life-saving emergency advice. Regional Poison Control Centers in the
United States provide information on recommended treatment for the
ingestion of household products and medicines, and parents and those
responsible for taking care of children are encouraged to keep the na-
tional toll-free number on their telephones. In cases of an emergency,
callers should remain calm and provide the Poison Control Center ex-
pert with essential information about the victim's age, weight, existing
health conditions, and details about the substance that was inhaled,
swallowed, or absorbed by the victim. Through our vigilance, we can
work together to help stop child poisonings and give every child an
opportunity for a bright future.

To encourage Americans to learn more about the dangers of accidental
poisonings and to take more preventive measures, the Congress, by
joint resolution approved September 26, 1961, as amended (75 Stat.
681), has authorized and requested the President to issue a proclama-
tion designating the third week of March each year as “National Poison
Prevention Week.”

NOW, THEREFORE, I, GEORGE W. BUSH, President of the United
States of America, do hereby proclaim March 16 through 22, 2003, as
National Poison Prevention Week. I call upon all Americans to observe
this week by participating in appropriate ceremonies and activities and
by learning how to prevent poisonings among children.

IN WITNESS WHEREOF, I have hereunto set my hand this fourteenth
day of March, in the year of our Lord two thousand three, and of the
Independence of the United States of America the two hundred and
twenty-seventh.

GEORGE W. BUSH

Proclamation 7654 of March 18, 2003

Greek Independence Day: A National Day of Celebration
of Greek and American Democracy, 2003

By the President of the United States of America
A Proclamation

After nearly 400 years of rule by the Ottomans, Greece declared its
independence on March 25, 1821. Long before that, ancient Athenians
created a Greek culture that valued human liberty and dignity, and
modern Greeks have demonstrated that preserving freedom is a power-
ful motivating force. Today, on Greek Independence Day, we recognize
the ancient Greek influence in framing our own Constitution and cele-
brate the Greek-American heritage that continues to strengthen our
communities and enrich our society.

Bound by history, mutual respect, and common ideals, America and
Greece have been firm allies in the great struggles for liberty. Our
countries fought together in every major twentieth-century war, and
today, we remain united in the war against terror that threatens the fu-
ture of every nation. We are working together to achieve peace and
prosperity in the Balkans and southeastern Mediterranean. As the cur-
cent president of the European Union, Greece is also playing a critical
role in our efforts to confront many other global problems that affect our nations and our world.

Our commitment to the friendship between our two nations has grown from strong bonds of tradition and shared fundamental values. On Greek Independence Day, I encourage all Americans to recognize the countless contributions Greek Americans have made to our country. Embodying the independence and creativity that have made our country strong, their proud history is a source of inspiration for our Nation and our world.

NOW, THEREFORE, I, GEORGE W. BUSH, President of the United States of America, by virtue of the authority vested in me by the Constitution and laws of the United States, do hereby proclaim March 25, 2003, as Greek Independence Day: A National Day of Celebration of Greek and American Democracy. I call upon all the people of the United States to observe this day with appropriate ceremonies and activities.

IN WITNESS WHEREOF, I have hereunto set my hand this eighteenth day of March, in the year of our Lord two thousand three, and of the Independence of the United States of America the two hundred and twenty-seventh.

GEORGE W. BUSH

Cancer Control Month, 2003

By the President of the United States of America
A Proclamation

Millions of Americans are winning the fight against cancer, but much work remains. More than 3,500 Americans are diagnosed with cancer each day, and more than 45,000 will die from the disease this month. Yet, experts believe that half of all cancer deaths are preventable. With exercise, nutrition, and healthy behavior, we can help prevent this deadly disease and save lives. During Cancer Control Month, we renew our commitment to over coming cancer by learning more about its prevention and early detection.

To protect against disease, Americans can make smart choices that will lead to longer, healthier lives. A critical step that Americans can take to improve their health and reduce the risk of cancer is to avoid the use of tobacco. Also, avoiding excessive drinking and sun exposure can help guard against cancer and help ensure better health.

Improvements in diet and fitness can help prevent many serious health problems. A diet rich in fruits and vegetables and regular physical activity help protect us from illness and can add years to our lives. Research suggests that we can decrease the number of cancer deaths in America by one-third simply by changing our diets and getting more exercise.

Preventative health screening is vital to early detection and treatment of cancer. Regular screening can save lives and enhances the well-
