LOVE CANAL PROPERTY ACQUISITION; CONGRESSIONAL FINDINGS

Section 213(a) of Pub. L. 99-499 provided that:

“(1) The area known as Love Canal located in the city of Niagara Falls and the town of Wheatfield, New York, was the first toxic waste site to receive national attention. As a result of that attention Congress investigated the problems associated with toxic waste sites and enacted CERCLA [Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (42 U.S.C. 9601 et seq.)] to deal with these problems.

“(2) Because Love Canal came to the Nation’s attention prior to the passage of CERCLA and because the fund under CERCLA was not available to compensate for all of the hardships endured by the citizens in the area, Congress has determined that special provisions are required. These provisions do not affect the lawfulness, implementation, or selection of any other response actions at Love Canal or at any other facilities.”

§ 9701. Congressional findings and declaration of policy

(a) The Congress finds that—

(1) nuclear energy is one of the two major energy sources available for electric energy production in the United States during the balance of the twentieth century;

(2) continued development of nuclear power is dependent upon maintaining an extremely high level of safety in the operation of nuclear plants, and on public recognition that these facilities do not constitute a significant threat to human health or safety;

(3) it is the responsibility of utilities, as owners and operators of nuclear powerplants, to assure that such plants are designed and operated safely and reliably; and

(4) a proper role of the Federal Government in assuring nuclear powerplant safety, in addition to its regulatory function, is the conduct of a research, development, and demonstration program to provide important scientific and technical information which can contribute to sound design and safe operation of these plants.

(b) It is declared to be the policy of the United States and the purpose of this chapter to establish a research, development, and demonstration program for developing practical improvements in the generic safety of nuclear powerplants during the next five years, beginning in the fiscal year 1981. The objectives of such program shall be—

(1) to reduce the likelihood and severity of potentially serious nuclear powerplant accidents; and

(2) to reduce the likelihood of disrupting the population in the vicinity of nuclear powerplants as the result of nuclear powerplant accidents.

Nothing in this chapter shall be construed as preventing the Secretary from undertaking
