Message to the Congress on Continuation of the National Emergency With Respect to Iran

October 31, 1995

*To the Congress of the United States:*

Section 202(d) of the National Emergencies Act (50 U.S.C. 1622(d)) provides for the automatic termination of a national emergency unless, prior to the anniversary date of its declaration, the President publishes in the *Federal Register* and transmits to the Congress a notice stating that the emergency is to continue in effect beyond the anniversary date. In accordance with this provision, I have sent the enclosed notice, stating that the Iran emergency is to continue in effect beyond November 14, 1995, to the *Federal Register* for publication. Similar notices have been sent annually to the Congress and the *Federal Register* since November 12, 1980. The most recent notice appeared in the *Federal Register* on November 1, 1994.

The crisis between the United States and Iran that began in 1979 has not been fully resolved. The international tribunal established to adjudicate claims of the United States and U.S. nationals against Iran and of the Iranian government and Iranian nationals against the United States continues to function, and normalization

of commercial and diplomatic relations between the United States and Iran has not been achieved. Indeed, on March 15 of this year, I declared a separate national emergency with respect to Iran pursuant to the International Emergency Economic Powers Act and imposed separate sanctions. By Executive Order 12959, these sanctions were significantly augmented. In these circumstances, I have determined that it is necessary to maintain in force the broad authorities that are in place by virtue of the November 14, 1979, declaration of emergency, including the authority to block certain property of the Government of Iran, and which are needed in the process of implementing the January 1981 agreements with Iran.

Statement on Signing Biotechnology Process Patent Legislation

November 1, 1995

I am pleased to sign into law S. 1111, a bill to provide enhanced protection of biotechnology process patents. This bill will update current patent law to provide the protection American biotechnology companies need to continue developing new products. American consumers will benefit from improvements in the diagnosis, cure, or treatment of disease and from the production of healthier, more abundant foods.

Process patents are especially important in biotechnology, since part of the genius of that field is to produce commercial quantities of breakthrough products through new and inventive processes. If the innovative process used to make a biotechnology product is not protected by patent, American biotechnology will remain vulnerable to foreign imitation. This bill will provide necessary new protection for proc-
