Salvador and the Farabundo Marti National Liberation Front (FMLN) was expanded on January 14, 1992 to include monitoring the cease-fire, separating combatants, observing the dismantling of the FMLN military structure, and observing the reintegration of the FMLN into Salvadoran society. The Security Council recently extended its mandate through the scheduled March 1994 elections. Seventeen countries have personnel in ONUSAL.

UN Mission in Haiti (UNMIHAT).

Established: September 23, 1993; Personnel: 1,267 authorized, to include approximately 600 U.S. Sea Bees and military trainers. Estimated Cost: \$50 million for first six months.

On August 31, 1993 the Security Council approved an advance team of not more than 30 persons for not more than 30 days to prepare for a possible deployment of the proposed 1,100 plus mission. On September 23, the Security Council approved the Secretary General's recommendation that the full mission consist of about 567 international police monitors to accompany local Haitian security force personnel, approximately 700 military construction personnel and a 50-60 person military training unit. The U.S. will contribute forces to the latter two elements of the mission.

The mission is for a period of six months, with the proviso that it be extended beyond 75 days only upon review by the Security Council of a report by the Secretary General that substantive progress has been made toward implementation of the Governors Island accords.

Deployment of forces was suspended October 14 after an armed gang blocked a ship carrying peacekeepers from docking in Port au Prince.

AFRICA

UN Mission for the Referendum in Western Sahara (MINURSO).

Established: April 29, 1991; Personnel: 349 (32 U.S.); Estimated Cost (1993): \$80 million.

MINURSO was charged to conduct a referendum on whether Western Sahara, a former colony from which Spain unilaterally withdrew, should become independent or integrated into Morocco. Its mandate was expected to terminate in January 1992, but failure by the parties to agree on procedures for the conduct of the referendum has led to an extension of MINURSO's deployment. Twenty-eight countries have provided civilian or military personnel. The UN Secretary General's plan calls for an ultimate deployment of approximately 2,900 military and civilian personnel to help conduct the referendum.

¹ Costs estimates are for UN total. Personnel data is as of August 31, 1993.

● This "bullet" symbol identifies statements or insertions which are not spoken by a Member of the Senate on the floor.

Matter set in this typeface indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

UN Angola Verification Mission (UNAVEM II).

Established: May 30, 1991; Personnel: 74 (0 U.S.); Estimated Cost (1993): \$173 million.

UNAVEM's original mandate was to monitor a cease-fire between government forces and UNITA rebels, assist in preparations for elections in September 1992, and monitor the polls. Elections proceeded relatively well, but UNITA rebels disavowed the results and resumed full-scale warfare. Although the United Nations has sought to encourage dialogue between UNITA and the government of Angola, it has been unsuccessful. UNITA forces appear intent on consolidating their military gains. The Security Council approved a three-month extension of UNAVEM II's mandate on September 15 and imposed sanctions, including an arms embargo, on UNITA. Approximately twenty-four countries have participated in the military operation.

UN Operation Mission in Somalia (UNOSOM II) (Chapter VII).

Established: April 24, 1992; Personnel: 23,331 (2,805 U.S.); Estimated cost (1993): \$1.5 billion.

UNOSOM's original mandate was to monitor a cease-fire in Mogadishu and to provide security for humanitarian assistance personnel. After the situation on the ground deteriorated, the Security Council on December 3, 1992, authorized, under Chapter VII of the Charter, member states to utilize "all necessary means" in establishing a secure environment for humanitarian relief operations. This became the U.S.-led Unified Task Force (UNITAF). The post-UNITAF UNOSOM II's objectives were established in UNSCR 814 of March 26, 1993, and include promoting national reconciliation, assisting Somalis in re-establishing their political institutions and economy, providing humanitarian assistance, and assisting in the repatriation of refugees. UNOSOM's current mandate expires on November 18.

On October 7, President Clinton announced that all but a few hundred non-combat support troops would be withdrawn from Somalia no later than March 31, 1994.

