

**(b) Resolution**

For purposes of this section, the term “resolution” means a joint resolution, the resolving clause of which is as follows: “That the House of Representatives and Senate approve the recommendation of the President for \_\_\_\_\_ in submitted to the Congress on \_\_\_\_\_, 19 \_\_\_\_\_”, the first blank space therein to be filled in with appropriate activity, the second blank space therein to be filled in with the name or description of the area of land affected by the activity, and the third blank space therein to be filled with the date on which the President submits his recommendation to the House of Representatives and the Senate. Such resolution may also include material relating to the application and effect of the National Environmental Policy Act of 1969 [42 U.S.C. 4321 et seq.] to the recommendation.

**(c) Referral**

A resolution once introduced with respect to such Presidential recommendation shall be referred to one or more committees (and all resolutions with respect to the same Presidential recommendation shall be referred to the same committee or committees) by the President of the Senate or the Speaker of the House of Representatives, as the case may be.

**(d) Other procedures**

Except as otherwise provided in this section the provisions of section 719f(d) of title 15 shall apply to the consideration of the resolution.

**SUBCHAPTER I—GENERAL PROVISIONS**

**§ 3301. Congressional findings and declaration of purpose**

(a) The Congress finds and declares the following:

(1) The stocks of salmon and steelhead which originate in the rivers of the conservation areas constitute valuable and renewable natural resources. Many groups of commercial, recreational, and treaty fishermen have historically depended upon these stocks of fish for their livelihoods and avocations. These fishery resources contribute to the food supply and economic health of the Pacific Northwest and the Nation as a whole, provide valuable recreational experiences for thousands of citizens from various parts of the United States and represent a central element of the cultures and economies of Indian tribes and the citizens of the Pacific Northwest.

(2) Over a period of several decades, competing uses of salmon and steelhead habitat and historical problems relating to conservation measures, the regulation of harvest and enhancement have depressed several of these stocks of salmon and steelhead.
