

To further consolidate and grow, China-U.S. relationship not only serves the fundamental interests of our two countries and our two peoples, but also will have a major impact on peace, stability, and prosperity in the Asia-Pacific region and in the world at large. Both President Bush and I said that we will continue to keep the larger direction of growing this constructive and cooperative relationship between us, and we will try to make efforts to ensure that this relationship will continue to grow on a sound and steady course.

I also briefed President Bush about the Chinese position on the Taiwan issue and informed President Bush about the current

situation in the Taiwan Strait. We hope that the U.S. side will continue to follow the "one China" policy.

I welcome President Bush to Beijing to attend the opening ceremony of the Olympic Games. And I highly appreciated that President Bush has on various occasions expressed his opposition to politicizing the Olympic Games.

Thank you, Mr. President.

President Bush. Thank you, sir.

NOTE: The President spoke at 3:33 p.m. at the Windsor Hotel Toya Resort and Spa. President Hu spoke in Chinese, and his remarks were translated by an interpreter.

Remarks to the White House Press Pool in Toyako *July 9, 2008*

G-8 Summit and Major Economies Leaders Meeting

Thank you all very much. We've just finished our meetings here in Japan. I would call them very productive.

Our goal was to make progress in five key areas: confronting climate change, reinforcing our commitment to a successful Doha agreement, fighting disease in Africa, ensuring that the G-8 nations are accountable for their commitments, and addressing the challenges of high food and energy prices. I'm pleased to report that we've had significant success in all of them.

On climate change, I want to thank the Prime Minister for hosting today's meeting of leaders from the world's major economies. In order to address climate change, all major economies must be at the table. And that's what took place today. The G-8 expressed our desire to have a significant reduction in greenhouse gases by 2050. We made it clear and the other nations agreed that they must also participate in an ambitious goal, with interim goals and interim plans, to enable the world to suc-

cessfully address climate change. And we made progress, significant progress, toward a comprehensive approach.

One way to meet objectives is to invest in technology, both at the national and international levels, both through the private and public sectors. And the United States, Japan, and United Kingdom launched what's called a clean technology fund, and we hope Congress funds that effort. It's a way to help developing nations afford the technologies so that they can become good stewards of the environment.

We're also taking steps to promote clean technologies by cooperating on research and development. You know, I firmly believe that we can become less dependent on oil through new technology, and obviously, we're going to have to spend some money on research and development to be able to achieve that objective.

On other matters, the G-8 leaders emphasized the critical importance of concluding a Doha round. We want the world to trade freely. We want to make sure markets are open for agricultural goods and

manufacturing goods and services. We also recognize that the best way to help alleviate poverty is through trade. And so we had good discussions over the past couple of days about successfully completing the Doha round by the end of this year.

We also made some progress on alleviating sickness in Africa. The G-8 committed \$60 billion over 5 years to fight HIV/AIDS and other diseases. I'm also pleased to report the G-8 leaders pledged to provide 100 million long-lasting insecticide-treated bed nets by 2010 to help deal with malaria. As you know, the United States has been in the forefront of trying to help nations eradicate malaria, and the G-8 nations stepped forward to support our efforts. And I appreciate that very much.

We also committed to—with partner nations in Africa to train new health care workers—can't solve health care problems unless there's health care workers on the ground. And the United States is involved with that. And finally, we are working to expand our efforts to treat key neglected tropical diseases, with the goal of reaching 75 percent of victims in the most affected countries in Africa, Asia, and Latin America within 5 years. In other words, we had a comprehensive agenda on helping those who are being affected by disease live healthy lives.

I've always believed, to whom much is given, much is required. The nations sitting around the table have got much, and I think we're required to help those who don't. Pledges are important. Those have been—you know, oftentimes in the political process people talk big, but they never follow up. And so one of the key ingredients of these recent meetings was all of us need to be reminded that when we say we're going to do something, we got to do it. And so accountability is an important part of fulfilling our obligations.

We agreed to release detailed reports on our progress in meeting the commitments, breaking down our efforts, country by country, disease by disease. This, of course,

will help ensure the G-8 initiatives are measurable and transparent so that we're held accountable for the promises we make.

And finally, we agreed on steps to deal with hunger and high energy prices. We agreed to meet short-term food needs by providing emergency food shipments and increasing access to fertilizer and seeds and encouraging other nations to eliminate their export restrictions. We also agreed on steps to relieve hunger in the longer term, including working to double production of key food staples in several African countries, accelerating access to new agricultural technology such as new seed varieties developed through biotechnology. We're also seeking to increase the amount of food aid supplied by local producers. In other words, instead of the United States just simply giving food, we ought to be buying food from local producers so that they can develop their own agricultural industries, so to help deal with food—world hunger.

We also agreed that on high energy prices—look, we got to deal with both on the supply and demand. On the supply side, oil and production refining capacity need to be increased. And the United States needs to do its part. The Democratic leaders in Congress will not allow us to explore for oil and gas in parts of Alaska, offshore America, and now is the time for them to change their mind. We also—I'm firmly—believe that we can do this kind of exploration in environmentally friendly ways.

On the demand side, we agreed to take new steps to increase energy efficiency, and we agreed that fuel subsidies that artificially inflate demand should be eliminated or reduced.

In other words, this was a—you know, a lot of meetings on important subjects, and we accomplished a lot. By protecting our environment and resisting protectionism and fighting disease and promoting development and improving the daily life for millions around the world, we serve

both our interests as Americans, and we serve the interests of the world.

We've enjoyed our stay here in Japan. I want to thank the Prime Minister once again for his grand hospitality. And I appreciate you all covering this summit. Thank you very much.

NOTE: The President spoke at 4:22 p.m. at the Windsor Hotel Toya Resort and Spa. In his remarks, he referred to Prime Minister Yasuo Fukuda of Japan.

Remarks on Intelligence Reform Legislation

July 9, 2008

Today the United States Congress passed a vital piece of legislation that will make it easier for this administration and future administrations to protect the American people. This vital intelligence bill will allow our national security professionals to quickly and effectively monitor the plans of terrorists outside the United States, while respecting the liberties of the American people.

This legislation is critical to America's safety; it is long overdue. Months ago, my administration set out key criteria that this intelligence legislation would have to have before I would sign it into law. The Attorney General and Director of National Intelligence report that the bill Congress passed today meets these criteria, and therefore, I will soon sign the bill into law.

This bill will help our intelligence professionals learn who the terrorists are talking to, what they're saying, and what they're planning. It will ensure that those companies whose assistance is necessary to protect the country will themselves be protected

from lawsuits for past or future cooperation with the Government. It will uphold our most solemn obligation as officials of the Federal Government to protect the American people.

I want to thank the members of my administration who worked hard to get this legislation passed. I thank the Democratic and Republican leadership in the Congress for their efforts, particularly House Majority Leader Hoyer, House Republican Whip Blunt, Senators Bond and Rockefeller, Congressmen Hoekstra, Reyes, and Smith.

This legislation shows that even in an election year, we can come together and get important pieces of legislation passed.

Thank you.

NOTE: The President spoke at 4:01 p.m. in the Rose Garden at the White House. In his remarks, he referred to Attorney General Michael B. Mukasey. Due to the 13-hour time difference, these remarks were made after those to the White House press pool in Toyako, Japan.

Remarks on Signing the FISA Amendments Act of 2008

July 10, 2008

Thank you all. Please be seated. Thank you. Welcome to the Rose Garden. Today I'm pleased to sign landmark legislation

that is vital to the security of our people. The bill will allow our intelligence professionals to quickly and effectively monitor
