States to observe each Memorial Day as a day of prayer for permanent peace and designating a period on that day when the people of the United States might unite in prayer.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby designate Memorial Day, Monday, May 30, 1983, as a day of prayer for permanent peace, and I designate the hour beginning in each locality at 11 o'clock in the morning of that day as a time to unite in prayer. I urge the press, radio, television, and all other information media to cooperate in this observance.

I also request the Governors of the United States and the Commonwealth of Puerto Rico and the appropriate officials of all local units of government to direct that the flag be flown at half-staff during this Memorial Day on all buildings, grounds, and naval vessels throughout the United States and in all areas under its jurisdiction and control, and I request the people of the United States to display the flag at half-staff from their homes for the customary forenoon period.

IN WITNESS WHEREOF, I have hereunto set my hand this 4th day of April, in the year of our Lord nineteen hundred and eighty-three, and of the Independence of the United States of America the two hundred and seventeenth.

RONALD REAGAN

Mother's Day, 1983

By the President of the United States of America
A Proclamation

Traditionally, this Nation honors its mothers by designating the second Sunday in May as Mother's Day.

To our mothers we owe our highest esteem, for it is from their gift of life that the flow of events begins that shapes our destiny. A mother's love, nurturing, and beliefs are among the strongest influences molding the development and character of our youngsters. As Henry Ward Beecher wrote, "What a mother sings to the cradle goes all the way down to the coffin."

Motherhood is both a great responsibility and one of the most rewarding and pleasurable experiences life has to offer. Mother's Day presents a special opportunity to appreciate our mothers—to consider all they have done, and all they continue to do, in fostering children's physical and emotional growth, nursing illness, encouraging success, easing failure, maintaining family life, supporting their spouses, contributing vitally to the economy through their accomplishments at work, and serving their communities. The quality and scope of their activities, as well as their overriding concern for the well-being of their families and our country, inspires and strengthens us as individuals and as a Nation.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby request that Sunday, May 8, 1983, be observed as Mother's Day. I direct Government officials to display the flag of the United States on all Federal Government buildings, and I urge all citizens to display the flag at their homes and other suitable places on that day.
IN WITNESS WHEREOF, I have hereunto set my hand this 6th day of April, in the year of our Lord nineteen hundred and eighty-three, and of the Independence of the United States of America the two hundred and seventh.

RONALD REAGAN

Proclamation 5043 of April 7, 1983

Cancer Control Month, 1983

By the President of the United States of America

A Proclamation

Cancer is a major concern to the American people because statistics demonstrate that at least one out of four Americans now living will become a victim of this disease. However, it is important to recognize that we are making progress against this dread killer—in basic research, in prevention, and in bringing the fruits of cancer research to the community.

Recent empirical studies and basic research are bringing us close to an understanding of how best to prevent, diagnose, and treat cancer. Such scientific advances as the discovery of the oncogene, or cancer gene, have provided fresh insights into the molecular process of this disease. Also on the horizon are positive developments in several areas that enhance our ability to deal with this disease syndrome: e.g., the utilization of hyperthermia, improved immunotherapeutic techniques that include the use of monoclonal antibodies and new vaccines, and approaches to surgery that, while less severe in nature, remain a major weapon in our arsenal.

We continue to gather information indicating that life-style and environment play a significant part in the incidence of cancer. Today there is a growing awareness of carcinogens and radiation as causative factors in cancer development. We recognize more fully the importance of diet and nutrition as factors in the development and prevention of this disease. As we evaluate the incidence of cancer among various groups of people, we may be able to identify substances that can have a chemopreventive effect on the population as a whole.

Reports issued by the Surgeon General increasingly link cigarette smoking with cancer of the lung and other parts of the body.

A concerted effort has begun to bring the latest advances in cancer care and treatment to the community at large in a more effective way than ever before. We hope that with the goodwill, determination, and support of the American people, our continued progress will eventually lead to the control and prevention of this tragic disease.

In 1938, the Congress of the United States passed a joint resolution requesting the President to issue an annual proclamation declaring April to be Cancer Control Month.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim the month of April, 1983, as Cancer Control Month. I invite the Governors of the fifty States and the Commonwealth of Puerto Rico, and the appropriate officials of all other areas under the United States flag, to issue similar proclamations. I also ask the health care professionals, the communications industry, and all other interested persons and groups to unite during this appointed time to reaffirm publicly our Nation's continuing commitment to control cancer.
