SUBCHAPTER I—DECLARATION OF FINDINGS AND PURPOSES

§ 7111. Congressional findings

The Congress of the United States finds that—

(1) the United States faces an increasing shortage of nonrenewable energy resources;

(2) this energy shortage and our increasing dependence on foreign energy supplies present a serious threat to the national security of the United States and to the health, safety and welfare of its citizens;

(3) a strong national energy program is needed to meet the present and future energy needs of the Nation consistent with overall national economic, environmental and social goals;

(4) responsibility for energy policy, regulation, and research, development and demonstration is fragmented in many departments and agencies and thus does not allow for the comprehensive, centralized focus necessary for effective coordination of energy supply and conservation programs; and

(5) formulation and implementation of a national energy program require the integration of major Federal energy functions into a single department in the executive branch.

(Pub. L. 95-91, title I, § 101, Aug. 4, 1977, 91 Stat. 567.)

§ 7112. Congressional declaration of purpose

The Congress therefore declares that the establishment of a Department of Energy is in the public interest and will promote the general welfare by assuring coordinated and effective administration of Federal energy policy and programs. It is the purpose of this chapter:

(1) To establish a Department of Energy in the executive branch.

(2) To achieve, through the Department, effective management of energy functions of the Federal Government, including consultation with the heads of other Federal departments and agencies in order to encourage them to establish and observe policies consistent with a coordinated energy policy, and to promote maximum possible energy conservation measures in connection with the activities within their respective jurisdictions.

(3) To provide for a mechanism through which a coordinated national energy policy can be formulated and implemented to deal with the short-, mid- and long-term energy problems of the Nation; and to develop plans and programs for dealing with domestic energy production and import shortages.

(4) To create and implement a comprehensive energy conservation strategy that will receive the highest priority in the national energy program.

(5) To carry out the planning, coordination, support, and management of a balanced and comprehensive energy research and development program, including—

(A) assessing the requirements for energy research and development;

(B) developing priorities necessary to meet those requirements;

(C) undertaking programs for the optimal development of the various forms of energy production and conservation; and

(D) disseminating information resulting from such programs, including disseminating information on the commercial feasibility and use of energy from fossil, nuclear, solar, geothermal, and other energy technologies.

(6) To place major emphasis on the development and commercial use of solar, geothermal, recycling and other technologies utilizing renewable energy resources.

(7) To continue and improve the effectiveness and objectivity of a central energy data collection and analysis program within the Department.

(8) To facilitate establishment of an effective strategy for distributing and allocating fuels in periods of short supply and to provide for the administration of a national energy supply reserve.

(9) To promote the interests of consumers through the provision of an adequate and reliable supply of energy at the lowest reasonable cost.

(10) To establish and implement through the Department, in coordination with the Secretaries of State, Treasury, and Defense, policies regarding international energy issues that have a direct impact on research, development, utilization, supply, and conservation of energy in the United States and to undertake activities involving the integration of domestic and foreign policy relating to energy, including provision of independent technical advice to the President on international negotiations involving energy resources, energy technologies, or nuclear weapons issues, except that the Secretary of State shall continue to exercise primary authority for the conduct of foreign policy relating to energy and nuclear nonproliferation, pursuant to policy guidelines established by the President.

(11) To provide for the cooperation of Federal, State, and local governments in the development and implementation of national energy policies and programs.

(12) To foster and assure competition among parties engaged in the supply of energy and fuels.

(13) To assure incorporation of national environmental protection goals in the formulation and implementation of energy programs, and to advance the goals of restoring, protecting, and enhancing environmental quality, and assuring public health and safety.

(14) To assure, to the maximum extent practicable, that the productive capacity of private enterprise shall be utilized in the development and achievement of the policies and purposes of this chapter.

(15) To provide for, encourage, and assist public participation in the development and enforcement of national energy programs.

(16) To create an awareness of, and responsibility for, the fuel and energy needs of rural and urban residents as such needs pertain to home heating and cooling, transportation, agricultural production, electrical generation, conservation, and research and development.

(17) To foster insofar as possible the continued good health of the Nation's small business firms, public utility districts, municipal utilities, and private cooperatives involved in energy production, transportation, research, development, demonstration, marketing, and merchandising.

(18) To provide for the administration of the functions of the Energy Research and Development Administration related to nuclear weapons and national security which are transferred to the Department by this chapter.

(19) To ensure that the Department can continue current support of mathematics, science, and engineering education programs by using the personnel, facilities, equipment, and resources of its laboratories and by working with State and local education agencies, institutions of higher education, and business and industry. The Department's involvement in mathematics, science, and engineering education should be consistent with its main mission and should be coordinated with all Federal efforts in mathematics, science, and engineering education, especially with the Department of Education and the National Science Foundation (which have the primary Federal responsibility for mathematics, science, and engineering education).

(Pub. L. 95-91, title I, §102, Aug. 4, 1977, 91 Stat. 567; Pub. L. 101-510, div. C, title XXXI, §3163, Nov. 5, 1990, 104 Stat. 1841.)

AMENDMENTS

1990—Pub. L. 101-510 substituted “chapter:” for “chapter—” in introductory provisions, capitalized the first letter of the first word in each of pars. (1) to (18), substituted a period for last semicolon in each of pars. (1) to (17), struck out “and” at end of par. (17), and added par. (19).

§ 7113. Relationship with States

Whenever any proposed action by the Department conflicts with the energy plan of any State, the Department shall give due consideration to the needs of such State, and where practicable, shall attempt to resolve such conflict through consultations with appropriate State officials. Nothing in this chapter shall affect the authority of any State over matters exclusively within its jurisdiction.

(Pub. L. 95-91, title I, §103, Aug. 4, 1977, 91 Stat. 569.)

SUBCHAPTER II—ESTABLISHMENT OF DEPARTMENT

§ 7131. Establishment

There is established at the seat of government an executive department to be known as the Department of Energy. There shall be at the head

of the Department a Secretary of Energy (hereinafter in this chapter referred to as the “Secretary”), who shall be appointed by the President by and with the advice and consent of the Senate. The Department shall be administered, in accordance with the provisions of this chapter, under the supervision and direction of the Secretary.

(i) Manufacturers energy consumption survey

(1) The Administrator shall conduct and publish the results of a survey of energy consumption in the manufacturing industries in the United States at least once every two years and in a manner designed to protect the confidentiality of individual responses. In conducting the survey, the Administrator shall collect information, including—

(A) quantity of fuels consumed;

(B) energy expenditures;

(C) fuel switching capabilities; and

(3) in carrying out this subsection, take into account reporting burdens and the protection of proprietary information as required by law.

(l) Data collection

In order to improve the ability to evaluate the effectiveness of the Nation’s energy efficiency policies and programs, the Administrator shall, in carrying out the data collection provisions of subsections (i) and (k) of this section, consider—

(1) expanding the survey instruments to include questions regarding participation in Government and utility conservation programs;

OIL PIPELINE REGULATORY REFORM

Pub. L. 102-486, title XVIII, Oct. 24, 1992, 106 Stat. 3010, provided that:

“SEC. 1801. OIL PIPELINE RATEMAKING METHODOLOGY.

“(a) ESTABLISHMENT.—Not later than 1 year after the date of the enactment of this Act [Oct. 24, 1992], the Federal Energy Regulatory Commission shall issue a final rule which establishes a simplified and generally applicable ratemaking methodology for oil pipelines in accordance with section 1(5) of part I of the Interstate Commerce Act [former 49 U.S.C. 1(5)].

“(b) EFFECTIVE DATE.—The final rule to be issued under subsection (a) may not take effect before the 365th day following the date of the issuance of the rule.

“SEC. 1802. STREAMLINING OF COMMISSION PROCEDURES.

“(a) RULEMAKING.—Not later than 18 months after the date of the enactment of this Act [Oct. 24, 1992], the Commission shall issue a final rule to streamline procedures of the Commission relating to oil pipeline rates in order to avoid unnecessary regulatory costs and delays.

