EFFECTIVE DATE

Subchapter effective Dec. 22, 1981, see section 1801 of Pub. L. 97-98, set out as a note under section 4301 of this title.

§ 3332. Program; development, purposes, scope, etc.

The Secretary may develop and implement a cooperative rangeland research program in coordination with the program carried out under the Renewable Resources Extension Act of 1978 [16 U.S.C. 1671 et seq.], to improve the production and quality of desirable native forages or introduced forages which are managed in a similar manner to native forages for livestock and wildlife. The program shall include studies of: (1) management of rangelands and agricultural land as integrated systems for more efficient utilization of crops and waste products in the production of food and fiber; (2) methods of managing rangeland watersheds to maximize efficient use of water and improve water yield, water quality, and water conservation, to protect against onsite and offsite damage of rangeland resources from floods, erosion, and other detrimental influences, and to remedy unsatisfactory and unstable rangeland conditions; (3) revegetation and rehabilitation of rangelands including the control of undesirable species of plants; and (4) such other matters as the Secretary considers appropriate.

§ 3401. Congressional findings and declaration of policy

(a) Wheat is basic to the American diet and the American economy. It is grown by thousands of farmers and consumed, in various forms, by millions of people in the United States.

(b) The size of the American wheat crop and how it is marketed and ultimately consumed determines whether many Americans receive adequate nourishment. Wheat has a strong impact on the Nation's well-being. Additional research on the optimal use of wheat products can improve the American diet. Consumer education about the nutritional value and economic use of wheat products can enhance the national welfare.

(c) It has long been recognized that it is in the national interest to have a regular, adequate, and high quality wheat supply. It would be extremely difficult, without an effective coordinated research and nutrition education effort, to accomplish this objective. A programmed effort of research and nutrition education is of great importance to wheat producers, processors, end product manufacturers, and consumers.

(d) It is the purpose of this chapter and in the public interest to authorize and enable the creation of an orderly procedure, adequately financed through an assessment, for the development and initiation of an effective and continuous coordinated program of research and nutrition education, designed to improve and enhance the quality, and make the most efficient use, of American wheat, processed wheat, and wheat end products to ensure an adequate diet for the people of the United States. The maximum rate of assessment authorized hereunder represents an infinitesimal proportion of the overall cost of manufacturing wheat end products. Therefore, such assessment will not significantly affect the retail prices of those products. Furthermore, any price effect will be more than offset by the increased efficiency in end product manufacture

and increased consumer acceptance, due to nutritional improvements in wheat products, which may be expected to follow from adoption of a plan under this chapter. Nothing in this chapter shall be construed to provide for control of production or otherwise limit the right of individual wheat producers to produce wheat.

EFFECTIVE DATE

Chapter effective Oct. 1, 1977, see section 1901 of Pub. L. 95-113, set out as an Effective Date of 1977 Amendment note under section 1307 of this title.

SHORT TITLE

Section 1701 of title XVII of Pub. L. 95-113 provided that: "This title [enacting this chapter] may be cited as the 'Wheat and Wheat Foods Research and Nutrition Education Act'."

SEPARABILITY

Section 1718 of Pub. L. 95-113 provided that: "If any provision of this title [this chapter] or the application thereof to any person or circumstances is held invalid, the validity of the remainder of the title and of the application of such provision to other persons and circumstances shall not be affected thereby."

§ 3402. Definitions

For the purposes of this chapter:

(a) The term "wheat" means all classes of wheat grains grown in the United States.

(b) The term "processed wheat" means the wheat-derived content of any substance (such as cake mix or flour) produced for use as an ingredient of an end product by changing wheat grown within the United States in form or character by any mechanical, chemical, or other means.

(c) The term "end product" means any product which contains processed wheat as an ingredient and which is intended, as produced, for consumption as human food, notwithstanding any additional incidental preparation which may be necessary by the ultimate consumer.

(d) The term "wheat producer" means any person who grows wheat within the United States for market.

(e) The term "processor" means any person who commercially produces processed wheat within the United States.

(f) The term "end product manufacturer" means any person who commercially produces an end product within the United States, but such term shall not include such persons to the extent that they produce end products on the premises where such end products are to be consumed by an ultimate consumer, including, but not limited to, hotels, restaurants, and institutions, nor shall such term include persons who produce end products for their own personal, family, or household use.

(g) The term "research" means any type of research to advance the nutritional quality, marketability, production, or other qualities of wheat, processed wheat, or end products.

(h) The term "nutrition education" means any action to disseminate to the public information resulting from research concerning the economic value or nutritional benefits of wheat, processed wheat, and end products.