UN Operation in Mozambique (ONUMOZ).

Established December 16, 1992; Personnel: 6,498 (0 U.S.); Estimated Cost (1993): \$330 million.

ONUMOZ is to assist in the implementation of the agreement between the Government of Mozambique and Mozambique National Resistance (RENAMO) to end Mozambique's civil war. The UN forces will monitor the cease-fire and demobilization of combatants and provide security for humanitarian relief missions. ONUMOZ's mandate expires on November 5, 1993, but is likely to be extended through the elections now planned for no later than October 1994. Italy, Uruguay, Zambia, Bangladesh and Botswana are major troop contributors.

UN Observer Rwanda/Uganda Mission (UNOMUR).

Established: June 22, 1993; Personnel: 81 authorized Estimated Cost (1993): \$6-8 million.

UNOMUR's mission is to deploy on the Ugandan side of the border and verify that no military assistance to Rwandan rebels is transported across the border from Uganda. UNOMUR's initial six-month mandate expires December 21, 1993, and in any case no later than new national elections in Rwanda. It will soon be integrated within UNAMIR, which (see below) was established on October 5, 1993.

UN Assistance Mission for Rwanda (UNAMIR).

Established: October 5, 1993. Personnel: 800 authorized. Estimated Cost for six months: \$63 million.

UNAMIR's mission is to deploy lightly-armed UN peacekeepers to Rwanda to monitor observance of the August 4 peace accords leading to national elections within 22 months and to assist with mine clearing, repatriation of refugees, and the coordination of humanitarian assistance activities in Rwanda. UNOMIR's initial six month mandate expires on April 5, 1994, but could be extended until the end of December 1995. No UNAMIR troops have yet been deployed to Rwanda.

UN Military Observers in Liberia (UNOMIL).

Established: September 22, 1993; Personnel: 650 (330 military, 320 civilian) requested; Estimated cost for seven months: \$140 million for seven months.

On August 10, the UN Security Council authorized the immediate deployment of 30 UNOMIL observers to Liberia as an advance party for a UNOMIL force, which the Security Council subsequently approved on September 23 in UNSC Resolution 866. The Secretary General proposed 330 military observers plus an equal number of civilians. Since 1990 the U.S. has given extensive support to the OAU and the Economic Community of West African States (ECOWAS), which have had peacekeepers in Liberia (the cease-fire Monitoring Group known as ECOMOG). There are about 11,000 ECOMOG peacekeepers currently deployed in Liberia. In his report of September 9 to the UN Security Council, the Secretary General affirmed that ECOMOG should retain the lead in peacekeeping in Liberia, supplemented by UNOMIL.

UNOMIL has a seven month mandate, subject to first review by the Security Council in December, 1993.

CONSCIENCE OR CONSTITUENCY? NAFTA AND THE DILEMMA OF THE REPRESENTATIVE

HON. STEPHEN HORN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, November 15, 1993

Mr. HORN. Mr. Speaker, I recently had conversation with a constituent who was very upset that I was strongly supporting the North American Free-Trade Agreement [NAFTA]. After making the usual criticisms of NAFTA—and after admitting that quite possibly there were some good reasons to support it—he said, "but none of this matters. If the people of your district want you to vote a certain way, then it is your duty to vote that way."

I answered that, in the absence of a reputable poll, no one really knew what the voters of the 38th Congressional District felt about NAFTA—my feeling is that, like elsewhere in the country, opinion is about evenly split. I then asked him the following: "Let's say that an overwhelming majority of people in the district were for NAFTA, but that I had studied the issue and was absolutely convinced that NAFTA would be a disaster for America. Would you want me to vote for it?"

After a long pause, this constituent—a thoughtful, hard-working follower of Ross Perot—said, "You should do what the people want you to do." I praised him for being consistent, but told him that I could not agree that a Representative should ever knowingly vote for something that he or she believes is wrong for the country—even if a majority of constitu-

ents favors it, and even if opposing it costs the Representative his or her job at the next election.

