PERSONAL HEALTH EDUCATION AND TRAINING PROGRAMS

Sec. 701. The Act (42 U.S.C. 3001 et seq.) is amended by adding at the end a new title as follows:

"TITLE VII—OLDER AMERICANS PERSONAL HEALTH EDUCATION AND TRAINING PROGRAM"

"SHORT TITLE"

"Sec. 701. This title may be cited as the 'Older Americans Personal Health Education and Training Act'."

"FINDINGS"

"Sec. 702. The Congress hereby finds that—
(1) individuals 60 years of age or older constitute the fastest growing segment of the Nation's population;
(2) the process of aging, as well as the changes in lifestyle which accompany it, such as retirement, the end of parenting roles, and relocation, seem to increase and exacerbate health problems faced by older individuals (such health problems include physical, mental, and emotional health problems);
(3) many of the health problems faced by individuals 60 years of age or older, such as arteriosclerosis, arthritis, adult-onset diabetes, hypothermia, heat stress, Alzheimer's disease, circulatory problems, hypertension, diminished hearing and eyesight, reduced strength, social isolation, and bone fragility are particularly common to the older American population;
(4) although older individuals make up only 11 percent of our population, they consume 29 percent of the total health care
expenditures and 50.5 percent of Federal health care (non-military) expenditures, and as our population ages the percentage of Federal health care dollars absorbed by older individuals will inevitably increase;

“(5) older individuals consume more prescription and over-the-counter drugs than any other age group and are therefore more likely to be exposed to two or more active drugs which negatively interact;

“(6) many of the health problems faced by older individuals and the fear of those health problems can be ameliorated and in some cases prevented if proper health education and training is available;

“(7) health education and training focused specifically on the needs of older individuals can play an important role in health promotion and illness prevention and simultaneously help reduce medical costs for both individuals and the Government;

“(8) the educational institutions of public health, the medical sciences, psychology, pharmacology, nursing, social work, health education, nutrition, and gerontology have much to offer in the design and implementation of health education and training services for older individuals; and

“(9) the existing 3,300 multipurpose senior centers established under this Act which already serve over 9,000,000 older individuals each year, are appropriate points of contact from which health education and training can be provided, but there is currently no uniform, standardized program consistently in place across the Nation.