“(b) SCOPE OF RULEMAKING.—Issues to be considered in the rulemaking proceeding to be conducted under subsection (a) shall include the following:

“(1) Identification of information to be filed with an oil pipeline tariff and the availability to the public of any analysis of such tariff filing performed by the Commission or its staff.

“(2) Qualification for standing (including definitions of economic interest) of parties who protest oil pipeline tariff filings or file complaints thereto.

“(3) The level of specificity required for a protest or complaint and guidelines for Commission action on the portion of the tariff or rate filing subject to protest or complaint.

“(4) An opportunity for the oil pipeline to file a response for the record to an initial protest or complaint.

“(5) Identification of specific circumstances under which Commission staff may initiate a protest.

“(c) ADDITIONAL PROCEDURAL CHANGES.—In conducting the rulemaking proceeding to carry out subsection (a), the Commission shall identify and transmit to Congress any other procedural changes relating to oil pipeline rates which the Commission determines are necessary to avoid unnecessary regulatory costs and delays and for which additional legislative authority may be necessary.

“(d) WITHDRAWAL OF TARIFFS AND COMPLAINTS.—

“(1) WITHDRAWAL OF TARIFFS.—If an oil pipeline tariff which is filed under part I of the Interstate Com-

merce Act [former 49 U.S.C. 1 et seq.] and which is subject to investigation is withdrawn—

“(A) any proceeding with respect to such tariff shall be terminated;

“(B) the previous tariff rate shall be reinstated; and

“(C) any amounts collected under the withdrawn tariff rate which are in excess of the previous tariff rate shall be refunded.

“(2) WITHDRAWAL OF COMPLAINTS.—If a complaint which is filed under section 13 of the Interstate Commerce Act [former 49 U.S.C. 13] with respect to an oil pipeline tariff is withdrawn, any proceeding with respect to such complaint shall be terminated.

“(e) ALTERNATIVE DISPUTE RESOLUTION.—To the maximum extent practicable, the Commission shall establish appropriate alternative dispute resolution procedures, including required negotiations and voluntary arbitration, early in an oil pipeline rate proceeding as a method preferable to adjudication in resolving disputes relating to the rate. Any proposed rates derived from implementation of such procedures shall be considered by the Commission on an expedited basis for approval.

“SEC. 1803. PROTECTION OF CERTAIN EXISTING RATES.

“(a) RATES DEEMED JUST AND REASONABLE.—Except as provided in subsection (b)—

“(1) any rate in effect for the 365-day period ending on the date of the enactment of this Act [Oct. 24, 1992] shall be deemed to be just and reasonable (within the meaning of section 1(5) of the Interstate Commerce Act [former 49 U.S.C. 1(5)]); and

“(2) any rate in effect on the 365th day preceding the date of such enactment shall be deemed to be just and reasonable (within the meaning of such section 1(5)) regardless of whether or not, with respect to such rate, a new rate has been filed with the Commission during such 365-day period;

if the rate in effect, as described in paragraph (1) or (2), has not been subject to protest, investigation, or complaint during such 365-day period.

“(b) CHANGED CIRCUMSTANCES.—No person may file a complaint under section 13 of the Interstate Commerce Act [former 49 U.S.C. 13] against a rate deemed to be just and reasonable under subsection (a) unless—

“(1) evidence is presented to the Commission which establishes that a substantial change has occurred after the date of the enactment of this Act [Oct. 24, 1992]—

“(A) in the economic circumstances of the oil pipeline which were a basis for the rate; or

“(B) in the nature of the services provided which were a basis for the rate; or

“(2) the person filing the complaint was under a contractual prohibition against the filing of a complaint which was in effect on the date of enactment of this Act and had been in effect prior to January 1, 1991, provided that a complaint by a party bound by such prohibition is brought within 30 days after the expiration of such prohibition.

If the Commission determines pursuant to a proceeding instituted as a result of a complaint under section 13 of the Interstate Commerce Act that the rate is not just and reasonable, the rate shall not be deemed to be just and reasonable. Any tariff reduction or refunds that may result as an outcome of such a complaint shall be prospective from the date of the filing of the complaint.

“(c) LIMITATION REGARDING UNDULY DISCRIMINATORY OR PREFERENTIAL TARIFFS.—Nothing in this section shall prohibit any aggrieved person from filing a complaint under section 13 or section 15(1) of the Interstate Commerce Act [former 49 U.S.C. 13, 15(1)] challenging any tariff provision as unduly discriminatory or unduly preferential.

“SEC. 1804. DEFINITIONS.

SUBCHAPTER V—ADMINISTRATIVE PROCEDURES AND JUDICIAL REVIEW

§ 7191. Procedures for issuance of rules, regulations, or orders

(a) Applicability of subchapter II of chapter 5 of title 5

(1) Subject to the other requirements of this subchapter, the provisions of subchapter II of chapter 5 of title 5 shall apply in accordance with its terms to any rule or regulation, or any order having the applicability and effect of a rule (as defined in section 551(4) of title 5), issued pursuant to authority vested by law in, or transferred or delegated to, the Secretary, or required by this chapter or any other Act to be carried out by any other officer, employee, or component of the Department, other than the Commission, including any such rule, regulation, or order of a State, or local government agency or officer thereof, issued pursuant to authority delegated by the Secretary in accordance with this subchapter. If any provision of any Act, the functions of which are transferred, vested, or delegated pursuant to this chapter, provides administrative procedure requirements in addition to the requirements provided in this subchapter, such additional requirements shall also apply to actions under that provision.

(2) Notwithstanding paragraph (1), this subchapter shall apply to the Commission to the same extent this subchapter applies to the Secretary in the exercise of any of the Commission's functions under section 7172(c)(1) of this title or which the Secretary has assigned under section 7172(e) of this title.

(b) Substantial issue of fact or law or likelihood of substantial impact on Nation's economy, etc.; oral presentation

(1) If the Secretary determines, on his own initiative or in response to any showing made pursuant to paragraph (2) (with respect to a proposed rule, regulation, or order described in subsection (a) of this section) that no substantial issue of fact or law exists and that such rule, regulation, or order is unlikely to have a substantial impact on the Nation's economy or large numbers of individuals or businesses, such proposed rule, regulation, or order may be promulgated in accordance with section 553 of title 5. If the Secretary determines that a substantial issue of fact or law exists or that such rule, regulation, or order is likely to have a substantial impact on the Nation's economy or large numbers of individuals or businesses, an opportunity for oral presentation of views, data, and arguments shall be provided.

(2) Any person, who would be adversely affected by the implementation of any proposed rule, regulation, or order who desires an opportunity for oral presentation of views, data, and arguments, may submit material supporting the existence of such substantial issues or such impact.

(3) A transcript shall be kept of any oral presentation with respect to a rule, regulation, or order described in subsection (a) of this section.

(c) Waiver of requirements

The requirements of subsection (b) of this section may be waived where strict compliance is

found by the Secretary to be likely to cause serious harm or injury to the public health, safety, or welfare, and such finding is set out in detail in such rule, regulation, or order. In the event the requirements of this section are waived, the requirements shall be satisfied within a reasonable period of time subsequent to the promulgation of such rule, regulation, or order.

(d) Effects confined to single unit of local government, geographic area within State, or State; hearing or oral presentation

(1) With respect to any rule, regulation, or order described in subsection (a) of this section, the effects of which, except for indirect effects of an inconsequential nature, are confined to—

(A) a single unit of local government or the residents thereof;

(B) a single geographic area within a State or the residents thereof; or

(C) a single State or the residents thereof;

the Secretary shall, in any case where appropriate, afford an opportunity for a hearing or the oral presentation of views, and provide procedures for the holding of such hearing or oral presentation within the boundaries of the unit of local government, geographic area, or State described in paragraphs (A) through (C) of this paragraph as the case may be.

(2) For the purposes of this subsection—

(A) the term “unit of local government” means a county, municipality, town, township, village, or other unit of general government below the State level; and

(B) the term “geographic area within a State” means a special purpose district or other region recognized for governmental purposes within such State which is not a unit of local government.

