their civilian lives behind them, they stepped forward to wage a crusade for freedom. They laid the foundations of the peace and security we enjoy today and planted the seeds of democracy that now are bearing fruit throughout Europe. Many of these heroes and patriots have gone to their final rest; but their service, their sacrifice, and their achievements will live forever in the memories and hearts of their fellow Americans.

The Congress by House Joint Resolution 65, has authorized and requested the President to issue a proclamation honoring the veterans of the Battle of the Bulge.

NOW, THEREFORE, I, WILLIAM J. CLINTON, President of the United States of America, do hereby proclaim the period of December 16, 1999, to January 25, 2000, as a time to commemorate the 55th anniversary of the Battle of the Bulge. I call upon the people of the United States to express our profound gratitude to the veterans of the Battle of the Bulge and to honor them with appropriate programs, ceremonies, and activities.

IN WITNESS WHEREOF, I have hereunto set my hand this sixteenth day of December, in the year of our Lord nineteen hundred and ninety-nine, and of the Independence of the United States of America the two hundred and twenty-fourth.

WILLIAM J. CLINTON

Proclamation 7262 of December 16, 1999

Wright Brothers Day, 1999

By the President of the United States of America

A Proclamation

We stand at a rare moment in human history: the end of a century and the birth of a new millennium. The arrival of the 21st century presents all Americans with an opportunity to reflect on where we have been as a Nation and to dream about where we will go in the future. At the dawn of this century, Orville and Wilbur Wright found themselves poised at such a moment. Behind them lay years of painstaking effort and experimentation, trial and failure, in their pursuit of the dream of powered human flight. Ahead of them stretched the sands of Kitty Hawk in North Carolina and yet another attempt to fly in the aircraft they had built by hand. On December 17, 1903, for 12 seconds and 120 feet, they achieved their dream and forever changed the destiny of mankind.

That first brief flight showed that the sky was no longer a limit but a new horizon; it ignited new dreams in our people. Each succeeding generation of Americans, building on the Wright brothers' achievement and fired by the same vision, energy, and determination, has refined the science of flight, increased the range, efficiency, and safety of aircraft, and created a modern air transportation system and aviation industry that have energized our economy and helped transform the world into a truly global community.
And, while they could never have foreseen it, the Wright brothers also brought us to the threshold of space. A scant six decades after that first flight, Americans left the Earth's atmosphere and orbited our planet. By 1969, Neil Armstrong had left the first human footprint on the dusty surface of the Moon. Today's astronauts fly space shuttle missions that are helping us meet the challenge of global climate change, bringing the International Space Station closer to completion, and expanding our knowledge of Earth and the universe. Yet even now the Wright brothers' achievement continues to fire our dreams and beckons us to make new discoveries.

The Congress, by a joint resolution approved December 17, 1963 (77 Stat. 402; 36 U.S.C. 169), has designated December 17 of each year as "Wright Brothers Day" and has authorized and requested the President to issue annually a proclamation inviting the people of the United States to observe that day with appropriate ceremonies and activities.

NOW, THEREFORE, I, WILLIAM J. CLINTON, President of the United States of America, do hereby proclaim December 17, 1999, as Wright Brothers Day.

IN WITNESS WHEREOF, I have hereunto set my hand this sixteenth day of December, in the year of our Lord nineteen hundred and ninety-nine, and of the Independence of the United States of America the two hundred and twenty-fourth.

WILLIAM J. CLINTON

Proclamation 7263 of January 11, 2000

Establishment of the Agua Fria National Monument

By the President of the United States of America

A Proclamation

The windswept, grassy mesas and formidable canyons of Agua Fria National Monument embrace an extraordinary array of scientific and historic resources. The ancient ruins within the monument, with their breathtaking vistas and spectacular petroglyphs, provide a link to the past, offering insights into the lives of the peoples who once inhabited this part of the desert Southwest. The area's architectural features and artifacts are tangible objects that can help researchers reconstruct the human past. Such objects and, more importantly, the spatial relationships among them, provide outstanding opportunities for archeologists to study the way humans interacted with one another, neighboring groups, and with the environment that sustained them in prehistoric times.

The monument contains one of the most significant systems of late prehistoric sites in the American Southwest. Between A.D. 1250 and 1450, its pueblo communities were populated by up to several thousand people. During this time, many dwelling locations in the Southwest were abandoned and groups became aggregated in a relatively small number of densely populated areas. The monument encompasses one of the best examples of these areas, containing important archeological evidence that is crucial to understanding the cultural, social, and economic processes that accompanied this period of significant change.
