(3) escalated energy costs have had a negative effect on the economics of United States commercial and recreational fisheries; Energy.

(4) commercial and recreational fisheries are a prominent factor in United States coastal economies and the direct and indirect returns to the United States economy from commercial and recreational fishing expenditures are threefold; and

(5) properly designed, constructed, and located artificial reefs in waters covered under this title can enhance the habitat and diversity of fishery resources; enhance United States recreational and commercial fishing opportunities; increase the production of fishery products in the United States; increase the energy efficiency of recreational and commercial fisheries; and contribute to the United States and coastal economies.

(b) PURPOSE.—The purpose of this title is to promote and facilitate responsible and effective efforts to establish artificial reefs in waters covered under this title.
