(5) an estimate of the potential cost savings to the Federal Government from acquiring products identified under subsection (b) of this section with respect to which energy is a significant component of life cycle cost, based on the quantities of such products that could be utilized throughout the Government; and
(6) the actual quantities acquired of products described in paragraph (5).

(Sec. 164 of Pub. L. 102–486 directed Postmaster General to conduct an energy survey, as defined in 42 U.S.C. 8259(5), for purposes of determining maximum potential cost effective energy savings that may be achieved in a representative sample of buildings owned or leased by United States Postal Service in different areas of the country, making recommendations for cost effective energy efficiency and renewable energy improvements in those buildings and in other similar United States Postal Service buildings, and identifying barriers which may prevent the United States Postal Service from complying with energy management goals, and further directed Postmaster General to transmit to Congress within 180 days after Oct. 24, 1992, a plan for implementing this survey, and to report to Congress on the findings and conclusions of such survey as soon as practicable after its completion.

§ 8262i. United States Postal Service energy management report

Not later than one year after October 24, 1992, and not later than January 1 of each year thereafter, the Postmaster General shall submit a report to the Committee on Governmental Affairs and the Committee on Energy and Natural Resources of the Senate and the Committee on Energy and Commerce and the Committee on Post Office and Civil Service of the House of Representatives on the United States Postal Service’s building management program as it relates to energy efficiency. The report shall include, but not be limited to—
(1) a description of actions taken to reduce energy consumption;
(2) future plans to reduce energy consumption;
(3) an assessment of the success of the energy conservation program;
(4) a statement of energy costs incurred in operating and maintaining all United States Postal Service facilities; and
(5) the status of the energy efficient procurement program established under section 8262h of this title.

(Sec. 165 of Pub. L. 102–486 directed Postmaster General to submit a report to Congress on the findings and conclusions of such survey as soon as practicable after its completion.

§ 8262j. United States Postal Service energy management regulations

(a) In general

The Postmaster General shall issue regulations to ensure the reliable and accurate accounting of energy consumption costs for all buildings or facilities which it owns, leases, operates, or manages. Such regulations shall—
(1) establish a monitoring system to determine which facilities are the most costly to operate on an energy consumption per square foot basis or other relevant analytical basis;
(2) identify unusual or abnormal changes in energy consumption; and
(3) check the accuracy of utility charges for electricity and gas consumption.

(b) Identification of energy efficiency products

The Postmaster General shall actively undertake a program to identify and procure energy efficiency products for use in its facilities. In carrying out this subsection, the Postmaster General shall, to the maximum extent practicable, incorporate energy efficient information available on Federal Supply Schedules maintained by the General Services Administration and the Defense Logistics Agency.

(Sec. 153 of Pub. L. 102–486 directed Postmaster General to conduct an energy survey, as defined in 42 U.S.C. 8259(5), for purposes of determining maximum potential cost effective energy savings that may be achieved in a representative sample of buildings owned or leased by United States Postal Service in different areas of the country, making recommendations for cost effective energy efficiency and renewable energy improvements in those buildings and in other similar United States Postal Service buildings, and identifying barriers which may prevent the United States Postal Service from complying with energy management goals, and further directed Postmaster General to transmit to Congress within 180 days after Oct. 24, 1992, a plan for implementing this survey, and to report to Congress on the findings and conclusions of such survey as soon as practicable after its completion.

CODIFICATION

Section was enacted as part of the Energy Policy Act of 1992 and not as part of the National Energy Conservation Policy Act which comprises this chapter.
