proud to announce we are launching an unprecedented $156 million initiative to stem the AIDS crisis in minority communities.

It is one of the greatest victories in the balanced budget law I just signed. It never could have happened without the passionate and compassionate leadership of Maxine Waters, Lou Stokes, and the rest of the Congressional Black Caucus or the support of Senator Specter and Congresswoman Pelosi and so many others.

Now, this initiative will allow thousands of cities, churches, schools, and grassroots organizations to expand prevention efforts and target them to the specific needs of specific minority communities such as young men, students, pregnant mothers. It will allow minority communities to expand treatment for substance abuse. It will increase access to protease inhibitors and other new therapies, because lifesaving therapies cannot be a luxury reserved only for the rich.

It will increase access to skilled doctors and other health care providers. And finally, it will help us to assemble teams of public health experts from the Centers for Disease Control and other Federal agencies to visit individual communities and provide whatever technical assistance those communities need.

This new initiative will build on the other historic funding increases in HIV/AIDS funding we won in the new balanced budget, which Secretary Shalala will talk about in greater detail in a moment. I’m also pleased that it will build on our race and health initiative. Congress has taken a first step to fund this initiative, but we must do more. We are not one America when some of our communities lag so far behind in health.

Of course, this room looks nothing like a house of worship except for a few collars I see. [Laughter] But I’d like to end my remarks today with what I think is quite an appropriate passage from the First Letter of Paul to the Corinthians: “The body is a unit, though it is made up of many parts. And though all its parts are many, they form one body. If one part suffers, every part suffers with it. If one part is honored, every part rejoices with it.”

So it is with the body of Americans and a nation that strives to be one America. Every one of our communities is inextricably linked in suffering and rejoicing, in sickness and in health. And that is why we must work together in every community to stop this cruel disease. Black or white, gay or straight, rich or poor, you name it, we have to stop it.

Now I’d like to present America’s Surgeon General, our Nation’s family doctor, whose deep commitment to advancing our country’s health is embodied in the 200-year-old guiding principle of our Public Health Service that you best protect the health of the entire Nation when you reach out to the most vulnerable people.

Dr. David Satcher.

NOTE: The President spoke at 5:16 p.m. in Room 450 of the Old Executive Office Building. In his remarks, the President referred to AIDS activist Denise Stokes, member, Presidential Advisory Council on HIV/AIDS.

Statement on Emergency Funding for the HIV/AIDS Initiative in Minority Communities

October 28, 1998

Today I am making available to the Department of Health and Human Services an additional $217 million in emergency funding. These funds were provided in P.L. 105-277, the Omnibus Consolidated and Emergency Supplemental Appropriations Act, 1999, which I signed into law on Wednesday, October 21st.

These funds will provide $50 million to the Secretary of Health and Human Services (HHS) to address the HIV/AIDS crisis facing the African-American community and other racial and ethnic minority communities due to the changing demographics of the disease. These funds are available for HHS to transfer to other agencies for several important purposes:

• to expand and improve access to state-of-the-art HIV/AIDS therapies;
• to strengthen and expand targeted HIV/AIDS effective prevention and intervention activities;
• to support HIV/AIDS substance abuse activities;
• to provide critical technical assistance in high-risk communities; and
• to build and sustain HIV/AIDS infrastructure.

In addition, these emergency funds will provide HHS with $139 million to prepare for and manage the response to the medical and public health consequences of a chemical-biological weapons incident. Of the $139 million provided, the Centers for Disease Control and Prevention will use $127 million to establish a civilian pharmaceutical stockpile and to improve public health surveillance, communications, epidemiologic capabilities, and laboratory capacity to respond to a chemical-biological weapons incident.

HHS’ Office of Emergency Preparedness will use $7 million to enhance medical response systems for a chemical-biological weapons incident, including funds to increase the number of local first responder teams. The remaining funds are for one-time projects initiated by Congress.

Finally, the Centers for Disease Control and Prevention will receive $28 million for global polio eradication and measles elimination efforts.

I am disappointed that Congress has chosen to earmark individual projects within the emergency funding provided by P.L. 105–277 for HHS’ Public Health and Social Services Emergency Fund and has done so in such a way that I must request all of the funds provided or none at all.

Statement on Signing the Digital Millennium Copyright Act
October 28, 1998

Today I am pleased to sign into law H.R. 2281, the “Digital Millennium Copyright Act.” This Act implements two landmark treaties that were successfully negotiated by my Administration in 1996 and to which the Senate gave its advice and consent to ratification on October 21, 1998. The Act also limits the liability of online service providers for copyright infringement under certain conditions.

The World Intellectual Property Organization (WIPO) Copyright Treaty and the WIPO Performances and Phonogram Treaty mark the most extensive revision of international copyright law in over 25 years. The treaties will grant writers, artists, and other creators of copyrighted material global protection from piracy in the digital age.

These treaties will become effective at a time when technological innovations present us with great opportunities for the global distribution of copyrighted works. These same technologies, however, make it possible to pirate copyrighted works on a global scale with a single keystroke. The WIPO treaties set clear and firm standards—obligating signatory countries to provide “adequate legal protection” and “effective legal remedies” against circumvention of certain technologies that copyright owners use to protect their works, and against violation of the integrity of copyright management information. This Act implements those standards, carefully balancing the interests of both copyright owners and users.

I am advised by the Department of Justice that certain provisions of H.R. 2281 and the accompanying Conference Report regarding the Register of Copyrights raise serious constitutional concerns. Contrary to assertions in the Conference Report, the Copyright Office is, for constitutional purposes, an executive branch entity. Accordingly, the Congress may exercise its constitutionally legitimate oversight powers to require the Copyright Office to provide information relevant to the legislative process. However, to direct that Office’s operations, the Congress must act in accord with the requirements of bicameralism and presentment prescribed in Article I of the Constitution. Further, the Congress may not require the Register to act in a manner that would impinge upon or undermine the President’s discretion under Article II, section 3 of the Constitution to determine which, if any, executive branch recommendations to the Congress would be “necessary and expedient.” Accordingly, I will construe sections 103(a), 104(b), 401(b), and 403(a) of H.R. 2281 to require the Register to perform duties only insofar as such requirements are consistent with these constitutional principles.