What this constituent expressed is the view that an elected Representative is nothing more than the extension of the popular will and should not exercise independent judgment. Historically, under this theory, a Representative is only necessary as a messenger of the people because the size of the population or the extent of the territory makes it impractical for all the people to vote on every issue.

In the modern age, with polls and interactive media, it may be possible to truly gauge "the will of the people" or to let the people actually decide issues at the national level. This is technically possible, but is it desirable?

Is public opinion—the views of the people on an issue at a certain point in time—capable of governing the country? Quite apart from the difficulties of accurately measuring public opinion, and the additional problem of changes in that opinion—do we repeal a law as soon as a few percent switch from support to opposition—there are two major flaws in governing by popular will:

First, the people can be wrong. Reasonable people can differ on what is good or bad for the country, but a majority of the people can occasionally be wrong. Anyone who doubts this will have to defend racial, ethnic, religious, and gender discrimination, the internment of Japanese-Americans, and many other policies that virtually everyone would now agree were morally wrong.

Second, governing by public opinion provides no accountability. This is perhaps the greatest objection. If the public simply wants their Representatives to do what the public is thought to desire, then any politician has an automatic excuse to avoid accountability: "The public wanted it. The public made me do it. How can you be angry at me when I only did what you, the public, wanted me to do?" By being completely representative the Representative becomes completely unaccountable for the consequences of his or her votes.

More recent notions of electronic democracy—national town halls as forums for decisionmaking—have all the same flaws that governing by public opinion has with the added complication that a small minority might be able to exercise disproportionate influence on the results. More important, there is a real danger of manipulation of the issues by master demagogues whose ability to arouse emotion far exceeds their ability to muster a sound argument.

Another theory of the proper role for a representative was expressed most famously by a member of the House of Commons of Great Britain, Edmund Burke. In his "Speech to the Electors of Bristol" in 1774, Burke said, "Your representative owes you not his industry only, but his judgment; and he betrays instead of serving you if he sacrifices it to your opinion."

Our constitutional Framers unquestionably held to the same theory as Burke; the Representative is elected—and thus accountable—to represent the values and interests of the people, but should exercise judgment and discretion on specific issues. Further, the Representative must uphold the Constitution—itself both a grant of rights to all and a limitation of the rights of the majority.

Our constitutional system was designed by imperfect people to allow an imperfect society to prevent as many grave errors as possible, and to correct eventually those errors that are made. That is why each branch of Government is designed to check the others. And, that is why the people are given the ultimate power of changing the direction of Government through elections, or by amending the Constitution itself.

However, the constitutional framework was also designed to check the popular passions of the people. Indeed, the Framers presumed that most of the dangers to liberty would be the result of popular passions overwhelming the judgment of the legislature, or usurpations by a power-hungry executive possibly acting in concert with a temporary majority of the people.

For better or for worse, the Framers created a system that often relies on political courage to make it work. A largely forgotten story illustrates the beauty of the system, the occasional fallibility of the people we elect to lead us, and it shows that majority opinion can be wrong.

In 1946, Harry Truman, a man of immense political courage, and a friend of organized labor, got into a fight with the striking steelworkers union. In addition to great courage, President Truman was also a man of great temper. Thus, his solution: draft all the steelworkers into the Army. The public supported Truman. The House debated all of 2 hours and gave him the authority to do this by a vote of 306 to 13. Then, Senator Robert A. Taft of Ohio, regarded by organized labor as their greatest enemy, but also a man of immense political courage, brought his Senate colleagues to their senses. The proposal to give the President the authority to draft striking workers was defeated.

Political courage, simply stated, is the willingness to do what one believes is right when it is not in one's political self-interest to do so. It has been the absence of political courage and leadership by Congress in recent years—often called gridlock and mistakenly blamed on having a President of one party and a Congress controlled by the other—that has fueled much of the frustration that led to the Perot phenomenon in 1992 and thereafter. However, with respect to NAFTA, what the supporters of Ross Perot want from Congress is not courage and leadership, but blind followership.

