Russia-U.S. Joint Statement on the Highly Enriched Uranium Agreement: Transparency Measures
April 21, 1996

The United States and Russia have agreed on transparency measures that provide assurances that the sides are fulfilling the obligations undertaken under the HEU Agreement to transform “megatons into megawatts.”

The transparency measures that have been developed are the culmination of two years of negotiations between official U.S. and Russian delegations and are evidence that irreversible nuclear disarmament is achievable if we work together. By blending-down HEU derived from nuclear weapons to low-enriched uranium that can only be used as fuel in commercial nuclear power reactors, we ensure that this material can never again be used in nuclear weapons.

NOTE: An original was not available for verification of the content of this joint statement.

Remarks on Earth Day in Great Falls, Maryland
April 22, 1996

Thank you very much. Ladies and gentlemen, thank you all for being here today and for the work that you do. I want to thank the Vice President for being the constant conscience of our administration and of the national debate on the environment. I thank Anthony Hinklebrant and Ashley King for the example they are setting for the young people of America. I want to thank these young folks with the Montgomery County Conservation Corps and the others who have volunteered to work in this park.

I want to say a special word of thanks to the employees of the National Park Service all over this country and here. They do a magnificent job for America. I want to thank Carol Browner, our EPA Administrator, and Katie McGinty, who represents the Nation’s environmental concerns in the Environmental Council in the White House. And I want to thank Secretary Babbitt, who can’t be here because he can’t be in more than one place at once; even Bruce Babbitt can’t do that. And, as the Vice President said, he’s at the Sterling Forest event this morning representing us.

I want to thank the Members of Congress who are here for their fidelity to the Nation’s environment and their willingness to stand and be counted in some pretty difficult moments over the last year or so. They have helped us to continue our commitment and to protect this country’s natural resources. And I want you to know that I never appreciated them more than I have in the last year or so when they’ve been in some of the difficult challenges they’ve been in. I thank them all, these who are here and their counterparts.

You know, I just came back, literally just came back from a remarkable journey all around the world. I flew from here to Alaska and refueled, and then I went to Korea and Japan and on to St. Petersburg and Moscow. And I was thinking, standing here today, I saw some of the most magnificent manmade creations anywhere in the world: the Imperial Palace in Tokyo; the great Hermitage Museum in St. Petersburg; the entire Kremlin has just been redone and restored to its historical grandeur. But none of it is any more beautiful than this wonderful nature that God has given us right here in this national park.

And not everybody can travel to see the great palaces of the world. Even the great art galleries of the world are beyond the reach of many of our fellow citizens. But everybody can come to this park without regard to their income, their station in life, what their other resources are. This belongs to all the American people, and we have to dedicate ourselves to making sure that as long as there is an America there will be a national park system with these treasures there for every single citizen of this country.

We have done a lot of work since I became President to try to improve our national parks