(3) Nothing in this subsection shall be construed as requiring a hearing or an oral presentation of views where none is required by this section or other provision of law.

(e) Prescription of procedures for State and local government agencies

Where authorized by any law vested, transferred, or delegated pursuant to this chapter, the Secretary may, by rule, prescribe procedures for State or local government agencies authorized by the Secretary to carry out such functions as may be permitted under applicable law. Such procedures shall apply to such agencies in lieu of this section, and shall require that prior to taking any action, such agencies shall take steps reasonably calculated to provide notice to persons who may be affected by the action, and shall afford an opportunity for presentation of views (including oral presentation of views where practicable) within a reasonable time before taking the action.

“(1) In addition to the requirements of subsection (a) of this section, notice of any proposed rule, regulation,

or order described in subsection (a) of this section shall be given by publication of such proposed rule, regulation, or order in the Federal Register. Such publication shall be accompanied by a statement of the research, analysis, and other available information in support of, the need for, and the probable effect of, any such proposed rule, regulation, or order. Other effective means of publicity shall be utilized as may be reasonably calculated to notify concerned or affected persons of the nature and probable effect of any such proposed rule, regulation, or order. In each case, a minimum of thirty days following such publication shall be provided for an opportunity to comment prior to promulgation of any such rule, regulation, or order.

“(2) Public notice of all rules, regulations, or orders described in subsection (a) of this section which are promulgated by officers of a State or local government agency pursuant to a delegation under this chapter shall be provided by publication of such proposed rules, regulations, or orders in at least two newspapers of statewide circulation. If such publication is not practicable, notice of any such rule, regulation, or order shall be given by such other means as the officer promulgating such rule, regulation, or order determines will reasonably assure wide public notice.

“(3) For the purposes of this subchapter, the exception from the requirements of section 553 of title 5 provided by subsection (a)(2) of such section with respect to public property, loans, grants, or contracts shall not be available.”

Subsec. (c). Pub. L. 105–28, § 2(a)(2), (3), redesignated subsec. (e) as (c) and substituted “subsection (b)” for “subsections (b), (c), and (d)”. Former subsec. (c) redesignated (b).

Subsecs. (e) to (g). Pub. L. 105–28, § 2(a)(2), redesignated subsecs. (e) to (g) as (c) to (e), respectively.

§ 7192. Judicial review

(a) Agency action

Judicial review of agency action taken under any law the functions of which are vested by law in, or transferred or delegated to the Secretary, the Commission or any officer, employee, or component of the Department shall, notwithstanding such vesting, transfer, or delegation, be made in the manner specified in or for such law.

(b) Review by district court of United States; removal

Notwithstanding the amount in controversy, the district courts of the United States shall have exclusive original jurisdiction of all other cases or controversies arising exclusively under this chapter, or under rules, regulations, or orders issued exclusively thereunder, other than any actions taken to implement or enforce any rule, regulation, or order by any officer of a State or local government agency under this chapter, except that nothing in this section affects the power of any court of competent jurisdiction to consider, hear, and determine in any proceeding before it any issue raised by way of defense (other than a defense based on the unconstitutionality of this chapter or the validity of action taken by any agency under this chapter). If in any such proceeding an issue by way of defense is raised based on the unconstitution-

ality of this chapter or the validity of agency action under this chapter, the case shall be subject to removal by either party to a district court of the United States in accordance with the applicable provisions of chapter 89 of title 28. Cases or controversies arising under any rule, regulation, or order of any officer of a State or local government agency may be heard in either (A) any appropriate State court, or (B) without regard to the amount in controversy, the district courts of the United States.

(c) Litigation supervision by Attorney General

Subject to the provisions of section 7171(i) of this title and notwithstanding any other law, the litigation of the Department shall be subject to the supervision of the Attorney General pursuant to chapter 31 of title 28. The Attorney General may authorize any attorney of the Department to conduct any civil litigation of the Department in any Federal court except the Supreme Court.

(Pub. L. 95-91, title V, § 502, Aug. 4, 1977, 91 Stat. 589.)

§ 7193. Remedial orders

(a) Violations of rules, regulations, or orders promulgated pursuant to Emergency Petroleum Allocation Act of 1973

If upon investigation the Secretary or his authorized representative believes that a person has violated any regulation, rule, or order described in section 7191(a) of this title promulgated pursuant to the Emergency Petroleum Allocation Act of 1973¹ [15 U.S.C. 751 et seq.], he may issue a remedial order to the person. Each remedial order shall be in writing and shall describe with particularity the nature of the violation, including a reference to the provision of such rule, regulation, or order alleged to have been violated. For purposes of this section "person" includes any individual, association, company, corporation, partnership, or other entity however organized.

(b) Notice of intent to contest; final order not subject to review

If within thirty days after the receipt of the remedial order issued by the Secretary, the person fails to notify the Secretary that he intends to contest the remedial order, the remedial order shall become effective and shall be deemed a final order of the Secretary and not subject to review by any court or agency.

(c) Notice of contestation to Commission; stay; hearing; cross examination; final order; enforcement and review

If within thirty days after the receipt of the remedial order issued by the Secretary, the person notifies the Secretary that he intends to contest a remedial order issued under subsection (a) of this section, the Secretary shall immediately advise the Commission of such notification. Upon such notice, the Commission shall stay the effect of the remedial order, unless the Commission finds the public interest requires immediate compliance with such remedial order. The Commission shall, upon request, af-

ford an opportunity for a hearing, including, at a minimum, the submission of briefs, oral or documentary evidence, and oral arguments. To the extent that the Commission in its discretion determines that such is required for a full and true disclosure of the facts, the Commission shall afford the right of cross examination. The Commission shall thereafter issue an order, based on findings of fact, affirming, modifying, or vacating the Secretary's remedial order, or directing other appropriate relief, and such order shall, for the purpose of judicial review, constitute a final agency action, except that enforcement and other judicial review of such action shall be the responsibility of the Secretary.

(d) Time limits

The Secretary may set reasonable time limits for the Commission to complete action on a proceeding referred to it pursuant to this section.

(e) Effect on procedural action taken by Secretary prior to issuance of initial remedial order

Nothing in preceding provisions of this section shall be construed to affect any procedural action taken by the Secretary prior to or incident to initial issuance of a remedial order which is the subject of the hearing provided in preceding provisions of this section, but such procedures shall be reviewable in the hearing.

(f) Savings provision

The provisions of preceding provisions of this section shall be applicable only with respect to proceedings initiated by a notice of probable violation issued after October 1, 1977.

(g) Retroactive application; marketing of petroleum products

With respect to any person whose sole petroleum industry operation relates to the marketing of petroleum products, the Secretary or any person acting on his behalf may not exercise discretion to maintain a civil action (other than an action for injunctive relief) or issue a remedial order against such person for any violation of any rule or regulation if—

(1) such civil action or order is based on a retroactive application of such rule or regulation or is based upon a retroactive interpretation of such rule or regulation; and

(2) such person relied in good faith upon rules, regulations, or ruling in effect on the date of the violation interpreting such rules or regulations.

§ 7274p. Advice to President and Congress regarding safety, security, and reliability of United States nuclear weapons stockpile

(a) Findings

Congress makes the following findings:

(1) Nuclear weapons are the most destructive weapons on earth. The United States and its allies continue to rely on nuclear weapons to deter potential adversaries from using weapons of mass destruction. The safety and reliability of the nuclear weapons stockpile are essential to ensure its credibility as a deterrent.

(2) On September 24, 1996, President Clinton signed the Comprehensive Test Ban Treaty.

(3) Effective as of September 30, 1996, the United States is prohibited by section 507 of

the Energy and Water Development Appropriations Act, 1993 (Public Law 102-377; 42 U.S.C. 2121 note)¹ from conducting underground nuclear tests “unless a foreign state conducts a nuclear test after this date, at which time the prohibition on United States nuclear testing is lifted”.

