

deficit came in at 2.4 percent of GDP. These events demonstrate the commitment of the Israeli government to fiscal consolidation and reform.

Second, the Israeli consumer price index (CPI) for 1997 rose by only 7 percent, at the bottom of the 7-10 percent 1997 target range and a 28-year low. This indicates that the battle being waged by the Bank of Israel and the Israeli government against persistent inflation is succeeding. The Israeli Ministry of Finance is reportedly considering lowering the 1998 inflation target (currently set at 7-10 percent) in order to consolidate the strong inflation performance registered in 1997.

This information will be included in the 1998 report to the Congress on the Loan Guarantees to Israel Program.
