

"(i) Notwithstanding any other provision of this Act the Secretary shall increase the acreage allotments for the 1958 and 1959 crops of wheat for farms in the irrigable portion of the area known as the Tulelake division of the Klamath project of California located in Modoc and Siskiyou Counties, California, as defined by the United States Department of Interior, Bureau of Reclamation, and hereinafter referred to as the area. The increase for the area for each such crop shall be determined by adding to the total allotments established for farms in the area for the particular crop without regard to this subsection, hereinafter referred to as the original allotments, an acreage sufficient to make available for each such crop a total allotment of eight thousand acres for the area. The additional allotments made available by this subsection shall be in addition to the National, State and county allotments otherwise established under this Act, but the acreage planted to wheat pursuant to such increased allotments shall be taken into account in establishing future State, county, and farm acreage allotments. The Secretary shall apportion the additional allotment acreage made available under this subsection between Modoc and Siskiyou Counties on the basis of the relative needs for additional allotments for the portion of the area in each county. The Secretary shall also allot such additional acreage to individual farms in the area for which an application for an increased acreage is made on the basis of tillable acres, crop rotation practices, type of soil and topography, and taking into account the original allotment for the farm, if any. No producer shall be eligible to participate in the wheat acreage reserve program with respect to any farm for any year for which such farm receives an additional allotment under this subsection; and no wheat produced on such farm in such year shall be eligible for price support. The increase in the wheat acreage allotment for any farm under this subsection shall be conditioned upon the production of durum wheat (class II) on such increased acreage.
