stitution and laws of the United States, do hereby proclaim November 13 through November 17, 2000, as International Education Week. I urge all Americans to observe this week with events and programs that celebrate the benefits of international education to our citizens, our economy, and the world.

IN WITNESS WHEREOF, I have hereunto set my hand this thirteenth day of November, in the year of our Lord two thousand, and of the Independence of the United States of America the two hundred and twenty-fifth.

WILLIAM J. CLINTON

Proclamation 7377 of November 15, 2000

America Recycles Day, 2000

By the President of the United States of America

A Proclamation

As we look forward to Thanksgiving, our annual celebration of America’s great bounty, it is appropriate to observe America Recycles Day and focus on how to preserve that bounty for the benefit of future generations.

Recycling waste and purchasing products made from recycled materials are among the easiest and most effective measures every American can take to conserve our resources and create a cleaner environment. Currently, our country recovers more than 28 percent of the billions of pounds of waste generated by Americans annually—an effort that translates into enough savings to supply the energy needs of 9 million U.S. households. But the recycling process succeeds only when recovered materials are returned to retailers as new products that are purchased by consumers; otherwise, the recycled products themselves must be disposed of as waste.

Buying recycled products conserves resources, reduces water and air pollution and greenhouse gas emissions, and saves energy. While beneficial for the environment, the recycling process is good for our economy as well. By promoting the development of markets for recycled products, we are also creating new jobs, many of which are in America’s inner cities, where job creation is particularly critical. It is estimated that while incinerating 10,000 tons of waste creates 1 job, and landfilling the same amount creates 6 jobs, recycling the same 10,000 tons creates 36 jobs. Nationwide, recycling and remanufacturing provide 1 million jobs and $100 billion in revenue.

To ensure the Federal Government’s leadership in the recycling effort, I signed an Executive Order in 1998 directing all Federal agencies to expand and strengthen their commitment to recycling and buying recycled-content and environmentally preferable products. The Federal Government now purchases more than $350 million in recycled-content products annually—an increase of $112 million a year, or 30 percent, from just a decade ago.

America Recycles Day helps us to build on this progress by uniting environmental and community organizations, business and industry, and
agencies at all levels of government as partners in the vital effort to keep recycling working. By encouraging every business and consumer in America to start or enhance recycling efforts and to buy recycled-content products, we can sustain our economy, improve our environment, and preserve our precious natural resources for the sake of generations to come.

NOW, THEREFORE, I, WILLIAM J. CLINTON, President of the United States of America, by virtue of the authority vested in me by the Constitution and laws of the United States, do hereby proclaim November 15, 2000, as America Recycles Day. I urge all Americans to observe this day with appropriate ceremonies and activities and to take personal responsibility for the environment not only by recycling, but also by choosing to purchase and use products made from recycled materials.

IN WITNESS WHEREOF, I have hereunto set my hand this fifteenth day of November, in the year of our Lord two thousand, and of the Independence of the United States of America the two hundred and twenty-fifth.

WILLIAM J. CLINTON

Proclamation 7378 of November 15, 2000

National Great American Smokeout Day, 2000

By the President of the United States of America
A Proclamation

In the 24 years since the American Cancer Society organized the first Great American Smokeout, our country has made encouraging progress in our battle to reduce the devastating human and economic toll that tobacco products take on our society. Today we have a more comprehensive understanding of the dangers of tobacco use and the sophisticated marketing tactics used by tobacco companies, and we have developed more effective methods for helping people break their addiction to tobacco products.

Despite the progress we have made, tobacco remains the leading cause of preventable death in our Nation, with more than 400,000 casualties from tobacco-related illness each year. Since the first report of the Surgeon General on smoking and health was issued in 1964, 10 million Americans have died from causes attributed to smoking. More than 50 million Americans are currently addicted to tobacco. Every day, another 3,000 young Americans become regular smokers; of these, nearly 1,000 will die prematurely.

A recent study funded by the National Institutes of Health has shown that young people become addicted to nicotine much more quickly than we previously thought. Adolescents who smoke as infrequently as once a month still experience symptoms of addiction. That is why my Administration has urged the Congress to raise the tax on cigarettes and grant authority to the Food and Drug Administration to limit tobacco marketing and sales to youth. I have also called on all the States to devote a substantial portion of their tobacco settlement funds to reduce youth smoking. Currently, tobacco companies are spending nearly $7 billion a year to market their products, dramatically more than the
