

subchapter II of this chapter shall be consistent with applicable State and local educational standards.

(B) Standards and procedures with respect to awarding academic credit and certifying educational attainment in programs conducted under such part shall be consistent with the requirements of applicable State and local law, including regulation.

(10) No funds available under this chapter may be used for public service employment except as specifically authorized under this chapter.

(11) The Federal requirements governing the chapter, use, and disposition of real property, equipment, and supplies purchased with funds provided under this chapter shall be the Federal requirements generally applicable to Federal grants to States and local governments.

(12) Nothing in this chapter shall be construed to provide an individual with an entitlement to a service under this chapter.

(13) Services, facilities, or equipment funded under this chapter may be used, as appropriate, on a fee-for-service basis, by employers in a local area in order to provide employment and training activities to incumbent workers—

(A) when such services, facilities, or equipment are not in use for the provision of services for eligible participants under this chapter;

(B) if such use for incumbent workers would not have an adverse effect<sup>1</sup> on the provision of services to eligible participants under this chapter; and

(C) if the income derived from such fees is used to carry out the programs authorized under this chapter.

(Pub. L. 105-220, title I, §195, Aug. 7, 1998, 112 Stat. 1057.)

## CHAPTER 31—ASSISTIVE TECHNOLOGY FOR INDIVIDUALS WITH DISABILITIES

Sec.	
3001.	Findings and purposes.
3002.	Definitions.
3003.	State grants for assistive technology.
3004.	State grants for protection and advocacy services related to assistive technology.
3005.	National activities.
3006.	Administrative provisions.
3007.	Authorization of appropriations.
3011 to 3058.	Omitted.

### § 3001. Findings and purposes

#### (a) Findings

Congress finds the following:

(1) Over 54,000,000 individuals in the United States have disabilities, with almost half experiencing severe disabilities that affect their ability to see, hear, communicate, reason, walk, or perform other basic life functions.

(2) Disability is a natural part of the human experience and in no way diminishes the right of individuals to—

(A) live independently;

(B) enjoy self-determination and make choices;

(C) benefit from an education;

(D) pursue meaningful careers; and

(E) enjoy full inclusion and integration in the economic, political, social, cultural, and educational mainstream of society in the United States.

(3) Technology is one of the primary engines for economic activity, education, and innovation in the Nation, and throughout the world. The commitment of the United States to the development and utilization of technology is one of the main factors underlying the strength and vibrancy of the economy of the United States.

(4) As technology has come to play an increasingly important role in the lives of all persons in the United States, in the conduct of business, in the functioning of government, in the fostering of communication, in the conduct of commerce, and in the provision of education, its impact upon the lives of individuals with disabilities in the United States has been comparable to its impact upon the remainder of the citizens of the United States. Any development in mainstream technology will have profound implications for individuals with disabilities in the United States.

(5) Substantial progress has been made in the development of assistive technology devices, including adaptations to existing devices that facilitate activities of daily living that significantly benefit individuals with disabilities of all ages. These devices, including adaptations, increase involvement in, and reduce expenditures associated with, programs and activities that facilitate communication, ensure independent functioning, enable early childhood development, support educational achievement, provide and enhance employment options, and enable full participation in community living for individuals with disabilities. Access to such devices can also reduce expenditures associated with early childhood intervention, education, rehabilitation and training, health care, employment, residential living, independent living, recreation opportunities, and other aspects of daily living.

(6) Over the last 15 years, the Federal Government has invested in the development of comprehensive statewide programs of technology-related assistance, which have proven effective in assisting individuals with disabilities in accessing assistive technology devices and assistive technology services. This partnership between the Federal Government and the States provided an important service to individuals with disabilities by strengthening the capacity of each State to assist individuals with disabilities of all ages meet their assistive technology needs.

(7) Despite the success of the Federal-State partnership in providing access to assistive technology devices and assistive technology services, there is a continued need to provide information about the availability of assistive technology, advances in improving accessibility and functionality of assistive technology, and appropriate methods to secure and utilize assistive technology in order to maximize the independence and participation of individuals with disabilities in society.

<sup>1</sup> So in original. Probably should be "effect".