(4) Section 1436(b) of the National Defense Authorization Act, Fiscal Year 1989 (Public Law 100-456; 42 U.S.C. 2121 note)¹ requires the Secretary of Energy to “establish and support a program to assure that the United States is in a position to maintain the reliability, safety, and continued deterrent effect of its stockpile of existing nuclear weapons designs in the event that a low-threshold or comprehensive test ban on nuclear explosive testing is negotiated and ratified.”

(5) Section 3138(d) of the National Defense Authorization Act for Fiscal Year 1994¹ (Public Law 103-160; 42 U.S.C. 2121 note) required the President to submit an annual report to Congress which sets forth “any concerns with respect to the safety, security, effectiveness, or reliability of existing United States nuclear weapons raised by the Stockpile Stewardship Program of the Department of Energy”.

(6) President Clinton declared in July 1993 that “to assure that our nuclear deterrent remains unquestioned under a test ban, we will explore other means of maintaining our confidence in the safety, reliability, and the performance of our weapons”. This decision was incorporated in a Presidential Directive.

(7) Section 3138 of the National Defense Authorization Act for Fiscal Year 1994 (Public Law 103-160; 42 U.S.C. 2121 note)¹ also requires that the Secretary of Energy establish a “stewardship program to ensure the preservation of the core intellectual and technical competencies of the United States in nuclear weapons”.

(8) The plan of the Department of Energy to maintain the safety and reliability of the United States nuclear weapons stockpile is known as the Stockpile Stewardship and Management Program. The ability of the United States to maintain and certify the safety, security, effectiveness, and reliability of the nuclear weapons stockpile without testing will require utilization of new and sophisticated computational capabilities and diagnostic technologies, methods, and procedures. Current diagnostic technologies and laboratory testing techniques are insufficient to certify the safety and reliability of the United States nuclear weapons stockpile into the future. Whereas in the past laboratory and diagnostic tools were used in conjunction with nuclear testing, in the future they will provide, under the Department of Energy’s stockpile stewardship plan, the sole basis for assessing past test data and for making judgments on phenomena observed in connection with the aging of the stockpile.

(9) Section 3159 of the National Defense Authorization Act for Fiscal Year 1997 (Public Law 104-201; 42 U.S.C. 7274o) requires that the directors of the nuclear weapons laboratories

¹ See References in Text note below.

and the nuclear weapons production plants submit a report to the Assistant Secretary of Energy for Defense Programs if they identify a problem that has significant bearing on confidence in the safety or reliability of a nuclear weapon or nuclear weapon type, that the Assistant Secretary must transmit that report, along with any comments, to the congressional defense committees and to the Secretary of Energy and the Secretary of Defense, and that the Joint Nuclear Weapons Council advise Congress regarding its analysis of any such problems.

(10) On August 11, 1995, President Clinton directed “the establishment of a new annual reporting and certification requirement [to] ensure that our nuclear weapons remain safe and reliable under a comprehensive test ban”.

(11) On the same day, the President noted that the Secretary of Defense and the Secretary of Energy have the responsibility, after being “advised by the Nuclear Weapons Council, the Directors of DOE’s nuclear weapons laboratories, and the Commander of United States Strategic Command”, to provide the President with the information regarding the certification referred to in paragraph (10).

(12) The Joint Nuclear Weapons Council established by section 179 of title 10 is responsible for providing advice to the Secretary of Energy and the Secretary of Defense regarding nuclear weapons issues, including “considering safety, security, and control issues for existing weapons”. The Council plays a critical role in advising Congress in matters relating to nuclear weapons.

(13) It is essential that the President receive well-informed, objective, and honest opinions, including dissenting views, from his advisers and technical experts regarding the safety, security, effectiveness, and reliability of the nuclear weapons stockpile.

(b) Policy

(1) In general

It is the policy of the United States—

- (A) to maintain a safe, secure, effective, and reliable nuclear weapons stockpile; and
- (B) as long as other nations control or actively seek to acquire nuclear weapons, to retain a credible nuclear deterrent.

(2) Nuclear weapons stockpile

It is in the security interest of the United States to sustain the United States nuclear weapons stockpile through a program of stockpile stewardship, carried out at the nuclear weapons laboratories and nuclear weapons production plants.

(3) Sense of Congress

It is the sense of Congress that—

(A) the United States should retain a triad of strategic nuclear forces sufficient to deter any future hostile foreign leadership with access to strategic nuclear forces from acting against the vital interests of the United States;

(B) the United States should continue to maintain nuclear forces of sufficient size and capability to implement an effective and robust deterrent strategy; and

(C) the advice of the persons required to provide the President and Congress with assurances of the safety, security, effectiveness, and reliability of the nuclear weapons force should be scientifically based, without regard for politics, and of the highest quality and integrity.

(c), (d) Omitted

(e) Advice and opinions regarding nuclear weapons stockpile

In addition to a director of a nuclear weapons laboratory or a nuclear weapons production plant (under section 3159 of the National Defense Authorization Act for Fiscal Year 1997 (Public Law 104-201; 42 U.S.C. 7274o)),¹ any member of the Joint Nuclear Weapons Council or the commander of the United States Strategic Command may also submit to the President, the Secretary of Defense, the Secretary of Energy, or the congressional defense committees advice or opinion regarding the safety, security, effectiveness, and reliability of the nuclear weapons stockpile.

(f) Expression of individual views

A representative of the President may not take any action against, or otherwise constrain, a director of a nuclear weapons laboratory or a nuclear weapons production plant, a member of the Joint Nuclear Weapons Council, or the Commander of United States Strategic Command for presenting individual views to the President, the National Security Council, or Congress regarding the safety, security, effectiveness, and reliability of the nuclear weapons stockpile.

§ 7275. Definitions

As used in sections 7275 to 7276c of this title:

(1) The term “Administrator” means the Administrator of the Western Area Power Administration.

(2) The term “integrated resource planning” means a planning process for new energy resources that evaluates the full range of alternatives, including new generating capacity, power purchases, energy conservation and efficiency, cogeneration and district heating and cooling applications, and renewable energy resources, in order to provide adequate and reliable service to its electric customers at the lowest system cost. The process shall take into account necessary features for system operation, such as diversity, reliability, dispatchability, and other factors of risk; shall take into account the ability to verify energy savings achieved through energy conservation and efficiency and the projected durability of such savings measured over time; and shall treat demand and supply resources on a consistent and integrated basis.

(3) The term “least cost option” means an option for providing reliable electric services to electric customers which will, to the extent practicable, minimize life-cycle system costs, including adverse environmental effects, of providing such service. To the extent prac-

ticable, energy efficiency and renewable resources may be given priority in any least-cost option.

(4) The term “long-term firm power service contract” means any contract for the sale by Western Area Power Administration of firm capacity, with or without energy, which is to be delivered over a period of more than one year.

(5) The terms “customer” or “customers” means any entity or entities purchasing firm capacity with or without energy, from the Western Area Power Administration under a long-term firm power service contract. Such terms include parent-type entities and their distribution or user members.

(6) For any customer, the term “applicable integrated resource plan” means the integrated resource plan approved by the Administrator under sections 7275 to 7276c of this title for that customer.

(Pub. L. 98-381, title II, §201, as added Pub. L. 102-486, title I, §114, Oct. 24, 1992, 106 Stat. 2799.)

CODIFICATION

Section was enacted as part of the Hoover Power Plant Act of 1984, and not as part of the Department of Energy Organization Act which comprises this chapter.

PRIOR PROVISIONS

A prior section 7275, Pub. L. 98-381, title II, §201, Aug. 17, 1984, 98 Stat. 1340, related to energy conservation program of Western Area Power Administration, prior to the general amendment of title II of Pub. L. 98-381 by section 114 of Pub. L. 102-486.

§ 7276. Regulations to require integrated resource planning

(a) Regulations

Within 1 year after October 24, 1992, the Administrator shall, by regulation, revise the Final Amended Guidelines and Acceptance Criteria for Customer Conservation and Renewable Energy Programs published in the Federal Register on August 21, 1985 (50 F.R. 33892), or any subsequent amendments thereto, to require each customer purchasing electric energy under a long-term firm power service contract with the Western Area Power Administration to implement, within 3 years after October 24, 1992, integrated resource planning in accordance with the requirements of sections 7275 to 7276c of this title.

