

Mar. 6 / Administration of William J. Clinton, 1997

integrate technology and high-quality instructional materials into the classroom, as well as motivate students and help them understand how math concepts are applied in the real world. The strategy should identify significant Federal programs, activities, and partnerships available to improve teaching and learning, ensure that these resources are appropriately focused on helping students reach challenging math standards, and determine how these resources can best support State and local reforms. In developing this strategy, the interagency group should review the current status of improvements in math education and identify and

address critical areas of need, drawing on research and input from educators and professional organizations.

Because teaching and learning in math and science are so integrally related, and because success in both subjects is vitally important in this information era, the working group should also review how Federal resources and partnerships with other organizations can help improve student achievement in science.

The working group should make its recommendations and submit its action strategy to me within 90 days.

Statement on the Death of President Cheddi Jagan of Guyana *March 6, 1997*

It was with deep regret that I learned of the death early today of President Cheddi Jagan of the Co-operative Republic of Guyana. President Jagan was a respected statesman in our hemisphere of democracies. He was one of the founders of the People's Progressive Party and for over 45 years played an active role in his country's political life. I remember warmly our

meeting at the Miami Summit of the Americas in December 1994. President Jagan was a champion of the poor who devoted himself to alleviating poverty in his country and throughout the Caribbean.

On behalf of the American people, I extend my deepest sympathies to the Jagan family and the people of Guyana.
