

June 30 / Administration of George Bush, 1992

United States foremost in my mind.

So I can't say it's been perfect, but I do think that the Department and, I hope, the White House has done a good job in the implementation of the law and in the using of these credits. I can tell you that what I really would rejoice in, and what I will rejoice in, is when we get this GATT agreement closed and get it finalized and let the American farmer compete with others on a level playing field all around the world. And that is the final and best answer to your very penetrating question about the

use of the EEP.

Thank you all very, very much.

*Note: The President spoke at 1:31 p.m. at the Department of Agriculture. In his remarks, he referred to Herb Plambeck and William Taylor Brown, former president and president, National Association of Farm Broadcasters; Sara Wyant Lutz, president, American Agricultural Editors Association; Marsha Mauzey, president, Agricultural Relations Council; and David King, president, Agricultural Communicators in Education.*

## Remarks on the Superconducting Super Collider

June 30, 1992

*The President.* Look, this meeting is about the super collider. And I just want to thank these most distinguished scientists for taking the strong scientific case up to Capitol Hill in support of this project. It is important not just for national pride; it's important to science generally that this be fully funded and that we stay out front, working, of course, with international partners the best we can, but that we remain out front. And I'm anxious to hear from you how you feel, sir, your testimony went. And thank you very much for going up there to the Senate. We've got to get in the Senate and get approved that which we failed to do in the House.

*Dr. Schwitters.* I think we had a chance to make the case for the SSC. We talked about the long-term value and need in the science and then the value of doing this kind of research for the country. We had

a few critical questions, but I think that the team answered them well because we do have good answers.

*The President.* Well, what we've got to do is get it restored in the conference and get this under control. We're fighting for it, and we are committed to it. We have a handful of these major scientific projects that need support, even though we've got tough budgetary conditions. This is no time to cut the funding for this project. We will fight with you for it.

*Dr. Schwitters.* Thank you very much. We really appreciate that.

*Note: The President spoke at 4:10 p.m. in the Roosevelt Room at the White House, during at a meeting with Government and private-sector scientists. Roy Schwitters was Director of the Superconducting Super Collider Laboratory in Waxahachie, TX.*

## Letter to Congressional Leaders Reporting on the Cyprus Conflict

June 30, 1992

*Dear Mr. Speaker: (Dear Mr. Chairman:)*

In accordance with Public Law 95-384 (22 U.S.C. 2373(c)), I am submitting to you this bimonthly report on progress toward a negotiated settlement of the Cyprus ques-

tion. This report covers the last 21 days of March, all of April, and the first 15 days of May, 1992.