(b) Certain small customers

Notwithstanding subsection (a) of this section, for customers with total annual energy sales or usage of 25 Gigawatt Hours or less which are not members of a joint action agency or a generation and transmission cooperative with power supply responsibility, the Administrator may establish different regulations and apply such regulations to customers that the Administrator finds have limited economic, managerial, and resource capability to conduct integrated resource planning. The regulations under this subsection shall require such customers to consider all reasonable opportunities to meet their future energy service requirements using demand-side techniques, new renewable resources and other programs that will provide retail customers

with electricity at the lowest possible cost, and minimize, to the extent practicable, adverse environmental effects.

(Pub. L. 98-381, title II, §202, as added Pub. L. 102-486, title I, §114, Oct. 24, 1992, 106 Stat. 2800.)

CODIFICATION

Section was enacted as part of the Hoover Power Plant Act of 1984, and not as part of the Department of Energy Organization Act which comprises this chapter.

PRIOR PROVISIONS

A prior section 7276, Pub. L. 98-381, title II, §202, Aug. 17, 1984, 98 Stat. 1341, related to regulations of Western Area Power Administration, including amendment of regulations after notice and comment, evaluation of energy conservation programs, and allowance by Western for incorporation of elements of such programs, prior to the general amendment of title II of Pub. L. 98-381 by section 114 of Pub. L. 102-486.

§ 7276a. Technical assistance

The Administrator may provide technical assistance to customers to, among other things, conduct integrated resource planning, implement applicable integrated resource plans, and otherwise comply with the requirements of sections 7275 to 7276c of this title. Technical assistance may include publications, workshops, conferences, one-to-one assistance, equipment loans, technology and resource assessment studies, marketing studies, and other mechanisms to transfer information on energy efficiency and renewable energy options and programs to customers. The Administrator shall give priority to providing technical assistance to customers that have limited capability to conduct integrated resource planning.

(Pub. L. 98-381, title II, §203, as added Pub. L. 102-486, title I, §114, Oct. 24, 1992, 106 Stat. 2800.)

CODIFICATION

Section was enacted as part of the Hoover Power Plant Act of 1984, and not as part of the Department of Energy Organization Act which comprises this chapter.

§ 7276b. Integrated resource plans

(a) Review by Western Area Power Administration

Within 1 year after October 24, 1992, the Administrator shall, by regulation, revise the Final Amended Guidelines and Acceptance Criteria for Customer Conservation and Renewable Energy Programs published in the Federal Register on August 21, 1985 (50 F.R. 33892), or any subsequent amendments thereto, to require each customer to submit an integrated resource plan to the Administrator within 12 months after such regulations are amended. The regulation shall require a revision of such plan to be submitted every 5 years after the initial submission. The Administrator shall review the initial plan in accordance with a schedule established by the Administrator (which schedule will provide for the review of all initial plans within 24 months after such regulations are amended), and each revision thereof within 120 days after his receipt of the plan or revision and determine whether the customer has in the development of the plan or revision, complied with sections 7275 to 7276c of this title. Plan amendments may be

submitted to the Administrator at any time and the Administrator shall review each such amendment within 120 days after receipt thereof to determine whether the customer in amending its plan has complied with sections 7275 to 7276c of this title. If the Administrator determines that the customer, in developing its plan, revision, or amendment, has not complied with the requirements of sections 7275 to 7276c of this title, the customer shall resubmit the plan at any time thereafter. Whenever a plan or revision or amendment is resubmitted the Administrator shall review the plan or revision or amendment within 120 days after his receipt thereof to determine whether the customer has complied with sections 7275 to 7276c of this title.

(b) Criteria for approval of integrated resource plans

The Administrator shall approve an integrated resource plan submitted as required under subsection (a) of this section if, in developing the plan, the customer has:

- (1) Identified and accurately compared all practicable energy efficiency and energy supply resource options available to the customer.
- (2) Included a 2-year action plan and a 5-year action plan which describe specific actions the customer will take to implement its integrated resource plan.
- (3) Designated "least-cost options" to be utilized by the customer for the purpose of providing reliable electric service to its retail consumers and explained the reasons why such options were selected.
- (4) To the extent practicable, minimized adverse environmental effects of new resource acquisitions.
- (5) In preparation and development of the plan (and each revision or amendment of the plan) has provided for full public participation, including participation by governing boards.
- (6) Included load forecasting.
- (7) Provided methods of validating predicted performance in order to determine whether objectives in the plan are being met.
- (8) Met such other criteria as the Administrator shall require.

(c) Use of other integrated resource plans

Where a customer or group of customers are implementing integrated resource planning under a program responding to Federal, State, or other initiatives, including integrated resource planning considered and implemented pursuant to section 2621(d) of title 16, in evaluating that customer's integrated resource plan under sections 7275 to 7276c of this title, the Administrator shall accept such plan as fulfillment of the requirements of sections 7275 to 7276c of this title to the extent such plan substantially complies with the requirements of sections 7275 to 7276c of this title.

(d) Compliance with integrated resource plans

Within 1 year after October 24, 1992, the Administrator shall, by regulation, revise the Final Amended Guidelines and Acceptance Criteria for Customer Conservation and Renewable Energy Programs published in the Federal Reg-

ister on August 21, 1985 (50 F.R. 33892), or any subsequent amendments thereto, to require each customer to fully comply with the applicable integrated resource plan and submit an annual report to the Administrator (in such form and containing such information as the Administrator may require) describing the customer's progress to the goals established in such plan. After the initial review under subsection (a) of this section the Administrator shall periodically conduct reviews of a representative sample of applicable integrated resource plans and the customer's implementation of the applicable integrated resource plan to determine if the customers are in compliance with their plans. If the Administrator finds a customer out-of-compliance, the Administrator shall impose a surcharge under this section on all electric energy purchased by the customer from the Western Area Power Administration or reduce such customer's power allocation by 10 percent, unless the Administrator finds that a good faith effort has been made to comply with the approved plan.

(e) Enforcement

(1) No approved plan

If an integrated resource plan for any customer is not submitted before the date 12 months after the guidelines are amended as required under this section or if the plan is disapproved by the Administrator and a revised plan is not resubmitted by the date 9 months after the date of such disapproval, the Administrator shall impose a surcharge of 10 percent of the purchase price on all power obtained by that customer from the Western Area Power Administration after such date. The surcharge shall remain in effect until an integrated resource plan is approved for that customer. If the plan is not submitted for more than one year after the required date, the surcharge shall increase to 20 percent for the second year (or any portion thereof prior to approval of the plan) and to 30 percent thereafter until the plan is submitted or the contract for the purchase of power by such customer from the Western Area Power Administration terminates.

(2) Failure to comply with approved plan

After approval by the Administrator of an applicable integrated resource plan for any customer, the Administrator shall impose a 10 percent surcharge on all power purchased by such customer from the Western Area Power Administration whenever the Administrator determines that such customer's activities are not consistent with the applicable integrated resource plan. The surcharge shall remain in effect until the Administrator determines that the customer's activities are consistent with the applicable integrated resource plan. The surcharge shall be increased to 20 percent if the customer's activities are out of compliance for more than one year and to 30 percent after more than 2 years, except that no surcharge shall be imposed if the customer demonstrates, to the satisfaction of the Administrator, that a good faith effort has been made to comply with the approved plan.

(3) Reduction in power allocation

In the case of any customer subject to a surcharge under paragraph (1) or (2), in lieu of imposing such surcharge the Administrator may reduce such customer's power allocation from the Western Area Power Administration by 10 percent. The Administrator shall provide by regulation the terms and conditions under which a power allocation terminated under this subsection may be reinstated.

(f) Integrated resource planning cooperatives

With the approval of the Administrator, customers within any State or region may form integrated resource planning cooperatives for the purposes of complying with sections 7275 to 7276c of this title, and such customers shall be allowed an additional 6 months to submit an initial integrated resource plan to the Administrator.

