## § 2011. Congressional declaration of policy

It is declared to be the policy of Congress, in order to promote the general welfare, to safeguard the health and well-being of the Nation's population by raising levels of nutrition among low-income households. Congress finds that the limited food purchasing power of low-income households contributes to hunger and malnutrition among members of such households. Congress further finds that increased utilization of food in establishing and maintaining adequate national levels of nutrition will promote the distribution in a beneficial manner of the Nation's agricultural abundance and will strengthen the Nation's agricultural economy, as well as result in more orderly marketing and distribution of foods. To alleviate such hunger and malnutrition, a food stamp program is herein authorized which will permit low-income households to obtain a more nutritious diet through normal channels of trade by increasing food purchasing power for all eligible households who apply for participation.
