## Message to the Congress Transmitting the Comprehensive National Energy Strategy

*July 14, 1998*

*To the Congress of the United States:*

I am pleased to transmit the Comprehensive National Energy Strategy (Strategy) to the Congress. This report required by section 801 of the Department of Energy Organization Act (Public Law 95-91; 42 U.S.C. 7321(b)), highlights our national energy policy. It contains specific objectives and plans for meeting five essential, common sense goals enumerated in the accompanying message from Secretary Pena.

Energy is a global commodity of strategic importance. It is also a key contributor to our economic performance, and its production and use affect the environment in many ways. Thus, affordable, adequate, and environmentally benign supplies of energy are critical to our Nation's economic, environmental, and national security.

The Strategy reflects the emergence and interconnection of three preeminent challenges in the late 1990s: how to maintain energy security in increasingly globalized energy markets; how to harness competition in energy markets both here and abroad; and how to respond to local and global environmental concerns, including the threat of climate change. The need for research and development underlies the Strat-

egy, which incorporates recommendations of my Committee of Advisors on Science and Technology (PCAST) for improvements in energy technologies that will enable the United States to address our energy-related challenges. Advances in energy technology can strengthen our economy, reduce our vulnerability to oil shocks, lower the cost of energy to consumers, and cut emissions of air pollutants as well as greenhouse gases.

This Strategy was developed over several months in an open process. Three public hearings were held earlier this year in California, Texas, and Washington, D.C., and more than 300 public comments were received. This Strategy is not a static document; its specifics can be modified to reflect evolving conditions, while the framework provides policy guidance into the 21st century. My Administration looks forward to working with the Congress to implement the Strategy and to achieve its goals in the most effective manner possible.

WILLIAM J. CLINTON

The White House,

July 14, 1998.

## Remarks in a Roundtable Discussion on the Patients' Bill of Rights

*July 15, 1998*

*The President.* Hello, everybody. I'd like to make a very brief opening statement, beginning with expressing my thanks to whoever's about to turn that tape recorder off. [Laughter] I'd like to thank Dr. Dickey, Dr. Smoak, Dr. Ander-

son, and all the people at the AMA for having us. I thank the members of our roundtable for joining us, including Secretary Shalala, Secretary Herman, Secretary West, Dr. Kizer, the director of the health agency at the VA. And I want
