SEC. 818. DEFINITIONS.

Section 502 (33 U.S.C. 1362) is amended by adding at the end the following:

“(26) The term ‘wetland’ means those areas that are inundated or saturated by surface water or ground water at a frequency and duration sufficient to support, and that under normal circumstances do support, a prevalence of vegetation typically adapted to life in saturated soil conditions.

“(27) The term ‘discharge of dredged or fill material’ means the act of discharging and any related act of filling, grading, draining, dredging, excavation, channelization, flooding, clearing of vegetation, driving of piling or placement of other obstructions, diversion of water, or other activities in navigable waters which impair the flow, reach, or circulation of surface water, or which result in a more than minimal change in the hydrologic

regime, bottom contour, or configuration of such waters, or in the type, distribution, or diversity of vegetation in such waters.

“(28) The term ‘mitigation bank’ shall mean wetland restoration, creation, or enhancement projects undertaken primarily for the purpose of providing mitigation compensation credits for wetland losses from future activities. Often these activities will be, as yet, undefined.

“(29) The term ‘cooperative mitigation ventures’ shall mean wetland restoration, creation, or enhancement projects undertaken jointly by several parties (such as private, public, and nonprofit parties) with the primary goal of providing compensation for wetland losses from existing or specific proposed activities. Some compensation credits may also be provided for future as yet undefined activities. Most cooperative mitigation ventures will involve at least one private and one public cooperating party.

“(30) The term ‘normal farming, silviculture, aquaculture and ranching activities’ means normal practices identified as such by the Secretary of Agriculture, in consultation with the Cooperative Extension Service for each State and the land grant university system and agricultural colleges of the State, taking into account existing practices and such other practices as may be identified in consultation with the affected industry or community.

“(31) The term ‘agricultural land’ means cropland, pastureland, native pasture, rangeland, an orchard, a vineyard, nonindustrial forest land, an area that supports a water dependent crop (including cranberries, taro, watercress, or rice), and any other land used to produce or support the production of an annual or perennial crop (including forage or hay), aquaculture product, nursery product, or wetland crop or the production of livestock.”

Conform the table of contents of the bill accordingly.
