(e) Acquisition, management, and disposal of real property

(1) The Foundation may only use Federal funds for the acquisition of interests in real property if—

(A) the interest is a long-term property interest, and

(4) All real property acquired by the Foundation in whole or in part with Federal funds and held by it shall be administered for the conservation and management of fish and wildlife in a manner that will provide for appropriate public access and use.

(5) Reconveyance of real property.—The Foundation shall convey at not less than fair market value any real property acquired by the Foundation in whole or in part with Federal funds if the Foundation notifies the Federal agency that administers the Federal program under which the funds were provided, and the agency does not disagree within 60 calendar days after the date of the notification, that—

It is the intent of Congress that in making expenditures from the endowment fund under paragraph (1) to carry out activities specified in that paragraph, the Foundation should give priority to funding projects that address the conservation of populations of whales that the Foundation determines—

(A) are the most endangered (including the northern right whale (Eubalaena glacialis)); or

(B) most warrant, and are most likely to benefit from, research management, or educational activities that may be funded with amounts made available from the fund.

Congressional Findings—National Whale Conservation

(1) the populations of whales that occur in waters of the United States are resources of substantial ecological, scientific, socioeconomic, and esthetic value;

(2) whale populations—

(A) form a significant component of marine ecosystems;

(B) are the subject of intense research;

(C) provide for a multimillion dollar whale watching tourist industry that provides the public an opportunity to enjoy and learn about great whales and the ecosystems of which the whales are a part; and

(D) are of importance to Native Americans for cultural and subsistence purposes;

(3) whale populations are in various stages of recovery, and some whale populations, such as the northern right whale (Eubalaena glacialis) remain perilously close to extinction;

(4) the interactions that occur between ship traffic, commercial fishing, whale watching vessels, and other recreational vessels and whale populations may affect whale populations adversely;

(5) the exploration and development of oil, gas, and hard mineral resources, marine debris, chemical pollutants, noise, and other anthropogenic sources of change in the habitat of whales may affect whale populations adversely;

(6) the conservation of whale populations is subject to difficult challenges related to—

(A) the migration of whale populations across international boundaries;

(B) the size of individual whales, as that size precludes certain conservation research procedures that may be used for other animal species, such as captive research and breeding;

(C) the low reproductive rates of whales that require long-term conservation programs to ensure recovery of whale populations; and

(D) the occurrence of whale populations in offshore waters where undertaking research, monitoring, and conservation measures is difficult and costly;

(7)(A) the Secretary of Commerce, through the Administrator of the National Oceanic and Atmospheric Administration;
Administration, has research and regulatory responsibility for the conservation of whales under the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361 et seq.), and

"(8) the funding available for the activities described in paragraph (6) (7) is insufficient to support all necessary whale conservation and recovery activities; and

"(9) there is a need to facilitate the use of funds from non-Federal sources to carry out the conservation of whales."

**§ 3704. Administrative services and support**

**(a) Provision of services**

(b) Additional authorization

(1) In general

In addition to the amounts authorized to be appropriated under subsection (a) of this sec-

findings. The Congress finds the following:

(1) Three-fourths of all American children and adults participate in wildlife-related recreational activities other than hunting, fishing and trapping.

(2) In 1985, Americans spent over $14 billion on non-consumptive wildlife-related recreation.

(3) The United States and Canada are inhabited by approximately two thousand six hundred vertebrate species of native fish and wildlife, which have provided food, clothing, and other essentials to a rapidly expanding human population.

(4) Over 90 percent of vertebrate fish and wildlife species in North America are not harvested for human use.

(5) The continued well-being of this once-abundant fish and wildlife resource, and even the very existence of many species, is in peril.

(6) In 1967, the United States Fish and Wildlife Service reported that forty-five common migratory bird species, which are not hunted, had exhibited significant declines in abundance, and that thirteen of these species have experienced widespread, systematic declines of 46.9 percent during a twenty-year study period.

(7) There have been nationwide declines in frogs and other amphibians.

(8) Over two hundred and seventy-five of vertebrate fish and wildlife species in the United States are now officially classified as threatened or endangered by the Federal Government.

(9) During the past decade, fish and wildlife species, including invertebrates, were added to the rapidly growing list of threatened and endangered species in North America at the average rate of over one per month.

(10) Currently, eighty-two species of invertebrates in the United States are listed as threatened or endangered under the Endangered Species Act [16 U.S.C. 1531 et seq.], and another nine hundred and fifty-one United States invertebrate species are candidates for listing under that Act.

(11) Proper management of fish and wildlife, before species become threatened or endangered with extinction, is the key to reversing the increasingly desperate status of fish and wildlife.

(12) Proper fish and wildlife conservation includes not only management of fish and wildlife species taken for recreation and protection of endangered and threatened species, but also management of the vast majority of species which fall into neither category.

(13) Partnerships in fish and wildlife conservation, such as the Federal Aid in Wildlife Restoration Program, the Federal Aid in Sport Fish Restoration Program, and the North American Wetlands Conservation Act [16 U.S.C. 4401 et seq.] have benefitted greatly the conservation of fish and wildlife and their habitats.

(14) A program that encourages partnerships among Federal and State governments and private entities to carry out wildlife conservation and appreciation projects would benefit all species of fish and wildlife through such activities as management, research, and interagency coordination.

(15) Many States, which are experiencing declining revenues, are finding it increasingly difficult to carry out projects to conserve the entire array of diverse fish and wildlife species and to provide opportunities for the public to associate with, enjoy, and appreciate fish and wildlife through nonconsumptive activities.
