§ 262j. Use of renewable resources for energy production

(a) Promotion, etc., by United States in connection with international financial institutions

The United States Government, in connection with its voice and vote in the Inter-American Development Bank, the African Development Fund, and the Asian Development Bank, shall encourage such institutions—

(1) to promote the decentralized production of renewable energy;
(2) to identify renewable resources to produce energy in rural development projects and determine the feasibility of substituting them for systems using fossil fuel;
(3) to train personnel in developing technologies for getting energy from renewable resources;
(4) to support research into the use of renewable resources, including hydropower, biomass, solar photovoltaic, and solar thermal;
(5) to support an information network to make available to policymakers the full range of energy choices;
(6) to broaden their energy planning, analyses, and assessments to include consideration of the supply of, demand for, and possible uses of renewable resources; and
(7) to coordinate with the Agency for International Development and other aid organizations in supporting effective rural energy programs.

(b) “Renewable resource” defined

For purposes of this section, the term “renewable resource” means any energy resource which—

(1) meets the needs of rural communities;
(2) saves capital without wasting labor;
(3) is modest in scale and simple to install and maintain and which can be managed by local individuals;
(4) is acceptable and affordable; and
(5) does not damage the environment.

Congressional Statement of Findings Respecting Use of Renewable Resources for Energy Production in Poor and Developing Countries and Role of International Financial Institutions

Section 601 of Pub. L. 96–259 provided that: “The Congress finds that—

‘‘(1) without an adequate supply of energy at affordable prices the world’s poor will continue to be deprived of jobs, food, water, shelter, and clothing, and poor countries will continue to be economically and politically unstable;

‘‘(2) dependence on increasingly expensive fossil fuel resources consumes too much of the capital...