(g) Customers with more than 1 contract

If more than one long-term firm power service contract exists between the Administrator and a customer, only one integrated resource plan shall be required for that customer under sections 7275 to 7276c of this title.

(h) Program review

Within 1 year after January 1, 1999, and at appropriate intervals thereafter, the Administrator shall initiate a public process to review the program established by this section. The Administrator is authorized at that time to revise the criteria set forth in subsection (b) of this section to reflect changes, if any, in technology, needs, or other developments.

(Pub. L. 98-381, title II, §204, as added Pub. L. 102-486, title I, §114, Oct. 24, 1992, 106 Stat. 2800.)

§ 7276c. Miscellaneous provisions**(a) Environmental impact statement**

The provisions of the National Environmental Policy Act of 1969 [42 U.S.C. 4321 et seq.] shall apply to actions of the Administrator implementing sections 7275 to 7276c of this title in the same manner and to the same extent as such provisions apply to other major Federal actions significantly affecting the quality of the human environment.

(b) Annual reports

The Administrator shall include in the annual report submitted by the Western Area Power Administration (1) a description of the activities undertaken by the Administrator and by customers under sections 7275 to 7276c of this title and (2) an estimate of the energy savings and renewable resource benefits achieved as a result of such activities.

(c) State regulated investor-owned utilities

Any State regulated electric utility (as defined in section 2602(18) of title 16) shall be exempt from the provisions of sections 7275 to 7276c of this title.

(d) Rural Electrification Administration requirements

Nothing in sections 7275 to 7276c of this title shall require a customer to take any action inconsistent with a requirement imposed by the Rural Electrification Administration¹

(Pub. L. 98-381, title II, §205, as added Pub. L. 102-486, title I, §114, Oct. 24, 1992, 106 Stat. 2803.)

SUBCHAPTER XIII—DEPARTMENT OF ENERGY SCIENCE EDUCATION PROGRAMS

CODIFICATION

This subchapter was enacted as part of part E (§§3161-3168) of title XXXI of div. C of the National Defense Authorization Act for Fiscal Year 1991, known as the Department of Energy Science Education Enhancement Act, and not as part of the Department of Energy Organization Act which comprises this chapter.

§ 7381. Findings and purposes

(a) Findings

The Congress finds the following:

(1) Scientific, technical, and engineering competence is essential to the Nation's future well-being.

(2) The scientific, technical, and engineering capability at the Federal laboratories is unmatched throughout the world.

(3) Superb research, development, testing, and evaluation occur in Department of Energy research and development facilities.

(4) Department of Energy research and development facilities will play an increasing role in assuring that the United States remains competitive in world markets.

(5) Improvements in mathematics, science, and engineering education are needed desperately to provide the trained and educated citizenry essential to the future competitiveness of the United States.

(6) The future health and vitality of the economy of the United States is predicated on the availability of an adequate supply of scientists, mathematicians, and engineers to provide for growing needs and to replenish the workforce.

(7) United States college and university enrollment in science, mathematics, and engineering programs is sharply declining at undergraduate, graduate, and post-graduate levels.

(8) The Federal Government is the largest United States employer of research scientists, mathematicians, and engineers, and the Department of Energy has a growing need for scientists, mathematicians, and engineers at a time when these enrollments are declining.

(9) Women and minorities are grossly underrepresented in science and mathematics fields, and this group represents more than 80 percent of the projected increase in the national workforce through the year 2000.

(b) Purposes

The purposes of this subchapter are—

(1) to encourage the development and implementation of science, mathematics, and engineering education programs at the Department of Energy and at its research and development facilities as part of a national effort to improve science, mathematics, and engineering education; and

(2) to provide more efficient coordination among science, mathematics, and engineering education programs.

SUBCHAPTER XVI—ENERGY EMPLOYEES OCCUPATIONAL ILLNESS COMPENSATION PROGRAM

CODIFICATION

This subchapter was enacted as title XXXVI of div. C of the Floyd D. Spence National Defense Authorization Act for Fiscal Year 2001, known as the Energy Employees Occupational Illness Compensation Program Act of 2000, and not as part of the Department of Energy Organization Act which comprises this chapter.

§ 7384. Findings; sense of Congress

(a) Findings

The Congress finds the following:

(1) Since World War II, Federal nuclear activities have been explicitly recognized under Federal law as activities that are ultra-hazardous. Nuclear weapons production and testing have involved unique dangers, including potential catastrophic nuclear accidents that private insurance carriers have not covered and recurring exposures to radioactive substances and beryllium that, even in small amounts, can cause medical harm.

(2) Since the inception of the nuclear weapons program and for several decades afterwards, a large number of nuclear weapons workers at sites of the Department of Energy and at sites of vendors who supplied the Cold War effort were put at risk without their knowledge and consent for reasons that, documents reveal, were driven by fears of adverse publicity, liability, and employee demands for hazardous duty pay.

(3) Many previously secret records have documented unmonitored exposures to radiation

and beryllium and continuing problems at these sites across the Nation, at which the Department of Energy and its predecessor agencies have been, since World War II, self-regulating with respect to nuclear safety and occupational safety and health. No other hazardous Federal activity has been permitted to be carried out under such sweeping powers of self-regulation.

(4) The policy of the Department of Energy has been to litigate occupational illness claims, which has deterred workers from filing workers’ compensation claims and has imposed major financial burdens for such employees who have sought compensation. Contractors of the Department have been held harmless and the employees have been denied workers’ compensation coverage for occupational disease.

(5) Over the past 20 years, more than two dozen scientific findings have emerged that indicate that certain of such employees are experiencing increased risks of dying from cancer and non-malignant diseases. Several of these studies have also established a correlation between excess diseases and exposure to radiation and beryllium.

(6) While linking exposure to occupational hazards with the development of occupational disease is sometimes difficult, scientific evidence supports the conclusion that occupational exposure to dust particles or vapor of beryllium can cause beryllium sensitivity and chronic beryllium disease. Furthermore, studies indicate that 98 percent of radiation-induced cancers within the nuclear weapons complex have occurred at dose levels below existing maximum safe thresholds.

(7) Existing information indicates that State workers’ compensation programs do not provide a uniform means of ensuring adequate compensation for the types of occupational illnesses and diseases that relate to the employees at those sites.

(8) To ensure fairness and equity, the civilian men and women who, over the past 50 years, have performed duties uniquely related to the nuclear weapons production and testing programs of the Department of Energy and its predecessor agencies should have efficient, uniform, and adequate compensation for beryllium-related health conditions and radiation-related health conditions.

(9) On April 12, 2000, the Secretary of Energy announced that the Administration intended to seek compensation for individuals with a broad range of work-related illnesses throughout the Department of Energy’s nuclear weapons complex.

(10) However, as of October 2, 2000, the Administration has failed to provide Congress with the necessary legislative and budget proposals to enact the promised compensation program.

(b) Sense of Congress

It is the sense of Congress that—

(1) a program should be established to provide compensation to covered employees;

(2) a fund for payment of such compensation should be established on the books of the Treasury;

(3) payments from that fund should be made only after—

(A) the identification of employees of the Department of Energy (including its predecessor agencies), and of contractors of the Department, who may be members of the group of covered employees;

(B) the establishment of a process to receive and administer claims for compensation for disability or death of covered employees;

(C) the submittal by the President of a legislative proposal for compensation of such employees that includes the estimated annual budget resources for that compensation; and

(D) consideration by the Congress of the legislative proposal submitted by the President; and

(4) payments from that fund should commence not later than fiscal year 2002.

"(a) UPDATE OF REPORT.—Not later than December 31, 2006, the Director of the National Institute for Occupational Safety and Health shall submit to Congress an update to the report required by section 3151(b) of the National Defense Authorization Act for Fiscal Year 2002 (Public Law 107-107; 42 U.S.C. 7384 note).

