

The crisis with respect to the grave acts of violence committed by foreign terrorists that threaten to disrupt the Middle East peace process that led to the declaration of a national emergency, on January 23, 1995, has not been resolved. Terrorist groups continue to engage in activities with the purpose or effect of threatening the Middle East peace process, and which are hostile to U.S. interests in the region. Such actions threaten vital interests of the national security, foreign policy, and economy of the United States. For these reasons, I have deter-

mined that it is necessary to maintain in force the broad authorities necessary to deny any financial support from the United States for foreign terrorists that threaten to disrupt the Middle East peace process.

WILLIAM J. CLINTON

The White House,  
January 21, 1997.

NOTE: The notice of January 21 is listed in Appendix D at the end of this volume.

## Exchange With Reporters

January 22, 1997

### 16th Street Explosion

*Q.* [*Inaudible*—the explosion near the abortion clinic this morning—any thoughts on that?

*The President.* Let me say that we do not yet have all the facts involving the incidents this morning. But Federal officials are working with the local law enforcement officials to get to the bottom of this. I want to emphasize again, as I had to do just a few days ago, that acts of violence against people who are trying to exercise their constitutional rights are acts of terror. They are illegal. They are wrong. And we will do our very best to investigate them, to catch who is doing it, and to make sure they're punished. But as to the incidents this

morning, we are still investigating them. The facts are unfolding. Whatever happened, there is never an excuse for an act of violence against someone exercising a constitutional right.

*Q.* [*Inaudible*—at the Mayflower, Mr. President?

*The President.* We're on top of the situation, I believe. We're doing our very best. And obviously I'm concerned about the safety of anybody involved that might be subject to that sort of thing. But the investigators are there, and we're working hard on it.

NOTE: The exchange began at 9:14 a.m. on the South Lawn at the White House, prior to the President's departure for Chicago, IL.

## Remarks at Stanley Field Middle School in Northbrook, Illinois

January 22, 1997

*The President.* I was just thinking, if I had had a class like this when I was their age, I might have gotten into a different line of work. [*Laughter*] This is fascinating. Thank you very much, guys. I'm glad you learned about Newton's laws doing this, and I'm glad you learned how to do this.

I just thought of something—you should know too, one of you made the point about conservation of materials. Interestingly enough, in many manufacturing enterprises today, that's one of

the major sources of adding productivity and profitability to the enterprise. Being environmentally responsible is just learning how to continue to get more and more and more output out of fewer and fewer raw materials. And that applies not only to stable materials like that but also to energy input. So a big part of what technology and learning is doing to all kinds of production is allowing people to produce more output of products and services with fewer

Jan. 22 / Administration of William J. Clinton, 1997

material input. Very interesting, so I'm glad you did it.

[At this point, Secretary of Education Richard Riley commented on standards in education, and then the students continued their demonstration.]

*The President.* The one thing I would say to you—we have to go, but you are going to live in the most exciting period of time in human history, in terms of what people can do with their minds and their imaginations and what people can do on their own. It's going to be a very, very exciting time. But it will only be an exciting time for people who can access it. That's why the learning is so important.

Someday you may be building—one of you may be building trains that go 500 miles an hour, that people get in, and therefore, then, they don't pollute the air. And they all travel together, so they can read while they're studying during their commute times. You may be doing

things you can't even imagine now because of what you're learning.

And that's the thing I would emphasize. You can't imagine what someday you might be doing with what you're just now learning here. And I envy you in that way. I think that the 21st century will be a time of enormous possibility for young people like you, and all you really need to tap it is a great education. And I'm glad you're getting it.

Thank you.

*Teacher.* I know they can do it. Well, thank you so much. We're very pleased to have you come.

*The President.* I'm glad to see you. Thank you.

*Teacher.* Thank you for coming.

*The President.* I wish I could see all the cars driving. What you should do, you should make a movie of this. You should have everybody—inspire classes all over America.

NOTE: The President spoke at 11:05 a.m. in the eighth grade science classroom.

## Remarks to the First in the World Consortium in Northbrook January 22, 1997

Thank you very much. First of all, let me thank Mary Hamblet for her introduction and for that fine statement about the thrill of teaching and the changes of teaching. Would all the teachers in the audience please stand? Thank you very much. [Applause] I thank you all very, very much.

Thank you, Dr. Kimmelman, for your leadership in the First in the World Consortium. I thank all the other superintendents and administrators who are here. Thank you, Congressman Porter, for your leadership for education and, I might add, for your leadership for safe streets in the United States, in the Congress. I appreciate that very much.

Thank you, Secretary Riley. Everything Dr. Kimmelman said about you was true, even if you did have to write his speech for him. [Laughter] I like it that the Secretary of Education is prouder of being a grandfather than anything else in his life. I think that's a good signal for America's future.

We're glad to be joined today also by Mayor Daley and Congressman Blagojevich. Welcome. Cook County Assessor Tom Hines; your State senator, Cathy Parker. Welcome. Thank you for being here. Village presidents Nancy Firfer and Mark Damisch, thank you also for coming. I thank the Glenbrook Concert Orchestra for the music. Thank you all.

I am honored to be here with all of you, humbled and encouraged by your passionate commitment to education. I came today to talk about your remarkable success, hoping it will reverberate all across America and people will want to know what has been done here and how, and to talk about why and how this must be done all across America.

As we come to the end of this century and set about the business of preparing America for the next century, as I said in my Inaugural Address, it is especially important that we be able to say we have kept the American dream of opportunity alive for all of our children. I think
