

I appreciate your hospitality. Thank you for letting me come by and share some thoughts with you. May God bless the people of Singapore.

NOTE: The President spoke at 6:04 p.m. in the University Cultural Centre Theatre. In his remarks, he referred to Senior Minister Goh Chok Tong of Singapore, and his wife, Tan Choo Leng; and Prime Minister Lee Hsien Loong of Singapore.

Remarks at a Dinner Hosted by Prime Minister Lee Hsien Loong of Singapore in Singapore  
November 16, 2006

*President Bush.* Thank you all. Mr. Prime Minister and Ms. Lee, thank you very much for your gracious hospitality. Laura and I are thrilled to be back here. I'm always amazed when I think about Singapore, a country that wasn't supposed to be; a part of the world where people basically said, "There's no chance for the good folks to survive and thrive." I'm amazed at your successes, and I appreciate the values on which your successes rest.

I congratulate the people of Singapore for being such a vivid example of enterprise and markets and hard work. I congratulate the Government for being visionary in its leadership. And I am thrilled that you allowed me to give a speech at one of your fine universities, talking about the importance of the Far East to the future of the United States.

I thank you very much for serving that meat. [*Laughter*] It was so good, it had to be from Texas. [*Laughter*]

The Prime Minister and I have had a lot of discussions about a variety of issues, and I shared with them one of my chief concerns, that our country would become—could possibly become isolationist and protectionist. In my speech today to the university, Mr. Prime Minister, I assured the

listeners that it is in our interest to remain engaged in the world. It's in our economic interests and it's in our national interests that the United States work with strong friends and allies such as Singapore to spread prosperity and hope and to work to lay the foundations for peace.

Mr. Prime Minister, I appreciate your clear vision of the threats that we face. I appreciate the fact that you see the ideological struggle before us. I cannot think of a more steadfast leader in you and your willingness to make the hard steps necessary to deal with this challenge today so that our children won't have to deal with it in more severe terms tomorrow.

I'm proud to call you friend. Laura and I are proud to be in your presence. May God bless you and your important country.

*Prime Minister Lee.* Thank you very much.

NOTE: The President spoke at approximately 7:25 p.m. at the Istana. In his remarks, he referred to Ho Ching, wife of Prime Minister Lee. The transcript released by the Office of the Press Secretary also included the remarks of Prime Minister Lee. A tape was not available for verification of the content of these remarks.

Remarks Following Discussions With Prime Minister John Howard of Australia and an Exchange With Reporters in Hanoi, Vietnam  
November 17, 2006

*President Bush.* I just had an enjoyable lunch with my friend John Howard. We talked about a variety of subjects. I talked to John about Iraq. I appreciate the Australian contributions to helping this young democracy succeed. There's a lot of questions, I know, in the press around the world about our troop posture and about the attitudes of our Government. I assured John that we will get the job done. We will continue to help this Maliki Government meet the aspirations of the Iraqi people.

And that—I'm sure there's some questions by the Australian press about what the elections mean. The elections mean that the American people want to know whether or not we have a plan for success, and that—and I assured John that any repositioning of troops, if that's what we choose to do, will be done in close consultation with John and his Government. But I also assured him that we're not leaving until this job is done, until Iraq can govern, sustain, and defend itself.

We talked about the climate. John has got some very strong ideas about the use of technologies to enable countries like our own and the rest of the world to be able to grow and, at the same time, protect the environment. And I appreciated his views. And I share those views. I assured him that we will continue to spend research dollars to develop technologies such as clean coal technologies, something that Australia is interested in, or the use of ethanol, for example, to power our automobiles, or money spent to develop hydrogen fuel cells, all aimed at changing our energy habits and, at the same time, protecting the environment.

We talked about the neighborhood that Australia is in. I always admire John's strategic vision of the world. I really appreciate the chance to have lunch with you.

*Prime Minister Howard.* Well, thank you very much, George. We did cover all of those subjects, and we spent a lot of time, naturally, talking about Iraq. Our views are very similar. It's not easy, but we hold to the view, and I've said it back in Australia, and I'd repeat it here today, that the idea of the coalition leaving in circumstances where the Iraqi people were not soon to be able to look after themselves and to enjoy the democracy they want would be a catastrophic defeat for our cause, not only in the Middle East, but it would embolden terrorists in that region. And it would embolden terrorism in countries like Indonesia.

Our discussions about climate change were very valuable. Our thinking is similar. We don't believe that Kyoto is the answer. Both our countries are committed to dealing with the growth of greenhouse gasses. We can have debate about the severity of the problem, but there's really no debate about the desirability of responding to it, provided we do it in a way that maintains economic growth in our societies and the world.

And we certainly have a similarity of commitment to doing things in the area of technology. And I indicated to the President that Australia is looking very seriously at the place of nuclear power in our own response. And the Australian media will be aware of the upcoming Switkowski report that is going to deal with the whole question of nuclear power in the overall equation.

*President Bush.* We'll answer a couple of questions. Jennifer [Jennifer Loven, Associated Press]. Hold on for a second, please. Jennifer.
