Proclamation 5112 of October 3, 1983

National Year of Partnerships in Education 1983–1984

By the President of the United States of America
A Proclamation

America's future is dependent upon the health and vitality of her education system. Although thousands of businesses, industries, individuals, organizations, teachers, administrators, and government at all levels have been involved in the education of our youth, there is more work to be done. More people must become active in improving the quality of education in our Nation.

Recently, many schools have developed private sector partnerships in an effort to broaden available resources and reach out to their communities for support. The private sector has much to offer the growing national movement to improve our education system. Some of the most effective methods include helping educators identify the learning needs of our society; encouraging professional exchanges between teachers, educators, and businesses; contributing expertise, financial resources, and equipment; and providing technical assistance in school administration and curriculum development. In order to encourage this trend, I call upon businesses, organizations, individuals, and agencies to become involved with their local schools.

Partnerships in Education Year gives us the opportunity to acknowledge the efforts of the private sector and to encourage the creation of new partnerships in education all across this Nation.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim the period from October 1, 1983, through June 30, 1984, as the National Year of Partnerships in Education. I invite all Americans to join me in my commitment to the excellence and quality of education offered to all Americans.

IN WITNESS WHEREOF, I have hereunto set my hand this 3rd day of Oct., in the year of our Lord nineteen hundred and eighty-three, and of the Independence of the United States of America the two hundred and eighth.

RONALD REAGAN

Proclamation 5113 of October 4, 1983

National Productivity Improvement Week, 1983

By the President of the United States of America
A Proclamation

The challenge of greater productivity growth is of supreme importance to America's future. Only through productivity gains can real living standards be improved. Greater productivity growth is the cornerstone of price stability and sustained economic growth. It is vital to regaining our competitive position in world markets and creating job opportunities for an expanding American labor force.

Productive societies reward saving, investing, building, and creating rather than consuming. A productive society lives within its means and does not pursue a pattern in its spending habits that results in simply shifting its burdens forward to the future. Productive societies also nourish the spirit of
adventure, innovation and entrepreneurship. Productive societies share common objectives and their leading institutions work together—business, government, labor, and academia view each other as partners, not adversaries.

We have made much progress in restoring the foundation for a prosperous and productive society. By reducing the rate of growth of government spending, by strengthening the incentives to save and invest, by eliminating many unnecessary and burdensome regulations, and by encouraging monetary policies that ensure the price stability needed for lasting economic growth we have created an environment for sustained increases in productivity.

The improvement of our Nation’s productivity depends on all Americans. The recently concluded White House Conference on Productivity brought together an outstanding group of distinguished citizens from all walks of life and sectors of our economy. Their recommendations for actions at all levels in the public and private sectors will help us build on the foundation we have laid.

In order to encourage better understanding of the need for productivity growth and the development of methods to improve productivity in the private and public sectors, the Congress, by Senate Joint Resolution 142, has designated the week of October 3 through October 9, 1983, as National Productivity Improvement Week.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim the week of October 3 through October 9, 1983, as National Productivity Improvement Week. I call upon the people of the United States to observe such week with appropriate ceremonies and activities.

IN WITNESS WHEREOF, I have hereunto set my hand this 4th day of Oct., in the year of our Lord nineteen hundred and eighty-three, and of the Independence of the United States of America the two hundred and eighth.

RONALD REAGAN

Proclamation 5114 of October 5, 1983

Myasthenia Gravis Awareness Week, 1983

By the President of the United States of America
A Proclamation

Americans with myasthenia gravis cannot move about freely, as most of us can. This chronic neuromuscular disease, which has no known cause, produces progressive muscular weakness and abnormally rapid fatigue of the voluntary muscles. Myasthenia gravis can also result in a life-threatening medical crisis, particularly when a patient’s throat muscles are affected.

Myasthenia gravis can strike any person, at any age, at any time. At least 100,000 people have been diagnosed as having this disorder, and scientists estimate that another 100,000 persons with myasthenia gravis have not yet been diagnosed.

In the past, myasthenia gravis patients died or were severely incapacitated by their weakened muscles. Several forms of treatment developed by scientists in private and Federal research institutions have led to improved management of the disease. Research supported by the Myasthenia Gravis