"(b) ELEMENTS.—The update shall—

"(1) for each facility for which such report found that insufficient information was available to determine whether significant residual contamination was present, determine whether significant residual contamination was present;

"(2) for each facility for which such report found that significant residual contamination remained present as of the date of the report, determine the date on which such contamination ceased to be present;

"(3) for each facility for which such report found that significant residual contamination was present but for which the Director has been unable to determine the extent to which such contamination is attributable to atomic weapons-related activities, identify the specific dates of coverage attributable to such activities and, in so identifying, presume that such contamination is attributable to such activities until there is evidence of decontamination of residual contamination identified with atomic weapons-related activities;

"(4) for each facility for which such report found significant residual contamination, determine whether it is at least as likely as not that such contamination could have caused an employee who was employed at such facility only during the residual contamination period to contract a cancer or beryllium illness compensable under subtitle B of the Energy Employees Occupational Illness Compensation Program Act of 2000 [42 U.S.C. 7384 et seq.]; and

"(5) if new information that pertains to the report has been made available to the Director since that report was submitted, identify and describe such information.

"(c) PUBLICATION.—The Director shall ensure that the report referred to in subsection (a) is published in the Federal Register not later than 15 days after being released."

STUDY OF RESIDUAL CONTAMINATION OF FACILITIES

"(2)(A) The National Institute for Occupational Safety and Health shall submit to the applicable congressional committees the following reports:

"(i) Not later than 180 days after the date of the enactment of this Act [Dec. 28, 2001], a report on the progress made as of the date of the report on the study required by paragraph (1).

"(B) In this paragraph, the term 'applicable congressional committees' means—

"(i) the Committee on Armed Services, Committee on Appropriations, Committee on the Judiciary, and Committee on Health, Education, Labor, and Pensions of the Senate; and

"(ii) the Committee on Armed Services, Committee on Appropriations, Committee on the Judiciary, and Committee on Education and the Workforce of the House of Representatives.

"(3) Amounts for the study under paragraph (1) shall be derived from amounts authorized to be appropriated by section 3614(a) of the Energy Employees Occupational Illness Compensation Program Act of 2000 (114 Stat. 1654A-498) [42 U.S.C. 7384g(a)].

"(4) In this subsection:

"(A) The terms 'atomic weapons employer facility', 'beryllium vendor', 'covered employee with cancer', and 'covered beryllium illness' have the meanings given those terms in section 3621 of the Energy Employees Occupational Illness Compensation Program Act of 2000 (114 Stat. 1654A-498; 42 U.S.C. 7384).

"(B) The term 'contamination' means the presence of any—

"(i) material that emitted radiation and was used in the production of an atomic weapon, excluding uranium mining and milling; or

"(ii) beryllium dust, particles, or vapor, exposure to which could cause or substantially contribute to the cancer of a covered employee with cancer or a covered beryllium illness, as the case may be."

EX. ORD. NO. 13179. PROVIDING COMPENSATION TO AMERICA'S NUCLEAR WEAPONS WORKERS

Ex. Ord. No. 13179, Dec. 7, 2000, 65 F.R. 77487, provided: By the authority vested in me as President by the Constitution and the laws of the United States of America, including Public Law 106-398, the Energy Employees Occupational Illness Compensation Program Act of 2000 [42 U.S.C. 7384 et seq.] (Public Law 106-398, the "Act"), and to allocate the responsibilities imposed by that legislation and to provide for further legislative efforts, it is hereby ordered as follows:

SECTION 1. *Policy.* Since World War II, hundreds of thousands of men and women have served their Nation in building its nuclear defense. In the course of their work, they overcame previously unimagined scientific

and technical challenges. Thousands of these courageous Americans, however, paid a high price for their service, developing disabling or fatal illnesses as a result of exposure to beryllium, ionizing radiation, and other hazards unique to nuclear weapons production and testing. Too often, these workers were neither adequately protected from, nor informed of, the occupational hazards to which they were exposed.

Existing workers' compensation programs have failed to provide for the needs of these workers and their families. Federal workers' compensation programs have generally not included these workers. Further, because of long latency periods, the uniqueness of the hazards to which they were exposed, and inadequate exposure data, many of these individuals have been unable to obtain State workers' compensation benefits. This problem has been exacerbated by the past policy of the Department of Energy (DOE) and its predecessors of encouraging and assisting DOE contractors in opposing the claims of workers who sought those benefits. This policy has recently been reversed.

While the Nation can never fully repay these workers or their families, they deserve recognition and compensation for their sacrifices. Since the Administration's historic announcement in July of 1999 that it intended to compensate DOE nuclear weapons workers who suffered occupational illnesses as a result of exposure to the unique hazards in building the Nation's nuclear defense, it has been the policy of this Administration to support fair and timely compensation for these workers and their survivors. The Federal Government should provide necessary information and otherwise help employees of the DOE or its contractors determine if their illnesses are associated with conditions of their nuclear weapons-related work; it should provide workers and their survivors with all pertinent and available information necessary for evaluating and processing claims; and it should ensure that this program minimizes the administrative burden on workers and their survivors, and respects their dignity and privacy. This order sets out agency responsibilities to accomplish these goals, building on the Administration's articulated principles and the framework set forth in the Energy Employees Occupational Illness Compensation Program Act of 2000 [42 U.S.C. 7384 et seq.]. The Departments of Labor, Health and Human Services, and Energy shall be responsible for developing and implementing actions under the Act to compensate these workers and their families in a manner that is compassionate, fair, and timely. Other Federal agencies, as appropriate, shall assist in this effort.

SEC. 2. Designation of Responsibilities for Administering the Energy Employees' Occupational Illness Compensation Program ("Program").

(a) *Secretary of Labor.* The Secretary of Labor shall have primary responsibility for administering the Program. Specifically, the Secretary shall:

(i) Administer and decide all questions arising under the Act not assigned to other agencies by the Act or by this order, including determining the eligibility of individuals with covered occupational illnesses and their survivors and adjudicating claims for compensation and benefits;

(ii) No later than May 31, 2001, promulgate regulations for the administration of the Program, except for functions assigned to other agencies pursuant to the Act or this order;

(iii) No later than July 31, 2001, ensure the availability, in paper and electronic format, of forms necessary for making claims under the Program; and

(iv) Develop informational materials, in coordination with the Secretary of Energy and the Secretary of Health and Human Services, to help potential claimants understand the Program and the application process, and provide these materials to individuals upon request and to the Secretary of Energy and the Attorney General for dissemination to potentially eligible individuals.

(b) *Secretary of Health and Human Services.* The Secretary of Health and Human Services shall:

(i) No later than May 31, 2001, promulgate regulations establishing:

(A) guidelines, pursuant to section 3623(c) of the Act [42 U.S.C. 7384n(c)], to assess the likelihood that an individual with cancer sustained the cancer in the performance of duty at a Department of Energy facility or an atomic weapons employer facility, as defined by the Act; and

(B) methods, pursuant to section 3623(d) of the Act, for arriving at and providing reasonable estimates of the radiation doses received by individuals applying for assistance under this program for whom there are inadequate records of radiation exposure;

(ii) In accordance with procedures developed by the Secretary of Health and Human Services, consider and issue determinations on petitions by classes of employees to be treated as members of the Special Exposure Cohort;

(iii) With the assistance of the Secretary of Energy, apply the methods promulgated under subsection (b)(i)(B) to estimate the radiation doses received by individuals applying for assistance;

(iv) Upon request from the Secretary of Energy, appoint members for a physician panel or panels to consider individual workers' compensation claims as part of the Worker Assistance Program under the process established pursuant to subsection (c)(v); and

(v) Provide the Advisory Board established under section 4 of this order with administrative services, funds, facilities, staff, and other necessary support services and perform the administrative functions of the President under the Federal Advisory Committee Act, as amended (5 U.S.C. App.), with respect to the Advisory Board.

(c) *Secretary of Energy.* The Secretary of Energy shall:

(i) Provide the Secretary of Health and Human Services and the Advisory Board on Radiation and Worker Health access, in accordance with law, to all relevant information pertaining to worker exposures, including access to restricted data, and any other technical assistance needed to carry out their responsibilities under subsection (b)(ii) and section 4(b), respectively.