Mr. Perot has been eloquent in his denunciation of lobbyists, special interests, and Political Action Committees [PAC's]. As one who refuses all PAC money, I commend him for his stand on campaign finance reform. It is ironic that many of those same special interests are the strongest opponents of NAFTA. Their pressure has helped all too many legislators rationalize opposition to NAFTA. Indeed, despite the media attention paid to Mr. Perot and other high-profile opponents of NAFTA, the most effective opposition has been the sheer power of some labor and business interests in protected industries which have threatened to cut off contributions by their Political Action Committees. One undecided Congresswoman has said publicly that she was told a vote for NAFTA "would mean a divorce with organized labor, and the divorce is final."

Privately, a majority of Representatives favor NAFTA because they know it is right for

America, and they know the criticisms are specious. Publicly, since Congress is—wisely—not allowed to vote in secret, NAFTA is behind and may well lose. Some who oppose NAFTA do so on frankly protectionist grounds. Although I disagree with their view and think it is shortsighted, I do not question their sincerity. Many others, however, who are not protectionist—and know what a disaster protectionism has been for this country—are really against it because of fear for their political lives.

There are no guidelines other than one's conscience as to when it is time to be courageous. Elected officials have been known to ask themselves: "Is this issue really worth losing my office? After all, if I am not reelected because of this single issue, then all the other worthy positions I stand for will be sacrificed." The danger, of course, is that one can compromise oneself so much that simply trying to stay in office is all that's left.

I believe NAFTA is one of the most important issues America will face in this decade and that it is certainly worth risking one's office to fight for it. Win or lose, I am far more concerned about what this debate has degenerated into. If NAFTA is rejected, the real tragedy will not simply be for trade or foreign policy. It will also be for Congress and the constitutional system and, thus, for the American people. The judgment on Congress will be that we were given a clear choice in the Nation's best interest but we lacked the courage to make the right decision.

The question now before us is whether enough Members are willing to take responsibility, vote their conscience, and set a bright course for the American future. For Congress, that is what the vote on NAFTA has become.

THE 10TH ANNIVERSARY OF THE LIFEPAGE PROGRAM

HON. PHILIP R. SHARP

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Monday, November 15, 1993

Mr. SHARP. Mr. Speaker, I would like to inform my colleagues in Congress of the 10th anniversary of an important, lifesaving service of the paging industry that means freedom and hope for organ transplant candidates.

Today, November 15, 1993, marks a decade of service for the LifePage Program, which provides free pagers and paging service to patients waiting for organ transplants. Administered through the Science and Education Foundation for Telocator, the Personal Communications Industry Association, LifePage has helped more than 50,000 transplant hopefuls lead normal, active lives while awaiting the notification call that could mean life or death.

LifePage was officially announced at a Capitol Hill news conference 10 years ago by ALBERT GORE, Jr., then a Representative from Tennessee with a keen interest in the organ donation issue. As author of the legislation which led to the National Organ Transplant Act, GORE praised LifePage for freeing patients from the chains of their telephones as they waited for word of an organ match.

What began as a pilot program in California with 300 pagers has evolved into a nationwide service which distributes more than 500 pagers per month. Thanks to the generosity of more than 450 paging companies, equipment manufacturers, and foundation contributors, tens of thousands of patients have been helped, and thousands more currently carry LifePage pagers.

Every 30 minutes, someone is added to the national transplant waiting list. Coupled with the fact that the preservation time for organs is extremely limited, patients may have as few as 20 minutes to respond to notification that an organ is available, before it must be offered to the next patient on the list. The stress posed by this limited reaction time can be overwhelming. LifePage offers these patients a sense of security and peace of mind. Perhaps Vice President GORE said it best during his remarks at the recent Telocator convention when he congratulated the paging industry on the success of the program, calling LifePage terrific technology matched with big hearts.

