§ 8262g. Procurement and identification of energy efficient products

(a) Procurement

The Administrator of General Services, the Secretary of Defense, and the Director of the Defense Logistics Agency, each shall undertake a program to include energy efficient products in carrying out their procurement and supply functions.

(b) Identification program

The Administrator of General Services, the Secretary of Defense, and the Director of the Defense Logistics Agency, in consultation with the Secretary of Energy, shall implement, in conjunction with carrying out their procurement and supply functions, a program to identify and designate those energy efficient products that offer significant potential savings, using, to the extent practicable, the life cycle cost methods and procedures developed under section 8254 of this title. The Secretary of Energy shall, to the extent necessary to carry out this section and after consultation with the aforementioned agency heads, provide estimates of the degree of relative energy efficiency of products.

(c) Guidelines

The Administrator for Federal Procurement Policy, in consultation with the Administrator of General Services, the Secretary of Energy, the Secretary of Defense, and the Director of the Defense Logistics Agency, shall issue guidelines to encourage the acquisition and use by all Federal agencies of products identified pursuant to this section. The Secretary of Defense and the Director of the Defense Logistics Agency shall consider, and place emphasis on, the acquisition of such products as part of the Agency’s ongoing review of military specifications.

(d) Report to Congress

Not later than December 31 of 1993 and thereafter as part of the report required under section 8258(b) of this title, the Secretary of Energy, in consultation with the Administrator for Federal Procurement Policy, the Administrator of General Services, the Secretary of Defense, and the Director of the Defense Logistics Agency, shall report on the progress, status, activities, and results of the programs under subsections (a), (b), and (c) of this section. The report shall include—

1. the types and functions of each product identified under subsection (b) of this section, and efforts undertaken by the Administrator of General Services, the Secretary of Defense, and the Director of the Defense Logistics Agency to encourage the acquisition and use of such products;

2. the actions taken by the Administrator of General Services, the Secretary of Defense, and the Director of the Defense Logistics Agency to identify products under subsection (b) of this section, the barriers which inhibit implementation of identification of such products, and recommendations for legislative action, if necessary;

3. progress on the development and issuance of guidelines under subsection (c) of this section;

4. an indication of whether energy cost savings technologies identified by the Advanced Building Technology Council, under section 1701-2(h) of title 12, have been used in the identification of products under subsection (b) of this section;
§ 8262i. United States Postal Service energy management report

Not later than one year after October 24, 1992, and not later than January 1 of each year thereafter, the Postmaster General shall submit a report to the Committee on Governmental Affairs and the Committee on Energy and Commerce and the Committee on Post Office and Civil Service of the House of Representatives on the United States Postal Service’s building management program as it relates to energy efficiency. The report shall include, but not be limited to—

(1) a description of actions taken to reduce energy consumption;
(2) future plans to reduce energy consumption;
(3) an assessment of the success of the energy conservation program;
(4) a statement of energy costs incurred in operating and maintaining all United States Postal Service facilities; and
(5) the status of the energy efficient procurement program established under section 8262h of this title.

Codification

Section was enacted as part of the Energy Policy Act of 1992, and not as part of the National Energy Conservation Policy Act which comprises this chapter.

§ 8262h. United States Postal Service energy regulations

(a) In general

The Postmaster General shall issue regulations to ensure the reliable and accurate accounting of energy consumption costs for all buildings or facilities which it owns, leases, operates, or manages. Such regulations shall—

(1) establish a monitoring system to determine which facilities are the most costly to operate on an energy consumption per square foot basis or other relevant analytical basis;
(2) identify unusual or abnormal changes in energy consumption; and
(3) check the accuracy of utility charges for electricity and gas consumption.

(b) Identification of energy efficiency products

The Postmaster General shall actively undertake a program to identify and procure energy efficiency products for use in its facilities. In carrying out this subsection, the Postmaster General shall—

(1) establish a monitoring system to determine which facilities are the most costly to operate on an energy consumption per square foot basis or other relevant analytical basis;
(2) identify unusual or abnormal changes in energy consumption; and
(3) check the accuracy of utility charges for electricity and gas consumption.

The Postmaster General shall actively undertake a program to identify and procure energy efficiency products for use in its facilities. In carrying out this subsection, the Postmaster General shall—

(1) establish a monitoring system to determine which facilities are the most costly to operate on an energy consumption per square foot basis or other relevant analytical basis;
(2) identify unusual or abnormal changes in energy consumption; and
(3) check the accuracy of utility charges for electricity and gas consumption.

The Postmaster General shall actively undertake a program to identify and procure energy efficiency products for use in its facilities. In carrying out this subsection, the Postmaster General shall—

(1) establish a monitoring system to determine which facilities are the most costly to operate on an energy consumption per square foot basis or other relevant analytical basis;
(2) identify unusual or abnormal changes in energy consumption; and
(3) check the accuracy of utility charges for electricity and gas consumption.

The Postmaster General shall actively undertake a program to identify and procure energy efficiency products for use in its facilities. In carrying out this subsection, the Postmaster General shall—

(1) establish a monitoring system to determine which facilities are the most costly to operate on an energy consumption per square foot basis or other relevant analytical basis;
(2) identify unusual or abnormal changes in energy consumption; and
(3) check the accuracy of utility charges for electricity and gas consumption.

The Postmaster General shall actively undertake a program to identify and procure energy efficiency products for use in its facilities. In carrying out this subsection, the Postmaster General shall—

(1) establish a monitoring system to determine which facilities are the most costly to operate on an energy consumption per square foot basis or other relevant analytical basis;
(2) identify unusual or abnormal changes in energy consumption; and
(3) check the accuracy of utility charges for electricity and gas consumption.