(ii) Upon request from the Secretary of Health and Human Services or the Secretary of Labor, and as permitted by law, require a DOE contractor, subcontractor, or designated beryllium vendor, pursuant to section 3631(c) of the Act [42 U.S.C. 7384v(c)], to provide information relevant to a claim under this Program;

(iii) Identify and notify potentially eligible individuals of the availability of compensation under the Program;

(iv) Designate, pursuant to sections 3621(4)(B) and 3622 of the Act [42 U.S.C. 7384l(4)(B), 7384m], atomic weapons employers and additions to the list of designated beryllium vendors;

(v) Pursuant to Subtitle D of the Act [42 U.S.C. 7385o], negotiate agreements with the chief executive officer of each State in which there is a DOE facility, and other States as appropriate, to provide assistance to a DOE contractor employee on filing a State workers' compensation system claim, and establish a Worker Assistance Program to help individuals whose illness is related to employment in the DOE's nuclear weapons complex, or the individual's survivor if the individual is deceased, in applying for State workers' compensation benefits. This assistance shall include:

(1) Submittal of reasonable claims to a physician panel, appointed by the Secretary of Health and Human Services and administered by the Secretary of Energy, under procedures established by the Secretary of Energy, for determination of whether the individual's illness or death arose out of and in the course of employment by the DOE or its contractors and exposure to a toxic substance at a DOE facility; and

(2) For cases determined by the physician panel and the Secretary of Energy under section 3661(d) and (e) of the Act [42 U.S.C. 7385o(d), (e)] to have arisen out of and in the course of employment by the DOE or its contractors and exposure to a toxic substance at a DOE facility, provide assistance to the individual in filing for

workers' compensation benefits. The Secretary shall not contest these claims and, to the extent permitted by law, shall direct a DOE contractor who employed the applicant not to contest the claim;

(vi) Report on the Worker Assistance Program by making publicly available on at least an annual basis claims-related data, including the number of claims filed, the number of illnesses found to be related to work at a DOE facility, job location and description, and number of successful State workers' compensation claims awarded; and

TERMINATION OF ADVISORY BOARDS

Advisory boards established after Jan. 5, 1973, to terminate not later than the expiration of the 2-year period beginning on the date of their establishment, unless, in the case of a board established by the President or an officer of the Federal Government, such board is renewed by appropriate action prior to the expiration of such 2-year period, or in the case of a board estab-

lished by Congress, its duration is otherwise provided by law. See sections 3(2) and 14 of Pub. L. 92-463, Oct. 6, 1972, 86 Stat. 770, 776, set out in the Appendix to Title 5, Government Organization and Employees.

§ 7384q. Designation of additional members of special exposure cohort

(a) Advice on additional members

(1) The Advisory Board on Radiation and Worker Health under section 7384o of this title shall advise the President whether there is a class of employees at any Department of Energy facility who likely were exposed to radiation at that facility but for whom it is not feasible to estimate with sufficient accuracy the radiation dose they received.

(2) The advice of the Advisory Board on Radiation and Worker Health under paragraph (1) shall be based on exposure assessments by radiation health professionals, information provided by the Department of Energy, and such other information as the Advisory Board considers appropriate.

(3) The President shall request advice under paragraph (1) after consideration of petitions by classes of employees described in that paragraph for such advice. The President shall consider such petitions pursuant to procedures established by the President.

(b) Designation of additional members

Subject to the provisions of section 7384l(14)(C) of this title, the members of a class of employees at a Department of Energy facility, or at an atomic weapons employer facility, may be treated as members of the Special Exposure Cohort for purposes of the compensation program if the President, upon recommendation of the Advisory Board on Radiation and Worker Health, determines that—

(1) it is not feasible to estimate with sufficient accuracy the radiation dose that the class received; and

(2) there is a reasonable likelihood that such radiation dose may have endangered the health of members of the class.

(c) Deadlines

(1) Not later than 180 days after the date on which the President receives a petition for designation as members of the Special Exposure Cohort, the Director of the National Institute for Occupational Safety and Health shall submit to the Advisory Board on Radiation and Worker Health a recommendation on that petition, including all supporting documentation.

(2)(A) Upon receipt by the President of a recommendation of the Advisory Board on Radiation and Worker Health that the President should determine in the affirmative that paragraphs (1) and (2) of subsection (b) of this section

apply to a class, the President shall have a period of 30 days in which to determine whether such paragraphs apply to the class and to submit that determination (whether affirmative or negative) to Congress.

(B) If the determination submitted by the President under subparagraph (A) is in the affirmative, the President shall also submit a report meeting the requirements of section 7384l(14)(C)(ii) of this title.

(C) If the President does not submit a determination required by subparagraph (A) within the period required by subparagraph (A), then upon the day following the expiration of that period, it shall be deemed for purposes of section 7384l(14)(C)(ii) of this title that the President submitted the report under that provision on that day.

The Secretary of Energy shall provide, in accordance with law, the Secretary of Health and Human Services and the members and staff of the Advisory Board on Radiation and Worker Health access to relevant information on worker exposures, including access to Restricted Data (as defined in section 2014(y) of this title).¹

§ 7384r. Separate treatment of chronic silicosis

(a) Sense of Congress

Congress finds that employees who worked in Department of Energy test sites and later contracted chronic silicosis should also be considered for inclusion in the compensation program. Recognizing that chronic silicosis resulting from exposure to silica is not a condition unique to the nuclear weapons industry, it is not the intent of Congress with this subchapter to establish a precedent on the question of chronic silicosis as a compensable occupational disease. Consequently, it is the sense of Congress that a further determination by the President is appropriate before these workers are included in the compensation program.

(b) Certification by President

A covered employee with chronic silicosis shall be treated as a covered employee (as defined in section 7384l(1) of this title) for the purposes of the compensation program required by section 7384d of this title unless the President submits to Congress not later than 180 days after October 30, 2000, the certification of the President that there is insufficient basis to include such employees. The President shall submit with the certification any recommendations

¹So in original. A closing parenthesis should probably follow “title”.

about the compensation program with respect to covered employees with chronic silicosis as the President considers appropriate.

(c) Exposure to silica in the performance of duty

A covered employee shall, in the absence of substantial evidence to the contrary, be determined to have been exposed to silica in the performance of duty for the purposes of the compensation program if, and only if, the employee was present for a number of work days aggregating at least 250 work days during the mining of tunnels at a Department of Energy facility located in Nevada or Alaska for tests or experiments related to an atomic weapon.

(d) Covered employee with chronic silicosis

For purposes of this subchapter, the term “covered employee with chronic silicosis” means a Department of Energy employee, or a Department of Energy contractor employee, with chronic silicosis who was exposed to silica in the performance of duty as determined under subsection (c) of this section.

(e) Chronic silicosis

For purposes of this subchapter, the term “chronic silicosis” means a nonmalignant lung disease if—

(1) the initial occupational exposure to silica dust preceded the onset of silicosis by at least 10 years; and

(2) a written diagnosis of silicosis is made by a medical doctor and is accompanied by—

(A) a chest radiograph, interpreted by an individual certified by the National Institute for Occupational Safety and Health as a B reader, classifying the existence of pneumoconioses of category 1/0 or higher;

(B) results from a computer assisted tomograph or other imaging technique that are consistent with silicosis; or

(C) lung biopsy findings consistent with silicosis.

(Pub. L. 106-398, §1 [div. C, title XXXVI, §3627], Oct. 30, 2000, 114 Stat. 1654, 1654A-505; Pub. L. 107-107, div. C, title XXXI, §3151(a)(3), Dec. 28, 2001, 115 Stat. 1372.)

AMENDMENTS

2001—Subsec. (e)(2)(A). Pub. L. 107-107 substituted “category 1/0” for “category 1/1”.

(2) If a covered employee eligible for payment dies before filing a claim under this subchapter,