I would like to join him in saluting the LifePage Program. It is in the interest of furthering the humanitarian goals of the LifePage Program that we commemorate the work of those who make it possible.

KEY DOCUMENTS PROVE INNOCENCE OF JOSEPH OCCHIPINTI

HON. JAMES A. TRAFICANT, JR.

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, November 15, 1993

Mr. TRAFICANT. Mr. Speaker, as part of my continuing efforts to bring to light all the facts in the case of former Immigration and Naturalization Service Agent Joseph Occhipinti, I submit into the RECORD additional key evidence in the case.

EXHIBIT 1

STATE OF NEW YORK,

County of Queens, ss:

Manual DeDios, being duly sworn, deposes and says:

I am a former editor of El Diario/La Prensa Newspaper and am currently the editor of a weekly newspaper published in the Spanish language known as Canbyo.

During the course of my work for Canbyo, I undertook to write an expose concerning criminal complaints brought against an Immigration and Naturalization Service Supervisory Special Agent named Joseph Occhipinti by various members of the Federation of Dominican Merchants and Industrialists of New York.

During the course of my investigatory work in researching for the article, I interviewed numerous individuals who are members of the Federation of Dominican Merchants and Industrialists of New York. These individuals confided to me that Mr. Occhipinti had been set up by the Federation and that the complaints against him were fraudulent. These individuals have indicated to me that they are in fear of their safety and as a result would not go public with this information.

I would be more than willing to share my information with any law enforcement agencies or Courts concerned with these matters and would cooperate fully in any further investigations.

MANUAL DE DIOS.

EXHIBIT 2

STATE OF NEW JERSEY,
County of New Jersey ss:

Alma Camerina, being duly sworn, deposes and says:

1. I am currently employed as a legal assistant with a law firm. I have previously been employed as a Police Officer in Puerto Rico and as a legal assistant with the law firm of Aranda & Gutlein. I am currently a registered informant with the New York City Police Department, Immigration and Naturalization Service, United States Customs Service and the Federal Bureau of Investigation. I have been instrumental in the development of numerous prosecutions.

2. I am familiar with Joseph Occhipinti and have known him since October 1988. At that time, I provided Mr. Occhipinti with certain information relating to the homicide investigation of Police Officer Michael Buzcek which was being conducted by Mr. Occhipinti and other law enforcement officials. I also provided Mr. Occhipinti with information concerning his investigation of the drug cartel of an individual known as Freddy Then. At this particular time, I was employed as a law assistant by Aranda & Gutlein.

3. In the early part of 1989, I informed Mr. Occhipinti and other law enforcement agents that my employers, Mr. Aranda and Mr. Gutlein, were involved in a number of criminal activities including but not limited to official corruption and drug and weapon trafficking. Mr. Gutlein, who is a former Assistant United States Attorney in the Southern District of New York, had told me on numerous occasions that he has a number of important contacts in the United States Attorney's Office.

4. Based upon the information that I gave to Mr. Occhipinti, I had at least two (2) meetings with Assistant United States Attorney Jeh Johnson. Mr. Occhipinti, as well as other law enforcement agents, was present at these meetings. During the course of these meetings, I provided Mr. Johnson with information concerning Mr. Aranda and Mr. Gutlein. I also informed Mr. Johnson that Freddy Then was buying up bodegas in New York for the purpose of using them as a vehicle for drug trafficking and money laundering which involved illegal aliens.

5. In or about March 1989, I heard a conversation at the law offices of Aranda & Gutlein. During the course of this conversation, Mr. Aranda complained to Mr. Gutlein about the fact that Mr. Occhipinti was putting tremendous pressure on the illegal activities of their Dominican clients. Mr. Aranda told Mr. Gutlein that he would like to have Mr. Occhipinti "eliminated". Mr. Gutlein stated to Mr. Aranda that having Mr. Occhipinti "eliminated" was not the right thing to do. Mr. Gutlein stated instead that they should think up a plan to set Mr. Occhipinti up and have him prosecuted for violating the civil rights of the Dominicans. Mr. Gutlein stated that he had contacts at the United States Attorney's Office and they should be able to help in prosecuting Mr. Occhipinti.

