merely to prevail, that is the essence of our being. None can define its limits or set its ultimate boundaries.”

I thank all of you for living that faith, for expanding our limits and broadening our boundaries. I thank you—through both anonymity and acclaim, through times of stress and strain as well as times of triumph—for carrying on this fundamental human mission.

Major Williams, please read the citations.

[At this point, Maj. Darryl Williams, USA, Army Aide to the President, read the citations, and the President presented the medals.]

The President. Thank you, Major. Thank you, ladies and gentlemen. Congratulations again. We’re adjourned. Thank you.

NOTE: The President spoke at 3:08 p.m. in the East Room at the White House. In his remarks, he referred to 1998 National Medal of Science recipient William Julius Wilson.

Memorandum on Renewing the Federal Government-University Research Partnership for the 21st Century
April 27, 1999

Memorandum for the National Science and Technology Council

Subject: Renewing the Federal Government-University Research Partnership for the 21st Century

Federal investments in university research are critically important to the Nation, helping foster the discovery of knowledge, stimulating technological innovation, improving the quality of life, and contributing to America’s economic prosperity. Universities also have the unique role of educating and training the next generation of scientists and engineers. Indeed, the integration of research and education is the hallmark of the American university system, which many nations now seek to emulate. Beginning with the visionary establishment of the land grant universities by President Lincoln in 1862 and continuing with President Truman’s effort to redouble our Nation’s commitment to university-sponsored research and education by the establishment of the National Science Foundation, the partnership that has evolved between the Federal Government and our Nation’s system of research universities has served us well by any measure of success.

However, with the end of the Cold War and the globalization of the world’s economy, it became apparent that the future success of the partnership cannot be taken for granted. That is why I directed the National Science and Technology Council (NSTC) to assess the current state of the partnership and recommend ways to strengthen it. The resulting report on Renewing the Federal Government-University Research Partnership for the 21st Century finds that the partnership is fundamentally sound, but that it can still be improved. Therefore, I direct as follows:

1. The NSTC, in consultation with research universities and other stakeholders in the Federal science and technology enterprise, shall develop a statement of principles that clearly articulates the roles, responsibilities, and expectations of each of the partners and establishes a framework for addressing future issues as they arise. Ultimately, this statement of principles will serve to shape future discussions and guide policy development and decision making.

2. The NSTC shall develop recommendations to better support the integration of research and education in Government policies and practice. The vital and dual roles of students (undergraduates as well as graduates), as both researchers who contribute to the national research enterprise and as students who gain research experience as part of their training, must be recognized and reflected in Government and university policies and practices.

3. The NSTC shall propose specific actions by member agencies to make the partnership more effective and efficient. These actions should be aimed at fostering a productive policy, regulatory, and administrative environment and promoting cost and administrative efficiencies while maintaining accountability for public funds.
These actions should be completed within 12 months of the date of this memorandum. The findings and recommendations contained in the NSTC report *Renewing the Federal Government-University Research Partnership for the 21st Century* should provide the basis for proceeding.

WILLIAM J. CLINTON

Statement on Ordering Reserves to Active Duty To Support Military Action in Kosovo
April 27, 1999

Today I authorized the Secretaries of Defense and Transportation to order to active duty up to 33,102 essential members of our Reserve component to support NATO and U.S. operations related to the conflict in Kosovo.

The Secretary of Defense has informed me that he intends to exercise that authority immediately to recall approximately 2,000 essential Air Force Reserve and Air National Guard crews from eight States. These reservists will support refueling operations for our intensifying air operations in Kosovo. I expect that over the coming days and weeks, Secretary Cohen and General Shelton will call upon additional personnel from all branches of the service to fill critical support positions in our humanitarian and combat operations in and around the former Yugoslavia. These Reserves are essential to America’s military strength; they are part of the total force we bring to bear whenever our men and women in uniform are called to action.

All Americans are proud of the commitment these citizen soldiers make to their country. On behalf of all Americans, I thank each reservist, their families and loved ones, and their employers here at home for their service and sacrifice in support of our important mission in Kosovo.

NOTE: The Executive order on ordering Reserves to active duty is listed in Appendix D at the end of this volume.

Message to the Congress on Ordering Reserves to Active Duty To Support Military Action in Kosovo
April 27, 1999

To the Congress of the United States:
I have today, pursuant to section 12304 of title 10, United States Code, authorized the Secretary of Defense, and the Secretary of Transportation with respect to the Coast Guard, when it is not operating as a service within the Department of the Navy, under their respective jurisdictions, to order to active duty any units, and any individual members not assigned to a unit organized to serve as a unit, of the Selected Reserve, or any member in the Individual Ready Reserve mobilizations category and designated essential under regulations prescribed by the Secretary concerned. These reserves will augment the active components in support of operations in and around the former Yugoslavia related to the conflict in Kosovo.

A copy of the Executive order implementing this action is attached.

WILLIAM J. CLINTON

The White House,
April 27, 1999.