6. In August of 1989, I reported this conversation to Jeh Johnson. Although Johnson took the information down, he did nothing to follow it up and I never heard from him again concerning it.

7. Approximately one (1) month after I spoke to Mr. Johnson at the United States Attorney's Office concerning the threats to Mr. Occhipinti, a co-worker of mine by the name of Alma Monte, told me to be careful for my safety because Mr. Gutlein had been informed by friends of his at the United

States Attorney's Office that I was providing information concerning Mr. Gutlein's activities. Ms. Monte further informed me that I was going to be physically harmed. For these reasons, I have since taken up residence out of state.

8. I would be more than happy to cooperate with law enforcement officials in any manner concerning the information contained in the within Affidavit.

ALMA CAMERINA.

EXHIBIT 3

STATE OF NEW YORK,
County of Bronx, ss:

Raul Anglada, being duly sworn, deposes and says:

1. I am a Detective currently employed by the New York City Police Department.

2. I am currently assigned to the 40th Precinct Detective Squad located at 257 Alexander Avenue, Bronx, New York.

3. In or about August to September 1989, while I was assigned to the 34th Precinct, I accompanied an Informant named Alma Camerina to the Office of the United States Attorney for the Southern District of New York.

4. At that time, we met with Assistant United States Attorney Jeh Johnson. Ms. Camerina informed Mr. Johnson that she had overheard a conversation between Mr. Aranda and Jorge Gutlein.

5. Mr. Aranda and Mr. Gutlein, according to Ms. Camerina, were talking about setting up Joseph Occhipinti.

6. I also wish to state that I can confirm that Project Bodega arose from the Freddy Then prosecution. During the course of my official duties, I accompanied Mr. Occhipinti on several visits to bodegas. I never observed Mr. Occhipinti do anything which was either illegal or improper.

7. Approximately one (1) year ago, I was interviewed by an FBI Agent named Lionel Barron. Mr. Barron advised me that he was conducting an informal investigation into allegations that Mr. Occhipinti was innocent of the charges that he had been convicted of. Subsequent to that time, I was never contacted by any Federal Official with reference to such an investigation. I do not know what resulted from Mr. Barron's investigation.

RAUL ANGLADA.

CELEBRATING GLENS FALLS, NY,
IN WARREN COUNTY

HON. GERALD B.H. SOLOMON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, November 15, 1993

Mr. SOLOMON. Mr. Speaker, I live in a city, Glens Falls, NY, which for nearly 50 years has been known as "Hometown, USA." It is located in a region we all refer to, quite matter of factly, as "God's Country."

A visit to Warren County would reveal why we are so proud of the area. This year, Warren County is celebrating 180 years of existence, and it has been an interesting 180 years.

Warren County was formed by an act of legislature on March 12, 1813. The first sessions were held at Lake George, but in 1815, James Caldwell donated property along the lakeshore for a permanent headquarters. The first courthouse was built in 1817 and functioned until destroyed in an 1843 fire. It was replaced by

a brick structure which remains as an architectural landmark to this day.

The county itself is named for Revolutionary War hero Joseph Warren. Bloody colonial warfare gave way to settlements and communities that persevered through the hardships and eventually prospered. The 19th century and its technological innovations led to an economic boom based on lumber and other natural resources. As the population swelled, tourism also emerged as an important industry.

But this growth made all too obvious the need for expanded county facilities. After years of debate and study, the Warren County Municipal Center opened on the 150th anniversary of the county. The modern complex, located between Lake George and Glens Falls, houses all government services with the exception of the highway department and infirmary.

The exterior has changed little in the last 30 years, but the interior has undergone significant renovations to allow the country government to grow with the times.
